                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Construction713,000Construction5Other-Total10                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Other - Total 10                                                                                                                                                                                                                                                                                                                                                                 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |    

       #### **Middle Creek Drive Rehabilitation**

Responsible	Department:		Engineering				CIP No.	M17
Financial Pla	an: Prior			Projected				
	Years	23	24	25	26	27	Future	Total
	864,000	2,931,000	-	-	-	-	-	3,795,000

#### Description :

Middle Creek Drive has subgrade failures causing the pavement, curb, and sidewalks to heave allowing water to penetrate the subgrade and has jeopardized the structural integrity of the pavement, curbs, and sidewalks. The deterioration of Middle Creek is believed to be from infiltration of ground water and irrigation systems. The Pavement Management Plan has identified PCI scores ranging from 7 to 83 on Middle Creek. The Plan recommends a combination of crack sealing, resconstruction for portions, and a thin mill and overlay for portions. Full-depth rehabilitation may be a preferred option and the costs with this option are reflected in the costs.

#### Drainage Capital Improvement Program FY 2023 - 2027

Drainage projects are based on the 2014 Drainage Master Plan. The City of Buda projects are designed to keep flood waters out of structures and to ensure compliance with the City's Municipal Separate Storm Sewer System (MS4) permit from TCEQ.

#### City of Buda, Texas Capital Improvement Program - Drainage

#### Garlic Creek Tributary Under RM 967 **Responsible Department:** Engineering CIP No. D03 Financial Plan : Prior Projected Years 23 24 27 Future Total 25 26 50,000 270,000 320,000 **Description :** FM 967 is a crucial roadway connecting west Buda with downtown and IH 35. The roadway has flooded dure to undersized culverts. Install two new 9'x4' reinforced concrete boxes (RCBs) in addition to the existing 8.5'x3.5' RCBs. Grade channel both upstream and downstream of the crossing. Install rock riprap protection on sides of crossing. The project will also improve drainage out of the Coves of Cimarron (County) as the Coves of Cimarron drainage pond drains through the culvert to the tributary. Coordination with TxDOT will be required. A hydrologic and hydraulic study will be necessary to evaluate the downstream impact of any proposed improvements. CULIND Estimated Project Cost: Project Task: Duration Design/Engineering 50,000 Planning/Design 6 **ROW Acquisition Right-of-way/Utilities** 2 Construction 270,000 Construction 6 Total **Construction Management** 14 Total 320,000 Funding Source: **Ongoing Operational Impact: Operating Fund** Personnel Debt 320,000 Supplies & Materials Grants/Other Repair & Maint. 320,000 Total Capital & Other Notes: Total This area of concern is not currently included in Proposition 4 - Drainage Project Area 3 and is not part of the Flood Early Warning System improvements. This roadway and drainage is a TxDOT facility. An Advanced Funding Agreement (AFA) with TxDOT will be required. The operational impact will be de minimus as this is an existing draining structure that will be improved. Staff time may be required to clear debris from riprap structure after heavy rain events.

#### Wild Wind Cove Groundwater Solutions **Responsible Department:** Engineering CIP No. D09 Financial Plan : Prior Projected Years 23 24 25 26 27 Future Total 50,000 150,000 200,000 Description : Near surface groundwater and highly expansive clay soils within certain sections of the Whispering Hollow subdivision have caused localised house foundation and road surface issues. Several homeowners located near Wild Wind Cove have installed sump pumps to remove excess groundwater from beneath their homes. A study was conducted in 2021 identifying possible solutions. A focus group composed of impacted residents reviewed the study and recommended different options. The highest priority would be to connect homeowner's sump pumps to the City's stormwater infrastructure. 2002 Area of 160 seepage Aerial image issues ND ND 160 ND ND - No Data Well 140 110 - Depth to Water (ft) Reported issue Estimated Project Cost: Project Task: Duration Design/Engineering Planning/Design 12 72,500 Right-of-way/Utilities **ROW Acquisition** Construction 127,500 Construction 3 Other Total 15 Total 200,000 Funding Source: **Ongoing Operational Impact: Operating Fund** 200,000 Personnel Debt Supplies & Materials Grants/Other Repair & Maint. 200,000 Total Capital & Other Notes: Total -

# **CIP POLICIES & PROCEDURES**

### PURPOSE

The purpose of the Capital Improvements Plan Procedure is to create a consistent process that outlines the procedure for proposing, evaluating, and adopting capital projects that will create long-term benefit to the City and that can be funded through the City's budget process.

### II.BACKGROUND

The Capital Improvements Plan (CIP) is a five-year planning document adopted annually by the City Council to plan for capital improvements related to the City's water, wastewater, mobility, drainage, parks, and facilities infrastructure.

Capital projects included in the CIP will be limited to projects costing \$50,000 or greater with a useful lifespan of twenty (20) years or longer, and also infrastructure master plans.

The Capital Improvements Plan is broken into six project categories: Parks, Facilities, Water, Wastewater, Mobility, and Drainage.

### III. CIP DEVELOPMENT PROCESS

A. The City Manager or designee will be responsible for coordinating the CIP process each year. Each department head will submit projects in a form and timeframe annually established by the City Manager or designee. Projects contained in the current CIP will be updated by the responsible department as necessary to reflect changes in cost and/or scope. The responsible department will also notify the CIP Committee if a project in the current CIP needs to be removed from the plan. The City Manager or designee will be responsible for compiling all of the submissions to be considered in the review process.

B. The City Manager or designee will lead a committee established to review and prioritize capital improvement projects. The committee will include at least one representative from impacted City departments. The committee shall prioritize and rank projects according to the criteria listed in Section IV.

C. Departments will include the following items as part of their project submission for evaluation and prioritization. Please do not use abbreviations or acronyms as this is a public document. A copy of the CIP standard form is located on the Shared Drive: CIP Folder.

-Project Category: Parks, Facility, Water, Wastewater, Mobility, or Drainage.

-Project Name: Provide a sufficient and reasonable description of the project.

-CIP Number: Leave blank, will be assigned by the CIP Committee.

-Financial Plan: Round all estimates up to the nearest \$1,000. For prior years, enter any previous dollars that have been spent on the project. Select which year the funding will be needed to begin the project. You may consider putting engineering and right-of-way acquisition in one year and construction in the following year if projects will span more than 12 months. If the project will go beyond the five-year Capital Improvements Plan window, place the remaining dollars needed in the "Future" column.

-Description: State how the project criteria (Section IV) will be met. Provide a detailed description of the project that includes the limits, estimated linear feet, features etc., for all that is included in the identified Financial Plan. If a future phase is anticipated, note that in the project description.

-Estimated Project Costs: Break out the anticipated costs for design/engineering and other costs. The total should match the total in the Financial Plan section.

-Project Task: Provide estimates in months to complete each of the listed tasks. If no activity is required for the project, leave field marked as "-".

-Funding Source: If the project will be funded from the General, Water, or Wastewater Fund, include the amounts in "Operating Fund". If it is anticipated that debt will be issued, include the amount in "Debt". All other funding sources such as minor funds, include in "Other". The total from this section should match the total from the Financial Plan section.

-Ongoing Operational Impact: Provide an estimate for the ongoing annual operational impact of the project.

-Notes: Provide any other pertinent project information including detail on funding sources, right-of-way acquisition, or relation to other projects included in the Capital Improvements Plan.

D. The proposed Capital Improvements Plan will be presented to the Capital Projects Council Committee.

E. The proposed Capital Improvements Plan will be presented to each appropriate board or commission before being presented to the City Council.

F. The City Council will annually adopt a five-year Capital Improvement Plan as part of the annual budget process.

### IV. Project Ranking Criteria

Projects will be initially ranked high, medium, or low according to the following criteria. Final recommended project priority will be determined by the CIP committee based on the project rank.

A. Public Health and Safety – Projects that improve the public health and safety of the community. Projects must demonstrate the benefit provided to the community and possible risks from not completing the project.

B. Mandates - Compliance with state and federal mandates that require the City to invest in a project.

C. Funding – Grants and funding partnerships are considered first followed by operating revenues and debt. Fund balance may be used to fund capital projects if the use of reserves will delay or eliminate a proposed bond issue and sufficient fund balance exists to provide necessary contingency reserves.

D. Service and Operational Impact – The service category prioritizes projects that will improve service delivery or reduce increasing maintenance costs including rehabilitating aging infrastructure. A cost-benefit analysis shall be conducted to weigh the impact of project rehabilitation to determine if the project will reduce future ongoing maintenance costs. Performance data will also be analyzed when considering projects related to improved service delivery. Future operation and maintenance expenses will be considered as part of this analysis.

E. Strategic Alignment – Projects will align with strategic priorities identified by the City Council and with strategic planning documents.

F. Quality of Life – Projects that promote recreational or aesthetic improvement opportunities.

G. Community Priority – Direction from public comment at various board, commission, and City Council meetings as well as results from community surveys and any other means that the public communicates their interest in potential projects.

H. Sustainable Design – The City recognizes the long-term benefits of incorporating sustainable elements and design into capital project design and construction. Sustainable design goals include reducing negative environmental impacts while improving citizens' health, comfort, and safety. Sustainable design involves "right-sizing" infrastructure to meet current and future needs, application of the City's design criteria, and use of long-lasting materials that will optimize performance, minimize the City's ongoing maintenance, and extending the asset's useful life.

i. Materials – The City will strive to incorporate sustainable materials into capital projects when feasible. Use of long-lasting materials that will optimize performance, minimize the City's ongoing maintenance, and extending the asset's useful life. Use of native landscaping and locally sourced materials are preferred.

ii. Dark Sky – The City will strive to incorporate lighting for projects that conform to the International Dark Sky Association's lighting standards.

iii. Conservation – The City will strive to incorporate alternative water and energy strategies for projects when feasible. Alternative water strategies include but are not limited to the following: rainwater harvesting, condensate collection, reuse water, gray water, storm water management and reuse, and EPA WaterSense approved plumbing fixtures and appliances. Alternative energy strategies include, but are not limited to the following: solar, wind, geothermal, hydropower, biofuels, and Energy Star rated items. Utilizing alternative energy methods for trail lighting and other lighting when feasible

iv. Preservation of Natural Resources – Project design will be mindful of natural resources and seek to preserve them whenever possible. The City will follow the City's Tree Ordinance as included in the Unified Development Code and will consider a projects impact on the natural environment and groundwater.

### V. Project Charter

Projects included in the approved City CIP shall have a charter that includes information on the following categories:

A. Project Description including how it meets Department goals with an accompanying schematic and location reference

- B. Assigned CIP Number
- C. Project Manager and assigned City Staff
- D. Schedule
- E. Budget
- F. Environmental Factors
- G. Public Outreach
- H. Procurement Information
- I. Project Contract or professional service agreement

### VI. CIP Amendment

Amendments to the Capital Improvement Plan (CIP) affecting the current fiscal year must be submitted to the City Engineer for review and recommended by the CIP committee for approval to the City Council through a budget amendment.

### VII. Mid-Year CIP Review

The City Council will review the progress of the CIP at the mid-year financial review for the City.

VIII. Annual Closeout of CIP Projects

Before the commencement of the next year's CIP planning process, the CIP Committee will document and provide a reason for the removal of a project from the previous year's CIP plan. This should include whether the project is complete, not needed, in progress, or any other reason as to why the project will no longer be included in the CIP planning process.
