YEAR 2005

## HAZARDOUS MATERIALS REPORTING FORMS

Enclosed is your most recent Hazardous Materials Inventory Statement based on the latest information available. Please carefully review it for accuracy. The requirements for submitting a consolidated Contingency Plan have changed (see * on page 1). If you require assistance in completing these forms, please feel free to contact the Burbank Fire Department, Hazardous Materials Division, at (818) 238-3475, Monday through Friday, 9:00 AM to 4:00 PM.

*Return to the Burbank Fire Department this Re-Certification Procedure Page signed and dated along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and any other appropriate and/or requested forms on or before March 1.* ***Failure to complete and return these forms by March 1 may result in fines and penalties. Keep a copy of the entire package for your records.*** *To avoid late penalties, this Department recommends use of CERTIFIED MAIL to ensure delivery of these forms before the March 1 deadline.*

## RE-CERTIFICATION PROCEDURE

*Please check the appropriate box(es)*

**HAZARDOUS MATERIALS:**

☐ **Delete:** If you no longer handle a material on the Inventory Statement provided, ***draw a line*** through the discontinued material, and ***complete a Chemical Description form writing "DELETE"*** across the form for each material you no longer handle.

☐ **Add:** If you are handling materials not previously disclosed, ***make copies of Chemical Description form and complete*** all information on the form (one form per material).

☐ **Revise/Update:** Cross out any errors on the Inventory Statement and Clearly Print the correct information. ***Make copies of Chemical Description form and complete*** all information on the form ***indicating "REVISE"*** (one form per material).

☑ **No Change:** There has been no change in the quantity of any hazardous material as reported, ***return the Inventory Statement we provided*** along with a newly completed and signed ***Business Activities Form, Business Owner/Operator Identification Form***, and this ***Re-Certification Procedure page*** signed and dated.

**CONSOLIDATED CONTINGENCY PLAN:**

☐ **Change:** Mark this Box if you are updating the Consolidated Contingency Plan.

☑ **No Change:** Mark this box if the Consolidated Contingency Plan on file is correct and complete.

**REGULATED SUBSTANCE REGISTRATION:**

☐ **Regulated Substance Registration:** If you are handling a Regulated Substance not previously disclosed, you must also ***complete the Regulated Substance Registration Form***. Complete only if substance is at or above threshold Quantity (TQ). A list of Regulated Substances is attached for reference.

*THE SUBMITTAL OF THE HAZARDOUS MATERIALS BURBANK REPORTING FORMS CONTAIN ALL OF THE REQUIRED STATE & FEDERAL INVENTORY INFORMATION AND SATIFIES THE REQUIREMENTS OF BOTH STATE & FEDERAL REGULATIONS.*

## ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is complete, accurate, and up to date. Also, no hazardous materials subject to the inventory requirements of this chapter, (California Health & Safety Code Chapter 6.95) are being handled that are not listed on the most recently submitted annual inventory form.

FIRE DEPARTMENT

January 10, 2005

Michelle Pitini
BORRMANN METAL CENTER
110 W Olive Ave
Burbank CA 91502

**SUBJECT: 00404 - BORRMANN METAL CENTER**
**110 W OLIVE AVE, BURBANK**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §15-1-8001-3.3, require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

**Enclosed you will find the following forms which you are required to complete and submit to us by March 1, 2005:**

✔ **The Hazardous Materials Annual Re-Certification Procedure**

A list of the hazardous materials identified at your facility may be included in this package. Review it carefully. You may complete the Annual Re-Certification Procedure for the Hazardous Materials Disclosure Report only, provided you can attest to the following:

- The most recent information submitted to the Burbank Fire Department is complete, accurate and up to date. (See attached list)
- There have been no changes in the quantities of hazardous materials as reported in the most recent submittal.
- No hazardous materials subject to the inventory reporting requirements are being handled that are not listed in the most recently submitted inventory report.
- The most recently submitted annual inventory report contains information required by Section 11022 of Title 42 of the United States Code.

✔ **The Facility Information Section**
Everyone is required to submit their Facility Information for 2005. This form has been filled out with the information we currently have on file. If there are any blanks, please complete this information. If there are any changes, please cross out the filled in information and write in your new information.

✔ **The Hazardous Materials Section**
These forms are provided for your convenience to be completed if you have added any new hazardous materials, deleted any hazardous materials, or if there are any changes in quantities or substances to be reported.

These Hazardous Materials Inventory Disclosure forms are currently part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions, complete the appropriate forms, and sign where indicated. Return **ORIGINAL** forms to the Burbank Fire Department by **March 1, 2005**. Failure to submit a properly completed inventory or annual re-certification statement by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

You can now request the Hazardous Materials and the Consolidated Contingency Plan forms to be sent to you by Email. These forms can be completed on your computer by using Microsoft Word. If you have any questions or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

Rick Mehling
Chief of Fire Department

To Our Customers and Vendors, September 1, 2004

On September 1, 2004 Borrmann Steel Company and Borrmann Metal Center will be merging into one entity. The combined company will be called Borrmann Metal Center. For your records we will use the old Borrmann Steel Co. Fed Tax I.D. number. The name Borrmann Metal Center better reflects our product line of aluminum, stainless steel and mild carbon steels. During the merger transition period billing payments should be made as follows: Orders shipped on or before August 31, 2004 and billed thru Borrmann Steel Co. or Borrmann Metal Center should be paid to the company from which you were billed. All invoices dated on or after September 1, 2004 will be paid to Borrmann Metal Center. If you have any further concerns or questions please direct your calls to Michelle Pitini or Jennifer Dimacali at (818) 846-7171.

Thank you,

Robert Wedeen / President
Bob Persson / President

## HAZARDOUS MATERIALS STATE REPORTING FORMS

Attached are your Annual Hazardous Materials reporting forms. These forms are to be completed and returned to this Department on or before March 1. Failure to complete and return these forms by March 1 may result in fines and penalties. If you require assistance in completing these forms, please feel free to contact the Burbank Fire Department, Hazardous Materials Division at **(818) 238-3475**, Monday through Friday 9:00 AM to 4:00 PM.

*To avoid late penalties, this Department recommends use of CERTIFIED MAIL to ensure delivery of these forms before the March 1 deadline.* ***Sign and date the Annual Certification Section below and keep a copy of the entire package for your records.***

## ANNUAL RE-CERTIFICATION

Attached are copies of the Hazardous Materials identified at your facility based on the latest information available. Carefully review and correct any information that may be incorrect or obsolete by completing a Chemical Description Form indicating the type of change. ***If you handle Regulated Substances (RS) at or above threshold quantities, you may submit a Regulated Substance Registration Form for each RS for each process.*** Check the appropriate box(es) below that (most) corresponds to your facility's information. Return the appropriate completed forms to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Delete:** If you no longer handle any of the chemicals on the list provided you, COMPLETE A CHEMICAL DESCRIPTION FORM INDICATING "DELETE" for each chemical you no longer handle.

☐ **Add:** If you are handling new chemical(s) not previously disclosed, **MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE** all information on the form. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☐ **Revise/Update:** If there are corrections to your inventory information, **MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE** all information on the form **INDICATING "REVISE"**. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☑ **No Change:** Mark this Box if there are no changes to the current inventory, **return the current inventory we provided** to us along with a newly completed and signed **Business Activities Form, Business Owner/Operator Identification Form**, and this **Annual Re-Certification Page** signed and dated.

☐ **Regulated Substance Registration:** If you are handling a Regulated Substance not previously disclosed, you must also **COMPLETE the Regulated Substance Registration Form**. A list of Regulated Substances is attached for reference.

## ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is true, accurate, and complete. Enclosed is our chemical inventory.

FIRE DEPARTMENT
MICHAEL W. DAVIS
FIRE CHIEF

January 9, 2004

Michelle Pitini
BORRMANN STEEL CO
110 W Olive Ave
Burbank CA 91502

**SUBJECT: 00404 - BORRMANN STEEL COMPANY**
**110 W OLIVE AVE, BURBANK**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §15-1-8001-3.3 require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

**Enclosed you will find the following forms which you are required to complete and submit to us by March 1, 2004:**

## ✔ The Hazardous Materials Annual Re-Certification Procedure

A list of the hazardous materials identified at your facility may be included in this package. Review it carefully. You may complete the Annual Re-Certification Procedure for the Hazardous Materials Disclosure Report only, provided you can attest to the following:

- The most recent information submitted to the Burbank Fire Department is complete, accurate and up to date. (See attached list)
- There have been no changes in the quantities of hazardous materials as reported in the most recent submittal.
- No hazardous materials subject to the inventory reporting requirements are being handled that are not listed in the most recently submitted inventory report.
- The most recently submitted annual inventory report contains information required by Section 11022 of Title 42 of the United States Code.

## ✔ The Facility Information Section

Everyone is required to submit their Facility Information for 2004. This form has been filled out with the information we currently have on file. If there are any blanks, please complete this information. If there are any changes, please cross out the filled in information and write in your new information.

✔ **The Hazardous Materials Section**
These forms are provided for your convenience to be completed if you have added any new hazardous materials, deleted any hazardous materials, or if there are any changes in quantities or substances to be reported.

These Hazardous Materials Inventory Disclosure forms are currently part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions, complete the appropriate forms, and sign where indicated. Return **ORIGINAL** forms to the Burbank Fire Department by **March 1, 2004**. Failure to submit a properly completed inventory or annual re-certification statement by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

If you have any questions or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

# BURBANK FIRE DEPARTMENT

HAZARDOUS MATERIALS DIVISION.

311 East Orange Grove Avenue, Burbank CA 91502-1221

YEAR 2003

(1)

(9)

## HAZARDOUS MATERIALS STATE REPORTING FORMS

Attached are your Annual Hazardous Materials reporting forms. These forms are to be completed and returned to this Department on or before March 1. Failure to complete and return these forms by March 1 may result in fines and penalties. If you require assistance in completing these forms, please feel free to contact the Burbank Fire Department, Hazardous Materials Division at **(818) 238-3475**, Monday through Friday 9:00 AM to 4:00 PM.

*To avoid late penalties, this Department recommends use of CERTIFIED MAIL to ensure delivery of these forms before the March 1 deadline.* ***Sign and date the Annual Certification Section below and keep a copy of the entire package for your records.***

## ANNUAL RE-CERTIFICATION

Attached are copies of the Hazardous Materials identified at your facility based on the latest information available. Carefully review and correct any information that may be incorrect or obsolete by completing a Chemical Description Form indicating the type of change. ***If you handle Regulated Substances (RS) at or above threshold quantities, you may submit a Regulated Substance Registration Form for each RS for each process.*** Check the appropriate box(es) below that (most) corresponds to your facility's information. Return the appropriate completed forms to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Delete:** If you no longer handle any of the chemicals on the list provided you, COMPLETE A CHEMICAL DESCRIPTION FORM INDICATING "DELETE" for each chemical you no longer handle.

☐ **Add:** If you are handling new chemical(s) not previously disclosed, **MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE** all information on the form. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

MD

☑ **Revise/Update:** If there are corrections to your inventory information, **MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE** all information on the form **INDICATING "REVISE"**. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☐ **No Change:** Mark this Box if there are no changes to the current inventory, **return the current inventory we provided** to us along with a newly completed and signed **Business Activities Form, Business Owner/Operator Identification Form**, and this **Annual Re-Certification Page** signed and dated.

☐ **Regulated Substance Registration:** If you are handling a Regulated Substance not previously disclosed, you must also **COMPLETE the Regulated Substance Registration Form**. A list of Regulated Substances is attached for reference.

## ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is true, accurate, and complete. Enclosed is our chemical inventory.

## II. ACTIVITIES DECLARATION

**NOTE: Please submit the Business Owner/Operator Identification Form with this Page**

| Does your facility . . . | If Yes, please complete these pages of the UPCF. . . | |
|---|---|---|
| **A. HAZARDOUS MATERIALS**<br>Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70? | ☑ YES ☐ NO 4 | ✓ HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESC<br>✓ CONSOLIDATED CONTINGENCY PLAN (Section I and Site Map(s))<br>✓ TRAINING PLAN |
| **B. UNDERGROUND STORAGE TANKS (USTs)** | | ✓UST FACILITY |
| 1. Own or operate underground storage tanks? | ☐ YES ☑ NO 5 | ✓UST TANK (one page per tank) |
| 2. Intend to upgrade existing or install new USTs? | ☐ YES ☑ NO 6 | ✓UST FACILITY<br>✓UST TANK (one per tank)<br>✓UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) |
| 3. Need to report closing a UST? | ☐ YES ☑ NO 7 | ✓UST TANK (closure portion –one page per tank) |
| **C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs)**<br>Own or operate ASTs above these thresholds:<br>any tank capacity is greater than 660 gallons, or<br>the total capacity for the facility is greater than 1,320 gallons? | ☐ YES ☑ NO 8 | NO FORM REQUIRED TO CUPA's |
| **D. HAZARDOUS WASTE** | | |
| 1. Generate hazardous waste? | ☐ YES ☑ NO 9 | ✓ EPA ID NUMBER – provide at the top of this page.<br>✓ As a generator, answer YES to Item E2b and complete Waste Generator Form. |
| 2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)? | ☐ YES ☑ NO 10 | ✓ RECYCLABLE MATERIALS REPORT |
| 3. Treat hazardous waste on site? | ☐ YES ☑ NO 11 | ✓ ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY<br>✓ ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit) |
| 4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)? | ☐ YES ☑ NO 12 | ✓ CERTIFICATION OF FINANCIAL ASSURANCE |
| 5. Consolidate hazardous waste generated at a remote site? | ☐ YES ☑ NO 13 | ✓ REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION |
| 6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site? | ☐ YES ☑ NO 14 | ✓ HAZARDOUS WASTE TANK CLOSURE CERTIFICATION |
| **E. LOCAL REQUIREMENTS** | | 15 |
| 1. REGULATED SUBSTANCES<br>Have Regulated Substances (RS) including Extremely Hazardous Substances (EHS) stored on site at greater than the threshold planning quantities established by the California Accidental Release Program (CalARP)? | ☑ YES ☐ NO 15a | In addition to Hazardous Materials requirements, complete:<br>✓ REGULATED SUBSTANCE REGISTRATION<br>✓ RISK MANAGEMENT PLAN (when required) |
| 2. OTHER REQUIREMENTS | | |
| a. Have hazardous materials stored on site at or above a threshold amount established by a CUPA's or PA's local ordinance? | ☑ YES ☐ NO 15b | ✓ Consult local CUPA or PA for added reporting requirements. |
| b. Required by a CUPA or PA to provide other information? | ☑ YES ☐ NO 15c | ✓ WASTE GENERATOR FORM (LA County) |

INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM

# REGULATED SUBSTANCE REGISTRATION

This page is to be completed for a Stationary Source that handles a Regulated Substance (RS) in a process at or above the threshold quantity. Regulated Substances (including Federal and State Listed Extremely Hazardous Substances (EHS) (RS)) must be registered for the purpose of complying with the California Accidental Release Prevention (CalARP) program. The owner or operator shall complete a Hazardous Materials Inventory – Chemical Description page and a Regulated Substance Registration for each Regulated Substance per process. Contact your local agency (CUPA or PA) for any additional assistance.
*Note: A list of Federal and State Regulated Substances is attached for your reference.*

1. FACILITY ID NUMBER This number is assigned by the CUPA. This unique number identifies your facility.
2. EPA ID NUMBER Enter your facility's 12-character EPA identification number.
3. BUSINESS NAME Enter the full legal name of the business.

106. DUN & BRADSTREET Enter the Dun and Bradstreet number of the Principal Company or entity which owns at least 50 percent of the voting stock. The Dun and Bradstreet number allows your business to be cross referenced to various business information. You may be able to obtain this number from your finance department. If your business does not have this information, contact Dun and Bradstreet at (610) 882-7748 or via the internet at www.dnb.com.

107a. PROCESS SIC CODE Enter the specific *Standard Industrial Classification Code* for the process using, treating, storing, producing, disposing, or otherwise handling regulated substances.

205. CHEMICAL NAME Enter the proper chemical name associated with the Chemical Abstract Service (CAS) number of the hazardous material. This should be the International Union of Pure and Applied Chemistry (IUPAC) name found on the Material Safety Data Sheet (MSDS).

208. EPCRA SECTION 302 The Emergency Planning and Community Right-to-Know Act requires notification of local authorities of the presence of certain Extremely Hazardous Substances listed in 40 CFR 302. 209. If you have a toxic regulated substance above the threshold quantity in a process, you are subject to EPCRA 302 and must check the box marked "yes."

209. CAS # Enter the Chemical Abstract Service number for the hazardous material.

218a. MAXIMUM DAILY AMOUNT Enter the maximum amount of hazardous material or mixture containing a hazardous material which is handled in the process at any one time over the course of the year.

221. UNITS IN POUNDS Leave this box blank. Note: All Regulated Substances must be reported in pounds.

246a. PROGRAM LEVEL Indicate the proper *Program Level* this process falls under. Mark either Program 1, 2, or 3 to identify with which program the process complies.

246b. NAME OF CORPORATE PARENT COMPANY Enter the legal name of the Principal Company or entity which owns at least 50 percent of the voting stock.

246c. PERSON RESPONSIBLE FOR RMP Enter the name of the person designated as responsible for the RMP.

246d. PERSON RESPONSIBLE FOR RMP - TITLE Enter the title of the person designated as responsible for the RMP.

246e. LATITUDE Enter the degrees of latitude for the business location. Latitude is the degrees north or south of the equator. Latitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid latitudes for LA County range from 33°17'53N to 34°49'14N. Be sure the latitude fits this range.

246f. LONGITUDE Enter the degrees of longitude for the business location. Longitude is the degrees east or west of the prime meridian. Longitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid longitudes for LA County range from 117°38'39W to 118°56'39W. Be sure the latitude fits this range.

246g. CAA TITLE V State and local operating permit programs are required under Title V of the Clean Air Act (40 CFR Part 70). Title V requires major sources of air pollution to receive permits, pay fees to cover cost of administering the program, and sign a binding certification of compliance on all permit applications and documents. Check the appropriate box, "yes" or "no."

246h. OSHA PSM The OSHA Process Safety Management Standard, codified at 29 CFR 1910.119, is similar to the Program 3 prevention program, and is designed to protect workers from the effects of accidental releases of hazardous substances. *Note:* This question covers all processes at your facility; if any process at your facility is subject to OSHA PSM, you must answer yes even if the PSM process does not involve a Regulated Substance. Answer the question either "yes" or "no."

246i. LAST SAFETY INSPECTION Enter the date of the last safety inspection of your facility and indicate the Agency (OSHA, State OSHA, EPA, State EPA, Fire Dept., etc..) that performed the inspection.

246j. PROCESS DESCRIPTION Describe the *process* and/or operations involved in the use, treatment, storage, production, disposal, or otherwise handling of the regulated substances ( include process pressures and temperature, and whether it is a raw material or an intermediate). *Note:* Any group of interconnected vessels or separate vessels, located such that a regulated substance could be involved in a potential release, is considered a single process.

246k. PRINCIPAL EQUIPMENT List the equipment and/or components used in the process involving the Regulated Substance.

246l. NAME OF OWNER / OPERATOR The full name of the owner/operator who signed the registration page.

246m. TITLE Enter the title of the person signing the page.

246n. DATE Enter the date the page was signed.

UNIFIED PROGRAM (UP) FORM

# CONSOLIDATED CONTINGENCY PLAN

## COVER PAGE

### FACILITY IDENTIFICATION

| BUSINESS NAME 3 | | FACILITY ID # 1 |
|---|---|---|
| BORRMANN STEEL CO. | | |
| SITE ADDRESS 103 | CITY 104 | ZIP CODE 105 |
| 110 W. OLIVE AVENUE | BURBANK | 91502 |

The Consolidated Contingency Plan provides businesses a format to comply with the emergency planning requirements of the following three written hazardous materials emergency response plans required in California:

- Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-2732),
- Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and,
- Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 and 2641).

This format is designed to reduce duplication in the preparation and use of emergency response plans at the same facility, and to improve the coordination between facility response personnel and local, state, and federal emergency responders during an emergency. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be completed for your facility. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

| PROGRAMS | SECTION(S) TO BE COMPLETED |
|---|---|
| Hazardous Materials Business Plan (HMBP) | Cover Page, Section I, and Site Map(s) |
| Hazardous Waste Generator (HWG) | Cover Page, Section I, and Site Map(s) |
| Underground Storage Tank (UST) | Cover Page, Sections I and II, and Site Map(s) |
| HMBP, HWG, UST | Cover Page, Sections I and II, and Site Map(s) |

**A copy of the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Describe below where a copy of your Contingency Plan, including the hazardous material inventories and Site Map(s), is located at your business:

LOCK BOX AT FRONT DOOR OF OFFICE.

### PLAN CERTIFICATION

*I certify under penalty of law that I have personally examined and I am familiar with the information provided by this plan and to the best of my knowledge the information is accurate, complete, and true.*

| PRINTED NAME OF OWNER/ OPERATOR | TITLE OF OWNER/OPERATOR |
|---|---|
| ROBERT G. WEDEEN | PRESIDENT. |
| SIGNATURE OF OWNER/ OPERATOR | DATE |
| Robert G Wedeen | 2/26/03 |

We appreciate the effort of local businesses in completing these plans and will assist in every possible way. If you have any questions, please contact your local CUPA or PA.

| OFFICIAL USE ONLY | DATE RECEIVED | REVIEWED BY | | |

# ADVISORY

The site-specific Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. The Contingency Plan shall be reviewed, and immediately amended, if necessary, whenever:

- the plan fails in an emergency,
- the facility changes in its design, construction, operation, maintenance, or other circumstances in a way that materially increases the potential for fires, explosions, or releases of hazardous waste or hazardous waste constituents, or changes the response necessary in an emergency,
- the list of emergency coordinators changes, or
- the list of emergency equipment changes.

Submit a copy of any updates or changes to your local CUPA or PA.

*UST owners/operators be advised that the local UST agency, CUPA or PA, must be notified within 30 days of any changes to the monitoring procedures listed in the UST Emergency Response and Monitoring Plan as found Section II of the Consolidated Contingency Plan.*

### III. EMERGENCY RESPONSE PLANS AND PROCEDURES

**A. *Notifications***

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

**FIRE / PARAMEDICS / POLICE / SHERIFF PHONE: 911**

**AFTER** the local emergency response personnel are notified, you shall then notify this Unified Program Agency and the Office of Emergency Services.

Local Unified Program Agency: (818) 238-3475
State Office of Emergency Service: (800) 852-7550 or (916) 262-1621
National Response Center: (800) 424-8802

BURBANK FIRE DEPT.
-4 MAR 03 11 17

Information to be provided during Notification:

- Your name and the telephone number from where you are calling.
- Exact address of the release or threatened release.
- Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- Material and quantity of the release, to the extent known.
- Current condition of the facility.
- Extent of injuries, if any.
- Possible hazards to public health and/ or the environment outside of the facility.

**B. *Emergency Medical Facility***

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

UNIFIED PROGRAM (UP) FORM
# CONSOLIDATED CONTINGENCY PLAN

## SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

### C. *Private Emergency Response*

**DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM?** ☐ Yes ☑ No

If yes, provide an attachment that describes what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

**CLEANUP/DISPOSAL CONTRACTOR**

List the contractor that will provide cleanup services in the event of a release.

| NAME OF CONTRACTOR | PHONE NO |
|---|---|
| ADDRESS | |
| CITY | ZIP CODE |

### D. *Arrangements With Emergency Responders*

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

### E. *Evacuation Plan*

1. The following alarm signal(s) will be used to begin evacuation of the facility *(check all which apply)*:

☑ Verbal ☐ Telephone *(including cellular)* ☐ Alarm System ☐ Public Address System ☐ Intercom
☐ Pagers ☐ Portable Radio ☐ Other *(specify)*:

2. ☐ Evacuation map is prominently displayed throughout the facility.

3. ☐ Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

SCOTT SHERWOOD/ WAREHOUSE SUPERVISOR.,
ROBERT G. WEDGE/ PRESIDENT (BACK-UP)

### F. *Earthquake Vulnerability*

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☑ Hazardous Waste/ Hazardous Materials Storage Areas ☐ Production Floor ☐ Process Lines
☐ Bench / Lab ☐ Waste Treatment ☐ Other

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☑ Utilities ☑ Sprinkler Systems ☑ Cabinets ☐ Shelves
☑ Racks ☐ Pressure Vessels ☑ Gas Cylinders ☑ Tanks
☑ Process Piping ☑ Shutoff Valves ☐ Other:

UNIFIED PROGRAM (UP) FORM

# CONSOLIDATED CONTINGENCY PLAN

## SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

**G. *Emergency Procedures***

Briefly describe your business standard operating procedures in the event of a release or threatened release of hazardous materials:

EVACUATE AREA, CALL FIRE DEPARTMENT

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

1.) PROPANE: FIRE HAZARD ONLY. EVACUATE AREA AND CALL FIRE DEPT. STORAGE IS CLEARLY MARKED & A FIRE EXTINGUISHER IS LOCATED NEAR AREA.

2) ACETYLENE: FIRE HAZARD ONLY! BOTTLES ARE STORED IN APPROVED RACK. EVACUATE AREA CALL FIRE DEPT.

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

Reduce the AMOUNT BEING STORED by having the bottles refilled OR replaced MORE OFTEN.

EVACUATE IMMEDIATELY AREA AND CALL FIRE DEPT.

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

IF LEAKING OCCUREED WE WOULD REMOVE BOTTLE AND LET IT EMPTY ITSELF IN A WELL VENTILATED AREA. KEEPING ALL EMPLOYEES WELL AWAY FROM THE LEAK.

### IV. EMERGENCY EQUIPMENT

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement

*EMERGENCY EQUIPMENT INVENTORY TABLE*

| 1. Equip Category | 2. Equipment Type | 3. Location * | 4. Description** |
|---|---|---|---|
| Personal Protective, Equipment, Safety Equipment, and First Aid Equipment | ☐ Cartridge Respirators | | |
| | ☐ Chemical Monitoring Equipment *(describe)* | | |
| | ☐ Chemical Protective Aprons/Coats | | |
| | ☐ Chemical Protective Boots | | |
| | ☐ Chemical Protective Gloves | | |
| | ☐ Chemical Protective Suits *(describe)* | | |
| | ☐ Face Shields | | |
| | ☑ First Aid Kits/Stations *(describe)* | A.C. | Bandages, spraycleaner etc. |
| | ☑ Hard Hats | A. | plastic hats |
| | ☐ Plumbed Eye Wash Stations | | |
| | ☑ Portable Eye Wash Kits *(i.e. bottle type)* | C | cleansing eye solution |
| | ☐ Respirator Cartridges *(describe)* | | |
| | ☑ Safety Glasses/~~Splash Goggles~~ | A | plastic eye wear |
| | ☐ Safety Showers | | |
| | ☐ Self-contained Breathing Apparatuses (SCBA) | | |
| | ☐ Other *(describe)* | | |
| Fire Extinguishing Systems | ☑ Automatic Fire Sprinkler Systems | C | WATER SPRINKLER |
| | ☐ Fire Alarm Boxes/Stations | | |
| | ☐ Fire Extinguisher Systems *(describe)* | | |
| | ☐ Other *(describe)* | | |
| Spill Control Equipment and Decontamination Equipment | ☑ Absorbents (describe) | A. D. | granulated clay |
| | ☐ Berms/Dikes (describe) | | |
| | ☐ Decontamination Equipment (describe) | | |
| | ☐ Emergency Tanks (describe) | | |
| | ☐ Exhaust Hoods | | |
| | ☐ Gas Cylinder Leak Repair Kits (describe) | | |
| | ☐ Neutralizers (describe) | | |
| | ☐ Overpack Drums | | |
| | ☐ Sumps (describe) | | |
| | ☐ Other (describe) | | |
| Communications and Alarm Systems | ☐ Chemical Alarms (describe) | | |
| | ☐ Intercoms/ PA Systems | | |
| | ☐ Portable Radios | | |
| | ☐ Telephones | | |
| | ☐ Underground Tank Leak Detection Monitors | | |
| | ☐ Other (describe) | | |
| Additional Equipment (Use Additional Pages if Needed.) | | | |
| | | | |
| | | | |
| | | | |
| | | | |

* *Use the Location Codes (LC) from the Site Map(s) prepared for your Contingency Plan.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

UNIFIED PROGRAM (UP) FORM

# CONSOLIDATED CONTINGENCY PLAN

## SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

### V. EMPLOYEE TRAINING

All facilities which handle hazardous materials must have a written employee training plan. A blank plan has been provided below for you to complete and submit. The items listed below are required per Health and Safety Code Section 25504 (c) and Title 19 Section 2732.

***FACILITY PERSONNEL ARE TRAINED AS FOLLOWS:***

- ❖ Familiarity with all plans and procedures specified in the Contingency Plan.
- ❖ Methods for safe handling of hazardous materials.
- ❖ Safety procedures in the event of a release or threatened release of a hazardous material.
- ❖ Use of emergency response equipment and supplies under the control of the business.
- ❖ Procedures for coordination with local emergency response organizations.

***TRAINING SHALL BE PROVIDED:***

- ❖ Initially for all new employees.
- ❖ Annually, including refresher courses, for all employees.

*Note: These training programs may take into consideration the position of each employee.*

***ADDITIONAL TRAINING SHOULD INCLUDE:***

- ❖ Internal alarm/notification procedures.
- ❖ Evacuation/re-entry procedures and assembly point locations.
- ❖ Material Safety Data Sheet (MSDS) training including specific hazard(s) of each chemical to which employees may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption).*

### VI. HAZARDOUS WASTE GENERATOR TRAINING

If your business is a hazardous waste generator, you are required to provide training in hazardous waste management for all workers who handle hazardous waste at your site (22 CCR §66265.16). You are also required to document training. The items below are required.

***EMPLOYEE TRAINING***

- ❖ Facility personnel will successfully complete training within six months after the date of their employment or assignment to a facility or to a new position at a facility.
- ❖ Employees will not handle hazardous wastes without supervision until trained.

***TRAINING DOCUMENTATION***

The owner or operator must maintain the following documents and records at the facility:

- ❖ Job title for each position at the facility that is related to hazardous waste management, and the names of the employee(s) filling the position(s).
- ❖ Description for each position listed above (must include required skill, education, or other qualifications as well as duties of employees assigned to the position).
- ❖ Description of *type* and *amount* of both introductory and continuing training given to each employee.
- ❖ Records that document that the requirements for training or job experience have been met.
- ❖ Current employees' training records (to be retained until closure of the facility).
- ❖ Former employees' training records (to be retained at least three years after termination of employment).

FIRE DEPARTMENT
MICHAEL W. DAVIS
FIRE CHIEF

January 24, 2003

Michelle Pitini
Borrmann Steel Co
110 W Olive Ave
Burbank CA91502

SUBJECT: **00404 - BORRMANN STEEL COMPANY**
**110 W OLIVE AVE, BURBANK**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §15-1-8001-3.3 require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

A review of our records indicates that we requested you complete a comprehensive inventory statement in 2000, which included the Consolidated Contingency Plan.

Enclosed you will find the following forms which you are required to complete and submit to us by March 1, 2003:

1. The **Hazardous Materials Annual Re-Certification Procedure**
A list of the hazardous materials identified at your facility may be included in this package. Review it carefully. You may complete the Annual Re-Certification Procedure for the Hazardous Materials Disclosure Report only, provided you can attest to the following:

- The most recent information submitted to the Burbank Fire Department is complete, accurate and up to date.
- There have been no changes in the quantities of hazardous materials as reported in the most recent submittal.
- No hazardous materials subject to the inventory reporting requirements are being handled that are not listed in the mot recently submitted inventory report.

**HAZARDOUS MATERIALS INVENTORY DISCLOSURE STATEMENT**
**00404 - 110 W OLIVE AVE, BURBANK**
January 24, 2003

- The most recently submitted annual inventory report contains information required by Section 11022 of Title 42 of the United States Code.

1. The **Facility Information Section**
Everyone is required to submit their Facility Information for 2003. This form has been filled out with the information we currently have on file. If there are any blanks, please complete this information. If there are any changes, please cross out the filled in information and write in your new information.

2. The **Hazardous Materials Section**
These forms are provided for your convenience to be completed if you have added any new hazardous materials, deleted any hazardous materials, or if there are any changes in quantities or substances to be reported.

3. The **Consolidated Contingency Plan Section w/Site Map**
Everyone is required to properly complete and submit a Consolidated Contingency Plan and Site Map for 2003 (once every three years). Our last general request for these forms was in 2000.

These Hazardous Materials Inventory Disclosure forms are currently part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions, complete the appropriate forms, and sign where indicated. Return **ORIGINAL** forms to the Burbank Fire Department by **March 1, 2003**. Failure to submit a properly completed inventory or annual re-certification statement by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

If you have any questions or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

Michael W. Davis
Chief of Fire Department

# HAZARDOUS MATERIALS STATE REPORTING FORMS

Attached are your Annual Hazardous Materials reporting forms. These forms are to be completed and returned to this Department on or before March 1. Failure to complete and return these forms by March 1 may result in fines and penalties. If you require assistance in completing these forms, please feel free to contact the Burbank Fire Department, Hazardous Materials Division at **(818) 238-3475**, Monday through Friday 9:00 AM to 4:00 PM.

*To avoid late penalties, this Department recommends use of CERTIFIED MAIL to ensure delivery of these forms before the March 1 deadline.* ***Sign and date the Annual Certification Section below and keep a copy of the entire package for your records.***

## ANNUAL RE-CERTIFICATION PROCEDURE

Attached are copies of the Hazardous Materials identified at your facility based on the latest information available. Carefully review and correct any information that may be incorrect or obsolete by completing a Chemical Description Form indicating the type of change. ***If you handle Regulated Substances (RS) at or above threshold quantities, you may submit a Regulated Substance Registration Form for each RS for each process.*** Check the appropriate box(es) below that (most) corresponds to your facility's information. Return the appropriate completed forms to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Delete:** If you no longer handle any of the chemicals on the list provided you, COMPLETE A CHEMICAL DESCRIPTION FORM INDICATING "DELETE" for each chemical you no longer handle.

☐ **Add:** If you are handling new chemical(s) not previously disclosed, **MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE** all information on the form. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☐ **Revise/Update:** If there are corrections to your inventory information, **MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE** all information on the form **INDICATING "REVISE"**. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☒ **No Change:** Mark this Box if there are no changes to the current inventory, **return the current inventory we provided** to us along with a newly completed and signed **Business Activities Form, Business Owner/Operator Identification Form**, and this **Annual Re-Certification Page** signed and dated.

☐ **Regulated Substance Registration:** If you are handling a Regulated Substance not previously disclosed, you must also **COMPLETE the Regulated Substance Registration Form**. A list of Regulated Substances is attached for reference.

## ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is true, accurate, and complete. Enclosed is our chemical inventory.

# INSTRUCTIONS FOR THE UNFIED PROGRAM (UP) FORM
# BUSINESS OWNER/OPERATOR IDENTIFICATION

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials - Chemical Description for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report (YYYYMMDD, ex. 1999/07/01).
101. ENDING DATE Enter the ending year and date of the report (YYYYMMDD, ex. 2000/06/30).
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for the primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the person who is the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digits in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
133b. NUMBER OF EMPLOYEES Enter the number of employees working at your facility.
133c. TAX IDENTIFICATION NUMBER (TIN) Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS).
133d. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
133e. MAILING/BILLING CITY Enter the city for the mailing/billing address.
133f. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
133g. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digit s in the zip code may also be added.
133h. MAILING/BILLING CONTACT Enter the name of the person who is your Mailing/Billing contact.
133i. MAILING/BILLING NAME Enter the Name of the company or department for Mailing/Billing.
133j. MAILING/BILLING PHONE Enter the Mailing/Billing phone number.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate, and complete.

134. DATE Enter the date that the document was signed (YYYYMMDD, ex. 1999/07/01).
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
137. TITLE OF SIGNER Enter the title of the person signing the page.

# BUSINESS ACTIVITIES

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. EPA ID NUMBER If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. HAZARDOUS MATERIALS ON-SITE Check the box to indicate whether you have hazardous materials on-site. You have a hazardous material if:
   - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
   - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
   - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

   If you have hazardous materials on-site, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. UPGRADE / INSTALL UST Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan, and monitoring program plan.
7. UST CLOSURE Check the appropriate box if you are closing a UST and complete the closure portion of the UST Tank pages for each tank.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST) Check the appropriate box to indicate whether there are APSTs on-site which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g) ). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k) ) is not subject to this act and is exempt:
   - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
   - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
   - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
   - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. HAZARDOUS WASTE GENERATOR Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled on-site or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. ON-SITE HAZARDOUS WASTE TREATMENT Check the appropriate box to indicate whether your facility treats hazardous waste on-site. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste on-site, complete the On-site Hazardous Waste Treatment Notification - Facility page and one set of On-site Hazardous Waste Treatment Notification - Unit pages for each unit
12. FINANCIAL ASSURANCE Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an on-site treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.

15a. LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS) Check the box to indicate whether Regulated Substances (RS) are stored on-site. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.

15b. LOCAL HAZARDOUS MATERIALS THRESHOLD Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.

15c. LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "Yes" box, complete the Hazardous Waste Generator Form (LA County).

UNIFIED PROGRAM (UP) FORM

# REGULATED SUBSTANCE REGISTRATION

**THIS PAGE IS TO BE COMPLETED FOR A STATIONARY SOURCE THAT HANDLES A REGULATED SUBSTANCE (RS) IN A PROCESS AT OR ABOVE THE THRESHOLD QUANTITY. REGULATED SUBSTANCES (INCLUDING FEDERAL LISTED AND STATE LISTED EXTREMELY HAZARDOUS SUBSTANCES) MUST BE REGISTERED FOR THE PURPOSE OF COMPLYING WITH THE CalARP (CALIFORNIA ACCIDENTAL RELEASE PREVENTION) PROGRAM. THE OWNER OR OPERATOR SHALL COMPLETE A HAZARDOUS MATERIALS INVENTORY FORM AND A REGISTRATION FOR EACH REGULATED SUBSTANCE PER EACH PROCESS.**

BUSINESS NAME (3): Borrmann Steel Company

FACILITY ID# (1): 000 171893

EPA ID # (2): 60

PROGRAM LEVEL (246a): unknown ☐ 1 ☐ 2 ☐ 3

NAME OF CORPORATE PARENT COMPANY (246b): N/A

DUN & BRADSTREET NUMBER (106): 04-115-5540

PERSON RESPONSIBLE FOR RMP (First Name, Last Name) (246c): Bill Sherwood

TITLE (246d): Warehouse Supervisor

LATITUDE (246e): unknown

LONGITUDE (246f): unknown

PROCESS SIC (107a): 5051

DOES THE FACILITY HAVE SUBSTANCES LISTED IN 40 CFR 355 APPENDIX A (EHS) (RS)? (208) ☐ Yes ☑ No

DO ANY PROCESSES REQUIRE A CLEAN AIR ACT TITLE V OPERATING PERMIT? (246g) ☐ Yes ☑ No

IS FACILITY SUBJECT TO 29CFR 1910.119/CCR 8 SEC 189(PSM)? (246h) ☐ Yes ☑ No

LAST SAFETY INSPECTION (246i) DATE ____/____/____ AGENCY unknown

CHEMICAL NAME (205):

CAS# (209):

MAXIMUM DAILY AMOUNT (218a):

UNITS IN POUNDS (221):

PROCESS DESCRIPTION (246j):

1) Acetylene (74-86-2) - used for cutting or welding of steel. Torch pressure is 40 PSI. Is used in conjunction with compressed oxygen. But not interconnected.

2) Propane (74-98-6) - used only as fuel for our forklifts.

PRINCIPAL EQUIPMENT (246k):

1) Acetylene - cutting torch assy & portable.

2) propane - Forklifts

## CERTIFICATION

**I, the owner or operator of the aforementioned business, hereby certify that the registration information provided above is true, accurate, and complete to the best of my knowledge based upon reasonable inquiry. I am fully aware that this certification executed on the date indicated below is made under penalty of perjury under the laws of the State of California.**

OWNER/OPERATOR NAME (246l): Robert G. Wedeen

OWNER/OPERATOR TITLE (246m): President

OWNER/OPERATOR SIGNATURE: X Robert G Wedeen

INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM

# REGULATED SUBSTANCE REGISTRATION

This page is to be completed for a Stationary Source that handles a Regulated Substance (RS) in a process at or above the threshold quantity. Regulated Substances (including Federal and State Listed Extremely Hazardous Substances (EHS) (RS)) must be registered for the purpose of complying with the California Accidental Release Prevention (CalARP) program. The owner or operator shall complete a Hazardous Materials Inventory – Chemical Description page and a Regulated Substance Registration for each Regulated Substance per process. Contact your local agency (CUPA or PA) for any additional assistance.
*Note: A list of Federal and State Regulated Substances is attached for your reference.*

1. FACILITY ID NUMBER This number is assigned by the CUPA. This unique number identifies your facility.
2. EPA ID NUMBER Enter your facility's 12-character EPA identification number.
3. BUSINESS NAME Enter the full legal name of the business.

106. DUN & BRADSTREET Enter the Dun and Bradstreet number of the Principal Company or entity which owns at least 50 percent of the voting stock. The Dun and Bradstreet number allows your business to be cross referenced to various business information. You may be able to obtain this number from your finance department. If your business does not have this information, contact Dun and Bradstreet at (610) 882-7748 or via the internet at www.dnb.com.

107a. PROCESS SIC CODE Enter the specific *Standard Industrial Classification Code* for the process using, treating, storing, producing, disposing, or otherwise handling regulated substances.

205. CHEMICAL NAME Enter the proper chemical name associated with the Chemical Abstract Service (CAS) number of the hazardous material. This should be the International Union of Pure and Applied Chemistry (IUPAC) name found on the Material Safety Data Sheet (MSDS).

208. EPCRA SECTION 302 The Emergency Planning and Community Right-to-Know Act requires notification of local authorities of the presence of certain Extremely Hazardous Substances listed in 40 CFR 302. 209. If you have a toxic regulated substance above the threshold quantity in a process, you are subject to EPCRA 302 and must check the box marked "yes."

209. CAS # Enter the Chemical Abstract Service number for the hazardous material.

218a. MAXIMUM DAILY AMOUNT Enter the maximum amount of hazardous material or mixture containing a hazardous material which is handled in the process at any one time over the course of the year.

221. UNITS IN POUNDS Leave this box blank. Note: All Regulated Substances must be reported in pounds.

246a. PROGRAM LEVEL Indicate the proper *Program Level* this process falls under. Mark either Program 1, 2, or 3 to identify with which program the process complies.

246b. NAME OF CORPORATE PARENT COMPANY Enter the legal name of the Principal Company or entity which owns at least 50 percent of the voting stock.

246c. PERSON RESPONSIBLE FOR RMP Enter the name of the person designated as responsible for the RMP.

246d. PERSON RESPONSIBLE FOR RMP - TITLE Enter the title of the person designated as responsible for the RMP.

246e. LATITUDE Enter the degrees of latitude for the business location. Latitude is the degrees north or south of the equator. Latitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid latitudes for LA County range from 33°17'53N to 34°49'14N. Be sure the latitude fits this range.

246f. LONGITUDE Enter the degrees of longitude for the business location. Longitude is the degrees east or west of the prime meridian. Longitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid longitudes for LA County range from 117°38'39W to 118°56'39W. Be sure the latitude fits this range.

246g. CAA TITLE V State and local operating permit programs are required under Title V of the Clean Air Act (40 CFR Part 70). Title V requires major sources of air pollution to receive permits, pay fees to cover cost of administering the program, and sign a binding certification of compliance on all permit applications and documents. Check the appropriate box, "yes" or "no."

246h. OSHA PSM The OSHA Process Safety Management Standard, codified at 29 CFR 1910.119, is similar to the Program 3 prevention program, and is designed to protect workers from the effects of accidental releases of hazardous substances. *Note:* This question covers all processes at your facility; if any process at your facility is subject to OSHA PSM, you must answer yes even if the PSM process does not involve a Regulated Substance. Answer the question either "yes" or "no."

246i. LAST SAFETY INSPECTION Enter the date of the last safety inspection of your facility and indicate the Agency (OSHA, State OSHA, EPA, State EPA, Fire Dept., etc..) that performed the inspection.

246j. PROCESS DESCRIPTION Describe the *process* and/or operations involved in the use, treatment, storage, production, disposal, or otherwise handling of the regulated substances ( include process pressures and temperature, and whether it is a raw material or an intermediate). *Note:* Any group of interconnected vessels or separate vessels, located such that a regulated substance could be involved in a potential release, is considered a single process.

246k. PRINCIPAL EQUIPMENT List the equipment and/or components used in the process involving the Regulated Substance.

246l. NAME OF OWNER / OPERATOR The full name of the owner/operator who signed the registration page.

246m. TITLE Enter the title of the person signing the page.

246n. `DATE Enter the date the page was signed.

CITY OF BURBANK
311 ORANGE GROVE AVENUE, BURBANK CALIFORNIA 91502-1221

FAX (818) 238-3479

FIRE DEPARTMENT
MICHAEL W. DAVIS
FIRE CHIEF

January 14, 2002

Michelle Pitini
BORRMANN STEEL CO
110 W Olive Ave
Burbank CA 91502

**SUBJECT: 00404 - BORRMANN STEEL COMPANY**
**110 W OLIVE AVE, BURBANK**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §15-1-8001-3-3 require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

A review of our records indicates that you completed a comprehensive inventory statement in 2000 or 2001. (A list of the hazardous materials identified at your facility may be included with this letter for your convenience.) If all the information you submitted is currently correct, you may complete the **Annual Re-Certification** and the **Facility Information Section**, provided you can attest to the following:

1. The most recent information submitted to the Burbank Fire Department is complete, accurate and up to date.

2. There have been no changes in the quantities of hazardous materials as reported in the most recent submittal.

3. No hazardous materials subject to the inventory reporting requirements are being handled that are not listed in the most recently submitted inventory report.

4. The most recently submitted annual inventory report contains information required by Section 11022 of Title 42 of the United States Code.

Enclosed you will find the new Hazardous Materials Inventory Disclosure Annual Re-certification, the Facility Information Section, and the Hazardous Materials Section. These Hazardous Materials Inventory Disclosure forms are currently part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions, complete the appropriate forms, and sign where indicated. Return **ORIGINAL** forms to the Burbank Fire Department by **March 1, 2002**. Failure to submit a properly completed inventory or annual re-certification statement by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

If you have any questions or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

Michael W. Davis
Chief of Fire Department

**BURBANK FIRE DEPARTMENT**
HAZARDOUS MATERIALS DIVISION
311 East Orange Grove Avenue, Burbank CA 91502-1221

# HAZARDOUS MATERIALS STATE REPORTING FORMS

Attached are your Annual Hazardous Materials reporting forms. These forms are to be completed and returned to this Department on or before March 1. Failure to complete and return these forms by March 1 may result in fines and penalties. If you require assistance in completing these forms, please feel free to contact the Burbank Fire Department, Hazardous Materials Division at **(818) 238-3475**, Monday through Friday 9:00 AM to 4:00 PM.

*To avoid late penalties, this Department recommends use of CERTIFIED MAIL to ensure delivery of these forms before the March 1 deadline.* ***Sign and date the Annual Certification Section below and keep a copy of the entire package for your records.***

## ANNUAL RE-CERTIFICATION PROCEDURE

Attached are copies of the Hazardous Materials identified at your facility based on the latest information available. Carefully review and correct any information that may be incorrect or obsolete by completing a Chemical Description Form indicating the type of change. ***If you handle Regulated Substances (RS) at or above threshold quantities, you may submit a Regulated Substance Registration Form for each RS for each process.*** Check the appropriate box(es) below that (most) corresponds to your facility's information. Return the appropriate completed forms to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Delete:** If you no longer handle any of the chemicals on the list provided you, COMPLETE A CHEMICAL DESCRIPTION FORM INDICATING "DELETE" for each chemical you no longer handle.

☐ **Add:** If you are handling new chemical(s) not previously disclosed, MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE all information on the form. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☐ **Revise/Update:** If there are corrections to your inventory information, MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE all information on the form INDICATING "REVISE". If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☑ **No Change:** Mark this Box if there are no changes to the current inventory, return the current inventory we provided to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Regulated Substance Registration:** If you are handling a Regulated Substance not previously disclosed, you must also COMPLETE the Regulated Substance Registration Form. A list of Regulated Substances is attached for reference.

## ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is true, accurate, and complete. Enclosed is our chemical inventory.

# BUSINESS OWNER/OPERATOR IDENTIFICATION

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials - Chemical Description for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report (YYYYMMDD, ex. 1999/07/01).
101. ENDING DATE Enter the ending year and date of the report (YYYYMMDD, ex. 2000/06/30).
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for the primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the person who is the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digits in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
133b. NUMBER OF EMPLOYEES Enter the number of employees working at your facility.
133c. TAX IDENTIFICATION NUMBER (TIN) Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS).
133d. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
133e. MAILING/BILLING CITY Enter the city for the mailing/billing address.
133f. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
133g. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digit s in the zip code may also be added.
133h. MAILING/BILLING CONTACT Enter the name of the person who is your Mailing/Billing contact.
133i. MAILING/BILLING NAME Enter the Name of the company or department for Mailing/Billing.
133j. MAILING/BILLING PHONE Enter the Mailing/Billing phone number.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate, and complete.

134. DATE Enter the date that the document was signed (YYYYMMDD, ex. 1999/07/01).
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
137. TITLE OF SIGNER Enter the title of the person signing the page.

| | | | | | |

# BUSINESS ACTIVITIES

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. EPA ID NUMBER If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. HAZARDOUS MATERIALS ON-SITE Check the box to indicate whether you have hazardous materials on-site. You have a hazardous material if:
   - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
   - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
   - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

   If you have hazardous materials on-site, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. UPGRADE / INSTALL UST Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan, and monitoring program plan.
7. UST CLOSURE Check the appropriate box if you are closing a UST and complete the closure portion of the UST Tank pages for each tank.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST) Check the appropriate box to indicate whether there are APSTs on-site which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g) ). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k) ) is not subject to this act and is exempt:
   - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
   - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
   - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
   - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. HAZARDOUS WASTE GENERATOR Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled on-site or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. ON-SITE HAZARDOUS WASTE TREATMENT Check the appropriate box to indicate whether your facility treats hazardous waste on-site. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste on-site, complete the On-site Hazardous Waste Treatment Notification - Facility page and one set of On-site Hazardous Waste Treatment Notification - Unit pages for each unit
12. FINANCIAL ASSURANCE Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an on-site treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.

15a. LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS) Check the box to indicate whether Regulated Substances (RS) are stored on-site. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.

15b. LOCAL HAZARDOUS MATERIALS THRESHOLD Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.

15c. LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "Yes" box, complete the Hazardous Waste Generator Form (LA County).

UNIFIED PROGRAM (UP) FORM

# REGULATED SUBSTANCE REGISTRATION

**THIS PAGE IS TO BE COMPLETED FOR A STATIONARY SOURCE THAT HANDLES A REGULATED SUBSTANCE (RS) IN A PROCESS AT OR ABOVE THE THRESHOLD QUANTITY. REGULATED SUBSTANCES (INCLUDING FEDERAL LISTED AND STATE LISTED EXTREMELY HAZARDOUS SUBSTANCES) MUST BE REGISTERED FOR THE PURPOSE OF COMPLYING WITH THE CalARP (CALIFORNIA ACCIDENTAL RELEASE PREVENTION) PROGRAM. THE OWNER OR OPERATOR SHALL COMPLETE A HAZARDOUS MATERIALS INVENTORY FORM AND A REGISTRATION FOR EACH REGULATED SUBSTANCE PER EACH PROCESS.**

BUSINESS NAME: Borrmann Steel Co.

FACILITY ID#: 000-171893

EPA ID #: 60

PROGRAM LEVEL: UNKNOWN ☐1 ☐2 ☐3

NAME OF CORPORATE PARENT COMPANY: N/A

DUN & BRADSTREET NUMBER: 04-115-5540

PERSON RESPONSIBLE FOR RMP (First Name, Last Name): Bill Sherwood

TITLE: Warehouse Manager

LATITUDE: Unknown

LONGITUDE: Unknown

PROCESS SIC: 5051

DOES THE FACILITY HAVE SUBSTANCES LISTED IN 40 CFR 355 APPENDIX A (EHS) (RS)? ☐ Yes ☑ No

DO ANY PROCESSES REQUIRE A CLEAN AIR ACT TITLE V OPERATING PERMIT ? ☐ Yes ☑ No

IS FACILITY SUBJECT TO 29CFR 1910.119/CCR 8 SEC 189(PSM) ? ☐ Yes ☑ No

LAST SAFETY INSPECTION DATE ___/___/___ AGENCY Unknown

CHEMICAL NAME:

CAS#:

# REGULATED SUBSTANCE REGISTRATION

This page is to be completed for a Stationary Source that handles a Regulated Substance (RS) in a process at or above the threshold quantity. Regulated Substances (including Federal and State Listed Extremely Hazardous Substances (EHS) (RS)) must be registered for the purpose of complying with the California Accidental Release Prevention (CalARP) program. The owner or operator shall complete a Hazardous Materials Inventory – Chemical Description page and a Regulated Substance Registration for each Regulated Substance per process. Contact your local agency (CUPA or PA) for any additional assistance.

*Note: A list of Federal and State Regulated Substances is attached for your reference.*

1. FACILITY ID NUMBER This number is assigned by the CUPA. This unique number identifies your facility.
2. EPA ID NUMBER Enter your facility's 12-character EPA identification number.
3. BUSINESS NAME Enter the full legal name of the business.

106. DUN & BRADSTREET Enter the Dun and Bradstreet number of the Principal Company or entity which owns at least 50 percent of the voting stock. The Dun and Bradstreet number allows your business to be cross referenced to various business information. You may be able to obtain this number from your finance department. If your business does not have this information, contact Dun and Bradstreet at (610) 882-7748 or via the internet at www.dnb.com.

107a PROCESS SIC CODE Enter the specific *Standard Industrial Classification Code* for the process using, treating, storing, producing, disposing, or otherwise handling regulated substances.

205. CHEMICAL NAME Enter the proper chemical name associated with the Chemical Abstract Service (CAS) number of the hazardous material. This should be the International Union of Pure and Applied Chemistry (IUPAC) name found on the Material Safety Data Sheet (MSDS).

208. EPCRA SECTION 302 The Emergency Planning and Community Right-to-Know Act requires notification of local authorities of the presence of certain Extremely Hazardous Substances listed in 40 CFR 302. 209. If you have a toxic regulated substance above the threshold quantity in a process, you are subject to EPCRA 302 and must check the box marked "yes."

209. CAS # Enter the Chemical Abstract Service number for the hazardous material.

218a. MAXIMUM DAILY AMOUNT Enter the maximum amount of hazardous material or mixture containing a hazardous material which is handled in the process at any one time over the course of the year.

221. UNITS IN POUNDS Leave this box blank. Note: All Regulated Substances must be reported in pounds.

246a. PROGRAM LEVEL Indicate the proper *Program Level* this process falls under. Mark either Program 1, 2, or 3 to identify with which program the process complies.

246b. NAME OF CORPORATE PARENT COMPANY Enter the legal name of the Principal Company or entity which owns at least 50 percent of the voting stock.

246c. PERSON RESPONSIBLE FOR RMP Enter the name of the person designated as responsible for the RMP.

246d. PERSON RESPONSIBLE FOR RMP - TITLE Enter the title of the person designated as responsible for the RMP.

246e. LATITUDE Enter the degrees of latitude for the business location. Latitude is the degrees north or south of the equator. Latitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid latitudes for LA County range from 33 17'53N to 34 49'14N. Be sure the latitude fits this range.

246f. LONGITUDE Enter the degrees of longitude for the business location. Longitude is the degrees east or west of the prime meridian. Longitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid longitudes for LA County range from 117 38'39W to 118 56'39W. Be sure the latitude fits this range.

246g. CAA TITLE V State and local operating permit programs are required under Title V of the Clean Air Act (40 CFR Part 70). Title V requires major sources of air pollution to receive permits, pay fees to cover cost of administering the program, and sign a binding certification of compliance on all permit applications and documents. Check the appropriate box, "yes" or "no."

246h. OSHA PSM The OSHA Process Safety Management Standard, codified at 29 CFR 1910.119, is similar to the Program 3 prevention program, and is designed to protect workers from the effects of accidental releases of hazardous substances. *Note:* This question covers all processes at your facility; if any process at your facility is subject to OSHA PSM, you must answer yes even if the PSM process does not involve a Regulated Substance. Answer the question either "yes" or "no."

246i. LAST SAFETY INSPECTION Enter the date of the last safety inspection of your facility and indicate the Agency (OSHA, State OSHA, EPA, State EPA, Fire Dept., etc..) that performed the inspection.

246j. PROCESS DESCRIPTION Describe the *process* and/or operations involved in the use, treatment, storage, production, disposal, or otherwise handling of the regulated substances ( include process pressures and temperature, and whether it is a raw material or an intermediate). *Note:* Any group of interconnected vessels or separate vessels, located such that a regulated substance could be involved in a potential release, is considered a single process.

246k. PRINCIPAL EQUIPMENT List the equipment and/or components used in the process involving the Regulated Substance.

246l. NAME OF OWNER / OPERATOR The full name of the owner/operator who signed the registration page.

246m. TITLE Enter the title of the person signing the page.

246n. DATE Enter the date the page was signed.

# UNIFIED PROGRAM CONSOLIDATED FORM
# REGULATED SUBSTANCE REGISTRATION

THIS PAGE IS TO BE COMPLETED FOR A STATIONARY SOURCE THAT HANDLES A REGULATED SUBSTANCE (RS) IN A PROCESS AT OR ABOVE THE THRESHOLD QUANTITY. REGULATED SUBSTANCES (INCLUDING FEDERAL LISTED AND STATE LISTED EXTREMELY HAZARDOUS SUBSTANCES) MUST BE REGISTERED FOR THE PURPOSE OF COMPLYING WITH THE Cal ARP (CALIFORNIA ACCIDENTAL RELEASE PREVENTION) PROGRAM. THE OWNER OR OPERATOR SHALL COMPLETE A HAZARDOUS MATERIALS INVENTORY FORM AND A REGISTRATION FOR EACH REGULATED SUBSTANCE PER EACH PROCESS.

| | | | |

PROCESS DESCRIPTION (246j)

1) Acetylene (74-86-2) - Used for cutting or welding of steel. Torch pressure is 40 PSI. Is used in conjunction with compressed oxygen. But not interconnected.

2) Propane (74-98-6) - Used only as fuel for our forklifts.

PRINCIPAL EQUIPMENT (246k)

1). Acetylene - Cutting torch assy ; portable.
2) Propane - Forklifts

## CERTIFICATION

**I, the owner or operator of the aforementioned business, hereby certify that the registration information provided above is true, accurate, and complete to the best of my knowledge based upon reasonable inquiry. I am fully aware that this certification executed on the date indicated below is made under penalty of perjury under the laws of the State of California.**

**BURBANK FIRE DEPARTMENT**
HAZARDOUS MATERIALS DIVISION
311 East Orange Grove Avenue, Burbank CA 91502-1221

# HAZARDOUS MATERIALS STATE REPORTING FORMS

Attached are your Annual Hazardous Materials reporting forms. These forms are to be completed and returned to this Department on or before March 1. Failure to complete and return these forms by March 1 may result in fines and penalties. If you require assistance in completing these forms, please feel free to contact the Burbank Fire Department, Hazardous Materials Division at **(818) 238-3475,** Monday through Friday 9:00 AM to 4:00 PM.

*To avoid late penalties, this Department recommends use of CERTIFIED MAIL to ensure delivery of these forms before the March 1 deadline.* ***Sign and date the Annual Certification Section below and keep a copy of the entire package for your records.***

## ANNUAL RE-CERTIFICATION PROCEDURE

Attached are copies of the Hazardous Materials identified at your facility based on the latest information available. Carefully review and correct any information that may be incorrect or obsolete by completing a Chemical Description Form indicating the type of change. ***If you handle Regulated Substances (RS) at or above threshold quantities, you may submit a Regulated Substance Registration Form for each RS for each process.*** Check the appropriate box(es) below that (most) corresponds to your facility's information. Return the appropriate completed forms to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Delete:** If you no longer handle any of the chemicals on the list provided you, COMPLETE A CHEMICAL DESCRIPTION FORM INDICATING "DELETE" for each chemical you no longer handle.

☐ **Add:** If you are handling new chemical(s) not previously disclosed, MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE all information on the form. If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☐ **Revise/Update:** If there are corrections to your inventory information, MAKE COPIES OF CHEMICAL DESCRIPTION FORM AND COMPLETE all information on the form INDICATING "REVISE". If applicable, complete the Regulated Substance Registration Form (one form per chemical).

☑ **No Change:** Mark this Box if there are no changes to the current inventory, return the current inventory we provided to us along with a newly completed and signed Business Activities Form, Business Owner/Operator Identification Form, and this Annual Re-Certification Page signed and dated.

☐ **Regulated Substance Registration:** If you are handling a Regulated Substance not previously disclosed, you must also COMPLETE the Regulated Substance Registration Form. A list of Regulated Substances is attached for reference.

## ANNUAL CERTIFICATION

I certify under penalty of law that I have personally examined the information submitted herein and believe the submitted information is true, accurate, and complete. Enclosed is our chemical inventory.

CITY OF BURBANK FIRE DEPARTMENT
HAZARDOUS MATERIALS DIVISION
311 East Orange Grove Avenue, Burbank CA 91502-1221

# HAZARDOUS MATERIALS REPORTING REQUIREMENTS

**WHO MUST REPORT?** State Law requires disclosure by all businesses that handle a hazardous material or a mixture containing a hazardous material in a quantity at any one time during the reporting year equal to or greater than a total weight of 500 pounds, or a total volume of 55 gallons, or 200 cubic feet at standard temperature and pressure for compressed gas, or the threshold quantity (if less than 500 pounds) for regulated substances. A mixture that contains one percent (1%) or more of a hazardous ingredient is a hazardous material. A mixture that contains one tenth of one *percent* (.1%) or more of a carcinogen is a hazardous material. The *California Accidental Release Prevention (CalARP) Program* requires all regulated substance handlers to register with this Department. See below for specific information.

**REPORTING MADE SIMPLE** – The City of Burbank Fire Department has simplified annual reporting. The Department will provide you with a list of last year's hazardous materials inventory. Enclosed is your Hazardous Materials Inventory as it currently appears in our database.

**CalARP PROGRAM** – The California Accidental Release Prevention (CalARP) Program replaced the California Risk Management and Prevention Program (RMPP). If you handle Regulated substances (RS) at or above a threshold quantity, you need to register. The enclosed *Regulated Substances List (Consolidated Federal and State Regulated Substances List)* replaced the Acutely Hazardous Materials (AHM) List and should be used to determine if your business is subject to the CalARP Program. Please note all flammables on the Regulated Substances List are reportable unless they are used as fuel. The reporting threshold for a regulated substance shall be determined by the quantity of the substance in a process, not the total quantity of the substance in a facility, as was previously done in the AHM Registration. Process means "any activity involving a" RS including any use, storage, manufacturing, handling, on-site movement or any combination thereof."

**MANDATORY REGULATED SUBSTANCE REGISTRATION** – Any business that has above threshold quantities of a regulated substance in a process, shall fill out the Regulated Substance (RS) Registration found on the back of the Chemical Description Form. This registration will provide information to this Department to evaluate the requirements imposed by the CalARP Program on each covered process. If your business filled out one or more RS Registration Forms, it is recommended that you contact this Department or wait for further instructions before attempting to fulfill the requirements of the CalARP Program. All regulated businesses under the CalARP Program will be notified of the requirements accordingly.

**EXEMPTIONS** – A retail store, including the interior receiving and stockroom areas, that handles hazardous materials contained solely in a consumer product for direct distribution to and used by the general public is exempt from the State reporting requirements, unless the individual container size equals or exceeds the reportable quantities in State Law.

Warehouses, storage, and/or distribution sites with a reportable quantity of hazardous material are not exempt from the disclosure reporting requirements.

Hazardous materials that are stored while in transit or temporarily maintained in a fixed facility during the course of transportation are exempt from these requirements. However, railcars or tankers containing hazardous materials are not in transit if the mode of power (i.e. locomotive or tractor) is disconnected.

Railroad cars containing hazardous materials remaining within the same railroad facility or business facility for more than thirty (30) days are deemed stored at the location and are subject to all reporting requirements.

This Department, upon written application, may exempt a handler from any portion of the Business Plan and/or exempt a hazardous material from the Inventory Form, if it is determined this exemption does not pose a significant hazard to human health, safety, or the environment.

***Reporting a release or threatened release of hazardous materials, that poses a significant, present, or potential hazard to human health and safety, property, or the environment:***

1) ***Call 911 for local emergency response personnel***
2) ***Notify this Department at (818) 238-3475 and,***
3) ***Then notify the Office of Emergency Services at (800) 852-8660 or (916) 262-1621.***

**CONSOLIDATED CONTINGENCY PLAN** – A Consolidated Contingency Plan must be submitted once every three years for all businesses that handle hazardous materials above the threshold. The consolidated contingency plan is designed to identify emergency response plans and procedures for releases and threatened releases. The Consolidated Contingency Plan also requires a training program on hazardous materials for employees on safety procedures in the event of a release or threatened release of hazardous materials.

**SITE MAP** – A business site map is required for each business that handles hazardous materials that has a quantity at any one time during the reporting year greater than a total weight of 5,000 pounds, or a total volume of 500 gallons, or 2,000 cubic feet of a compressed gas. See instructions on the back of the map for details. Blueprints will not be accepted.

**FACILITY MODIFICATIONS** – If you are the owner or operator of a new facility or your facility is being modified in a way that results in any change to the safe operating limits or that introduces a new hazard, you must contact this Department as soon as possible. CalARP Program requirements may need to be met before start-up of new or modified operations.

**VIOLATIONS AND FINES** – Any business that violates any Health and Safety Code Sections that pertain to hazardous materials reporting may be civilly liable for up to $2,000 for each day of the violation. A violation of these provisions creates liability of up to $5,000 for each day of the violation. Any person or business that, upon discovery of a release or threatened release, fails to immediately report to this Department, may be fined up to $25,000 per day of violation and/or be sentenced up to one (1) year in County jail. Furthermore, if the violation results in, or significantly contributes to, any emergency, including a fire, to which the county or city is required to respond, the person shall also be assessed the full cost of the county or city emergency response, as well as the cost of cleaning up and disposing of the hazardous material (Section 25515).

# BUSINESS OWNER/OPERATOR IDENTIFICATION

lease submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials - Chemical Description for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report (YYYYMMDD, ex. 1999/07/01).
101. ENDING DATE Enter the ending year and date of the report (YYYYMMDD, ex. 2000/06/30).
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for the primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the person who is the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digits in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
133b. NUMBER OF EMPLOYEES Enter the number of employees working at your facility.
133c. TAX IDENTIFICATION NUMBER (TIN) Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS).
133d. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
133e. MAILING/BILLING CITY Enter the city for the mailing/billing address.
133f. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
133g. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digit s in the zip code may also be added.
133h. MAILING/BILLING CONTACT Enter the name of the person who is your Mailing/Billing contact.
133i. MAILING/BILLING NAME Enter the Name of the company or department for Mailing/Billing.
133j. MAILING/BILLING PHONE Enter the Mailing/Billing phone number.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate, and complete.

134. DATE Enter the date that the document was signed (YYYYMMDD, ex. 1999/07/01).
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
137. TITLE OF SIGNER Enter the title of the person signing the page.

# INSTRUCTIONS FOR THE UNFIED PROGRAM (UP) FORM
# BUSINESS ACTIVITIES

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. EPA ID NUMBER If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. HAZARDOUS MATERIALS ON-SITE Check the box to indicate whether you have hazardous materials on-site. You have a hazardous material if:
   - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure).
   - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
   - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

   If you have hazardous materials on-site, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. UPGRADE / INSTALL UST Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan, and monitoring program plan.
7. UST CLOSURE Check the appropriate box if you are closing a UST and complete the closure portion of the UST Tank pages for each tank.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST) Check the appropriate box to indicate whether there are APSTs on-site which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g) ). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k) ) is not subject to this act and is exempt:
   - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
   - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
   - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
   - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. HAZARDOUS WASTE GENERATOR Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled on-site or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. ON-SITE HAZARDOUS WASTE TREATMENT Check the appropriate box to indicate whether your facility treats hazardous waste on-site. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste on-site, complete the On-site Hazardous Waste Treatment Notification - Facility page and one set of On-site Hazardous Waste Treatment Notification - Unit pages for each unit
12. FINANCIAL ASSURANCE Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an on-site treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.

15a. LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS) Check the box to indicate whether Regulated Substances (RS) are stored on-site. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.

15b. LOCAL HAZARDOUS MATERIALS THRESHOLD Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.

15c. LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "Yes" box, complete the Hazardous Waste Generator Form (LA County).

UNIFIED PROGRAM (UP) FORM

# REGULATED SUBSTANCE REGISTRATION

THIS PAGE IS TO BE COMPLETED FOR A STATIONARY SOURCE THAT HANDLES A REGULATED SUBSTANCE (RS) IN A PROCESS AT OR ABOVE THE THRESHOLD QUANTITY. REGULATED SUBSTANCES (INCLUDING FEDERAL LISTED AND STATE LISTED EXTREMELY HAZARDOUS SUBSTANCES) MUST BE REGISTERED FOR THE PURPOSE OF COMPLYING WITH THE CalARP (CALIFORNIA ACCIDENTAL RELEASE PREVENTION) PROGRAM. THE OWNER OR OPERATOR SHALL COMPLETE A HAZARDOUS MATERIALS INVENTORY FORM AND A REGISTRATION FOR EACH REGULATED SUBSTANCE PER EACH PROCESS.

PROCESS DESCRIPTION

(1) Acetylene 74-86-2) - Used for Cutting or welding of steel. Torch pressure 40 PSI. Is used in conjunction with Compressed oxygen But not inter connected.

(2) Propane 74-98-6) → used only as fuel for our forklifts.

PRINCIPAL EQUIPMENT 246k

(1) Acetylene - Cutting Torch assy + portable
(2) Propane - Forklifts.

## CERTIFICATION

I, the owner or operator of the aforementioned business, hereby certify that the registration information provided above is true, accurate, and complete to the best of my knowledge based upon reasonable inquiry. I am fully aware that this certification executed on the date indicated below is made under penalty of perjury under the laws of the State of California.

OWNER/OPERATOR NAME 246l: Robert G. Wedeen

Robert Wedeen
Borrmann Steel Co
110 W Olive Ave
Burbank CA 91502

**SUBJECT: 00404 - BORRMANN STEEL COMPANY**
**110 W OLIVE AVE, BURBANK**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §15-1-8001-3-3 require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health Safety Code §25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

A review of our records indicates that you completed a comprehensive inventory statement in 2000. Copies of the hazardous materials identified at your facility are included in this package. Review them carefully. If all the information is correct, you may complete the annual certification form, provided you can attest to the following:

1. The most recent information submitted to the Burbank Fire Department is complete, accurate and up to date.

2. There have been no changes in the quantities of hazardous materials as reported in the most recent submittal.

3. No hazardous materials subject to the inventory reporting requirements are being handled that are not listed in the most recently submitted inventory report.

4. The most recently submitted annual inventory report contains information required by Section 11022 of Title 42 of the United States Code.

**00404 - BORRMANN STEEL COMPANY - 110 W OLIVE AVE, BURBANK**

Enclosed you will find the new Hazardous Materials Inventory Disclosure Recertification Statement. The Hazardous Materials Inventory Disclosure Statement is currently a part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions and complete the appropriate forms. Return ORIGINAL forms to the Burbank Fire Department within 30 days from the date of this letter. Failure to submit a properly completed inventory or annual re-certification statement by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. BE SURE TO RETAIN A COPY FOR YOUR RECORDS.

If you have already submitted a Hazardous Materials Inventory Disclosure Statement to the Burbank Fire Department for 2001, ignore this request.

If you have any questions or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

Michael W. Davis
Chief of Fire Department

# Business Owner/Operator Identification (formerly OES Form 2730)

Please submit the Business Activities page, the Business Owner/Operator Identification page (OES Form 2730), and Hazardous Materials - Chemical Description pages (OES Form 2731) for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report. (YYYYMMDD, ex. 1999/07/01)
101. ENDING DATE Enter the ending year and date of the report. (YYYYMMDD, ex. 2000/06/30)
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digit s in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
133b. NUMBER OF EMPLOYEES Enter the number of employees working at your facility.
133c. TAX IDENTIFICATION NUMBER (TIN) Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS).
133d. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
133e. MAILING/BILLING CITY Enter the city for the mailing/billing address.
133f. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
133g. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digit s in the zip code may also be added.
134. DATE Enter the date that the document was signed. (YYYYMMDD, ex. 1999/07/01)
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate and complete.

137. TITLE OF SIGNER Enter the title of the person signing the page.

INSTRUCTIONS FOR THE UNIFIED PROGRAM CONSOLIDATED FORM

# Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page (OES Form 2730), and Hazardous Materials Inventory - Chemical Description pages (OES Form 2731) for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. EPA ID NUMBER If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. HAZARDOUS MATERIALS ONSITE Check the box to indicate whether you have hazardous materials onsite. You have a hazardous material if:
   - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
   - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
   - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have hazardous materials onsite, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. UPGRADE/INSTALL UST Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan and monitoring program plan.
7. UST CLOSURE Check the appropriate box if you are closing an UST and complete the closure portion of the UST Tank pages for each tank.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST) Check the appropriate box to indicate whether there are APSTs onsite which exceed the regulatory thresholds. (There is no UPCF page for APSTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC §25270.2 (g) ). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. An aboveground petroleum storage tank (APST) facility with one or more of the following (see HSC §25270.2 (k) ) is not subject to this act and is exempt:
   - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
   - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
   - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
   - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. HAZARDOUS WASTE GENERATOR Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. ONSITE HAZARDOUS WASTE TREATMENT Check the appropriate box to indicate whether your facility treats hazardous waste onsite. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste onsite, complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages for each unit.
12. FINANCIAL ASSURANCE Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank.
If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.
15a. LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS) Check the box to indicate whether Regulated Substances (RS) are stored onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.
15b. LOCAL HAZARDOUS MATERIALS THRESHOLD Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.
15c. LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "yes" box, complete the Hazardous Waste Generator Form (LA County).

INSTRUCTIONS FOR THE UNFIED PROGRAM CONSOLIDATED FORM

# REGULATED SUBSTANCE REGISTRATION

This page is to be completed for a Stationary Source that handles a Regulated Substance (RS) in a process at or above the threshold quantity. Regulated Substances (including Federal and State Listed Extremely Hazardous Substances (EHS)) must be registered for the purpose of complying with the California Accidental Release Prevention (Cal ARP) program. The owner or operator shall complete a Hazardous Materials Inventory – Chemical Description page and a Regulated Substance Registration for each Regulated Substance per process. Contact your local agency (CUPA or PA) for any additional assistance.

*Note: A list of Federal and State Regulated Substances is attached for your reference.*

1. FACILITY ID NUMBER This number is assigned by the CUPA. This unique number identifies your facility.
2. EPA ID NUMBER Enter your facility's 12-character EPA identification number.
3. BUSINESS NAME Enter the full legal name of the business.

106. DUN & BRADSTREET Enter the Dun and Bradstreet number of the Principal Company or entity which owns at least 50 percent of the voting stock. The Dun and Bradstreet number allows your business to be cross referenced to various business information. You may be able to obtain this number from your finance department. If your business does not have this information, contact Dun and Bradstreet at (610) 882-7748 or via the internet at www.dnb.com.

107a PROCESS SIC CODE Enter the specific *Standard Industrial Classification Code* for the process using, treating, storing, producing, disposing, or otherwise handling regulated substances.

205. CHEMICAL NAME Enter the proper chemical name associated with the Chemical Abstract Service (CAS) number of the hazardous material. This should be the International Union of Pure and Applied Chemistry (IUPAC) name found on the Material Safety Data Sheet (MSDS).

208. EPCRA SECTION 302 The Emergency Planning and Community Right-to-Know Act requires notification of local authorities of the presence of certain Extremely Hazardous Substances listed in 40 CFR 302. 209. If you have a toxic regulated substance above the threshold quantity in a process, you are subject to EPCRA 302 and must check the box marked "yes."

209. CAS # Enter the Chemical Abstract Service number for the hazardous material.

218a. MAXIMUM DAILY AMOUNT Enter the maximum amount of hazardous material or mixture containing a hazardous material which is handled in the process at any one time over the course of the year.

221a. UNITS IN POUNDS Leave this box blank. Note: All Regulated Substances must be reported in pounds.

246a. PROGRAM LEVEL Indicate the proper *Program Level* this process falls under. Mark either Program 1, 2, or 3 to identify with which program the process complies.

246b. NAME OF CORPORATE PARENT COMPANY Enter the legal name of the Principal Company or entity which owns at least 50 percent of the voting stock.

246c. PERSON RESPONSIBLE FOR RMP Enter the name of the person designated as responsible for the RMP.

246d. PERSON RESPONSIBLE FOR RMP - TITLE Enter the title of the person designated as responsible for the RMP.

246e. LATITUDE Enter the degrees of latitude for the business location. Latitude is the degrees north or south of the equator. Latitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid latitudes for LA County range from 33°17'53N to 34°49'14N. Be sure the latitude fits this range.

246f. LONGITUDE Enter the degrees of longitude for the business location. Longitude is the degrees east or west of the prime meridian. Longitude is measured in degrees, minutes, and seconds. We recommend the use of U.S. Geological Survey (USGS) topographical quadrangle maps to make this determination. Valid longitudes for LA County range from 117°38'39W to 118°56'39W. Be sure the latitude fits this range.

246g. CAA TITLE V State and local operating permit programs are required under Title V of the Clean Air Act (40 CFR Part 70). Title V requires major sources of air pollution to receive permits, pay fees to cover cost of administering the program, and sign a binding certification of compliance on all permit applications and documents. Check the appropriate box, "yes" or "no."

246h. OSHA PSM The OSHA Process Safety Management Standard, codified at 29 CFR 1910.119, is similar to the Program 3 prevention program, and is designed to protect workers from the effects of accidental releases of hazardous substances. *Note:* This question covers all processes at your facility; if any process at your facility is subject to OSHA PSM, you must answer yes even if the PSM process does not involve a Regulated Substance. Answer the question either "yes" or "no."

246i. LAST SAFETY INSPECTION Enter the date of the last safety inspection of your facility and indicate the Agency (OSHA, State OSHA, EPA, State EPA, Fire Dept., etc..) that performed the inspection.

246j. PROCESS DESCRIPTION Describe the *process* and/or operations involved in the use, treatment, storage, production, disposal or otherwise handling of the regulated substances ( include process pressures and temperature, and whether it is a raw material or an intermediate). *Note:* Any group of interconnected vessels or separate vessels, located such that a regulated substance could be involved in a potential release, is considered a single process.

246k. PRINCIPAL EQUIPMENT List the equipment and/or components used in the process involving the Regulated Substance.

246l. NAME OF OWNER / OPERATOR The full name of the owner/operator who signed the registration page.

246m. TITLE Enter the title of the person signing the page.

246n. DATE Enter the date the page was signed.

# Unified Program Consolidated Form
# CONSOLIDATED CONTINGENCY PLAN

BURBANK FIRE DEPT.

## I. FACILITY IDENTIFICATION

| BUSINESS NAME | | FACILITY ID # |
|---|---|---|
| BORRMANN STEEL COMPANY 31 JAN 0013 40 3 | | 1 |
| SITE ADDRESS 103 | CITY 104 | ZIP CODE 105 |
| 110 West Olive Avenue | Burbank | 91502 |

The Consolidated Contingency Plan provides businesses a format to comply with the emergency planning requirements of the following three written hazardous materials emergency response plans required in California:

- Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-2732),
- Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and,
- Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 and 2641).

This site-specific Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials which could threaten human health and/or the environment. The contingency plan shall be reviewed, and immediately amended, if necessary, whenever:

- the plan fails in an emergency,
- materially increases the potential for fires, explosions, or releases of hazardous waste or hazardous waste constituents, or changes the response necessary in an emergency,
- the list of emergency coordinators changes, or,
- the list of emergency equipment changes.

This format is designed to minimize duplication in the preparation and use of emergency response plans at the same facility, and to improve the coordination between facility response personnel and local, state and federal emergency responders during an emergency. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be completed for your facility. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

| PROGRAMS | SECTION(S) TO BE COMPLETED |
|---|---|
| Hazardous Materials Business Plan (HMBP) | Cover Page, Section I, and Site Map(s) |
| Hazardous Waste Generator (HWG) | Cover Page, Section I, and Site Map(s) |
| Underground Storage Tank (UST) | Cover Page, Sections I and II, and Site Map(s) |
| HMBP, HWG, UST | Cover Page, Sections I and II, and Site Map(s) |

**A copy of the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Describe below where a copy of your Contingency Plan, including the hazardous material inventories and Site Map(s), is located at your business:

Lock box at front door of office

We appreciate the effort of local businesses in completing these plans and will assist in every possible way. If you have any questions, please contact your local CUPA or PA.

### III. EMERGENCY RESPONSE PLANS AND PROCEDURES

#### A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

**AFTER** the local emergency response personnel are notified, you shall then notify this Unified Program Agency and the Office of Emergency Services.

Local Unified Program Agency: (818) 238-3475
State Office of Emergency Service: (800) 852-7550 or (916) 262-1621
National Response Center: (800) 424-8802

Information to be provided during Notification:

- Your Name and the Telephone Number from where you are calling.
- Exact address of the release or threatened release.
- Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- Material and quantity of the release, to the extent known.
- Current condition of the facility.
- Extent of injuries, if any.
- Possible hazards to public health and/ or the environment outside of the facility.

#### B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material. HealthCenter

| HOSPITAL/CLINIC: Providence St. Joseph Occupational | PHONE NO: 8-1-8 953-4434 |
|---|---|
| ADDRESS: 3413 Pacific Avenue | |
| STATE: Burbank, CA | ZIP CODE: 91505 |

#### C. Private On-Site Emergency Response Team

DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM? ☐ Yes ☒ No

If yes, describe what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

# Unified Program Consolidated Form
## CONSOLIDATED CONTINGENCY PLAN
## SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

### D. Arrangements With Emergency Responders

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below: NO

### E. Evacuation Plan

1. The following alarm signal(s) will be used to begin evacuation of the facility *(check all which apply)*:

☒ Verbal ☐ Telephone *(including cellular)* ☐ Alarm System ☐ Public Address System ☐ Intercom
☐ Pagers ☐ Portable Radio ☐ Other *(specify)*:

2. ☐ Evacuation map is prominently displayed throughout the facility.

3. ☐ Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

Bill Sherwood / Warehouse Supervisor (Back-up) Robert G. Wedeen / Vice President Executive

### F. Earthquake Vulnerability

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☑ Hazardous Waste/ Hazardous Materials Storage Areas ☐ Production Floor ☐ Process Lines
☐ Bench/ Lab ☐ Waste Treatment ☐ Other:

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☑ Utilities ☑ Sprinkler Systems ☑ Cabinets ☐ Shelves
☑ Racks ☐ Pressure Vessels ☑ Gas Cylinders ☑ Tanks

### G. Emergency Procedures

Briefly describe your business standard operating procedures in the event of a release or threatened release of hazardous materials: Evacuate area, call Fire Department

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

1) Propane: Fire hazard only. Evacuate area and call fire department. Storage is clearly marked and a fire extinguisher is located near area.
2) Acetylene: Fire hazard only: Bottles are stored in approved rack. Evacuate area, call fire department.

**Unified Program Consolidated Form**
**CONSOLIDATED CONTINGENCY PLAN**
**SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN**

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

Reduce the amount being stored by having the bottles refilled or replaced more often.

Evacuate immediate area and call fire dept.

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

If leaking occurred we would remove bottle and let it empty itself in a well ventilated area. Keeping all employees well away from the leak.

## II. Emergency Equipment

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3) requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

**EMERGENCY EQUIPMENT INVENTORY TABLE**

| 1. Equipment Category | 2. Equipment Type | 3. Location * | 4. Description** |
|---|---|---|---|
| Personal Protective, Equipment, Safety Equipment, and First Aid Equipment | ☐ Cartridge Respirators | | |
| | ☐ Chemical Monitoring Equipment *(describe)* | | |
| | ☐ Chemical Protective Aprons/Coats | | |
| | ☐ Chemical Protective Boots | | |
| | ☐ Chemical Protective Gloves | | |
| | ☐ Chemical Protective Suits *(describe)* | | |
| | ☐ Face Shields | | |
| | ☒ First Aid Kits/Stations *(describe)* | A,C | Bandages, spraycleaner etc. |
| | ☒ Hard Hats | A | Plastic hat |
| | ☐ Plumbed Eye Wash Stations | | |
| | ☒ Portable Eye Wash Kits *(i.e. bottle type)* | C | Cleansing eye solution |
| | ☐ Respirator Cartridges *(describe)* | | |
| | ☒ Safety Glasses/~~Splash Goggles~~ | A | Plastic eyewear |
| | ☐ Safety Showers | | |
| | ☐ Self-Contained Breathing Apparatuses (SCBA) | | |
| | ☐ Other *(describe)* | | |
| Fire Extinguishing Systems | ☒ Automatic Fire Sptinkler Systems | C | Water sprinkler |
| | ☐ Fire Alarm Boxes/Stations | | |
| | ☐ Fire Extinguisher Systems *(describe)* | | |
| | ☐ Other *(describe)* | | |
| Spill Control Equipment and Decontamination Equipment | ☒ Absorbents (describe) | A,D | granulated clay |
| | ☐ Berms/Dikes (describe) | | |
| | ☐ Decontamination Equipment (describe) | | |
| | ☐ Emergency Tanks (describe) | | |
| | ☐ Exhaust Hoods | | |
| | ☐ Gas Cylinders Leak Repair Kits (describe) | | |
| | ☐ Neutralizers (describe) | | |
| | ☐ Overpack Drums | | |
| | ☐ Sumps (describe) | | |
| | ☐ Other (describe) | | |
| Communications and Alarm Systems | ☐ Chemical Alarms (describe) | | |
| | ☐ Intercoms/ PA Systems | | |
| | ☐ Portable Radios | | |
| | ☐ Telephones | | |
| | ☐ Underground Tank Leak Detection Monitors | | |
| | ☐ Other (describe) | | |
| Additional Equipment (Use Additional Pages if Needed.) | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

* *Use the Location Codes (LC) from the Storage Map(s) prepared for your Contingency Plan.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

# CONSOLIDATED CONTINGENCY PLAN
# SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

## Employee Training Plan

All facilities which handle hazardous materials must have a written employee training plan. A blank plan has been provided below for you to complete and submit. Check all boxes which apply.
*[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

- [x] Internal alarm/notification *
- [x] Evacuation/re-entry procedures and assembly point locations*
- [x] Emergency incident reporting
- [ ] External emergency response organization notification
- [x] Location(s) and contents of Contingency Plan
- [ ] Facility evacuation drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

- [x] Safe methods for handling and storage of hazardous materials *
- [x] Location(s) and proper use of fire and spill control equipment
- [ ] Spill procedures/emergency procedures
- [x] Proper use of personal protective equipment *
- [x] Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
- [ ] **Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* * NA

3. **Emergency Response Team Members** are capable of and engaged in the following:

- [ ] Personnel rescue procedures
- [ ] Shutdown of operations
- [ ] Liaison with responding agencies
- [ ] Use, maintenance, and replacement of emergency response equipment
- [x] Refresher training, which is provided at least annually *
- [ ] Emergency response drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

## Recordkeeping

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is required. A blank summary has been provided below for you to complete and submit. Check all boxes which apply. The following records are maintained at the facility.
*[Note: Items marked with an asterisk (*) are required.]*:

- [x] Current employees' training records *(to be retained until closure of the facility)* *
- [x] Former employees' training records *(to be retained at least three years after termination of employment)* *
- [x] Training Program(s) *(i.e. written description of introductory and continuing training)* *
- [x] Current copy of this Contingency Plan *
- [x] Record of recordable/reportable hazardous material/waste releases *
- [x] Record of hazardous material/waste storage area inspections *
- [ ] Record of hazardous waste tank daily inspections * N/A
- [ ] Description and documentation of facility emergency response drills

*Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.*

## II. MONITORING PLAN AND PROCEDURES

**1. The frequency of monitoring is as follows:**

a. Tank:

b. Piping:

**2. The methods and equipment (name and model) used for monitoring include:**

a. Tank:

b. Piping:

**3. The location (s) where monitoring will be performed include (see attached plot plan for further details):**

Attach one page plot plan showing:
1. Location of underground storage tanks, buildings, and property lines.
2. Location of monitoring points and the monitoring system is located.

**4. The name(s) of responsible person (s) performing the monitoring and/or maintaining the equipment include:**

**5. The reporting format for all monitoring performed is as follows:**

a. Tank:

b. Piping:

**6. The preventative maintenance schedule for the monitoring equipment is:**

**7. The training necessary for the operation of UST systems, including piping and monitoring equipment includes:**

Note: Training is scheduled and provided on _____ basis and training records for personnel are kept at the facility.

| Signature of Owner/ Operator | Date |

# Unified Program Consolidated Form
# CONSOLIDATED CONTINGENCY PLAN

## SITE MAP

A site plan and storage map must be included with your Contingency Plan. For relatively small facilities, these documents may be combined into one drawing. Since these drawings are intended for use in emergency response situations, larger facilities *(generally those with complex and/or multiple buildings)* should provide an overall site plan and a separate storage map for each building/storage area. A blank Facility Site Map has been provided on the reverse side of this page You may complete that page or attach any other drawing(s) which contain(s) the information required below.

**1. Site Plan:** This drawing shall contain, at a minimum, the following information:

a. Site Orientation (north, south, etc.);
b. Approximate scale *(e.g. "1 inch = 10 feet".)*;
c. Date the map was drawn;
d. Locations of all buildings and other structures;
e. Parking lots and internal roads;
f. Hazardous materials loading/unloading areas;
g. Outside hazardous materials storage or use areas;
h. Storm drain and sanitary sewer drain inlets;
i. Wells for monitoring of underground tank systems;
j. Primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas;
k. Adjacent property use;
l. Locations and names of adjacent streets and alleys;
m. Access and egress points and roads.

**2. Storage Map(s):** The map(s) shall contain, at a minimum, the following information:

a. General purpose of each section/area within each building *(e.g. "Office Area", "Manufacturing Area", etc.)*;
b. Location of each hazardous material/waste storage, dispensing, use, or handling area *(e.g. individual underground tanks, aboveground tanks, storage rooms, paint booths, etc.)*. Each area shall be identified by a unique location code number, letter, or name *(e.g. "1", "2", "3"; "A", "B", "C", etc.)*;
c. Entrances to and exits from each building and hazardous material/waste room/area;
d. Location of each utility emergency shut-off point *(i.e. gas, water, electric.)*;
e. Location of each monitoring system control panel *(e.g. underground tank monitoring, toxic gas monitoring, etc.)*.

Borrmann Steel Co
110 W Olive Ave
Burbank, CA 91502

**SUBJECT: HAZARDOUS MATERIALS INVENTORY DISCLOSURE STATEMENT**
**00404 110 W OLIVE AVE, BURBANK**

In July 1997, the City of Burbank became part of the Los Angeles County Certified Unified Program Agency (LACoCUPA). The LACoCUPA consolidates six environmental programs. The City of Burbank is responsible for the management of four of these six programs. They include Underground Storage Tanks, Hazardous Materials Disclosure and Response, Risk Management, and enforcement of the Hazardous Materials Management requirements of the Fire Code.

California Health & Safety Code, Chapter 6.95, Article 1 and Burbank Municipal Code §5-1-8001-3-3 require all businesses that store, use, or handle hazardous materials in quantities that meet or exceed the thresholds established in Health & Safety Code §25503.5, must submit a completed hazardous materials inventory disclosure statement annually. Our records indicate that you meet these requirements.

Enclosed you will find the new Hazardous Materials Business Plan and Inventory Disclosure Statements. The Hazardous Materials Business Plan and Inventory Disclosure Statements are currently a part of a Consolidated Permit Package issued by the Los Angeles County Certified Unified Program Agency (LACoCUPA). Please carefully read the instructions and complete the appropriate forms. Return **ORIGINAL** carefully completed forms to the Burbank Fire Department within 30 days from the date of this letter. Failure to submit a properly completed inventory and Business Plan by the due date could result in civil penalties. A self-addressed envelope is enclosed for your convenience. **BE SURE TO RETAIN A COPY FOR YOUR RECORDS.**

If you have any questions or if we can be of any assistance, please contact the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

FIRE DEPARTMENT

MICHAEL W. DAVIS
FIRE CHIEF

June 7, 1999

Borrman Steel Co.
110 W. Olive Ave
Burbank CA 91502

**SUBJECT: DELINQUENT HAZARDOUS MATERIALS INVENTORY REPORT SUBMITTAL**

A fire prevention inspection of the above address conducted May 27, 1999 indicated the following hazardous materials were present at your facility.

- 3 – 55 gallon drums of 15W40 motor oil
- 2 – 55 gallon drums of hydraulic fluid
- 6 – 1 gallon containers of cutting oil
- 1 – 55 gallon drum of deburring compound
- 5 gallons of laquer thinner
- 1,006 gallons of liquid oxygen (942 gallons of 150" $H_2O$) 115,691 cubic feet total gas volume NTP
- Compressed gases
  Oxygen 250 cubic feet
  Argon/$CO_2$ mix – 250 cubic feet
  2 – Acetylene – 145 cubic feet/each – 290 cubic feet total
- LPG Cylinders
  6 (35.8#) – 302.56 cubic feet
  4 (40#) – 338.06 cubic feet
- And any additional chemicals handled and or stored on site.

Our records indicate that your business has not submitted a properly completed Hazardous Materials Inventory Report as required by the Burbank Fire Department. You are required to submit a complete Hazardous Materials Inventory Disclosure in accordance with Burbank Municipal Code §15-1-8001.3.3 and California Health and Safety Code, Chapter 6.95, Article 1, §25500 to 25520. You were issued a Hazardous Materials Inventory Disclosure Packet which

included the Hazardous Materials Inventory Report Forms August 10, 1998. The Hazardous Materials Inventory Report was due September 30, 1998. Failure to submit a properly completed packet in a timely fashion could result in civil and criminal penalties of up to $5,000 per day and/or up to one year in jail.

This letter notifies you that the Burbank Fire Department will ask the City Attorney's Office to proceed with legal action against your business if the completed Hazardous Materials Inventory Statement is not received by the Burbank Fire Department within 21 days from the date of this letter.

If you have any questions regarding this matter, please contact Devin Burns (818) 238-3475

Your cooperation in this matter is appreciated.

FIRE DEPARTMENT

MICHAEL W. DAVIS
FIRE CHIEF

June 7, 1999

Borrman Steel Co.
110 W. Olive Ave
Burbank CA 91502

A fire prevention inspection of the above address conducted on May 27, 1999 indicated that there are variances with the Uniform Fire Code. The following corrections are required:

- Provide a separate Hazardous Material Inventory Sheet for each building including its appurtenant structures and each exterior facility in which hazardous materials are stored. [UFC 8001.3 and UFC Appendix II-E]

- Provide the Fire Department with a completed Business and Site Plan within 30 days. [Health and Safety Code Section 25505]

- Provide placarding per NFPA 704 Standards. Placards should be affixed to the upper left corner of the building and have the following information:
  HEALTH - 4
  FLAMMABILITY - 3
  REACTIVITY - 4
  SPECIAL HAZARDS - OXY.
  Refer to the enclosed handout regarding placarding. [UFC 8001.7 and 8004.1.9]

Work should be completed immediately upon receipt of this advisory. Reinspection will be made in approximately two weeks. If you have any questions, please call the Fire Prevention Bureau at (818) 238-3475.

Thank you for your cooperation.

# INSTRUCTIONS FOR COMPLETION OF THE CONSOLIDATED PERMIT APPLICATION PACKAGE

## FACILITY INFORMATION (*FORMERLY* OES FORM 2730)

1. **FACILITY ID NUMBER** Enter your Facility ID number, if known. Otherwise, leave this blank. This number is assigned by LA County Fire Department. This is the unique number which identifies your facility.
3. **BUSINESS NAME** Enter the full legal name of the business.
5. **REGULATED SUBSTANCES (RS) STORED ONSITE?** Check the appropriate box to indicate whether Regulated Substances (RS) are onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached list. If you handle RS at greater than the threshold planning quantities then you must complete the Facility Information Form (OES Form 2730), the Hazardous Materials Inventory - Chemical Description Section (OES Form 2731), and the CalARP- State Registration Section (OES Form 2735.6) as well as a Consolidated Contingency Plan, and Training Plan.
100. **YEAR BEGINNING** Enter the beginning calendar date and year of the report (i.e. January 1, 1998).
101. **YEAR ENDING** Enter the ending calendar date and year of the report (i.e. December 31, 1998).
102. **TOTAL PAGES** The total number of pages in the inventory, including this page.
103. **BUSINESS PHONE** Enter the business phone number, area code first, and any extension.
104. **SITE ADDRESS** Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
105. **BUSINESS CITY** Enter the city or unincorporated area where the facility is located.
106. **BUSINESS ZIP** Enter the zip code for the facility. The extra 4 digit zip may also be added.
107. **DUN & BRADSTREET** Enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748.
108. **SIC CODE** The primary Standard Industrial Classification 4 Digit Code for the facility.
109. **COUNTY** Enter the county in which the facility is located.
110. **(BUSINESS) OPERATOR NAME** Enter the name of the business operator.
111. **(BUSINESS) OPERATOR PHONE** Enter business operator phone number, if different from business phone, area code first, and any extension.
112. **(BUSINESS) OWNER NAME** Enter name of business owner, if different from business operator name.
113. **(BUSINESS) OWNER PHONE** Enter the owner's phone number if different from business phone, area code first, and any extension.
114. **(BUSINESS) OWNER MAILING ADDRESS** Enter the owner's mailing address if different from business site address.
115. **(BUSINESS) OWNER CITY** Enter the name of the city for the owner's mailing address.
116. **(BUSINESS) OWNER STATE** Enter the 2 character state abbreviation for the owner's mailing address.
117. **(BUSINESS) OWNER ZIP** Enter the zip code for the owner's address. The extra 4 digit zip may also be added.
118. **ENVIRONMENTAL CONTACT NAME** Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
119. **ENVIRONMENTAL CONTACT PHONE** Enter the phone number at which the environmental contact can be contacted, area code first, and any extension.
120. **ENVIRONMENTAL CONTACT STREET ADDRESS** Enter the mailing address where all environmental contact correspondence should be sent, if different from the site address.
121. **ENVIRONMENTAL CONTACT CITY** Enter the name of the city for the environmental contact address.
122. **ENVIRONMENTAL CONTACT STATE** Enter the 2 character state abbreviation for the environmental contact address.
123. **ENVIRONMENTAL CONTACT ZIP** Enter the zip code for the environmental contact address. The extra 4 digit zip may also be added.
124. **PRIMARY EMERGENCY CONTACT NAME** Enter the name of a facility representative that can be contacted in case of an emergency involving hazardous materials at the facility. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
125. **PRIMARY EMERGENCY CONTACT TITLE** Enter the title of the primary contact.
126. **PRIMARY EMERGENCY CONTACT BUSINESS PHONE** Enter the phone number for the primary contact, area code first, and any extensions.
127. **PRIMARY EMERGENCY CONTACT 24-HOUR PHONE** Enter a 24-hour phone number for the primary contact. The 24-hour phone number must be one which is answered 24 hours a day and if not the contact's home phone number, then the service answering the phone must be able to immediately contact the above stated individual.
128. **PRIMARY EMERGENCY CONTACT PAGER NUMBER** Enter the pager telephone number for the primary contact, if available.
129. **ALTERNATE (SECONDARY) EMERGENCY CONTACT NAME** Enter the name of facility official that can be contacted in the event that the primary contact is not available. The contact shall have full facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
130. **ALTERNATE (SECONDARY) EMERGENCY CONTACT TITLE** Enter the title of the secondary emergency contact.
131. **ALTERNATE (SECONDARY) EMERGENCY CONTACT BUSINESS PHONE** Enter the business number for the secondary contact, area code first, and any extension.
132. **ALTERNATE (SECONDARY) EMERGENCY CONTACT 24-HOUR PHONE** Enter a 24-hour phone number for the secondary contact. The 24 hour phone number must be one which is answered 24 hours a day and if not the contact's home phone number, then the service answering the phone must be able to immediately contact the above stated individual.
133. **ALTERNATE (SECONDARY) EMERGENCY CONTACT PAGER NUMBER** Enter the pager number for the secondary contact, if available.
135. **NAME OF DOCUMENT PREPARER** The full name of the person who prepared the inventory submittal information.
136. **NAME OF OWNER / OPERATOR** The full name of the owner/operator who signed the inventory submittal information.
137. **SIGNATURE OF OWNER / OPERATOR** The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signatory believes that all the information submitted in the inventory is accurate and complete.
138. **TITLE** Enter the title of the person signing the form.
139. **DATE CERTIFIED** Enter the date that the document was signed.
150. **MAILING/BILLING ADDRESS** The address that all correspondence and bills should be sent.
151. **MAILING/BILLING CITY** The name of the city for the mailing/billing address.
152. **MAILING/BILLING STATE** The 2 character state abbreviation for the mailing/billing address.
153. **MAILING/BILLING ZIP** Zip Code + 4.

# ACTIVITY DECLARATION

PAGE ___ OF ___

## I. FACILITY IDENTIFICATION

| | | | |
|---|---|---|---|
| FACILITY ID # | 1 | EPA ID # CALØØØ171893 | 2 |
| DBA/FACILITY NAME BORRMANN STEEL COMPANY | 3 | | |

## II. ACTIVITIES DECLARATION

If your facility does any of the following activities. ▸ Submit Facility Information Form and any of the following applicable form(s)

| Does Your Facility... | | If Yes, Please Complete... |
|---|---|---|
| **A. HAZARDOUS MATERIALS** Have hazardous materials stored onsite (for any purpose) at or above 55 galonls for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids stored in aboveground and underground storage tanks) ? | ☑YES ☐NO 4 | ▸ CHEMICAL DESCRIPTION FORM (OES Form 2731)<br>▸ CONSOLIDATED CONTINGENCY PLAN (format not included)<br>▸ TRAINING PLAN (format not included) |
| **B. REGULATED SUBSTANCES (RS)** Have Regulated Substances stored onsite (RS) at greater than the threshold planning quantities established by the California Accidental Release Prevention program (Cal/ARP) ? | ☐YES ☑NO 5 | ▸ CHEMICAL DESCRIPTION FORM (OES Form 2731)<br>▸ REGULATED SUBSTANCE REGISTRATION FORM (OES Form 2735.6)<br>▸ CONTINGENCY PLAN (format not included)<br>▸ TRAINING PLAN (format not included) |
| **C. UNDERGROUND STORAGE TANKS**<br>1. Own or operate underground storage tanks (UST) ?<br>2. Intend to upgrade existing or install new USTs ? | 1. ☐YES ☑NO 6<br>2. ☐YES ☑NO 7 | ▸ UST FACILITY FORM<br>▸ UST TANK FORM (one per tank)<br>▸ UST INSTALLATION FORM (one per tank) |
| **D. TANK CLOSURE / REMOVAL**<br>1. Need to report closing a UST that held hazardous materials or waste?<br>2. Need to report the closing/removal of a tank that was itself classified as hazardous waste? | 1. ☐YES ☑NO 8<br>2. ☐YES ☑NO 9 | ▸ UST TANK FORM (closure section-one per tank)<br>▸ UST CLOSURE FORM (format not included) |
| **E. ABOVE GROUND PETROLEUM STORAGE TANKS (APSTs or ASTs)** Own or operate ASTs above these thresholds; any tank capacity is greater than 650 gallons or the total capacity for the facility is greater than 1,320 gallons | ☐YES ☑NO 10 | ▸ No form is required at this time. However, if you answered yes, prepare and maintain an SPCC plan as part of your contingency plan to address oil spills and releases from the AST(s) at your facility." |
| **F. HAZARDOUS WASTE:**<br>1. Generate hazardous waste? | ☐YES ☑NO 11 | ▸ EPA ID number - provide on this page<br>▸ As a Generator of Hazardous Waste, answer yes to item G, Local Requirements, and complete applicable forms |
| 2. Recycle more than 100 kg/mo of recyclable materials at the same location it was generated?<br>3. Recycle more than 100 kg/mo of recyclable materials at an offsite location different from the point of generation? | 2. ☐YES ☑NO 12<br>3. ☐YES ☑NO 13 | ▸ RECYCLABLE MATERIALS FORM |
| 4. Treat Hazardous Waste on site?<br>5. Subject to Financial Assurance Requirement? | 4. ☐YES ☑NO 14<br>5. ☐YES ☑NO 15 | ▸ TIERED PERMITTING FACILITY FORM<br>▸ TIERED PERMITTING UNIT FORM (one per unit)<br>▸ CERTIFICATION OF FINANCIAL ASSURANCE |
| 6. Consolidate Hazardous Waste generated at a remote site? | ☐YES ☑NO 16 | ▸ REMOTE WASTE / CONSOLIDATION SITE NOTIFICATION FORM |
| **G. LOCAL REQUIREMENTS**<br>1. Have onsite for any purpose hazardous materials at or above a threshold amount established by the local agency of CUPA?<br>2. Required by CUPA to provide other information? | 1. ☐YES ☑NO 17<br>2. ☐YES ☑NO 18 | ▸ CONSULT LOCAL AGENCY OR CUPA FOR REPORTING REQUIREMENTS<br>▸ WASTE GENERATOR FORM (LA County) . |

# INSTRUCTIONS FOR COMPLETION OF THE CONSOLIDATED PERMIT APPLICATION PACKAGE

## ACTIVITY DECLARATION FORM

1. **FACILITY ID NUMBER** Enter your Facility ID number, if known. Otherwise, leave this blank. This number is assigned by LA County Fire Department. This is the unique number which identifies your facility.
2. **EPA ID #** If you generate, store, treat or dispose hazardous waste, enter your facility's 12 character EPA ID number issued by the U.S. EPA Cal EPA/ DTSC. (Note: Contact Cal EPA/ DTSC at (916) 324-1781, (800) 618-6942 for information on obtaining an EPA ID number).
3. **BUSINESS NAME** Enter the full legal name of the business.
4. **HAZARDOUS MATERIALS STORED ONSITE** Check the appropriate box to indicate whether you store reportable quantities of hazardous material onsite. The State of California defines a Hazardous Material as "*any material that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health or to the environment*" (H&S C § 25501(n)). If your vendor has supplied a Material safety Data Sheet (MSDS) for a material, it is probably a hazardous material. If it is flammable, combustible, corrosive, toxic, reactive, unstable, an oxidizer, radio active, explosive, pyroforic, crogenic, an irritant, a sensitizer, or stored as a compressed gas or a liquified gas, consider the material to be hazardous. Hazardous materials include but are not limited to hazardous substances and hazardous wastes.
5. **REGULATED SUBSTANCES (RS) STORED ONSITE?** Check the appropriate box to indicate whether Regulated Substances (RS) are onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle RS at greater than the threshold planning quantities then you must complete the Facility Information Form (OES Form 2730), the Hazardous Materials Inventory- Chemical Description Section (OES Form 2731), and the CalARP- State Registration Section (OES Form 2735.6) as well as a Consolidated Contingency Plan, and Training Plan.
6. **UNDERGROUND STORAGE TANKS (USTs) - OWN OR OPERATE** Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances defined in HSC § 25281(g). If yes, complete the UST Facility Form, (*formerly* SRWCB Form A) and a UST Tank Form (*formerly* SRWCB Form B) for each tank.
7. **USTs-INSTALL OR UPGRADE** Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances defined in HSC § 25281(g). If yes, complete the UST Installation Form (*formerly* SRWCB Form C).
8. **UST TANK CLOSURE / REMOVAL** Check the appropriate box to indicate whether a UST which held hazardous materials is being closed in place. If yes, complete the Removal UST Tank Form (*formerly* SRWCB Form B).
9. **CLOSURE / REMOVAL OF A UST WHICH ITSELF WAS HAZARDOUS WASTE** Check the appropriate box to indicate whether the tank being closed would itself be classified as hazardous waste, after its contents are removed. Examples of wastes found in removed USTs may include but are not limited to asbestos, lead, and PCBs. If the removed UST is hazardous waste, after removal of its contents, complete the Tank Closure Certification Form. *(Note: the tank owner has responsibility to assure that a waste determination was made on the removed tank to determine whether or not the tank was hazardous waste).*
10. **ABOVEGROUND PETROLEUM STORAGE TANKS (APSTs) ONSITE** Check the appropriate box to indicate whether there are APSTs onsite which exceed the regulatory thresholds. This section applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof; which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (H&SC §25270.2(g)). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. *Note: Per H&SC § 25270.2(k), the following APSTs are exempt from requirements:*
    - *A pressure vessel or boiler which is subject to Division 5 of the Labor Code.*
    - *A storage tank containing hazardous waste if a hazardous waste facilities permit has been issued for the storage tank by the Department of Toxic Substances Control.*
    - *An aboveground oil production tank which is regulated by the Division of Oil and Gas.*
    - *Certain oil-filled electrical equipment including but not limited to transformers, Circuit breakers, or capacitors.*
11. **HAZARDOUS WASTE GENERATOR** Check the appropriate box to indicate whether your facility generates hazardous waste. If yes, go to item number 18 and complete the Waste Generator Form. If your facility generates hazardous waste, you must obtain and use an EPA Identification number in order to properly transport and dispose of it. *Hazardous Waste are defined in State laws and regulations (H&SC § 25117, 25141, 22 CCR § 66261.3, 66261.10). Hazardous wastes exhibit corrosive, ignitable, reactive, and toxic characteristics. Examples of common hazardous wastes generated by businesses include waste oil, waste dry cleaning solvent, parts cleaning solvent waste, waste photo developing chemicals, waste paint, and waste printing inks.*
12. **ONSITE HAZARDOUS MATERIALS RECYCLER** Check the appropriate box to indicate whether your facility recycles hazardous materials which were generated onsite. If you recycle more than 100 kilograms per month of recyclable material under a claim that the material qualifies for exclusion or exemption pursuant to Section 25143.2 of the California Health & Safety Code (H&SC), and the generator is the same entity as the recycler, then check "yes", and complete the Recyclable Materials Reporting Form.
13. **OFFSITE HAZARDOUS MATERIALS RECYCLER** Check the appropriate box to indicate whether your facility recycles hazardous materials which were generated offsite. If you recycle more than 100 kilograms per month of recyclable material under a claim that the material qualifies for exclusion or exemption pursuant to H&SC §25143.2, and the generator was NOT the same entity as the recycler, then check "yes" and complete the Recyclable Materials Reporting Form.
14. **ONSITE HAZARDOUS WASTE TREATMENT** Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment or onsite recycling activities exempted from the definition of treatment by HSC § 25143.2. If your facility treats hazardous waste onsite, complete the Onsite Hazardous Waste Treatment Notification- Facility Form and the Onsite Hazardous Waste Treatment Notification-Unit Form (*formerly* DTSC form 1772).
15. **FINANCIAL ASSURANCE** Check the appropriate box to indicate whether your facility is subject to Financial Assurance requirements. Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13(b), H&SC §25245.4.), unless they are exempt. If your facility is subject to Financial Assurance requirements, then complete the Certification Of Financial Assurance Form (*formerly* DTSC form 1232).
16. **CONSOLIDATE HAZARDOUS WASTE** Check the appropriate box to indicate whether the facility consolidates hazardous waste generated at a remote site. Answer yes if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transport the hazardous waste to a consolidation site you operate. This activity must be eligible as provided by HSC § 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification Form (*formerly* DTSC form 1196).
17. **OTHER HAZARDOUS MATERIALS** Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local agency or CUPA. Check with your local Fire Department or CUPA for details.
18. **LOCAL REQUIRED INFORMATION** Check the "yes" box if your facility answered yes to item number 11 and generates hazardous waste. If you checked the "yes" box, complete the Waste Generator Form.

# REGULATED SUBSTANCE REGISTRATION
# (OES 2735.6)

THIS FORM IS TO BE COMPLETED FOR A STATIONARY SOURCE THAT HANDLES A REGULATED SUBSTANCE (RS) IN A PROCESS AT OR ABOVE THE THRESHOLD QUANTITY. REGULATED SUBSTANCES (WHICH INCLUDE EXTREMELY HAZARDOUS SUBSTANCES IN CALIFORNIA) MUST BE REGISTERED FOR THE PURPOSE OF COMPLYING WITH THE CALIFORNIA ACCIDENTAL RELEASE PREVENTION PROGRAM (CalARP). THE OWNER OR OPERATOR SHALL COMPLETE A SINGLE REGISTRATION FOR EACH REGULATED SUBSTANCE PER PROCESS.

| | | | |
|---|---|---|---|
| BUSINESS NAME: Borrmann Steel Company (3) | | FACILITY ID# Unknown (1) | |
| U.S. EPA ID#: 000 171893 (2) | NUMBER OF FT EMPLOYEES: 60 (350) | PROGRAM LEVEL: Unknown ☐1 ☐2 ☐3 (351) | |

| RERSON RESPONSIBLE FOR RMP (First Name, Last Name): Bill Sherwood (354) | | TITLE: Warehouse Supervisor (355) | |
| LATITUDE: Unknown (356) | LONGITUDE: Unknown (357) | PROCESS SIC: 5051 (358) | |
| IS FACILITY SUBJECT TO 29CFR 1910.119/CCR 8 SEC 5189(PSM) ? ☐ YES ☒ NO (359) | | DOES THE PROCESS REQUIRE A CAA TITLE V OPERATING PERMIT ? ☐ YES ☒ NO (360) | |
| IS SUBSTANCE LISTED IN 40 CFR 355 APPENDIX A (EHS)? No (361) | | LAST SAFETY INSPT: AGENCY Unknown DATE _____ (362) | |

**PROCESS DESCRIPTION:** (303)

1). ACETYLENE 74-86-2) - Used for cutting or welding of steel. Torch pressure is 40 PSI. Is used in conjunction with compressed oxygen. But not ~~interconnect~~ interconnected.

2). PROPANE 74-98-6) - Used only as fuel for our forklifts.

**PRINCIPAL EQUIPMENT** (363)

1). Acetylene - Cutting torch assy & portable.

2). Propane - Forklifts.

## CERTIFICATION

I, the owner or operator of the aforementioned business, hereby certify that the registration information provided above is true, accurate, and complete to the best of my knowledge, based upon reasonable inquiry. I am fully aware that this certification, executed on the date indicated below, is made under penalty of perjury under the laws of the State of California.

# HAZARDOUS MATERIALS BUSINESS PLAN

## I. FACILITY IDENTIFICATION

| BUSINESS NAME (Facility Name or DBA) 3 | FACILITY ID # 1 |
|---|---|
| Borrmann Steel Company | |

## II. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Administering Agency and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

| INDIVIDUAL RESPONSIBLE FOR CALLING 911 | (Backup) |
|---|---|
| Bill Sherwood /Warehouse Supervisor | Robert G. Wedeen/Executive Vice President |

**AFTER** the local emergency response personnel are notified, you shall then notify this Administering Agency and the Office of Emergency Services.

Local Administering Agency: (323) 890-4000
State Office of Emergency Service: (800) 852-7550 or (916) 262-1621

| INDIVIDUAL RESPONSIBLE FOR CALLING THIS ADMINISTERING AGENCY AND THE STATE OFFICE OF EMERGENCY SERVICES. | (Backup) |
|---|---|
| Bill Sherwood /Warehouse Supervisor | Robert G. Wedeen/Executive Vice President |

B. List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

| HOSPITAL/CLINIC: | | PHONE NO: |
|---|---|---|
| Providence St. Joseph Occupational Health Center | | 818/953-4434 |
| ADDRESS: 3413 Pacific Avenue, Burbank | STATE: CA | ZIP CODE: 91505 |

C. **DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM?** ☐ Yes ☒ No
If yes, describe what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

***State law requires your business to complete all sections of this Emergency Response Procedure listed below. The entry "Not Applicable" is not permitted. Use only the space provided, no attachments or supplements will be accepted.***

D. Briefly describe your business'standard operating procedures in the event of a release or threatened release of hazardous materials: Evacuate area, call Fire Department.

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

1). Propane: Fire hazard only. Evacuate area and call fire department. Storage is clearly marked and a fire extinguisher is located near area.

2). Acetylene: Fire hazard only: Bottles are stored in approved rack. Evacuate area call fire depariment.

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

Reduced the amount being stored by having the bottles refilled or replaced more often.

Evacuate immediate area and call fire department.

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

If leaking occurred we would remove bottle and let it emply itself in a well ventilated area. Keeping all employees well away from the leak.

4. Describe what policies and procedures your business will follow to immediately notify and evacuate your facility in the event of a release or threatened release of hazardous materials.

A warning will be given by the person finding the leak to all employees in the area.

The supervisor is notified and all employees threatened by the leak will be evacuated.

Fire department will be called. If safe, leaking bottle will be isolated.

5. Your business is required by State Law to keep a copy of this Business Plan, including the inventory and Site Map. Describe where this copy is located at your business.

Lock box at fromt door of office.

I.D. #

## III. EMPLOYEE TRAINING PROGRAM

Describe the training for all employees in safety procedures in the event of a release or threatened release of hazardous materials. This training shall include, but not be limited to, the following: new employee training, annual training, periodic refresher courses, and familiarization with Section II (Emergency Response Plans and Procedures) of this business plan.

We have new employee indoctrination via a written Safety program and all employees, when they are hired, are required to read thoroughly, date and sign the manuel with the understanding of what they read.

We have semi-annual refresher training through Employee Safety Program.

The Safety program and Employee manuel includes Section II which all employees have read and signed at hire date.

Safety Posters are rotated regularly including procedures for fire and leaks.

# INSTRUCTIONS FOR COMPLETION OF THE CONSOLIDATED PERMIT APPLICATION PACKAGE

## FACILITY INFORMATION (*FORMERLY* OES FORM 2730)

1. **FACILITY ID NUMBER** Enter your Facility ID number, if known. Otherwise, leave this blank. This number is assigned by LA County Fire Department. This is the unique number which identifies your facility.
3. **BUSINESS NAME** Enter the full legal name of the business.
5. **REGULATED SUBSTANCES (RS) STORED ONSITE?** Check the appropriate box to indicate whether Regulated Substances (RS) are onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached list. If you handle RS at greater than the threshold planning quantities then you must complete the Facility Information Form (OES Form 2730), the Hazardous Materials Inventory - Chemical Description Section (OES Form 2731), and the CalARP- State Registration Section (OES Form 2735.6) as well as a Consolidated Contingency Plan, and Training Plan.
100. **YEAR BEGINNING** Enter the beginning calendar date and year of the report (i.e. January 1, 1998).
101. **YEAR ENDING** Enter the ending calendar date and year of the report (i.e. December 31, 1998).
102. **TOTAL PAGES** The total number of pages in the inventory, including this page.
103. **BUSINESS PHONE** Enter the business phone number, area code first, and any extension.
104. **SITE ADDRESS** Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
105. **BUSINESS CITY** Enter the city or unincorporated area where the facility is located.
106. **BUSINESS ZIP** Enter the zip code for the facility. The extra 4 digit zip may also be added.
107. **DUN & BRADSTREET** Enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748.
108. **SIC CODE** The primary Standard Industrial Classification 4 Digit Code for the facility.
109. **COUNTY** Enter the county in which the facility is located.
110. **(BUSINESS) OPERATOR NAME** Enter the name of the business operator.
111. **(BUSINESS) OPERATOR PHONE** Enter business operator phone number, if different from business phone, area code first, and any extension.
112. **(BUSINESS) OWNER NAME** Enter name of business owner, if different from business operator name.
113. **(BUSINESS) OWNER PHONE** Enter the owner's phone number if different from business phone, area code first, and any extension.
114. **(BUSINESS) OWNER MAILING ADDRESS** Enter the owner's mailing address if different from business site address.
115. **(BUSINESS) OWNER CITY** Enter the name of the city for the owner's mailing address.
116. **(BUSINESS) OWNER STATE** Enter the 2 character state abbreviation for the owner's mailing address.
117. **(BUSINESS) OWNER ZIP** Enter the zip code for the owner's address. The extra 4 digit zip may also be added.
118. **ENVIRONMENTAL CONTACT NAME** Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
119. **ENVIRONMENTAL CONTACT PHONE** Enter the phone number at which the environmental contact can be contacted, area code first, and any extension.
120. **ENVIRONMENTAL CONTACT STREET ADDRESS** Enter the mailing address where all environmental contact correspondence should be sent, if different from the site address.
121. **ENVIRONMENTAL CONTACT CITY** Enter the name of the city for the environmental contact address.
122. **ENVIRONMENTAL CONTACT STATE** Enter the 2 character state abbreviation for the environmental contact address.
123. **ENVIRONMENTAL CONTACT ZIP** Enter the zip code for the environmental contact address. The extra 4 digit zip may also be added.
124. **PRIMARY EMERGENCY CONTACT NAME** Enter the name of a facility representative that can be contacted in case of an emergency involving hazardous materials at the facility. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
125. **PRIMARY EMERGENCY CONTACT TITLE** Enter the title of the primary contact.
126. **PRIMARY EMERGENCY CONTACT BUSINESS PHONE** Enter the phone number for the primary contact, area code first, and any extensions.
127. **PRIMARY EMERGENCY CONTACT 24-HOUR PHONE** Enter a 24-hour phone number for the primary contact. The 24-hour phone number must be one which is answered 24 hours a day and if not the contact's home phone number, then the service answering the phone must be able to immediately contact the above stated individual.
128. **PRIMARY EMERGENCY CONTACT PAGER NUMBER** Enter the pager telephone number for the primary contact, if available.
129. **ALTERNATE (SECONDARY) EMERGENCY CONTACT NAME** Enter the name of facility official that can be contacted in the event that the primary contact is not available. The contact shall have full facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
130. **ALTERNATE (SECONDARY) EMERGENCY CONTACT TITLE** Enter the title of the secondary emergency contact.
131. **ALTERNATE (SECONDARY) EMERGENCY CONTACT BUSINESS PHONE** Enter the business number for the secondary contact, area code first, and any extension.
132. **ALTERNATE (SECONDARY) EMERGENCY CONTACT 24-HOUR PHONE** Enter a 24-hour phone number for the secondary contact. The 24 hour phone number must be one which is answered 24 hours a day and if not the contact's home phone number, then the service answering the phone must be able to immediately contact the above stated individual.
133. **ALTERNATE (SECONDARY) EMERGENCY CONTACT PAGER NUMBER** Enter the pager number for the secondary contact, if available.
135. **NAME OF DOCUMENT PREPARER** The full name of the person who prepared the inventory submittal information.
136. **NAME OF OWNER / OPERATOR** The full name of the owner/operator who signed the inventory submittal information.
137. **SIGNATURE OF OWNER / OPERATOR** The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signatory believes that all the information submitted in the inventory is accurate and complete.
138. **TITLE** Enter the title of the person signing the form.
139. **DATE CERTIFIED** Enter the date that the document was signed.
150. **MAILING/BILLING ADDRESS** The address that **all** correspondence and bills should be sent.
151. **MAILING/BILLING CITY** The name of the city for the mailing/billing address.
152. **MAILING/BILLING STATE** The 2 character state abbreviation for the mailing/billing address.
153. **MAILING/BILLING ZIP** Zip Code + 4.

# ACTIVITY DECLARATION

## I. FACILITY IDENTIFICATION

| | |
|---|---|
| FACILITY ID # 1 | EPA ID # CAL000171893 2 |
| DBA/FACILITY NAME Borrmann Steel Company 3 | |

## II. ACTIVITIES DECLARATION

If your facility does any of the following activities. ▸ Submit Facility Information Form and any of the following applicable form(s)

| Does Your Facility... | | If Yes, Please Complete... |
|---|---|---|
| **A. HAZARDOUS MATERIALS** Have hazardous materials stored onsite (for any purpose) at or above 55 galonls for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids stored in aboveground and underground storage tanks) ? | 4 ☑YES ☐NO | ▸ CHEMICAL DESCRIPTION FORM (OES Form 2731)<br>▸ CONSOLIDATED CONTINGENCY PLAN (format not included)<br>▸ TRAINING PLAN (format not included) |
| **B. REGULATED SUBSTANCES (RS)** Have Regulated Substances stored onsite (RS) at greater than the threshold planning quantities established by the California Accidental Release Prevention program (Cal/ARP) ? | 5 ☐YES ☑NO | ▸ CHEMICAL DESCRIPTION FORM (OES Form 2731)<br>▸ REGULATED SUBSTANCE REGISTRATION FORM (OES Form 2735.6)<br>▸ CONTINGENCY PLAN (format not included)<br>▸ TRAINING PLAN (format not included) |
| **C. UNDERGROUND STORAGE TANKS**<br>1. Own or operate underground storage tanks (UST) ?<br>2. Intend to upgrade existing or install new USTs ? | 6 ☐YES ☑NO<br>7 ☐YES ☑NO | ▸ UST FACILITY FORM<br>▸ UST TANK FORM (one per tank)<br>▸ UST INSTALLATION FORM (one per tank) |
| **D. TANK CLOSURE / REMOVAL**<br>1. Need to report closing a UST that held hazardous materials or waste?<br>2. Need to report the closing/removal of a tank that was itself classified as hazardous waste? | 8 ☐YES ☑NO<br>9 ☐YES ☑NO | ▸ UST TANK FORM (closure section-one per tank)<br>▸ UST CLOSURE FORM (format not included) |
| **E. ABOVE GROUND PETROLEUM STORAGE TANKS (APSTs or ASTs)** Own or operate ASTs above these thresholds; any tank capacity is greater than 650 gallons or the total capacity for the facility is greater than 1,320 gallons | 10 ☐YES ☑NO | ▸ No form is required at this time. However, if you answered yes, prepare and maintain an SPCC plan as part of your contingency plan to address oil spills and releases from the AST(s) at your facility." |
| **F. HAZARDOUS WASTE:**<br>1. Generate hazardous waste? | 11 ☐YES ☑NO | ▸ EPA ID number - provide on this page<br>▸ As a Generator of Hazardous Waste, answer yes to item G, Local Requirements, and complete applicable forms |
| 2. Recycle more than 100 kg/mo of recyclable materials at the same location it was generated?<br>3. Recycle more than 100 kg/mo of recyclable materials at an offsite location different from the point of generation? | 12 ☐YES ☑NO<br>13 ☐YES ☑NO | ▸ RECYCLABLE MATERIALS FORM |
| 4. Treat Hazardous Waste on site?<br>5. Subject to Financial Assurance Requirement? | ☐YES ☑NO 14<br>☐YES ☑NO 15 | ▸ TIERED PERMITTING FACILITY FORM<br>▸ TIERED PERMITTING UNIT FORM (one per unit)<br>▸ CERTIFICATION OF FINANCIAL ASSURANCE |
| 6. Consolidate Hazardous Waste generated at a remote site? | 16 ☐YES ☑NO | ▸ REMOTE WASTE / CONSOLIDATION SITE NOTIFICATION FORM |
| **G. LOCAL REQUIREMENTS**<br>1. Have onsite for any purpose hazardous materials at or above a threshold amount established by the local agency or CUPA?<br>2. Required by CUPA to provide other information? | 17 ☐YES ☑NO<br>18 ☐YES ☑NO | ▸ CONSULT LOCAL AGENCY OR CUPA FOR REPORTING REQUIREMENTS.<br>▸ WASTE GENERATOR FORM (LA County) |

| | | | | | | | | |

# INSTRUCTIONS FOR COMPLETION OF THE CONSOLIDATED PERMIT APPLICATION PACKAGE

## ACTIVITY DECLARATION FORM

1. **FACILITY ID NUMBER** Enter your Facility ID number, if known. Otherwise, leave this blank. This number is assigned by LA County Fire Department. This is the unique number which identifies your facility.
2. **EPA ID #** If you generate, store, treat or dispose hazardous waste, enter your facility's 12 character EPA ID number issued by the U.S. EPA Cal EPA/ DTSC. (Note: Contact Cal EPA/ DTSC at (916) 324-1781, (800) 618-6942 for information on obtaining an EPA ID number).
3. **BUSINESS NAME** Enter the full legal name of the business.
4. **HAZARDOUS MATERIALS STORED ONSITE** Check the appropriate box to indicate whether you store reportable quantities of hazardous material onsite. The State of California defines a Hazardous Material as "*any material that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health or to the environment*" (H&S C § 25501(n)). If your vendor has supplied a Material safety Data Sheet (MSDS) for a material, it is probably a hazardous material. If it is flammable, combustible, corrosive, toxic, reactive, unstable, an oxidizer, radio active, explosive, pyroforic, crogenic, an irritant, a sensitizer, or stored as a compressed gas or a liquified gas, consider the material to be hazardous. Hazardous materials include but are not limited to hazardous substances and hazardous wastes.
5. **REGULATED SUBSTANCES (RS) STORED ONSITE?** Check the appropriate box to indicate whether Regulated Substances (RS) are onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle RS at greater than the threshold planning quantities then you must complete the Facility Information Form (OES Form 2730), the Hazardous Materials Inventory- Chemical Description Section (OES Form 2731), and the CalARP- State Registration Section (OES Form 2735.6) as well as a Consolidated Contingency Plan, and Training Plan.
6. **UNDERGROUND STORAGE TANKS (USTs) - OWN OR OPERATE** Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances defined in HSC § 25281(g). If yes, complete the UST Facility Form, (*formerly* SRWCB Form A) and a UST Tank Form (*formerly* SRWCB Form B) for each tank.
7. **USTs-INSTALL OR UPGRADE** Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances defined in HSC § 25281(g). If yes, complete the UST Installation Form (*formerly* SRWCB Form C).
8. **UST TANK CLOSURE / REMOVAL** Check the appropriate box to indicate whether a UST which held hazardous materials is being closed in place. If yes, complete the Removal UST Tank Form (*formerly* SRWCB Form B).
9. **CLOSURE / REMOVAL OF A UST WHICH ITSELF WAS HAZARDOUS WASTE** Check the appropriate box to indicate whether the tank being closed would itself be classified as hazardous waste, after its contents are removed. Examples of wastes found in removed USTs may include but are not limited to asbestos, lead, and PCBs. If the removed UST is hazardous waste, after removal of its contents, complete the Tank Closure Certification Form. *(Note: the tank owner has responsibility to assure that a waste determination was made on the removed tank to determine whether or not the tank was hazardous waste).*
10. **ABOVEGROUND PETROLEUM STORAGE TANKS (APSTs) ONSITE** Check the appropriate box to indicate whether there are APSTs onsite which exceed the regulatory thresholds. This section applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof; which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (H&SC §25270.2(g)). The facility must have a single tank greater than 660 gallons, or cumulative storage capacity greater than 1,320 gallons for all APSTs. *Note: Per H&SC § 25270.2(k), the following APSTs are exempt from requirements:*
    - *A pressure vessel or boiler which is subject to Division 5 of the Labor Code.*
    - *A storage tank containing hazardous waste if a hazardous waste facilities permit has been issued for the storage tank by the Department of Toxic Substances Control.*
    - *An aboveground oil production tank which is regulated by the Division of Oil and Gas.*
    - *Certain oil-filled electrical equipment including but not limited to transformers, Circuit breakers, or capacitors.*
11. **HAZARDOUS WASTE GENERATOR** Check the appropriate box to indicate whether your facility generates hazardous waste. If yes, go to item number 18 and complete the Waste Generator Form. If your facility generates hazardous waste, you must obtain and use an EPA Identification number in order to properly transport and dispose of it. *Hazardous Waste are defined in State laws and regulations (H&SC § 25117, 25141, 22 CCR § 66261.3, 66261.10). Hazardous wastes exhibit corrosive, ignitable, reactive, and toxic characteristics. Examples of common hazardous wastes generated by businesses include waste oil, waste dry cleaning solvent, parts cleaning solvent waste, waste photo developing chemicals, waste paint, and waste printing inks.*
12. **ONSITE HAZARDOUS MATERIALS RECYCLER** Check the appropriate box to indicate whether your facility recycles hazardous materials which were generated onsite. If you recycle more than 100 kilograms per month of recyclable material under a claim that the material qualifies for exclusion or exemption pursuant to Section 25143.2 of the California Health & Safety Code (H&SC), and the generator is the same entity as the recycler, then check "yes", and complete the Recyclable Materials Reporting Form.
13. **OFFSITE HAZARDOUS MATERIALS RECYCLER** Check the appropriate box to indicate whether your facility recycles hazardous materials which were generated offsite. If you recycle more than 100 kilograms per month of recyclable material under a claim that the material qualifies for exclusion or exemption pursuant to H&SC §25143.2, and the generator was NOT the same entity as the recycler, then check "yes" and complete the Recyclable Materials Reporting Form.
14. **ONSITE HAZARDOUS WASTE TREATMENT** Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment or onsite recycling activities exempted from the definition of treatment by HSC § 25143.2. If your facility treats hazardous waste onsite, complete the Onsite Hazardous Waste Treatment Notification- Facility Form and the Onsite Hazardous Waste Treatment Notification-Unit Form (*formerly* DTSC form 1772).
15. **FINANCIAL ASSURANCE** Check the appropriate box to indicate whether your facility is subject to Financial Assurance requirements. Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13(b), H&SC §25245.4.), unless they are exempt. If your facility is subject to Financial Assurance requirements, then complete the Certification Of Financial Assurance Form (*formerly* DTSC form 1232).
16. **CONSOLIDATE HAZARDOUS WASTE** Check the appropriate box to indicate whether the facility consolidates hazardous waste generated at a remote site. Answer yes if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transport the hazardous waste to a consolidation site you operate. This activity must be eligible as provided by HSC § 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification Form (*formerly* DTSC form 1196).
17. **OTHER HAZARDOUS MATERIALS** Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local agency or CUPA. Check with your local Fire Department or CUPA for details.
18. **LOCAL REQUIRED INFORMATION** Check the "yes" box if your facility answered yes to item number 11 and generates hazardous waste. If you checked the "yes" box, complete the Waste Generator Form.

**CITY OF BURBANK FIRE DEPARTMENT**
**HAZARDOUS MATERIALS BUSINESS PLAN**

PLEASE READ THE INSTRUCTIONS PRIOR TO COMPLETING AND RETURNING THIS FORM.

TO AVOID PENALTY THIS FORM MUST BE RETURNED BY: ____/____/____

SECTION I: BUSINESS IDENTIFICATION DATA

1. Business Address: 110 W. Olive Ave Zip Code 91502
2. Facility Unit: _____
3. Business Name: Borrman Steel Co Inc
4. Business Phone: (818) 846-7171
5. Mailing Address: 110 W. Olive Ave
6. City: Burbank, CA Zip Code 91502
7. Emergency Contact Person Name and Title — 24 hour Telephone Numbers

   Primary Bob Persson 818 222-6175

   Alternate Robert Wedeen 818 366-8228

SECTION II: EMERGENCY RESPONSE PLANS AND PROCEDURES

A: EMERGENCY NOTIFICATIONS

1. Local Emergency Response Personnel

   Agency: _____

   Phone: 911

   Notified By (Name): _____

   Agency: _____

   Phone: 911

   Notified By (Name): _____

shall include the facilitators name, title, facility location, date of drill, and the signature of the facilitator.

ITEMS 1-6: Describe your businesses employee training relating to the five areas specified in this section.

SECTION IV: BUSINESS SITE PLAN

Provide on a separate sheet, information clearly describing how and where the hazardous materials are handled. Clear and legible diagrams and annotated site maps shall be used for this purpose. See attached sample; site plan and symbols.

SECTION V: PREVENTION

List actions which have been accomplished to abate hazards relating to the use, handling or storage of hazardous materials (release or threaten release of material(s)).

SECTION VI: CERTIFICATION

In the spaces provided, enter the name, signature and title of the responsible representative of your business.

2. Administering Agency

Agency: _____

Phone: _____

Notified By: _____

3. State Office of Emergency Services

Phone: (1) (800) 852-7550 / (916) 427-4341

Notified By: _____

4. Hazardous Waste Contractor

Name: _____ Phone ( )

5. Insurance Company

Name: Don Aldrich Phone (818) 846-4834

6. *Los Angeles Regional Poison Control Center (1) (800) 777-6476*

B: LOCAL EMERGENCY MEDICAL ASSISTANCE APPROPRIATE FOR POTENTIAL ACCIDENTAL SCENARIO IN YOUR BUSINESS

Facility: Providence Saint Joseph Occupational Health Center

Address: 3413 Pacific Ave

City: Burbank CA Zip Code 91505

Phone: (818) 953-4434

Emergency Medical Agency: _____

_____

Phone: ( )

C: MITIGATION, PREVENTION, AND ABATEMENT OF HAZARDS

1. Describe your businesses procedures for mitigation, prevention and abatement of hazards to person, property, or the environment:

The Safety manager holds safety meetings and reviews the procedures in the safety manual.

2. Does your business have a private on-site response team?
Yes _____ No X
If yes, what is the method of notification in the event of an incident at your business?

D: IMMEDIATE NOTIFICATION AND EVACUATION OF YOUR FACILITY:
Evacuation drills shall be conducted annually or more frequently if required.

SECTION III EMPLOYEE TRAINING PROGRAM

OUTLINE THE STEPS YOUR BUSINESS WILL TAKE TO MEET THE TRAINING REQUIREMENTS NOTED IN THIS SECTION

1. METHODS FOR SAFE HANDLING OF HAZARDOUS MATERIALS:

   Follow manufactures recommendations.

2. PROCEDURES FOR COORDINATION WITH LOCAL EMERGENCY RESPONSE ORGANIZATIONS:

   Call local agency w/ 24 hour notice of any import or export of harderous materials.

3. USE OF EMERGENCY RESPONSE EQUIPMENT AND SUPPLIES UNDER THE CONTROL OF THE HANDLER: N/A

4. EMERGENCY MITIGATION PROCEDURES IN RESPONSE TO A RELEASE OR THREATENED RELEASE OF A HAZARDOUS MATERIAL:

   Follow manufactures recommendations.

5. FAMILIARIZATION WITH THE BUSINESS EMERGENCY RESPONSE PLANS AND PROCEDURES (SECTIONS II, III, IV, AND V)

   Read, Review and Hold periodic classes.

6. PROVISIONS FOR INSURING INITIAL AND REFRESHER TRAINING:

   Safety manager appointed.

SECTION VI: CERTIFICATION

I, Bob Persson (Print), certify that the above information will be used to fulfill my businesses obligations under the laws and that inaccurately or omission of information constitutes perjury under the law.

## Submittal Status

Certified on 1/20/2026 by *anthony aguilar* of New Borrmann Metal Center (Burbank, CA)

## Hazardous Materials

| | |
|---|---|
| Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70? | Yes |

## Underground Storage Tank(s) (UST)

| | |
|---|---|
| Does your facility own or operate underground storage tanks? | No |

## Hazardous Waste

| | |
|---|---|
| Is your facility a Hazardous Waste Generator? | Yes |
| Does your facility treat hazardous waste on-site? | No |
| Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)? | No |
| Does your facility consolidate hazardous waste generated at a remote site? | No |
| Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site? | No |
| Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste. | No |
| Is your facility a Household Hazardous Waste (HHW) Collection site? | No |

## Excluded and/or Exempted Materials

| | |
|---|---|
| Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)? | No |

## Aboveground Petroleum Storage

| | |
|---|---|
| Does your facility own or operate aboveground petroleum storage tanks or containers AND:<br>* have a total aboveground petroleum storage capacity of 1,320 gallons or more, OR<br>* have one or more petroleum tanks in an underground area? | No |

## Regulated Substances

| | |
|---|---|
| Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)? | No |

## Additional Information

No additional comments provided.

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING (Check all that apply): A10.

☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

## B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR BY (Check all that apply): B1.

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (e.g., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

## C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:
1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:
1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

**ATTACHMENT 6 - 2938**

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR BY (Check all that apply): C11.

- [x] 1. VERBAL WARNINGS;
- [ ] 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;
- [x] 3. TELEPHONE;
- [ ] 4. PAGERS;
- [x] 5. ALARM SYSTEM;
- [ ] 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY (Check all that apply): C12.

- [x] 1. VERBAL WARNINGS;
- [x] 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;
- [x] 3. TELEPHONE;
- [ ] 4. PAGERS;
- [x] 5. ALARM SYSTEM;
- [x] 6. PORTABLE RADIO

EMERGENCY COORDINATOR CONTACT INFORMATION: Eddie Gutierrez C13.

PRIMARY EMERGENCY COORDINATOR NAME: Eddie Gutierrez PHONE NO.: (818) 303-5407 PHONE NO.:

ALTERNATE EMERGENCY COORDINATOR NAME: David olhberg PHONE NO.: (818) 669-2972 PHONE NO.:

- [ ] Check if additional Emergency Coordinator contact and address information is available onsite or by calling PHONE NO.:

Note: If more than one alternate emergency coordinator is designated, attach a list in order of responsibility.

## D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

Check the applicable boxes to indicate your facility's procedures for containing spills and preventing and mitigating releases, fires and/or explosions.

D1.

- [x] 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- [x] 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls, built-in berms);
- [x] 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, spill pigs, spill pillows);
- [x] 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS;
- [x] 5. LINED TRENCH DRAINS AND/OR SUMPS;
- [ ] 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- [x] 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS;
- [x] 8. STOP PROCESSES AND/OR OPERATIONS;
- [ ] 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- [x] 10. SHUT OFF WATER, GAS, ELECTRICAL UTILITIES;
- [x] 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE AND/OR MEDICAL AID;
- [x] 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AND/OR IMPACTED AREAS;
- [x] 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION;
- [x] 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE EMERGENCY RESPONSE TEAM;
- [x] 15. REMOVE CONTAINERS AND/OR ISOLATE AREAS;
- [x] 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- [x] 17. USE ABSORBENT MATERIAL FOR SPILL CONTAINMENT;
- [x] 18. VACUUM SUCTION USING APPROPRIATE VACUUM (e.g., Intrinsically safe) FOR SPILL CONTROL AND/OR CLEANUP;
- [x] 19. DECONTAMINATE PERSONNEL AND EQUIPMENT WITHIN DESIGNATED AREA AND DISPOSE OF WASTEWATER AS HAZARDOUS WASTE;
- [x] 20. PROVIDE SAFE TEMPORARY STORAGE OF HAZARDOUS WASTE GENERATED DURING EMERGENCY ACTIONS;
- [ ] 21. OTHER (Specify): D2.

## E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (Check all that apply): E1.

E2.

- [x] 1. BELLS;
- [x] 2. HORNS/SIRENS;
- [x] 3. VERBAL (i.e., Shouting);
- [ ] 4. OTHER (Specify):

THE FOLLOWING LOCATION(S) WILL BE USED FOR AN EMERGENCY ASSEMBLY AREA(S) (e.g., Parking lot, street corner): E3.

west side parking lot

Note: The Emergency Coordinator must account for all onsite employees and visitors after evacuation.

EVACUATION ROUTE S AND ALTERNATE EVACUATION ROUTES ARE DESCRIBED AS FOLLOWS: E4.

- [x] 1. WRITTEN PROCEDURES DESCRIBING ROUTES, EXITS, AND ASSEMBLY AREAS;
- [x] 2. EVACUATION MAP(S) DEPICTING ROUTES, EXITS, AND ASSEMBLY AREAS;
- [ ] 3. OTHER (Specify): E5.

Note: Evacuation procedures and/or maps should be posted in visible facility locations and must be included in the Contingency Plan.

## F. ARRANGEMENTS FOR EMERGENCY SERVICES

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following): F1.

- [x] 1. HAVE BEEN DETERMINED NOT NECESSARY;
- [ ] 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Note: Advance arrangements with local fire and police departments, hospitals, state and local emergency response teams, and/or emergency services contractors should be made for your facility, if necessary. Large Quantity Generators must describe arrangements in the Contingency Plan.

## G. EMERGENCY EQUIPMENT

**Check the applicable boxes to list emergency response equipment available at the facility, identify the location(s) where the equipment is kept, and indicate the equipment's capability, if applicable.**

| TYPE | EQUIPMENT AVAILABLE G1. | LOCATION G2. | CAPABILITY G3. |
|---|---|---|---|
| *EXAMPLE* | ☒ *CHEMICAL PROTECTIVE GLOVES* | *SPILL RESPONSE KIT* | *SINGLE USE, OIL RESISTANT ONLY* |
| **Safety and First Aid** | 1. ☒ CHEMICAL PROTECTIVE SUITS, APRONS, AND/OR VESTS | warehouse | single use |
| | 2. ☒ CHEMICAL PROTECTIVE GLOVES | warehouse | single use |
| | 3. ☒ CHEMICAL PROTECTIVE BOOTS | warehose | single use |
| | 4. ☒ SAFETY GLASSES, GOGGLES, AND FACE SHIELDS | warehouse | single use |
| | 5. ☒ HARD HATS | warehouse | single use |
| | 6. ☒ AIR-PURIFYING RESPIRATORS | warehoue | single use |
| | 7. ☐ SELF-CONTAINED BREATHING APPARATUS (SCBA) | | |
| | 8. ☒ FIRST AID KITS | warehouse | single use with refills |
| | 9. ☐ PLUMBED EYEWASH FOUNTAIN AND/OR SHOWER | | |
| | 10. ☒ PORTABLE EYEWASH KITS AND/OR STATION | warehoue | stationed for multi use |
| | 11. ☐ OTHER | | |
| **Fire Fighting** | 12. ☒ PORTABLE FIRE EXTINGUISHERS | warehouse | multi use |
| | 13. ☐ FIXED FIRE SUPPRESSION SYSTEMS AND/ OR SPRINKLERS | | |
| | 14. ☒ FIRE ALARM BOXES | warehouse | multi use |
| | 15. ☐ OTHER | | |
| **Spill Control and Clean-Up** | 16. ☒ ALL-IN-ONE SPILL KIT | warehouse | multiuse with refills |
| | 17. ☒ ABSORBENT MATERIAL | warehouse | multiuse with refills |
| | 18. ☒ CONTAINER FOR USED ABSORBENT | warehouse | multiuse with refils |
| | 19. ☒ BERM AND/OR DIKING EQUIPMENT | warehouse | multise with refills |
| | 20. ☒ BROOM | warehouse | multiuse |
| | 21. ☒ SHOVEL | warehouse | multiuse |
| | 22. ☒ VACUUM | warehouse | multiuse |
| | 23. ☐ EXHAUST HOOD | | |
| | 24. ☐ SUMP AND/OR HOLDING TANK | | |
| | 25. ☒ CHEMICAL NEUTRALIZERS | warehouse | single use |
| | 26. ☐ GAS CYLINDER LEAK REPAIR KIT | | |
| | 27. ☒ SPILL OVERPACK DRUMS | warehouse | multiuse with refills |
| | 28. ☐ OTHER | | |
| **Communi-cations and Alarm Systems** | 29. ☒ TELEPHONES (e.g., Cellular) | warehouse | |
| | 30. ☐ INTERCOM AND/OR PA SYSTEM | | |
| | 31. ☒ PORTABLE RADIOS | warehouse | |
| | 32. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT | | |
| **Other** | 33. ☐ OTHER | | |
| | 34. ☐ OTHER | | |

## H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases due to seismic motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply): H1.

- ☐ 1. HAZARDOUS MATERIALS AND/OR WASTE STORAGE AREAS
- ☑ 2. PROCESS LINES AND PIPING
- ☐ 3. LABORATORY
- ☐ 4. WASTE TREATMENT AREA

LOCATIONS (e.g., Shop, outdoor shed, lab): H2.

Bay 4 gas lines

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS AND/OR EQUIPMENT (Check all that apply): H3.

- ☑ 1. SHELVES, CABINETS AND/OR RACKS
- ☑ 2. TANKS AND SHUT-OFF VALVES
- ☐ 3. PORTABLE GAS CYLINDERS
- ☐ 4. EMERGENCY SHUT-OFF AND/OR UTILITY VALVES
- ☐ 5. SPRINKLER SYSTEMS
- ☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane tank)

LOCATIONS: H4.

bay 4

## I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify): tail gate meeting

Check the applicable boxes below to indicate how the employee training program is administered.

☑ 1. FORMAL CLASSROOM ☐ 2. VIDEOS ☑ 3. SAFETY MEETINGS ☑ 4. STUDY GUIDES / MANUALS I1.

☐ 5. OTHER (Specify): I2.

☐ 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES

☐ 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT I3.

☑ 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE I4.

**EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:**

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

**Large Quantity Generator Training:** Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

**Small Quantity Generator Training:** Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

**Hazardous Materials Business Plan Training**: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

## J. LIST OF ATTACHMENTS

Check one of the following: J1.

☑ 1. NO ATTACHMENTS ARE REQUIRED; or

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

**NO FURTHER REQUIREMENTS - BORRMANN STEEL COMPANY, 110 WEST OLIVE STREET, BURBANK, CALIFORNIA (FILE NO. 109.5197)**

Upon review of our file for the subject site, we have the following comments with respect to the Well Investigation Program:

1. The subject facility has been used for manufacturing and distributing steel products since 1946. During our initial inspection on May 16, 1990, Board staff noted numerous potential sources of soil and ground water quality impact including process areas, equipment maintenance and a former gasoline underground storage tank (UST).

2. A total of six boreholes were drilled and sampled to a maximum depth of 10' below ground surface (bgs) adjacent to potential sources of liquid wastes on the subject site to determine if releases have impacted soil and to delineate the extent of impact. Laboratory analysis of these soil matrix samples detected a maximum concentration of 18 mg/kg total recoverable petroleum hydrocarbons(TRPH) at 5' bgs in the equipment maintenance area. No VOC's were detected. Ground water is estimated to be approximately 100' bgs in the site area.

Based on information submitted, our inspections and other information in our files, we have no further requirements with respect to the Well Investigation Program. The impacted soil detected at the site is not a substantial continuing source of ground water quality degradation and therefore cleanup is not warranted.

The jurisdiction requirements of other agencies, such as the U.S. Environmental Protection Agency (USEPA), are not affected by the Board's "no further requirements" determination. Such agencies may choose to make their own determination concerning the site. If you have any questions, please contact Ann Zaszkodna at (213) 266-7599.

RE: Request for Information
Borrmann Steel Co.
110 W. Olive Avenue
Burbank, CA 91502

Dear Sir or Madam:

The United States Environmental Protection Agency (EPA) is conducting an investigation of soil and groundwater contamination and threatened contamination in the San Fernando Valley. The purpose of this investigation is to determine the nature, cause, and extent of the release of hazardous substances in the area; to determine the source(s) or potential source(s) of such releases and/or potentially responsible parties; and to assess the effects of any contamination on the environment and public health.

As part of this investigation, EPA needs historical and current information from companies currently or previously located at or near the area of known or suspected contamination. EPA has reason to believe that you may be in possession of such information. Therefore, pursuant to the authority of Section 104 of CERCLA, 42 U.S.C. § 9604, and Section 3007 of RCRA, 42 U.S.C. § 6972, you are hereby requested to respond to the Information Request set forth herein.

Compliance with the Information Request is mandatory. Failure to respond fully and truthfully within thirty-five (35) days of receipt can result in enforcement action by EPA pursuant to Section 104(e) of CERCLA, as amended, and/or Section 3008 of RCRA. Each of these statutes permits EPA to seek imposition of penalties of up to twenty-five thousand dollars ($25,000) for each day of continued noncompliance. Please be further advised that provision of false, fictitious, or fraudulent statements or representations may subject you to criminal penalties under 18 U.S.C. § 1001 or Section 3008(d) of RCRA.

Pursuant to 40 CFR § 2.310(h), you are hereby furnished with notice of the contemplated disclosure by EPA of the information provided in response to this Information Request to authorized

representatives of EPA. Any comments on this contemplated action must be submitted to EPA at the 75 Hawthorne Street address specified below within thirty-five (35) days of receipt of this Information Request.

The information that EPA plans to disclose to its authorized representatives includes any response to this Information Request. The authorized representatives of EPA to which EPA may disclose information contained in your response are as follows:

1. PRC Environmental Management, Inc.
   EPA Contract Number 068-W9-0009

2. CH2M Hill California, Inc.
   EPA Contract Number 068-W9-0031

3. Labat-Anderson, Inc.
   EPA Contract Number 068-W9-0052

4. California State Water Resources Control Board and California Regional Water Quality Control Board, Los Angeles Region
   EPA Cooperative Agreement Number V-009472-01-4

This information may be made available to these authorized representatives of EPA for any or all of the following reasons: to assist with document handling, inventory, and indexing; to assist with document review and analysis for verification of completeness; and to provide expert technical review of the contents of the response. Pursuant to 40 C.F.R. § 2.310(h), you may submit comments on EPA's disclosure of any confidential information contained in your response by EPA to its authorized representatives.

You must respond to the following Information Request by letter, signed by a duly authorized officer of the company, submitted by certified mail to the address specified below within thirty-five (35) days of your receipt of this Request.

Your response should include the name, address, and telephone number of the person to whom EPA should direct future correspondence in regard to this matter.

If you are not claiming confidentiality in regard to your response, or if you are claiming confidentiality in regard to your response but do not have any comments to submit to EPA regarding EPA's disclosure of such confidential information to its authorized representatives, submit your response to:

Claire Trombadore
South Coast Groundwater Section (H-6-4)
United States Environmental Protection Agency
P.O. Box 193036
San Francisco, CA 94119-3036

If you are claiming confidentiality in regard to your response and have comments to submit to EPA regarding EPA's disclosure of such confidential information to its authorized representatives, submit your response and any comments regarding the disclosure of your response to authorized representatives of EPA to:

Claire Trombadore
South Coast Groundwater Section (H-6-4)
United States Environmental Protection Agency
75 Hawthorne Street
San Francisco, CA 94105

Please include in your response to the Information Request a notarized affidavit on behalf of Borrmann Steel Co. stating that a diligent record search has been completed and that there has been a diligent interview of present and former employees who may have knowledge of the requested information. Also include in the affidavit a statement that all information responsive to the Information Request has been forwarded to EPA.

This Information Request is not subject to the approval requirements of the Paperwork Reduction Act of 1980, 44 U.S.C. § 3501, et seq.

If you need further information concerning technical issues, please contact Claire Trombadore at (415) 744-2249. If you have any legal questions please contact, or have your attorney contact, Marcia Preston, Assistant Regional Counsel, at (415) 744-1388.

Sincerely yours,

Keith A. Takata
Deputy Director
Office of Superfund Programs

**INFORMATION REQUEST**

Instructions

1. A separate response must be made to each of the Questions set forth in this Information Request.

2. Precede each answer with the number of the question to which it corresponds.

3. Should you find at any time after the submission of your response that any portion of the submitted information is false or misrepresents the truth, you must notify EPA thereof as soon as possible.

4. For each document produced in response to this Information Request indicate on the document, or in some other reasonable manner, the number of the Question to which it responds.

5. For each and every Question contained herein, identify all documents consulted or referred to in the preparation of the answer and provide true and accurate copies of all such documents.

6. For each and every Question contained herein, if you have reason to believe that there may be persons able to provide a more detailed or complete response to any Questions contained herein or who may be able to provide additional responsive documents, identify such persons and the additional information or documents that they may have.

7. For each and every Question contained herein, if information responsive to this Information Request is not in your possession, custody, or control, then identify any persons from whom you believe such information may be obtained.

8. The information requested herein must be provided notwithstanding its possible characterization as confidential information or trade secrets. You may, if you desire, assert a confidentiality claim covering part or all of the information requested, pursuant to Section 104(e)(7) of CERCLA, as amended by SARA, 42 U.S.C. § 9604(e)(7), and 40 C.F.R. 2.203(b), by attaching to such information at the time it is submitted a cover sheet, stamped or typed legend, or some other suitable form of notice employing language such as "trade secret" or "proprietary". Information covered by such a claim will be disclosed by EPA only to the extent and only by means of the procedures set forth in CERCLA Section 104(e)(7). If no such claim accompanies the information when it is received by EPA, it may be made available to the public by EPA without further notice to you. You should read the above cited regulations carefully before asserting a business confidentiality claim, since certain categories of information are not properly the subject of such a claim.

9. Where specific information has not been memorialized in any document, but is nonetheless responsive to a Question, you must respond to the Question with a written response.

Definitions

The following definitions shall apply to the following words as they appear in this Information Request.

1. The term "you" or "Respondent" shall mean the company named in the address of this Request, the company's officers, managers, employees, contractors, trustees, successors, assigns, and agents.

2. The term "person" as used herein includes, in the plural as well as the singular, any natural person, firm, unincorporated association, partnership, corporation, trust or other entity.

3. The term "the facility" shall mean and include the property on or about 110 W. Olive Avenue, Burbank, CA 91502.

4. The term "hazardous substance" shall have the definition set forth in Section 101(14) of CERCLA, 42 U.S.C. § 9601(14), and includes any mixtures of such hazardous substances with any other substances, including petroleum products.

5. The term "pollutant or contaminant" shall have the definition set forth in Section 101(33) of CERCLA, 42 U.S.C. § 9601(33), and includes any mixtures of such pollutants and contaminants with any other substances, including petroleum products.

6. The term "hazardous waste" shall have the definition set forth in Section 1004(5) of RCRA, 42 U.S.C. § 6903(5).

7. The term "solid waste" shall have the definition set forth in Section 1004(27) of RCRA, 42 U.S.C. § 6903(27).

8. The term "hazardous material" shall mean all hazardous substances, pollutants, and contaminants as defined above.

9. The term "identify" means, with respect to a natural person, to set forth the person's name, present or last known business address and business telephone number, present or last known home address and home telephone number, and present or last known job title, position or business.

10. The term "identify" means, with respect to a corporation, partnership, business trust or other association or business entity (including a sole proprietorship) to set forth its full name, address, legal form (e.g. corporation, partnership, etc.), organization, if any, and a brief description of its business.

11. The term "identify" means, with respect to a document, to provide its customary business description, its date, its number if any (e.g. invoice or purchase order number), the identity of the author, addressor, addressee and/or recipient, and the substance or subject matter.

12. The term "release" shall have the definition contained in Section 101(22) of CERCLA, 42 U.S.C. § 9601(22), and includes any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment, including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substance, pollutant or contaminant.

13. The terms "document" and "documents" shall include: (a) writing of any kind, formal or informal, whether or not wholly or partially in handwriting, including by way of illustration and not by way of limitation, any invoice, receipt, endorsement, check, bank draft, canceled check, deposit slip, withdrawal slip, order, correspondence, record book, minutes, memorandum of telephone and other conversations including meetings, agreements and the like, diary, calendar, desk pad, scrapbook, notebook, bulletin, circular, form, pamphlet, statement, journal, postcard, letter, telegram, telex, report, notice, message, analysis, comparison, graph, chart, interoffice or intraoffice communications, photostat or other copy of any documents, microfilm or film record, any photograph, sound recording on any type of device, any punch card, disk or disk pack; (b) any tape or other type of memory generally associated with computers and data processing (together with the programming instructions and other written material necessary to use such punch card, disk or disk pack, tape or other type of memory and together with printouts of such punch card, disk, or disk pack, tape or other type of memory); (c) every copy of each document which is not an exact duplicate of a document which is produced; (d) every copy which has any writing, figure or notation, annotation or the like of it; (e) drafts; (f) attachments to or enclosures with any document; and (g) every document referred to in any other document.

14. The terms "and" and "or" shall be construed either disjunctively or conjunctively as necessary to bring within the scope of this Information Request any information which might otherwise be construed to be outside its scope.

15. The term "arrangement" means every separate contract or other agreement between two or more persons.

Questions

1. List the EPA RCRA Identification Number(s) of the Respondent, if any.

2. Describe the current business operations and activities at the facility. Include a description of the goods and services produced and furnished and an explanation of the processes involved in their production and furnishing. In addition, provide a summary of any and all changes in the types of goods and services produced and furnished, including but not limited to any changes in the production or furnishing processes and the dates of such changes since operations began at the facility.

3. Identify the current owner(s) of the facility. State the dates during which the current owner owned, operated, or leased any portion of the facility, and provide copies of all documents evidencing or relating to such ownership, operation, or lease, including but not limited to, purchase and sale agreements, deeds, and leases.

4. Identify all prior owners of the facility. For each prior owner further identify:

   a. The dates of ownership;

   b. All evidence that hazardous materials were released or threatened to be released at the facility during the period that they owned the facility.

5. Identify the prior operators and lessees of the facility. For each such operator or lessee, further identify:

   a. The dates of their operations at or lease of the facility;

   b. The nature of their operations at the facility;

   c. All evidence that hazardous materials were released or threatened to be released at the facility during the period in which they were operating at the facility.

6. Provide a scaled map of the facility which includes the locations of significant features. Describe the physical characteristics of the facility, including but not limited to, the following:

   a. Surface structures (e.g., building, tanks, etc);

   b. Subsurface structures (e.g., underground tanks, sumps, pits, clarifiers, etc.);

   c. Ground water wells and dry wells, including drilling

logs;

d. Past and present storm water drainage system, sanitary sewer system, including septic tank(s) and subsurface disposal field(s);

e. Any and all additions, demolitions, or changes of any kind to physical structures on, under, or about the facility, or to the property itself (e.g., excavation work) and state the dates on which such changes occurred.

7. Provide all existing technical or analytical information about the facility, including but not limited to, data and documents related to soil, water (ground and surface), geology, hydrogeology, or air quality on and about the facility.

8. Are you or your consultants planning to perform any investigations of the soil, water (ground or surface), geology, hydrogeology, or air quality on or about the facility? If so, identify:

a. The nature and scope of these investigations;

b. The contractors or other persons that will undertake these investigations;

c. The purpose of the investigations;

d. The dates when such investigations will take place and be completed;

e. Where on the facility such investigations will take place.

9. Did you acquire or lease the facility after the disposal or placement of any hazardous substances on, in, or at the facility? Describe all of the facts on which you base the answer to this Question.

10. At the time you acquired or leased the facility, did you know or have reason to know that any hazardous substance was disposed of on, in, or at the facility? Describe all investigations of the facility that you took prior to acquiring or leasing the facility, and all of the facts on which you base the answer to this Question.

11. Did you ever transport to the facility or use, purchase, generate, store, treat, dispose, or otherwise handle at the facility any hazardous materials? If the answer to this question is anything but an unqualified "no", identify for the entire time period the facility has been in operation:

a. In general terms, the types of hazardous material transported, used, purchased, generated, stored, treated,

disposed, or otherwise handled, and the purposes for your transportation, use, purchase, generation, storage, treatment, disposal, or handling of such hazardous materials;

b. The name, Chemical Abstract Service (CAS) number, chemical composition, characteristics, and physical state (e.g., solid, liquid, gas) of each hazardous material so transported, used, purchased, generated, stored, treated, disposed, or otherwise handled;

c. The persons who supplied you with each such hazardous material or how each such hazardous material was generated by you;

d. How each such hazardous material was transported, used, purchased, stored, treated, disposed, or otherwise handled by you;

e. The time period during which each such hazardous material was transported, used, purchased, generated, stored, treated, disposed, or otherwise handled by you;

f. Where each such hazardous material was used, purchased, generated, stored, treated, disposed, or otherwise handled by you, describing the location(s) and providing a map or diagram of such location(s). Location information should include, but is not limited to, information pertaining to tanks, ponds, treatment facilities, and other units where hazardous materials were used, generated, stored, treated or disposed, but which may no longer exist;

g. The persons who transported and/or disposed of each such hazardous material. If disposal off of the facility occurred, provide a detailed description, including copies of manifests, and identify the location where the hazardous material was transported;

h. The annual quantity of each such hazardous material used, purchased, generated, stored, treated, transported, disposed, or otherwise handled by you, reported in gallons for liquids and pounds for solids for every year the facility was in operation.

Provide Material Safety Data Sheets (MSDS) for each hazardous material used, purchased, generated, stored, treated, transported, disposed, or otherwise handled by you.

12. Identify all leaks, spills, releases or threats of releases of any kind into the environment of any hazardous materials that have occurred or may occur at or from the facility. In addition, identify:

a. When such releases occurred or may occur;

b. How the releases occurred or may occur;

c. What hazardous materials were released or may be released;

d. What amount of each such hazardous material was released or may be released;

e. Where such releases occurred or may occur, describing the location(s) and providing a map or diagram of such location(s);

f. Any and all activities undertaken in response to each such release or threatened release;

g. Any and all investigations of the circumstances, nature, extent, or location of each such release or threatened release, including the results of any soil, water (ground and surface), or air testing that was undertaken;

h. Whether any report(s) of any such release(s) was (were) made to any public agency, and the content of that (those) report(s);

i. All persons with information relating to subparts a. through h. of this Question.

13. If any releases or threatened release identified in response to Question 12, above, occurred into any subsurface disposal system, floor drain, sump, or dry well inside or under any buildings located on the facility, further identify:

a. Precisely where the disposal system, floor drain, sump, or dry well is and was located;

b. When the disposal system, floor drain, sump, or dry well was installed;

c. Whether the disposal system, floor drain, sump, or dry well was connected to pipes;

d. Where such pipes are or were located, describing the location(s) and providing a map or diagram of such location(s);

e. When such pipes were installed;

f. How and when such pipes were replaced, repaired, or otherwise changed.

14. Is the facility currently connected to a sewer line? If so, identify the sewage system, date of connection, and type of

wastes discharged. If you are or at some time operated the facility without a sewer line connection, identify the method of waste disposal that you use or did use. Specifically, have you or are you using leach field(s), septic tank(s), or any other method of disposal at the facility. Provide copies of any sewer permits, including but not limited to industrial waste permits.

15. Describe any acts or omissions of any persons, other than your employees, agents, or those persons with whom you had a contractual relationship, that may have caused any release or threat of release of hazardous materials at the facility and any damages relating thereto and identify such persons. In addition:

    a. Describe all precautions that you took against foreseeable acts or omissions of any such third parties, and the consequence that could foreseeably result from such acts or omissions;

    b. Describe the care you exercised with respect to the hazardous materials found at the facility.

16. Identify all divisions and subsidiary companies, corporations, and business entities of Respondent. Describe your interest in or ownership of each company, corporation, or business entity. Identify all parent companies or corporations of Respondent, and describe their interest in or ownership of Respondent. In addition, provide a company and/or corporate history, showing all mergers, acquisitions, name changes, or changes in business form of Respondent and its parents or subsidiaries, including the date of each such change or event. This information may be presented as a table or illustration.

17. Provide a copy of the current Articles of Incorporation and By-laws of Respondent. In addition, provide copies of the Articles of Incorporation for all corporations which are predecessors of Respondent.

18. State Respondent's Standard Industrial Classification ("SIC") Code(s), if any, including the date the code(s) was determined or last updated.

19. Provide copies of any and all operating permits issued to Respondent by the South Coast Air Quality Management District.

20. Do you currently own or operate any other facility, or have you owned or operated any other facilities in the past, located in the San Fernando Valley? If so, provide the following information:

    a. Name of facility;

    b. Brief description of operations taking place at facility,

including principal product or service sold or furnished;

c. Date you acquired or otherwise began operations at the facility; and

d. Date you sold or otherwise ceased operations at the facility, if applicable.

WELL INVESTIGATION PROGRAM - SUBSURFACE INVESTIGATION (FILE NO. 104.0197)

Reference is made to your consultants, Environmental Managers and Auditors, Inc., Final Report dated January 31, 1991, for Subsurface Investigation at the subject site, and the revised analytical testing report, submitted by Crosby Laboratories, Inc., dated March 18, 1991.

We have reviewed and evaluated the reports, and have the following comments.

1. A review of the analytical test results has identified the presence of low concentrations of petroleum-based hydrocarbons at all test boring locations, ranging from 10.6 mg/kg to 18.1 mg/kg. No chlorinated volatile organic constituents or aromatic hydrocarbons were detected at any of test boring locations completed onsite to evaluate steel cutting machine areas within and outside the building, and maintenance equipment area.

2. No information regarding the source of petroleum-based hydrocarbons detected across the site and the full downward extent of these constituents is available at this time due to the limited scope of the subsurface investigation completed to date. However, based upon the data contained in your report, which indicates that no volatile organic constituents have been detected onsite, no further soil assessment is required at this time. The need for further subsurface investigation may appear as additional soil and/or groundwater data in the surrounding area become available, and are evaluated.

3. In order to minimize any future problems associated with the handling of chemical or wastes onsite, we recommend that all of your steel cutting machine areas be upgraded to contain concrete floor areas, to prevent cutting oils, lubricants, and any other waste material, from leaving these areas or infiltrating to the underlying soils.

If you have any questions, please contact Yue Rong at (213) 266-7604.

WELL INVESTIGATION PROGRAM - SUBSURFACE INVESTIGATION, BORRMANN STEEL COMPANY, 110 W. OLIVE STREET, BURBANK (FILE NO. 104.0197)

Reference is made to the letter by Mr. Chun-Yu Chan of your company, dated February 27, 1991, regarding the analytical test results for the subsurface investigation completed by Environmental Managers & Auditors, Inc. at the subject site.

Mr. Chan acknowledged in his letter, that the detection limits reported on the laboratory data sheets were mistakenly reported for this project. We have reviewed the laboratory analytical test result and correction provided in the letter, and find that additional information is needed in order for us to complete our review and evaluation of the data provided for this project. The additional information is listed below.

1. A revised laboratory analytical result report must be provided in order to correct the mistake existing in the detection limits reported.

2. The following items specified must be submitted with the revised report, at a minimum:

    A. Internal tracking documents for all soil samples analyzed for this project.

    B. QA/QC results summaries

        1. Initial calibration
        2. Continuing calibration
        3. Method blanks
        4. Surrogate recoveries

5. Matrix spike (MS)
6. Laboratory duplicate or matrix spike duplicate (MSD)
7. Laboratory QC check sample, if applicable
8. Retention time windows
9. Method detection limits (MDL)

C. Raw data - chromatograms and area/quantitation reports

1. Environmental samples (include dilutions and any re-analyses)
2. Initial calibration
3. Continuing calibration
4. Method blanks
5. Surrogate recoveries
6. Matrix spike (MS)
7. Laboratory duplicate or matrix spike duplicate (MSD)
8. Laboratory QC check sample, as applicable
9. Sample (Soil) extraction sheets and clean-up logs
10. Instrument analysis log for each instrument used

D. Calibration curves for EPA Method 418.1, related to the TPH concentration detected as reported in the laboratory data sheets.

Four copies of your revised report containing all information identified above are due to this Regional Board by March 20, 1991. If you have any questions regarding this matter, please contact Yue Rong at (213) 266-7604.

Montery Park, CA 91754

Dear Mr. Rong

The 18 soil samples submitted by Mr. Khalid Mahmood of Environmental Managers & Auditors, Inc. on November 16, 1990 were analyzed as received as low level soil on November 20, 1990 using EPA method 5030 purge and trap.

A low detection limit was mistakenly used when the reports were submitted. A revised report showing a corrected detection limit is enclosed. A separate copy has been sent to Environmental Managers & Auditors, Inc.

For soil samples, the detection limits used by this laboratory for 8010 and 8020 are attached for you reference.

Thank you for your attention.

Sincerely,

CROSBY LABORATORIES, INC.

## ANALYTICAL QUALIFIERS:

1. All solid and sludge samples are analyzed on an "as received" basis without correction for moisture content.
2. IF target analytes are found in the laboratory reagent blank at or above the indicated detection limit, the test result is corrected by the amount found before reporting.

No target analytes were found.

Dear Mr. Bacharowski:

Environmental Managers & Auditors, Inc. (EMA) is pleased to submit the enclosed additional information you requested during our telephone conversation on February 13, 1991. The additional information includes matrix spike/matrix spike duplicates concentrations, surrogate spike concentrations, laboratory control standards, calibration check standards, and copies of laboratory extraction sheets. Also enclosed are three more copies of the original report submitted on January 31, 1991.

Should you have any questions or need more information, please do not hesitate to call us at (818) 852-4260.

Sincerely,

ENVIRONMENTAL MANAGERS
& AUDITORS, INC.

Norman Sacro
Project Director

SUBJECT: Subsurface Investigation - Borrmann Steel Company, Burbank
Well Investigation Program
RWQCB File No. 104.0197

Dear Mr. Bacharowski:

Environmental Managers & Auditors, Inc. (EMA) is pleased to submit this report on the Subsurface Site Investigation performed at Borrmann Steel facility located in Burbank, California. The investigation was conducted as proposed in the workplan dated September 12, 1990 approved by the Regional Quality Control Board (RWQCB). The analytical results of the soil samples indicate presence of total petroleum hydrocarbons (TPH) at concentrations below levels of concern (10.7 mg/kg to 18.1 mg/kg). No volatile organics were detected in any of the soil samples. EMA recommends that no further environmental investigation is warrated at Borrmann Steel.

Should you have any questions or need more information, please do not hesitate to call us at (818) 852-4260.

Sincerely,

ENVIRONMENTAL MANAGERS
& AUDITORS, INC.

## PROFESSIONAL CERTIFICATION

This report for Subsurface Site Investigation for the Borrmann Steel Company facility located at 110 W. Olive Avenue, Burbank, California, has been prepared by Environmental Managers & Auditors, Inc. under the professional supervision of the geologist whose seal and signature appears hereon.

The findings, recommendations, specifications, or professional opinions offered herein, within the limits prescribed by the client, were prepared in accordance with generally accepted professional geologic principles and practice. There is no other warranty, either express or implied.

Charles (Rus) Purcell

## 1.0 INTRODUCTION

Pursuant to a letter from the Regional Water Quality Control Board (RWQCB) dated July 16, 1990, Environmental Managers & Auditors, Inc. (EMA) submitted a Work Plan for subsurface investigation at Borrmann Steel Co. in connection with RWQCB's Well Investigation Program. In November 1990, EMA implemented the Work Plan upon approval by RWQCB. Figure 1 presents the general location map for the subject facility. The areas of primary concern for this investigation include the following:

- Cutting machine areas;
- Maintenance equipment area; and
- Former underground storage fuel tank area.

The main objective of the Well Investigation Program was to determine possible sources contributing to pollution in nearby drinking water wells.

## 2.0 SITE CONDITIONS

### 2.1 Geology

The site is situated within the San Fernando basin in the upper Los Angeles river area of Los Angeles County, California. The geologic rock units and formations of the upper Los Angeles River area represent a long span of geologic time. Rock units of the basement complex have been assigned on age of pre-Cambrian whereas other units within the basement complex represent various periods through the upper Jurassic or lower Cretaceous. Upper pleistocene, older alluvium and recent alluvium are unconsolidated deposits.

The Saugus Formation outcrops in the hills and southern slopes of the mountains along the northern part of the valley floor and underlines the other members of the water bearing series. The maximum thickness of this unit as measured in Lopez Canyon is 6,400 feet (State Water Rights Board, 1962). Within the study area this formation is overlain by older and recent alluvium.

The older alluvium is composed of generally coarse-grained unconsolidated or uncemented deposits of modern streams laid down in earlier cycles of erosion. The source areas of the streams during earlier and present stages of erosion have undergone little change with the exception of remnants (terrance deposits) which have been isolated by erosion around the margin of the valley floor, deposition has been nearly continuous to the present time.

The recent alluvial deposits are derived primarily from sedimentary rocks and are finer grained and deposited in much the same manner as the underlying older alluvium.

### 2.2 Hydrogeology

The site is located within the San Fernando, hydrologic sub area. The boundaries of the San Fernando hydrologic sub area, are the alluvial contacts with the nonwater-bearing series along the San Rafael Hills and Verdugo mountains on the east and northeast, the Santa Susana mountains and Simi Hills on the northwest and west, and the Santa Monica mountains on the south. The Los Fernando hydrologic sub area, is bounded on the east by the alluvial contact with the San Rafael and Repetto Hills and on the west by this contact with the Elysian Hills.

An area of high groundwater level is present in the western portion of the hydrologic sub area. Because of the existence of more permeable gravel stringers in the fine-grained units found in the western portion of the sub area, small localized pressure effects can be observed. These gravel stringers represent the former stream channels which have braided over the fine-grained deposits and in turn have been buried by additional fine-grained material.

In the San Fernando sub area, groundwater moves in the direction of the hydrologic gradient of slope of the ground water surface from areas of recharge to points of discharge. General direction of groundwater flow is southeasterly, from the recharge areas in the alluvial cones along the edges of the valley fill toward the discharge area in the Los Angeles river narrows.

Pumping large quantities of water from municipal uses has greatly modified the predevelopment condition in the eastern portion of the San Fernando sub area with respect to the depth to water, hydrologic gradients and local directions of groundwater movement.

Based on the groundwater elevation contour maps (State Water Rights Board, 1962) depth to water within the study area range from 70 to 100 feet. The subsurface outflow from the San Fernando sub area averaged about 340 acre-feet per year during the 29-year base period.

## 2.3 Past and Present Business Practices on Site

The facility has been operating at the site since its construction in 1944 when it was built on vacant land (Celli, September 1990). The facility has always been engaged in the warehousing and cutting of steel products.

## 3.0 DRILLING, SAMPLING AND LABORATORY ANALYTICAL RESULTS

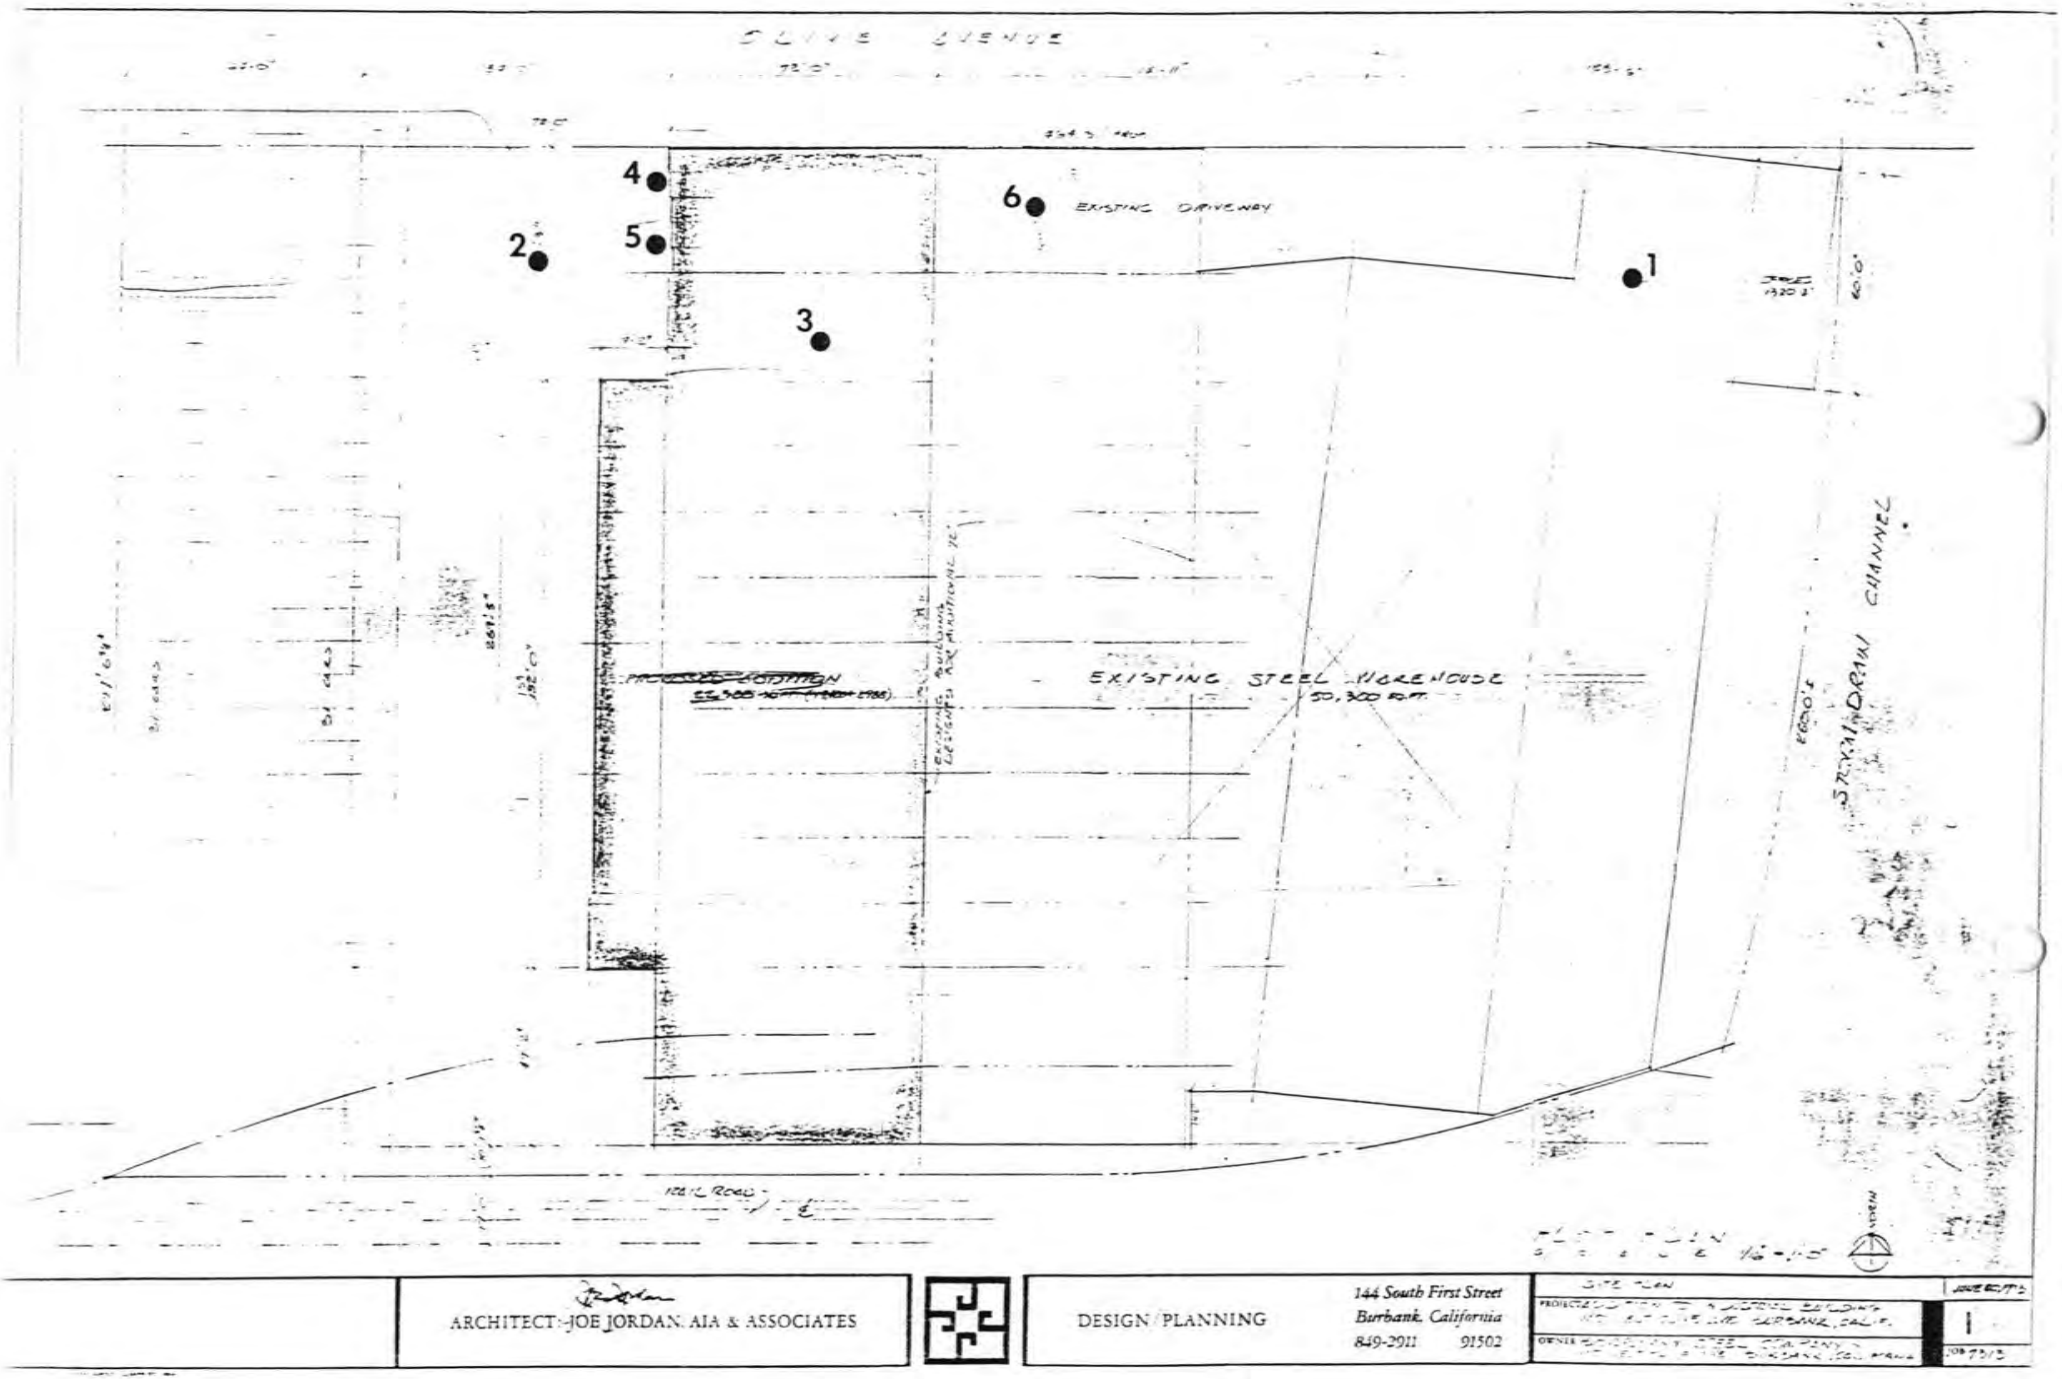
In order to satisfy the requirements of the RWQCB, a total of six soil test borings were drilled. Discussed below are the sampling locations, sampling procedures and laboratory analytical results.

### 3.1 Sampling Locations

A total of six boreholes were drilled as proposed in the Work Plan. As recommended by Mr. Yue Rong of RWQCB, the locations of boreholes 2 and 3 were changed. The locations of boreholes as drilled are presented in Figure 2.

### 3.2 Drilling and Sampling

The drilling was performed by Datum Exploration using a truck-mounted drill rig. Methods employed were as follows:



- Borings were drilled using 10-inch hollow stem augers. Prior to drilling, the augers were thoroughly steam cleaned and visually inspected for any potential source of contamination from previous drilling. Soil cuttings were retained in 55-gallon steel drums and stored on site. The boreholes were backfilled with a clean sand and bentonite mixture.

- The subsurface soil samples were collected with a Modified California Split Spoon Sampler and retained in brass sleeves. Samples were taken at depths of 1, 5, and 10 feet below the surface.

- Immediately following collections at each depth, the sampler was opened carefully to avoid disturbance and the middle sleeve immediately covered with aluminum foil and capped at both ends and sealed with electrical tape. The sleeves were then placed in resealable plastic bags and then placed into a cooler with ice for preservation of sample integrity. Collected samples were hand delivered the next day to Crosby Laboratories, a State-certified laboratory, using chain-of-custody protocol. A copy of the custody sheet is presented in Appendix A.

- Soil contained in the upper and lower brass sleeves was scanned using a photoionization detector (HNu) for both safety monitoring and data collection purposes. Table 3.1 presents HNu readings.

- Each sample was described with respect to lithologic characteristics according to the Unified Soil Classification System. The drilling logs are presented in Appendix B.

● SAMPLING LOCATIONS AS DRILLED

- Sampling equipment was decontaminated using laboratory detergent (Alconox) and deionized water after each use. Each split spoon was inspected for completeness of decontamination prior to use.

- Groundwater was not encountered in any of the boreholes.

### 3.3 Laboratory Analysis

Eighteen soil samples were collected from six boreholes and analyzed for volatile organic compounds (VOCs) following EPA Method 8010/8020 and for Total Petroleum Hydrocarbons (TPH) by EPA Method 418.1.

No VOCs were detected in any of the soil samples. TPH levels ranged from 10.7 mg/kg to 18.1 mg/kg. The results of geologic field observations, HNU monitoring, and the chemical analysis of each soil sample are summarized in Table 3.1. A tabulation of all analytical data associated with the subsurface sampling is presented in Appendix C.

## 4.0 CONCLUSIONS AND RECOMMENDATIONS

No volatile organic compounds were detected in any of the soil samples. Results show presence of low levels of total petroleum hydrocarbons ranging from 10.7 mg/kg to 18.1 mg/kg. These levels appear to be insignificant and are below levels of concern.

EMA recommends that no further environmental investigation is warranted at Borrmann Steel site.

**QC & SYSTEM AUDIT DATA SHEET**

## QUALITY CONTROL DATA - EPA8010

| | ACCURACY | | | | PRECISION | |
|---|---|---|---|---|---|---|
| PARAMETER | Percent Spike Recovery | Control Limits | Performance Check Recovery | Control Limits | Relative Percent Difference | Control Limits |
| 1,1 Dichloroethene | 70.1 | 40-120 | 100.9 | 90-110 | 0.0 | 0-40 |
| Trichloroethene | 86.1 | 50-120 | 99.1 | 90-110 | 0.0 | 0-40 |
| Chlorobenzene | 66.0 | 50-120 | 95.5 | 90-110 | 0.0 | 0-40 |

## SYSTEM AUDIT REFERENCE

Access ID# : EMA14902-19
QC Std ID# : SP112090
Sample Prep Ref.# : P64SPOVI

## ANALYTICAL QUALIFIERS:

1. All solid and sludge samples are analyzed on an "as received" basis without correction for moisture content.
2. IF target analytes are found in the laboratory reagent blank at or above the indicated detection limit, the test result is corrected by the amount found before reporting.

No target analytes were found.

Subject: Subsurface Investigation at Borman Steel Company, Burbank, California - RWQCB File No. 104.0197

Dear Mr. Bacharowski:

Environmental Managers and Auditors, Inc. (EMA) submitted the work plan for subsurface investigation at the above referenced site to RWQCB on September 12, 1990. In your letter dated September 27, 1990 to Mr. Mark Celli of Borman Steel the work plan was approved. However, Borman Steel was advised to comply with some additional requirements. As part of the additional requirements, five comments were made on the work plan. This letter is in response to your comments.

1. The field activities will be supervised by Mr. Russ Purcell, a California Registered Geologist (Registration No. 4091). Mr. Purcell's involvement will include supervision of the drilling and sampling activities on site, logging the boreholes, and preparation of final report.

2. The final report will contain the minimum laboratory data requested in your letter.

3. The analytical testing will be performed by Crosby Analytical, Inc. of Anaheim, a California Certified Laboratory.

4. Boring logs, together with proper map and diagrams clearly depicting site location and all soil test boring locations on site will be presented in the final report.

5. All boring locations will be field verified with Regional Board Staff on the day the drilling commences on site.

BORMAN

We plan to commence drilling and sampling activities on November 15, 1990. As discussed in your letter that a Regional Board Staff is required to be present during drilling/sampling activities, we would appreciate if you could make one of your staff members available to be on site at 9:30 a.m. on November 15, 1990.

If you have any questions, please call us at (818) 852-4260.

Sincerely,

ENVIRONMENTAL MANAGERS
& AUDITORS, INC.

SUBSURFACE INVESTIGATION - WELL INVESTIGATION PROGRAM (FILE NO. 104.0197)

Reference is made to your consultants, Environmental Managers and Auditors, Inc., workplan dated September 12, 1990, for Subsurface Investigation at the subject site.

We have reviewed and evaluated your workplan, and have no objections to you implementing it provided that all work is completed as specified in your proposal and complies with the additional requirements listed below, as discussed in a telephone conversation between Mr. Norman Sacro of Environmental Managers and Auditors, and Mr. Yue Rong of this Regional Board staff on September 25, 1990.

1. The workplan was not signed by the Registered/Certified geotechnical personnel who will be directly overseeing field activities, and is required to sign the Final Report for this project. Prior to commencing any field activities, this individual must provide this Regional Board with a written notification specifying the level of his/her involvement with this project and the duration of his/her field supervision of the drilling and sampling activities onsite.

2. The final report must contain the following minimum laboratory QA/QC data: reagent blanks, matrix spike/matrix spike duplicates, spiking surrogate recoveries concentrations, laboratory control standards, calibration check standards, the extraction procedures utilized, and copies of laboratory extraction sheets.

3. Please provide us with the name of the analytical testing laboratory that will be used for analyses of soil samples prior to commencing any work onsite.

4. Boring logs, together with proper map and diagrams clearly depicting site location and all soil test boring locations onsite must be provided in the final report.

5. All boring locations must be verified in the field with Regional Board staff and your consultant on the day that drilling commences onsite. Please notify us at least one week prior to commencing field work so that we can arrange a staff to be present.

Four copies of the final report are due to this Regional Board by November 16, 1990. If you have any questions, please contact Yue Rong at (213) 266-7528.

SUBJECT: Subsurface Investigation
Well Investigation Program
RWQCB File No. 104.0197

Dear Mr. Bacharowski:

Environmental Managers & Auditors, Inc. (EMA) is pleased to submit this Proposed Work Plan for Subsurface Site Investigation on behalf of Borrmann Steel Company in response to a letter from the Regional Water Quality Control Board (RWQCB) dated July 16, 1990. EMA has been authorized by the facility to prepare this document in accordance with your Well Investigation Program. It is our understanding that the information you require regarding the former underground storage tank has been forwarded to you by the facility earlier.

Should you have any questions or need more information, please call.

Sincerely,

ENVIRONMENTAL MANAGERS
& AUDITORS, INC.

## 1.0 INTRODUCTION

This proposed work plan is being submitted in response to a letter from the Regional Water Quality Control Board, Los Angeles Region (RWQCB) dated July 16, 1990 (see Appendix A) requiring a subsurface investigation.

On May 16, 1990, RWQCB inspected Borrmann, for past and present methods of handling chemicals and wastes. The facility is located at 110 W. Olive Avenue, Burbank, California. Figure 1 presents the facility location map. Of primary concern are the areas listed below as indicated in the letter from the RWQCB:

- "Cutting machine areas at your facility. There were obvious signs of waste discharge to the ground throughout these areas, and there were no control mechanisms in place to contain any spilled or leaked material."
- "Maintenance equipment area, where chemical/waste material discharge were observed."
- "Former underground fuel storage tank area previously located at the front of your facility."

The main objective of RWQCB Well Investigation Program (WIP) is to determine possible sources contributions to pollution in nearby drinking water wells.

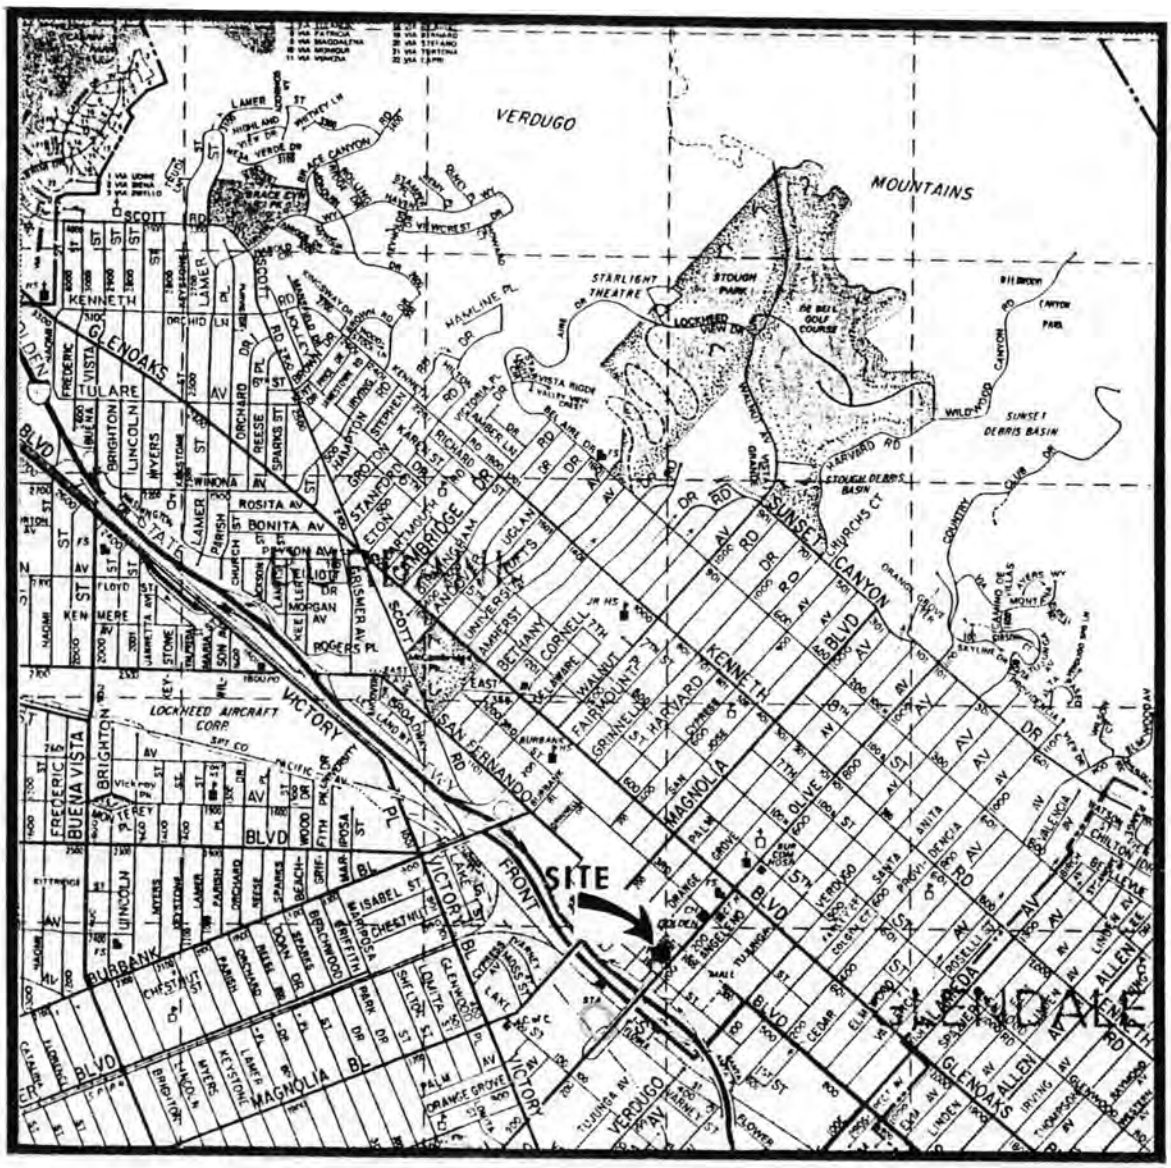

**Figure 1. LOCATION MAP FOR SUBJECT FACILITY**

## 2.0 SITE CONDITIONS

### 2.1 Geology

The site is situated within the San Fernando basin in the upper Los Angeles river area of Los Angeles County, California. The geologic rock units and formations of the upper Los Angeles River area represent a long span of geologic time. Rock units of the basement complex have been assigned on age of pre-Cambrian whereas other units within the basement complex represent various periods through the upper Jurassic or lower Cretaceous. Upper pleistocene, older alluvium and recent alluvium are unconsolidated deposits.

The Saugus formation crops in the hills and southern slopes of the mountains along the northern part of the valley floor and underlines the other members of the water bearing series. The maximum thickness of this unit as measured in Lopez Canyon is 6,400 feet (State Water Rights Board, 1962). Within the study area this formation is overlain by older and recent alluvium.

The older alluvium is composed of generally coarsegrained unconsolidated or uncemented deposits of modern streams laid down in earlier cycles of erosion. The source areas of the streams during earlier and present stages of erosion have undergone little change with the exception of remnants (terrance deposits) which have been isolated by erosion around the margin of the valley floor, deposition has been nearly continuous to the present time.

The recent alluvium deposits are derived primarily from sedimentary rocks and are finer grained and deposited in much the same manner as the underlying older alluvium.

### 2.2 Hydrogeology

The site is located within the San Fernando, hydrologic sub area. The boundaries of the San Fernando hydrologic sub area, are the alluvial contacts with the nonwater-bearing series along the San Rafael Hills and Verdugo mountains on the east and northeast, the Santa Susana mountains and Simi Hills on the northwest and west, and the Santa Monica mountains on the south. The Los Fernando hydrologic sub area, is bounded on the east by the alluvial contact with the San Rafael and Repetto Hills and on the west by this contact with the Elysian Hills.

An area of high groundwater level is present in the western portion of the hydrologic sub area. Because of the existence of more permeable gravel stringers in the fine grained found in the western portion of the sub area, small localized pressure effects can be observed. This gravel stringers represents the former stream channels which have braided over the fine grained deposits and in turn have been buried by additional fine grained material.

In the San Fernando sub area, ground water moves in the direction of the hydrologic gradient of slope of the ground water surface from areas of recharge to points of discharge. General direction of ground water flow is southeasterly, from the recharge areas in the alluvial cones along the edges of the valley fill toward the discharge area in the Los Angeles river narrows.

Pumping large quantities of water from municipal uses has greatly modified the predevelopment condition in the eastern portion of the San Fernando sub area with respect to the depth to water, hydrologic gradients and local directions of ground water movement.

Based on the ground water elevation contour maps (State Water Rights Board, 1962) depth to water within the study area range from 70 to 100 feet. The sub surface outflow from the San Fernando sub area averaged about 340 acre-feet per year during the 29-year base period.

## 2.3 Past and Present Business Practices on Site

The facility has been operating at the site since its construction in 1944 when it was built on vacant land (Celli, September 1990). The facility has always been engaged in the warehousing and cutting of steel products.

## 3.0 SAMPLING AND LABORATORY ANALYSIS PROTOCOLS

In order to satisfy the requirements of the RWQCB, a total of six soil test borings will be drilled. Discussed below are the sampling location, sampling procedures, and laboratory analytical protocols.

### 3.1 Sampling Locations

A total of six test borings are called for in the letter from the RWQCB (Appendix A). EMA proposes to drill all six boreholes at the locations described below. Sample locations have also been assigned to each. Appendix B gives the approximate locations of the boreholes proposed to be drilled.

| LOCATION | DESCRIPTION |
|---|---|
| 1 | One (1) boring is to be completed adjacent to steel cutting machine station located in the north east portion of the workshop. |
| 2 | One (1) boring is to be completed adjacent to steel cutting machine station located in the southern portion of the workshop. |
| 3 | One (1) boring is to be completed adjacent to steel cutting machine station located in the western portion of the workshop. |
| 4, 5 | Two borings (2) borings are to be drilled immediate outside of the workshop but adjacent to the cutting machine station located in the western portion of the workshop. |
| 6 | One (1) boring is to be completed at in-house maintenance area located in the northern portion of the facility. |

### 3.2 Sampling Procedures

Six 10-foot vertical boreholes will be drilled using a 10-inch hollow stem auger. Prior to drilling, the augers will be thoroughly steam cleaned and visually inspected for any potential source of contamination from previous drilling. Samples will be collected at the following depths: 1, 5, and 10 below the surface or up to refusal depth. All soil samples will be collected in brass sleeves using a Modified California Split Spoon Sampler. Samples will be visually classified for lithologic purposes according to the Unified Soils Classification System.

In each split spoon, soil will be retained in three brass sleeves. Immediately following collection, the middle brass sleeves will be capped with Teflon sheet and placed into refrigerated ice chests for preservation of sample integrity. Soil contained in either the upper or lower brass sleeves will be scanned using a photoionization detector (HNu). This is done for both safety and data collection purposes. The detector will be used to

assist in the determination of the level of respiratory protection required for the sampling crew. The sampling will be conducted in Level D protection unless an upgrade to Level C is mandated by the instrumental monitoring of the breathing zone. In addition, the instrumental scanning will give semi-quantitative information related to volatile organics contained in the samples.

All samples will be appropriately labeled, sealed in Ziplock plastic bags, stored on ice, shipped in ice chests to the laboratory following a chain-of-custody protocol (See Appendix C). The samples will be sent to a State-certified laboratory for analysis.

Sampling equipment will be decontaminated between sampling horizons by washing with laboratory detergent (Alconox) and rinsing with distilled water. The borehole will be backfilled with a clean sand and bentonite mixture. Soil cuttings will be contained in 55-gallon steel drums and stored on site. If the laboratory results indicate that the soil does not contain hazardous levels of contaminants, the cuttings will be disposed of as non-hazardous. Otherwise, the cuttings will be manifested and disposed of as hazardous waste in an approved landfill.

Groundwater is not expected to be encountered at 10 depth feet based on known information (See Section 2.2). In case free water is encountered during drilling, the drilling will be discontinued and the hole backfilled immediately with sand and bentonite mixture. Based on the laboratory results, the issue of installing a groundwater well will be dealt with in consultation with the property owner as well the RWQCB.

### 3.3 Laboratory Analytical Methods

All soil samples will be analyzed for volatile organic compounds (VOCs) following EPA Method 8010/8020 and for TPH by EPA Method 418.1. For quality control purposes, a matrix spike (MS), a matrix spike duplicate (MSD), and a blank will be run along with the sample extracts. EPA's practical quantitation limits of 5-10 ug/kg for VOCs and 1 mg/kg for TPH will be achieved by the laboratory. The samples will be analyzed within EPA-prescribed holding times.

SUBSURFACE INVESTIGATION - WELL INVESTIGATION PROGRAM (FILE NO. 104.0197)

On May 16, 1990, your facility was inspected by members of this Regional Board staff. The inspection focused mainly on past and present methods used for handling chemicals and wastes at your facility. During the site visit, the inspectors became aware of certain situations that may have resulted in soils and potential ground water pollution. Of primary concern are the areas listed below:

1. Cutting machine areas at your facility. There were obvious signs of waste discharge to the ground throughout these areas, and there were no control mechanisms in place to contain any spilled or leaked material.

2. Maintenance equipment area, where chemical/waste material discharges were observed.

3. Former underground fuel storage tank area previously located at the front of your facility.

The main objective of this Agency's Well Investigation Program (WIP) is to determine possible sources contributing to pollution in nearby drinking water wells. This program is comprehensive since even small discharges may have significant additive effects on the quality of ground water in the area. You are hereby directed to submit a workplan for conducting a Subsurface Investigation to determine whether infiltration of contaminants into soils has occurred at the area of concern identified above. Your workplan must address all items contained within the enclosed Workplan Requirements for Initial Subsurface Engineering/Geologic Soil Investigation and incorporate the site specific requirements listed below.

1. A total of six (6) soil test borings are required at this time, and boring locations are identified below.

   a) One (1) boring is to be completed adjacent to steel cutting machine station located in the north east portion of the workshop.

   b) One (1) boring is to be completed adjacent to steel cutting machine station located in the southern portion of the workshop.

   c) One (1) boring is to be completed adjacent to steel cutting machine station located in the western portion of the workshop. Two (2) are to be drilled immediate outside of the workshop but adjacent to the cutting machine station located in the western portion of the workshop.

   d) One boring is to be completed at in-house maintenance area located in the northern portion of the facility.

2. Soil samples must be taken at 1, 5, and 10 feet below land surface at each test boring location. All soil samples must be analyzed after a protocol is to be developed and to specify all laboratory analysis to be completed. Minimum analyses of all soil samples are to include EPA Method 418.1 for total petroleum hydrocarbons and EPA Methods 8010/8020 or 8260 for volatile organics.

3. In-house maintenance area located in the northern portion of the workshop must be retrofitted in order to prevent waste material from infiltrating through the asphalt concrete surface throughout this area.

4. Please submit a copy of the final report for former underground storage tank removal and related soil testing with your workplan.

Four copies of the workplan containing all of the information identified above are due to this Regional Board by August 17, 1990. If you have any questions concerning this matter, please contact Mr. Yue Rong at (213) 266-7528.

SUBSURFACE INVESTIGATION - WELL INVESTIGATION PROGRAM (FILE NO. 104.0197)

We have received your letter dated July 24, 1990, requesting additional time to submit the required Subsurface Investigation Workplan for the subject site. The additional time is requested due to the tight schedule for your company's upcoming inventory activities onsite. You are hereby granted a time extension until September 17, 1990, to submit your workplan. No further time extension will be granted.

By your request, enclosed is a partial list of consultants available to perform the engineering or geologic subsurface investigation required of you by this Regional Board. This Regional Board in no way endorses or preapproved any consultants on the list. Each consultant requested inclusion on this list and appears to have at least one staff person who meets the registration requirements of our Subsurface Investigation Guidelines. This list is not exclusive, as there are many consultants who meet the registration requirements but did not request to be included. You are free to retain the consultant of your choosing, either from this list or elsewhere.

Please note that retaining a consultant from this list does not assure acceptance of that consultant's work by this Regional Board. The Regional Board reserves the authority to review any consultant's work to assure compliance with all applicable statutes, regulations, guidelines, and orders. It is your responsibility to ascertain that the consultant is professionally qualified and that the required work is adequately performed.

If you have any questions, please contact Yue Rong at (213) 266-7528.

Subject: Geotechnical Evaluation and Review
Subsurface Tank Removal
Borrman Steel
110 W. Olive Ave., Burbank, CA
for Allied Environmental Management, Inc.

Dear Ms. Schwartz,

This report presents the results of a geotechnical evaluation of the subsurface storage tank removal at the referenced site and a review of the work performed, and summary data presented by Allied Environmental Management, Inc. A total of one 1000-gallon, leaded gasoline tank was removed February 10, 1987, by Allied Environmental Management and transported by Allied for disposal. Local fire department personnel were present to insure proper removal and transportation procedures. A summary of the work performed is presented in the appendix. Vicinity and site maps are presented in Plates 1 & 2. Upon removal of the tank, selected soil samples were taken to determine the degree of contamination in the soils below the tanks. The results of laboratory testing are presented in Plate 4, while the Chain of Custody Record is presented in Plate 5. No subsurface logging was performed.

## SITE LOCATION AND GEOLOGY

The subject site is located on the southeast side of Olive Ave. northeast of its junction with Lake St. in the City of Burbank, County of Los Angeles. The present elevation is approximately 560 feet above sea level. The site consists of predominantly alluvial basin fill deposits associated with ephemeral stream deposition within the L.A. basin. The present courses of the Burbank Western Channel and the Los Angeles River are located less than 0.2 mile to the east and 1.5 miles to the south, respectively. The alluvial materials are generally sandy and silty in nature, though some areas contain considerable clay or gravel.

Analysis of ground water contour data on file with the County of Los Angeles indicate the ground-water level in the vicinity of the site to be on the order of 75 feet below the ground surface. No water was encountered in the excavation.

## SOIL SAMPLING AND EVALUATION

Selected soil samples were obtained from the earth materials below the tanks. Sample locations were chosen in a manner so as to provide the most complete coverage of the subsurface materials and to provide for a more complete evaluation of potential soil contamination. Special attention was given to geological conditions which may provide for accelerated downward movement of ground water. The sample locations are depicted in Plate 2.

The sample were taken in earth materials below the removed tank. A total of two samples, one from the east end and one from the west end, were taken from below the tank bottom at a depth of 8 feet below surface (Plate 2). The samples were placed in glass container, sealed with tape, placed in ice to chill, and transported to Curtis & Tompkins, Ltd. for laboratory analysis. The samples were tested using EPA method 8015 and for lead. The laboratory test results and the Chain of Custody Record are presented in the appendix (Plates 4 & 5).

## CONCLUSIONS

Review of the summary data presented by Allied Environmental Management, Chain of Custody Record, and the laboratory test results indicate the amount of contamination in the earth materials below the tank to be within the guidelines of the County of Los Angeles. No additional removal or treatment of the earth material is deemed necessary.

REMARKS

This investigation was made in accordance with generally accepted geologic procedures and within the limits prescribed by the client. No other warranty, expressed or implied, is made as to the professional evaluation included in this report.

Although no significant variations in bedrock or soil conditions are anticipated, if conditions are encountered during future restoration work, and these conditions appear to be different from those disclosed by this preliminary report, this office shall be notified to consider the need for modification.

The backfill at the site was compacted using on-site equipment. While a relative degree of compaction can be obtained in this manner, the fill was not tested and does not qualify as a certified fill. Should this area be used in the future to support structural loads, steps should be taken to test and insure the competence of the fill.

It should be realized that subsurface excavations are subject to caving and may present a hazard. In this regard, all shoring and bracing, if necessary, shall conform to current standards of the Industrial Accident Commission of the State of California and other public agencies having jurisdiction.

This report is subject to review by controlling public agencies having jurisdiction.

If you have any questions, please contact this office.

Respectfully submitted,

George DeVries
Registered Geologist 3721

A L L I E D
ENVIRONMENTAL MANAGEMENT, INC.
8316 FIRESTONE BLVD.
DOWNEY, CA, 90241.

Borrman Steel, 110 West Olive Ave, Burbank, has maintained the following underground tank(s):
(1) - 1,000 gal. steel tank(s) for leaded gasoline.
They have requested a permanent closure for the present tank(s). The decision was based on the possibility of future tank leakage that would cause a contamination of the soil.

The necessary permits were obtained by an agent of ALLIED and signed from the proper authorities needed:
City / County Fire Department - Permit on file with Dept.
Local Health Services Dept. - Permit #2372-B
The tank(s) had been rendered inert and removed from the site FEB. 10,1987. Tank removal and soil sampling was performed by Allied Industrial Services.

PROCEDURES: After a backhoe had removed soil from the bottom of the excavation floor, total soil sample(s) collected:
(2) - sample(s) taken from the (8) foot level.
All soil samples were transported to Curtis & Tompkins, Ltd, for analysis, using E.P.A. method(s): 8015. The sample jars were sealed, labeled, and stored in ice, including Chain-of-Custody record to insure traceability,(SEE ATTACHED).

LABORATORY RESULTS (ANALYSIS): Analysis of the soil sampling taken from the tankbed(s) revealed the following:(SEE ATTACHED).

According to the County Department of Public Works, the maximum allowable level of contamination in soil is 100 parts per million (p.p.m.). Therefore, in conclusion, there is not any evidence of soil contamination from the original tank bed(s) of Borrman Steel Company in Burbank.

OWNERSHIP: FEDERAL STATE LOCAL AGCY PRIVATE X
SITE DESCRIPTION:

A business of steel cutting and distribution. Most of areas in the company are used for storage of steel products. Areas of concern:

1. 3 steel-cutting machine areas,
2. in-house machine maintenance area,
3. former UST (removed now).

Cutting oils are constantly spilled and discharged to the black tar surface while machines are cutting steels. Oil spills dribbled on the floor and streamed to backyard. Sign of oil discharge was observed in the backyard.

MANDATORY CHEMICAL USE QUESTIONNAIRE (FILE NO. AB104.0197)

The California Regional Water Quality Control Board, Region 4, is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within the region.

As part of the statewide monitoring program (AB1803) being conducted under the direction of the California Department of Health Services, ground water wells in your area have been sampled. The results of the sampling indicate the presence of organic contaminants in the ground water.

Your facility is geographically within the area of concern and may be engaged in practices which might require the storage and use of chemicals such as solvents, oils, fuels, etc. Therefore, pursuant to Section 13267(b) of the California Water Code, you are requested to complete the attached questionnaire to provide information on past or present chemical storage or use at your facility. In addition to completing the questionnaire, specify the type of sewer system (private, municipal, industrial) used at your site. Please return the completed questionnaire to the Regional Board by May 7, 1990. The return of this questionnaire, properly signed, is required even if no chemical is stored or used at your facility. If you are new owners, complete the questionnaire to the best of your ability and provide available data concerning the past owners including contact and phone number.

If your facility is currently conducting or has in the past conducted an investigation associated with soil or ground water contamination, please include a copy of the findings or relevant information with the questionnaire.

If you have any questions, please call Mila Silvestre-Kleinbergs at (213) 266-7529.

# *ANALYTICAL DATA REQUEST FORM*

Date Requested: 03/06/91
Requested by: Mr. D. A. Bacharowski
Mr. Y Rong
(Tel #) (213)266-7500

Copy 1: Mr. B. Jones - DOHS, L.A. County
2: Ms. A. Kaneshiro - DOHS, L.A. County
3: Mr. M. Celli - Borrmann Steel Co.
4: Mr. K. Mohmood - EM&A
5: Mr. R. Spinner - DOHS, Water Lab.
6: Ms. A. Greene - U.S. EPA, Region IX

**RE:** Client Name: Environmental Managers & Auditors, Inc.
Project Name: BORR STE
Project No: 0041-01-01
Lab ID #(s): AA14902-AA14919
Test(s) Requested: EPA-8010/EPA-8020, EPA-418.1

Release Approved by Client: Mr. Khalid Mohmood, Project Director Date: 03/12/91
**TOTAL # OF PAGES ATTACHED:**

1. Are copies of Laboratory Workbook for the specified samples attached?
   X Yes ____ No
2. Are copies of the "Sample Queue/Sample set-up" information attached?
   X Yes ____ No
3. Are copies of the "Component Table" information attached?
   X Yes ____ No
4. Are copies of the "Peak Integration" information attached?
   X Yes ____ No
5. Are copies of the "Data Acquisition" information attached?
   X Yes ____ No
6. Is a copy of the calibration curve integration data used to quantify specified samples attached?
   X Yes ____ No
7. Are the following QC chromatograms attached?

| | | | | | |
|---|---|---|---|---|---|
| a. | Reagent Blank | X | Yes | ____ | No |
| b. | Matrix Spike | X | Yes | ____ | No |
| c. | Duplicate Spike | X | Yes | ____ | No |
| d. | Duplicate Run | X | Yes | ____ | No |
| e. | QC Check Std | X | Yes | ____ | No |

**FOR OFFICE USE ONLY**

Date Prepared: 03/18/91 Via: ☐ Certified Mail No: ____
Date Mailed: 03/20/91 ☒ Courier: Name: Pacific Delivery

# *LABORATORY DATA FILE SHEET*

*Client:* EMA *Project Manager:* Mr. K. Mohmood

*Project Name:* BORR STE *# of Lab Reports:* 54

*Report Period:* *From:* 11/15/90 *To:* 11/21/90

1. *Are all Report Copies made from the final report sent to the client, and are they attached?*

   X *Yes* _____ *No*

2. *Are all calibration curve data along with blank data used for Sample results calculation attached?*

   X *Yes* _____ *No*

3. *Are all sample peak integration data complete and attached?*

   X *Yes* _____ *No*

4. *Are all Quality Control Data for each method used completed?*

   X *Yes* _____ *No*

5. *Are all SYSTEM AUDIT REFERENCE DATA (Data Access ID#; OC Std ID#, Sample Prep. Ref. #;) attached?*

   X *Yes* _____ *No*

6. *Is the QC & SYSTEM AUDIT DATA SHEET showing Accuracy & Precision Data complete and attached?*

   X *Yes* _____ *No*

*If "YES", Data File is complete. Attach to final report and place in customer file.*
*If "NO", **STOP** and complete before sending report.*

*NO REPORT SHALL GO OUT UNTIL ALL IS COMPLETE*

Approved by the State of California, Department of Health Services

## ANALYTICAL QUALIFIERS:

1. All solid and sludge samples are analyzed on an "as received" basis without correction for moisture content.
2. IF target analytes are found in the laboratory reagent blank at or above the indicated detection limit, the test result is corrected by the amount found before reporting.

No target analytes were found.

**Notes:**

**SD = Standard Deviation $[(S^2)^{1/2}]$**
**UCL = Upper Control Limit (1.92 MDL)**
**LCL = Lower Control Limit (0.69 MDL)**
**$S^2$ = Variance**
**C = Concentration (ug/l)**

**MDL = Method Detection (Factor)(SD)**
**where Factor is Students' t value at the 99% confidence level as follows:**

**For 7 replicates use 3.143 as Students' t value.**
**For 8 replicates use 2.998 as Students' t value.**
**For 9 replicates use 2.896 as Students' t value.**
**For 10 replicates use 2.821 as Students' t value.**

**Notes:**

| | | | | | |
|---|---|---|---|---|---|
| SD | = | Standard Deviation $[(S^2)^{1/2}]$ | MDL | = | Method Detection (Factor)(SD) where Factor is Students' t value at the 99% confidence level as follows: |
| UCL | = | Upper Control Limit (1.92 MDL) | | | |
| LCL | = | Lower Control Limit (0.69 MDL) | | | |
| $S^2$ | = | Variance | | | For 7 replicates use 3.143 as Students' t value. |
| C | = | Concentration (ug/l) | | | For 8 replicates use 2.998 as Students' t value. |
| | | | | | For 9 replicates use 2.896 as Students' t value. |
| | | | | | For 10 replicates use 2.821 as Students' t value. |

# CALIBRATION STANDARDS LOG SHEET

**METHOD REFERENCE: EPA 8010**
**HALOGENATED VOLATILE ORGANICS**
**# OF COMPOUNDS:** 28

## SUPPLIER INFORMATION

**Name:** Ultra Scientific

**Lot #:** C-4288 (Purgable Halocarbon Mixture)
**Catalog #** HCM-601
**Matrix/solvent:** Pesticide Grade Methanol
**Concentration:** see below
**Expiration Date:** 4/91

## LIST OF COMPOUNDS

| | Conc @ µg/ml | | |
|---|---|---|---|
| Benzyl chloride | | 1,3-Dichlorobenzene | 100.0 µg/ml |
| Bis(2-chloroethoxy)methane | | 1,4-Dichlorobenzene | 100.0 µg/ml |
| Bis (2-chloroisopropyl) ether | | Dichlorodifluoromethane | 100.5 µg/ml |
| Bromobenzene | | 1,1-Dichloroethane | 100.1 µg/ml |
| Bromodichloromethane | 100.1 µg/ml | 1,2-Dichloroethane | 100.1 µg/ml |
| Bromoform | 100.1 µg/ml | 1,1-Dichloroethylene | 100.1 µg/ml |
| Bromomethane | 100.4 µg/ml | trans-1,2-Dichloroethylene | 100.1 µg/ml |
| Carbon Tetrachloride | 100.0 µg/ml | Dichloromethane = methylene chl | 100.1 µg/ml |
| Chloroacetaldehyde | | 1,2-Dichloropropane | 100.0 µg/ml |
| Chlorobenzene | 100.1 µg/ml | trans-1,3-Dichloropropylene | 100.0 µg/ml |
| Chloroethane | 100.4 µg/ml | 1,1,2,2-Tetrachloroethane | 100.1 µg/ml |
| Chloroform | 100.0 µg/ml | ~~1,1,1,2-Tetrachloroethane~~ | |
| 1-Chlorohexane | | Tetrachloroethylene | 100.1 µg/ml |
| 2-Chloroethyl vinyl ether | | 1,1,1-Trichloroethane | 100.0 µg/ml |
| Chloromethane | 100.5 µg/ml | 1,1,2-Trichloroethane | 100.1 µg/ml |
| Chloromethyl methyl ether | | Trichloroethylene | 100.1 µg/ml |
| Chlorotoluene | | Trichlorofluoromethane | 100.1 µg/ml |
| Dibromochloromethane | 100.0 µg/ml | Trichloropropane | |
| Dibromomethane | | Vinyl chloride | 100.5 µg/ml |
| 1,2-Dichlorobenzene | 100.0 µg/ml | cis-1,3-Dichloropropene | 100.0 µg/ml |

## HALOG&AROMATIC VOLATILE ORGANIC

### Operating Conditions Gas Chromatography

**Operator ID:** CYC
**Injection Method:** PURGE&TRP
**Sample Size:** 5 ml
**Sample Pressure:** NA
**Column Type:** Capillary

### Temperature Information

**Column Temperature:** Program
**Injector Temperature:** 200
**Detector Temperature:** 250

**Column Temperature Program**

35 C FOR 8 MIN @10C/MIN TO 210 C AND HOLD FOR 3 MIN
TOTAL TIME = 28.5 MIN

## Column Information

### Column 1

| | | | |
|---|---|---|---|
| **Column ID:** | DB-624 CAP. | **Solid Support:** | NA |
| **Material:** | SPECIALTY | **Percent Load:** | NA |
| **Length:** | 75 m | **Liquid Phase:** | NA |
| **Internal Diameter:** | 0.53 mm | **Mesh Size:** | NA |
| **Date Packed:** | NA | | |

### Gas Specification for Column 1

| | | | |
|---|---|---|---|
| **Carrier Gas:** | HELIUM | **Make-Up Gas:** | NA |
| **Flow/Pressure:** | 10ML/MIN (FLOW) | **Make-Up Flow:** | NA |
| **Split Ratio:** | NA | | |
| **Comment:** | ULTRA HIGH PURITY. | | |

## Detector Information

| No. | Name | Type | Range | Comment |
|---|---|---|---|---|
| 1 | GC#1 ELCD | ELCD | 0 TO 10v | ATT=5;TEMP=880;PUMP=SRTN;MODE=H |
| 2 | GC#1 PID | PID | 0 TO 1V | ATT=1;TEMP=230;LAMP INT.=MID |

## General Comments

ELCD- Set Hydrogen flow at the gauge to 40 psi. Set Helium flow at the gauge to 80 psi. Total flow (Hydrogen + Carrier) should be between 105 to 110 ml/min). (Flow of Hydrogen should be approx. 95 ml/min; carrier flow should be 10 ml/min).

## HALOG&AROMATIC VOLATILE ORGANIC

## Sample Queue

### Queue Parameters

**File Path:** D:\MAX\8010-20D
**Starting Index:** 1
**Raw Sample Weight:** 1.000
**Volume of Extract:** 1.000

### Stripchart Parameters

**Scaling:** Fit to highest valid peak
**Peak Labels:** Retention times
**Regions:** 1
**Options:** baselines, starts/ends, maxima
**x-Axis limits:** 0.0-6144
**y-Axis limits:** 0.0-1.000

# MAXIMA 820 CONCENTRATION REPORT

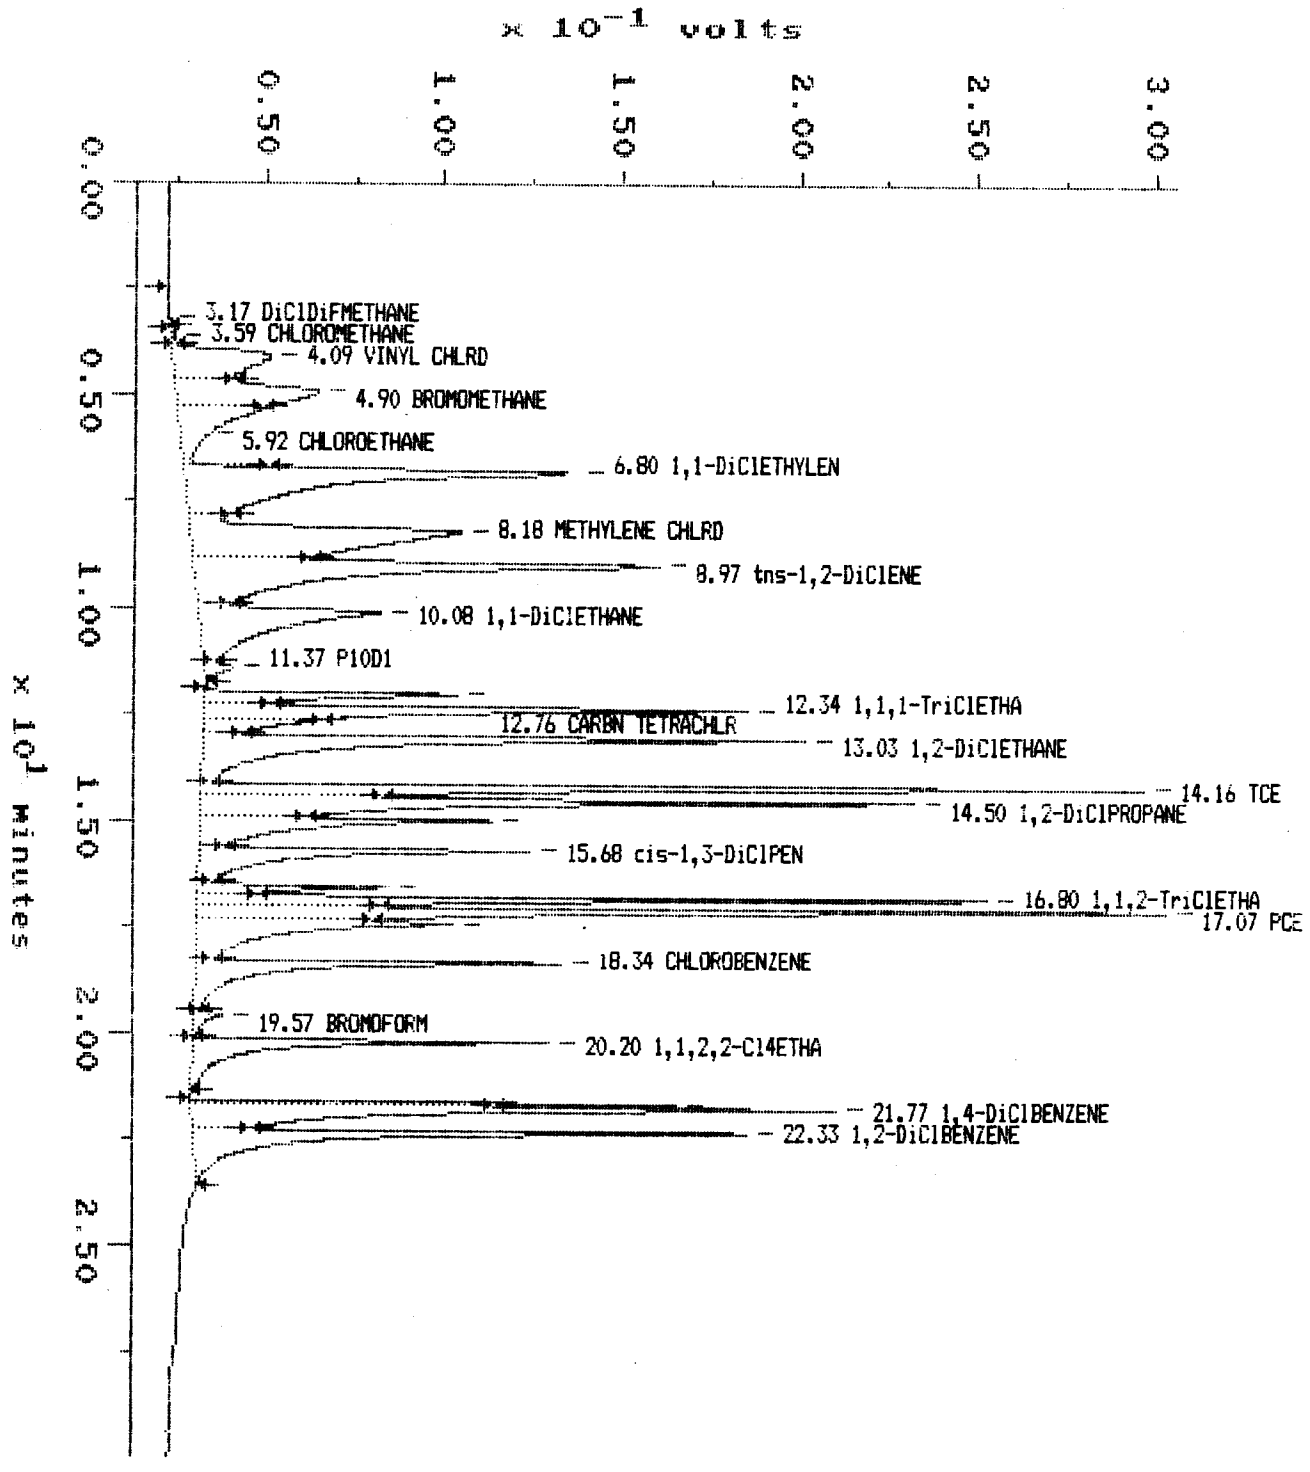
Printed: 22-NOV-1990 8:05:20

**SAMPLE:** 1PPB

#3 in Method: HALOG&AROMATIC VOLATILE ORGANIC
Acquired: 21-NOV-1990 8:15
Rate: 5.0 points/sec
Duration: 30.000 minutes
Operator: CYC

Type: STND
Instrument: GC#1 PURGE&TRAP
Filename: CS21PPB
Index: Disk
Injection Volume: 5000.0



**DETECTOR:** GC#1 ELCD Ch#1

# EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel information and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

***Thank you for your business.***
Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel information and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

***Thank you for your business.***
Please contact EDR at 1-800-352-0050
with any questions or comments.

UNION PACIFIC RAILROAD COMPANY
Burbank, Los Angeles County, California

EXHIBIT "A"

Parcel No.1

A 32.0 foot wide strip of land situate in a portion of Lots 1, 2, and 3, a portion of vacated Harrison Street, and a portion of a vacated 20.0 foot wide east-west alley as shown on the Replat of Fawkes's Subdivision of Plat 87 Burbank, all in the City of Burbank, Los Angeles County, California, as per map recorded in Book 70 at Pages 58 and 59 of Miscellaneous Records of said County, more particularly described as follows:

**COMMENCING** at northwest corner of said Lot 1;

Thence South 46°48' East, along the northeasterly line of said Lot 1, a distance of 230.33 feet, to the **POINT OF BEGINNING**, said point being the beginning of a curve to the right, concave northwesterly, with a radius of 435.09 feet, and a chord bearing South 26°33'27" West, a chord distance of 221.32 feet;

Thence Southwesterly, along said curve through a central angle of 29°28'06", an arc distance of 223.78 feet;

Thence South 41°17'30" West, tangent to last described curve, a distance of 254.80 feet;

Thence South 48°48'30" East, a distance of 32.00 feet;

Thence North 41°17'30" East, a distance of 254.74 feet, to the beginning of a tangent curve to the left, concave northwesterly, with a radius of 467.09 feet, and a chord bearing North 27°44'23" East, a chord distance of 218.90 feet;

Thence Northeasterly, along said curve, through a central angle of 27°06'13", an arc distance of 220.96 feet, to a point on the northeasterly line of aforesaid Lot 1;

Thence North 46°48' West, along the northeasterly line of said Lot 1, a distance of 37.02 feet, to the **POINT OF BEGINNING.**

Containing an area of 15,267 square feet.

Parcel No. 2

A 15.0 foot wide strip of land situate in Lot 1 of the Replat of Fawke's Subdivision of Plat 87 Burbank, in the City of Burbank, Los Angeles County, California, as per map recorded in Book 70 at Pages 58 and 59 of Miscellaneous Records of said County, said strip is bound on the northwest by the southeasterly line of aforesaid Parcel No. 1, on the northeast by northeasterly line of said Lot 1, on the southeast by a line that is parallel with and 15.0 feet distant southeasterly, measured radially, from the southeasterly line of aforesaid Parcel No. 1, and on the southwest by southwesterly line of the Burbank Channel of the Los Angeles Flood Control District as per easement recorded in the Official Records of said County in Book 19756 at Page 340.

Containing an area of 1,300 square feet, more or less.

# APPENDIX H

## Resumes for Preparers of Phase I ESA Report

# Michael T. Steiger, PE

## Vice President / Principal Engineer

Mr. Steiger is a registered professional civil engineer with twenty-seven years of professional consulting and in-house corporate experience directing and executing a wide range of complex water, wastewater, and environmental remediation and compliance projects. He specializes in remedial investigations, feasibility studies, and remedial actions; industrial process wastewater management and permitting; environmental regulatory compliance audits at industrial facilities; CEQA environmental review; transactional due diligence; vapor intrusion assessment and mitigation; and working with regulatory agencies to resolve environmental-related matters. His work and academic training have also included vadose zone hydrogeology, fate and mobility of salinity and nutrients in soil and groundwater, and aqueous geochemistry. Mr. Steiger led Apple Inc.'s global environmental due diligence and data center water and wastewater compliance programs, responsible for the overall direction and execution of all aspects of the programs. His leadership facilitated Apple's rapid data center and real estate portfolio growth while cost-effectively reducing environmental footprints and minimizing corporate environmental liabilities. Having worked in both consulting and in-house corporate settings, Mr. Steiger is uniquely skilled at understanding and meeting the needs of his clients.

**Education**

- M.S. Civil Engineering/ Water Resources, University of California, Berkeley, 1997
- B.S. Civil and Environmental Engineering, Cornell University, 1996

**Registrations/Certifications**

- Professional Civil Engineer, CA (#63348)
- 40-hour OSHA HAZWOPER Training Course
- 8-hour Health and Safety Training Course for Supervisors

## Relevant Experience

- **Corporate Environmental Due Diligence Program.** Mr. Steiger was responsible for the strategic and technical direction of all aspects of a Fortune 50 corporate Global Environmental Due Diligence Program. Contaminated property acquired by the company was re-utilized for multiple uses, including commercial and industrial redevelopment, data centers, and open space such as wetland and stream corridor restoration, sustainable forestry, endangered species habitat, and carbon offsets. Mr. Steiger led over 700 Phase I and Phase II environmental due diligence assessments for acquisitions of contaminated properties in multiple countries. Mr. Steiger's work included assessment of properties contaminated by prior industrial manufacturing; spills from aboveground and underground storage tanks, sumps, trenches, pits and ponds; agricultural activities; military installations; dry cleaners and gas stations; research and development facilities; oil, gas, water, wastewater and electrical infrastructure; and pesticide packaging and manufacturing. He developed agency-approved work plans for soil, groundwater, and soil vapor testing; developed and led execution of risk based soil and groundwater remedial actions; led the design, construction and operation of vapor intrusion mitigation systems; transferred, obtained, and terminated environmental permits as part of company acquisitions; improved global environmental compliance and risk management approaches; evaluated impacts of processes and operational changes on air and

water emissions and waste management; developed strategy for interaction with regulatory agencies to minimize future compliance risks; led technical review and response to regulatory compliance orders; and led development cycles for global safe drinking water and hazardous waste management standards.

- **Phase I and Phase II Assessment.** *Orchards and Processing Facility.* Principal in Charge. Mr. Steiger was the principal in charge of the Phase I ESA services to a prospective purchaser of approximately 3,000 acres of property in Merced and Stanislaus Counties in California. The property contained many acres of orchards, well head and pesticide mixing and storage areas, a maintenance facility with above ground fuel storage and waste oil storage tanks, and a processing facility with a wastewater pond and fill areas. EKI completed Phase I ESA reports for the various sites and prepared scopes of work for Phase II investigations to support the Phase I ESAs. Based on EKI's preliminary information, the Client proceeded with the acquisition.
- **Phase I and Phase II Environmental Site Assessment.** *East Palo Alto, CA*. Project Manager. At a former industrial property impacted with high concentrations of arsenic, volatile organic compounds, and pesticides, Mr. Steiger performed a Phase I environmental site assessment and was responsible for subsequent phases of Phase II soil and groundwater investigations to assist with acquisition and development of the property by a real estate developer. A Superfund Record of Decision (ROD) was previously issued for the property and nearby properties related to past releases from a former agricultural chemical manufacturing facility located adjacent to the property. Mr. Steiger assessed potential impacts to the planned future development related to identified existing environmental conditions and the effectiveness of the remedial actions previously implemented on the property. As a result, the lead regulatory agency overseeing cleanup of a neighboring property required several contingency actions be incorporated into the groundwater containment system, alleviating concerns that the proposed containment system could impact development of his client's property.
- **Phase I and Phase II Environmental Site Assessment.** *Dublin, CA*. Project Engineer. As part of a property transaction, Mr. Steiger performed Phase I / Phase II Environmental Investigations for property that was formerly part of an active U.S. Navy Facility in the 1940s. Mr. Steiger performed field activities including logging soil boreholes and collecting soil and groundwater samples to investigate the potential presence of a variety of chemical constituents in soil and groundwater. Historical uses at the site included painting facilities, a laundry that may have contained dry cleaning facilities, and importing and placement of fill soils. Mr. Steiger interpreted the field data and analytical results of samples and prepared the written report.
- **Remediation of Former Oakland Army Base.** *Oakland, CA.* Mr. Steiger assisted the City of Oakland with the transfer and environmental remediation of 366 acres of the former Oakland Army Base. Redevelopment plans for the base include a variety of commercial and industrial uses as well as maritime, rail, and other port activities. Releases to the environment resulted from prior industrial uses and Army activities at the base, such as maintaining and fueling locomotive engines and trucks, draining fluids from vehicles for overseas shipment, and repairing and servicing vehicles and other equipment at base facilities. Mr. Steiger prepared an NCP-consistent Remedial Action Plan (RAP), which includes a Risk Management Plan (RMP) as an integral component. The RAP/RMP linked and phased remediation requirements with specific post-transfer redevelopment and land uses of the

base. Mr. Steiger worked closely with the City of Oakland, Army,DTSC, and Port of Oakland to prepare the DTSC-approved RAP and RMP, and associated risk-based remediation criteria, that met the needs of the various stakeholders. Mr. Steiger also completed treatability testing for on-site stabilization of acid clay refining sludge that is to be excavated at the location of a former waste oil refining facility, which facilitated the City of Oakland's receipt of a site-specific Land Disposal Restriction (LDR) Treatment Variance from U.S. EPA Region IX, and prepared detailed technical specifications and design drawings for excavation and treatment of the acid clay refining sludge. Mr. Steiger also assisted the City with obtaining closure from the DTSC for over 40 individual chemical release sites at the former Oakland Army Base in accordance with the RAP/RMP protocols.

- **Hydrology and Water Quality Analysis for Commercial and Industrial Development Project,** *Central Valley, California.* Mr. Steiger prepared a Hydrology and Water Quality Report for the CEQA process and related efforts in support of the entitlement and development of approximately 4 million square feet (MSF) of planned new commercial and industrial buildings on approximately 250 acres. Mr. Steiger analyzed impacts of the development on stormwater drainage hydrology, surface water quality, flooding, and groundwater quality.
- **Permitting for Remediation of Former Manufacturing Site**. *Emeryville, CA.* Mr. Steiger led the engineering design and pilot-testing of a multi-phase extraction (MPE) system for remediation of groundwater, NAPL product, and soil vapor. EKI's MPE system design included multiple MPE wells, compressed-air-powered groundwater pumps, SVE blower, oil/water separator, knockout tank, bag filters, granular activated carbon (GAC) filtration, potassium permanganate (KMNO) filtration, and other appurtenances. Mr. Steiger managed construction of the MPE system by a qualified contractor and secured necessary permitting, including a permit by rule (PBR) to treat hazardous waste, an East Bay Municipal Utility District discharge permit for discharge of treated groundwater effluent to the sanitary sewer and Bay Area Air Quality Management District permit for discharge of treated SVE effluent.
- **Food Processing Wastewater Management**. *Atwater CA.* Mr. Steiger is providing strategic direction and leading technical evaluations of his client's food processing facility processes and wastewater management systems. Due to excessive wastewater disposal costs and legally imposed constraints on wastewater generation volume and quality, as well as potential future constraints on water use, the client was contemplating moving operations to another state. Under Mr. Steiger's leadership, EKI developed an innovative plan with goals to reduce water usage and wastewater generation by over 90%, improve wastewater quality, and ultimately allow operations to not only stay at its currently location, but also potentially expand operations. EKI's plan included detailed wastewater characterization to identify specific high concentration, low volume sources of wastewater pollutants, bench-scale and pilot-scale studies of innovative wastewater treatment technologies, and reuse and recycling of treated wastewater in the facility. Mr. Steiger worked closely with the Client's executive team to secure approval and funding for EKI's wastewater management plan from the Client's board of directors. Mr. Steiger is leading execution of the plan and the engineering design of several facility improvements.

# Kian Lew

## Environmental Scientist

Mr. Lew has provided support for a broad range of contaminated site investigations and relief efforts. He has experience in AutoCAD and IDRISI Tioga and has used that skill to support development and modification of land use maps and structures and related infrastructure as well as drawings delineating contamination at sites to support Remedial Investigation reports. Mr. Lew has conducted research, produced, and contributed text on several Phase I Environmental Site Assessments. Additional responsibilities include site reconnaissance processes for disaster recovery projects, wetlands delineation surveys, as well as supervising field teams for groundwater sampling, vacuum enhanced fluid recovery projects, and radiological soil surveys. While completing his undergraduate degree he did research on ground cover and hydrolytic fracturing using image spectroscopy and GIS as well as research in toxicology of lead uptake in freshwater mussels.

### Relevant Experience

- **C10112.04 Carson Goose Owner, LLC,** *Cal Compact Landfill Cells 3-5 Compliance Plans.* Carson, CA. Task Manager/Design Lead. EKI oversees development of environmental engineering design drawings for the landfill gas collection system, landfill cover system, and the building protection system (BPS). EKI has facilitated ongoing coordination with the Client's Design and Development team and acted as a liaison for the Client with the Department of Toxic Substances Control (DTSC). EKI has also overseen the preparation of certain updated environmental compliance work plans. These plans are being updated to reflect the new development plan remedial activities including mass grading, waste reconsolidation, and installation of an expanded landfill gas (LFG) collection system and geomembrane cap in Cells 3, 4, and 5. Approval of these compliance plans by the DTSC and SCAQMD is required prior to beginning intrusive excavation/mass grading activities at the Site. Task manager and design lead for the development of the geomembrane cap. Conduct and coordinate meetings and workshops between design teams and the Client. Help design the details and drainage features of the geomembrane and how it interacts with the various Site features and structures.

**Education**

- BS, Environmental Science, Ithaca College, 2013

**Registrations/Certifications**

- 40-Hour HAZWOPER Health & Safety for Hazardous Waste Operations (29 CFR 1910.120)
- 8-Hour HAZWOPER Refresher
- Environmental and Safety Supervisor Course
- OSHA 30-Hour Construction Training
- OSHA 1910.120 (e)(4) Supervisor Training
- HAZCOMM Training (OSHA 1910.1200)
- DOT Employee Training

**Affiliations**

- Member of Orange County Association of Environmental Professionals (OCAEP)

- **C10035.02 Phillips Ranch Business Center, LLC**, *Pomona Landfill.* El Monte, CA. Task Manager/Environmental Scientist. The Client is developing the parcels with a Mixed-Use structure including a Hyatt House Hotel and multi-family residential uses, and a multi-story apartment building. The Site is defined as the footprint of the landfill cover system plus a 50-foot buffer zone around the perimeter where environmental mitigation and monitoring requirements are applied. Cal Recycle issued a Certificate of Completion letter for the landfill cover system on December 14, 2018. With completion of the cap certification, landfill post-closure maintenance and monitoring is required. In addition, methane mitigation requirements for structures located within 1,000 feet of a landfill are required. As task manager, review monthly landfill cover system and post-major storm event inspection reports. A landfill cover inspection consists of a walkthrough of the asphalt cover and vegetative cover and documentation of findings in a Landfill Cover Inspection Form. Landfill refuse boundary perimeter probes are monitored/sampled on a quarterly basis. The main purpose of the probes is to monitor the potential migration of landfill gas beyond the landfill cap boundary and confirm that the concentrations of methane are below the lower explosive limit (LEL) of 5 percent by volume in air. Quarterly reports are reviewed and submitted following each monitoring event to the Los Angeles County Department of Public Health, Solid Waste Management Division and Cal Recycle.
- **B90009.04 SFF Gold Street, LLC**, *PSAI Gold Street Landfill*. San Jose, CA. Task Manager. EKI provides environmental consulting services related to the landfill cap located on the Site. EKI provides cap status assessment as the Site is located on a portion of the former Santos Landfill, and is part of a U.S. EPA National Priorities List ("NPL" or "Superfund") site referred to as the "South Bay Asbestos Area." EKI has provided 5-year and annual cap status reports and provides assistance with agency coordination and planning with lot improvements that may impact the landfill. As task manager, wrote and reviewed the Post-Closure Land Use and investigation work plans. Also helped coordinate field efforts involving depth of cover investigations, shallow landfill gas assessments, and new construction oversite.
- **C00071.00 Rocksy LLC**, *Rocksy SVE Pilot Test.* Van Nuys, CA. Task Manager/Field Lead. Soil, soil vapor, and groundwater investigations had been conducted at the Site since the 2003. The most recent investigations have focused on soil and soil vapor and a network of sampling points and soil vapor monitoring wells have been developed to delineate VOCs at the Site. Based on the data collected in these recent investigations, it was concluded that the primary chemicals of concern are VOCs in soil vapor and that a soil vapor extraction (SVE) system was potentially the appropriate technology for remediation of the Site. As task manager and field lead, oversaw various Site investigations, drilling and well installation, SVE system pilot testing, and the operation and maintenance of the SVE system. Also wrote and reviewed various work plans for site investigations, pilot testing, and the removal action work plan.
- **Successor Agency to the Community Development Commission of the City of South Gate,** *Tweedy Blvd Groundwater Monitoring and Remediation Project.* South Gate, CA. Field Operations Lead/Environmental Safety Supervisor. Field operations lead, responsible for supervising company personnel, managing groundwater monitoring activities and remediation efforts, and subcontractor oversite related to the investigation and remediation of soil and soil vapor contamination resulting from manufacturing activities and several tank farm areas. Performed groundwater monitoring and

sampling at 5 wells with traffic controls. Abandoned and regraded two wells located adjacent to the project Site. Oversaw soil vapor extraction system probe and well installations including horizontal and vertical drilling. Conducted air monitoring and utility clearance oversight of subcontractors and logged lithology related to remediation activities. Oversaw installation of SVE wells and extraction system. Performed activities regarding soil vapor extraction (SVE) system operation and maintenance which include the monitoring of the system run time, temperature, vapor flow rate, induced vacuum, and vapor concentrations. In addition, vapor samples are collected from the influent, midpoint, and the effluent using Tedlar bags. Oversaw and performed aquifer testing through the use of solid slugs and transducers to analyze the viability of in-situ chemical oxidation injections. Oversaw and performed ISCO injections to remediate TPH and benzene in shallow groundwater. Write and coordinate the semi-annul and WDR reports on behalf of the Los Angeles Regional Water Quality Control Board. [September 2018–2021, Pre EKI]

- **Hibco Corporation,** *Hibco Groundwater Monitoring and Remediation.* Hawthorne, CA. Field Operations Lead/Environmental Safety Supervisor. Field operations lead, responsible for supervising company personnel, managing groundwater monitoring activities and remediation efforts, and subcontractor oversite related to the investigation and remediation of soil and groundwater. Installed groundwater monitoring wells located on site, performed injections to facilitate in-situ chemical oxidation and the breakdown of contaminates, and performed semi-annual groundwater monitoring events for 11 wells located on Site. Oversaw and coordinated chemical injections of persulfate to initiate remediation and conducted waste management activities. Oversee continued groundwater contamination assessment including the use of shallow borings to collect groundwater and more accurately delineate contamination plume, collection of deep groundwater through Cone Penetration Test (CPT) drilling, and installation of additional shallow groundwater monitoring wells. Write and coordinate the semi-annul and WDR reports on behalf of the Los Angeles Regional Water Quality Control Board. [September 2018–201, Pre EKI]

- **Clearway Energy Group LLC***, Luna Valley Solar Power Phase I ESA.* Fresno County, CA. Environmental Scientist. Environmental scientist for the preparation of Phase I ESA for approximately 1,300 acres of land, in unincorporated western Fresno County, California. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and review of potential environmental issues. [2020, Pre EKI]

- **Clearway Energy Group LLC,** *Daggett Solar Project.* San Bernardino County, CA. Field Operations Lead/Environmental Safety Supervisor. Field operations lead to conduct shallow soil sampling to validate REC conclusions and further evaluate potential contaminates and areas of concern. Shallow soil sampling was conducted using incremental sampling methodology (ISM) to screen the soil for potential impacts. The ISM was chosen to reduce data variability and increase sample representativeness for the specified area under investigation. The ISM provides an unbiased estimate of the mean contaminate concentrations by collecting representative soil volumes within defined decision units (or areas) that are then combined, processed, and subsampled according to specific

protocols. Shallow soil samples were collected from an approximately 2,000 feet long by 40 feet wide area along the southern boundary of the Project. [2020, Pre EKI]

- **Nevada Environmental Response Trust,** *In-Situ Perchlorate and Hexavalent Chromium Treatment Bench-Scale and Treatability Studies.* Henderson, NV. Field Operations Lead /Environmental Scientist. Field operations lead/environmental scientist responsible for preparing the work plan and conducting several bench-scale and treatability studies. The treatability studies include the evaluation of in situ chemical reduction, in situ biological reduction, soil flushing, and vacuum enhanced recovery technologies to address hexavalent chromium, chloroform, chlorate, and perchlorate impacts to soil and groundwater. Performed various groundwater monitoring activities, well installations, vacuum pilot test, well developments, groundwater confluence testing and injection activities, and retention pond remediation. Write and coordinate status reports based on results from performed activities. [September 2018–2021, Pre EKI]
- **City of Lynwood,** *Lynwood Springs Soil Investigation and Remediation. Lynwood*, CA. Field Operations Lead/Environmental Safety Supervisor. Field operations lead responsible for supervising company personnel, and subcontractor oversite related to the investigation and remediation of soil and soil vapor contamination resulting from activities related to historical dry cleaners, multiple gas stations, and a U-haul site with potential contaminates of concern including PCE, TCE, TPH-g, benzene, MTBE, and TBA. Performed sub slab vapor probe and outdoor vapor probe installation and soil vapor sampling throughout the Site for laboratory analyses. [September 2017–2018, Pre EKI]
- **PacWest Management Inc.,** *PacWest Soil Vapor Extraction (SVE) Wells Installation,* Lancaster, CA. Field Operations Lead/Environmental Safety Supervisor. Field operations lead responsible for supervising company personnel and subcontractor oversite related to the installation of soil vapor extraction (SVE) wells using both a warthog auger sampler and a hollow stem auger sampler and conducted soil sampling for lithology. Oversaw the construction and trenching of the SVE piping and manifold for the extraction system. Oversaw system installation and delineation. Performed activities regarding soil vapor extraction (SVE) system operation and maintenance which include the monitoring of the system run time, temperature, vapor flow rate, induced vacuum, and vapor concentrations. In addition, vapor samples are collected from the influent, midpoint, and the effluent using Tedlar bags. Write quarterly status reports for the Antelope Valley Air Quality Management District. [September 2018–2020, Pre EKI]
- **Griffon Corporation,** *Groundwater Monitoring Wells.* Rancho Dominguez, CA. Field Operations Lead/Environmental Safety Supervisor. Performed activities regarding soil vapor extraction (SVE) system operation and maintenance which include the monitoring of the system run time, temperature, vapor flow rate, induced vacuum, and vapor concentrations. In addition, vapor samples are collected from the influent, midpoint, and the effluent using Tedlar bags. Groundwater monitoring and sampling activities are also performed on a quarterly basis where monitoring wells are inspected and gauged and sampling of 27 monitoring wells take place. As field operations lead, I am responsible for supervising company personnel and subcontractor oversite related to the sampling of the groundwater monitoring wells. [September 2019–Present, Pre EKI]

- **Glenn Springs Holdings Inc. (GSHI),** *Passaic River Sediment Waste Characterization.* Passaic County, NJ. Environmental Scientist/ Vibracore Technician/Soil Logger. Coring and logging technician for sediment waste characterization sampling used to determine disposal requirements and options for consideration of the Passaic River clean up remedial design. A total of 347 samples from 183 locations were collected during the sediment coring program with sample locations selected to provide areal coverage from locations evenly spaced to collect representative data for all areas of the site. Collected 5 foot sediment cores from the bed of the Passaic River using vibracoring sampling and push core sampling techniques. Logged and sampled soil collected from sediment cores to be tested for metals, VOCs, SVOCs, Pesticides, Herbicides, Organic Carbon, Petroleum Hydrocarbons, cyanide, sulfide, and total dioxins and Furans. [October 2017, Pre EKI]
- **Consolidated Edison,** *West End Avenue Groundwater Monitoring.* New York, NY. Field Operations Lead/Environmental Safety Supervisor. Performed groundwater monitoring and non-aqueous phase liquid monitoring at the Con Edison West End Avenue location for four wells and a sump located in the basement of 780 West End Avenue, New York, New York. Activities performed are part of a spill that occurred at the Con Edison Feeder Cable M52 located beneath the north bound parking lane of West End Avenue, adjacent to building 780 West End Ave. Con Edison has previously completed remedial excavations at this location in order to repair the feeder oil leak, recently installed 4 recovery wells, and removed soil from within the building footprint and poured a new concrete floor in the building's basement (including fixing 2 sump pits). During these activities, groundwater was observed to be approximately nine (9) to eleven (11) feet bgs, with a free dielectric fluid observed at the groundwater surface as a floating Light Non Aqueous Phase Liquid (LNAPL). Vacuum Enhanced Fluid Recovery (VEFR) was performed, and results are reported. Assisted in scheduling staff and subcontractors for weekly VEFR events. Performed air monitoring of wells and pipes through the use of a PID meter and recorded the results. [September 2016–2017, Pre EKI]
- **Consolidated Edison,** *Victory Boulevard Groundwater Monitoring.* Staten Island, NY. Field Operations Lead/Environmental Safety Supervisor. Performed groundwater monitoring and non-aqueous phase liquid monitoring at the Con Edison Victory Boulevard location for five wells and two standpipes as part of an investigation of a previous Feeder Cable spill in Feeder Cables 38R51 and 52. Also performed oversight of vacuum-enhanced fluid recovery (VEFR) events and reported results. Assisted in scheduling staff and subcontractors for weekly VEFR events. Performed air monitoring of wells and pipes through the use of a 4-gas meter and recorded the results. [September 2016–2017, Pre EKI]
- **Cushman & Wakefield,** *The former Atlantic Club Casino and Hotel Phase I Environmental Site Assessment (ESA).* Atlantic City, NJ. Environmental Scientist. Environmental Professional (EP) for the preparation a Phase I Environmental Site Assessment (ESA) located in New Jersey. A Phase I ESA was conducted for third-party owned properties, ranging in size, developed as commercial properties, and a parking garage. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM E1527-13 standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and a review of potential environmental issues. [2016, Pre EKI]

- **US Department of Defense,** *Joint Base McGuire-Dix-Lakehurst Groundwater Sampling.* Fort Dix, NJ. Environmental Scientist. Conducted low-flow groundwater sampling of 14 monitoring wells located throughout an active military base using QED bladder pump systems and Horiba U-52 water quality meters. Sampling activities required escorts on militarily sensitive areas and strict adherence to military regulations regarding on-site conduct and operation of site vehicles. Responsibilities included calibration and maintenance of field equipment, as well as sample management. Performed air monitoring through the use of a photoionization detector (PID) on the various wells and recorded the results for health and safety. [November 2015, Pre EKI]
- **Consolidated Edison,** *Newtown Substation Groundwater Sampling.* Long Island City, NY. Field Operations Lead/Environmental Safety Supervisor. Conducts quarterly groundwater sampling of 12 wells using QED MP50 bladder pump systems and Horiba U-52 water quality meters for VOCs. Responsibilities include maintenance, decontamination, and daily calibration of instrumentation; disposal of wastewater in on-site storage area; maintenance of daily logs; and sample management. Performed air monitoring through the use of a photoionization detector (PID) on the various wells and recorded the results for health and safety. [September 2015–2017, Pre EKI]
- **TransCanada,** *Ravenswood Generating Station Semi-Annual Groundwater Sampling.* Queens, NY. Field Operations Lead/Environmental Safety Supervisor. Conducted semi-annual groundwater sampling of 15 wells using Solinst 410 peristaltic pumps and Horiba U-52 water quality meters for methane, ferrous iron, nitrates and sulfates, VOCs, BTEX, PAHs, and dissolved organic compounds. Responsibilities included maintenance, decontamination, and daily calibration of instrumentation; leading daily safety tailgate meetings; disposal of wastewater in on-site storage area; and maintenance of daily logs. Performed air monitoring through the use of a photoionization detector (PID) on the various wells and recorded the results for health and safety. [May 2016, Pre EKI]
- **SunEdison,** *Phase I Environmental Site Assessments (ESAs)*. Multiple Locations, NY. Environmental Scientist. Environmental Professional (EP) for the preparation of multiple Phase I Environmental Site Assessments (ESAs) located throughout upstate New York. A Phase I ESA was conducted for third-party owned properties, ranging in size from 10-acres to 50-acres, developed as agricultural lands and/or undeveloped farmlands that may potentially be developed into ground-mounted solar energy facilities. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM E1527-13 standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance (performed by a local EP), and a review of potential environmental issues. [2015, Pre EKI]
- **Port Authority of New York and New Jersey,** *Radiological Soils Survey.* Elizabeth, NJ. Environmental Site Supervisor. Oversaw the onsite operations for the radiological surveys and sampling performed at the Goethals Bridge Remediation Area 3 (the Site) in Elizabeth, New Jersey (NJ) for the Port Authority of New York and New Jersey (PANYNJ). The radiological survey was conducted in accordance with the general approach and methodologies that are given in the New Jersey Department of Environmental Protection's (NJDEP) Field Sampling Procedures Manual (NJDEP 2005) and Tetra Tech standard operating procedures (SOP) which conform to applicable US Nuclear Regulatory Commission (NRC) regulations. The site survey was performed to determine if residual activity in the area of

concern is above the established release criteria and to evaluate the distribution of radiological impacts. The scope of the work included gamma walkover surveys of the site, subsurface soil sampling at systematic gridded site locations, and subsequent offsite laboratory analysis. The walkover survey, soil sampling, and analysis was performed to determine the existence and extent of isotopes potentially associated with uranium contamination. Laboratory analysis will be performed for natural uranium (U-nat). [July 2015–August 2015, Pre EKI]

- **U.S. Department of Defense,** *Former Bakery and Filling Station Petroleum Spill Remediation.* Fisher's Island, NY. Environmental Scientist. Conducted the abandonment of monitoring wells for remediation of a petroleum spill located on a portion of the Former United States Department of Defense H.G. Wright Fort on behalf of a private citizen. Fort H.G. Wright was decommissioned in approximately 1948 without removing an underground storage tank containing gasoline at the former bakery and filling station. The underground storage tank was removed by others in 2010 without removing all the residual petroleum impacted soil. Tetra Tech evaluated the existing site conditions and recommended in-situ remediation of the residually impacted soil and ground water using Micro-Blaze non-formulated as the bioremediation regent. Tetra Tech demonstrated to the satisfaction of the New York State Department of Environmental Conservation that the in-situ remediation reduced the levels of residual petroleum contamination to levels sufficient to close the petroleum spill in April 2015. The spill was originally opened in January of 2010. [May 2015, Pre EKI]
- **District Department of the Environment (DDOE),** *Anacostia Bathymetry Survey.* Washington, DC. Environmental Scientist/ Vibracore Technician. Coring technician of multibeam, single beam sweep, and single beam survey data on approximately 9 miles of the Anacostia River and Kingman Lake. The DDOE required a baseline survey for future sediment sampling and remediation efforts on the river. Collected 10 foot and 20 foot sediment cores from the bed of the Anacostia River using vibracoring sampling technique. Scope of the work included logging, sampling, and analyses of sediment of 130 sediment cores taken from bores throughout the River's expanse. [May 2015, Pre EKI]
- **Kinder Morgan,** *Environmental Field Surveys.* West Milford, NJ. Environmental Scientist. Conducted environmental field surveys including the field verification of previously delineated vernal pool features within an existing gas line right-of-way (ROW). Surveys included an assessment of vernal pool habitats, vegetation cover types, associated post-construction impacts, nighttime amphibian surveys, and photo and GPS documentation. [April 2015, Pre EKI]
- **Transcanada (formerly Keyspan),** *Ravenswood Generating Station Groundwater Monitoring.* Queens, NY. Environmental Scientist. Performed groundwater monitoring and non-aqueous phase liquid monitoring at Ravenswood Power Generating Station. Also performed oversight of vacuum-enhanced fluid recovery (VEFR) events and reported results. Assisted in scheduling staff and subcontractors for bi-weekly VEFR events. Performed air monitoring through the use of a photoionization detector (PID) on the various wells and recorded the results for health and safety. [March 2015, Pre EKI]
- **Port of Tacoma,** *Phase I ESA.* Tacoma, WA. Environmental Professional. Environmental Professional (EP) for the preparation of a Phase I ESA located in the Port of Tacoma, Washington. A Phase I ESA was conducted for a third-party owned warehouse consisting approximately 36,491 square feet of interior space, and the remainder of the Site (23,231 square feet) being exterior vehicle parking and

roadway covered with asphalt. The Site was currently leased by WCTS for warehousing of break-bulk cargo. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM E1527-13 standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and review of potential environmental issues. [March 2015, Pre EKI]

- **EQT,** *Mountain Valley Pipeline Project,* West Virginia. Environmental Scientist. Worked with a three-person team of biologist and soil scientists to perform wetland and waterbody delineation along a 300 foot wide corridor passing through Virginia and West Virginia. Gathered GPS data points and filled out information logs for wetland and water body delineation using a Trimble GPS unit. If wetlands are found to be adjacent to or within project site, the wetlands are staked so that project mitigation measures are effective. Analyzed GIS information post-processed from the GPS data points and made in-field corrections to data base off of in person surveyed land. [October 2014–Present, Pre EKI]
- **National Grid,** *Gardenville-Dunkirk 115 kV and Lockport-Mortimer 115 kV Rebuild Projects*. New York. Environmental Scientist. In support of the National Grid Energy Highway Project Article IV application, conducted a noise assessment, which requires the analysis of ambient sound conditions in order to determine the feasibility of the Project to operate in compliance with applicable regulations and ordinances. Collected spot measurements of existing sound using a Larson Davis 831 real-time sound level analyzer. The baseline survey measurement results provided the basis for guidance on possible noise mitigation strategies. [October 2014, Pre EKI]
- **Foster Wheeler Energy Corporation,** *Screening Level Ecological Risk Assessment,* Former Industrial Facility. Mountain Top, PA. Environmental Scientist. Provided support on the Screening Level Ecological Risk Assessment (SLERA) through screening contaminants that required further evaluation based off of supplemental screening documents and coming up with write-ups for surface water and SED results. Also provided support for the SLERA tables used in the final report. [August 2014–October 2015, Pre EKI]
- **Excelerate Energy, Inc.,** *Aguirre Liquefied Natural Gas (LNG) Gasport, Excelerate Energy*. Aguirre, Puerto Rico. Environmental Scientist. Gathered LNG terminal information and calculated discharges for various pollutants in both maximum daily values and average daily values to be used in in support of Section 316(b) of the National Pollutant Discharge Elimination System (NPDES) permit application. Provided support for the Aguirre Gasport DEIS comment/question matrix and the Sampling and Analysis Plan (SAP) for the Characterization of Water Quality at the Aguirre GasPort Project Site for NPDES Related Monitoring. [July 2013–October 2013, Pre EKI]
- **Excelerate Energy, Inc.,** *Lavaca Bay Liquefied Natural Gas (LNG) Gasport.* Lavaca Bay, TX. Environmental Scientist. Gathered LNG terminal information and calculated discharges for various pollutants in both maximum daily values and average daily values to be used in in support of Section 316(b) of the National Pollutant Discharge Elimination System (NPDES) permit application. Provided support in Resource Report 2 identifying and describing the water resources present within the Project area and the potential impacts associated with these resources from construction, operation and maintenance of project facilities.

- **Department of Community Affairs,** *New Jersey Tier 2 Hurricane Sandy.* All New Jersey. Environmental Scientist. Reviewed Hurricane Sandy remediation/reconstruction applications to determine whether the applicant met state and federal conditions for the Reconstruction, Rehabilitation, Elevation, and Mitigation Program (RREM) to receive state funds to help repair or rebuild their homes after Hurricane Sandy. Work included the creation and analysis of property maps using GIS. Site reconnaissance to the properties were also done to determine the possibilities of spills, contaminates, and/or any other recognizable environmental concerns located on site. Architecture and historical value of homes was assessed for cultural resources portion of the project. [August 2013–May 2015, Pre EKI]
- **Fireworks Site Joint Defense Group,** *Fireworks Phase III.* Hanover MA. Environmental Scientist. Gathering data from various data sources including MADEP and NYANZA on mercury and large-mouth bass for BASF analyses. Created a database from gathered information analyzing various constituents. [August 2013–November 2013, Pre EKI]
- *Various Energy Installation Projects.* New York. Environmental Scientist Intern. Created service lists for various energy projects including creating a service list for the Article VII Amendment Application for NYPA's Marcy South Series Compensation Project. The service lists that were required went under Article VII regulations (NYSDPS 16NYCRR 85-88.pdf). §85-2.10(a)
- **Chemtura Corporation,** *Stormwater Sampling Reports*. Newark, NJ. Environmental Scientist. Put together a SMR (self-monitoring report) submittal to MCUA (Middlesex County Utilities Authority). This report looked at various metals, semi-volatile organics, volatile organics, PCBs, Chemical Oxygen Demand, as well as daily and average water flow. Collected quarterly NJPDES stormwater samples from Chemtura-Perth Amboy and Chemtura-Fords. [June 2013–Present, Pre EKI]
- **Foster Wheeler Corporation,** *Church Road TCE Site*. Mountain Top, PA. Intern. Tabulated well purge sheets with groundwater data taken from the field. [June–August 2013, Pre EKI]
- **Manufacturing Facility Phase I ESA.** *Alaska*. Environmental Scientist. Environmental scientist for the site reconnaissance of five sites conducted for limited Phase I ESAs encompassing five separate areas of Alaska. The subject properties consisted of fish canneries with various processing buildings, warehousing, packaging, and commercial docks. The due diligence activities were conducted following the ASTM standard.
- **Phase I ESA.** *San Bernardino County, CA*. Environmental Scientist. Environmental scientist for the preparation of Phase I ESAs of approximately 1,172 acres of land for in San Bernardino County, California. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and review of potential environmental issues.
- **Solar Power Project Phase I ESA***. Riverside County, CA*. Environmental Scientist. Environmental scientist for the site reconnaissance of a Phase I ESA for approximately 1,800 acres of land a 15-mile transmission line connecting the subject property to a substation. The subject property includes two solar fields, a power block unit per solar field, an administration building, a warehouse/maintenance building, two evaporations ponds, a water treatment plant, and electrical/control buildings located in each power block. The due diligence activities were conducted following the ASTM standard.

- **Wind Farm Phase I ESA.** *Kern County, CA.* Environmental Scientist. Performed site reconnaissance for a Phase I ESA for a wind generation plant encompassing approximately 15,000 acres. The subject property includes one hundred wind turbines, an Operations & Maintenance building, a substation, and a couple of laydown yards. The due diligence activities were conducted following the ASTM standard.
- **Wind Energy Facility Phase I ESAs.** *Whitewater, CA.* Environmental Scientist. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and review of potential environmental issues.
- **Solar Electricity Generating Facility Phase I ESA.** *Fresno County, CA.* Environmental Scientist. The approximately 1,300 acres property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and review of potential environmental issues.
- **Solar Power Facility Phase I ESA.** *Williams, CA.* Environmental Scientist. Environmental scientist for the preparation of a Phase I ESA for approximately 967 acres of rural land approximately 8 miles southwest of the city of Williams, California for potential purchase. The property was assessed to determine the potential impacts to the environment from historic and current activities. The due diligence activities were conducted following the ASTM standard, and included the review of facility information, collection of independent environmental information, a site reconnaissance, and review of potential environmental issues.
- **Solar Power Facility Phase I ESAs.** *San Bernardino County, CA.* Environmental Scientist. Environmental scientist for the preparation of Phase I ESAs and Phase I ESA updates for several parcels of land associated with the proposed Daggett Solar Power Facility encompassing approximately 3,500 acres of land in San Bernardino County. The Phase I ESAs were completed in general accordance with the ASTM Standard E2247-16.
- **Phase I ESAs.** *Selah and Wapato, WA*. Environmental Scientist. Environmental Professional (EP) for the preparation of two Phase I ESAs. The due diligence activities were conducted following the ASTM E1527-13 standard and comprised of a database search, historical aerial photographs, Sanborn fire insurance maps, and/or historical USGS topographic maps, the collection of independent environmental information, a site reconnaissance (performed by a local EP), and a review of potential environmental issues. The results of the Phase I ESAs are used by the seller and potential buyers to determine the magnitude of identified environmental issues and associated costs for remedial actions.

# APPENDIX I

## EKI Standard Operating Procedures

## SOP-20 SOIL GAS ACTIVE – INSTALL AND COLLECT

Scope and Application

The objective of this standard operating procedure (SOP) is to provide information regarding collection of soil gas samples for analysis of volatile organic compounds (VOCs) using active sampling techniques. The soil gas samples will be collected from soil gas probes (SGPs) that will be installed to depths between 5 feet below ground surface and 30 feet below ground surface.

The activities in this SOP are generally consistent with the Active Soil Gas Investigations Advisory (CalEPA, 2015). In various relevant regulatory guidance documents (CalEPA, 2023; State Water Board, 2019), the terms “soil vapor” and “soil gas” have been used interchangeably; EKI’s convention is to use the term “soil gas” except where well-established terms are used such as “soil vapor extraction” or “vapor pin”.

Specific step-by-step instructions regarding equipment need for and collection of soil gas samples are included in Attachment A. The instructions include:

- A detailed list of sampling equipment and materials;
- Additional equipment and material required for to collect field quality assurance/quality control (QA/QC) duplicates;
- How to:
  - Set up sample trains and perform shut-in tests;
  - Set up sample trains and perform shut-in tests;
  - Perform leak testing using shrouds and leak check gas; and
  - Collect samples.
- Checks prior to shipment and specific information to include on the chain-of-custody regarding items for the laboratory to check the conditions of canisters.

This SOP describes use of a tracer gas, in particular 1,1-difluoroethane (DFA) for checking leaks. If other gases are used, such as helium, or liquid tracers are used, such a 2-propanol (isopropyl alcohol), the site-specific work plan will include detailed instructions for use of that tracer. Field staff should verify with the EKI Project Manager that the procedures described herein are appropriate for the project. In the event that a project has site-specific procedures, protocols, and/or requirements, these procedures, protocols, and/or requirements should be followed in lieu of those described in this SOP.

In advance of field work, field staff should verify with the EKI Project Manager that the procedures described in this SOP are appropriate for the project. In the event that a project has site-specific procedures, protocols, and/or requirements, these procedures, protocols, and/or requirements should be followed in lieu of those described in this SOP. Work will be conducted under the supervision of a Licensed Site Professional (LSP), Licensed Environmental Professional (LEP), licensed Professional Geologist, and/or licensed Professional Engineer, as applicable.

### 1.1 PRE-MOBILIZATION

Pre-mobilization activities will include:

- Discussing objectives and concerns with EKI Project Manager;
- Preparing, or reviewing, proposal to client that details scope, schedule, and budget for the sampling activities;
- Notifying the regulatory oversight agency (e.g., Regional Water Quality Control Board; Department of Toxic Substances Control; County), if required;
- Reviewing the site-specific workplan that was submitted to and approved by the regulatory oversight agency;
- Coordinating with property owners/tenants;
- Coordinating with analytical laboratory to obtain appropriate sample collection equipment (see Attachment A and Table 1) and courier contact info (or if not couriering, FedEx office location, hours, and EKI FedEx account number);
- Coordinating and preparing work authorizations for drilling and coring subcontractors, including provisions for insurance certifications, if needed;
- Preparing or updating the site-specific health and safety plan (HASP) for EKI personnel, if necessary; and
- Marking locations, clearing with a private utility clearing company, and calling Underground Services Alert (USA).

### 1.2 HEALTH AND SAFETY

Work will comply with all applicable California Occupational Safety and Health Agency (CalOSHA) requirements, the site's health and safety procedures, and EKI's site-specific Health and Safety Plan (HASP). EKI personnel will pay attention to potential physical hazards (e.g., trips, slips, falls, vehicles, rotating equipment, falling objects) while on site. EKI personnel working on-site will minimize contact with potential biological or chemical contaminants in soil, dust, and vapors using appropriate personal protection equipment (PPE).

- For direct contact with solids, PPE may include, but is not limited to, disposable protective clothing (e.g., Tyvek®), disposable gloves, and eye protection.
- For vapors and dust, PPE may include air purifying respirators and/or self-contained breathing apparatus (SCBA) units, as necessary.

To screen for potential concerns related to organic vapors, EKI personnel should use a calibrated photoionization detector (PID) to measure volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPH-g) emanating from groundwater wells, soil gas wells, boreholes, excavations, and excavated soil and VOCs from within the breathing zone of personnel in the active work area. If this screening indicates elevated VOC levels are present, EKI personnel should implement the procedures described in the HASP and notify the EKI Project Manager.

### 1.3 General Procedures

At this time in California, it is expected that data pertaining to assessment of vapor intrusion will be uploaded to the State Water Resources Control Board's (State Water Board) GeoTracker database. The State Water Board has developed guidance regarding the naming conventions for different types of air samples. It is important the sample names are selected upfront, to correspond with the GeoTracker requirements (State Water Board, 2019). The data formatting requirements for creation of an electronic deliverable format (EDF) need to be provided to the analytical laboratory in advance of sample analysis so that the laboratory prepares the EDF in a format that is compatible with GeoTracker requirements. The GeoTracker sample nomenclature identifies "SG" as the prefix for names of samples of soil gas collected exterior to buildings.

### 1.4 Materials and Equipment

The following table includes materials and equipment for the soil gas probes. The sample collection materials and equipment are provided in Attachment A.

| | |
|---|---|
| Borehole depth | • 5.5 feet bgs or 0.75 feet above shallow groundwater |
| Borehole diameter | • 4-inches (typically 4-inches with standard hand auger, 2.5-inches with direct push rig, 8- to 10-inches with hollow stem auger rig) |
| Downhole probe tubing | • Material: Teflon® fluorinated ethylene propylene tubing<br>• Size:<br>o Outer diameter: 0.25-inch or 1/4-inch;<br>o Inner diameter: 0.188-inch or 3/16-inch;<br>o Wall thickness: 0.031 inch |
| Probe tip | • Stainless-steel (SS) mesh screen, 3- or 6-inches long, 0.5-inch diameter, ¼-inch tubing fitting<br>• Depth to bottom of screen: borehole depth – 0.5 feet bgs<br>• Depth to top of screen: depth to bottom of screen – screen length in feet bgs |
| Sand pack | • Material: #3 sand (8x20 mesh)<br>• Top: borehole depth – screen length – 1 feet bgs<br>• Bottom: borehole depth (see above) |
| Dry granular bentonite | • Material: medium granular bentonite, dry<br>• Thickness above the sandpack: 6 inches |
| Grout | • Material:<br>o Temporary probe (sampled for <1 year): hydrated granular bentonite<br>o Permanent probe (sampled for >1 year): neat cement grout with 1 to 5% bentonite<br>• Place from above the dry bentonite to the depth of the surface vault. |

| | |
|---|---|
| Probe valve | • SS plug valve with ¼-inch tubing compression fittings and cap<br>o Swagelok Plug Valve, Part No.: SS-4P4T<br>o Swagelok Cap, Part No.: SS-400-P<br>• Install valve on top end of downhole tubing. Connect to downhole tubing using compression fitting.<br>• Keep valve closed and provide threaded cap on outlet when not used for sampling. |
| Surface finish | Project Specific<br>• Plastic irrigation valve box<br>• Traffic-rated steel well box |

### 1.5 INSTALLATION OF SOIL GAS PROBES

As noted above, soil gas probe locations will be cleared with USA and using a private utility locator. A hand auger will be used for the first five feet of each SGP. Deeper probes will be installed by direct push rigs or using a hollow-stem auger after hand clearing the top five feet. Generic SGP construction details are included in Figure 1.

Each SGP will consist of a 3- or 6-inch long, ½-inch diameter stainless-steel wire mesh screen attached to a length of continuous ¼-inch diameter Teflon® fluorinated ethylene propylene (FEP) tubing (or equivalent) fitted at the top with a stainless-steel laboratory-grade plug valve using Swagelok-type compression-ferrule connections.

SGPs will be emplaced using an approximately 1-inch diameter threaded flush-joint polyvinyl chloride (PVC) emplacement "guide" pipe, to keep the screen and tubing centered in the borehole at the proper depth. SGP screens will be backfilled with a one-foot vertical filter pack at a minimum, consisting of prewashed silica sand, tremied slowly into the borehole. The SGP screen will be suspended using the guide pipe at the approximate center of the sand interval. After emplacement of the sand, the guide pipe will be withdrawn, and slight tension will be maintained on the tubing to ensure it remains centered during sealing and grouting.

Above the sand, each SGP will be sealed with a 6-inch layer of dry medium granular bentonite, and above this layer, each borehole will be backfilled to approximately one foot below existing grade using grout (see above) (CalEPA, 2015). The SGP may be completed at the surface with a traffic-rated well box to protect the sampling valve or with a plastic irrigation box; the type of surface completion will be detailed in the site-specific work plan.

For SGPs installed using direct push, soil gas samples will not be collected until at least 2 hours have passed after installation of the SGPs, to allow subsurface conditions to re-equilibrate from drilling and SGP construction (CalEPA, 2015). For SGPs installed using a hand auger or hollow-stem auger, soil gas samples will not be collected until at least 48 hours have passed after installation of the SGPs, to allow subsurface conditions to re-equilibrate from drilling and SGP construction (CalEPA, 2015).

After completion of soil gas sample collection, described below, the SGPs will be removed, if temporary, and the boring will be reamed, if necessary, and grouted to the surface.

### 1.6 SUMMARY OF SOIL GAS COLLECTION PROCEDURES

SGPs will not be sampled during rainfall or within 5 days of a significant rainfall event (i.e., 0.5-inches or more of rain in a 24-hour period); however, soil gas sampling after rainfall can proceed where infiltration has not occurred, such as under buildings or beneath high-integrity pavement (CalEPA, 2015). Collect pressure measurements from each SGP prior to sample collection. Samples will be collected in pre-evacuated 1-liter SUMMA®-passivated stainless-steel canisters using a 125 milliliter per minute (mL/min) flow restrictor. All materials used for sample collection, e.g., manifolds, hose barbs, sample tubing and fittings will be provided by the analytical laboratory.

Flow rates between 100 to 200 mL/min and vacuums less than 100-inches of water should be maintained during purging and sampling to minimize stripping (partitioning of vapors from pore water to soil gas), to prevent ambient air from diluting the soil gas samples, and to reduce variability between contractors. Maintaining these flow rates and vacuums will increase the likelihood that representative samples will be collected. A flow rate greater than 200 mL/min may be used when purging times are excessive, such as for deep wells with larger-diameter tubing. An oil-free vacuum pump can be used to purge soil gas wells. However, a vacuum of 100-inches of water or less will be maintained during sampling whenever a higher flow rate is used for purging. The pressure gauge used to measure vacuum should be calibrated and in good working order. When purging at rates of greater 200 mL/min, reduce the flow rate to 200 mL/min for sampling.

During soil gas sample collection, a temporary plastic shroud will be placed over the sampling apparatus at each location. A small amount of “leak-check” compound, DFA, will be sprayed into the shroud to create a measurable concentration of DFA in the air around the sampling apparatus. An air sample from within the shroud will be collected at each sampling location unless otherwise indicated in the site-specific work plan.

Specific details regarding soil gas collection are provided in Attachment A. If low flow conditions are observed, i.e., during sampling greater than 7.5 inches of mercury (in-Hg) (100-inches of water) on the manifold gauge are observed, sample collection guidelines to be followed are included in Attachment B.

### 1.7 FIELD AND LABORATORY QUALITY ASSURANCE/QUALITY CONTROL

Field QA/QC is performed by collecting leak-check samples within the shroud and collecting field duplicates.

Field duplicate samples. Field duplicates are used to estimate sampling and laboratory analysis precision. field duplicate samples should be collected to match as best as possible the sampling location, time, and duration to create a matched pair for direct comparison. Field duplicate(s) will be collected at a rate of approximately 5% of the total number of samples (i.e., approximately 1 per 20 samples). In general, a minimum of one duplicate sample should be collected per sampling event.

| SAMPLING EQUIPMENT AND MATERIALS | |
|---|---|
| Sample canisters | • 1-liter, pre-evacuated, SUMMA®-passivated stainless-steel canisters with inlet valves (provided by analytical laboratory).<br>o SUMMA® canisters may be either batch or individually certified based upon the sampling objectives (see Table 1). |
| Shroud air canister | • 1-liter, pre-evacuated, SUMMA®-passivated stainless-steel canisters with inlet valves (provided by analytical laboratory). |
| Canister vacuum gauge | • 0-30 in-Hg gauge (provided by analytical laboratory) connected between sample canister and flow controller.<br>o Prior to use, establish the maximum and minimum values on the gauge and record data on field form. |
| Manifold vacuum gauge | • 0-30 in-Hg gauge (provided by analytical laboratory) connected between manifold valve and flow controller.<br>o Used to check for low-flow conditions during sampling, verify that the manifold vacuum gauge is installed ahead of the flow controller. |
| Manifolds | • Single manifolds for each sample location (see Field QA/QC section below for duplicates) (provided by analytical laboratory).<br>o Manifolds may be either batch or individually certified based upon the sampling objectives (see Table 1). |
| Flow controller/restrictor | • Critical flow orifice rated for 100-200 mL/min (provided by analytical laboratory) |
| Sample tubing | • Teflon (FEP), 1/4-inch outer diameter, new and unused (provided by analytical laboratory) |
| Fittings | • Swagelok-type stainless-steel compression fittings for ¼-inch tubing.<br>• Provided by laboratory. |
| Shroud | • 30- to 40-gallon clear plastic trash bag; minimum plastic thickness 1.2 mil. |
| Leak check gas | • 1,1-DFA (CAS No. 75-37-6) (provided in pressurized can by laboratory). |
| FIELD QA/QC - DUPLICATE SAMPLING EQUIPMENT | |
| Shroud air canister | • If the collection of concurrent duplicate samples is required, request 6-L SUMMA®-passivated stainless-steel canisters and inlet valves from analytical laboratory (the number of canisters and inlet values required is equal to the number of duplicate samples). |
| Manifolds | • Request a dual manifold for each duplicate sample location (provided by analytical laboratory).<br>o Dual manifolds may be either batch or individually certified based upon the sampling objectives (see Table 1). |

**ATTACHMENT A**

| | |
|---|---|
| PRE-MOBILIZATION | |
| Sample Container Inventory and Field Documents | • Verify correct number of SGPs, sample canisters, and manifolds<br>• Prepare Chain-of-Custody.<br>• Print out Sample Collection Log - Sub-Slab Soil Gas or Soil Gas Probes (in addition to the standard field forms). |
| Site Coordination | • Confirm onsite sampling schedule and site contact details. |
| PRE-SAMPLING MEASUREMENTS | |
| Probe pressure (vacuum) | • Attach sample tubing to probe valve and connect tubing to a vacuum gauge or digital manometer, capable of measuring 0.01 in-WC or less.<br>• Open probe valve.<br>• Record pressure (or vacuum) in probe relative to outdoor air pressure.<br>• Close probe valve.<br>• Remove vacuum gauge. |
| Canister vacuum testing | • Verify canisters remain at or near full vacuum (30 in-Hg) prior to sample collection. For sample canisters:<br>• Measure and record the canister vacuum during the shut-in test (see below).<br>• Sample canisters with a measured vacuum within 5% of full vacuum may be used for soil gas sample collection.<br>• For shroud air canisters:<br>• Measure and record the canister vacuum during the leak check setup (see below).<br>• Shroud air canisters with a vacuum within 10% of full vacuum may be used for shroud air sample collection for leak testing. |
| SAMPLING TRAIN SETUP AND SHUT-IN TEST | |
| Sample Train Setup | • Assemble sampling train (see Figure 2):<br>• Sample canister(s), sample tubing, and manifold with vacuum gauges and flow controller. |

**ATTACHMENT A**

| | |
|---|---|
| Shut-in test | • After connecting sampling train to SGP, open the manifold valve and briefly open and then close sample canister valve. Keep probe valve closed throughout test.<br>• Open manifold valve while the probe valve is closed:<br>o Briefly open and then close sample canister valve.<br>o Allow 10 to 30 seconds for the vacuum to equilibrate in manifold. The vacuum may be lower than the initial vacuum as pressure equilibrates in the manifold tubing through the flow controller.<br>o After equilibration, observe and record vacuum reading on canister vacuum gauge (this is the start of the shut-in test).<br>• Approximately 2 minutes after start of shut-in test, observe and record vacuum reading on canister vacuum gauge (this is the end of the shut-in test).<br>o Shut-in test is successful if vacuum is stable or decreases by less than 2 in-Hg over 2 minutes.<br>o If vacuum decreases by more than 2 in-Hg in 2 minutes:<br>▪ Close manifold valve and replace the tubing between the manifold valve and probe valve (this is the most common portion of sampling train to leak). Re-test to assess if the leak is fixed.<br>▪ Based on findings, check manifold fittings and re-test as needed.<br>• After a successful shut-in test, proceed with leak testing, purging, and sample collection. |
| LEAK TESTING | |
| Leak Check Setup | • Place plastic bag (“shroud”) around entire sampling setup, including probe, sample tubing, flow controller, and sample canister.<br>• Secure base of shroud to the floor with sandbags or other weights. |
| Leak Check Procedure | • Inject leak check gas into shroud for approximately 1 second immediately prior to beginning sampling; if the sampling duration is longer than 10 minutes, inject additional leak check gas into the shroud every 10 minutes.<br>• Objective is to provide a concentration of approximately 3,000 to 30,000 ppmv of leak check gas in the shroud air during sample collection.<br>• Collect a sample of the shroud air in the shroud air canister concurrent with soil gas sample collection (see below). |
| Leak Check Evaluation | • Both the sample canister and the shroud air canister will be analyzed for DFA at the laboratory. A DFA concentration in the sample canister of 5% or less of the DFA concentration in the shroud air canister is acceptable (indicates a leak of 5% or less). |

**ATTACHMENT A**

| | |
|---|---|
| PRE-SAMPLE PURGE | |
| Purge volume | • One purge volume is the volume of downhole probe tubing, probe tip, and pore space in the sand pack and dry bentonite. For example:<br>o Downhole probe tubing: 5 feet (150 cm) long, 0.4 cm ID: volume = 19 mL<br>o Probe tip: 3 inches (7.6 cm) long, 0.5-inch (1.3 cm) diameter: volume = 10 mL<br>o Sand pack and bentonite: 18 inches (46 cm) long, 3.5 inches (8.9 cm) diameter, and assuming 40% porosity: volume = 1,145 mL<br>o Total volume = 1,174 mL (= 1.2 L)<br>o 3 purge volumes = 3.6 L<br>o Purge 3.6 L prior to sample collection |
| Purge Device | • 6-liter pre-evacuated purge canister, or<br>• Oil-free vacuum pump |
| Pre-sample purge | • After completing the shut-in test and setting up the leak check shroud:<br>o Open manifold valve and probe valve.<br>o Open valve on purge canister inlet and record initial vacuum.<br>o Inject leak check gas into the shroud, as described above.<br>o Wait for vacuum on the purge canister vacuum gauge to decrease the appropriate amount for the desired purge volume.<br>▪ Volume removed (liters) = [Change in vacuum (in-Hg)] / [29.9 in-Hg] x [canister volume (liters)]<br>▪ For a 6-liter canister, vacuum decreases 5 in-Hg for each one-liter of purge volume.<br>▪ For a 3.6 L purge, vacuum should decrease 18 in-Hg.<br>o When vacuum decreases for the required purge volume, close purge canister valve.<br>o Monitor the manifold vacuum gauge reading periodically during purging to verify the manifold vacuum gauge does not exceed 7.5 in-Hg (appx. 100 in-WC). If exceeded, stop and follow the low-flow sampling procedures listed in Attachment B. Record if low-flow conditions were observed.<br>• Estimated purge time: 3.6 L at 125 mL/minute = 30 minutes |
| SAMPLE COLLECTION | |
| Sampling Setup Verification | • Verify sampling setup, installed as described in prior steps, includes:<br>• Sample canister (with inlet valve closed)<br>• Canister vacuum gauge<br>• Flow controller<br>• Manifold vacuum gauge (verify gauge is installed ahead of the flow controller)<br>• Sample tubing connected to SGP<br>• Shroud covering sampling setup |

**ATTACHMENT A**

| | |
|---|---|
| Soil Gas and Shroud Sample Collection | • Simultaneously open inlet valves on sample canister and shroud canister, and immediately inject leak check gas into shroud (see above).<br>• Verify the base of shroud is secured against the floor with sandbags or other weights.<br>• Open manifold valve and record initial vacuum in each canister.<br>• Monitor the manifold vacuum gauge reading periodically during sampling to verify the gauge does not exceed 7.5 in-Hg (appx. 100 in-WC). If exceeded, stop and follow the low-flow sampling procedures listed in Attachment B. Record if low-flow conditions were observed.<br>• Monitor the canister vacuum gauge and wait for vacuum to decrease to between 1 and 5 in-Hg (2-3 in-Hg is ideal).<br>• Simultaneously close valves on sample canister and shroud canister. Record the final vacuum in each canister.<br>• Close manifold valve.<br>• Close soil gas probe valve.<br>• Remove shroud.<br>• Remove sample canister, manifold, and sample tubing. Before disconnecting the sample tubing from the probe valve, attach a 2-inch length peroxide cured silicone tubing onto the end of the sample (Teflon) tubing, and while opening the probe valve simultaneously insert the PID and other meters[23], if being used, to obtain field readings and record on field form. Objective is to capture the soil gas sample stream immediately following sample collection – if multiple field meters are used, verify the probe valve is closed each time between switching field meters.<br>• Prepare sample canisters for transport to the laboratory.<br>• Secure the protective cap and secured cover (if applicable) at the sample location. |
| SAMPLE SHIPPING | |
| Sample Packaging and Shipment | • Double-check that sample canister valve and threaded cap are tightly closed (finger-tight only, no wrenches).<br>• Place completed and signed Chain of Custody form in the box with the filled samples containers.<br>• Place a signed Custody Seal(s) on the boxes containing the filled sample canisters. |

[23] Methane meters or combustible gas meters may also be used. Required use of other meters will be included in the site-specific work plan. The meters will be used in accordance with manufacturers specifications.

## ATTACHMENT A

**Abbreviations:**

cm: centimeters
DFA: 1,1-difluoroethane
ID: inner diameter
in-Hg: inches mercury
in-WC: inches water column
mL: milliliters
PID: photoionization detector
ppmv: parts per million by volume
QA/QC: quality assurance/quality control

**ATTACHMENT B**

| SAMPLING PROCEDURES IF LOW-FLOW CONDITIONS ARE OBSERVED (>7.5 in-Hg on manifold gauge during initial sampling attempt) | |
|---|---|
| Soil Gas and Shroud Sample Collection | • If 7.5 in-Hg (approximately. 100 in-WC) is exceeded during sampling, follow the steps listed below. Note that low-flow sampling locations may need to be performed in a separate mobilization.<br>o Re-start the standard sampling process with a new sampling apparatus (new SUMMA®, manifold, etc.), and substitute a 6-L SUMMA® canister for the shroud sample (this is to ensure an adequate shroud sample volume for the extended sampling duration to collect aliquots of soil gas).<br>o Follow the Step-by-Step Instructions for Soil Gas Sampling (Attachment A).<br>o Monitor the manifold vacuum gauge reading during sampling to verify the gauge does not exceed 7.5 in-Hg (approximately 100 in-WC). When this value is exceeded, record the observed low-flow conditions, time, and canister vacuum readings. Simultaneously close valves on sample and shroud canisters and close the manifold valve.<br>o Wait approximately 15 minutes to allow for soil gas equilibration in the subsurface.<br>o Simultaneously open valves on sample and shroud canisters, and open the manifold valve, and **then immediately inject leak check gas into shroud**. Record time, canister vacuum readings, and the manifold vacuum reading.<br>o Monitor the manifold vacuum gauge reading during sampling to verify the gauge does not exceed 7.5 in-Hg (approximately 100 in-WC). If exceeded, stop and repeat the steps listed above, and increase the waiting time increment by 15 minutes (or as necessary) to collect sufficient aliquots of soil gas.<br>o Monitor the canister vacuum gauge and wait for vacuum to decrease to between 1 and 5 in-Hg (2-3 in-Hg is ideal).<br>o Simultaneously close valves on sample canister and shroud canister. Record the final vacuum in each canister.<br>o Close manifold valve.<br>o Remove shroud.<br>o Remove sample canister, manifold, and sample tubing.<br>o Prepare sample canister for transport to the laboratory.<br>o Secure the protective cap and secured cover (if applicable) at the sample location. |

## SOP-7 BOREHOLE INSTALLATION, SOIL SAMPLE COLLECTION, AND BOREHOLE ABANDONMENT

Scope and Application

This standard operating procedure (SOP) sets forth the general field procedures for the installation and abandonment of boreholes and the collection of soil samples. This SOP provides general information for the collection of samples to be analyzed for chemicals of concern, including volatile and non-volatile chemicals. A specific protocol for collection and field preservation of samples for volatile organic analyses, including total petroleum hydrocarbons as gasoline (TPH-g) and volatile organic compounds (VOCs) in accordance with United State Environmental Protection Agency (USEPA) Method 5035 are included in a separate SOP.

Borehole installation method should minimally alter the medium that is being investigated. It is essential that the drilling process does not introduce hazardous or foreign substances into the borehole or create conduits that: (a) introduce new soil or groundwater contaminants or (b) facilitate the spread of existing groundwater contaminants. This SOP describes the methods most commonly used by EKI for borehole installation for environmental investigations which include: hand augering, direct push technology (DPT), and hollow-stem auger drilling.

EKI SOPs require hand-augering of all boreholes to a minimum of 5 feet below ground surface to determine if underground utilities are present.

This SOP does not address the following: multi-increment sample collection, collection of samples for per- and polyfluoroalkyl substances (PFAS), collection of soil gas samples, or collection of grab groundwater samples. Please refer to the specific SOPs for appropriate procedures for the collection of such samples.

The procedures in this SOP include:

- Installation of boreholes using hand auger, direct push, and selected drilling techniques and collection of soil samples;
- General processing of samples for chemicals of concern (COCs) and other analyses;
- Borehole abandonment; and
- Field Quality Assurance/Quality Control (QA/QC).

In advance of field work, field staff should verify with the EKI Project Manager that the procedures described in this SOP are appropriate for the project. In the event that a project has site-specific procedures, protocols, and/or requirements, these procedures, protocols, and/or requirements should be followed in lieu of those described in this SOP. Work will be conducted under the supervision of a Licensed Site Professional (LSP), Licensed Environmental Professional (LEP), licensed Professional Geologist, and/or licensed Professional Engineer, as applicable.

### 1.1 PRE-MOBILIZATION

Pre-mobilization activities will include:

- Preparing, or reviewing, proposal to client that details scope, schedule, and budget for the sampling activities. Discuss objectives and concerns with EKI Project Manager;
- Notifying the regulatory oversight agency (e.g., Regional Water Quality Control Board, Department of Toxic Substances Control, County), if required;
- Obtaining permits for drilling from County and/or City, if required, and notifying the permitting agency prior to fieldwork as required by the permit;
- Coordinating with property owners/tenants;
- Checking out necessary equipment from EKI supply room/office (e.g., water level meter, peristaltic pump, tubing, etc.) and/or ordering rental equipment, if EKI equipment not available;
- Coordinating and preparing work authorizations for drilling subcontractors, including provisions for insurance certifications;
- Coordinating with analytical laboratory to obtain appropriate sample containers, minimum volumes, preservation requirements, sample handling, courier contact info (or if not couriering, FedEx office location, hours, and EKI FedEx account number);
- Preparing or updating the site-specific health and safety plan (HASP) for EKI personnel, if necessary;
- Review historical sampling events to determine sampling requirements for Investigation Derived Waste (IDW); and
- Marking locations, clearing with a private utility clearing company, and calling Underground Services Alert (USA).

### 1.2 HEALTH AND SAFETY

Work will comply with all applicable California Occupational Safety and Health Agency (CalOSHA) requirements, the site's health and safety procedures, and EKI's site-specific Health and Safety Plan (HASP). EKI personnel will pay attention to potential physical hazards (e.g., trips, slips, falls, vehicles, rotating equipment, falling objects) while on site. EKI personnel working on-site will minimize contact with potential biological or chemical contaminants in soil, dust, and vapors using appropriate personal protection equipment (PPE).

- For direct contact with solids, PPE may include, but is not limited to, disposable protective clothing (e.g., Tyvek®), disposable gloves, and eye protection.
- For vapors and dust, PPE may include air purifying respirators and/or self-contained breathing apparatus (SCBA) units, as necessary.

To screen for potential concerns related to organic vapors, EKI personnel should use a calibrated photoionization detector (PID) to measure volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPH-g) emanating from groundwater wells, soil gas wells, boreholes, excavations, and excavated soil and VOCs from within the breathing zone of personnel in the active work area. If this screening indicates elevated VOC levels are present,

EKI personnel should implement the procedures described in the HASP and notify the EKI Project Manager.

### 1.3 MATERIALS AND EQUIPMENT

| | |
|---|---|
| SOP-specific equipment | • Hand auger and extension rod, with additional auger head for the materials likely to be encountered:<br>  o Open mud-auger head (with cutouts) for clay;<br>  o Normal cylindrical head for sandy soil; and<br>  o Sand head (with auger teeth touching each other) for loose sands and gravels.<br>• Extension rods for hand auger (allows deeper drilling with less effort)<br>• Ratcheting handle for hand auger<br>• Liners for sampling equipment, if needed<br>• Slide Hammer<br>• Pipe wrenches (to remove hand auger bits)<br>• 5-gram EnCore® Samplers and EnCore® Standard T-Handle or 5-gram Terra Core® Samplers and pre-preserved vials obtained from the laboratory<br>• Glass sample jars obtained from the laboratory (4-, 8-, or 16-ounce jars dependent on the number of analyses being requested at the laboratory)<br>• Photoionization detector (PID)<br>• Stainless-steel trowels, spoons, or scoops<br>• Gloves<br>• Ziploc-type Bags<br>• Sample Labels<br>• Fine tip sharpie<br>• Plastic sheeting |
| General equipment and materials | • Decontamination materials (e.g., deionized water, Alconox™, paper towels, bucket)<br>• Forms (see below) and pens<br>• Chain of custody<br>• Coolers with ice |

### 1.4 DECONTAMINATION OF DRILLING AND SAMPLING EQUIPMENT

Decontamination of all reusable soil sampling equipment will be performed in accordance with EKI SOP-4 (Decontamination of Reusable Equipment).

### 1.5 HAND AUGER BOREHOLE INSTALLATION

As stated above, EKI standard operating procedures require hand-augering of all boreholes to a minimum of 5 feet below ground surface to determine if underground utilities are present. Hand augering may be performed by EKI field staff for shallow soil investigations without a drilling subcontractor. Typically, the down-hole end of the hand auger consists of a 2- to 4-inch stainless-steel auger head with cutting teeth. The head of the hand auger is advanced by simultaneously

pushing and turning the attached handle with extension rods (if needed). Once the head of the hand auger is full of soil, the head is pulled to the surface and the soil is removed from the head and placed on plastic sheeting. Cored soil should be placed on the plastic sheeting in a line based upon the order it was removed so that the depth can be identified for sampling. Removal of soil from a hand-auger head is most easily accomplished by tapping the head with a rubber mallet, using light to no more than moderate force. Hand augers may appear to be tough, but they are surprisingly easy to break (and expensive to replace).

To sample soil from a hand augered borehole for volatile chemical analyses (e.g., TPH-g, VOCs, etc.), a down-hole undisturbed soil core should be collected using a slide hammer and sample barrel that is typically 6-inches long. At the desired sampling depth, the hand auger is removed, and the sample barrel is driven into undisturbed soil using a weighted hammer attachment. The 6-inch long sample barrel is fitted with two (2) 3-inch long, new, unused, stainless-steel sample liners that retain the undisturbed soil when brought back up from the borehole. The practical depth of sampling using a hand auger with or without a slide hammer depends upon the soil properties and depth of investigation. Sandy, incohesive soils may be difficult to retain within the sample barrel though "sand catcher" devices can help. Collection of soil samples using the slide hammer in clayey soils may be difficult due to increased friction and torquing of the hand auger extensions. Do not bend the slide hammer sampler when driving it downward or pulling it upward. One narrow bolt holds the head on, which can break if the force is not aligned with the axis of the sampler. Additional instructions regarding collection of soil samples for volatile compounds are included in EKI SOP-8 (Collection of Soil Samples for VOCs and TPH-g Using Method 5035).

If a slide hammer cannot be used to collect soil samples for volatile chemical analysis due to soil conditions, the most cohesive portions of hand augered soil should be selected and sub-sampled as described above.

### 1.6 Direct Push Technology for Borehole Installation

DPT drilling rigs use hydraulically operated hammers to advance small-diameter hollow steel rods into the ground. For boreholes installed using DPT, drilling and sampling will be performed with a dual–tube sampling method that allows the outer drilling rods to remain in the ground to prevent borehole collapse and cross-contamination. An undisturbed, continuous soil core is then collected in inner sampling rods fitted with new, unused, butyrate plastic sample liners that are typically 4-feet long.

The filled soil core liner should be cut open lengthwise by the drilling subcontractor and placed on new plastic sheeting or a decontaminated core tray on the logging/sample processing table. EKI field staff will then screen the soil core with the PID, collect soil samples, and describe the core as described below.

### 1.7 Hollow-Stem Auger Drilling for Borehole Installation

The hollow stem auger drilling method uses continuous flight augers that mechanically excavate soil cuttings from the borehole as the augers are pushed and rotated into the ground. The hollow

center of the auger allows access to the bottom of the hole without withdrawing the auger string and drilling bit. When the target sample depth is reached, an undisturbed soil sample is collected ahead of the auger string and drilling bit using a decontaminated steel split-spoon sampler. The split-spoon sampler is lowered to the bottom of the borehole and driven to a depth equal to the total length of the sampler, which is typically 18-inches or 24-inches long and 2-inches or 2.5-inches in diameter. The sampler is typically pounded into the ground in 6-inch intervals using a 140-pound weight (hammer) repeatedly dropped from a height of 30-inches or using a hydraulic hammer. The number of hammer blows is typically counted (blow counts) by the drilling contractor and recorded for each 6-inch interval, if requested by the field technician.

Split-spoon samplers can be fitted with 1.5-inch or 2-inch diameter stainless-steel liners, but liners should not be used for EKI projects unless specifically required by the site-specific work plan as collecting soil inside liners fitted into the split-spoon sampler makes screening and logging of the core more difficult. After retrieval, the split-spoon sampler will be opened by the drilling subcontractor and placed on new plastic sheeting or a decontaminated core tray on the logging/sample processing table. EKI field staff will then screen the soil core with the PID, collect soil samples, and describe the core as described below.

### 1.8 Collection of Soil Samples

After soil is collected for sampling as described above, EKI field staff will perform the following tasks:

- Record the amount of soil recovered for each sample interval;
- Briefly examine the soil visually for obvious signs of contamination;
- Screen the soil with the PID by placing the intake of the PID very close to the soil and record the PID reading for each 6-inch interval, if possible; and
- Determine the sample collection interval as directed by the EKI work plan.

While performing these tasks, EKI field staff will take care to:

- Not collect soil that was in contact with the sidewalls of the barrel, liner, or sampler;
- Always use decontaminated stainless-steel spatulas, spoons, or scoops to handle the soil; and
- Always don a new pair of nitrile gloves before handling the soil to prevent cross-contamination in the soil core.

Upon examination of the soil, EKI field staff should contact the EKI Project Manager if there are any questions or clarifications needed to determine the exact sample interval(s).

All samples will be labeled and handled in accordance with EKI SOP-2 (Sample Handling and Chain of Custody).

### 1.8.1 Collection Of Soil Samples for Non-Volatile Chemical Analyses

Samples collected for non-volatile analyses (e.g., metals, pesticides, polychlorinated biphenyls (PCBs), semivolatile organic compounds (SVOCs), etc.) will be collected by one of the following methods:

- Capping both ends of the sample liner with Teflon sheeting and tight-fitting high-density polyethylene end caps;
- Placing soil directly into laboratory-supplied glass jars using a decontaminated stainless-steel spatula, spoon, or scoop; or
- Donning a new pair of nitrile gloves before placing soil into the jar by hand.

### 1.8.2 Collection Of Soil Samples For Volatile Chemical Analyses

Samples collected for volatile chemical analyses (TPH-g, VOCs, etc.) will be sub-sampled in general accordance with USEPA's *Method 5035 Closed-System Purge-and-Trap and Extraction for Volatile Organics in Soil and Waste Samples*, as described in EKI SOP-8 (Collection of Soil Samples for VOCs and TPH-g Using Method 5035). USEPA Method 5035 describes several methods for preserving soil samples in the field, including sub-sampling devices which preserve or seal the soil sample from the atmosphere, such as the EnCore® sampler or field preservation of soil samples in pre-preserved vials obtained from the laboratory.

If required by the site-specific work plan, soil samples for volatile chemical analyses collected for characterization for off-site disposal at a landfill may be collected in a 1.5-inch or 2-inch diameter sample liner capped at both ends with Teflon sheeting and tight-fitting high-density polyethylene end caps.

## 1.9 Borehole Soil Description And Logging

Soil from borehole drilling will be logged by EKI field staff using the Unified Soil Classification System (USCS). Soil color will be described in accordance with The Munsell Soil Color Charts. EKI field staff will record descriptions of the soil core on the Borehole and Well Construction Log form. EKI field staff that are logging soil core will be California-registered Professional Geologists or will be working under the supervision of a professional geologist or engineering geologist that is registered in the State of California or a Licensed Site Professional (LSP), Licensed Environmental Professional (LEP), licenced Professional Geologist, and/or licensed Professional Engineer, as applicable.

## 1.10 Borehole Abandonment

Abandonment of the borehole will be conducted in accordance with the permits for drilling from the County and/or City, if required, and/or the appropriate State of California Well Standards, including California Department of Water Resources (DWR) Bulletins 74-81 (DWR, 1981) and 74-90 (DWR, 1991).

## 1.11 Investigation Derived Waste (IDW)

All investigation derived waste (IDW), such as excess soil cuttings and decontamination water, will be containerized in California Department of Transportation (DOT)-approved containers

(e.g., 55-gllon drums or roll-off bins) and processed in accordance with the EKI SOP-3 (Management of Investigation Derived Waste).

### 1.12 Field Quality Assurance/Quality Control

Field QA/QC samples for soil samples may include equipment blanks, matrix spike/matrix spike duplicates, and temperature blanks.

Equipment blank: Equipment blank samples are used to assess the adequacy of the implemented decontamination procedures and/or to evaluate potential contamination from the equipment used during sampling. An equipment blank is a sample of purified (e.g., distilled) water that has been poured over decontaminated reusable sampling equipment before sampling. The equipment blank sample should be collected in a clean, unused 1-Liter amber bottle and decanted into the appropriate laboratory-supplied containers for the analyses specified in the site-specific work plan for the equipment blank. In general, one equipment blank sample should be collected and analyzed for every 20 soil samples that are collected for analysis.

For each sampling event, EKI personnel will collect the following field QA/QC samples for analysis by the laboratory, unless otherwise specified in the site-specific work plan.

Temperature blank: A temperature blank is a small container (e.g., a 40 mL VOA vial or small plastic sampling bottle) that is filled with distilled water; one temperature blank should be placed into each cooler that is shipped to the analytical laboratory. The temperature of the temperature blank is measured at the analytical laboratory to evaluate if the samples were adequately cooled during shipment to the laboratory.

If specifically required by the site-specific work plan, the following Field QA/QC samples should also be collected:

MS/MSD samples: Matrix spike (MS) and matrix spike duplicate (MSD) samples are duplicate samples that are submitted to the analytical laboratory to evaluate the QA/QC procedures of the analytical laboratory using site-specific matrices. Consult with the analytical laboratory to determine how many additional samples are required for the analysis of VOCs or TPH-g. In general, one MS/MSD sample should be collected and analyzed for every 20 soil samples that are collected for analysis.

### 1.13 List of Attachments

Attachment A Borehole and Well Construction Log

### 1.14 List of Forms

- Daily Field Notes
- Daily Safety Meeting Log (if working with subcontractor, e.g., drillers)
- Borehole and Well Construction Log
- Chain-of-Custody Record

### 1.15 Other Relevant SOPs

- Collection of Soil Samples for VOCs and TPH-g Using Method 5035

- Photoionization Detector Calibration and Use
- Decontamination of Reusable Equipment
- Sample Handling and Chain of Custody
- Field Notes and Photographs
- Management of Investigation Derived Waste

BH1,2

# SOP-8 COLLECTION OF SOIL SAMPLES FOR VOCS AND TPH-G USING METHOD 5035

Scope and Application

Traditional soil sampling methods have been shown to result in significant losses of volatile organic compounds (VOCs) and/or total petroleum hydrocarbons in the gasoline range (TPH-g). The purpose of this standard operating procedure (SOP) is to implement sample collection and handling procedures that will minimize losses of VOCs and/or TPH-g in solid samples and thus obtain more representative results. This SOP addresses select aspects of sample collection, handling, preparation, and shipment in accordance with the United States Environmental Protection Agency (USEPA) *Method 5035A (SW-846): Closed-System Purge-and-Trap and Extraction for Volatile Organics in Soil and Waste Samples* (USEPA, 2002). It does not address non-field related requirements of SW-846 Method 5035A guidance such as sampling design, laboratory quality assurance/quality control procedures, or laboratory analytical methods, etc.

To minimize the time during which samples are exposed to atmospheric conditions (i.e., under conditions which facilitate the volatilization, and hence loss, of VOCs and TPH-g from the sample), a hand-operated cylindrical coring device (e.g., EnCore® or Terra Core® samplers) is used to collect the samples. While the procedures for sampling cohesive granular materials using EnCore® and Terra Core® samplers are similar, the sample preservation requirements for each technique are significantly different. Regardless of which sampling methodology is employed, several (typically between 3 and 5) collocated sub-samples will be required for each sample location.

The procedures in this SOP include:

- Soil sample collection using EnCore® and Terra Core® samplers;
- Sample preservation; and
- Field quality assurance/quality control (QA/QC).

In advance of field work, field staff should verify with the EKI Project Manager that the procedures described in this SOP are appropriate for the project. In the event that a project has site-specific procedures, protocols, and/or requirements, these procedures, protocols, and/or requirements should be followed in lieu of those described in this SOP. Work will be conducted under the supervision of a Licensed Site Professional (LSP), Licensed Environmental Professional (LEP), licensed Professional Geologist, and/or licensed Professional Engineer, as applicable.

## 1.1 PRE-MOBILIZATION

Pre-mobilization activities will include:

- Reviewing the planned scope of work;
- Discussing sampling objectives and potential concerns with the EKI Project Manager;
- Confirming whether the necessary sampling supplies are available and, if not, ordering these supplies from a product vendor or the analytical laboratory; and

- Coordinating with the analytical laboratory and/or courier to arrange for sample drop-off, pickup, and/or delivery.

### 1.2 HEALTH AND SAFETY

Work will comply with all applicable California Occupational Safety and Health Agency (CalOSHA) requirements, the site's health and safety procedures, and EKI's site-specific Health and Safety Plan (HASP). EKI personnel will pay attention to potential physical hazards (e.g., trips, slips, falls, vehicles, rotating equipment, falling objects) while on site. EKI personnel working on-site will minimize contact with potential biological or chemical contaminants in soil, dust, and vapors using appropriate personal protection equipment (PPE).

- For direct contact with solids, PPE may include, but is not limited to, disposable protective clothing (e.g., Tyvek®), disposable gloves, and eye protection.
- For vapors and dust, PPE may include air purifying respirators and/or self-contained breathing apparatus (SCBA) units, as necessary.

To screen for potential concerns related to organic vapors, EKI personnel should use a calibrated photoionization detector (PID) to measure volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPH-g) emanating from groundwater wells, soil gas wells, boreholes, excavations, and excavated soil and VOCs from within the breathing zone of personnel in the active work area. If this screening indicates elevated VOC levels are present, EKI personnel should implement the procedures described in the HASP and notify the EKI Project Manager.

| | |
|---|---|
| SOP-specific equipment | • 5-gram EnCore® samplers and EnCore® standard T-handle OR 5-gram Terra Core® samplers and three 40 milliliter (mL) VOA vials containing an appropriate volume of sample preservative[16]<br>• Standard ppm PID lamp 10.6 electron volts (eV)<br>• Disposable gloves<br>• Hand auger with extender pipe (if necessary), additional bit for clay (if necessary), and pipe wrenches<br>• Stainless-steel trowel<br>• Ziplock-type bags<br>• Sample labels<br>• Fine tip indelible marker (e.g., Sharpie) |
| General equipment and materials | • Decontamination materials (e.g., deionized water, Alconox™, paper towels, bucket)<br>• Field notes and pens<br>• Chain of custody<br>• Coolers with ice, Ziploc-type bags, and bubble wrap |

[16] The sample preservative is typically distilled water, acidified distilled water, methanol, or sodium bisulfate. NOTE: The use of acidified water is not recommended for the analysis of solids with significant levels of carbonates, because the acidified water and carbonates will result in effervescence and the loss of volatile compounds.

### 1.3 Materials and Equipment

### 1.4 Decontamination

Decontamination of all reusable soil sampling equipment will be performed in accordance with EKI SOP-4 (Decontamination of Reusable Equipment).

### 1.5 Sampling For VOCs Or TPH-g

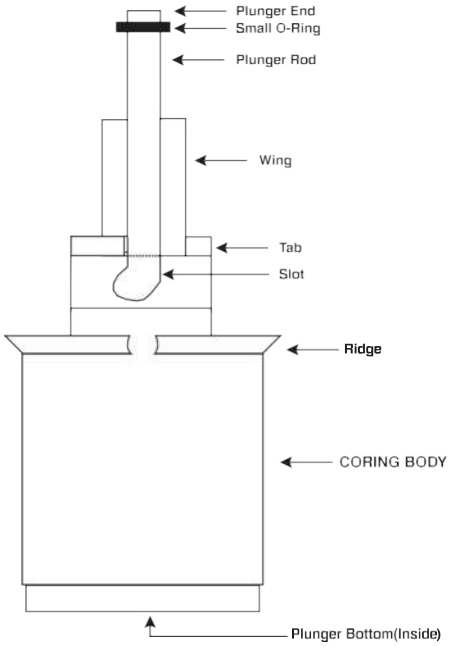
Don the appropriate PPE as specified in the site-specific HASP. Locate the sampling location and document pertinent information in the field notes. Using clean decontaminated tools, carefully remove stones, vegetation, debris, etc. from the surface of the sampling area. To minimize the loss of VOCs or TPH-g, expose a fresh soil surface for sampling and collect sub-samples for analysis as quickly as possible, taking special care to limit exposure and disaggregation of the soil's physical structure. If the soil surface has been exposed for more than a minute or two, a fresh surface should be created just prior to sampling and sampling personnel should be prepared to collect the sub-samples immediately thereafter.

Details regarding sampling with EnCore® and Terra Core® samplers are provided below in Sections 1.5.1 and 1.5.2, respectively. For reporting VOCs and TPH-g in dry-weight concentrations, collect additional soil in a 4-ounce glass jar for the analysis of moisture content (if additional soil is collected for the analysis of other analytes (e.g., metals), it is not necessary to collect more material for the analysis of moisture content).

#### 1.5.1 EnCore® Samplers

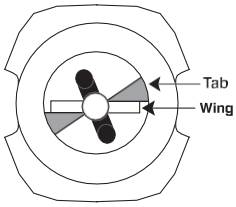
The EnCore® sampler is a sampling device that can be used as both a simultaneous coring tool for cohesive soils and a transport device to an offsite analytical laboratory. The EnCore® sampler consists of a cylindrical coring/storage chamber with a vapor tight plunger and cap. EnCore® samplers are single use devices that cannot be cleaned and/or reused and they will be used with the EnCore® T-handle.

New, unused EnCore® samplers are purchased by EKI and brought to the Site. In general, laboratories require collection of a minimum of three (3) EnCore® samplers per analysis (i.e., a total of six (6) EnCore® samplers would be required for VOCs and TPH-g analysis). EKI field personnel should contact the project analytical laboratory to confirm the number of EnCore® samplers required for the analyses outlined in the site-specific work plan.



To collect a sample using an EnCore® sampler, follow the steps below.

- Using clean disposable gloves, remove the **coring body** (Figure 1) from the foil bag.
- Hold the coring body and push the **plunger rod** down until the small **o-ring** rests against the **tabs** (if it is not already in this position).
- Depress the **locking lever** on the T-handle (Figure 1). Place coring body, **plunger end first**, into open end of T-handle, aligning the two **slots** on the coring body with the two **locking pins** in the T-handle. Twist the coring body clockwise to lock the pins in slots. Confirm that coring body is locked in place.



- Push the coring body of the sampler into the soil until the coring body is completely full; when full, the small o-ring will be centered in the T-handle **viewing hole.**
- Visually confirm that there is no void space at the top of the sampler and that the sampled material extends slightly beyond the end of the sampler (no more than 1 millimeter). Wipe excess soil from exterior of the coring body using a clean paper towel.
- Cap the coring body while it is still on the T-handle. Push the **cap locking arms** (Figure 2) over the flat area of the **ridge** (Figure 1) and twist to lock the cap in place. Cap will be properly seated to seal the sampler (Figure 2).
- Remove the capped sampler by depressing the locking lever on the T-handle while twisting and pulling the sampler from the T-handle.
- Lock the plunger by twisting the extended plunger rod counterclockwise until the **wings** (Figure 1) rest firmly against the **tabs.**
- Repeat the procedures above until the required number of sub-samples have been collected. To provide the laboratory with enough sample to meet applicable quality assurance and quality control (QA/QC) requirements and potential re-analysis needs, it is usually necessary to collect three (3) EnCore® samplers per analysis.
- For moisture analysis as discussed above, place soil directly into the laboratory-supplied glass jar either by: (a) using a decontaminated stainless-steel spatula, spoon, or scoop; or (b) donning a new pair of nitrile gloves before placing soil into the jar by hand.
- Place the sealed samplers into the EnCore® sampling bag and label the sampling bag with a unique sample name, the date and time of sampling, and other relevant project information and place the collected sub-samples into a cooler filled with ice.
- Decontaminate all non-disposable sampling equipment, e.g., the T-handle.

### 1.5.2 Terra Core® Sample Kits

Terra Core® samplers are a plastic one-time use transfer tool designed to collect 5-gram (or 10-gram) soil sub-samples and transfer the sub-sample to laboratory provided containers for in-field chemical preservation. Terra Core® samplers cannot be cleaned and/or reused. Each Terra Core® sampling kit obtained from the project laboratory will include three (3) or four (4) 40-milliliter

(mL) VOA vials with preservative, a glass sample jar for percent moisture analysis, and one disposable plastic Terra Core™ syringe. The preservative is placed into each VOA vial by the project laboratory; one of the VOA vials will contain methanol[17] and the remaining VOA vials will contain distilled (DI) water or acidified water.[18] The volume (in mL) of preservative in each VOA vial should match the mass (in grams) of the sample being collected (i.e., for 5-gram Terra Core® samplers, each of the vials should contain approximately 5 mL of liquid). Each of the VOA vials are pre-weighed and pre-labeled by the laboratory; it is imperative that the weight recorded on each vial remains legible upon receipt at the analytical laboratory. Only one sampling kit is required for the analysis of VOCs and TPH-g.[19]

To collect a sample using a Terra Core® sample kit, follow the steps below.

- Using clean disposable gloves, prepare one of the VOA vials containing the sample preservative to receive the sampled material.
- With the plunger seated in the handle of a clean unused Terra Core® sampler, push the sampler into freshly exposed soil until the chamber is filled (Figure 3a).
- Visually verify that the sampling chamber is filled; if it is not, press the sampler into the soil again. The sampled material should be flush with the mouth of the sampler; remove any excess material that extends beyond the mouth of the sampler (Figure 3b).
- Wipe excess soil off of the sampler using a clean paper towel (Figure 3b).
- Place the mouth of the sampler into the VOA vial containing the appropriate preservative and rotate the plunger that was seated in the handle top 90 degrees until it is aligned with the slots in the body (Figure 3c).
- To minimize splashing, hold the VOA vial and sampler at a slight angle and extrude the sample into the preservative by pushing the plunger down (Figure 3c).
- Quickly remove the sampler from the VOA vial and recap the VOA vial. To make sure that the VOA vial is well sealed, remove any soil from the top and/or threads of the vial prior to re-capping.
- Ensure that all of the sampled material is covered by the sample preservative; if necessary, agitate the sample slightly to disaggregate the sample.
- Using a fine tip indelible marker, fill out the label on the sealed VOA vial with a unique sample name, the date and time of sampling, the analyses required, and other relevant project information. Do not affix an additional label to the vial as it will alter the weight

[17] The methanol preserved sample is for the analysis of samples that contain greater than 200 micrograms per kilogram (ug/kg) of total VOCs and the water preserved samples are used for the analysis of samples that contain less than 200 ug/kg of total VOCs.

[18] The acidified water preservative is created by mixing sodium bisulfate with distilled water; for a 5-gram sample, approximately 1 gram of sodium bisulfate is dissolved in approximately 5 mL of distilled water. The analytical laboratory also typically includes a magnetic stir bar in the VOA vials that contain DI water/acidified water.

[19] If both VOCs AND TPH-g will be analyzed, a total of four VOA vials are required (one containing methanol and the remaining three containing DI or acidified water); if only VOCs OR TPH-g will be analyzed, only three VOA vials are required (one containing methanol and the remaining two containing DI or acidified water).

of the vial. Instead, affix any additional labels to the exterior of a Ziploc®-type bag in which the VOA vials are placed.

- Repeat the procedure above to fill the remaining VOA vials included in the sampling kit.
- For moisture analysis as discussed above, place soil directly into the laboratory-supplied glass jar either by: (a) using a decontaminated stainless-steel spatulas, spoon, or scoop; or (b) donning a new pair of nitrile gloves before placing soil into the jar by hand.
- Place the sealed vials into the sampling kit bag and label with a unique sample name, the date and time of sampling, and other relevant project information and place the collected sub-samples into a cooler filled with ice.
- For every 20 samples that are collected, one extra Terra Core® sampling kit should be collected and submitted for analysis for the analytical laboratory's batch quality assurance quality control testing.
- Decontaminate all non-disposable sampling equipment.

(a) (b) (c)

Figure 3: Terra Core® sampling steps.

### 1.6 TRANSPORT, PRESERVATION, AND HOLDING TIMES

- Transport samples to the analytical laboratory on wet ice.
- EnCore® samples will be extracted at the laboratory within 48 hours of being collected; EnCore® samples received within 48 hours of collection may instead be frozen on arrival at the analytical laboratory[20] to extend the holding time to 14 days from the date of collection.
- Terra Core® samples preserved in DI water or acidified water will be shipped and delivered to the analytical laboratory for extraction within 48 hours of sample collection. If these samples cannot be extracted within 48 hours, the samples can be preserved by freezing the sample within 48 hours (to a temperature between -7 and -20 degrees Celsius); the frozen samples can then be shipped to the analytical laboratory where they will be thawed and extracted within 14 days of sample collection.

[20] The laboratory must document that the samples were frozen and maintained at a temperature between -7 and -20 degrees Celsius until extraction.

- Methanol preserved samples will be extracted within 14 days of sample collection.

### 1.7 FIELD QUALITY ASSURANCE/QUALITY CONTROL

Field QA/QC samples for soil may include the collection of equipment blanks, matrix spike/matrix spike duplicate (MS/MSD) samples, and temperature blank; additional details about these samples are presented below.

Equipment blank: Equipment blank samples are used to assess the adequacy of the implemented decontamination procedures and/or to evaluate potential contamination from the equipment used during sampling. An equipment blank is a sample of purified (e.g., distilled) water that has been poured over decontaminated reusable sampling equipment before sampling. The equipment blank sample should be collected in a clean, unused 1-Liter amber bottle and decanted into the appropriate laboratory-supplied containers for the analyses specified in the site-specific work plan for the equipment blank. In general, one equipment blank sample should be collected and analyzed for every 20 soil samples that are collected for analysis.

Temperature blank: A temperature blank is a small container (e.g., a 40 mL VOA vial or small plastic sampling bottle) that is filled with distilled water; one temperature blank should be placed into each cooler that is shipped to the analytical laboratory. The temperature of the temperature blank is measured at the analytical laboratory to evaluate if the samples were adequately cooled during shipment to the laboratory.

MS/MSD samples: Matrix spike (MS) and matrix spike duplicate (MSD) samples are duplicate samples that are submitted to the analytical laboratory to evaluate the QA/QC procedures of the analytical laboratory using site-specific matrices. Consult with the analytical laboratory to determine how many additional samples are required for the analysis of VOCs or TPH-g. In general, one MS/MSD sample should be collected and analyzed for every 20 soil samples that are collected for analysis.[21]

### 1.8 LIST OF FORMS

- Daily Field Notes
- Chain-of-Custody Record

### 1.9 OTHER RELEVANT SOPS

- Field Notes and Photographs
- Sample Handling and Chain of Custody
- Photoionization Detector Calibration and Use
- Decontamination of Reusable Equipment

[21] Typically, for EnCore®-based sampling an additional 2 EnCores® will need to be collected for the MS/MSD for VOCs and TPH-g; for Terra Core®-based sampling, and additional Terra Core® sampling kit will need to be used.

# Soil Vapor Sampling with H&P Equipment
# Summary of Procedures

**Revision 3**

**Revised: October 2024**

**Effective: October 2024**

---

*The information contained in this document is proprietary and intended for use with H&P services only. These soil vapor sampling procedures are the standard policies and practices communicated to clients for use with laboratory equipment supplied by H&P Mobile Geochemistry, Inc. The H&P client is responsible for following these procedures and for updating the text that follows to account for any modifications to the procedures.*

# Soil Vapor Sample Collection

## 1.0 Sample Train Set-Up

### 1.1 Components of the Sampling Train

*The H&P sampling train consists of an in-line gauge to monitor probe vacuum during purging, a gauge to monitor the summa canister vacuum during sampling, the summa canister container, and a purge device (i.e. syringe or pump).*

### 1.2 Connecting the Sampling Train

*The sampling train is assembled using a combination of Swagelok quick-connect fittings, luer lock valves, small amounts of connector Tygon tubing (installed flush, so as not to expose the tubing to the vapor sample), and zip ties. The sampling train is attached to the vapor probe via a luer lock connection between the one-way valve at the termination of the vapor probe, and a three-way valve that branches off to the purge device on one side, and the sampling container on the other side.*

### 1.3 Conducting a Shut-In Test

*Prior to purging and sampling, a shut-in test is conducted on the sampling train to check for leaks in the above-ground fittings. The shut-in test is conducted by attaching the complete sample train assembly to the termination valve on the soil vapor probe. With the valve attached to the soil vapor probe in the "off" position, a purge syringe or vacuum pump is used to evacuate the sample train of air to a minimum measured vacuum of approximately 100 inches of water. The vacuum is observed on an in-line vacuum gauge which is positioned prior to the purge syringe or vacuum pump. The vacuum gauge is observed for one minute and all above ground connections will be considered "air-tight" if the pressure on the gauge does not noticeably dissipate. If there is an observable loss in vacuum, the fittings in the sample assembly are checked and tightened, and the test is repeated. Sampling is not commenced until the above ground fittings are deemed air-tight.*

## 2.0 Leak Check

*A leak test is performed on each individual soil vapor sample probe in order to test the integrity of the entire sampling system. Its purpose is to evaluate whether an adequate seal is established at the soil vapor probe interface with the ground surface, as well as a leak check of all above ground fittings to ensure that the samples collected are not being diluted by ambient air.*

### 2.1 Liquid Leak Check Compounds

*Liquid leak check compounds, such as Difluoroethane (DFA) or Tetrafluoroethane (PFA) can be used to evaluate sample integrity. The liquid tracer compound is applied to a towel and kept in a closed plastic zip lock bag until it is ready to be used. Prior to purging and sampling of the soil vapor probe, the towel is emptied from the plastic bag and placed directly at the point of entry of the soil vapor probe into the borehole. This is used to test the integrity of the construction of the soil vapor probe. Additional saturated towels can also be set near all above ground sample train connections to ensure there are no leaks in the above ground fittings as well. The towel used for the leak detection can be reused between samples and should be refreshed with the liquid compound prior to each purging and sampling event. If the purging and sampling collection takes longer than five minutes in duration, the liquid tracer should be reapplied to the cloth, or steps should be made to contain the compound within an enclosure.*

### 2.1 Gaseous Leak Check Compounds

*Gaseous tracer compounds, such as helium, can be used to evaluate sample integrity. The tracer gas is contained in a shroud which is then placed over the soil vapor probe location, or the entire sample train, evaluating any leaks in the sampling system. More details can be found in attached Appendix B.*

## 3.0 Purging the Soil Vapor Probe

### 3.1 Calculating Purge Volume

*The purge volume of a soil vapor well is defined as the internal volume of the length of tubing used in the construction of the soil gas well added to the "dead space volume" of the sand pack around the probe tip/filter, as well as the "dead space volume" of the dry bentonite placed above and below the sand pack. Purge volume definitions and calculations will vary based on local and state regulations, as well as individual client interpretations of purge volume.*

### 3.2 Removing the Purge Air from the Soil Vapor Probe

*Depending on the volume of purge air that is required to be removed from the soil vapor probe, there are two options that can be used for purging. For smaller purge volumes, a plastic, gas-tight, calibrated syringe is used to purge the probe. For larger purge volumes, a vacuum pump is used. The purging device is attached to a 3-way valve (or a tee fitting) which is then connected to the on/off valve on the soil vapor probe. This 3-valve allows the sample train to be connected to one port on the valve, and the purge equipment to be attached to the other. This ensures that all of the sample train assembly being used for the collection of the sample will be upstream of the purging device, and therefore eliminates any potential for cross contamination.*

### 3.3 Purge/Sample Flow Rate and Applied Vacuum

*Flow rates between 100 to 200 mL/min and probe vacuum pressures of less than 100 inches of water are maintained during purging and sampling of the soil vapor probe to minimize stripping, and to prevent ambient air from diluting the soil vapor samples.*

*When using a syringe for purging and sample collection, flow rates can be monitored by timing the interval at which the plunger is drawn. A 60 mL syringe will take approximately 20 seconds to fill in order to maintain a 200 mL/min flow rate. When using a vacuum pump, in-line calibrated flow meters are used to accurately monitor flow rates. These flow meters have metering valves which allow the flow rates to be increased or decreased to the appropriate rate.*

*An in-line vacuum gauge is used when purging with a syringe or a pump in order to maintain probe vacuum pressures less than 100" of water. If, while purging, vacuum pressure exceeds 100" of water, the client will be informed that the soil vapor probe location appears to be in a low-permeable soil formation. The sample technician will then slow the purge flow rate to a rate of 100 mL/min in attempt to maintain flow and keep the applied vacuum below 100" water.*

## 4.0 Collecting the Sample

*Soil Vapor samples are collected in the appropriate gas-tight container required for specific projects and analysis needed. All sample collection assemblies and containers should be attached to the soil vapor probe via a 3-way valve prior to the purging device in order to avoid cross contamination.*

### 4.1 Glass Syringes

*H&P uses an airtight calibrated glass syringe for sample collection to be analyzed by the mobile on-site laboratory. The glass syringe is attached via a luer lock connection to a 3-way valve, which allows sample to be drawn into the syringe and then sealed off by rotating the valve. The syringe is attached to the "T" fitting (or 3-way valve) connected to the soil vapor probe on/off valve, and prior to the purging device. After purging of the soil vapor probe has been completed, the valve is rotated so that the flow path of the soil vapor probe is diverted towards the sample syringe. The plunger is then slowly drawn back at a flow rate of 200 mL/min or less. When the plunger is pulled back and the soil vapor sample has been drawn into the syringe, the valve is shut off at the syringe. It is then disconnected and immediately wrapped in aluminum foil, or transferred to a cool, dark bag to prevent photo degradation of the target analytes from direct sunlight. The soil vapor holding time in the syringe should not exceed 15 minutes before it is transferred to the sample instrument.*

### 4.2 Summa Canister

*H&P provides summa canister volumes of 1L or smaller for soil vapor and subslab sampling (1L, 450mL, 400mL, or 200mL). The summa canisters are attached to a sample assembly (also called a flow regulator or flow restrictor) via a quick-connect fitting. The*

*sample assembly contains a vacuum gauge which is used to monitor the summa canister vacuum pressure, and a critical orifice which restricts the flow of air through the device at the desired rate. The leading end of the sample assembly contains a barb fitting which is attached to the "T" fitting (or 3-way valve) connected to the soil vapor probe on/off valve, and prior to the purging device. After purging of the soil vapor probe has been completed, the valve is rotated so that the flow path of the soil vapor probe is diverted towards the sample assembly and summa canister. The valve on the summa canister is then opened and sampling is commenced. Canister vacuum pressures are recorded prior to sampling, and again after sampling has been completed. It is H&P's procedure to allow the vacuum pressure to zero with the collection of the sample. This allows the canister to be under zero pressure and thus, along with the shut-off male quick connect fitting and the canister valve, assures that there is no potential for unwanted air to enter the canister should a leak occur during transit. If requested, slight vacuum (two to four inches of mercury) may be left in the canister at the commencement of sampling. Summa canisters should be kept out of direct sun light and kept at room temperature until received by the laboratory. The soil vapor holding time in a summa canister should not exceed 30 days.*

### 4.1 Tedlar Bags

*H&P also uses new Tedlar Bags for sample collection to be analyzed by the mobile on-site laboratory. A disposable plastic syringe can be used by drawing the sample into the syringe, and then evacuating it through a side port in the 3-way valve into the Tedlar bag. This process is repeated until the proper amount of sample is collected in the bag.*

*Samples collected in Tedlar bags should not be exposed to sunlight or extreme temperatures. Photo degradation of target analytes is possible with light exposure. The soil vapor holding time for Tedlar bags should not exceed 3 days.*

## Work Plan Approval

| WORK SITE ADDRESS | CITY | ZIP | EMAIL ADDRESS FOR WELL PERMIT APPROVAL |
|---|---|---|---|
| 110 W Olive Ave | Burbank | 91502 | jhernandez@ekiconsult.com |

**NOTICE:**

- WORK PLAN APPROVALS ONCE GRANTED, ARE VALID FOR 180 DAYS. 30 DAY EXTENSIONS OF WORK PLAN APPROVALS ARE CONSIDERED ON AN INDIVIDUAL (CASE-BY-CASE) BASIS AND MAY BE SUBJECT TO ADDITIONAL PLAN REVIEW FEES (HOURLY RATE AS APPLICABLE).
- WORK PLAN MODIFICATIONS MAY BE REQUIRED IF WELL AND GEOLOGIC CONDITIONS ENCOUNTERED AT THE SITE INSPECTION ARE FOUND TO DIFFER FROM THE SCOPE OF WORK PRESENTED TO THE DEPARTMENT OF PUBLIC HEALTH—DRINKING WATER PROGRAM.
- POTENTIAL APPROVALS ARE LIMITED TO COMPLIANCE WITH THE CALIFORNIA WELL STANDARDS AND THE LOS ANGELES COUNTY CODE AND DOES NOT GRANT ANY RIGHTS TO CONSTRUCT, RENOVATE, OR DECOMMISSION ANY WELL. THE APPLICANT IS RESPONSIBLE FOR SECURING ALL OTHER NECESSARY PERMITS SUCH AS WATER RIGHTS, PROPERTY RIGHTS, COASTAL COMMISSION OR WATERMASTER APPROVALS, USE COVENANTS, ENCROACHMENT PERMISSIONS, UTILITY LINE SETBACKS, CITY/COUNTY PUBLIC WORKS RIGHTS OF WAY, ETC.
- THIS PERMIT IS NOT COMPLETE UNTIL ALL OF THE FOLLOWING REQUIREMENTS ARE SIGNED BY THE DEPUTY HEALTH OFFICER. WORK SHALL NOT BE INITIATED WITHOUT A WORK PLAN APPROVAL STAMPED BY THE DEPARTMENT OF PUBLIC HEALTH—DRINKING WATER PROGRAM.

**TO BE COMPLETED BY DEPARTMENT OF PUBLIC HEALTH—DRINKING WATER PROGRAM:**

| | | | | | |
|---|---|---|---|---|---|
| ✓ | WORK PLAN APPROVED FOR: 2 - Soil Borings/Exp. Holes | **PERMIT NUMBER:** | SR0435347 | **DATE:** | February 20, 2026 |

ADDITIONAL APPROVAL CONDITIONS:
You are hereby directed to follow the work plan conditions:

- Work plan approval is issued for scope of work submitted to the Drinking Water Program. Any modifications to the scope of work will require an additional work plan review.
- Ensure the borings/exploration holes are backfilled within 24 hours of boring construction.
- Ensure to **backfill using a tremie pipe under pressure or equivalent equipment** with approved cement grout, proceeding upward from the bottom of the boring/exploration hole to surface.
- Ensure soil borings are sealed per California Well Standards (Bulletins 74-81 and 74-90)
    - Cement grout mix ratio of 5-6 gallons of water per 94-pound bag of Portland cement.
    - Up to 6% of Bentonite may be added to the cement-based mix.
    - No hydrated Bentonite chips and/or soil cuttings.
- Borings/Exploration holes must comply with all applicable requirements published in the California Well Standards (Bulletins 74-81 and 74-90) and the Los Angeles County Code, Title 11.

**Please note: We no longer allow soil vapor probes to be installed into ground water sample borings or borings that extend into ground water. Follow the Advisory Active Soil Gas Investigations July 2015: Cal EPA, DTSC, LA RWQCB and San Francisco RWQCB for vapor probe borings. We do not permit percolation test borings or soil vapor probe installations in the vadose zone.**

**PPE:** Level D
**Work Hours:** 6:30 – 17:45
**Equipment:** Hollow Stem Auger Rig (HSA)
**Air Monitoring:** Rae Instruments MultiRae PID

**Visitors Onsite:**

**Daily Work Summary:** ~~SoCal Locators locating underground utilities~~; M&R Drilling hand augering and drilling with an HSA rig ~~and installing 4 soil vapor probes~~; EKI collecting soil samples at each boring.

**Special Conditions, Scope Changes, Issues, Delays:** Repeated indoor borings approx 20 ft north and collected soil samples at first native/fill soil contact at each boring (EKI-SB-7, 8, and 9) + due to steel plates & gravel.

**Field Notes:** Recorded by Julia Hernandez

7:45 arrived on site, notified PM and site contacts, Brett and Dave.
7:50 Field prep, calibrated PID & MR on site.
7:55 Brett and Dave on site, unlocked gate to yard and warehouse.
8:00 MR mobilized to warehouse, conducted health&safety.
8:30 MR mobilized indoors and began hand augering at 3 indoor boring locations along historic railspur.
8:35 upper 2 to 3 ft at historic rail spur is coarse gravel; changed sampling plan to collect first native soil below gravel and fill at each indoor boring.
10:00 MR completed hand augering at indoor borings; backfilled borings and mobilized to outdoor yard.
10:05 EKI began mobilizing equipment to van for easier transport to yard.
10:10 Rear glass window on van shattered upon opening door and lightly hitting tree stump on edge of glass window; EKI stopped work, notified drillers to pause work and ask for assistance.
10:15 EKI and MR cleaned up broken glass and taped up broken window with gorilla tape and filled plastic bag.
11:15 EKI mobilized to yard and continued drilling and sampling activities.
12:00 EKI provided update to PM and notified mgmt of broken window.
13:45 MR completed drilling and backfilling all borings; began site clean up and paperwork
14:00 MR off-site, EKI remained on-site to complete paperwork, coordinate IDW sample, take photos and clean up.

# Daily Field Summary Report

Project: Barmann Steel Co.
Address: 410 W. Olive Ave. Burbank, CA.
Date: 3/7/26 EKI Job No: C50221.01

Personnel Onsite: Julia Hernandez EKI
Task: Conduct SVP sampling & decommissioning SVP's.
Weather: clear & windy
PPE: Level D
Work Hours: 6:30 - 15:30
Equipment: Mobile lab
Air Monitoring:
Visitors Onsite:

Daily Work Summary: Conduct SVP sampling with a mobile lab and decommission SVP's once all probes have been sampled.

Special Conditions, Scope Changes, Issues, Delays:

Field Notes:

7:45 Arrived on site, field prep, notified site contacts (Dave & Brett)
~~8:50~~ H&P Mobile Geochemistry lab on site, conducted health & safety meeting.
8:10 unlocked the gate per Dave's permission.
8:15 H&P setting up equipment and calibrating machines.
8:30 H&P began sampling ~~and~~ at EKI-VP-1
8:40 Discussed SOP with H&P for EPA 8260 method; no shrouds are used in sampling setup. DFA is sprayed on a rag and placed at least 1 foot from SVP sampling port during purging and sampling. DFA is ~~monitored~~ included in the results and 5,000 µg/m³ DFA indicates a leak in the sampling train.
8:55 H&P completed collecting samples from EKI-VP-1, and began analyses inside the mobile lab; estimated analyses completion is 1 hour.
~~9:50~~ 9:00 Notified MR drillers to delay arrival to noon.
9:30 MR arrived on site, instructed to hold off on decommissioning until data has been issued for EKI-VP-1 and to hold off on decommissioning other probes until data has been issued for each probe.
10:00 checked in with H&P on analysis, the analysis is almost done, MR is on standby until all data for first probe is collected.
10:25 Results are in for EKI-VP-1; PCE was the only compound detected, with concentration of 13 µg/m³
10:30 H&P began mobilizing to EKI-VP-4; MR began decommissioning EKI-VP-1.
11:15 Results for EKI-VP-4 were PCE @ 815 µg/m³ and only compound detected.
11:55 Results for EKI-VP-3 were PCE @ 1,000 µg/m³ and TCE at 60 µg/m³

eki environment & water

## Daily Field Summary Report

Date:

| Field Notes: | |
|---|---|
| 12:00 | HaP mobilized to EKI-VP-2 and began purging and sampling. |
| 12:20 | Sample collected, began analyses. |
| 12:50 | Results for EKI-VP-2 were only DCE detected at 15 ug/m3. MR began decomissioning last 2 probes sampled. |
| 13:00 | All probes officially decomissioned, took photos, HaP mobile preparing preliminary results report. |
| 13:15 | finished paperwork with MR and discussed results with Kianlew; HaP issued preliminary results. |
| 13:20 | MR and HaP off-site; EKI locked up and notified site contacts of departure |
| ~~13:25~~ | |
| 13:25 | EKI off-site, travel back to Irvine. |
| 15:30 | EKI back at Irvine office |

Project Name:

# APPENDIX L

## Lithologic Borehole Logs

| | | | |
|---|---|---|---|
| BOREHOLE LOCATION: 110 W. Olive Ave. Burbank CA. | BH or Well ID: EKI-SB-1 | BOREHOLE DIAMETER: 6-in | TOTAL DEPTH: 20 Ft |
| DRILLING COMPANY: M&R Drilling | DRILLER & HELPER(S): Austin, Steve, Adrian | Project: Borrmann Steel | DATE STARTED: 2/28/26 |
| DRILLING METHOD(S) & RIG USED: HSA rig w/ HSA's | | Proj No: C50221.01 | COMPLETED: 2/28/26 |
| ISOLATION CASING: FROM NA TO | GROUT: Portland Cement FROM TO | DEPTH TO WATER: INITIAL N/A FINAL N/A | LOGGED BY: J. Hernandez |
| BLANK CASING: FROM NA TO | SEAL: FROM NA TO NA | | WEATHER: Clear |
| PERFORATED CASING: FROM NA TO | SIZE & TYPE OF FILTER PACK: FROM NA TO NA | | WELL COMPLETION TYPE / DESCRIPTION: Soil Boring |

Notes:

(HA: hand augered) (nL: split spoon sampler w/ no liners) (**x"ssL**: x-inch diameter stainless steel liners)
(**x"bL**: x- inch diameter brass liners) (**che**: chemical analysis) (**enc**: encore sample) (**phy**: physical-properties analysis)

# APPENDIX M

## Laboratory Reports

eurofins | Environment Testing

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Kian Lew
EKI Environment & Water Inc
17880 Fitch
Irvine, California 92614

Generated 3/18/2026 7:49:55 PM

## JOB DESCRIPTION

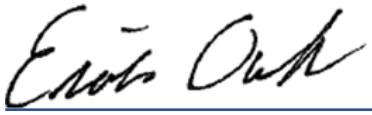
Borrmann Steel Company

## JOB NUMBER

570-269712-1

Eurofins Calscience
2841 Dow Avenue
Suite 100
Tustin CA 92780

See page two for job notes and contact information.



# Eurofins Calscience

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Calscience Project Manager.

## Authorization

Generated
3/18/2026 7:49:55 PM

Authorized for release by
Erick Ovalle, Project Manager
Erick.Ovalle@et.eurofinsus.com
(657)210-6331

## Qualifiers

### GC/MS VOA

| Qualifier | Qualifier Description |
|---|---|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### GC/MS Semi VOA

| Qualifier | Qualifier Description |
|---|---|
| *+ | LCS and/or LCSD is outside acceptance limits, high biased. |
| *1 | LCS/LCSD RPD exceeds control limits. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| me | LCS Recovery is within Marginal Exdeedance (ME) control limit range (± 4 SD from the mean). |

### GC Semi VOA

| Qualifier | Qualifier Description |
|---|---|
| *+ | LCS and/or LCSD is outside acceptance limits, high biased. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### LCMS

| Qualifier | Qualifier Description |
|---|---|
| *3 | ISTD response or retention time outside acceptable limits. |

### Metals

| Qualifier | Qualifier Description |
|---|---|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

## Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|---|---|
| ☼ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |

## Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|---|---|
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

**Job Narrative**
**570-269712-1**

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

**Receipt**
The samples were received on 3/2/2026 11:45 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 1.8°C and 2.1°C.

**GC/MS VOA**
Method 8260B: The method blank for analytical batch 570-705634 contained Methylene Chloride above the method detection limit. This target analyte concentration was less than the reporting limit (RL) in the method blank; therefore, re-extraction and/or re-analysis of samples was not performed.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-705634. The laboratory control sample (LCS) was performed in duplicate (LCSD) to provide precision data for this batch.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**GC/MS Semi VOA**
Method 8270C: The continuing calibration verification (CCV) associated with batch 570-704919 recovered above the upper control limit for 2,4-Dinitrophenol, 2-Nitrophenol and Benzoic acid. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are:EKI-SB-10-0.5 (570-269712-1), EKI-SB-10-2.0 (570-269712-2), EKI-SB-10-5.0 (570-269712-3), EKI-SB-1-5.5 (570-269712-4), EKI-SB-2-3.0 (570-269712-5), EKI-SB-3-5.5 (570-269712-6), EKI-DB-2-7.0 (570-269712-10), EKI-DB-2-15.0 (570-269712-11), EKI-UST-1-8.0 (570-269712-12), EKI-SB-1-7.0 (570-269712-14), EKI-SB-1-15.0 (570-269712-15), EKI-SB-7-2.5 (570-269712-17) and (CCVIS 570-704919/2).

Method 8270C: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 570-704242 and analytical batch 570-704919 recovered outside control limits for the following analytes: 2-Nitrophenol and Benzoic acid. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270C: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 570-704242 and analytical batch 570-704919 recovered outside control limits for the following analytes: Pyridine.

Method 8270C: The matrix spike/matrix spike duplicate (MS/MSD) for preparation batch 570-704242 and analytical batch 570-704919 exceeded control limits for the following analyte(s): Benzidine and Benzoic acid, Note that this analyte is a known poor performer when analyzed using this method.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Gasoline Range Organics**
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Diesel Range Organics**
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Pesticides**

## Job ID: 570-269712-1 (Continued)

Method 8141B: The continuing calibration verification (CCV) associated with batch 570-710088 recovered above the upper control limit for Azinphos-methyl, Demeton-o/s, Dichlorvos, Ethoprop and Mevinphos. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are:EKI-SB-4-5.5 (570-269712-7), EKI-SB-5-6.0 (570-269712-8), EKI-SB-6-4.5 (570-269712-9), EKI-DB-2-7.0 (570-269712-10), EKI-DB-2-15.0 (570-269712-11), EKI-SB-1-7.0 (570-269712-14) and EKI-SB-1-15.0 (570-269712-15).

Method 8141B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-704317 and analytical batch 570-710088 were outside control limits.

Method 8141B: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 570-704317 and analytical batch 570-710088 recovered outside control limits for the following analytes: Dichlorvos and Mevinphos. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8141B: The continuing calibration verification (CCV) associated with 570-710088 recovered high and outside the control limits on one column. Results are confirmed on both columns and reported from the passing column. The associated samples are: (CCV 570-710088/17), (CCV 570-710088/18), (CCV 570-710088/27), (CCV 570-710088/28), (CCV 570-710088/36), (CCV 570-710088/37), (CCV 570-710088/45) and (CCV 570-710088/46).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Herbicides**
Method 8321B: Internal standard responses were outside of acceptance limits for the following sample: EKI-DB-2-7.0 (570-269712-10). The sample(s) shows evidence of matrix interference.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Metals**
Method 6020B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-704833 and analytical batch 570-706069 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**General Chemistry**
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

DCPAA = 2,4-Dichlorophenylacetic acid (Surr)

Client: EKI Environment & Water Inc
Project/Site: Borrmann Steel Company

Job ID: 570-269712-1

## Method: 8260B - Volatile Organic Compounds (GC/MS)

**Lab Sample ID: MB 570-705634/5**
**Matrix: Solid**
**Analysis Batch: 705634**

**Client Sample ID: Method Blank**
**Prep Type: Total/NA**

# Accreditation/Certification Summary

Client: EKI Environment & Water Inc
Project/Site: Borrmann Steel Company

Job ID: 570-269712-1

## Laboratory: Eurofins Calscience

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|---|---|---|---|
| California | State | 3082 | 07-31-26 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte |
|---|---|---|---|
| 2540G | | Solid | Percent Moisture |
| 8081B | 3546 | Solid | alpha-Chlordane |
| 8081B | 3546 | Solid | gamma-Chlordane |
| 8141B | 3546 | Solid | Bolstar |
| 8141B | 3546 | Solid | Coumaphos |
| 8141B | 3546 | Solid | Demeton-o/s |
| 8141B | 3546 | Solid | Ethoprop |
| 8141B | 3546 | Solid | Fensulfothion |
| 8141B | 3546 | Solid | Fenthion |
| 8141B | 3546 | Solid | Merphos |
| 8141B | 3546 | Solid | Mevinphos |
| 8141B | 3546 | Solid | Naled |
| 8141B | 3546 | Solid | Tokuthion |
| 8141B | 3546 | Solid | Trichloronate |
| 8260B | 5035 | Solid | 1,1,2-Trichloro-1,2,2-trifluoroethane |
| 8260B | 5035 | Solid | 1,1-Dichloropropene |
| 8260B | 5035 | Solid | 1,2,3-Trichlorobenzene |
| 8260B | 5035 | Solid | 1,2,4-Trimethylbenzene |
| 8260B | 5035 | Solid | 1,3,5-Trimethylbenzene |
| 8260B | 5035 | Solid | 1,3-Dichloropropane |
| 8260B | 5035 | Solid | 2,2-Dichloropropane |
| 8260B | 5035 | Solid | 2-Butanone (MEK) |
| 8260B | 5035 | Solid | 2-Chlorotoluene |
| 8260B | 5035 | Solid | 2-Hexanone |
| 8260B | 5035 | Solid | Acetone |
| 8260B | 5035 | Solid | Ethanol |
| 8260B | 5035 | Solid | Isopropylbenzene |
| 8260B | 5035 | Solid | p-Isopropyltoluene |
| 8260B | 5035 | Solid | Vinyl acetate |
| 8270C | 3546 | Solid | 1,2,4-Trichlorobenzene |
| 8270C | 3546 | Solid | 1-Methylnaphthalene |
| 8270C | 3546 | Solid | 2,4,5-Trichlorophenol |
| 8270C | 3546 | Solid | 2,4,6-Trichlorophenol |
| 8270C | 3546 | Solid | 2-Methylphenol |
| 8270C | 3546 | Solid | 3/4-Methylphenol |
| 8270C | 3546 | Solid | 4,6-Dinitro-2-methylphenol |
| 8270C | 3546 | Solid | Azobenzene |
| 8270C | 3546 | Solid | bis(2 chloro-1-methylethyl) ether |
| 8270C | 3546 | Solid | Hexachloro-1,3-butadiene |
| 8270C | 3546 | Solid | Hexachlorobenzene |
| 8270C | 3546 | Solid | Hexachlorocyclopentadiene |
| 8270C | 3546 | Solid | Hexachloroethane |
| 8270C | 3546 | Solid | Phenol |
| 8270C | 3546 | Solid | Pyrene |
| 8270C | 3546 | Solid | Pyridine |

## JOB DESCRIPTION

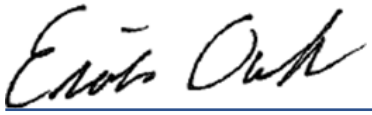
Borrmann Steel Company

## JOB NUMBER

570-269739-1

Eurofins Calscience
2841 Dow Avenue
Suite 100
Tustin CA 92780

See page two for job notes and contact information.



# Eurofins Calscience

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Calscience Project Manager.

## Authorization

Generated
3/12/2026 4:34:36 PM

Authorized for release by
Erick Ovalle, Project Manager
Erick.Ovalle@et.eurofinsus.com
(657)210-6331

## Qualifiers

### GC/MS VOA

| Qualifier | Qualifier Description |
|---|---|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### GC Semi VOA

| Qualifier | Qualifier Description |
|---|---|
| B | Compound was found in the blank and sample. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### Metals

| Qualifier | Qualifier Description |
|---|---|
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

## Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|---|---|
| ☼ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

# Case Narrative

Client: EKI Environment & Water Inc
Project: Borrmann Steel Company

Job ID: 570-269739-1

## Job ID: 570-269739-1 — Eurofins Calscience

**Job Narrative**
**570-269739-1**

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

**Receipt**
The sample was received on 3/2/2026 11:45 AM. Unless otherwise noted below, the sample arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.8°C.

**GC/MS VOA**
Method 8260B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for the following sample associated with preparation batch 570-704441 and analytical batch 570-704464 were outside control limits: (570-269739-D-1-B MS) and (570-269739-D-1-C MSD). The associated laboratory control sample (LCS) recovery met acceptance criteria.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Gasoline Range Organics**
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Diesel Range Organics**
Method 8015C: The method blank for preparation batch 570-705060 and analytical batch 570-706159 contained ORO (C23-C40) above the method detection limit. This target analyte concentration was less than the reporting limit (RL) in the method blank; therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**PCBs**
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Metals**
Method 6020B: The serial dilution performed for the following sample associated with batch 570-706703 was outside control limits: (570-269739-B-1-F SD)

Method 6020B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-706167 and analytical batch 570-706703 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Detection Summary

Client: EKI Environment & Water Inc
Project/Site: Borrmann Steel Company

Job ID: 570-269739-1

## Client Sample ID: IDW-03012026

## Lab Sample ID: 570-269739-1

| Analyte | Result | Qualifier | RL | MDL | Unit | Dil Fac | D | Method | Prep Type |
|---|---|---|---|---|---|---|---|---|---|
| 1,2,4-Trimethylbenzene | 0.49 | J | 2.0 | 0.28 | ug/Kg | 1 | | 8260B | Total/NA |
| Acetone | 10 | J | 20 | 9.8 | ug/Kg | 1 | | 8260B | Total/NA |
