# STAFF REPORT

**COMMUNITY DEVELOPMENT**

**DATE:** June 2, 2026

**TO:** Justin Hess, City Manager

**FROM:** Patrick Prescott, Community Development Director
VIA: David Kriske, Assistant Community Development Director – Transportation
BY: Karla Aguilar, Administrative Analyst II

**SUBJECT:** Approval of a Parking Permit Agreement with the Boys and Girls Club of Burbank and Greater East Valley to Provide Two Months of Discounted Staff Parking at the Courthouse City Public Parking Structure

## RECOMMENDATION

1. Find the approval of a Parking Permit Agreement (Attachment 1) for non-exclusive use of certain spaces within the City-owned Courthouse Public Parking Structure exempt from review under the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines § 15301 because the approval involves operation of an existing facility involving no expansion of existing or former use.

2. Approve a Parking Permit Agreement (Attachment 1) with the Boys and Girls Club of Burbank and Greater East Valley (B&G Club) to provide a 40% discount on the cost of the City's regular monthly public parking permit fee to allow B&G Club employees to park at the City-owned Courthouse Public Parking Structure for a two-month summer period.

3. Authorize the Community Development Director, as the City Manager's designee, to execute the Parking Permit Agreement on behalf of the City.

## BACKGROUND

The B&G Club is a non-profit organization that operates and manages after-school services for Burbank youth at its facility in Downtown Burbank. The B&G Club offers

programs during the school year and expanded programming during June and July when school is not in session. The expanded summer program requires more staff to operate, meaning the B&G Club cannot accommodate vehicle parking on-site for the up to 60 staff members needed.

Nearby public parking in Downtown Burbank is time-limited, but the City sells a $6.20 daily parking permit and a $69.00 monthly parking permit that allows parkers to exceed the time limits in off-street parking lots and structures. The monthly parking permit price will be $74 as of July 1, 2026[1]. The B&G Club is located adjacent to the City-owned Courthouse Public Parking Structure (located at 301 E. Angeleno Avenue), which can accommodate the B&G Club's 60 staff vehicles. During the school year, the B&G Club purchases monthly parking passes for their staff but has indicated to the City that the expense to provide parking for their summer staff is cost prohibitive. The B&G Club has requested a 40% discount from the normal monthly permit cost to provide parking for the 60 staff members working during the two-month summer period. They are requesting this discount based on their status as a non-profit organization that provides critical programs to Burbank families. The City Council has previously approved this summer discount for the B&G Club in 2023, 2024, and 2025.

## DISCUSSION

The City's fee schedule currently does not provide for a method whereby staff can discount the parking fees to non-profit organizations. Any changes to the approved fees would need to be approved by Council. If Council wishes to offer a discounted parking fee to the B&G Club, staff recommends Council approve the attached Parking Permit Agreement to implement a specific, lower fee for B&G Club to park staff vehicles at the Courthouse Public Parking Structure.

The proposed Parking Permit Agreement would allow the B&G Club to obtain up to 60 parking permits at a discounted rate to allow permit users non-exclusive use of parking spaces within the Courthouse Public Parking Structure during the two-month period of B&G Club's expanded summer program. The 40% discount rate would lower the $69.00 monthly fee in June to $41.40 and the future $74.00 monthly fee in July down to $44.40. The total amount due for two months of parking for the 60 staff members would be lowered from $8,580 (the regular price for non-exclusive space use) to $5,148 (discounted price). If the agreement is approved, City staff will issue Parking Permits electronically to be identified by the vehicle's license plate number ("Permit-By-Plate" or "LPN"). The vehicles will be subject to all parking rules that apply to other members of the public who wish to park at the structure.

Staff recommends that the Parking Permit Agreement be utilized as a method to offer a

[1] Subject to approval by the City Council as part of the Fiscal Year 2026-27 budget.

discount, rather than creating a special parking rate for all non-profits. Staff is currently developing broader adjustments to parking pricing in Downtown Burbank for future Council consideration to align with the Citywide Parking Management Principles, which were adopted at the May 21, 2019, City Council meeting (Attachment 2). These principles guide the City in the further development of a parking management system. Of particular importance for Downtown Burbank is leveraging underused parking, regulating parking with pricing, and tailoring implementation to unique conditions within specific neighborhoods. Future adjustments may include utilizing the City's new Permit-by-Plate enforcement system to establish parking rates for individual parking garages based on factors such as demand, location and convenience to Downtown. This approach could result in a lower cost to some parking users. As broader adjustments are still being developed, the proposed Parking Permit Agreement would offer a discount for the upcoming summer period only.

## ENVIRONMENTAL REVIEW

Approving the Parking Permit Agreement is categorically exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines § 15301 (Class 1 Existing Facilities) because this action involves operation of an existing public facility involving no expansion of existing or former use.

## FISCAL IMPACT

The full cost of 60 monthly parking permits for the months of June and July 2026 would total $8,580 while the discounted cost of 60 monthly parking permits for the months of June and July 2026 would total $5,148. The fiscal impact of offering a discounted parking rate to the B&G Club is the difference between the full and discounted prices, or $3,432. This cost difference would impact the City's Parking Authority Fund 310 that pays for the operation and maintenance of the City's Downtown parking lots and structures and receives revenue from parking permit sales.

## CONCLUSION

The B&G Club is a non-profit entity that offers important youth services to Burbank residents. It is reasonable to consider offering a reduced rate for monthly parking permits to allow its summer staff the ability to park in the Courthouse Public Parking Structure given the benefit to the community. Therefore, staff recommends Council approve the proposed Parking Permit Agreement to allow the B&G Club staff to park in this structure for a reduced cost for two months.

## ATTACHMENTS

Attachment 1 – Proposed Parking Permit Agreement
Attachment 2 – Citywide Parking Management Principles

# PARKING PERMIT AGREEMENT

THIS PARKING PERMIT AGREEMENT ("Agreement") by and between the City of Burbank, California ("City"), a public entity, and The Boys & Girls Club of Burbank and the Greater East Valley, Inc., a California nonprofit corporation ("BGC"), is entered into on the ___ day of June, 2026, on the following terms and conditions. The parties are individually referred to herein as a "Party," and collectively as the "Parties."

## RECITALS

A. BGC manages and operates a non-profit organization that provides after-school services for Burbank youth.

B. BGC provides after-school services at its main office at 300 E. Angeleno Avenue in Burbank. During the summer months when school is not in session, BGC provides expanded, all-day youth programs that require additional staffing. BGC's property has insufficient on-site parking to accommodate the personal vehicles of the expanded staff.

C. Nearby public parking in Downtown Burbank is time limited, but the City sells daily and monthly non-exclusive parking passes to exceed the time limits. The City also leases parking spaces for exclusive use at an increased cost. BGC purchases monthly non-exclusive parking permits for school-year programs, but is unable to afford parking permits for the expanded staff needed to support summer programs.

D. Because the BGC provides needed youth programming and services to the Burbank community, and BGC has limited funding to provide these services, it is in the interest of the City to support BGC's mission to provide youth services by offering monthly non-exclusive parking permits to BGC for its expanded staff at a reduced cost for the limited summer duration to support BGC's continuation of its summer youth programs which benefit the Burbank community.

E. The City owns a public parking structure located immediately across the street from BGC's property at 301 E. Angeleno Avenue in Burbank ("Parking Structure"), which is maintained and operated in cooperation with the Parking Authority of the City of Burbank ("Authority"). The Parking Structure provides public parking to visitors of Downtown Burbank as well as employees of adjacent businesses. The Parking Structure is utilized less than other parking areas in Downtown Burbank and has sufficient parking to accommodate BGC's staff.

F. The Parties now desire to enter into this Agreement to establish the terms under which BGC may temporarily utilize the Parking Structure for its

expanded summer staff by obtaining non-exclusive parking permits at a discounted cost.

AGREEMENT

1. Allocation of Parking Permits. Subject to the conditions and limitations set forth in this Agreement, City hereby agrees to provide BGC up to 60 digital parking permits ("Parking Permits") for non-exclusive use of spaces in the Parking Structure. Parking Permits are issued electronically and are identified by the vehicle's license plate number ("Permit-By-Plate" or "LPN"); there is no physical permit.

BGC will assign the Parking Permits to its summer employees, and such employees may park in the Parking Structure all day in spaces located on Levels 3 through 5, where signs indicate "Except by Permit." BGC employees must obtain the Parking Permits through the City's online parking permit portal.

Parking shall not be allowed in spaces identified for jury parking, court parking, or reserved for another business. BGC and all users of such Parking Permits shall comply with all applicable rules, regulations, laws, or other conditions governing use by the public and by permit holders in the Parking Structure.

2. Term. The Term of this Agreement shall commence on June, 5, 2026 ("Commencement Date") and end on July 31, 2026 ("Termination Date"). The Parking Permits shall be valid for the entirety of the Term, and shall automatically terminate on the expiration or earlier termination of this Agreement.

3. Fee. The total fee payable to the City by BGC for issuance of the Parking Permits hereunder shall not exceed $5,148.00 ("Permit Fee"). The total Permit Fee shall be paid in advance to the City, without deduction or offset except as otherwise provided herein in lawful money of the United States of America at the City of Burbank Community Development Department office, P.O. Box 6459, Burbank, California 91510-6459, or to such other person or at such other place as the City's Community Development Director may from time to time designate in writing. The Permit Fee represents the monthly rate for 60 business parking permits for a two-month period, with a 40 percent discount from the normal market rate established in the Burbank Fee Schedule. The discounted rate is offered for the reasons specified in the Recitals. If BGC purchases daily or monthly business parking permits for any of its 60 summer employees prior to the Commencement Date for the period between May 27, 2026 and the Commencement Date, the cost of those permits shall be deducted from the Permit Fee. BGC shall not be required to purchase all 60 permits for both June and July should all of their employees not need the full 60 permit allotment allowed by this Agreement.

4. Restrictions as to Use of Spaces. BGC's use of permit parking spaces in the Parking Structure is limited by the conditions set forth in this Section 4.

4.1 Cooperation. BGC agrees not to overburden, cause any

improvements to or damage the Parking Structure and agrees to fully cooperate with the City in the use of the Parking Structure. BGC's failure to comply with the provisions of this section, or BGC's failure to enforce the provisions of this Agreement as to its employees shall be a material default under this Agreement.

4.2 Users of Parking Structure. Unless otherwise permitted by this Agreement, only employees or full time contracted staff of BGC may use the Parking Permits allocated pursuant to the terms of this Agreement. The Parking Permits are non-transferable, and BGC remains responsible to enforce any requirements of this Agreement as to its employees or contractors who may use the Parking Permits, including the Terms and Conditions listed on Attachment A of this Agreement.

4.3 Removal of Inoperable Vehicles. Any vehicle owned or operated by BGC or its staff which has become disabled for any reason shall be promptly removed from the Parking Structure and taken to an appropriate service or storage facility. Disabled vehicles shall not be parked or stored in the Parking Structure.

5. Assignment. The quality and identity of BGC and its work in furtherance of supporting local summer youth programs are of particular interest and concern to the City. It is because of that quality and identity that the City has entered into this Agreement with BGC. Therefore, unless otherwise permitted by this Agreement, BGC shall not assign or transfer its rights under this Agreement to any other entity without express written authorization from the City Council.

6. Allocation Not a Lease. The parties agree this Agreement merely grants BGC the right to use permit parking spaces in the Parking Structure, and does not grant BGC, or its assignees or employees, a leasehold interest in any of the Parking Structure.

7. Non-Liability of City. The City shall not be obligated to provide any security for the Parking Structure. The City and the Authority shall not be liable for any loss, damage or injury of any kind whatsoever, or any claim thereof, to the property of BGC, its successors, assignees, agents, representatives, officers, employees, or arising from or due to any act or omission of BGC or any of its employees using the Parking Structure. BGC, as a material part of the consideration for this Agreement, hereby waives all claims and demands against the City and the Authority, and hereby covenants and agrees to indemnify and save the City and the Authority free and harmless from liability for all claims and demands by its assignees, employees, agents for any and all such losses, damages and injuries, together with all costs and expenses arising therefrom and in connection therewith, except when such losses, damages, and injuries are due to the City's or Authority's negligence or intentional misconduct. BGC expressly waives the benefits of Civil Code §1542, which provides as follows:

> "A general release does not extend to claims which the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her

settlement with the debtor or released party."

8. Indemnification. BGC agrees to defend, indemnify and hold the City and the Authority, and their elected and appointed officials, agents and employees, free and harmless from every claim, demand, damage or action, and any cost or expense in connection therewith, that may arise in any manner out of the use of Parking Structure by BGC and its authorized users, excluding any third party claims, demands, damages or actions except those arising solely out of the intentional misconduct or gross negligence of City or the Authority or its officers, agents and or employees.

9. Default; Right to Cure. Failure or delay by either Party to perform any term or provision of this Agreement constitutes a default under this Agreement. The Party who so fails or delays must immediately commence to cure, correct or remedy such failure or delay and shall complete such cure, correction or remedy with reasonable diligence and during any period of curing shall not be in default.

The non-defaulting party shall give written notice of default to the party in default specifying the default complained of by the non-defaulting party. Unless specifically stated otherwise, the non-defaulting party may not institute proceedings against the party in default until thirty (30) days after giving such notice. Failure or delay in giving such notice shall not constitute a waiver of any default nor shall it change the time of default.

Except as otherwise expressly provided in this Agreement, any failure or delay by either party in asserting any of its rights or remedies as to any default shall not operate as a waiver of any default or of any such rights or remedies or deprive such party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert or enforce any such rights or remedies.

10. Termination and Expiration. Either Party may terminate this Agreement by giving notice to the other Party at least thirty (30) days prior to the date when such termination shall become effective. The City may immediately terminate this Agreement upon a material breach of BGC. In the event any individual user of a Parking Permit creates a public nuisance or otherwise violates the terms of this Agreement, or otherwise poses a danger or threat to the public, City shall notify BGC which shall have twenty-four hours to cure the violation or nuisance. Should the problem fail to be cured within that period, BGC shall terminate that individual's right to use the Parking Structure.

10.1 Effect of Termination on Permit Parking. In the event that this Agreement is terminated, the Parking Permits under the terms hereof shall become invalid and no longer be of any effect. To the fullest extent practicable, BGC shall retrieve all Parking Permits issued pursuant to this Agreement and return them immediately to the City. BGC shall work with the City to make a proper accounting of all Parking Permits issued pursuant to this Agreement.

10.2 Removal of Personal Property. Upon the expiration of the Term of this Agreement, or upon earlier termination, BGC shall remove all personal property, if any, located in the Parking Structure.

11. Subordination. Unless stated otherwise, this Agreement is and shall always be automatically subordinate to any Mortgage or deed of trust which is now or shall at any time be placed upon the Parking Structure, and to any present lease. The Parties agree this Agreement is not an agreement affecting real property and grants no real property interest in the Parking Structure to BGC. BGC agrees to execute and deliver, without cost to City any instrument requested by City or any title company to evidence the subordination of this Agreement to any such mortgage or deed of trust.

12. Miscellaneous.

12.1. Severability. It is agreed that if any provision of this Agreement shall be determined to be void by any court of competent jurisdiction, then such determination shall not affect any other provision of this Agreement and any and all other such provisions shall remain in full force and effect and it is the intention of the parties hereto that all provisions of this Agreement shall be construed in favor of their validity.

12.2 Captions. Paragraph captions or titles of this Agreement are for convenience only and in no way limit or amplify the terms, covenants and conditions of this Agreement and shall have no effect upon the construction or interpretation of any part hereof.

12.3. Notices. All notices herein provided to be given, or which may be given, be either party to the other, shall be deemed to have been fully given when made in writing and deposited in the United States mail certified and postage prepaid, and addressed as follows:

## Attachment A: Terms and Conditions

1. Monthly Public Parking Permits are valid for designated permit parking spaces on Levels 3 through 5 of the Courthouse Parking Structure (301 E. Angeleno Ave., Burbank, CA 91502), where the parking sign indicates “Except by Permit.” Permits are valid Monday-Friday, from 8:00 AM to 6:00 PM and may not be used for overnight parking or long-term storage of vehicles. All City parking lots and structures are closed from 3:00AM to 5:00AM.

2. Parking is on a first-come, first-serve basis and does not guarantee the Permit Holder a parking space.

3. Permits are valid only for the calendar month for which payment has been made. The permit is effective until the last day of the paid month.

4. The Permit allows the Permit Holder to park one vehicle (identified by license plate number). The Permit Holder is responsible for ensuring that their vehicle information is up-to-date in the online system to avoid citations. The vehicle’s license plate must be clearly visible to the License Plate Recognition (LPR) cameras used by City Parking Enforcement Officers. Failure to make the license plate visible may result in a parking citation.

5. Permits cannot be sold, rented, leased, or assigned to any other party or vehicle, except for the Permit Holder’s own vehicles. It is the Permit Holder’s responsibility to ensure their vehicle information is correct in the online system.

6. Commercial vehicles, large non-commercial vehicles, and non-motorized vehicles are not permitted to park in any public parking facility. Permits may not be assigned to these types of vehicles.

7. The City is not responsible for any damage, theft, or loss of vehicles or property left inside the vehicle while parked in City parking lots or structures.

8. All applicable parking restrictions, including but not limited to BMC Title 6, Chapter 1, Article 16, and the California Vehicle Code (CVC), are enforceable and must be obeyed. Failure to comply may result in a parking citation and/or revocation of permit privileges.

9. All sales are final; no refunds. If a chargeback is submitted, the customer's vehicle license plate may be added to an ineligibility list, preventing future permit purchases. If management allows future purchases, they must be made in-person with cash only, and online purchasing privileges will be revoked.

10. The applicant agrees to comply with any and all requirements related to monthly public parking permits as set forth by the City, including any changes approved subsequent to the issuance of the permit.

11. Permits may be revoked if applicant fails to comply with the terms and conditions of the permit.

## Burbank Citywide Parking Management Objectives

1. **Protect Single Family Parking**
   The City Council has identified protecting single family neighborhoods as a top priority in the City's policymaking, and protecting single family parking supports that priority. Residential street parking should be reserved for residents on those streets and their visitors, particularly if these parking spaces will be needed to support new housing in single family neighborhoods from new Accessory Dwelling Units, which are not required to provide parking if located near transit. Protecting single family parking also requires more efficient enforcement to ensure the parking is protected, and also requires streamlined permitting to make permit administration more convenient. Protecting single family parking also indirectly supports the economic viability of adjacent commercial businesses by removing the inherent competition between residential and commercial parkers in these areas. To that end, limited residential parking could be assigned responsibly to employees of nearby businesses and still provide overall protection.

2. **Increase Parking Availability**
   In places where parking demand is high, increasing its availability is required. This does not necessarily require the construction of expensive new parking, but should instead involve improving regulation of existing parking to ensure efficient turnover, spread the demand for parking away from core areas, simplify enforcement to improve effectiveness, and improve information to drivers on where parking is available. Improving availability through regulation and better information will also reduce the congestion caused by drivers hunting for parking, particularly in high-demand areas like San Fernando Boulevard in Downtown Burbank

3. **Leverage Underused Private Parking**
   Burbank's zoning regulations require each commercial and residential property provide its own supply of parking, based on requirements that allow generous extra parking to account for peak parking periods. As a result, many private parking lots are underutilized during off-peak times or because particular business operations require less parking than basic code requirements dictate. Loosening private parking regulations to allow businesses to share parking and to allow businesses to offer surplus parking as general public parking could free up substantial new parking supplies in areas where on-street public parking is at capacity.

4. **Regulate Street Parking and Public Parking Lots with Pricing**
   In places where street parking is over-utilized, it is critical that the most convenient parking be used efficiently. This means that users should use the parking only as long as they need, and parking usage should turn over often to increase utilization of each parking spot. In these cases, street parking should be regulated with pricing. Parking that's priced ensures that turnover occurs in these high-demand areas and simplifies enforcement to help with compliance. For price to be used effectively, however, it should be set in a manner that achieves a measurable

performance goal for the parking system. That is, the price should be set in a way that ensures turnover to maintain no higher than 80 to 90 percent occupancy at all times. This translates to maintaining one or two open parking spaces per city block at all times. The price should be set just high enough to achieve this performance goal (and no more), and should be adjusted periodically to achieve and maintain this availability. Because many neighborhoods have sufficient parking, in many neighborhoods often the price needed to meet this goal will still be free. The purpose of setting parking pricing in this way is not to generate revenue, but to regulate parking. A beneficial side-effect of regulating parking with price is that some drivers may shift their trips from cars altogether and may walk, bike or take public transit as a way to avoid paying for parking. Finally, setting a price on public parking in high-demand areas will incentivize nearby private parking owners with underutilized parking to offer that parking up for public use because they can charge for it without facing competition from adjacent free public parking.

5. **Reinvest Parking Revenue**
   While parking management programs that use pricing should not be guided by the goal of revenue generation, the revenue that is received can fund other public services. Any revenue from parking management should be directed back into the parking system. This means that parking revenue should be reinvested to fund additional parking enforcement or to maintain City parking assets like parking lots and structures. Some cities also invest some portion of parking revenues back into the neighborhoods that are subject to the parking pricing. The City Council could consider dedicating a portion of parking revenue towards improving local neighborhoods subject to parking pricing.

6. **Tailor Implementation to Neighborhoods**
   Parking management may be implemented differently across neighborhoods because different parts of the City have different parking issues. Parking management will need to be tailored to individual neighborhoods, including Downtown, residentially adjacent strip commercial like Magnolia Park, multifamily neighborhoods, certain industrial areas, and special land uses like transit centers. Parking management should be implemented at a neighborhood or district level to avoid piecemeal implementation while also recognizing that different neighborhoods have different parking needs.

# STAFF REPORT

## COMMUNITY DEVELOPMENT

**DATE:** June 2, 2026

**TO:** Justin Hess, City Manager

**FROM:** Patrick Prescott, Community Development Department Director
VIA: Simone McFarland, Assistant Community Development Director

**SUBJECT:** Approval of Purchase and Sale Agreement Between Robert L. Persson, Robert G. Wedeen, Tasha Sounart, Kelsey Hendrix, Hunter Persson, Prestin Wittbrodt, and Robert G. Wedeen Trust, and the City of Burbank, For the Property Commonly Known As 110 W. Olive Street, Located in the City of Burbank, County of Los Angeles, State of California, APN Nos. 2451-007-019, 2451-007-20 And 2451-007-026 and Amend the Fiscal Year 2025-2026 Budget by $13,500,000

## RECOMMENDATION

1. Find that the proposed acquisition of the subject property is being undertaken without plans for any specific use or development of the property at this time, and therefore the mere change in title ownership does not have the possibility of causing any potentially significant impact on the environment and therefore is exempt from environment review under the California Environmental Quality Act pursuant to Pub. Res. Code § 21065, CEQA Guidelines §§ 15060(c)(2)-(3), 15061(b)(3), 15378). As such, no additional environmental analysis is required at this time;
2. Find that the proposed acquisition of the subject property is consistent with the City's adopted General Plan;
3. Approve, as to form, the Purchase and Sale Agreement and Escrow Instructions (Agreement) and authorize the City Manager to close escrow to finalize the purchase of the Property;
4. Authorize the City Manager or his designee to execute the final Purchase and Sales Agreement Between Robert L. Persson, Robert G. Wedeen, Tasha Sounart, Kelsey Hendrix, Hunter Persson, Prestin Wittbrodt, and Robert G. Wedeen Trust and the City of Burbank, for the property commonly known as 110 W. Olive Street, located in the

City of Burbank, County of Los Angeles, State of California, APN Nos. 2451-007-019, 2451-007-20 and 2451-007-026 in the amount of $14,000,000;
5. Amend the Fiscal Year (FY) 2025-26 Budget to appropriate $13,500,000, the remainder of the sales price ($14,000,000 minus $500,000 deposit); and
6. Authorize City staff to collect rent on the existing lease and appropriate the funds.

## BACKGROUND

The City actively looks for property available for purchase to maintain and expand our city services and prepare for future needs. Purchasing property when offered for sale, instead of obtaining it through eminent domain, saves the City time, money, and political capital.

Recently, staff was made aware that the building that currently houses Borrmann Metal Center, commonly known as Bormann Steels, located at 110 W. Olive (Property), was for sale. Buying the Property provides an opportunity for the expansion of city services across multiple departments. As such, City staff, at Council's direction, entered into negotiations to purchase the Property. Staff successfully negotiated a $14,000,000 sales price, which was slightly lower than the appraised price of $14,265,000. The parties agreed to preliminary terms for the purchase, opened escrow, and the City completed due diligence on the Property. Should Council approve this item, the City will be able to close escrow on the Property by the end of the June 2026.

The Property, built in 1947, abuts the City's Public Works Yard property and is across from the Burbank Water & Power (BWP) Power Plant. The site contains a 124,000 square foot metal building, offices and a parking lot, totaling 2.85 acres. Zoning is Burbank Center Commercial Manufacturing (BCCM). There is a current lease on the property with Borrmann Steels that expires January 31, 2029.

## DISCUSSION

Purchasing the Property offers several opportunities for use by multiple City departments, which include the following:

1) Community Development has a significant need to identify a location to store and maintain its fixed-route transit buses. Currently, the City must rely on its contracted transit operator to provide a facility and the City's current operator leases a facility in Glendale. Securing a City-owned storage and maintenance location would enable the City to lower transit operations costs. It would also allow the City to install battery electric transit vehicle charging infrastructure as California Air Resources Board (CARB) will require 25% of bus purchases to be zero-emission starting in 2026, and 100% zero-emission in 2029.

2) Public Works proposes relocating the City's Recycle Center administrative and reuse operations to this facility. The relocation would enable the current private

operator processing materials on the City's behalf to upgrade equipment and utilize the expanded space to increase recycling diversion rates. Additionally, moving City staff to the new space would accommodate the City's recently expanded staff and provide room for a proposed "Reuse" center at the new site. This center would offer gently used bulky items—such as furniture and donated goods—for sale at affordable prices, helping the City meet its mandatory waste diversion requirements and diverting those items from the landfill.

3) The Fire Department has a need for approximately 9,000 square feet for apparatus storage to park reserve fire engines and ambulances.

The existing lease extends through January 31, 2029, providing adequate time for staff to evaluate and plan for the Property's future use in consideration of the City's operations needs described above. During this interim period, the existing lease is expected to generate approximately $1,171,224 in rental revenue, which would be placed into the General Fund.

During due diligence, staff completed a land survey of the Property, Phase I and Phase II environmental studies, a building assessment and an asbestos and lead paint study (Attachments 3 – 6). All of these studies meet departmental standards and indicate there are no conditions that require immediate remedial activity. There are, however, improvements recommended to ensure the building remains in good condition.

The Phase I/II conducted by the City Consultant EKI identified environmental conditions typical of properties with prior industrial use. Based on the assessment, conditions within the office area were found to be below applicable screening levels, indicating low potential concern under current site conditions.

The assessment also concluded that existing building features and operational conditions within the warehouse area currently limit potential exposure concerns. EKI recommended that additional indoor air sampling only be considered if future site use changes or significant building modifications occur.

Gale Jordan Associates, Inc. provided the asbestos and lead paint studies. The studies identified limited materials containing asbestos and lead based paint commonly associated with older structure. These materials would be managed and removed in accordance with applicable regulatory requirements during any future renovation or demolition activities. The assessment concluded that with standard regulatory controls and removal procedures, no significant exposure concerns are anticipated during such work.

The building structural assessment was conducted by Biggs Cardosa Associates, Inc. The building was built in 1947 and is an open steel structure with a small two-story office building. Roof repairs costing $905,284 were completed in 2025.

Biggs Cardosa made a number of recommended improvements based on time periods with estimated costs:

- Priority 1 Immediate (items that should be immediately addressed): $600,000
- Priority 2 Crucial (one to two years): $250,000
- Priority 3 Priority (three to five years): $1,900,000
- Priority 4 Long Term (five plus years): $1,650,000
- Priority 4 Long Term Seismic Retrofit (five plus years): $5,250,000

The remaining rent that would be owed under the current lease, $1,171,224, could be used to offset the above mentioned costs. Upon vacancy of the Property, the City would evaluate options to retrofit the existing facility, modify the Property to accommodate the proposed uses, or potentially construct a new building on the Property depending on operational needs and prevailing market conditions for labor and material. The retrofits would allow the City to create the battery electric transit vehicle charging infrastructure as required by the CARB. Additionally, adding a Reuse Center to the Property helps the City meet its mandatory waste diversion requirements and allows for the upgrading of equipment at the Recycle Center to ensure more efficient collection of recyclables from the waste stream.

Lastly, staff reviewed both the survey and the title reports and resolved all concerns.

**ENVIRONMENTAL REVIEW**

The Agreement and associated transfer of the Property will not, itself, result in any direct physical change or reasonably foreseeable indirect physical change to the environment, nor is there a possibility that this activity will have a significant effect on the environment.

The acquisition of the subject Property by the City does not approve any development project, nor does it change the physical environment as the building will continue to be immediately used by the City as a warehouse/storage facility. The approval of the Agreement and transfer of the Property, therefore, does not constitute the approval of a "project" under CEQA because the activity has no potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment. The activity is also exempt from CEQA under the commonsense exemption as it can be seen with certainty that the sale and continued use of the Property for warehousing and storage uses has no possibility of having a significant effect on the on the environment. (Pub. Res. Code § 21065, CEQA Guidelines §§ 15060(c)(2)-(3),

15061(b)(3), 15378.) Should a development project be proposed at the Property site in the future, such development project would have to undergo CEQA review.

Furthermore, the purchase of the Property is consistent with the final Environmental Impact Report (EIR) adopted for the City's 6th Cycle (2021-2029) Housing Element and no additional environmental documentation is required at this time. The City identified several mitigation measures/conditions of approval in the EIR, including "UTIL-3d Expansion and Upgrades to BWRP Treatment Facilities." Purchasing the Property is in furtherance of satisfying this mitigation measure/condition of approval. As previously noted above, any future expansion project on or in conjunction with the Property will be subject to any required additional environmental assessment prior to approval of such project.

**Surplus Land Act (SLA)**

SLA does not apply to this transaction as the City would be purchasing the land and using it for our own use. California Government Code Section 54221(c)(1) describes an "agency's use" to include "utility sites," "demonstration" projects and "wastewater treatment plants." While there is an existing lease that will be transferred with the purchase, the City does not anticipate entering any leases that for a term longer than 15 years, or leases that would allow for development or demolition. As noted above, the current leases do not extend past 2029 and contain limitations on uses and demolition, so under the SLA Guidelines these leases would not be considered "dispositions" that would require complying with SLA procedures (See SLA Guidelines, § 102(i).).

**FISCAL IMPACT**

The total acquisition cost for the property is $14,400,000, consisting of a $14,000,000 purchase price and $400,000 for inspection and due diligence costs.

The $14,000,000 purchase price will be distributed among the General Fund, the Public Improvements Fund (Transportation), and the Refuse Collection and Disposal Fund, proportionate to each fund's projected use of the property. To date, $900,000 has already been appropriated from the General Fund to cover the initial $500,000 deposit and the $400,000 inspection/closing costs. Staff is requesting Council authority to amend the Fiscal Year (FY) 2025-26 Budget by appropriating the remaining $13,500,000 balance of the purchase price as follows:

- $4,000,000 from revenue account number 001.ND000.30010.0000.00000.00000 (General Fund, Non-Departmental, Unassigned Fund Balance) to expenditure account number 001.ND01A.70000.0000.00000.00000 (General Fund, Land Purchase)

- $4,750,000 from revenue account number 127.ND000.30011.0000.00000.00000

(Public Improvements, Non-Departmental, Assigned Fund Balance) to expenditure account number 127.CD33A.70000.0000. 00000.00000 (Public Improvements – Transportation, Land Purchase)

- $4,750,000 from revenue account number 498.ND000.30011.0000.00000.00000 (Refuse Collection and Disposal, Non-Departmental, Assigned Fund Balance) to expenditure account number 498.PW31C.15001.0000.00000.00000 (Refuse Collection and Disposal Fund – Recycling, Land Clearing).

Assuming the current tenant fulfills the remainder of the lease, the City is estimated to receive up to $1,171,224 in rental revenue. These funds will be credited to the General Fund under Account 001.ND000.45025.1040.00000.00000 (110 W. Olive Rental).

## CONCLUSION

The proposed acquisition of the 110 W. Olive property represents a strategic and cost-effective investment that supports the City's long-term operational needs and service expansion goals. By securing the site through negotiation rather than eminent domain, the City avoids additional costs and delays while gaining a versatile facility that can serve multiple departments, including transit, public works, and fire services. Due diligence confirms the property is suitable for acquisition with manageable environmental considerations, and its current lease will provide interim revenue to offset expenses and allow for thoughtful future planning. Overall, the purchase aligns with the City's fiscal, operational, and environmental objectives, making it a prudent and forward-looking decision.

# AGREEMENT AND ESCROW INSTRUCTIONS FOR THE PURCHASE AND SALE OF REAL PROPERTY

This AGREEMENT AND ESCROW INSTRUCTIONS FOR THE PURCHASE AND SALE OF REAL PROPERTY (hereinafter "Agreement") is entered into as of ____,2026, (hereinafter “Effective Date”) by and between ROBERT PERSSON, Trustee of the Robert Persson Revocable Inter-Vivos Trust, as to an undivided 43.062300% interest, ROBERT G. WEDEEN, Trustee of the Robert G. Wedeen Trust, as to an undivided 18.015100% interest, TASHA SOUNART, a married woman, as her sole and separate property, as to an undivided 14.957525% interest, KELSEY HENDRIX, a married woman, as her sole and separate property, as to an undivided 14.957525% interest, HUNTER PERSSON, a married man, as his sole and separate property, as to an undivided 4.503775% interest and PRESTIN WITTBRODT, a married woman, as her sole and separate property, as to an undivided 4.503775% interest, ALL AS TENANTS IN COMMON, as to Parcels A and B and ROBERT PERSSON, Trustee of the Robert Persson Revocable Inter-Vivos Trust, as to an undivided 50% interest and to ROBERT G. WEDEEN, Trustee, the ROBERT G. WEDEEN TRUST, as to an undivided 50% interest, Tenants in Common, as to Parcel C (hereinafter "Seller") and the CITY OF BURBANK, a municipal corporation (hereinafter "Buyer"), constitutes both an agreement to purchase and sell real property and escrow instructions directed to Fidelity National Title, located at 555 S. Flower Street, Suite 4420 Los Angeles, CA 90071, Attn. Cornelius Morgan (213) 452-7151, ("Escrow Agent") in its capacity as escrow holder, and hereby establishes an escrow ("Escrow") to accommodate the transaction contemplated hereby. The Seller and Buyer are from time to time hereinafter referred to individually as a “party” and collectively as the “parties”. The Agreement is set forth as follows:

## RECITALS

A. Seller is the owner in fee simple of that certain real property consisting of approximately 2.848 acres (124,051 square feet of land area) situated in Los Angeles County, commonly known as 110 W. Olive Ave., Burbank, California, 91502 (“Real Property”), which is more particularly described by legal description in Exhibit “A” and by Plat Map shown in Exhibit “B” attached hereto, along with the improvements to real property, including, without limitation, a metal building consisting of approximately 77,138± square feet, various metal canopies; asphalt paving; concrete block iron, iron, chain link fencing/gating; and approximately nine truck parking spaces (the “Improvements”). The Real Property and the improvements shall collectively be referred to in this Agreement as the “Property.” Seller makes no representations or warranties concerning the square footage of the Property, and expressly requests the Buyer to ascertain and determine the actual square footage of the Property.

B. The Seller desires to sell the Property to Buyer, and Buyer desires to purchase the Property from Seller, all on the terms and conditions of this Agreement.

## AGREEMENT

NOW, THEREFORE, in consideration of the foregoing and of the benefits which will accrue to the parties hereto in carrying out the terms and conditions

of this Agreement, it is understood and agreed, by and between the parties hereto, as follows:

**1.** **Sale and Purchase**. Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, the Property, upon the terms and for the consideration set forth in this Agreement. Such purchase and sale of the Property includes:

(a) all rights, benefits, easements and appurtenances thereto;

(b) any improvements and fixtures located on the Property, and not owned by the tenant, including, without limitation, buildings and structures located on the Property, all apparatus, installed equipment and appliances owned by Seller and located on or in and used exclusively in connection with the operation or occupancy of the Property, and all on-site parking;

(c) to the extent assignable, any intangible personal property used in the ownership, use, operation or maintenance of the Property, including without limitation: permits, licenses, governmental approvals and other entitlements relating to the Property, plans, specifications and drawings, and other documents related to any right to occupy any of the Property.

**2.** **Purchase Price**. The total purchase price for the Property ("Purchase Price") is Fourteen Million Dollars and No Cents ($14,000,000.00). Purchase is payable to Seller subject to the terms and conditions set forth in this Agreement. The Purchase Price shall be deemed to include and represent the agreed upon fair market value of the Property under this transaction, and any and all other or further compensation for the Property and all interests therein, including, without limitation, bonus value of any leases or possessory rights in the Property, and severance damages, if any, lost rental income, leasehold interests, attorneys' fees, goodwill, interest, relocation benefits or assistance, as, and if legally eligible and other claims which Seller, or any person or entity claiming under or through Seller, could or might obtain, claim or recover in any legal proceedings, including, without limitation, a condemnation action.

**3**. **Commencement Date.** This Agreement will commence after it is fully executed by all parties, on the date of the last signature below.("Commencement Date").

**4.** **Earnest Money Deposit**. The agreed upon Deposit to be made by Buyer during the Escrow period shall be Five Hundred Thousand Dollars and No Cents ($500,000.000) and shall be paid in two parts of two hundred fifty thousand dollars each, pursuant to the terms of this Agreement.

4.1 Within five (5) business days after the establishment of Escrow, Buyer will deposit funds in an amount equal to Two Hundred and Fifty Thousand Dollars and No Cents ($250,000.00) ("Initial Deposit") with Escrow Agent. An

additional Two Hundred Fifty Thousand Dollars and No Cents ($250,000) shall be deposited by the Buyer into Escrow upon the expiration of the initial 90-day period as specified in this Agreement. The total deposits made by the Buyer with the Escrow Agent in accordance with this Agreement shall be collectively referred to as the "Deposit". The Deposit shall be held in an interest-bearing account (at the current market rate) with all interest credited to Buyer, and applied pursuant to the terms of this Agreement.

4.2 Buyer's deposit will only be applied to the purchase price upon close of escrow and will only become non-refundable to Buyer upon the expiration of Buyer's contingency period as specified in this Agreement. The Deposit and any interest earned thereon shall be applied against the Purchase Price. Escrow Agent shall disburse the Deposit with interest to Buyer or Seller, as applicable, in accordance with the terms of this Agreement.

4.3 If this Agreement is terminated for any reason, prior to the end of Buyer's Contingency Period, the Deposit shall be refunded to Buyer with any interest accrued, without demand, deduction or offset. If this Agreement is terminated due to either party's material default and failure to cure, after the Buyer's Contingency Period has ended, the non-defaulting party shall be entitled to the Deposit and any interest earned thereon without demand, deduction or offset.

**5. <u>Contingency Period</u>.**

5.1 The Contingency Period will begin on the Commencement Date of this Agreement. Buyer shall have from the Commencement Date until May 31, 2026 (hereinafter "Contingency Period"), to complete all contingencies as deemed necessary in the Buyer's sole discretion. This Contingency Period may be extended 30 days pursuant to written agreement signed by both parties and submitted to the Escrow Agent.

5.2 Buyer shall undertake, at Buyer's sole expense, an appraisal and inspection of the Property; Phase 1 and Phase 2 environmental testing on the Property (as required); an American Land Title Association ("ALTA") Survey of the Property; a review of the physical condition of the Property, including but not limited to, inspection and examinations of soils, soils reports, environmental factor, Hazardous Substances and reports, and archeological information relating to the Property; a review of the Seller's nonresidential building energy use disclosure report; a review of the building plans and permits for the Improvements; and a review and investigation of the effect of any zoning, maps, permits, reports, engineering data, regulations, ordinances, and Laws affecting the Property. As soon as possible, but no later than ten (10) Business Days of the date of the commencement of the Contingency Period, Seller shall identify and deliver to Buyer, copies of the above documents in its possession, if any. If Seller comes into possession of any of the above documents after the above-referenced time period, Seller shall provide such document(s) to Buyer as soon as possible, but not later than five (5) Business Days after receipt.

5.3 Buyer shall undertake a review of Seller's leases, licenses, maintenance contracts, utility contracts, operating contracts, management contracts, service contracts, warranties, and other contracts pertaining to the Property, together with any amendments or modifications (the "Property Contracts"). As soon as possible, but no later than ten (10) Business Days of the date of commencement of the Contingency Period, Seller shall identify and deliver to Buyer, copies of the above documents in its possession, if any. At Buyer's request, Seller shall terminate any Property Contracts at or prior to the close of Escrow that Buyer specifies.

5.4 If Seller fails to identify and deliver the documents set forth in Section 5.2 and 5.3 or deliver written notice to Buyer that the documents do not exist, within ten (10) Business Days of the date of commencement of the Contingency Period, the last date of the Contingency Period shall be extended one day for each day beyond the ten (10) day period until Seller delivers all the documents.

5.5 Buyer agrees that within the first ninety (90) days from opening of Escrow, the Buyer shall complete any and all due diligence it deems appropriate related to: title and zoning, existing leases, and review of roof report and repair work. During this ninety-day period, Buyer's potential Purchase of the Property, including the Purchase Price, shall be contingent upon Buyer's review and approval, in Buyer's sole discretion, of fee title ownership and condition of title to the Property.

5.6 Buyer to have until May 31, 2026, (unless both buyer and seller mutually agree to extend the period by 30 days) to complete all remaining contingencies not expressly listed in Section 5.5 of this Agreement to perform any and all due diligence it deems appropriate including, but not limited to, reviewing and assessing the physical aspects, zoning, valuation, environmental, excavation drilling, sampling and testing of the Property. Seller shall provide Buyer access to the property, upon reasonable notice, to conduct any and all inspections or due diligence reasonably necessary during this contingency period. Additionally, Buyer's Contingencies will include obtaining City Council's approval and ratification of the sales and purchase agreement and at any time may also include directing staff's ability to continue to negotiate with buyer.

5.7 During either Contingency Period, Buyer's potential Purchase of the Property, including the Purchase Price, shall be contingent upon Buyer's review and approval, in Buyer's sole discretion, of fee title ownership and condition of title to the Property, including Buyer's sole discretion, of any and all physical, natural and environmental conditions of the Property, including, without limitation, its suitability of development or use by Buyer.

5.8 Upon expiration of the Contingency Period (May 31, 2026, or a date thereafter upon mutual agreement in writing to extend this date 30 days by both parties) and upon written removal of all contingencies by Buyer, the Earnest Money Deposit shall become non-refundable, except for Seller's default (including, without limitation, Seller's misrepresentation, failure to disclose, failure to provide information, failure to allow access, failure to perform), material change,

damage, destruction or loss of the Property. At no time prior to May 31, 2026, or a date thereafter as mutually agreed upon by all parties, and upon written removal of all contingencies by the Buyer, shall any portion of the Earnest Money Deposit be deemed non-refundable.

5.9 Seller agrees to be responsible for any and all existing taxes, liens, encumbrances, judgements affecting title, up and until, the date of purchase of the property by the Buyer. This shall include any and all property taxes owed for April 2026, and any and all judgments or encumbrances issued against the property effecting title for any and all claims or acts alleged to have occurred during Seller's ownership of the property, whether recorded against the property while Seller owns the property or after, and whether recorded against the property or not along with an proration of taxes due between the last assessment and close of escrow. Any existing judgments, liens, taxes, loans, or any other monetary related encumbrances recorded against the Property shall be paid by Seller, prior to the expiration of the full Contingency Period, or paid at the close of escrow from the Seller's portion of sale proceeds. Upon execution of the Purchase and Sale Agreement, Title for the Property shall be free and clear, subject to any easements.

**6. Escrow.** Within three (3) business days after the Commencement Date, Seller and Buyer will open Escrow Fidelity National Title, located at 555 S. Flower Street, Suite 4420 Los Angeles, CA 90071, Attn. Cornelius Morgan (213) 452-7151, ("Escrow Agent"). This Agreement constitutes the joint escrow instructions of Buyer and Seller, and a duplicate original of this Agreement shall be delivered to the Escrow Agent upon the opening of the Escrow. Buyer and Seller may furnish to the Escrow Agent any additional escrow instructions in writing which are in conformity with this Agreement, and which are mutually satisfactory to Seller and Buyer. The Buyer, through its City Manager, and Seller agree to promptly execute any such escrow instructions consistent with the terms of this Agreement which the Escrow Agent may reasonably request. The Escrow Agent is hereby empowered to act under this Agreement and shall carry out its duties as Escrow Agent hereunder. The City Manager has administrative authority on behalf of the Buyer to make amendments to this Agreement, other than increasing the Purchase Price or changing the Property (including changes to the purchase and sale description in Section 1, above).

**7. Close of Escrow.** Escrow shall close upon the occurrence of the following actions:

(a) Deposit of a fully executed and acknowledged grant deed by the Seller conveying the Property, and all rights, benefits, easements and appurtenances thereto ("Grant Deed") in the form attached hereto as Exhibit "C". The conveyance shall be free and clear of any and all encumbrances as set forth above, unless approved in writing by Buyer;

(b) Deposit of the Purchase Price by Buyer, after deducting both the

Deposit plus any interest accrued thereon, all credits under this Agreement, and as adjusted by the costs, expenses and prorations set forth in this Agreement;

(c) Issuance of the policy of title insurance described in Section 25, below;

(d) Submission to Escrow of the "**Release of all Claims**" by Seller, as set forth in Exhibit "D;" and

(e) Possession of the property shall be transferred to Buyer within three (3) days of the Close of Escrow and Seller shall provide keys, passwords, codes and/or means to operate all locks, mailboxes, security systems, alarms, automation systems, and intranet and Internet-connected devices included in the Purchase Price.

Notwithstanding the foregoing, Escrow shall close (the "Closing") on or prior to June 30, 2026, ("Closing Date"), unless extended 30 days by mutual agreement of the Seller and Buyer. The City Manager or his designee, may approve reasonable extensions on behalf of the Buyer. Buyer shall deposit the Purchase Price into Escrow at least one business day prior to the scheduled Closing Date and the Closing shall be conducted in a mutually acceptable manner in accordance with the customs of Los Angeles County in light of Seller's existing mortgage loan and encumbrances recorded against the Property.

Escrow may not close without an Agreement and Escrow Instructions for the Purchase and Sale of Real Property that are approved by the Burbank City Council by majority vote and executed by all parties, with all conditions completed to the satisfaction of the parties, including instructions for the payment of any liens or encumbrances to be paid from Seller's proceeds as outlined in this Agreement. . Buyer's potential Purchase of the Property, including the Purchase Price, would be contingent upon other contingencies to the Close of Escrow as set forth in the negotiated Agreement and Escrow Instructions for the Purchase and Sale of Real Property.

Upon Close of Escrow, Buyer shall assume all existing leases as Lessor of the Property. Seller will cooperate in facilitating any transfers of existing leases. Any deposits issued under existing leases will be transferred into escrow to be transferred to Buyer upon the Close of Escrow.

**8. Expenses of Escrow.** Except as otherwise provided herein, Buyer and Seller shall split (50%/50%) all Escrow Agent fees, charges and costs connected with the Escrow, including, but not limited to, the Escrow fees, recording fees and notary fees. Seller is responsible for the payment of any documentary transfer taxes or fees. Any costs of obtaining reconveyances under encumbrances or removing clouds on the title, and recording fees in connection therewith, shall be borne by Seller. If escrow fails to close, and there is no event of default by either Buyer or Seller, then Buyer and Seller are responsible for their own costs and expenses incurred in connection with Escrow and this transaction.

**9. Condition of Title, Property Inspection, other Conditions to Close Escrow.** It shall be a condition to the Close of Escrow, for Buyer's benefit, and a covenant of Seller, that the Property be conveyed to Buyer by Seller by Grant Deed, with free and clear title, in accordance with this Section.

On or before opening of Escrow, Escrow Agent will procure and provide a preliminary title report and all legible copies of the documents of record creating exceptions disclosed in the Preliminary Title Report (collectively, "Title Report") issued by Fidelity National Title located at 555 S. Flower Street, Suite 4420 Los Angeles, CA 90071, Attn. Darrin Zowarka ("Title Company") to Buyer, disclosing the condition of the title to the Property. The Title Report shall be prepared in connection with a CLTA Owner's Title Insurance Policy, which cost shall be at the Seller's expense. Buyer shall pay the difference incurred for the purchase of an ALTA Owner's Title Insurance Policy if so desired by Buyer, which Escrow Agent shall cause to be prepared and delivered. Any specific endorsements required by Buyer shall be paid for by Buyer at the close of escrow.

Buyer will complete its review of the Title Report and, in its sole discretion disapprove by notice delivered to Seller and Escrow Agent, any exceptions to title, within 90 days of opening escrow. If Buyer does not disapprove of any such exceptions shown on the Title Report within this time period, Buyer shall be deemed to have approved the Title Report. The exceptions approved by Buyer are referred to herein as the "Permitted Title Exceptions." Seller, at its option, shall have five (5) business days from receipt of Buyer's written disapproval notice to remove any exceptions to title to which Buyer objects. If the objectionable exceptions are not removed, within the stated time period, ("Due Diligence Date") Buyer may elect to waive such objections, or, upon agreement with Seller, extend Seller's removal period for objectionable exceptions (including but not limited to, allowing any monetary exceptions to be removed upon the Closing of Escrow by payment through Seller's portion of sale proceeds). Alternatively, Buyer in its sole discretion may elect to terminate this Agreement, terminating all Buyer obligations hereunder, and any then existing Buyer deposits shall be refunded to Buyer.

If any monetary lien that can be removed by the payment of a liquidated sum of money appears on title after Buyer receives the Title Report and before Close of Escrow, Seller shall cause such lien to be paid, discharged, or removed from Title or provide a release of the lien as a condition of Closing.

**10. Inspection of Property.** Property inspections shall be completed on or before the Due Diligence Date. Seller, at no cost or expense, shall cooperate with Buyer and Buyer's efforts to obtain any permits, approvals, assignments, reviews, inspections, surveys, reports, assessments and environmental studies by any governmental agency or private consultant as Buyer may wish to obtain following acceptance of this Purchase and Sale Agreement and Escrow Instructions through the Close of Escrow. As owners of the Property, Seller shall execute whatever documents may be necessary to obtain such matters provided there is no adverse physical impact to the Property or unreasonable disturbance to the existing leasehold tenants.

During the term of this Agreement, Seller shall allow the Buyer and its representatives and designees access to the Property as necessary for inspection

thereof; and to conduct all due diligence activities listed below. In addition, at any time prior to the Due Diligence Date, Buyer and its representatives and designees shall have the right of access to the Property during normal business hours upon no less than three (3) business days' advance notice to Seller to make such investigations, studies and tests including surveys and engineering studies as Buyer deems necessary or advisable (in Buyer's sole and absolute discretion), The cost of any such inspections, tests and studies shall be borne by Buyer. Buyer shall repair any damage to the Property caused by Buyer's inspections and tests, but under no circumstances shall Buyer be responsible for any preexisting conditions on or relating to the Property, or any negligence or willful misconduct of Seller or any of its respective representatives, agents, employees, contractors or tenants. If Buyer disapproves the conditions of the Property, or the results of any investigations, studies and/or tests conducted by Buyer (which Buyer may approve or disapprove in its sole and absolute discretion, for any reason or for no reason), Buyer may terminate this Agreement on or before the Due Diligence Date, as indicated in Section 5 of this document, by written notice to Seller, in which event the Deposit (less its portion of escrow costs) shall be immediately returned to Buyer without the need for any further instruction and notwithstanding any contrary instruction from Seller, and all obligations of Buyer and Seller shall be null and void except for those matters expressly set forth herein to survive termination. The failure of Buyer to terminate this Agreement on or before the Due Diligence Date shall be deemed an election by Buyer not to terminate this Agreement pursuant to this Section, in which case the Deposit shall become nonrefundable to Buyer except as expressly set forth in this Agreement.

Buyer has the right to conduct, but is not limited to, the following due diligence activities:

(a) Hazard Materials, Asbestos and Physical Assessments Report(s) at the Buyer's expense
(b) Environmental Documents including but not limited to Phase I and Phase II at Buyer's expense with the scope of work approved by the seller and made a part herein.
(c) Valuation at the Buyer's expense
(d) Inspection of the building at the Buyer's expense and/or Inspection conducted by the City Building Inspector and/or his designee.
(e) Inspection conducted by the City Fire Inspector and/or his designee.

10.1 To the extent that that the information is in Seller's possession, Seller agrees to provide Buyer with the following documents within five (5) days after the Commencement Date, which shall comprise Seller's "Due Diligence Materials": Seller shall provide Buyer copies of any and all leases, surveys, maps, plans, inspections, reports, including, but not limited to soil, environmental and biological reports, studies, assessments, agreements or other documents and materials relating to the condition of the Property, including its suitability of development or use. Seller shall provide Buyer copies of all existing leases, exhibits, agreements, documents, materials, and records of any cancelled leases or agreements related to the Property.

10.2 As of the Close of Escrow, there shall have been (I) no material adverse change in the condition of the Property from that which was known to Buyer as of the Due Diligence Date, and (II) no material adverse change in any applicable law or other governmental requirement, relating to the development of any portion of the Property which was effective as of the Due Diligence Date, and (III) no material adverse change or modification in, and no appeal or repeal or breach of, any governmental approval, consent, agreement or contractual obligation relating to the Property or any portion thereof from that which was known to Buyer as of the Due Diligence Date. Seller shall maintain the Property in its current state and in good condition and repair and shall not create nor permit the creation of any title exceptions, including, without limitation, any easements or liens to encumber the Property without Buyer's prior written approval.

10.3 If each of the conditions set forth in Sections 5, 9, and 10 are timely satisfied, then Buyer shall be obligated to proceed with the Close of Escrow subject to the terms and conditions of this Agreement. If any of the foregoing conditions set forth in Sections 5, 9, and 10 are not timely satisfied or waived in writing by Buyer in Buyer's sole and absolute discretion, then, upon written notice delivered by Buyer (in Buyer's sole and absolute discretion), but without limiting the terms of Section 18, this Agreement shall terminate and the Deposit and any interest earned thereon shall be immediately returned to Buyer, notwithstanding any contrary instruction by Seller, and (i) each party shall execute such documents as Escrow Agent may reasonably require to evidence such termination, (ii) Escrow Agent shall return all documents to the party who deposited them, (iii) Escrow Agent shall charge its fees and expenses to Buyer (provided that if the Close of Escrow does not occur as a result of the default of either Buyer or Seller, the defaulting party shall pay all of the charges and costs in connection with the Escrow, including without limitation the amount of any cancellation charges), (iv) unless this Agreement is terminated for a Seller default or breach of representation, warranty or covenant, Buyer shall return to Seller all documents delivered to it by Seller relating to the Property, all obligations of either party relating to this Agreement and the Property shall terminate except for those obligations that expressly survive a termination of this Agreement.

**11. <u>Seller Representations and Warranties</u>.** Seller hereby represents and warrants for the benefit of Buyer that the following facts are true, in each case to the Seller's actual knowledge and belief as of the date of this Agreement, and that Seller will take no voluntary action to cause such facts to become untrue in any material respect from the date of this Agreement to the date of the Close of Escrow:

(a) Seller now has and will have at the Close of Escrow good and indefeasible title in fee simple to the Property and no party, except as herein set forth, has or will have any right in or to acquire, the Property;

(b) Seller has the legal power, right and authority to enter into this Agreement and all of the other agreements and documents specified herein, and to consummate the transactions contemplated hereby;

(c) At the Closing, the Property will be free and clear of all encumbrances except any encumbrances permitted by Buyer; Seller covenants and agrees, at Seller's sole cost and expense, to obtain releases, at or prior

to the Closing, for any and all liens affecting the Property as of the date of Closing;

(d) There are, and at the Close of Escrow there will be, no pending actions, suits, arbitrations, claims or proceedings, at law, in equity or otherwise, affecting, or which may affect, all or any portion of the Property of which Seller is aware (or should be) or in which Seller is or will be a party by reason of Seller's ownership of the Property, including, but not limited to, judicial, municipal or administrative proceedings in collection actions, federal, state or local authority actions regarding environmental matters, or personal injury; Seller to certify that there is no pending retrofit work, no unpermitted construction, no outstanding permits and that all building permits have been finalized;

(e) Seller has not received any notices from any insurance company of any defects or inadequacies in the Property or any part thereof, which would materially and adversely affect the insurability of the Property or the premiums for the insurance thereof, and no notice has been given by any insurance company, which has issued a policy with respect to any portion of the Property or by any board of fire underwriters (or other body exercising similar functions) requesting the performance of any repairs, alterations, or other work which has not been complied with;

(f) If the Property is used as security for a deed of trust or other mortgage, any such deed of trust or mortgage shall be reconveyed on or prior to the Close of Escrow.

(g) Before the Closing, Seller shall maintain the Property ("Maintenance Duties") in a manner consistent with reasonable area maintenance Best Practices.

(h) Seller is not in material default under the terms of any lease agreement, loan agreement or deed of trust, or any other agreement pertaining to the Property, nor has any event occurred that will constitute a default under such documents or instruments following the passage of time;

(i) No uncured breach or default, whether declared or not, including, without limitation, nonpayment of any sum or nonperformance of any obligation, exists under, or with regard to, any obligation of Seller that is secured by a lien on the Property;

(j) Seller has not received any notice that the location, construction, occupancy, operation, and/or use of the Property violates, in any material respect, any applicable law, statute, ordinance, rule, regulation, order, or determination of any governmental authority or any board of fire underwriters (or other body exercising similar functions), or any restrictive covenant or deed restriction (recorded or otherwise)

affecting the Property, including, without limitation, all applicable zoning ordinances and building codes, flood disaster laws, and health and environmental laws and regulations.

(k) Seller further represents

(i) the Property has never been used by Seller, or, to the best of Seller's knowledge, Seller's tenants, to generate, manufacture, refine, transport, treat, store, handle or dispose of any Hazardous Substances (as hereinafter defined) in violation of any Environmental Laws, and Seller has not received any written notice that any Hazardous Substances currently exist in, on, or under the Property in violation of any Environmental Laws and Seller has not received any written notice that any prior owner of the Property generated, manufactured, refined, transported, treated, stored, handled or disposed of any Hazardous Substances (as hereinafter defined) in violation of any Environmental Laws.

(ii) The term "Hazardous Substances" as used in this Agreement shall mean any hazardous or toxic material, substance, or waste, pollutant or contaminant which is regulated under any statute, law, regulation, rule or ordinance of any local, state, regional, or federal authority having jurisdiction over the Property, or its use, including, but not limited to, any material, substance or waste which is (i) defined as a hazardous substance under any Environmental Laws; (ii) a petroleum hydrocarbon, including crude oil or any fraction thereof and all petroleum products; (iii) polychlorinated biphenyls; (iv) lead; (v) urea formaldehyde; (vi) asbestos; (vii) flammable explosives; (viii) infectious materials; (ix) radioactive materials; or (x) defined or regulated as a hazardous substance under rules or regulations promulgated under any of the foregoing Environmental Laws.

(iii) The term "Environmental Laws" as used in this Agreement shall mean any federal, state, or local statute, law, regulation, order, consent, decree, judgment, permit, license, code, covenant, deed restriction, common law, treaty, convention, ordinance, or other requirement relating to public health, safety or the environment, including, without limitation, those relating to releases, discharges or emissions to air, water, land or groundwater, to the withdrawal or use of groundwater, to the use and handling of polychlorinated biphenyls or asbestos, to the disposal, treatment, storage or management of hazardous or solid waste, or Hazardous Substances or crude oil, or any fraction thereof, or to exposure to toxic or hazardous materials, to the handling, transportation, discharge or release of gaseous or liquid

Hazardous Substances and any regulation, order, notice or demand issued pursuant to such law, statute or ordinance, in each case applicable to the Property, including, without limitation, the following: the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended by the Superfund Amendments and Re-Authorization Act of 1986; the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 and the Hazardous and Solid Waste Amendments of 1984; the Hazardous Materials Transportation Act, as amended; the Federal Water Pollution Control Act, as amended by the Clean Water Act of 1976; the Safe Drinking Water Act; the Clean Air Act, as amended; the Toxic Substances Control Act of 1976; the Occupational Safety and Health Act of 1977, as amended; the Emergency Planning and Community Right-to-Know Act of 1986; the National Environmental Policy Act of 1975; the Oil Pollution Act of 1990, and any similar or implementing state law, and any state statute and any further amendments to these laws providing for financial responsibility for clean-up or other actions with respect to the release or threatened release of Hazardous Substances or crude oil, or any fraction thereof and all rules and regulations promulgated thereunder.

(iv) Seller has not obtained, and is not required to obtain, and Seller has no knowledge of any reason Buyer or Seller will be required to obtain, any permits, licenses, or similar authorizations to construct, occupy, operate, or use any buildings, improvements, fixtures, and equipment forming a part of the Property by reason of any Environmental Laws.

(v) No notice of violation, lien, complaint, suit order or other notice with respect to the environmental condition of the Property is outstanding, nor has any such notice been issued which has not been fully satisfied and complied with in a timely fashion so as to bring the Property into full compliance with all Environmental Laws.

(l) Except as specifically provided herein, during the term of this Agreement, Seller will not, without the prior written consent of Buyer, enter into any new maintenance or service contract affecting the Property, which cannot be terminated on notice of thirty (30) days or less, or subject the Property to any new mortgage, deed of trust, lien, encumbrance, claim, charge, equity, covenant, condition, restriction, easement, right-of-way or other similar matter affecting the Property;

(m) Seller affirms that there are no existing leases other than what has been provided to Buyer, including any warranties and estoppel certificates, currently in Seller's possession, and will provide a

complete inventory of all documents as required per this Agreement.

(n) Seller shall not (a) enter into any new lease agreements related to the Property, including, without limitation, any subleases, parking or licensing agreements without Seller's prior, written approval or (b) enter into discussions to sell or otherwise dispose of the Property while escrow remains open pursuant to this Agreement. ;

(o) The Improvements on the Property contain no latent (excluding visible obvious visible defects) physical or structural defects actually known by Seller which have not been disclosed. The term "Improvements" includes without limitation, all walkways, curbs, landscaping, and other related improvements.

(p) The Seller may change ownership entities through grant deeds or new legal entities during the escrow period; however, the Sellers must still constitute the existing parties.

The representations and warranties of Seller set forth in this Section survive the Close of Escrow and shall be deemed to be remade and restated by Seller on and as of the Close of Escrow. These representations and warranties shall be in place for two years after Closes of Escrow.

**12. Buyer Representations and Warranties.** Buyer represents and warrants that this Agreement and all other documents delivered by Buyer prior to or on the Close of Escrow, (i) have been or will be authorized, executed, and delivered by Buyer pursuant to City administrative procedures; (ii) are binding obligations of Buyer; and (iii) do not violate the provisions of any agreement to which Buyer is a party. Buyer further represents that Buyer is a duly organized municipal corporation existing under the laws of the State of California, with its principal place of business in the City of Burbank, State of California.

**13. Indemnification.**

13.1 As a matter to which Escrow Agent need not be concerned, Seller hereby agrees to indemnify and hold Buyer harmless from and against any and all claims, demands, liabilities, liens, costs, expenses, penalties, damages and losses, including and without limitation reasonable attorney's fees and costs offered by the Buyer as a direct or indirect result of:

13.1.1 Any misrepresentation, breach of warranty or breach of covenant made by Seller in this Agreement (including, without limitation, with respect to environmental matters) or any document, certificate, disclosure or exhibit given or delivered to Buyer pursuant to or in connection with this Agreement (collectively, "Seller's Representations").

13.1.2 If, at any time, after Close of Escrow, it is determined that there are Hazardous Materials located at, on in, under, or about the Property which were present as of the date of Closing and which were not otherwise disclosed by Seller, Seller hereby agrees, at Seller's sole cost and expense, to unconditionally indemnify, defend, and hold Buyer harmless from and against any loss, liability, damage (whether direct or consequential), expenses, claims, penalties, fines, injunctions, suits, proceedings, disbursements, or expenses (including, without limitation, attorneys' and experts' fees and disbursements and court costs) (collectively, the "liabilities") (a) arising as a result of any incorrectness in any representations or warranties of Seller contained in this Agreement; (b) arising under any Environmental Laws; or (c) any other liabilities, if any which may be incurred by or asserted against Buyer directly or indirectly resulting from the presence of a Hazardous Substance on the Property as of the date of Close of Escrow that was not previously disclosed by Seller, provided, however, that such indemnity shall not apply with respect to matters caused by or arising out of the acts or activities of the Buyer after the Close of Escrow.

13.2 Seller hereby agrees to assume the burden and expense of defending all suits, administrative proceedings and disputes of any description with all persons, entities, political subdivisions or government agencies arising out of the matters to be indemnified by Seller under this Agreement. Seller shall pay, promptly upon entry, any nonappealable order, judgment or other final resolution of any claim or dispute arising out of the matters to be indemnified under this Agreement and shall pay promptly when due any fines, penalties or agreed settlements arising out of the matters to be indemnified under this Agreement.

**14. Notices from Buyer.** Buyer shall promptly, after obtaining knowledge thereof, advise Seller in writing of Buyer's receipt of any written: (a) notice of any governmental or regulatory actions instituted or threatened in writing under any Environmental Laws affecting the Property or any indemnification hereunder including, without limitation, any notice of inspection, abatement or noncompliance arising out of any activity prior to the Close of Escrow; (b) all claims made or threatened in writing by any third party against Seller or the Property relating to any Hazardous Substances or a violation of Environmental Laws arising out of any activity prior to the Close of Escrow, and (c) Buyer's discovery of any occurrence or condition on the Property which could subject Buyer or the Property to a claim under any Environmental Law or to any restrictions on ownership, occupancy, transferability or use of the Property under any Environmental Law arising out of any activity prior to the Close of Escrow.

**15. Title Insurance.** At the Close of Escrow, the Escrow Agent shall be irrevocably committed to issue at Seller's cost a CLTA Owner's Title Insurance Policy in the full amount of the Purchase Price, insuring fee simple title to the Property as being vested solely and exclusively in the Buyer upon the Close of Escrow, subject only to (i) the Permitted Title Exceptions, and (ii) Escrow Agent's Standard pre-printed CLTA Exceptions in the policy jacket issued with all of Escrow Agent's CLTA policies ("Title Policy"). Buyer will request an ALTA Owner's Title Insurance Policy or Extended

Coverages, with Seller paying that amount which would have been required for a CLTA Owner's Title Insurance Policy, and Buyer paying the difference.

**16. Apportioned Cost.** The following are to be apportioned as of the Closing Date and the applicable adjustment(s) shall be made to the Purchase Price delivered to Seller:

16.1 Utility Charges. To the extent Seller is responsible for utility charges, the parties shall arrange for utility services to be billed to Seller up to the Close of Escrow and to Buyer from and after the Closing.

**17. Real Estate Taxes and Special Assessments.** Escrow Agent will prorate between the Parties, at the Close of Escrow, any general and special real estate taxes and assessments as of the Closing Date. General and special real estate taxes and assessments payable for all tax years (or portions thereof) prior to the Closing Date, and any supplemental tax assessments relating to the period prior to the Closing, will be paid by Seller. As necessary, general and special real estate taxes and assessments payable for all tax years (or portions thereof) after the Closing Date, and any supplemental tax assessments relating to the period after the Closing, will be paid by Buyer as applicable.

**18. Right of Termination**

18.1 Right to Termination by Buyer Prior to Conveyance. In the event that the Seller does not tender conveyance of title to the Property in the manner, condition and time provided in this Agreement, Seller shall use its best efforts to do so as promptly as possible, and if any such failure is not cured within ten (10) days after written demand by the Buyer, then Buyer, in its sole and absolute discretion, shall have the right to terminate this Agreement by written notice to the Seller, in which case the Deposit (and any interest thereon) shall be immediately returned to Buyer without the need for further instruction and notwithstanding any contrary instruction by Seller. This remedy shall be in addition to any and all rights or remedies Buyer may have under this Agreement, at law or in equity upon Seller's breach of its obligations hereunder, including but not limited to specific performance.

In the event that Buyer does not complete the conditions to close escrow and take title to the Property under tender or conveyance by Seller within the time provided in this Agreement, and any such failure is not cured within ten (10) days after written demand by the Seller, then this Agreement may, at the option of Seller, be terminated by written notice thereof to Buyer. In such event, the deposit shall be returned to Buyer (unless otherwise provided in this Agreement) and the parties shall have no further recourse against each other under this Agreement.

In the event that all of the conditions to Buyer's obligations to acquire the Property have been satisfied or waived by Buyer in writing in its sole and absolute discretion, and the Buyer does not pay the Purchase Price and take title to the Property under tender or conveyance by the Seller within the time provided in this Agreement, and any such failure is not cured within ten (10) days after written demand by the Seller, or, in the event such case cannot reasonably be cured within such ten (10) day period, commence such cure

within ten (10) days after such written demand, then this Agreement may, at the option of the Seller, be terminated by written notice thereof to the Buyer. In the event of any other failure of Buyer to perform its obligations under this Agreement, Buyer shall not be deemed in default hereunder until five (5) days after Buyer's receipt of a written notice from Seller.

**IN THE EVENT THE CLOSE OF ESCROW AND THE CONSUMMATION OF THE TRANSACTION HEREIN CONTEMPLATED DOES NOT OCCUR AS HEREIN PROVIDED BY ANY REASON OF A MATERIAL DEFAULT OF BUYER UNDER THIS AGREEMENT BEYOND TEN (10) DAYS AFTER WRITTEN DEMAND BY SELLER, BUYER AND SELLER AGREE THAT IT WOULD BE IMPRACTICAL AND EXTREMELY DIFFICULT TO ESTIMATE THE DAMAGES WHICH SELLER MAY SUFFER. THEREFORE, BUYER AND SELLER DO HEREBY AGREE THAT A REASONABLE ESTIMATE OF THE TOTAL NET DETRIMENT THAT SELLER WOULD SUFFER IN THE EVENT THAT BUYER SO MATERIALLY DEFAULTS AND FAILS TO COMPLETE THE PURCHASE OF THE PROPERTY IS AND SHALL BE, AS SELLER'S SOLE AND EXCLUSIVE REMEDY (WHETHER AT LAW OR IN EQUITY), AN AMOUNT EQUAL TO THE DEPOSIT (AND WITHOUT LIMITATION, IN NO EVENT SHALL BUYER HAVE ANY LIABILITY FOR SPECULATIVE, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, AND THE PROVISIONS OF THIS PARENTHETICAL SHALL SURVIVE THE CLOSE OF ESCROW AND THE EXECUTION AND DELIVERY OF THE GRANT DEED). SAID AMOUNT SHALL BE THE FULL, AGREED AND LIQUIDATED DAMAGES FOR THE DEFAULT OF THIS AGREEMENT BY BUYER BEYOND NOTICE AND CURE, ALL OTHER CLAIMS TO DAMAGES OR OTHER REMEDIES BEING HEREIN EXPRESSLY WAIVED BY SELLER. THE PAYMENT OF SUCH AMOUNT AS LIQUIDATED DAMAGES IS NOT INTENDED AS A FORFEITURE OR PENALTY WITHIN THE MEANING OF CALIFORNIA CIVIL CODE SECTIONS 3275 OR 3369 BUT IS INTENDED TO CONSTITUTE LIQUIDATED DAMAGES TO SELLER PURSUANT TO CALIFORNIA CIVIL CODE SECTIONS 1671, 1676 AND 1677. SELLER HEREBY WAIVES THE PROVISIONS OF CALIFORNIA CIVIL CODE SECTION 3389. UPON A MATERIAL DEFAULT OF BUYER UNDER THIS AGREEMENT BEYOND ANY APPLICABLE NOTICE AND CURE PERIOD AND TERMINATION OF THIS AGREEMENT AS A RESULT THEREOF, THE DEPOSIT SHALL BE IMMEDIATELY RELEASED TO SELLER WITHOUT THE NEED FOR ANY FURTHER INSTRUCTION AND NOTWITHSTANDING ANY CONTRARY INSTRUCTION BY BUYER, AND NEITHER PARTY SHALL HAVE ANY FURTHER RIGHTS OR OBLIGATIONS HEREUNDER, EACH TO THE OTHER, EXCEPT FOR ANY SUCH RIGHT OF SELLER TO COLLECT SUCH LIQUIDATED DAMAGES FROM BUYER AND ESCROW AGENT.**

_____ _____

**Buyer's Initials** **Seller's Initials**

18.2 If Escrow fails to close by reason of any default or breach by SELLER and the failure to close continues for ten (10) Business Days after receipt of written notice from BUYER, BUYER may, as BUYER'S sole and exclusive remedy (whether at law or in equity), (A) terminate this Agreement by giving written notice of termination to SELLER whereupon (i) Escrow Agent shall return the Deposit and all accrued interest to BUYER, (ii) BUYER shall be released from its obligation to consummate the Transaction, (iii) SELLER will be responsible for the cost of any and all escrow fees and title company charges, and (iv) SELLER shall reimburse BUYER for its actual, verifiable out-of-pocket third party expenses incurred in connection with its negotiation of this Agreement and due diligence investigation of the Property in a total amount not to exceed Twenty Thousand Dollars ($20,000.00) or (B) pursue specific performance of the conveyance of the Property, but only if BUYER files such specific performance action within forty-five (45) days following the scheduled date for the Close of Escrow and diligently prosecutes such action to completion.

18.3 SELLER will not have the right to specific performance or to recover money damages in excess of the liquidated damages pursuant to Section 13 if BUYER fails to purchase the Property in accordance with the provisions of this Agreement.

18.4 SELLER AND BUYER acknowledge that they have read and understand this Section 13 and by their initials immediately below agree to be bound by its terms.

**Buyer's Initials** **Seller's Initials**

**19. Notices and Communications Between the Parties.** Formal notices, demands and communications between the Seller and the Buyer must be in writing and shall be deemed to have been properly given (i) if by email, on the day of transmission so long as confirmation of such transmission is received before 5:00 p.m., Los Angeles, CA time on a day that is not a Saturday, Sunday, State or Federal legal holiday (and if transmitted after 5:00 p.m., Los Angeles, CA time, on the following business day) and a copy is also mailed, (ii) if by personal service, on the date of delivery, or (iii) if by delivery by reputable document delivery service such as Federal Express that provides a receipt showing date and time of delivery, on the first business day after delivered to such delivery service, in each case addressed to the address of the party as set forth below, or at any other address as that party may later designate by Notice:

Seller: BCH Enterprises LLC/Olive Avenue Partners, LLC
C/O Hoffman Short Rubin Dewinter Sanderson
1037 Park View Drive - Covina, California 91724
Attn: Joanne Hoffmann

Buyer: City of Burbank
275 East Olive Avenue
Burbank, California 91502
Attention: Simone McFarland, Assistant Community Development Director
smcfarland@burbankca.gov

With copies to Escrow: Fidelity National Title
555 S. Flower Street, Suite 4420
Los Angeles, CA 90071
Attn. Cornelius Morgan

Written notices, demands and communications may be sent in the same manner to such other addresses as either party may from time-to-time designate.

**20. Conflicts of Interest.** Seller hereby represents that no member, official or employee of Buyer shall have any personal interest, direct or indirect, in this Agreement, nor shall any such member, official or employee of Buyer participate in any decision relating to this Agreement which affects his or her personal interest or the interests of any corporation, partnership or association in which he or she is directly or indirectly interested.

**21. Assignment.** Seller shall not assign, transfer or convey their rights and/or obligations under this Agreement and/or with respect to the Property without the prior written consent of Buyer, which consent Buyer may withhold in its sole and absolute discretion. Any permitted assignments shall not relieve the assigning party from its liability under this Agreement.

Buyer shall not assign, transfer or convey their rights and/or obligations under this Agreement and/or with respect to the Property without the prior written consent of Seller, which consent Seller may withhold in its sole and absolute discretion. However, Buyer is permitted to assign the Agreement to an entity controlled by the Buyer.

**22. Binding on Successors.** Subject to the provisions of this Agreement, the terms, conditions, covenants and agreements set forth herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

**23. Brokers' Commission.** Seller and Buyer warrants to each other they have not paid or given, and will not pay or give, any third person any money or other consideration for obtaining this Agreement. Seller shall pay a real estate commission to Lee and Associates ("Broker") per a separate written agreement. Buyer represents themselves in this transaction and will pay no commission fees. If any claims for broker's or finder's fees for the consummation of this Agreement arises, the Broker Party shall indemnify, save harmless and defend the other party from and against such claims.

Seller and Buyer acknowledge that Broker has made no representations or warranties regarding the physical condition of the property. Seller and Buyer are relying on their own independent investigation. No representations or recommendations have been made as to the legal sufficiency, legal effect or tax consequence of this proposal or the transaction to which it relates. The parties are urged to independently seek the advice of counsel as to the legal and tax consequences of this transaction.

**24. Non-Foreign Certification.** Seller shall execute a certification under penalty of perjury in the form of and upon the terms set forth in Exhibit "E", attached hereto and incorporated herein by reference, setting forth the party's address and certifying that each is not a "foreign person" in accordance with and/or for the purpose of the provisions of Section 1445 (as may be amended) of the Internal Revenue Code of 1986, as amended, and any regulations promulgated thereunder, and a State of California Form 597.

**25. Close of Escrow**

25.1 Simultaneously, with the Close of Escrow, Escrow Agent shall cause to be issued by Fidelity Title Insurance Company ("Title Company"), 555 S. Flower Street, Suite 4420 Los Angeles, CA 90071, Attn. Darrin Zowarka, an ALTA Extended Owner's Coverage Title Insurance Policy with ALTA Survey (hereinafter "Title Policy") in the amount of the Purchase Price, subject only to Approved Exceptions.

25.2 SELLER shall deposit with Escrow Agent on or prior to the Close of Escrow the following documents:

25.2.1 A grant deed executed and acknowledged by SELLER conveying to BUYER good and marketable fee

simple title to the Property.

25.2.2 SELLER'S FIRPTA Affidavit of non-foreign status as contemplated by Section 1445 of the Internal Revenue Code of 1986 as amended.

25.2.3 The original plans and specifications for the Improvements along with the certificates of occupancy, if available.

25.2.4 All keys to the Improvements which SELLER or SELLER'S agents have in their possession (to be delivered to BUYER at the Property at the Close of Escrow).

25.2.5 Any other documents, required by Escrow Agent in connection with the Transaction contemplated herein.

25.3 BUYER shall deposit with Escrow Agent, on or prior to the Close of Escrow the following:

(a) The balance of the Purchase Price in immediately available funds in accordance with Section 2 above, plus BUYER'S share of closing costs and pro-rations and any other documents reasonably required by Escrow Agent.

(b) Execute counterparts of the General Assignment, as applicable.

(c) Any other documents required by Escrow Agent in connection with the Transaction contemplated herein.

(d) The conveyance of the Property to BUYER and the closing of this Transaction shall take place on or before June 30, 2026 and following (i) expiration of the Contingency Period or (ii) satisfaction of all conditions to each party's performance, or upon a date agreed upon by the parties in writing, as set forth in this Agreement (hereinafter "Close of Escrow"). Any extension past the scheduled Close of Escrow will be negotiated in good faith by BUYER and SELLER.

(e) On the Close of Escrow, Escrow Agent shall close Escrow as follows:

(i) Record the Deed (marked to return to BUYER) with the Los Angeles County Recorder (which shall be deemed delivery to BUYER)

(ii) Issue the Title Policy.

(iii) Disburse to SELLER the Purchase Price less prorated amounts and charges to be paid by or on behalf of SELLER;

(iv) Charge BUYER for those costs and expenses to be paid by BUYER pursuant to this Agreement and disburse any net funds remaining after the preceding disbursements to BUYER;

(v) Prepare and deliver to both BUYER and SELLER one signed copy of Escrow Agent's closing statement showing all receipts and disbursements of the Escrow; and

(vi) Deliver to BUYER the FIRPTA Affidavit and the withholding affidavit, if any.

(vii) If the Escrow Agent is unable to simultaneously perform all of the instructions set forth above, Escrow Agent shall notify BUYER and SELLER and retain all funds and documents pending receipt of further instructions jointly issued by BUYER and SELLER.

25.4. Cost Allocation: Escrow Agent shall allocate the following costs at the Close of Escrow:

(a) SELLER shall pay:

(i) All governmental conveyance fees and Taxes due upon transfer of the Property, including Document Transfer Stamp fees; and

(ii) All charges in connection with the issuance of an ALTA Standard

(iii) Policy of Title Insurance, including but not limited to 103.5 Endorsement; and

(iv) One-half (1/2) of the escrow fee charged by the Escrow Agent;

(v) Real property Taxes will be prorated at Close of Escrow based upon the latest Tax bill and notice increases and adjustments, if any. If any real estate or special Taxes, charges or assessments have not been fully assessed or computed as of the Close of Escrow for the current fiscal year of the taxing authority, then the same shall be adjusted on a closing statement prepared by Escrow Agent and submitted, together with reasonably detailed supporting documentation based upon the most recently issued bills therefore and the parties hereto agree that BUYER, as a government agency, is not responsible for paying real property Taxes at the Close of Escrow. SELLER agrees that BUYER will not pay any portion of any pre-paid Taxes and BUYER is not responsible for any portion of SELLER'S refund of pre-paid Taxes, if any, when final bills are issued; and

(vi) Cost and charges of all utilities and water used prior to the Close of Escrow.

(b) BUYER shall pay:

(i) The recording charges in connection with the recordation of the Deed; and

(ii) That portion of the premium for the Title Policy and any such additional endorsements in excess of the premium for an ALTA Standard Policy of Title Insurance; and

(iii) One-half (1/2) the escrow fee charged by the Escrow Agent.

**26. Extent of Escrow Agent's Responsibilities.**

(a) Escrow Agent shall have no obligation to inform any party of any other transaction or of facts within Escrow Agent's knowledge, unless the same concerns the Property, or any such matters prevent Escrow Agent's compliance with this Agreement.

(b) Escrow Agent shall not be responsible for (i) the sufficiency or correctness as to the form or the validity of any document deposited with Escrow Agent, (ii) the manner of execution of any such deposited document, unless such execution occurs in Escrow Agent's premises and under its supervision, or (iii) the identity, authority or rights of any person executing any document deposited with Escrow Agent.

(c) Recordation of any instruments delivered through the Escrow, if necessary or proper in the issuance of the Title Policy, is authorized. No examination or insurance as to the amount or payment of personal property taxes is required.

**27. General Provisions.**

27.1 The title and headings of the sections in this Agreement are intended solely for reference and do not modify, explain, or construe any provision of this Agreement. All references to sections, recitals, and the preamble shall, unless otherwise stated, refer to the sections, recitals, and preamble of this Agreement. In construing this Agreement, the singular form shall include the plural and vice versa. This Agreement shall not be construed as if it had been prepared by one of the parties, but rather as if both parties have prepared the agreement.

27.2 This Agreement, all attached exhibits, and all related documents referred to in this Agreement, constitute the entire agreement between the parties. There are no oral agreements, which are not expressly set forth in this Agreement and the related documents being executed in connection with this Agreement. This Agreement may not be modified, amended, or otherwise changed except by a writing executed by each of the parties hereto. The City Manager is provided with authority to make modifications (except as otherwise outlined in this Agreement) subject to the approval of the City Attorney, including but not limited to time extensions.

27.3 Nothing in this Agreement express or implied, is intended to confer upon any person, other than the parties and their respective successors and assigns, any rights or remedies.

27.4 If any term of provisions of this Agreement is held invalid or unenforceable, the remainder of this Agreement shall not be affected.

**28. Time of Essence.** Time is of the essence in the performance of this Agreement and each and every term, condition, obligation, and provision thereof.

**29. Exhibits.** The Exhibits attached hereto are hereby incorporated herein by this reference for all purposes.

**30. Waiver.** The waiver or failure to enforce any provision of this Agreement shall not operate as a waiver of any future breach of any such provision or any other provision hereof.

**31. Governing Law.** The terms of this Agreement shall be interpreted according to the laws of the State of California. The Parties agree and consent to the jurisdiction of the state and federal courts of competent jurisdiction in the County of Los Angeles, California or in the United States District Court for the Central District of California if jurisdiction may be established in federal court.

**32. Survival.** The provisions of Section 13 (Indemnification) shall survive the termination or expiration of this Agreement.

**33. 1033 Exchange.** The Seller is entitled to seek any tax benefits allowable under the law related to the sale and purchase of the Property. Buyer (City of Burbank) makes no warranties or guarantees that Seller would qualify for any such tax benefit, including 1033 IRS tax benefit. Seller should seek his/her own legal counsel regarding any tax benefits associated with this Agreement. Buyer does agree that but for a completed sale of Property between Buyer and Seller, the Buyer, a municipal corporation, would have recommended to its governing body, to pursue condemnation or eminent domain to acquire the property.

**34. Exclusivity.** Seller has not entered into any other agreements for the sale of the Property, or granted any rights of first refusal or options to purchase the Property, or any other rights to others that may prevent the final execution of a Purchase and Sale Agreement and Escrow Instructions between Buyer and Seller, and Seller shall not enter into any such agreements relating to the sale of the Property with any third parties.

**35. Confidentiality**. All parties agree that this Agreement and sales instructions will remain confidential until the earlier of: (1) the approval by City Council at a City Council Meeting of a final Purchase and Sale Agreement and Escrow Instructions, or (2) the rescission of this Purchase and Sale Agreement and Escrow Instructions. Neither Buyer nor Seller shall disclose this Purchase and Sale Agreement and Escrow Instructions or the contents herein to any other party before the earlier to occur of (1) or (2) above, to the extent permitted under the California Public Records Act (California Government Code §7920.000).

**36. Counterpart Signatures.** This Agreement may be executed by each party in one or more counterparts, each of which shall be deemed an original and all of which taken together shall constitute one binding document.

**37. No Attorney's Fees.** In the event of any action or suit under, or to enforce, this Agreement, the parties shall be responsible for their own costs, expenses and

attorney's fees incurred. The prevailing party shall not be entitled to reasonable attorneys' fees.

**38. Independent Counsel.** Each party was represented by legal counsel during the negotiation and execution of this Agreement. Each party shall be responsible for its own, respective, fees and expenses of legal counsel and consultants incurred as a result of this Agreement, or the Transaction contemplated thereby.

**39. Cooperative/Further Assurances.**

39.1 The parties agree to execute such instructions to the Escrow Agent and execute and deliver any and all additional papers, documents or other assurances and shall perform any further acts which may be reasonably necessary to carry out the intent of the parties and the conditions, provisions and terms of the Agreement.

39.2 Current City of Burbank City Business Tax Registration Certificate Required: SELLER shall obtain and keep in full force and effect during the term of this Agreement all Business Tax Registration Certificates required by the City of Burbank Municipal Code. SELLER'S Vendor Registration Number must be shown on all invoices submitted for payment. Failure to do so may delay payment. For additional information regarding applicability of the City Business Tax Registration, contact the City of Burbank, City Clerk's Office.

IN WITNESS WHEREOF, Seller and Buyer have executed this Purchase and Sale Agreement and Escrow Instructions as of the dates set forth below.

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS:

PARCEL A:

PARCEL 1:

THAT PORTION OF LOT 1 OF FAWKE'S SUBDIVISION, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 70 PAGES 58 AND 59 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, LYING NORTHWESTERLY OF THE NORTHWEST LINE OF THE STRIP OF LAND 17 FEET WIDE CONVEYED TO THE SOUTHERN PACIFIC RAILROAD COMPANY AND DESCRIBED IN PARCEL 1 OF THE DEED RECORDED IN BOOK 2296 PAGE 399, OF OFFICIAL RECORDS.

ALSO THE NORTHEASTERLY ONE-HALF OF THE VACATED ALLEY 20 FEET WIDE, LYING ADJACENT TO THE SOUTHWESTERLY LINE OF THE ABOVE DESCRIBED LAND BOUNDED SOUTHEASTERLY BY THE NORTHWEST LINE OF THE ABOVE MENTIONED 17 FOOT STRIP OF LAND.

ALSO INCLUDING THAT PORTION OF LAND AS DESCRIBED IN THE CERTAIN QUITCLAIM DEED BY AND BETWEEN THE LOS ANGELES COUNTY FLOOD CONTROL DISTRICT AND BORRMANN STEEL COMPANY, A CALIFORNIA CORPORATION AND RECORDED DECEMBER 19, 1962 AS INSTRUMENT NO. 2783 OF OFFICIAL RECORDS OF LOS ANGELES COUNTY, CALIFORNIA AND MORE PARTICULARLY DESCRIBED THEREIN.

EXCEPT THAT PORTION OF SAID LOT 1, WHICH IS INCLUDED WITHIN THE LINES OF THE LAND DESCRIBED IN PARCEL 94 OF THE DECREE OF CONDEMNATION FILLED IN CASE NO. 47441 SUPERIOR COURT OF SAID COUNTY, A CERTIFIED COPY OF SAID DECREE BEING RECORDED IN BOOK 19786 PAGE 381, OF OFFICIAL RECORDS OF SAID COUNTY.

PORTION APN: 2451-007-019

PARCEL 2:
THAT PORTION OF LOT 2 OF FAWKE'S SUBDIVISION, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 70 PAGES 58 AND 59 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, LYING NORTHWESTERLY OF THE NORTHWEST LINE OF THE STRIP OF LAND 17 FEET WIDE, CONVEYED TO THE SOUTHERN PACIFIC RAILROAD COMPANY AND DESCRIBED IN PARCEL 1 OF THE DEED RECORDED IN BOOK 2296 PAGE 399, OF OFFICIAL RECORDS OF SAID COUNTY.

ALSO THE SOUTHWESTERLY ONE-HALF OF THE VACATED ALLEY 20 FEET WIDE, LYING ADJACENT TO THE NORTHEASTERLY LINE OF THE ABOVE DESCRIBED LAND, BOUNDED SOUTHEASTERLY BY THE NORTHWEST LINE OF THE ABOVE MENTIONED 17 FOOT STRIP OF LAND.

PORTION APN: 2451-007-019

PARCEL B:

THE NORTHEASTERLY 100.00 FEET OF THAT PORTION OF LOT 3 IN FAWKE'S SUBDIVISION OF BLOCK 87 OF BURBANK, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 70 PAGE 58 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, BOUNDED ON THE SOUTHEAST BY THE NORTHWESTERLY LINE OF THE 17 FOOT STRIP OF LAND CONVEYED TO THE SOUTHERN PACIFIC RAILROAD COMPANY, DESCRIBED AS PARCEL 1 IN DEED RECORDED IN BOOK 2296 PAGE 399, OF OFFICIAL RECORDS AND BOUNDED ON THE NORTHEAST BY THE SOUTHWESTERLY LINE OF HARRISON STREET VACATED, AS SHOWN ON THE MAP OF SAID TRACT AND BOUNDED ON THE SOUTHWEST AND NORTHWEST BY THE SOUTHWESTERLY AND NORTHWESTERLY LINES, RESPECTIVELY OF SAID LOT.

ALSO A STRIP OF LAND 50 FEET WIDE LYING NORTHEASTERLY OF AND CONTIGUOUS WITH THE NORTHEASTERLY LINE OF SAID LOT 3 AND MARKED "HARRISON STREET" (NOW VACATED) ON SAID MAP, LYING BETWEEN THE NORTHEASTERLY PROLONGATION OF THE NORTHWESTERLY AND SOUTHEASTERLY LINES RESPECTIVELY OF SAID LOT ABOVE DESCRIBED.

APN: 2451-007-020

PARCEL C:
THOSE PORTIONS OF LOTS 1, 2 AND 3 OF THE REPLAT OF FAWKES SUBDIVISION OF PLAT 87 OF BURBANK, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, TOGETHER WITH A PORTION OF VACATED HARRISON STREET, 50 FEET IN WIDTH, LYING BETWEEN SAID LOTS 2 AND 3 AND A PORTION OF VACATED ALLEY, 20 FEET IN WIDTH, LYING BETWEEN LOTS 1 AND 2, AS SHOWN ON MAP RECORDED IN BOOK 70, PAGES 58 AND 59 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY DESCRIBED AS PARCEL 1 IN THE DEED RECORDED IN BOOK 2296, PAGE 399, OF OFFICIAL RECORDS, DESCRIBED THEREIN AS FOLLOWS:

BEGINNING AT A POINT IN THE SOUTHWESTERLY LINE OF FLOWER STREET, DISTANT 267.35 FEET, MEASURED SOUTH 46° 48' EAST ALONG SAID SOUTHWESTERLY LINE OF FLOWER STREET FROM ITS INTERSECTION WITH THE EASTERLY LINE OF OLIVE AVENUE; THENCE SOUTHWESTERLY ALONG A CURVE CONCAVE TO THE RIGHT, HAVING A RADIUS OF 467.09 FEET, AND WHOSE RADIAL LINE AT POINT OF BEGINNING BEARS SOUTH 75° 48' 43" EAST, A DISTANCE OF 220.96 FEET TO END OF CURVE; THENCE SOUTH 41° 17' 30" WEST TANGENT TO LAST DESCRIBED CURVE, A DISTANCE OF 695.29 FEET TO A POINT IN THE NORTHEASTERLY LINE OF LAKE STREET; THENCE NORTH 48° 42' 30" WEST, ALONG SAID NORTHEASTERLY LINE OF LAKE STREET, A DISTANCE OF 17.00 FEET TO A POINT; THENCE NORTH 41° 17' 30" EAST, A DISTANCE OF 695.29 FEET TO A POINT; THENCE NORTHEASTERLY ALONG A CURVE CONCAVE TO THE LEFT, HAVING A RADIUS OF 450.09 FEET, AND TO WHICH LAST DESCRIBED COURSE IS TANGENT, A DISTANCE OF 222.40 FEET TO A POINT IN AFORESAID SOUTHWESTERLY LINE OF FLOWER STREET; THENCE SOUTH 40° 48' EAST ALONG SAID SOUTHWESTERLY LINE OF FLOWER STREET, A DISTANCE OF 19.55 FEET TO POINT OF BEGINNING. EXCEPT THE SOUTHWESTERLY 440 FEET THEREOF.

EXCEPT THEREFROM ALL MINERALS AND MINERAL RIGHTS OF EVERY KIND AND CHARACTER NOW KNOWN TO EXIST OR HEREAFTER DISCOVERED, INCLUDING, WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, OIL AND GAS RIGHTS THERETO, TOGETHER WITH THE SOLE, EXCLUSIVE AND PERPETUAL RIGHT TO EXPLORE FOR, REMOVE AND DISPOSE OF SAID MINERALS BY ANY MEANS OR METHODS SUITABLE TO GRANTOR, ITS SUCCESSORS AND ASSIGNS, BUT WITHOUT ENTERING UPON OR USING THE SURFACE OF THE PROPERTY, AND IN SUCH MANNER AS NOT TO DAMAGE THE SURFACE OF SAID LANDS OR TO

INTERFERE WITH THE USE THEREOF BY GRANTEE, ITS SUCCESSORS OR ASSIGNS, AS RESERVED IN DEED RECORDED APRIL 26, 2000 AS INSTRUMENT NO. 00-630351, OF OFFICIAL RECORDS.

## LEGAL DESCRIPTION:

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS:

PARCEL A:
PARCEL 1:
THAT PORTION OF LOT 1 OF FAWKE'S SUBDIVISION, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 70 PAGES 58 AND 59 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, LYING NORTHWESTERLY OF THE NORTHWEST LINE OF THE STRIP OF LAND 17 FEET WIDE, CONVEYED TO THE SOUTHERN PACIFIC RAILROAD COMPANY AND DESCRIBED IN PARCEL 1 OF THE DEED RECORDED IN BOOK 2296 PAGE 399, OF OFFICIAL RECORDS.

ALSO THE NORTHEASTERLY ONE-HALF OF THE VACATED ALLEY 20 FEET WIDE, LYING ADJACENT TO THE SOUTHWESTERLY LINE OF THE ABOVE DESCRIBED LAND, BOUNDED SOUTHEASTERLY BY THE NORTHWEST LINE OF THE ABOVE MENTIONED 17 FOOT STRIP OF LAND.

EXCEPT THAT PORTION OF SAID LOT 1, WHICH IS INCLUDED WITHIN THE LINES OF THE LAND DESCRIBED IN PARCEL 94 OF THE DECREE OF CONDEMNATION FILLED IN CASE NO. 47441 SUPERIOR COURT OF SAID COUNTY, A CERTIFIED COPY OF SAID DECREE BEING RECORDED IN BOOK 19786 PAGE 381, OF OFFICIAL RECORDS OF SAID COUNTY.

PORTION APN: 2451-007-019

PARCEL 2:

THAT PORTION OF LOT 2 OF FAWKE'S SUBDIVISION, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 70 PAGES 58 AND 59 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, LYING NORTHWESTERLY OF THE NORTHWEST LINE OF THE STRIP OF LAND 17 FEET WIDE, CONVEYED TO THE SOUTHERN PACIFIC RAILROAD COMPANY AND DESCRIBED IN PARCEL 1 OF THE DEED RECORDED IN BOOK 2296 PAGE 399, OF OFFICIAL RECORDS OF SAID COUNTY.

ALSO THE SOUTHWESTERLY ONE-HALF OF THE VACATED ALLEY 20 FEET WIDE, LYING ADJACENT TO THE NORTHEASTERLY LINE OF THE ABOVE DESCRIBED LAND, BOUNDED SOUTHEASTERLY BY THE NORTHWEST LINE OF THE ABOVE MENTIONED 17 FOOT STRIP OF LAND.

PORTION APN: 2451-007-019

PARCEL B:
THE NORTHEASTERLY 100.00 FEET OF THAT PORTION OF LOT 3 IN FAWKE'S SUBDIVISION OF BLOCK 87 OF BURBANK, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 70 PAGE 58 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, BOUNDED ON THE SOUTHEAST BY THE NORTHWESTERLY LINE OF THE 17 FOOT STRIP OF LAND CONVEYED TO THE SOUTHERN PACIFIC RAILROAD COMPANY, DESCRIBED AS PARCEL 1 IN DEED RECORDED IN BOOK 2296 PAGE 399, OF OFFICIAL RECORDS AND BOUNDED ON THE NORTHEAST BY THE SOUTHWESTERLY LINE OF HARRISON STREET VACATED, AS SHOWN ON THE MAP OF SAID TRACT AND BOUNDED ON THE SOUTHWEST AND NORTHWEST BY THE SOUTHWESTERLY AND NORTHWESTERLY LINES, RESPECTIVELY OF SAID LOT.

ALSO A STRIP OF LAND 50 FEET WIDE LYING NORTHEASTERLY OF AND CONTIGUOUS WITH THE NORTHEASTERLY LINE OF SAID LOT 3 AND MARKED "HARRISON STREET" (NOW VACATED) ON SAID MAP, LYING BETWEEN THE NORTHEASTERLY PROLONGATION OF THE NORTHWESTERLY AND SOUTHEASTERLY LINES RESPECTIVELY OF SAID LOT ABOVE DESCRIBED.

APN: 2451-007-020

PARCEL C:
THOSE PORTIONS OF LOTS 1, 2 AND 3 OF THE REPLAT OF FAWKES SUBDIVISION OF PLAT 87 OF BURBANK, IN THE CITY OF BURBANK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, TOGETHER WITH A PORTION OF VACATED HARRISON STREET, 50 FEET IN WIDTH, LYING BETWEEN SAID LOTS 2 AND 3 AND A PORTION OF VACATED ALLEY, 20 FEET IN WIDTH, LYING BETWEEN LOTS 1 AND 2, AS SHOWN ON MAP RECORDED IN BOOK 70, PAGES 58 AND 59 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY DESCRIBED AS PARCEL 1 IN THE DEED RECORDED IN BOOK 2296, PAGE 399, OF OFFICIAL RECORDS, DESCRIBED THEREIN AS FOLLOWS:

BEGINNING AT A POINT IN THE SOUTHWESTERLY LINE OF FLOWER STREET, DISTANT 267.35 FEET, MEASURED SOUTH 46° 48' EAST ALONG SAID SOUTHWESTERLY LINE OF FLOWER STREET FROM ITS INTERSECTION WITH THE EASTERLY LINE OF OLIVE AVENUE; THENCE SOUTHWESTERLY ALONG A CURVE CONCAVE TO THE RIGHT, HAVING A RADIUS OF 467.09 FEET, AND WHOSE RADIAL LINE AT POINT OF BEGINNING BEARS SOUTH 75° 48' 43" EAST, A DISTANCE OF 220.96 FEET TO END OF CURVE; THENCE SOUTH 41° 17' 30" WEST TANGENT TO LAST DESCRIBED CURVE, A DISTANCE OF 695.29 FEET TO A POINT IN THE NORTHEASTERLY LINE OF LAKE STREET; THENCE NORTH 48° 42' 30" WEST, ALONG SAID NORTHEASTERLY LINE OF LAKE STREET, A DISTANCE OF 17.00 FEET TO A POINT; THENCE NORTH 41° 17' 30" EAST, A DISTANCE OF 695.29 FEET TO A POINT; THENCE NORTHEASTERLY ALONG A CURVE CONCAVE TO THE LEFT, HAVING A RADIUS OF 450.09 FEET, AND TO WHICH LAST DESCRIBED COURSE IS TANGENT, A DISTANCE OF 223.40 FEET TO A POINT IN AFORESAID SOUTHWESTERLY LINE OF FLOWER STREET; THENCE SOUTH 40° 48' EAST ALONG SAID SOUTHWESTERLY LINE OF FLOWER STREET, A DISTANCE OF 19.55 FEET TO POINT OF BEGINNING.

EXCEPT THE SOUTHWESTERLY 440 FEET THEREOF.

EXCEPT THEREFROM ALL MINERALS AND MINERAL RIGHTS OF EVERY KIND AND CHARACTER NOW KNOWN TO EXIST OR HEREAFTER DISCOVERED, INCLUDING, WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, OIL AND GAS RIGHTS THERETO, TOGETHER WITH THE SOLE, EXCLUSIVE AND PERPETUAL RIGHT TO EXPLORE FOR, REMOVE AND DISPOSE OF SAID MINERALS BY ANY MEANS OR METHODS SUITABLE TO GRANTOR, ITS SUCCESSORS AND ASSIGNS, BUT WITHOUT ENTERING UPON OR USING THE SURFACE OF THE PROPERTY, AND IN SUCH MANNER AS NOT TO DAMAGE THE SURFACE OF SAID LANDS OR TO INTERFERE WITH THE USE THEREOF BY GRANTEE, ITS SUCCESSORS OR ASSIGNS, AS RESERVED IN DEED RECORDED APRIL 26, 2000 AS INSTRUMENT NO. 00-630351, OF OFFICIAL RECORDS.

APN 2451-007-026

## TITLE REPORT EXCEPTIONS:

THE FOLLOWING EASEMENTS, STATEMENTS AND MATTERS AS DISCLOSED IN FIDELITY NATIONAL TITLE COMPANY PRELIMINARY REPORT ORDER NO.: FBDO-2511013 DATED FEBRUARY 5, 2026.

NO RESPONSIBILITY FOR COMPLETENESS, ACCURACY OR CONTENT OF SAID PRELIMINARY REPORT IS ASSUMED BY THIS MAP.

(NO) INDICATES ITEM NUMBER PER SCHEDULE "B", EXCEPTIONS TO COVERAGE, OF ABOVE PRELIMINARY REPORT.

(A-F) TAXES, ASSESSMENTS AND LIEN OF SUPPLEMENTAL OR ESCAPED ASSESSMENTS, IF ANY.

(1) 1. WATER RIGHTS, CLAIMS OR TITLE TO WATER, WHETHER OR NOT DISCLOSED BY THE PUBLIC RECORDS.

THE FOLLOWING ITEMS AFFECT PARCEL A:

(2) 2. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT:
PURPOSE: PIPELINES AND DITCHES
RECORDING NO: IN BOOK 470, PAGE 83 OF DEEDS
AFFECTS: A PORTION OF SAID LAND
REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.
AND RECORDING NO.: IN BOOK 698, PAGE 314, OF DEEDS
(EASEMENT IS NOT PLOTTABLE PER RECORD THEREFORE NOTHING IS PLOTTED HEREON)

(3) 3. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
GRANTED TO: THE CITY OF BURBANK, A MUNICIPAL CORPORATION
PURPOSE: PUBLIC ROAD AND HIGHWAY
RECORDING NO.: IN BOOK 19213, PAGE 253, OFFICIAL RECORDS
AFFECTS: THE NORTHWESTERLY 20 FEET OF SAID LAND
(EASEMENT PLOTTED HEREON)

(4) 4. AN INSTRUMENT ENTITLED COVENANT AND AGREEMENT TO INSTALL SPRINKLER SYSTEM
EXECUTED BY: BORRMANN STEEL COMPANY, A CALIFORNIA CORPORATION
IN FAVOR OF: THE CITY OF BURBANK
RECORDING DATE: FEBRUARY 17, 1958
RECORDING NO.: AS INSTRUMENT NO. 3037, OFFICIAL RECORDS
REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.
(NO PLOTTABLE SURVEY ITEMS)

(5) 5. THE COMMUNITY INTEREST OF THE SPOUSE OF THE VESTEES NAMED BELOW.
VESTEE: TASHA SOUNART, KELSEY HENDRIX, HUNTER PERSSON AND PRESTIN WITTBRODT
THE COMPANY WILL REQUIRE THAT THE SPOUSE OF THE VESTEE SHOWN ABOVE JOIN IN ANY CONVEYANCE OR ENCUMBRANCE BEFORE SUCH TRANSACTION WILL BE INSURED.
(NO PLOTTABLE SURVEY ITEMS)

THE FOLLOWING ITEMS AFFECT PARCEL B:

(6) 6. MATTERS CONTAINED IN THAT CERTAIN DOCUMENT
ENTITLED: AGREEMENT
RECORDING NO.: IN BOOK 2296, PAGE 399 OF OFFICIAL RECORDS
REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.
AND RECORDING DATE: MARCH 28, 1924
AND RECORDING NO.: IN BOOK 3118, PAGE 288 OF OFFICIAL RECORDS
(NO PLOTTABLE SURVEY ITEMS)

(7) 7. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
GRANTED TO: CITY OF BURBANK
PURPOSE: PUBLIC ROAD, HIGHWAY AND STREET
RECORDING NO.: IN BOOK 18011, PAGE 249 OF OFFICIAL RECORDS
AFFECTS: A PORTION OF SAID LAND
REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.
(EASEMENT PLOTTED HEREON)

(8) 8. THE LAND DESCRIBED HEREIN IS INCLUDED WITHIN A PROJECT AREA OF THE REDEVELOPMENT AGENCY SHOWN BELOW, AND THAT PROCEEDINGS FOR THE REDEVELOPMENT OF SAID PROJECT HAVE BEEN INSTITUTED UNDER THE REDEVELOPMENT LAW (SUCH REDEVELOPMENT TO PROCEED ONLY AFTER THE ADOPTION OF THE REDEVELOPMENT PLAN) AS DISCLOSED BY A DOCUMENT.
REDEVELOPMENT AGENCY: BURBANK REDEVELOPMENT AGENCY
REDEVELOPMENT PROJECT
RECORDING DATE: JULY 1, 1997
RECORDING NO.: 97-979283 OF OFFICIAL RECORDS
(NO PLOTTABLE SURVEY ITEMS)

(9) 9. THE LAND DESCRIBED HEREIN IS INCLUDED WITHIN A PROJECT AREA OF THE REDEVELOPMENT AGENCY SHOWN BELOW, AND THAT PROCEEDINGS FOR THE REDEVELOPMENT OF SAID PROJECT HAVE BEEN INSTITUTED UNDER THE REDEVELOPMENT LAW (SUCH REDEVELOPMENT TO PROCEED ONLY AFTER THE ADOPTION OF THE REDEVELOPMENT PLAN) AS DISCLOSED BY A DOCUMENT.
REDEVELOPMENT AGENCY: THE SOUTH SAN FERNANDO REDEVELOPMENT PROJECT AREA
RECORDING DATE: DECEMBER 13, 2007
RECORDING NO.: 20072743137 OF OFFICIAL RECORDS
(NO PLOTTABLE SURVEY ITEMS)

(10) 10. THE COMMUNITY INTEREST OF THE SPOUSE OF THE VESTEES NAMED BELOW.
VESTEE: TASHA SOUNART, KELSEY HENDRIX, HUNTER PERSSON AND PRESTIN WITTBRODT
THE COMPANY WILL REQUIRE THAT THE SPOUSE OF THE VESTEE SHOWN ABOVE JOIN IN ANY CONVEYANCE OR ENCUMBRANCE BEFORE SUCH TRANSACTION WILL BE INSURED.
(NO PLOTTABLE SURVEY ITEMS)

THE FOLLOWING ITEMS AFFECT PARCEL C:

(11) 11. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
GRANTED TO: LOS ANGELES COUNTY FLOOD CONTROL DISTRICT
PURPOSE: PUBLIC UTILITIES
RECORDING NO.: IN BOOK 19756, PAGE 340 OF OFFICIAL RECORDS
AFFECTS: A PORTION OF SAID LAND AS MORE PARTICULARLY DESCRIBED IN SAID DOCUMENT
REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.
(EASEMENT PLOTTED HEREON)

(12) 12. THE LAND DESCRIBED HEREIN IS INCLUDED WITHIN A PROJECT AREA OF THE REDEVELOPMENT AGENCY SHOWN BELOW, AND THAT PROCEEDINGS FOR THE REDEVELOPMENT OF SAID PROJECT HAVE BEEN INSTITUTED UNDER THE REDEVELOPMENT LAW (SUCH REDEVELOPMENT TO PROCEED ONLY AFTER THE ADOPTION OF THE REDEVELOPMENT PLAN) AS DISCLOSED BY A DOCUMENT.
REDEVELOPMENT AGENCY: BURBANK REDEVELOPMENT AGENCY
RECORDING DATE: JULY 1, 1997
RECORDING NO.: 97-979283 OF OFFICIAL RECORDS
(NO PLOTTABLE SURVEY ITEMS)

(13) 13. EASEMENT(S) FOR THE PURPOSE(S) SHOWN BELOW AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT:
GRANTED TO: THE CITY OF BURBANK, A MUNICIPAL CORPORATION
PURPOSE: STREET
RECORDING DATE: AUGUST 6, 2019
RECORDING NO.: 2019-779864 OF OFFICIAL RECORDS
AFFECTS: A PORTION OF SAID LAND AS MORE PARTICULARLY DESCRIBED IN SAID DOCUMENT.
REFERENCE IS HEREBY MADE TO SAID DOCUMENT FOR FULL PARTICULARS.
(LAND DESCRIBED IN SAID DOCUMENT PLOTTED HEREON. TITLE TO VERIFY IF LAND WAS GRANTED IN FEE)

THE FOLLOWING ITEMS AFFECT ALL PARCELS:

(14) 14. PLEASE BE ADVISED THAT OUR SEARCH DID NOT DISCLOSE ANY OPEN DEEDS OF TRUST OF RECORD. IF YOU SHOULD HAVE KNOWLEDGE OF ANY OUTSTANDING OBLIGATION, PLEASE CONTACT THE TITLE DEPARTMENT IMMEDIATELY FOR FURTHER REVIEW PRIOR TO CLOSING.

(15) 15. MATTERS WHICH MAY BE DISCLOSED BY AN INSPECTION AND/OR BY A CORRECT ALTA/NSPS LAND TITLE SURVEY OF SAID LAND THAT IS SATISFACTORY TO THE COMPANY, AND/OR BY INQUIRY OF THE PARTIES IN POSSESSION THEREOF.

(16) 16. ANY EASEMENTS NOT DISCLOSED BY THE PUBLIC RECORDS AS TO MATTERS AFFECTING TITLE TO REAL PROPERTY, WHETHER OR NOT SAID EASEMENTS ARE VISIBLE AND APPARENT.

(17) 17. ANY RIGHTS OF THE PARTIES IN POSSESSION OF A PORTION OF, OR ALL OF, SAID LAND, WHICH RIGHTS ARE NOT DISCLOSED BY THE PUBLIC RECORDS.
THE COMPANY WILL REQUIRE, FOR REVIEW, A FULL AND COMPLETE COPY OF ANY UNRECORDED AGREEMENT, CONTRACT, LICENSE AND/OR LEASE, TOGETHER WITH ALL SUPPLEMENTS, ASSIGNMENTS AND AMENDMENTS THERETO, BEFORE ISSUING ANY POLICY OF TITLE INSURANCE WITHOUT EXCEPTING THIS ITEM FROM COVERAGE.
THE COMPANY RESERVES THE RIGHT TO EXCEPT ADDITIONAL ITEMS AND/OR MAKE ADDITIONAL REQUIREMENTS AFTER REVIEWING SAID DOCUMENTS.

## SURVEYOR'S NOTES:

1. TITLE TO SAID ESTATE OR INTEREST AT THE DATE HEREOF IS VESTED IN:
ROBERT L. PERSSON, TRUSTEE OF THE ROBERT L. PERSSON TRUST, AS TO AN UNDIVIDED 43.062309% INTEREST, ROBERT G. WEDEEN, TRUSTEE OF THE ROBERT G. WEDEEN TRUST, AS TO AN UNDIVIDED 18.015100% INTEREST, TASHA SOUNART, A MARRIED WOMAN, AS HER SOLE AND SEPARATE PROPERTY, AS TO AN UNDIVIDED 14.957525% INTEREST, KELSEY HENDRIX, A MARRIED WOMAN, AS HER SOLE AND SEPARATE PROPERTY, AS TO AN UNDIVIDED 14.957525% INTEREST, HUNTER PERSSON, A MARRIED MAN, AS HIS SOLE AND SEPARATE PROPERTY, AS TO AN UNDIVIDED 4.503775% INTEREST AND PRESTIN WITTBRODT, A MARRIED WOMAN, AS HER SOLE AND SEPARATE PROPERTY, AS TO AN UNDIVIDED 4.503775% INTEREST, ALL AS TENANTS IN COMMON, AS TO PARCELS A AND B AND

ROBERT K. PERSSON, TRUSTEE THE ROBERT K. PERSSON TRUST, AS TO AN UNDIVIDED 50% INTEREST AND TO ROBERT G. WEDEEN, TRUSTEE, THE ROBERT G. WEDEEN TRUST, AS TO AN UNDIVIDED 50% INTEREST, TENANTS IN COMMON, AS TO PARCEL C.

2. PROJECT ADDRESS: 110 W. OLIVE AVENUE, BURBANK, CALIFORNIA

3. ASSESSOR'S PARCEL NUMBERS: APN 2451-007-019, APN 2451-007-020, APN 2451-007-026

4. PARCEL AREAS:
LAND DESCRIBED IN THE TITLE REPORT:

| | |
|---|---|
| LEGAL DESCRIPTION FEE: | 136,602 S.F./3.136 ACRES |
| EXISTING STREET AREA: | 1,056 S.F./0.024 ACRES |
| AREA DESCRIBED IN (13): | 8,852 S.F./0.203 ACRES |
| NET AREA = FEE – STREET – (13): | 126,689 S.F./2.909 ACRES |

5. ZONING INFORMATION:
(THE FOLLOWING ZONE DESIGNATIONS ARE PER CITY OF BURBANK DEPARTMENT OF COMMUNITY DEVELOPMENT)
GENERAL PLAN DESIGNATION: DOWNTOWN COMMERCIAL
ZONE DESIGNATION: BCCM–BURBANK CENTER COMMERCIAL MANUFACTURING
SPECIFIC PLAN: BURBANK CENTER SPECIFIC PLAN:
BCCM BURBANK CENTER COMMERCIAL MANUFACTURING ZONE
MIXED COMMERCIAL/OFFICE/INDUSTRIAL

NOTE: FOLLOWING ARE SELECTED ZONING AND/OR DEVELOPMENT REQUIREMENTS OF PARTICULAR RELEVANCE TO THE PROPERTY SHOWN HEREON, AND SHOULD NOT BE CONSTRUED AS REPRESENTING THE TOTALITY OF SUCH REQUIREMENTS THAT MAY BE ASSOCIATED WITH SAID PROPERTY. IT IS RECOMMENDED THAT INTERESTED PARTIES CONSULT AN OFFICIAL COPY OF THE COMPLETE MUNICIPAL ZONING CODE, AS WELL AS ANY EXISTING AGREEMENTS OR OTHER SIMILAR DOCUMENTS, FOR A GREATER DEMONSTRATION OF THE REQUIREMENTS ASSOCIATED WITH THE PROPERTY SHOWN HEREON.

6. SELECTED ZONING REQUIREMENTS:
(THE FOLLOWING REQUIREMENTS ARE PER BURBANK CENTER SPECIFIC PLAN AND BURBANK MUNICIPAL CODE)
1) BUILDING SETBACK REQUIREMENTS (SECTION 31-2531 AND ARTICLE 10-1-724):
A. ALL STRUCTURES, INCLUDING SEMI-SUBTERRANEAN GARAGES, BUT EXCLUDING ABOVE-GRADE PARKING STRUCTURES, SHALL BE SET BACK AT LEAST FIVE (5) FEET FROM THE FRONT LOT LINE OR 20 PERCENT OF THE BUILDING HEIGHT, WHICHEVER IS GREATER; THIS SETBACK REQUIREMENT MAY BE AVERAGED. SUCH SETBACK SHALL BE REQUIRED FOR NOT LESS THAT PORTION OF A BUILDING THAT IS WITHIN 20 FEET ABOVE GRADE AND SHALL BE CALCULATED FOR THE LENGTH OF THE BUILDING FRONTAGE ONLY. ANY OPEN SPACE OR SURFACE PARKING LOTS NOT IN FRONT OF A STRUCTURE SHALL NOT BE INCLUDED IN CALCULATING AVERAGE SETBACKS. PORTIONS OF BUILDINGS OVER 20 FEET IN HEIGHT MAY EXTEND OVER REQUIRED FRONT YARD SETBACKS, EXCEPT IN AREAS WHERE REQUIRED TREES ARE PLANTED.
B. STRUCTURES, EXCEPT ABOVE-GRADE PARKING STRUCTURES, ON LOTS WITH LESS THAN 25 FEET OF STREET FRONTAGE AND WITH A HEIGHT OF NO MORE THAN 25 FEET, MAY NOT ENCROACH INTO REQUIRED STREET SIDE YARD SETBACKS ON THOSE FRONTAGES OF 75 FEET OR LESS.
C. A MINIMUM OF 50 PERCENT OF FRONT AND EXPOSED SIDE YARDS SHALL BE LANDSCAPED.
D. ANY REQUIRED FRONT SETBACK AREA SHALL HAVE AN AUTOMATIC IRRIGATION SYSTEM AND THE PLANTED MATERIAL REQUIRED BY CODE SHALL BE CONTINUOUSLY MAINTAINED.
2) HEIGHT RESTRICTIONS (SECTION 31-2530):
A. MAXIMUM ALLOWABLE HEIGHT FOR ALL STRUCTURES WITHIN THE BCP AREA
DISTANCE FROM R-1 OR R-2 ZONED LOT LINE: MAXIMUM ALLOWABLE HEIGHT
0–25 FEET: 1 FOOT HEIGHT FOR EACH 1 FOOT OF DISTANCE FROM R-1 OR R-2 LOT LINE FOR ANY PART OF STRUCTURE.
25–50 FEET: 25 FEET FOR ROOF AND ARCHITECTURAL FEATURES MAY EXCEED THE MAXIMUM HEIGHT, UP TO 35 FEET, IF A 45° IS MAINTAINED)
50–150 FEET: 35 FEET
150'–300 FEET: 50 FEET
GREATER THAN 300 FEET: 70 FEET (90 FEET WITHIN THE CIVIC CENTER)
GREATER THAN 500 FEET: 164 FEET (OR 12 STORIES) VA CONDITIONAL USE PERMIT
GREATER THAN 500 FEET: 205 FEET (OR 15 STORIES) VA PLANNED DEVELOPMENT
3) LOT AREA, WIDTH AND DEPTH:
A. THERE ARE NO REQUIREMENTS FOR LOT AREA.
B. THERE ARE NO REQUIREMENTS FOR LOT WIDTH.
C. THERE ARE NO REQUIREMENTS FOR LOT DEPTH
4) PARKING SPACE REQUIREMENTS (ARTICLE 14-10-1-1408):
A. MANUFACTURING AND INDUSTRIAL AND WHOLESALE TRADE: 1 SPACE FOR EACH 500 SQ. FT. OF ADJUSTED GROSS FLOOR AREA.,
B. WAREHOUSES AND BUILDINGS USED IN WHOLE OR IN PART FOR STORAGE PURPOSES: 1 SPACE FOR EACH 1,000 SQ. FT. OF ADJUSTED GROSS FLOOR AREA.
B. OFFICES – GENERAL 3 SPACES FOR EACH 1,000 SQ. FT. OF ADJUSTED GROSS FLOOR AREA.
C. PERSONAL OR PHYSICAL ARTS STUDIO, REHEARSAL STUDIO: (LESS THAN 1,500 SQ. FT.) 3.3 SPACES FOR EACH 1,000 SQ. FT. OF ADJUSTED GROSS FLOOR AREA; (1,500 SQ. FT. TO 2,500) 4 SPACES FOR EACH 1,000 SQ. FT. OF ADJUSTED GROSS FLOOR AREA.; (GREATER THAN 2,500 SQ. FT.) 6 SPACES FOR EACH 1,000 SQ. FT. OF ADJUSTED GROSS FLOOR ARE.

7. A PORTION OF THE PROPERTY SHOWN HEREON IS SITUATED WITHIN ZONE "X–UNSHADED" (AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN), AS SHOWN ON A FLOOD INSURANCE RATE MAP (F.I.R.M.) WITH MAP NO. 06037C1337F, EFFECTIVE DATE: SEPTEMBER 26, 2008, COMMUNITY NUMBER: 065018 FOR CITY OF BURBANK, PANEL NUMBER: 1337, SUFFIX: "F", AND AS ALSO SHOWN ON A FLOOD INSURANCE RATE MAP (F.I.R.M.) WITH MAP NO. 06037C1345F, EFFECTIVE DATE: SEPTEMBER 26, 2008, COMMUNITY NUMBER: 065018 FOR CITY OF BURBANK, PANEL NUMBER: 1345, SUFFIX: "F".

8. SUBJECT SITE DESCRIBED IN THE TITLE REPORT IS CURRENTLY DEVELOPED WITH 1 ONE-STORY BUILDING WITH A BUILDING PERIMETER FOOTPRINT AREA OF 76,118 SQ. F.T AND HAS THE FOLLOWING PARKING SPACE COUNT:

NUMBER OF REGULAR SPACES = 2
NUMBER OF HANDICAP SPACES = 1

TOTAL NUMBER OF PARKING SPACES = 3

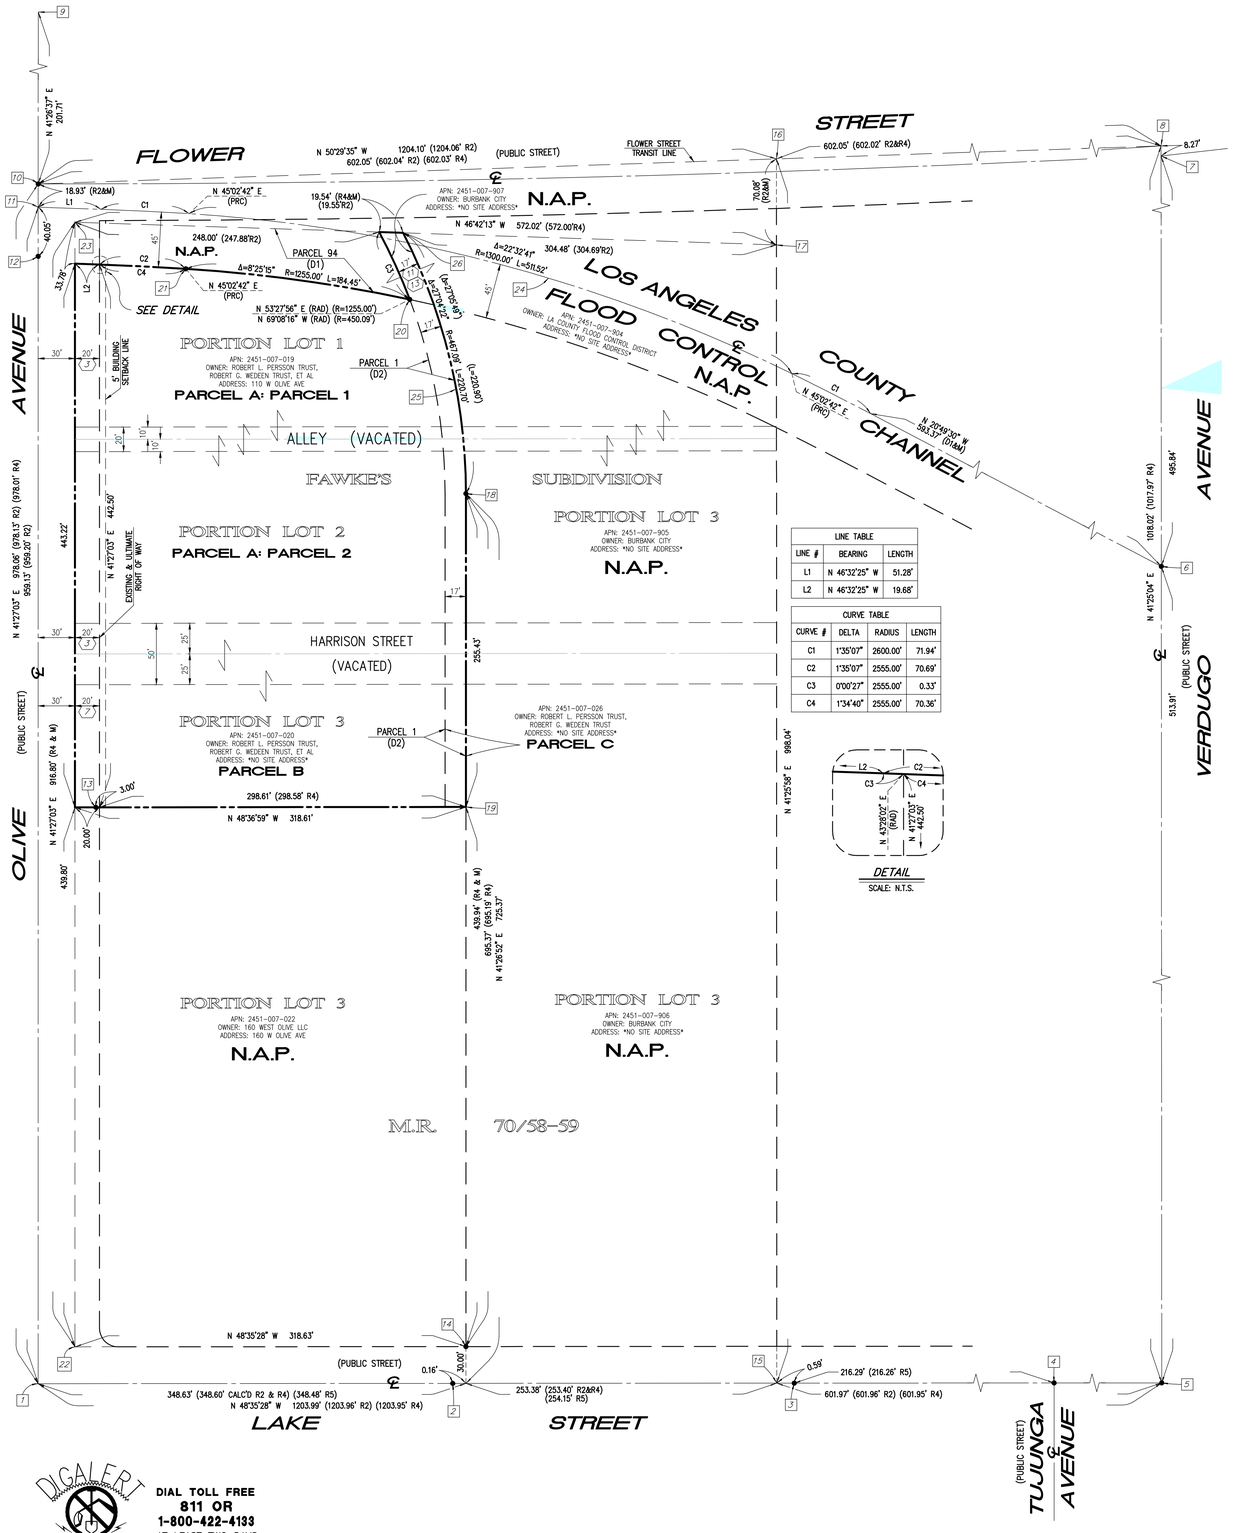
TOTAL NUMBER OF GRADE LEVEL BAYDOORS = 2

9. GEOLOGICAL HAZARDS:
A. ALQUIST-PRIOLO SPECIAL STUDIES ZONES:
SUBJECT PROPERTY IS OUTSIDE OF ANY ALQUIST PRIOLO SPECIAL STUDIES ZONES AS SHOWN ON SPECIAL STUDIES ZONES OFFICIAL MAP FOR BURBANK QUADRANGLE, EFFECTIVE: JANUARY 1, 1979.
B. SEISMIC HAZARD ZONES:
SUBJECT PROPERTY IS WITHIN A ZONE REQUIRING INVESTIGATION FOR LIQUEFACTION BUT IS OUTSIDE OF ANY ZONE REQUIRING INVESTIGATION FOR EARTHQUAKE-INDUCED LANDSLIDES AS SHOWN ON SEISMIC HAZARD ZONES OFFICIAL MAP FOR BURBANK QUADRANGLE, RELEASED: MARCH 25, 1999.

10. THIENES ENGINEERING, INC. HAS PERFORMED NO INDEPENDENT TITLE INVESTIGATION NOR OTHERWISE SEARCHED FOR EASEMENTS OF RECORD, ENCUMBRANCES, RESTRICTIVE COVENANTS, OWNERSHIP, TITLED EVIDENCE OR ANY OTHER SIMILAR INFORMATION THAT MAY BE DISCLOSED BY AN ACCURATE AND CURRENT "ABSTRACT OF TITLE" OR "TITLE POLICY." EASEMENTS ARE SHOWN HEREON BASED ON INFORMATION DISCLOSED BY A TITLE REPORT, LISTED HEREON, WHICH HAS BEEN DRAFTED, AND, IN SOME CASES UPDATED AND/OR REVISED, BY A TITLE INSURANCE COMPANY, ALSO LISTED HEREON, AND SUPPLIED TO THE UNDERSIGNED THEREBY.

11. SUBSURFACE AND ENVIRONMENTAL CONDITIONS WERE NOT EXAMINED OR CONSIDERED AS PART OF THIS SURVEY.

12. THIS SURVEY DOES NOT INCLUDE LOCATIONS OF OR ENCROACHMENTS BY SUB-SURFACE FOOTINGS AND/OR FOUNDATIONS OF BUILDINGS, WALLS OR OTHER IMPROVEMENTS SHOWN ON THIS MAP.



13. SUBSTRUCTURE UTILITIES ARE SHOWN HEREON BASED SOLELY ON INFORMATION DISCLOSED TO UNDERSIGNED BY LOCAL, STATE AND FEDERAL GOVERNMENTAL AGENCIES AND/OR INFORMATION DISCLOSED TO UNDERSIGNED BY PRIVATE UTILITY COMPANIES. ALTHOUGH SAID SUBSTRUCTURE UTILITIES SHOWN HEREON ARE BELIEVED TO BE REASONABLY ACCURATE, PHYSICAL FIELD VERIFICATION OF THE CHARACTER AND LOCATIONS OF SAID SUBSTRUCTURE UTILITIES IS REQUIRED. THIENES ENGINEERING, INC. MAKES NO GUARANTEE, WARRANTY OR OTHER REPRESENTATION, EITHER EXPRESSLY OR IMPLIED, AS TO THE ACCURACY AND/OR THOROUGHNESS OF SUCH INFORMATION. THEREFORE, ALL GENERALIZED STATEMENTS SHOWN HEREON, INCLUDING BUT NOT LIMITED TO, "ALL UTILITIES," "ALL KNOWN UTILITIES," "ALL UTILITIES KNOWN TO THE UNDERSIGNED," AND THE LIKE, AS WELL AS REFERENCES TO LISTS OF UTILITIES ARE TO BE CONSTRUED AS BEING STRICTLY REFERENCES TO ONLY THOSE UTILITIES DISCLOSED TO THE UNDERSIGNED BY SAID LOCAL, STATE AND FEDERAL GOVERNMENTAL AGENCIES AND/OR INFORMATION DISCLOSED BY SAID PRIVATE UTILITY COMPANIES, AND EXCLUDES ALL UTILITIES AND UTILITY-RELATED INFORMATION, IF ANY, WHICH HAS NOT BEEN DISCLOSED TO THE UNDERSIGNED.

14. AS A MATTER OF POLICY, ONLY OFFICIALLY RELEASED COPIES OF THIS SURVEY HAVE A SIGNATURE TOGETHER WITH THE RELEASE/REVISION DATE(S) SHOWN. ANY MODIFICATIONS, UPDATES, OR REVISIONS WITH THEIR EFFECTIVE RELEASE DATES WILL BE SHOWN THEREON. ANY PARTIES REQUIRING INFORMATION WHICH CANNOT BE DERIVED FROM THIS SURVEY AFTER THE INITIAL RELEASE DATE ARE ADVISED TO CONTACT THE OFFICE OF THE PREPARER TO INQUIRE ON THE PRESENT STATUS OF THE SURVEY AND IF LATER VERSIONS HAVE BEEN RELEASED. COPIES OF THIS SURVEY LACKING THE HEREIN ABOVE MENTIONED SIGNATURE ARE TO BE CONSIDERED AS UNOFFICIAL VERSIONS.

15. PHOTOGRAMMETRIC MAPPING PROCEDURES MAY HAVE BEEN UTILIZED AS THE BASIS FOR THE LOCATION OF CERTAIN FEATURES SHOWN HEREON (EXCLUDING BOUNDARIES). WHERE GROUND MEASUREMENTS ARE NOT OTHERWISE NECESSARY TO LOCATE THOSE FEATURES TO AN APPROPRIATE AND ACCEPTABLE ACCURACY RELATIVE TO A NEARBY BOUNDARY, THE MAP ACCURACY STANDARDS SUPPLIED BY THE PHOTOGRAMMETRIST INDICATES THAT NINETY (90) PERCENT OF ALL PLANIMETRIC FEATURES WHICH ARE WELL-DEFINED ON THE PHOTOGRAPHS ARE PLOTTED SO THAT THEIR POSITION ON THE FINISHED MAPS SHALL BE ACCURATE TO WITHIN 0.5 FEET OF THEIR TRUE COORDINATE POSITION, WHICH COULD BE DETERMINED BY TEST SURVEYS. NONE OF THE FEATURES TESTED SHOULD BE MISPLACED BY MORE THAN 1.0 FEET IN SUCH A TEST SURVEY. IF CONTOURS ARE SHOWN HEREON AND IF SAID CONTOURS WERE PLOTTED BY PHOTOGRAMMETRIC MAPPING PROCEDURES, THEN NINETY (90) PERCENT OF THE ELEVATIONS DETERMINED FROM THE SOLID-LINE CONTOURS SHALL HAVE ACCURACY WITH RESPECT TO TRUE ELEVATION OF ONE-HALF (1/2) CONTOUR INTERVAL OR BETTER. THE REMAINING TEN (10) PERCENT OF SUCH ELEVATIONS SHALL BE NOT IN ERROR BY MORE THAN ONE CONTOUR INTERVAL. IN DENSELY WOODED AREAS WHERE HEAVY BRUSH OR TREE COVER OBSCURES THE GROUND, THE CONTOURS ARE SHOWN AS DASHED LINES AND THEY ARE PLOTTED AS ACCURATELY AS POSSIBLE UNDER THOSE CONDITIONS. NINETY (90) PERCENT OF ALL SPOT ELEVATIONS PLOTTED BY PHOTOGRAMMETRIC MAPPING PROCEDURES SHALL HAVE ACCURACY AT LEAST ONE-FORTH (1/4) THE CONTOUR INTERVAL. THE REMAINING TEN (10) PERCENT SHALL BE NOT IN ERROR BY MORE THAN ONE-HALF (1/2) THE CONTOUR INTERVAL.

16. IN THE PROCESS OF CONDUCTING OUR FIELDWORK WE DID NOT FIND EVIDENCE OF RECENT EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS OVER AND ABOVE SITE IMPROVEMENTS DELINEATED HEREON.

17. THERE IS NO OBSERVABLE EVIDENCE OF CHANGES IN STREET RIGHT-OF-WAY LINES, RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS OVER AND ABOVE SITE IMPROVEMENTS DELINE

| LINE TABLE | | |

## MONUMENT & ESTABLISHMENT NOTES:

1. S.F.N.; CENTERLINE INTERSECTION OF OLIVE STREET AND LAKE STREET; ESTABLISHED BY TIES PER PWFB 1719/1436.
2. FOUND SPIKE AND WASHER STAMPED "LS 5748", FLUSH, PER R5; ACCEPTED AS A POINT ON CENTERLINE OF LAKE STREET.
3. FOUND SPIKE AND WASHER STAMPED "LS 5748", FLUSH, PER R5; ACCEPTED AS A POINT ON CENTERLINE OF LAKE STREET.
4. FOUND SPIKE AND WASHER STAMPED "LS 8271", FLUSH, PER R5; ACCEPTED AS CENTERLINE INTERSECTION OF LAKE STREET AND TUJUNGA AVENUE.
5. FOUND PK NAIL, NO TAG, FLUSH, IN LIEU OF SPIKE AND WASHER STAMPED "LS 4016" PER FB 334, PG 197, FITS TIES PER SAID FB; ACCEPTED AS THE CENTERLINE INTERSECTION OF LAKE STREET AND VERDUGO AVENUE.
6. FOUND SPIKE AND WASHER STAMPED "CITY ENG", UP 0.1', PER R6; ACCEPTED AS THE CENTERLINE INTERSECTION OF VERDUGO AVENUE AND L.A.C.F.C.D. RIGHT OF WAY.
7. S.F.N.; CENTERLINE INTERSECTION OF VERDUGO AVENUE AND FLOWER STREET (EAST); ESTABLISHED BY TIES PER PWFB 1719/1446.
8. S.F.N.; CENTERLINE INTERSECTION OF VERDUGO AVENUE AND FLOWER STREET (WEST); ESTABLISHED BY HOLDING A RECORD DISTANCE OF 8.27' ALONG THE NORTHEASTERLY PROLONGATION OF 6 - 7 FROM 7 PER R4.
9. FOUND 2" IRON PIPE TAGGED "LS 5381", FLUSH, PER R3; ACCEPTED AS BEING A POINT ON THE CENTERLINE OF OLIVE AVENUE.
10. FOUND MAG NAIL, NO TAG, IN LIEU OF SPIKE AND WASHER STAMPED "LS 2988", FLUSH, PER PWFB 1719/814, FITS TIES PER SAID FB; ACCEPTED AS AN ANGLE POINT ON THE CENTERLINE OF OLIVE AVENUE.
11. S.F.N.; CENTERLINE INTERSECTION OF OLIVE AVENUE AND L.A.C.F.C.D. CHANNEL; ESTABLISHED BY HOLDING A RECORD DISTANCE OF 18.93' FROM 10 ALONG 1 - 10.
12. FOUND MAG NAIL, NO TAG, IN LIEU OF SPIKE AND WASHER STAMPED "LS 2988", FLUSH, PER PWFB 1719/814, FITS TIES PER SAID FB; ACCEPTED AS A POINT ON THE CENTERLINE OF OLIVE AVENUE.
13. FOUND LEAD, TACK AND TAG "LS 2505", FLUSH, PER R4; ACCEPTED AS 3' OFFSET MEASURED ALONG THE PROLONGATION OF THE NORTHEASTERLY LINE R4.
14. FOUND 1" IRON PIPE TAGGED "PLS 7780", FLUSH, PER R4; ACCEPTED AS THE SOUTHERLY CORNER OF R4.
15. S.F.N.; INTERSECTION OF THE SOUTHWESTERLY PROLONGATION OF SOUTHEASTERLY LINE OF R2 AND THE CENTERLINE OF LAKE STREET; ESTABLISHED BY PRORATION ALONG THE CENTERLINE OF LAKE STREET BETWEEN 1 AND 5 PER R2.
16. INTERSECTION OF THE SOUTHEASTERLY LINE OF R2 AND FLOWER STREET TRANSIT LINE; ESTABLISHED BY PRORATION ALONG FLOWER STREET TRANSIT LINE BETWEEN 8 AND 10 PER R4.
17. INTERSECTION OF THE NORTHERLY LINE OF R1 AND THE SOUTHEASTERLY LINE OF R2; ESTABLISHED BY HOLDING A RECORD DISTANCE OF 70.08' FROM 16 ALONG 15 - 16 PER R2 & R4.
18. FOUND 2" IRON PIPE, OPEN, DOWN 0.4'; ACCEPTED AS BEING THE SAME 2" IRON PIPE TAGGED "LS 2568" AT THE BC IN THE NORTHWESTERLY LINE OF R2 PER PER R2.
19. S.F.N.; ESTABLISHED HOLDING A RECORD DISTANCE OF 439.94' FROM 14 ALONG 14 - 18 PER R4.
20. FOUND 3.5" BRASS DISK STAMPED "LOS ANGELES COUNTY FLOOD CONTROL DISTRICT", DOWN 0.5', NO REFERENCE; ACCEPTED AS THE INTERSECTION OF SOUTHERLY RIGHT-OF-WAY LINE OF L.A.C.F.C.D. CHANNEL AND WESTERLY RIGHT-OF-WAY LINE OF SOUTHERN PACIFIC RAILROAD COMPANY.
21. FOUND 3.5" BRASS DISK STAMPED "LOS ANGELES COUNTY FLOOD CONTROL DISTRICT", UP 0.2', NO REFERENCE; ACCEPTED AS PCC IN SOUTHERLY RIGHT-OF-WAY LINE OF L.A.C.F.C.D. CHANNEL.
22. WESTERLY CORNER OF LOT 3 OF R1; ESTABLISHED BY INTERSECTION.
23. NORTHERLY CORNER OF LOT 1 OF R1; ESTABLISHED BY HOLDING A RECORD DISTANCE OF 916.80' FROM 22 ALONG THE SOUTHEASTERLY RIGHT OF WAY OF OLIVE AVENUE (30.00-FOOT HALF WIDTH) PER R4.
24. CENTERLINE OF L.A.C.F.C.D. RIGHT OF WAY; ESTABLISHED BY HOLDING RECORD DATA BETWEEN 6 AND 11 PER D1.
25. TANGENT CURVE IN THE SOUTHEASTERLY RIGHT-OF-WAY LINE OF THE SOUTHERN PACIFIC RAILROAD COMPANY; ESTABLISHED AS BEING TANGENT TO 14 - 18 HOLDING A RECORD RADIUS OF 467.09' PER D2 AND R4.
26. INTERSECTION OF SOUTHEASTERLY RIGHT-OF-WAY LINE OF THE SOUTHERN PACIFIC RAILROAD COMPANY AND NORTHERLY LINE OF LOT 1 OF R1; ESTABLISHED BY INTERSECTION LINE 17 - 23 AND 25.

4.0 Recommendations

5.0 Confidentiality and Limitations

## APPENDICES

A. Bulk Sampling Summary – Asbestos

B. Bulk Sampling Summary - Lead

C. Laboratory Report – Asbestos

D. Laboratory Report – Lead

## 1.0 SCOPE OF WORK

gale/jordan associates, inc. (gja) was retained by the City of Burbank to conduct a limited asbestos and lead survey at the Borrmann Metal Center, located at 110 W. Olive Ave. in Burbank, CA 91502.

Fidel Flores, Cal/OSHA Certified Asbestos Consultant No. 08-4375 Exp. 5/15/26 and CDPH Certified Lead Inspector/Assessor No. LRC00004602, Exp. 12/13/26, conducted the survey on January 22, 2026. He is also accredited by EPA/AHERA (Asbestos Hazard Emergency Response Act) for "Building Inspection for Asbestos. Thomas Jordan, Cal/OSHA Certified Asbestos Consultant No. 92-0208 Exp. 07/27/26 reviewed the project.

## 2.0 INVESTIGATIVE METHODS

### 2.1 Asbestos

A minimum of three samples of each suspect asbestos-containing material (ACM) were collected and analyzed for asbestos content. This sampling protocol satisfies the guidelines of Cal/OSHA and the South Coast Air Quality Management District for the materials sampled. The sampling was limited to visible and accessible materials. No destructive sampling was conducted; therefore, other asbestos-containing materials may be present. The roof was excluded due to lack of access.

Analysis was performed by SGS/Forensic Laboratories, Inc. in Carson, California, NVLAP No. 101459-1, using Polarized Light Microscopy with Dispersion Staining (PLM/DS) in accordance with the Environmental Protection Agency (EPA), "Method for the Determination of Asbestos in Bulk Building Materials" (EPA 600/R-93-116). Percentage estimates of each material component are based on the analyst's best judgment following examination with a stereoscope and PLM/DS analysis.

Please see the laboratory documentation, Appendix C.

### 2.2 Lead

Samples of several types of paint, suspect lead-containing materials, were collected. The purpose of the survey was to ascertain the potential for worker exposure to lead dust, per CCR Title 8, Section 1532.1 (Cal/OSHA Lead Standard).

The samples were analyzed by SGS/Forensic Laboratories in Carson, California using Flame Atomic Absorption Spectroscopy in accordance with EPA Method 3050B/7420. See the laboratory documentation, Appendix D.

## 3.0 RESULTS OF INVESTIGATION

3.1 Asbestos

Samples were collected of drywall/joint compound, ceiling materials, flooring materials, exterior stucco, asphalt and concrete.

The following materials proved to contain asbestos:

| MATERIAL | SAMPLING AREA Borrmann Metal Center | ESTIMATED QUANTITY | ANALYTICAL RESULTS wt%* |
|---|---|---|---|
| 12" x 12" VFT w/ black mastic | Administrative vault | 80 sf | 2% Chrysotile in red tile (lower layer) |

*wt% - percentage by weight

The asbestos-containing vinyl floor tile is considered to be non-friable; it was in good condition at the time of the bulk sampling.

Please see the bulk sampling summary, Appendix A.

3.2 Lead

Samples of six types of paint were collected and analyzed for lead content. The following paints proved to contain lead:

| MATERIAL | SAMPLING AREA Borrmann Metal Center | ANALYTICAL RESULTS wt%* | ANALYTICAL RESULTS ppm* |
|---|---|---|---|
| Yellow paint | Production Area | 0.022 | 220 |
| Tan paint | Main building's exterior | 0.0008 | 80 |
| **Blue paint** | **Office Areas** | **0.43** | **4,300** |
| White paint | Office Areas | 0.036 | 360 |

| MATERIAL | SAMPLING AREA Borrmann Metal Center | ANALYTICAL RESULTS wt%* | ANALYTICAL RESULTS ppm* |
|---|---|---|---|
| Bue paint | Exterior/siding walls | 0.059 | 590 |

*wt% - percentage by weight; ppm – parts per million. **Bold** - indicates lead-based paint

The Cal/OSHA Lead in Construction Standard considers any amount of lead in paint to be of concern during renovation and demolition activities; however, Cal/OSHA considers lead content below 0.06% (600 ppm) to not produce an exposure concern for workers during renovation/demolition activities (Title 8 CCR 1532.1).

The Consumer Safety Product Commission considers paint with a lead content over 600 ppm is considered to be "lead-based paint".

For disposal purposes, the California Department of Toxic Substances Control has determined that materials with a TTLC (Total Threshold Limit Concentration) below 50 parts per million (ppm) or 0.005 percent by weight (wt%) are not hazardous.

Please see the bulk sampling summary, Appendix B.

## 4.0 RECOMMENDATIONS

### 4.1 Asbestos

When work is performed in the vicinity of an asbestos-containing material, the workers must be informed that the material contains asbestos. Removal of an asbestos-containing material must be performed by a licensed (Contractor's State License Board) and registered (Cal/OSHA) asbestos abatement contractor under the supervision of a Cal/OSHA Certified Asbestos Consultant.

All ACM (friable and non-friable) have the potential to release asbestos fibers into the air if they are disturbed or damaged. Building activities or events that could cause these materials to release asbestos fibers include, but are not limited to: maintenance activities, renovation work, water leaks, breakage or damage of the materials and disturbance activities (i.e., cutting or sanding).

### 4.2 Lead

The blue paint in the office areas proved to be a lead-based paint. Respiratory protection is required during the removal of the lead-based paint until air monitoring results indicate worker exposure is below the Federal OSHA Action Level of 30 ug/$m^3$. Alternatively, a

previous **negative** initial exposure assessment (meeting the OSHA requirements of 8CCR 1532 for the same type of project done within the previous year with the same work crew) may be provided prior to the removal of these materials.

Cal/OSHA considers lead content below 0.06% (600 ppm) to not produce an exposure concern for workers during renovation/demolition activities (Title 8 CCR 1532.1).

Detectable materials, above 50 ppm, require additional analysis of the waste stream, such as a California Wet-Test, for disposal purposes. The additional testing should be performed prior to disposal to determine disposal options.

## 5.0 CONFIDENTIALITY AND LIMITATIONS

This report is prepared for the express use and benefit of The City of El Segundo and its agents and employees. The information in this report or portions thereof may be required to be included in notifications to employees, contractors or other visitors to the building(s). The Owner or its agents shall not use this report as a specification or work plan for any of the work suggested or recommended in the report.

This report is based upon conditions and practices observed at the property and information made available to gja. This report does not propose to identify all hazards or unsafe practices, or to indicate that other hazards or unsafe practices do not exist at the premises. Additional suspect but un-sampled materials could be located between walls, in voids, or in other inaccessible areas; caution should be exercised regarding these areas. gja cannot warrant that these buildings do not contain asbestos and/or lead in locations other than those noted in this report.

gja will not discuss or disclose any information about our services to any third party without the Client's written consent unless otherwise required by law or by judicial or administrative order.

gja's assessment of the risk of exposure to asbestos and lead followed generally accepted protocols and is based on conditions at the time of the survey. gja is not responsible for changes in conditions or accepted protocols subsequent to our site visit.

# APPENDIX A

# BULK SAMPLING SUMMARY - ASBESTOS

ND indicates “non-detected” for asbestos

| SAMPLE NUMBERS CI26003 | MATERIAL | SAMPLING AREA Borrmann Metal Center | ANALYTICAL RESULTS wt%* |
|---|---|---|---|
| 001 - 003 | Drywall/joint compound | Throughout Administrative | ND |

Maria Cosper, Laboratory Supervisor, Hayward Laboratory

Note: Limit of Quantification ('LOQ') = 1%. 'Trace' denotes the presence of asbestos below the LOQ. 'ND' = 'None Detected'.

Inhomogeneous samples are separated into homogenous subsamples and analyzed individually. Analytical results and reports are generated by SGS at the request of and for the exclusive use of the person or entity (client) named on such report. Results, reports or copies of same will not be released by SGS to any third party without prior written request from client. This report applies only to the sample(s) tested. Supporting laboratory documentation is available upon request. This report must not be reproduced except in full, unless approved by SGS. The client is solely responsible for the use and interpretation of test results and reports requested from SGS. This report must not be used by the client to claim product endorsement by NVLAP or any other agency of the U.S. Government. SGS is not able to assess the degree of hazard resulting from materials analyzed. SGS reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified. All samples were received in acceptable condition unless otherwise noted.

**Total Samples Submitted:** 6
**Total Samples Analyzed:** 6

| Sample Number | Lab Number | Analyte | Result | Result Units | Reporting Limit* | Method Reference |
|---|---|---|---|---|---|---|
| PB-01 | LM301410 | Pb | 0.022 | wt% | 0.006 | EPA 3050B/7000B |
| PB-02 | LM301411 | Pb | 0.008 | wt% | 0.006 | EPA 3050B/7000B |
| PB-03 | LM301412 | Pb | 0.43 | wt% | 0.03 | EPA 3050B/7000B |
| PB-04 | LM301413 | Pb | 0.036 | wt% | 0.006 | EPA 3050B/7000B |
| PB-05 | LM301414 | Pb | < 0.006 | wt% | 0.006 | EPA 3050B/7000B |
| PB-06 | LM301415 | Pb | 0.059 | wt% | 0.006 | EPA 3050B/7000B |

* The Reporting Limit represents the lowest amount of analyte that the laboratory can confidently detect in the sample, and is not a regulatory level. The Units for the Reporting Limit are the same as the Units for the Final Results.

Kevin Poon

Kevin Poon, Laboratory Supervisor, Hayward Laboratory

Analytical results and reports are generated by SGS at the request of and for the exclusive use of the person or entity (client) named on such report. Results, reports or copies of same will not be released by SGS to any third party without prior written request from client. This report applies only to the sample(s) tested. Supporting laboratory documentation is available upon request. This report must not be reproduced except in full, unless approved by SGS. The client is solely responsible for the use and interpretation of test results and reports requested from SGS. SGS is not able to assess the degree of hazard resulting from materials analyzed. SGS reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified. Any modifications that have been made to referenced test methods are documented in SGS Standard Operating Procedures Manual. Sample results have not been blank corrected. Quality control and sample receipt condition were acceptable unless otherwise noted.
Note* Sampling data used in this report was provided by the client as noted on the associated chain of custody form.

Subject: Existing Conditions Structural Assessment
Borrmann Metal Center
110 W. Olive Ave
Burbank, California 91502

## *1.0 Introduction*

As requested by the City of Burbank, Biggs Cardosa Associates, Inc. (BCA) has completed an existing conditions structural assessment of the Borrmann Metal Center. This assessment summarizes structural deficiencies encountered during our walkthrough of the site and buildings. Deficiencies include structural concerns, distress, damage, and deterioration. Also included are structural replacement and repair recommendations and rough order of magnitude budget estimates. Estimated building replacement costs are also provided for comparison.

## *2.0 Assessment Methodology*

The BCA team conducted visual observations of the site and structures to identify items in need of structural repair, retrofit, or replacement. These items are noted with the intent to preserve the existing structures and restore the structural safety of the facility over the coming years. Budget estimates were developed for observed deficiencies and are categorized in priority groups ranging from Immediate to Long-Term. The methodology used in this assessment is limited to visual observations and does not include structural calculations or analysis.

Items related to other disciplines such as architectural, accessibility, waterproofing, mechanical, electrical, etc. were not reviewed as part of this assessment.

Access to the rooftops and high areas of the interior such as the warehouse roof framing was not provided. All visual assessments were made from the ground.

BCA team site visits were performed on the following dates:

| Date | BCA Staff |
|---|---|
| January 9, 2026 | Max Chamberlain |
| March 21, 2026 | Max Chamberlain and Miguel Zeron |
| April 11, 2026 | Max Chamberlain and Dan Lazzarini |

***3.0 Priority Glossary***

The following table is used to prioritize the structural deficiencies noted in our site visits.

| Priority | Description | Explanation |
|---|---|---|
| 1 | Immediate, 0-1 years | Conditions in this category require immediate action to correct a safety hazard, stop accelerated deterioration, or return an element to operation. |
| 2 | Crucial, 1-2 years | Conditions in this category require appropriate attention to preclude predictable deterioration and the associated higher costs of repair. |
| 3 | Necessary, 3-5 years | Conditions in this category include items that represent a sensible improvement to existing conditions. |
| 4 | Long-term, 5+ years | Conditions in this category require long-term consideration and include items that present a future need. |

### *4.0 General Building Description*

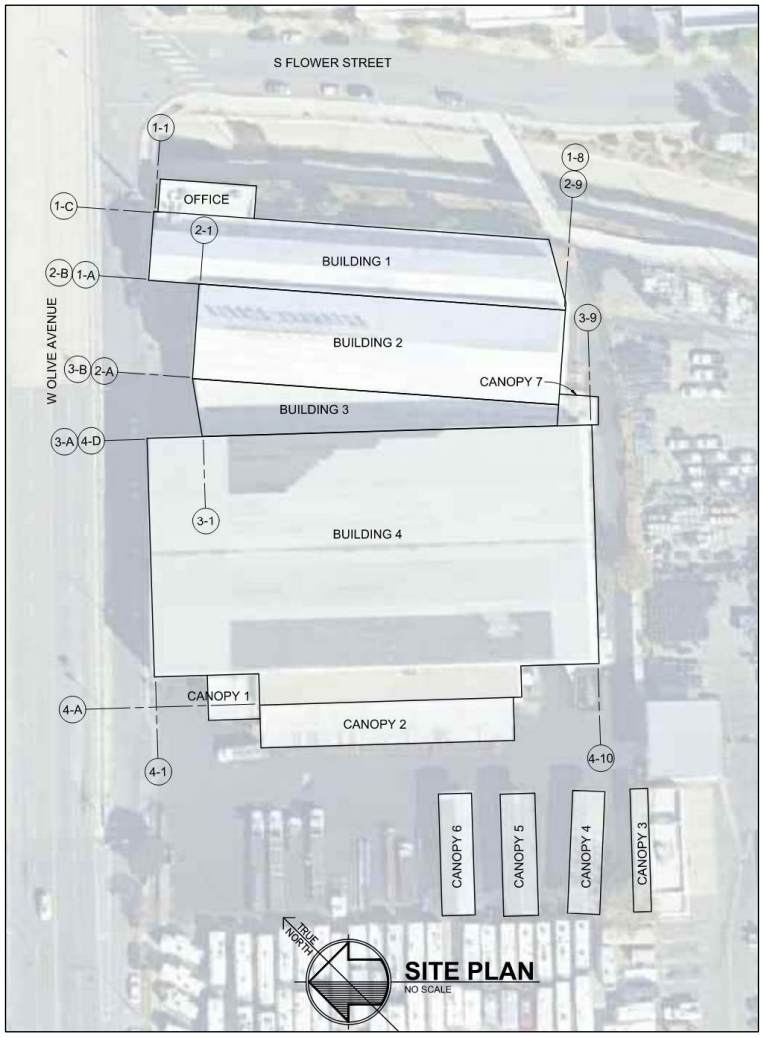

*Figure 4.0A Site Plan*

Borrmann Metal Center is bounded by West Olive Avenue to the north, the City of Burbank Public Works yard to the south, a drainage canal to the east, and a recreational vehicle sales facility to the west. The structures on the site include a group of four connected warehouse buildings and an office building. The office building totals approximately 3,000 square feet and the warehouse totals approximately 70,000 square feet. The tallest of the warehouse buildings is approximately 44 feet above grade. The site includes various exterior canopies and over 100 steel storage racks for materials, both inside the warehouses and at the exterior. Refer to Figure 4.0A above for the arrangement of the buildings and canopies.

The site is generally flat with a minor slope at the south of the warehouses for truck access to the loading docks. A portion of the office building to the east extends over grade that is sloped down to the drainage channel.

Refer to building key plans in the appendix and refer to Photos 4.0A through 4.0D below. All

photo locations in this report are noted on the key plans in the appendix.

*Photo 4.0A Exterior of office building and warehouse building 2 (viewed from W. Olive Ave).*

*Photo 4.0B General site conditions for yard and canopies west of warehouse.*

*Photo 4.0C Office east end overhang supported on WF beam and columns.*

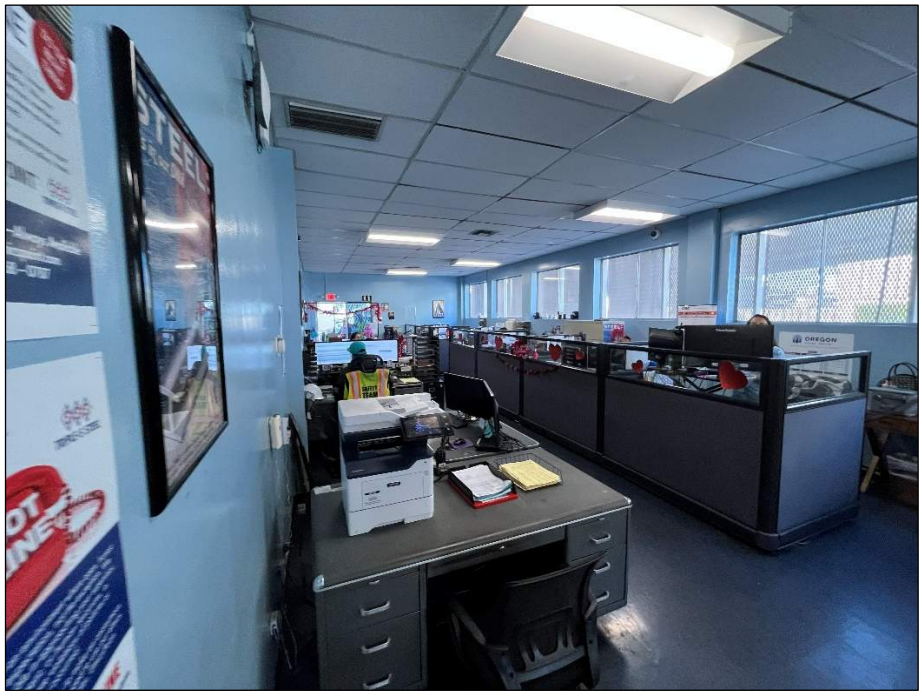

*Photo 4.0D First floor interior of the office building.*

The warehouse buildings are all high-bay single-story structures. They are used for the storage and assembly of various steel fabrications. They contain many material storage racks, welding and cutting equipment, and overhead gantry cranes. The gantry cranes are supported on rails mounted to the building columns that run the length of the buildings. There are a total of five gantry cranes throughout the four warehouse buildings.

The east and west ends of warehouse building 4 have large doors for trucks to enter and exit the loading bays. The south end has a sunken pit with a dirt floor used for storage space. This area was likely used as a loading dock in the past.

4.1 Structural Systems – Warehouse

Refer to the key plans in the appendix for the roof framing system of the warehouse buildings. The roofs are primarily constructed with metal decking supported by steel purlins. The purlins are supported by either steel trusses or steel wide-flange beams, which span between steel wide flange columns. The columns are supported on concrete pedestals that are isolated at the interior and integrated with the stem wall at the perimeter. Building 1 has a low roof area along grid line 1-C that is framed with wood posts and beams. See photo 4.0E and 4.0F following.

The exterior of the warehouse buildings is constructed from corrugated metal panels. Metal panels are typically supported by wood and steel wind girts spanning to the building columns. The metal panels at the east wall of building 1 are supported by wood posts and blocking.

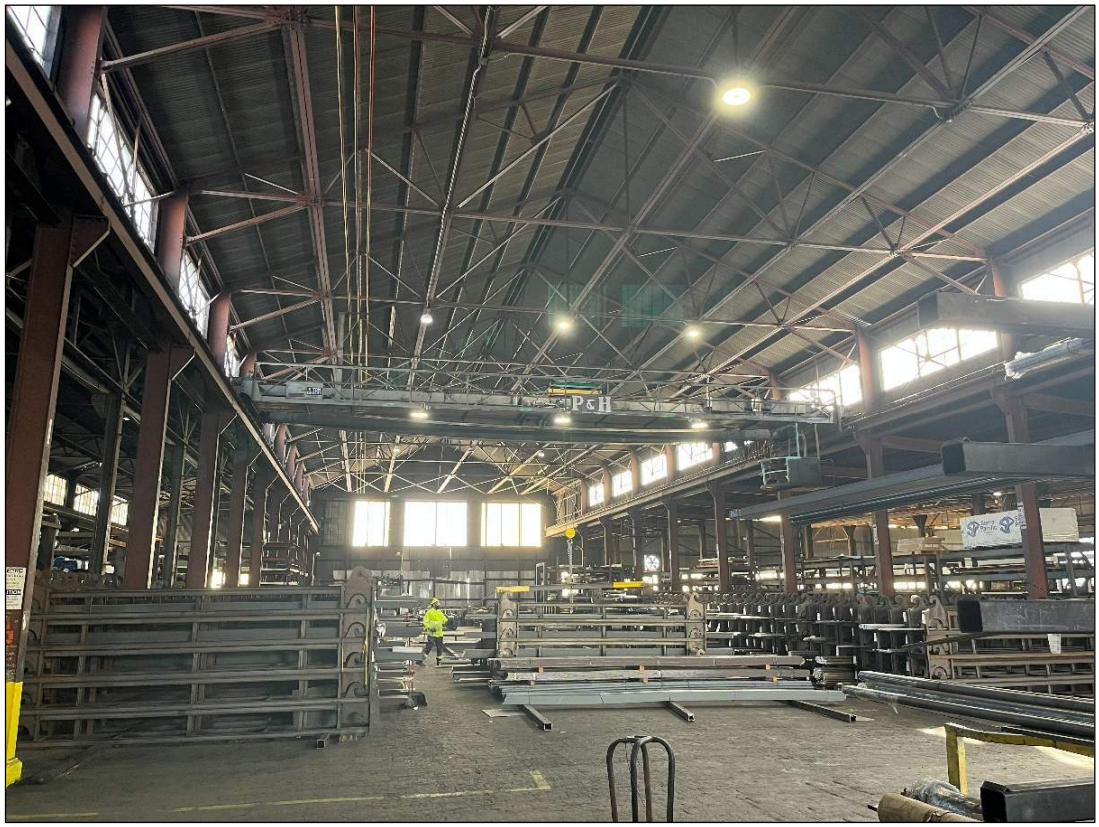

*Photo 4.0E Warehouse building 2 interior looking south.*

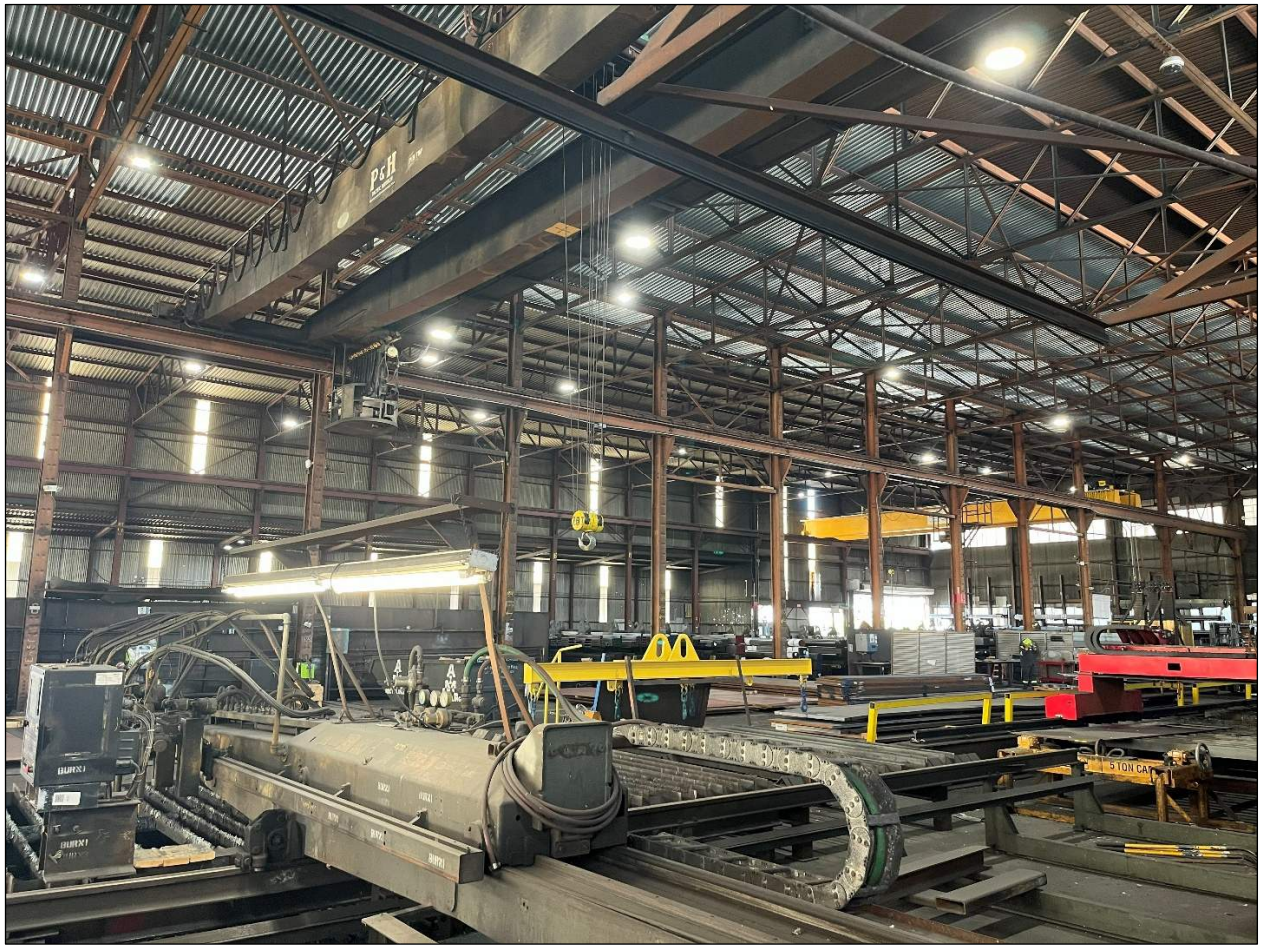

*Photo 4.0F Warehouse building 4 interior looking west.*

Each building appears to have been constructed at a different point in time. The original construction date is unknown, but title records suggest the oldest buildings could have been constructed in the late 1940s to early 1950s. Based on the structural framing systems and extent of deterioration, warehouse building 1 and half of building 4 (from grid lines 4-C to 4-D) appear to be the oldest and possibly the original buildings. Building 2 appears to be a subsequent addition to Building 1. Half of building 4 from grid lines 4-A to 4-C appears to be the most recently constructed structure and building 3 appears to be an infill of the space between buildings 2 and 4.

While connected together, it is unlikely that the buildings were designed to perform as one structure for resisting lateral loads from wind and seismic forces. The lateral force resisting system for most of the warehouse buildings consists of steel truss moment-resisting frames. The frames use the connection from the roof trusses to the wide flange columns as a moment-resisting connection. At building 1, the lateral system on grid line 1-C appears to be the metal siding. The siding is screwed to horizontal wood blocking, vertical posts, and the sill plate. The sill plate is connected to the concrete stem wall with anchor bolts spaced approximately 5’-0” on-center. At building 4, the lateral system on grid line 4-A consists of two bays of X-bracing with tension rods.

4.2 Structural Systems – Office

The office is a two-story, wood-framed building that is constructed partially inside one of the warehouse buildings. The eastern portion of the office building is supported on cast-in-place stem walls and a wide flange steel beam on steel columns at the easternmost end facing the drainage channel.

4.3 Other Structures

Seven canopy structures are located throughout the site. These are labeled on the site key plan in Figure 4.0A. The canopy structures are framed with steel HSS beams and columns. The framing is covered with corrugated metal roofing panels. The canopies cover material storage racks or work areas and equipment. Refer to photo 4.0G below.

*Photo 4.0G Exterior canopy structure typical framing (Canopy 6).*

***5.0 Documents***

No original construction drawings were available for our use. The building key plans included in the appendix were created based on our field notes and measurements. The key plans are provided

to note the location of structural deficiencies and to generate rough order of magnitude (ROM) costs for repairs and replacement.

## *6.0 Observations and Review of Existing Conditions*

BCA site visits included review of the building's exterior cladding, wall and roof framing, visible foundations, storage racks, exterior canopies, and equipment. Please refer to the key plans in the Appendix for specific locations of structural concerns, distress, damage and deterioration noted in the following sections.

### 6.1 Building Foundations

#### 6.1.1 Warehouse Foundations

1. The stem wall at the perimeter of the warehouse buildings is in fair condition considering the age of the structure. We noted various locations where cracking and spalling were observed (see photo 6.0A). A large crack was observed on grid line 1-C (see photo 6.0B).
2. The wide flange columns are supported on concrete pedestals. We noted various locations where significant spalling and cracking have occurred (see photo 6.0C). The anchor bolts are exposed, and column base plates are not fully supported by the pedestals. Some locations show permanent lateral deformation of the anchor bolts.
3. Spalling of concrete was observed at the top of the walls and slabs at the north and south end loading bays.

*Photo 6.0A Typical warehouse stem wall cracking.*

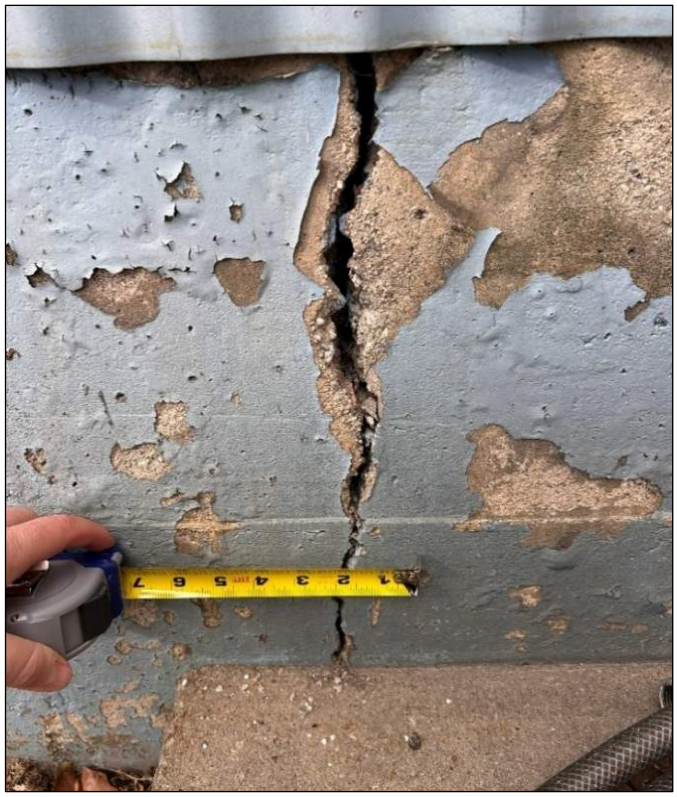

*Photo 6.0B Large crack in stem wall at grid line 1-C (viewed from outside).*

*Photo 6.0C Typical spalled concrete column base pedestal with exposed anchor bolts.*

6.1.2 Office Foundations

1. We noted some visible cracks in the concrete stem wall supporting the office floor overhang at the east end facing the drainage channel. These cracks appear to have been sealed in the past with spray foam which is not a structural repair.
2. Rust was observed on the steel beams and columns that support the overhang portion of the structure on the east end (see photo 6.0D). The wide flange columns also appear to be in contact with the soil below. The presence and condition of the footings below these columns is unknown.

*Photo 6.0D Rust on beam and columns at office building overhang.*

6.1.3 Exterior Canopies Foundations

1. The exterior canopies are typically supported directly on the asphalt. They are not supported on concrete foundations or slabs. These structures are also not anchored down or otherwise positively attached at their base (see photo 6.0E).

*Photo 6.0E Canopy structure typical base condition*

6.2 Building Superstructure

6.2.1 Warehouse Superstructure

1. The steel wide flange columns above the foundation generally appeared to be in fair condition. Rust and evidence of past water intrusion was noted at various locations and the integrity of steel finishes varied in the buildings. Some columns and steel jambs at the truck doors in building 4 are exposed and significantly rusted. Some of the steel wide flange columns have bent flanges from vehicular impact.
2. The majority of the 4x6 wood posts supporting the roof of building 1 along grid line 1-C are in fair condition. Some are severely damaged from presumed vehicle impacts (see photo 6.0F). These locations are noted in the key plans.
3. The low roof of Building 1 is framed with wood beams. These are generally in good condition, but a few locations were seen where the beams are splintered and damaged, possibly due to vehicle impact (see photo 6.0G).
4. At the exterior walls, the condition of the horizontal wind girts that span between the posts/columns varies significantly. Many locations showed significant damage to the wind girt members and their connections to the vertical posts/columns (see photo 6.0H). These

locations are documented in the key plans.

5. At the building 3 roof beams, we observed many locations where there appears to be inadequate bearing at the bolted seat connection to building 2 and 4 columns (see photo 6.0I). Inadequate or loss of bearing is a potential collapse concern during lateral building movement from wind or earthquakes. Many beam-to-column connections at this building also appeared to be missing bolts. It is unclear if welds are present at these connections in lieu of the missing bolts. He purlin connections to the primary beams on line 3-7 also appear to be missing bolts.
6. In Building 4, we observed a location where the low roof deck has inadequate bearing on the steel beam on grid line 4-B (see photo 6.0J). This condition is at risk of failure from live load on the roof. Access to the roof should be immediately limited in this area until the condition is corrected.
7. The metal roof trusses appear to be in fair condition throughout all warehouse buildings. None appeared to be damaged. Rust was noted on various trusses, particularly in the original portion of building 4 between grid lines 4-C and 4-D (see photo 6.0K).
8. At the south end of Building 1, we observed what appears to be structural modifications to the original building frame. It is unknown if these modifications were engineered. Structural evaluation of this condition is needed.
9. In general, various roof panels were seen with damage or holes. These locations are potential sources of water intrusion, which will cause further deterioration of the structural steel framing.
10. In general, the warehouse buildings do not appear to be adequately connected together so as to perform as one structure for wind and seismic loads. There are many apparent discontinuities in the load path of the lateral force resisting system (LFRS). This condition could result in significant building damage and partial or total collapse should the code-level earthquake occur.
11. At building 1 along grid line 1-C, the metal siding which is presumed to perform as a shear wall is damaged and missing screws at many locations (see photo 6.0L). Specific locations are noted on the key plans.
12. At Building 4, one of X-bracing tension rods was cut on grid line 4-A (see photo 6.0M). The location is noted on the key plan. This damage results in a 50% decrease in the strength of the LFRS on this line.
13. The warehouse building walls are sheathed in corrugated metal panels. These metal panels showed significant wear and tear at many locations. The typical damage consists of dents, holes, tears, missing and damaged screws, and entire missing panels. Most of this damage is suspected to have been caused by vehicle impact. There are no guardrails or bollards in place to protect the exterior wall finishes from vehicle impact.

*Photo 6.0F Damaged wood post on grid line 1-C.*

*Photo 6.0G Damaged low roof beam near grid line 1-C.*

*Photo 6.0H Damaged wood wind girt members on grid line 2-9.*

*Photo 6.0I Inadequate bearing at beam and column connection in building 3*

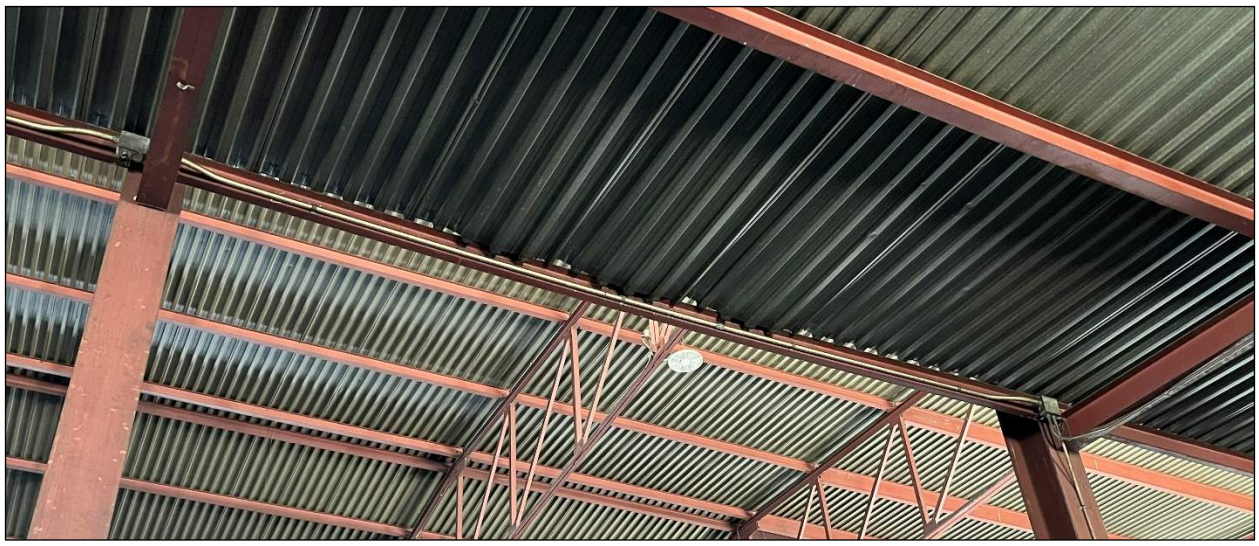

*Photo 6.0J Low roof deck on grid line 4-B with inadequate support at edge beam.*

*Photo 6.0K Rust on overhead roof trusses in Building 4.*

*Photo 6.0L Typical damage to exterior metal siding panels and missing screws at grid line 1-C.*

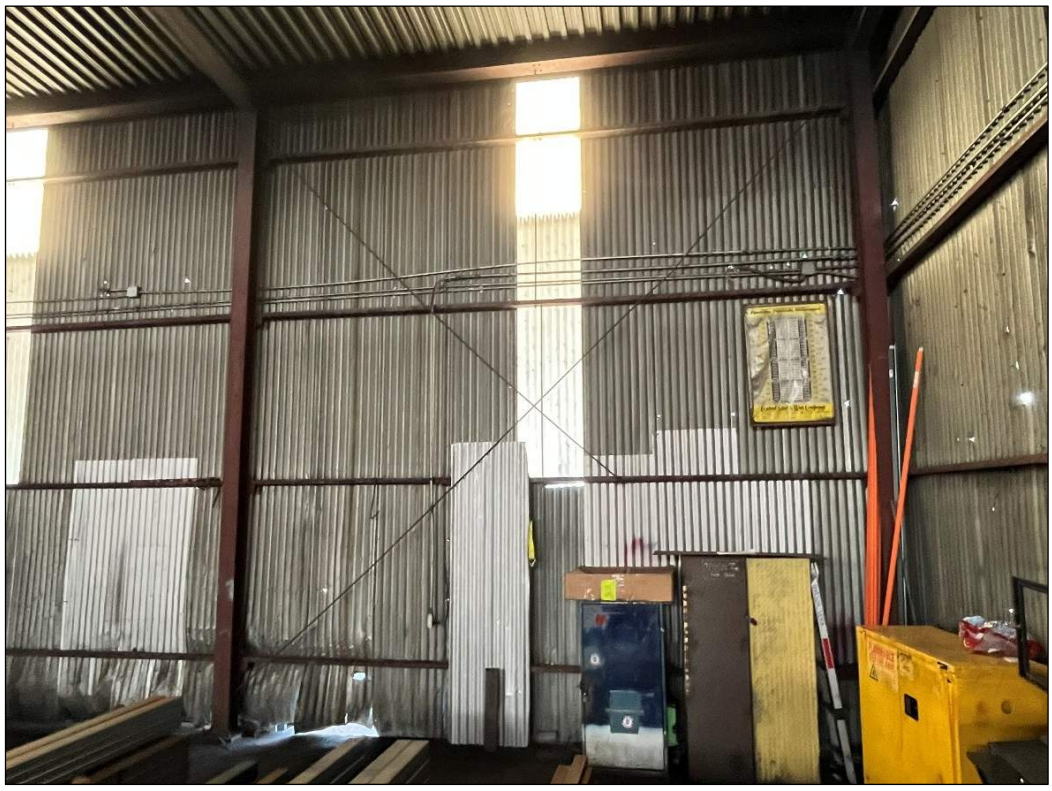

*Photo 6.0M Severed X-brace tension rod on grid line 4-A.*

6.2.2 Office Superstructure

1. At the north wall of the office the exterior stucco appears to be damaged in a few locations (see photo 6.0N).
2. The first floor overhang wood framing is not enclosed and exposed to weather.

*Photo 6.0N Stucco damage at Office Building.*

6.2.3 Exterior Canopies Superstructure

1. Most of the exterior canopy structures are in poor condition. Extensive rust was encountered at all canopies along with impact damage to many columns, roof panels, and roof beams.
2. Some canopies have had their framing heavily modified including the removal and relocation of beams and columns.
3. Many of the roof members appear to be undersized and show signs of excessive deflection under dead load.

6.3 Miscellaneous

1. The condition and structural adequacy of the existing gantry cranes and their supporting structure could not be evaluated. No apparent distress was noted but access to these areas was not provided.
2. Storage racks throughout the site are in fair to poor condition. A few of the racks showed signs of impact damage and many were rusted. Most of them do not appear to be anchored at the base or supported on concrete foundations/slabs. A few exterior racks have rebar stakes anchoring them to the asphalt or soil which is not an adequate connection.
3. Most heavy equipment (band saw, plasma cutters, shears, air compressors, dust vacuum, etc.) and the liquid oxygen tank do not have seismic anchorage. Some pieces of equipment

are supported on housekeeping pads, while others are placed on asphalt.

4. The air compressor enclosure to the south of building 4 does not have seismic anchorage. Additionally, the roof panels of the enclosure do not appear to be attached to the enclosure framing.
5. The handrail on grid line 2-7 in the warehouse has missing and failed anchor bolts at the post base connections. The rail and post members and welds are also heavily damaged (see photo 6.0P). Extensive spalling at the edge of slab was also observed at this railing. This railing presents a safety hazard. Other handrails throughout the site appeared to be in fair condition but they do not appear to have designed for code-prescribed live loads.
6. The signage on the roof of building 4 could not be accessed therefore the attachment of the signage to the structure could not be assessed.

*Photo 6.0P Damaged hand railing and spalled concrete on grid line 2-7.*

### *7.0 Recommendations*

Based on our findings summarized in the previous sections, we have provided the following prioritized recommendations. Refer to the priority glossary provided in Section 3.0 of this report. These categories are based on the severity of the deficiency, threat to life safety, and the impact that repairs/replacement will have on the overall safety of the structures.

7.1 Priority 1 (Immediate, 0-1 years)

1. Remove or replace seven damaged and unanchored exterior canopies.
2. At warehouse building 1 and building 2, replace damaged corrugated metal siding shear panels, fasteners, and support framing at grid line 1-C and grid line 2-9.
3. At building 1, replace damaged wood posts and horizontal girts/blocking on grid line 1-C between lines 1-5 and 1-7.
4. At building 1, repair or replace damaged roof beams in the area south of grid line 1-5.
5. Replace damaged handrail at grid line 2-7 adjacent to recessed area and repair concrete spall at edge of slab.
6. At building 3, repair beam-to-column connections with inadequate bearing. Add welded connection plates to strengthen the lateral connection between the buildings and reduce the collapse risk.
7. Further evaluate the apparent permanent deformation at steel column base connections in building 1 and repair all damaged/spalled column base pedestals in buildings 1, 2, 3, and 4. Consider encasing the bottom 3 feet of the columns in concrete to provide improved protection from vehicle impact.
8. Add post-installed anchors at the exterior liquid oxygen tank. Evaluate existing foundation for adequacy and replace/retrofit the foundation if needed.
9. At building 4, repair or replace the cut X-brace tension rod on grid line 4-A.
10. At building 4, repair the inadequate bearing of the low roof decking on the grid line 4-B support beam. Evaluate the remainder of the grid line for inadequate deck bearing and repair as needed.

7.2 Priority 2 (Crucial, 1-2 years)

1. Further evaluate all building 3 roof beam-to-column connections that appear to be missing bolts. Retrofit existing connections as needed to restore structural capacity at missing bolts or welds.
2. Further evaluate building 3 roof purlin-to-beam connections at grid line 3-7. The purlin connections do not appear to be bolted to the beam.
3. Restore protective finishes to the exposed unpainted structural steel at the building 4 truck doors.
4. Construct a foundation slab and anchor the air compressor enclosure behind building 4. Attach the roof panels to the enclosure framing.
5. Investigate and seal the source of past water intrusion seen on grid line 4-D columns.
6. Repair stem wall and footing cracks with epoxy injection throughout the warehouse and office building. Repair concrete spalls with structural repair mortar.
7. Replace the entirety of the existing handrail at the back of building 4 adjacent to recessed area with a more robust handrail.

7.3 Priority 3 (Necessary, 3-5 years)

1. Investigate the attachment of the roof signage on building 4.
2. Replace/repair all damaged and missing corrugated metal siding panels at the perimeter of the warehouse buildings.
3. Replace/repair all damaged metal roof deck panels at the warehouse buildings to prevent further water intrusion.

4. Construct foundation slabs if missing and add post-installed concrete anchors at all equipment including band saws, plasma cutters, shears, dust vacuum stand, transformers, etc.
5. Excavate soil and pour new concrete to protect steel columns at the office building floor overhang.
6. Restore protective finishes to the steel framing supporting the office building floor overhang. Create an enclosed soffit or crawl space to protect the wood framing.
7. Repair the exterior wall stucco damage at the office building along W. Olive Ave.
8. Construct concrete slabs to support and anchor down all existing material storage racks.
9. Further evaluate the lateral load path and interconnection of the warehouse buildings for seismic loads and provide recommendations for a voluntary retrofit program.
10. Evaluate steel support framing and connections at gantry cranes to verify structural integrity.

7.4 Priority 4 (Long term, 5+ years)

1. Restore protective finishes to steel framing in all warehouse buildings. This work is prioritized as follows:
    a. Building 4 from grid lines 4-C to 4-D.
    b. Building 1.
    c. Building 3.
    d. Building 2.
    e. Remainder of Building 4.
2. Evaluate structural framing modifications at the south end of Building 1 at grid line 1-B from lines 1-7 to 1-8.
3. Install barriers to protect building 1 wood stud wall framing on line 1-C from vehicle impact.
4. Install barriers to protect metal siding and girts at perimeter of all buildings from vehicle impact.
5. Design and construct a voluntary seismic retrofit for the warehouse buildings to improve their performance as one structure when subjected to lateral wind and seismic loads. The continued use of the building in its current state does not trigger any mandatory seismic upgrades. Because the retrofit would be voluntary, the scope can be tailored to a specified budget. A chance of building use or occupancy classification could result in a mandatory seismic retrofit.

## *8.0 Rough Order of Magnitude (ROM) Cost Estimate*

8.1 Recommendations ROM Cost Summary

| Priority | Estimated Cost | Percentage of Total |
|---|---|---|
| 1* | $600,000.00 | 6.2% |
| 2 | $250,000.00 | 2.6% |
| 3 | $1,900,000.00 | 19.7% |
| 4 – Items 1 thru 4 | $1,650,000.00 | 17.1% |
| 4 – Item 5 voluntary seismic retrofit allowance** | $5,250,000.00 | 54.4% |
| **Total** | **$9,650,000.00** | **100.0%** |

*Assumes removal of the seven exterior canopies. See Section 8.2 below for replacement cost not included here.
**See Section 8.1.1 Item 28.

8.1.1 Recommendations Unit Cost Assumptions

1. Exterior canopy demolition: $15 per SF.
2. Metal siding panel replacement/repair: $30 per SF.
3. Metal roof deck replacement/repair: $40 per SF.
4. Wood post and exterior stud wall replacement: $50 per SF.
5. Wood roof beam repair/replacement: $30 per SF.
6. Hand Railing replacement: $400 per LF.
7. Concrete spall replacement at slabs/stem walls: $100 per SF.
8. Building 3 roof beam-to-column connection repair: $5,000 per location.
9. Structural evaluation and repair at spalled column pedestals: $5,000 per location.
10. Anchorage of liquid oxygen tank: $10,000 (assumes existing foundation is adequate).
11. Repair/replace cut X-brace tension rod at building 4: $20,000.
12. Repair inadequate bearing of low roof deck at building 4: $900 per LF.
13. Structural evaluation and repair at building 3 roof beam-to-column connections with missing bolts: $2,000 per location.
14. Structural steel prep, prime, and paint: $8 per SF of roof or wall area.
15. Air compressor enclosure repairs, anchorage, foundation: $20,000.
16. Building 4 investigate and seal source of water intrusion at roof: $50,000 allowance.
17. Concrete crack repair (epoxy injection): $200 per LF
18. Building 4 roof signage investigation and repairs: $25,000 allowance.
19. Equipment anchorage: $4,000 each unit.
20. Protect steel support columns at office floor overhang: $2,000 per location.
21. Restore steel finishes and create soffit at office floor overhang. $20 per SF.
22. Office exterior wall stucco repair: $25 per SF.
23. New concrete slab and anchorage for storage racks: $5,000 per location.
24. Structural evaluation of lateral load path at warehouse buildings and recommendations: $85,000.
25. Structural evaluation of gantry crane support framing and recommendations: $50,000.

26. Structural evaluation at building 1 modified roof framing: $35,000.
27. Design and install vehicle barriers to protect metal siding: $900 per LF.
28. Warehouse buildings voluntary seismic retrofit: Up to $75 per SF allowance (scope to be defined through further evaluation).

8.2 ROM Building Replacement Cost Summary

1. Seven exterior canopies replacement: $700,000.
2. Office building replacement: $1,500,000.
3. Warehouse building replacement:
    a. Option 1 pre-engineered metal building: $8,750,000 to $14,000,000.
    b. Option 2 custom steel building: $14,000,000 to $21,000,000.

8.2.1 Building Replacement Cost Assumptions

1. Exterior canopy replacement: $80 per SF.
2. Office building replacement: $500 per SF.
3. Warehouse building replacement (pre-engineered metal building): $125 to $200 per SF.
4. Warehouse building replacement (custom steel building): $200 to $300 per SF.

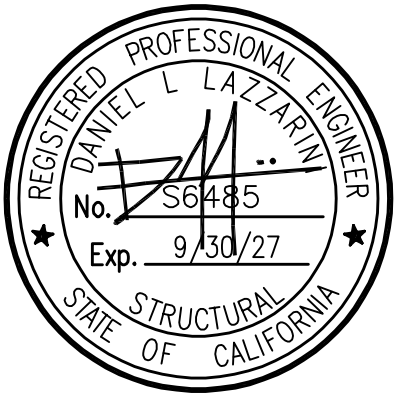
8.3 Cost Estimate Assumptions and Exclusions

1. Estimates include a contingency of 25% plus 15% for contractor profit and overhead.
2. All costs are present day costs and do not account for inflation or escalation.
3. It is assumed no hazardous materials abatement is required.
4. Repairs assume full access to the work area during normal working days/hours for all contractors. Shutdown of building operations is not considered.
5. All repairs or replacements will be designed by licensed professionals, and all work will be permitted.
6. It is assumed that 50% of warehouse building 4 grid line 4-B requires upgrades for adequate deck bearing at the low roof. To be confirmed through further detailed evaluation.
7. It is assumed that 50% of the corrugated metal panels at the warehouse exterior walls need to be repaired/replaced. To be confirmed through further detailed evaluation.
8. It is assumed that 20% of the warehouse roof area requires repairs or replacement of metal panels. To be confirmed through further detailed evaluation.
9. For Priority 4 Items 3 and 4 it is assumed that barriers will be installed on the interior of all warehouse walls, and on the exterior of warehouse building 4 grid line 4-A adjacent to canopy 2 where materials are stored.
10. For Priority 4 Item 5, estimates for the seismic retrofit scope of work assume the use of the building will not change and that any such retrofit would be voluntary. A mandatory seismic retrofit may be required if the building's use or occupancy classification changes.

## *9.0 Closing*

This existing conditions structural assessment has been prepared based on visual review of the accessible areas of the subject site and buildings. With exception of the exterior canopies, most of the building appears to have performed adequately over time. However, we do note several structural concerns and safety issues that merit attention.

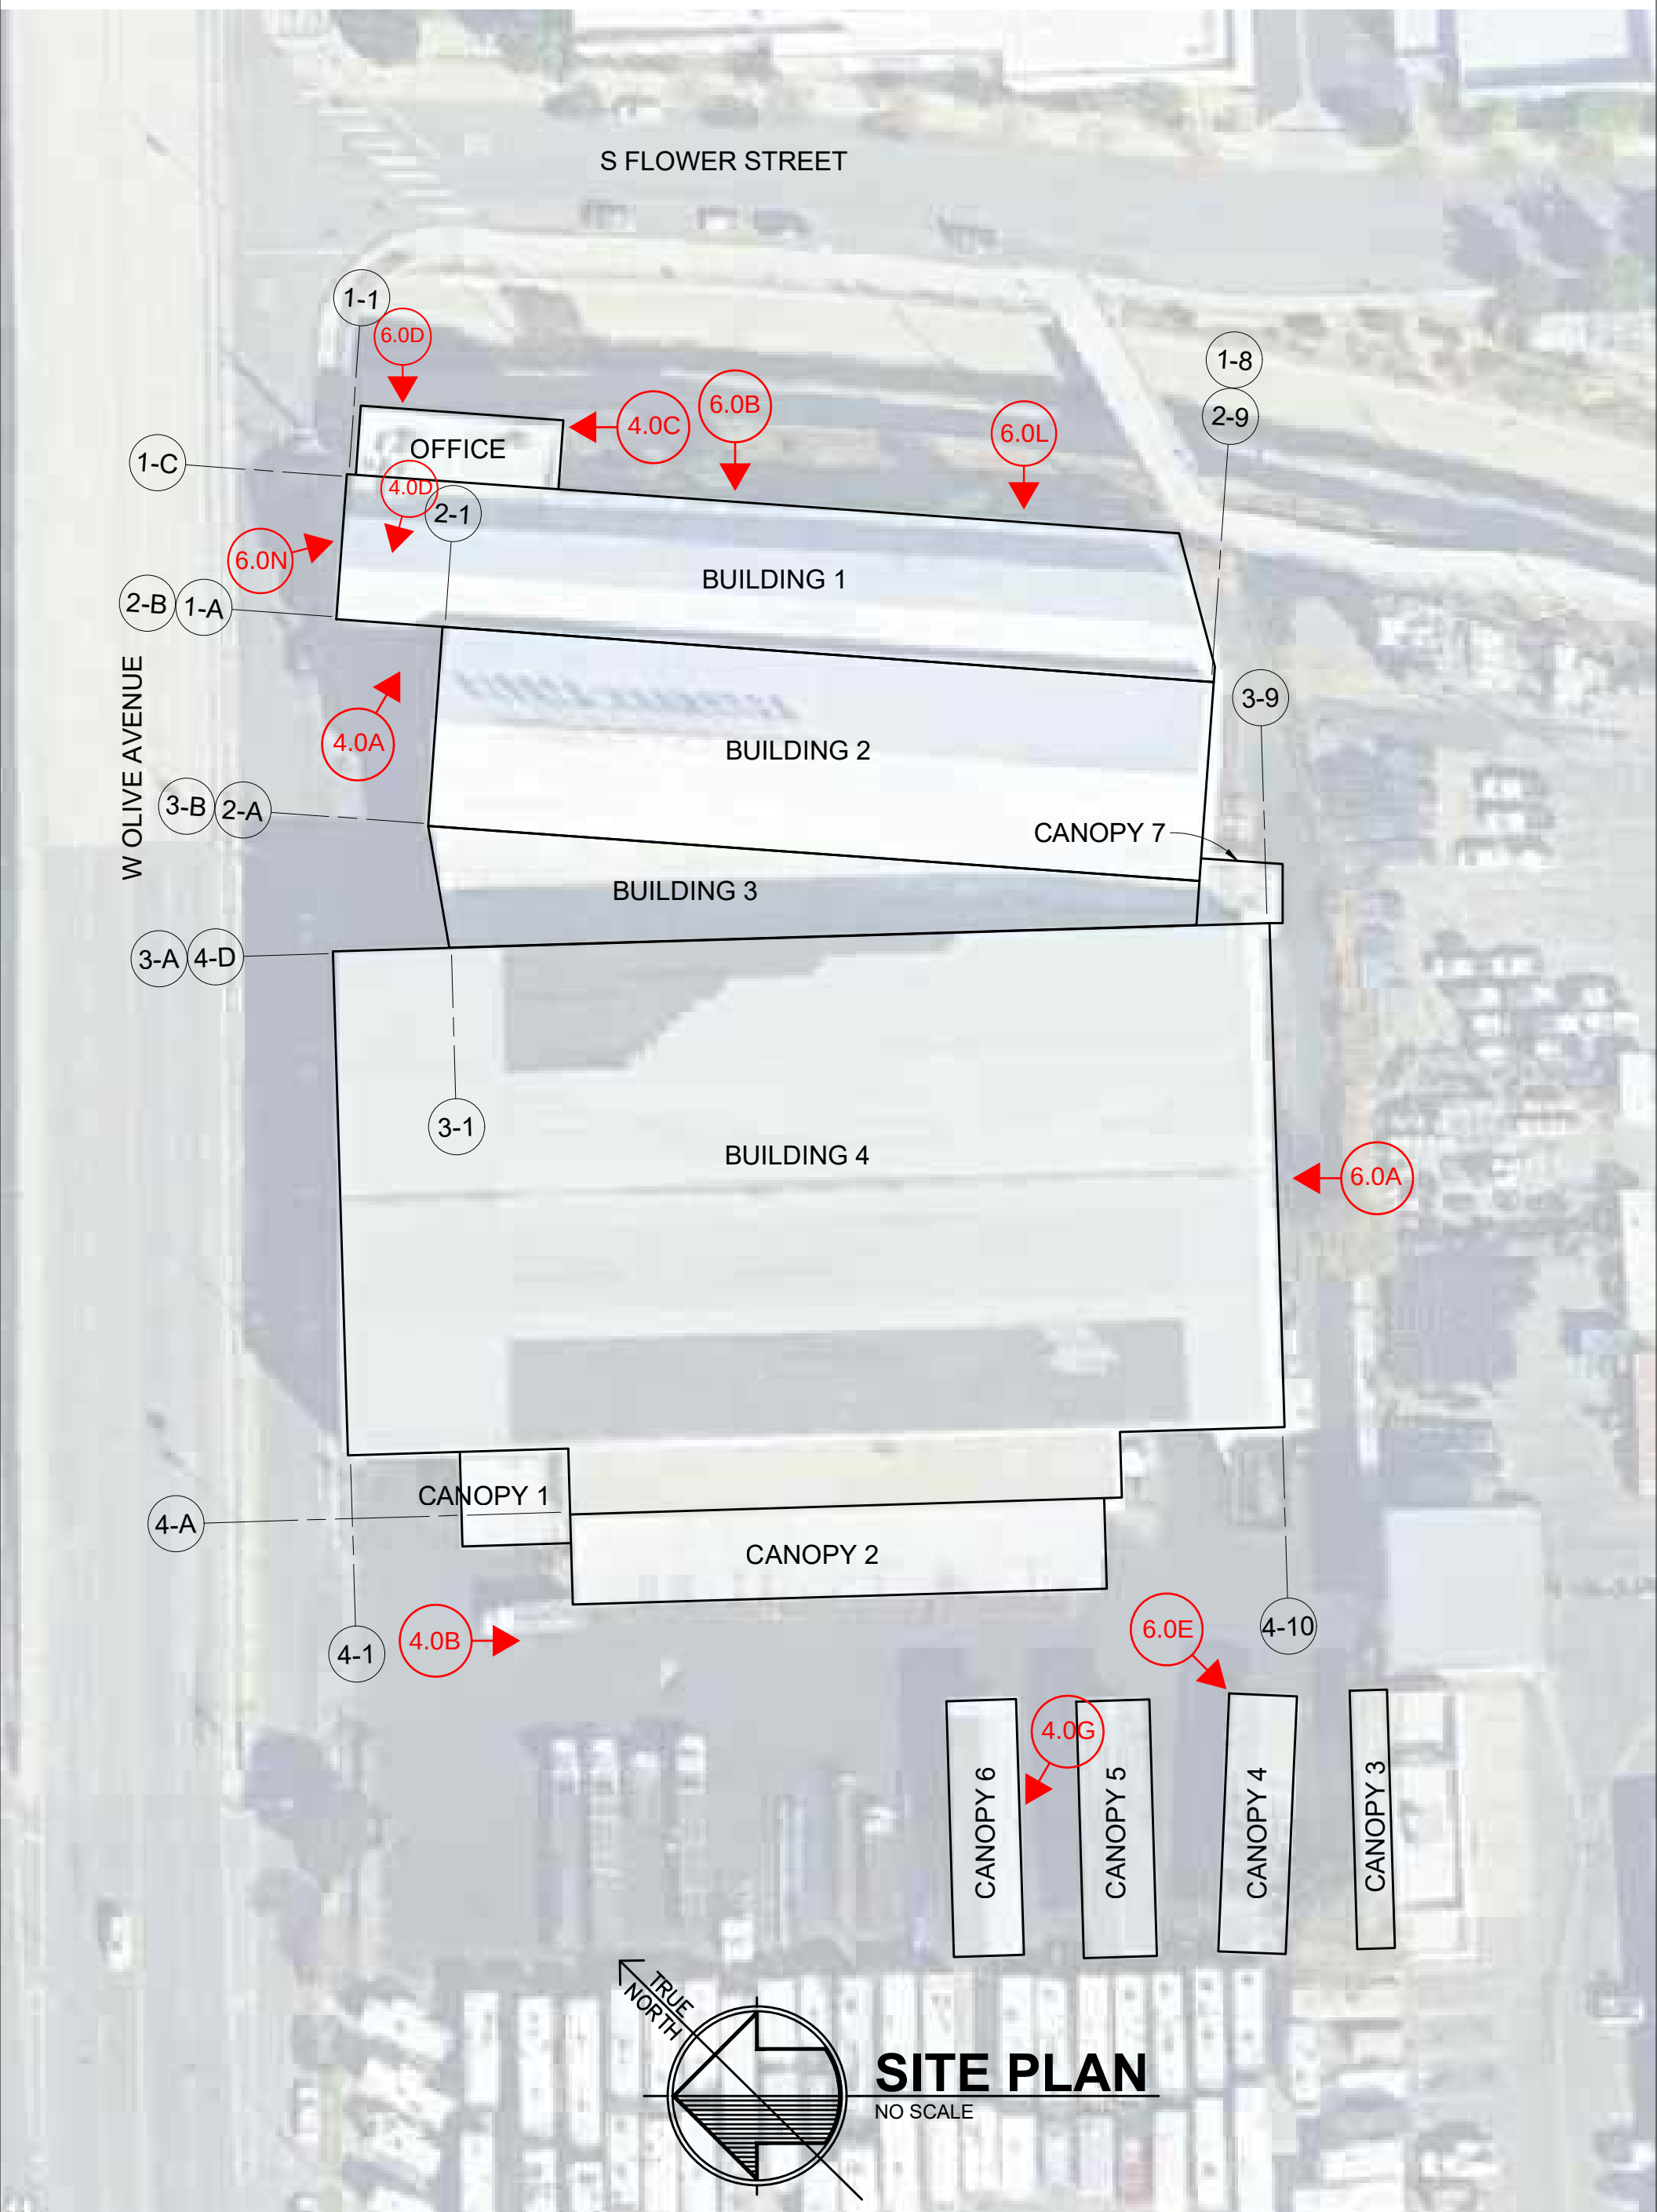
The observations, deficiencies, and recommendations provided herein reflect the apparent condition of the structural systems and are intended to assist in planning for maintenance and repairs with the goal of ensuring continued safe use of the facility.



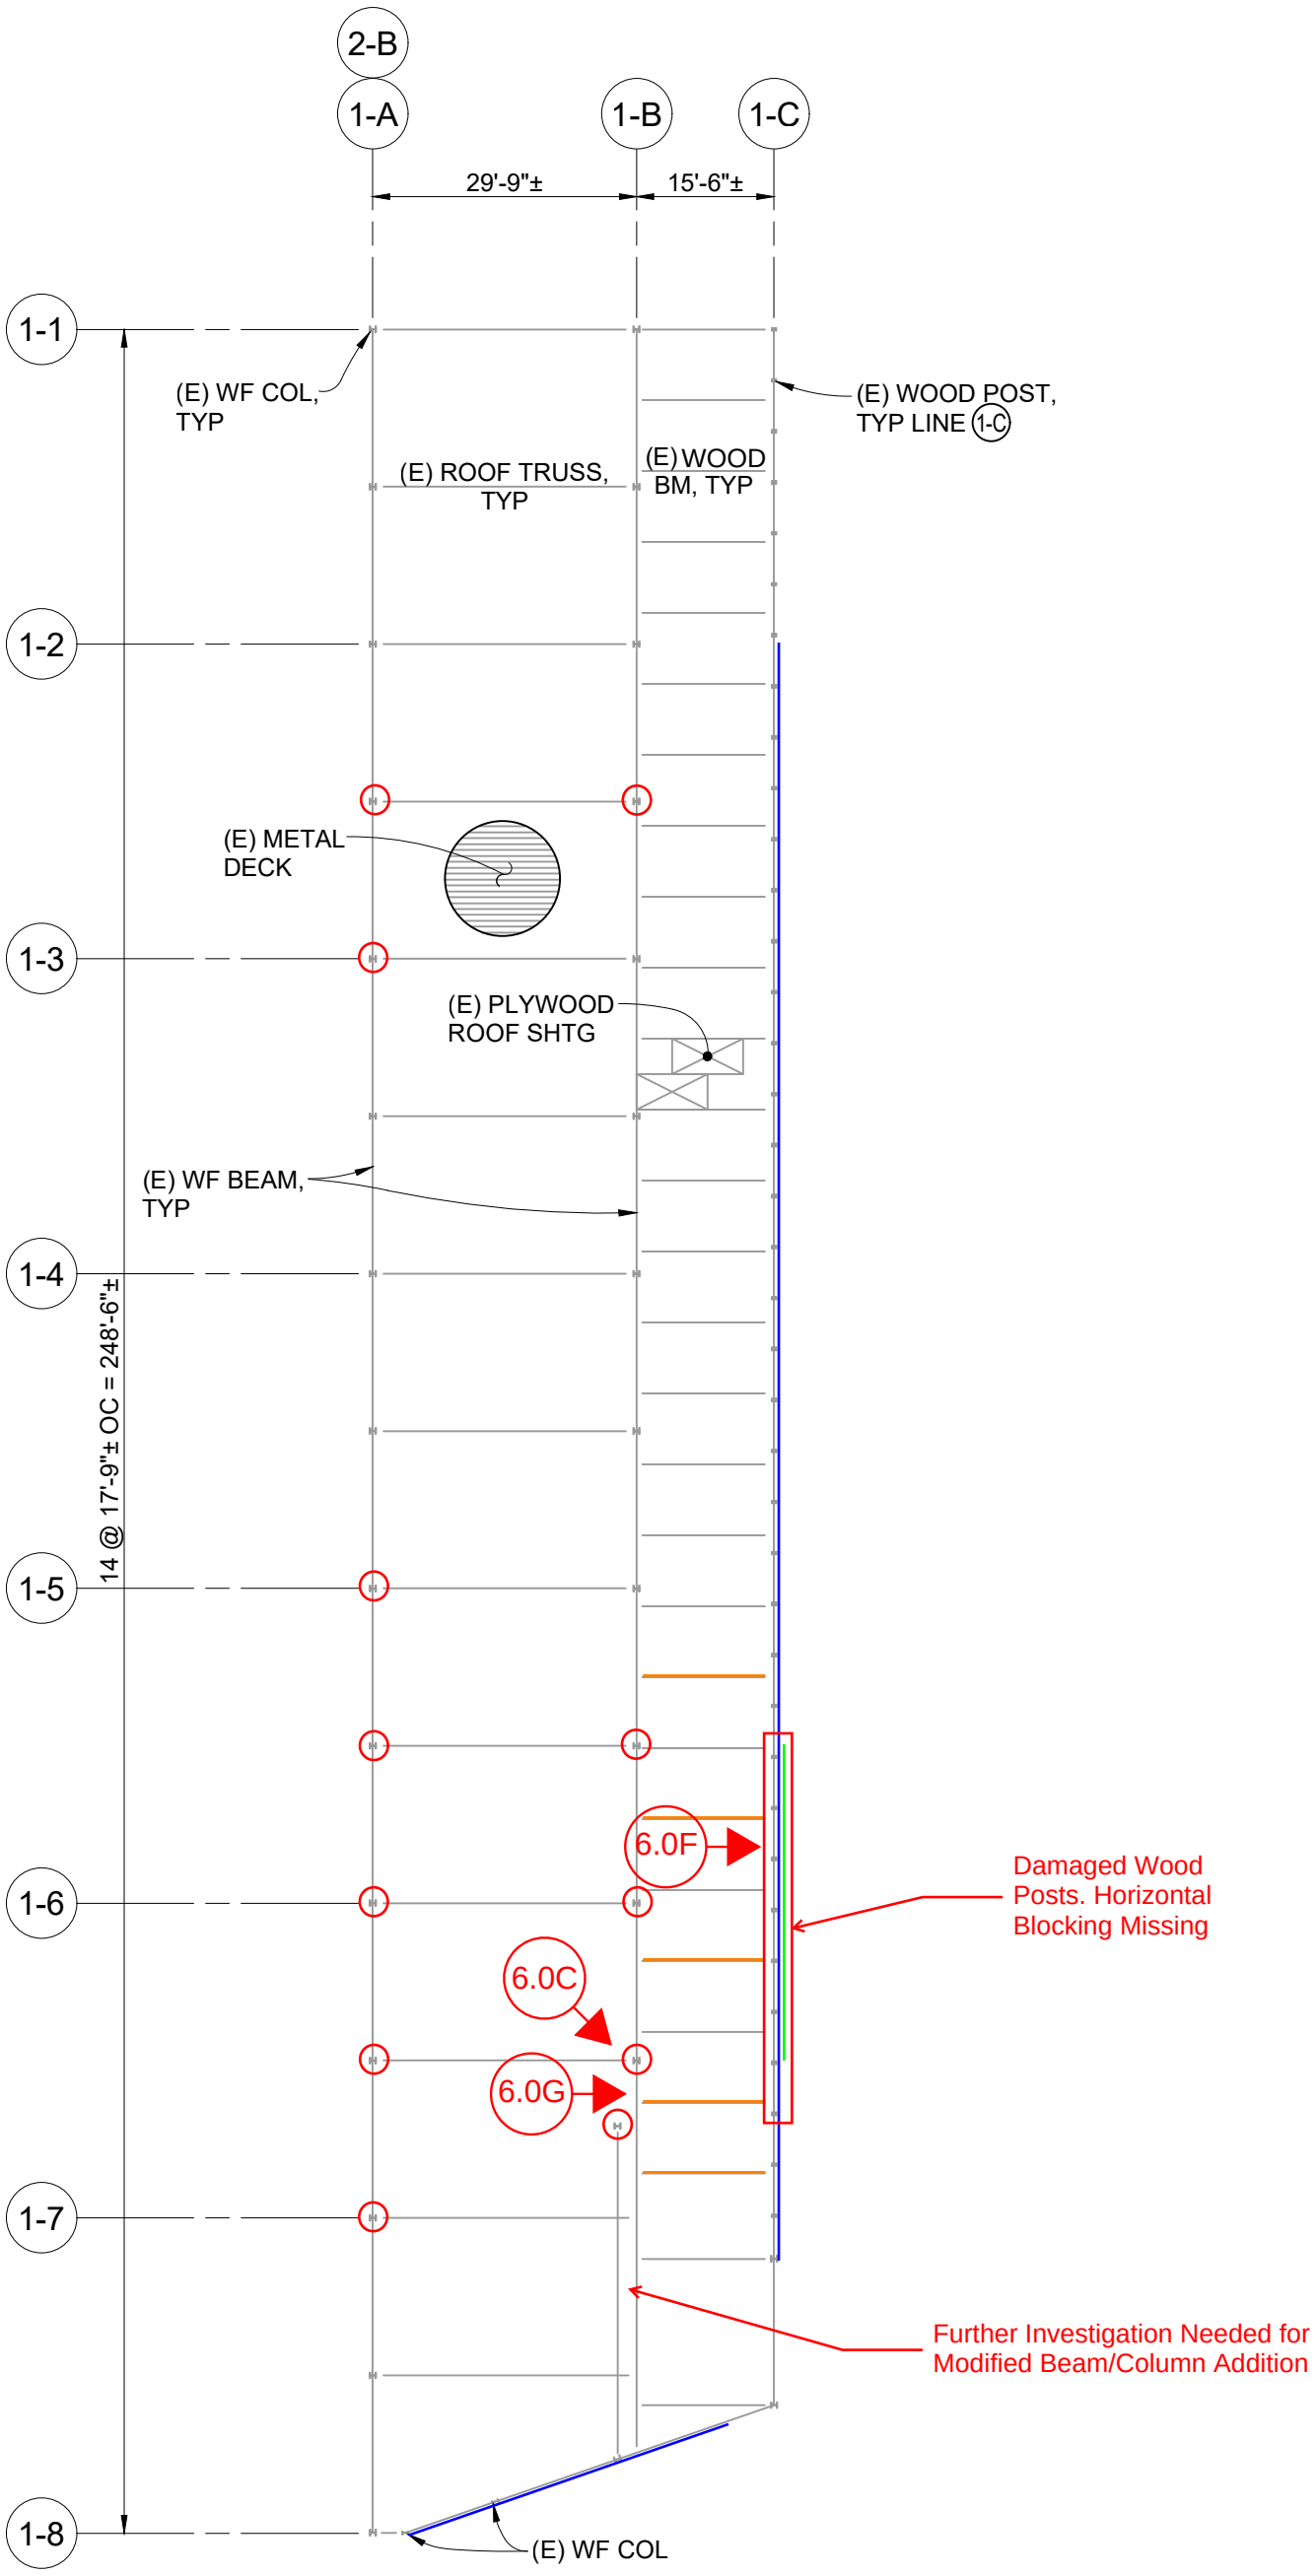
### *10.0 Limitations of this Review*

1. We have made reasonable efforts to ensure that this report is accurate; however, we cannot assume any liability, which might result from it, or any conditions, which this report might fail to disclose.
2. This evaluation was based on the information gained from visual observations of the existing structures. Observations are limited to what was accessible and visible at the time of our site visit. Concealed conditions were not observed. The evaluation did not include any destructive/non-destructive testing to determine existing material properties or quantities.
3. The recommendations in this report are not suitable for use as Construction Documents for permit and/or construction.
4. Items related to other disciplines such as architectural, accessibility, waterproofing, mechanical, electrical, etc. were not assessed.

Should you have any questions regarding this report, please do not hesitate to contact us.



Sincerely,



BIGGS CARDOSA
ASSOCIATES, INC.

# EXECUTIVE SUMMARY

EKI Environment & Water, Inc. (EKI) is pleased to present to the City of Burbank (Client or City) this report presenting the findings of a Phase I Environmental Site Assessment (ESA) and Phase II soil and soil vapor sampling investigation for the property located at 110 West Olive Avenue, Burbank, CA (Subject Property or Site; see Figure 1). The Subject Property is approximately 3.0 acres in area and includes three parcels (Assessor's Parcel Numbers (APNs) 2451-007-019, 2451-007-020, and 2451-007-026). EKI understands that Client is considering purchasing the Subject Property to use as a storage facility for the City of Burbank's Public Works Department.

This Phase I ESA was performed by EKI in general conformance with the scope and limitations of ASTM International (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation: E1527-21 (ASTM, 2021), and the requirements issued by the U.S. Environmental Protection Agency in 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries, Final Rule, dated 1 November 2005 (Final EPA AAI Rule) (U.S. EPA, 2005). The ASTM E1527-21 standard and the Final EPA AAI Rule similarly prescribe accepted reasonable efforts to identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property, e.g., Recognized Environmental Conditions (RECs). ASTM E1527-21 also prescribes measures to identify historical RECs, controlled RECs, Business Environmental Risks (BERs), and de minimis conditions at a property.

Based on the preliminary findings of Phase I ESA tasks, and at the request of the City, EKI implemented a Phase II sampling investigation at the Subject Property that included the collection of soil and soil vapor samples at selected locations on the Subject Property. A summary of the key findings of this Phase I ESA and Phase II sampling investigation is presented below. EKI's Phase I ESA opinions are informed by the Phase II sampling; the Phase II does not eliminate the possibility of unsampled impacts.

RECs. ASTM E1527-21 defines a REC as "(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. The following RECs were identified for the Subject Property in the performance of this Phase I and Phase II ESA:

- San Fernando Valley Superfund Site: The Subject Property lies within the San Fernando Valley Superfund Site's regional groundwater plume area. Chemicals of concern in groundwater include tetrachloroethene (PCE), trichloroethene (TCE), total chromium, and hexavalent chromium and are attributed to historical industrial operations in the San Fernando Valley Basin. PCE and TCE were detected in on-Site soil vapor samples collected by EKI at concentrations that exceed DTSC and EPA commercial/industrial screening levels. These detections are consistent with VOC volatilization from the regional plumes and migration through the vadose zone. This condition represents a REC as hazardous substances are present on the Subject Property exceeding screening levels which may present a vapor intrusion risk to occupants of overlying structures.

Historical RECs. ASTM E1527-21 defines a Historical REC (HREC) as "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria

established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations)."

- Former UST: A former 1,000-gallon steel gasoline UST was installed on the western portion of the Subject Property in 1953 and removed by Borrmann Steel Company on 10 February 1987, under regulatory oversight. The County of Los Angeles Department of Public Works (County) issued a formal closure letter on March 20, 1987, confirming remaining soils met unrestricted use criteria and that no further action was required. The Water Board concluded that these impacts posed no significant risk to groundwater and issued a "No Further Requirements" determination in 1997. Additional post-excavation soil sampling by the Water Board in 1990 detected total petroleum hydrocarbons (TPH) in soil however all concentrations were below the screening levels. TPH was detected in soil samples collected by EKI at concentrations below DTSC and EPA commercial/industrial screening levels, which is consistent with the previous investigation conducted within the former UST area. This condition represents a HREC as the previous release of petroleum products has been addressed to the satisfaction of the County and Water Board and meets unrestricted use criteria.

Controlled RECs. ASTM E1527-21 defines a Controlled REC as a "recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls."

- No controlled RECs were identified for the Subject Property in the performance of this Phase I ESA.

Business Environmental Risks. ASTM E1527-21 defines a BER as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate." The following BERs were identified for the Subject Property:

- Interior Unpaved Area with Staining: Soil samples were collected beneath a recessed unpaved area with a gravel floor and a rail spur along the eastern side of the warehouse building. Staining was observed by EKI in this area during the 9 January 2026 Site reconnaissance. Releases of petroleum products and solvents may have occurred in this area during loading and unloading in the past. TPH was not detected above laboratory reporting limits. Volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals were detected at concentrations below DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the absence of petroleum impacts, the lack of VOC and SVOC concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC, however due to the limited scope of sampling, the potential for localized chemical impacts to soil cannot be ruled out and this condition constitutes a BER.

- Exterior Metal Cutting Machine: Soil samples were collected near an external metal cutting machine located on the southwestern corner of the Subject Property building. Staining with visible cracks on the concrete floor near the cutting machine was observed by EKI during the 9 January 2026 Site reconnaissance. Releases of petroleum products and solvents may have occurred in this area during operation of the cutting machine. TPH, VOCs, SVOCs, and metals were

all detected at concentrations below DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the lack of TPH, VOC, and SVOC concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.

- Eastern Historical Railroad Spur: Railroad operations can be associated with potential environmental impacts including release of petroleum products and solvents from railcars and equipment, application of herbicides and pesticides, and leaching of chemical constituents from treated wooden ties. Soil samples were collected below the exterior railroad spur located along the eastern boundary of the Subject Property to evaluate these potential concerns. No TPH, VOCs, SVOCs, pesticides, herbicides, or metals were detected above DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the lack of TPH, VOC, SVOC, pesticide, and herbicide concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.

- Southern Historical Orchards: Orchards were present on the southern border of the Subject Property from approximately 1928 to 1938. Orchards can be associated with potential environmental impacts including pesticides, herbicides and metals in soil. Soil samples of first were collected to evaluate these potential concerns. No pesticides or herbicides were detected above laboratory reporting limits. Metals were detected at concentrations below DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the lack of pesticide or herbicide concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.

- Potential Historical Fill (Burbank River Re-Alignment): Historical aerial photographs indicate that fill material may have been placed on Subject Property after 1938 to infill a former channel of the Burbank River on the Subject Property prior to it being diverted and channelized into the Burbank Channel located adjacent and north of the Subject Property. Depending on the source, fill materials can contain debris or wastes (e.g., ash, construction materials, industrial wastes) and may be associated with contaminants such as metals, petroleum hydrocarbons, SVOCs, and pesticides/herbicides. Soil samples were collected within the inferred fill areas to evaluate these potential concerns. No TPH, VOCs, SVOCs, metals, pesticides, or herbicides were detected above DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring

element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). In addition, observations of subsurface lithology did not indicate the presence of debris, ash, or other anthropogenic fill materials, and appeared consistent with nearby native soil. Based on the lack of TPH, VOCs, SVOCs, metals, pesticides, or herbicides concentrations exceeding screening levels, the interpretation that arsenic concentrations reflect naturally occurring background conditions, and the subsurface lithology consistent with native soil, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.

- Subject Property Buildings: Given the age of the structures (built between the 1950s and 1970s), Subject Property buildings could contain asbestos containing materials, lead-based paint, polychlorinated biphenyls (PCBs), or other hazardous materials. As part of redevelopment, hazardous building materials should be profiled, managed, and disposed appropriately.

ASTM E1527-21 defines a de minimis condition as "condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

- No de minimis conditions were identified for the Subject Property in the performance of this Phase I ESA.

Significant Data Gaps. ASTM E1527-21 defines a "Data Gap" as a lack of or inability to obtain information required by the ASTM standard that affects the ability of the Environmental Professional to identify conditions indicative of releases or threatened releases to the Subject Property despite good faith efforts made by the environmental professional. No Data Gaps were identified in the performance of this Phase I ESA.

This Executive Summary does not contain all of the information, including observations, findings, and opinions, presented in the full Phase I ESA report. This Phase I ESA report should be read in its entirety to obtain a more complete understanding of the information and issues identified regarding the Subject Property and to aid in the evaluation of risks, decision-making, and/or actions taken by Client based on this information.

# 1 INTRODUCTION

EKI is pleased to present to The City of Burbank (City or Client), this Phase I Environmental Site Assessment and Results of Phase II Sampling Investigation for the property located at 110 Olive West Avenue in Burbank, California (Subject Property or Site; see Figure 1). The Subject Property is approximately 3 acres in area and includes three parcels (Assessor's Parcel Numbers (APNs) 2451-007-019, 2451-007-020, and 2451-007-026). The Subject Property is currently owned and occupied by The Borrmann Steel Company which fabricates and distributes finished steel products.

This Phase I ESA was performed by EKI in general conformance with the scope and limitations of E1527-21 (ASTM, 2021) and the Final EPA AAI Rule (U.S. EPA, 2005). The ASTM E1527-21 standard and the Final EPA AAI Rule similarly prescribe accepted reasonable efforts to identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property, e.g., Recognized Environmental Conditions (RECs). ASTM E1527-21 also prescribes measures to identify historical RECs, controlled RECs, Business Environmental Risks (BERs), and de minimis conditions at a property.

EKI's services were performed in accordance with the Professional Services Agreement by and between EKI and the City of Burbank, dated 1 August 2025 and EKI's proposal dated 4 February 2026.

## 1.1 Purpose of Phase I ESA

The purpose of this Phase I ESA is to identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property, i.e., RECs, in accordance with ASTM E1527-21. EKI understands that Client is purchasing the Subject Property to expand The City of Burbank's operations and use as a storage yard for fleet vehicles and other equipment.

## 1.2 Reliance

This report was prepared pursuant to the Agreement between EKI and Client and, as such, is for the sole benefit, use, and reliance of Client. Unless specifically authorized in writing in an agreement acceptable to EKI in its reasonable discretion, reliance on this report by any other entity is not permitted or authorized. Reliance on the information contained in this report by any third party without authorization by EKI does not make such entity a third-party beneficiary of EKI's work product. Any such unauthorized reliance on, modification of, or use of this report, including any of its information or conclusions, will be at such third party's sole risk. The User of this report, as defined by ASTM E1527-21, is City of Burbank.

## 1.3 Limitations and Exclusions

This report has been prepared for the exclusive use of the Client for the specific purpose described herein. The conclusions and recommendations are based on the scope of work performed and information available at the time of the investigation. Conditions may vary across the Site, and the absence of detected impacts at sampled locations does not guarantee that chemical impacts are not present at the Site.

## 1.4 Tasks Performed

EKI performed the following tasks as part of this Phase I and Phase II ESA:

- Reviewed available historical land use information for the Subject Property, adjoining properties, and surrounding area, e.g., historical Sanborn maps, historical aerial photographs, historical USGS topographic maps, and historical City Directories, provided by Lightbox/Environmental Data Resources, Inc. (EDR) (see Appendix A).

- Performed a site reconnaissance of the Subject Property to observe the current conditions and setting of the Subject Property and adjoining properties (see photographs in Appendix B), and conducted an interview with an Owner representative during the site visit.
- Reviewed the responses to questionnaires, completed by a representative of the User of this Phase I ESA report and a representative of the current owner of the Subject Property (see Appendix D).
- Purchased and reviewed an environmental regulatory agency database report for the Subject Property and surrounding area prepared by EDR (referred to as an EDR Radius Map Report; see Appendix E).
- Searched for environmental reports for the Subject Property and selected nearby upgradient reported chemical release sites on the California Water Resources Control Board (SWRCB) Geotracker and California Department of Toxic Substances Control (DTSC) EnviroStor database websites, and reviewed available files.
- Requested publicly-available files for the Subject Property from selected environmental regulatory and public agencies and reviewed files and/or responses provided to EKI (see agency responses and files received in Appendix F).
- Purchased and reviewed an Environmental Lien Search report for the Subject Property, prepared by EDR (see Appendix G).
- Following completion of Phase I ESA activities, completed a Phase II subsurface sampling investigation at the Subject Property including collecting soil and soil vapor samples at selected locations (see Section 8 of this report).

## 1.5 Limitations, Deviations, and Exceptions of Assessment

This assessment did not include an audit of current facility operations for compliance with hazardous material usage laws, regulations, or permits, including occupational health and safety issues. This Phase I ESA by EKI did not include an assessment of "non-scope considerations" as listed in Section 13.1.5 of ASTM E1527-21.

## 1.6 Additional Services

No other additional services beyond those required by ASTM E1527-21 or ASTM E2247-23 were performed by EKI as part of this Phase I ESA.

The conclusions and recommendations presented herein are our professional opinion and are not a warranty or guaranty as to the presence, absence, or extent of contamination at the Subject Property or of releases from or near the Subject Property. The facts presented herein are based on available information obtained by EKI and represent existing conditions at the Subject Property at the time the information was collected.

# 2 DESCRIPTION OF SUBJECT PROPERTY

## 2.1 Subject Property Location, Setting, Current Uses and Ownership

A description of the Subject Property and surrounding area is presented in the following table. Additional information on current uses of the Subject Property is included in Section 4.

| | |
|---|---|
| **Subject Property Address(es)** | 110 West Olive Avenue, Burbank, CA, 91502 |
| **Assessor's Parcel Number(s)/Property ID(s)** | 2451-007-026 |
| **Subject Property Size** | Approximately 3.0 acres |
| **Numbers of Buildings/SF** | 1/ ~71,000 square feet consisting of offices and a large warehouse |
| **Current Use(s) of Subject Property** | Steel and related alloy fabrication facility where steel and related alloy materials are cut, rolled, welded, and distributed as finished products. Records obtained from various regulatory agencies indicate the facility utilizes chemicals and manages hazardous materials and waste, including motor oil, hydraulic oil, waste oil and mixed oil, oil/water separation sludge latex waste, and other organic solids.<br>The facility is certified to manage these materials under the Los Angeles County Certified Unified Program Agency (LACoCUPA) and required to notify California Environmental Reporting System (CERS). |
| **Current Owner** | Borrmann Steel Company |
| **Surrounding Land Uses** | North: Burbank Channel Bikeway; Hollywood IX (internet provider); Downtown Burbank Metrolink Station; The Asylum (video production service).<br>South: Metro RV Sales (RV dealer);<br>East: City of Burbank Public Works Department;<br>West: City of Burbank Water and Power Switching Station |

## 2.2 Physical Characteristics of Subject Property

The physical characteristics of the Subject Property and sources for information are presented in the following table.

| | | |
|---|---|---|
| **Elevation and Surface Topography** | 560 feet above sea level; slopes southeast. | EDR Radius Map. |
| **Surface Water Runoff** | Runoff over paved surfaces; no storm drains observed on the Subject Property. | Site reconnaissance. |
| **Geology** | The uplands surrounding the SFV are comprised of crystalline and sedimentary rocks. Quaternary alluvium up to 2,000 feet thick was derived by erosion of the surrounding uplands. Groundwater in the eastern SFV occurs primarily in alluvial valley-fill deposits of Quaternary age, eroded from the adjacent San Gabriel and Verdugo Mountains. The valley fill is estimated to be at least 1,200 feet thick in places and is bounded to the east and at depth by low-permeability granitic and metamorphic bedrock. The valley fill deposits of the eastern SFV are relatively permeable and have been subdivided into the following four distinct lithologic/aquifer zones: Upper Regional Zone, Middle Regional Zone, Lower Regional Zone, and Deep Regional Zone. | Final 2023 Annual Groundwater Monitoring Report, Geosyntec, March 2024. |
| **Depth to Groundwater** | Depth-to-water measured in monitoring wells located near the Subject Property is approximately 100 feet below top of casing. | Final 2023 Annual Groundwater Monitoring. |
| **Groundwater Gradient Direction** | Southeast. | EDR Radius Map; Final 2023 Annual Groundwater Monitoring Report, Geosyntec, March 2024. |

# 3 HISTORICAL USE OF THE SUBJECT PROPERTY

Information on historical uses of the Subject Property and vicinity was obtained from the following sources, which are included in Appendix A of this report:

- Historical aerial photographs provide by EDR for the Subject Property and vicinity provided by EDR for selected years between 1928 and 2024;
- Historical USGS topographic maps provided by EDR for the Subject Property and vicinity provided by EDR for selected years between 1894 and 2022;
- Sanborn Fire Insurance maps provided by EDR for selected years between 1918 and 1970; and
- Historical City Directory information provided by EDR for selected years between 1920 and 2022.

| Time Period | Historical Land Use – Subject Property | Historical Land Use – Adjoining Properties |
|---|---|---|
| 1894 - 1938 (Pre-Development) | Topographic maps, Sanborn maps, and aerial photographs from this time period show the Subject Property is mostly vacant or undeveloped during this period. The only significant features visible during this period include the Burbank River (1928- 1938), a railroad spur (1894-1928), and orchards on the southern portion of the Subject Property (1928-1938) | Topographic maps, Sanborn maps, and aerial photographs from this time period show roads present along the west and north boundaries of the Subject Property. The adjoining land is vacant to the south and east, the railroad spur extends to the west and east of the Subject Property, and the Burbank River extends to the northwest and south of the Subject Property. The southern adjoining property appears to be an orchard (1928-1938). |
| 1941 – 1952 (Initial Development) | Topographic maps, Sanborn maps, and aerial photographs from this time period show a transition from vacant land to developed property. A building is first present on the north end of the Subject Property in 1941 along with an area in the southeast corner labelled as “USED LUMBER STGE YARD.” Orchards are no longer present on the 1952 aerial photograph. | Aerial photograph from 1952 show that the Burbank River has been channelized into the Burbank Channel along the north boundary of the Subject Property; Structures are first present on the southern adjoining property in the 1941 Sanborn map. |
| 1954 – 1960 (Expansion of Development) | Aerial photographs and Sanborn maps from this time period show an expansion of the footprint of the building on the north end of the Subject Property. | Aerial photographs and Sanborn maps show no changes to the adjoining properties. |
| 1964 – 1983 (Full Build-Out) | Aerial photographs and Sanborn maps from this time period show the Subject Property is fully built out by 3 buildings and other structures. | Aerial photographs and Sanborn maps show new structures present on the adjoining properties to the east and south. |
| 1989 – present (Modern Configuration) | Aerial photographs from this time period show the railroad spur along the eastern side of the Subject Property has been removed in the 1989 aerial photograph. | Aerial photographs and Sanborn maps show no changes to the adjoining properties. |

## 3.1 Historical City Directory Listings for Subject Property

The EDR Historical City Directory report (see Appendix A) lists addresses and occupants between the years of 1920 through 2022. Borrmann Steel Company is listed as the sole occupant of the Subject Property from 1950 to the present. There are no occupants listed for the Subject Property (110 West Olive Avenue) in the city directory prior to year 1950.

# 4 OBSERVATIONS MADE DURING SITE RECONNAISSANCE

On 9 January 2026, Kian Lew and Matias Marquez of EKI conducted a walk-through visual reconnaissance of the Subject Property. Kian Lew is an Environmental Professional as defined in 40 CFR Section 312.10, and as accepted by ASTM 1527-21 (see professional resume in Appendix H).

Accompanying EKI on the walk-through visual reconnaissance were David Ohlberg, branch manager with Borrmann Steel, the current owner of the Subject Property, and Brett Warner with Lee & Associates, real estate broker for the City of Burbank. During the visit, EKI conducted brief interviews with Mr. Ohlberg. Key observations of the Subject Property and adjoining areas are discussed below. Selected photographs taken during the walk-through of the Subject Property by EKI are presented in Appendix B of this report.

At the time of the walk-through visual reconnaissance, the Subject Property was an active industrial metal fabrication and distribution warehouse facility solely occupied by Borrmann Steel. The facilities included one main building with an office area in the north and the metal cutting and warehouse area in the south. The office area contained a second floor with additional office space, conference rooms, and storage. The main warehouse contained multiple cutting machines and storage racks for metal sheeting located on a concrete foundation. Along the southeastern side of the warehouse a recessed area with a gravel floor a rail spur was observed. The southern portion of the subject property consisted of a paved lot with metal storage racks and loading areas for trucks and forklifts.

| Subject Property Reconnaissance Observations – 9 January 2026 | | |
|---|---|---|
| Building Construction | General Building Uses | Office space in the northern portion of the building with warehouse space in the southern portion. The warehouse is used to cut, roll, weld, and distribute metal sheeting as finished products. |
| | Number of building stories | Second floor located above the office area |
| | Ancillary Structures | Covered metal storage racks in the southeast corner of the subject property |
| | Basement floor | N/A |
| | Basement conditions | N/A |
| Interior and Exterior | Hazardous Substances and Petroleum Products in connection with identified uses | Two 55-gallon drums and multiple 5-gallon buckets of used oil were observed near cutting and rolling machines used for sheet metal. |
| | Storage Tanks | 250-gallon liquid oxygen above ground storage tank |
| | Unusual Odors (strong, noxious, or pungent) | None observed |
| | Pools of Liquids | None observed |
| | Drums, Totes, other Bulk Containers (conditions, leaks, staining) | 5-gallon buckets of used oil near cutting machines with no secondary containment were observed. An approximately 275-gallon tote of Diesel Exhaust Fluid (DEF) was observed outside on the southern side of the building. |
| | Sumps, clarifiers, drains | None observed |
| | Hazardous Substances and Petroleum Product Containers not in | None observed |

| Subject Property Reconnaissance Observations – 9 January 2026 | | |
|---|---|---|
| | Connection with Identified Uses | |
| | Unidentified Substance Containers | None observed |
| | Hydraulic equipment (elevators, lifts) | Hydraulic lifts integrated into the warehouse for moving metal around |
| | Polychlorinated Biphenyl(PCB)-containing equipment | None observed |
| | Transformers (pad-mounted or pole) | Pad mounted transformers observed on the western side of the Subject Property |
| Interior and Exterior | Stains or Corrosion of Walls or Floors | Stains were observed in the recessed area with the gravel floor near rail spurs on the eastern side of the warehouse. Staining was also observed near a metal cutting/rolling machine that was located outside under an awning along the southern side of the warehouse |
| | Ventilation of Sub-Grade Parking Levels (if any) | N/A |
| | Pits, Ponds, or Lagoons associated with Waste Disposal | N/A |
| | Other Key Observations | None observed |
| Exterior | Stained Soil or Pavement | Staining was observed in the recessed areas with the gravel floor within the warehouse and near the rolling/cutting machine on the exterior of the warehouse |
| | Stressed Vegetation | |
| | Obvious Fill Areas or Debris Dumping | None was observed however based on known site history, the Burbank Western Channel north of the Subject Property once transected the Site and was most likely in-filled to create the current ground surface. |
| | Solid Waste | Municipal waste is collected in bins on the southeast corner of the warehouse |
| | Aboveground Storage Tanks | 250-gallon liquid oxygen above ground storage tank |
| | Underground Storage Tanks (vents, fill pipes) | None observed however based on known Site history, one 1,000-gallon UST containing unleaded gasoline was located on the western side of the Subject Property. The UST was removed with a no further action letter issued in 1987. |
| | Wastewater (Industrial/ Domestic) | None observed |
| | Wells (Water Supply or Monitoring) | None observed |
| | Septic/Leach Field Systems; Cesspools | None observed |
| | Heating/Cooling (e.g., electric, gas) | HVAC system located in the attic of the office area |
| | Storm Water Drainage | Municipal stormwater drainage. One storm drain was observed in a loading dock |

| Subject Property Reconnaissance Observations – 9 January 2026 | | |
|---|---|---|
| | (Municipal, dry wells) | on the western side of the Subject Property. According to Mr. Ohlberg, it is unknown where the drain leads, however it is suspected to lead to municipal storm drains. |
| | Other Key Observations | Rail spurs were observed along the eastern side of the Subject Property. |
| Adjoining Areas | Manufacturing, industrial, or bulk chemical storage or distribution? | None observed |
| | Chemical use, storage or disposal? | None observed |
| Adjoining Areas | Groundwater monitoring wells, grouted boreholes or other indicators of past investigations/ remedial actions? | None observed |
| | Observed current or indications of past gasoline service stations, dry cleaners, machine shops, or auto repair facilities? | None observed |
| | Other Key Observations | The Burbank Western Channel is located directly adjacent to the north of the Subject Property. |

## 4.1 Adjoining Properties

From the Subject Property and publicly-accessible areas, EKI observed the following adjoining properties and uses at the time of the site reconnaissance:

To the north: Burbank Channel.

To the south: Metro RV (160 W Olive Ave, Burbank, CA 91502, RV dealership, storage, and service center).

To the east: Burbank Public Works (124 S Lake St, Burbank, CA 91502, public works department).

To the west: West Olive Avenue.

# 5 REVIEW OF PRIOR ENVIRONMENTAL REPORTS

As of the preparation of this Phase I ESA report, no environmental reports or documents pertaining to the Subject Property were provided to EKI by the Owner or Client. However, during EKI's file review of requested public agency records, a limited subsurface investigation conducted in 1990 at the Subject Property was identified. Files including work plans, reports and letters from this request are included in Appendix F.

Based on files obtained from a records request from the Water Board (see Section 7.4, the Water Board initiated oversight in April 1990 of Borrmann Steel Company as part of the statewide AB1803 groundwater monitoring program administered by the California Department of Health Services. Given the facility's location within a designated area of concern and its operations involving solvents, oils, fuels, and related chemicals, the Water Board issued a mandatory chemical use questionnaire and subsequently conducted a facility inspection in May 1990, (Appendix F; RWQCB, 1990a).

The May 1990 inspection identified three primary areas of potential soil and groundwater impact: (1) cutting machine areas exhibiting visible waste discharge to ground surface with no secondary containment; (2) the maintenance equipment area, where chemical and waste discharges were observed; and (3) the former location of a 1,000-gallon gasoline underground storage tank (UST) on the western portion of the property, (Appendix F; RWQCB, 1990b).

In July 1990, the Water Board directed Bormann Steel to prepare and submit a subsurface investigation workplan. The workplan, developed under the agency's Well Investigation Program (WIP) designed to identify potential contamination sources affecting nearby drinking water supply wells, was approved and implemented in November 1990 by Environmental Managers & Auditors, Inc. (EMA). Six soil borings were advanced across the identified areas of concern, with samples collected at depths of 1, 5, and 10 feet below ground surface (bgs). Samples were analyzed for volatile organic compounds (VOCs) per EPA Methods 8010/8020 and for total petroleum hydrocarbons (TPH) per EPA Method 418.1, (Appendix F; EMA, 1991).

Laboratory results indicated that TPH concentrations ranged from 10.7 mg/kg to 18.1 mg/kg (below current screening levels) across all sampled intervals, and no VOCs were detected above reporting limits at any depth or location. EMA concluded that the detected TPH levels fell below established levels of concern at the time and that residual TPH soil impacts did not represent a significant threat to underlying groundwater quality. On this basis, EMA determined that no further investigation was warranted, (Appendix F; EMA, 1991).

In March 1991, the Water Board issued a comment letter on the Subsurface Investigation Report, which included a recommendation that the facility upgrade its floors to concrete in all steel cutting machine areas. This measure was intended to prevent cutting oils, lubricants, and other waste materials from migrating beyond these areas or infiltrating underlying soils, thereby minimizing the potential for future chemical or waste handling issues onsite, (Appendix F; RWQCB, 1991). Based on EKI's site reconnaissance, the floor inside the facility is largely paved with concrete approximately 3 feet in thickness, apart from the eastern interior boundary, which remains unpaved.

The Water Board concurred with EMA's findings and, in a letter dated March 25, 1997, issued a formal "No Further Requirements" (NFR) determination for the facility. This closure confirmed that TPH concentrations in soil were below risk-based thresholds, posed no significant threat to groundwater quality, and that no additional investigation or remedial action was necessary, (Appendix F; RWQCB, 1997).

# 6 INFORMATION PROVIDED BY OWNER AND USER

## 6.1 Summary of Owner Questionnaire

Robert Wedeem and Robert Persson, the current tenant of the Subject Property, completed the Owner Questionnaire, a copy of which, dated 8 January 2026, is included in Appendix D of this report. A summary of key information provided in the Owner Questionnaire is presented in the following table:

| | |
|---|---|
| Years Associated with Subject Property | 1 Year |
| General Land Use History | Metal distribution and metal cutting |
| Chemicals Used/Stored at Subject Property | Unknown at this time |
| Aware of Spills/Releases of Chemicals | Unknown at this time |
| Former or Current Fuel USTs/ASTs | Gasoline tank, unknown date of installation. Removed approximately mid-1980s. Ground was tested after removal and no contamination was found. |
| Aware of Leaks/Releases from USTs/ASTs | No |
| Chemicals Wastes Generated | Unknown |
| Landfills or Debris Disposal Areas | No |
| Water Supply or Groundwater Monitoring Wells | No |
| Septic or Leachfield Systems | No |
| Known Application of Pesticides | In past there was monthly pest control for office and warehouse. |
| Asbestos or Lead Surveys Performed | Unknown |
| Prior Phase I or Phase II Assessments | They believe there was at least one occurred however they do not know the date or have the report. |
| Aware of Environmental Cleanup Liens | No |
| Known or Suspected Property Contamination | No |
| Other Potentially Relevant Information | No |

## 6.2 Summary of User Questionnaire

Simone McFarland with the City of Burbank, the User of this Phase I ESA, complete the User Questionnaire, a copy of which, dated 28 December 2025, is included in Appendix D of this report. A summary of the key information for the Subject Property provided in the User Questionnaire is presented in the following table:

| User Question | Response | If "Yes", Key Information Provided |
|---|---|---|
| Aware of Environmental Cleanup Liens? | No | |
| Aware of Activity or Land Use Limitations or Controls? | No | |
| Specialized Knowledge of Chemicals or Processes? | No | |
| Aware of Past Uses of the Subject Property? | No | |
| Knowledge of Chemicals Currently or Previously Used? | No | |
| Aware of Any Chemical Spills or Releases? | No | |
| Aware of Any Environmental Cleanups? | No | |
| Obvious Indicators that Point to Presence or Likely Presence of Past Releases or Contamination? | Yes | "Yes, the property is used for steel distribution and may have been used for other related steel and related alloy uses such as manufacturing and processing." |

## 6.3 Interviews with Key Site Persons

During the Subject Property walk-through visual reconnaissance (see Section 4), EKI interviewed Mr. David Ohlberg, branch manager with Borrmann Steel, the current owner at the Subject Property. The information from the interview is included in Section 4.

In addition, Robert Wedeem and Robert Persson, the current tenant of the Subject Property, completed the Owner Questionnaire, a copy of which, dated 8 January 2026, is included in Appendix D of this report. A summary of key information provided in the Owner Questionnaire is presented in a table presented in Section 6.1 and contains sufficient information in lieu of a formal Owner interview.

# 7 RESULTS OF REGULATORY AGENCY DATABASE SEARCH AND FILE REVIEWS

To identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property, i.e., known or potential contamination of soil, soil vapor, or groundwater, or reported chemical use, EKI retained EDR to perform a search of available, selected federal, state, and local environmental regulatory agency databases. EDR performed a search for the Subject Property area and properties located within selected radii of the Subject Property, consistent with ASTM E1527-21. A copy of the resulting "radius map report" provided by EDR (EDR report), dated 11 February 2026, is provided in Appendix E. Refer to the EDR report for a complete list of the federal, state, and tribal databases searched.

## 7.1 Results of EDR Database Search for Subject Property

According to the EDR report, the Subject Property is listed in the following environmental regulatory databases.

| Address | Entity Name | Database(s) | Chemical Use / Release Notes | Years Listed |
|---|---|---|---|---|
| 110 W OLIVE AVE | BORRMANN STEEL | HIST UST | 1,000-gallon carbon steel tank containing unleaded motor vehicle fuel/waste oil. No leaks detected. | 1988 |
| 110 W OLIVE AVE | BORRMANN METALS CENTER | HWTS HAZNET | Waste oil and mixed oil; unspecified oil-containing waste disposed at Clean Harbors of Buttonwillow Landfill. | 2018 |
| 110 W OLIVE AVE | BOORMAN STEEL | HWTS | None listed. | 1997 |
| 110 W OLIVE AVE | BORRMANN METAL | HAULERS | None listed. | 2015 |
| 110 W OLIVE AVE | BORRMANN STEEL CO | SWEEPS UST; LOS ANGELES CO.; HMS; CERS | Multiple administrative violations cited for non-compliance of hazardous waste management. No releases observed. | 1989 - 2024 |
| 110 W OLIVE AVE | BORRMANN STEEL COMPANY | FINDS | None listed. | 2015 |
| 110 W OLIVE AVE | BORRMANN STEEL | HIST UST; WIP | UST was installed in 1953. | 1953 |
| 110 W OLIVE AVE | BORRMANN METAL CENTER, INC. | HWTS; HAZNET | Waste types listed include other organic solids; waste oil and mixed oil; oil/water separation sludge; latex waste. | 1998 - 2018 |
| 110 W OLIVE AVE | NEW BORRMANN METAL COMPANY LLC | HWTS | None listed. | Not Reported. |
| 110 W OLIVE AVE | BORRMANN METAL CENTER, INC. | FINDS; ECHO | Environmental interest type described as "other hazardous waste activities". | 1998 |

| Address | Entity Name | Database(s) | Chemical Use / Release Notes | Years Listed |
|---|---|---|---|---|
| 110 W OLIVE AVE | BORRMANN METAL CENTER, INC. | RCRA NonGen /NLR | 20 gallons of Non-RCRA Hazardous Waste Liquid (Used Antifreeze) | 2000 |
| 110 W OLIVE AVE | NEW BORRMANN METAL COMPANY LLC | RCRA NonGen /NLR | None listed. | None listed, |

The above database listings reflect the presence of the UST and use of oils at the Subject Property. The Subject Property is not listed on any other environmental regulatory databases, including chemical release databases. No releases are reported at the Subject Property according to the EDR report. Multiple violations are listed for the Subject Property however, all violations are considered administrative and after review do not pose a significant risk. Because chemical releases were not reported for the Subject Property, and previous facility inspections and subsurface investigations conducted with agency oversight indicated that operations did not pose a significant contamination release to groundwater, the historical and current facility operations do not pose a significant threat to groundwater and are not considered a REC.

## 7.2 Off-Site, Nearby and Upgradient Chemical Release Sites

As discussed in Section 2.3, above, the direction of the groundwater gradient at the Subject Property is presumed to be generally to the southeast based on recent groundwater elevation data collected for the San Fernando Valley Superfund Site. Thus, upgradient properties are generally northwest of the Subject Property.

According to the EDR report, the following upgradient reported chemical release sites are located within approximately one quarter mile of the Subject Property:

| Address | Entity Name | Database(s) | Chemical Release Notes | Approximate Distance from Subject Property |
|---|---|---|---|---|
| 5 W OLIVE ST | CITY OF BURBANK; CONTINENTAL-HAGEN CORP | LUST; Cortese; HIST CORTESE; CERS; UST FINDER RELEASE; SWEEPS UST; HIST UST; | Former LUST cleanup site with regulatory agency closure granted. | 0.078 miles northwest |
| 164 W MAGNOLIA BLVD | BURBANK CITY, BURBANK WATER & POWER, SCPPA, BURBANK PUBLIC SERVICE DEPT., | LUST; CPS-SLIC; AST; SWEEPS UST; CA FID UST; CHMIRS; EMI; NPDES; WDS; WIP; CIWQS; CERS; CORTESE; HIST CORTESE; | Former LUST and VCA cleanup site with regulatory agency closure granted. | 0.161 miles west |

| Address | Entity Name | Database(s) | Chemical Release Notes | Approximate Distance from Subject Property |
|---|---|---|---|---|
| | | CERSE; CERS HAZ WASTE; CERS TANKS; HWTS; HAZNET; ENVIROSTOR; VCP; HIST UST; UST FINDER; UST FINDER RELEASE | | |
| 201 N FRONT ST | RAILCHEM; UE SPECIALTIES; SANDOVAL DIESEL CO; MATROLINK STATION; SOUTH PACIFIC TRANSPORTATION | SEMS-ARCHIVE; CORRACTS; RCRA-TSDF; RCRA-SQG; RAATS; FINDS; ECHO; DEED; HWTS; HAZNET; CERS; CPS-SLIC; ENVIROSTOR; HWP; WIP | Former cleanup site regulatory agency closure granted. | 0.102 miles northwest |

As discussed in Section 7.3.2 below, releases at the above sites have been addressed by the appropriate regulatory agencies and additional records obtained from Envirostor and/or Geotracker indicate these sites have achieved closure. Given the types of chemicals released, the nature of the releases, and the distances from the Subject Property, none of these off-Site upgradient releases are likely to impact the Subject Property.

## 7.3 Search and Review of Online Environmental Regulatory Databases

EKI conducted a search for the Subject Property and nearby reported chemical release sites on the SWRCB Geotracker database and the DTSC EnviroStor database.

### 7.3.1 Results for Subject Property

The Subject Property is not listed on either State database as a chemical release site.

### 7.3.2 Results for Off-Site Upgradient Properties

The following sites located within approximately one quarter of a mile and potentially upgradient of the Subject Property are reported by Geotracker and/or EnviroStor to be chemical release sites:

5 West Olive Street

Based on Geotracker records, the site at 5 West Olive Street, approximately 100 feet northwest of the Subject Property, is a closed LUST cleanup site under Water Board oversight. Two 7,500-gallon USTs (gasoline and diesel) were removed in November 1989. Post-removal investigations identified TPH-G in soil up to 40,000 mg/kg at approximately 35 feet bgs, with initial groundwater concentrations of TPH-G

up to 55,000 µg/L and benzene up to 1,100 µg/L. A combined SVE and Air Sparging system operated from October 1996 through August 1997, extracting approximately 41,549 pounds of hydrocarbons. Post-remediation groundwater sampling confirmed BTEX below laboratory detection limits in all monitoring wells, with only trace TPH-G (88–92 µg/L) and benzene (0.39 µg/L) remaining in groundwater. The Water Board issued UST case closure in June 2000, determining that corrective action met the requirements of Health and Safety Code Section 25299.37 and that no further action was required.

The site is currently owned by the City of Burbank and operates as a paved parking lot for the Downtown Burbank Metrolink Station located at 201 North Front Street, Burbank, California. Based on the chemicals of concern, the depth to groundwater (approximately 100 feet), the distance of the release from the Subject Property, and the no further action letter issued by Water Board, this upgradient release site is unlikely to have impacted the Subject Property.

The Magnolia Power Plant

Based on Envirostor records, The Magnolia Power Plant at 164 West Magnolia Boulevard, approximately 200 feet west of the Subject Property, is a closed cleanup site under DTSC oversight. Historical operations as an electric generator and substation resulted in potential releases of arsenic, chromium VI, and halogenated solvents to soil. Phase II investigations identified TPH up to 2,570 mg/kg, VOCs including 1,1,2,2-tetrachloroethane at 5.8 ppb and 1,2,3-trichloropropane at 6.9 ppb, and arsenic in shallow subsurface soils. Following execution of a Voluntary Cleanup Agreement (VCA) in January 2003, DTSC reviewed a May 2003 Preliminary Endangerment Assessment (PEA) and concurred that detected concentrations did not pose a threat to human health or the environment under any land use scenario. DTSC determined no further investigation or soil remediation was warranted, achieving regulatory closure in June 2003.

The site is currently owned by the City of Burbank and comprises approximately 3 acres within the northeastern portion of the 23-acre Burbank Water and Power (BWP) Facility. Based on the chemicals of concern, groundwater not being affected, and regulatory closure, this upgradient release site is unlikely to have impacted the Subject Property.

201 North Front Street

Based on Envirostor records, the site at 201 North Front Street, approximately 200 feet northwest of the Subject Property, is a closed cleanup site formerly operated by Railchem, Inc., whose Resource Conservation and Recovery Act (RCRA) Hazardous Waste Management Unit (HWMU) is considered the primary source of soil impacts. Identified chemicals of concern included tetrachloroethylene (PCE) and trichloroethylene (TCE) in vadose zone soils, and total chromium and hexavalent chromium in shallow soils. An SVE system operated from October 1992 to December 1996, after which a 1997 risk screening confirmed residual soil impacts did not pose a carcinogenic risk under commercial land use conditions. DTSC approved the Closure Certification Report in September 1997 and formally closed the HWMU in June 1998, confirming soil cleanup requirements had been met; however, residual groundwater contamination attributable to the HWMU remains under USEPA oversight as part of the Glendale Operable Unit of the Crystal Springs National Priorities List (NPL) Site.

Based on Geotracker records, a December 2014 Phase II investigation detected elevated levels of total chromium in soil at a maximum concentration of 39.4 mg/kg at 15 feet bgs. Hexavalent chromium was not detected above the laboratory reporting limit of 0.04 mg/kg in any other soil samples, which is well below the USEPA Region 9 RSL of 6.3 mg/kg for industrial/commercial land use. On this basis, the Regional Board issued a No Further Requirements (NFR) determination for soils in September 2015, with the caveat that groundwater contamination remains subject to continued USEPA Superfund oversight.

The site is currently jointly owned by the City of Burbank and the Los Angeles County Metropolitan Transportation Authority (Metro) and operates as the Downtown Burbank Metrolink Station. Based on NFR determination from the Water Board, the distance from the Subject Property, and the low levels of VOCs found in the soil vapor probes on the Subject Property collected as part of the Phase II investigation for this report, this upgradient release site is unlikely to have significantly impacted the Subject Property.

## 7.4 Review of Regulatory Agency Files for Subject Property

EKI submitted requests to the following environmental regulatory and public agencies for publicly available file information for the Subject Property:

- California Department of Toxic Substances Control (DTSC)
- California Regional Water Quality Control Board, Los Angeles Region (Water Board)
- County of Los Angeles Department of Public Works, Environmental Programs Division
- County of Los Angeles Fire Department, Health Hazardous Materials Division (Fire Dept.)
- South Coast Air Quality Management District (SCAQMD)
- City of Burbank Building and Safety Division
- Cal Recycle (formerly the California Integrated Waste Management Board)
- California Geologic Energy Management Division (CalGEM)

According to responses received from DTSC, County of Los Angeles Department of Public Works, Environmental Programs Division, SCAQMD, Cal Recycle, and CalGEM, no files for the Subject Property exist at those agencies.

Files were received from the Water Board, Fire Dept., and City of Burbank Building and Safety Division which are included in Appendix F. EKI's opinion is that the review of available regulatory agency records (see summaries below), including those records obtained from Geotracker or EnviroStor, are sufficient to evaluate the existence of RECs, CRECs, Historical Recognized Environmental Conditions (HRECs) or de minimis conditions associated with the Subject Property.

### 7.4.1 Summary of Water Board File Review

Key information obtained from review of Water Board files is presented below:

Well Investigation Program (WIP) – Subsurface Investigation

As described in Section 5 above, the Water Board initiated oversight of Borrmann Steel Company in April 1990 under the statewide AB1803 groundwater monitoring program, citing the facility's location within a designated area of concern and its operations involving solvents, oils, fuels, and related chemicals.

A subsequent facility inspection identified three areas of potential soil and groundwater impact where visible waste discharge was observed near all steel cutting machines onto the ground, prompting the Water Board to direct the facility to prepare a subsurface investigation workplan.

In November 1990, EMA implemented the approved workplan, advancing six shallow soil borings to a maximum depth of 10 feet bgs across the areas of concern and analyzing samples for VOCs and TPH.

Results indicated TPH concentrations ranging from 10.7 mg/kg to 18.1 mg/kg with no VOCs detected above reporting limits, which EMA determined to be below established levels of concern and not representative of a significant threat to groundwater quality. The Water Board concurred with these

findings and issued a formal NFR determination in March 1997, confirming that no further investigation or remedial action was necessary.

### 7.4.2 Summary of Fire Department File Review

Key information obtained from review of Fire Department files is presented below:

Former Underground Storage Tank Removal and Regulatory Closure

Historical records obtained from the City of Burbank Fire Department and the Water Board indicate that a 1,000-gallon steel gasoline UST was installed on the western side of the Subject Property in 1953. In 1987, Bormann Steel initiated the tank removal procedure with oversight from the Fire Department and the Water Board.

The UST was removed on February 10, 1987, by Allied Environmental Management, Inc., with local fire department personnel present to ensure proper removal and transportation procedures were followed. Following removal, the tank was transported to the Casmalia "Class A" Dump in Kern County, California.

Following tank removal, a backhoe removed soil from the bottom of the excavation floor and two soil samples were collected at 8 feet below ground surface (bgs) — one from the east end (SP-1) and one from the west end (SP-2) — and analyzed for TPH and lead using EPA Method 8015. TPH was detected in only one sample (SP-1) at a concentration of 1.9 mg/kg, which is well below the 100 mg/kg screening threshold applied by the County Department of Public Health at the time of closure. This threshold remains consistent with current regulatory guidance; according to the 2025 Environmental Screening Level (ESL) Summary Tables (Revision 3), the Tier 1 soil ESL for TPH as gasoline is 100 mg/kg across all direct exposure scenarios. Lead was not detected above reporting limits in either soil sample.

On March 3, 1987, a Geotechnical Evaluation and Review of Subsurface Tank Removal, prepared by George DeVries, Consulting Geologist (Registered Geologist #3721), was submitted to the County of Los Angeles Department of Public Works. The report noted that groundwater was not encountered during excavation and that the pit was backfilled and compacted using on-site equipment with uncertified fill, which would require testing prior to supporting structural loads in the future.

On March 20, 1987, the County of Los Angeles Department of Public Works issued a Hazardous Materials Underground Storage closure letter confirming that soils removed during tank excavation were considered unrestricted and suitable for use as backfill material. The closure was deemed final with no further action required.

Notwithstanding the 1987 regulatory closure, the Water Board initiated a separate investigation of Borrmann Steel Company in April 1990 to evaluate potential areas of concern at the Subject Property, including the former UST area. Soil analytical results from this investigation detected TPH in soil at concentrations ranging from 10.6 to 18.1 mg/kg; VOCs were not detected above reporting limits. Based on these findings, the Water Board determined that residual soil impacts did not pose a significant risk to groundwater and issued a "No Further Requirements" determination for the Subject Property in 1997 (EMA, 1991).

Chemical Use and Hazardous Waste Management

Historical records obtained from the City of Burbank Fire Department indicate the facility utilizes chemicals and hazardous materials including compressed oxygen gas, acetylene gas, liquid petroleum distillate, liquid propane, oxygen gas, compressed argon gas, motor oil, hydraulic oil, cutting oil (cherry red spray mist oil), and deburring compound (PFS-727) water-based cleaning compound.

The facility is certified to manage these materials under the Los Angeles County Certified Unified Program Agency (LACoCUPA) and required to notify California Environmental Reporting System (CERS).

According to recent CERS records, the facility received multiple violations from 2007 to 2023 largely for administrative compliance. The violations consisted primarily of recurring administrative non-compliance with Burbank Fire Department hazardous materials reporting requirements, including failures to submit Chemical Inventories, Consolidated Contingency Plans, Site Maps, Emergency Response Plans, and Annual Renewal Certifications dating back to at least 2008. The majority of violations were resolved through proper submission and acceptance of the required documents into the CERS, with recheck violations generated in 2008, 2014, 2018, and 2019 ultimately being closed once the corresponding filings were accepted.

### 7.4.3 Summary of City of Burbank Building and Safety Division File Review

Key information obtained from review of City of Burbank Building and Safety Division files is presented below:

- Records indicate the Subject Property became privately owned in 1958 and is no longer used for railroad right of way purposes.

## 7.5 Results of Environmental Lien Search

EKI purchased from EDR an Environmental Lien Search report for the Subject Property. A copy of the EDR Lien Search report, dated 13 February 2026, is included in Appendix G of this Phase I ESA report. According to the Environmental Lien Search report, there are no records of environmental cleanup liens or use limitations (AULs) filed or recorded against the Subject Property. This is consistent with the other available information reviewed by EKI as part of this Phase I ESA.

# 8 PHASE II INVESTIGATION ACTIVITIES

This Phase II ESA was conducted by EKI and its subcontractors between 28 February 2026 and 7 March 2026. All field work was conducted under the supervision of Michael T. Steiger, P.E., a California licensed Professional Engineer (PE). Detailed descriptions of field methods and procedures are provided in EKI's Standard Operating Procedures (SOPs) (Appendix I). Deviations, if any, from EKI's SOPs are described below.

## 8.1 Purpose and Objectives

The purpose of this Phase II ESA was to obtain site-specific soil and soil vapor sufficient to assess whether there has been a release of hazardous substances on the Subject Property and impacts from off-site contamination. Specifically, this investigation was designed to:

- Evaluate whether releases occurred at specific areas of potential environmental concern identified in the Phase I ESA including (a) the unpaved area inside the building with staining, (b) the exterior area near the metal cutting machine, (c) the exterior railroad spur, (d) historical orchards on the southern portion of the Subject Property, and (d) the former 1,000 gallon UST.
- Assess the quality of potential fill materials that may have been brought onto the property after 1938 to channelize the adjacent Burbank Channel.
- Evaluate soil vapor for VOC impacts and vapor intrusion potential.

## 8.2 Preparation for Field Work

Prior to initiating field work, EKI completed the following:

- Prepared a Site-specific Health and Safety Plan (HSP) for field personnel.
- Coordinated with the Site owner and tenants regarding access, schedule, and timing.
- Conducted a Site visit to visually assess the planned sampling locations, evaluate access constraints and field logistics, and mark the planned locations for utility clearance.
- Contacted DigAlert at least 48 hours prior to drilling and sampling, as required by law.
- Coordinated and subcontracted with the following subcontractors:
  - J&H Drilling, Inc. dba M&R Drilling, a California-licensed drilling company to advance soil borings and construct soil vapor probes.
  - Eurofins Calscience, a California-certified analytical testing laboratory, to analyze soil samples.
  - H&P Geochemistry Mobile, Inc. a California-certified analytical mobile testing laboratory, to collect and analyze soil vapor samples.
  - SoCal Locators, Inc, an underground utility locating service, to screen for the presence of buried utilities at the planned borehole locations.

## 8.3 Permitting

EKI obtained one soil boring permit from The Los Angeles County Department of Environmental Health (Appendix J) for the advancement of soil borings below 10 feet bgs.

## 8.4 Soil Investigation

EKI collected 18 soil samples at selected locations at the Site (see Figure 3). All soil samples were labeled with a unique identification number, placed in a chilled ice chest, and submitted to the analytical laboratory under chain-of-custody procedures.

### 8.4.1 Rationale for Specific Sample Locations and Depths

The following sections describe the rationale for specific soil sample locations and depths.

#### *8.4.1.1 Interior Unpaved Area with Staining and Exterior Metal Cutting Machine*

Four shallow soil borings were advanced at the approximate locations EKI-SB-7, EKI-SB-8, EKI-SB-9, and EKI-SB-10 shown on the attached Figure 3 to a total depth of 9 feet, 3 feet, 1.5 feet, and 6 feet below ground surface, respectively, with samples taken at various depths. EKI-SB-7, EKI-SB-8, EKI-SB-9 were located inside the warehouse building along unpaved graveled floor within the eastern side of the building where railroad tracks and surficial staining were observed during the site reconnaissance. EKI-SB-10 was located outdoors in the southwest area next to a metal cutting machine where used oil containers, and visible cracks on the asphalt floor were observed during site reconnaissance. The rationale for sampling in these areas was to assess whether potential chemical spills, waste oils, or heavy metals have impacted the topsoil of these locations. Samples collected from these areas were analyzed for compounds associated with the potential impacts including VOCs, SVOCs, TPH, and metals.

#### *8.4.1.2 Eastern Historical Railroad Spur*

Two shallow soil borings were advanced at the approximate locations EKI-SB-2 and EKI-SB-3 shown on the attached Figure 3 to a total depth of 6 feet bgs with samples taken at the depth of first encountered native soil at 3 feet and 5.5 feet bgs, respectively. EKI-SB-2 and EKI-SB-3 were located outdoors along the exterior eastern boundary of the subject property where historical railroad was identified in historical Sanborn maps. The rationale for sampling in this area was to assess whether potential spills and leaks from railroad on and offloading, chemical leaching from the rail ties, and elevated heavy metals have impacted the soil. Samples collected in these areas were analyzed for compounds associated with the potential impacts including SVOCs, pesticides/herbicides, and metals.

#### *8.4.1.3 Historical Orchards*

Three shallow soil borings were advanced at the approximate locations EKI-SB-4, EKI-SB-5 and EKI-SB-6 shown on attached Figure 3. EKI-SB-4 and EKI-SB-6 were advanced to a total depth of 6 feet bgs, and EKI-SB-5 was advanced to a total depth of 7.5 feet bgs, with samples taken at the depth of first encountered native soil at 5.5 feet, 4.5 feet, and 6 feet bgs, respectively. EKI-SB-4, EKI-SB-5 and EKI-SB-6 were located along the southern border of the Subject Property where historical orchards were identified in areal imagery from 1938 to test for pesticides/herbicides and metals. The rationale for sampling in this area was to assess whether the historical orchards land use activities have impacted the soil with pesticides/herbicides and metals.

#### *8.4.1.4 Potential Historical Fill (Burbank River Re-Alignment)*

Two deep soil borings were advanced on the east and west side of the Subject Property at the approximate locations EKI-SB-1 and EKI-DB-2 shown on attached Figure 3. EKI-SB-1 and EKI-DB-2 were advanced to a total depth of 20 feet bgs, using a hollow stem auger rig, with samples taken at 7 feet and 15 feet bgs, and one sample at 5.5 feet bgs from EKI-SB-1 to address historical railroad concerns described above. EKI-SB-1 was located on the northeast corner of the Subject Property and EKI-DB-2 was located on the western side near Olive Avenue. Fill material was encountered between 0.5 feet and 5.5 feet bgs at both borings

and was characterized as generally brown to very dark brown, poorly graded fine-grained sand with 5 to 10% silt. Common contaminants found in historic imported fill include polycyclic aromatic hydrocarbons (PAHs), lead, coal ash, and debris, and the Subject Property may have received imported fill material sometime after 1938 to fill in and channelize the Burbank Channel located adjacent north to the Subject Property. The rationale for sampling in these areas at these depths was to assess whether the historical fill material is potentially impacted by these contaminates often associated with imported fill used in the 1930s. Samples collected at these depths were analyzed for compounds associated with the potential impacts including SVOCs (which include PAHs), TPH, metals, and pesticides/herbicides. As originally proposed, EKI-DB-1 would have advanced to 20 feet bgs, however, refusal was encountered at 7 feet bgs and as a result, no samples were collected from this boring. Alternatively, EKI-SB-1 was advanced to 20 ft bgs to collect the samples at the proposed depths.

#### *8.4.1.5 Former UST*

One soil boring was advanced at the approximate location EKI-UST-1 shown on Figure 3 to a total depth of 16.5 feet bgs using a hollow stem auger rig within the footprint of the historical UST that was removed in 1987. Samples were taken at depths that were below the depth of the removed UST, approximately 8 feet bgs, and 15 feet bgs. Based on historical records that EKI has obtained from the City of Burbank Fire Department, the UST was located on the western side of the Subject Property. The rationale for sampling in this location is to assess whether the soil is impacted by compounds associated with a historical gasoline UST including VOCs, SVOCs, and TPH.

### 8.4.2 Modifications to Sampling Depths and Locations in the Field

Sampling depths for borings EKI-SB-7, EKI-SB-8, and EKI-SB-9 were modified in the field due to coarse gravel encountered from approximately 0 to 2 feet bgs, which made the proposed sampling depths of 0.5 feet, 2 feet, and 5 feet bgs infeasible. EKI-DB-1 was originally proposed to advance to 20 feet bgs with sampling at 7 and 15 feet bgs; however, refusal was encountered at 7 feet bgs, and no samples were collected from this boring. As a result, sampling was redirected to EKI-SB-1, located approximately 20 feet north of EKI-DB-1. Although EKI-SB-1 was originally proposed to advance to only 6 feet bgs with a single sample collected at the first encountered native soil depth, it was instead advanced to 20 feet bgs to collect samples at the depths originally proposed for EKI-DB-1, as well as to assess compounds associated with both the historical railroad and historical fill material, the latter encountered below approximately 5 feet bgs.

### 8.4.3 Soil Sampling Procedures

The soil sampling procedures are presented below. Daily reports for soil sampling and SVP construction are provided in Appendix K.

EKI subcontracted with M&R Drilling to drill 17 soil boreholes at the locations shown on Figure 3. The soil boreholes were drilled to various depths to target specific soil types and potential contaminants of concern as shown on the Soil Sampling Matrix on Table 1. Some borings were advanced using a hand auger while others were advanced using a CME 75 hollow-stem auger rig. Due to gravel and a second layer of asphalt encountered at most borings in the upper 2.5 ft to 3 feet bgs, the upper 5 feet of each borehole were advanced with the hollow stem auger's steel hammer to successfully advance below the coarse material that would have caused refusal by hand auger. The EKI field geologist continuously logged the soil lithology using the Unified Soil Classification System (USCS) and Munsell Soil Color Chart and performed field screening for VOCs in selected soil samples and cuttings, using a hand-held photo-ionization detector (PID). Lithologic borehole logs prepared by EKI are included in Appendix L.

Soil samples were collected from the boreholes by hand auger bucket or split spoons and placed in 4 oz jars and Volatile Organic Analysis (VOA) vials for specific analyses listed in Table 1. These soil sampling procedures are described in more detail in EKI SOP-8 (Appendix I). A total of 18 soil samples representing the following depth intervals from all borings were retained for the following chemical analyses:

- Borings EKI-SB-1, EKI-SB-2 and EKI-SB-3: first encountered native soil at 5.5 to 6 feet, 3 to 3.5 feet, and 5.5 to 6 feet bgs, respectively; analyzed for SVOCs, pesticides/herbicides, and metals.
- Borings EKI-SB-4, EKI-SB-5, and EKI-SB-6: first encountered native soil at 5.5 to 5 feet, 6 to 6.5 feet, and 4.5 to 5 feet bgs, respectively; analyzed for pesticides/herbicides and metals.
- EKI-SB-7, EKI-SB-8, EKI-SB-9: first encountered topsoil at 2.5 feet, 1.5 feet, and 8.5 feet bgs, respectively; analyzed for VOCs, SVOCs, TPH, and metals.
- EKI-SB-10: first encountered topsoil and fill/native interface at 0.5 feet, 2 feet, and 5 feet bgs; analyzed for analyzed for VOCs, SVOCs, TPH, and metals.
- EKI-SB-1 and EKI-DB-2: potential historical imported fill layers at 7 feet and 15 feet bgs at both borings; analyzed for SVOCs (which include PAHs), TPH, metals, and pesticides/herbicides.

All sample containers were labeled, stored, transported and submitted under chain-of-custody protocols to Eurofins Calscience in Tustin, California for chemical analysis following the procedures in EKI SOP-2 (Appendix I).

### 8.4.4 Laboratory Analysis of Soil Samples

Selected soil samples were analyzed by Eurofins for the following as shown on Tables 4 through 6:

- CAM 17 metals and Mercury using U.S. EPA Method 6020b/7471;
- SVOCs using U.S. EPA Method 8270c;
- Organochlorine pesticides (OCPs) using U.S. EPA Method 8081A;
- Herbicides using U.S. EPA Method 8135b;
- VOCs using U.S. EPA Method 8260 and preserved consistent with SW-846 Test Method 5035 (Terracore Samplers);
- Total petroleum hydrocarbons quantified as gasoline using U.S. EPA Method 8015B;
- TPH as diesel using U.S. EPA Method 8015B, with silica gel cleanup; and
- Percent moisture using ASTM D2216 (to compare the analytical results to current published environmental regulatory agency screening levels, which are presented in dry weight).

A copy of the laboratory reports, with the complete analyte list and chain-of-custody forms, is provided in Appendix M.

## 8.5 Soil Vapor Investigation

Four soil vapor borings, EKI-VP-1, EKI-VP-2, EKI-VP-3, and EKI-VP-4, were advanced in the four corners of the Subject Property as shown on Figure 3, for the construction of temporary soil vapor probes (SVPs) to test for VOCs. The rationale for sampling soil vapor in these locations is to assess whether there are VOCs present in the vadose zone as a result from impacts from the adjacent PCE/TCE sites, the Superfund Site, potential use of solvents, chemical spills from railroads, and the leaking USTs. The soil vapor samples were analyzed for chlorinated VOCs, including PCE and TCE. VOCs impacts to the vadose zone could potentially

lead to vapor intrusion at the Subject Property. Due to the limited scope of this investigation, indoor air sampling was not conducted, and therefore indoor data does not yet exist for the Subject Property. In order to conduct a formal vapor intrusion assessment, indoor sampling and sub-slab sampling will need to be conducted inside the buildings at the Subject Property.

M&R Drilling, at the direction of EKI, constructed four SVPs at selected locations at the Subject Property (see Figure 3). The SVP construction procedures and soil vapor sampling and analysis procedures are presented below. Daily reports for soil sampling and SVP construction are provided in Appendix K.

### 8.5.1 Construction of Soil Vapor Probes

EKI subcontracted with M&R to drill 4 soil boreholes for construction of SVPs at the locations shown on Figure 3. The SVP boreholes were drilled to a depth of approximately 6 feet below ground surface (bgs) using a 2-in steel hammer from the hollow-stem auger rig. The boreholes were originally proposed to be advanced by hand-auger but due to a potential second layer of asphalt encountered at approximately 3 feet bgs, the driller used the hollow-stem auger rig to successfully advance to the proposed depths. The EKI field geologist working under the supervision of the registered professional, logged the soil lithology using the Unified Soil Classification System (USCS) and Munsell Soil Color Chart and performed field screening for VOCs in selected soil samples and cuttings, using a hand-held PID.

The SVPs were constructed as described in EKI SOP-20 (Appendix I), in general accordance with the *Advisory - Active Soil Gas Investigations* (CalEPA, 2015). The SVP screens were placed at nominal depths of 4.5 feet bgs. The SVP construction details are shown on the lithologic borehole logs included in Appendix L.

After a borehole was completed to its total depth and an SVP was constructed and sampled, the borehole was backfilled and sealed at the surface in accordance with permit conditions.

### 8.5.2 Soil Vapor Sampling Procedures

On 7 March 2026, under the direction of EKI, H&P Mobile Geochemistry, Inc., a State-certified mobile laboratory, performed the soil vapor sampling of all four temporary SVPs. Before sampling each SVP, H&P conducted a 60 second shut-in test to confirm the aboveground sample train held vacuum. The SVPs were then purged for three system volumes, including the probe inner tubing, dry bentonite, and sand pack volumes, at a rate not exceeding 200 milliliters per minute and at a vacuum below 100 inches of water column (in w.c.). 1,1-difluoroethane (DFA), a leak check compound, was then applied to the SVPs. These protocols are consistent with H&P's Standard Operating Procedure. Each sample was collected in a 400-mL Tedlar bag by drawing soil vapor through a luer-lock connection between the sampling probe and the vacuum pump. The sample was then immediately injected into an on-Site portable gas chromatograph and analyzed for VOCs using modified U.S. Environmental Protection Agency (EPA) Method 8260SV. The laboratory report is provided in Appendix M.

### 8.5.3 Quality Assurance/Quality Control Results Evaluation

This section is an evaluation of the field and laboratory quality assurance and quality control results and a determination of the usability of the data.

#### *8.5.3.1 Field Quality Control Samples*

H&P collected and analyzed the following field quality control samples as part of the Site Investigation:

#### *8.5.3.2 Blank sample, EC60701-BLK1, and replicate soil vapor sample EKI-VP-1-REP.Laboratory QA/QC Review*

EKI evaluated the laboratory QA/QC data provided by Eurofins Calscience and H&P Mobile Geochemistry to determine if the analytical data are acceptable for purposes of attaining the objectives of this Site Investigation. The laboratory reports contain laboratory-provided QA/QC results associated with the analyses. Laboratory QA/QC measures included reporting of Matrix spike (MS) and matrix spike duplicate (MSD) samples, laboratory control samples and laboratory control sample duplicates (LCS/LCSD), method blanks, and surrogate analyses.

Analytes were not detected in laboratory method blanks. Surrogate percent recoveries and LCS/LCSD percent recoveries and RPDs were within laboratory control limits. MS/MSD and surrogate results were occasionally outside their laboratory-defined control limits. However, all the corresponding LCS and method blank results were within their control limits, and the occasional MS/MSD results outside their control limit were judged to be caused by matrix effects. Therefore, the data were found to be acceptable for the intended use.

## 8.6 Decontamination

M&R decontaminated all down-hole equipment by steam cleaning prior to advancing each soil borehole to minimize the potential for cross-contamination. All re-usable field sampling equipment was decontaminated prior to each use by either steam cleaning or washing in a solution of Alconox®, followed by rinsing with clean water, and then rinsing with distilled water, following the procedures in EKI SOP-4 (Appendix I).

## 8.7 Investigation Derived Waste Characterization and Disposal

All investigation derived waste (IDW), i.e. soil cuttings, purged groundwater, and decontamination water, generated during sampling activities were placed in Department of Transportation (DOT) approved 55-gallon drums. All drums were sealed, labeled with the generator name and contact information, and left at a secure location on the Site designated by the Site owner for temporary storage. EKI collected samples of the IDW and submitted the samples to Eurofins Calscience in Tustin, California. The analytical results for the IDW are included in Appendix M. On behalf of Client, EKI is currently coordinating Client's proper disposal of the IDW at a permitted waste management facility.[1]

## 8.8 Destruction and Grouting of Boreholes

Once the investigation was completed, temporary well casings were removed, and Type I-II neat cement grout was placed from the bottom of each soil borehole to the surface using a tremie pipe, in accordance with the permit requirements. A cold asphalt patch was placed at the top of boreholes completed within the asphalt-covered parking area.

[1] EKI is not, and has no responsibility as, a generator, operator, treater, storer, transporter or disposer of hazardous materials or toxic substances found or identified at or near the Site, including investigation-derived waste. Client is arranging for handling, removal, treatment, storage, transportation, and disposal or reuse of such materials. Final decisions regarding disposal and/or treatment of hazardous material shall be the sole responsibility of Client. EKI's responsibilities are limited to assisting Client with its appropriate arrangements.

# 9 EVALUATION OF PHASE II RESULTS

This section presents an evaluation of the investigation results for the Site. Analytical results for all chemicals detected in soil and soil vapor samples collected during the Site investigation are reported in Tables 3 through 6. The final, signed laboratory analytical reports are included in Appendix M. The lithologic borehole logs and daily reports prepared by EKI for the Site investigation are provided in Appendix L and K, respectively.

## 9.1 Results of Soil Sampling

As shown in Tables 4 through 6, the analytical results for the soil samples are compared to the following current environmental regulatory agency screening levels for commercial/industrial land use:

- California Regional Water Quality Control Board, San Francisco Bay Region (SFRWQCB) soil Environmental Screening Levels (ESLs) (SFRWQCB, 2026);
- California Department of Toxic Substances Control (DTSC)-Modified Screening Levels (DTSC-SLs, 2025):
  - DTSC Human and Ecological Risk Office (HERO) - Human Heakth Risk Assessment (HHRA) Note Number 3, Modified Screening Levels (DTSC, 2025);
  - DTSC HERO – HHRA Note Number 11, Southern California Ambient Arsenic Screening Levels (DTSC, 2020); and
- U.S. EPA Regional Screening Levels (RSLs) (U.S. EPA, 2024). Applicable to VOCs without a DTSC-SL, consistent with DTSC Note 3 (DTSC, 2025).

### 9.1.1 Interior Unpaved Area with Staining

VOCs: VOCs were detected in the soil samples above the laboratory detection limit (DL) at EKI-SB-7, EKI-SB-8, and EKI-SB-9 include acetone, benzene, 2-butanone (MEK), xylenes, and toluene, with concentrations well below applicable commercial/industrial screening levels.

TPH: No TPH compounds were detected in the soil samples above the laboratory DLs at any boring location.

Metals: Low levels of heavy metals were detected in the soil samples above laboratory DLs at EKI-SB-7, EKI-SB-8, and EKI-SB-9, with most concentrations well below applicable commercial/industrial screening levels. Elevated concentrations of arsenic ranged from 3.10 mg/kg and 4.21 mg/kg, however, these are well below the 12 mg/kg regional background threshold for Southern California.

### 9.1.2 Exterior Metal Cutting Machine

VOCs: PCE was detected in soil samples between the laboratory detection limit (DL) and method detection limit (MDL) at EKI-SB-10 at 0.5 feet, and 2 feet bgs with concentrations measured at 0.30 micrograms per kilogram (ug/kg) and 0.58 ug/kg, respectively. Other VOCs detected above the laboratory DL at this sampling location include acetone, benzene and toluene, with concentrations well below applicable commercial/industrial screening levels.

SVOCs: Bis(2-ethylhexyl) phthalate was detected in soil samples between the laboratory DL and MDL at EKI-SB-10-2.0 at 2 feet bgs.

TPH: TPH-DRO and TPH-ORO were detected in soil samples above the laboratory DLs at EKI-SB-10 at 0.5 feet bgs, with concentrations of 22 mg/kg and 220 mg/kg, respectively, and TPH-ORO was measured between the DL and MDL at 8.7 mg/kg.

Metals: Low levels of heavy metals were detected in soil samples at all depths at EKI-SB-10, with most concentrations well below applicable commercial/industrial screening levels. Elevated concentrations of arsenic ranged from 1.08 mg/kg and 2.56 mg/kg, however, these are well below the 12 mg/kg regional background threshold for Southern California.

### 9.1.3 Eastern Historical Railroad Spur

VOCs: No VOCs were detected in soil samples above the laboratory detection limit (DL) at any boring location.

SVOCs: Bis(2-ethylhexyl) phthalate was detected in soil samples between the laboratory DL and MDL at EKI-SB-10 at 2 feet bgs, with a concentration of 0.47 mg/kg.

Metals: Low levels of heavy metals were detected in soil samples at EKI-SB-1, EKI-SB-2, and EKI-SB-3, with most concentrations well below applicable commercial/industrial screening levels. Elevated concentrations of arsenic ranged from 0.818 mg/kg and 2.91 mg/kg, however, these are well below the 12 mg/kg regional background threshold for Southern California.

Pesticides/Herbicides: No compounds were detected in soil samples above the DL at any boring location.

### 9.1.4 Southern Historical Orchards

Metals: Low levels of heavy metals were detected in soil samples at EKI-SB-4, EKI-SB-5, and EKI-SB-6, with most concentrations well below applicable commercial/industrial screening levels. Elevated concentrations of arsenic ranged from 2.00 mg/kg and 3.76 mg/kg, however, these are well below the 12 mg/kg regional background threshold for Southern California.

Pesticides/Herbicides: No compounds were detected in soil samples above the DL at any boring location.

### 9.1.5 Potential Historical Fill (Burbank River Re-Alignment)

SVOCs: Di-n-butyl phthalate was detected in soil samples between the laboratory DL and MDL at EKI-SB-1 at 7 feet bgs with a concentration of 0.31 mg/kg.

TPH: TPH-ORO was detected in soil samples between the DL and MDL at EKI-DB-2 at 7 feet bgs with a concentration of 5.8 mg/kg.

Metals: Low levels of heavy metals were detected in soil samples at EKI-SB-1 and EKI-DB-2, with most concentrations well below applicable commercial/industrial screening levels. Elevated concentrations of arsenic ranged from 1.63 mg/kg and 3.89 mg/kg, however, these are well below the 12 mg/kg regional background threshold for Southern California.

Pesticides/Herbicides: No compounds were detected in soil samples above the laboratory DL at any boring location.

### 9.1.6 Former UST

BTEX and fuel oxygenates: No BTEX or fuel oxygenate compounds were detected in soil samples above the laboratory DL. Compounds measured between the laboratory DL and MDL at EKI-UST-1 include tert-Butyl alcohol (TBA), benzene, and toluene.

TPH: TPH-DRO and TPH-ORO were detected in soil samples above the laboratory DL at EKI-UST-1 at 8 feet bgs, with concentrations of 8.0 milligrams per kilogram (mg/kg) and 38 mg/kg, respectively.

All concentrations measured between laboratory DL and MDL are J-flagged in the laboratory report (Appendix M) and on Tables 4 through 6.

### 9.2 Results of Soil Vapor Sampling

As shown in Table 3, the analytical results for the soil vapor samples are compared to the following current environmental regulatory agency screening levels for soil vapor at commercial/industrial sites:

- Air DTSC-SLs (DTSC, 2025) divided by the default attenuation factor (AF) of 0.03 (Cal-EPA, 2023); and
- Air U.S. EPA RSLs (RSLs, 2024) divided by the default AF of 0.03. Applicable to VOCs without a DTSC-SL, consistent with DTSC Note 3 (DTSC, 2025).

PCE was detected above the laboratory reporting limit at all 4 SVP locations with concentrations ranging from 13 to 820 micrograms per cubic meter (µg/$m^3$), and TCE was detected only at EKI-VP-3 with a concentration of 82 µg/$m^3$.

Elevated PCE concentrations were detected at EKI-VP-3 and EKI-VP-4 with concentrations of 990 µg/$m^3$ and 820 µg/$m^3$, respectively, and exceed the DTSC-SL of 67 µg/$m^3$. These SVP locations are located along the southern boundary of the Subject Property where the comingled groundwater plume of the San Fernando Superfund Site underlies. This is considered a REC as there is a hazardous substance exceeding DTSC screening levels located on the Subject Property which may present a vapor intrusion risk to occupants of overlying structures.

## 10 CONCLUSIONS AND RECOMMENDATIONS

EKI's findings and opinions regarding conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property are presented below. We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 110 West Olive Avenue, Burbank, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. EKI's Phase I ESA opinions are informed by the Phase II sampling; the Phase II does not eliminate the possibility of unsampled impacts. This assessment has revealed the following RECs, Historical RECs, and BERs in connection with the Subject Property.

*RECs:* The following RECs were identified for the Subject Property:

- San Fernando Valley Superfund Site: The Subject Property lies within the San Fernando Valley Superfund Site's regional groundwater plume area. Chemicals of concern in groundwater include tetrachloroethene (PCE), trichloroethene (TCE), total chromium, and hexavalent chromium and are attributed to historical industrial operations in the San Fernando Valley Basin. PCE and TCE were detected in on-Site soil vapor samples collected by EKI at concentrations that exceed DTSC and EPA commercial/industrial screening levels. These detections are consistent with VOC volatilization from the regional plumes and migration through the vadose zone. This condition represents a REC as hazardous substances are present on the Subject Property exceeding screening levels which may present a vapor intrusion risk to occupants of overlying structures.

*HRECs:* The following HRECs were identified for the Subject Property:

- Former UST: A former 1,000-gallon steel gasoline UST was installed on the western portion of the Subject Property in 1953 and removed by Borrmann Steel Company on 10 February 1987, under regulatory oversight. The County of Los Angeles Department of Public Works (County) issued a formal closure letter on March 20, 1987, confirming remaining soils met unrestricted use criteria and that no further action was required. The Water Board concluded that these impacts posed no significant risk to groundwater and issued a "No Further Requirements" determination in 1997. Additional post-excavation soil sampling by the Water Board in 1990 detected total petroleum hydrocarbons (TPH) in soil however all concentrations were below the screening levels. TPH was

detected in soil samples collected by EKI at concentrations below DTSC and EPA commercial/industrial screening levels, which is consistent with the previous investigation conducted within the former UST area. This condition represents a HREC as the previous release of petroleum products has been addressed to the satisfaction of the County and Water Board and meets unrestricted use criteria.

*BERs:* The following BERs were identified for the Subject Property:

- Interior Unpaved Area with Staining: Soil samples were collected beneath a recessed unpaved area with a gravel floor and a rail spur along the eastern side of the warehouse building. Staining was observed by EKI in this area during the 9 January 2026 Site reconnaissance. Releases of petroleum products and solvents may have occurred in this area during loading and unloading in the past. TPH was not detected above laboratory reporting limits. Volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals were detected at concentrations below DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the absence of petroleum impacts, the lack of VOC and SVOC concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.
- Exterior Metal Cutting Machine: Soil samples were collected near an external metal cutting machine located on the southwestern corner of the Subject Property building. Staining with visible cracks on the concrete floor near the cutting machine was observed by EKI during the 9 January 2026 Site reconnaissance. Releases of petroleum products and solvents may have occurred in this area during operation of the cutting machine. TPH, VOCs, SVOCs, and metals were all detected at concentrations below DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the lack of TPH, VOC, and SVOC concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.
- Eastern Historical Railroad Spur: Railroad operations can be associated with potential environmental impacts including release of petroleum products and solvents from railcars and equipment, application of herbicides and pesticides, and leaching of chemical constituents from treated wooden ties. Soil samples were collected below the exterior railroad spur located along the eastern boundary of the Subject Property to evaluate these potential concerns. No TPH, VOCs, SVOCs, pesticides, herbicides, or metals were detected above DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the lack of TPH, VOC, SVOC, pesticide, and herbicide concentrations exceeding screening

levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.

- Southern Historical Orchards: Orchards were present on the southern border of the Subject Property from approximately 1928 to 1938. Orchards can be associated with potential environmental impacts including pesticides, herbicides and metals in soil. Soil samples first were collected to evaluate these potential concerns. No pesticides or herbicides were detected above laboratory reporting limits. Metals were detected at concentrations below DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). Based on the lack of pesticide or herbicide concentrations exceeding screening levels, and the interpretation that arsenic concentrations reflect naturally occurring background conditions, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.
- Potential Historical Fill (Burbank River Re-Alignment): Historical aerial photographs indicate that fill material may have been placed on Subject Property after 1938 to infill a former channel of the Burbank River on the Subject Property prior to it being diverted and channelized into the Burbank Channel located adjacent and north of the Subject Property. Depending on the source, fill materials can contain debris or wastes (e.g., ash, construction materials, industrial wastes) and may be associated with contaminants such as metals, petroleum hydrocarbons, SVOCs, and pesticides/herbicides. Soil samples were collected within the inferred fill areas to evaluate these potential concerns. No TPH, VOCs, SVOCs, metals, pesticides, or herbicides were detected above DTSC and EPA commercial/industrial screening levels, with the exception of arsenic. Arsenic was detected at concentrations above screening levels; however, arsenic is a naturally occurring element in regional soils, and detected concentrations are consistent with published background concentrations for southern California soils, typically up to approximately 12 mg/kg (DTSC, 2020). In addition, observations of subsurface lithology did not indicate the presence of debris, ash, or other anthropogenic fill materials, and appeared consistent with nearby native soil. Based on the lack of TPH, VOCs, SVOCs, metals, pesticides, or herbicides concentrations exceeding screening levels, the interpretation that arsenic concentrations reflect naturally occurring background conditions, and the subsurface lithology consistent with native soil, this condition does not represent a REC, however due to the limited scope of sampling, the potential for chemical impacts to soil cannot be ruled out and this condition constitutes a BER.
- Subject Property Buildings: Given the age of the structures (built between the 1950s and 1970s), Subject Property buildings could contain asbestos containing materials, lead-based paint, polychlorinated biphenyls (PCBs), or other hazardous materials. As part of redevelopment, hazardous building materials should be profiled, managed, and disposed appropriately.

## 10.1 Identified Phase I ESA Gaps

According to ASTM E1527-21 a “Data Gap” is lack of or inability to obtain information required by the ASTM standard that affects the ability of the environmental professional to identify conditions indicative of releases or threatened releases to the Subject Property despite good faith efforts made by the environmental professional. No Data Gaps were identified in the performance of this Phase I ESA.

**Abbreviations:**
"--": not applicable
method detection limit. The concentration is an approximate value.
<: not detected above the stated laboratory reporting limit
ASTM: American Society for Testing and Materials
bgs: below ground surface
DB: deep boring
DRO: Diesel Range Organics
DTSC: California Department of Toxic Substances Control
EKI: EKI Environment & Water, Inc.
EPA: Environmental Protection Agency
ESL: Environmental Screening Level
J: Result is an approximate value between the laboratory detection limit and the method detection limit
GRO: Gasoline Range Organics
HHRA: Human Health Risk Assessment
mg/kg: milligrams per kilogram
ORO: Oil Range Organics
Quality Control Board
RSL: Regional Screening Level
SB: shallow boring
SFBRWQCB: San Francisco Bay Regional Water
SL: Screening Level
TPH: Total Petroleum Hydrocarbons
UST: underground storage tank

**Notes:**
(a) Soil samples were analyzed by Eurofins Calscience in Tustin, California by EPA Methods 8015C for DRO and ORO and 8015D for GRO.
(b) Compounds above laboratory detection limits are shown in **bold**.
(c) Soil commercial / industrial SFBRWQCB ESLs are based on the non-cancer hazard direct exposure levels. DTSC-SL/RSL are not available for TPH.
(d) Superscript indicates a SFBRWQCB ESL for cancer risk is not available, thus a non-cancer hazard value is shown.

# Table 5
## Soil Sample Analytical Results – Pesticides and Herbicides
Borrmann Steel Company
110 West Olive Avenue, Burbank, California

**Abbreviations:**

EPA: Environmental Protection Agency
"--": not applicable/not available
<: not detected above the stated laboratory reporting limit
µg/kg: micrograms per kilogram
bgs: below ground surface
DB: deep boring
DTSC: California Department of Toxic Substances Control
HHRA: Human Health Risk Assessment
RSL: Regional Screening Level
SB: shallow boring
SL: Screening Level

**Notes:**

(a) Soil samples were analyzed by Eurofins Calscience in Tustin, California by EPA Methods 8081B for organochlorine pesticides, 8141B for organophosphorus pesticides, and 8321B for chlorinated herbicides.
(b) Soil commercial / industrial DTSC-SLs and EPA RSLs are based on the more stringent of the cancer and non-cancer endpoints. If a DTSC-SL is not available, then the lower of the cancer and non-cancer endpoints from the EPA RSLs are shown.
(c) All concentrations are measured in µg/kg. Screening level units are converted into µg/kg.
(d) Superscript indicates a DTSC-SL or EPA-RSL cancer endpoint is not available, thus a non-cancer endpoint is shown.

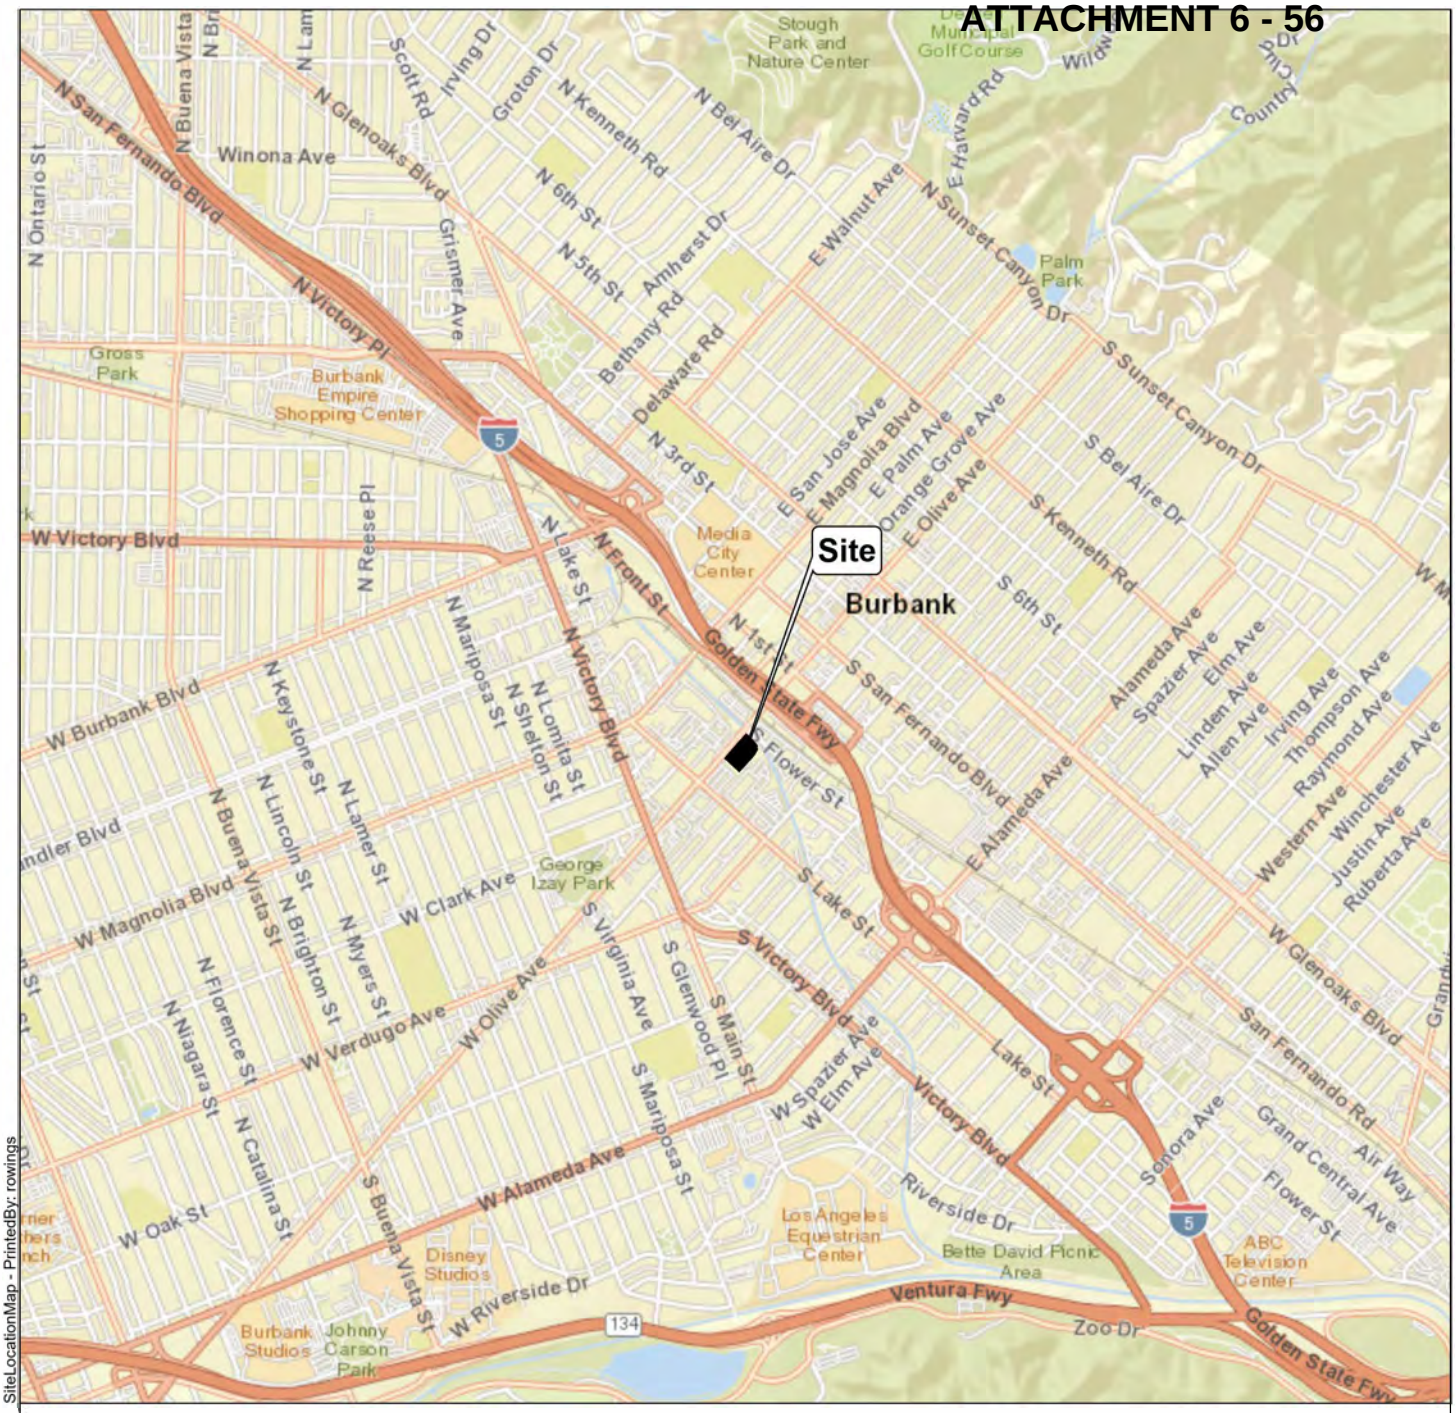
: highlight indicates detected concentration exceeds the lower of the DTSC-SLs or EPA RSLs

**Abbreviations:**

"--": not applicable/not available
%: percent
<: not detected above the stated laboratory reporting limit
bgs: below ground surface
DTSC: California Department of Toxic Substances Control
EPA: Environmental Protection Agency
ESL: Environmental Screening Level
HHRA: Human Health Risk Assessment
J: Result is an approximate value between the laboratory detection limit and the method detection limit
mg/kg: milligram per kilogram
RSL: Regional Screening Level
SFRWQCB: San Francisco Regional Water Quality Control Board
SL: Screening Level



**Notes:**

(a) Soil samples were analyzed by Eurofins Calscience in Tustin, California by EPA Method 6020b for all metals except mercury, which was analyzed by EPA Method 7471b, and SM 2540G for percent moisture.
(b) Compounds above laboratory detection limits are shown in **bold**.
(c) Soil commercial / industrial DTSC-SLs and EPA RSLs are based on the more stringent of the cancer and non-cancer endpoints. If a DTSC-SL is not available, then the lower of the cancer and non-cancer endpoints from the EPA RSLs are shown.
(d) All concentrations are measured in mg/kg, except Percent Moisture.
(e) Per DTSC HHRA Note 11, the upper bound background ambient arsenic concentration established for southern California soils is 12 mg/kg. If site concentrations are at or below 12 mg/kg and consistent with ambient distribution patterns (no spatial trends, no evidence of anthropogenic release), the arsenic may be attributed to background.
(f) Superscript indicates a DTSC-SL or EPA-RSL cancer endpoint is not available, thus a non-cancer endpoint is shown.
(g) The SFBRWQCB ESL for chromium is based on Soil Tier 1 threshold of 160 mg/kg.

- Areas of Concern
- Soil Vapor Probe (4.5 ft)
- Shallow Boring to 5 ft near Unpaved Gravel Floor and Metal Cutting Machine
- Shallow Boring to First Encountered Native Soil near Historical Railroad
- Shallow Boring to First Encountered Soil near Historical Orchards
- Deep Soil Boring to 20 ft for Potential Historical Fill
- Originally Proposed Deep Soil Boring to 20 ft for Potential Historical Fill
- UST Boring

Abbreviations

BTEX - benzene, toluene, ethylbenzene, xylene
DB = deep boring
EKI = EKI Environment & Water, Inc.
ft bgs = feet below ground surface
MTBE - methyl tert-butyl ether
PAH - polycyclic aromatic hydrocarbon
SB = shallow boring
TPH - total petroleum hydrocarbons
UST - underground storage tank
VOCs - volatile organic compounds
VP = vapor probe

Notes

1. All locations are approximate.
2. Soil vapor probes were installed at 4.5 ft bgs.
3. Shallow borings were either a) hand augered to 5 ft bgs and sampled at 0.5, 2, anc 5 ft bgs for VOCs, all TPH, metals, and PAHs; or b) hand augered to native soil and sampled for pesticides, herbicides, and metals.
4. Deeper soil borings were drilled using hollow stem auger to 15-20 ft bgs to the base of the original channel. Two samples were be collected at 7 and 15 ft bgs.
5. UST boring was drilled to 8 and 15 ft bgs and sampled for BTEX, all TPH, MTBE, and VOCs.

EKI = EKI Environment & Water, Inc.
ESL = environmental screening level
ft bgs = feet below ground surface
GRO = gasoline range organics
"J" = result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value.
mg/kg = milligram per kilogram
NA = not analyzed
ORO = oil range organics
SB = shallow boring
TPH = total petroleum hydrocarbons
UST = underground storage tank

Notes

1. All locations are approximate.
2. All depths are in ft bgs, and concentrations are in mg/kg.
3. Concentrations that exceed the laboratory reporting limit are bolded.
4. Sampling depths for borings EKI-SB-7, EKI-SB-8, and EKI-SB-9 were modified in the field due to coarse gravel encountered from approximately 0 to 2 ft bgs, which made the proposed sampling depths of 0.5 ft, 2 ft, and 5 ft bgs infeasible.
5. EKI-DB-1 was proposed to be advanced to 20 ft bgs with sampling at 7 and 15 ft bgs, but refusal at 7 ft bgs prevented sample collection. Sampling was redirected to EKI-SB-1, which was advanced to 20 ft bgs to collect samples at the depths planned for EKI-DB-1, plus a shallow native soil sample at 5.5 ft bgs.

- Shallow Boring to First Encountered Native Soil near Historical Railroad
- Shallow Boring to First Encountered Soil near Historical Orchards
- Deep Soil Boring to 20 ft for Potential Historical Fill
- Originally Proposed Deep Soil Boring to 20 ft for Potential Historical Fill

Abbreviations

"--" = not available / not applicable
DB = deep boring
DTSC = Department of Toxic Substances Control
EKI = EKI Environment & Water, Inc.
ESL = Environmental Screening Level
EPA = Environmental Protection Agency
ft bgs = feet below ground surface
HHRA = Human Health Risk Assessment
mg/kg = milligram per kilogram
RSL = regional screening level
SB = shallow boring
SFBRWQCB = San Francisco Bay Regional Water Quality Control Board
SL = screening level

Notes

1. All locations are approximate.
2. All depths are in ft bgs, and all concentrations are in mg/kg.
3. Concentrations that exceed the laboratory reporting limit are bolded. Per DTSC HHRA Note 11, the upper bound background ambient arsenic concentration established for southern California soils is 12 mg/kg. The SFBRWQCB ESL for chromium is based on Soil Tier 1 threshold of 160 mg/kg.
4. EKI-DB-1 was proposed to be advanced to 20 ft bgs with sampling at 7 and 15 ft bgs, but refusal at 7 ft bgs prevented sample collection. Sampling was redirected to EKI-SB-1, which was advanced to 20 ft bgs to collect samples at the depths planned for EKI-DB-1, plus a shallow native soil sample at 5.5 ft bgs.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EKI Environment & Water, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by EKI Environment & Water, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

# EDR BUILDING PERMIT REPORT

## About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

## Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

# EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of EKI Environment & Water, Inc. on Feb 11, 2026.

**TARGET PROPERTY**

110 West Olive Avenue
Burbank, CA 91502

**SEARCH METHODS**

EDR searches available lists for both the Target Property and Surrounding Properties.

**RESEARCH SUMMARY**

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

# GLOSSARY

**General Building Department concepts**

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

# GLOSSARY

**Permit Content Definitions**

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

**Sample Building Permit Data**

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

## RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

## TARGET PROPERTY: ADDRESS NOT IDENTIFIED IN RESEARCH SOURCE

The following Target Property addresses were researched for this report, and the addresses were not identified in the research source.

| Address Researched | Address Not Identified in Research Source |
|---|---|
| 110 West Olive Avenue | 2020, 2017, 2004, 2003, 2000, 1999, 1996, 1972, 1971, 1969, 1967, 1965, 1964, 1963, 1961, 1958, 1957, 1955, 1954, 1951, 1949, 1948, 1947, 1946, 1945, 1944, 1942, 1940, 1939, 1938, 1937, 1936, 1935, 1934, 1933, 1932, 1931, 1930, 1929, 1928, 1927, 1926, 1925, 1924, 1923, 1921, 1920 |

# APPENDIX B

## Selected Photographs Taken During Site Reconnaissance and Phase II Sampling Investigation

**APPENDIX B**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**
**110 WEST OLIVE AVENUE, BURBANK, CALIFORNIA 91502**
**TAKEN JANURY 9, FEBRUARY 28, MARCH 1, AND MARCH 7, 2026**

Photo 1: Former UST area located on the west side.

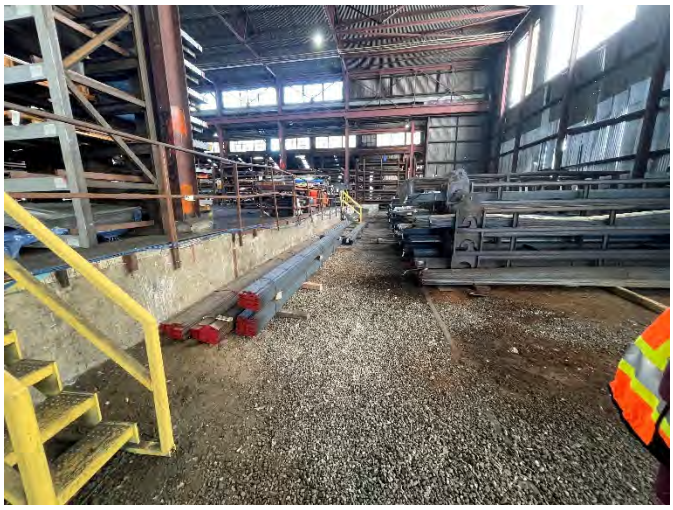

Photo 2: Unpaved gravel floor area in the east interior side.

Photo 3: Cutting machine area located in the southwest.

Photo 4: Exterior yard area.

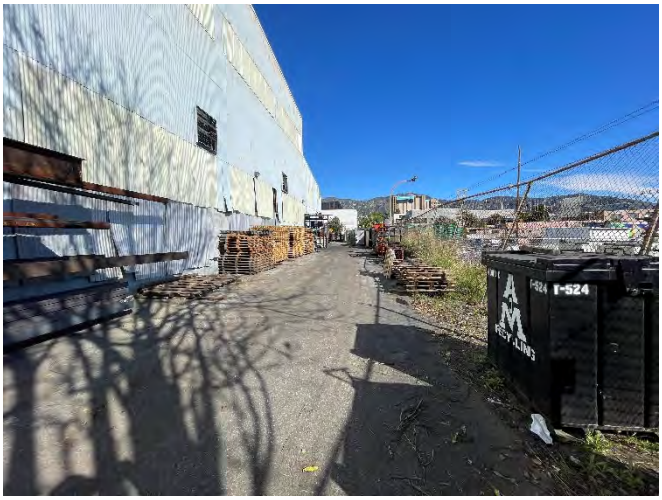

Photo 5: Historic railroad area along the exterior eastern boundary.

Photo 6: M&R drilling EKI-DB-2 near former UST area.

**APPENDIX B**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**
**110 WEST OLIVE AVENUE, BURBANK, CALIFORNIA 91502**
**TAKEN JANUARY 9, FEBRUARY 28, MARCH 1, AND MARCH 7, 2026**

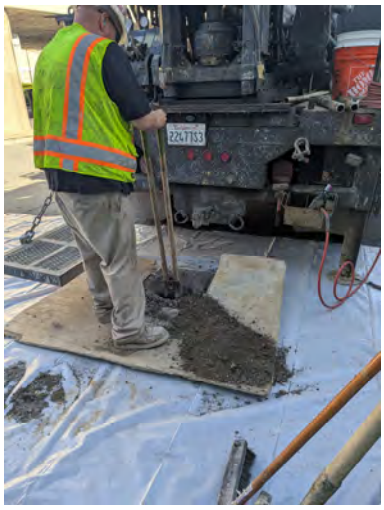

Photo 7: Fill material encountered in the upper 3 feet at EKI-DB-2.

Photo 8: Grouted deep soil boring EKI-SB-1 within historic railroad area.

Photo 9: Grouted shallow boring EKI-SB-2 within historic railroad area.

Photo 10: Grouted shallow boring EKI-SB-3 within historic railroad area.

Photo 11: Asphalt fragments encountered between 0.5 and 2.5 feet bgs at EKI-UST-1.

Photo 12: Grouted shallow boring EKI-SB-4 within historical orchard area along southern boundary.

**APPENDIX B**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**
**110 WEST OLIVE AVENUE, BURBANK, CALIFORNIA 91502**
**TAKEN JANUARY 9, FEBRUARY 28, MARCH 1, AND MARCH 7, 2026**

Photo 13: Grouted shallow soil boring EKI-SB-5 within historic orchards area along the southern boundary.

Photo 14: Grouted shallow soil boring EKI-SB-6 within historic orchards area along the southern boundary and temporary

Photo 15: M&R potholing through gravel at EKI-SB-9 within interior unpaved gravel area.

Photo 16: Grouted shallow boring EKI-SB-10 within cutting machine area.

Photo 17: Temporary SVP location in southwest corner.

Photo 18: Temporary SVP location in southeast corner.

**APPENDIX B**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**
**110 WEST OLIVE AVENUE, BURBANK, CALIFORNIA 91502**
**TAKEN JANUARY 9, FEBRUARY 28, MARCH 1, AND MARCH 7, 2026**

Photo 19: Temporary SVP location in northeast corner.

Photo 20: Grouted deep boring located near former UST area on the west side.

Photo 21: Grouted deep boring EKI-UST-1 located within former UST footprint.

Photo 22: Temporary SVP location in northwest corner.

Photo 23: H&P collecting a soil vapor sample from EKI-VP-1.

# APPENDIX C

## Prior Reports for Subject Property

No prior reports were provided of the Subject Property from the Client.

# APPENDIX D

## Completed User Questionnaire and Owner Questionnaire

# USER QUESTIONNAIRE
# FOR
# PHASE I ENVIRONMENTAL ASSESSMENT

This questionnaire is being provided to User/Client to assist with the collection of information required in 40 CFR Part 312.22, Part 312.25, Part 312.26, and Parts 312.28 through 312.31 of the U.S. EPA's *Standards and Practices for All Appropriate Inquiries, Final Rule,* dated 1 November 2005. This questionnaire is consistent with the User Questionnaire suggested in Appendix X3 of ASTM E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,* published in November 2021. Please answer the following questions in good faith and to the best of your knowledge regarding the Subject Property.

**Subject Property Address:** _____

**Name of Person Completing Questionnaire:** _____

**Company:** _____

**Date:** _____

1) Are you aware of any Environmental Cleanup Liens that are filed or recorded against the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

_____

2) Are you aware of any activity and land use limitations (i.e., engineering or institutional controls) that are in place at the Subject Property that have been filed or recorded?

○ Yes ⊘ No

If yes, explain: _____

_____

3) Do you have any specialized knowledge or experience related to the Subject Property or nearby properties, i.e., do you have knowledge of chemicals and processes used at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

_____

4) Does the purchase price being paid for the Subject Property, if applicable, reasonably reflect the fair market value of the Subject Property?

⊘ Yes ○ No

**Questionnaire continued on Page 2**

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be on the Subject Property?

○ Yes ○ No N/A

If yes, explain: _____

5) Are you aware of any commonly known or reasonably ascertainable information about the Subject Property that would help EKI identify conditions indicative of releases or threatened releases? For example:

a) Do you know the past uses of the Subject Property?

⊘ Yes ○ No

If yes, explain: Metal Distribution and processing involving cutting metal

b) Do you know of specific chemicals that are present or once were present at the Subject Property?

⊘ Yes ⊘ No

If yes, explain: Vegetable based cutting oils, liquid oxygen, natural gas, gasoline,

c) Do you know of spills or other chemical releases that have taken place at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

d) Do you know of any environmental cleanups that have taken place at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

6) Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of contamination or past chemical releases at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

**End of User Questionnaire**

# ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The purpose of this questionnaire is to provide information to assist EKI Environment & Water, Inc. (EKI) in performing an Environmental Site Assessment (ESA) for the property cited below. Information provided in this questionnaire will be used solely by EKI to complete the ESA.

Please respond to every question in good faith and to the best of your knowledge. For questions that are not applicable to the property, please indicate so by placing "NA" in the space provided. If your response is "Yes," please add a brief description in the space provided to supplement your response.

Primary property address(es): _____

Any former or alternate property addresses: _____

Name(s) of current property tenant(s)/occupant(s): _____

_____

Number of years current tenant on property: Approx 1 year

Prior tenant(s)/occupant(s) and years on property (if known): Approx 4 years and 60 years

Approximate property size: 2.7 ACRES Acres

Approximate total building size: 71,000 ± Acres

Approximate dates of building construction: 1947, 1972

Assessors parcel number(s): _____

Name of current property owner: BCH LLC and Olive Ave LLC

Provide a general description of current uses of the property: Metal Distributor and Metal cutting.

Please attach any site drawings showing buildings, structures, and property lines.

Name of person completing questionnaire: Robert Wedeen & Robert Persson Date: 1/8/2026

Company: BCH ENTERPRISES, LLC

Title: Partner

Length of time associated with property: 1980 – 2020

## 1. SITE USE HISTORY

Describe the land use history of the property. Indicate specific years of various uses if known. If use is unknown, write "unknown."

| Years | Uses |
|---|---|
| Pre-1900: | unknown |
| 1900-1940: | unknown |
| 1940-1950: | unknown and first building completed about 1946 |
| 1950-1960: | Metal Distribution Mfg/Dist. |
| 1960-1970: | |
| 1970-1980: | |
| 1980-1990: | |
| 1990-2000: | |
| 2000-present: | |

## 2. USE OF ADJACENT PROPERTIES

Describe the current general land uses of the adjoining properties.

| Adjacent Property | Property Use |
|---|---|
| Property to the North: | Public Street |
| Property to the South: | RV SALES |
| Property to the East: | Burbank city property |
| Property to the West: | Public Street |

## 3. CHEMICALS USED ON THE PROPERTY

List the primary or main chemicals used or stored on the property. Submit a copy of the most recent chemical inventory list for the property that also includes quantities stored:

1. unknown at this time
2. 
3. 
4. 
5. 
6. 
7. 
8. 
9. 
10. 

Are current operating facilities on the property required to submit an annual Hazardous Materials Business Plan, or similar chemical use and inventory document, to the local environmental regulatory agency?

(X) Yes ( ) No (X) Unknown

Do the operating facilities currently maintain a chemical use or storage permit with the local environmental regulatory agency?

( ) Yes ( ) No (X) Unknown

Please list the federal, state or local environmental regulatory agencies that currently regulate chemical use, storage, or disposal activities at the property, or conduct inspection visits to the property:

1. Unknown
2. 
3. 
4. 
5. 

Next to each entry, please provide the approximate month and year of the most recent inspection of the facility performed by that agency.

## 4. TANKS FOR PETROLEUM PRODUCTS OR OTHER CHEMICALS

### 4.1 Underground Tanks

Are you aware of any current or former underground storage tanks (USTs) on the property?

(X) Yes ( ) No

If yes, please describe: gasoline tank, Unknown date of installation. Removed approx. mid 1980s. Ground was tested after removal and no contamination found

If yes, are there permits for the USTs issued by a regulatory agency? ( ) Yes ( ) No (X) Unknown

If yes, which agency? 

Have the USTs been tested recently for tightness or integrity? ( ) Yes ( ) No ( ) Unknown

Describe: 

Do you have any knowledge that the USTs leak now or in the past? ( ) Yes (X) No ( ) Unknown

Describe: 

Are you aware of any USTs on the property that are still in place and are not used? ◯ Yes ⊘ No

If yes, please describe: _____

_____

Are you aware of any current or former buried heating fuel oil tanks on the property? ◯ Yes ⊘ No

**4.2 Above Ground Tanks**

Are there any current or former above ground storage tanks (ASTs) on the property? ⊘ Yes ◯ No

Describe: Liquid Oxygen

_____

If yes, are there permits for the ASTs issued by a regulatory agency? ◯ Yes ◯ No ⊘ Unknown

If yes, which agency? _____

Do you have any knowledge that the ASTs leak now or in the past? ◯ Yes ⊘ No ◯ Unknown

Describe: _____

_____

Is there an emergency power generator situated on the property? ◯ Yes ⊘ No ⊘ Unknown

If yes, how is the emergency power generator fueled? Other

## 5. STORAGE SYSTEMS FOR PETROLEUM OR OTHER CHEMICALS

Are any chemicals on the property stored in drums (e.g., 55-gallon drums) or other containers?

◯ Yes ◯ No ⊘ Unknown

Describe: _____

_____

Do you have any knowledge that the drums or other containers leak or leaked in the past?

◯ Yes ⊘ No ◯ Unknown

Describe: _____

_____

Are there any above ground or below ground pipelines on the property that convey chemicals?

(X) Yes ( ) No ( ) Unknown

Describe: Natural gas

Do you have any knowledge that the pipelines leak or leaked in the past? ( ) Yes (X) No ( ) Unknown

Describe: _____

Have any leaks or spills on the property, if any, been reported to the local governing environmental regulatory agency?

( ) Yes ( ) No (X) Unknown

Describe: _____

## 6. CHEMICAL WASTES

List chemical wastes currently generated and/or stored on the property (e.g., waste oils, waste solvents, solid wastes):

1. unknown
2. 
3. 
4. 
5. 
6. 
7. 
8. 
9. 
10. 

Are chemical wastes transported off-site for disposal? ( ) Yes ( ) No (X) Unknown

Describe: _____

Do operating facilities on the property maintain a U.S. EPA Hazardous Waste Generator ID Number?

( ) Yes ( ) No (X) Unknown

Do the operating facilities maintain a Hazardous Waste Generator Permit, or similar waste generator permit, with the local environmental regulatory agency?

( ) Yes ( ) No (X) Unknown

Are you aware of any type of on-site disposal of chemicals, chemical wastes, or other wastes on the property?

○ Yes ⊗ No

Describe: _____

_____

Are you aware of any current or former landfills, waste disposal, or debris dumping areas on the property?

○ Yes ⊗ No

Describe: _____

_____

Are any forms of waste treatment operations performed on the property? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

## 7. WATER AND WASTEWATER

### 7.1 Water Supply

What is the source of potable water supply for the property? Other

Name of providing agency or department: City water

Are you aware of any current or former, known or suspected, water supply wells on the property?

○ Yes ⊗ No

Describe: _____

_____

### 7.2 Wastewater Discharge

What is the current method of sanitary sewerage for the property? ?

Name of providing agency or department: _____

Are you aware of any current or former septic and/or leachfield systems on the property?

○ Yes ⊗ No

Describe: _____

_____

Is industrial or process wastewater generated and/or discharged from the property?

○ Yes ⊗ No ○ Unknown

Describe: _____

_____

If yes, is the industrial wastewater discharge currently permitted by a local agency?

○ Yes ⊗ No ○ Unknown

Describe: _____

_____

Is there any pre-treatment of wastewater prior to discharge? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

Has the property received any violations related to wastewater discharge? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

**7.3 Stormwater**

Has a Storm Water Pollution Prevention Plan been prepared for the property?

○ Yes ○ No ⊗ Unknown

Describe: _____

_____

Are you aware of any chemical spills or releases entering the property's storm drain system?

○ Yes ⊗ No

Describe: _____

_____

**8. AIR EMISSIONS**

Are there any air emissions or air discharge points on the property? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

Does an air discharge permit currently exist for the property? ◯ Yes ◯ No ⊘ Unknown

Describe: _____

Has the property ever received any air discharge violations? ◯ Yes ⊘ No ⊘ Unknown

Describe: _____

Are you aware of any complaints from neighbors or others regarding air/odors, soil, water, or noise issues?

◯ Yes ⊘ No

Describe: _____

## 9. PESTICIDES, HERBICIDES, AND OTHER AGRICULTURAL CHEMICALS

Are you aware of any past or current applications of pesticides, herbicides, or other agricultural chemicals to the property?

⊘ Yes ◯ No

Describe and provide chemical inventories, if available: In the past there was monthly pest control for office and warehouse

Are you aware of any pesticides, herbicides, or other agricultural chemicals being mixed, formulated, rinsed, stored, or disposed of on the property?

◯ Yes ⊘ No

Describe activities and locations: _____

Is the property now, or in the past, been used as a storage or staging area for crop dusting operations?

◯ Yes ⊘ No

Describe: _____

Are you aware of any cattle or sheep "dipping" or spraying operations (e.g., pesticides / parasticides), or use of "oilers" on the property?

○ Yes ⊗ No

Describe: _____

_____

**10. POLYCHLORINATED BIPHENYLS ("PCBs")**

Are there any electrical transformers, capacitors, or other equipment on the property that may contain PCBs?

○ Yes ○ No ⊗ Unknown

Describe: _____

_____

Are transformers on the Property privately-owned, or owned by public utility company or municipality?

○ Yes ○ No ⊗ Unknown

Has any testing for PCBs been performed on the equipment listed above? ○ Yes ○ No ⊗ Unknown

Describe: _____

_____

Are you aware of any transformer fluid or PCB-related spills or leaks on the property?

○ Yes ⊗ No

Describe: _____

_____

**11. ASBESTOS AND LEAD**

Has an asbestos or lead-in-paint survey ever been conducted for past or current property buildings or structures, if any?

○ Yes ○ No ⊗ Unknown

Describe: _____

_____

## 12. OTHER QUESTIONS

Have any environmental assessment studies been performed for the property with respect to soil, groundwater, air, or building materials (e.g., Phase I assessments, Phase II investigations, etc.)?

(X) Yes ( ) No ( ) Unknown

Describe: We believe on ~~[illegible]~~ at least one occasion but unsure of date.

Has any public agency ever investigated or cited the property or operating facility for violation or possible violation of any environmental law or commenced enforcement or clean-up action under environmental law with respect to the property?

( ) Yes ( ) No (X) Unknown

Describe: _____

Has any public agency ever listed the property as a site requiring or qualifying for clean-up under any environmental law?

( ) Yes ( ) No (X) Unknown

Describe: _____

Are there any Environmental Cleanup Liens filed or recorded against the property? ( ) Yes (X) No

Has a fire, spill, explosion, or release to the environment that required notification to the authorities, remediation, evacuation, or otherwise occurred during the last 5 years?

( ) Yes ( ) No (X) Unknown

Describe: _____

Is there any known or suspected soil or groundwater contamination at or under this facility or property?

( ) Yes (X) No ( ) Unknown

Describe: _____

Are there any groundwater monitoring wells on the property? ( ) Yes (X) No ( ) Unknown

Describe: _____

Are you aware of any clandestine drug labs (e.g., meth labs) that have operated on the property in the recent or distant past, or are currently operating on the Site?

○ Yes ⊘ No ○ Unknown

**12.1 Are any of the following features present on or adjacent to the property?**

| | | | |
|---|---|---|---|
| • Surface water impoundments (e.g., ponds, sumps, pits, lagoons) | ○ Yes | ⊘ No | ○ Unknown |
| • Existing or former mines, quarries, tunnels or pits | ○ Yes | ⊘ No | ○ Unknown |
| • Existing or former oil or natural gas wells or related infrastructure | ○ Yes | ○ No | ○ Unknown |
| • Drainage canals, sloughs, creeks, swales | ⊘ Yes | ○ No | ○ Unknown |
| • Areas where fill or cover soil was brought onto the property | ○ Yes | ⊘ No | ○ Unknown |
| • Refuse/trash dumps, buried debris, land filling, or "bone yards" | ○ Yes | ⊘ No | ○ Unknown |
| • Easements for buried pipelines (e.g., buried petroleum or gas lines) | ○ Yes | ○ No | ⊘ Unknown |
| • Current or former railroad spurs or tracks | ⊘ Yes | ○ No | ○ Unknown |

## 13. HELPFUL DOCUMENTS

Please indicate which documents listed below are known to exist, are available for review, and/or can be provided to EKI.

| | | |
|---|---|---|
| • Environmental reports for the property (e.g., Phase I-II assessments) | ○ Yes | ⊘ No |
| • Environmental audit reports (e.g., operating/compliance reports) | ○ Yes | ⊘ No |
| • Environmental permits (e.g., hazardous waste or solid waste disposal permits, wastewater or air discharge permits, NPDES permits) | ○ Yes | ○ No |
| • Registrations for underground or above ground storage tanks | ○ Yes | ⊘ No ? |
| • Material safety data sheets (MSDSs) | ○ Yes | ○ No |
| • Safety plans (e.g., preparedness and prevention plans, spill prevention, countermeasure, and control plans) | ○ Yes | ○ No |
| • Notices or other correspondences from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property | ○ Yes | ○ No |
| • Hazardous waste generator notices or reports | ○ Yes | ○ No |
| • Geotechnical or hydrogeologic studies for the property | ○ Yes | ⊘ No |

**END OF QUESTIONNAIRE**

# USER QUESTIONNAIRE
# FOR
# PHASE I ENVIRONMENTAL ASSESSMENT

This questionnaire is being provided to User/Client to assist with the collection of information required in 40 CFR Part 312.22, Part 312.25, Part 312.26, and Parts 312.28 through 312.31 of the U.S. EPA's *Standards and Practices for All Appropriate Inquiries, Final Rule,* dated 1 November 2005. This questionnaire is consistent with the User Questionnaire suggested in Appendix X3 of ASTM E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,* published in November 2021. Please answer the following questions in good faith and to the best of your knowledge regarding the Subject Property.

**Subject Property Address:** _____

**Name of Person Completing Questionnaire:** _____

**Company:** _____

**Date:** _____

1) Are you aware of any Environmental Cleanup Liens that are filed or recorded against the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

_____

2) Are you aware of any activity and land use limitations (i.e., engineering or institutional controls) that are in place at the Subject Property that have been filed or recorded?

○ Yes ⊘ No

If yes, explain: _____

_____

3) Do you have any specialized knowledge or experience related to the Subject Property or nearby properties, i.e., do you have knowledge of chemicals and processes used at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

_____

4) Does the purchase price being paid for the Subject Property, if applicable, reasonably reflect the fair market value of the Subject Property?

⊘ Yes ○ No

**Questionnaire continued on Page 2**

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be on the Subject Property?

○ Yes ○ No N/A

If yes, explain: _____

5) Are you aware of any commonly known or reasonably ascertainable information about the Subject Property that would help EKI identify conditions indicative of releases or threatened releases? For example:

a) Do you know the past uses of the Subject Property?

⊘ Yes ○ No

If yes, explain: Metal Distribution and processing involving cutting metal

b) Do you know of specific chemicals that are present or once were present at the Subject Property?

⊘ Yes ⊘ No

If yes, explain: Vegetable based cutting oils, liquid oxygen, natural gas, gasoline,

c) Do you know of spills or other chemical releases that have taken place at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

d) Do you know of any environmental cleanups that have taken place at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

6) Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of contamination or past chemical releases at the Subject Property?

○ Yes ⊘ No

If yes, explain: _____

**End of User Questionnaire**

# ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The purpose of this questionnaire is to provide information to assist EKI Environment & Water, Inc. (EKI) in performing an Environmental Site Assessment (ESA) for the property cited below. Information provided in this questionnaire will be used solely by EKI to complete the ESA.

Please respond to every question in good faith and to the best of your knowledge. For questions that are not applicable to the property, please indicate so by placing "NA" in the space provided. If your response is "Yes," please add a brief description in the space provided to supplement your response.

Primary property address(es): _____

Any former or alternate property addresses: _____

Name(s) of current property tenant(s)/occupant(s): _____

_____

Number of years current tenant on property: Approx 1 year

Prior tenant(s)/occupant(s) and years on property (if known): Approx 4 years and 60 years

Approximate property size: 2.7 ACRES Acres

Approximate total building size: 71,000 ± Acres

Approximate dates of building construction: 1947, 1972

Assessors parcel number(s): _____

Name of current property owner: BCH LLC and Olive Ave LLC

Provide a general description of current uses of the property: Metal Distributor and Metal cutting.

Please attach any site drawings showing buildings, structures, and property lines.

Name of person completing questionnaire: Robert Wedeen & Robert Persson Date: 1/8/2026

Company: BCH ENTERPRISES, LLC

Title: Partner

Length of time associated with property: 1980 – 2020

## 1. SITE USE HISTORY

Describe the land use history of the property. Indicate specific years of various uses if known. If use is unknown, write "unknown."

| Years | Uses |
|---|---|
| Pre-1900: | unknown |
| 1900-1940: | unknown |
| 1940-1950: | unknown and first building completed about 1946 |
| 1950-1960: | Metal Distribution Mfg/Dist. |
| 1960-1970: | |
| 1970-1980: | |
| 1980-1990: | |
| 1990-2000: | |
| 2000-present: | |

## 2. USE OF ADJACENT PROPERTIES

Describe the current general land uses of the adjoining properties.

| Adjacent Property | Property Use |
|---|---|
| Property to the North: | Public Street |
| Property to the South: | RV SALES |
| Property to the East: | Burbank city property |
| Property to the West: | Public Street |

## 3. CHEMICALS USED ON THE PROPERTY

List the primary or main chemicals used or stored on the property. Submit a copy of the most recent chemical inventory list for the property that also includes quantities stored:

1. unknown at this time
2. 
3. 
4. 
5. 
6. 
7. 
8. 
9. 
10. 

Are current operating facilities on the property required to submit an annual Hazardous Materials Business Plan, or similar chemical use and inventory document, to the local environmental regulatory agency?

(X) Yes ( ) No (X) Unknown

Do the operating facilities currently maintain a chemical use or storage permit with the local environmental regulatory agency?

( ) Yes ( ) No (X) Unknown

Please list the federal, state or local environmental regulatory agencies that currently regulate chemical use, storage, or disposal activities at the property, or conduct inspection visits to the property:

1. Unknown
2. 
3. 
4. 
5. 

Next to each entry, please provide the approximate month and year of the most recent inspection of the facility performed by that agency.

## 4. TANKS FOR PETROLEUM PRODUCTS OR OTHER CHEMICALS

### 4.1 Underground Tanks

Are you aware of any current or former underground storage tanks (USTs) on the property?

(X) Yes ( ) No

If yes, please describe: gasoline tank, Unknown date of installation. Removed approx. mid 1980s. Ground was tested after removal and no contamination found

If yes, are there permits for the USTs issued by a regulatory agency? ( ) Yes ( ) No (X) Unknown

If yes, which agency? 

Have the USTs been tested recently for tightness or integrity? ( ) Yes ( ) No ( ) Unknown

Describe: 

Do you have any knowledge that the USTs leak now or in the past? ( ) Yes (X) No ( ) Unknown

Describe: 

Are you aware of any USTs on the property that are still in place and are not used? ◯ Yes ⊘ No

If yes, please describe: _____

Are you aware of any current or former buried heating fuel oil tanks on the property? ◯ Yes ⊘ No

**4.2 Above Ground Tanks**

Are there any current or former above ground storage tanks (ASTs) on the property? ⊘ Yes ◯ No

Describe: Liquid Oxygen

If yes, are there permits for the ASTs issued by a regulatory agency? ◯ Yes ◯ No ⊘ Unknown

If yes, which agency? _____

Do you have any knowledge that the ASTs leak now or in the past? ◯ Yes ⊘ No ◯ Unknown

Describe: _____

Is there an emergency power generator situated on the property? ◯ Yes ⊘ No ⊘ Unknown

If yes, how is the emergency power generator fueled? Other

**5. STORAGE SYSTEMS FOR PETROLEUM OR OTHER CHEMICALS**

Are any chemicals on the property stored in drums (e.g., 55-gallon drums) or other containers?

◯ Yes ◯ No ⊘ Unknown

Describe: _____

Do you have any knowledge that the drums or other containers leak or leaked in the past?

◯ Yes ⊘ No ◯ Unknown

Describe: _____

Are there any above ground or below ground pipelines on the property that convey chemicals?

(X) Yes ( ) No ( ) Unknown

Describe: Natural gas

Do you have any knowledge that the pipelines leak or leaked in the past? ( ) Yes (X) No ( ) Unknown

Describe: _____

Have any leaks or spills on the property, if any, been reported to the local governing environmental regulatory agency?

( ) Yes ( ) No (X) Unknown

Describe: _____

## 6. CHEMICAL WASTES

List chemical wastes currently generated and/or stored on the property (e.g., waste oils, waste solvents, solid wastes):

1. unknown
2. 
3. 
4. 
5. 
6. 
7. 
8. 
9. 
10. 

Are chemical wastes transported off-site for disposal? ( ) Yes ( ) No (X) Unknown

Describe: _____

Do operating facilities on the property maintain a U.S. EPA Hazardous Waste Generator ID Number?

( ) Yes ( ) No (X) Unknown

Do the operating facilities maintain a Hazardous Waste Generator Permit, or similar waste generator permit, with the local environmental regulatory agency?

( ) Yes ( ) No (X) Unknown

Are you aware of any type of on-site disposal of chemicals, chemical wastes, or other wastes on the property?

○ Yes ⊗ No

Describe: _____

_____

Are you aware of any current or former landfills, waste disposal, or debris dumping areas on the property?

○ Yes ⊗ No

Describe: _____

_____

Are any forms of waste treatment operations performed on the property? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

## 7. WATER AND WASTEWATER

### 7.1 Water Supply

What is the source of potable water supply for the property? Other

Name of providing agency or department: City water

Are you aware of any current or former, known or suspected, water supply wells on the property?

○ Yes ⊗ No

Describe: _____

_____

### 7.2 Wastewater Discharge

What is the current method of sanitary sewerage for the property? ?

Name of providing agency or department: _____

Are you aware of any current or former septic and/or leachfield systems on the property?

○ Yes ⊗ No

Describe: _____

_____

Is industrial or process wastewater generated and/or discharged from the property?

○ Yes ⊗ No ○ Unknown

Describe: _____

_____

If yes, is the industrial wastewater discharge currently permitted by a local agency?

○ Yes ⊗ No ○ Unknown

Describe: _____

_____

Is there any pre-treatment of wastewater prior to discharge? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

Has the property received any violations related to wastewater discharge? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

**7.3 Stormwater**

Has a Storm Water Pollution Prevention Plan been prepared for the property?

○ Yes ○ No ⊗ Unknown

Describe: _____

_____

Are you aware of any chemical spills or releases entering the property's storm drain system?

○ Yes ⊗ No

Describe: _____

_____

**8. AIR EMISSIONS**

Are there any air emissions or air discharge points on the property? ○ Yes ⊗ No ○ Unknown

Describe: _____

_____

Does an air discharge permit currently exist for the property? ◯ Yes ◯ No ⊗ Unknown

Describe: _____

Has the property ever received any air discharge violations? ◯ Yes ⊗ No ⊗ Unknown

Describe: _____

Are you aware of any complaints from neighbors or others regarding air/odors, soil, water, or noise issues?

◯ Yes ⊗ No

Describe: _____

## 9. PESTICIDES, HERBICIDES, AND OTHER AGRICULTURAL CHEMICALS

Are you aware of any past or current applications of pesticides, herbicides, or other agricultural chemicals to the property?

⊗ Yes ◯ No

Describe and provide chemical inventories, if available: In the past there was monthly pest control for office and warehouse

Are you aware of any pesticides, herbicides, or other agricultural chemicals being mixed, formulated, rinsed, stored, or disposed of on the property?

◯ Yes ⊗ No

Describe activities and locations: _____

Is the property now, or in the past, been used as a storage or staging area for crop dusting operations?

◯ Yes ⊗ No

Describe: _____

Are you aware of any cattle or sheep "dipping" or spraying operations (e.g., pesticides / parasticides), or use of "oilers" on the property?

○ Yes ⊗ No

Describe: _____

_____

**10. POLYCHLORINATED BIPHENYLS ("PCBs")**

Are there any electrical transformers, capacitors, or other equipment on the property that may contain PCBs?

○ Yes ○ No ⊗ Unknown

Describe: _____

_____

Are transformers on the Property privately-owned, or owned by public utility company or municipality?

○ Yes ○ No ⊗ Unknown

Has any testing for PCBs been performed on the equipment listed above? ○ Yes ○ No ⊗ Unknown

Describe: _____

_____

Are you aware of any transformer fluid or PCB-related spills or leaks on the property?

○ Yes ⊗ No

Describe: _____

_____

**11. ASBESTOS AND LEAD**

Has an asbestos or lead-in-paint survey ever been conducted for past or current property buildings or structures, if any?

○ Yes ○ No ⊗ Unknown

Describe: _____

_____

## 12. OTHER QUESTIONS

Have any environmental assessment studies been performed for the property with respect to soil, groundwater, air, or building materials (e.g., Phase I assessments, Phase II investigations, etc.)?

(X) Yes ( ) No ( ) Unknown

Describe: We believe on ~~[illegible]~~ at least one occasion but unsure of date.

Has any public agency ever investigated or cited the property or operating facility for violation or possible violation of any environmental law or commenced enforcement or clean-up action under environmental law with respect to the property?

( ) Yes ( ) No (X) Unknown

Describe: _____

Has any public agency ever listed the property as a site requiring or qualifying for clean-up under any environmental law?

( ) Yes ( ) No (X) Unknown

Describe: _____

Are there any Environmental Cleanup Liens filed or recorded against the property? ( ) Yes (X) No

Has a fire, spill, explosion, or release to the environment that required notification to the authorities, remediation, evacuation, or otherwise occurred during the last 5 years?

( ) Yes ( ) No (X) Unknown

Describe: _____

Is there any known or suspected soil or groundwater contamination at or under this facility or property?

( ) Yes (X) No ( ) Unknown

Describe: _____

Are there any groundwater monitoring wells on the property? ( ) Yes (X) No ( ) Unknown

Describe: _____

Are you aware of any clandestine drug labs (e.g., meth labs) that have operated on the property in the recent or distant past, or are currently operating on the Site?

○ Yes ⊘ No ○ Unknown

**12.1 Are any of the following features present on or adjacent to the property?**

| | | | |
|---|---|---|---|
| • Surface water impoundments (e.g., ponds, sumps, pits, lagoons) | ○ Yes | ⊘ No | ○ Unknown |
| • Existing or former mines, quarries, tunnels or pits | ○ Yes | ⊘ No | ○ Unknown |
| • Existing or former oil or natural gas wells or related infrastructure | ○ Yes | ○ No | ○ Unknown |
| • Drainage canals, sloughs, creeks, swales | ⊘ Yes | ○ No | ○ Unknown |
| • Areas where fill or cover soil was brought onto the property | ○ Yes | ⊘ No | ○ Unknown |
| • Refuse/trash dumps, buried debris, land filling, or "bone yards" | ○ Yes | ⊘ No | ○ Unknown |
| • Easements for buried pipelines (e.g., buried petroleum or gas lines) | ○ Yes | ○ No | ⊘ Unknown |
| • Current or former railroad spurs or tracks | ⊘ Yes | ○ No | ○ Unknown |

## 13. HELPFUL DOCUMENTS

Please indicate which documents listed below are known to exist, are available for review, and/or can be provided to EKI.

| | | |
|---|---|---|
| • Environmental reports for the property (e.g., Phase I-II assessments) | ○ Yes | ⊘ No |
| • Environmental audit reports (e.g., operating/compliance reports) | ○ Yes | ⊘ No |
| • Environmental permits (e.g., hazardous waste or solid waste disposal permits, wastewater or air discharge permits, NPDES permits) | ○ Yes | ○ No |
| • Registrations for underground or above ground storage tanks | ○ Yes | ⊘ No ? |
| • Material safety data sheets (MSDSs) | ○ Yes | ○ No |
| • Safety plans (e.g., preparedness and prevention plans, spill prevention, countermeasure, and control plans) | ○ Yes | ○ No |
| • Notices or other correspondences from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property | ○ Yes | ○ No |
| • Hazardous waste generator notices or reports | ○ Yes | ○ No |
| • Geotechnical or hydrogeologic studies for the property | ○ Yes | ⊘ No |

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

**DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

Proposed NPL ---- Proposed National Priority List Sites
NPL LIENS ---- Federal Superfund Liens

***Lists of Federal Delisted NPL sites***

Delisted NPL ---- National Priority List Deletions

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY ---- Federal Facility Site Information listing

***Lists of Federal RCRA generators***

RCRA-VSQG ---- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

***Federal institutional controls / engineering controls registries***

LUCIS ---- Land Use Control Information System
US INST CONTROLS ---- Institutional Controls Sites List

***Federal ERNS list***

ERNS ---- Emergency Response Notification System

***Lists of state and tribal leaking storage tanks***

INDIAN LUST ---- Leaking Underground Storage Tanks on Indian Land

***Lists of state and tribal registered storage tanks***

FEMA UST ---- Underground Storage Tank Listing
INDIAN UST ---- Underground Storage Tanks on Indian Land

***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP ---- Voluntary Cleanup Priority Listing

***Lists of state and tribal brownfield sites***

BROWNFIELDS ---- Considered Brownfieds Sites Listing

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT ---- Waste Management Unit Database

# EXECUTIVE SUMMARY

**EDR RECOVERED GOVERNMENT ARCHIVES**

***Exclusive Recovered Govt. Archives***

RGA LF ---------- Recovered Government Archive Solid Waste Facilities List
RGA LUST ---------- Recovered Government Archive Leaking Underground Storage Tank

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/26/2025 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a

given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/26/2025 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1

***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 24 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/20/2025 has revealed that there are 21 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 37 CPS-SLIC sites within approximately 0.5 miles of the target property.

***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 18 UST sites within

approximately 0.25 miles of the target property.

***Local Lists of Registered Storage Tanks***

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 17 SWEEPS UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 45 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/17/2025 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 13 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 11/30/2025 has revealed that there are 50 E MANIFEST sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A review of the HWP list, as provided by EDR, and dated 11/06/2025 has revealed that there is 1 HWP site within approximately 1 mile of the target property.

LA CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LA CO LF METHANE list, as provided by EDR, and dated 05/14/2024 has revealed that there is 1 LA CO LF METHANE site within approximately 0.5 miles of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past

# EXECUTIVE SUMMARY

sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area 2) is

**SAN FERNANDO VALLEY (AREA 2) (Continued)** **1000710134**

an area of contaminated ground water located in the vicinity of the Crystal Springs Well Field in the Cities of Los Angeles and Glendale, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 6,680 acres, contains trichloroethylene TCE) and perchloroethylene PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guidelines for TCE and PCE 5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended withwater from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State s guidelines. Status June 10, 1986):
EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1, the most contaminated area. The RI is scheduled to begin in early 1986.

| Background Info: | essentially been put out of commission.<br>Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the SFVGWB since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying |

**SAN FERNANDO VALLEY (AREA 2) (Continued)** **1000710134**

responsible parties. EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP) The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern & Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements (ARAR's); and evaluate the potential risk to human health and the environment.
The Remedial Investigation of the SFVGWB was divided into two phases:
Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).
Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.
Phase II activities consist of basinwide remedial investigation conducted by the LADWP.
Remedial Actions (RAs):
North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.
A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.
A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.
Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU was separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedy. The PRPs formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.
Verdugo and Pollock (Areas #3 and #4) --
Currently no RAs have been identified for Area #3 or for Area #4. In October 2003, US EPA propsed No Remedial Action Verdugo

Basin (Area #3).
Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valey Groundwater Basin. EPA and the RWQCB are currently identifyig potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC.
The San Fernando Valley Ground Water Basin (SFVGWB) is located within the Upper Los Angeles River Area and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.
The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:
Area #1 - North Hollywood NPL site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit (OU) and the Burbank OU.
Area #2 - Crystal Springs NPL Site covers 3975 acres south-east of the North Hollywood NPL site and is located in the cities of Glendale and Los Angeles.
Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the San Fernando Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.
Area #4 - Pollock NPL Site covers 1653 acres in the southeastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale.
Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.
The primary contaminants of concern are volatile organic compounds (VOCs), trichloroethylene (TCE), and tetracholoethylene (PCE), which have been and/or are being used in many San Fernando Valley industries, such aeronautical, automotive, dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage, and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination at numerous wells have been so severe with TCE and PCE that these wells have

Environmental Interest/Information System:
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS:
Name: BORRMANN METAL CENTER
Address: 110 W OLIVE AVE
City,State,Zip: BURBANK, CA 91502
Site ID: 388139
CERS ID: 10229686
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 388139
Site Name: Borrmann Metal Center
Violation Date: 07-11-2017
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 07/13/2017. Sign Required for Hazardous Materials Storage Area.
Violation Division: Burbank Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 388139
Site Name: Borrmann Metal Center
Violation Date: 12-18-2024
Citation: HSC 6.5 25205.16(b) - California Health and Safety Code, Chapter 6.5, Section(s) 25205.16(b)
Violation Description: Failure to obtain or maintain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste. Maintenance of ID numbers must be annually verified by using the Electronic Verification Questionnaire (EVQ). *Inspector verify by reviewing HWTS or contacting DTSC Business Operations unit at evq@dtsc.ca.gov.
Violation Notes: OBSERVATION: The generator failed to obtain or maintain an Identification Number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without obtaining and maintaining an Identification Number. To maintain an active Identification Number you must annually complete the Electronic Verification Questionnaire (eVQ). NEED NEW EPA ID FOR NEW OWNER. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an Identification Number, or taken necessary steps to reactivate an inactive number. Ensure that you complete the annual Electronic Verification Questionaire to maintain an active Identification Number.

Violation Date: 08-31-2020
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/17/2020. OBSERVATION: 4x55 gal drums of used oil located in the front oil storage area was observed without a hazardous waste label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-17-2024
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Follow-up inspection conducted today. The program data and labeling violations have been corrected. The spillage within the secondary containment of the hazardous waste containers has not been cleaned. The violation has not been corrected.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CAS Number: 56-23-5
Substance: CARBON TETRACHLORIDE
Pathway: GROUND WATER PATHWAY
Scoring: 4

NPL Status: Currently on the Final NPL
Substance ID: U228
CAS Number: 79-01-6
Substance: TRICHLOROETHYLENE (TCE)
Pathway: GROUND WATER PATHWAY
Scoring: 2

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area l) is an area of contaminated ground water in the vicinity of the North Hollywood section of the City of Los Angeles, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 5,l56 acres, contains trichloroethylene TCE) and perchloroethylene PCE), and to a lesser extent, carbon tetrachloride and chloroform, according to analyses conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guideline for TCE and PCE 5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are eithertaken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State s guidelines. Status June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1, the most contaminated area. The RI is scheduled to begin in early 1986.

Completed Document Type: Five-Year Review Reports
Completed Date: 08/17/1998
Comments: A second 5-year review of remedial activities is conducted at the North Hollywood OU (NHOU) and covers operations from 1993 thru 1997. The purpose was to evaluate whether the NH Interim Remedy achieved the objectives specified in the ROD. The findings of the 5-year review are that the objectives of the ROD have been met.

| Background Info: | The San Fernando Valley Ground Water Basin (SFVGWB) is located within the Upper Los Angeles River Area, and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.<br>The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:<br>Area #1 - North Hollywood NPL Site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit(OU) and the Burbank OU.<br>Area #2 - Crystal Springs NPL Site covers 3975 acres located southeast of the North Hollywood NPL site and is in the cities of Glendale and Los Angeles.<br>Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the SF Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.<br>Area #4 - the Pollock NPL Site covers 1635 acres in the south-eastern part of the San Fernando Valley and is located in and |

**SAN FERNANDO VALLEY (AREA 1) (Continued)** **1000709322**

adjacent to the cities of Los Angeles and Glendale.
Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.
The primary contaminants of concern are the volatile organic compounds (VOCs) trichloroethylene (TCE) and tetrachloroethylene (PCE). These compounds have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination in numerous wells have been so severe with TCE and PCE that these wells have essentially been put out of commission.
Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of VOC vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the San Fernando Valley since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties.
EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern and Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements; (ARAR's) and evaluate the potential risk to human health and the environment.
The Remedial Investigation of the SFVGWB was divided into two phases.
Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).
Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.
Phase II activities consist of a basinwide remedial investigation conducted by the LADWP.
Remedial Actions (RAs):

**SAN FERNANDO VALLEY (AREA 1) (Continued)** **1000709322**

North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.
A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.
A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.
Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU has been separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remeday. The PRPs have formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.
Verdugo and Pollock (Areas #3 and #4) --
Currently no RAs have been identified for Area #3 or for Area #4. In October 2003 US EPA proposed No Remedial Action for Verdugo Basin (Area #3).
Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valley Groundwater Basin.
EPA and the RWQCB are currently dentifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC

Environmental Interest/Information System:
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The Integrated Compliance Information System (ICIS) provides a

MAP FINDINGS

Map ID / Direction / Distance / Elevation | Site | Database(s) | EDR ID Number / EPA ID Number

**SAN FERNANDO VALLEY (AREA 1) (Continued)** **1000709322**

database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

| Site Name: | Sprint Burbank POP CABRBB |
| Violation Date: | 07-20-2021 |
| Citation: | 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12 |
| Violation Description: | Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste. |
| Violation Notes: | OBSERVATION: The generator has not obtained an Identification Number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without obtaining an Identification Number. Transporting used oil (from the existing generator maintenance) without an EPA ID. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an Identification Number. |

| Citation: | HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a) |
| Violation Description: | Failure to include in the SPCC Plan a prediction of the direction, rate of flow, and total quantity of oil that could be discharged for each type of major equipment failure where experience indicates a reasonable potential for equipment failure. The rate of flow is not required on a Tier I qualified facility SPCC Plan. |
| Violation Notes: | Returned to compliance on 08/11/2021. OBSERVATION: Failure to predict the direction, rate of flow, and total quantity of oil that could be discharged for each type of major equipment failure in the SPCC plan. Flow into trench drain, missing subsequent flow towards an outfall. CORRECTIVE ACTION: Update SPCC plan to include prediction of the direction, rate of flow, and total quantity of oil that could be discharged for each type of major equipment failure. Describe the flow subsequent from the trench drain on the SPCC Plan. |

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-30-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Ulysses Valverde granted consent to inspect. Site was referred to us by BFD. Site has been in business for more than two decades but was never in our HW database. Company services and repairs motorhomes and travel trailers (RVs). HW observed: 5x55 gal used oil, 2x55 gal used coolant on secondary containment pallets. Site requires typical housekeeping in Hw storage area. Absorbent spread out around containment area, oil on floor. lack of labelling and containment has some liquid in it. HazWaste Active EPA ID CAL000093253 Signed Manifest: # & date 015449719JJK03/09/16
Eval Division: Los Angeles County Fire Department

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 04/11/2023. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. 2x55 gal drums of used antifreeze in the service bay dated 9/13/21 not disposed within 180 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| Waste Description: | Lead |
| Waste Code: | F002 |
| Waste Description: | The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures. |
| Waste Code: | F003 |
| Waste Description: | The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent |

**M2 COLLISION CARE CENTER (Continued)** **1000303631**

Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110055878420

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| RWQCB Region: | LOS ANGELES RWQCB (REGION 4) |
| Site History: | The Site had undergone SVE remediation for treatment of PCE and TCE from 1993 to 1996. An NFR for VOCs in soils only was issued by LA-RWQCB. The closure and abandonment of the system was approved by DTSC, the lead agency at the time. Regional Board issued a CWC 13267 Order for a subsurface investigation of chromium and hexavalent chromium. A site assessment was conducted in December 2014, which included one boring advanced to 46 feet bgs in the area near a storm drain inlet where elevated total chromium concentration was reported in a surface sediment sample in 1983. Hexavalent chromium was not detected above laboratory reporting limits in the soil in December 2014. The maximum concentration of total chromium detected was 39.4 mg/kg, well below the USEPA Region 9 RSL of 180,000 mg/kg for industrial/commercial sites. |
