Beacon – FEAF Part 1 Narrative
Proposed Local Law Concerning Drive-Through Facilities

On February 10, 2025, the Beacon City Council introduced a local law to amend Chapter 223 of the Beacon City Code (the “Zoning Code”). At the City Council’s April 28, 2025 meeting the proposed local law was separated to only contain the proposed amendment to the City’s permitted use regulations for drive-through facilities and clarify that any uses not expressly permitted are prohibited. The proposed local law to amend the Zoning Code concerning self-storage business will be addressed via separate LL.

Specifically, the proposed local law would amend the Zoning Code’s schedule of permitted uses to eliminate drive-through facilities as a permitted use in all zoning districts when such use is only prohibited in the Central Main Street (“CMS”) and Linkage (“L”) districts. As such, the proposed local law would affect all zoning districts, except the CMS and L districts, in the City of Beacon by eliminating the drive-through uses from the Schedule of Permitted Uses as established by the Beacon Zoning Code § 223-17C.

The proposed local law would further amend Beacon Zoning Code § 223-17B to clarify that any uses not expressly permitted by the Zoning Code, or the Schedule of Permitted Uses established by § 223-17C, are prohibited.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Project :

Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☐ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☐ Part 1 ☐ Part 2 ☐ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the _____ as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Beacon – FEAF Part 3 Attachment
Negative Declaration of Environmental Significance

Proposed Local Law Concerning Drive-Through Facilities

On February 10, 2025, the Beacon City Council introduced a local law to amend Chapter 223 of the Beacon City Code (the “Zoning Code”). This proposed local law would amend the City’s permitted use regulations for drive-through facilities and clarify that any land uses not expressly permitted are prohibited. The Local Law was referred to the Dutchess County Planning Board, which by letter dated February 27, 2025, opined that the proposed Local Law is a matter of local concern without comment. The Local Law was also referred to the City of Beacon Planning Board, which at its March 11, 2025, meeting discussed the proposed local law and provided comments which were reviewed by the Council. Furthermore, at the City Council’s April 28, 2025 meeting, the Council decided to separate the Local Law into two (2) separate laws with the self-storage facility component originally proposed being addressed independently. There have been no material or substantive changes to the drive-through or clarification aspects of the Local Law.

The proposed local law will not have a significant adverse impact on the environment for the following reasons:

The proposed amendment to the City of Beacon’s Zoning Code is not inconsistent with the City’s Comprehensive Plan. Rather, the proposed Local Law furthers the City’s goals of increasing walkability and shift away from autocentric uses by eliminating drive-through facilities from the City Code. Drive-through facilities are also currently prohibited in the City’s Central Main Street (“CMS”) and Linkage (“L”) Zoning Districts. Furthermore, the City Council is, thru its police powers and authorities granted by the New York State Constitution and applicable Statutes expressly authorized to dictate the types of land uses which may be permitted within the territorial boundaries of the City of Beacon.

The proposed Local Law does not create any adverse environmental impacts because the local law will not result in any direct or physical impacts to land. Instead, the proposed Local Law prohibits a certain type of use in all zoning districts which are already prohibited in the CMS and L Zoning Districts. It may, however, result in indirect or secondary impacts as owners will not be able to construct drive-through facilities and will need to utilize such land for a different permissible purpose. Nonetheless, each application will involve a unique and individual set of circumstances, the particular nature of which will be subject to the regulations and requirements of the Zoning Code, the City Code, and State law. The evaluation of such future uses will involve independent review for conformance with the Zoning Code as well as environmental impacts. However, the proposed Local Law alone will not have a direct impact on land. As such, the potential for secondary or indirect effects of the proposed Local Law do not support the conclusion that the legislation will or may create a significant adverse environmental impact requiring preparation of an environmental impact statement. Further, potential secondary or indirect impacts do not give rise to any currently identifiable potential

significant adverse environmental impacts. Therefore, an environmental impact statement need not be prepared.

The proposed Local Law does not propose any actions or land uses which are sharply or drastically different from surrounding land use patterns. There are no known impacts to population density, nor will it cause a change in density of development that is not supported by existing infrastructure by the exclusion of drive-through facilities in the City. It is not inconsistent with the City's current land use plan which aims to move away from autocentric uses and increase housing affordability. It is not inconsistent with any known County or regional land use plan(s).

Moreover, this proposed Local Law is not expected to have significant adverse environmental impact because permitted land uses are being restricted. As such, future land use applications within the City will require independent environmental review for the specific development as it relates to uses permitted within the City. As this proposed Local Law does not involve the actual development of land (i.e., restricts it), the extent that this environmental review precedes future development or pending development is thus no less protective of the environment than the requirements of SEQRA.

Additionally, the proposed Local Law will not result in a substantial adverse change or impact in existing air quality, ground or surface water, traffic or noise levels, nor a substantial adverse change or impact for erosion, flooding, leaching or drainage because the proposed Local Law serves to eliminate a distinct type of land use, which are already prohibited in the City's CMS and L districts, and therefore has no direct impact on the environment.

The proposed Local Law will not have a direct impact on or cause the removal or destruction of large quantities of flora or fauna, nor substantially interfere with any protected flora or fauna, habitats, or environmentally sensitive areas.

It will not result in the impairment of the character or quality of important historical, archaeological, architectural, or aesthetic resources of the existing community or neighborhood. Nor will it create a hazard to human health or significant change in the intensity of land uses, or result in the loss of open space or recreation because it will eliminate a specific type of land use from the City's Schedule of Permitted Land Uses. It is not believed that the proposed Local Law will drastically change or result in material demand for other permitted uses in the City.

As such, for the reasons herein and the reasons set forth in the Full Environmental Assessment form Parts 1 and 2, and the information contained in the record, the proposed Local Law will not have a significant adverse environmental impact.
