**Roll Call**

**Workshop Agenda Items**

1. Community Segment: Southern Dutchess Coalition MLK Jr. Essay Award Winners
2. Police Department Annual Report
3. City of Beacon Park Cleaning & Janitorial Services Request for Proposal Results
4. South Avenue Park Project No. 2: Court Surfacing Bid Results
5. South Avenue Park Project No. 3: Court Fencing Bid Results
6. South Avenue Park Project No. 4: Court Improvements & Restroom Facility Bid Results
7. Appointment of Dar Sims to the Position of Temporary Fire Lieutenant
8. Appointment of Nicholas Krygowski to the Position of Municipal Program Assistant
9. Appointment of James Vermeulen to the Planning Board
10. Draft Resolution Urging the New York State Senate and Assembly to Pass the Packaging Reduction and Recycling Infrastructure Act Senate Bill (Senate Bill 1464 / Assembly Bill 1749)

**Announcement of Next Meeting: April 7, 2025 at 7:00 p.m.**

Police Department Annual Report

Police Department Annual Report - Slide Deck

CHIEF OF POLICE
THOMAS FIGLIA

CITY OF BEACON
POLICE DEPARTMENT
1 MUNICIPAL PLAZA, SUITE 3
BEACON, NY 12508
(845)831-4111
FAX: (845)838-5092

NEW YORK STATE
ACCREDITED AGENCY

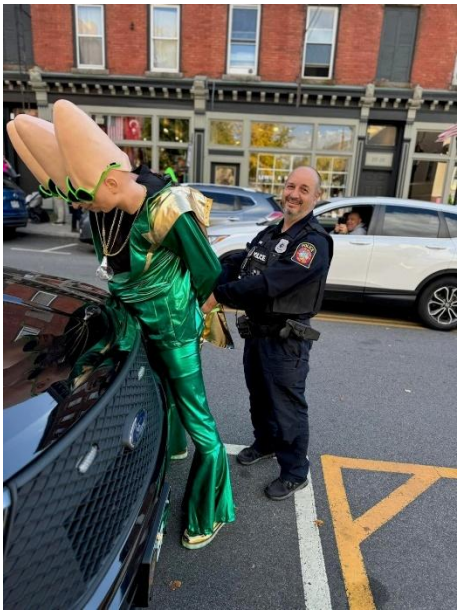

Mayor Kyriacou and City Council:

The City of Beacon Police Department remains committed to transparency in its operations and to accountability to the community that we serve. As part of this commitment, we recognize the need to inform the public about department activity, crime in the city, and about our efforts to address it in the context of our capabilities. To that end, I am presenting the City of Beacon Police Department's Annual Report for 2024.

-Chief Thomas Figlia

**Community Participation**

Creating opportunities for department members to interact with the public in capacities other than strict law enforcement encounters is critical to the department's efforts. These opportunities go a long way in helping to foster trust between the department's members and the public, even when we must take enforcement action. In times of great stress or crisis, recognizing the responding officer from a previous, pleasant interaction can go a long way in de-escalating a situation.

The department either participates in or provides services to a number of community events each year. In 2024, there were at least 31 such specific events. This included providing traffic control, and participating in, various parades and events such as the Martin Luther King Day Parade, the Celebration of Light Parade, the Parade of Green, St. Joachim's and St. John's Good Friday Procession, the Stride for Life Event, the JV Forrestal Bike/Walk to School Day, the Elks Club's 100th Anniversary Parade, the Spirit of Beacon Day's parade, the Hocus Pocus Parade, the Animal Rescue Foundation's 5K Run, I Am Beacon's 5K Run, the Strawberry, Corn and Pumpkin Festivals, the Elijah Hughes Basketball Tournament and the Independence Day Fireworks. We also provided officers for various events at Beacon High School such as football, basketball and soccer games.

In addition to those, the department was also represented at other community events solely as a means of community relations. These included a Drug Take Back Day at the recreation center, the Memorial Day Service, the New Covenant Learning Center's Bike Rodeo, the I Am Beacon Back to School Block Party, The Elks Club's 9/11 Ceremony, the PBA's Thanksgiving Dinner Giveaway in South Davies Terrace and a Car Seat Installation and Inspection Event at the Elks Club.

We also regularly participated in educational activities. The department provided tours of police headquarters for J.V. Forrestal Elementary School, Green Teen, and the Beacon High School Varsity Basketball Team. We assisted with Beacon High School's Forensics and Criminal Justice classes, worked

in conjunction with the Dutchess County Sheriff's Office to hold police written and physical exam preparatory classes in Beacon, attended the Beacon High School Career Fair, and hosted our own Youth Police Academy over the course of a week during the summer.

Finally, in 2024 we also relaunched our Main St. Bicycle Patrol as weather and staffing allows, in order to put an officer out on a slower, open patrol and to make him more accessible to people on our busiest street.

In 2025, we will continue participate in the community and to build on the success of our interactions with the public through the many excellent events that Beacon has.

**Staffing**

For 2024, the department's full staff compliment, per the annual budget, was 36 sworn members, including the Chief of Police. This is in addition to a civilian staff including 2 full time dispatchers working Monday through Friday one from 8am to 4pm and the other 4pm to 12am, 2 part time dispatchers working Saturday and Sunday 8am to 4pm and 4pm to 12am, and two administrative assistants. While not city employees, the department also contracts with Mental Health America of Dutchess County to provide a full-time Behavioral Health Specialist and co-houses, on a part-time basis, a Domestic Violence Victim's Advocate who is employed by Family Services.

In 2024, we experienced unprecedented staff movement. Two officers resigned to take other police jobs, one in Carmel and the other with State Police. Additionally, unfortunately another officer chose to resign rather than extend field training due to unsatisfactory performance during probation. Even more significantly, the Chief of Police, the Detective Sergeant and the senior patrol Sergeant all retired within two months of each other and during that same time a sergeant who was provisionally serving as a lieutenant had to return to the rank of sergeant due to civil service rules. These vacancies required more promotions in close proximity to each other than at any other time in known department history.

Thomas Figlia was promoted from Lieutenant to Chief of Police. Micheal Confield was promoted from Sergeant to Lieutenant. Oscar Vargas was promoted from Sergeant to Lieutenant. Thomas Durkin was promoted from Detective to Detective Sergeant. Alyssa Rudden was promoted from Detective to Sergeant. Kelvin Grey was promoted from Detective to Sergeant. Carl Garofolo, Ryan Sambells, Kevin Sequist and Samantha Milani were all promoted from Police Officer to Detective.

With these resignations and retirements, the department also dipped to its lowest staffing levels in recent memory with eight vacancies and two members out on injury. Officers were needed on overtime just to fill the minimal patrol shifts for, at the very least, 80 hours per week. In order to respond to this crisis, the department, the City Administration, and the PBA worked together to start moving in the right direction

when it comes to recruitment and retention. A mid-contract cost of living pay increase was instituted in order to move the Beacon Police Department's pay into closer alignment with other are departments that had far outpaced it. We also implemented a sign-on bonus and recruiting bonus in the hopes of recruiting police officers with previous experience. At the end of 2025, the current PBA contract expires, and we will need to start negotiations to again move Beacon Police Department compensation and opportunities further into line with other area departments. Even factoring in the adjustment last year, we are still behind recruiting rivals such as the Town and City of Poughkeepsie Police Departments.

In positive news, in 2024 we hired one police officer who graduated the police academy in early 2025. We also hired three more police officers in early 2025, two of whom are currently attending the Rockland County Police Academy and one of whom has started Field Training due to his previous police experience. Additionally, in 2024 the department added a dispatched to the weekend evening shifts, freeing a police officer from desk duty and allowing them to be assigned to patrol.

**Notable Police Incidents**

In 2024, department members continued to work hard to address and resolve a number of significant incidents and crimes. Though this report could not possibly include them all, some of the more outstanding among them follow:

On March 4th, officers working the midnight shift found several windows broken on Main Street. As they investigated, they located the suspect actively breaking another and an arrest was made.

On March 19th, the department responded to a structure fire in the Colonial Springs Apartments. The police officer who was first on scene forced entry into apartments filling with smoke in order to ensure they were cleared out, and members worked with Beacon Fire Department to set up a congregation point for displaced residents so they could be easily located and assisted with emergency housing options.

On April 3rd, officers responded to a call for a burglary in Tompkins Terrace. They quickly identified the suspects and located them. While interviewing them a 15-year-old male was found to be in possession of a loaded handgun. Arrests were then made at the scene.

On April 16th officers received a report of a vehicle stolen from Main Street. Before being located, the vehicle had crashed into a pole on Rt. 9D and fled the scene. Officers on patrol then located the vehicle, which attempted to flee before quickly crashing again into a guardrail on the Newburgh-Beacon Bridge. At that time the suspect fled on foot and was apprehended.

On June 5th, officers responded to a serious assault on Main Street. in which the suspect went so far as to jump on the head of the homeless victim. The suspect was quickly identified and apprehended. After victim cooperation was secured, additional serious charges were brought on the suspect.

On June 8th, officers responded to a serious assault which occurred during a flag football game and left the victim with sustained injuries. An investigation was completed, and two individuals were arrested.

On June 13th, officers responded to a burglary on Main Street in which the suspects were operating a high-performance vehicle. Officers located and attempted to stop it, but it fled at very high speeds creating a significant risk to the public so the pursuit was terminated. The burglary was subsequently found to be a part of an interstate burglary ring, and two suspects were taken into custody by authorities out of state. The case, including the burglary on Main Street. is being handled federally.

On July 24th, officers responded to a suspicious individual looking into vehicles in the parking lot of the Beacon Train Station. They located the suspect who only spoke Spanish and who was interviewed by one of our Spanish speaking officers. Though he initially provided a fake name, investigation revealed that he was wanted in Rockland County for a fatal hit and run incident in Spring Valley. He was arrested and turned over to the appropriate jurisdiction.

On August 17th, officers responded to 31 Eliza Street for a female who had been stabbed. Investigation revealed that it was the result of a domestic assault, and the suspect was still on scene. He resisted arrest and attempted to assault one of the officers but was eventually subdued and arrested.

On August 20th, officers responded again to 31 Eliza Street for another male who was threatening staff with a knife. He was promptly located, still in possession of the knife, and arrested.

On August 29th, the department received a Flock License Plate Reader notification for a vehicle entering the City that was wanted in connection with a serious domestic assault in New Jersey. Officers located the vehicle and arrested the wanted suspect, who was held for extradition back to New Jersey.

On September 6th, an individual was assaulted, without provocation, and subjected to verbal abuse in reference to his national origin. The victim escaped but did not call police until he was leaving the area. The suspect had been previously located due to another incident and was transported for a psychological evaluation. Once the assault was reported an investigation was conducted which included detectives travelling far upstate to secure a statement and evidence from the victim. The suspect was charged with a hate crime assault.

On September 22nd, officers responded to a call of a female setting fire to clothing inside of an apartment in Tompkins Terrace. She was arrested, and during the investigation, officers also located an illegal firearm which was possessed by another member of the household who was a prohibited person. The firearm was seized, and charges were filed.

On September 29th, officers responded to a residence on South Avenue for a mother who had provided her 11-year-old daughter with pills and a razor and encouraged her to kill herself after the child had threatened suicide. The mother was arrested, and the daughter turned over to a third party with Child Protective Services (CPS) being notified.

On October 18th, officers responded to South Avenue Park for a report of a suicidal female. Officers located her and attempted to deescalate her. While that was ongoing, she produced a lighter and began attempting to set herself on fire. They quickly intervened physically to stop her and transport her to the hospital for a psychiatric evaluation.

On November 6th, officers responded to a call of an individual attempting to light an occupied building on fire on Main Street. He was quickly located and arrested at the scene.

On December 3rd, the department received a call for a for a suicidal individual in Looper's Plaza (1020 Wolcott Avenue). This was the same individual who had attempted to light herself on fire on October 18th. As officers attempted to interview her, she pulled out a knife and held it to her neck. While still holding

the knife to her neck, she then attempted to barricade herself inside of a store. Officers quickly evacuated the employees and using verbal negotiation and tactical intervention, successfully got her to drop the knife, at which time she was taken into custody and again transported to the hospital for psychiatric evaluation.

On December 12th, the department received a Flock License Plate Reader notification for a stolen vehicle. Patrol located the vehicle in the parking lot of the Lofts on Leonard Street. The suspect fled on foot but was quickly apprehended and arrested. The vehicle was returned to the owner.

Perhaps most significantly, this year the Beacon Police Department made three arrests in a murder case which occurred in the Forrestal Heights parking lot in 2022. This included setting up surveillance on one suspect and then taking him into custody after a felony traffic stop on Fishkill Avenue. It also included working with the United States Bureau of Prisons and the Pennsylvania Department of Corrections to gain custody of two of the other incarcerated suspects and transporting them from Pennsylvania back to New York to face justice.

**Dutchess County Drug Task Force**

The Beacon Police Department assigns a detective to the Dutchess County District Attorney's Drug Task Force, where he serves at the assistant coordinator (second in command). The mission of the Task Force is to apprehend dangerous drug dealers throughout Dutchess County with a focus on reducing violent crime and overdose deaths. In order to do this, the Task Force recently changed its approach to investigations in order to act more quickly and has already seen significant success. This year the County saw a 50% decrease in drug overdose deaths. Dutchess County is a place where one rarely stays just in their own municipality, so dangerous drug dealing and violence in one part of the County impacts residents of the County as a whole. This work is important countywide, but the following is a summary of task force cases from 2024 that had a direct impact on Beacon drug dealers.

On February 25th, the Task Force arrested a Beacon resident for fentanyl sales which he was making in Hyde Park. A search warrant of his residence revealed additional drugs as well as a handgun.

On April 29th, the Task Force arrested an individual for multiple cocaine sales which occurred within the City of Beacon. At that time, the individual was actually out of custody as a result of entering into a diversion program after pleading guilty to previous drug sales.

On June 11th, the Task Force provided surveillance assistance to the Beacon Police Department which proved crucial to the Fishkill Avenue arrest of the murder suspect detailed above.

On July 31st, the Task Force arrested a multi-time convicted drug dealer who was selling Fentanyl and living at 31 Eliza Street (Hamilton Fish Plaza). At the time of his arrest, the suspect was out on bail from a high-profile aggravated assault which occurred in the City of Poughkeepsie where the victim was severely beaten with a baseball bat in the middle of the arterial.

On October 17th, the Task Force, assisted by Beacon Police Department patrol officers, conducted an operation to arrest a Beacon resident who had sold fentanyl to undercover agents. This suspect had a serious criminal history and gang associations that included a previous federal conviction for possession

of an explosive. A search warrant of his Beacon residence revealed Class A felony weight drugs as well as an illegal firearm.

This, however, is just a fraction of the impact on Beacon. Several other suspects that they arrested in 2024 also sold drugs inside of Beacon or to Beacon residents at one time or another.

**Mental Health America Behavioral Health Specialist**

As is often discussed, the Beacon Police Department contracts with Mental Health America of Dutchess County to have a behavioral health specialist available full time to the community. When he is working his shift, our behavioral health specialist acts as a co-responder to service calls where there may be an intersection between the incident and an individual's mental health. Additionally, for calls that come in when he is not on shift, he attempts follow ups, both remotely and in person, with individuals involved. Not only is the behavioral health specialist trained in de-escalation techniques, as are all of our sworn officers, but he also brings the ability to link individuals in need with post-call services, treatment providers, case management, crisis shelters, and substance treatment. In 2024, he responded with officers to 184 calls and completed 130 follow ups. In total, 114 individuals were linked to post police call resources. Of those, among other resources, 82 were linked with behavioral or mental health treatment, 75 with a treatment provider, 17 with case management, 15 with crisis shelters, and 12 with substance abuse treatment.

**Training**

The Beacon Police Department prides itself on not just meeting, but exceeding by a significant margin, the New York State requirements for training of its officers. Each year, all officers receive in-service training on Workplace Violence and Sexual Harassment Prevention, Disability Awareness, Use of Force Policy and Case Law, De-Escalation, Defensive Tactics, Active Shooter Response, Spring and Fall Handgun and Patrol Rifle Training, Bloodborne Pathogens, use of and policy related to Electronic Control Weapons and Pepper Spray, and Scenario Based Training. Every other year, members also receive training in Cardiopulmonary Resuscitation (CPR) and the use of Automated External Defibrillators (AEDs). In 2024, all officers completed each of their trainings successfully.

Additionally, individual officers are provided with training outside of our department to better suit them either for specific assignments, to gain or retain qualification as instructors (a duty they have in addition to their regular duties), or to improve their knowledge in areas in which they have shown initiative. As a result of all of the staffing changes in 2024, there was a particularly high need for training. This included all supervisors receiving Legal Updates Training from the Dutchess County District Attorney's Office, a lieutenant receiving training in Internal Affairs Investigations, a sergeant attending Lethality Assessment Train the Trainer (for domestic violence responses), a new sergeant attending the Course in Police Supervision, two of our instructors being certified in Scenario Based Training Instruction and Safety, a detective being trained in Ghost Gun Investigations and also Property and Evidence Room Management,

two instructors attending a countywide Active Shooter and Hostile Events Response training, two detectives receiving Crime Scene Photography and Crime Scene Investigations training, one detective receiving Interview and Interrogation training, one detective receiving Background Investigations Training, and an officer being certified as a Field Training Officer.

In 2025, the department will keep its pace of in-service training and continue to have a higher-than-average need for specialized training as we seek to recruit new officers and get everyone fully trained for new positions which they took in 2024.

**New Parking Enforcement Equipment Initiative Completed in 2024**

The Beacon Police Department, like many other departments of our size, contracts with a vendor to provide electronic parking ticket writers as well as back-end parking ticket management services, including owner look ups, collections notices, and DMV registration holds. For many years, the department contracted with a southern New York based company and had very satisfactory services from them. In 2019, that vendor was absorbed by another and, as is often the case, customer service declined. Services that the vendor once provided were pushed down to the customer, and most importantly, the new equipment they provided was poorly designed and rarely worked. This led to a sharp decline in our parking enforcement as officers struggled with increasingly frequent equipment failures. In 2024, the contract with the vendor expired, and we signed with a new vendor which provides the same services with a fee structure that the finance department determined would be a savings to the City. The new vendor also provides much-improved handheld, electronic ticket-writer units, which have proven much more dependable. These new units went into use in late November 2024, and since that time, there has been a significant increase in parking enforcement as a result. For example, in December 2023, only 20 parking tickets were issued whereas in December 2024, 187 tickets were issued.

**Future Initiatives**

In 2024, the department began to set in motion several large initiatives which will go live in 2025. One of the largest is an investment in new body worn cameras. The previous system had been in place and fully operation since 2018 but was plagued by a weak physical product and low-tech software. In 2024, the City Council approved a contract with Axon, which will provide the department with brand new, state of the art body worn cameras. These new devices also come with one of the most advanced back-end software solutions on the market. This upgrade will enhance our efficiency when reviewing incident footage and when responding to requests for video both via the Freedom of Information Act and via discovery requests from the District Attorney's Office where they relate to criminal cases.

Part of the agreement with Axon also included the latest technology in electronic control weapons. Commonly referred to as "Tasers". The newest versions of these devices allow greater accuracy and faster follow ups in the case of a failed attempt to use the device. This ability is an extremely important advancement as the use of these less lethal devices are often critical for turning a potentially lethal encounter into a non-lethal one. Unfortunately, if the device does not work, the officers are often left with

no choice but to use a higher level of force since the previous versions could not be quickly deployed a second time. The newest technology allows rapid follow up in the case of a failure.

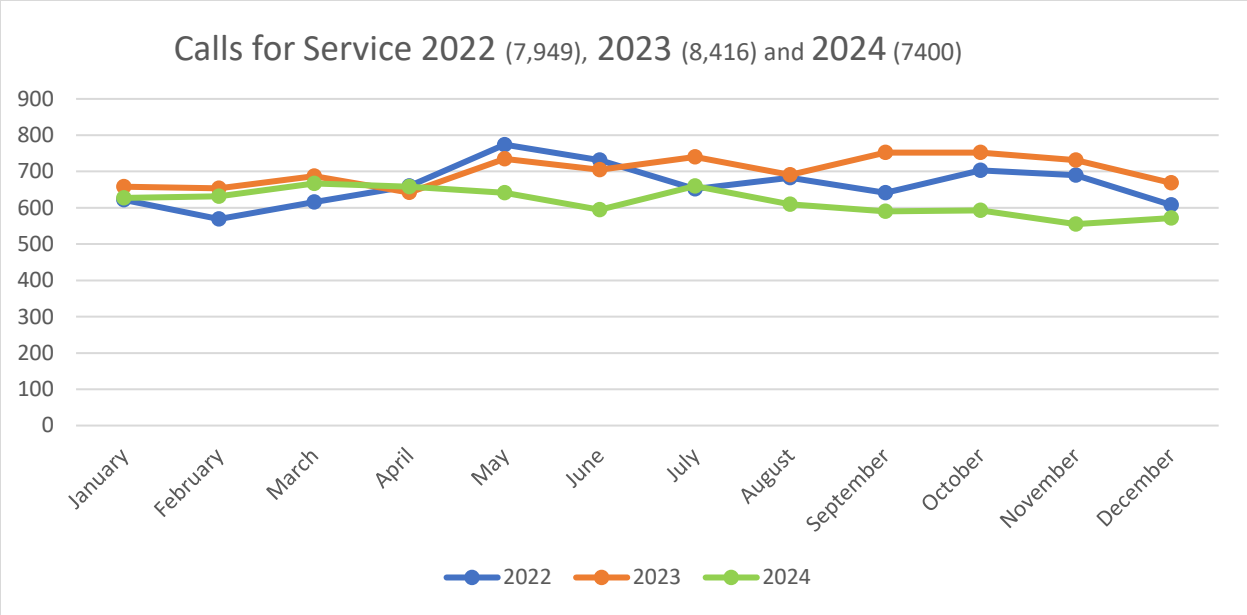

The department also continued to lead the City departments in the transition to green vehicles. The department purchased three new hybrid patrol vehicles in 2024. They were delivered in early February of 2025 and will soon replace three highly worn, damaged and less efficient patrol vehicles.

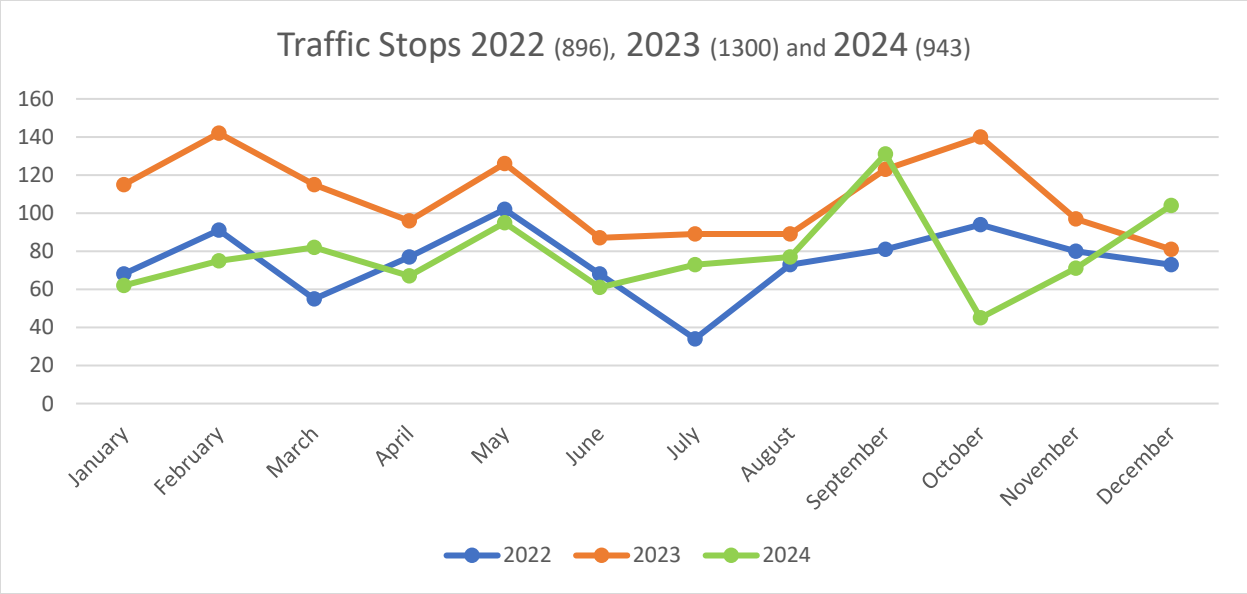

Finally, for at least two decades, the police locker room and gym has been in serious disrepair with broken, old and rusted equipment, lockers, and fixtures. The floor has been literally crumbling for several years. Plans to use contractors for renovation had been in the works for several years, but in 2024, the situation was reevaluated, and after a successful in-house renovation of the Wastewater Treatment Plant restrooms and locker rooms, the City administration determined that the Department of Public Works could complete nearly all of the renovations in-house at a significant savings. Early in 2025, work began, and currently both the locker room and gym have been gutted. New, improved equipment and lockers that are more durable have been ordered, and major repairs to the rooms are currently in progress. The launch of these much-needed improvements has already positively impacted morale in the department.

**Yearly Activity and Crime Statistics**

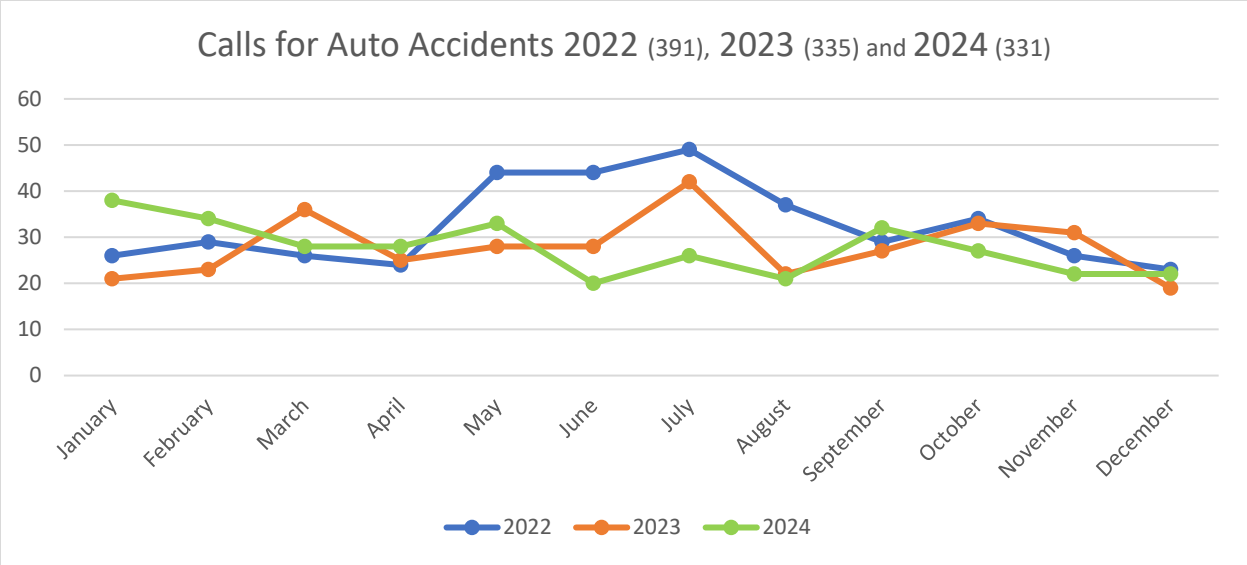

One item that is frequently requested from the Beacon Police Department is data on police activity and crime. In the 2023 Annual report, we provided charts and statistics for several areas. This year, data for 2024 was added to that previously provided in order to create an even more comprehensive overview. Below you will find a month-to-month comparison of total calls for service in 2022, 2023 and 2024, as well as specific call for service types which we track on a monthly basis. In 2024, we actually saw a decrease from the higher number of calls for service in 2023 to a number closer to that of 2022. Similarly, traffic stops went down proportionally, though they remained higher than 2022's level. Auto accidents also went down from 2023 to 2024, though not by as significant an amount as 2022 to 2023. As a result of concerns voiced by the community, the department is expanding traffic enforcement going into 2025. For example, in January of 2024, 62 stops were performed whereas in January of 2025, there were 97 stops. Similarly, in February 2024, there were 75 stops made and in February 2025 there were 94 made.

**Calls for Service and Traffic Enforcement**

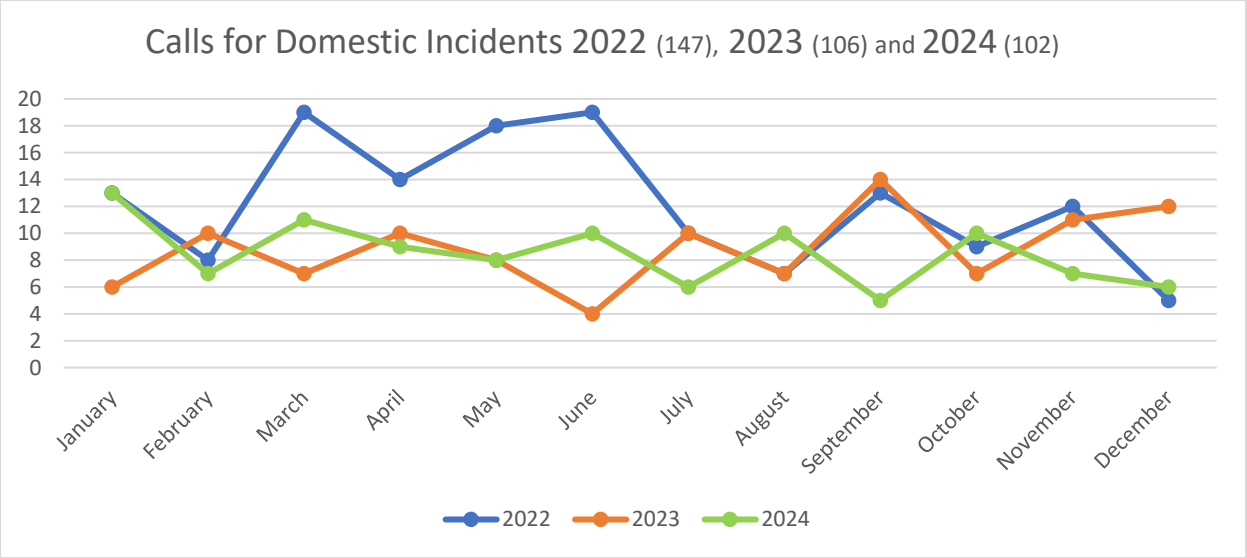

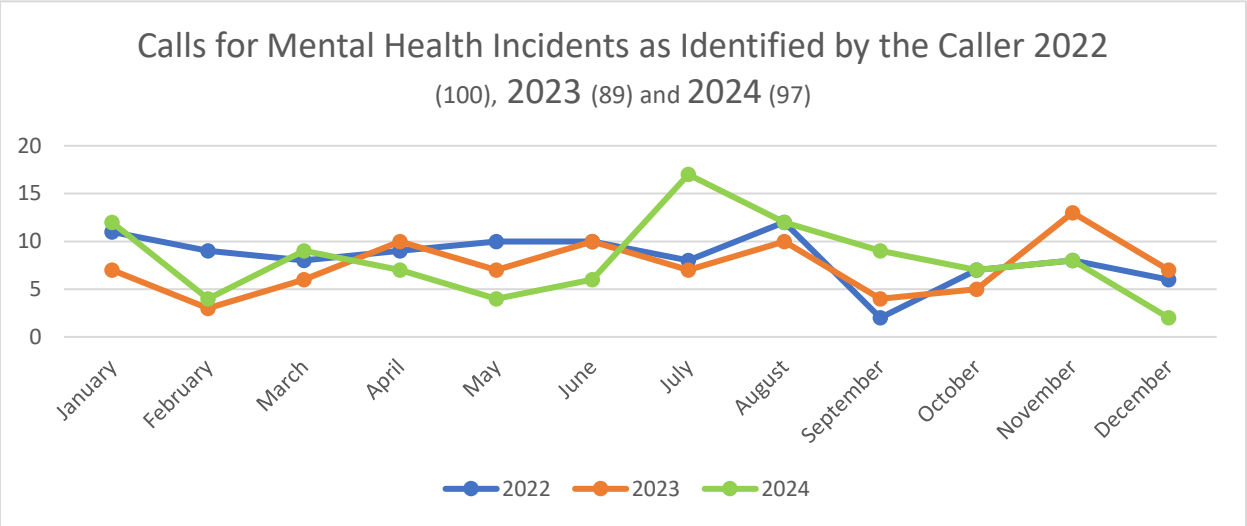

Reports of traffic accidents decreased approximately 14% from 2022 to 2023 and then 1.19% from 2023 to 2024

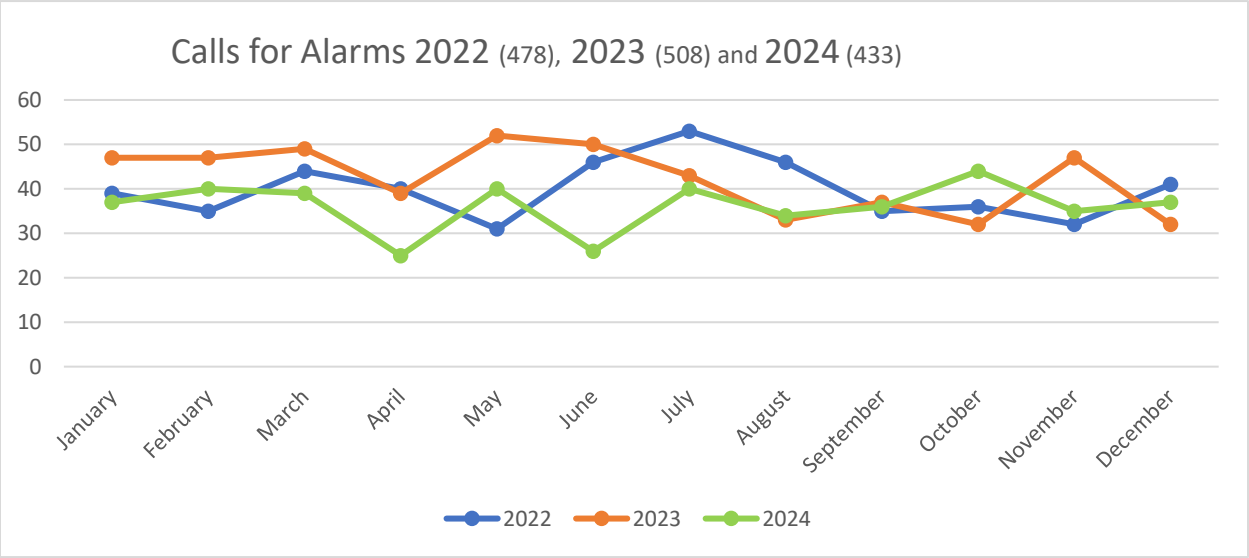

We saw a notable decrease in total reported domestic incidents from 2022 to 2023 with an approximately 27% difference. The trend in decreases in reported domestic incidents started as far back as 2019 and continued for 2024 with slight decrease of approximately 3.8%.

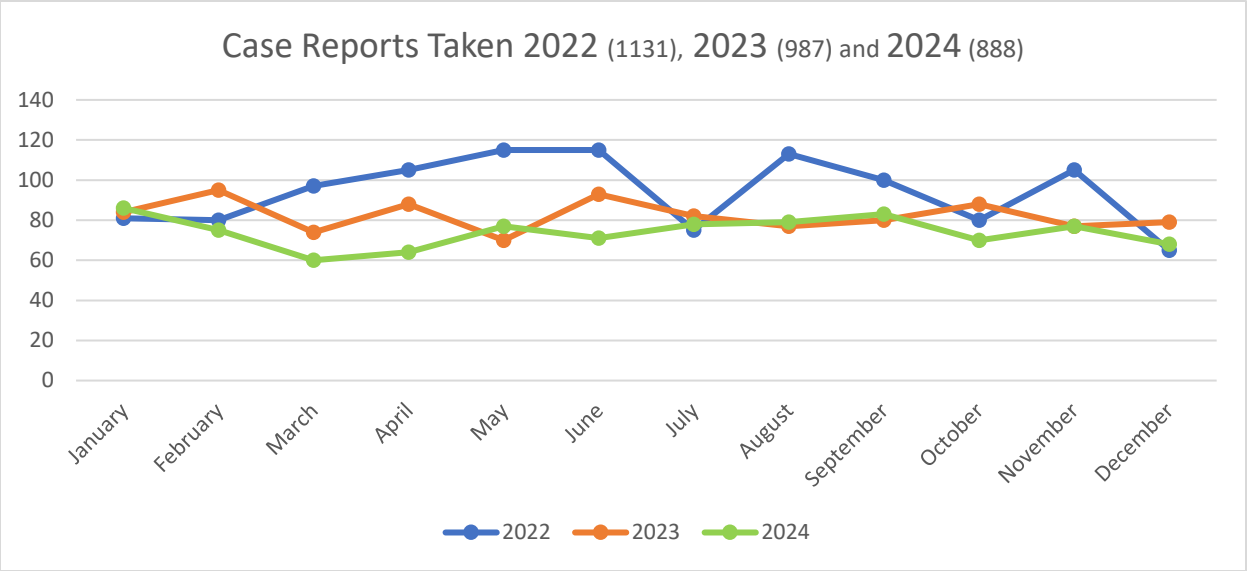

Calls for mental health incidents, as identified by the caller, rose back to approximately the same level as 2022; however, this statistic only reflects a small proportion of the number of individuals in crises that with whom the Beacon Police Department interacts. The majority of our interactions with such individuals come in the form of calls for other incidents, such as disorderly subject(s) calls.

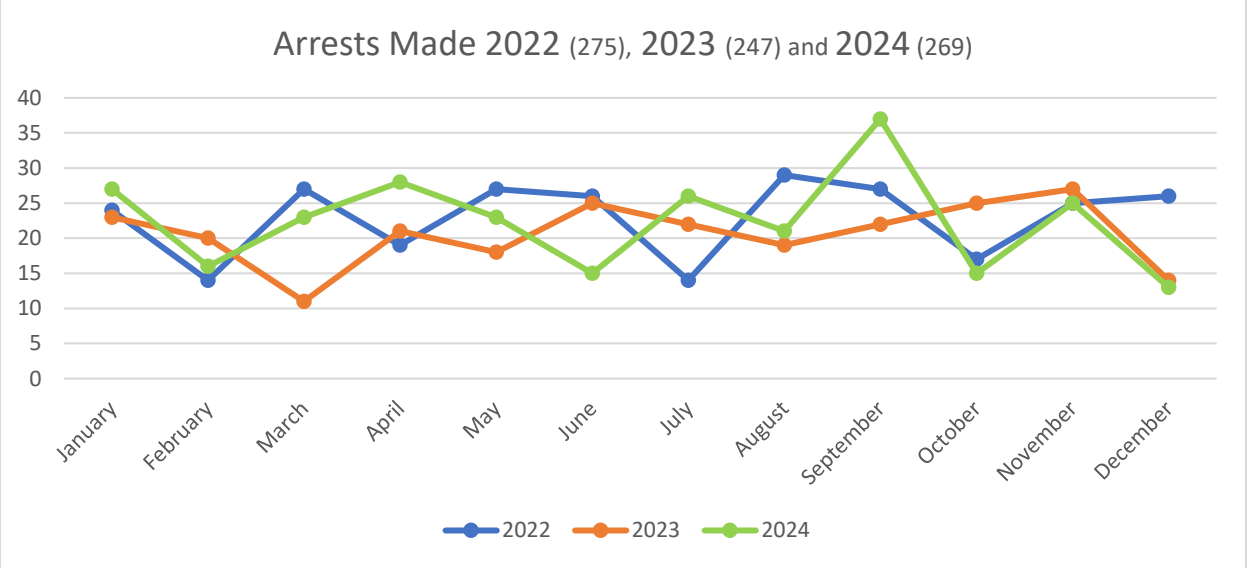

Calls for alarms, which for our tracking purposes reflect calls for residential and commercial burglar alarms, panic alarms and hold up alarms, were up in 2023 but decreased in 2024 and even went below 2022 levels.

In 2024 the downward trend in total case reports continued but the total arrests increased.

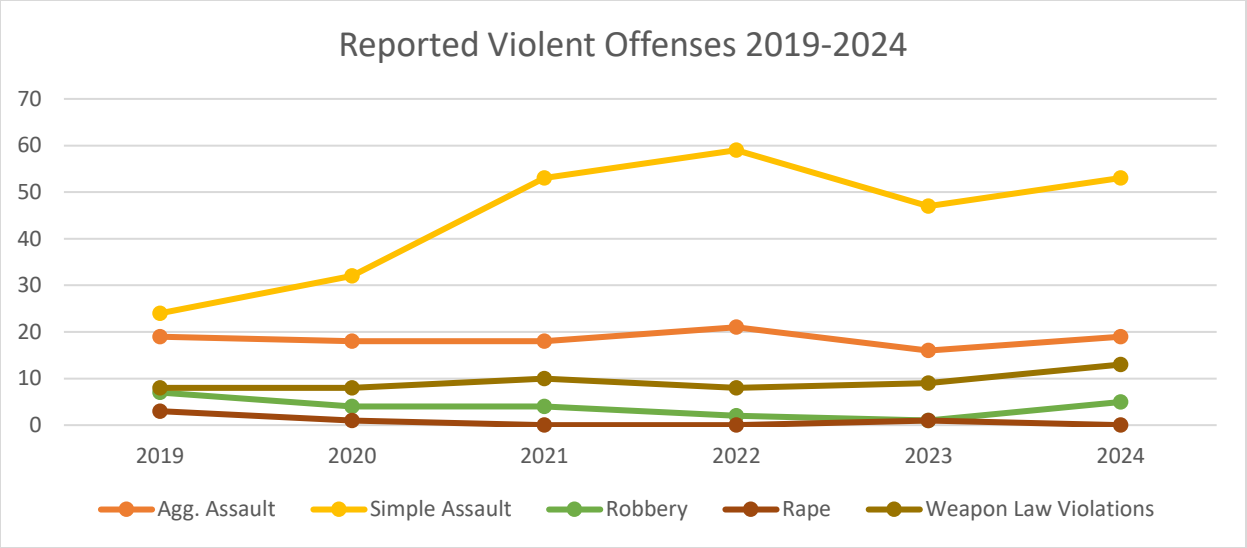

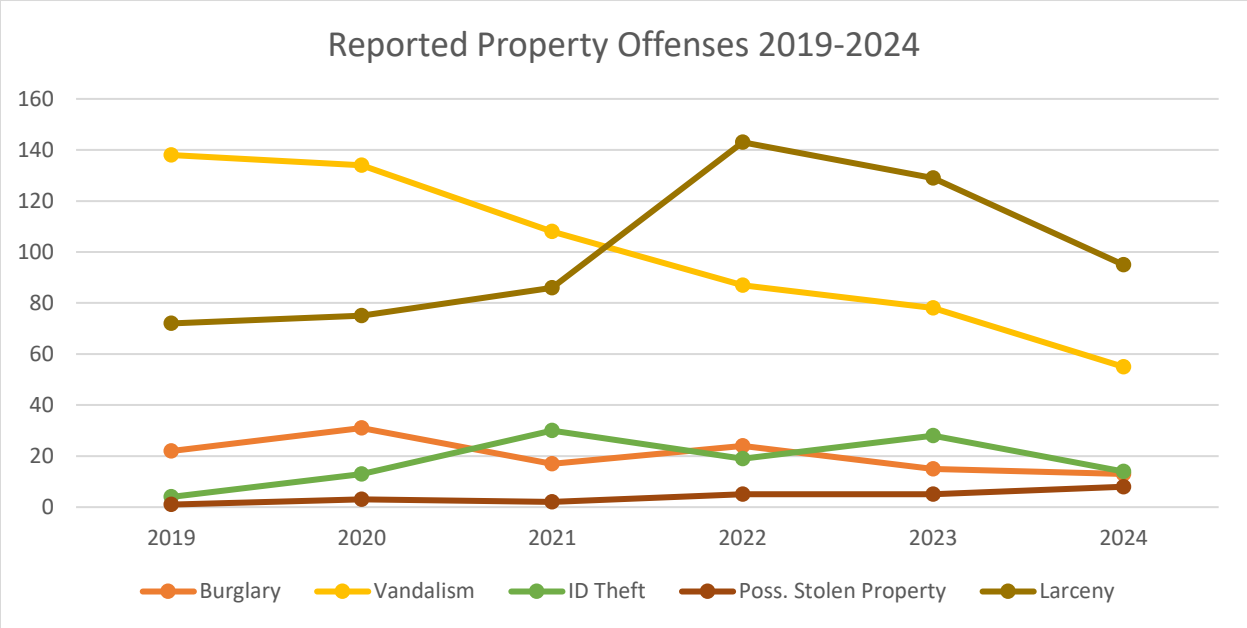

**Yearly Crime and Arrest Statistics**

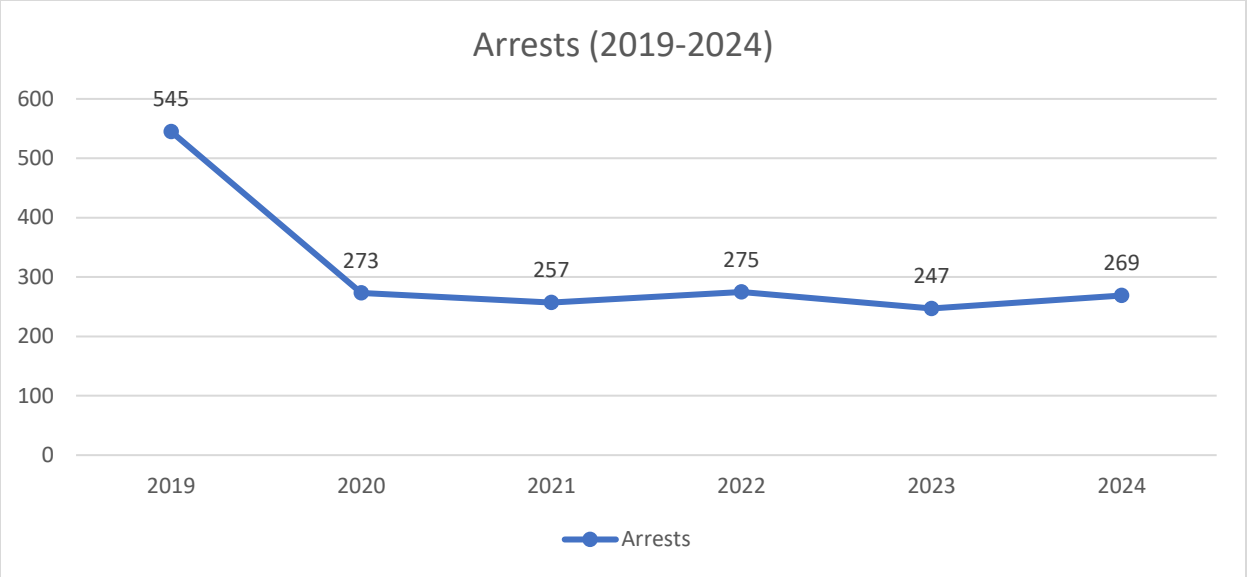

In the next set of charts, comparisons are made for specific data sets between the years 2019 through 2024. The data goes back to 2019 because in the criminal justice community, 2019 is generally regarded as the last year of a fairly uninterrupted downward trend for crime in the United States. In Beacon, both violent and property crime has been relatively steady and low. The City has, however, experienced significant increases in both larceny and simple assault, which are concerning. Most larcenies and all simple assaults are considered misdemeanors.

Simple assaults in 2024 were up slightly, though they remained lower than their 2022 peak. In 2024, larcenies continued their downward trend with a 26% decrease from 2023. Vandalism also continued its downward trend in 2024, dropping another 29%. There was also a drop in burglaries from 2023 to 2024.

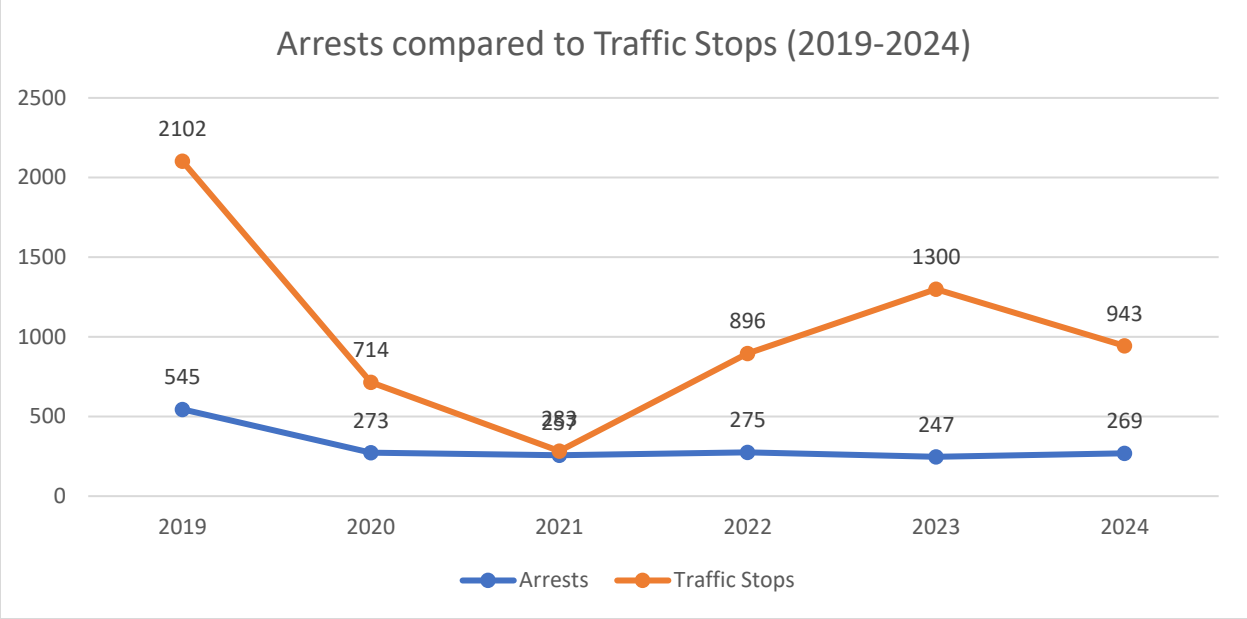

Between 2019 and 2020, the department saw a very significant drop in the total number of arrests made. That number has remained relatively steady though there was a nearly 9% increase from 2023 to 2024.

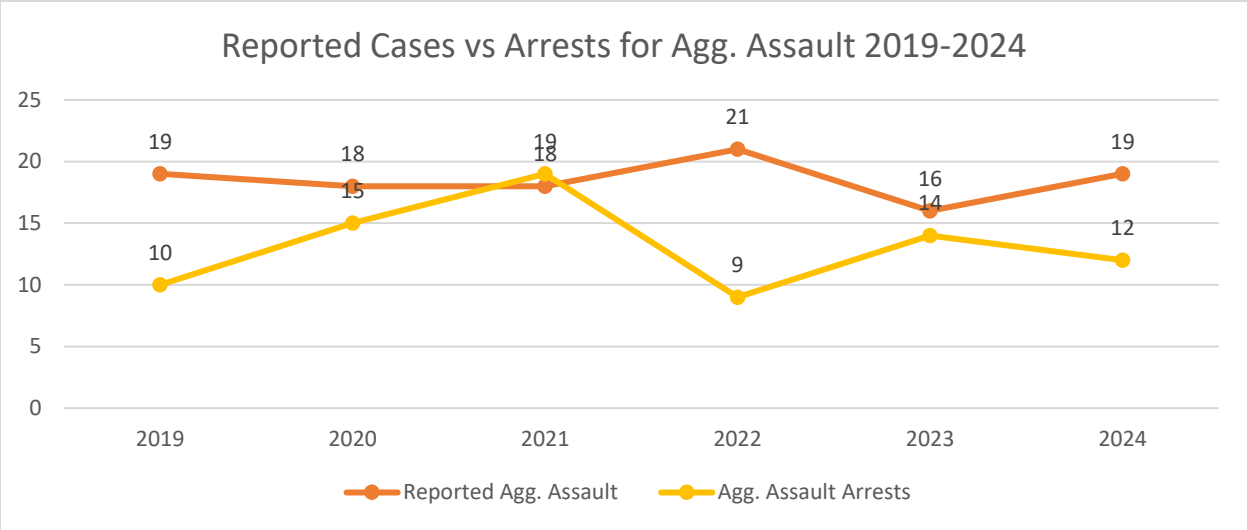

The following chart, however, indicates that a likely cause of this reduction in arrests is a decreased focus on traffic-based misdemeanor arrests. A number of factors account for this. First, in 2020 there was a well-known decrease in travel due to COVID. Around the same time changes to laws relating to arrests for traffic crimes such as driving with a suspended license also changed.

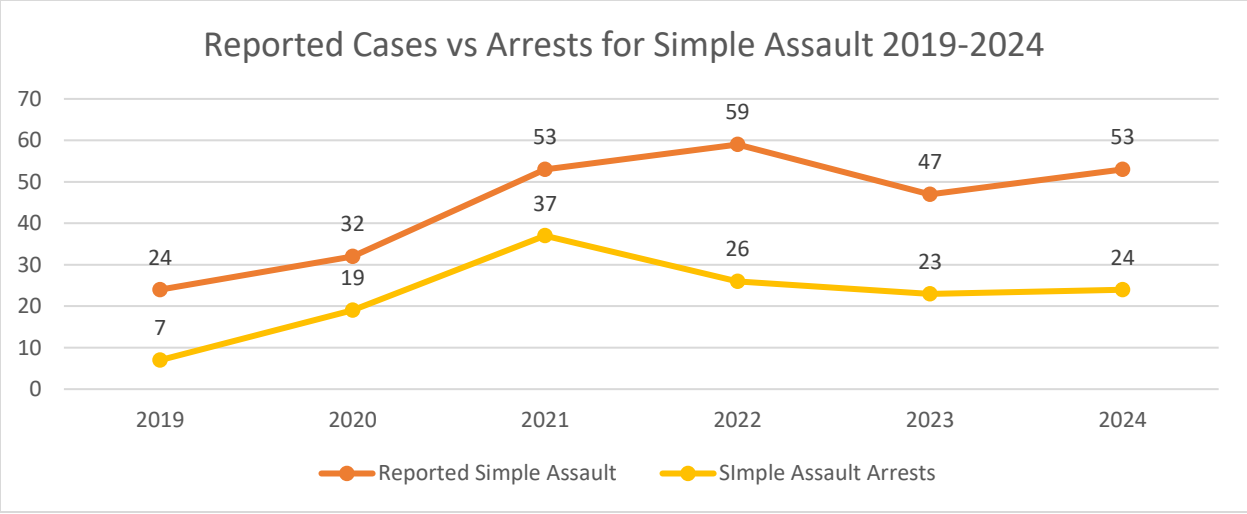

**Data for Specific Offenses**

The next set of charts compare total numbers of specific offenses reported in 2019, 2020, 2021, 2022, 2023, and 2024 to total number of arrests made for those specific offenses during those years. It should be noted that sometimes an arrest for an offense committed in one year cannot be made until another year. For example, there were zero murders in 2024, but there were 3 arrests for murder[1].

Aggravated assaults are defined as assaults involving serious physical injury, the use of a weapon, or multiple perpetrators. In 2024, arrests for aggravated assaults comprised approximately 63% of total aggravated assault cases. It should be noted that it is possible for there to be more arrests than reported crimes because of the ability for multiple perpetrators to commit one aggravated assault.

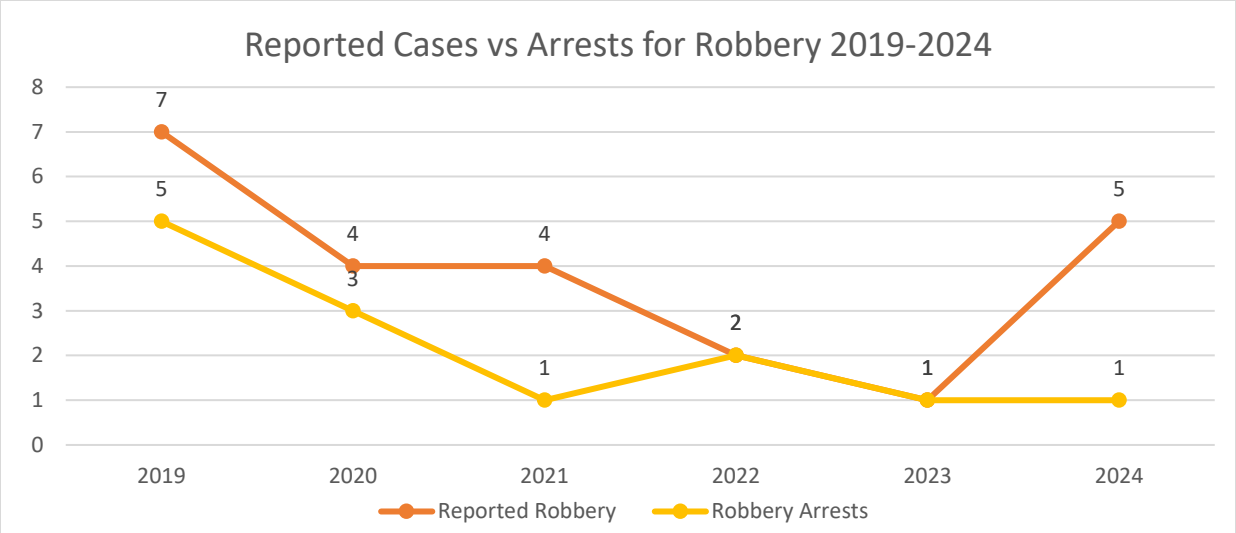

Reported simple assaults remain higher than they were in 2019, though they are still lower than they were in 2022. Arrests for simple assault also rose slightly from 2023 to 2024.

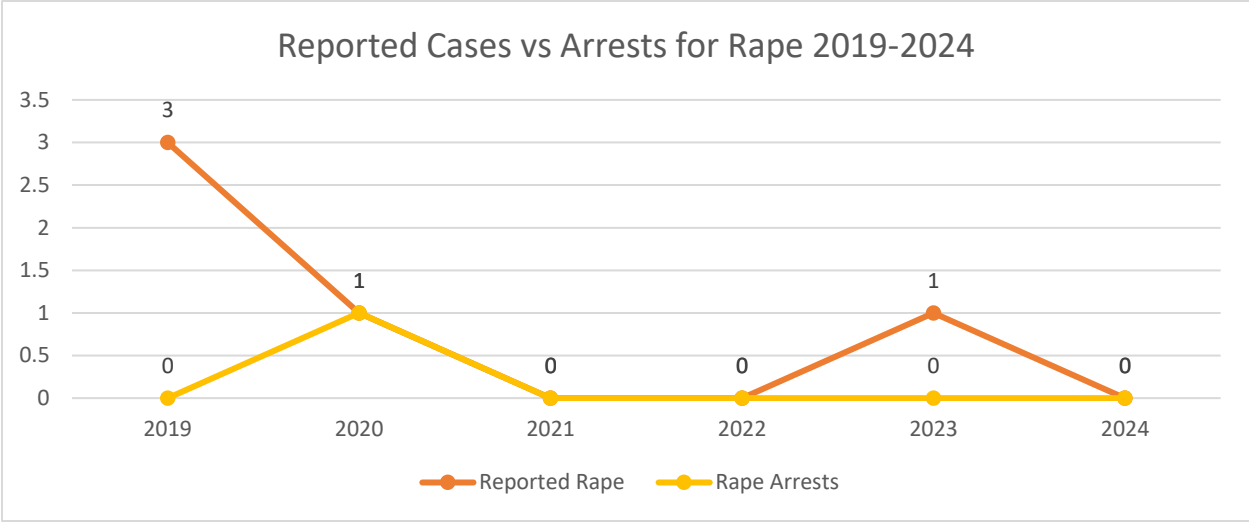

[1] There is no chart for murder due to the fact that it is so uncommon that the great majority of years there are none.

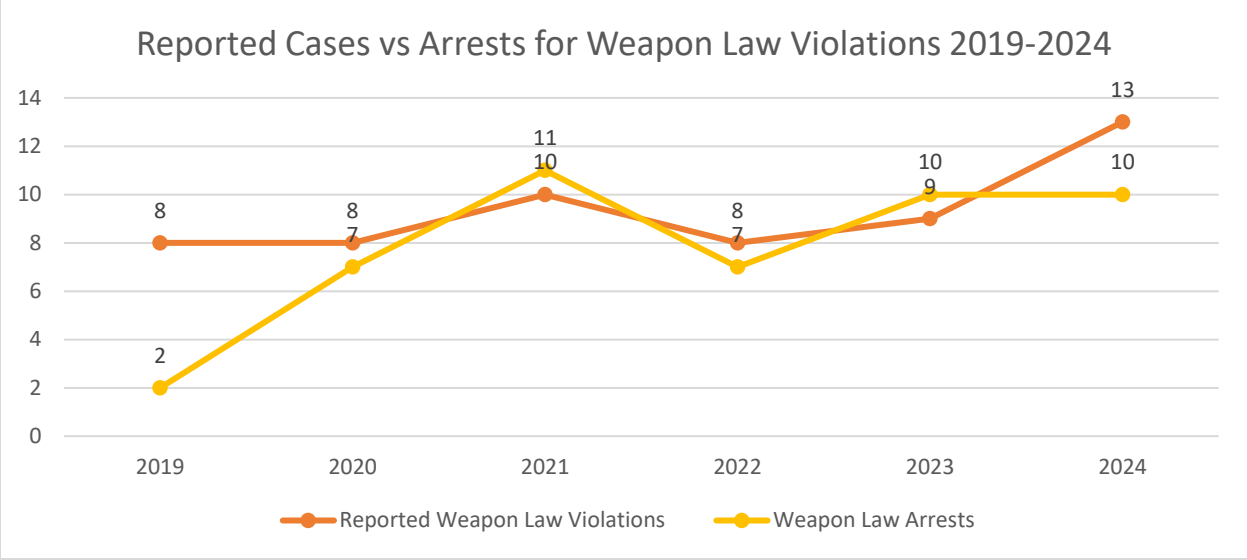

Robbery is very rare in Beacon, and it is difficult to glean much significant information from the numbers presented as just a few cases can cause statistical percentages to vary significantly.

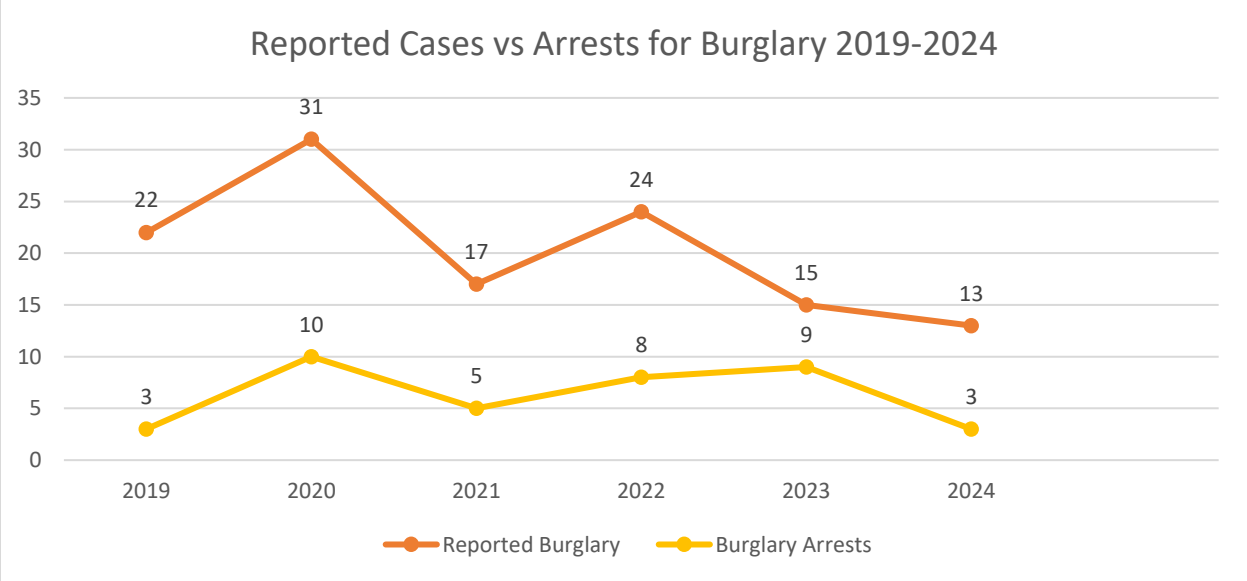

Rape, as defined in the National Incident Based Reporting System, is also a rarity in Beacon with a high of just 3 reported incidents in 2019 and none reported in 2024. It is well known that these cases present significant hurdles to prosecution but with so few cases, it is impossible to draw any particular conclusions from the available data here in Beacon. Additionally, rape has a specific definition and does not represent all sexually related crimes reported.

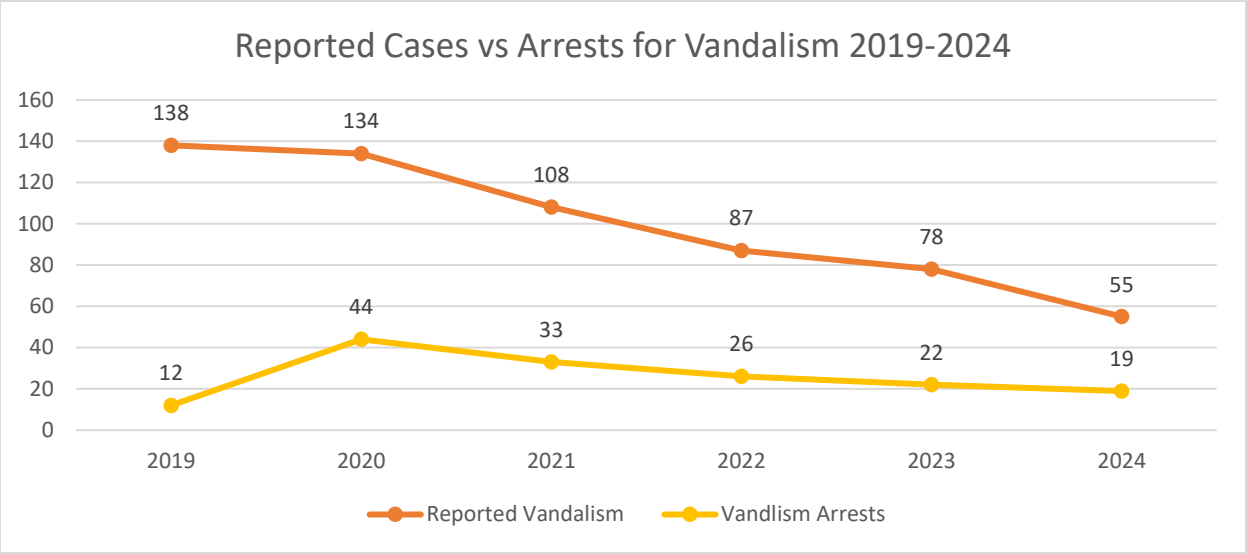

Weapon possession violations are also fairly rare in Beacon, though far more common than robbery or rape. The department's arrest rate is high in these cases. Additionally, as with some other offenses, the law allows more than one individual to be charged with possession of the same weapon so in 2021, there were actually more arrests than incidents. Most weapon possession offenses, like simple assaults, are misdemeanors.

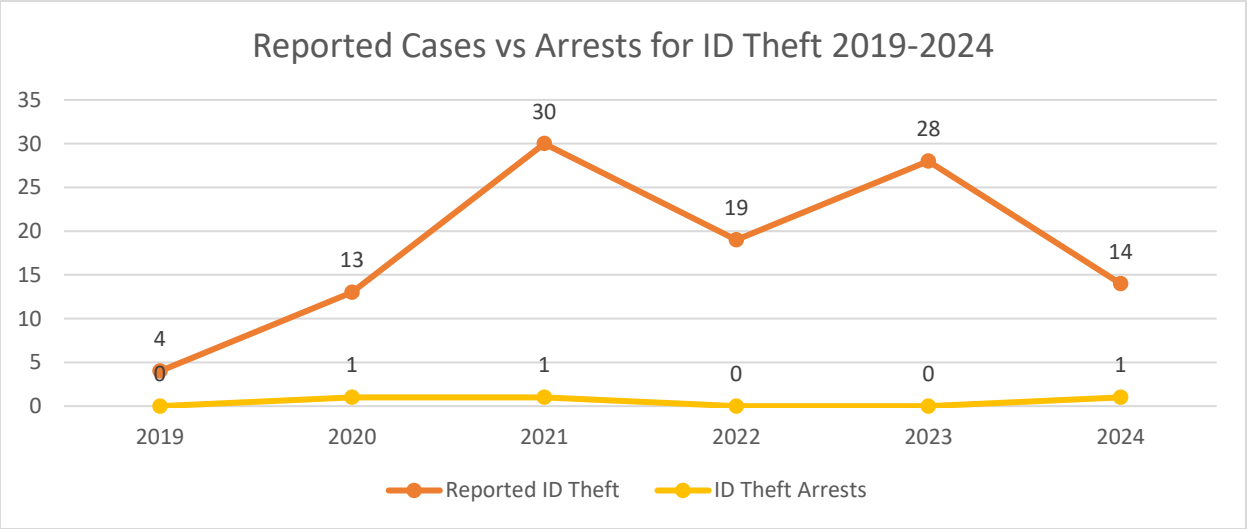

Burglary is the most common, high-level property crime that occurs in Beacon. Though not extremely common in any year, as with last year, there continues to be a notable decline in the number of reported burglaries, with an approximately 41% decrease when comparing 2019 to 2024.

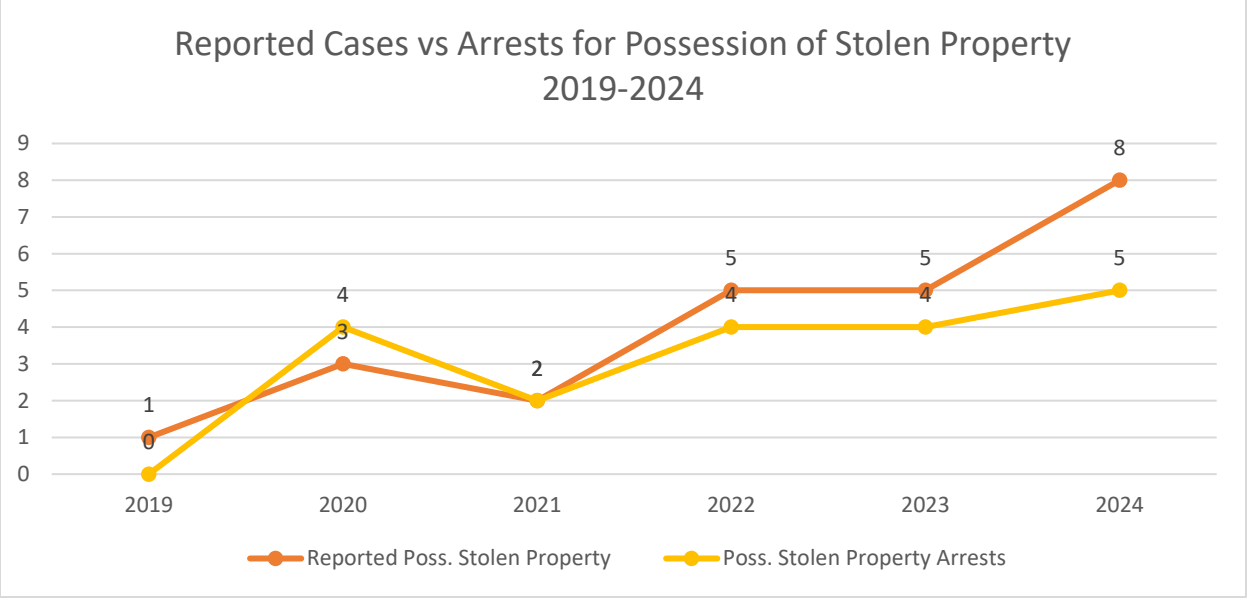

Destruction of property, commonly known as vandalism, is a property crime which can be a felony or a misdemeanor depending on the value of the property destruction. The City has been fortunate to see a tremendous 60% decrease in reported cases from 2019 to 2024. While the number of arrests were down slightly from 2023 to 2024, the number of reported cases was down far more.

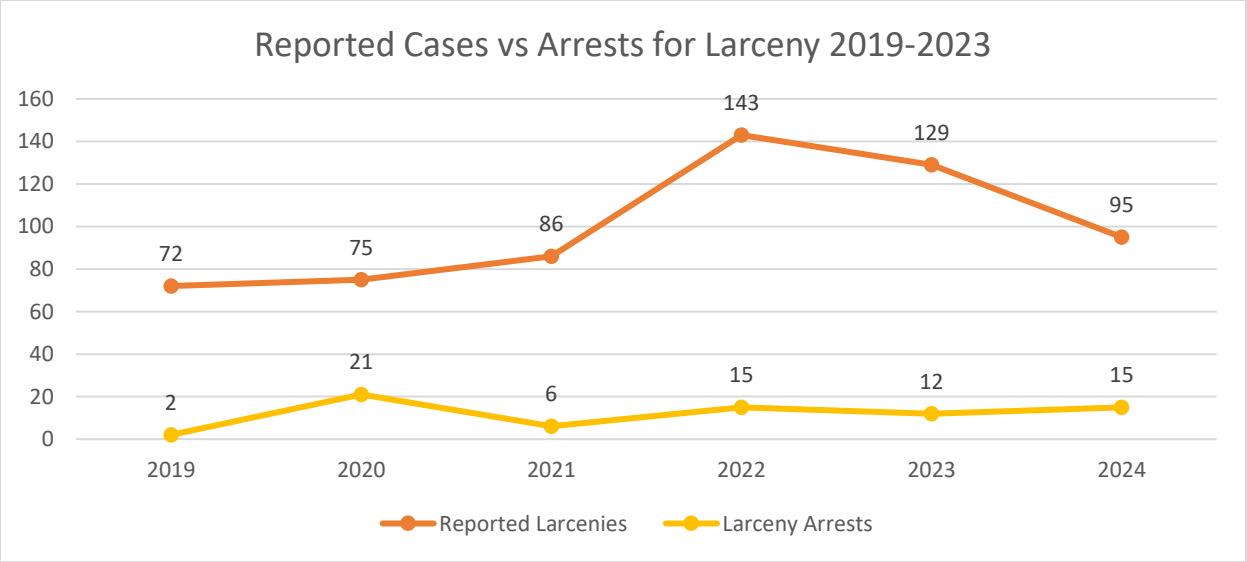

One area every local police department struggles with is identity theft. Identity theft cases are usually technology driven crimes and there has been a large increase in reports since 2019. Additionally, the crime itself is usually merely a misdemeanor and the perpetrator is rarely even in the same state as the victim, sometimes not even in the same country, meaning the resources needed to combat such offenses can rarely be provided. Without significant changes at the state or federal level, this is likely to be a trend that continues. These offenses did, however, decrease by 50% from 2023 to 2024 and the department was also able to make an arrest in one case.

Stolen property is yet another area where there are not many offenses which occur in Beacon, but the arrest rate tracks the offense rate fairly closely year after year.

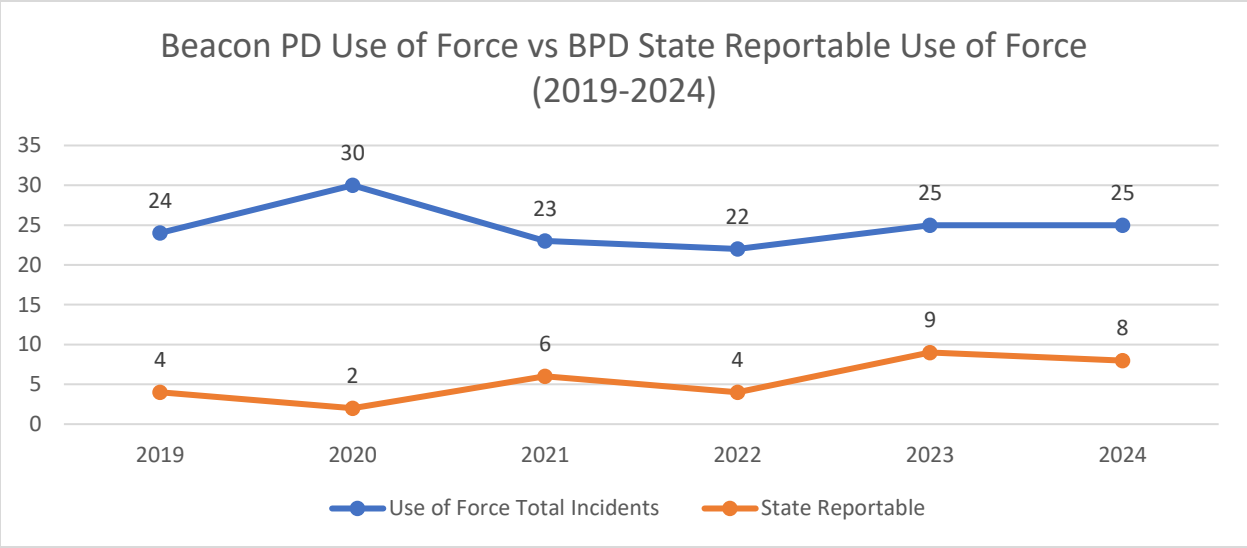

Like simple assaults, larcenies are another offense which has seen significant increase since 2019. 2022 saw a nearly 99% increase in reported larcenies over 2019. Fortunately, in 2023, the upward trend *may* have broken as there was a nearly 10% drop in reported larcenies versus 2022. From 2023 to 2024 we saw another large decrease of approximately 26%, while arrests actually went up from 12 to 15. Still, there is significant work to be done. While anecdotal, it should be noted, however, that it seems to becoming more common for perpetrators to be identified but victims deciding not to pursue charges in larceny cases.

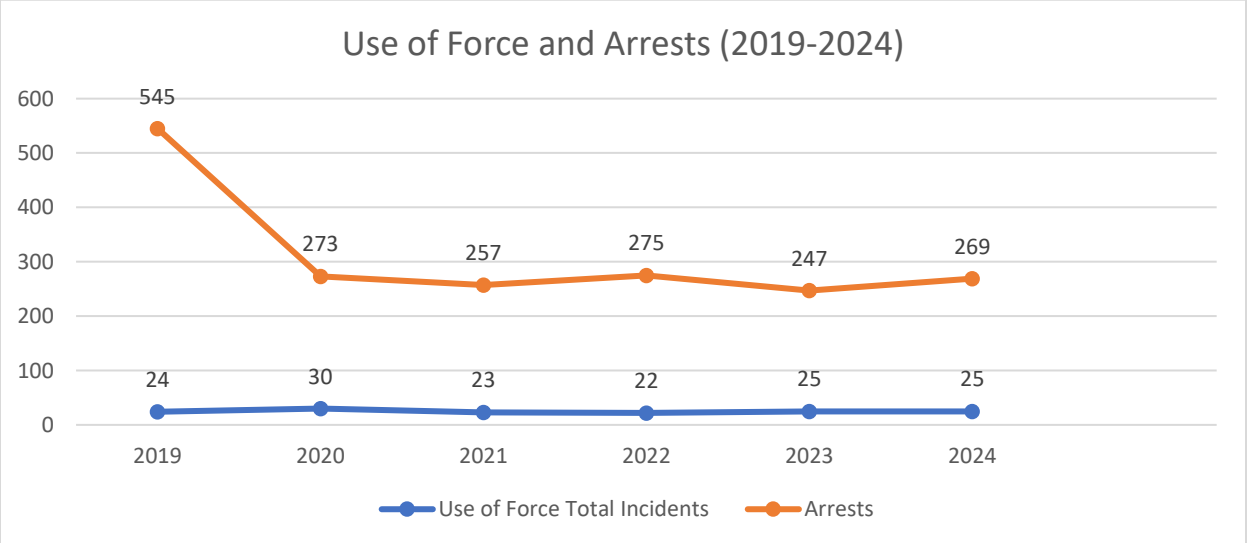

**Use of Force**

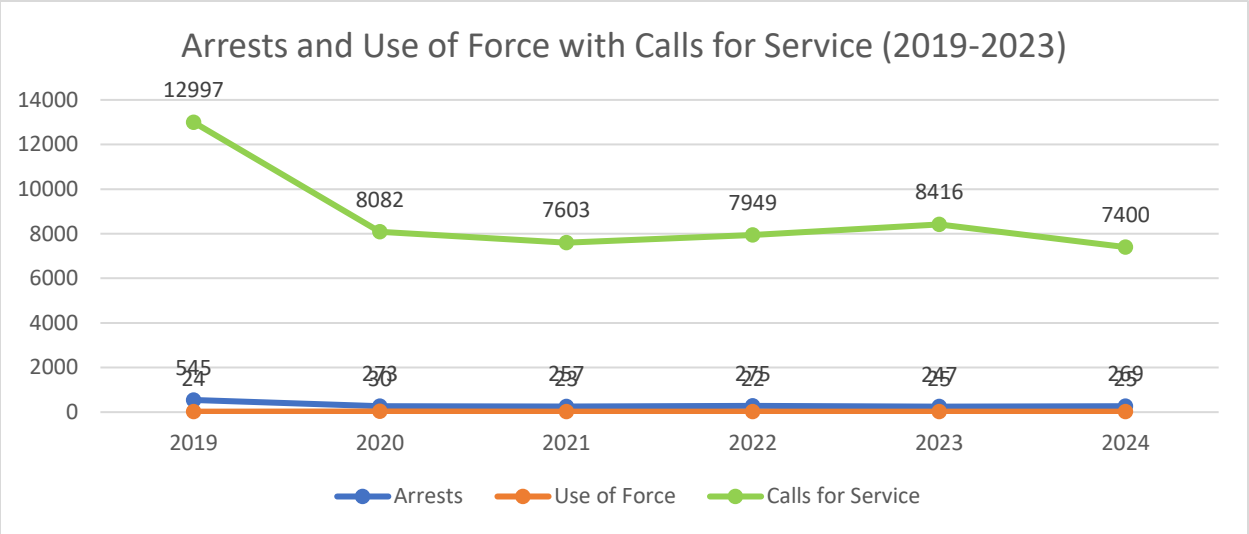

The use of force is an area of significant concern both to the community and to the Beacon Police Department leadership. All use of force cases are thoroughly reviewed both by the on-shift supervisor and by the lieutenant responsible for internal investigations. The department requires more thorough use of force reporting than New York State. The below table compares the number of incidents for which the department required the completion of a use of force report to the number that the state required be reported to the New York State Division of Criminal Justice Services.

Though since 2019 the number of arrests has decreased significantly, the department's use of force has been somewhat steady. This is likely because most of the department's use of force incidents do not stem from officer-initiated arrests (which are down significantly with the recent changes to the law, particularly the vehicle and traffic law), but rather from incidents in which a person was committing a crime and a victim or witness called for help. Though in 2024 use of force incidents made up a higher proportion of arrests than in 2019, they still only represented less than 10% of arrests. Additionally, state reportable uses of force made up less than 3% of arrests.

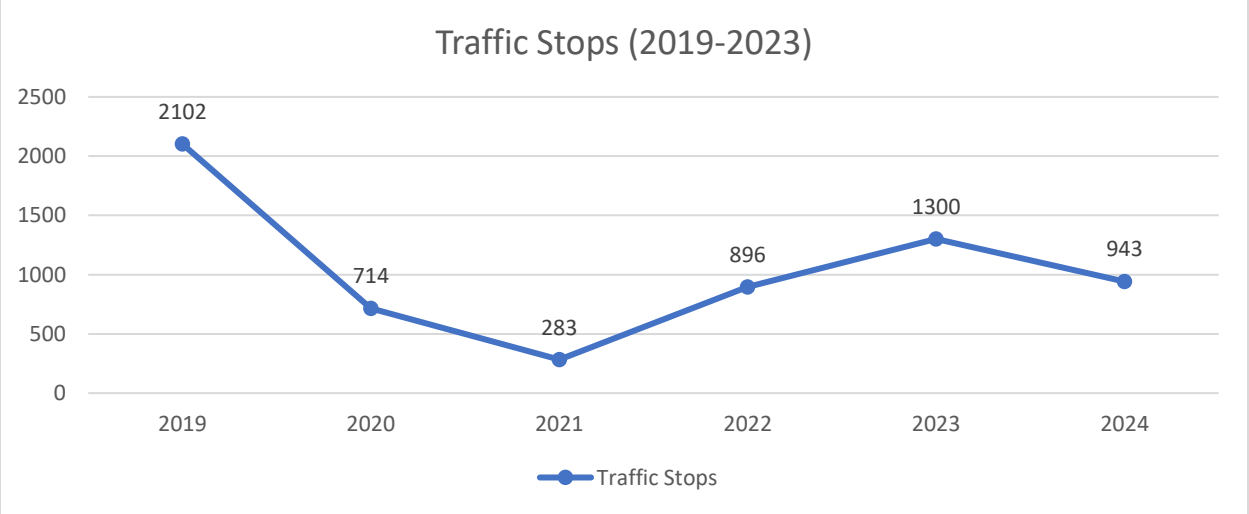

Moreover, in 2024 arrests only represented approximately 4% of calls for service and uses of force only represented 0.33% of calls for service.

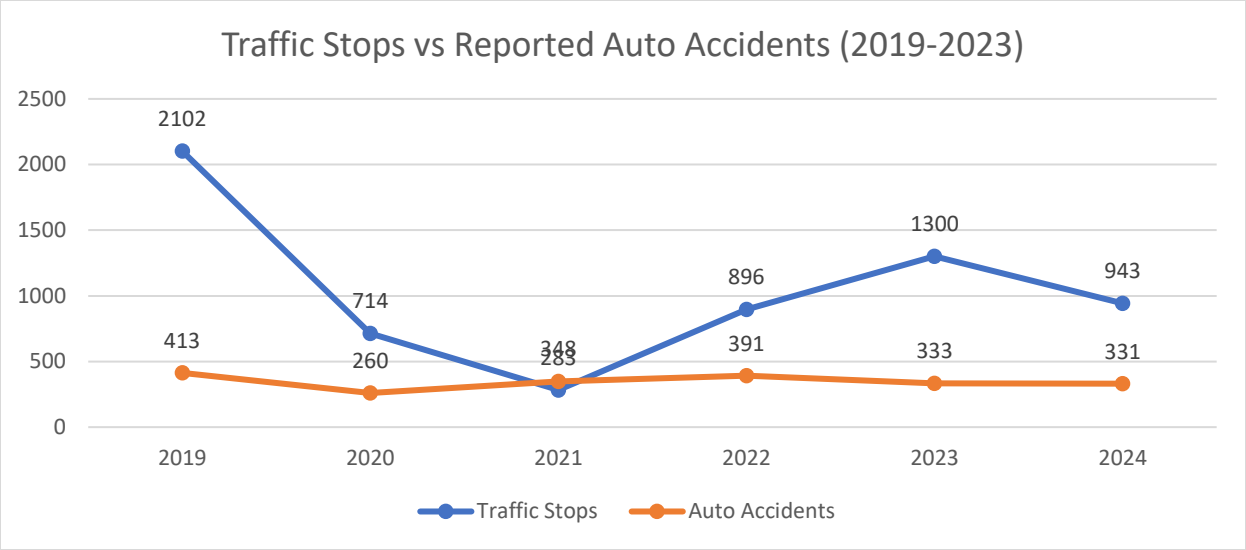

**Traffic Enforcement**

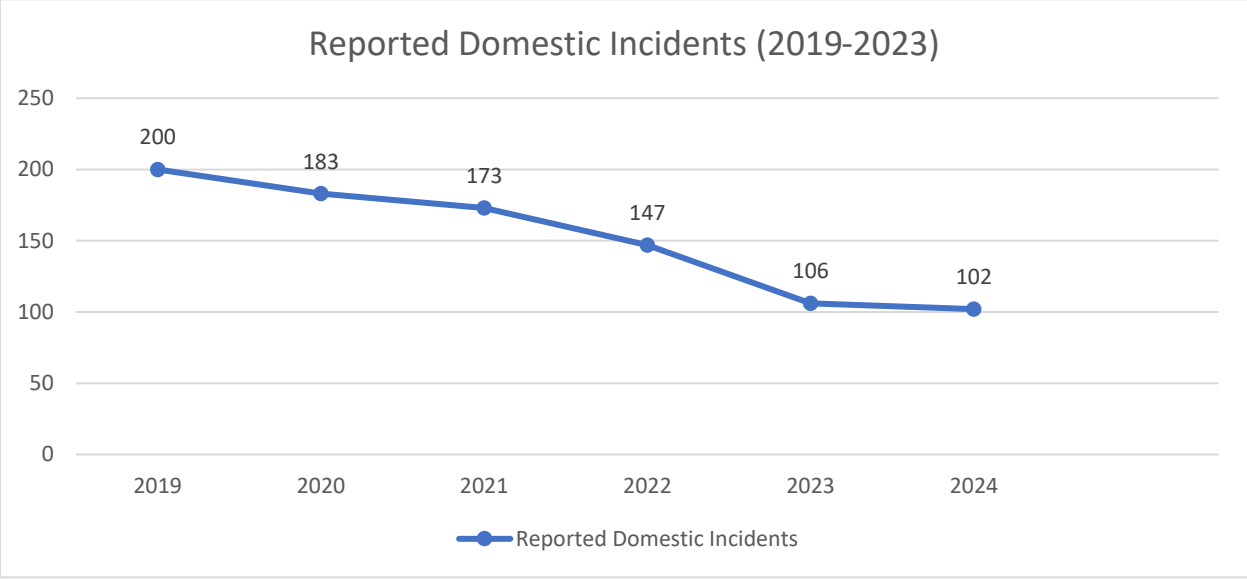

As noted above, a significant area of community concern in Beacon is traffic enforcement. It represents, by far, the most requests for increased enforcement that the department receives from the community. As has been noted earlier, there was a substantial decrease in traffic stops after 2019. In 2020, due to COVID, most police departments temporarily ordered officers to stop performing all but the most necessary stops in order to promote social distancing. Additionally, we cannot deny that nationwide protests demanding significant changes to policing, and specifically the 19 that occurred here in Beacon, led to officers being much less likely to engage in proactive, discretionary policing. However, the department still works hard to be responsive to community complaints and that has led to greatly increased enforcement from 2021's low to 2024. As was also stated above, we are targeting another increase in 2025.

One area of traffic enforcement that we are working on addressing however, is that while the increase in traffic enforcement in 2022 and 2023 may have resulted in a 14% decrease in reported auto accidents from 2022 to 2023, previously much higher traffic stop numbers did not seem to have much of impact on auto accident numbers. Last year we noted the desire for greater traffic accident analysis going forward. To be frank, 2024's personnel upheaval made that impossible to accomplish but recently we gained access to NYSDOT data that may be able to assist in that effort.

On a final, positive note, the Beacon Police Department takes domestic abuse seriously. We work closely with Family Services and, as described above, have a domestic violence victim's advocate cohoused within the police department. The city has been fortunate to see a steady, year after year decline in the number of reported domestic incidents. In fact, since 2019 there has been a 49% decrease in domestic incident calls.

In addition to the large initiatives outlined above, for 2025 the Beacon Police Department will continue in its mission to serve the people of this community though our successful programs of community engagement and realistic, focused training. We will seek to improve the output and precision of our traffic enforcement measures and we will work closely with community members and the Dutchess County District Attorney's Office to successfully respond to criminal activity and build cases which lead to, where appropriate, successful interventions or prosecutions of the perpetrators of those crimes.

# CITY OF BEACON
# POLICE DEPARTMENT

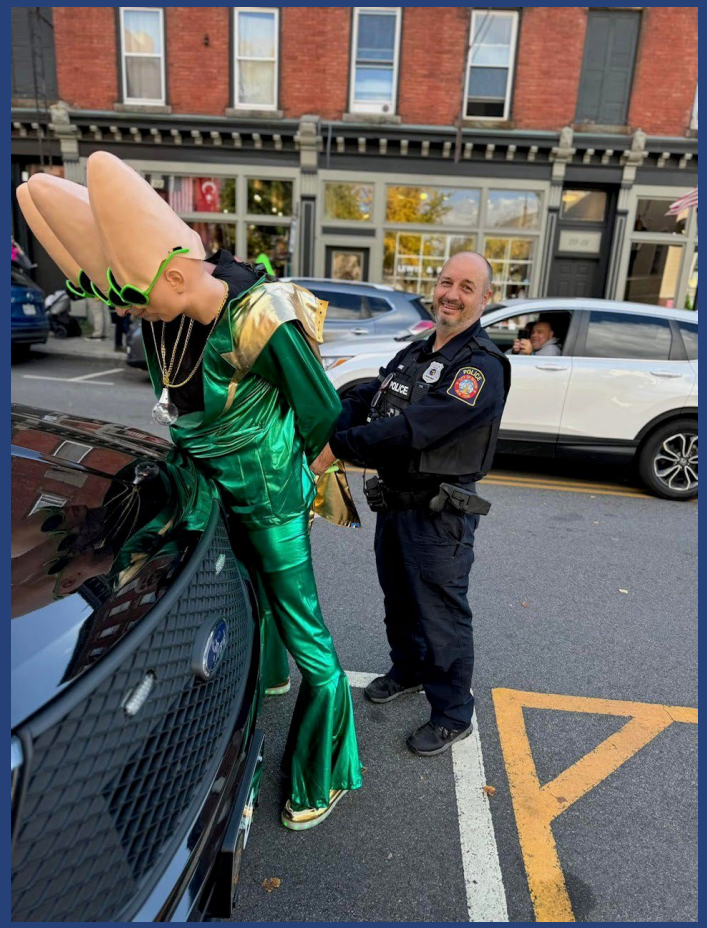

## 2024 ANNUAL REPORT

# Beacon Police 2024 Annual Report

- The City of Beacon Police Department remains committed to transparency in its operations and accountability to the community that we serve.
- As part of this commitment, we recognize the need to inform the public about Departmental activity, crime in the City, and our efforts to address such within the context of our capabilities.

# Community Participation

- Creating opportunities for our staff to interact with the public outside of strict enforcement is critical to the Department's efforts towards fostering trust between officers and the community.
- In 2024, we participated in 31 community events, either through providing dedicated police services, traffic control, or simply being present for community relations. We also relaunched our Main St. Bike Patrol.

# Staffing

- BPD is budgeted for 36 sworn members and 6 civilian staff.
- We also contract with a full time Behavioral Health Specialist and house a part-time Domestic Violence Victim's Advocate.
- We experienced unprecedented staff movement and understaffing in 2024.

- We also took significant efforts to improve recruiting/retention and streamline hiring.
- In 2025, the current PBA Contract will expire and more work to bolster staffing will need to be done.

# Notable Police Incidents

- In 2024, Department members continued to work hard to address and resolve a number of significant incidents and crimes.
- Some notable highlights include:
  - The arrest of a man who was actively vandalizing businesses on Main Street.
  - Locating a 15-year-old with a loaded handgun.
  - The Arrest of a suspect who seriously assaulted a homeless victim.
  - Making an arrest in a hate crimes assault.
  - Making two active arson arrests.
  - Resolving a suicidal female holding a knife to her throat.
  - Making multiple arrests related to a 2022 murder.

# Dutchess County Drug Task Force

- The Beacon Police Department assigns a detective to the Dutchess County District Attorney's Drug Task Force.
- The mission of the Task Force is to apprehend dangerous drug dealers throughout Dutchess County, with a focus on reducing violent crime and overdose deaths.
- Several dangerous drug dealers who either sold drugs, or who resided in Beacon were arrested in 2024.
- The most significant of which was a fentanyl dealer with a previous conviction for possession of an explosive. The individual was arrested and found to be in possession of A-Felony weight drugs and an illegal handgun.

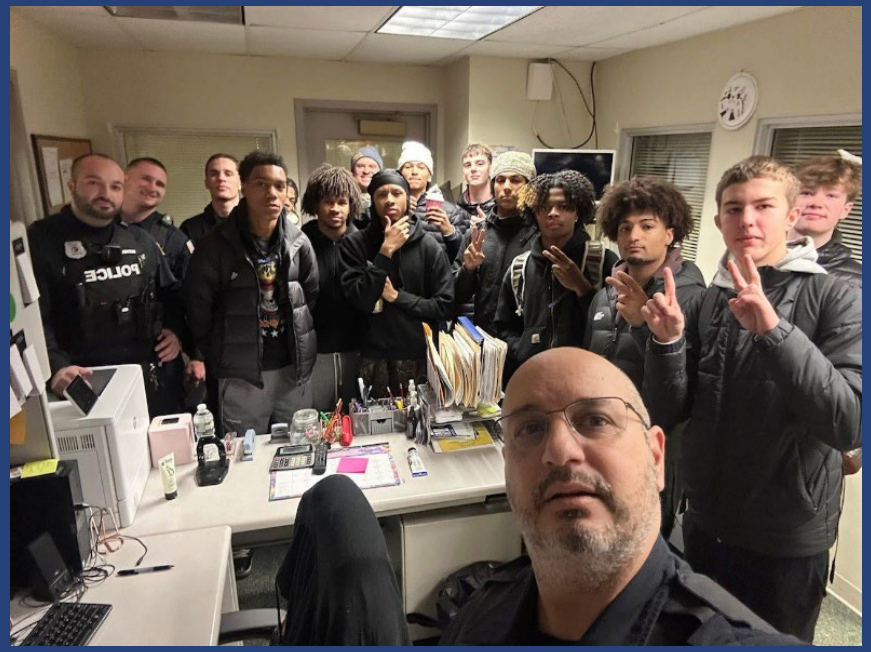

# Mental Health America Behavioral Specialist

- In 2024, the MHA Behavioral Specialist co-responded to 184 calls for service and completed 130 follow ups.
- 114 individuals were linked with post-police call services, including mental health treatment, treatment providers, case management, crisis shelters, and substance abuse treatment.

# Training

- The Beacon Police Department prides itself in exceeding New York State requirements for training by a significant margin.
- Staff completed all mandated in-service training, as well as numerous additional courses to enhance their skills.
- In 2025, the Department will need to maintain its pace of training in order to account for individuals serving in new roles and anticipated new hires.

# Parking Enforcement Equipment Initiative

- BPD utilizes a vendor to provide electronic ticket writers and manage back-end services.
- In 2019, our previous vendor was absorbed and services and quality of the equipment declined drastically, leading to a significant decline in parking ticket issuance.
- In 2024, we transitioned to a new company which offers better equipment. Since that time, parking ticket issuances have improved.

# Future Initiatives

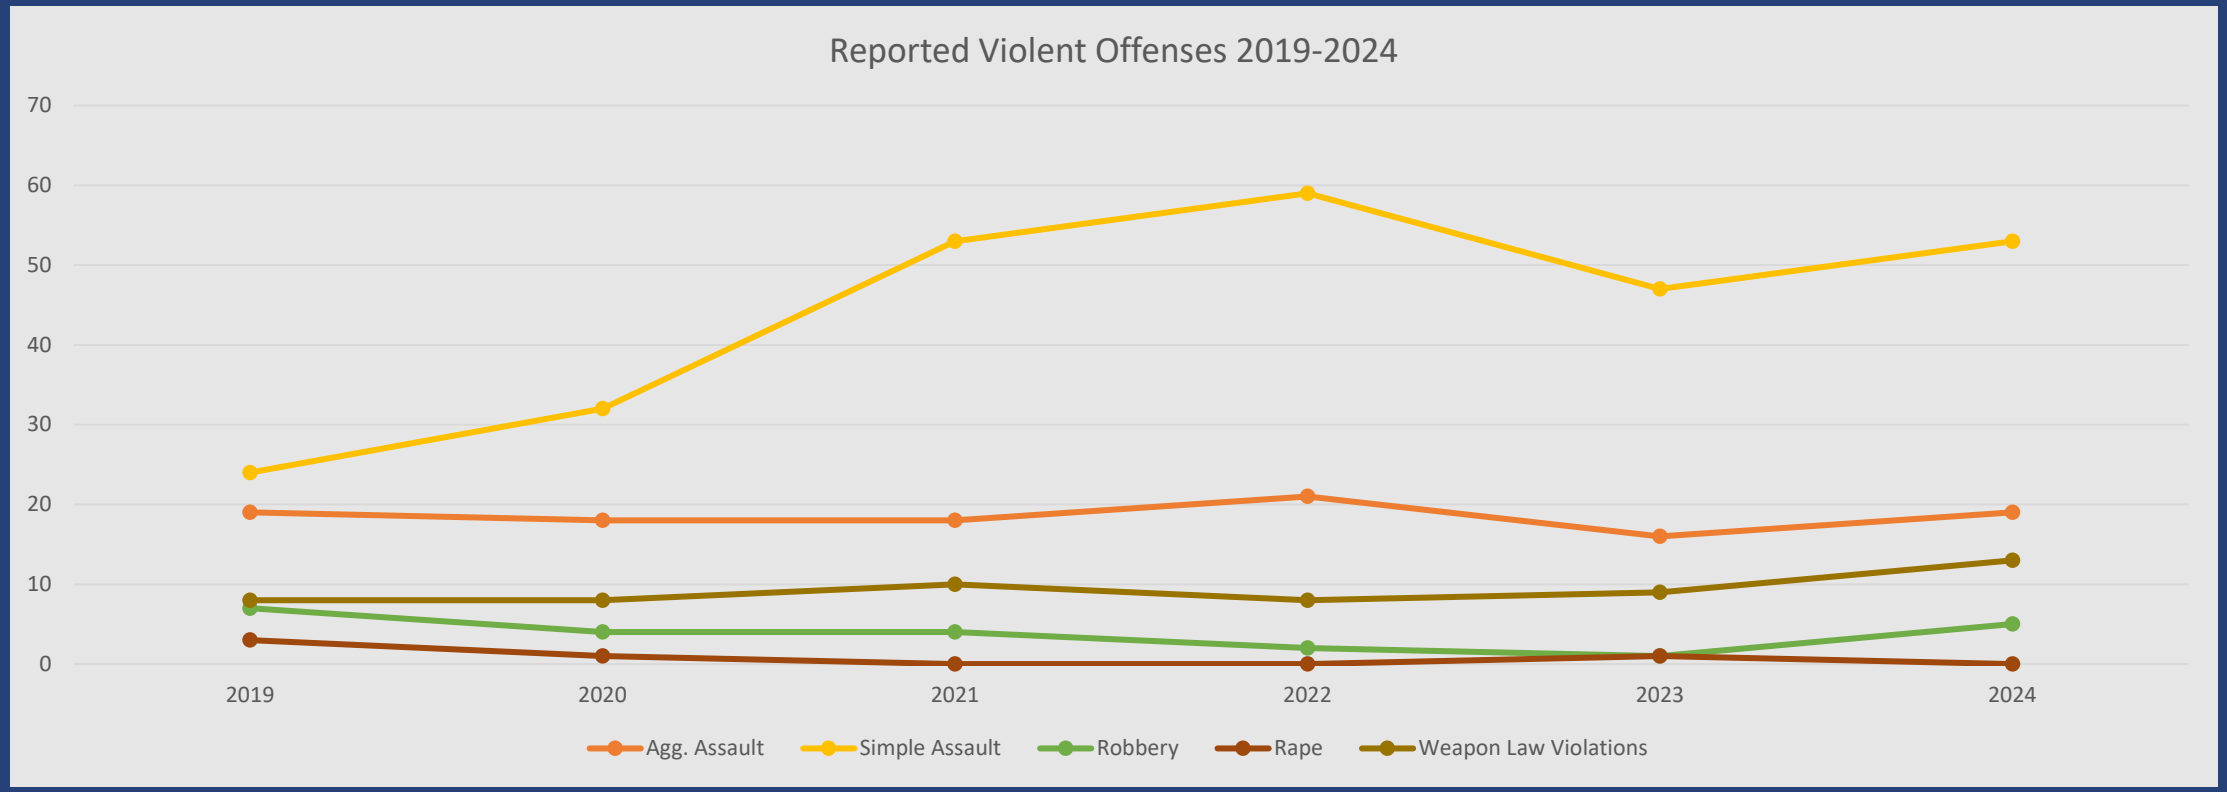

- New Axon Body Worn Cameras and Electronic Control Weapons are being deployed.
- Three new hybrid patrol vehicles have been obtained and are being upfitted for service.
- Complete renovation of the locker room and gym is underway.

# Yearly Activity and Crime Statistics

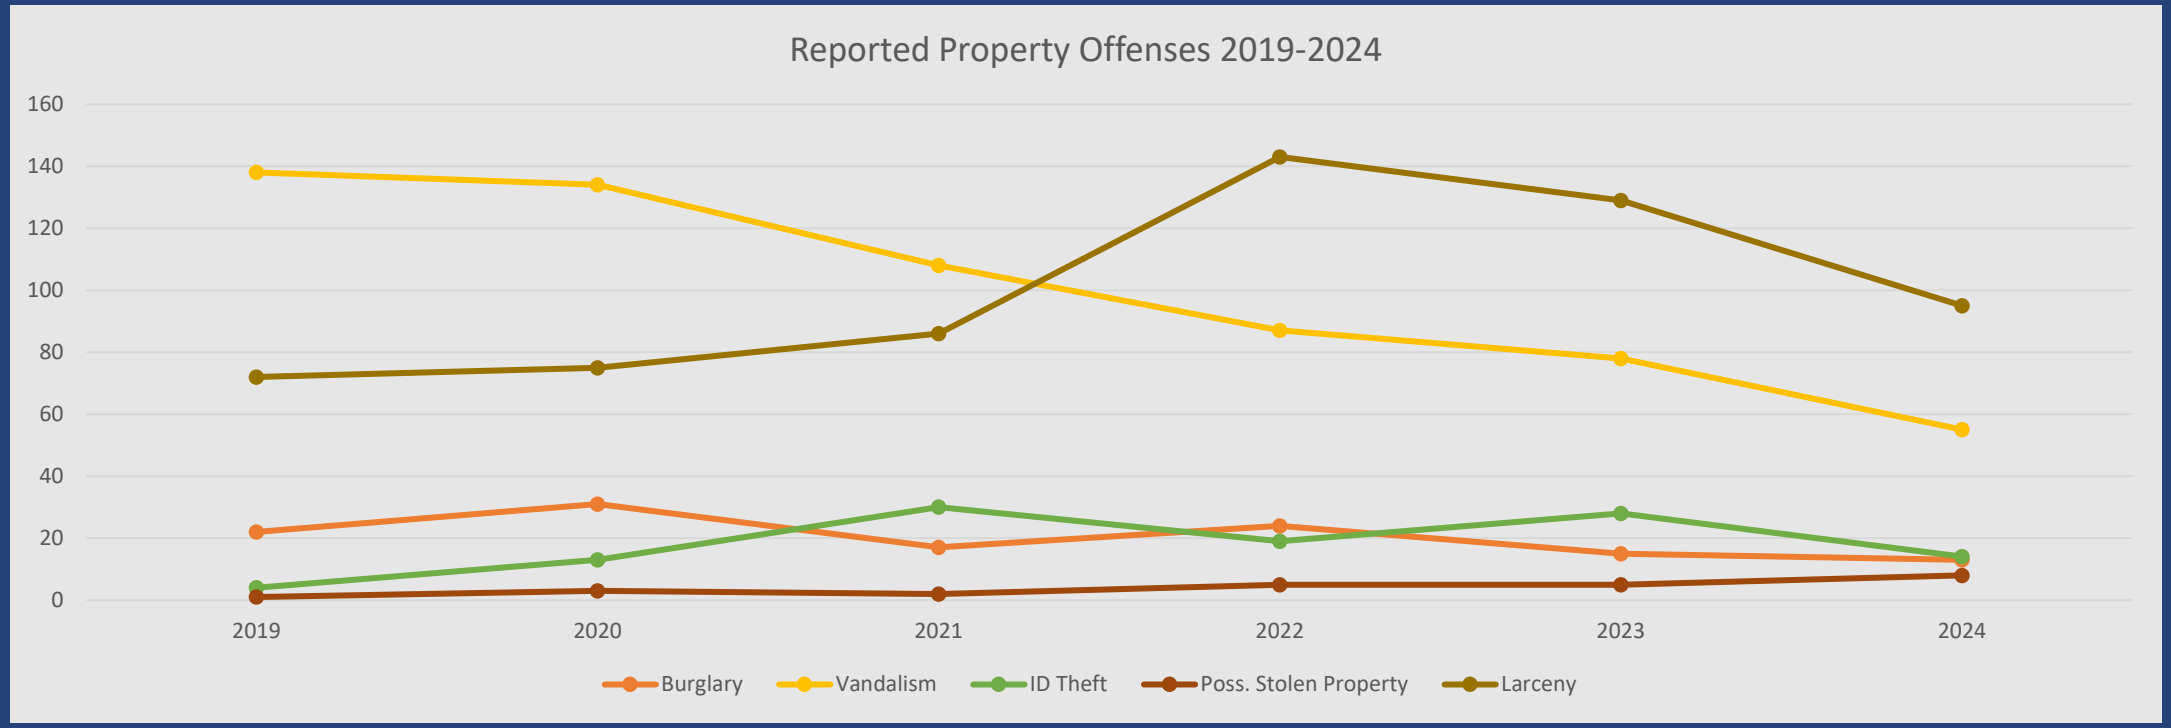

| Activity | 2024 | 2023 | Change % |
|---|---|---|---|
| Calls for Service | 7,400 | 8,416 | – 12% |
| • Alarms | 433 | 508 | – 15% |
| • Domestic Incident | 102 | 106 | – 4% |
| • Mental Health | 97 | 89 | + 9% |
| Traffic Stops | 943 | 1,300 | – 27% |
| Auto Accidents | 331 | 335 | – 1% |
| Case Reports | 888 | 987 | – 10% |
| Arrests Made | 269 | 247 | + 9% |

# Reported Violent Offenses – 2019-2024

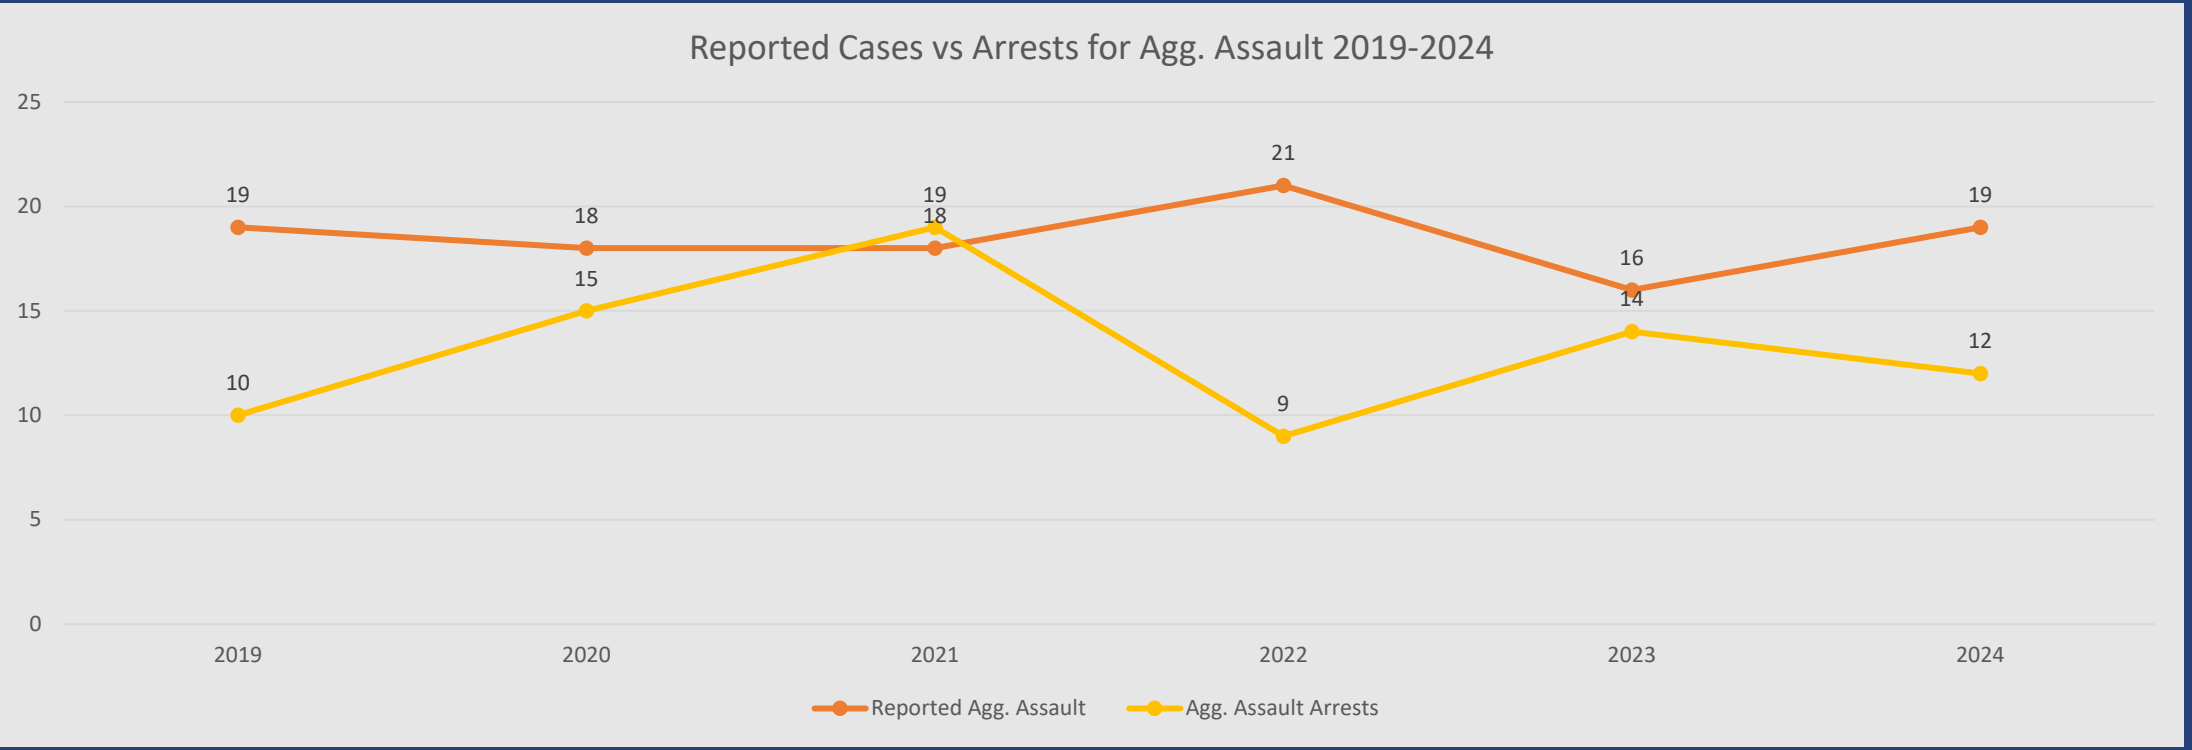

- Most reported violent offenses rose slightly in 2024 from 2023.
- Most categories have been fairly steady over time, with the exception of simple assault, which started rising in 2020 and remains higher than previous levels.

# Reported Property Offenses

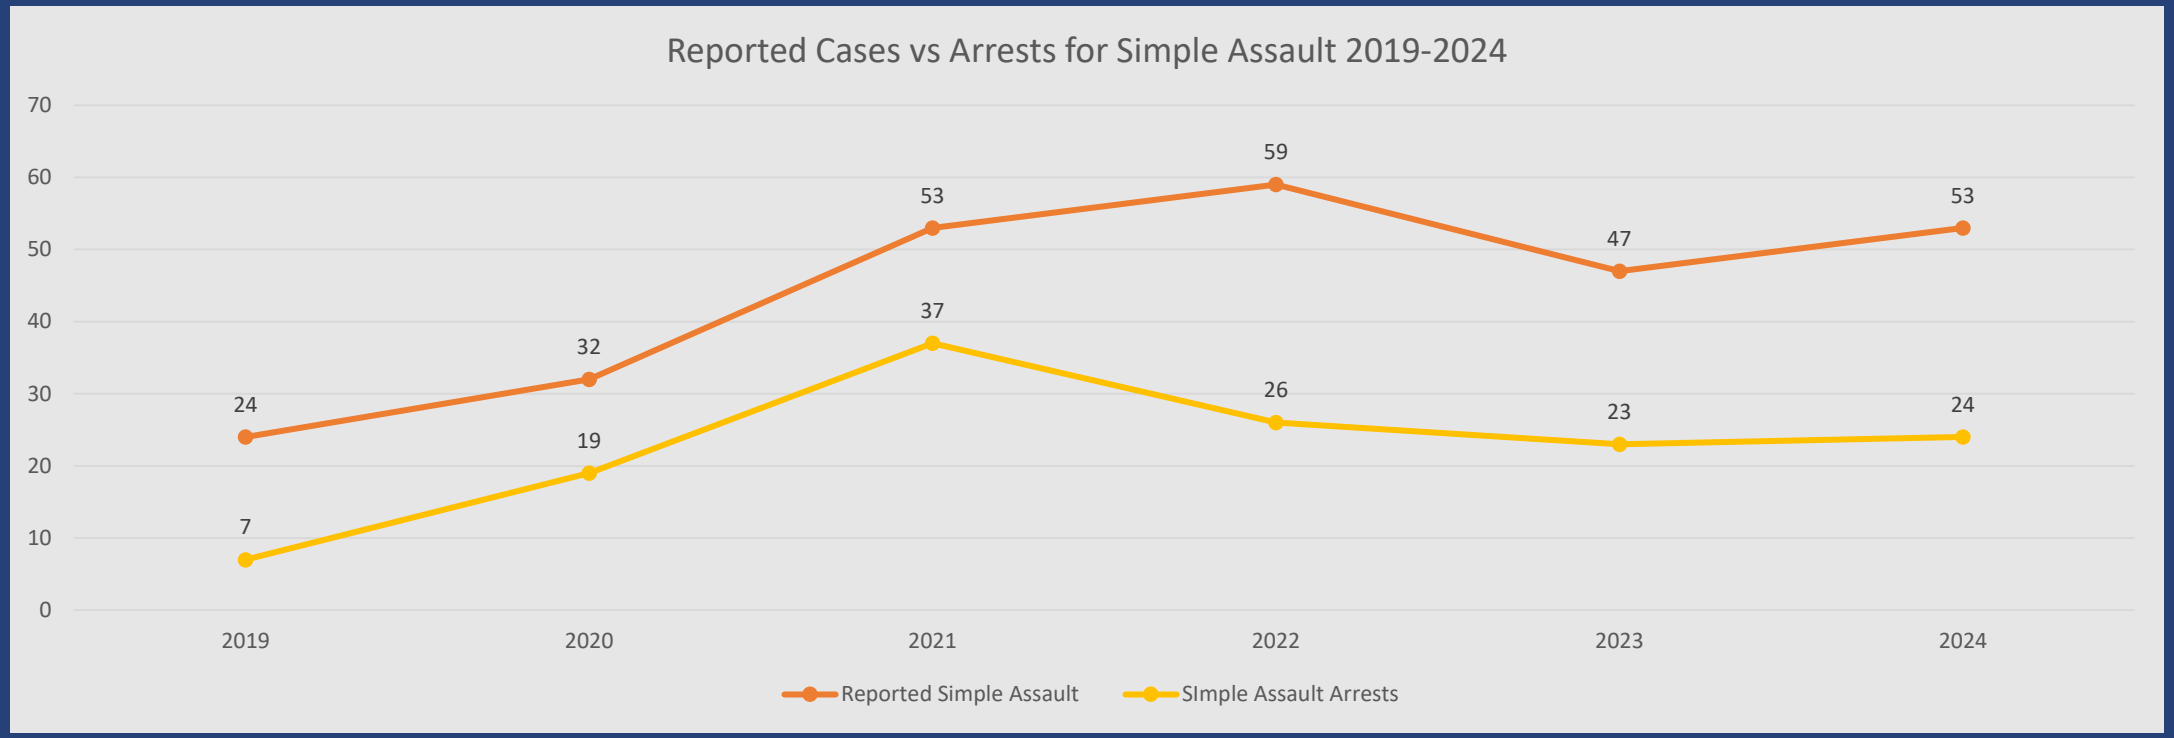

- Most reported property offenses have remained steady over time, with the exceptions of vandalism and larceny.
- We have observed continued, steady decrease in vandalism
- Larceny rose from 2021 to 2022, followed by a significant decline since.

# Aggravated Assault Cases/Arrests

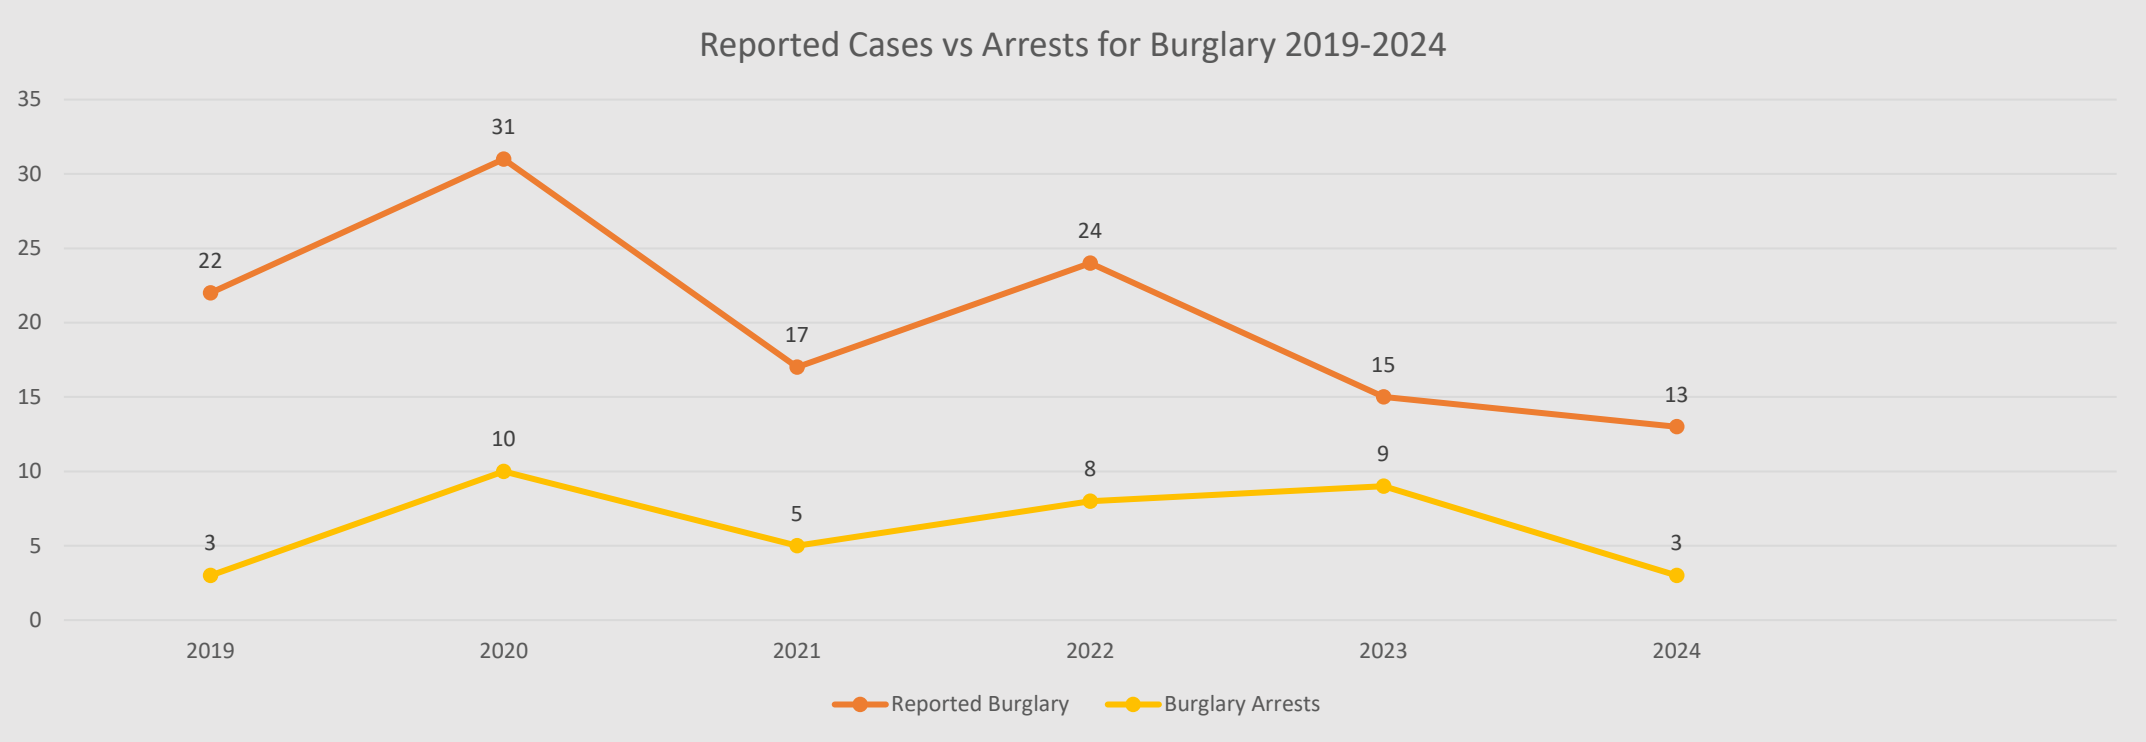

- In 2024, arrests accounted for 63% of total Aggravated Assault Cases.
- Note: multiple suspects can be arrested for the same aggravated assault and arrests for a case in one year may occur in a subsequent year.

# Simple Assault Cases/Arrests

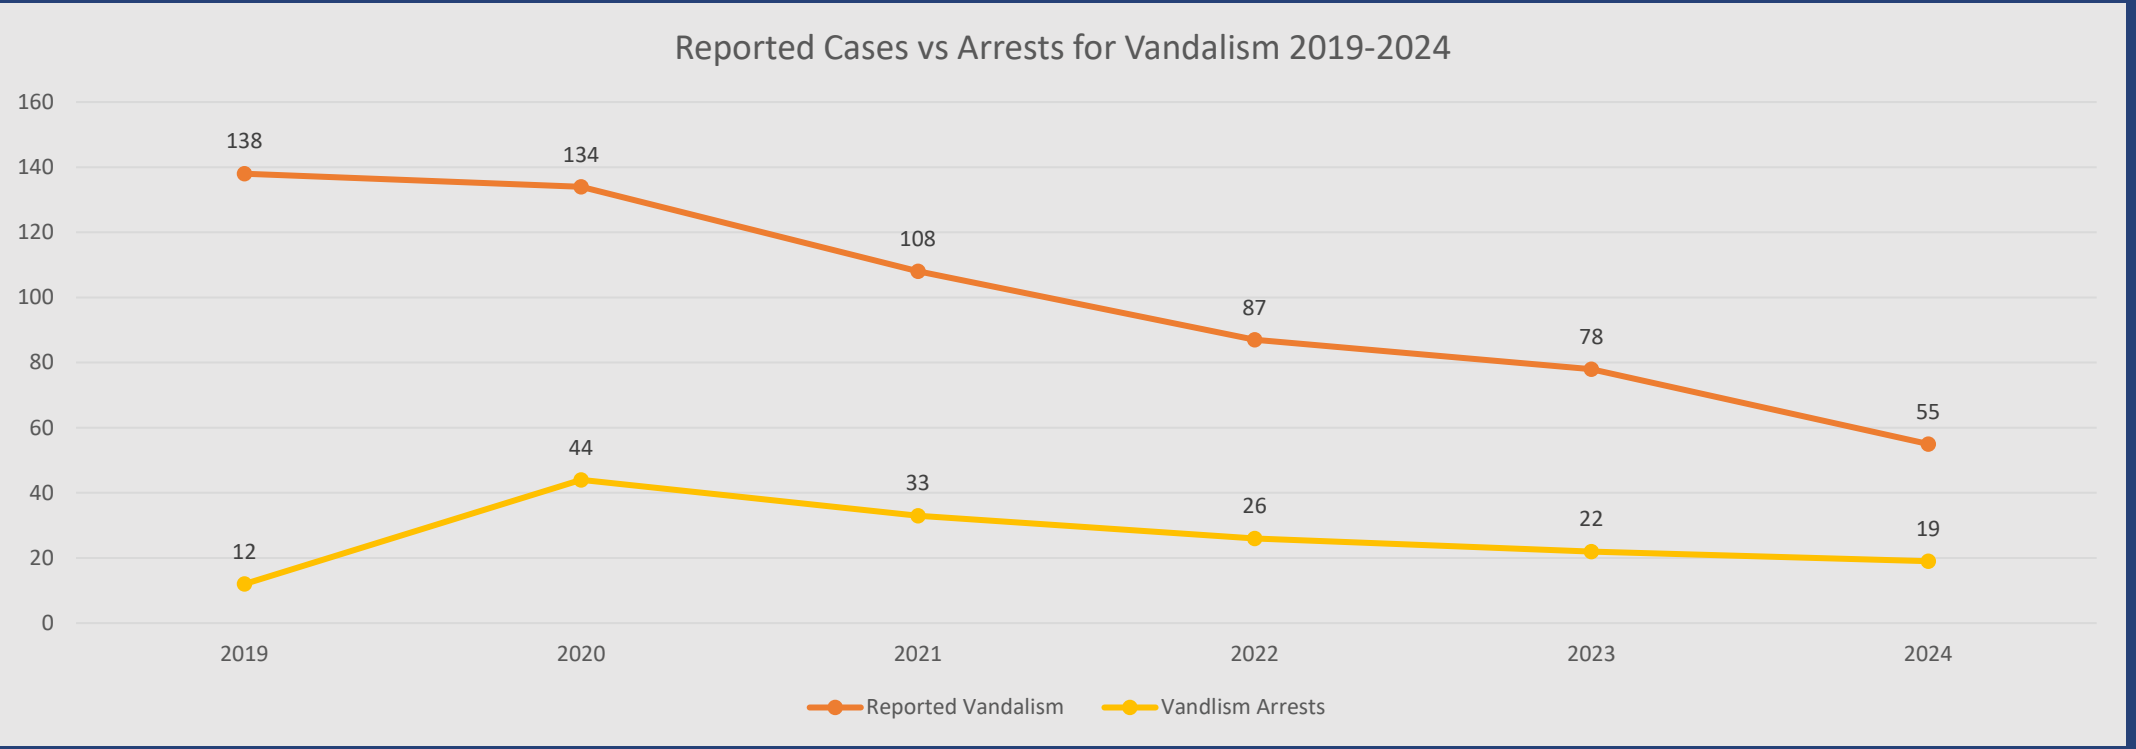

- Reported simple assaults remain higher than 2019 levels, but remain lower than levels in 2022.
- Arrests for simple assault also rose slightly from 2023 to 2024.
- Statistics for violent offenses (Robbery, Rape and Weapons Law Violations) are included in the report, but trend in the single digits.

# Burglary Cases/Arrests

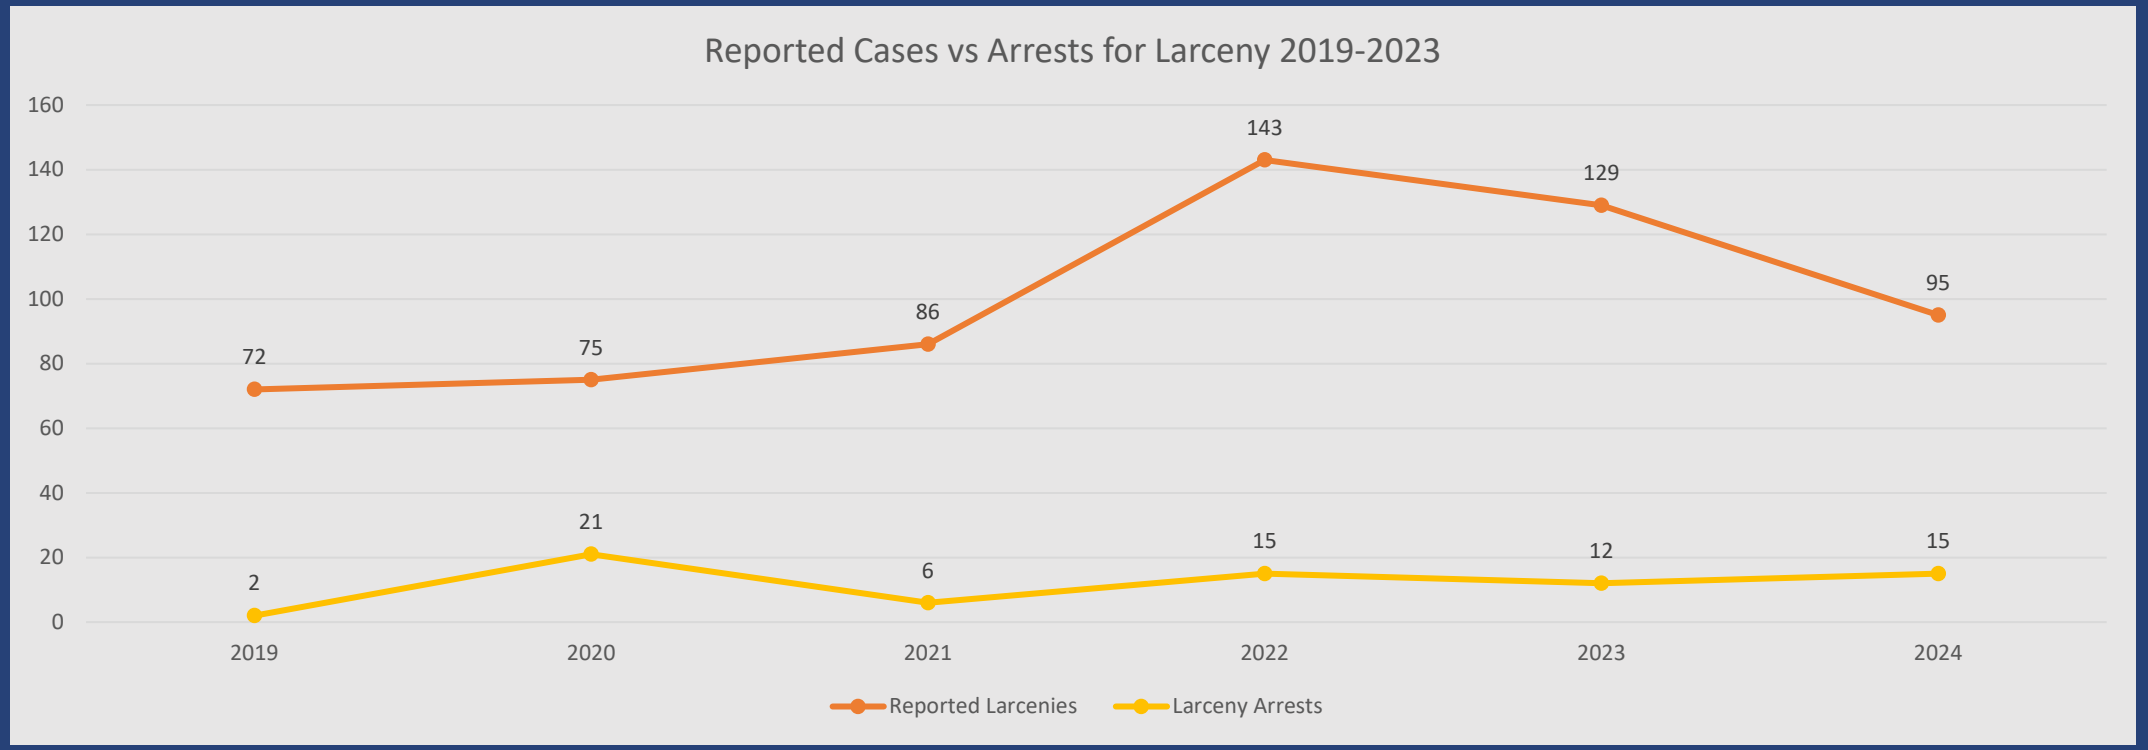

- Burglary is the most common, high-level property crime that occurs in Beacon.
- There continues to be a notable decline in the number of reported burglaries, with an approximate 41% decrease when comparing 2019 to 2024.

# Vandalism Cases/Arrests

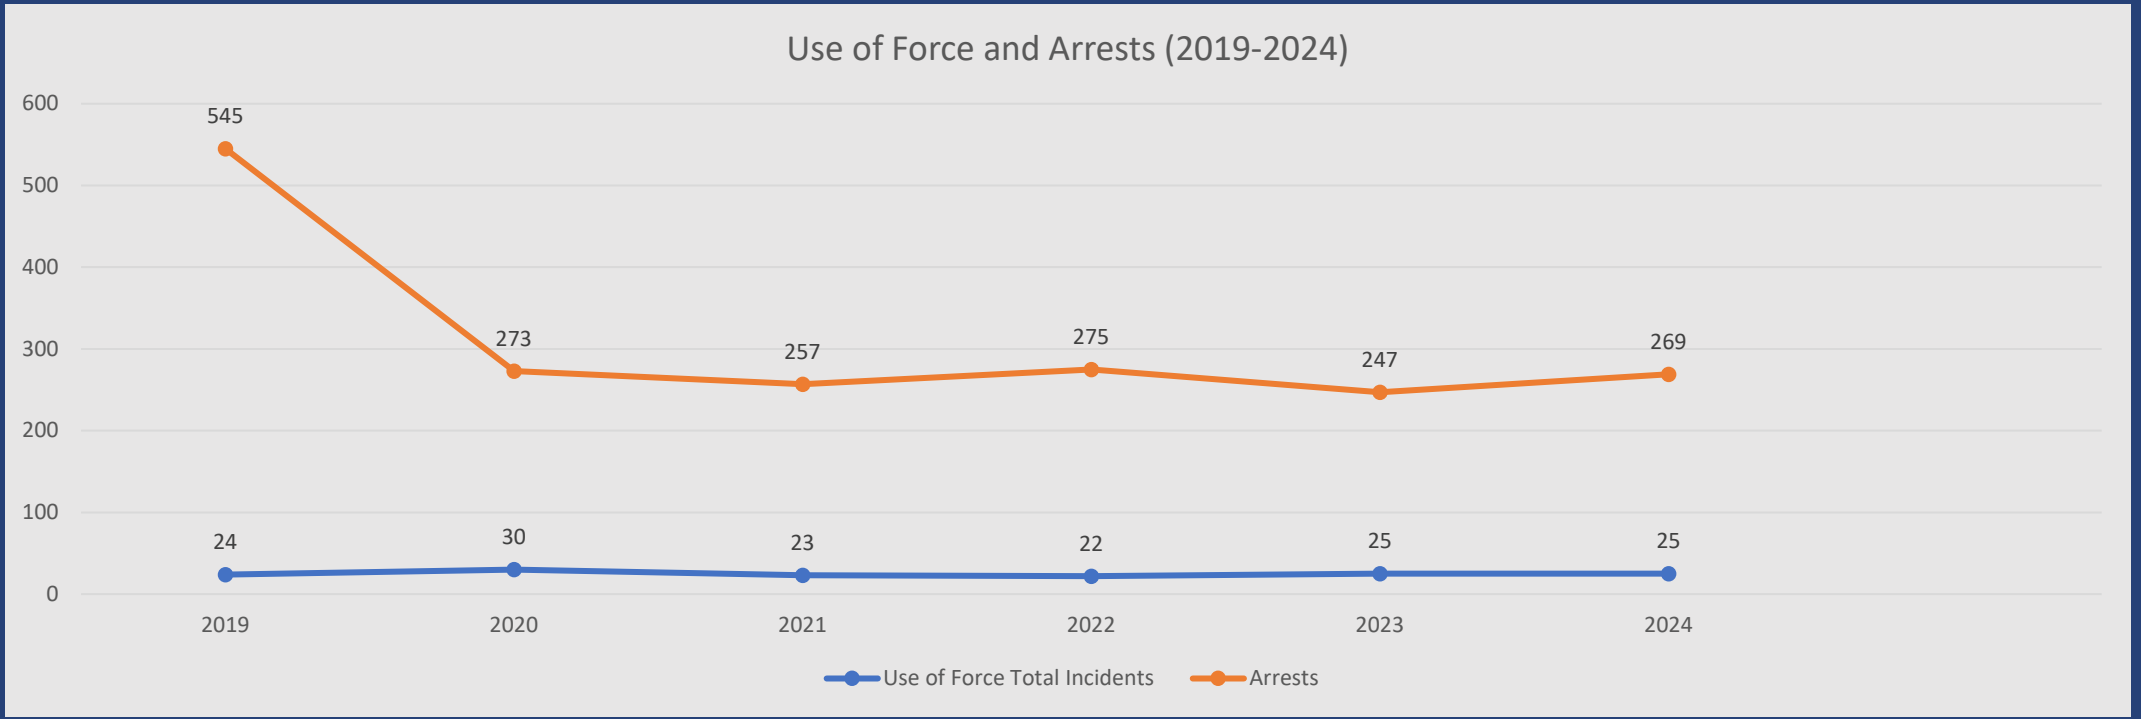

- Destruction of property (vandalism), is a property crime which can be a felony or a misdemeanor, based upon value.
- There has been a 60% decrease in reported cases from 2019 to 2024. While the number of arrests were down slightly from 2023 to 2024, the number of reported cases decreased by far more.

# Larceny Cases/Arrests

- Reported larceny incidents have increased from 2019. The upward trend may have broken in 2023. From 2023 to 2024 we saw a decrease of approximately 26%, while arrests rose from 12 to 15.
- Note: anecdotally, it seems to be increasingly common for victims to decline to pursue charges against identified perpetrators.

# Use of Force

- While arrests have decreased from 2019, use of force has remained steady, likely because most instances do not stem from officer-initiated arrests (which have become more infrequent), but rather from crimes involving a victim or witness that called for help.
- 2024 use-of-force incidents represented less than 10% of arrests and 0.33% of total service calls.

# Going Forward

- In addition to the large initiatives outlined previously, the Beacon Police Department will continue its mission to serve the community though our successful programs of community engagement and realistic, focused training.
- We will also seek to improve the output and precision of our traffic enforcement measures.
- As always, the Department will work closely with community members and the Dutchess County District Attorney's Office to respond to criminal activity and build cases which lead to successful interventions or prosecutions, as appropriate.

**ATTACHMENTS**

Weston & Sampson Memorandum Regarding South Avenue Park Project No. 2: Court Surfacing Bid Results

March 28, 2025

1 Winners Circle, Suite 130, Albany, NY 12205
Tel: 518.463.4400

Mr. Chris White
City Administrator
City of Beacon
One Municipal Plaza
Beacon, NY 12508

Re: **City of Beacon – Project #2 – Court Surfacing – South Avenue Park**
**Award Recommendation**
**Beacon, New York**

Dear Mr. White:

We are enclosing herewith a certified tabulation of the bid received on March 27, 2025, for the above referenced project. There were six (6) bidders for this contract. The low bid was submitted by Consorti Bros. Paving & Sealcoating, Inc. in the Base Bid amount of $54,110.27.

The following is a summary of the bids received:

| | Contractor Name | Base Bid Total | | Bid Bond |
|---|---|---|---|---|
| 1 | Citymark Striping, LLC. | $ 182,855.00 | | X |
| 2 | Consorti Bros. Paving & Sealcoating, Inc. | $ 54,110.27 | | X |
| 3 | Maruti Construction, LLC. | $ 158,800.00 | | X |
| 4 | MZ General Contracting Corp. | $ 237,690.00 | | X |
| 5 | Spitale Construction Resources, Inc. | $ 138,963.00 | | X |
| 6 | Sport-Tech Acrylics Corporation | $ 70,900.00 | | X |

The bid submitted by Consorti Bros. Paving & Sealcoating, Inc was formal and accompanied by a five percent (5%) Bid Bond drawn on The Cincinnati Insurance Company.

Consorti Bros. Paving & Sealcoating, Inc is certified to perform and bid on public work subject to the Prevailing Wage Requirements of NYS Labor Law Article 8. Consorti has satisfactorily completed work of a similar nature and is considered well qualified to perform the work under this contract.

We, therefore, recommend that the Town award the contract to **Consorti Bros. Paving & Sealcoating, Inc** in the amount of their **Base Bid for a total of $54,110.27.**

Please notify us when the Resolution of Award has been made so that we can begin the contract execution process. If you have any questions, or if we can be of further assistance, please let us know.

Sincerely,
WESTON & SAMPSON PE, LS, LA, ARCHITECTS, PC

Re: **City of Beacon – Project #3 – Court Fencing – South Avenue Park**
**Award Recommendation**
**Beacon, New York**

Dear Mr. White:

We are enclosing herewith a certified tabulation of the bid received on March 27, 2025, for the above referenced project. There were eight (8) bidders for this contract. The low bid was submitted by WBE Fence Company, Inc. in the Base Bid amount of $58,647.00.

The following is a summary of the bids received:

| | Contractor Name | Base Bid Total | | Bid Bond |
|---|---|---|---|---|
| 1 | Hershy's Fencing, Inc. | $ 77,691.92 | | X |
| 2 | Mancon, LLC. | $ 350,000.00 | | X |
| 3 | Maruti Construction, LLC. | $ 87,700.00 | | X |
| 4 | MZ General Contracting Corp. | $ 147,634.00 | | X |
| 5 | Senco Metals, LLC. | $ 128,000.00 | | X |
| 6 | Spitale Construction Resources, Inc. | $ 69,667.00 | | X |
| 7 | Sport-Tech Construction Corp. | $ 89,000.00 | | X |
| 8 | WBE Fence Company, Inc. | $ 58,647.00 | | X |

The bid submitted by WBE Fence Company, Inc was formal and accompanied by a five percent (5%) Bid Bond drawn on Philadelphia Indemnity Insurance Company.

WBE Fence Company, Inc is certified to perform and bid on public work subject to the Prevailing Wage Requirements of NYS Labor Law Article 8. WBE Fence Company, Inc has satisfactorily completed work of a similar nature and is considered well qualified to perform the work under this contract.

We, therefore, recommend that the Town award the contract to **WBE Fence Company, Inc** in the amount of their **Base Bid for a total of $58,647.00.**

Appointment of Dar Sims to the Position of Temporary Fire Lieutenant

**ATTACHMENTS**

Fire Chief Memorandum for the Appointment of Dar Sims to the Position of Temporary Fire Lieutenant

Dar Sims Resume

# CITY OF BEACON FIRE DEPARTMENT

**1140 Wolcott Avenue**
**Beacon, New York 12508**
**Office: (845)831-1334**

Dear City Administrator White,

On March 14th, the City's Director of Human Resources and I interviewed the top three candidates from the Civil Service Promotional List for the position of Lieutenant. After a thorough review and consideration of qualifications, I am pleased to recommend Dar Y. Sims for appointment as Temporary Lieutenant with the City of Beacon Fire Department.

Dar Sims has over 15 years of diverse fire service and emergency medical experience in the Fire Service and has been with the City of Beacon Fire Department since 2020. He is a decorated U.S. Marine Corps combat veteran, a certified New York State Fire Instructor II, and holds a wide range of national certifications, including Fire Officer I and II, Fire Instructor I and II, and Fire Inspector I and II. He has completed over 1,100 hours of documented training across multiple disciplines including fire suppression, rescue operations, hazardous materials, and firefighter safety.

Mr. Sims has demonstrated a deep commitment to firefighter development, having trained hundreds of volunteer and career firefighters across the region. His instructional roles at Dutchess Community College and within regional training academies speak to his leadership, communication skills, and technical knowledge. In 2023, he scored number one on the City of Beacon's Lieutenant civil service examination, further qualifying him for consideration.

Beyond his impressive credentials, Dar has shown himself to be a driven and respected member of the fire service community. His combat experience, calm demeanor under pressure, and dedication to professional growth make him exceptionally well-suited for leadership. He has remained active in both EMS and fire service roles, continuously building upon his skills while staying connected to operational demands and evolving best practices.

Appointing Dar Sims to the position of Temporary Lieutenant will not only fill a leadership gap, but also strengthen the department through his mentorship, instructional background, and firsthand operational knowledge. His enthusiasm for the job and his proven ability to work with diverse teams will serve as an asset to both the department and the community we serve.

Please let me know if you would like to review his resume, certifications, or additional documentation in support of this recommendation.

Sincerely,

Thomas Lucchesi
Chief of Department

# Dar Y Sims

**Firefighter / AEMT**

## SUMMARY

Professional and experienced career firefighter/AEMT with 15+ years of experience and extensive training in fire prevention as well as lifesaving techniques and community safety tactics. With a commitment to protecting and serving the public in fire safety, I have acquired in-depth knowledge of emergency response procedures, which includes CPR and first aid, both in working and collaborative environments with other local, state, and federal law enforcement and fire prevention agencies. This is inclusive of the compliances regarding state, county and federal regulations and policies for duties and fire prevention behaviors. Furthermore, I am highly skilled in resolving conflict with the ability to work in many diverse work situations and environments while remaining calm and collected, but quick thinking and responsive, while under high pressure situations working within a team environment or while working individually. Works well within regulatory controls and within the boundaries of confidentiality when considering protocols for handling sensitive information. Additionally, as a certified New York State Fire Instructor, I have acquired extensive experience in training and educating new recruits and volunteer firefighters in the importance of fire safety procedures while assessing their skills for real life fire prevention and control.

## NATIONAL CERTIFICATIONS

- Fire I – February 2013
- Fire Inspector I – March 2013
- Fire II – August 2017
- Fire Instructor I – October 2017

HR@BeaconNY.gov

**To: Mayor Kyriacou and City Councilmembers**
**From: Sara Morris**
**Date: March 31, 2025**
**Re: Appointing Nicholas Krygowski to position of Municipal Program Assistant**

Please accept my recommendation to provisionally appoint Nicholas Krygowski to the position of Municipal Program Assistant. Mr. Krygowski has the educational background and professional experience to fill this role.

Mr. Krygowski holds a Bachelor of Science in Cybersecurity from Western Connecticut State University. Mr. Krygowski is currently working for the City supporting the Human Resources department, while collaborating with other departments, to digitize all documents. Mr. Krygowski has proven himself to be an asset to the City. His experience in records management and data security, familiarity with City processes, and his desire to lead the digitization effort, assures me that he is best suited for this position.

Mr. Krygowski will primarily oversee the digitization process of all City documents for records retention purposes; master the HRIS component of MUNIS to help streamline Human Resources processes; assist the Director of Human Resources and all HR functions; and work collaboratively with other departments to support their needs.

Mr. Krygowski will be set to start the new position on April 8, 2025, following the appointment at the City Council on April 7, 2025. I appreciate your consideration on the matter.

Thank you!

Sincerely,

Sara Morris, MBA, PHR
Director of Human Resources

**RESOLUTION NO. __ OF 2025**

**URGING THE NEW YORK STATE SENATE AND ASSEMBLY TO PASS THE PACKAGING REDUCTION AND RECYCLING INFRASTRUCTURE ACT (S1749/A1464)**

**WHEREAS,** packaging makes up approximately 40 percent of the waste in New York State, the management of which costs taxpayers millions of dollars annually; and

**WHEREAS,** companies that produce packaging should help to bear the costs of this waste; and

**WHEREAS,** some packaging is neither recyclable nor reusable and refillable packaging systems are not readily available; and

**WHEREAS,** plastic causes serious pollution, including as litter and by use of toxic chemicals in the production of such; and

**WHEREAS,** the Packaging Reduction and Recycling Infrastructure Act (S1749/A1464) would reduce waste, increase recycling rates, create jobs, reduce toxicity in products, provide millions of dollars in savings for local governments and taxpayers, and lower greenhouse gas emissions; and

**NOW, THEREFORE, BE IT RESOLVED** that the City of Beacon urges the New York State Legislature to pass and Governor Kathy Hochul to sign into law a strong and effective Packaging Reduction and Recycling Infrastructure Act (S1749/A1464).

**BE IT FURTHER RESOLVED,** that the City Clerk of the City of Beacon is directed to send a copy of this resolution to Governor Kathy Hochul, State Assemblymember Jonathan Jacobson, and State Senator Rob Rolison.

# STATE OF NEW YORK

1464

2025-2026 Regular Sessions

# IN SENATE

January 10, 2025

Introduced by Sen. HARCKHAM -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to enacting the packaging reduction and recycling infrastructure act

**The People of the State of New York, represented in Senate and Assembly, do enact as follows:**

Section 1. Short title. This act shall be known and may be cited as the "packaging reduction and recycling infrastructure act".

§ 2. Article 27 of the environmental conservation law is amended by adding a new title 34 to read as follows:

TITLE 34

PACKAGING REDUCTION AND RECYCLING INFRASTRUCTURE ACT

Section 27-3401. Definitions.

27-3403. Selection of packaging reduction and recycling organizations.

27-3405. Responsibilities of packaging reduction and recycling organizations.

27-3407. Packaging reduction and recycling organization plan.

27-3409. Packaging reduction and recycling plan approval.

27-3411. Packaging reduction and recycling advisory council.

27-3413. Funding mechanism.

27-3415. Collection and convenience.

27-3417. Producer responsibilities.

27-3419. Department responsibilities.

27-3421. Statewide packaging reduction, reuse, and recycling needs assessment.

27-3423. Education and outreach program.

27-3425. Prohibition on certain toxic substances and materials.

27-3427. Non-reusable packaging reduction standards.

27-3429. Recycled content standards.

EXPLANATION--Matter in *italics* (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD04197-01-5

27-3431. Recyclability criteria and packaging recycling requirements.
27-3433. Establishment of the office of recycling inspector general.
27-3435. Penalties and enforcement.
27-3437. Rules and regulations.
27-3439. State preemption.
27-3441. Other assistance programs.
27-3443. Antitrust protections.
27-3445. Severability.

§ 27-3401. Definitions.

As used in this title:

1. "Advisory council" or "council" means the packaging reduction and recycling advisory council established under section 27-3411 of this title.

2. "Affiliate" means a person who directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with a producer.

3. "Beverage container" shall have the same meaning as is set forth in subdivision two of section 27-1003 of this article.

4. "Brand" means any mark, word, name, symbol, design, device, or graphical element or a combination thereof, including a registered or unregistered trademark, that identifies and distinguishes a product from other products.

5. "Contamination" means:

(a) the presence of materials in a given collected material stream that are not on the minimum recyclables list maintained by the department; or

(b) the presence of materials in a given recycled material delivered as a feedstock or commodity that are not specified or accepted as a component of the feedstock or commodity.

6. "Control", including the terms "controlling", "controlled by" and "under common control with", means the possession, directly or indirectly, of the power to direct or cause the direction of (a) the management and policies of a person, (b) the operation of a person, or (c) substantially all of the assets of a person, whether through the ownership of voting securities, by contract, or otherwise.

7. "Discarded", "discards", "generated" or "generation" means packaging material that has been used for its intended purpose and is no longer needed by consumers, businesses, institutions, and other users, and can be managed through reuse, recycling, or disposal.

8. "Disposal" means the landfilling or incineration of material or products. "Disposal" shall also include energy recovery or energy generation by any means, including, but not limited to, incineration, combustion, pyrolysis, gasification, or solvolysis, waste-to-energy, or waste-to-fuel, or any other chemical conversion process. "Disposal" shall also include the use of materials for landfill cover.

9. "Eco-modulation" means structuring program fees in a way to provide producers with financial incentives to reduce waste at the source, increase recyclability of packaging materials, promote reusable packaging products, including those that are contained within a reuse and refill system, discourage and decrease contamination, disincentivize designs or practices that increase the costs and adverse environmental impacts of managing the packaging materials, and encourage designs and processes that improve and facilitate development of infrastructure and systems for source reduction, reuse, recycling, and composting.

10. "Disadvantaged community" shall have the same meaning as is set forth in subdivision five of 75-0101 of this chapter.

11. "Intentionally added substance" means a substance or material that serves an intended function or technical effect in the product or product component, including as an intentional breakdown product of an added chemical that also has a functional or technical effect in the product or product component.

12. "Local government" means any municipal corporation, governmental subdivision of the state, local government unit, special district, school, local or regional board, commission, or authority authorized by law to plan or provide for waste management services for a specific geographical area.

13. "Minimum recyclables list" means a list of those materials that, identified by the department in regulations, must be managed through the packaging reduction and recycling program and by the local governments and service providers that receive funding or reimbursement from the program as approved by the department in accordance with section 27-3419 of this title.

14. "Packaging material" or "material" means a discrete material or category of material, regardless of recyclability, including but not limited to such material types that are flexible, foam, or rigid material, including paper, cardboard, plastic, glass, metal, or multi-material, that is used for the containment, protection, handling, delivery, transport, distribution, or presentation of another product that is sold, offered for sale, imported, or distributed in the state, including through an internet transaction, and single-use plastic products. Packaging material does not include:

(a) Medical devices and packaging which are included with products regulated as a drug, medical device, or dietary supplement by the United States food and drug administration under the federal food, drug, and cosmetic act, 21 U.S.C. 321 et seq., Sec. 3.2(E) of 21 U.S. code of federal regulations, or the dietary supplement health and education act;

(b) Animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other packaging materials regulated by the United States department of agriculture under the virus, serum, toxin act, 21 U.S.C. 151-159;

(c) Packaging regulated by the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. Sec. 136 et seq. or other applicable federal law, rule, or regulation;

(d) Packaging used to contain hazardous or flammable products regulated by the 2012 federal Occupational Safety and Health Administration Hazard Communications Standard, 29 C.F.R. 1910.1200;

(e) Plastic packaging containers used to contain and ship products that are classified for transportation as dangerous goods or hazardous materials under 40 C.F.R. 178;

(f) Beverage containers subject to a returnable container deposit under title ten of this article;

(g) Infant formula as defined in section 321(z) of title 21 of the United States code of federal regulations;

(h) Medical foods as defined in section 360ee(b)(3) of title 21 of the United States code of federal regulations; and

(i) Architectural paint containers collected and managed pursuant to title twenty of this article.

15. "Packaging reduction and recycling organization" or "organization" means a not-for-profit organization registered pursuant to 26 U.S.C. 501(c)(3) designated by the department for the initial organization, or

by a group of producers for subsequent organizations, to act as an agent on behalf of each producer to develop and implement a packaging reduction and recycling plan pursuant to section 27-3407 of this title and comply with the organization's responsibilities under section 27-3405 of this title.

16. "Packaging reduction and recycling plan" or "plan" means a document in which an organization describes the efforts it will undertake to comply with the requirements of this title.

17. "Packaging reduction and recycling program" or "program" means the program implemented by an organization, and overseen by the department, to comply with and implement the provisions of this title.

18. "Post-consumer recycled material" means new material produced using material resulting from recycling.

19. "Primary packaging" means the packaging in direct contact with the product itself, also sometimes referred to as a consumer unit.

20. "Producer" means the following entities, other than local governments, state governments and the federal government, for compliance with the requirements for packaging materials sold, offered for sale, or distributed to consumers in or into this state:

(a) For products sold or served to consumers at a physical retail location in this state which are not single use plastics:

(i) If the product is sold or served in or with packaging under the product manufacturer's own brand or is sold or served in packaging materials that lack identification of a brand, the producer is the person who manufactures the packaged product;

(ii) If there is no person to which subparagraph (i) of this paragraph applies, the producer is the person who is licensed to manufacture and sell or serve the packaged product under the brand or trademark of another manufacturer or person, whether or not the trademark is registered in this state, unless the manufacturer of the packaging materials has agreed to accept responsibility;

(iii) If there is no person to which subparagraph (i) or (ii) of this paragraph applies, the producer is the brand owner of the product that is packaged;

(iv) If there is no person described in subparagraph (i), (ii) or (iii) of this paragraph within the United States, the producer is the person who is the importer of record for the packaged product into the United States for use in a commercial enterprise that sells, offers for sale, or distributes the product in this state; or

(v) If there is no person to which subparagraph (i), (ii), (iii) or (iv) of this paragraph applies, the producer is the person who first distributes the packaged product in or into the state.

(b) For single use plastics and for products sold or distributed to consumers in packaging materials in or into this state via remote sale or distribution:

(i) The producer of packaging materials used to directly protect or contain the product is the same as the producer defined in paragraph (a) of this subdivision.

(ii) For packaging materials used to ship the product to a consumer, the producer is the person who packages the item to be shipped to the consumer.

(c) For any single use plastic product:

(i) If the single use plastic product is sold under the manufacturer's own brand, the producer is the person who manufactures the single use plastic product;

(ii) If there is no person to which subparagraph (i) of this paragraph applies, the producer is the person who is the owner or licensee of a brand or trademark under which the single use plastic product is used in a commercial enterprise, sold, offered for sale, or distributed in or into this state, whether or not the trademark is registered in this state;

(iii) If there is no person to which subparagraph (i) or (ii) of this paragraph applies, the producer is the brand owner of the single use plastic product;

(iv) If there is no person described in subparagraph (i), (ii), or (iii) of this paragraph within the United States, the producer is the person who imports the single use plastic product into the United States for use in a commercial enterprise that sells, offers for sale, or distributes the single use plastic product in this state; or

(v) If there is no person described in subparagraph (i), (ii), (iii) or (iv) of this paragraph, the producer is the person who first distributes the single use plastic product in or into this state.

(d) Where the producer pursuant to paragraph (a) or (c) of this subdivision is a business operated wholly or in part as a franchise, the producer is the franchisor, if such franchisor has franchisees that have a commercial presence in the state.

21. "Product line" means a group of related products all marketed under a single brand that is sold by the same producer to distinguish products from each other for better usability for customers.

22. "Recyclable" means a packaging material that meets the criteria in subdivision one of section 27-3431 of this title.

23. "Recycled" means the use of discarded packaging materials or products in the production of a new product or packaging in place of virgin materials. "Recycled" material does not include contaminants, residues, and other process losses or use of materials as landfill cover.

24. "Recycling" means to separate, dismantle or process the materials, components or commodities contained in discards for the purpose of preparing the materials, components, or commodities for use or reuse in new products or components. "Recycling" does not include: (a) energy recovery or energy generation by any means, including but not limited to, combustion, incineration, pyrolysis, gasification, solvolysis, or waste-to-fuel; (b) any chemical conversion process; or (c) landfill disposal.

25. "Recycling rate" means the percentage of any given material or category of material that is ultimately recycled. The recycling rate for any packaging material shall be calculated as the total weight of packaging material that is recycled in a given year divided by the total weight of packaging material generated in that year.

26. "Reuse" means the return of packaging material back into the economic stream for use in the same kind of application intended for the original packaging, without effectuating a change in the original composition of the package, the identity of the product, or the components thereof.

27. "Reuse and refill system" means a program or set of mechanisms designed to facilitate multiple uses of packaging. Mechanisms may include, but are not limited to, deposits, incentives, curbside collection, collection kiosks, refill stations, dishwashing facilities, and re-distribution networks.

28. "Reusable or refillable packaging and containers" means packaging material and containers that are specifically designed and manufactured

to maintain shape and structure, and be materially durable for repeated sanitizing, washing, and reuse; provided, however, that such packaging and containers must comply with the high reuse and refill rate as set forth in the plan and approved by the department.

29. "Single use plastic" means single use plastic products that frequent the residential waste stream or are plastic products that have the effect of disrupting recycling processes, including, but not limited to, single use plastic items such as straws, utensils, cups, plates, and plastic bags.

30. "Toxic packaging task force" means the toxic packaging task force established by subdivision two of section 27-3425 of this title.

31. "Toxic substances" means a chemical or chemical class identified by a state agency, federal agency, international intergovernmental agency, accredited research university, or other scientific entity deemed authoritative by the department on the basis of credible scientific evidence as being one or more of the following:

(a) A chemical or chemical class that is a carcinogen, mutagen, reproductive toxicant, immunotoxin, neurotoxicant, or endocrine disruptor.

(b) A chemical or chemical class that is persistent or bioaccumulative.

(c) A chemical or chemical class that may harm the normal development of a fetus or child or cause other developmental toxicity in humans or wildlife.

(d) A chemical or chemical class that may harm organs or cause other systemic toxicity.

(e) A chemical or chemical class that may have adverse air quality impacts, adverse ecological impacts, adverse soil quality impacts, or adverse water quality impacts.

(f) A chemical or chemical class that the department has determined has equivalent toxicity to the above criteria.

32. "Unit weight" means the weight of packaging material per unit of product sold.

§ 27-3403. Selection of packaging reduction and recycling organizations.

1. Until the date which is ten years after the effective date of this title, there shall be only one packaging reduction organization and all producers shall be required to register with such packaging reduction organization.

2. Within six months of the effective date of this title, any not-for-profit seeking to serve as the initial packaging reduction and recycling organization shall submit an application on a form and format prescribed by the department.

3. Consistent with the requirements of this title, within nine months of the effective date of this title, the department shall select a not-for-profit organization applicant to act as the initial packaging reduction and recycling organization to operate the packaging reduction and recycling program, and such organization shall then register with the department in the manner prescribed by the department.

4. Regulations promulgated pursuant to this title may provide for additional organizations beginning ten years after the effective date of this title if, after ten years and the recommendation by the advisory council pursuant to subdivision ten of section 27-3411 of this title, the department determines that it would be beneficial for there to be additional organizations implementing the program, such regulations shall ensure:

(a) consistency and coordination between all organizations;

(b) responsibilities carried out are consistent and seamless;

(c) local governments and service providers are reimbursed for recycling services as required under this title; and

(d) that packaging material requirements are not reported as generated, supplied or managed by more than one organization.

§ 27-3405. Responsibilities of packaging reduction and recycling organizations.

1. Producers shall register with a packaging reduction organization to meet the responsibilities of the program pursuant to the provisions of this section, and each organization shall be responsible for implementation of the program on behalf of producers registered with such organization.

2. Each organization involved in the administration of the program shall:

(a) Develop a packaging reduction and recycling plan and submit such plan to the advisory council for review and comment, and after any modifications in response to such comments, submit the plan to the commissioner for approval pursuant to section 27-3407 of this title;

(b) Collect and compile data from producers as required by section 27-3417 of this title;

(c) Calculate reimbursement rates through the objective formula approved by the department as contemplated by paragraph (e) of subdivision four of section 27-3407 of this title for the costs associated with this title, the implementation of reduction, refill, and reuse programs, and the collection, transportation and recycling, or other processing of packaging materials;

(d) Collect fees due from producers as required by section 27-3413 of this title;

(e) Reimburse the department and any other relevant state agencies for the costs associated with conducting the statewide needs assessment required by section 27-3421 of this title, the administration of the program by the department, and the expenses of the advisory council and the toxic packaging task force;

(f) Distribute funds to reimburse local governments and private companies for the costs associated with this title, including the implementation of reduction, refill, and reuse programs, and the collection, transportation and recycling, disposal or other processing of packaging materials;

(g) Undertake an effective statewide education and public outreach program as required by section 27-3423 of this title;

(h) Offer technical support to producers, with an emphasis on support to small businesses, to assist them with compliance with the requirements of this title, including information about procuring affordable alternatives to non-compliant packaging material and reducing packaging material; and

(i) Make recommendations to the department regarding investments in reduction, refill, reuse, collection, transportation, recycling, disposal, and other processing of packaging materials consistent with this title.

3. Annually, each organization shall submit a report to the department that, at a minimum, must include the following information:

(a) Contact information for the organization;

(b) A list of all (i) producers, (ii) brands, and (iii) products that each producer sells, offers for sale, or distributes into the state that are contained, protected, delivered, presented, or distributed in or using packaging material, in each case identified by the Universal Product Code (UPC) if the product has one;

(c) The total amount, by both weight and number of units, which may be estimated if an exact amount is infeasible to provide, of each type of packaging material used to contain, protect, handle, deliver, transport, distribute, or present products sold, offered for sale, or distributed into the state by each individual producer during the prior calendar year;

(d) The total amount, by both weight and number of units, of each material used to contain, protect, handle, deliver, transport, distribute, or present products sold, offered for sale, or distributed into the state by all producers during the prior calendar year;

(e) The total amount, by weight, of each material category recycled as a result of activities undertaken by the organization, either directly or through reimbursement or contractual arrangement;

(f) A calculation of the recycling rate of each material category which is derived by dividing the amount of each material category recycled, as reported in paragraph (e) of this subdivision by the amount of each material category generated, as reported in paragraph (d) of this subdivision;

(g) A complete accounting of all payments made to and by the organization during the prior calendar year;

(h) An analysis of the average time it took to reimburse municipalities during the prior calendar year;

(i) A list of producers reasonably believed to be out of compliance with the requirements of this title, and the reason the organization reasonably believes the producer to be out of compliance. Information on non-compliant producers shall be provided to the commissioner and recycling inspector general's office in a timely fashion and for possible enforcement action by the office;

(j) A description of the educational and outreach efforts made by the organization in the prior calendar year, and how those efforts were designed to reduce packaging waste, and increase reuse and recycling of packaging materials;

(k) An assessment of whether the fee structure adopted by the organization pursuant to section 27-3413 of this title has been effective in incentivizing improvements to the design of packaging material, including actual reduction of packaging material, increases in reusable and refillable packaging material, recycling rates for packaging materials, and decreases in the amount of packaging material;

(l) A description of the reimbursements and expenditures, including the timeliness of such reimbursements, made pursuant to section 27-3413 of this title;

(m) A recommended minimum recyclables list that meets the requirements of subdivision one of section 27-3431 of this title, based on the needs assessment, information gathered from end markets, including commodity brokers and manufacturers who purchase post-consumer materials for use in manufacturing new products, and available collection and processing infrastructure information;

(n) Audited financial statements;

(o) The results of the review conducted pursuant to subdivision four of this section; and

(p) Any additional information required by the department.

4. Each organization shall conduct an annual review process to determine whether packaging materials are recyclable. This review shall be conducted in consultation with representatives of end markets, including recycled commodities brokers and manufacturers who purchase post-consumer material for use in manufacturing new products, and in consultation

with local governments. For the purposes of calculating producer payments and local government reimbursements in accordance with this title, this annual process shall include a transitional period between the date the determination is finalized and the date it goes into effect.

5. Each organization shall conduct public outreach and provide consumers with educational and informational materials related to reducing the amount of packaging discarded, recycled, and disposed of in the state as outlined in section 27-3423 of this title.

6. Each organization shall operate a program that provides for collection convenience as described in section 27-3415 of this title.

7. An organization shall not share, except with the department, the advisory council, and the toxic packaging task force, or as required by law, any proprietary information that is identified by a producer as proprietary information without prior written consent.

§ 27-3407. Packaging reduction and recycling organization plan.

1. Within two years of the effective date of this title, the initial packaging reduction organization shall develop and submit a packaging reduction and recycling plan for implementation of the rules and regulations of this title, including ensuring timely disbursements to local governments, to the department for approval. The plan shall be submitted to the advisory council for review pursuant to section 27-3411 of this title prior to the department's approval. Any subsequent or additional organization shall develop and submit a packaging reduction and recycling plan and comply with all the requirements of this section, and have such plan approved pursuant to section 27-3409 of this title.

2. The plan shall cover five years and be updated every five years following the approval of the original plan. The department shall have the discretion to require the plan to be reviewed or revised prior to the five-year period pursuant to section 27-3419 of this title.

3. Each producer shall begin program implementation within six months after the date the plan for the initial organization is approved and in no event later than three years of the effective date of this title. If no plan is approved by that timeframe, the department, in its discretion, shall either approve a plan with conditions or specify modifications that must be made within forty-five days to conform the submitted plan to the requirements of this section. If a producer is not making good faith efforts to comply with the requirements of this title during such forty-five day period, the producer shall be subject to penalties for noncompliance.

4. The submitted plan shall include, but not be limited to:

(a) contact information, including the name, e-mail address, physical address, and telephone number of the authorized representative of the producer or producers;

(b) the identity of the producer or producers participating in the plan;

(c) a comprehensive list of the types and brands of covered materials for which the producer or producers are responsible for;

(d) a description of how the organization will implement the program, including the mechanisms and processes for providing assistance to producers to comply with the reporting requirements of this title;

(e) in relation to funding the program:

(i) a proposed budget outlining the anticipated costs of operating the program and a description of the method by which the organization intends to determine and collect producer payments during the initial startup period;

(ii) a description of the proposed funding mechanism, identified in section 27-3413 of this title, that meets the requirements of this title;

(iii) a description of how the organization will maintain a financial reserve sufficient to operate the program in a fiscally prudent and responsible manner; and

(iv) a description of how the organization intends to manage and account for all program related funds which pass through the organization, including how timely reimbursements to local governments will be provided;

(f) an objective formula establishing a reimbursement rate, which covers obligations identified in the needs assessment and the minimum recyclables list and takes into account variable regional costs, for participating local governments or private sector service providers;

(g) a description of the process for participating local governments or private sector service providers to recoup reasonable costs as established by the objective formula, from the producer or organization, including, as applicable, any administrative, sorting, collection, transportation, public education, or processing costs, if the organization uses existing services through a local government or obtains such services from a private sector service provider;

(h) at a minimum, the following funding mechanism details shall be provided in the plan:

(i) proposed program fees, provided as a table listing the rate paid for each material category, including at a minimum those identified in subdivision three of section 27-3413, which in sum, will generate sufficient funding to cover obligations identified in the needs assessment and the requirements of this title; and

(ii) proposed program fee adjustments to incorporate eco-modulation factors;

(i) a description of the characteristics of each type of packaging material that is relevant to the eco-modulating factors set forth pursuant to section 27-3413 of this title;

(j) if the local government does not elect to provide service, a description of the process used for contracting with a private sector entity to provide such services and the recoupment of reasonable costs, including procedures to ensure that such private sector entity is not compensated for such services by both the organization and the consumer for the same service, provided, however, that the packaging recycling and reduction organization and any such private sector entity has entered into a labor peace agreement with a bona-fide labor organization that is actively engaged in representing or attempting to represent its employees and its contractors' employees;

(k) a description of how the organization will work with existing waste haulers, material recovery facilities, recyclers, and local governments to operate or expand current collection programs to address material collection methods, improve efficiency and yield of processing materials from separate collection streams, and increase packaging reduction and reuse;

(l) a description of how the organization will use open, competitive, and fair procurement practices should they directly enter into contractual agreements with service providers, including municipalities and private entities;

(m) a description of how a local government will participate, on a voluntary basis, with collection and how existing local government recycling processing and collection infrastructure will be used;

(n) a description of how the organization plans to meet the convenience requirements set forth in this title;

(o) a description of the process for end-of-life management, including recycling and disposal of residuals collected for recycling, using environmentally sound management practices;

(p) a description of how the organization shall provide the option to purchase recycled materials from processors;

(q) a description of how producers are complying with the waste reduction, toxics, recycling and post-consumer content requirements of this title, and the process for verifying compliance, including any third party verification services;

(r) a description of how: (i) the organization will strategically invest in existing and future reuse and recycling infrastructure and market development in the state in consultation with the department and in a manner not inconsistent with the needs assessment, including, but not limited to, installing or upgrading equipment to improve the sorting of covered materials or mitigating the impacts of materials on other commodities at existing sorting and processing facilities, and capital expenditures for new technology, equipment, and facilities; and (ii) how the process to offer and select opportunities will be conducted in an open, competitive, and fair manner;

(s) a description of how the organization's recycling infrastructure and market development investments (i) were informed by the results of the needs assessment, and (ii) will utilize the state's existing infrastructure;

(t) a process to address concerns and questions from customers and residents;

(u) a description of the organization's public outreach education program for consumers and other stakeholders;

(v) a description of how the comments of stakeholders were considered and addressed in the development of the plan;

(w) a detailed description of how the organization consulted with the advisory council, the public, and other stakeholders in the development of the plan prior to its submission to the department, and to what extent the organization specifically incorporated the advisory council's input into the plan;

(x) a comprehensive contingency plan demonstrating how the activities in the plan will continue to be carried out by some other entity, if needed, such as an escrow company, until such time as a new plan is submitted and approved by the department:

(i) upon the expiration of an approved plan;

(ii) in the event that the organization has been notified by the department that it must transfer implementation responsibility for the plan to a different organization;

(iii) in the event that the organization notifies the department that it will cease to implement an approved plan; or

(iv) in any other event that the organization can no longer carry out plan implementation; and

(y) any other additional information required by the department.

5. The organization shall also provide the advisory council a reasonable period of time to review and comment upon the draft plan prior to its submission to the department in accordance with section 27-3409 of this title which shall in no event be less than sixty days. The organization shall make an assessment of comments received and shall provide a summary and an analysis of the issues raised by the advisory council and significant changes suggested by any such comments, a statement of

the reasons why any significant changes were not incorporated into the plan, and a description of any changes made to the plan as a result of such comments.

§ 27-3409. Packaging reduction and recycling plan approval.

1. Before approval or denial of a packaging reduction and recycling plan can be made in accordance with this title, the producer or organization shall submit the plan to the packaging reduction and recycling advisory council. The advisory council shall then make a recommendation regarding approval or disapproval of the plan in accordance with section 27-3411 of this title.

2. Within sixty days of the advisory council making a recommendation to the department, the department shall make a determination to approve the plan as submitted; approve the plan with conditions; or deny the plan, with reasons for the denial.

3. The department may establish additional plan requirements in addition to those identified herein to fulfill the intent of this title; provided, however, that any additional requirements shall be established one year prior to a required submission of a plan.

4. The department may rescind the approval of an approved plan at any time for cause and with documented justification.

5. The maintenance of a labor peace agreement as contemplated by paragraph (j) of subdivision four of section 27-3407 of this title shall be an ongoing material condition of plan approval.

6. For the purposes of this title, "labor peace agreement" means an agreement between an entity and labor organization that, at a minimum, protects the state's proprietary interests by prohibiting labor organizations and members from engaging in picketing, work stoppages, boycotts, and any other economic interference.

§ 27-3411. Packaging reduction and recycling advisory council.

1. There is hereby established within the department a packaging reduction and recycling advisory council to receive and review the packaging reduction and recycling plans required under section 27-3407 of this title, to make recommendations to the department regarding approval of the plans, to review the annual reports produced by organizations and to make recommendations to the department and organizations as required by this section.

2. The advisory council shall convene for the first time no later than one year after the effective date of this title. The advisory council shall be composed of seventeen members. Nine shall be appointed by the commissioner, three shall be appointed by the speaker of the assembly, one shall be appointed by the minority leader of the assembly, three shall be appointed by the temporary president of the senate and one shall be appointed by the minority leader of the senate. The advisory council shall include at least one member from each of the following:

(a) a local government association or local government program, including an additional local government representative from cities with a population of one million or more residents;

(b) a statewide environmental organization;

(c) a representative of a disadvantaged community affected by solid waste infrastructure;

(d) an environmental justice organization;

(e) a statewide waste disposal or recycling association;

(f) a materials recovery facility located within the state;

(g) a recycling collection provider;

(h) a manufacturer of packaging materials utilizing post-consumer recycled content;

(i) a consumer advocate;
(j) a retailer;
(k) a public health specialist;
(l) a producer and an organization established under this title as non-voting members;
(m) a representative of a labor organization representing waste collection employees; and
(n) a representative of a labor organization representing municipal solid waste and recycling processing employees.
3. Appointments to the advisory council are term-limited to ten consecutive years of service; the chair shall be chosen through a majority vote of its members and shall serve no longer than three consecutive years.
4. Advisory council members shall serve without compensation, except that a member of the committee who is a state officer or employee may receive their regular compensation while engaging in the business of the committee, but shall be entitled to receive reimbursement for any actual, necessary expenses incurred in the course of performing business for the committee.
5. All decisions made by the advisory council shall be decided by voting and votes shall only be valid when a quorum is present. A quorum shall exist when greater than fifty percent of voting members are present. The advisory council shall meet at least once a year by the call of the chair or by request of more than half the members. The decisions of the advisory council shall be by vote of the majority of its membership.
6. The council shall determine whether the plan submitted under section 27-3409 of this title meets the criteria and objectives under such section in making its recommendation.
7. The advisory council shall, within sixty days of the submission of a packaging reduction and recycling plan, either:
(a) forward the plan to the commissioner with its recommendation for approval; or
(b) forward the plan to the commissioner with its disapproval and stated reasons therefor, including any recommended changes to the plan necessary for approval.
8. An organization may resubmit a packaging reduction and recycling plan for approval at any time. Upon such resubmission, the advisory council shall, within sixty days, forward the plan to the commissioner with its recommendation for approval or disapproval.
9. The advisory council shall review the submitted annual reports and make such recommendations to the department and the organization for improving future administration of the program and compliance with this title.
10. Thirty months from the date the department adopts rules and regulations pursuant to this title, and every three years thereafter, the advisory council shall conduct a review of all relevant data, including annual reports, the latest scientific data available, any pertinent statewide waste and reuse data, and any other information deemed important, to make recommendations to the following:
(a) organizations for any changes in the administration of the program, including feedback on the education and outreach program as outlined in section 27-3423 of this title;
(b) the department for any necessary changes to regulations, the funding mechanism, reimbursement and expenditure policies, or whether it would be beneficial for there to be additional organizations implementing the program; and

(c) the legislature for recommended statutory changes. Such recommendations shall include a recommendation as to whether to modify the definition of recycling under this title.

§ 27-3413. Funding mechanism.

1. An organization shall establish such program participation fees for producers through the plan pursuant to section 27-3407 of this title, which shall be sufficient to cover all costs of the program, including administration, enforcement, the statewide needs assessment, and all other state costs of the program and organizations' costs of the program, including but not limited to those costs described in subdivision four of this section.

2. An organization shall structure program fees to provide producers with financial incentives through eco-modulation, to reward waste and source reduction and recycling compatibility innovations and practices, and to disincentivize designs or practices that increase costs of managing the products or materials that contain toxic substances.

3. An organization may adjust fees to be paid by participating producers based on factors that affect system costs. At a minimum, fees shall be variable based on:

(a) The category of packaging material, provided that the list of such packaging material categories for which there is a specific producer fee shall include, at a minimum, the following material types:

(i) Paper;

(ii) Cardboard;

(iii) Corrugated cardboard;

(iv) Wood;

(v) Glass;

(vi) Polyethylene terephthalate (PET);

(vii) High density polyethylene (HDPE);

(viii) Expanded polystyrene (EPS);

(ix) Polystyrene;

(x) Bio-plastics;

(xi) Generic plastics;

(xii) Plastic film;

(xiii) Other plastics;

(xiv) Ferrous metals;

(xv) Aluminum;

(xvi) Tinplate;

(xvii) Generic metals; and

(xviii) Mixed materials including laminates and packaging containing more than one of the above materials;

(b) The quantity of each packaging material type, by weight, that the producer sells, offers for sale, or distributes in the state;

(c) Eco-modulation, including as described in subdivision two of this section.

4. Producer fees shall be designed to cover, at minimum, the total costs associated with:

(a) Providing curbside collection or other form of residential service that is, at minimum, as convenient as is detailed in section 27-3415 of this title;

(b) The department's and other state agencies' administration and enforcement of this title;

(c) Organizations' administration of this title;

(d) The cost associated with the development of the needs assessment, as required in section 27-3421 of this title;

(e) The costs associated with the advisory council and the toxic packaging task force;

(f) The costs associated with establishing packaging reduction and reuse infrastructure;

(g) The cost of reimbursement for, or providing, recycling services, including the collection cost, processing cost for each recyclable material, cost of handling non-recyclable material types collected as part of a recycling operation, transportation cost of recycling for each material type; and

(h) Any other factors determined by the department.

5. An organization may adjust producer fees based on factors that affect system costs provided that the specific parameters of such adjustments and fees are included in the plan approved by the department. At a minimum, fees shall be variable based on:

(a) costs to provide curbside collection or another form of residential service that is, at minimum, as convenient as curbside collection or as convenient as the previous recycling collection plan in the particular jurisdiction should recycling collection not be provided;

(b) costs to process packaging materials for acceptance by secondary material markets;

(c) whether the packaging material would typically be readily-recyclable, except that as a consequence of the packaging design, the packaging product has the effect of disrupting recycling processes or the product includes labels, inks, and adhesives containing heavy metals or other toxic substances that would result in contamination of the recycling process;

(d) whether the packaging material is specifically designed to be reusable or refillable and has high reuse or refill rate; and

(e) the commodity value of a packaging material, as defined by published indices.

6. The fees shall be adjusted, or the producers may be provided a credit, as detailed in the plan, based upon the percentage of post-consumer recycled material content and such percentage of post-consumer recycled content shall be verified by the organization or through an independent third party approved to perform verification services to ensure that such percentage exceeds the minimum requirements in the packaging, as long as the recycled content does not disrupt the potential for future recycling.

7. In addition to the annual schedule of fees approved in the plan, an organization fee schedule may include a special assessment on specific categories of packaging materials, identified in the plan, if the nature of the packaging material imposes unusual costs in collection or processing or requires special actions to address effective access to recycling or successful processing in local government recycling facilities.

8. The fees shall be structured to provide producers with financial incentives to encourage:

(a) A reduction in total packaging as measured by unit weight used by producers, and discarded by consumers, businesses, institutions, and other users. Weight reductions shall not be achieved by substituting plastic for other materials types;

(b) An increase in the proportion of a producer's total packaging that is managed within a reuse and refill system;

(c) An increase in the proportion of a producer's total packaging that is deemed recyclable as determined by an annual review process as described in section 27-3405 of this title;

(d) An increase in the proportion of a producer's total packaging that is ultimately recycled;

(e) A reduction in toxic components in packaging materials; and

(f) A reduction in litter from packaging materials.

9. An organization shall be responsible for calculating and disbursing funding at a reasonable rate developed through an objective formula approved by the department, and such reasonable rate may be varied based on population density rates, for municipal services utilized by an organization if the municipality elects to be compensated by the organization in the collection, recovery, recycling, and processing of covered materials and products, whether such services are provided directly by the municipality or through a contracted service provider.

10. If a municipality does not elect to provide service, the organization shall be responsible for contracting with a private entity for services and shall be responsible for calculating and disbursing funding at a reasonable recycling program rate for collection, recycling, recovery, and processing services provided by the private sector entity contracted to provide such service. Any such contract shall be subject to a labor peace agreement as contemplated by paragraph (j) of subdivision four of section 27-3407 of this title.

11. To facilitate an organization's cost reimbursement determination, participating municipalities and private sector haulers contracting with the organization shall report data related to their costs and the value of materials to the organization. Cost calculations shall take into consideration the amount received from the sale of source-separated materials.

12. There shall be no fee assessed on reusable or refillable packaging and containers contained within a reuse or refill system.

13. Any funds directly collected pursuant to this title shall not be used to carry out lobbying activities on behalf of an organization.

14. No retailer may charge a point-of-sale or other fee to consumers to facilitate a producer or organization to recoup the costs associated with meeting the obligations under this title.

15. Nothing in this title shall require a local government to participate in the program, provided that a local government must give at least three months' notice of its intent to cease participation.

§ 27-3415. Collection and convenience.

1. The program shall provide for widespread, convenient, and equitable access to collection opportunities for recyclable packaging materials at no additional cost. Such opportunities, including curbside recycling, shall be provided to all residents of the state in a manner that is as convenient as the collection of solid waste as provided to the consumer as of the effective date of this title. Organizations shall ensure services continue for curbside recycling programs as of the effective date of this title, either directly or through a contract to provide services, and that such services are continued through such producer or organization's plan pursuant to section 27-3405 of this title.

2. Participation in the program shall not restrict a jurisdiction's consumer's ability to contract directly with third parties to obtain recycling collection services if consumers have the option to enter into such contracts as of the effective date of this title, as long as the consumer still voluntarily chooses to contract directly with the third party. The local government shall not provide disbursement to such third party should the local government provide widespread recycling services either directly or through a contract that is different from the contract with such third party, and there shall be procedures in

place to ensure that no service provider is compensated more than once for the same service.

3. Organizations may rely on a range of means to collect various categories of packaging materials so long as collection options include curbside recycling collection services provided by municipal programs, municipal contracted programs, solid waste collection companies, or other approved entities as identified by the department if at a minimum:

(a) the category of packaging materials is on the minimum recyclables list, is suitable for residential curbside recycling collection and can be effectively sorted by the facilities receiving the curbside collected material;

(b) the category of packaging materials is not handled through a deposit and return scheme or buy back system that relies on a collection system other than curbside or multi-family collection;

(c) the provider of the curbside recycling service agrees to the organization's service provider costs arrangement; and

(d) any private contract for such services is subject to a labor peace agreement as contemplated by paragraph (j) of subdivision four of section 27-3407.

4. All local government or private recycling service providers shall provide for the collection and recycling of all packaging materials contained on the minimum recyclables lists, based on geographic regions, in order to be eligible for reimbursement; provided, however, nothing shall penalize a local government or private recycling service for recovering and recycling materials that are generated in the local government or geographic region that are not included on the minimum recyclables lists as long as it can be demonstrated that such materials have a consistent regional market for purchase as determined by the department in consultation with the producer or organization.

5. Reimbursement shall cover collection, processing, transportation, and recycling and disposal of all packaging materials so long as the program includes at least the minimum recyclables list. The department may grant an exception to the requirements in this subdivision upon a written showing by the local government or private recycling service that compliance with the requirements is not practicable for a specific identified product or material and if the department finds it is in the best interest of the intent of this title to grant an exception; provided, however, that any such exception granted by the department shall not exceed twelve months.

6. Program funds shall be used for investment in collection systems, transportation systems, reuse systems, washing systems, redistribution systems, technology for tracking and data collection, capital expenditures on new and emerging technology that is focused on reusable and refillable packaging, as well as equipment, and facilities, and other projects determined by the department to facilitate the goals and objectives of this title.

7. Nothing in this title shall be deemed to automatically void or nullify any collection contracts in effect as of the effective date of this title.

§ 27-3417. Producer responsibilities.

1. Beginning with the required program implementation date as contemplated by subdivision three of section 27-3407 of this title and in no event later than three years after the effective date of this title, a producer shall not sell, offer for sale, or distribute into the state a product contained, protected, delivered, presented, or distributed in packaging unless the producer is registered with an organization and in

full compliance with all requirements of this title. Producers shall register with the initial organization within eighteen months of the effective date of this title; provided, however, that any person who becomes a producer thereafter shall register with an organization and begin program implementation within six months thereof or be subject to penalties for noncompliance.

2. Either when the producer registers, or within eighteen months of the effective date of this title, whichever is later and annually thereafter, each producer shall provide the organization with the following information:

(a) Contact information, including the name, e-mail address, physical address, and telephone number of the authorized representative of the producer;

(b) A comprehensive list of the categories and brands of packaging materials for which the producer or producers are responsible;

(c) The total amount, in units and weight, of each category of packaging material sold, offered for sale, or distributed for sale into the state by the producer in the prior calendar year; and

(d) Any other information required by the department.

3. Producers are responsible for payment of fees, through an organization, based on the quantity, category of packaging material used in the state, and other factors.

4. Producers are responsible for meeting the toxic substances, packaging material reduction, post-consumer content, and recycling standards under this title.

5. A producer shall electronically submit annually, to both the department and the packaging reduction and recycling organization, a written declaration signed by its chief executive officer, verifying the producer's compliance with:

(a) The packaging material reduction requirements of this title;

(b) The packaging material recycled content requirements of this title;

(c) The packaging material recycling requirements of this title;

(d) The toxic substance reduction requirements of this title;

(e) Their obligations to pay fees to the organization pursuant to section 27-3413 of this title and subdivision three of this section; and

(f) Any reimbursement obligations they have to local governments or third party service providers in connection with this title.

6. A producer is exempt from the requirements and prohibitions of this title in a calendar year in which:

(a) The producer and its affiliates collectively realized less than five million dollars in total gross revenue during the prior calendar year;

(b) The producer and its affiliates collectively sold, offered for sale, or distributed for sale products contained, protected, delivered, presented, or distributed in or using less than two tons of packaging material in total during the prior calendar year;

(c) The producer is a not-for-profit corporation that is primarily engaged in preparing and delivering medically tailored meals and medical nutrition therapy. As used in this paragraph, "medically tailored meals and medical nutrition therapy" means nutritional assessment, nutritional therapy, and nutritional counseling provided by a certified dietician or certified nutritionist, and the provision of any food indicated by such assessment, therapy or counseling and ordered by a health care professional acting within their lawful scope of practice under title eight of the education law, for the purpose of treating one

or more chronic conditions for an individual who is limited in their activities of daily living; or

(d) is an agricultural cooperative with less than fifty employees engaged in the production of dairy products.

7. A producer claiming an exemption pursuant to subdivision six of this section shall provide the department with sufficient information to demonstrate that the claimant is eligible for an exemption.

8. Nothing in this title shall impair a producer's eligibility for tax credits or other business incentives for which they would otherwise qualify.

§ 27-3419. Department responsibilities.

1. Within eighteen months of the effective date of this title, the department shall, in accordance with section 27-3435 of this title, promulgate all rules and regulations necessary to implement, administer, and enforce the provisions of this title, including setting standards for consumer protection when the organization directly disburses funds to third parties. These rules and regulations shall include prohibiting certain toxics in packaging pursuant to section 27-3425 of this title as of the dates set forth therein.

2. Beginning two years after the required program implementation date as contemplated by subdivision three of section 27-3407 of this title and in no event later than three years after the effective date of this title, and annually thereafter, the department shall utilize the information obtained pursuant to paragraphs (b), (c), (d), (e), (f) and (g) of subdivision three of section 27-3405 of this title, and any other information available to the department, with input from the advisory council, to produce an annual report to be shared with the legislature and posted publicly on the department's website.

3. The department shall establish and maintain the minimum recyclables list by regulation. The department shall update this list annually, after the initial organization's plan is first approved, considering recommendations from organizations and the advisory council. The minimum recyclables list may vary by geographic region depending on regional markets and regional collection and processing infrastructure, but shall in all cases meet the requirements of subdivision one of section 27-3431 of this title.

4. In the event that the department determines that the organization no longer meets the requirements of this title, or fails to implement and administer the requirements of this title in a manner that effectuates the purposes of this title, after reasonable opportunity to cure such deficiencies, the department shall revoke its approval of such organization and, subject to the contingency plan contemplated by paragraph (w) of subdivision four of section 27-3407 of this title, shall select a new organization pursuant to section 27-3403 of this title.

§ 27-3421. Statewide packaging reduction, reuse, and recycling needs assessment.

1. No later than one year after the effective date of this title and every five years thereafter, the department shall complete or cause to be completed a statewide packaging material reduction, reuse, and recycling needs assessment to determine the current state of packaging material reuse, recycling, and disposal, identify barriers and opportunities to reduce the amount of packaging material discarded and disposed of, and increase the reusability and recyclability of packaging material.

2. The needs assessment, at a minimum, shall cover the following:

(a) The current recycling rate for each type of packaging material;

(b) The amount, by weight and material type, of packaging material recycled at each recycling facility that accepts discarded packaging material generated in the state;

(c) The processing capacity, market conditions, and opportunities in the state and regionally for recyclable materials generally, and packaging material categories specifically;

(d) The net cost of end-of-life management of discarded packaging material in the state, including the cost associated with the collection, transportation, sortation, recycling, littering, landfilling, or incineration of discarded packaging;

(e) The availability of opportunities in the recycling and reuse system for minority- and women-owned businesses;

(f) Current barriers affecting recycling access and availability in the state;

(g) Current barriers to the marketability of recyclable materials generated in the state;

(h) Opportunities for the creation of packaging material reuse and refill programs in the state;

(i) Opportunities for the improvement of packaging material recycling in the state, including the development of end markets for recycled packaging materials;

(j) Current barriers affecting the creation and implementation of packaging material reuse and refill programs;

(k) Consumer education needs in the state with respect to packaging material waste reduction, recycling, and reducing contamination in recycling, and reuse and refill systems for packaging material; and

(l) Landfill capacity.

3. The cost incurred by the department associated with conducting the needs assessment shall be paid for by the organization.

4. The department shall report the results of the needs assessment to the public, the state legislature, and the governor, and shall post the results on its website.

§ 27-3423. Education and outreach program.

1. The organization shall develop and implement an educational outreach program designed to educate the public about waste reduction and improve the effectiveness of local government recycling and, at a minimum, include:

(a) Educational and informational materials for consumers related to reducing the amount of packaging discarded, recycled, and disposed of in the state;

(b) A description of the environmental, social, economic, and environmental justice impacts associated with improper disposal of packaging material and failure to reuse or recycle packaging materials;

(c) Information on the proper end-of-life management of packaging material, including reuse, recycling, composting, and disposal;

(d) The location and availability of curbside collection and additional drop-off collection opportunities for packaging material, including deposit and take-back programs;

(e) How to prevent litter of packaging material in the process of collection;

(f) Recycling instructions that are consistent statewide, except as necessary to take into account differences among local laws and processing capabilities, easy to understand, and easily accessible; and

(g) Any other information required by the department.

2. The educational outreach program shall incorporate, at a minimum, electronic, print, web-based and social media elements, including for

use by local governments at their discretion, as well as including a variety of outreach and education tools. Such educational outreach programs shall ensure materials are widely accessible and available in multiple languages.

3. The educational outreach program shall be coordinated with and assist local government programs, local government contracted programs, solid waste collection companies, and other entities providing services.

4. The educational outreach program shall be developed to ensure disadvantaged communities receive targeted outreach and support.

5. The educational outreach program shall include a plan to work with producers to label or mark packaging material, in accordance with reasonable labeling standards, with information to assist consumers in responsibly managing and recycling covered products.

6. The organization shall consult with local governments on the development of educational materials and may coordinate with local governments on outreach and communication.

7. The organization shall be authorized to provide producers and retailers with educational materials related to the responsible reduction, reuse, recycling, or disposal of discarded packaging material. The educational and informational materials provided to the retailer under this subdivision may include, but need not be limited to, printed materials, signage and templates of materials that can be reproduced by retailers and provided thereby to consumers at the time of a product's purchase, and advertising materials that promote and encourage consumers to properly reuse, recycle, or dispose of packaging material.

8. The organization shall make information on relevant tax credits and other business incentives available to producers.

§ 27-3425. Prohibition on certain toxic substances and materials.

1. Notwithstanding title two of article thirty-seven of this chapter to the contrary, (a) Beginning three years after the promulgation of rules and regulations pursuant to this title, no person or entity shall sell, offer for sale, or distribute into the state any packaging containing any of the following toxic substances or materials as an intentionally added substance:

(i) Ortho-phthalates;

(ii) Bisphenols;

(iii) Per- and polyfluoroalkyl substances (PFAS);

(iv) Heavy metals and compounds, including lead, hexavalent chromium, cadmium, and mercury, but excluding copper phthalocyanine (chemical abstracts service registry number 147-14-8);

(v) Benzophenone and its derivatives;

(vi) Halogenated flame retardants;

(vii) Perchlorate;

(viii) Formaldehyde;

(ix) Toluene;

(x) Antimony and compounds;

(xi) UV 328 (2-(2H-benzotriazol-2-yl)-4,6-di-tert-pentylphenol);

(xii) Polyvinyl chloride, including polyvinylidene chloride;

(xiii) Polystyrene but excluding EPS (expanded polystyrene); or

(xiv) Polycarbonate.

(b) Beginning five years after the promulgation of rules and regulations pursuant to this title, no person or entity shall sell, offer for sale, or distribute into the state any packaging containing any of the toxic substances listed in paragraph (a) of this subdivision, even if they are not an intentionally added substance, at or above a level that the department shall establish by regulation that is the lowest

level that can feasibly be achieved; provided, however, that the department shall review such level every five years to determine whether it should be lowered.

2. (a) There is hereby established within the department a toxic packaging task force to review the toxicity in packaging in the state, and to recommend to the department the designation of additional toxic substances which shall be subject to the same prohibition as those substances listed in subdivision one of this section.

(b) The toxic packaging task force shall have nine members, one of whom shall be the commissioner or their designee who shall be chair, and one of whom shall be the commissioner of health or their designee. The other members shall include: (i) a representative of the packaging industry; (ii) a representative of an environmental justice organization; (iii) a representative from the chemical industry; (iv) a professional or academic expert in toxicology; and (v) a professional or academic expert in public health risk assessment; all of whom shall be appointed by the commissioner. The remaining members shall be persons with significant professional or academic expertise in maternal or child health, epidemiology, chemical safety or public health policy, one of whom shall be appointed by the temporary president of the senate and one of whom shall be appointed by the speaker of the assembly. Appointments to the toxic packaging task force are term limited to five consecutive years of service.

(c) The task force shall meet at least twice per year to review and recommend to the department whether (i) there are additional toxic substances or classes of toxic substances for use in packaging that should no longer be sold, offered for sale, distributed for sale, or distributed for such use in this state, and (ii) there should be substance or material-specific exceptions to the prohibitions provided for in subdivision one of this section, provided such recommendation may be made only upon a demonstration of substantial and convincing evidence that such substance or material does not meet the criteria for classification as a toxic substance or material.

3. (a) Within one hundred eighty days of the toxic packaging task force recommending the designation of an additional toxic substance, the department shall adopt rules and regulations to designate such substance as a toxic substance under this section and prohibit the use of such toxic substance in packaging in the same manner as those toxic substances listed in subdivision one of this section, with an effective date no later than two years after the date of such recommendation, unless the department determines that such two-year period would be unduly burdensome, in which case the department shall establish an effective date for such prohibition no later than four years after the date of such recommendation.

(b) The department may evaluate recommendations from the toxic packaging task force for exceptions as provided in paragraph (c) of subdivision two of this section, and upon a demonstration of substantial and convincing evidence that such substance or material does not meet the criteria for classification as a toxic substance or material, may adopt rules and regulations to except such substance as a toxic substance or material.

4. Any producer that violates this section, or any rules or regulations promulgated pursuant to this section, shall be subject to a fine for each violation not to exceed ten thousand dollars per violation. For the purposes of this section, each product line that is sold, offered for sale, or distributed to consumers, via retail commerce, in the

state, including through an internet transaction shall be considered a separate violation.

§ 27-3427. Non-reusable packaging reduction standards.

1. Each individual producer is required to meet the following packaging reduction requirements:

(a) Beginning three years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the third year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, in each case, by ten percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(b) Beginning five years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the fifth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, in each case, by fifteen percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(c) Beginning eight years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the eighth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, for all materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale into the state, in each case, by twenty percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(d) Beginning ten years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the tenth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, for all materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale into the state, in each case, by twenty-five percent either on a company-wide basis or by unit weight for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(e) Beginning twelve years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the twelfth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, for all materials used to contain, protect, deliver, present, or distribute the

products they sell, offer for sale, or distribute for sale into the state, in each case, by thirty percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

2. The reductions required by this section shall be measured against the packaging material the producer used during the first year such producer registered with an organization.

3. These reductions shall be achieved by eliminating single-use packaging material, including secondary or tertiary packaging material, elimination of packaging material components, reduction of packaging material components, or by transitioning to reusable or refillable packaging systems. Reductions may also be achieved by substituting plastic packaging material with non-plastic packaging material. However, the reductions required by this section shall not be achieved by substituting non-plastic materials with plastic materials or substituting recyclable materials with non-recyclable materials.

4. In the case of a producer for which, as of the effective date of this title or upon entry into the market after such effective date, a portion of its packaging is reusable and contained within a reuse and refill system, such producer may apply to the department for a waiver from the packaging reduction requirements set forth in subdivision one of this section with respect to that percentage of its packaging, by unit weight, which is contained within a reuse and refill system.

5. In the case of a producer that demonstrates in a manner satisfactory to the department that, for the period beginning ten years prior to the effective date of this title and ending on the date which is two years after the effective date of this title, the producer reduced the amount of packaging used to contain, protect, deliver, present, or distribute the products the producer sells, offers for sale, or distributes for sale into the state, such producer may apply to the department for a waiver from the packaging reduction requirements of this section with respect to that percentage of its packaging, by unit weight, which was reduced during such twelve-year period.

6. A producer may apply to the department for a waiver from the reduction requirements of this section if compliance is impossible due to federal law or otherwise conflicts with federal law. Such waiver must be applied for annually. In such application the producer shall provide the department and the advisory council with sufficient information, in the determination of the department in consultation with the advisory council, to make a determination on such application, including proof that the producer has taken all feasible actions to achieve the reductions required by this section.

7. Nothing in this section shall preclude a producer from going beyond the reduction standards in subdivision one of this section.

§ 27-3429. Recycled content standards.

1. Each individual producer shall meet the recycling content targets contained in this section.

2. Beginning two years after promulgation of rules and regulations pursuant to this title:

(a) all glass containers manufactured in the state used by the producer shall contain, on average, at least thirty-five percent post-consumer recycled content;

(b) all paper carryout bags sold, offered for sale, or given away free in the state by a producer shall contain, on average, at least forty percent post-consumer recycled content; except that a paper carryout bag

that holds eight pounds or less shall only be required to contain, on average, at least twenty percent post-consumer recycled content; and

(c) all plastic trash bags sold or offered for sale in the state by a producer shall contain, on average, at least twenty percent post-consumer recycled content.

3. The requirements of this section shall not apply to reusable or refillable packaging or containers.

4. Beginning two years after plan implementation begins for the initial organization, the department is authorized, in consultation with the advisory council, to:

(a) establish content requirements for materials not listed in subdivision two of this section; and

(b) modify the post-consumer recycled content targets for the materials set forth in subdivision two of this section, provided that modifications do not result in a lesser percentage or an earlier year for the respective target.

§ 27-3431. Recyclability criteria and packaging recycling requirements.

1. Beginning two years after the promulgation of rules and regulations pursuant to this title, packaging materials used by a producer shall meet the following recyclability criteria:

(a) be capable of being sorted by entities that process recyclable material generated in the state;

(b) have a consistent regional market for purchase, by end users in the production of new products;

(c) not contain the following:

(i) opaque or pigmented polyethylene terephthalate;

(ii) oxo-degradable additives, including oxo-biodegradable additives;

(iii) polyethylene terephthalate glycol in rigid packaging;

(iv) label constructions, including adhesives, inks, materials and formats, or features that render a package non-recyclable or disruptive to the recycling process; and

(v) DoPS - polystyrene, excluding EPS (expanded polystyrene);

(d) meet the post-consumer content requirements of this title; and

(e) any other criteria determined by the department.

2. Each individual producer shall be required to meet the following recycling rate standards:

(a) With respect to the producer's non-plastic packaging:

(i) Beginning January first, two thousand thirty, a minimum of thirty-five percent of packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled, with a minimum of five percent being reused;

(ii) Beginning January first, two thousand thirty-seven, a minimum of fifty percent of packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled, with a minimum of ten percent being reused; and

(iii) Beginning January first, two thousand fifty-two, a minimum of seventy-five percent of packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled, with a minimum of twenty percent being reused.

(b) With respect to plastic packaging:

(i) Beginning January first, two thousand thirty, a minimum of twenty-five percent of plastic packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled;

(ii) Beginning January first, two thousand thirty-seven, a minimum of fifty percent of plastic packaging material reported by the producer or

an organization as supplied into the state shall be reused or recycled; and

(iii) Beginning January first, two thousand fifty-two, a minimum of seventy-five percent of plastic packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled.

3. The department may adjust the recycling rates in subdivision two of this section by rulemaking based on information gathered through the needs assessment or provided in producer plans and reports, and/or based on consideration of environmental, technical and economic conditions. An adjustment to the statewide recycling and reuse performance targets may not adjust the recycling rate target to less than thirty percent or more than seventy-five percent.

4. A producer may apply to the department for a waiver from the recycling rate requirements of this section if compliance is impossible due to federal law or otherwise conflicts with federal law. Such waiver shall be applied for annually. In such application the producer shall provide the department and the advisory council with sufficient information, in the determination of the department in consultation with the advisory council, to make a determination on such application, including proof that the producer has taken all feasible actions to achieve the reductions required by this section.

5. The requirements of subdivision two of this section shall not apply to reusable or refillable packaging or containers.

§ 27-3433. Establishment of the office of recycling inspector general.

1. The commissioner shall establish an independent office of recycling inspector general within the department. The recycling inspector general shall evaluate the programs and organizations created pursuant to this title on an annual basis and shall ensure such programs are functioning properly, and that all organizations and producers are in compliance with the requirements of this title.

2. The recycling inspector general shall have the authority to investigate the compliance of producers and the organization with all provisions of this title and to bring enforcement actions for violations of this title pursuant to the provisions of section 27-3435 of this title. A violation by the organization as the result of actions by one or more producers shall be enforceable by the recycling inspector general as violations against such producers.

§ 27-3435. Penalties and enforcement.

1. Failure to comply with the requirements of this title shall subject the organization or an individual producer to penalties for violations. The department, recycling inspector general, or attorney general, may conduct investigations, including inspecting operations, facilities, and records of producers and organizations, and performing audits of producers and organizations, to determine whether such producers and organizations are complying with the requirements of this title.

2. The department, the recycling inspector general, or the attorney general, shall notify an organization or producer of any conduct or practice that does not comply with the requirements of this title and of any inconsistencies identified in an audit.

3. The department, the recycling inspector general, and the attorney general, may issue a notice of violation to, and impose an administrative civil penalty not to exceed one thousand dollars per day per violation on any entity not in compliance with this title or any of the regulations the department adopts to implement this title. For the purposes of this section, each product line that is sold, offered for

sale, or distributed to consumers via retail commerce in the state, including through an internet transaction, shall be considered a separate violation.

4. Civil penalties under this section shall be assessed by the department after an opportunity to be heard pursuant to the provisions of section 71-1709 of this chapter, or by the court in any action or proceeding pursuant to section 71-2727 of this chapter, and in addition thereto, such person or entity may by similar process be enjoined from continuing such violation and any permit, registration or other approval issued by the department may be revoked or suspended or a pending renewal denied.

§ 27-3437. Rules and regulations.

1. Within eighteen months after the effective date of this section, the department shall promulgate all rules and regulations necessary to implement, administer, and enforce the provisions of this title.

2. When promulgating rules pursuant to the provisions of this section, the department shall solicit input from the public of any draft rule or regulation to implement this section, including at a minimum a ninety-day comment period and one public hearing on such draft rules.

§ 27-3439. State preemption.

Jurisdiction in all matters pertaining to costs and funding mechanisms of packaging reduction and recycling organizations relating to the recovery of packaging materials shall, by this title, be vested exclusively in the state; provided, however, that nothing in this title shall preclude any city, town, village or other local planning units from determining what materials shall be included for recycling in a local government recycling collection program or shall preclude any person from coordinating, for recycling or reuse, the collection of packaging materials and products.

§ 27-3441. Other assistance programs.

Nothing in this title shall impact any producer eligibility for any state or local incentive or assistance program to which they are otherwise eligible.

§ 27-3443. Antitrust protections.

A producer shall not be liable for any claim of a violation of antitrust, restraint of trade, or unfair trade practice arising from conduct undertaken in order to comply with this title; provided, however, this section shall not apply to any agreement establishing or affecting the price of packaging material, or the output or production of any agreement restricting the geographic area or customers to which packaging material will be sold.

§ 27-3445. Severability.

The provisions of this title shall be severable and if any phrase, clause, sentence or provision of this title or the applicability thereof to any person or circumstance shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.

§ 3. The environmental conservation law is amended by adding a new section 37-0202 to read as follows:

§ 37-0202. Applicability.

This article shall only have effect to the extent that the prohibitions in this title are not otherwise substantially given effect or in conflict with the provisions of title thirty-four of article twenty-seven of this chapter.

§ 4. This act shall take effect immediately.

# STATE OF NEW YORK

1749

2025-2026 Regular Sessions

# IN ASSEMBLY

January 14, 2025

Introduced by M. of A. GLICK, BURDICK, ROSENTHAL, PAULIN, SHIMSKY, COLTON, REYES, R. CARROLL, RAJKUMAR, GONZALEZ-ROJAS, LUNSFORD, GALLAGHER, BURKE, STECK, KELLES, LEVENBERG, RAGA, SIMON, CUNNINGHAM, SIMONE, SHRESTHA, DE LOS SANTOS, TAPIA, EACHUS, SEAWRIGHT, DINOWITZ, EPSTEIN, HEVESI, ALVAREZ, FORREST, OTIS, GIBBS, STIRPE, RIVERA, CRUZ, ANDERSON, RAMOS, WEPRIN, ZINERMAN, MAMDANI, MITAYNES, BICHOTTE HERMELYN, LEE, BARRETT, JACOBSON, STERN, McMAHON, KIM, TAYLOR, CLARK, SAYEGH, BENEDETTO, JACKSON, MEEKS, CONRAD, DAVILA, WILLIAMS, BORES, K. BROWN, BRONSON, LUCAS, DILAN, DeSTEFANO -- read once and referred to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to enacting the packaging reduction and recycling infrastructure act

**The People of the State of New York, represented in Senate and Assembly, do enact as follows:**

Section 1. Short title. This act shall be known and may be cited as the "packaging reduction and recycling infrastructure act".

§ 2. Article 27 of the environmental conservation law is amended by adding a new title 34 to read as follows:

**TITLE 34**

**PACKAGING REDUCTION AND RECYCLING INFRASTRUCTURE ACT**

**Section 27-3401. Definitions.**

**27-3403. Selection of packaging reduction and recycling organizations.**

**27-3405. Responsibilities of packaging reduction and recycling organizations.**

**27-3407. Packaging reduction and recycling organization plan.**

**27-3409. Packaging reduction and recycling plan approval.**

**27-3411. Packaging reduction and recycling advisory council.**

**27-3413. Funding mechanism.**

**27-3415. Collection and convenience.**

**27-3417. Producer responsibilities.**

EXPLANATION--Matter in ***italics*** (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD04197-01-5

27-3419. Department responsibilities.
27-3421. Statewide packaging reduction, reuse, and recycling needs assessment.
27-3423. Education and outreach program.
27-3425. Prohibition on certain toxic substances and materials.
27-3427. Non-reusable packaging reduction standards.
27-3429. Recycled content standards.
27-3431. Recyclability criteria and packaging recycling requirements.
27-3433. Establishment of the office of recycling inspector general.
27-3435. Penalties and enforcement.
27-3437. Rules and regulations.
27-3439. State preemption.
27-3441. Other assistance programs.
27-3443. Antitrust protections.
27-3445. Severability.

§ 27-3401. Definitions.

As used in this title:

1. "Advisory council" or "council" means the packaging reduction and recycling advisory council established under section 27-3411 of this title.

2. "Affiliate" means a person who directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with a producer.

3. "Beverage container" shall have the same meaning as is set forth in subdivision two of section 27-1003 of this article.

4. "Brand" means any mark, word, name, symbol, design, device, or graphical element or a combination thereof, including a registered or unregistered trademark, that identifies and distinguishes a product from other products.

5. "Contamination" means:

(a) the presence of materials in a given collected material stream that are not on the minimum recyclables list maintained by the department; or

(b) the presence of materials in a given recycled material delivered as a feedstock or commodity that are not specified or accepted as a component of the feedstock or commodity.

6. "Control", including the terms "controlling", "controlled by" and "under common control with", means the possession, directly or indirectly, of the power to direct or cause the direction of (a) the management and policies of a person, (b) the operation of a person, or (c) substantially all of the assets of a person, whether through the ownership of voting securities, by contract, or otherwise.

7. "Discarded", "discards", "generated" or "generation" means packaging material that has been used for its intended purpose and is no longer needed by consumers, businesses, institutions, and other users, and can be managed through reuse, recycling, or disposal.

8. "Disposal" means the landfilling or incineration of material or products. "Disposal" shall also include energy recovery or energy generation by any means, including, but not limited to, incineration, combustion, pyrolysis, gasification, or solvolysis, waste-to-energy, or waste-to-fuel, or any other chemical conversion process. "Disposal" shall also include the use of materials for landfill cover.

9. "Eco-modulation" means structuring program fees in a way to provide producers with financial incentives to reduce waste at the source,

increase recyclability of packaging materials, promote reusable packaging products, including those that are contained within a reuse and refill system, discourage and decrease contamination, disincentivize designs or practices that increase the costs and adverse environmental impacts of managing the packaging materials, and encourage designs and processes that improve and facilitate development of infrastructure and systems for source reduction, reuse, recycling, and composting.

10. "Disadvantaged community" shall have the same meaning as is set forth in subdivision five of 75-0101 of this chapter.

11. "Intentionally added substance" means a substance or material that serves an intended function or technical effect in the product or product component, including as an intentional breakdown product of an added chemical that also has a functional or technical effect in the product or product component.

12. "Local government" means any municipal corporation, governmental subdivision of the state, local government unit, special district, school, local or regional board, commission, or authority authorized by law to plan or provide for waste management services for a specific geographical area.

13. "Minimum recyclables list" means a list of those materials that, identified by the department in regulations, must be managed through the packaging reduction and recycling program and by the local governments and service providers that receive funding or reimbursement from the program as approved by the department in accordance with section 27-3419 of this title.

14. "Packaging material" or "material" means a discrete material or category of material, regardless of recyclability, including but not limited to such material types that are flexible, foam, or rigid material, including paper, cardboard, plastic, glass, metal, or multi-material, that is used for the containment, protection, handling, delivery, transport, distribution, or presentation of another product that is sold, offered for sale, imported, or distributed in the state, including through an internet transaction, and single-use plastic products. Packaging material does not include:

(a) Medical devices and packaging which are included with products regulated as a drug, medical device, or dietary supplement by the United States food and drug administration under the federal food, drug, and cosmetic act, 21 U.S.C. 321 et seq., Sec. 3.2(E) of 21 U.S. code of federal regulations, or the dietary supplement health and education act;

(b) Animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other packaging materials regulated by the United States department of agriculture under the virus, serum, toxin act, 21 U.S.C. 151-159;

(c) Packaging regulated by the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. Sec. 136 et seq. or other applicable federal law, rule, or regulation;

(d) Packaging used to contain hazardous or flammable products regulated by the 2012 federal Occupational Safety and Health Administration Hazard Communications Standard, 29 C.F.R. 1910.1200;

(e) Plastic packaging containers used to contain and ship products that are classified for transportation as dangerous goods or hazardous materials under 40 C.F.R. 178;

(f) Beverage containers subject to a returnable container deposit under title ten of this article;

(g) Infant formula as defined in section 321(z) of title 21 of the United States code of federal regulations;

(h) Medical foods as defined in section 360ee(b)(3) of title 21 of the United States code of federal regulations; and

(i) Architectural paint containers collected and managed pursuant to title twenty of this article.

15. "Packaging reduction and recycling organization" or "organization" means a not-for-profit organization registered pursuant to 26 U.S.C. 501(c)(3) designated by the department for the initial organization, or by a group of producers for subsequent organizations, to act as an agent on behalf of each producer to develop and implement a packaging reduction and recycling plan pursuant to section 27-3407 of this title and comply with the organization's responsibilities under section 27-3405 of this title.

16. "Packaging reduction and recycling plan" or "plan" means a document in which an organization describes the efforts it will undertake to comply with the requirements of this title.

17. "Packaging reduction and recycling program" or "program" means the program implemented by an organization, and overseen by the department, to comply with and implement the provisions of this title.

18. "Post-consumer recycled material" means new material produced using material resulting from recycling.

19. "Primary packaging" means the packaging in direct contact with the product itself, also sometimes referred to as a consumer unit.

20. "Producer" means the following entities, other than local governments, state governments and the federal government, for compliance with the requirements for packaging materials sold, offered for sale, or distributed to consumers in or into this state:

(a) For products sold or served to consumers at a physical retail location in this state which are not single use plastics:

(i) If the product is sold or served in or with packaging under the product manufacturer's own brand or is sold or served in packaging materials that lack identification of a brand, the producer is the person who manufactures the packaged product;

(ii) If there is no person to which subparagraph (i) of this paragraph applies, the producer is the person who is licensed to manufacture and sell or serve the packaged product under the brand or trademark of another manufacturer or person, whether or not the trademark is registered in this state, unless the manufacturer of the packaging materials has agreed to accept responsibility;

(iii) If there is no person to which subparagraph (i) or (ii) of this paragraph applies, the producer is the brand owner of the product that is packaged;

(iv) If there is no person described in subparagraph (i), (ii) or (iii) of this paragraph within the United States, the producer is the person who is the importer of record for the packaged product into the United States for use in a commercial enterprise that sells, offers for sale, or distributes the product in this state; or

(v) If there is no person to which subparagraph (i), (ii), (iii) or (iv) of this paragraph applies, the producer is the person who first distributes the packaged product in or into the state.

(b) For single use plastics and for products sold or distributed to consumers in packaging materials in or into this state via remote sale or distribution:

(i) The producer of packaging materials used to directly protect or contain the product is the same as the producer defined in paragraph (a) of this subdivision.

(ii) For packaging materials used to ship the product to a consumer, the producer is the person who packages the item to be shipped to the consumer.

(c) For any single use plastic product:

(i) If the single use plastic product is sold under the manufacturer's own brand, the producer is the person who manufactures the single use plastic product;

(ii) If there is no person to which subparagraph (i) of this paragraph applies, the producer is the person who is the owner or licensee of a brand or trademark under which the single use plastic product is used in a commercial enterprise, sold, offered for sale, or distributed in or into this state, whether or not the trademark is registered in this state;

(iii) If there is no person to which subparagraph (i) or (ii) of this paragraph applies, the producer is the brand owner of the single use plastic product;

(iv) If there is no person described in subparagraph (i), (ii), or (iii) of this paragraph within the United States, the producer is the person who imports the single use plastic product into the United States for use in a commercial enterprise that sells, offers for sale, or distributes the single use plastic product in this state; or

(v) If there is no person described in subparagraph (i), (ii), (iii) or (iv) of this paragraph, the producer is the person who first distributes the single use plastic product in or into this state.

(d) Where the producer pursuant to paragraph (a) or (c) of this subdivision is a business operated wholly or in part as a franchise, the producer is the franchisor, if such franchisor has franchisees that have a commercial presence in the state.

21. "Product line" means a group of related products all marketed under a single brand that is sold by the same producer to distinguish products from each other for better usability for customers.

22. "Recyclable" means a packaging material that meets the criteria in subdivision one of section 27-3431 of this title.

23. "Recycled" means the use of discarded packaging materials or products in the production of a new product or packaging in place of virgin materials. "Recycled" material does not include contaminants, residues, and other process losses or use of materials as landfill cover.

24. "Recycling" means to separate, dismantle or process the materials, components or commodities contained in discards for the purpose of preparing the materials, components, or commodities for use or reuse in new products or components. "Recycling" does not include: (a) energy recovery or energy generation by any means, including but not limited to, combustion, incineration, pyrolysis, gasification, solvolysis, or waste-to-fuel; (b) any chemical conversion process; or (c) landfill disposal.

25. "Recycling rate" means the percentage of any given material or category of material that is ultimately recycled. The recycling rate for any packaging material shall be calculated as the total weight of packaging material that is recycled in a given year divided by the total weight of packaging material generated in that year.

26. "Reuse" means the return of packaging material back into the economic stream for use in the same kind of application intended for the original packaging, without effectuating a change in the original composition of the package, the identity of the product, or the components thereof.

27. "Reuse and refill system" means a program or set of mechanisms designed to facilitate multiple uses of packaging. Mechanisms may include, but are not limited to, deposits, incentives, curbside collection, collection kiosks, refill stations, dishwashing facilities, and re-distribution networks.

28. "Reusable or refillable packaging and containers" means packaging material and containers that are specifically designed and manufactured to maintain shape and structure, and be materially durable for repeated sanitizing, washing, and reuse; provided, however, that such packaging and containers must comply with the high reuse and refill rate as set forth in the plan and approved by the department.

29. "Single use plastic" means single use plastic products that frequent the residential waste stream or are plastic products that have the effect of disrupting recycling processes, including, but not limited to, single use plastic items such as straws, utensils, cups, plates, and plastic bags.

30. "Toxic packaging task force" means the toxic packaging task force established by subdivision two of section 27-3425 of this title.

31. "Toxic substances" means a chemical or chemical class identified by a state agency, federal agency, international intergovernmental agency, accredited research university, or other scientific entity deemed authoritative by the department on the basis of credible scientific evidence as being one or more of the following:

(a) A chemical or chemical class that is a carcinogen, mutagen, reproductive toxicant, immunotoxin, neurotoxicant, or endocrine disruptor.

(b) A chemical or chemical class that is persistent or bioaccumulative.

(c) A chemical or chemical class that may harm the normal development of a fetus or child or cause other developmental toxicity in humans or wildlife.

(d) A chemical or chemical class that may harm organs or cause other systemic toxicity.

(e) A chemical or chemical class that may have adverse air quality impacts, adverse ecological impacts, adverse soil quality impacts, or adverse water quality impacts.

(f) A chemical or chemical class that the department has determined has equivalent toxicity to the above criteria.

32. "Unit weight" means the weight of packaging material per unit of product sold.

§ 27-3403. Selection of packaging reduction and recycling organizations.

1. Until the date which is ten years after the effective date of this title, there shall be only one packaging reduction organization and all producers shall be required to register with such packaging reduction organization.

2. Within six months of the effective date of this title, any not-for-profit seeking to serve as the initial packaging reduction and recycling organization shall submit an application on a form and format prescribed by the department.

3. Consistent with the requirements of this title, within nine months of the effective date of this title, the department shall select a not-for-profit organization applicant to act as the initial packaging reduction and recycling organization to operate the packaging reduction and recycling program, and such organization shall then register with the department in the manner prescribed by the department.

4. Regulations promulgated pursuant to this title may provide for additional organizations beginning ten years after the effective date of

this title if, after ten years and the recommendation by the advisory council pursuant to subdivision ten of section 27-3411 of this title, the department determines that it would be beneficial for there to be additional organizations implementing the program, such regulations shall ensure:

(a) consistency and coordination between all organizations;

(b) responsibilities carried out are consistent and seamless;

(c) local governments and service providers are reimbursed for recycling services as required under this title; and

(d) that packaging material requirements are not reported as generated, supplied or managed by more than one organization.

§ 27-3405. Responsibilities of packaging reduction and recycling organizations.

1. Producers shall register with a packaging reduction organization to meet the responsibilities of the program pursuant to the provisions of this section, and each organization shall be responsible for implementation of the program on behalf of producers registered with such organization.

2. Each organization involved in the administration of the program shall:

(a) Develop a packaging reduction and recycling plan and submit such plan to the advisory council for review and comment, and after any modifications in response to such comments, submit the plan to the commissioner for approval pursuant to section 27-3407 of this title;

(b) Collect and compile data from producers as required by section 27-3417 of this title;

(c) Calculate reimbursement rates through the objective formula approved by the department as contemplated by paragraph (e) of subdivision four of section 27-3407 of this title for the costs associated with this title, the implementation of reduction, refill, and reuse programs, and the collection, transportation and recycling, or other processing of packaging materials;

(d) Collect fees due from producers as required by section 27-3413 of this title;

(e) Reimburse the department and any other relevant state agencies for the costs associated with conducting the statewide needs assessment required by section 27-3421 of this title, the administration of the program by the department, and the expenses of the advisory council and the toxic packaging task force;

(f) Distribute funds to reimburse local governments and private companies for the costs associated with this title, including the implementation of reduction, refill, and reuse programs, and the collection, transportation and recycling, disposal or other processing of packaging materials;

(g) Undertake an effective statewide education and public outreach program as required by section 27-3423 of this title;

(h) Offer technical support to producers, with an emphasis on support to small businesses, to assist them with compliance with the requirements of this title, including information about procuring affordable alternatives to non-compliant packaging material and reducing packaging material; and

(i) Make recommendations to the department regarding investments in reduction, refill, reuse, collection, transportation, recycling, disposal, and other processing of packaging materials consistent with this title.

3. Annually, each organization shall submit a report to the department that, at a minimum, must include the following information:

(a) Contact information for the organization;

(b) A list of all (i) producers, (ii) brands, and (iii) products that each producer sells, offers for sale, or distributes into the state that are contained, protected, delivered, presented, or distributed in or using packaging material, in each case identified by the Universal Product Code (UPC) if the product has one;

(c) The total amount, by both weight and number of units, which may be estimated if an exact amount is infeasible to provide, of each type of packaging material used to contain, protect, handle, deliver, transport, distribute, or present products sold, offered for sale, or distributed into the state by each individual producer during the prior calendar year;

(d) The total amount, by both weight and number of units, of each material used to contain, protect, handle, deliver, transport, distribute, or present products sold, offered for sale, or distributed into the state by all producers during the prior calendar year;

(e) The total amount, by weight, of each material category recycled as a result of activities undertaken by the organization, either directly or through reimbursement or contractual arrangement;

(f) A calculation of the recycling rate of each material category which is derived by dividing the amount of each material category recycled, as reported in paragraph (e) of this subdivision by the amount of each material category generated, as reported in paragraph (d) of this subdivision;

(g) A complete accounting of all payments made to and by the organization during the prior calendar year;

(h) An analysis of the average time it took to reimburse municipalities during the prior calendar year;

(i) A list of producers reasonably believed to be out of compliance with the requirements of this title, and the reason the organization reasonably believes the producer to be out of compliance. Information on non-compliant producers shall be provided to the commissioner and recycling inspector general's office in a timely fashion and for possible enforcement action by the office;

(j) A description of the educational and outreach efforts made by the organization in the prior calendar year, and how those efforts were designed to reduce packaging waste, and increase reuse and recycling of packaging materials;

(k) An assessment of whether the fee structure adopted by the organization pursuant to section 27-3413 of this title has been effective in incentivizing improvements to the design of packaging material, including actual reduction of packaging material, increases in reusable and refillable packaging material, recycling rates for packaging materials, and decreases in the amount of packaging material;

(l) A description of the reimbursements and expenditures, including the timeliness of such reimbursements, made pursuant to section 27-3413 of this title;

(m) A recommended minimum recyclables list that meets the requirements of subdivision one of section 27-3431 of this title, based on the needs assessment, information gathered from end markets, including commodity brokers and manufacturers who purchase post-consumer materials for use in manufacturing new products, and available collection and processing infrastructure information;

(n) Audited financial statements;

(o) The results of the review conducted pursuant to subdivision four of this section; and

(p) Any additional information required by the department.

4. Each organization shall conduct an annual review process to determine whether packaging materials are recyclable. This review shall be conducted in consultation with representatives of end markets, including recycled commodities brokers and manufacturers who purchase post-consumer material for use in manufacturing new products, and in consultation with local governments. For the purposes of calculating producer payments and local government reimbursements in accordance with this title, this annual process shall include a transitional period between the date the determination is finalized and the date it goes into effect.

5. Each organization shall conduct public outreach and provide consumers with educational and informational materials related to reducing the amount of packaging discarded, recycled, and disposed of in the state as outlined in section 27-3423 of this title.

6. Each organization shall operate a program that provides for collection convenience as described in section 27-3415 of this title.

7. An organization shall not share, except with the department, the advisory council, and the toxic packaging task force, or as required by law, any proprietary information that is identified by a producer as proprietary information without prior written consent.

§ 27-3407. Packaging reduction and recycling organization plan.

1. Within two years of the effective date of this title, the initial packaging reduction organization shall develop and submit a packaging reduction and recycling plan for implementation of the rules and regulations of this title, including ensuring timely disbursements to local governments, to the department for approval. The plan shall be submitted to the advisory council for review pursuant to section 27-3411 of this title prior to the department's approval. Any subsequent or additional organization shall develop and submit a packaging reduction and recycling plan and comply with all the requirements of this section, and have such plan approved pursuant to section 27-3409 of this title.

2. The plan shall cover five years and be updated every five years following the approval of the original plan. The department shall have the discretion to require the plan to be reviewed or revised prior to the five-year period pursuant to section 27-3419 of this title.

3. Each producer shall begin program implementation within six months after the date the plan for the initial organization is approved and in no event later than three years of the effective date of this title. If no plan is approved by that timeframe, the department, in its discretion, shall either approve a plan with conditions or specify modifications that must be made within forty-five days to conform the submitted plan to the requirements of this section. If a producer is not making good faith efforts to comply with the requirements of this title during such forty-five day period, the producer shall be subject to penalties for noncompliance.

4. The submitted plan shall include, but not be limited to:

(a) contact information, including the name, e-mail address, physical address, and telephone number of the authorized representative of the producer or producers;

(b) the identity of the producer or producers participating in the plan;

(c) a comprehensive list of the types and brands of covered materials for which the producer or producers are responsible for;

(d) a description of how the organization will implement the program, including the mechanisms and processes for providing assistance to producers to comply with the reporting requirements of this title;

(e) in relation to funding the program:

(i) a proposed budget outlining the anticipated costs of operating the program and a description of the method by which the organization intends to determine and collect producer payments during the initial startup period;

(ii) a description of the proposed funding mechanism, identified in section 27-3413 of this title, that meets the requirements of this title;

(iii) a description of how the organization will maintain a financial reserve sufficient to operate the program in a fiscally prudent and responsible manner; and

(iv) a description of how the organization intends to manage and account for all program related funds which pass through the organization, including how timely reimbursements to local governments will be provided;

(f) an objective formula establishing a reimbursement rate, which covers obligations identified in the needs assessment and the minimum recyclables list and takes into account variable regional costs, for participating local governments or private sector service providers;

(g) a description of the process for participating local governments or private sector service providers to recoup reasonable costs as established by the objective formula, from the producer or organization, including, as applicable, any administrative, sorting, collection, transportation, public education, or processing costs, if the organization uses existing services through a local government or obtains such services from a private sector service provider;

(h) at a minimum, the following funding mechanism details shall be provided in the plan:

(i) proposed program fees, provided as a table listing the rate paid for each material category, including at a minimum those identified in subdivision three of section 27-3413, which in sum, will generate sufficient funding to cover obligations identified in the needs assessment and the requirements of this title; and

(ii) proposed program fee adjustments to incorporate eco-modulation factors;

(i) a description of the characteristics of each type of packaging material that is relevant to the eco-modulating factors set forth pursuant to section 27-3413 of this title;

(j) if the local government does not elect to provide service, a description of the process used for contracting with a private sector entity to provide such services and the recoupment of reasonable costs, including procedures to ensure that such private sector entity is not compensated for such services by both the organization and the consumer for the same service, provided, however, that the packaging recycling and reduction organization and any such private sector entity has entered into a labor peace agreement with a bona-fide labor organization that is actively engaged in representing or attempting to represent its employees and its contractors' employees;

(k) a description of how the organization will work with existing waste haulers, material recovery facilities, recyclers, and local governments to operate or expand current collection programs to address material collection methods, improve efficiency and yield of processing

materials from separate collection streams, and increase packaging reduction and reuse;

(l) a description of how the organization will use open, competitive, and fair procurement practices should they directly enter into contractual agreements with service providers, including municipalities and private entities;

(m) a description of how a local government will participate, on a voluntary basis, with collection and how existing local government recycling processing and collection infrastructure will be used;

(n) a description of how the organization plans to meet the convenience requirements set forth in this title;

(o) a description of the process for end-of-life management, including recycling and disposal of residuals collected for recycling, using environmentally sound management practices;

(p) a description of how the organization shall provide the option to purchase recycled materials from processors;

(q) a description of how producers are complying with the waste reduction, toxics, recycling and post-consumer content requirements of this title, and the process for verifying compliance, including any third party verification services;

(r) a description of how: (i) the organization will strategically invest in existing and future reuse and recycling infrastructure and market development in the state in consultation with the department and in a manner not inconsistent with the needs assessment, including, but not limited to, installing or upgrading equipment to improve the sorting of covered materials or mitigating the impacts of materials on other commodities at existing sorting and processing facilities, and capital expenditures for new technology, equipment, and facilities; and (ii) how the process to offer and select opportunities will be conducted in an open, competitive, and fair manner;

(s) a description of how the organization's recycling infrastructure and market development investments (i) were informed by the results of the needs assessment, and (ii) will utilize the state's existing infrastructure;

(t) a process to address concerns and questions from customers and residents;

(u) a description of the organization's public outreach education program for consumers and other stakeholders;

(v) a description of how the comments of stakeholders were considered and addressed in the development of the plan;

(w) a detailed description of how the organization consulted with the advisory council, the public, and other stakeholders in the development of the plan prior to its submission to the department, and to what extent the organization specifically incorporated the advisory council's input into the plan;

(x) a comprehensive contingency plan demonstrating how the activities in the plan will continue to be carried out by some other entity, if needed, such as an escrow company, until such time as a new plan is submitted and approved by the department:

(i) upon the expiration of an approved plan;

(ii) in the event that the organization has been notified by the department that it must transfer implementation responsibility for the plan to a different organization;

(iii) in the event that the organization notifies the department that it will cease to implement an approved plan; or

(iv) in any other event that the organization can no longer carry out plan implementation; and

(v) any other additional information required by the department.

5. The organization shall also provide the advisory council a reasonable period of time to review and comment upon the draft plan prior to its submission to the department in accordance with section 27-3409 of this title which shall in no event be less than sixty days. The organization shall make an assessment of comments received and shall provide a summary and an analysis of the issues raised by the advisory council and significant changes suggested by any such comments, a statement of the reasons why any significant changes were not incorporated into the plan, and a description of any changes made to the plan as a result of such comments.

§ 27-3409. Packaging reduction and recycling plan approval.

1. Before approval or denial of a packaging reduction and recycling plan can be made in accordance with this title, the producer or organization shall submit the plan to the packaging reduction and recycling advisory council. The advisory council shall then make a recommendation regarding approval or disapproval of the plan in accordance with section 27-3411 of this title.

2. Within sixty days of the advisory council making a recommendation to the department, the department shall make a determination to approve the plan as submitted; approve the plan with conditions; or deny the plan, with reasons for the denial.

3. The department may establish additional plan requirements in addition to those identified herein to fulfill the intent of this title; provided, however, that any additional requirements shall be established one year prior to a required submission of a plan.

4. The department may rescind the approval of an approved plan at any time for cause and with documented justification.

5. The maintenance of a labor peace agreement as contemplated by paragraph (j) of subdivision four of section 27-3407 of this title shall be an ongoing material condition of plan approval.

6. For the purposes of this title, "labor peace agreement" means an agreement between an entity and labor organization that, at a minimum, protects the state's proprietary interests by prohibiting labor organizations and members from engaging in picketing, work stoppages, boycotts, and any other economic interference.

§ 27-3411. Packaging reduction and recycling advisory council.

1. There is hereby established within the department a packaging reduction and recycling advisory council to receive and review the packaging reduction and recycling plans required under section 27-3407 of this title, to make recommendations to the department regarding approval of the plans, to review the annual reports produced by organizations and to make recommendations to the department and organizations as required by this section.

2. The advisory council shall convene for the first time no later than one year after the effective date of this title. The advisory council shall be composed of seventeen members. Nine shall be appointed by the commissioner, three shall be appointed by the speaker of the assembly, one shall be appointed by the minority leader of the assembly, three shall be appointed by the temporary president of the senate and one shall be appointed by the minority leader of the senate. The advisory council shall include at least one member from each of the following:

(a) a local government association or local government program, including an additional local government representative from cities with a population of one million or more residents;

(b) a statewide environmental organization;

(c) a representative of a disadvantaged community affected by solid waste infrastructure;

(d) an environmental justice organization;

(e) a statewide waste disposal or recycling association;

(f) a materials recovery facility located within the state;

(g) a recycling collection provider;

(h) a manufacturer of packaging materials utilizing post-consumer recycled content;

(i) a consumer advocate;

(j) a retailer;

(k) a public health specialist;

(l) a producer and an organization established under this title as non-voting members;

(m) a representative of a labor organization representing waste collection employees; and

(n) a representative of a labor organization representing municipal solid waste and recycling processing employees.

3. Appointments to the advisory council are term-limited to ten consecutive years of service; the chair shall be chosen through a majority vote of its members and shall serve no longer than three consecutive years.

4. Advisory council members shall serve without compensation, except that a member of the committee who is a state officer or employee may receive their regular compensation while engaging in the business of the committee, but shall be entitled to receive reimbursement for any actual, necessary expenses incurred in the course of performing business for the committee.

5. All decisions made by the advisory council shall be decided by voting and votes shall only be valid when a quorum is present. A quorum shall exist when greater than fifty percent of voting members are present. The advisory council shall meet at least once a year by the call of the chair or by request of more than half the members. The decisions of the advisory council shall be by vote of the majority of its membership.

6. The council shall determine whether the plan submitted under section 27-3409 of this title meets the criteria and objectives under such section in making its recommendation.

7. The advisory council shall, within sixty days of the submission of a packaging reduction and recycling plan, either:

(a) forward the plan to the commissioner with its recommendation for approval; or

(b) forward the plan to the commissioner with its disapproval and stated reasons therefor, including any recommended changes to the plan necessary for approval.

8. An organization may resubmit a packaging reduction and recycling plan for approval at any time. Upon such resubmission, the advisory council shall, within sixty days, forward the plan to the commissioner with its recommendation for approval or disapproval.

9. The advisory council shall review the submitted annual reports and make such recommendations to the department and the organization for improving future administration of the program and compliance with this title.

10. Thirty months from the date the department adopts rules and regulations pursuant to this title, and every three years thereafter, the advisory council shall conduct a review of all relevant data, including annual reports, the latest scientific data available, any pertinent statewide waste and reuse data, and any other information deemed important, to make recommendations to the following:

(a) organizations for any changes in the administration of the program, including feedback on the education and outreach program as outlined in section 27-3423 of this title;

(b) the department for any necessary changes to regulations, the funding mechanism, reimbursement and expenditure policies, or whether it would be beneficial for there to be additional organizations implementing the program; and

(c) the legislature for recommended statutory changes. Such recommendations shall include a recommendation as to whether to modify the definition of recycling under this title.

§ 27-3413. Funding mechanism.

1. An organization shall establish such program participation fees for producers through the plan pursuant to section 27-3407 of this title, which shall be sufficient to cover all costs of the program, including administration, enforcement, the statewide needs assessment, and all other state costs of the program and organizations' costs of the program, including but not limited to those costs described in subdivision four of this section.

2. An organization shall structure program fees to provide producers with financial incentives through eco-modulation, to reward waste and source reduction and recycling compatibility innovations and practices, and to disincentivize designs or practices that increase costs of managing the products or materials that contain toxic substances.

3. An organization may adjust fees to be paid by participating producers based on factors that affect system costs. At a minimum, fees shall be variable based on:

(a) The category of packaging material, provided that the list of such packaging material categories for which there is a specific producer fee shall include, at a minimum, the following material types:

(i) Paper;

(ii) Cardboard;

(iii) Corrugated cardboard;

(iv) Wood;

(v) Glass;

(vi) Polyethylene terephthalate (PET);

(vii) High density polyethylene (HDPE);

(viii) Expanded polystyrene (EPS);

(ix) Polystyrene;

(x) Bio-plastics;

(xi) Generic plastics;

(xii) Plastic film;

(xiii) Other plastics;

(xiv) Ferrous metals;

(xv) Aluminum;

(xvi) Tinplate;

(xvii) Generic metals; and

(xviii) Mixed materials including laminates and packaging containing more than one of the above materials;

(b) The quantity of each packaging material type, by weight, that the producer sells, offers for sale, or distributes in the state;

(c) Eco-modulation, including as described in subdivision two of this section.

4. Producer fees shall be designed to cover, at minimum, the total costs associated with:

(a) Providing curbside collection or other form of residential service that is, at minimum, as convenient as is detailed in section 27-3415 of this title;

(b) The department's and other state agencies' administration and enforcement of this title;

(c) Organizations' administration of this title;

(d) The cost associated with the development of the needs assessment, as required in section 27-3421 of this title;

(e) The costs associated with the advisory council and the toxic packaging task force;

(f) The costs associated with establishing packaging reduction and reuse infrastructure;

(g) The cost of reimbursement for, or providing, recycling services, including the collection cost, processing cost for each recyclable material, cost of handling non-recyclable material types collected as part of a recycling operation, transportation cost of recycling for each material type; and

(h) Any other factors determined by the department.

5. An organization may adjust producer fees based on factors that affect system costs provided that the specific parameters of such adjustments and fees are included in the plan approved by the department. At a minimum, fees shall be variable based on:

(a) costs to provide curbside collection or another form of residential service that is, at minimum, as convenient as curbside collection or as convenient as the previous recycling collection plan in the particular jurisdiction should recycling collection not be provided;

(b) costs to process packaging materials for acceptance by secondary material markets;

(c) whether the packaging material would typically be readily-recyclable, except that as a consequence of the packaging design, the packaging product has the effect of disrupting recycling processes or the product includes labels, inks, and adhesives containing heavy metals or other toxic substances that would result in contamination of the recycling process;

(d) whether the packaging material is specifically designed to be reusable or refillable and has high reuse or refill rate; and

(e) the commodity value of a packaging material, as defined by published indices.

6. The fees shall be adjusted, or the producers may be provided a credit, as detailed in the plan, based upon the percentage of post-consumer recycled material content and such percentage of post-consumer recycled content shall be verified by the organization or through an independent third party approved to perform verification services to ensure that such percentage exceeds the minimum requirements in the packaging, as long as the recycled content does not disrupt the potential for future recycling.

7. In addition to the annual schedule of fees approved in the plan, an organization fee schedule may include a special assessment on specific categories of packaging materials, identified in the plan, if the nature of the packaging material imposes unusual costs in collection or processing or requires special actions to address effective access to recycling or successful processing in local government recycling facilities.

8. The fees shall be structured to provide producers with financial incentives to encourage:

(a) A reduction in total packaging as measured by unit weight used by producers, and discarded by consumers, businesses, institutions, and other users. Weight reductions shall not be achieved by substituting plastic for other materials types;

(b) An increase in the proportion of a producer's total packaging that is managed within a reuse and refill system;

(c) An increase in the proportion of a producer's total packaging that is deemed recyclable as determined by an annual review process as described in section 27-3405 of this title;

(d) An increase in the proportion of a producer's total packaging that is ultimately recycled;

(e) A reduction in toxic components in packaging materials; and

(f) A reduction in litter from packaging materials.

9. An organization shall be responsible for calculating and disbursing funding at a reasonable rate developed through an objective formula approved by the department, and such reasonable rate may be varied based on population density rates, for municipal services utilized by an organization if the municipality elects to be compensated by the organization in the collection, recovery, recycling, and processing of covered materials and products, whether such services are provided directly by the municipality or through a contracted service provider.

10. If a municipality does not elect to provide service, the organization shall be responsible for contracting with a private entity for services and shall be responsible for calculating and disbursing funding at a reasonable recycling program rate for collection, recycling, recovery, and processing services provided by the private sector entity contracted to provide such service. Any such contract shall be subject to a labor peace agreement as contemplated by paragraph (j) of subdivision four of section 27-3407 of this title.

11. To facilitate an organization's cost reimbursement determination, participating municipalities and private sector haulers contracting with the organization shall report data related to their costs and the value of materials to the organization. Cost calculations shall take into consideration the amount received from the sale of source-separated materials.

12. There shall be no fee assessed on reusable or refillable packaging and containers contained within a reuse or refill system.

13. Any funds directly collected pursuant to this title shall not be used to carry out lobbying activities on behalf of an organization.

14. No retailer may charge a point-of-sale or other fee to consumers to facilitate a producer or organization to recoup the costs associated with meeting the obligations under this title.

15. Nothing in this title shall require a local government to participate in the program, provided that a local government must give at least three months' notice of its intent to cease participation.

§ 27-3415. Collection and convenience.

1. The program shall provide for widespread, convenient, and equitable access to collection opportunities for recyclable packaging materials at no additional cost. Such opportunities, including curbside recycling, shall be provided to all residents of the state in a manner that is as convenient as the collection of solid waste as provided to the consumer as of the effective date of this title. Organizations shall ensure services continue for curbside recycling programs as of the effective date of this title, either directly or through a contract to provide

services, and that such services are continued through such producer or organization's plan pursuant to section 27-3405 of this title.

2. Participation in the program shall not restrict a jurisdiction's consumer's ability to contract directly with third parties to obtain recycling collection services if consumers have the option to enter into such contracts as of the effective date of this title, as long as the consumer still voluntarily chooses to contract directly with the third party. The local government shall not provide disbursement to such third party should the local government provide widespread recycling services either directly or through a contract that is different from the contract with such third party, and there shall be procedures in place to ensure that no service provider is compensated more than once for the same service.

3. Organizations may rely on a range of means to collect various categories of packaging materials so long as collection options include curbside recycling collection services provided by municipal programs, municipal contracted programs, solid waste collection companies, or other approved entities as identified by the department if at a minimum:

(a) the category of packaging materials is on the minimum recyclables list, is suitable for residential curbside recycling collection and can be effectively sorted by the facilities receiving the curbside collected material;

(b) the category of packaging materials is not handled through a deposit and return scheme or buy back system that relies on a collection system other than curbside or multi-family collection;

(c) the provider of the curbside recycling service agrees to the organization's service provider costs arrangement; and

(d) any private contract for such services is subject to a labor peace agreement as contemplated by paragraph (j) of subdivision four of section 27-3407.

4. All local government or private recycling service providers shall provide for the collection and recycling of all packaging materials contained on the minimum recyclables lists, based on geographic regions, in order to be eligible for reimbursement; provided, however, nothing shall penalize a local government or private recycling service for recovering and recycling materials that are generated in the local government or geographic region that are not included on the minimum recyclables lists as long as it can be demonstrated that such materials have a consistent regional market for purchase as determined by the department in consultation with the producer or organization.

5. Reimbursement shall cover collection, processing, transportation, and recycling and disposal of all packaging materials so long as the program includes at least the minimum recyclables list. The department may grant an exception to the requirements in this subdivision upon a written showing by the local government or private recycling service that compliance with the requirements is not practicable for a specific identified product or material and if the department finds it is in the best interest of the intent of this title to grant an exception; provided, however, that any such exception granted by the department shall not exceed twelve months.

6. Program funds shall be used for investment in collection systems, transportation systems, reuse systems, washing systems, redistribution systems, technology for tracking and data collection, capital expenditures on new and emerging technology that is focused on reusable and refillable packaging, as well as equipment, and facilities, and other

projects determined by the department to facilitate the goals and objectives of this title.

7. Nothing in this title shall be deemed to automatically void or nullify any collection contracts in effect as of the effective date of this title.

§ 27-3417. Producer responsibilities.

1. Beginning with the required program implementation date as contemplated by subdivision three of section 27-3407 of this title and in no event later than three years after the effective date of this title, a producer shall not sell, offer for sale, or distribute into the state a product contained, protected, delivered, presented, or distributed in packaging unless the producer is registered with an organization and in full compliance with all requirements of this title. Producers shall register with the initial organization within eighteen months of the effective date of this title; provided, however, that any person who becomes a producer thereafter shall register with an organization and begin program implementation within six months thereof or be subject to penalties for noncompliance.

2. Either when the producer registers, or within eighteen months of the effective date of this title, whichever is later and annually thereafter, each producer shall provide the organization with the following information:

(a) Contact information, including the name, e-mail address, physical address, and telephone number of the authorized representative of the producer;

(b) A comprehensive list of the categories and brands of packaging materials for which the producer or producers are responsible;

(c) The total amount, in units and weight, of each category of packaging material sold, offered for sale, or distributed for sale into the state by the producer in the prior calendar year; and

(d) Any other information required by the department.

3. Producers are responsible for payment of fees, through an organization, based on the quantity, category of packaging material used in the state, and other factors.

4. Producers are responsible for meeting the toxic substances, packaging material reduction, post-consumer content, and recycling standards under this title.

5. A producer shall electronically submit annually, to both the department and the packaging reduction and recycling organization, a written declaration signed by its chief executive officer, verifying the producer's compliance with:

(a) The packaging material reduction requirements of this title;

(b) The packaging material recycled content requirements of this title;

(c) The packaging material recycling requirements of this title;

(d) The toxic substance reduction requirements of this title;

(e) Their obligations to pay fees to the organization pursuant to section 27-3413 of this title and subdivision three of this section; and

(f) Any reimbursement obligations they have to local governments or third party service providers in connection with this title.

6. A producer is exempt from the requirements and prohibitions of this title in a calendar year in which:

(a) The producer and its affiliates collectively realized less than five million dollars in total gross revenue during the prior calendar year;

(b) The producer and its affiliates collectively sold, offered for sale, or distributed for sale products contained, protected, delivered, presented, or distributed in or using less than two tons of packaging material in total during the prior calendar year;

(c) The producer is a not-for-profit corporation that is primarily engaged in preparing and delivering medically tailored meals and medical nutrition therapy. As used in this paragraph, "medically tailored meals and medical nutrition therapy" means nutritional assessment, nutritional therapy, and nutritional counseling provided by a certified dietician or certified nutritionist, and the provision of any food indicated by such assessment, therapy or counseling and ordered by a health care professional acting within their lawful scope of practice under title eight of the education law, for the purpose of treating one or more chronic conditions for an individual who is limited in their activities of daily living; or

(d) is an agricultural cooperative with less than fifty employees engaged in the production of dairy products.

7. A producer claiming an exemption pursuant to subdivision six of this section shall provide the department with sufficient information to demonstrate that the claimant is eligible for an exemption.

8. Nothing in this title shall impair a producer's eligibility for tax credits or other business incentives for which they would otherwise qualify.

§ 27-3419. Department responsibilities.

1. Within eighteen months of the effective date of this title, the department shall, in accordance with section 27-3435 of this title, promulgate all rules and regulations necessary to implement, administer, and enforce the provisions of this title, including setting standards for consumer protection when the organization directly disburses funds to third parties. These rules and regulations shall include prohibiting certain toxics in packaging pursuant to section 27-3425 of this title as of the dates set forth therein.

2. Beginning two years after the required program implementation date as contemplated by subdivision three of section 27-3407 of this title and in no event later than three years after the effective date of this title, and annually thereafter, the department shall utilize the information obtained pursuant to paragraphs (b), (c), (d), (e), (f) and (g) of subdivision three of section 27-3405 of this title, and any other information available to the department, with input from the advisory council, to produce an annual report to be shared with the legislature and posted publicly on the department's website.

3. The department shall establish and maintain the minimum recyclables list by regulation. The department shall update this list annually, after the initial organization's plan is first approved, considering recommendations from organizations and the advisory council. The minimum recyclables list may vary by geographic region depending on regional markets and regional collection and processing infrastructure, but shall in all cases meet the requirements of subdivision one of section 27-3431 of this title.

4. In the event that the department determines that the organization no longer meets the requirements of this title, or fails to implement and administer the requirements of this title in a manner that effectuates the purposes of this title, after reasonable opportunity to cure such deficiencies, the department shall revoke its approval of such organization and, subject to the contingency plan contemplated by para-

graph (w) of subdivision four of section 27-3407 of this title, shall select a new organization pursuant to section 27-3403 of this title.

§ 27-3421. Statewide packaging reduction, reuse, and recycling needs assessment.

1. No later than one year after the effective date of this title and every five years thereafter, the department shall complete or cause to be completed a statewide packaging material reduction, reuse, and recycling needs assessment to determine the current state of packaging material reuse, recycling, and disposal, identify barriers and opportunities to reduce the amount of packaging material discarded and disposed of, and increase the reusability and recyclability of packaging material.

2. The needs assessment, at a minimum, shall cover the following:

(a) The current recycling rate for each type of packaging material;

(b) The amount, by weight and material type, of packaging material recycled at each recycling facility that accepts discarded packaging material generated in the state;

(c) The processing capacity, market conditions, and opportunities in the state and regionally for recyclable materials generally, and packaging material categories specifically;

(d) The net cost of end-of-life management of discarded packaging material in the state, including the cost associated with the collection, transportation, sortation, recycling, littering, landfilling, or incineration of discarded packaging;

(e) The availability of opportunities in the recycling and reuse system for minority- and women-owned businesses;

(f) Current barriers affecting recycling access and availability in the state;

(g) Current barriers to the marketability of recyclable materials generated in the state;

(h) Opportunities for the creation of packaging material reuse and refill programs in the state;

(i) Opportunities for the improvement of packaging material recycling in the state, including the development of end markets for recycled packaging materials;

(j) Current barriers affecting the creation and implementation of packaging material reuse and refill programs;

(k) Consumer education needs in the state with respect to packaging material waste reduction, recycling, and reducing contamination in recycling, and reuse and refill systems for packaging material; and

(l) Landfill capacity.

3. The cost incurred by the department associated with conducting the needs assessment shall be paid for by the organization.

4. The department shall report the results of the needs assessment to the public, the state legislature, and the governor, and shall post the results on its website.

§ 27-3423. Education and outreach program.

1. The organization shall develop and implement an educational outreach program designed to educate the public about waste reduction and improve the effectiveness of local government recycling and, at a minimum, include:

(a) Educational and informational materials for consumers related to reducing the amount of packaging discarded, recycled, and disposed of in the state;

(b) A description of the environmental, social, economic, and environmental justice impacts associated with improper disposal of packaging material and failure to reuse or recycle packaging materials;

(c) Information on the proper end-of-life management of packaging material, including reuse, recycling, composting, and disposal;

(d) The location and availability of curbside collection and additional drop-off collection opportunities for packaging material, including deposit and take-back programs;

(e) How to prevent litter of packaging material in the process of collection;

(f) Recycling instructions that are consistent statewide, except as necessary to take into account differences among local laws and processing capabilities, easy to understand, and easily accessible; and

(g) Any other information required by the department.

2. The educational outreach program shall incorporate, at a minimum, electronic, print, web-based and social media elements, including for use by local governments at their discretion, as well as including a variety of outreach and education tools. Such educational outreach programs shall ensure materials are widely accessible and available in multiple languages.

3. The educational outreach program shall be coordinated with and assist local government programs, local government contracted programs, solid waste collection companies, and other entities providing services.

4. The educational outreach program shall be developed to ensure disadvantaged communities receive targeted outreach and support.

5. The educational outreach program shall include a plan to work with producers to label or mark packaging material, in accordance with reasonable labeling standards, with information to assist consumers in responsibly managing and recycling covered products.

6. The organization shall consult with local governments on the development of educational materials and may coordinate with local governments on outreach and communication.

7. The organization shall be authorized to provide producers and retailers with educational materials related to the responsible reduction, reuse, recycling, or disposal of discarded packaging material. The educational and informational materials provided to the retailer under this subdivision may include, but need not be limited to, printed materials, signage and templates of materials that can be reproduced by retailers and provided thereby to consumers at the time of a product's purchase, and advertising materials that promote and encourage consumers to properly reuse, recycle, or dispose of packaging material.

8. The organization shall make information on relevant tax credits and other business incentives available to producers.

§ 27-3425. Prohibition on certain toxic substances and materials.

1. Notwithstanding title two of article thirty-seven of this chapter to the contrary, (a) Beginning three years after the promulgation of rules and regulations pursuant to this title, no person or entity shall sell, offer for sale, or distribute into the state any packaging containing any of the following toxic substances or materials as an intentionally added substance:

(i) Ortho-phthalates;

(ii) Bisphenols;

(iii) Per- and polyfluoroalkyl substances (PFAS);

(iv) Heavy metals and compounds, including lead, hexavalent chromium, cadmium, and mercury, but excluding copper phthalocyanine (chemical abstracts service registry number 147-14-8);

(v) Benzophenone and its derivatives;

(vi) Halogenated flame retardants;

(vii) Perchlorate;

(viii) Formaldehyde;
(ix) Toluene;
(x) Antimony and compounds;
(xi) UV 328 (2-(2H-benzotriazol-2-yl)-4,6-di-tert-pentylphenol);
(xii) Polyvinyl chloride, including polyvinylidene chloride;
(xiii) Polystyrene but excluding EPS (expanded polystyrene); or
(xiv) Polycarbonate.

(b) Beginning five years after the promulgation of rules and regulations pursuant to this title, no person or entity shall sell, offer for sale, or distribute into the state any packaging containing any of the toxic substances listed in paragraph (a) of this subdivision, even if they are not an intentionally added substance, at or above a level that the department shall establish by regulation that is the lowest level that can feasibly be achieved; provided, however, that the department shall review such level every five years to determine whether it should be lowered.

2. (a) There is hereby established within the department a toxic packaging task force to review the toxicity in packaging in the state, and to recommend to the department the designation of additional toxic substances which shall be subject to the same prohibition as those substances listed in subdivision one of this section.

(b) The toxic packaging task force shall have nine members, one of whom shall be the commissioner or their designee who shall be chair, and one of whom shall be the commissioner of health or their designee. The other members shall include: (i) a representative of the packaging industry; (ii) a representative of an environmental justice organization; (iii) a representative from the chemical industry; (iv) a professional or academic expert in toxicology; and (v) a professional or academic expert in public health risk assessment; all of whom shall be appointed by the commissioner. The remaining members shall be persons with significant professional or academic expertise in maternal or child health, epidemiology, chemical safety or public health policy, one of whom shall be appointed by the temporary president of the senate and one of whom shall be appointed by the speaker of the assembly. Appointments to the toxic packaging task force are term limited to five consecutive years of service.

(c) The task force shall meet at least twice per year to review and recommend to the department whether (i) there are additional toxic substances or classes of toxic substances for use in packaging that should no longer be sold, offered for sale, distributed for sale, or distributed for such use in this state, and (ii) there should be substance or material-specific exceptions to the prohibitions provided for in subdivision one of this section, provided such recommendation may be made only upon a demonstration of substantial and convincing evidence that such substance or material does not meet the criteria for classification as a toxic substance or material.

3. (a) Within one hundred eighty days of the toxic packaging task force recommending the designation of an additional toxic substance, the department shall adopt rules and regulations to designate such substance as a toxic substance under this section and prohibit the use of such toxic substance in packaging in the same manner as those toxic substances listed in subdivision one of this section, with an effective date no later than two years after the date of such recommendation, unless the department determines that such two-year period would be unduly burdensome, in which case the department shall establish an

effective date for such prohibition no later than four years after the date of such recommendation.

(b) The department may evaluate recommendations from the toxic packaging task force for exceptions as provided in paragraph (c) of subdivision two of this section, and upon a demonstration of substantial and convincing evidence that such substance or material does not meet the criteria for classification as a toxic substance or material, may adopt rules and regulations to except such substance as a toxic substance or material.

4. Any producer that violates this section, or any rules or regulations promulgated pursuant to this section, shall be subject to a fine for each violation not to exceed ten thousand dollars per violation. For the purposes of this section, each product line that is sold, offered for sale, or distributed to consumers, via retail commerce, in the state, including through an internet transaction shall be considered a separate violation.

§ 27-3427. Non-reusable packaging reduction standards.

1. Each individual producer is required to meet the following packaging reduction requirements:

(a) Beginning three years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the third year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, in each case, by ten percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(b) Beginning five years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the fifth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, in each case, by fifteen percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(c) Beginning eight years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the eighth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, for all materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale into the state, in each case, by twenty percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(d) Beginning ten years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the tenth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging

material, and the amount of all other packaging material, for all materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale into the state, in each case, by twenty-five percent either on a company-wide basis or by unit weight for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

(e) Beginning twelve years after the program implementation date set forth in subdivision three of section 27-3407 or January first of the twelfth year following the date on which a producer first registers with an organization if a producer registers after the program implementation date, such producer shall reduce the amount of primary plastic packaging material, and the amount of all other packaging material, for all materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale into the state, in each case, by thirty percent either on a company-wide basis or by unit weight, for all packaging materials used to contain, protect, deliver, present, or distribute the products they sell, offer for sale, or distribute for sale in the state.

2. The reductions required by this section shall be measured against the packaging material the producer used during the first year such producer registered with an organization.

3. These reductions shall be achieved by eliminating single-use packaging material, including secondary or tertiary packaging material, elimination of packaging material components, reduction of packaging material components, or by transitioning to reusable or refillable packaging systems. Reductions may also be achieved by substituting plastic packaging material with non-plastic packaging material. However, the reductions required by this section shall not be achieved by substituting non-plastic materials with plastic materials or substituting recyclable materials with non-recyclable materials.

4. In the case of a producer for which, as of the effective date of this title or upon entry into the market after such effective date, a portion of its packaging is reusable and contained within a reuse and refill system, such producer may apply to the department for a waiver from the packaging reduction requirements set forth in subdivision one of this section with respect to that percentage of its packaging, by unit weight, which is contained within a reuse and refill system.

5. In the case of a producer that demonstrates in a manner satisfactory to the department that, for the period beginning ten years prior to the effective date of this title and ending on the date which is two years after the effective date of this title, the producer reduced the amount of packaging used to contain, protect, deliver, present, or distribute the products the producer sells, offers for sale, or distributes for sale into the state, such producer may apply to the department for a waiver from the packaging reduction requirements of this section with respect to that percentage of its packaging, by unit weight, which was reduced during such twelve-year period.

6. A producer may apply to the department for a waiver from the reduction requirements of this section if compliance is impossible due to federal law or otherwise conflicts with federal law. Such waiver must be applied for annually. In such application the producer shall provide the department and the advisory council with sufficient information, in the determination of the department in consultation with the advisory council, to make a determination on such application, including

proof that the producer has taken all feasible actions to achieve the reductions required by this section.

7. Nothing in this section shall preclude a producer from going beyond the reduction standards in subdivision one of this section.

§ 27-3429. Recycled content standards.

1. Each individual producer shall meet the recycling content targets contained in this section.

2. Beginning two years after promulgation of rules and regulations pursuant to this title:

(a) all glass containers manufactured in the state used by the producer shall contain, on average, at least thirty-five percent post-consumer recycled content;

(b) all paper carryout bags sold, offered for sale, or given away free in the state by a producer shall contain, on average, at least forty percent post-consumer recycled content; except that a paper carryout bag that holds eight pounds or less shall only be required to contain, on average, at least twenty percent post-consumer recycled content; and

(c) all plastic trash bags sold or offered for sale in the state by a producer shall contain, on average, at least twenty percent post-consumer recycled content.

3. The requirements of this section shall not apply to reusable or refillable packaging or containers.

4. Beginning two years after plan implementation begins for the initial organization, the department is authorized, in consultation with the advisory council, to:

(a) establish content requirements for materials not listed in subdivision two of this section; and

(b) modify the post-consumer recycled content targets for the materials set forth in subdivision two of this section, provided that modifications do not result in a lesser percentage or an earlier year for the respective target.

§ 27-3431. Recyclability criteria and packaging recycling requirements.

1. Beginning two years after the promulgation of rules and regulations pursuant to this title, packaging materials used by a producer shall meet the following recyclability criteria:

(a) be capable of being sorted by entities that process recyclable material generated in the state;

(b) have a consistent regional market for purchase, by end users in the production of new products;

(c) not contain the following:

(i) opaque or pigmented polyethylene terephthalate;

(ii) oxo-degradable additives, including oxo-biodegradable additives;

(iii) polyethylene terephthalate glycol in rigid packaging;

(iv) label constructions, including adhesives, inks, materials and formats, or features that render a package non-recyclable or disruptive to the recycling process; and

(v) DoPS - polystyrene, excluding EPS (expanded polystyrene);

(d) meet the post-consumer content requirements of this title; and

(e) any other criteria determined by the department.

2. Each individual producer shall be required to meet the following recycling rate standards:

(a) With respect to the producer's non-plastic packaging:

(i) Beginning January first, two thousand thirty, a minimum of thirty-five percent of packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled, with a minimum of five percent being reused;

(ii) Beginning January first, two thousand thirty-seven, a minimum of fifty percent of packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled, with a minimum of ten percent being reused; and

(iii) Beginning January first, two thousand fifty-two, a minimum of seventy-five percent of packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled, with a minimum of twenty percent being reused.

(b) With respect to plastic packaging:

(i) Beginning January first, two thousand thirty, a minimum of twenty-five percent of plastic packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled;

(ii) Beginning January first, two thousand thirty-seven, a minimum of fifty percent of plastic packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled; and

(iii) Beginning January first, two thousand fifty-two, a minimum of seventy-five percent of plastic packaging material reported by the producer or an organization as supplied into the state shall be reused or recycled.

3. The department may adjust the recycling rates in subdivision two of this section by rulemaking based on information gathered through the needs assessment or provided in producer plans and reports, and/or based on consideration of environmental, technical and economic conditions. An adjustment to the statewide recycling and reuse performance targets may not adjust the recycling rate target to less than thirty percent or more than seventy-five percent.

4. A producer may apply to the department for a waiver from the recycling rate requirements of this section if compliance is impossible due to federal law or otherwise conflicts with federal law. Such waiver shall be applied for annually. In such application the producer shall provide the department and the advisory council with sufficient information, in the determination of the department in consultation with the advisory council, to make a determination on such application, including proof that the producer has taken all feasible actions to achieve the reductions required by this section.

5. The requirements of subdivision two of this section shall not apply to reusable or refillable packaging or containers.

§ 27-3433. Establishment of the office of recycling inspector general.

1. The commissioner shall establish an independent office of recycling inspector general within the department. The recycling inspector general shall evaluate the programs and organizations created pursuant to this title on an annual basis and shall ensure such programs are functioning properly, and that all organizations and producers are in compliance with the requirements of this title.

2. The recycling inspector general shall have the authority to investigate the compliance of producers and the organization with all provisions of this title and to bring enforcement actions for violations of this title pursuant to the provisions of section 27-3435 of this title. A violation by the organization as the result of actions by one or more producers shall be enforceable by the recycling inspector general as violations against such producers.

§ 27-3435. Penalties and enforcement.

1. Failure to comply with the requirements of this title shall subject the organization or an individual producer to penalties for violations.

The department, recycling inspector general, or attorney general, may conduct investigations, including inspecting operations, facilities, and records of producers and organizations, and performing audits of producers and organizations, to determine whether such producers and organizations are complying with the requirements of this title.

2. The department, the recycling inspector general, or the attorney general, shall notify an organization or producer of any conduct or practice that does not comply with the requirements of this title and of any inconsistencies identified in an audit.

3. The department, the recycling inspector general, and the attorney general, may issue a notice of violation to, and impose an administrative civil penalty not to exceed one thousand dollars per day per violation on any entity not in compliance with this title or any of the regulations the department adopts to implement this title. For the purposes of this section, each product line that is sold, offered for sale, or distributed to consumers via retail commerce in the state, including through an internet transaction, shall be considered a separate violation.

4. Civil penalties under this section shall be assessed by the department after an opportunity to be heard pursuant to the provisions of section 71-1709 of this chapter, or by the court in any action or proceeding pursuant to section 71-2727 of this chapter, and in addition thereto, such person or entity may by similar process be enjoined from continuing such violation and any permit, registration or other approval issued by the department may be revoked or suspended or a pending renewal denied.

§ 27-3437. Rules and regulations.

1. Within eighteen months after the effective date of this section, the department shall promulgate all rules and regulations necessary to implement, administer, and enforce the provisions of this title.

2. When promulgating rules pursuant to the provisions of this section, the department shall solicit input from the public of any draft rule or regulation to implement this section, including at a minimum a ninety-day comment period and one public hearing on such draft rules.

§ 27-3439. State preemption.

Jurisdiction in all matters pertaining to costs and funding mechanisms of packaging reduction and recycling organizations relating to the recovery of packaging materials shall, by this title, be vested exclusively in the state; provided, however, that nothing in this title shall preclude any city, town, village or other local planning units from determining what materials shall be included for recycling in a local government recycling collection program or shall preclude any person from coordinating, for recycling or reuse, the collection of packaging materials and products.

§ 27-3441. Other assistance programs.

Nothing in this title shall impact any producer eligibility for any state or local incentive or assistance program to which they are otherwise eligible.

§ 27-3443. Antitrust protections.

A producer shall not be liable for any claim of a violation of antitrust, restraint of trade, or unfair trade practice arising from conduct undertaken in order to comply with this title; provided, however, this section shall not apply to any agreement establishing or affecting the price of packaging material, or the output or production of any agreement restricting the geographic area or customers to which packaging material will be sold.

**§ 27-3445. Severability.**

**The provisions of this title shall be severable and if any phrase, clause, sentence or provision of this title or the applicability thereof to any person or circumstance shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.**

§ 3. The environmental conservation law is amended by adding a new section 37-0202 to read as follows:

**§ 37-0202. Applicability.**

**This article shall only have effect to the extent that the prohibitions in this title are not otherwise substantially given effect or in conflict with the provisions of title thirty-four of article twenty-seven of this chapter.**

§ 4. This act shall take effect immediately.
