14. CITY CLERK'S REPORT

15. CITY ATTORNEY'S REPORT

15.A Proposed Legislative Bill Summaries, weeks four and five of Florida's legislative session.

16. ADJOURNMENT

Pursuant to Florida Statutes 286.0105, if an individual decides to appeal any decision made by the board, agency or commission of the City of New Smyrna Beach with respect to any matter considered at this meeting, a record of the proceedings will be required and the individual will need to ensure that a verbatim transcript of the proceedings is made, which record includes the testimony and evidence upon which the appeal is based. Such person must provide a method for recording the proceedings.

In accordance with the Americans with Disabilities Act, persons needing assistance to participate in any of these proceedings should contact the City Clerk’s office in person or by mail at 210 Sams Avenue, New Smyrna Beach, Florida 32168, (386) 410-2630, prior to the meeting.

THE CITY OF NEW SMYRNA BEACH - LEISURE SERVICES

PROCLAMATION: RECOGNIZING JUNETEENTH

May 27, 2025

Background:

June 19th has officially been designated as Juneteenth Independence Day, marking it as the 11th federal holiday and the first new federal holiday since the establishment of Martin Luther King Jr. Day in 1983. This year, the City of New Smyrna Beach will commemorate this occasion for the 2nd year, partnering with community members and organizations to promote unity and mutual respect. The city will host activities that honor and celebrate the cultural heritage and achievements of the African American community in recognition of Juneteenth.

The celebration will commence with a Juneteenth Gala at the Brannon Center on June 14th and culminate with a community event at Pettis Park on June 21st. The gala will not only recognize local community leaders but will also award scholarships to four New Smyrna Beach High School students pursuing higher education. Our aim is to foster an ongoing celebration of progress that enhances awareness of Juneteenth and bridges the past, present, and future. Members of the Juneteenth committee will be present for the proclamation presentation by the Mayor and City Commission.

City of New Smyrna Beach
Proclamation
Recognizing
Juneteenth

WHEREAS, on June 19, 1865, federal authorities arrived in Galveston, Texas, and informed enslaved African Americans that the Civil War had ended and they were now free; and June 19th—commonly known as Juneteenth—has long been recognized and celebrated as the day slavery officially ended in the United States; and

WHEREAS, formerly enslaved African Americans in the Southwest commemorated June 19th as the anniversary of their emancipation, passing down the tradition through generations as a source of strength, inspiration, and hope; and Juneteenth has been celebrated for more than 150 years as a testament to the enduring spirit of freedom and the struggle for equality in America; and

WHEREAS, the Juneteenth celebration honors the memory of those who endured the horrors of slavery and those who made the journey from slavery to freedom, whose faith, courage, and strength of character remain a powerful lesson for all Americans, regardless of background, race, or religion; and

WHEREAS, the annual observance of Juneteenth Independence Day is an essential part of our national heritage. On June 17, 2021, President Joe Biden signed the Juneteenth National Independence Day Act into law, officially designating Juneteenth as the 11th federal holiday and the first new federal holiday since the creation of Martin Luther King Jr. Day in 1983;

NOW, THEREFORE, I, Fred E. Cleveland, Mayor of the City of New Smyrna Beach, do hereby proclaim June 19th of each year as

"Juneteenth Independence Day"

in the City of New Smyrna Beach, and urge all citizens to honor the past, celebrate the present, and embrace the future by learning more about the resilience, contributions, and achievements of those who helped shape our nation.

IN WITNESS WHEREOF, I have hereunto set my hand this 27th day of May, 2025.

City of New Smyrna Beach

Proclamation

Recognizing

Gary Norville

Whereas, the New Smyrna Beach Airport stands as a testament to our nation's rich military history, serving as a pivotal component in today's national airspace system, and remains a beacon of pride for the community; and

Whereas, American Aero Services, under the leadership of Gary Norville, has been a major and valued tenant at New Smyrna Beach Airport since 1988, contributing significantly to both the local community and the aviation industry; and

Whereas, Gary Norville has demonstrated an unwavering commitment to the preservation and restoration of vintage warbirds, military vehicles, military armor, missiles, rockets, and other historically significant artifacts, ensuring that the legacy of those who have served is never forgotten; and

Whereas, Gary's deep knowledge of military history, particularly as it relates to the airport's past, has created a bridge between the past and the present, highlighting the importance of the airport's role in both history and the future of aviation; and

Whereas, Gary and his dedicated team have consistently provided critical support to the airport, especially during emergencies, by offering their expertise, equipment, and manpower to efficiently remove disabled aircraft from the runway, ensuring the safety and continued operation of the airport; and

Whereas, Gary Norville's contribution to New Smyrna Beach Airport goes far beyond business, embodying the spirit of service and dedication to both the preservation of aviation history and the community's ongoing success;

Now, therefore, we, the City of New Smyrna Beach, do hereby recognize and honor **Gary Norville** for his outstanding contributions, his tireless commitment to preserving our military heritage, and his integral role in supporting and strengthening New Smyrna Beach Airport. His work continues to enrich our community and aviation history, and we express our deepest gratitude for his service.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the City of New Smyrna Beach to be affixed this 8th day of April 2025.

MEMORANDUM

FROM THE OFFICE OF THE CITY MANAGER

To: Mayor and City Commission

From: Kevin Cowper, City Manager

Re: **City Manager's Report – May 27, 2025**

Date: May 21, 2025

- Continued preparations for the 2026 Fiscal Year Budget scheduled to be approved September 23. Met with Finance staff daily the week of May 12 to finalize the first draft of the proposed FY 2026 budget. Held meetings with each member of the Commission to review the proposed FY 2026 Budget.

- Attended the Volusia County Elected Officials Roundtable meeting on May 12 and received updates about the 2025 Legislative Session, New Volusia County Dangerous Dogs Regulations, 2025 Hurricane Season Preview, 2025 Sea Turtle Nesting Season and Construction Extension, and Flooding Subcommittee Report.

- Attended the Mayor/Manager Breakfast on May 13 to discuss issues of mutual interest between New Smyrna Beach, Edgewater, and Port Orange.

- Attended the Southeast Volusia Chamber of Commerce State of the County luncheon on May 13 and heard presentation on County activities by Councilmember Jake Johansson.

- Followed up on citizen comments received during the May 13 City Commission meeting about vehicular safety at the Flagler – Cooper and Ocean - Cooper intersections. Staff is reviewing options.

- Followed up on citizen comments received during the May 13 City Commission meeting about vehicular safety at the 3rd Avenue - Saxon

intersection. Staff is coordinating with the State and County to review the traffic signal timing and need for a left turn signal.

- Followed up on citizen comments received during the May 13 City Commission meeting about State Highway 44 resurfacing. The Florida Department of Transportation currently plans to resurface a 2.5 mile section of Highway 44 from just west of I-95 to east of South Walker Drive. In addition to resurfacing, the project will include limited sidewalk construction, curb ramp upgrades to meet Americans with Disabilities Act standards, drainage improvements, and a full reconstruction of the traffic signal at Sugar Mill Drive. Construction is currently scheduled to begin in August 2026.

- Attended the Marine Discovery Center Ribbon Cutting Ceremony on May 15 to celebrate the completion of the Living Shoreline Project.

- Attended the City Commission Workshop on May 15 to discuss sidewalks, pole signs and landscaping/tree preservation.

- Attended the Human Resources Open House on May 22 for their new offices in the former Connor Library building. This relocation is part of a larger reassignment of office space in City Hall to better utilize available space and meet the needs of our staff and citizens.

- Attended the Volusia League of Cities Annual Awards Banquet on May 22. Congratulations to Assistant Airport Director Jacob Cosat who was presented with the Public Works Employee of the Year Award.

- Held a hurricane pre-season meeting with City staff to begin preparations for the upcoming hurricane season, which begins on June 1.

- Please find attached the April Financial Report.

- Please find attached the April Permit Issuance Report.

- Please find attached the April Digital Media Report.

- Please find attached the April NSBU Monthly Capacity Metrics Report.

- Should you have any questions or need additional information or clarification, on any of the teams presented in this report, please let me know.

April 2025	3.940	56.3%

Definitions:
MGD = Millions of Gallons per Day
TMADF = 3 Month Average Day Flow (this is the flow that our capacity available is determined on with FDEP)
Water Plant Permit Capacity = 10.368 MGD
Wastewater Plant Permit Capacity = 7.0 MGD

PLEASE NOTE: Florida has a very broad public records law. Most written communications, and email addresses, sent to or

THE CITY OF NEW SMYRNA BEACH - AIRPORT

RESOLUTION NO. 13-25: CONSIDER THE ADOPTION OF A RESOLUTION, WHICH IF ADOPTED, WOULD APPROVE THE FDOT GRANT OFFER FOR A PUBLIC TRANSPORTATION GRANT AGREEMENT (PTGA) NO. 456950-1-94-01 AIR TRAFFIC CONTROL EQUIPMENT UPGRADE.

May 27, 2025

Background:

The New Smyrna Beach Air Traffic Control Tower (ATCT) has an existing Airport Lighting Control System (ALCS) equipment that is more than 20 years old and is beyond its service life. Parts are no longer available for the system, and we are experiencing service outages. During discussions with the Florida Department of Transportation Aviation office about this issue, they offered to assist with a grant to help pay for the replacement of this critical airport infrastructure.

Airport Lighting Control Panels (ALCPs) are used for remote control of airport lighting and auxiliary aids. The configuration of the control panel is custom-designed and built to accommodate the lighting control features and functions required at each specific airport. Toggle, rotary, or push-button switches can be installed on the panel to manually turn on and off airport lighting equipment requiring remote control.

Findings:

Staff recommends approval of the FDOT Grant offer for a Public Transportation Grant Agreement for the Air Traffic Control Equipment Upgrade.

Fiscal Analysis:

If approved, a budget amendment will be forthcoming.

10454201.567207

Total Project Cost - $62,500
Reimbursed by FDOT (80%) - $50,000
Local Share Airport Fund (20%) - $12,500

Strategic Plan Item:

No

THIS PUBLIC TRANSPORTATION GRANT AGREEMENT ("Agreement") is entered into _____, by and between the State of Florida, Department of Transportation, ("Department"), and City of New Smyrna Beach, ("Agency"). The Department and the Agency are sometimes referred to in this Agreement as a "Party" and collectively as the "Parties."

NOW, THEREFORE, in consideration of the mutual benefits to be derived from joint participation on the Project, the Parties agree to the following:

1. **Authority.** The Agency, by Resolution or other form of official authorization, a copy of which is attached as **Exhibit "D", Agency Resolution** and made a part of this Agreement, has authorized its officers to execute this Agreement on its behalf. The Department has the authority pursuant to Section(s) 332.007, Florida Statutes, to enter into this Agreement.

2. **Purpose of Agreement.** The purpose of this Agreement is to provide for the Department's participation in Air Traffic Control Equipment Upgrade at New Smyrna Beach Municipal Airport, as further described in **Exhibit "A", Project Description and Responsibilities**, attached and incorporated into this Agreement ("Project"), to provide Department financial assistance to the Agency, state the terms and conditions upon which Department funds will be provided, and to set forth the manner in which the Project will be undertaken and completed.

3. **Program Area.** For identification purposes only, this Agreement is implemented as part of the Department program area selected below (select all programs that apply):

   X **Aviation**
   __ **Seaports**
   __ **Transit**
   __ **Intermodal**
   __ **Rail Crossing Closure**
   __ **Match to Direct Federal Funding** (Aviation or Transit)
   (Note: Section 15 and Exhibit G do not apply to federally matched funding)
   __ **Other**

4. **Exhibits.** The following Exhibits are attached and incorporated into this Agreement:

   X Exhibit A: Project Description and Responsibilities
   X Exhibit B: Schedule of Financial Assistance
   __ *Exhibit B1: Deferred Reimbursement Financial Provisions
   __ *Exhibit B2: Advance Payment Financial Provisions
   __ *Exhibit B3: Alternative Advanced Pay (Transit Bus Program)
   X *Exhibit C: Terms and Conditions of Construction
   X Exhibit D: Agency Resolution
   X Exhibit E: Program Specific Terms and Conditions
   X Exhibit E1: Prohibition Based on Health Care Choices
   __ Exhibit E2: Exterior Vehicle Wrap, Tinting, Paint, Marketing and Advertising (Transit)

X Exhibit F: Contract Payment Requirements
X *Exhibit G: Audit Requirements for Awards of State Financial Assistance
__ *Exhibit H: Audit Requirements for Awards of Federal Financial Assistance
__ *Exhibit I: Certification of Disbursement of Payment to Vehicle and/or Equipment Vendor
__ *Additional Exhibit(s):

*Indicates that the Exhibit is only attached and incorporated if applicable box is selected.

5. Time. Unless specified otherwise, all references to "days" within this Agreement refer to calendar days.

6. Term of Agreement. This Agreement shall commence upon full execution by both Parties ("Effective Date") and continue through June 1, 2027. If the Agency does not complete the Project within this time period, this Agreement will expire unless an extension of the time period is requested by the Agency and granted in writing by the Department prior to the expiration of this Agreement. Expiration of this Agreement will be considered termination of the Project. The cost of any work performed prior to the Effective Date or after the expiration date of this Agreement will not be reimbursed by the Department.

a. __ If this box is checked the following provision applies:

Unless terminated earlier, work on the Project shall commence no later than the __ day of __, or within __ days of the issuance of the Notice to Proceed for the construction phase of the Project (if the Project involves construction), whichever date is earlier. The Department shall have the option to immediately terminate this Agreement should the Agency fail to meet the above-required dates.

7. Amendments, Extensions, and Assignment. This Agreement may be amended or extended upon mutual written agreement of the Parties. This Agreement shall not be renewed. This Agreement shall not be assigned, transferred, or otherwise encumbered by the Agency under any circumstances without the prior written consent of the Department.

8. Termination or Suspension of Project. The Department may, by written notice to the Agency, suspend any or all of the Department's obligations under this Agreement for the Agency's failure to comply with applicable law or the terms of this Agreement until such time as the event or condition resulting in such suspension has ceased or been corrected.

a. Notwithstanding any other provision of this Agreement, if the Department intends to terminate the Agreement, the Department shall notify the Agency of such termination in writing at least thirty (30) days prior to the termination of the Agreement, with instructions to the effective date of termination or specify the stage of work at which the Agreement is to be terminated.

b. The Parties to this Agreement may terminate this Agreement when its continuation would not produce beneficial results commensurate with the further expenditure of funds. In this event, the Parties shall agree upon the termination conditions.

c. If the Agreement is terminated before performance is completed, the Agency shall be paid only for that work satisfactorily performed for which costs can be substantiated. Such payment, however, may not exceed the equivalent percentage of the Department's maximum financial assistance. If any portion of the Project is located on the Department's right-of-way, then all work in progress on the Department right-of-way will become the property of the Department and will be turned over promptly by the Agency.

d. In the event the Agency fails to perform or honor the requirements and provisions of this Agreement, the Agency shall promptly refund in full to the Department within thirty (30) days of the termination of the Agreement any funds that were determined by the Department to have been expended in violation of the Agreement.

e. The Department reserves the right to unilaterally cancel this Agreement for failure by the Agency to comply with the Public Records provisions of Chapter 119, Florida Statutes.

9. Project Cost:

a. The estimated total cost of the Project is $62,500. This amount is based upon **Exhibit "B", Schedule of Financial Assistance**. The timeline for deliverables and distribution of estimated amounts between deliverables within a grant phase, as outlined in **Exhibit "B", Schedule of Financial Assistance**, may be modified by mutual written agreement of the Parties and does not require execution of an **Amendment to the Public Transportation Grant Agreement**. The timeline for deliverables and distribution of estimated amounts between grant phases requires an amendment executed by both Parties in the same form as this Agreement.

b. The Department agrees to participate in the Project cost up to the maximum amount of $50,000 and, the Department's participation in the Project shall not exceed 80.00% of the total eligible cost of the Project, and as more fully described in **Exhibit "B'', Schedule of Financial Assistance**. The Agency agrees to bear all expenses in excess of the amount of the Department's participation and any cost overruns or deficits involved.

10. Compensation and Payment:

a. Eligible Cost. The Department shall reimburse the Agency for allowable costs incurred as described in **Exhibit "A"**, **Project Description and Responsibilities**, and as set forth in **Exhibit "B", Schedule of Financial Assistance**.

b. Deliverables. The Agency shall provide quantifiable, measurable, and verifiable units of deliverables. Each deliverable must specify the required minimum level of service to be performed and the criteria for evaluating successful completion. The Project and the quantifiable, measurable, and verifiable units of deliverables are described more fully in **Exhibit "A", Project Description and Responsibilities**. Modifications to the deliverables in **Exhibit "A", Project Description and Responsibilities** requires a formal written amendment.

c. Invoicing. Invoices shall be submitted no more often than monthly by the Agency in detail sufficient for a proper pre-audit and post-audit, based on the quantifiable, measurable, and verifiable deliverables as established in **Exhibit "A", Project Description and Responsibilities**. Deliverables and costs incurred must be received and approved by the Department prior to reimbursement. Requests for reimbursement by the Agency shall include an invoice, progress report, and supporting documentation for the deliverables being billed that are acceptable to the Department. The Agency shall use the format for the invoice and progress report that is approved by the Department.

d. Supporting Documentation. Supporting documentation must establish that the deliverables were received and accepted in writing by the Agency and must also establish that the required minimum standards or level of service to be performed based on the criteria for evaluating successful completion as specified in **Exhibit "A", Project Description and Responsibilities** has been met. All costs invoiced shall be supported by properly executed payrolls, time records, invoices, contracts, or vouchers evidencing in proper detail the nature and propriety of charges as described in **Exhibit "F", Contract Payment Requirements**.

e. Travel Expenses. The selected provision below is controlling regarding travel expenses:

X Travel expenses are NOT eligible for reimbursement under this Agreement.

__ Travel expenses ARE eligible for reimbursement under this Agreement. Bills for travel expenses specifically authorized in this Agreement shall be submitted on the Department's

Contractor Travel Form No. 300-000-06 and will be paid in accordance with Section 112.061, Florida Statutes, and the most current version of the Department's Disbursement Handbook for Employees and Managers.

f. Financial Consequences. Payment shall be made only after receipt and approval of deliverables and costs incurred unless advance payments are authorized by the Chief Financial Officer of the State of Florida under Chapters 215 and 216, Florida Statutes, or the Department's Comptroller under Section 334.044(29), Florida Statutes. If the Department determines that the performance of the Agency is unsatisfactory, the Department shall notify the Agency of the deficiency to be corrected, which correction shall be made within a time-frame to be specified by the Department. The Agency shall, within thirty (30) days after notice from the Department, provide the Department with a corrective action plan describing how the Agency will address all issues of contract non-performance, unacceptable performance, failure to meet the minimum performance levels, deliverable deficiencies, or contract non-compliance. If the corrective action plan is unacceptable to the Department, the Agency will not be reimbursed. If the deficiency is subsequently resolved, the Agency may bill the Department for the amount that was previously not reimbursed during the next billing period. If the Agency is unable to resolve the deficiency, the funds shall be forfeited at the end of the Agreement's term.

g. Invoice Processing. An Agency receiving financial assistance from the Department should be aware of the following time frames. Inspection or verification and approval of deliverables shall take no longer than 20 days from the Department's receipt of the invoice. The Department has 20 days to deliver a request for payment (voucher) to the Department of Financial Services. The 20 days are measured from the latter of the date the invoice is received or the deliverables are received, inspected or verified, and approved.

If a payment is not available within 40 days, a separate interest penalty at a rate as established pursuant to Section 55.03(1), Florida Statutes, will be due and payable, in addition to the invoice amount, to the Agency. Interest penalties of less than one (1) dollar will not be enforced unless the Agency requests payment. Invoices that have to be returned to an Agency because of Agency preparation errors will result in a delay in the payment. The invoice payment requirements do not start until a properly completed invoice is provided to the Department.

A Vendor Ombudsman has been established within the Department of Financial Services. The duties of this individual include acting as an advocate for Agency who may be experiencing problems in obtaining timely payment(s) from a state agency. The Vendor Ombudsman may be contacted at (850) 413-5516.

h. Records Retention. The Agency shall maintain an accounting system or separate accounts to ensure funds and projects are tracked separately. Records of costs incurred under the terms of this Agreement shall be maintained and made available upon request to the Department at all times during the period of this Agreement and for five years after final payment is made. Copies of these records shall be furnished to the Department upon request. Records of costs incurred include the Agency's general accounting records and the Project records, together with supporting documents and records, of the Contractor and all subcontractors performing work on the Project, and all other records of the Contractor and subcontractors considered necessary by the Department for a proper audit of costs.

i. Progress Reports. Upon request, the Agency agrees to provide progress reports to the Department in the standard format used by the Department and at intervals established by the Department. The Department will be entitled at all times to be advised, at its request, as to the status of the Project and of details thereof.

j. Submission of Other Documents. The Agency shall submit to the Department such data, reports, records, contracts, and other documents relating to the Project as the Department may require as listed in **Exhibit "E", Program Specific Terms and Conditions** attached to and incorporated into this Agreement.

k. Offsets for Claims. If, after Project completion, any claim is made by the Department resulting from an audit or for work or services performed pursuant to this Agreement, the Department may offset such amount from payments due for work or services done under any agreement that it has with the Agency owing such amount if, upon written demand, payment of the amount is not made within 60 days to the Department. Offsetting any amount pursuant to this paragraph shall not be considered a breach of contract by the Department.

l. Final Invoice. The Agency must submit the final invoice on the Project to the Department within 120 days after the completion of the Project. Invoices submitted after the 120-day time period may not be paid.

m. Department's Performance and Payment Contingent Upon Annual Appropriation by the Legislature. The Department's performance and obligation to pay under this Agreement is contingent upon an annual appropriation by the Legislature. If the Department's funding for this Project is in multiple fiscal years, a notice of availability of funds from the Department's project manager must be received prior to costs being incurred by the Agency. See **Exhibit "B", Schedule of Financial Assistance** for funding levels by fiscal year. Project costs utilizing any fiscal year funds are not eligible for reimbursement if incurred prior to funds approval being received. The Department will notify the Agency, in writing, when funds are available.

n. Limits on Contracts Exceeding $25,000 and Term more than 1 Year. In the event this Agreement is in excess of $25,000 and has a term for a period of more than one year, the provisions of Section 339.135(6)(a), Florida Statutes, are hereby incorporated:

> "The Department, during any fiscal year, shall not expend money, incur any liability, or enter into any contract which, by its terms, involves the expenditure of money in excess of the amounts budgeted as available for expenditure during such fiscal year. Any contract, verbal or written, made in violation of this subsection is null and void, and no money may be paid on such contract. The Department shall require a statement from the comptroller of the Department that funds are available prior to entering into any such contract or other binding commitment of funds. Nothing herein contained shall prevent the making of contracts for periods exceeding 1 year, but any contract so made shall be executory only for the value of the services to be rendered or agreed to be paid for in succeeding fiscal years; and this paragraph shall be incorporated verbatim in all contracts of the Department which are for an amount in excess of $25,000 and which have a term for a period of more than 1 year."

o. Agency Obligation to Refund Department. Any Project funds made available by the Department pursuant to this Agreement that are determined by the Department to have been expended by the Agency in violation of this Agreement or any other applicable law or regulation shall be promptly refunded in full to the Department. Acceptance by the Department of any documentation or certifications, mandatory or otherwise permitted, that the Agency files shall not constitute a waiver of the Department's rights as the funding agency to verify all information at a later date by audit or investigation.

p. Non-Eligible Costs. In determining the amount of the payment, the Department will exclude all Project costs incurred by the Agency prior to the execution of this Agreement, costs incurred after the expiration of the Agreement, costs that are not provided for in **Exhibit "A"**, **Project**

Description and Responsibilities, and as set forth in **Exhibit "B", Schedule of Financial Assistance**, costs agreed to be borne by the Agency or its contractors and subcontractors for not meeting the Project commencement and final invoice time lines, and costs attributable to goods or services received under a contract or other arrangement that has not been approved in writing by the Department. Specific unallowable costs may be listed in **Exhibit "A"**, **Project Description and Responsibilities.**

11. **General Requirements.** The Agency shall complete the Project with all practical dispatch in a sound, economical, and efficient manner, and in accordance with the provisions in this Agreement and all applicable laws.

    a. **Necessary Permits Certification.** The Agency shall certify to the Department that the Agency's design consultant and/or construction contractor has secured the necessary permits.

    b. **Right-of-Way Certification.** If the Project involves construction, then the Agency shall provide to the Department certification and a copy of appropriate documentation substantiating that all required right-of-way necessary for the Project has been obtained. Certification is required prior to authorization for advertisement for or solicitation of bids for construction of the Project, even if no right-of-way is required.

    c. **Notification Requirements When Performing Construction on Department's Right-of-Way.** In the event the cost of the Project is greater than $250,000.00, and the Project involves construction on the Department's right-of-way, the Agency shall provide the Department with written notification of either its intent to:

        i. Require the construction work of the Project that is on the Department's right-of-way to be performed by a Department prequalified contractor, or

        ii. Construct the Project utilizing existing Agency employees, if the Agency can complete said Project within the time frame set forth in this Agreement.

    d. __ If this box is checked, then the Agency is permitted to utilize its own forces and the following provision applies: **Use of Agency Workforce.** In the event the Agency proceeds with any phase of the Project utilizing its own forces, the Agency will only be reimbursed for direct costs (this excludes general overhead).

    e. __ If this box is checked, then the Agency is permitted to utilize **Indirect Costs: Reimbursement for Indirect Program Expenses** (select one):

        i. __ Agency has selected to seek reimbursement from the Department for actual indirect expenses (no rate).

        ii. __ Agency has selected to apply a de minimus rate of 15% to modified total direct costs. Note: The de minimus rate is available only to entities that have never had a negotiated indirect cost rate. When selected, the de minimus rate must be used consistently for all federal awards until such time the agency chooses to negotiate a rate. A cost policy statement and de minimis certification form must be submitted to the Department for review and approval.

        iii. __ Agency has selected to apply a state or federally approved indirect cost rate. A federally approved rate agreement or indirect cost allocation plan (ICAP) must be submitted annually.

    f. **Agency Compliance with Laws, Rules, and Regulations, Guidelines, and Standards.** The Agency shall comply and require its contractors and subcontractors to comply with all terms

and conditions of this Agreement and all federal, state, and local laws and regulations applicable to this Project.

g. **Claims and Requests for Additional Work.** The Agency shall have the sole responsibility for resolving claims and requests for additional work for the Project. The Agency will make best efforts to obtain the Department's input in its decisions. The Department is not obligated to reimburse for claims or requests for additional work.

12. Contracts of the Agency:

a. **Approval of Third Party Contracts.** The Department specifically reserves the right to review and approve any and all third party contracts with respect to the Project before the Agency executes or obligates itself in any manner requiring the disbursement of Department funds, including consultant and purchase of commodities contracts, or amendments thereto. If the Department chooses to review and approve third party contracts for this Project and the Agency fails to obtain such approval, that shall be sufficient cause for nonpayment by the Department. The Department specifically reserves unto itself the right to review the qualifications of any consultant or contractor and to approve or disapprove the employment of the same. If Federal Transit Administration (FTA) funds are used in the Project, the Department must exercise the right to third party contract review.

b. **Procurement of Commodities or Contractual Services.** It is understood and agreed by the Parties hereto that participation by the Department in a project with the Agency, where said project involves the purchase of commodities or contractual services where purchases or costs exceed the Threshold Amount for CATEGORY TWO per Section 287.017, Florida Statutes, is contingent on the Agency complying in full with the provisions of Section 287.057, Florida Statutes. The Agency's Authorized Official shall certify to the Department that the Agency's purchase of commodities or contractual services has been accomplished in compliance with Section 287.057, Florida Statutes. It shall be the sole responsibility of the Agency to ensure that any obligations made in accordance with this Section comply with the current threshold limits. Contracts, purchase orders, task orders, construction change orders, or any other agreement that would result in exceeding the current budget contained in **Exhibit "B", Schedule of Financial Assistance**, or that is not consistent with the Project description and scope of services contained in **Exhibit "A", Project Description and Responsibilities** must be approved by the Department prior to Agency execution. Failure to obtain such approval, and subsequent execution of an amendment to the Agreement if required, shall be sufficient cause for nonpayment by the Department, in accordance with this Agreement.

c. **Consultants' Competitive Negotiation Act.** It is understood and agreed by the Parties to this Agreement that participation by the Department in a project with the Agency, where said project involves a consultant contract for professional services, is contingent on the Agency's full compliance with provisions of Section 287.055, Florida Statutes, Consultants' Competitive Negotiation Act. In all cases, the Agency's Authorized Official shall certify to the Department that selection has been accomplished in compliance with the Consultants' Competitive Negotiation Act.

d. **Disadvantaged Business Enterprise (DBE) Policy and Obligation.** It is the policy of the Department that DBEs, as defined in 49 C.F.R. Part 26, as amended, shall have the opportunity to participate in the performance of contracts financed in whole or in part with Department funds under this Agreement. The DBE requirements of applicable federal and state laws and regulations apply to this Agreement. The Agency and its contractors agree to ensure that DBEs have the opportunity to participate in the performance of this Agreement. In this regard, all recipients and contractors shall take all necessary and reasonable steps in accordance with applicable federal and state laws and regulations to ensure that the DBEs have the opportunity to compete for and perform contracts. The Agency and its contractors

and subcontractors shall not discriminate on the basis of race, color, national origin or sex in the award and performance of contracts, entered pursuant to this Agreement.

13. **Maintenance Obligations**. In the event the Project includes construction or the acquisition of commodities then the following provisions are incorporated into this Agreement:

    a. The Agency agrees to accept all future maintenance and other attendant costs occurring after completion of the Project for all improvements constructed or commodities acquired as part of the Project. The terms of this provision shall survive the termination of this Agreement.

14. **Sale, Transfer, or Disposal of Department-funded Property:**

    a. The Agency will not sell or otherwise transfer or dispose of any part of its title or other interests in real property, facilities, or equipment funded in any part by the Department under this Agreement without prior written approval by the Department.

    b. If a sale, transfer, or disposal by the Agency of all or a portion of Department-funded real property, facilities, or equipment is approved by the Department, the following provisions will apply:

        i. The Agency shall reimburse the Department a proportional amount of the proceeds of the sale of any Department-funded property.

        ii. The proportional amount shall be determined on the basis of the ratio of the Department funding of the development or acquisition of the property multiplied against the sale amount, and shall be remitted to the Department within ninety (90) days of closing of sale.

        iii. Sale of property developed or acquired with Department funds shall be at market value as determined by appraisal or public bidding process, and the contract and process for sale must be approved in advance by the Department.

        iv. If any portion of the proceeds from the sale to the Agency are non-cash considerations, reimbursement to the Department shall include a proportional amount based on the value of the non-cash considerations.

    c. The terms of provisions “a” and “b” above shall survive the termination of this Agreement.

        i. The terms shall remain in full force and effect throughout the useful life of facilities developed, equipment acquired, or Project items installed within a facility, but shall not exceed twenty (20) years from the effective date of this Agreement.

        ii. There shall be no limit on the duration of the terms with respect to real property acquired with Department funds.

15. **Single Audit.** The administration of Federal or State resources awarded through the Department to the Agency by this Agreement may be subject to audits and/or monitoring by the Department. The following requirements do not limit the authority of the Department to conduct or arrange for the conduct of additional audits or evaluations of Federal awards or State financial assistance or limit the authority of any state agency inspector general, the State of Florida Auditor General, or any other state official. The Agency shall comply with all audit and audit reporting requirements as specified below.

    Federal Funded:

    a. In addition to reviews of audits conducted in accordance with 2 CFR Part 200, Subpart F – Audit Requirements, monitoring procedures may include but not be limited to on-site visits by

Department staff and/or other procedures, including reviewing any required performance and financial reports, following up, ensuring corrective action, and issuing management decisions on weaknesses found through audits when those findings pertain to Federal awards provided through the Department by this Agreement. By entering into this Agreement, the Agency agrees to comply and cooperate fully with any monitoring procedures/processes deemed appropriate by the Department. The Agency further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Department, State of Florida Chief Financial Officer (CFO), or State of Florida Auditor General.

b. The Agency, a non-Federal entity as defined by 2 CFR Part 200, Subpart F – Audit Requirements, as a subrecipient of a Federal award awarded by the Department through this Agreement, is subject to the following requirements:

i. In the event the Agency expends a total amount of Federal awards equal to or in excess of the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, the Agency must have a Federal single or program-specific audit conducted for such fiscal year in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements. **Exhibit "H", Audit Requirements for Awards of Federal Financial Assistance**, to this Agreement provides the required Federal award identification information needed by the Agency to further comply with the requirements of 2 CFR Part 200, Subpart F – Audit Requirements. In determining Federal awards expended in a fiscal year, the Agency must consider all sources of Federal awards based on when the activity related to the Federal award occurs, including the Federal award provided through the Department by this Agreement. The determination of amounts of Federal awards expended should be in accordance with the guidelines established by 2 CFR Part 200, Subpart F – Audit Requirements. An audit conducted by the State of Florida Auditor General in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements, will meet the requirements of this part.

ii. In connection with the audit requirements, the Agency shall fulfill the requirements relative to the auditee responsibilities as provided in 2 CFR Part 200, Subpart F – Audit Requirements.

iii. In the event the Agency expends less than the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, in Federal awards, the Agency is exempt from Federal audit requirements for that fiscal year. However, the Agency must provide a single audit exemption statement to the Department at FDOTSingleAudit@dot.state.fl.us no later than nine months after the end of the Agency's audit period for each applicable audit year. In the event the Agency expends less than the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, in Federal awards in a fiscal year and elects to have an audit conducted in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements, the cost of the audit must be paid from non-Federal resources (*i.e.*, the cost of such an audit must be paid from the Agency's resources obtained from other than Federal entities).

iv. The Agency must electronically submit to the Federal Audit Clearinghouse (FAC) at https://harvester.census.gov/facweb/ the audit reporting package as required by 2 CFR Part 200, Subpart F – Audit Requirements, within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period. The FAC is the repository of record for audits required by 2 CFR Part 200, Subpart F – Audit Requirements. However, the Department requires a copy of the audit reporting package also be submitted to FDOTSingleAudit@dot.state.fl.us within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period as required by 2 CFR Part 200, Subpart F – Audit Requirements.

v. Within six months of acceptance of the audit report by the FAC, the Department will review the Agency's audit reporting package, including corrective action plans and management letters, to the extent necessary to determine whether timely and appropriate action on all deficiencies has been taken pertaining to the Federal award provided through the Department by this Agreement. If the Agency fails to have an audit conducted in accordance with 2 CFR Part 200, Subpart F – Audit Requirements, the Department may impose additional conditions to remedy noncompliance. If the Department determines that noncompliance cannot be remedied by imposing additional conditions, the Department may take appropriate actions to enforce compliance, which actions may include but not be limited to the following:

1. Temporarily withhold cash payments pending correction of the deficiency by the Agency or more severe enforcement action by the Department;
2. Disallow (deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance;
3. Wholly or partly suspend or terminate the Federal award;
4. Initiate suspension or debarment proceedings as authorized under 2 C.F.R. Part 180 and Federal awarding agency regulations (or in the case of the Department, recommend such a proceeding be initiated by the Federal awarding agency);
5. Withhold further Federal awards for the Project or program;
6. Take other remedies that may be legally available.

vi. As a condition of receiving this Federal award, the Agency shall permit the Department or its designee, the CFO, or State of Florida Auditor General access to the Agency's records, including financial statements, the independent auditor's working papers, and project records as necessary. Records related to unresolved audit findings, appeals, or litigation shall be retained until the action is complete or the dispute is resolved.

vii. The Department's contact information for requirements under this part is as follows:

Office of Comptroller, MS 24
605 Suwannee Street
Tallahassee, Florida 32399-0450
FDOTSingleAudit@dot.state.fl.us

State Funded:

a. In addition to reviews of audits conducted in accordance with Section 215.97, Florida Statutes, monitoring procedures to monitor the Agency's use of state financial assistance may include but not be limited to on-site visits by Department staff and/or other procedures, including reviewing any required performance and financial reports, following up, ensuring corrective action, and issuing management decisions on weaknesses found through audits when those findings pertain to state financial assistance awarded through the Department by this Agreement. By entering into this Agreement, the Agency agrees to comply and cooperate fully with any monitoring procedures/processes deemed appropriate by the Department. The Agency further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Department, the Department of Financial Services (DFS), or State of Florida Auditor General.

b. The Agency, a "nonstate entity" as defined by Section 215.97, Florida Statutes, as a recipient of state financial assistance awarded by the Department through this Agreement, is subject to the following requirements:

i. In the event the Agency meets the audit threshold requirements established by Section 215.97, Florida Statutes, the Agency must have a State single or project-specific audit conducted for such fiscal year in accordance with Section 215.97, Florida Statutes; applicable rules of the Department of Financial Services; and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. **Exhibit "G", Audit Requirements for Awards of State Financial Assistance,** to this Agreement indicates state financial assistance awarded through the Department by this Agreement needed by the Agency to further comply with the requirements of Section 215.97, Florida Statutes. In determining the state financial assistance expended in a fiscal year, the Agency shall consider all sources of state financial assistance, including state financial assistance received from the Department by this Agreement, other state agencies, and other nonstate entities. State financial assistance does not include Federal direct or pass-through awards and resources received by a nonstate entity for Federal program matching requirements.

ii. In connection with the audit requirements, the Agency shall ensure that the audit complies with the requirements of Section 215.97(8), Florida Statutes. This includes submission of a financial reporting package as defined by Section 215.97(2)(e), Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.

iii. In the event the Agency does not meet the audit threshold requirements established by Section 215.97, Florida Statutes, the Agency is exempt for such fiscal year from the state single audit requirements of Section 215.97, Florida Statutes. However, the Agency must provide a single audit exemption statement to the Department at FDOTSingleAudit@dot.state.fl.us no later than nine months after the end of the Agency's audit period for each applicable audit year. In the event the Agency does not meet the audit threshold requirements established by Section 215.97, Florida Statutes, in a fiscal year and elects to have an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, the cost of the audit must be paid from the Agency's resources (*i.e.*, the cost of such an audit must be paid from the Agency's resources obtained from other than State entities).

iv. In accordance with Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, copies of financial reporting packages required by this Agreement shall be submitted to:

Florida Department of Transportation
Office of Comptroller, MS 24
605 Suwannee Street
Tallahassee, Florida 32399-0405
FDOTSingleAudit@dot.state.fl.us

And

State of Florida Auditor General

111 West Madison Street, Room 401
Tallahassee, FL 32399-1450
Email: flaudgen_localgovt@aud.state.fl.us

v. Any copies of financial reporting packages, reports, or other information required to be submitted to the Department shall be submitted timely in accordance with Section 215.97, Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, as

applicable.

vi. The Agency, when submitting financial reporting packages to the Department for audits done in accordance with Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, should indicate the date the reporting package was delivered to the Agency in correspondence accompanying the reporting package.

vii. Upon receipt, and within six months, the Department will review the Agency's financial reporting package, including corrective action plans and management letters, to the extent necessary to determine whether timely and appropriate corrective action on all deficiencies has been taken pertaining to the state financial assistance provided through the Department by this Agreement. If the Agency fails to have an audit conducted consistent with Section 215.97, Florida Statutes, the Department may take appropriate corrective action to enforce compliance.

viii. As a condition of receiving state financial assistance, the Agency shall permit the Department or its designee, DFS, or the Auditor General access to the Agency's records, including financial statements, the independent auditor's working papers, and project records as necessary. Records related to unresolved audit findings, appeals, or litigation shall be retained until the action is complete or the dispute is resolved.

c. The Agency shall retain sufficient records demonstrating its compliance with the terms of this Agreement for a period of five years from the date the audit report is issued and shall allow the Department or its designee, DFS, or State of Florida Auditor General access to such records upon request. The Agency shall ensure that the audit working papers are made available to the Department or its designee, DFS, or State of Florida Auditor General upon request for a period of five years from the date the audit report is issued, unless extended in writing by the Department.

16. Notices and Approvals. Notices and approvals referenced in this Agreement must be obtained in writing from the Parties' respective Administrators or their designees.

17. Restrictions, Prohibitions, Controls and Labor Provisions:

a. Convicted Vendor List. A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity; may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statutes, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

b. Discriminatory Vendor List. In accordance with Section 287.134, Florida Statutes, an entity or affiliate who has been placed on the Discriminatory Vendor List, kept by the Florida Department of Management Services, may not submit a bid on a contract to provide goods or services to a public entity; may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity.

c. Non-Responsible Contractors. An entity or affiliate who has had its Certificate of Qualification suspended, revoked, denied, or have further been determined by the Department to be a non-responsible contractor, may not submit a bid or perform work for the construction or repair of a public building or public work on a contract with the Agency.

d. Prohibition on Using Funds for Lobbying. No funds received pursuant to this Agreement may be expended for lobbying the Florida Legislature, judicial branch, or any state agency, in accordance with Section 216.347, Florida Statutes.

e. Unauthorized Aliens. The Department shall consider the employment by any contractor of unauthorized aliens a violation of Section 274A(e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation will be cause for unilateral cancellation of this Agreement.

f. Procurement of Construction Services. If the Project is procured pursuant to Chapter 255, Florida Statutes, for construction services and at the time of the competitive solicitation for the Project, 50 percent or more of the cost of the Project is to be paid from state-appropriated funds, then the Agency must comply with the requirements of Section 255.0991, Florida Statutes.

g. E-Verify. The Agency shall:

i. Utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Agency during the term of the contract; and

ii. Expressly require any subcontractors performing work or providing services pursuant to the state contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

h. Projects with Non-profit Organizations. Pursuant to Section 216.1366. Florida Statutes, if the Agency is a nonprofit organization as defined in Section 215.97(2)(m), Florida Statutes, the Agency shall provide documentation to indicate the amount of state funds:

i. Allocated to be used during the full term of this Agreement for remuneration to any member of the board of directors or an officer of the Agency

ii. Allocated under each payment by the Department to be used for remuneration of any member of the board of directors or an officer of the Agency. The documentation must indicate the amounts and recipients of the remuneration.

Such information will be posted by the Department to the Florida Accountability Contract Tracking System maintained pursuant to Section 215.985, F.S., and must additionally be posted to the Agency's website, if the Agency is a non-profit organization and maintains a website. The Agency shall utilize the Department's Form 350-090-19, Compensation to Non-Profits Using State Funds, for purposes of documenting the compensation. The subject Form is required for every contract for services executed, amended, or extended on or after July 1, 2023, with non-profit organizations.

Pursuant to Section 216.1366, F.S., the term:

i. "Officer" means a chief executive officer, chief financial officer, chief operating officer, or any other position performing and equivalent function.

ii. "Remuneration" means all compensation earned by or awarded to personnel, whether paid or accrued, regardless of contingency, including bonuses, accrued paid time off, severance payments, incentive payments, contributions to a retirement plan or in-kind payments, reimbursements, or allowances for moving expenses, vehicles and other transportation, telephone services, medical services, housing and meals.

iii. "State Funds" means funds paid from the General Revenue Fund or any state trust fund, funds allocated by the Federal Government and distributed by the state, or funds appropriated by the Federal Government and distributed by the state, or funds appropriated by the state for distribution through any grant program. The term does not include funds used for the Medicaid program.

i. Design Services and Construction Engineering and Inspection Services. If the Project is wholly or partially funded by the Department and administered by a local governmental entity, except for a seaport listed in Section 311.09, Florida Statutes, or an airport as defined in Section 332.004, Florida Statutes, the entity performing design and construction engineering and inspection services may not be the same entity.

18. Indemnification and Insurance:

a. It is specifically agreed between the Parties executing this Agreement that it is not intended by any of the provisions of any part of this Agreement to create in the public or any member thereof, a third party beneficiary under this Agreement, or to authorize anyone not a party to this Agreement to maintain a suit for personal injuries or property damage pursuant to the terms or provisions of this Agreement. The Agency guarantees the payment of all just claims for materials, supplies, tools, or labor and other just claims against the Agency or any subcontractor, in connection with this Agreement. Additionally, to the extent permitted by law and as limited by and pursuant to the provisions of Section 768.28, Florida Statutes, the Agency shall indemnify, defend, and hold harmless the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses, and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the Agency and persons employed or utilized by the Agency in the performance of this Agreement. Nothing contained in this paragraph is intended to nor shall it constitute a waiver of the Department's or the Agency's sovereign immunity. This indemnification shall survive the termination of this Agreement. Additionally, the Agency agrees to include the following indemnification in all contracts with contractors/subcontractors and consultants/subconsultants who perform work in connection with this Agreement:

"To the fullest extent permitted by law, the Agency's contractor/consultant shall indemnify, defend, and hold harmless the Agency and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement."

b. The Agency shall provide Workers' Compensation Insurance in accordance with Florida's Workers' Compensation law for all employees. If subletting any of the work, ensure that the subcontractor(s) and subconsultant(s) have Workers' Compensation Insurance for their employees in accordance with Florida's Workers' Compensation law. If using "leased employees" or employees obtained through professional employer organizations ("PEO's"), ensure that such employees are covered by Workers' Compensation Insurance through the PEO's or other leasing entities. Ensure that any equipment rental agreements that include

operators or other personnel who are employees of independent contractors, sole proprietorships, or partners are covered by insurance required under Florida's Workers' Compensation law.

c. If the Agency elects to self-perform the Project, then the Agency may self-insure. If the Agency elects to hire a contractor or consultant to perform the Project, then the Agency shall carry, or cause its contractor or consultant to carry, Commercial General Liability insurance providing continuous coverage for all work or operations performed under this Agreement. Such insurance shall be no more restrictive than that provided by the latest occurrence form edition of the standard Commercial General Liability Coverage Form (ISO Form CG 00 01) as filed for use in the State of Florida. The Agency shall cause, or cause its contractor or consultant to cause, the Department to be made an Additional Insured as to such insurance. Such coverage shall be on an "occurrence" basis and shall include Products/Completed Operations coverage. The coverage afforded to the Department as an Additional Insured shall be primary as to any other available insurance and shall not be more restrictive than the coverage afforded to the Named Insured. The limits of coverage shall not be less than $1,000,000 for each occurrence and not less than a $5,000,000 annual general aggregate, inclusive of amounts provided by an umbrella or excess policy. The limits of coverage described herein shall apply fully to the work or operations performed under the Agreement, and may not be shared with or diminished by claims unrelated to the Agreement. The policy/ies and coverage described herein may be subject to a deductible and such deductibles shall be paid by the Named Insured. No policy/ies or coverage described herein may contain or be subject to a Retention or a Self-Insured Retention unless the Agency is a state agency or subdivision of the State of Florida that elects to self-perform the Project. Prior to the execution of the Agreement, and at all renewal periods which occur prior to final acceptance of the work, the Department shall be provided with an ACORD Certificate of Liability Insurance reflecting the coverage described herein. The Department shall be notified in writing within ten days of any cancellation, notice of cancellation, lapse, renewal, or proposed change to any policy or coverage described herein. The Department's approval or failure to disapprove any policy/ies, coverage, or ACORD Certificates shall not relieve or excuse any obligation to procure and maintain the insurance required herein, nor serve as a waiver of any rights or defenses the Department may have.

d. When the Agreement includes the construction of a railroad grade crossing, railroad overpass or underpass structure, or any other work or operations within the limits of the railroad right-of-way, including any encroachments thereon from work or operations in the vicinity of the railroad right-of-way, the Agency shall, or cause its contractor to, in addition to the insurance coverage required above, procure and maintain Railroad Protective Liability Coverage (ISO Form CG 00 35) where the railroad is the Named Insured and where the limits are not less than $2,000,000 combined single limit for bodily injury and/or property damage per occurrence, and with an annual aggregate limit of not less than $6,000,000. The railroad shall also be added along with the Department as an Additional Insured on the policy/ies procured pursuant to the paragraph above. Prior to the execution of the Agreement, and at all renewal periods which occur prior to final acceptance of the work, both the Department and the railroad shall be provided with an ACORD Certificate of Liability Insurance reflecting the coverage described herein. The insurance described herein shall be maintained through final acceptance of the work. Both the Department and the railroad shall be notified in writing within ten days of any cancellation, notice of cancellation, renewal, or proposed change to any policy or coverage described herein. The Department's approval or failure to disapprove any policy/ies, coverage, or ACORD Certificates shall not relieve or excuse any obligation to procure and maintain the insurance required herein, nor serve as a waiver of any rights the Department may have.

e. When the Agreement involves work on or in the vicinity of utility-owned property or facilities, the utility shall be added along with the Department as an Additional Insured on the Commercial General Liability policy/ies procured above.

19. Miscellaneous:

a. Environmental Regulations. The Agency will be solely responsible for compliance with all applicable environmental regulations and for any liability arising from non-compliance with these regulations, and will reimburse the Department for any loss incurred in connection therewith.

b. Non-Admission of Liability. In no event shall the making by the Department of any payment to the Agency constitute or be construed as a waiver by the Department of any breach of covenant or any default which may then exist on the part of the Agency and the making of such payment by the Department, while any such breach or default shall exist, shall in no way impair or prejudice any right or remedy available to the Department with respect to such breach or default.

c. Severability. If any provision of this Agreement is held invalid, the remainder of this Agreement shall not be affected. In such an instance, the remainder would then continue to conform to the terms and requirements of applicable law.

d. Agency not an agent of Department. The Agency and the Department agree that the Agency, its employees, contractors, subcontractors, consultants, and subconsultants are not agents of the Department as a result of this Agreement.

e. Bonus or Commission. By execution of the Agreement, the Agency represents that it has not paid and, also agrees not to pay, any bonus or commission for the purpose of obtaining an approval of its application for the financing hereunder.

f. Non-Contravention of State Law. Nothing in the Agreement shall require the Agency to observe or enforce compliance with any provision or perform any act or do any other thing in contravention of any applicable state law. If any of the provisions of the Agreement violate any applicable state law, the Agency will at once notify the Department in writing so that appropriate changes and modifications may be made by the Department and the Agency to the end that the Agency may proceed as soon as possible with the Project.

g. Execution of Agreement. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which shall constitute the same Agreement. A facsimile or electronic transmission of this Agreement with a signature on behalf of a party will be legal and binding on such party.

h. Federal Award Identification Number (FAIN). If the FAIN is not available prior to execution of the Agreement, the Department may unilaterally add the FAIN to the Agreement without approval of the Agency and without an amendment to the Agreement. If this occurs, an updated Agreement that includes the FAIN will be provided to the Agency and uploaded to the Department of Financial Services' Florida Accountability Contract Tracking System (FACTS).

i. Inspector General Cooperation. The Agency agrees to comply with Section 20.055(5), Florida Statutes, and to incorporate in all subcontracts the obligation to comply with Section 20.055(5), Florida Statutes.

j. Law, Forum, and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida. In the event of a conflict between any portion of the contract and Florida law, the laws of Florida shall prevail. The Agency agrees to waive forum

and venue and that the Department shall determine the forum and venue in which any dispute under this Agreement is decided.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year written above.

EXHIBIT A

Project Description and Responsibilities

A. Project Description (description of Agency's project to provide context, description of project components funded via this Agreement (if not the entire project)): The existing Airport Lighting Control System (ALCS) equipment is more than 20 years old and is beyond its service life. Parts are no longer available for the system, and we are experiencing service outages. Replace the Air Traffic Control Tower (ATCT) Airport Lighting Control System (ALCS).

B. Project Location (limits, city, county, map): New Smyrna Beach Municipal Airport/New Smyrna Beach, FL/Volusia

C. Project Scope (allowable costs: describe project components, improvement type/service type, approximate timeline, project schedule, project size): Lighting Installation/Upgrade: As required by 215.971, F.S., this scope of work includes but is not limited to consultant and design fees, bid and award services, construction inspection, mobilization and demobilization, demolition, cables, conduits, lightning protection, required vault equipment modifications, including all materials, equipment, labor, and incidentals required to complete the lighting systems upgrade project. The Sponsor will comply with Aviation Program

D. Deliverable(s): Final close out documents to be uploaded in JACIP.

The project scope identifies the ultimate project deliverables. Deliverables for requisition, payment and invoice purposes will be the incremental progress made toward completion of project scope elements. Supporting documentation will be quantifiable, measurable, and verifiable, to allow for a determination of the amount of incremental progress that has been made, and provide evidence that the payment requested is commensurate with the accomplished incremental progress and costs incurred by the Agency.

E. Unallowable Costs (including but not limited to): Stored materials unless prior written approval from FDOT is obtained

F. Transit Operating Grant Requirements (Transit Only):

Transit Operating Grants billed as an operational subsidy will require an expenditure detail report from the Agency that matches the invoice period. The expenditure detail, along with the progress report, will be the required deliverables for Transit Operating Grants. Operating grants may be issued for a term not to exceed three years from execution. The original grant agreement will include funding for year one. Funding for years two and three will be added by amendment as long as the grantee has submitted all invoices on schedule and the project deliverables for the year have been met.

EXHIBIT B

Schedule of Financial Assistance

FUNDS AWARDED TO THE AGENCY AND REQUIRED MATCHING FUNDS PURSUANT TO THIS AGREEMENT CONSIST OF THE FOLLOWING:

A. Fund Type and Fiscal Year:

Financial Management Number	Fund Type	FLAIR Category	State Fiscal Year	Object Code	CSFA/ CFDA Number	CSFA/CFDA Title or Funding Source Description	Funding Amount
456950-1-94-01	DDR	088719	2025	751000	55.004	Aviation Grant Program	$50,000.00
456950-1-94-01	LF	088719	2025	751000	55.004	Aviation Grant Program	$12,500.00
	Total Financial Assistance						$62,500.00

B. Estimate of Project Costs by Grant Phase:

Phases*	State	Local	Federal	Totals	State %	Local %	Federal %
Land Acquisition	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Planning	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Environmental/Design/Construction	$50,000.00	$12,500.00	$0.00	$62,500.00	80.00	20.00	0.00
Capital Equipment/ Preventative Maintenance	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Match to Direct Federal Funding	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Mobility Management (Transit Only)	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Totals	$50,000.00	$12,500.00	$0.00	$62,500.00			

*Shifting items between these grant phases requires execution of an Amendment to the Public Transportation Grant Agreement.

Scope Code and/or Activity Line Item (ALI) (Transit Only)	
Common Name/UZA Name (Transit Only)	

BUDGET/COST ANALYSIS CERTIFICATION AS REQUIRED BY SECTION 216.3475, FLORIDA STATUTES:

I certify that the cost for each line item budget category (grant phase) has been evaluated and determined to be allowable, reasonable, and necessary as required by Section 216.3475, Florida Statutes. Documentation is on file evidencing the methodology used and the conclusions reached.

Luci Taylor

Department Grant Manager Name

Signature Date

EXHIBIT C

TERMS AND CONDITIONS OF CONSTRUCTION

1. Design and Construction Standards and Required Approvals.

a. The Agency understands that it is responsible for the preparation and certification of all design plans for the Project. The Agency shall hire a qualified consultant for the design phase of the Project or, if applicable, the Agency shall require their design-build contractor or construction management contractor to hire a qualified consultant for the design phase of the Project.

b. Execution of this Agreement by both Parties shall be deemed a Notice to Proceed to the Agency for the design phase or other non-construction phases of the Project. If the Project involves a construction phase, the Agency shall not begin the construction phase of the Project until the Department issues a Notice to Proceed for the construction phase. Prior to commencing the construction work described in this Agreement, the Agency shall request a Notice to Proceed from the Department's Project Manager, Luci Taylor (email: luciana.taylor@dot.state.fl.us) or from an appointed designee. Any construction phase work performed prior to the execution of this required Notice to Proceed is not subject to reimbursement.

c. The Agency will provide one (1) copy of the final design plans and specifications and final bid documents to the Department's Project Manager prior to bidding or commencing construction of the Project.

d. The Agency shall require the Agency's contractor to post a payment and performance bond in accordance with applicable law(s).

e. The Agency shall be responsible to ensure that the construction work under this Agreement is performed in accordance with the approved construction documents, and that the construction work will meet all applicable Agency and Department standards.

f. Upon completion of the work authorized by this Agreement, the Agency shall notify the Department in writing of the completion of construction of the Project; and for all design work that originally required certification by a Professional Engineer, this notification shall contain an Engineer's Certification of Compliance, signed and sealed by a Professional Engineer, the form of which is attached to this Exhibit. The certification shall state that work has been completed in compliance with the Project construction plans and specifications. If any deviations are found from the approved plans or specifications, the certification shall include a list of all deviations along with an explanation that justifies the reason to accept each deviation.

2. Construction on the Department's Right of Way. If the Project involves construction on the Department's right-of-way, then the following provisions apply to any and all portions of the Project that are constructed on the Department's right-of-way:

a. The Agency shall hire a qualified contractor using the Agency's normal bid procedures to perform the construction work for the Project. The Agency must certify that the installation of the Project is completed by a Contractor prequalified by the Department as required by Section 2 of the Standard Specifications for Road and Bridge Construction (2016), as amended, unless otherwise approved by the Department in writing or the Contractor exhibits past project experience in the last five years that are comparable in scale, composition, and overall quality to the site characterized within the scope of services of this Project.

b. Construction Engineering Inspection (CEI) services will be provided by the Agency by hiring a Department prequalified consultant firm including one individual that has completed the Advanced Maintenance of Traffic Level Training, unless otherwise approved by the Department in writing. The CEI staff shall be present on the Project at all times that the contractor is working. Administration of the CEI staff shall be under the responsible charge of a State of Florida Licensed Professional Engineer who shall provide the certification that all design and construction for the Project meets the minimum construction standards established by Department. The Department shall approve all CEI personnel. The CEI firm shall not be the same firm as that of the Engineer of Record for the Project. The Department shall have the right, but not the obligation, to perform independent assurance testing during the course of construction of the Project. Notwithstanding the foregoing, the Department may issue a written waiver of the CEI requirement for portions of Projects involving the construction of bus shelters, stops, or pads.

c. The Project shall be designed and constructed in accordance with the latest edition of the Department's Standard Specifications for Road and Bridge Construction, the Department Design Standards, and the Manual of Uniform Traffic Control Devices (MUTCD). The following guidelines shall apply as deemed appropriate by the Department: the Department Structures Design Manual, AASHTO Guide Specifications for the Design of Pedestrian Bridges, AASHTO LRFD Bridge Design Specifications, Florida Design Manual, Manual for Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways (the "Florida Green Book"), and the Department Traffic Engineering Manual. The Agency will be required to submit any construction plans required by the Department for review and approval prior to any work being commenced. Should any changes to the plans be required during construction of the Project, the Agency shall be required to notify the Department of the changes and receive approval from the Department prior to the changes being constructed. The Agency shall maintain the area of the Project at all times and coordinate any work needs of the Department during construction of the Project.

d. The Agency shall notify the Department a minimum of 48 hours before beginning construction within Department right-of-way. The Agency shall notify the Department should construction be suspended for more than 5 working days. The Department contact person for construction is Luci Taylor.

e. The Agency shall be responsible for monitoring construction operations and the maintenance of traffic (MOT) throughout the course of the Project in accordance with the latest edition of the Department Standard Specifications, section 102. The Agency is responsible for the development of a MOT plan and making any changes to that plan as necessary. The MOT plan shall be in accordance with the latest version of the Department Design Standards, Index 600 series. Any MOT plan developed by the Agency that deviates from the Department Design Standards must be signed and sealed by a professional engineer. MOT plans will require approval by the Department prior to implementation.

f. The Agency shall be responsible for locating all existing utilities, both aerial and underground, and for ensuring that all utility locations be accurately documented on the construction plans. All utility conflicts shall be fully resolved directly with the applicable utility.

g. The Agency will be responsible for obtaining all permits that may be required by other agencies or local governmental entities.

h. It is hereby agreed by the Parties that this Agreement creates a permissive use only and all improvements located on the Department's right-of-way resulting from this Agreement shall become the property of the Department. Neither the granting of the permission to use the Department right of way nor the placing of facilities upon the Department property shall operate to create or vest any property right to or in the Agency, except as may otherwise be provided in separate agreements. The Agency shall not acquire any right, title, interest or

estate in Department right of way, of any nature or kind whatsoever, by virtue of the execution, operation, effect, or performance of this Agreement including, but not limited to, the Agency's use, occupancy or possession of Department right of way. The Parties agree that this Agreement does not, and shall not be construed to, grant credit for any future transportation concurrency requirements pursuant to Chapter 163, F.S.

i. The Agency shall not cause any liens or encumbrances to attach to any portion of the Department's property, including but not limited to, the Department's right-of-way.

j. The Agency shall perform all required testing associated with the design and construction of the Project. Testing results shall be made available to the Department upon request. The Department shall have the right to perform its own independent testing during the course of the Project.

k. The Agency shall exercise the rights granted herein and shall otherwise perform this Agreement in a good and workmanlike manner, with reasonable care, in accordance with the terms and provisions of this Agreement and all applicable federal, state, local, administrative, regulatory, safety and environmental laws, codes, rules, regulations, policies, procedures, guidelines, standards and permits, as the same may be constituted and amended from time to time, including, but not limited to, those of the Department, applicable Water Management District, Florida Department of Environmental Protection, the United States Environmental Protection Agency, the United States Army Corps of Engineers, the United States Coast Guard and local governmental entities.

l. If the Department determines a condition exists which threatens the public's safety, the Department may, at its discretion, cause construction operations to cease and immediately have any potential hazards removed from its right-of-way at the sole cost, expense, and effort of the Agency. The Agency shall bear all construction delay costs incurred by the Department.

m. The Agency shall be responsible to maintain and restore all features that might require relocation within the Department right-of-way.

n. The Agency will be solely responsible for clean up or restoration required to correct any environmental or health hazards that may result from construction operations.

o. The acceptance procedure will include a final "walk-through" by Agency and Department personnel. Upon completion of construction, the Agency will be required to submit to the Department final as-built plans and an engineering certification that construction was completed in accordance to the plans. Submittal of the final as-built plans shall include one complete set of the signed and sealed plans on 11" X 17" plan sheets and an electronic copy prepared in Portable Document Format (PDF). Prior to the termination of this Agreement, the Agency shall remove its presence, including, but not limited to, all of the Agency's property, machinery, and equipment from Department right-of-way and shall restore those portions of Department right of way disturbed or otherwise altered by the Project to substantially the same condition that existed immediately prior to the commencement of the Project.

p. If the Department determines that the Project is not completed in accordance with the provisions of this Agreement, the Department shall deliver written notification of such to the Agency. The Agency shall have thirty (30) days from the date of receipt of the Department's written notice, or such other time as the Agency and the Department mutually agree to in writing, to complete the Project and provide the Department with written notice of the same (the "Notice of Completion"). If the Agency fails to timely deliver the Notice of Completion, or if it is determined that the Project is not properly completed after receipt of the Notice of Completion, the Department, within its discretion may: 1) provide the Agency with written authorization granting such additional time as the Department deems appropriate to correct the deficiency(ies); or 2) correct the deficiency(ies) at the Agency's sole cost and expense,

without Department liability to the Agency for any resulting loss or damage to property, including, but not limited to, machinery and equipment. If the Department elects to correct the deficiency(ies), the Department shall provide the Agency with an invoice for the costs incurred by the Department and the Agency shall pay the invoice within thirty (30) days of the date of the invoice.

q. The Agency shall implement best management practices for erosion and pollution control to prevent violation of state water quality standards. The Agency shall be responsible for the correction of any erosion, shoaling, or water quality problems that result from the construction of the Project.

r. Portable Traffic Monitoring Site (PTMS) or a Telemetry Traffic Monitoring Site (TTMS) may exist within the vicinity of your proposed work. It is the responsibility of the Agency to locate and avoid damage to these sites. If a PTMS or TTMS is encountered during construction, the Department must be contacted immediately.

s. During construction, highest priority must be given to pedestrian safety. If permission is granted to temporarily close a sidewalk, it should be done with the express condition that an alternate route will be provided, and shall continuously maintain pedestrian features to meet Americans Disability Act (ADA) standards.

t. Restricted hours of operation will be as follows, unless otherwise approved by the Department's District Construction Engineer or designee (insert hours and days of the week for restricted operation): Not Applicable

u. Lane closures on the state road system must be coordinated with the Public Information Office at least two weeks prior to the closure. The contact information for the Department's Public Information Office is:

Insert District PIO contact info:
800-780-7102

Note: (Highlighted sections indicate need to confirm information with District Office or appropriate DOT person managing the Agreement)

3. **Engineer's Certification of Compliance.** The Agency shall complete and submit and if applicable Engineer's Certification of Compliance to the Department upon completion of the construction phase of the Project.

ENGINEER'S CERTIFICATION OF COMPLIANCE

PUBLIC TRANSPORTATION GRANT AGREEMENT
BETWEEN
THE STATE OF FLORIDA, DEPARTMENT OF TRANSPORTATION
and _____

PROJECT DESCRIPTION: _____

DEPARTMENT CONTRACT NO.: _____

FINANCIAL MANAGEMENT NO.: _____

In accordance with the Terms and Conditions of the Public Transportation Grant Agreement, the undersigned certifies that all work which originally required certification by a Professional Engineer has been completed in compliance with the Project construction plans and specifications. If any deviations have been made from the approved plans, a list of all deviations, along with an explanation that justifies the reason to accept each deviation, will be attached to this Certification. Also, with submittal of this certification, the Agency shall furnish the Department a set of "as-built" plans for construction on the Department's Right of Way certified by the Engineer of Record/CEI.

EXHIBIT D

AGENCY RESOLUTION

PLEASE SEE ATTACHED

EXHIBIT E

PROGRAM SPECIFIC TERMS AND CONDITIONS - AVIATION
AVIATION PROGRAM ASSURANCES

A. General.

1. The assurances herein shall form an integral part of the Agreement between the Department and the Agency.

2. These assurances delineate the obligations of the Parties to this Agreement to ensure their commitment and compliance with specific provisions of **Exhibit "A", Project Description and Responsibilities**, and **Exhibit "B", Schedule of Financial Assistance**, as well as serving to protect public investment in public-use airports and the continued viability of the Florida Aviation System.

3. The Agency shall comply with the assurances as specified in this Agreement.

4. The terms and assurances of this Agreement shall remain in full force and effect throughout the useful life of a facility developed; equipment acquired; or Project items installed within a facility for an airport development or noise compatibility program project, but shall not exceed 20 years from the effective date of this Agreement.

5. There shall be no limit on the duration of the terms and assurances of this Agreement regarding Exclusive Rights and Airport Revenue so long as the property is used as a public airport.

6. There shall be no limit on the duration of the terms and assurances of this Agreement with respect to real property acquired with funds provided by this Agreement.

7. Subject to appropriations, the Department shall continue to comply with its financial commitment to this Project under the terms of this Agreement, until such time as the Department may determine that the Agency has failed to comply with the terms and assurances of this Agreement.

8. An Agency that has been determined by the Department to have failed to comply with either the terms of these Assurances, or the terms of the Agreement, or both, shall be notified, in writing, by the Department, identifying the specifics of the non-compliance and any corrective action by the Agency to remedy the failure.

9. Failure by the Agency to satisfactorily remedy the non-compliance shall absolve the Department's continued financial commitment to this Project and immediately require the Agency to repay the Department the full amount of funds expended by the Department on this Project.

10. Any history of failure to comply with the terms and assurances of an Agreement will jeopardize the Agency's eligibility for further state funding of airport projects by the Department.

B. Agency Compliance Certification.

1. General Certification. The Agency hereby certifies, with respect to this Project, it will comply, within its authority, with all applicable, current laws and rules of the State of Florida and applicable local governments, as well as Department policies, guidelines, and requirements, including but not limited to, the following (latest version of each document):

a. Florida Statutes (F.S.)

- Chapter 163, F.S., Intergovernmental Programs
- Chapter 329, F.S., Aircraft: Title; Liens; Registration; Liens
- Chapter 330, F.S., Regulation of Aircraft, Pilots, and Airports
- Chapter 331, F.S., Aviation and Aerospace Facilities and Commerce
- Chapter 332, F.S., Airports and Other Air Navigation Facilities
- Chapter 333, F.S., Airport Zoning

b. Florida Administrative Code (FAC)

- Chapter 73C-41, FAC, Community Planning; Governing the Procedure for the Submittal and Review of Local Government Comprehensive Plans and Amendments
- Chapter 14-60, FAC, Airport Licensing, Registration, and Airspace Protection
- Section 62-256.300, FAC, Open Burning, Prohibitions
- Section 62-701.320(13), FAC, Solid Waste Management Facility Permit Requirements, General, Airport Safety

c. Local Government Requirements

- Airport Zoning Ordinance
- Local Comprehensive Plan

d. Department Requirements

- Eight Steps of Building a New Airport
- Florida Airport Revenue Use Guide
- Florida Aviation Project Handbook
- Guidebook for Airport Master Planning
- Airport Compatible Land Use Guidebook

2. **Construction Certification.** The Agency hereby certifies, with respect to a construction-related project, that all design plans and specifications will comply with applicable federal, state, local, and professional standards, as well as Federal Aviation Administration (FAA) Advisory Circulars (AC's) and FAA issued waivers thereto, including but not limited to, the following:

a. Federal Requirements

- FAA AC 70/7460-1, Obstruction Marking and Lighting
- FAA AC 150/5300-13, Airport Design
- FAA AC 150/5370-2, Operational Safety on Airports During Construction
- FAA AC 150/5370-10, Standards for Specifying Construction of Airports

b. Local Government Requirements

- Local Building Codes
- Local Zoning Codes

c. Department Requirements

- Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways (Commonly Referred to as the "Florida Green Book")
- Manual on Uniform Traffic Control Devices
- Section 14-60.007, FAC, Airfield Standards for Licensed Airports
- Standard Specifications for Construction of General Aviation Airports
- Design Guidelines & Minimum Standard Requirements for T-Hangar Projects

3. **Land Acquisition Certification.** The Agency hereby certifies, regarding land acquisition, that it will comply with applicable federal and/or state policies, regulations, and laws, including but not limited to the following:

a. Federal Requirements

- Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970
- National Environmental Policy of 1969
- FAA Order 5050.4, National Environmental Policy Act Implementing Instructions for Airport Projects
- FAA Order 5100.37B, Land Acquisition and Relocation Assistance for Airport Projects

b. Florida Requirements

- Chapter 73, F.S., Eminent Domain (re: Property Acquired Through Condemnation)
- Chapter 74, F.S., Proceedings Supplemental to Eminent Domain (re: Condemnation)
- Section 286.23, F.S., Public Business: Miscellaneous Provisions

C. Agency Authority.

1. **Legal Authority.** The Agency hereby certifies, with respect to this Agreement, that it has the legal authority to enter into this Agreement and commit to this Project; that a resolution, motion, or similar action has been duly adopted or passed as an official act of the airport sponsor's governing body authorizing this Agreement, including assurances contained therein, and directing and authorizing the person identified as the official representative of the governing body to act on its behalf with respect to this Agreement and to provide any additional information as may be required.

2. **Financial Authority.** The Agency hereby certifies, with respect to this Agreement, that it has sufficient funds available for that portion of the Project costs which are not paid by the U.S. Government or the State of Florida; that it has sufficient funds available to assure future operation and maintenance of items funded by this Project, which it will control; and that authority has been granted by the airport sponsor governing body to commit those funds to this Project.

D. Agency Responsibilities. The Agency hereby certifies it currently complies with or will comply with the following responsibilities:

1. **Accounting System.**

   a. The Agency shall create and maintain a separate account to document all of the financial transactions related to the airport as a distinct entity.

   b. The accounting records shall be kept by the Agency or its authorized representative in accordance with Generally Accepted Accounting Principles and in an accounting system that will facilitate an effective audit in accordance with the 2 CFR Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards and Section 215.97, F.S., Florida Single Audit Act.

   c. The Department has the right to audit and inspect all financial records of the Agency upon reasonable notice.

2. **Good Title.**

   a. The Agency holds good title, satisfactory to the Department, to the airport or site thereof, or gives assurance, satisfactory to the Department, that good title will be obtained.

   b. For noise compatibility program projects undertaken on the airport sponsor's property, the Agency holds good title, satisfactory to the Department, to that portion of the property upon which state funds will be expended, or gives assurance, satisfactory to the Department, that good title will be obtained.

3. **Preserving Rights and Powers.**

   a. The Agency shall not take or permit any action which would operate to deprive it of any of the rights and powers necessary to perform any or all of the terms and assurances of this Agreement without the written approval of the Department. Further, the Agency shall act promptly to acquire, extinguish, or modify, in a manner acceptable to the Department, any outstanding rights or claims of right of others which would interfere with such performance by the Agency.

   b. If an arrangement is made for management and operation of the airport by any entity or person other than the Agency or an employee of the Agency, the Agency shall reserve sufficient rights and authority to ensure that the airport will be operated and maintained in accordance with the terms and assurances of this Agreement.

4. **Hazard Removal and Mitigation.**

a. For airport hazards located on airport controlled property, the Agency shall clear and protect terminal airspace required for instrument and visual operations at the airport (including established minimum flight altitudes) by removing, lowering, relocating, marking, or lighting or otherwise mitigating existing airport hazards and by preventing the establishment or creation of future airport hazards.

b. For airport hazards not located on airport controlled property, the Agency shall work in conjunction with the governing public authority or private land owner of the property to clear and protect terminal airspace required for instrument and visual operations at the airport (including established minimum flight altitudes) by removing, lowering, relocating, marking, or lighting or otherwise mitigating existing airport hazards and by preventing the establishment or creation of future airport hazards. The Agency may enter into an agreement with surrounding property owners or pursue available legal remedies to remove potential hazards to air navigation.

5. Airport Compatible Land Use.

a. The Agency assures that appropriate airport zoning ordinances are in place consistent with Section 333.03, F.S., or if not in place, that it will take appropriate action necessary to ensure local government adoption of an airport zoning ordinance or execution of an interlocal agreement with another local government body having an airport zoning ordinance, consistent with the provisions of Section 333.03, F.S.

b. The Agency assures that it will disapprove or oppose any attempted alteration or creation of objects, natural or man-made, dangerous to navigable airspace or that would adversely affect the current or future levels of airport operations.

c. The Agency assures that it will disapprove or oppose any attempted change in local land use development regulations that would adversely affect the current or future levels of airport operations by creation or expansion of airport incompatible land use areas.

6. Consistency with Local Government Plans.

a. The Agency assures the Project is consistent with the currently existing and planned future land use development plans approved by the local government having jurisdictional responsibility for the area surrounding the airport.

b. The Agency assures that it has given fair consideration to the interest of local communities and has had reasonable consultation with those parties affected by the Project.

c. The Agency shall consider and take appropriate actions, if deemed warranted by the Agency, to adopt the current, approved Airport Master Plan into the local government comprehensive plan.

7. Consistency with Airport Master Plan and Airport Layout Plan.

a. The Agency assures that the project, covered by the terms and assurances of this Agreement, is consistent with the most current Airport Master Plan.

b. The Agency assures that the Project, covered by the terms and assurances of this Agreement, is consistent with the most current, approved Airport Layout Plan (ALP), which shows:

1) The boundaries of the airport and all proposed additions thereto, together with the boundaries of all offsite areas owned or controlled by the Agency for airport purposes and proposed additions thereto;
2) The location and nature of all existing and proposed airport facilities and structures (such as runways, taxiways, aprons, terminal buildings, hangars, and roads), including all proposed extensions and reductions of existing airport facilities; and
3) The location of all existing and proposed non-aviation areas on airport property and of all existing improvements thereon.

c. The Agency assures that it will not make or permit any changes or alterations on the airport or any of its facilities that are not consistent with the Airport Master Plan and the Airport Layout Plan, as approved by the Department.

d. Original Airport Master Plans and Airport Layout Plans and each amendment, revision, or modification thereof, will be subject to the approval of the Department.

8. Airport Financial Plan.

a. The Agency assures that it will develop and maintain a cost-feasible Airport financial plan to accomplish the projects necessary to achieve the proposed airport improvements identified in the Airport Master Plan and depicted in the Airport Layout Plan, and any updates thereto. The Agency's Airport financial plan must comply with the following conditions:

1) The Airport financial plan will be a part of the Airport Master Plan.
2) The Airport financial plan will realistically assess project phasing considering availability of state and local funding and likelihood of federal funding under the FAA's priority system.
3) The Airport financial plan will not include Department funding for projects that are inconsistent with the local government comprehensive plan.

b. All Project cost estimates contained in the Airport financial plan shall be entered into and kept current in the Florida Aviation Database (FAD) Joint Automated Capital Improvement Program (JACIP) website.

9. Airport Revenue. The Agency assures that all revenue generated by the airport will be expended for capital improvement or operating costs of the airport; the local airport system; or other local facilities which are owned or operated by the owner or operator of the airport and which are directly and substantially related to the air transportation of passengers or property, or for environmental or noise mitigation purposes on or off the airport.

10. Fee and Rental Structure.

a. The Agency assures that it will maintain a fee and rental structure for facilities and services at the airport that it will make the airport as self-sustaining as possible under the circumstances existing at the particular airport.

b. If this Agreement results in a facility that will be leased or otherwise produce revenue, the Agency assures that the price charged for that facility will be based on the market value.

11. Public-Private Partnership for Aeronautical Uses.

a. If the airport owner or operator and a person or entity that owns an aircraft or an airport tenant or potential tenant agree that an aircraft hangar or tenant-specific facility, respectively, is to be constructed on airport property for aircraft storage or tenant use at the expense of the aircraft owner or tenant, the airport owner or operator may grant to the aircraft owner or tenant of the facility a lease that is subject to such terms and conditions on the facility as the airport owner or operator may impose, subject to approval by the Department.

b. The price charged for said lease will be based on market value, unless otherwise approved by the Department.

12. Economic Nondiscrimination.

a. The Agency assures that it will make the airport available as an airport for public use on reasonable terms without unjust discrimination to all types, kinds and classes of aeronautical activities, including commercial aeronautical activities offering services to the public.

1) The Agency may establish such reasonable, and not unjustly discriminatory, conditions to be met by all users of the airport as may be necessary for the safe and efficient operation of the airport.

2) The Agency may prohibit or limit any given type, kind or class of aeronautical use of the airport if such action is necessary for the safe operation of the airport or necessary to serve the civil aviation needs of the public.

b. The Agency assures that each airport Fixed-Based Operator (FBO) shall be subject to the same rates, fees, rentals, and other charges as are uniformly applicable to all other FBOs making the same or similar uses of such airport and utilizing the same or similar facilities.

13. Air and Water Quality Standards. The Agency assures that all projects involving airport location, major runway extension, or runway location will be located, designed, constructed, and operated so as to comply with applicable air and water quality standards.

14. Operations and Maintenance.

a. The Agency assures that the airport and all facilities, which are necessary to serve the aeronautical users of the airport, shall be operated at all times in a safe and serviceable condition and in accordance with the minimum standards as may be required or prescribed by applicable federal and state agencies for maintenance and operation, as well as minimum standards established by the Department for State of Florida licensing as a public-use airport.

1) The Agency assures that it will not cause or permit any activity or action thereon which would interfere with its use for airport purposes.
2) Except in emergency situations, any proposal to temporarily close the airport for non-aeronautical purposes must first be approved by the Department.
3) The Agency assures that it will have arrangements for promptly notifying airmen of any condition affecting aeronautical use of the airport.

b. Nothing contained herein shall be construed to require that the airport be operated for aeronautical use during temporary periods when adverse weather conditions interfere with safe airport operations.

15. Federal Funding Eligibility.

a. The Agency assures it will take appropriate actions to maintain federal funding eligibility for the airport and it will avoid any action that renders the airport ineligible for federal funding.

b. If the Agency becomes ineligible for federal funding of airport projects, such determination will render the Agency ineligible for state funding of airport projects.

16. Project Implementation.

a. The Agency assures that it will begin making expenditures or incurring obligations pertaining to this Project within one year after the effective date of this Agreement.

b. The Agency may request a one-year extension of this one-year time period, subject to approval by the Department District Secretary or designee.

c. Failure of the Agency to make expenditures, incur obligations or receive an approved extension may allow the Department to terminate this Agreement.

17. Exclusive Rights. The Agency assures that it will not permit any exclusive right for use of the airport by any person providing, or intending to provide, aeronautical services to the public.

18. Airfield Access.

a. The Agency assures that it will not grant or allow general easement or public access that opens onto or crosses the airport runways, taxiways, flight line, passenger facilities, or any area used for emergency

equipment, fuel, supplies, passengers, mail and freight, radar, communications, utilities, and landing systems, including but not limited to flight operations, ground services, emergency services, terminal facilities, maintenance, repair, or storage, except for those normal airport providers responsible for standard airport daily services or during special events at the airport open to the public with limited and controlled access.

b. The Agency assures that it will not grant or allow general easement or public access to any portion of the airfield from adjacent real property which is not owned, operated, or otherwise controlled by the Agency without prior Department approval.

19. Retention of Rights and Interests. The Agency will not sell, lease, encumber, or otherwise transfer or dispose of any part of its title or other interests in the real property shown as airport owned or controlled on the current airport layout plan without prior written approval by the Department. It will not sell, lease, encumber, terminate, waive, or otherwise transfer or dispose of any part of its title, rights, or other interest in existing noise easements or avigation easements on any property, airport or non-airport, without prior written approval by the Department. These assurances shall not limit the Agency's right to lease airport property for airport-compatible purposes.

20. Consultant, Contractor, Scope, and Costs.

a. The Department has the right to disapprove the Agency's employment of consultants, contractors, and subcontractors for all or any part of this Project if the specific consultants, contractors, or subcontractors have a record of poor project performance with the Department.

b. Further, the Department maintains the right to disapprove the proposed Project scope and cost of professional services.

21. Planning Projects. For all planning projects or other aviation studies, the Agency assures that it will:

a. Execute the project per the approved project narrative or with approved modifications.

b. Furnish the Department with such periodic project and work activity reports as indicated in the approved scope of services.

c. Make such project materials available for public review, unless exempt from public disclosure.

1) Information related to airport security is considered restricted information and is exempt from public dissemination per Sections 119.071(3) and 331.22 F.S.
2) No materials prepared under this Agreement shall be subject to copyright in the United States or any other country.

d. Grant the Department unrestricted authority to publish, disclose, distribute, and otherwise use any of the material prepared in connection with this Agreement.

e. If the Project involves developing an Airport Master Plan or an Airport Layout Plan, and any updates thereto, it will be consistent with provisions of the Florida Aviation System Plan, will identify reasonable future growth of the airport and the Agency will comply with the Department airport master planning guidebook, including:

1) Provide copies, in electronic and editable format, of final Project materials to the Department, including computer-aided drafting (CAD) files of the Airport Layout Plan.
2) Develop a cost-feasible financial plan, approved by the Department, to accomplish the projects described in the Airport Master Plan or depicted in the Airport Layout Plan, and any updates thereto. The cost-feasible financial plan shall realistically assess Project phasing considering availability of state and local funding and federal funding under the FAA's priority system.
3) Enter all projects contained in the cost-feasible plan in the Joint Automated Capital Improvement Program (JACIP).

f. The Agency understands and agrees that Department approval of this Agreement or any planning material developed as part of this Agreement does not constitute or imply any assurance or commitment on the part of the Department to approve any pending or future application for state aviation funding.

g. The Agency will submit master planning draft and final deliverables for Department and, if required, FAA approval prior to submitting any invoices to the Department for payment.

22. Land Acquisition Projects. For the purchase of real property, the Agency assures that it will:

a. Laws. Acquire the land in accordance with federal and/or state laws governing such action.

b. Administration. Maintain direct control of Project administration, including:

1) Maintain responsibility for all related contract letting and administrative procedures related to the purchase of real property.
2) Secure written Department approval to execute each agreement for the purchase of real property with any third party.
3) Ensure a qualified, State-certified general appraiser provides all necessary services and documentation.
4) Furnish the Department with a projected schedule of events and a cash flow projection within 20 calendar days after completion of the review appraisal.
5) Establish a Project account for the purchase of the land.
6) Collect and disburse federal, state, and local project funds.

c. Reimbursable Funds. If funding conveyed by this Agreement is reimbursable for land purchase in accordance with Chapter 332, F.S., the Agency shall comply with the following requirements:

1) The Agency shall apply for a FAA Airport Improvement Program grant for the land purchase within 60 days of executing this Agreement.
2) If federal funds are received for the land purchase, the Agency shall notify the Department, in writing, within 14 calendar days of receiving the federal funds and is responsible for reimbursing the Department within 30 calendar days to achieve normal project federal, state, and local funding shares per Chapter 332, F.S.
3) If federal funds are not received for the land purchase, the Agency shall reimburse the Department within 30 calendar days after the reimbursable funds are due in order to achieve normal project state and local funding shares as described in Chapter 332, F.S.
4) If federal funds are not received for the land purchase and the state share of the purchase is less than or equal to normal state and local funding shares per Chapter 332, F.S., when reimbursable funds are due, no reimbursement to the Department shall be required.

d. New Airport. If this Project involves the purchase of real property for the development of a new airport, the Agency assures that it will:

1) Apply for federal and state funding to construct a paved runway, associated aircraft parking apron, and connecting taxiway within one year of the date of land purchase.
2) Complete an Airport Master Plan within two years of land purchase.
3) Complete airport construction for basic operation within 10 years of land purchase.

e. Use of Land. The Agency assures that it shall use the land for aviation purposes in accordance with the terms and assurances of this Agreement within 10 years of acquisition.

f. Disposal of Land. For the disposal of real property the Agency assures that it will comply with the following:
1) For land purchased for airport development or noise compatibility purposes, the Agency shall, when the land is no longer needed for such purposes, dispose of such land at fair market value and/or make available to the Department an amount equal to the state's proportionate share of its market value.

2) Land will be considered to be needed for airport purposes under this assurance if:

a) It serves aeronautical purposes such as a runway protection zone or as a noise buffer.
b) Revenue from uses of such land contributes to airport financial self-sufficiency.

3) Disposition of land under Sections D.22.f.1. or D.22.f.2. of this Exhibit, above, shall be subject to retention or reservation of any interest or right therein needed to ensure such land will only be used for purposes compatible with noise levels related to airport operations.
4) Revenues from the sale of such land must be accounted for as outlined in Section D.1. of this Exhibit, and expended as outlined in Section D.9. of this Exhibit.

23. Construction Projects. The Agency assures that it will:

a. Project Certifications. Certify Project compliances, including:

1) Consultant and contractor selection comply with all applicable federal, state and local laws, rules, regulations, and policies.
2) All design plans and specifications comply with federal, state, and professional standards and applicable FAA advisory circulars, as well as the minimum standards established by the Department for State of Florida licensing as a public-use airport.
3) Completed construction complies with all applicable local building codes.
4) Completed construction complies with the Project plans and specifications with certification of that fact by the Project Engineer.

b. Design Development. For the plans, specifications, construction contract documents, and any and all other engineering, construction, and contractual documents produced by the Engineer, which are hereinafter collectively referred to as "plans", the Engineer will certify that:

1) The plans shall be developed in accordance with sound engineering and design principles, and with generally accepted professional standards.
2) The plans shall be consistent with the intent of the Project as defined in Exhibit A and Exhibit B of this Agreement.
3) The Project Engineer shall perform a review of the certification requirements listed in Section B.2. of this Exhibit, Construction Certification, and make a determination as to their applicability to this Project.
4) Development of the plans shall comply with all applicable laws, ordinances, zoning and permitting requirements, public notice requirements, and other similar regulations.

c. Inspection and Approval. The Agency assures that:

1) The Agency will provide and maintain competent technical supervision at the construction site throughout the Project to assure that the work conforms to the plans, specifications, and schedules approved by the Department, as applicable, for the Project.
2) The Agency assures that it will allow the Department to inspect the work and that it will provide any cost and progress reporting, as may be required by the Department.
3) The Agency assures that it will take the appropriate corrective action necessary, as required by the Department, for work which does not conform to the Department standards.

d. Pavement Preventive Maintenance. The Agency assures that for a project involving replacement or reconstruction of runway or taxiway pavement it has implemented an airport pavement maintenance management program and that it will use such program for the useful life of any pavement constructed, reconstructed, or repaired with state financial assistance at the airport.

24. Noise Mitigation Projects. The Agency assures that it will:

a. Government Agreements. For all noise compatibility projects that are carried out by another unit of local government or are on property owned by a unit of local government other than the Agency, the Agency shall enter into an agreement with that government body.

1) The local agreement, satisfactory to the Department, shall obligate the unit of local government to the same terms and assurances that apply to the Agency.
2) The Agency assures that it will take steps to enforce the local agreement if there is substantial non-compliance with the terms of the local agreement.

b. Private Agreements. For noise compatibility projects on privately owned property:

1) The Agency shall enter into an agreement with the owner of that property to exclude future actions against the airport.
2) The Agency assures that it will take steps to enforce such agreement if there is substantial non-compliance with the terms of the agreement.

Exhibit E1

PROGRAM SPECIFIC TERMS AND CONDITIONS

(Prohibition on Discrimination Based on Health Care Choices)

This exhibit forms an integral part of the Agreement between the Department and the Agency.

1. **Statutory Reference.** Section 339.08, F.S. and Section 381.00316, F.S.

2. **Statutory Compliance.** Pursuant to Section 339.08, F.S., the Department may not expend state funds to support a project or program of certain entities if the entity is found to be in violation of Section 381.00316, F.S. The Department shall withhold state funds until the entity is found to be in compliance with Section 381.00316, F.S. This shall apply to any of the following entities:

    a. A public transit provider as defined in s. 341.031(1), F.S.;
    b. An authority created pursuant to chapter 343, F.S., chapter 348, F.S., or chapter 349, F.S.; c. A public-use airport as defined in s. 332.004, F.S.; or
    d. A port listed in s. 311.09(1), F.S.

EXHIBIT F

Contract Payment Requirements
Florida Department of Financial Services, Reference Guide for State Expenditures
Cost Reimbursement Contracts

Invoices for cost reimbursement contracts must be supported by an itemized listing of expenditures by category (salary, travel, expenses, etc.). Supporting documentation shall be submitted for each amount for which reimbursement is being claimed indicating that the item has been paid. Documentation for each amount for which reimbursement is being claimed must indicate that the item has been paid. Check numbers may be provided in lieu of copies of actual checks. Each piece of documentation should clearly reflect the dates of service. Only expenditures for categories in the approved agreement budget may be reimbursed. These expenditures must be allowable (pursuant to law) and directly related to the services being provided.

Listed below are types and examples of supporting documentation for cost reimbursement agreements:

(1) Salaries: A payroll register or similar documentation should be submitted. The payroll register should show gross salary charges, fringe benefits, other deductions and net pay. If an individual for whom reimbursement is being claimed is paid by the hour, a document reflecting the hours worked times the rate of pay will be acceptable.

(2) Fringe Benefits: Fringe Benefits should be supported by invoices showing the amount paid on behalf of the employee (e.g., insurance premiums paid). If the contract specifically states that fringe benefits will be based on a specified percentage rather than the actual cost of fringe benefits, then the calculation for the fringe benefits amount must be shown.

Exception: Governmental entities are not required to provide check numbers or copies of checks for fringe benefits.

(3) Travel: Reimbursement for travel must be in accordance with Section 112.061, Florida Statutes, which includes submission of the claim on the approved State travel voucher or electronic means.

(4) Other direct costs: Reimbursement will be made based on paid invoices/receipts. If nonexpendable property is purchased using State funds, the contract should include a provision for the transfer of the property to the State when services are terminated. Documentation must be provided to show compliance with Department of Management Services Rule 60A-1.017, Florida Administrative Code, regarding the requirements for contracts which include services and that provide for the contractor to purchase tangible personal property as defined in Section 273.02, Florida Statutes, for subsequent transfer to the State.

(5) In-house charges: Charges which may be of an internal nature (e.g., postage, copies, etc.) may be reimbursed on a usage log which shows the units times the rate being charged. The rates must be reasonable.

(6) Indirect costs: If the contract specifies that indirect costs will be paid based on a specified rate, then the calculation should be shown.

Contracts between state agencies, and/or contracts between universities may submit alternative documentation to substantiate the reimbursement request that may be in the form of FLAIR reports or other detailed reports.

The Florida Department of Financial Services, online Reference Guide for State Expenditures can be found at this web address: https://myfloridacfo.com/docs-sf/accounting-and-auditing-libraries/manuals/agencies/reference-guide-for-state-expenditures.pdf?sfvrsn=b4cc3337_6

AUDIT REQUIREMENTS FOR AWARDS OF STATE FINANCIAL ASSISTANCE

THE STATE RESOURCES AWARDED PURSUANT TO THIS AGREEMENT CONSIST OF THE FOLLOWING:

SUBJECT TO SECTION 215.97, FLORIDA STATUTES:~

Awarding Agency: Florida Department of Transportation
State Project Title: Aviation Grant Program
CSFA Number: 55.004
***Award Amount:** $50,000

*The award amount may change with amendments

Specific project information for CSFA Number 55.004 is provided at: https://apps.fldfs.com/fsaa/searchCatalog.aspx

COMPLIANCE REQUIREMENTS APPLICABLE TO STATE RESOURCES AWARDED PURSUANT TO THIS AGREEMENT:

State Project Compliance Requirements for CSFA Number 55.004 are provided at: https://apps.fldfs.com/fsaa/searchCompliance.aspx

The State Projects Compliance Supplement is provided at: https://apps.fldfs.com/fsaa/compliance.aspx

RESOLUTION NO. 13-25

A RESOLUTION OF THE CITY OF NEW SMYRNA BEACH AUTHORIZING THE MAYOR TO MAKE, EXECUTE AND DELIVER TO THE STATE OF FLORIDA DEPARTMENT OF TRANSPORTATION, PUBLIC TRANSPORTATION GRANT AGREEMENT FPN #456950-1-94-01 FOR THE AIR TRAFFIC CONTROL EQUIPMENT UPGRADE AT THE NEW SMYRNA BEACH MUNICIPAL AIRPORT; PROVIDING FOR CONFLICTING RESOLUTIONS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the State of Florida Department of Transportation and the City of New Smyrna Beach desire to enter into an Agreement for the Air Traffic Control Equipment Upgrade at New Smyrna Beach Municipal Airport; and

WHEREAS, the State of Florida Department of Transportation has requested the City of New Smyrna Beach to execute and deliver to the State of Florida Department of Transportation the Public Transportation Grant Agreement for the aforementioned project, FPN 456950-1-94-01.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF NEW SMYRNA BEACH, FLORIDA:

SECTION 1: ***Authorization.*** That the City Commission hereby authorizes the Mayor to make, execute, and deliver to the State of Florida Department of Transportation Public Transportation Grant Agreement, FPN 456950-1-94-01, which agreement is more particularly described as:

SEE EXHIBIT "A" ATTACHED HERETO AND BY REFERENCE MADE A PART HEREOF.

SECTION 2: ***Conflicting Resolutions.*** That all other resolutions or parts thereof that are in conflict with this resolution are hereby rescinded and repealed.

SECTION 3: ***Effective Date.*** That this resolution shall take effect immediately upon its final adoption.

APPROVED AS TO FORM AND CORRECTNESS:

Carrie Avallone

CARRIE AVALLONE
City Attorney

DATE: 5/19/2025

STATE OF FLORIDA DEPARTMENT OF TRANSPORTATION

PUBLIC TRANSPORTATION GRANT AGREEMENT

Form 725-000-01
STRATEGIC DEVELOPMENT
OGC 03/25

CFDA Title:	N/A				
CSFA Number:	55.004				
CSFA Title:	Aviation Grant Program				

THIS PUBLIC TRANSPORTATION GRANT AGREEMENT ("Agreement") is entered into _____, by and between the State of Florida, Department of Transportation, ("Department"), and City of New Smyrna Beach, ("Agency"). The Department and the Agency are sometimes referred to in this Agreement as a "Party" and collectively as the "Parties."

NOW, THEREFORE, in consideration of the mutual benefits to be derived from joint participation on the Project, the Parties agree to the following:

1. **Authority.** The Agency, by Resolution or other form of official authorization, a copy of which is attached as **Exhibit "D", Agency Resolution** and made a part of this Agreement, has authorized its officers to execute this Agreement on its behalf. The Department has the authority pursuant to Section(s) 332.007, Florida Statutes, to enter into this Agreement.

2. **Purpose of Agreement.** The purpose of this Agreement is to provide for the Department's participation in Air Traffic Control Equipment Upgrade at New Smyrna Beach Municipal Airport, as further described in **Exhibit "A", Project Description and Responsibilities**, attached and incorporated into this Agreement ("Project"), to provide Department financial assistance to the Agency, state the terms and conditions upon which Department funds will be provided, and to set forth the manner in which the Project will be undertaken and completed.

3. **Program Area.** For identification purposes only, this Agreement is implemented as part of the Department program area selected below (select all programs that apply):

   X **Aviation**
   _ **Seaports**
   _ **Transit**
   _ **Intermodal**
   _ **Rail Crossing Closure**
   _ **Match to Direct Federal Funding** (Aviation or Transit)
   (Note: Section 15 and Exhibit G do not apply to federally matched funding)
   _ **Other**

4. **Exhibits.** The following Exhibits are attached and incorporated into this Agreement:

   X Exhibit A: Project Description and Responsibilities
   X Exhibit B: Schedule of Financial Assistance
   _ *Exhibit B1: Deferred Reimbursement Financial Provisions
   _ *Exhibit B2: Advance Payment Financial Provisions
   _ *Exhibit B3: Alternative Advanced Pay (Transit Bus Program)
   X *Exhibit C: Terms and Conditions of Construction
   X Exhibit D: Agency Resolution
   X Exhibit E: Program Specific Terms and Conditions
   X Exhibit E1: Prohibition Based on Health Care Choices
   _ Exhibit E2: Exterior Vehicle Wrap, Tinting, Paint, Marketing and Advertising (Transit)

X Exhibit F: Contract Payment Requirements
X *Exhibit G: Audit Requirements for Awards of State Financial Assistance
__ *Exhibit H: Audit Requirements for Awards of Federal Financial Assistance
__ *Exhibit I: Certification of Disbursement of Payment to Vehicle and/or Equipment Vendor
__ *Additional Exhibit(s):

*Indicates that the Exhibit is only attached and incorporated if applicable box is selected.

5. **Time.** Unless specified otherwise, all references to "days" within this Agreement refer to calendar days.

6. **Term of Agreement.** This Agreement shall commence upon full execution by both Parties ("Effective Date") and continue through June 1, 2027. If the Agency does not complete the Project within this time period, this Agreement will expire unless an extension of the time period is requested by the Agency and granted in writing by the Department prior to the expiration of this Agreement. Expiration of this Agreement will be considered termination of the Project. The cost of any work performed prior to the Effective Date or after the expiration date of this Agreement will not be reimbursed by the Department.

   a. __ If this box is checked the following provision applies:

   Unless terminated earlier, work on the Project shall commence no later than the __ day of __, or within __ days of the issuance of the Notice to Proceed for the construction phase of the Project (if the Project involves construction), whichever date is earlier. The Department shall have the option to immediately terminate this Agreement should the Agency fail to meet the above-required dates.

7. **Amendments, Extensions, and Assignment.** This Agreement may be amended or extended upon mutual written agreement of the Parties. This Agreement shall not be renewed. This Agreement shall not be assigned, transferred, or otherwise encumbered by the Agency under any circumstances without the prior written consent of the Department.

8. **Termination or Suspension of Project.** The Department may, by written notice to the Agency, suspend any or all of the Department's obligations under this Agreement for the Agency's failure to comply with applicable law or the terms of this Agreement until such time as the event or condition resulting in such suspension has ceased or been corrected.

   a. Notwithstanding any other provision of this Agreement, if the Department intends to terminate the Agreement, the Department shall notify the Agency of such termination in writing at least thirty (30) days prior to the termination of the Agreement, with instructions to the effective date of termination or specify the stage of work at which the Agreement is to be terminated.

   b. The Parties to this Agreement may terminate this Agreement when its continuation would not produce beneficial results commensurate with the further expenditure of funds. In this event, the Parties shall agree upon the termination conditions.

   c. If the Agreement is terminated before performance is completed, the Agency shall be paid only for that work satisfactorily performed for which costs can be substantiated. Such payment, however, may not exceed the equivalent percentage of the Department's maximum financial assistance. If any portion of the Project is located on the Department's right-of-way, then all work in progress on the Department right-of-way will become the property of the Department and will be turned over promptly by the Agency.

   d. In the event the Agency fails to perform or honor the requirements and provisions of this Agreement, the Agency shall promptly refund in full to the Department within thirty (30) days of the termination of the Agreement any funds that were determined by the Department to have been expended in violation of the Agreement.

e. The Department reserves the right to unilaterally cancel this Agreement for failure by the Agency to comply with the Public Records provisions of Chapter 119, Florida Statutes.

9. Project Cost:

a. The estimated total cost of the Project is $62,500. This amount is based upon **Exhibit "B", Schedule of Financial Assistance**. The timeline for deliverables and distribution of estimated amounts between deliverables within a grant phase, as outlined in **Exhibit "B", Schedule of Financial Assistance**, may be modified by mutual written agreement of the Parties and does not require execution of an **Amendment to the Public Transportation Grant Agreement**. The timeline for deliverables and distribution of estimated amounts between grant phases requires an amendment executed by both Parties in the same form as this Agreement.

b. The Department agrees to participate in the Project cost up to the maximum amount of $50,000 and, the Department's participation in the Project shall not exceed 80.00% of the total eligible cost of the Project, and as more fully described in **Exhibit "B", Schedule of Financial Assistance**. The Agency agrees to bear all expenses in excess of the amount of the Department's participation and any cost overruns or deficits involved.

10. Compensation and Payment:

a. **Eligible Cost.** The Department shall reimburse the Agency for allowable costs incurred as described in **Exhibit "A", Project Description and Responsibilities**, and as set forth in **Exhibit "B", Schedule of Financial Assistance**.

b. **Deliverables.** The Agency shall provide quantifiable, measurable, and verifiable units of deliverables. Each deliverable must specify the required minimum level of service to be performed and the criteria for evaluating successful completion. The Project and the quantifiable, measurable, and verifiable units of deliverables are described more fully in **Exhibit "A", Project Description and Responsibilities**. Modifications to the deliverables in **Exhibit "A", Project Description and Responsibilities** requires a formal written amendment.

c. **Invoicing.** Invoices shall be submitted no more often than monthly by the Agency in detail sufficient for a proper pre-audit and post-audit, based on the quantifiable, measurable, and verifiable deliverables as established in **Exhibit "A", Project Description and Responsibilities**. Deliverables and costs incurred must be received and approved by the Department prior to reimbursement. Requests for reimbursement by the Agency shall include an invoice, progress report, and supporting documentation for the deliverables being billed that are acceptable to the Department. The Agency shall use the format for the invoice and progress report that is approved by the Department.

d. **Supporting Documentation.** Supporting documentation must establish that the deliverables were received and accepted in writing by the Agency and must also establish that the required minimum standards or level of service to be performed based on the criteria for evaluating successful completion as specified in **Exhibit "A", Project Description and Responsibilities** has been met. All costs invoiced shall be supported by properly executed payrolls, time records, invoices, contracts, or vouchers evidencing in proper detail the nature and propriety of charges as described in **Exhibit "F", Contract Payment Requirements**.

e. **Travel Expenses.** The selected provision below is controlling regarding travel expenses:

X Travel expenses are NOT eligible for reimbursement under this Agreement.

__ Travel expenses ARE eligible for reimbursement under this Agreement. Bills for travel expenses specifically authorized in this Agreement shall be submitted on the Department's

Contractor Travel Form No. 300-000-06 and will be paid in accordance with Section 112.061, Florida Statutes, and the most current version of the Department's Disbursement Handbook for Employees and Managers.

f. **Financial Consequences.** Payment shall be made only after receipt and approval of deliverables and costs incurred unless advance payments are authorized by the Chief Financial Officer of the State of Florida under Chapters 215 and 216, Florida Statutes, or the Department's Comptroller under Section 334.044(29), Florida Statutes. If the Department determines that the performance of the Agency is unsatisfactory, the Department shall notify the Agency of the deficiency to be corrected, which correction shall be made within a time-frame to be specified by the Department. The Agency shall, within thirty (30) days after notice from the Department, provide the Department with a corrective action plan describing how the Agency will address all issues of contract non-performance, unacceptable performance, failure to meet the minimum performance levels, deliverable deficiencies, or contract non-compliance. If the corrective action plan is unacceptable to the Department, the Agency will not be reimbursed. If the deficiency is subsequently resolved, the Agency may bill the Department for the amount that was previously not reimbursed during the next billing period. If the Agency is unable to resolve the deficiency, the funds shall be forfeited at the end of the Agreement's term.

g. **Invoice Processing.** An Agency receiving financial assistance from the Department should be aware of the following time frames. Inspection or verification and approval of deliverables shall take no longer than 20 days from the Department's receipt of the invoice. The Department has 20 days to deliver a request for payment (voucher) to the Department of Financial Services. The 20 days are measured from the latter of the date the invoice is received or the deliverables are received, inspected or verified, and approved.

   If a payment is not available within 40 days, a separate interest penalty at a rate as established pursuant to Section 55.03(1), Florida Statutes, will be due and payable, in addition to the invoice amount, to the Agency. Interest penalties of less than one (1) dollar will not be enforced unless the Agency requests payment. Invoices that have to be returned to an Agency because of Agency preparation errors will result in a delay in the payment. The invoice payment requirements do not start until a properly completed invoice is provided to the Department.

   A Vendor Ombudsman has been established within the Department of Financial Services. The duties of this individual include acting as an advocate for Agency who may be experiencing problems in obtaining timely payment(s) from a state agency. The Vendor Ombudsman may be contacted at (850) 413-5516.

h. **Records Retention.** The Agency shall maintain an accounting system or separate accounts to ensure funds and projects are tracked separately. Records of costs incurred under the terms of this Agreement shall be maintained and made available upon request to the Department at all times during the period of this Agreement and for five years after final payment is made. Copies of these records shall be furnished to the Department upon request. Records of costs incurred include the Agency's general accounting records and the Project records, together with supporting documents and records, of the Contractor and all subcontractors performing work on the Project, and all other records of the Contractor and subcontractors considered necessary by the Department for a proper audit of costs.

i. **Progress Reports.** Upon request, the Agency agrees to provide progress reports to the Department in the standard format used by the Department and at intervals established by the Department. The Department will be entitled at all times to be advised, at its request, as to the status of the Project and of details thereof.

j. **Submission of Other Documents.** The Agency shall submit to the Department such data, reports, records, contracts, and other documents relating to the Project as the Department may require as listed in **Exhibit "E", Program Specific Terms and Conditions** attached to and incorporated into this Agreement.

k. **Offsets for Claims.** If, after Project completion, any claim is made by the Department resulting from an audit or for work or services performed pursuant to this Agreement, the Department may offset such amount from payments due for work or services done under any agreement that it has with the Agency owing such amount if, upon written demand, payment of the amount is not made within 60 days to the Department. Offsetting any amount pursuant to this paragraph shall not be considered a breach of contract by the Department.

l. **Final Invoice.** The Agency must submit the final invoice on the Project to the Department within 120 days after the completion of the Project. Invoices submitted after the 120-day time period may not be paid.

m. **Department's Performance and Payment Contingent Upon Annual Appropriation by the Legislature.** The Department's performance and obligation to pay under this Agreement is contingent upon an annual appropriation by the Legislature. If the Department's funding for this Project is in multiple fiscal years, a notice of availability of funds from the Department's project manager must be received prior to costs being incurred by the Agency. See **Exhibit "B", Schedule of Financial Assistance** for funding levels by fiscal year. Project costs utilizing any fiscal year funds are not eligible for reimbursement if incurred prior to funds approval being received. The Department will notify the Agency, in writing, when funds are available.

n. **Limits on Contracts Exceeding $25,000 and Term more than 1 Year.** In the event this Agreement is in excess of $25,000 and has a term for a period of more than one year, the provisions of Section 339.135(6)(a), Florida Statutes, are hereby incorporated:

> "The Department, during any fiscal year, shall not expend money, incur any liability, or enter into any contract which, by its terms, involves the expenditure of money in excess of the amounts budgeted as available for expenditure during such fiscal year. Any contract, verbal or written, made in violation of this subsection is null and void, and no money may be paid on such contract. The Department shall require a statement from the comptroller of the Department that funds are available prior to entering into any such contract or other binding commitment of funds. Nothing herein contained shall prevent the making of contracts for periods exceeding 1 year, but any contract so made shall be executory only for the value of the services to be rendered or agreed to be paid for in succeeding fiscal years; and this paragraph shall be incorporated verbatim in all contracts of the Department which are for an amount in excess of $25,000 and which have a term for a period of more than 1 year."

o. **Agency Obligation to Refund Department.** Any Project funds made available by the Department pursuant to this Agreement that are determined by the Department to have been expended by the Agency in violation of this Agreement or any other applicable law or regulation shall be promptly refunded in full to the Department. Acceptance by the Department of any documentation or certifications, mandatory or otherwise permitted, that the Agency files shall not constitute a waiver of the Department's rights as the funding agency to verify all information at a later date by audit or investigation.

p. **Non-Eligible Costs.** In determining the amount of the payment, the Department will exclude all Project costs incurred by the Agency prior to the execution of this Agreement, costs incurred after the expiration of the Agreement, costs that are not provided for in **Exhibit "A", Project**

Description and Responsibilities, and as set forth in **Exhibit "B", Schedule of Financial Assistance**, costs agreed to be borne by the Agency or its contractors and subcontractors for not meeting the Project commencement and final invoice time lines, and costs attributable to goods or services received under a contract or other arrangement that has not been approved in writing by the Department. Specific unallowable costs may be listed in **Exhibit "A", Project Description and Responsibilities.**

11. **General Requirements.** The Agency shall complete the Project with all practical dispatch in a sound, economical, and efficient manner, and in accordance with the provisions in this Agreement and all applicable laws.

    a. **Necessary Permits Certification.** The Agency shall certify to the Department that the Agency's design consultant and/or construction contractor has secured the necessary permits.

    b. **Right-of-Way Certification.** If the Project involves construction, then the Agency shall provide to the Department certification and a copy of appropriate documentation substantiating that all required right-of-way necessary for the Project has been obtained. Certification is required prior to authorization for advertisement for or solicitation of bids for construction of the Project, even if no right-of-way is required.

    c. **Notification Requirements When Performing Construction on Department's Right-of-Way.** In the event the cost of the Project is greater than $250,000.00, and the Project involves construction on the Department's right-of-way, the Agency shall provide the Department with written notification of either its intent to:

        i. Require the construction work of the Project that is on the Department's right-of-way to be performed by a Department prequalified contractor, or

        ii. Construct the Project utilizing existing Agency employees, if the Agency can complete said Project within the time frame set forth in this Agreement.

    d. __ If this box is checked, then the Agency is permitted to utilize its own forces and the following provision applies: **Use of Agency Workforce.** In the event the Agency proceeds with any phase of the Project utilizing its own forces, the Agency will only be reimbursed for direct costs (this excludes general overhead).

    e. __ If this box is checked, then the Agency is permitted to utilize **Indirect Costs: Reimbursement for Indirect Program Expenses** (select one):

        i. __ Agency has selected to seek reimbursement from the Department for actual indirect expenses (no rate).

        ii. __ Agency has selected to apply a de minimus rate of 15% to modified total direct costs. Note: The de minimus rate is available only to entities that have never had a negotiated indirect cost rate. When selected, the de minimus rate must be used consistently for all federal awards until such time the agency chooses to negotiate a rate. A cost policy statement and de minimis certification form must be submitted to the Department for review and approval.

        iii. __ Agency has selected to apply a state or federally approved indirect cost rate. A federally approved rate agreement or indirect cost allocation plan (ICAP) must be submitted annually.

    f. **Agency Compliance with Laws, Rules, and Regulations, Guidelines, and Standards.** The Agency shall comply and require its contractors and subcontractors to comply with all terms

and conditions of this Agreement and all federal, state, and local laws and regulations applicable to this Project.

g. **Claims and Requests for Additional Work.** The Agency shall have the sole responsibility for resolving claims and requests for additional work for the Project. The Agency will make best efforts to obtain the Department's input in its decisions. The Department is not obligated to reimburse for claims or requests for additional work.

12. Contracts of the Agency:

a. **Approval of Third Party Contracts.** The Department specifically reserves the right to review and approve any and all third party contracts with respect to the Project before the Agency executes or obligates itself in any manner requiring the disbursement of Department funds, including consultant and purchase of commodities contracts, or amendments thereto. If the Department chooses to review and approve third party contracts for this Project and the Agency fails to obtain such approval, that shall be sufficient cause for nonpayment by the Department. The Department specifically reserves unto itself the right to review the qualifications of any consultant or contractor and to approve or disapprove the employment of the same. If Federal Transit Administration (FTA) funds are used in the Project, the Department must exercise the right to third party contract review.

b. **Procurement of Commodities or Contractual Services.** It is understood and agreed by the Parties hereto that participation by the Department in a project with the Agency, where said project involves the purchase of commodities or contractual services where purchases or costs exceed the Threshold Amount for CATEGORY TWO per Section 287.017, Florida Statutes, is contingent on the Agency complying in full with the provisions of Section 287.057, Florida Statutes. The Agency's Authorized Official shall certify to the Department that the Agency's purchase of commodities or contractual services has been accomplished in compliance with Section 287.057, Florida Statutes. It shall be the sole responsibility of the Agency to ensure that any obligations made in accordance with this Section comply with the current threshold limits. Contracts, purchase orders, task orders, construction change orders, or any other agreement that would result in exceeding the current budget contained in **Exhibit "B", Schedule of Financial Assistance**, or that is not consistent with the Project description and scope of services contained in **Exhibit "A", Project Description and Responsibilities** must be approved by the Department prior to Agency execution. Failure to obtain such approval, and subsequent execution of an amendment to the Agreement if required, shall be sufficient cause for nonpayment by the Department, in accordance with this Agreement.

c. **Consultants' Competitive Negotiation Act.** It is understood and agreed by the Parties to this Agreement that participation by the Department in a project with the Agency, where said project involves a consultant contract for professional services, is contingent on the Agency's full compliance with provisions of Section 287.055, Florida Statutes, Consultants' Competitive Negotiation Act. In all cases, the Agency's Authorized Official shall certify to the Department that selection has been accomplished in compliance with the Consultants' Competitive Negotiation Act.

d. **Disadvantaged Business Enterprise (DBE) Policy and Obligation.** It is the policy of the Department that DBEs, as defined in 49 C.F.R. Part 26, as amended, shall have the opportunity to participate in the performance of contracts financed in whole or in part with Department funds under this Agreement. The DBE requirements of applicable federal and state laws and regulations apply to this Agreement. The Agency and its contractors agree to ensure that DBEs have the opportunity to participate in the performance of this Agreement. In this regard, all recipients and contractors shall take all necessary and reasonable steps in accordance with applicable federal and state laws and regulations to ensure that the DBEs have the opportunity to compete for and perform contracts. The Agency and its contractors

and subcontractors shall not discriminate on the basis of race, color, national origin or sex in the award and performance of contracts, entered pursuant to this Agreement.

13. **Maintenance Obligations.** In the event the Project includes construction or the acquisition of commodities then the following provisions are incorporated into this Agreement:

    a. The Agency agrees to accept all future maintenance and other attendant costs occurring after completion of the Project for all improvements constructed or commodities acquired as part of the Project. The terms of this provision shall survive the termination of this Agreement.

14. **Sale, Transfer, or Disposal of Department-funded Property:**

    a. The Agency will not sell or otherwise transfer or dispose of any part of its title or other interests in real property, facilities, or equipment funded in any part by the Department under this Agreement without prior written approval by the Department.

    b. If a sale, transfer, or disposal by the Agency of all or a portion of Department-funded real property, facilities, or equipment is approved by the Department, the following provisions will apply:

        i. The Agency shall reimburse the Department a proportional amount of the proceeds of the sale of any Department-funded property.

        ii. The proportional amount shall be determined on the basis of the ratio of the Department funding of the development or acquisition of the property multiplied against the sale amount, and shall be remitted to the Department within ninety (90) days of closing of sale.

        iii. Sale of property developed or acquired with Department funds shall be at market value as determined by appraisal or public bidding process, and the contract and process for sale must be approved in advance by the Department.

        iv. If any portion of the proceeds from the sale to the Agency are non-cash considerations, reimbursement to the Department shall include a proportional amount based on the value of the non-cash considerations.

    c. The terms of provisions "a" and "b" above shall survive the termination of this Agreement.

        i. The terms shall remain in full force and effect throughout the useful life of facilities developed, equipment acquired, or Project items installed within a facility, but shall not exceed twenty (20) years from the effective date of this Agreement.

        ii. There shall be no limit on the duration of the terms with respect to real property acquired with Department funds.

15. **Single Audit.** The administration of Federal or State resources awarded through the Department to the Agency by this Agreement may be subject to audits and/or monitoring by the Department. The following requirements do not limit the authority of the Department to conduct or arrange for the conduct of additional audits or evaluations of Federal awards or State financial assistance or limit the authority of any state agency inspector general, the State of Florida Auditor General, or any other state official. The Agency shall comply with all audit and audit reporting requirements as specified below.

    Federal Funded:

    a. In addition to reviews of audits conducted in accordance with 2 CFR Part 200, Subpart F – Audit Requirements, monitoring procedures may include but not be limited to on-site visits by

Department staff and/or other procedures, including reviewing any required performance and financial reports, following up, ensuring corrective action, and issuing management decisions on weaknesses found through audits when those findings pertain to Federal awards provided through the Department by this Agreement. By entering into this Agreement, the Agency agrees to comply and cooperate fully with any monitoring procedures/processes deemed appropriate by the Department. The Agency further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Department, State of Florida Chief Financial Officer (CFO), or State of Florida Auditor General.

b. The Agency, a non-Federal entity as defined by 2 CFR Part 200, Subpart F – Audit Requirements, as a subrecipient of a Federal award awarded by the Department through this Agreement, is subject to the following requirements:

i. In the event the Agency expends a total amount of Federal awards equal to or in excess of the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, the Agency must have a Federal single or program-specific audit conducted for such fiscal year in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements. **Exhibit "H", Audit Requirements for Awards of Federal Financial Assistance**, to this Agreement provides the required Federal award identification information needed by the Agency to further comply with the requirements of 2 CFR Part 200, Subpart F – Audit Requirements. In determining Federal awards expended in a fiscal year, the Agency must consider all sources of Federal awards based on when the activity related to the Federal award occurs, including the Federal award provided through the Department by this Agreement. The determination of amounts of Federal awards expended should be in accordance with the guidelines established by 2 CFR Part 200, Subpart F – Audit Requirements. An audit conducted by the State of Florida Auditor General in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements, will meet the requirements of this part.

ii. In connection with the audit requirements, the Agency shall fulfill the requirements relative to the auditee responsibilities as provided in 2 CFR Part 200, Subpart F – Audit Requirements.

iii. In the event the Agency expends less than the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, in Federal awards, the Agency is exempt from Federal audit requirements for that fiscal year. However, the Agency must provide a single audit exemption statement to the Department at FDOTSingleAudit@dot.state.fl.us no later than nine months after the end of the Agency's audit period for each applicable audit year. In the event the Agency expends less than the threshold established by 2 CFR Part 200, Subpart F – Audit Requirements, in Federal awards in a fiscal year and elects to have an audit conducted in accordance with the provisions of 2 CFR Part 200, Subpart F – Audit Requirements, the cost of the audit must be paid from non-Federal resources (*i.e.*, the cost of such an audit must be paid from the Agency's resources obtained from other than Federal entities).

iv. The Agency must electronically submit to the Federal Audit Clearinghouse (FAC) at https://harvester.census.gov/facweb/ the audit reporting package as required by 2 CFR Part 200, Subpart F – Audit Requirements, within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period. The FAC is the repository of record for audits required by 2 CFR Part 200, Subpart F – Audit Requirements. However, the Department requires a copy of the audit reporting package also be submitted to FDOTSingleAudit@dot.state.fl.us within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period as required by 2 CFR Part 200, Subpart F – Audit Requirements.

v. Within six months of acceptance of the audit report by the FAC, the Department will review the Agency's audit reporting package, including corrective action plans and management letters, to the extent necessary to determine whether timely and appropriate action on all deficiencies has been taken pertaining to the Federal award provided through the Department by this Agreement. If the Agency fails to have an audit conducted in accordance with 2 CFR Part 200, Subpart F – Audit Requirements, the Department may impose additional conditions to remedy noncompliance. If the Department determines that noncompliance cannot be remedied by imposing additional conditions, the Department may take appropriate actions to enforce compliance, which actions may include but not be limited to the following:

1. Temporarily withhold cash payments pending correction of the deficiency by the Agency or more severe enforcement action by the Department;
2. Disallow (deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance;
3. Wholly or partly suspend or terminate the Federal award;
4. Initiate suspension or debarment proceedings as authorized under 2 C.F.R. Part 180 and Federal awarding agency regulations (or in the case of the Department, recommend such a proceeding be initiated by the Federal awarding agency);
5. Withhold further Federal awards for the Project or program;
6. Take other remedies that may be legally available.

vi. As a condition of receiving this Federal award, the Agency shall permit the Department or its designee, the CFO, or State of Florida Auditor General access to the Agency's records, including financial statements, the independent auditor's working papers, and project records as necessary. Records related to unresolved audit findings, appeals, or litigation shall be retained until the action is complete or the dispute is resolved.

vii. The Department's contact information for requirements under this part is as follows:

Office of Comptroller, MS 24
605 Suwannee Street
Tallahassee, Florida 32399-0450
FDOTSingleAudit@dot.state.fl.us

State Funded:

a. In addition to reviews of audits conducted in accordance with Section 215.97, Florida Statutes, monitoring procedures to monitor the Agency's use of state financial assistance may include but not be limited to on-site visits by Department staff and/or other procedures, including reviewing any required performance and financial reports, following up, ensuring corrective action, and issuing management decisions on weaknesses found through audits when those findings pertain to state financial assistance awarded through the Department by this Agreement. By entering into this Agreement, the Agency agrees to comply and cooperate fully with any monitoring procedures/processes deemed appropriate by the Department. The Agency further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Department, the Department of Financial Services (DFS), or State of Florida Auditor General.

b. The Agency, a "nonstate entity" as defined by Section 215.97, Florida Statutes, as a recipient of state financial assistance awarded by the Department through this Agreement, is subject to the following requirements:

i. In the event the Agency meets the audit threshold requirements established by Section 215.97, Florida Statutes, the Agency must have a State single or project-specific audit conducted for such fiscal year in accordance with Section 215.97, Florida Statutes; applicable rules of the Department of Financial Services; and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. **Exhibit "G", Audit Requirements for Awards of State Financial Assistance,** to this Agreement indicates state financial assistance awarded through the Department by this Agreement needed by the Agency to further comply with the requirements of Section 215.97, Florida Statutes. In determining the state financial assistance expended in a fiscal year, the Agency shall consider all sources of state financial assistance, including state financial assistance received from the Department by this Agreement, other state agencies, and other nonstate entities. State financial assistance does not include Federal direct or pass-through awards and resources received by a nonstate entity for Federal program matching requirements.

ii. In connection with the audit requirements, the Agency shall ensure that the audit complies with the requirements of Section 215.97(8), Florida Statutes. This includes submission of a financial reporting package as defined by Section 215.97(2)(e), Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.

iii. In the event the Agency does not meet the audit threshold requirements established by Section 215.97, Florida Statutes, the Agency is exempt for such fiscal year from the state single audit requirements of Section 215.97, Florida Statutes. However, the Agency must provide a single audit exemption statement to the Department at FDOTSingleAudit@dot.state.fl.us no later than nine months after the end of the Agency's audit period for each applicable audit year. In the event the Agency does not meet the audit threshold requirements established by Section 215.97, Florida Statutes, in a fiscal year and elects to have an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, the cost of the audit must be paid from the Agency's resources (*i.e.*, the cost of such an audit must be paid from the Agency's resources obtained from other than State entities).

iv. In accordance with Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, copies of financial reporting packages required by this Agreement shall be submitted to:

Florida Department of Transportation
Office of Comptroller, MS 24
605 Suwannee Street
Tallahassee, Florida 32399-0405
FDOTSingleAudit@dot.state.fl.us

And

State of Florida Auditor General
Local Government Audits/342
111 West Madison Street, Room 401
Tallahassee, FL 32399-1450
Email: flaudgen_localgovt@aud.state.fl.us

v. Any copies of financial reporting packages, reports, or other information required to be submitted to the Department shall be submitted timely in accordance with Section 215.97, Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, as

applicable.

vi. The Agency, when submitting financial reporting packages to the Department for audits done in accordance with Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, should indicate the date the reporting package was delivered to the Agency in correspondence accompanying the reporting package.

vii. Upon receipt, and within six months, the Department will review the Agency's financial reporting package, including corrective action plans and management letters, to the extent necessary to determine whether timely and appropriate corrective action on all deficiencies has been taken pertaining to the state financial assistance provided through the Department by this Agreement. If the Agency fails to have an audit conducted consistent with Section 215.97, Florida Statutes, the Department may take appropriate corrective action to enforce compliance.

viii. As a condition of receiving state financial assistance, the Agency shall permit the Department or its designee, DFS, or the Auditor General access to the Agency's records, including financial statements, the independent auditor's working papers, and project records as necessary. Records related to unresolved audit findings, appeals, or litigation shall be retained until the action is complete or the dispute is resolved.

c. The Agency shall retain sufficient records demonstrating its compliance with the terms of this Agreement for a period of five years from the date the audit report is issued and shall allow the Department or its designee, DFS, or State of Florida Auditor General access to such records upon request. The Agency shall ensure that the audit working papers are made available to the Department or its designee, DFS, or State of Florida Auditor General upon request for a period of five years from the date the audit report is issued, unless extended in writing by the Department.

16. **Notices and Approvals.** Notices and approvals referenced in this Agreement must be obtained in writing from the Parties' respective Administrators or their designees.

17. **Restrictions, Prohibitions, Controls and Labor Provisions:**

a. **Convicted Vendor List.** A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity; may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statutes, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

b. **Discriminatory Vendor List.** In accordance with Section 287.134, Florida Statutes, an entity or affiliate who has been placed on the Discriminatory Vendor List, kept by the Florida Department of Management Services, may not submit a bid on a contract to provide goods or services to a public entity; may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity.

c. **Non-Responsible Contractors.** An entity or affiliate who has had its Certificate of Qualification suspended, revoked, denied, or have further been determined by the Department to be a non-responsible contractor, may not submit a bid or perform work for the construction or repair of a public building or public work on a contract with the Agency.

d. **Prohibition on Using Funds for Lobbying.** No funds received pursuant to this Agreement may be expended for lobbying the Florida Legislature, judicial branch, or any state agency, in accordance with Section 216.347, Florida Statutes.

e. **Unauthorized Aliens.** The Department shall consider the employment by any contractor of unauthorized aliens a violation of Section 274A(e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation will be cause for unilateral cancellation of this Agreement.

f. **Procurement of Construction Services.** If the Project is procured pursuant to Chapter 255, Florida Statutes, for construction services and at the time of the competitive solicitation for the Project, 50 percent or more of the cost of the Project is to be paid from state-appropriated funds, then the Agency must comply with the requirements of Section 255.0991, Florida Statutes.

g. **E-Verify.** The Agency shall:

   i. Utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Agency during the term of the contract; and

   ii. Expressly require any subcontractors performing work or providing services pursuant to the state contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

h. **Projects with Non-profit Organizations.** Pursuant to Section 216.1366. Florida Statutes, if the Agency is a nonprofit organization as defined in Section 215.97(2)(m), Florida Statutes, the Agency shall provide documentation to indicate the amount of state funds:

   i. Allocated to be used during the full term of this Agreement for remuneration to any member of the board of directors or an officer of the Agency

   ii. Allocated under each payment by the Department to be used for remuneration of any member of the board of directors or an officer of the Agency. The documentation must indicate the amounts and recipients of the remuneration.

   Such information will be posted by the Department to the Florida Accountability Contract Tracking System maintained pursuant to Section 215.985, F.S., and must additionally be posted to the Agency's website, if the Agency is a non-profit organization and maintains a website. The Agency shall utilize the Department's Form 350-090-19, Compensation to Non-Profits Using State Funds, for purposes of documenting the compensation. The subject Form is required for every contract for services executed, amended, or extended on or after July 1, 2023, with non-profit organizations.

   Pursuant to Section 216.1366, F.S., the term:

   i. "Officer" means a chief executive officer, chief financial officer, chief operating officer, or any other position performing and equivalent function.

ii. "Remuneration" means all compensation earned by or awarded to personnel, whether paid or accrued, regardless of contingency, including bonuses, accrued paid time off, severance payments, incentive payments, contributions to a retirement plan or in-kind payments, reimbursements, or allowances for moving expenses, vehicles and other transportation, telephone services, medical services, housing and meals.

iii. "State Funds" means funds paid from the General Revenue Fund or any state trust fund, funds allocated by the Federal Government and distributed by the state, or funds appropriated by the Federal Government and distributed by the state, or funds appropriated by the state for distribution through any grant program. The term does not include funds used for the Medicaid program.

i. Design Services and Construction Engineering and Inspection Services. If the Project is wholly or partially funded by the Department and administered by a local governmental entity, except for a seaport listed in Section 311.09, Florida Statutes, or an airport as defined in Section 332.004, Florida Statutes, the entity performing design and construction engineering and inspection services may not be the same entity.

18. Indemnification and Insurance:

a. It is specifically agreed between the Parties executing this Agreement that it is not intended by any of the provisions of any part of this Agreement to create in the public or any member thereof, a third party beneficiary under this Agreement, or to authorize anyone not a party to this Agreement to maintain a suit for personal injuries or property damage pursuant to the terms or provisions of this Agreement. The Agency guarantees the payment of all just claims for materials, supplies, tools, or labor and other just claims against the Agency or any subcontractor, in connection with this Agreement. Additionally, to the extent permitted by law and as limited by and pursuant to the provisions of Section 768.28, Florida Statutes, the Agency shall indemnify, defend, and hold harmless the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses, and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the Agency and persons employed or utilized by the Agency in the performance of this Agreement. Nothing contained in this paragraph is intended to nor shall it constitute a waiver of the Department's or the Agency's sovereign immunity. This indemnification shall survive the termination of this Agreement. Additionally, the Agency agrees to include the following indemnification in all contracts with contractors/subcontractors and consultants/subconsultants who perform work in connection with this Agreement:

"To the fullest extent permitted by law, the Agency's contractor/consultant shall indemnify, defend, and hold harmless the Agency and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement."

b. The Agency shall provide Workers' Compensation Insurance in accordance with Florida's Workers' Compensation law for all employees. If subletting any of the work, ensure that the subcontractor(s) and subconsultant(s) have Workers' Compensation Insurance for their employees in accordance with Florida's Workers' Compensation law. If using "leased employees" or employees obtained through professional employer organizations ("PEO's"), ensure that such employees are covered by Workers' Compensation Insurance through the PEO's or other leasing entities. Ensure that any equipment rental agreements that include

operators or other personnel who are employees of independent contractors, sole proprietorships, or partners are covered by insurance required under Florida's Workers' Compensation law.

c. If the Agency elects to self-perform the Project, then the Agency may self-insure. If the Agency elects to hire a contractor or consultant to perform the Project, then the Agency shall carry, or cause its contractor or consultant to carry, Commercial General Liability insurance providing continuous coverage for all work or operations performed under this Agreement. Such insurance shall be no more restrictive than that provided by the latest occurrence form edition of the standard Commercial General Liability Coverage Form (ISO Form CG 00 01) as filed for use in the State of Florida. The Agency shall cause, or cause its contractor or consultant to cause, the Department to be made an Additional Insured as to such insurance. Such coverage shall be on an "occurrence" basis and shall include Products/Completed Operations coverage. The coverage afforded to the Department as an Additional Insured shall be primary as to any other available insurance and shall not be more restrictive than the coverage afforded to the Named Insured. The limits of coverage shall not be less than $1,000,000 for each occurrence and not less than a $5,000,000 annual general aggregate, inclusive of amounts provided by an umbrella or excess policy. The limits of coverage described herein shall apply fully to the work or operations performed under the Agreement, and may not be shared with or diminished by claims unrelated to the Agreement. The policy/ies and coverage described herein may be subject to a deductible and such deductibles shall be paid by the Named Insured. No policy/ies or coverage described herein may contain or be subject to a Retention or a Self-Insured Retention unless the Agency is a state agency or subdivision of the State of Florida that elects to self-perform the Project. Prior to the execution of the Agreement, and at all renewal periods which occur prior to final acceptance of the work, the Department shall be provided with an ACORD Certificate of Liability Insurance reflecting the coverage described herein. The Department shall be notified in writing within ten days of any cancellation, notice of cancellation, lapse, renewal, or proposed change to any policy or coverage described herein. The Department's approval or failure to disapprove any policy/ies, coverage, or ACORD Certificates shall not relieve or excuse any obligation to procure and maintain the insurance required herein, nor serve as a waiver of any rights or defenses the Department may have.

d. When the Agreement includes the construction of a railroad grade crossing, railroad overpass or underpass structure, or any other work or operations within the limits of the railroad right-of-way, including any encroachments thereon from work or operations in the vicinity of the railroad right-of-way, the Agency shall, or cause its contractor to, in addition to the insurance coverage required above, procure and maintain Railroad Protective Liability Coverage (ISO Form CG 00 35) where the railroad is the Named Insured and where the limits are not less than $2,000,000 combined single limit for bodily injury and/or property damage per occurrence, and with an annual aggregate limit of not less than $6,000,000. The railroad shall also be added along with the Department as an Additional Insured on the policy/ies procured pursuant to the paragraph above. Prior to the execution of the Agreement, and at all renewal periods which occur prior to final acceptance of the work, both the Department and the railroad shall be provided with an ACORD Certificate of Liability Insurance reflecting the coverage described herein. The insurance described herein shall be maintained through final acceptance of the work. Both the Department and the railroad shall be notified in writing within ten days of any cancellation, notice of cancellation, renewal, or proposed change to any policy or coverage described herein. The Department's approval or failure to disapprove any policy/ies, coverage, or ACORD Certificates shall not relieve or excuse any obligation to procure and maintain the insurance required herein, nor serve as a waiver of any rights the Department may have.

e. When the Agreement involves work on or in the vicinity of utility-owned property or facilities, the utility shall be added along with the Department as an Additional Insured on the Commercial General Liability policy/ies procured above.

19. Miscellaneous:

a. **Environmental Regulations.** The Agency will be solely responsible for compliance with all applicable environmental regulations and for any liability arising from non-compliance with these regulations, and will reimburse the Department for any loss incurred in connection therewith.

b. **Non-Admission of Liability.** In no event shall the making by the Department of any payment to the Agency constitute or be construed as a waiver by the Department of any breach of covenant or any default which may then exist on the part of the Agency and the making of such payment by the Department, while any such breach or default shall exist, shall in no way impair or prejudice any right or remedy available to the Department with respect to such breach or default.

c. **Severability.** If any provision of this Agreement is held invalid, the remainder of this Agreement shall not be affected. In such an instance, the remainder would then continue to conform to the terms and requirements of applicable law.

d. **Agency not an agent of Department.** The Agency and the Department agree that the Agency, its employees, contractors, subcontractors, consultants, and subconsultants are not agents of the Department as a result of this Agreement.

e. **Bonus or Commission.** By execution of the Agreement, the Agency represents that it has not paid and, also agrees not to pay, any bonus or commission for the purpose of obtaining an approval of its application for the financing hereunder.

f. **Non-Contravention of State Law.** Nothing in the Agreement shall require the Agency to observe or enforce compliance with any provision or perform any act or do any other thing in contravention of any applicable state law. If any of the provisions of the Agreement violate any applicable state law, the Agency will at once notify the Department in writing so that appropriate changes and modifications may be made by the Department and the Agency to the end that the Agency may proceed as soon as possible with the Project.

g. **Execution of Agreement.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which shall constitute the same Agreement. A facsimile or electronic transmission of this Agreement with a signature on behalf of a party will be legal and binding on such party.

h. **Federal Award Identification Number (FAIN).** If the FAIN is not available prior to execution of the Agreement, the Department may unilaterally add the FAIN to the Agreement without approval of the Agency and without an amendment to the Agreement. If this occurs, an updated Agreement that includes the FAIN will be provided to the Agency and uploaded to the Department of Financial Services' Florida Accountability Contract Tracking System (FACTS).

i. **Inspector General Cooperation.** The Agency agrees to comply with Section 20.055(5), Florida Statutes, and to incorporate in all subcontracts the obligation to comply with Section 20.055(5), Florida Statutes.

j. **Law, Forum, and Venue.** This Agreement shall be governed by and construed in accordance with the laws of the State of Florida. In the event of a conflict between any portion of the contract and Florida law, the laws of Florida shall prevail. The Agency agrees to waive forum

and venue and that the Department shall determine the forum and venue in which any dispute under this Agreement is decided.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year written above.

EXHIBIT A

Project Description and Responsibilities

A. Project Description (description of Agency's project to provide context, description of project components funded via this Agreement (if not the entire project)): The existing Airport Lighting Control System (ALCS) equipment is more than 20 years old and is beyond its service life. Parts are no longer available for the system, and we are experiencing service outages. Replace the Air Traffic Control Tower (ATCT) Airport Lighting Control System (ALCS).

B. Project Location (limits, city, county, map): New Smyrna Beach Municipal Airport/New Smyrna Beach, FL/Volusia

C. Project Scope (allowable costs: describe project components, improvement type/service type, approximate timeline, project schedule, project size): Lighting Installation/Upgrade: As required by 215.971, F.S., this scope of work includes but is not limited to consultant and design fees, bid and award services, construction inspection, mobilization and demobilization, demolition, cables, conduits, lightning protection, required vault equipment modifications, including all materials, equipment, labor, and incidentals required to complete the lighting systems upgrade project. The Sponsor will comply with Aviation Program

D. Deliverable(s): Final close out documents to be uploaded in JACIP.

The project scope identifies the ultimate project deliverables. Deliverables for requisition, payment and invoice purposes will be the incremental progress made toward completion of project scope elements. Supporting documentation will be quantifiable, measurable, and verifiable, to allow for a determination of the amount of incremental progress that has been made, and provide evidence that the payment requested is commensurate with the accomplished incremental progress and costs incurred by the Agency.

E. Unallowable Costs (including but not limited to): Stored materials unless prior written approval from FDOT is obtained

F. Transit Operating Grant Requirements (Transit Only):

Transit Operating Grants billed as an operational subsidy will require an expenditure detail report from the Agency that matches the invoice period. The expenditure detail, along with the progress report, will be the required deliverables for Transit Operating Grants. Operating grants may be issued for a term not to exceed three years from execution. The original grant agreement will include funding for year one. Funding for years two and three will be added by amendment as long as the grantee has submitted all invoices on schedule and the project deliverables for the year have been met.

EXHIBIT B

Schedule of Financial Assistance

FUNDS AWARDED TO THE AGENCY AND REQUIRED MATCHING FUNDS PURSUANT TO THIS AGREEMENT CONSIST OF THE FOLLOWING:

A. Fund Type and Fiscal Year:

Financial Management Number	Fund Type	FLAIR Category	State Fiscal Year	Object Code	CSFA/ CFDA Number	CSFA/CFDA Title or Funding Source Description	Funding Amount
456950-1-94-01	DDR	088719	2025	751000	55.004	Aviation Grant Program	$50,000.00
456950-1-94-01	LF	088719	2025	751000	55.004	Aviation Grant Program	$12,500.00
	Total Financial Assistance						$62,500.00

B. Estimate of Project Costs by Grant Phase:

Phases*	State	Local	Federal	Totals	State %	Local %	Federal %
Land Acquisition	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Planning	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Environmental/Design/Construction	$50,000.00	$12,500.00	$0.00	$62,500.00	80.00	20.00	0.00
Capital Equipment/ Preventative Maintenance	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Match to Direct Federal Funding	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Mobility Management (Transit Only)	$0.00	$0.00	$0.00	$0.00	0.00	0.00	0.00
Totals	$50,000.00	$12,500.00	$0.00	$62,500.00			

*Shifting items between these grant phases requires execution of an Amendment to the Public Transportation Grant Agreement.

Scope Code and/or Activity Line Item (ALI) (Transit Only)	
Common Name/UZA Name (Transit Only)	

BUDGET/COST ANALYSIS CERTIFICATION AS REQUIRED BY SECTION 216.3475, FLORIDA STATUTES:

I certify that the cost for each line item budget category (grant phase) has been evaluated and determined to be allowable, reasonable, and necessary as required by Section 216.3475, Florida Statutes. Documentation is on file evidencing the methodology used and the conclusions reached.

Luci Taylor

Department Grant Manager Name

Signature Date

EXHIBIT C

TERMS AND CONDITIONS OF CONSTRUCTION

1. **Design and Construction Standards and Required Approvals.**

   a. The Agency understands that it is responsible for the preparation and certification of all design plans for the Project. The Agency shall hire a qualified consultant for the design phase of the Project or, if applicable, the Agency shall require their design-build contractor or construction management contractor to hire a qualified consultant for the design phase of the Project.

   b. Execution of this Agreement by both Parties shall be deemed a Notice to Proceed to the Agency for the design phase or other non-construction phases of the Project. If the Project involves a construction phase, the Agency shall not begin the construction phase of the Project until the Department issues a Notice to Proceed for the construction phase. Prior to commencing the construction work described in this Agreement, the Agency shall request a Notice to Proceed from the Department's Project Manager, Luci Taylor (email: luciana.taylor@dot.state.fl.us) or from an appointed designee. Any construction phase work performed prior to the execution of this required Notice to Proceed is not subject to reimbursement.

   c. The Agency will provide one (1) copy of the final design plans and specifications and final bid documents to the Department's Project Manager prior to bidding or commencing construction of the Project.

   d. The Agency shall require the Agency's contractor to post a payment and performance bond in accordance with applicable law(s).

   e. The Agency shall be responsible to ensure that the construction work under this Agreement is performed in accordance with the approved construction documents, and that the construction work will meet all applicable Agency and Department standards.

   f. Upon completion of the work authorized by this Agreement, the Agency shall notify the Department in writing of the completion of construction of the Project; and for all design work that originally required certification by a Professional Engineer, this notification shall contain an Engineer's Certification of Compliance, signed and sealed by a Professional Engineer, the form of which is attached to this Exhibit. The certification shall state that work has been completed in compliance with the Project construction plans and specifications. If any deviations are found from the approved plans or specifications, the certification shall include a list of all deviations along with an explanation that justifies the reason to accept each deviation.

2. **Construction on the Department's Right of Way.** If the Project involves construction on the Department's right-of-way, then the following provisions apply to any and all portions of the Project that are constructed on the Department's right-of-way:

   a. The Agency shall hire a qualified contractor using the Agency's normal bid procedures to perform the construction work for the Project. The Agency must certify that the installation of the Project is completed by a Contractor prequalified by the Department as required by Section 2 of the Standard Specifications for Road and Bridge Construction (2016), as amended, unless otherwise approved by the Department in writing or the Contractor exhibits past project experience in the last five years that are comparable in scale, composition, and overall quality to the site characterized within the scope of services of this Project.

b. Construction Engineering Inspection (CEI) services will be provided by the Agency by hiring a Department prequalified consultant firm including one individual that has completed the Advanced Maintenance of Traffic Level Training, unless otherwise approved by the Department in writing. The CEI staff shall be present on the Project at all times that the contractor is working. Administration of the CEI staff shall be under the responsible charge of a State of Florida Licensed Professional Engineer who shall provide the certification that all design and construction for the Project meets the minimum construction standards established by Department. The Department shall approve all CEI personnel. The CEI firm shall not be the same firm as that of the Engineer of Record for the Project. The Department shall have the right, but not the obligation, to perform independent assurance testing during the course of construction of the Project. Notwithstanding the foregoing, the Department may issue a written waiver of the CEI requirement for portions of Projects involving the construction of bus shelters, stops, or pads.

c. The Project shall be designed and constructed in accordance with the latest edition of the Department's Standard Specifications for Road and Bridge Construction, the Department Design Standards, and the Manual of Uniform Traffic Control Devices (MUTCD). The following guidelines shall apply as deemed appropriate by the Department: the Department Structures Design Manual, AASHTO Guide Specifications for the Design of Pedestrian Bridges, AASHTO LRFD Bridge Design Specifications, Florida Design Manual, Manual for Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways (the "Florida Green Book"), and the Department Traffic Engineering Manual. The Agency will be required to submit any construction plans required by the Department for review and approval prior to any work being commenced. Should any changes to the plans be required during construction of the Project, the Agency shall be required to notify the Department of the changes and receive approval from the Department prior to the changes being constructed. The Agency shall maintain the area of the Project at all times and coordinate any work needs of the Department during construction of the Project.

d. The Agency shall notify the Department a minimum of 48 hours before beginning construction within Department right-of-way. The Agency shall notify the Department should construction be suspended for more than 5 working days. The Department contact person for construction is Luci Taylor.

e. The Agency shall be responsible for monitoring construction operations and the maintenance of traffic (MOT) throughout the course of the Project in accordance with the latest edition of the Department Standard Specifications, section 102. The Agency is responsible for the development of a MOT plan and making any changes to that plan as necessary. The MOT plan shall be in accordance with the latest version of the Department Design Standards, Index 600 series. Any MOT plan developed by the Agency that deviates from the Department Design Standards must be signed and sealed by a professional engineer. MOT plans will require approval by the Department prior to implementation.

f. The Agency shall be responsible for locating all existing utilities, both aerial and underground, and for ensuring that all utility locations be accurately documented on the construction plans. All utility conflicts shall be fully resolved directly with the applicable utility.

g. The Agency will be responsible for obtaining all permits that may be required by other agencies or local governmental entities.

h. It is hereby agreed by the Parties that this Agreement creates a permissive use only and all improvements located on the Department's right-of-way resulting from this Agreement shall become the property of the Department. Neither the granting of the permission to use the Department right of way nor the placing of facilities upon the Department property shall operate to create or vest any property right to or in the Agency, except as may otherwise be provided in separate agreements. The Agency shall not acquire any right, title, interest or

estate in Department right of way, of any nature or kind whatsoever, by virtue of the execution, operation, effect, or performance of this Agreement including, but not limited to, the Agency's use, occupancy or possession of Department right of way. The Parties agree that this Agreement does not, and shall not be construed to, grant credit for any future transportation concurrency requirements pursuant to Chapter 163, F.S.

i. The Agency shall not cause any liens or encumbrances to attach to any portion of the Department's property, including but not limited to, the Department's right-of-way.

j. The Agency shall perform all required testing associated with the design and construction of the Project. Testing results shall be made available to the Department upon request. The Department shall have the right to perform its own independent testing during the course of the Project.

k. The Agency shall exercise the rights granted herein and shall otherwise perform this Agreement in a good and workmanlike manner, with reasonable care, in accordance with the terms and provisions of this Agreement and all applicable federal, state, local, administrative, regulatory, safety and environmental laws, codes, rules, regulations, policies, procedures, guidelines, standards and permits, as the same may be constituted and amended from time to time, including, but not limited to, those of the Department, applicable Water Management District, Florida Department of Environmental Protection, the United States Environmental Protection Agency, the United States Army Corps of Engineers, the United States Coast Guard and local governmental entities.

l. If the Department determines a condition exists which threatens the public's safety, the Department may, at its discretion, cause construction operations to cease and immediately have any potential hazards removed from its right-of-way at the sole cost, expense, and effort of the Agency. The Agency shall bear all construction delay costs incurred by the Department.

m. The Agency shall be responsible to maintain and restore all features that might require relocation within the Department right-of-way.

n. The Agency will be solely responsible for clean up or restoration required to correct any environmental or health hazards that may result from construction operations.

o. The acceptance procedure will include a final "walk-through" by Agency and Department personnel. Upon completion of construction, the Agency will be required to submit to the Department final as-built plans and an engineering certification that construction was completed in accordance to the plans. Submittal of the final as-built plans shall include one complete set of the signed and sealed plans on 11" X 17" plan sheets and an electronic copy prepared in Portable Document Format (PDF). Prior to the termination of this Agreement, the Agency shall remove its presence, including, but not limited to, all of the Agency's property, machinery, and equipment from Department right-of-way and shall restore those portions of Department right of way disturbed or otherwise altered by the Project to substantially the same condition that existed immediately prior to the commencement of the Project.

p. If the Department determines that the Project is not completed in accordance with the provisions of this Agreement, the Department shall deliver written notification of such to the Agency. The Agency shall have thirty (30) days from the date of receipt of the Department's written notice, or such other time as the Agency and the Department mutually agree to in writing, to complete the Project and provide the Department with written notice of the same (the "Notice of Completion"). If the Agency fails to timely deliver the Notice of Completion, or if it is determined that the Project is not properly completed after receipt of the Notice of Completion, the Department, within its discretion may: 1) provide the Agency with written authorization granting such additional time as the Department deems appropriate to correct the deficiency(ies); or 2) correct the deficiency(ies) at the Agency's sole cost and expense,

without Department liability to the Agency for any resulting loss or damage to property, including, but not limited to, machinery and equipment. If the Department elects to correct the deficiency(ies), the Department shall provide the Agency with an invoice for the costs incurred by the Department and the Agency shall pay the invoice within thirty (30) days of the date of the invoice.

q. The Agency shall implement best management practices for erosion and pollution control to prevent violation of state water quality standards. The Agency shall be responsible for the correction of any erosion, shoaling, or water quality problems that result from the construction of the Project.

r. Portable Traffic Monitoring Site (PTMS) or a Telemetry Traffic Monitoring Site (TTMS) may exist within the vicinity of your proposed work. It is the responsibility of the Agency to locate and avoid damage to these sites. If a PTMS or TTMS is encountered during construction, the Department must be contacted immediately.

s. During construction, highest priority must be given to pedestrian safety. If permission is granted to temporarily close a sidewalk, it should be done with the express condition that an alternate route will be provided, and shall continuously maintain pedestrian features to meet Americans Disability Act (ADA) standards.

t. Restricted hours of operation will be as follows, unless otherwise approved by the Department's District Construction Engineer or designee (insert hours and days of the week for restricted operation): Not Applicable

u. Lane closures on the state road system must be coordinated with the Public Information Office at least two weeks prior to the closure. The contact information for the Department's Public Information Office is:

Insert District PIO contact info:
800-780-7102

Note: (Highlighted sections indicate need to confirm information with District Office or appropriate DOT person managing the Agreement)

3. **Engineer's Certification of Compliance.** The Agency shall complete and submit and if applicable Engineer's Certification of Compliance to the Department upon completion of the construction phase of the Project.

ENGINEER'S CERTIFICATION OF COMPLIANCE

PUBLIC TRANSPORTATION GRANT AGREEMENT
BETWEEN
THE STATE OF FLORIDA, DEPARTMENT OF TRANSPORTATION
and _____

PROJECT DESCRIPTION: _____

DEPARTMENT CONTRACT NO.: _____

FINANCIAL MANAGEMENT NO.: _____

In accordance with the Terms and Conditions of the Public Transportation Grant Agreement, the undersigned certifies that all work which originally required certification by a Professional Engineer has been completed in compliance with the Project construction plans and specifications. If any deviations have been made from the approved plans, a list of all deviations, along with an explanation that justifies the reason to accept each deviation, will be attached to this Certification. Also, with submittal of this certification, the Agency shall furnish the Department a set of "as-built" plans for construction on the Department's Right of Way certified by the Engineer of Record/CEI.

EXHIBIT D

AGENCY RESOLUTION

PLEASE SEE ATTACHED

EXHIBIT E

PROGRAM SPECIFIC TERMS AND CONDITIONS - AVIATION
AVIATION PROGRAM ASSURANCES

A. General.

1. The assurances herein shall form an integral part of the Agreement between the Department and the Agency.

2. These assurances delineate the obligations of the Parties to this Agreement to ensure their commitment and compliance with specific provisions of **Exhibit "A", Project Description and Responsibilities**, and **Exhibit "B", Schedule of Financial Assistance**, as well as serving to protect public investment in public-use airports and the continued viability of the Florida Aviation System.

3. The Agency shall comply with the assurances as specified in this Agreement.

4. The terms and assurances of this Agreement shall remain in full force and effect throughout the useful life of a facility developed; equipment acquired; or Project items installed within a facility for an airport development or noise compatibility program project, but shall not exceed 20 years from the effective date of this Agreement.

5. There shall be no limit on the duration of the terms and assurances of this Agreement regarding Exclusive Rights and Airport Revenue so long as the property is used as a public airport.

6. There shall be no limit on the duration of the terms and assurances of this Agreement with respect to real property acquired with funds provided by this Agreement.

7. Subject to appropriations, the Department shall continue to comply with its financial commitment to this Project under the terms of this Agreement, until such time as the Department may determine that the Agency has failed to comply with the terms and assurances of this Agreement.

8. An Agency that has been determined by the Department to have failed to comply with either the terms of these Assurances, or the terms of the Agreement, or both, shall be notified, in writing, by the Department, identifying the specifics of the non-compliance and any corrective action by the Agency to remedy the failure.

9. Failure by the Agency to satisfactorily remedy the non-compliance shall absolve the Department's continued financial commitment to this Project and immediately require the Agency to repay the Department the full amount of funds expended by the Department on this Project.

10. Any history of failure to comply with the terms and assurances of an Agreement will jeopardize the Agency's eligibility for further state funding of airport projects by the Department.

B. Agency Compliance Certification.

1. **General Certification.** The Agency hereby certifies, with respect to this Project, it will comply, within its authority, with all applicable, current laws and rules of the State of Florida and applicable local governments, as well as Department policies, guidelines, and requirements, including but not limited to, the following (latest version of each document):

   a. **Florida Statutes (F.S.)**
      - Chapter 163, F.S., Intergovernmental Programs
      - Chapter 329, F.S., Aircraft: Title; Liens; Registration; Liens
      - Chapter 330, F.S., Regulation of Aircraft, Pilots, and Airports
      - Chapter 331, F.S., Aviation and Aerospace Facilities and Commerce
      - Chapter 332, F.S., Airports and Other Air Navigation Facilities
      - Chapter 333, F.S., Airport Zoning

b. Florida Administrative Code (FAC)

- Chapter 73C-41, FAC, Community Planning; Governing the Procedure for the Submittal and Review of Local Government Comprehensive Plans and Amendments
- Chapter 14-60, FAC, Airport Licensing, Registration, and Airspace Protection
- Section 62-256.300, FAC, Open Burning, Prohibitions
- Section 62-701.320(13), FAC, Solid Waste Management Facility Permit Requirements, General, Airport Safety

c. Local Government Requirements

- Airport Zoning Ordinance
- Local Comprehensive Plan

d. Department Requirements

- Eight Steps of Building a New Airport
- Florida Airport Revenue Use Guide
- Florida Aviation Project Handbook
- Guidebook for Airport Master Planning
- Airport Compatible Land Use Guidebook

2. **Construction Certification.** The Agency hereby certifies, with respect to a construction-related project, that all design plans and specifications will comply with applicable federal, state, local, and professional standards, as well as Federal Aviation Administration (FAA) Advisory Circulars (AC's) and FAA issued waivers thereto, including but not limited to, the following:

a. Federal Requirements

- FAA AC 70/7460-1, Obstruction Marking and Lighting
- FAA AC 150/5300-13, Airport Design
- FAA AC 150/5370-2, Operational Safety on Airports During Construction
- FAA AC 150/5370-10, Standards for Specifying Construction of Airports

b. Local Government Requirements

- Local Building Codes
- Local Zoning Codes

c. Department Requirements

- Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways (Commonly Referred to as the "Florida Green Book")
- Manual on Uniform Traffic Control Devices
- Section 14-60.007, FAC, Airfield Standards for Licensed Airports
- Standard Specifications for Construction of General Aviation Airports
- Design Guidelines & Minimum Standard Requirements for T-Hangar Projects

3. **Land Acquisition Certification.** The Agency hereby certifies, regarding land acquisition, that it will comply with applicable federal and/or state policies, regulations, and laws, including but not limited to the following:

a. Federal Requirements

- Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970
- National Environmental Policy of 1969
- FAA Order 5050.4, National Environmental Policy Act Implementing Instructions for Airport Projects
- FAA Order 5100.37B, Land Acquisition and Relocation Assistance for Airport Projects

b. Florida Requirements

- Chapter 73, F.S., Eminent Domain (re: Property Acquired Through Condemnation)
- Chapter 74, F.S., Proceedings Supplemental to Eminent Domain (re: Condemnation)
- Section 286.23, F.S., Public Business: Miscellaneous Provisions

C. Agency Authority.

1. **Legal Authority.** The Agency hereby certifies, with respect to this Agreement, that it has the legal authority to enter into this Agreement and commit to this Project; that a resolution, motion, or similar action has been duly adopted or passed as an official act of the airport sponsor's governing body authorizing this Agreement, including assurances contained therein, and directing and authorizing the person identified as the official representative of the governing body to act on its behalf with respect to this Agreement and to provide any additional information as may be required.

2. **Financial Authority.** The Agency hereby certifies, with respect to this Agreement, that it has sufficient funds available for that portion of the Project costs which are not paid by the U.S. Government or the State of Florida; that it has sufficient funds available to assure future operation and maintenance of items funded by this Project, which it will control; and that authority has been granted by the airport sponsor governing body to commit those funds to this Project.

D. Agency Responsibilities. The Agency hereby certifies it currently complies with or will comply with the following responsibilities:

1. **Accounting System.**

   a. The Agency shall create and maintain a separate account to document all of the financial transactions related to the airport as a distinct entity.

   b. The accounting records shall be kept by the Agency or its authorized representative in accordance with Generally Accepted Accounting Principles and in an accounting system that will facilitate an effective audit in accordance with the 2 CFR Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards and Section 215.97, F.S., Florida Single Audit Act.

   c. The Department has the right to audit and inspect all financial records of the Agency upon reasonable notice.

2. **Good Title.**

   a. The Agency holds good title, satisfactory to the Department, to the airport or site thereof, or gives assurance, satisfactory to the Department, that good title will be obtained.

   b. For noise compatibility program projects undertaken on the airport sponsor's property, the Agency holds good title, satisfactory to the Department, to that portion of the property upon which state funds will be expended, or gives assurance, satisfactory to the Department, that good title will be obtained.

3. **Preserving Rights and Powers.**

   a. The Agency shall not take or permit any action which would operate to deprive it of any of the rights and powers necessary to perform any or all of the terms and assurances of this Agreement without the written approval of the Department. Further, the Agency shall act promptly to acquire, extinguish, or modify, in a manner acceptable to the Department, any outstanding rights or claims of right of others which would interfere with such performance by the Agency.

   b. If an arrangement is made for management and operation of the airport by any entity or person other than the Agency or an employee of the Agency, the Agency shall reserve sufficient rights and authority to ensure that the airport will be operated and maintained in accordance with the terms and assurances of this Agreement.

4. **Hazard Removal and Mitigation.**

a. For airport hazards located on airport controlled property, the Agency shall clear and protect terminal airspace required for instrument and visual operations at the airport (including established minimum flight altitudes) by removing, lowering, relocating, marking, or lighting or otherwise mitigating existing airport hazards and by preventing the establishment or creation of future airport hazards.

b. For airport hazards not located on airport controlled property, the Agency shall work in conjunction with the governing public authority or private land owner of the property to clear and protect terminal airspace required for instrument and visual operations at the airport (including established minimum flight altitudes) by removing, lowering, relocating, marking, or lighting or otherwise mitigating existing airport hazards and by preventing the establishment or creation of future airport hazards. The Agency may enter into an agreement with surrounding property owners or pursue available legal remedies to remove potential hazards to air navigation.

5. **Airport Compatible Land Use.**

a. The Agency assures that appropriate airport zoning ordinances are in place consistent with Section 333.03, F.S., or if not in place, that it will take appropriate action necessary to ensure local government adoption of an airport zoning ordinance or execution of an interlocal agreement with another local government body having an airport zoning ordinance, consistent with the provisions of Section 333.03, F.S.

b. The Agency assures that it will disapprove or oppose any attempted alteration or creation of objects, natural or man-made, dangerous to navigable airspace or that would adversely affect the current or future levels of airport operations.

c. The Agency assures that it will disapprove or oppose any attempted change in local land use development regulations that would adversely affect the current or future levels of airport operations by creation or expansion of airport incompatible land use areas.

6. **Consistency with Local Government Plans.**

a. The Agency assures the Project is consistent with the currently existing and planned future land use development plans approved by the local government having jurisdictional responsibility for the area surrounding the airport.

b. The Agency assures that it has given fair consideration to the interest of local communities and has had reasonable consultation with those parties affected by the Project.

c. The Agency shall consider and take appropriate actions, if deemed warranted by the Agency, to adopt the current, approved Airport Master Plan into the local government comprehensive plan.

7. **Consistency with Airport Master Plan and Airport Layout Plan.**

a. The Agency assures that the project, covered by the terms and assurances of this Agreement, is consistent with the most current Airport Master Plan.

b. The Agency assures that the Project, covered by the terms and assurances of this Agreement, is consistent with the most current, approved Airport Layout Plan (ALP), which shows:

1) The boundaries of the airport and all proposed additions thereto, together with the boundaries of all offsite areas owned or controlled by the Agency for airport purposes and proposed additions thereto;
2) The location and nature of all existing and proposed airport facilities and structures (such as runways, taxiways, aprons, terminal buildings, hangars, and roads), including all proposed extensions and reductions of existing airport facilities; and
3) The location of all existing and proposed non-aviation areas on airport property and of all existing improvements thereon.

c. The Agency assures that it will not make or permit any changes or alterations on the airport or any of its facilities that are not consistent with the Airport Master Plan and the Airport Layout Plan, as approved by the Department.

d. Original Airport Master Plans and Airport Layout Plans and each amendment, revision, or modification thereof, will be subject to the approval of the Department.

8. **Airport Financial Plan.**

a. The Agency assures that it will develop and maintain a cost-feasible Airport financial plan to accomplish the projects necessary to achieve the proposed airport improvements identified in the Airport Master Plan and depicted in the Airport Layout Plan, and any updates thereto. The Agency's Airport financial plan must comply with the following conditions:

1) The Airport financial plan will be a part of the Airport Master Plan.
2) The Airport financial plan will realistically assess project phasing considering availability of state and local funding and likelihood of federal funding under the FAA's priority system.
3) The Airport financial plan will not include Department funding for projects that are inconsistent with the local government comprehensive plan.

b. All Project cost estimates contained in the Airport financial plan shall be entered into and kept current in the Florida Aviation Database (FAD) Joint Automated Capital Improvement Program (JACIP) website.

9. **Airport Revenue.** The Agency assures that all revenue generated by the airport will be expended for capital improvement or operating costs of the airport; the local airport system; or other local facilities which are owned or operated by the owner or operator of the airport and which are directly and substantially related to the air transportation of passengers or property, or for environmental or noise mitigation purposes on or off the airport.

10. **Fee and Rental Structure.**

a. The Agency assures that it will maintain a fee and rental structure for facilities and services at the airport that it will make the airport as self-sustaining as possible under the circumstances existing at the particular airport.

b. If this Agreement results in a facility that will be leased or otherwise produce revenue, the Agency assures that the price charged for that facility will be based on the market value.

11. **Public-Private Partnership for Aeronautical Uses.**

a. If the airport owner or operator and a person or entity that owns an aircraft or an airport tenant or potential tenant agree that an aircraft hangar or tenant-specific facility, respectively, is to be constructed on airport property for aircraft storage or tenant use at the expense of the aircraft owner or tenant, the airport owner or operator may grant to the aircraft owner or tenant of the facility a lease that is subject to such terms and conditions on the facility as the airport owner or operator may impose, subject to approval by the Department.

b. The price charged for said lease will be based on market value, unless otherwise approved by the Department.

12. **Economic Nondiscrimination.**

a. The Agency assures that it will make the airport available as an airport for public use on reasonable terms without unjust discrimination to all types, kinds and classes of aeronautical activities, including commercial aeronautical activities offering services to the public.

1) The Agency may establish such reasonable, and not unjustly discriminatory, conditions to be met by all users of the airport as may be necessary for the safe and efficient operation of the airport.

2) The Agency may prohibit or limit any given type, kind or class of aeronautical use of the airport if such action is necessary for the safe operation of the airport or necessary to serve the civil aviation needs of the public.

b. The Agency assures that each airport Fixed-Based Operator (FBO) shall be subject to the same rates, fees, rentals, and other charges as are uniformly applicable to all other FBOs making the same or similar uses of such airport and utilizing the same or similar facilities.

13. **Air and Water Quality Standards.** The Agency assures that all projects involving airport location, major runway extension, or runway location will be located, designed, constructed, and operated so as to comply with applicable air and water quality standards.

14. **Operations and Maintenance.**

a. The Agency assures that the airport and all facilities, which are necessary to serve the aeronautical users of the airport, shall be operated at all times in a safe and serviceable condition and in accordance with the minimum standards as may be required or prescribed by applicable federal and state agencies for maintenance and operation, as well as minimum standards established by the Department for State of Florida licensing as a public-use airport.

1) The Agency assures that it will not cause or permit any activity or action thereon which would interfere with its use for airport purposes.
2) Except in emergency situations, any proposal to temporarily close the airport for non-aeronautical purposes must first be approved by the Department.
3) The Agency assures that it will have arrangements for promptly notifying airmen of any condition affecting aeronautical use of the airport.

b. Nothing contained herein shall be construed to require that the airport be operated for aeronautical use during temporary periods when adverse weather conditions interfere with safe airport operations.

15. **Federal Funding Eligibility.**

a. The Agency assures it will take appropriate actions to maintain federal funding eligibility for the airport and it will avoid any action that renders the airport ineligible for federal funding.

b. If the Agency becomes ineligible for federal funding of airport projects, such determination will render the Agency ineligible for state funding of airport projects.

16. **Project Implementation.**

a. The Agency assures that it will begin making expenditures or incurring obligations pertaining to this Project within one year after the effective date of this Agreement.

b. The Agency may request a one-year extension of this one-year time period, subject to approval by the Department District Secretary or designee.

c. Failure of the Agency to make expenditures, incur obligations or receive an approved extension may allow the Department to terminate this Agreement.

17. **Exclusive Rights.** The Agency assures that it will not permit any exclusive right for use of the airport by any person providing, or intending to provide, aeronautical services to the public.

18. **Airfield Access.**

a. The Agency assures that it will not grant or allow general easement or public access that opens onto or crosses the airport runways, taxiways, flight line, passenger facilities, or any area used for emergency

equipment, fuel, supplies, passengers, mail and freight, radar, communications, utilities, and landing systems, including but not limited to flight operations, ground services, emergency services, terminal facilities, maintenance, repair, or storage, except for those normal airport providers responsible for standard airport daily services or during special events at the airport open to the public with limited and controlled access.

b. The Agency assures that it will not grant or allow general easement or public access to any portion of the airfield from adjacent real property which is not owned, operated, or otherwise controlled by the Agency without prior Department approval.

19. Retention of Rights and Interests. The Agency will not sell, lease, encumber, or otherwise transfer or dispose of any part of its title or other interests in the real property shown as airport owned or controlled on the current airport layout plan without prior written approval by the Department. It will not sell, lease, encumber, terminate, waive, or otherwise transfer or dispose of any part of its title, rights, or other interest in existing noise easements or avigation easements on any property, airport or non-airport, without prior written approval by the Department. These assurances shall not limit the Agency's right to lease airport property for airport-compatible purposes.

20. Consultant, Contractor, Scope, and Costs.

a. The Department has the right to disapprove the Agency's employment of consultants, contractors, and subcontractors for all or any part of this Project if the specific consultants, contractors, or subcontractors have a record of poor project performance with the Department.

b. Further, the Department maintains the right to disapprove the proposed Project scope and cost of professional services.

21. Planning Projects. For all planning projects or other aviation studies, the Agency assures that it will:

a. Execute the project per the approved project narrative or with approved modifications.

b. Furnish the Department with such periodic project and work activity reports as indicated in the approved scope of services.

c. Make such project materials available for public review, unless exempt from public disclosure.

1) Information related to airport security is considered restricted information and is exempt from public dissemination per Sections 119.071(3) and 331.22 F.S.
2) No materials prepared under this Agreement shall be subject to copyright in the United States or any other country.

d. Grant the Department unrestricted authority to publish, disclose, distribute, and otherwise use any of the material prepared in connection with this Agreement.

e. If the Project involves developing an Airport Master Plan or an Airport Layout Plan, and any updates thereto, it will be consistent with provisions of the Florida Aviation System Plan, will identify reasonable future growth of the airport and the Agency will comply with the Department airport master planning guidebook, including:

1) Provide copies, in electronic and editable format, of final Project materials to the Department, including computer-aided drafting (CAD) files of the Airport Layout Plan.
2) Develop a cost-feasible financial plan, approved by the Department, to accomplish the projects described in the Airport Master Plan or depicted in the Airport Layout Plan, and any updates thereto. The cost-feasible financial plan shall realistically assess Project phasing considering availability of state and local funding and federal funding under the FAA's priority system.
3) Enter all projects contained in the cost-feasible plan in the Joint Automated Capital Improvement Program (JACIP).

f. The Agency understands and agrees that Department approval of this Agreement or any planning material developed as part of this Agreement does not constitute or imply any assurance or commitment on the part of the Department to approve any pending or future application for state aviation funding.

g. The Agency will submit master planning draft and final deliverables for Department and, if required, FAA approval prior to submitting any invoices to the Department for payment.

22. **Land Acquisition Projects.** For the purchase of real property, the Agency assures that it will:

a. **Laws.** Acquire the land in accordance with federal and/or state laws governing such action.

b. **Administration**. Maintain direct control of Project administration, including:

1) Maintain responsibility for all related contract letting and administrative procedures related to the purchase of real property.
2) Secure written Department approval to execute each agreement for the purchase of real property with any third party.
3) Ensure a qualified, State-certified general appraiser provides all necessary services and documentation.
4) Furnish the Department with a projected schedule of events and a cash flow projection within 20 calendar days after completion of the review appraisal.
5) Establish a Project account for the purchase of the land.
6) Collect and disburse federal, state, and local project funds.

c. **Reimbursable Funds.** If funding conveyed by this Agreement is reimbursable for land purchase in accordance with Chapter 332, F.S., the Agency shall comply with the following requirements:

1) The Agency shall apply for a FAA Airport Improvement Program grant for the land purchase within 60 days of executing this Agreement.
2) If federal funds are received for the land purchase, the Agency shall notify the Department, in writing, within 14 calendar days of receiving the federal funds and is responsible for reimbursing the Department within 30 calendar days to achieve normal project federal, state, and local funding shares per Chapter 332, F.S.
3) If federal funds are not received for the land purchase, the Agency shall reimburse the Department within 30 calendar days after the reimbursable funds are due in order to achieve normal project state and local funding shares as described in Chapter 332, F.S.
4) If federal funds are not received for the land purchase and the state share of the purchase is less than or equal to normal state and local funding shares per Chapter 332, F.S., when reimbursable funds are due, no reimbursement to the Department shall be required.

d. **New Airport.** If this Project involves the purchase of real property for the development of a new airport, the Agency assures that it will:

1) Apply for federal and state funding to construct a paved runway, associated aircraft parking apron, and connecting taxiway within one year of the date of land purchase.
2) Complete an Airport Master Plan within two years of land purchase.
3) Complete airport construction for basic operation within 10 years of land purchase.

e. **Use of Land.** The Agency assures that it shall use the land for aviation purposes in accordance with the terms and assurances of this Agreement within 10 years of acquisition.

f. **Disposal of Land.** For the disposal of real property the Agency assures that it will comply with the following:
1) For land purchased for airport development or noise compatibility purposes, the Agency shall, when the land is no longer needed for such purposes, dispose of such land at fair market value and/or make available to the Department an amount equal to the state's proportionate share of its market value.

2) Land will be considered to be needed for airport purposes under this assurance if:

   a) It serves aeronautical purposes such as a runway protection zone or as a noise buffer.
   b) Revenue from uses of such land contributes to airport financial self-sufficiency.

3) Disposition of land under Sections D.22.f.1. or D.22.f.2. of this Exhibit, above, shall be subject to retention or reservation of any interest or right therein needed to ensure such land will only be used for purposes compatible with noise levels related to airport operations.
4) Revenues from the sale of such land must be accounted for as outlined in Section D.1. of this Exhibit, and expended as outlined in Section D.9. of this Exhibit.

23. **Construction Projects.** The Agency assures that it will:

a. **Project Certifications**. Certify Project compliances, including:

   1) Consultant and contractor selection comply with all applicable federal, state and local laws, rules, regulations, and policies.
   2) All design plans and specifications comply with federal, state, and professional standards and applicable FAA advisory circulars, as well as the minimum standards established by the Department for State of Florida licensing as a public-use airport.
   3) Completed construction complies with all applicable local building codes.
   4) Completed construction complies with the Project plans and specifications with certification of that fact by the Project Engineer.

b. **Design Development.** For the plans, specifications, construction contract documents, and any and all other engineering, construction, and contractual documents produced by the Engineer, which are hereinafter collectively referred to as "plans", the Engineer will certify that:

   1) The plans shall be developed in accordance with sound engineering and design principles, and with generally accepted professional standards.
   2) The plans shall be consistent with the intent of the Project as defined in Exhibit A and Exhibit B of this Agreement.
   3) The Project Engineer shall perform a review of the certification requirements listed in Section B.2. of this Exhibit, Construction Certification, and make a determination as to their applicability to this Project.
   4) Development of the plans shall comply with all applicable laws, ordinances, zoning and permitting requirements, public notice requirements, and other similar regulations.

c. **Inspection and Approval.** The Agency assures that:

   1) The Agency will provide and maintain competent technical supervision at the construction site throughout the Project to assure that the work conforms to the plans, specifications, and schedules approved by the Department, as applicable, for the Project.
   2) The Agency assures that it will allow the Department to inspect the work and that it will provide any cost and progress reporting, as may be required by the Department.
   3) The Agency assures that it will take the appropriate corrective action necessary, as required by the Department, for work which does not conform to the Department standards.

d. **Pavement Preventive Maintenance.** The Agency assures that for a project involving replacement or reconstruction of runway or taxiway pavement it has implemented an airport pavement maintenance management program and that it will use such program for the useful life of any pavement constructed, reconstructed, or repaired with state financial assistance at the airport.

24. Noise Mitigation Projects. The Agency assures that it will:

a. Government Agreements. For all noise compatibility projects that are carried out by another unit of local government or are on property owned by a unit of local government other than the Agency, the Agency shall enter into an agreement with that government body.

1) The local agreement, satisfactory to the Department, shall obligate the unit of local government to the same terms and assurances that apply to the Agency.
2) The Agency assures that it will take steps to enforce the local agreement if there is substantial non-compliance with the terms of the local agreement.

b. Private Agreements. For noise compatibility projects on privately owned property:

1) The Agency shall enter into an agreement with the owner of that property to exclude future actions against the airport.
2) The Agency assures that it will take steps to enforce such agreement if there is substantial non-compliance with the terms of the agreement.

- End of Exhibit E -

Exhibit E1

PROGRAM SPECIFIC TERMS AND CONDITIONS

(Prohibition on Discrimination Based on Health Care Choices)

This exhibit forms an integral part of the Agreement between the Department and the Agency.

1. **Statutory Reference.** Section 339.08, F.S. and Section 381.00316, F.S.

2. **Statutory Compliance.** Pursuant to Section 339.08, F.S., the Department may not expend state funds to support a project or program of certain entities if the entity is found to be in violation of Section 381.00316, F.S. The Department shall withhold state funds until the entity is found to be in compliance with Section 381.00316, F.S. This shall apply to any of the following entities:

    a. A public transit provider as defined in s. 341.031(1), F.S.;
    b. An authority created pursuant to chapter 343, F.S., chapter 348, F.S., or chapter 349, F.S.; c. A public-use airport as defined in s. 332.004, F.S.; or
    d. A port listed in s. 311.09(1), F.S.

- End of Exhibit E1 -

EXHIBIT F

Contract Payment Requirements
Florida Department of Financial Services, Reference Guide for State Expenditures
Cost Reimbursement Contracts

Invoices for cost reimbursement contracts must be supported by an itemized listing of expenditures by category (salary, travel, expenses, etc.). Supporting documentation shall be submitted for each amount for which reimbursement is being claimed indicating that the item has been paid. Documentation for each amount for which reimbursement is being claimed must indicate that the item has been paid. Check numbers may be provided in lieu of copies of actual checks. Each piece of documentation should clearly reflect the dates of service. Only expenditures for categories in the approved agreement budget may be reimbursed. These expenditures must be allowable (pursuant to law) and directly related to the services being provided.

Listed below are types and examples of supporting documentation for cost reimbursement agreements:

(1) Salaries: A payroll register or similar documentation should be submitted. The payroll register should show gross salary charges, fringe benefits, other deductions and net pay. If an individual for whom reimbursement is being claimed is paid by the hour, a document reflecting the hours worked times the rate of pay will be acceptable.

(2) Fringe Benefits: Fringe Benefits should be supported by invoices showing the amount paid on behalf of the employee (e.g., insurance premiums paid). If the contract specifically states that fringe benefits will be based on a specified percentage rather than the actual cost of fringe benefits, then the calculation for the fringe benefits amount must be shown.

Exception: Governmental entities are not required to provide check numbers or copies of checks for fringe benefits.

(3) Travel: Reimbursement for travel must be in accordance with Section 112.061, Florida Statutes, which includes submission of the claim on the approved State travel voucher or electronic means.

(4) Other direct costs: Reimbursement will be made based on paid invoices/receipts. If nonexpendable property is purchased using State funds, the contract should include a provision for the transfer of the property to the State when services are terminated. Documentation must be provided to show compliance with Department of Management Services Rule 60A-1.017, Florida Administrative Code, regarding the requirements for contracts which include services and that provide for the contractor to purchase tangible personal property as defined in Section 273.02, Florida Statutes, for subsequent transfer to the State.

(5) In-house charges: Charges which may be of an internal nature (e.g., postage, copies, etc.) may be reimbursed on a usage log which shows the units times the rate being charged. The rates must be reasonable.

(6) Indirect costs: If the contract specifies that indirect costs will be paid based on a specified rate, then the calculation should be shown.

Contracts between state agencies, and/or contracts between universities may submit alternative documentation to substantiate the reimbursement request that may be in the form of FLAIR reports or other detailed reports.

The Florida Department of Financial Services, online Reference Guide for State Expenditures can be found at this web address: https://myfloridacfo.com/docs-sf/accounting-and-auditing-libraries/manuals/agencies/reference-guide-for-state-expenditures.pdf?sfvrsn=b4cc3337_6

EXHIBIT G

AUDIT REQUIREMENTS FOR AWARDS OF STATE FINANCIAL ASSISTANCE

THE STATE RESOURCES AWARDED PURSUANT TO THIS AGREEMENT CONSIST OF THE FOLLOWING:

SUBJECT TO SECTION 215.97, FLORIDA STATUTES:~

Awarding Agency: Florida Department of Transportation
State Project Title: Aviation Grant Program
CSFA Number: 55.004
***Award Amount:** $50,000

*The award amount may change with amendments

Specific project information for CSFA Number 55.004 is provided at: https://apps.fldfs.com/fsaa/searchCatalog.aspx

COMPLIANCE REQUIREMENTS APPLICABLE TO STATE RESOURCES AWARDED PURSUANT TO THIS AGREEMENT:

State Project Compliance Requirements for CSFA Number 55.004 are provided at: https://apps.fldfs.com/fsaa/searchCompliance.aspx

The State Projects Compliance Supplement is provided at: https://apps.fldfs.com/fsaa/compliance.aspx

THE CITY OF NEW SMYRNA BEACH - ENGINEERING

RESOLUTION NO. 14-25: CONSIDER THE APPROVAL OF COUNTYWIDE LOCAL MITIGATION STRATEGY (LMS) PLAN WITH RESOLUTION.

May 27, 2025

Background:

The Local Mitigation Strategy (LMS) plan is a crucial document that procedurally gives an organized approach to all cities and the county in preparation, coordination and comprehensive recovery efforts associated with natural disasters such as floods, hurricanes, tornadoes, etc. The LMS plan is dynamic and has been updated to reflect the best management practices for emergency response to provide cohesion between agencies to effectively serve each of the communities.

Findings:

The City's commitment to reducing flooding and other weather related impacts support the LMS plan and requires City Commission to endorse a Resolution to this effect. The goals are broad and support Vulnerability Assessment (sensitivity analysis), mitigation strategies as well as endorsing the Community Rating System as part of the National Flood Insurance Program that incentivizes flood reduction measures and results in a significant reduction of flood insurance premiums for residents.
The LMS plan has been reviewed by the applicable departments including Fire Rescue, Police, Maintenance Operations as well as Engineering and found the goals and objectives to be in line with the City's best interest, thereby endorsing Commission's approval of the resolution to adopt the LMS plan.

Fiscal Analysis:

There are no fiscal requirements as each of the Departments enacts the guidelines within the approved operating budget.

Strategic Plan Item:

No

Staff Report Created By: Kyle Fegley - City Engineer

Res 14-25 LMS Plan.pdf

VOLUSIA COUNTY, FLORIDA

MULTI-JURISDICTIONAL LOCAL MITIGATION STRATEGY

PREPARED BY THE ECFRPC
AND THE VOLUSIA PREPARES LMS WORKING GROUP
JANUARY 2025

SECTION 1 – INTRODUCTION

This section of the Plan provides a general introduction to the Volusia County Multi-Jurisdictional Local Mitigation Strategy (LMS). It consists of the following five subsections:

- **Background**
- **Purpose**
- **Scope**
- **Authority**
- **Summary of Plan Contents**

1.1 BACKGROUND

Natural hazards, such as hurricanes, floods and tornadoes, are a part of the world around us. Their occurrence is natural and inevitable, and there is little we can do to control their force and intensity. We must consider these hazards to be legitimate and significant threats to human life, safety and property.

Volusia County, Florida is vulnerable to a wide range of natural hazards, including hurricanes and tropical storms, flooding, tornadoes and wildfires. These hazards threaten the life and safety of county residents and have the potential to damage or destroy both public and private property and disrupt the local economy and overall quality of life of individuals who live, work and vacation in the community.

While the threat from hazardous events may never be fully eliminated, there is much we can do to lessen their potential impact upon our community and our citizens. By minimizing the impact of hazards upon our built environment, we can prevent such events from resulting in disasters. The concept and practice of reducing risks to people and property from known hazards is generally referred to as *hazard mitigation*.

FEMA Definition of Hazard Mitigation:
"Any sustained action taken to reduce or eliminate the long-term risk to human life and property from hazards."

Hazard mitigation techniques include both structural measures, such as strengthening or protecting buildings and infrastructure from the destructive forces of potential hazards and non-structural measures, such as the adoption of sound land use policies and the creation of public awareness programs. It is widely accepted that the most effective mitigation measures are implemented at the local government level, where decisions on the regulation and control of development are ultimately made. A comprehensive mitigation approach addresses hazard vulnerabilities that exist today and in the foreseeable future. Therefore, it is essential that projected patterns of future development are evaluated and considered in terms of how that growth will increase or decrease a community's overall hazard vulnerability.

As a community formulates a comprehensive strategy to hazard mitigation, a key component is to develop, adopt and update a Local Mitigation Strategy. An LMS/hazard mitigation plan establishes a broad

community vision and guiding principles for reducing hazard risk and further proposes specific mitigation actions to eliminate or reduce identified vulnerabilities. Each of the jurisdictions has adopted the LMS by resolution (**Appendix A**).

The Volusia County Multi-Jurisdictional Local Mitigation Strategy has evolved over the years, as more thoroughly described in Section 2: Planning Process. The Volusia Prepares LMS Working Group (LMS Working Group) has developed Bylaws and Operating Procedures (**Appendix B**) to formalize the LMS update process and working group. The Plan documents and represents the County's and participating local jurisdictions' sustained efforts to incorporate hazard mitigation principles and practices into the routine government activities and functions of Volusia County and its participating jurisdictions and partners. This includes documenting the goals and objectives that Volusia County deems necessary to protect people and property from hazards. At its most inner core, the Plan recommends specific actions to combat hazard vulnerability and protect its residents from losses to those hazards that pose the greatest risk. Actions go beyond recommending micro-level solutions such as elevation, retrofitting and acquisition projects, and address macro-level solutions. Examples of macro-level actions that contribute to reducing the future vulnerability of Volusia County include local policies on community growth and development, incentives for natural resource protection and public awareness and outreach activities. Finally, the Plan is a living document, with implementation, evaluation and update procedures included to help achieve meaningful objectives and successful outcomes over time.

1.1.1 Disaster Mitigation Act of 2000

To reduce the Nation's mounting natural disaster losses, the U.S. Congress passed the Disaster Mitigation Act of 2000 (DMA 2000) to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Section 322 of DMA 2000 emphasizes the need for state and local government entities to closely coordinate mitigation planning activities and makes the development of a hazard mitigation plan a specific eligibility requirement for any local government applying for federal mitigation grant funds. These funds include the Hazard Mitigation Grant Program (HMGP) and the Pre-Disaster Mitigation (PDM) program, both of which are administered by the Federal Emergency Management Agency (FEMA) under the Department of Homeland Security. Communities with an adopted and federally approved hazard mitigation plan thereby become pre-positioned and are more apt to receive available mitigation funds before and after the next disaster strikes.

The Volusia County Multi-Jurisdictional LMS has been prepared in coordination with FEMA Region IV and the Florida Division of Emergency Management to ensure that the Plan meets all applicable DMA 2000 and state requirements. A *Local Mitigation Plan Review Crosswalk*, found in **Appendix C**, provides a summary of federal and state minimum standards and notes the location where each requirement is met within the Plan.

1.2 PURPOSE

The purpose of the Volusia County Multi-Jurisdictional LMS is to:

- **Provide a comprehensive update to the *Volusia County Local Hazard Mitigation Plan*, as previously amended in 2020, that is compliant with federal and state requirements.**
  - This Plan is intended to assist participating jurisdictions to comply with requirements in order to expedite the response and recovery process. In addition, compliance is often required to obtain state and federal funding for pre-disaster mitigation projects and post-disaster situations. This Plan allows participating jurisdictions to quickly assemble the necessary grant application materials when seeking funding.

- **Provide a methodical, substantive approach to mitigation planning.**
  - The use of a methodical approach ensures that each step in the planning process builds upon the last, resulting in a high level of assurance that proposed mitigation actions have a valid basis.

- **Enhance public awareness and understanding of hazard mitigation planning.**
  - Engaging the public in the local mitigation planning process shapes the goals, objectives and policies in this Plan. Further, it provides a method for educating the public on how to protect themselves from the impacts of hazards.

- **Create a decision tool for management.**
  - This plan provides local managers, leaders and officials with the tools needed to reduce vulnerabilities to future hazard events.

- **Enhance local policies for hazard mitigation capability.**
  - The Capability Assessment found in Section 7 outlines the policies in Volusia County and the participating jurisdictions to reduce hazard vulnerability. Volusia County's participating jurisdictions aim to enhance and create policies to address mitigating the impacts of a hazard if such policies do not exist.

- **Assure inter-jurisdictional coordination of mitigation-related programming.**
  - By creating a Multi-Jurisdictional plan, this Plan ensures coordination of mitigation activities. This ensures that mitigation actions proposed or implemented by one jurisdiction will be compatible with the actions pursued by another.

- **Provide jurisdiction-specific hazard mitigation vulnerability assessments and actions.**
  - The vulnerability of each jurisdiction will be outlaid in the Vulnerability Assessment. Further, each jurisdiction, based on its vulnerability, will have actions to address hazard vulnerability.

1.3 SCOPE

The focus of the Volusia County Multi-Jurisdictional LMS is on those hazards deemed to be "high" or "moderate" risk as determined through a detailed hazard risk assessment conducted for Volusia County. Other hazards that pose a "low" or "negligible" risk will continue to be evaluated during future updates to the Plan, but they may not be fully addressed until they are determined to be of high or moderate risk. This enables Volusia County and its participating jurisdictions to prioritize mitigation actions based on those hazards which are understood to present the greatest risk to lives and property.

The geographic scope (i.e., the planning area) for the Plan includes all areas within the unincorporated jurisdiction of Volusia County and the participating incorporated municipalities: Daytona Beach, Daytona Beach Shores, DeBary, DeLand, Deltona, Edgewater, Holly Hill, Lake Helen, New Smyrna Beach, Oak Hill, Orange City, Ormond Beach, Pierson, Ponce Inlet, Port Orange and South Daytona. In addition, other entities, such as the Volusia County School District, Halifax Medical Center, various Advent Health locations, American Red Cross and the Daytona Beach International Airport participated in the planning process. See Section 2 for a full list of participating entities.

1.4 AUTHORITY

The Volusia County Multi-Jurisdictional LMS has been developed in accordance with current state and federal rules and regulations governing local hazard mitigation plans and has been adopted by Volusia County and its participating jurisdictions and partners in accordance with standard local procedures. The Plan shall be routinely monitored and revised to maintain compliance with the following provisions, rules and legislation:

- Section 322, Mitigation Planning, of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as enacted by Section 104 of the Disaster Mitigation Act of 2000 (P.L. 106-390); and
- FEMA's Interim Final Rule published in the Federal Register on February 26, 2002, at 44 CFR Part 201.

1.5 SUMMARY OF PLAN CONTENTS

The contents of this Plan are designed and organized to be as reader-friendly and functional as possible. While significant background information is included in the processes used and studies completed (i.e., risk assessment, capability assessment), this information is separated from the more meaningful planning outcomes or actions (i.e., mitigation strategy, mitigation action plans).

Section 2: ***Planning Process***, provides a complete narrative description of the process used to prepare the Plan. This includes the identification of who was involved, who participated on the planning team, and how the public and other stakeholders were involved. It also includes a detailed summary for each of the key meetings held along with any associated outcomes.

The ***Community Profile***, located in Section 3, describes the general makeup of Volusia County, including prevalent geographic, demographic and economic characteristics. In addition, building characteristics and land use patterns are discussed. This baseline information provides a snapshot of the planning area and thereby assists local officials recognize those social, environmental and economic factors that ultimately play a role in determining community vulnerability to hazards.

The Risk Assessment is presented in three sections: Section 4: ***Hazard Identification***; Section 5: ***Hazard Profiles***; and Section 6: ***Vulnerability Assessment***. Together, these sections serve to identify, analyze and assess the overall risk posed to Volusia County and the participating jurisdictions from hazards. The risk assessment also attempts to define any hazard risks that may uniquely or exclusively affect specific areas of Volusia County or its participating jurisdictions and partners.

The ***Capability Assessment***, found in Section 7, provides a detailed analysis of the capacity in Volusia County and the participating jurisdictions to implement meaningful mitigation strategies and identifies existing opportunities to increase and enhance that capacity. Specific capabilities addressed in this section include planning and regulatory capability, staff and organizational (administrative) capability, technical capability, fiscal capability and political capability.

The ***Community Profile***, ***Risk Assessment*** and ***Capability Assessment*** collectively serve as a basis for determining the goals for the Volusia County Multi-Jurisdictional LMS, each contributing to the development, adoption and implementation of a meaningful and manageable *Mitigation Strategy* that is based on accurate background information.

The ***Mitigation Strategy***, found in Section 8, consists of broad countywide goal statements as well as an analysis of hazard mitigation techniques for Volusia County and its participating jurisdictions and partners to consider in reducing hazard vulnerabilities. The Strategy provides the foundation for a detailed ***Mitigation Action Plan***, found in Section 9, which links specific mitigation actions for each County department or agency to locally assigned implementation mechanisms and target completion dates. Together, these sections are designed to make the Plan both strategic (through the identification of long-term goals) but also functional through the identification of short-term and immediate actions that will guide day-to-day decision-making and project implementation.

In addition to the identification and prioritization of possible mitigation projects, emphasis is placed on the use of program and policy alternatives to help make Volusia County and the participating jurisdictions less vulnerable to the damaging forces of hazards while improving the economic, social and environmental health of the community. The concept of multi-objective planning was emphasized throughout the planning process, particularly in identifying ways to link, where possible, hazard mitigation policies and programs with complimentary community goals related to disaster recovery, housing, economic development, recreational opportunities, transportation improvements, environmental quality, land development and public health and safety.

Section 10: ***Plan Maintenance Procedures*** includes the measures that Volusia County and the participating jurisdictions will take to ensure the Plan's continuous long-term implementation. The procedures also include the manner in which the Plan will be regularly evaluated and updated to remain a current and meaningful planning document.

SECTION 2 – PLANNING PROCESS

44 CFR Requirement

44 CFR Part 201.6(c)(1): The plan shall include documentation of the planning process used to develop the plan, including how it was prepared, who was involved in the process and how the public was involved.

This section describes the planning process undertaken by Volusia County in the development of the 2025 Multi-jurisdictional Local Mitigation Strategy. It consists of the following six subsections:

- **Overview of Hazard Mitigation Planning**
- **History of Hazard Mitigation Planning in Volusia County**
- **Preparing the 2025 Plan**
- **The Volusia Prepares Local Mitigation Strategy Working Group**
- **Community Meetings and Workshops**
- **Involving the Public and Identified Stakeholders**

2.1 OVERVIEW OF HAZARD MITIGATION PLANNING

Local hazard mitigation planning is the process of organizing community resources, identifying and assessing hazard risks and determining how to best minimize or manage those risks. This process results in a hazard mitigation plan that identifies specific mitigation actions, each designed to achieve both short-term planning objectives and a long-term community vision.

To ensure the functionality of a hazard mitigation plan, responsibility is assigned for each proposed mitigation action to a specific individual, department or agency along with a schedule or target completion date for its implementation. Plan maintenance procedures are established for the routine monitoring of implementation progress, as well as the evaluation and enhancement of the mitigation plan itself. These plan maintenance procedures ensure that the plan remains a current, dynamic and effective planning document over time that becomes integrated into the routine local decision-making process.

Mitigation planning offers many benefits, including:

- **Saving lives and property**
- **Saving money**
- **Speeding recovery following disasters**
- **Reducing future vulnerability through wise development and post-disaster recovery and reconstruction**
- **Expediting the receipt of pre-disaster and post-disaster grant funding**
- **Demonstrating a firm commitment to improving community health and safety**

Typically, mitigation planning is described as having the potential to produce long-term and recurring benefits by breaking the repetitive cycle of disaster loss. A core assumption of hazard mitigation is that

the investments made before a hazard event will significantly reduce the demand for post-disaster assistance by lessening the need for emergency response, repair, recovery and reconstruction. Furthermore, mitigation practices will enable local residents, businesses and industries to re-establish themselves in the wake of a disaster, getting the community economy back on track sooner and with less interruption.

The benefits of mitigation planning go beyond solely reducing hazard vulnerability. Measures such as the acquisition or regulation of land in known hazard areas can help achieve multiple community goals, such as preserving open space, maintaining environmental health and enhancing recreational opportunities. Thus, it is vitally important that any local mitigation planning process be integrated with other concurrent local planning efforts, and any proposed mitigation strategies must consider other existing community goals or initiatives that will help complement or hinder their future implementation.

2.2 HISTORY OF HAZARD MITIGATION PLANNING IN VOLUSIA COUNTY

Volusia County's hazard mitigation planning efforts began in 1997 with the formation of the Volusia Prepares Committee. The committee developed the first LMS in 1999 (adopted 2000), as part of the Florida Department of Community Affairs LMS Initiative. The previous version of the LMS, prior to the 2025 version, was updated and adopted in 2020.

2.3 PREPARING THE 2025 LMS

The 2025 LMS update was prepared by the East Central Florida Regional Planning Council with assistance from Volusia County Emergency Management Staff. The LMS Update process was led by Volusia County Emergency Management Plans Coordinator Aubrie Austin. The LMS plan was updated from June 2024 to January 2025.

Per the contractual scope of work[1], the consultant team utilized the mitigation planning process recommended by FEMA (Publication Series 386) and recommendations provided by Florida Division of Emergency Management mitigation planning staff. A Local Mitigation Plan Crosswalk, found in Appendix C, provides a detailed summary of FEMA's current minimum standards of acceptability for compliance with the DMA 2000 and notes the location of where each requirement is met within the Plan. These standards are based upon FEMA's Interim Final Rule as published in the Federal Register on February 26, 2002, in Part 201 of the 44 Code of Federal Regulations.

The 2025 LMS was prepared using an updated plan outline and incorporated relevant content from the 2020 LMS. The LMS Working Group updated various parts of the 2020 LMS, as exemplified below:

- *Stakeholders*
  The LMS Working Group identified additional stakeholders that would like to participate in the LMS update process. These stakeholders were invited to subsequent meetings.

- *Plan Outline*
  The LMS Working Group did not revise the plan outline that was proposed by the consultant.

[1] A copy of the negotiated contractual scope of work between Volusia County and ECFRPC is available through Volusia County upon request.

- *Hazards*
  The LMS Working Group decided to include natural hazards starting with the 2009 LMS update, per DMA 2K requirements. Additional manmade and technical hazards occurrences have been included because the rise in occurrences over past years. Many of these hazards are addressed through other emergency preparedness and response plans (e.g., Comprehensive Emergency Management Plan, Emergency Response Plan, Emergency Action Plan, etc.), but cascading impacts have increased the need for mitigation.

- *Hazards Identification Scoring (for reference)*
  In 2024, prior to this plan update, each jurisdiction reviewed the hazards scores that were included in the 2020 LMS (Comparison of Jurisdictional Relative Risk) and modified the scores for each hazard to reflect changes in the impacted area; probability of occurrence; and affects to the built and natural environment and economy.

- *Goals and Objectives*
  The LMS Working Group reviewed the goals and objectives as part of the 2025 update cycle. Through a series of meetings at the beginning of the update process, all goals and objectives were assessed, combined, and/or updated to better reflect the changing needs of the county.

- *Vulnerability Assessment*
  The Vulnerability Assessment was updated using property appraiser data, Resilient Florida Statute Guidelines, and NOAA/USACE predications, as well as the most recent local parcel data (October 2024) for GIS analysis. Hazard maps, hazards exposure and loss estimates were included when appropriate. See Sections 4, 5 and 6 for further information.

- *Hazard Mitigation Initiatives*
  The LMS Working Group decided to continue to use the Excel-based mitigation initiative status and scoring system. See Section 9 for further information.

- *LMS Working Group Bylaws and Operating Procedures (for reference)*
  The LMS Working Group updated the Bylaws and Operating Procedures in 2014 with the facilitated assistance from the consultant with changes made since the 2009 LMS update.

- *Capability Assessment*
  In 2009, a Capability Assessment was prepared, which was not included in the 2005 LMS. This assessment was updated for the 2020 LMS. A survey was conducted among the participating jurisdictions to update the 2025 LMS.

The process used to update this LMS included:

- Conducted the Preliminary Meeting with Volusia County Emergency Management to establish planning process, roles, responsibilities, etc. in preparation for the Kickoff Meeting.
- Conducted the Kickoff Meeting with the Volusia Prepares LMS Working Group
- Offered engagement opportunities for the general public

- Implemented the Vulnerability Assessment produced by the East Central Florida Regional Planning Council (ECFRPC)
- Updated the Capability Assessment
- Conducted Mitigation Strategy Meetings with the Volusia Prepares LMS Working Group and invited the general public to attend. The meetings focused on the plan outline and data collection process, as well as a review of the first draft of the updated 2025 plan.
- Developed the Mitigation Strategy with the LMS Working Group
- Updated the scores for the Mitigation Initiatives
- Updated the Mitigation Initiatives status and scoring of potential projects
- Updated the LMS Plan Maintenance process

Each of these planning steps resulted in critical work products and outcomes that collectively make up the Plan. These elements have been included as separate sections of the Plan (further described in Section 1: Introduction).

The jurisdictions will consider using content from the LMS into other planning initiatives.

2.4 VOLUSIA PREPARES LOCAL MITIGATION STRATEGY WORKING GROUP

To guide the development of this Plan, Volusia County reconvened its Volusia Prepares LMS Working Group that was created under past planning efforts. Since the previous update, some changes have been made to the LMS working group in terms of personnel. The LMS Working Group includes representatives of various public, private and non-profit organizations throughout the county. The LMS Working Group represents a community-based planning team made up of local government officials and other key stakeholders identified to serve as critical partners in the planning process.

Opportunities were provided for all Volusia County jurisdictions, agencies, businesses, academia and other interested parties to participate in the LMS update process. All Volusia Prepares information is emailed to city managers, business owners, chambers of commerce, agencies, non-profits, emergency managers and other county partners.

Several non-profits (e.g., American Red Cross, Volusia Interfaiths/Agencies Networking in Disaster and United Cerebral Palsy) have participated in the LMS update process and have approved initiatives in the LMS. There is a Volusia Prepares Business group that has developed a Business Operations Center and emergency business database. They've also held several business planning workshops.

Beginning in June 2024, the LMS Working Group members engaged in regular discussions as well as local meetings and planning workshops to discuss and complete tasks associated with preparing the Plan. This working group coordinated together on all aspects of plan preparation and provided valuable input to the process. In addition to regular meetings, committee members routinely communicated and were kept informed through an e-mail distribution list and Internet Web site.

Specifically, the tasks assigned to the LMS Working Group members included:

- Participate in LMS update meetings and workshops.
- Provide best available data.

- Help complete the Capability Assessment Survey and provide copies of any mitigation or hazard-related documents for review and incorporation into the Plan.
- Support the development of the Mitigation Strategy, including the design and adoption of community goal statements.
- Help design and propose appropriate mitigation actions for their department/agency for incorporation into the Mitigation Action Plan. Provide a status update and assign a priority score to existing Mitigation Actions.
- Review and provide timely comments on all study findings and draft plan deliverables.
- Support the adoption of the 2025 Volusia County Multi-Jurisdictional Local Mitigation Strategy by all participating jurisdictions.

In addition to these tasks, the Volusia Prepares LMS Working Group consists of a subcommittee responsible for the integration of the County's Program for Public Information (PPI) report into the workflow of the Volusia Prepares Working Group. This includes the creation of an annual report that reviews the status and applicability of the plan.

Section 2 Table 1 lists the members of the Volusia County Prepares LMS Working Group who were responsible for participating in the development of the Plan.

2.5 COMMUNITY MEETINGS AND WORKSHOPS

The preparation of this Plan required a series of meetings and workshops for facilitating discussion, gaining consensus and initiating data collection efforts with local government staff, community officials and other identified stakeholders. More importantly, the meetings and workshops prompted continuous input and feedback from relevant participants throughout the drafting stages of the Plan. Below is a summary of the key meetings and community workshops held during the development of the plan update.

In many cases, routine discussions and additional meetings were held by local staff to accomplish planning tasks specific to their department or agency, such as the approval of specific mitigation actions for their jurisdiction, department or agency to undertake and include in the Mitigation Action Plan. Preplanning efforts began in January 2024. The LMS Working Group was notified in the first quarter meeting that the LMS update was this year, and their participation was vital to the plan's success.

The following is a summary of the meetings that occurred during the LMS update planning process. Meeting invitations, agendas, minutes and rosters are provided in Appendix D.

Volusia Prepares Kickoff Meeting

June 21, 2024

The Kickoff Meeting was held at the Volusia Emergency Operations Center, 3825 Tiger Bay Road and was attended by the LMS Working Group. The primary purpose of the meeting was to explain the proposed planning process in detail, describe individual roles and responsibilities and begin initial data collection efforts. The LMS Working Group was asked to identify additional stakeholders, new plans, data and studies to incorporate into the LMS update.

Public Kickoff Meeting

September 20, 2024

The Working Group's Quarter 3 Meeting was open to the public. This meeting was held at the Volusia County Emergency Operations Center. The goal was to begin the public engagement process. The objective was to inform the Working Group and the public on the progress made up to that point and to discuss any updates needed to the priority project list.

Public Engagement Meetings

November 25 and 26, 2024

Two public meetings were held to inform the public of the planning process and the overall scope of the 2025 Volusia County Local Mitigation Strategy. Maps and a draft plan were provided and general items within the plan were discussed. Special attention was given to community members' needs and recommendations for the plan.

Volusia Prepares Meeting #2 and Conclusion Meeting for Public

December 13, 2024

The next Local Mitigation Strategy Meeting was held at the Volusia County Emergency Operations Center, 3825 Tiger Bay Road. The purpose of this meeting was to inform the jurisdictions and the public on the plan update and obtain comments and feedback.

The final opportunity for public comment will take place at the County Council meeting when the plan is presented for formal adoption. Upcoming community outreach efforts will focus on including the concepts of mitigation in current public information activities, and to make the public aware of this planning process, its goals and objectives, and opportunities for public input at every possible occasion.

2.6 INVOLVING THE PUBLIC AND IDENTIFIED STAKEHOLDERS

A press release was issued from Volusia County Community Information, by the Volusia County Public Information Officer, to invite the public to participate in the LMS development and provide comments on the LMS. The press release included background information about the LMS process, the agenda topics, date, time and location information. Public feedback was accepted by emails, in meetings, in surveys, or by contacting the LMS Coordinator. In addition, the LMS was also placed on the Volusia County Emergency Management's Website.

The public and community stakeholders were invited to "Public Meetings" during the LMS planning process (see Appendix D). These meetings were hosted at two different public library locations to reach different parts of the community. Additionally, they were hosted at different times of the day, one evening and one morning, to accommodate various residents.

The public was also invited to the Volusia Prepares meetings conducted on September 20th and December 13th at the Volusia County EOC.

VCEM engaged community leaders from low-income and underserved communities to request input on the risks and hazards over the 5-year planning period. The survey was distributed to these partners as a way to report local experiences of hazard events (see Appendix D).

SECTION 3 – COMMUNITY PROFILE

This section of the Plan provides an overview of Volusia County, Florida. It consists of the following five subsections:

- **Geography and the Environment**
- **Population and Demographics**
- **Housing, Infrastructure and Land Use**
- **Employment and Industry**
- **Development Trends**

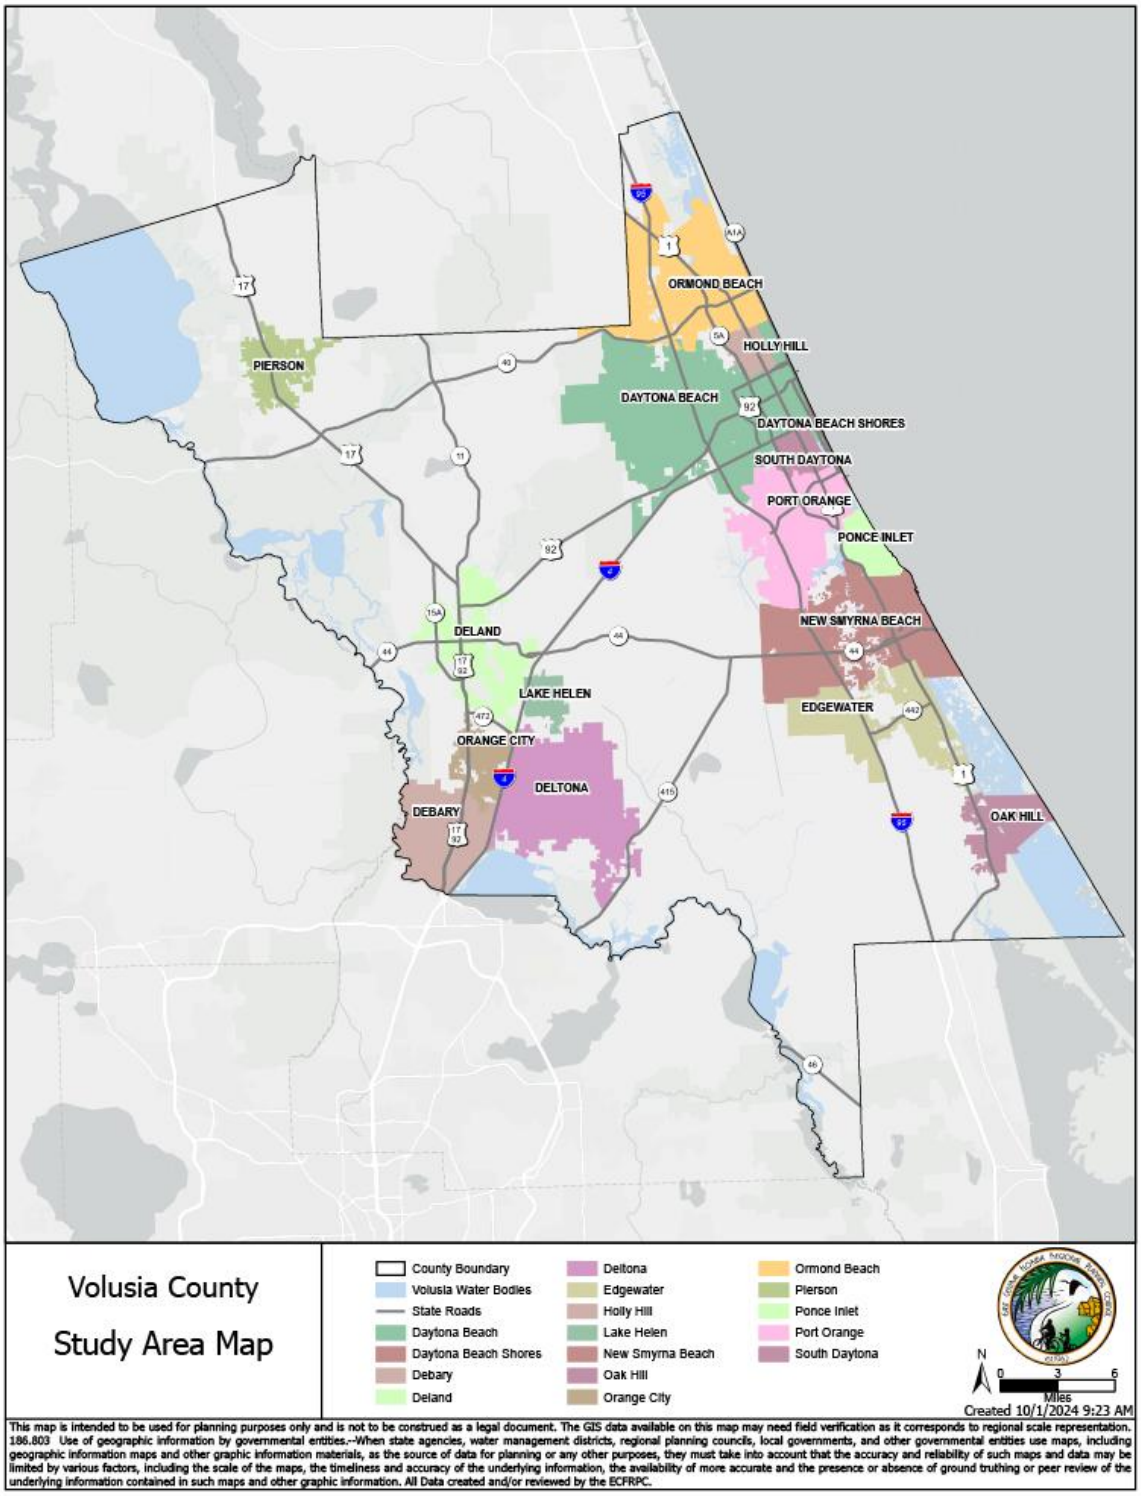
A variety of resources were used to obtain reliable data and information about the community's profile and demographics. To develop this plan, sources such as the U.S. Census, BEBR reports, and Volusia County Property Appraiser information, were utilized.

3.1 GEOGRAPHY AND THE ENVIRONMENT

Volusia County was established in 1854 as a prosperous steamboat landing area. It lies on the central coast of eastern Florida and is comprised of 1,103 square miles of land and 329 square miles of water (bounded to the north and south by the coastal counties of Flagler and Brevard). Several counties border Volusia County to the west including Putnam, Marion, Lake and Seminole. The County is located approximately 40 miles from Orlando, 95 miles from Jacksonville and 105 miles from Tampa, Florida.

There are 16 incorporated areas within Volusia County, of which Deltona is the largest in terms of population. An orientation map of the Volusia County study area is provided as **Section 3 Figure 1**. The participating jurisdictions in this plan include Daytona Beach, Daytona Beach Shores, DeBary, Deland Deltona, Edgewater, Holly Hill, Lake Helen, New Smyrna Beach, Oak Hill, Orange City, Ormond Beach, Pierson, Ponce Inlet, Port Orange, South Daytona, and the unincorporated area of Volusia County.

Forest land accounts for approximately 56 percent of the land area in Volusia County[1]. There is an abundance of public land in Volusia County. For example, the northern portion of the county, abutting Flagler County, is located in the North Peninsula State Recreation Area. In addition, the southern coastal portion of the county, adjacent to Brevard County, is part of the Canaveral National Seashore.



The climate in Volusia County is considered sub-tropical with generally warm, humid temperatures year-round. The average winter temperature is 61 degrees Fahrenheit. The average summer temperature is 81 degrees Fahrenheit, though it typically exceeds 90 degrees Fahrenheit in the months of June, July, and August. The average annual precipitation is 53.83 inches.

The dominant surface water resources in Volusia County are Mosquito Lagoon, Lake George (37,884 acres), Lake Monroe (5,423 acres), and Lake Harney (3,210 acres)[2]. Additionally, the Halifax River and

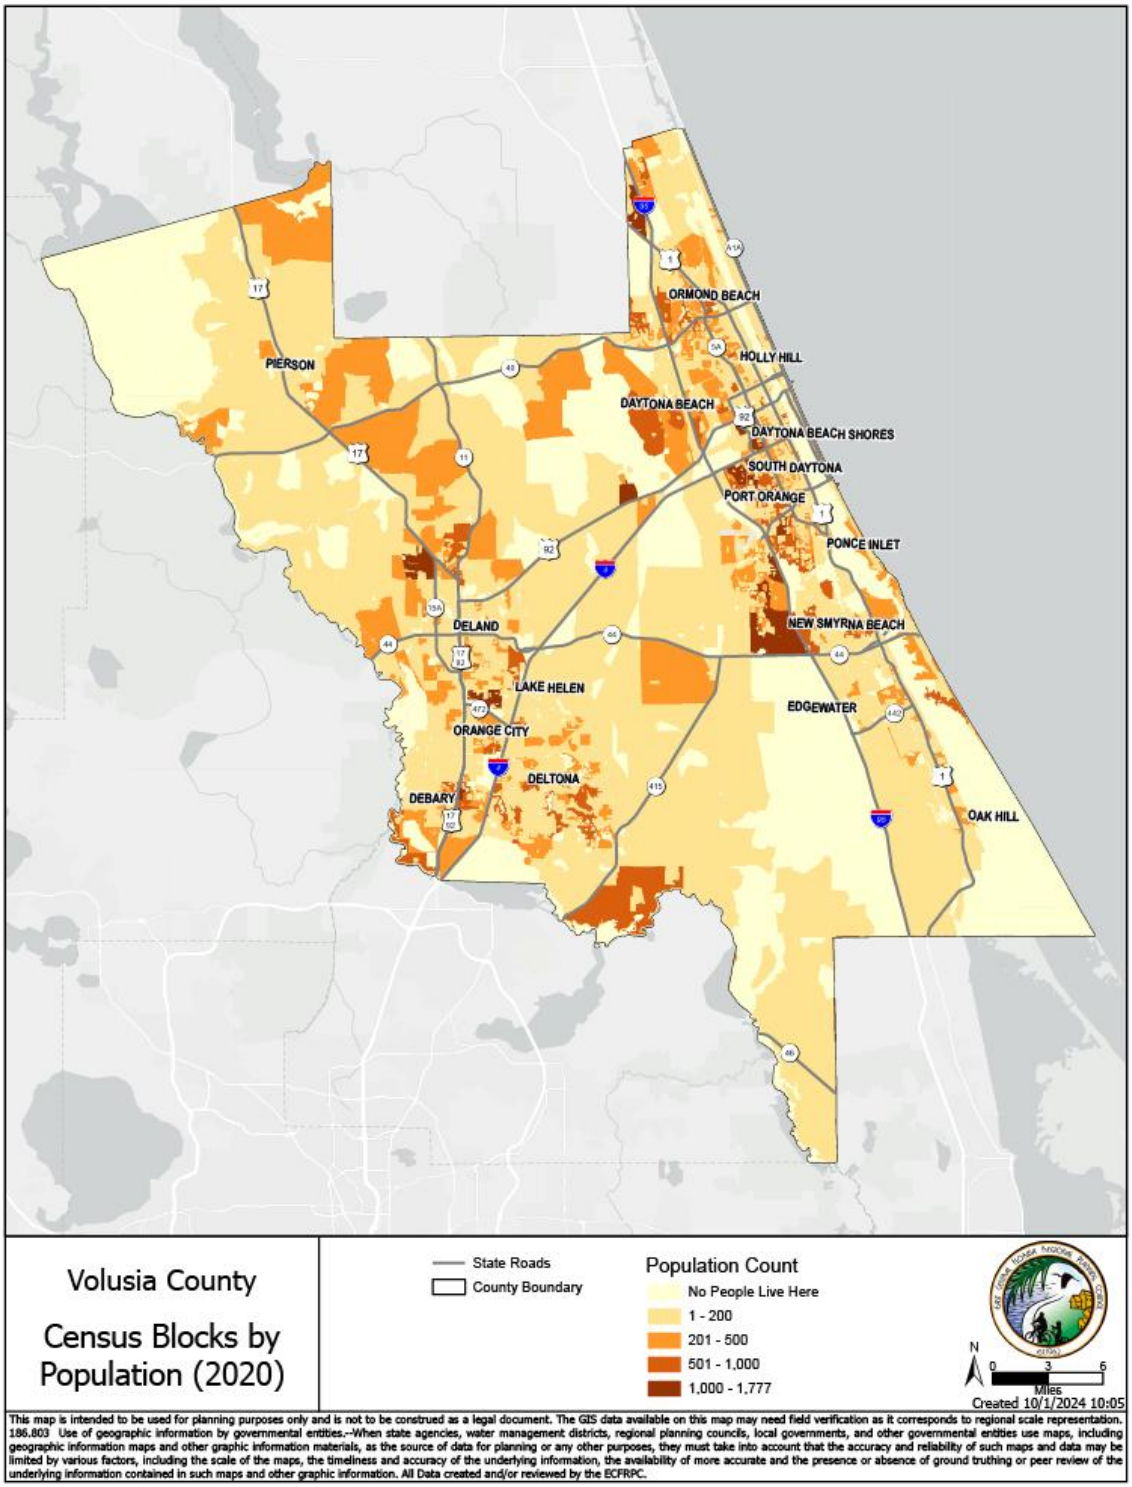
[1] http://www.freshfromflorida.com
[2] Volusia County Comprehensive Plan, Figure 1-2 Legend for Water Bodies

Indian River Lagoon are major waterways. There are many other water areas throughout the County, which are fed by numerous creeks, bayous and other minor tributaries.

Section 3: Figure 1: Volusia County Study Area Map

Source: Volusia County GIS, ECFRPC GIS

3.2 POPULATION AND DEMOGRAPHICS



According to the U.S. Census Bureau, the 2023 estimated population of Volusia County was 590,357. This represents a 6.7 percent increase from 2020, when the population was 553,537. **Section 3: Table 1** provides the 2020 populations of the cities and unincorporated areas within Volusia County, along with the 2023 population estimates as provided by the U.S. Census Bureau. In addition, **Section 3: Figure 2** shows the population distribution in Volusia County.

Section 3: Table 1: Population of Cities and Unincorporated Areas in Volusia County[3]

JURISDICTION	2020 POPULATION	2023 POPULATION ESTIMATE
Daytona Beach	71,586	82,485
Daytona Beach Shores	5,120	5,194
DeBary	22,255	23,209
DeLand	37,786	43,009
Deltona	93,701	98,739
Edgewater	23,111	23,636
Holly Hill	12,970	13,075
Lake Helen	2,843	2,964
New Smyrna Beach	30,210	32,655
Oak Hill	2,011	2,128
Orange City	12,631	14,928
Ormond Beach	43,070	44,277
Pierson	1,540	1,558
Ponce Inlet	3,365	3,450
Port Orange	62,619	65,966
South Daytona	12,852	13,781
Unincorporated	115,867	119,303

Section 3: Figure 2: Population of Cities and Unincorporated Areas in Volusia County

Source: U.S. Census Bureau (2020)

According to the 2022 U.S. Census American Community Survey, the median age for the County was 46.6 years. This is higher than the Florida median age of 42.7 years of age. It is estimated that 25.4 percent of the County's population is made up of persons that are 65 years old and over, which is higher than the State figure of 21.6 percent.

The racial mix in Volusia County is predominately white, but has other populations. White persons make up 70.4 percent of the County's population. Black or African American persons accounted for 10.1 percent of the Volusia County population, less than the state percentage of 15.0 percent. Asians comprised 2.0 percent of the population compared to the state's 2.9 percent. People of two or more races comprise 7.6 percent of the population in the County.

According to the Census American Community Survey, in 2022 there were 2.7 people per household. There were 2.32 people per household according to the 2010 U.S. Census.

Section 3: Table 2: Average Number of Persons Per Household

JURISDICTION	AVERAGE NUMBER OF PERSONS PER HOUSEHOLD
Daytona Beach	2.7
Daytona Beach Shores	2.2
DeBary	2.7
DeLand	2.9
Deltona	3.2
Edgewater	2.6
Holly Hill	2.5
Lake Helen	2.5

3.3 HOUSING, INFRASTRUCTURE, AND LAND USE

3.3.1 Housing

According to the Census Bureau's 2022 American Community Survey, there are 273,835 housing units in Volusia County. Of these structures, 68.8 percent are single-unit and 22.7 percent are multi-unit. The remaining 8.5 percent are mobile homes or other types of housing. The median value of owner-occupied housing units was $251,400, compared to the $178,700 state average and the $193,500 national average.[4]

3.3.2 Infrastructure

Infrastructure is categorized in this Plan as Transportation and Utilities, as these elements are vital in a disaster event, both for evacuation and for response and recovery efforts. Volusia County is endowed with multi-modes of transportation and has several utility providers.

Transportation

Volusia County has several transportation options whether traveling by automobile, rail, or air. There are two federal interstates which run through the County: Interstate 95 runs north to south along the coast, and Interstate 4 runs northeast, connecting the County to Orlando, and merging with I-95 near Daytona Beach. There are also four federal highways (U.S. 1, U.S. 17, U.S. 40 and U.S. 92). There are also four major railway transportation providers (Amtrak, CSX, Florida East Coast Railway, and SunRail), and a number of regional airports. The major area airport is Daytona Beach International Airport. In addition, Port Canaveral, a deep-water port, and one of the busiest cruise ports in the world, is located about 70 miles south of Volusia County in Brevard County.

Utilities

Florida Power and Light, Duke Energy, City of New Smyrna Beach Utilities Commission, and Clay Electric Cooperative serve the electricity needs in Volusia County. The natural gas suppliers are Florida Public Utilities and TECO People's Gas. Water and sewer services are provided by a number of different sources including Volusia County Utilities, North Peninsula Utilities Corporation, and municipal governments.

3.3.3 Land Use

Unincorporated Area	1735	333	41	6305	40339

Source: Volusia County Property Appraiser, ECFRPC

3.4 EMPLOYMENT AND INDUSTRY

Volusia County began as a prosperous steamboat landing town in the early 1800s. Today, employment is based largely in the public sector. According to the 2022 American Community Survey, the civilian labor force in Volusia County is approximately 255,301. The top employers are Volusia County Schools, and the local hospital systems.

From an industry perspective, the main economic sources for the county are educational services, and health care and social assistance (21.7%); Retail trade (13.6%); Professional, scientific, and management, and administrative and waste management services (12.4%); and Arts, entertainment, and recreation, and accommodation and food services (11.5%).[5]

In 2022, the estimated median household income for Volusia County was $64,601, less than the State at $72,200 and U.S. medians of $80,610.[6]

3.5 DEVELOPMENT TRENDS

Volusia County experienced substantial growth between 2000 and 2005 followed by a sharp decline in growth between 2009 and 2012, as indicated by U.S. Census residential building permit data. Growth has generally rebounded since 2013.

Section 3: Table 4: Annual Residential Building Permit Data, Volusia County

YEAR	TOTAL RESIDENTIAL UNITS	YEAR OVER YEAR CHANGE
2000	3,147	---
2001	5,112	+ 1,965
2002	4,171	-941
2003	5,112	+ 941
2004	4,920	- 192
2005	5,186	+ 266
2006	2,961	- 2,225
2007	1,577	- 1,384
2008	1,053	- 524
2009	600	- 453
2010	653	+ 53
2011	539	- 114
2012	760	+ 221
2013	1,307	+ 547
2014	1,205	- 102
2015	987	- 218
2016	1,077	+ 90
2017	1,496	+ 419
2018	1,598	+ 102
2019	1,928	+ 105
2020	2,035	+ 107
2021	2,759	+724

SECTION 4 – HAZARD IDENTIFICATION

This section is the first of three sections that assess the risk of Volusia County and the participating jurisdictions to hazards. This section identifies a wide range of hazards that could potentially impact the County. Section 5: ***Hazard Profiles*** provides more detailed information about how the identified hazards specifically impact the County and participating jurisdictions. Section 6: ***Vulnerability Assessment*** provides detailed analyses results that indicate the number of damages that could occur in the County because of the identified hazards. Together, these sections serve to identify, analyze and assess the overall risk posed to Volusia County and the participating jurisdictions from hazards. The risk assessment also attempts to define any hazard risks that may uniquely or exclusively affect specific areas of Volusia County or its participating jurisdictions and partners.

Volusia County and the participating jurisdictions are vulnerable to a wide range of natural hazards[1] that threaten life and property. Upon a review of the full range of natural hazards suggested under FEMA planning guidance, Volusia County and the participating jurisdictions have identified several hazards that are to be addressed in this Multi-Jurisdictional LMS. These hazards were identified through an extensive process that utilized input from the Local Mitigation Strategy Working Group (LMS Working Group) members, research of past disaster declarations in the County, a review of previous hazard mitigation plans in the County, and a review of the current Florida Hazard Mitigation Plan. Readily available online information from reputable sources such as federal and state agencies was also evaluated to supplement information from these key sources.

Section 4: Table 1 lists the full range of natural hazards initially identified for consideration in the Plan and provides a brief description for each. This table includes seventeen (17) individual hazards categorized by the following types: natural, technological, and manmade. Some of these hazards are interrelated or cascading (i.e., hurricanes can cause flooding, storm surge and tornadoes). It should also be noted that some hazards, such as extreme temperature may impact a large area yet cause little damage, while other hazards, such as tornadoes, may impact a small area yet cause extensive damage.

Section 4: Table 1: Descriptions of the Full Range of Initially Identified Hazards

HAZARD	DESCRIPTION
Natural	
Agriculture	Agriculture includes Infestations, Invasive Species, and Diseases Infestation or disease in agriculture is when biological entities such as insects, rodents, bacteria or viruses significantly increase in a given area, affecting crops to the point where human and animal health is threatened, valuable crops may be damaged or significant environmental resources may be lost.
Coastal Erosion	Landward displacement of a shoreline caused by the forces of waves and currents define coastal erosion. Coastal erosion is measured as the rate of change in the

[1] FEMA's current regulations and interim guidance under the Disaster Mitigation Act of 2000 (DMA 2000) require, at a minimum, an evaluation of a full range of natural hazards. An evaluation of human-caused hazards (e.g., technological hazards, terrorism, etc.) is encouraged, though not required, for plan approval. Volusia County has focused solely on natural hazards at this time. Incorporation of human-caused hazards may be evaluated in future versions of the plan, as it is a "living document" which will be monitored, evaluated and updated regularly.

HAZARD	DESCRIPTION
	position or horizontal displacement of a shoreline over a period. It is generally associated with episodic events such as hurricanes and tropical storms, nor'easters, storm surges and coastal flooding but may also be caused by human activities that alter sediment transport. Construction of shoreline protection structures can mitigate the hazard but may also exacerbate it under some circumstances.
Drought	A drought is a prolonged period of less than normal precipitation such that the lack of water causes a serious hydrologic imbalance. Common effects of drought include crop failure, water supply shortages, and fish and wildlife mortality. High temperatures, intense winds, and low humidity can worsen drought conditions and make areas more susceptible to wildfire. Human demands and actions can hasten or mitigate drought-related impacts on local communities.
Extreme Temperature	Extreme temperature generally refers to temperatures that are unusually high or low compared to typical weather conditions for a specific location and time of year. However, defining what constitutes "extreme" can be challenging due to context, location, history, and duration. Volusia County defines extreme temperature in two ways. • Extreme cold may include snow, sleet, freezing rain, or a mix of these wintry forms of precipitation. Ice storms occur when moisture falls and freezes immediately upon impact on trees, power lines, communication towers, structures, roads and other hard surfaces. Winter storms and ice storms can down trees, cause widespread power outages, damage property, and cause fatalities and injuries to human life. • Extreme heat is defined as temperatures that hover 9 degrees or more above the average high temperature of 90°F for the region and last for 3 or more consecutive days. Humid or muggy conditions, which add to the discomfort of high temperatures, occur when a "dome" of high atmospheric pressure traps hazy, damp air near the ground.
Flood	The accumulation of water within a water body results in the overflow of excess water onto adjacent lands, usually floodplains, causing flood or rising waters in various ways. Floods have three categories: riverine, coastal, or shallow flooding (which includes sheet flow, ponding, and urban drainage). A floodplain is the land adjoining the channel of a river, stream ocean, lake or other watercourse or water body that is susceptible to flooding.
Public Health Emergencies	Public health emergencies consist of disease and pandemic outbreaks. They may be accidental, natural, or intentional. Under section 319 of the Public Health Service Act (42 U.S.C § 319), the Secretary of the Department of Health and Human Services (HSS) can declare a public health emergency. This can include medical surges (often from mass casualty events) that require hospitals to act beyond normal capacity.
Rising Coastal Waters	Rising coastal waters is a hazard that refers to unprecedented water levels along the coast, usually leading to inland affects. This hazard encompasses: • Storm surge is a large dome of water often 50 to 100 miles wide and rising anywhere from four to five feet in a Category 1 hurricane up to more than 30 feet in a Category 5 storm. Storm surge heights and associated waves are also dependent upon the shape of the offshore continental shelf (narrow or wide) and the depth of the ocean bottom (bathymetry). A narrow shelf, or one that drops steeply from the shoreline and subsequently produces deep

HAZARD	DESCRIPTION
	water close to the shoreline, tends to produce a lower surge but higher and more powerful storm waves. Storm surge arrives ahead of a storm's actual landfall and the more intense the hurricane is, the sooner the surge arrives. Storm surge can be devastating to coastal regions, causing severe beach erosion and property damage along the immediate coast. • Sea level rise is caused by warming of the earth's climate, the associated thermal expansion of water molecules, and generally impacts coastal, lagoon-adjacent and river-adjacent areas that are hydrologically connected to the ocean. Sea level rise has been observed over the past few decades in Central Florida, including Volusia County. Projections by NOAA and the U.S. Army Corps of Engineers depict varying levels of sea level rise by the year 2100. As part of this plan, sea level rise and sea level rise-plus storm surge are analyzed. • Tsunamis are a wave or series of waves mostly caused by an earthquake or by a large undersea landslide, volcanic eruption or other undersea disturbance. From the area of disturbance, tsunami waves will travel outward in all directions and can originate hundreds or even thousands of miles away from affected coastal areas.
Severe Weather	Severe weather refers to any significant or intense weather conditions that can cause damage, disruption, or pose a threat to safety. It encompasses a range of phenomena that are more extreme than typical weather conditions. Volusia County experiences severe weather in a variety of ways. • A hail event produces hailstones that fall to the ground. Hail forms when updrafts in thunderstorms carry raindrops into parts of the atmosphere where the temperatures are below freezing. • Lightning is a discharge of electrical energy resulting from the buildup of positive and negative charges within a thunderstorm, creating a "bolt" when the buildup of charges becomes strong enough. This flash of light usually occurs within the clouds or between the clouds and the ground. A bolt of lightning can reach temperatures approaching 50,000 degrees Fahrenheit. Lightning rapidly heats the sky as it flashes, but the surrounding air cools following the bolt. This rapid heating and cooling of the surrounding air causes thunder. On average, 73 people are killed each year by lightning strikes in the United States. • Thunderstorms are caused by air masses of varying temperatures meeting in the atmosphere. Rapidly rising warm and moist air fuels the formation of thunderstorms. They can move through an area very quickly or linger for several hours.
Tornado	A tornado is a violently rotating column of air that has contact with the ground and is often visible as a funnel cloud. Its vortex rotates cyclonically with wind speeds ranging from as low as 40 mph to as high as 300 mph. Tornadoes are most often generated by thunderstorm activity when cool, dry air intersects and overrides a layer of warm, moist air forcing the warm air to rise rapidly. The destruction caused by tornadoes ranges from light to catastrophic depending on the intensity, size, and duration of the storm.
Tropical Cyclones	Hurricanes and tropical storms are classified as tropical cyclones and defined as any closed circulation developing around a low-pressure center in which the winds rotate

HAZARD	DESCRIPTION
	counterclockwise in the Northern Hemisphere (or clockwise in the Southern Hemisphere) and with a diameter averaging 10 to 30 miles across. When maximum sustained winds reach or exceed 39 miles per hour, the system is designated a tropical storm, given a name, and is closely monitored by the National Hurricane Center. When sustained winds reach or exceed 74 miles per hour the storm is deemed a hurricane. The primary damaging forces associated with these storms are high-level sustained winds, heavy precipitation and tornadoes. Coastal areas are also vulnerable to the additional forces of storm surge, wind-driven waves and tidal flooding which can be more destructive than cyclone wind. Most hurricanes and tropical storms form in the Atlantic Ocean, Caribbean Sea and Gulf of Mexico during the official Atlantic hurricane season, which extends from June through November.
Wildland Fire	An uncontrolled fire burning in an area of vegetative fuels such as grasslands, brush, or woodlands. Heavier fuels with high continuity, steep slopes, high temperatures, low humidity, low rainfall, and high winds all work to increase risk for people and property located within wildfire hazard areas or along the urban/wildland interface. Wildfires are part of the natural management of forest ecosystems, but most are caused by human factors. Over 80 percent of forest fires started by negligent human behavior such as smoking in wooded areas or improperly extinguishing campfires. The second most common cause for wildfire is lightning.
Manmade	
Civil Disturbance	Events of civil disturbances can be classified as armed violence, riots, protests, and threats against the military or the government. The proper planning and prevention methods aid in the mitigation of such events. For threats of civil disturbance utilizing armed violence, it is likely that a joint jurisdictional management of operations will take effect, coordinated at the county level between the Sheriff's Office, Florida Department of Law Enforcement (FDLE), and the Office of Emergency Management. Civil disturbances can occur due to socio-economic, political or other reasons. These types of events typically occur in public places.
Mass Migration	Mass-migration occurs when persons of one geographic area move in large numbers to another geographic location.
Terrorism	Terrorism includes any attempt to attack, cripple or damage public goods, public infrastructure or citizens on a large scale. Defined in the Code of Federal Regulations as "the unlawful use of force and violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives" (28 C.F.R. Section 0.85). The various forms of terrorism Volusia County may experience come in four forms. • Agro-Terrorism: The deliberate introduction of disease-causing organisms and chemicals into the food supply through agriculture. It could impact the public if crops or agricultural foods contaminated with disease-causing organisms were to enter the food chain. • Cyber Terrorism: Unlawful attacks and threats of attack against computers, networks, and the information stored therein; and used to intimidate or coerce a government or its people in furtherance of political or social objectives.

HAZARD	DESCRIPTION
	• Domestic Terrorism: Violent, criminal acts committed by individuals and/or groups to further ideological goals stemming from domestic influences, such as those of a political, religious, social, racial, or environmental nature. • International Terrorism: Violent, criminal acts committed by individuals and/or groups who are inspired by, or associated with, designated foreign terrorist organizations or nations (state-sponsored).
Technological	
Coastal Oil Spill	An oil spill is the release of liquid petroleum into the environment, typically the ocean, rivers, or lakes. These spills can result from various incidents, including accidents involving oil tankers, offshore drilling rigs, pipelines, storage facilities, or during the extraction process. Oil spills can have severe environmental, economic, and health impacts. While oil spills would primarily affect the Gulf coast of Florida, oil spills can negatively affect tourism and ecological conditions on the Atlantic coast of Florida.
Critical Infrastructure Failure	Public utilities provide critical services such as drinking water, stormwater and wastewater collection/treatment, electric power, transportation, supply chains systems that support food and fuel, and communications. These services contribute to the economic well-being and public health/safety of the communities they serve. A utility service disruption can be a cascading emergency from an event such as a cyber-terrorism or a hurricane. Widespread power outages can occur without warning. Generally warning times will be short in the case of technological failure, such as a fire at a sub-station, traffic accident, human error, or terrorist attack. In cases where a power failure is caused by natural hazards, greater warning time is possible. For example, high wind events such as tornados and hurricanes often cause widespread power failure and are often forecasted before they affect a community so that residents can prepare.
HazMat / Industrial Incident	Hazardous material (HazMat) includes events when liquid, solid or gaseous chemicals that are harmful or fatal to humans or ecological infrastructure disperse into the atmosphere.

SPECIAL NOTE: The plan omits hazards that may be recognized to affect the jurisdiction(s) in the planning area. Rationale is that while some hazards may pose a risk to Volusia County, mitigation investments would not be deemed appropriate or feasible due to the impending need to mitigate more frequent disasters. Hazards, such as sinkholes and earthquakes, were omitted due to low probability, limited recorded impacts, and low economic impact. It is acknowledged that mitigation efforts can duplicate hazard mitigation benefits.

SECTION 5 – HAZARD PROFILES

44 CFR Requirement

44 CFR Part 201.6(c)(2)(i):
The risk assessment shall include a description of the type, location and extent of all natural hazards that can affect the jurisdiction. The plan shall include information on previous occurrences of hazard events and on the probability of future hazard events.

5.1 OVERVIEW

This section includes detailed hazard profiles for each of the hazards identified in the previous section as significant enough for further evaluation through the risk assessment in Volusia County. This includes the following hazards:

- **Natural**
  - Agriculture
  - Coastal Erosion
  - Drought
  - Extreme Temperature
  - Flood
  - Public Health Emergencies
  - Rising Coastal Water
  - Severe Weather
  - Tornado
  - Tropical Cyclones
  - Wildland Fire
- **Manmade**
  - Civil Disturbance
  - Mass Migration
  - Terrorism
- **Technological**
  - Coastal Oil Spill
  - Critical Infrastructure Failure
  - HazMat/ Industrial Incident

Each hazard profile described in this section includes a general description of the hazard, its location and extent, notable historical occurrences, the probability of future occurrences, potential impacts, and overall vulnerability. It also includes specific items noted by members of the Local Mitigation Strategy Working Group (LMS Working Group). The probability of future occurrence is expressed as “high” (expected to occur at least every five years), “moderate” (expected to occur at least every 25 years), “low”

(expected to occur at least every 100 years, and "very low" (is possible to occur, despite their being no recorded occurrences).

Major Disaster Declarations

In 1988, the Robert T. Stafford Disaster Relief and Emergency Assistance Act was enacted to support state and local governments when disasters overwhelm local resources. This law, as amended, establishes a process for requesting and obtaining a Presidential Disaster Declaration, defines the type and scope of assistance available from the federal government, and sets the conditions for obtaining that assistance. The Federal Emergency Management Agency (FEMA), now part of the Emergency Preparedness and Response Directorate of the Department of Homeland Security, is tasked with coordinating the response. Since 1965, Volusia County has received numerous presidential disaster declarations for such hazards as hurricanes, tornados, floods and severe freezes (**Section 5: Table 1**).

Section 5: Table 1: Presidential Disaster Declarations

EVENT	DECLARATION DATE	DECLARATION NUMBER
Severe Storms, Tornadoes, and Flooding	05/15/79	586
Tornadoes, Flooding, High Winds & Tides, Freezing	03/13/93	982
Tropical Storm Gordon, Tornadoes, Flooding	11/28/94	1043
Tropical Storm Josephine	10/15/96	1141
Severe Storms, High Winds, Tornadoes, Flooding	02/25/98	1195
Extreme Fire Hazard	07/03/98	1223
Hurricane Floyd	09/22/99	1300
Hurricane Irene	10/28/99	1306
Severe Freeze	02/06/01	159
Hurricane Charlie/Bonnie	08/13/04	1539
Hurricane Frances	09/04/04	1545
Hurricane Ivan	09/15/04	1551
Hurricane Jeanne	09/26/04	1561
Hurricane Katrina Evacuation	09/05/05	3220
Severe Storms, Tornadoes	02/03/07	1679
Severe Storms, Tornadoes, and Flooding	02/08/07	1680
Tropical Storm Fay	08/21/08	3288
Severe Storms, Flooding, Tornadoes, Straight-line Winds	05/27/09	1840
Hurricane Matthew	10/03/16	3377
Hurricane Irma	09/04/17	3385
Hurricane Michael	10/07/18	3405
Hurricane Dorian	08/28/19	3420
Florida Covid-19 Pandemic	03/25/20	4486

Hurricane Sally	09/23/20	4564
Hurricane Ian	09/29/22	4673
Hurricane Nicole	12/13/22	4680
Hurricane Idalia	08/31/23	4734
Hurricane Debby	08/10/24	4806
Hurricane Milton	10/11/2024	4834

Source: Federal Emergency Management Agency

Volusia County Emergency Management has had numerous significant disaster events that resulted in the activation of their Emergency Operations Center. **Section 5 Table 2** lists these events by type, area of impact, EOC activation level, the estimated number of properties that were damaged, and loss estimates.

Section 5: Table 2: Significant Activation Events

Date of Event	Type of Event	Area of Event	EOC Level Activation	Damage Estimate	
				Number of Properties	Dollars
3/13/1993	Windstorm	County-Wide	Level 2 (Part)	1273	16,948,355

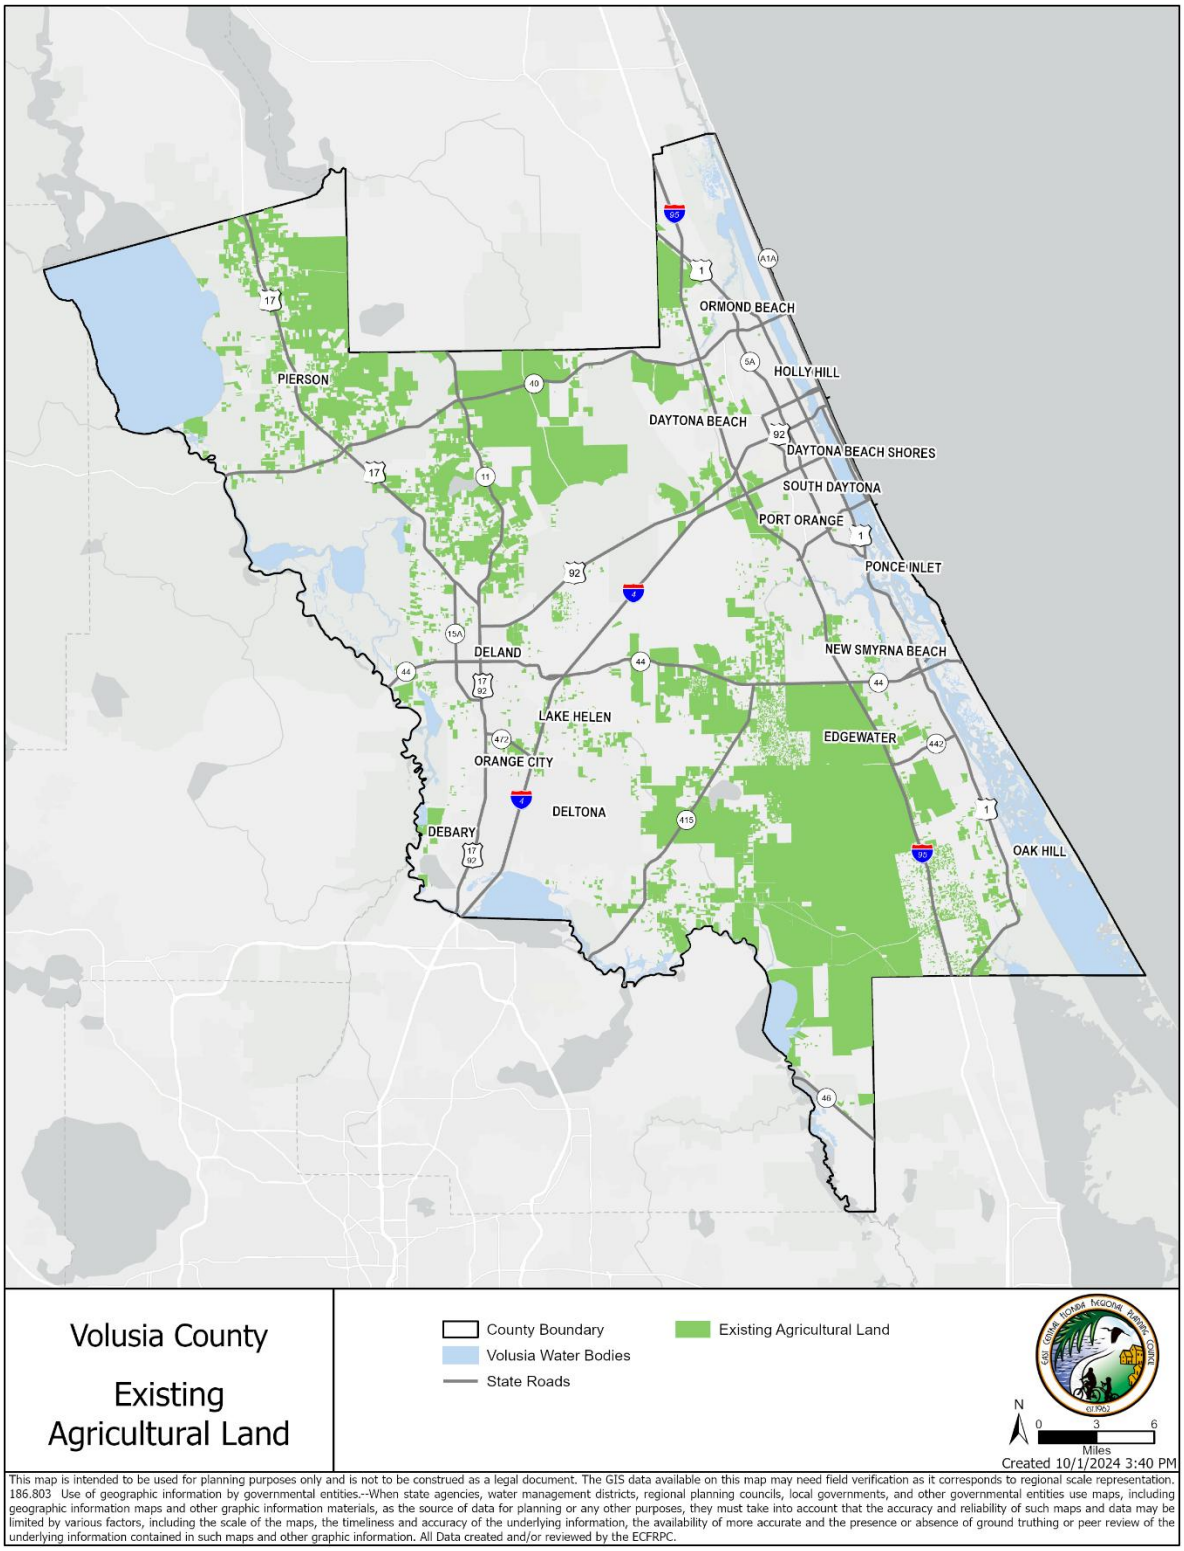
NATURAL HAZARDS

5.2 AGRICULTURE

Background

Agriculture includes Infestations, Invasive Species, and Diseases Infestation or disease in agriculture is when biological entities such as insects, rodents, bacteria or viruses significantly increase in a given area, affecting crops to the point where human and animal health is threatened, valuable crops may be damaged, or significant environmental resources may be lost. Examples of common Volusia infestations are caused by mosquitos, citrus greening, southern pine beetle, Florida Dampwood Termites, rats, or noxious plants like Brazilian Pepper Tree, etc.

Cattle diseases like Mad Cow, Hartwater, and hoof-and-mouth and citrus disease like Greening and Canker are of concern to Volusia farmers. Coordination with the University of Florida IFAS and Volusia County Extension is the first step in mitigation planning for agricultural infestations and disease. A notable source of information on the distribution of invasive plants, insects, animals and diseases in Volusia can be found at the Early Detection and Distribution Mapping system website, http://www.eddmaps.org, known as EDDMapS. The EDDMapS web-based mapping system documents invasive species and disease distribution. The site combines data from other databases and organizations as well as volunteer observations to create a national network of invasive species distribution data that is used by scientists, researchers, land managers, landowners, educators, conservationists, ecologists, farmers, foresters, state and national parks. Florida has ecosystems not found in the other 47 contiguous states, and it also has more non-native species than any state other than Hawaii.



If important natural resources such as mangroves, sea oats, oyster beds, etc. are overrun by invading species, then the county will be more vulnerable to the consequences of all other hazards. With the disappearance of natural barriers, lower impacting hazards will have increasingly stronger impacts on residents, businesses, critical infrastructure and the ability of the County to provide uninterrupted program operations. Faculty members at the University of Florida currently are conducting research and outreach programs to better understand and control these exotic invasive species. Until controls are in place the entire population of Volusia is at risk to the effects of a degrading ecosystem.

Location and Spatial Extent

Agriculture incidents in Volusia County are quite rare and historically have not caused much damage to the community. In 2022, the county had 95,988 acres of farmland. Much of the agricultural land is located in the central western part of Volusia County, including Enterprise and Pierson. The extent encompasses small areas of crops within the county. Since 2022, there has been a 13% decrease in the number of farms that exist within the county. While the direct impacts may be rare, the indirect effects of an incident could be county-wide. From 2020 to 2024, at least 70 acres within the county are infested with non-native species.[1] **Section 5 Figure 1** displays the areas of the county most vulnerable to agricultural incidents based on areas zoned agricultural.

Section 5: Table 3: Farm Overview 2022[2]

	2022	% Change Since 2017
Number of Farms	1,374	-13
Land in Farms (Acres)	95,988	-16
Average Size of Farm (Acres)	70	-4

Historical Occurrences

With its plant-friendly south temperate/subtropical climate, Florida particularly suffers from the introduction and unchecked growth of exotic plants. Almost half (1,180) of the 3,834 plant species found in Florida have arrived here since European occupation. Since plants are the base of the food chain, exotic "takeovers" can jeopardize plant-dependent wildlife and the whole ecosystem. The Florida Exotic Pest Plant Council (FLEPPC) has identified 152 non-native invasive species that are invading and disrupting native plant communities (2011 list). In 2022, that has now increased to 172[3]. EDDMapS notes over 299 separate invasive plants, animal, and insect species found in Volusia County to date. Many of the listed species are distributed throughout the county and are found in natural and disturbed landscapes.

In Florida, at least 60 species of exotic birds have bred in the wild. Despite this fact, the chance of persisting survival of non-indigenous birds is uncertain. Among those species which have survived and thrived as pests are Muscovy ducks, rock doves, European starlings, house sparrows, and monk parakeets. Though troublesome in other respects, some species (such as feral pigs) are important as prey for native predators (Florida panthers) and serve as an attraction for hunters. However, negative impacts from invasive species include habitat destruction, competition with native species, predation, hybridization, disease and parasites.

Florida mammal pests include the Norway rat, roof rat, house mouse and feral pig. Siting of invasive fish in Volusia include Lionfish, and Nile Tilapia. Annually, insect pests cause an estimated $1 billion in damages in Florida, and many of the worst pests are non-indigenous. According to entomologist Dr. John Capinera, 1,218 invading insect species become established in Florida annually. These non-natives arrive by flying, walking, swimming, rafting and by stowing away on cargo (often on infested plants commercially imported).

In 1997 and 1998, Florida's agricultural community was forced to focus time and resources on communicating to the general public about the Mediterranean fruit fly (Medfly) and the control methods used to eradicate the pest when the fly threatened the state's $6.8 million agriculture industry. The Florida Agricultural Extension is a partnership between the University of Florida Institute of Food and Agricultural Sciences (IFAS), the United States Department of Agriculture (USDA) and county governments in Florida to provide scientific knowledge and expertise to the public through educational programs. Volusia County has cattle farms, citrus orchards, ferneries, and other agricultural enterprises that are vulnerable to infestations and disease. Information on these infestations and diseases is available at http://www.volusia.org/services/community-services/extension/.

Probability of Future Occurrences

Agricultural threats will continue to pose a threat to Volusia County for years to come, but the probability remains low for catastrophic farming impacts. Agriculture does remain a threat because although the number of farms has decreased since 2017, the market value of products sold increased by 47% and farm related income by 116%.

5.3 COASTAL EROSION

Background

Coastal erosion is a hazard defined as the wearing away of land and loss of beach, shoreline, or dune material and is measured as the rate of change in the position or horizontal (landward) displacement of a shoreline over a period of time. Short-term erosion typically results from episodic natural events such as hurricanes and storm surge, windstorms and flooding hazards, but may be exacerbated by human activities such as boat wakes, removal of dune and vegetative buffers, shoreline hardening and dredging. Long-term erosion is a function of multi-year impacts such as wave action, sea level rise, sediment loss, subsidence and climate change. Climatic trends can change a beach from naturally accreting to eroding due to increased episodic erosion events caused by waves from an above-average number of storms and high tides, or the long-term effects of fluctuations in sea level.

Natural recovery from erosion can take years, often decades. If a beach or dune system does not recover quickly enough naturally, coastal and upland property may be exposed to further damage in subsequent coastal erosion and flooding events. Human actions to supplement natural coastal recovery, such as beach nourishment, dune stabilization and shoreline protection structures (e.g., sea walls, groins, jetties, etc.) can mitigate the hazard of coastal erosion, but may also exacerbate it under some circumstances.

Death and injury are not typically associated with coastal erosion; however, it can cause the destruction of buildings and infrastructure and represents a major threat to the local economies of coastal communities that rely on the financial benefits of recreational beaches.

Location and Spatial Extent

All coastal areas in Volusia County are susceptible to coastal erosion. The jurisdictions most vulnerable are displayed in **Section 5 Figure 2**. Using Florida Department of Environment (FDEP) field data beginning in 1972, it is clear that Volusia County shorelines are moving due to erosion, accretion, and beach nourishment projects[4]. Further, in July 2023, FDEP released a *Critically Eroded Beaches in Florida* report that identifies four critically eroded beach areas (27.2miles), two non-critically eroded beach area (2 miles) and one critically eroded inlet shoreline area (0.6 mile) in Volusia County.

A 16.6-mile segment of beach (R51 – R143) along Ormond Beach, Daytona Beach, Daytona Beach Shores, Wilbur By The Sea and the Town of Ponce Inlet is critically eroded, threatening development and recreational interests, as well as sea turtle nesting areas where the dry sand beach has become very narrow. Most of this segment is armored with seawalls.

Due to the erosional impacts of Hurricane Ian and Nicole in 2022, there is a 0.9-mile segment of a noncritically eroded beach within the Town of Ponce Inlet between R143 to R148.2 and no structures are threatened. The north shoreline (0.6-mile) of Ponce de Leon Inlet is critically eroded and threatens recreational interests at the county park. The 8.4 miles of beaches (R160.8 – R207.8) south of Ponce de Leon Inlet within New Smyrna Beach and Bethune Beach are critically eroded. Private development and recreational interests, as well as sea turtle nesting habitats, are threatened. Much of New Smyrna Beach

[4] Foster, Emmet and Jenny Cheng. Shoreline Beach Change Estimates, Volusia County, 2000. Office of Beaches and Coastal Systems, Florida Department of Environmental Protection; Beaches and Shores Research Center, Florida State University.

is armored with seawalls, with Bethune Beach protected by a boulder rock revetment. The New Smyrna Beach area has received inlet sand transfer material from dredging within Ponce de Leon Inlet and additional material from dredging the Atlantic Intracoastal Waterway. A 1.1-mile segment of the Canaveral National Seashore (R207.8 – R214) south of Bethune Beach is also non-critically eroded without any threatened interests at this time.[5]

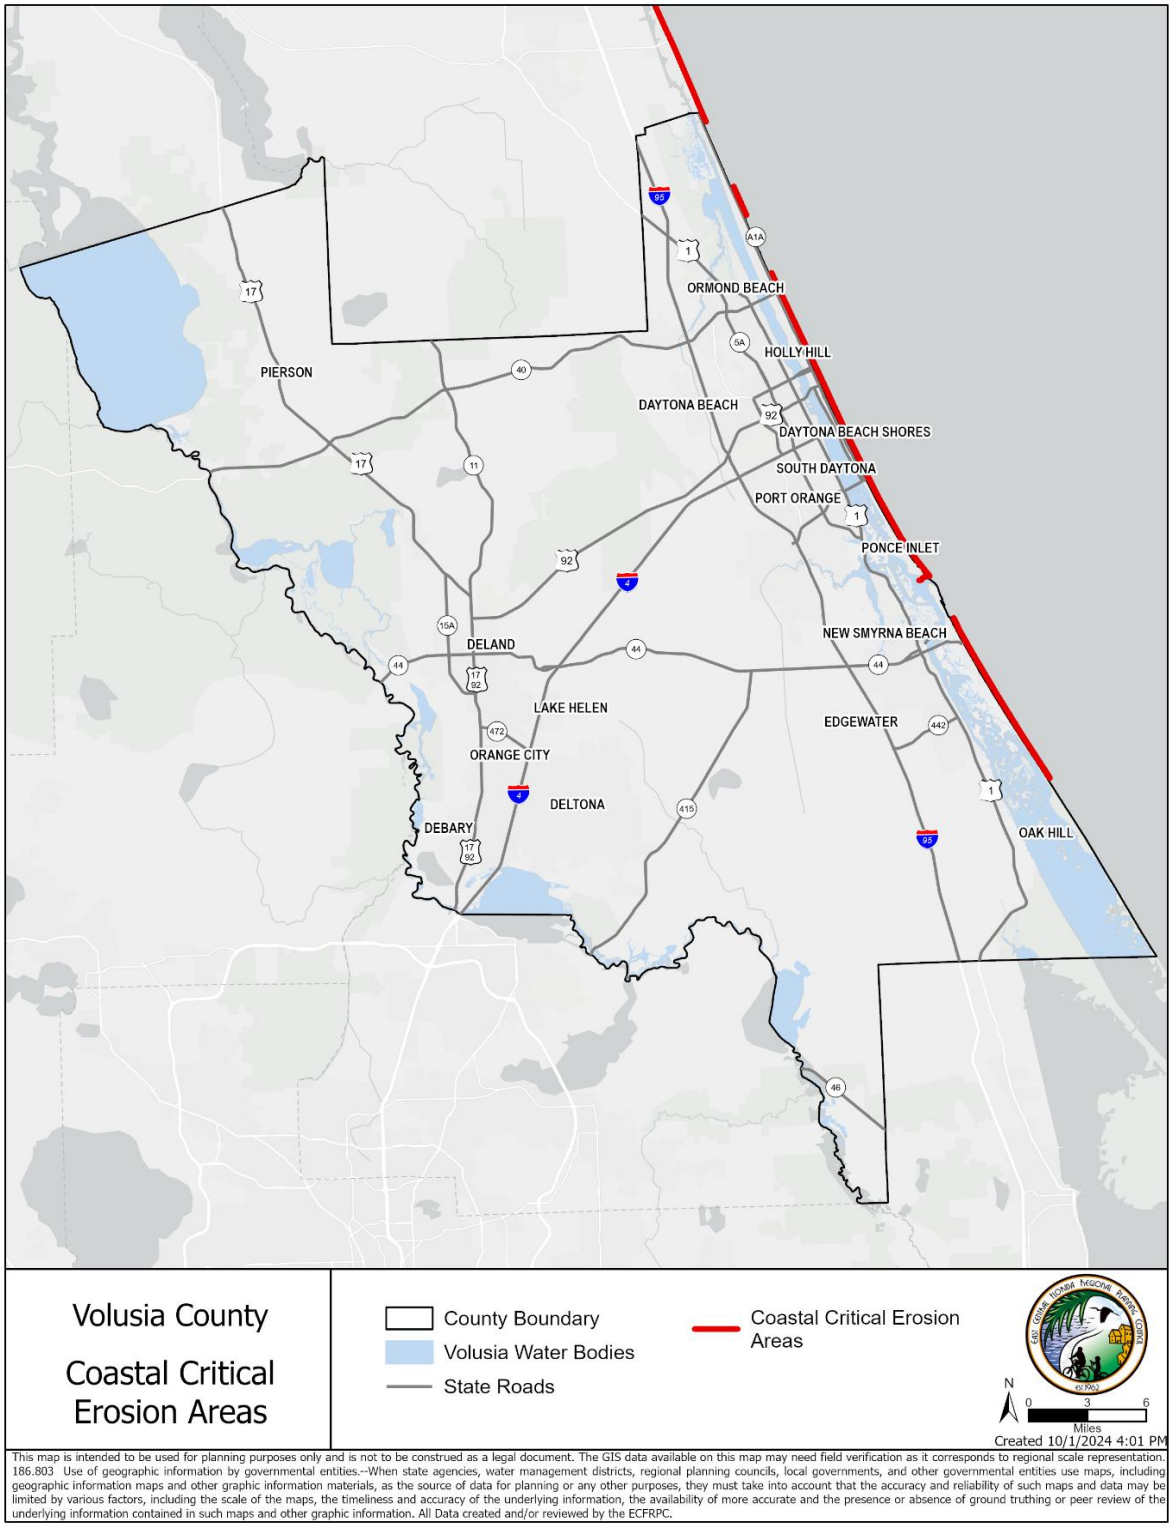
The beach ridge in Volusia County ranges from 300 – 3,000 feet in width. A majority of the county, ranging approximately from Ormond Beach to Bethune Beach, has fine-grained quartz sand. Sand in areas north and south of this area consist of a shell-quartz mixture and have steeper slopes than the central county. The southernmost mile of shoreline in Volusia County makes up part of the Canaveral National Seashore Park, while the northernmost area is part of the North Peninsula State Recreation Area.

Historical Occurrences

Erosion events typically are part of other hazard events (e.g., storm surge and hurricanes) and the monetary damage for the erosion alone is unknown.

Section 5: Table 4: Historical Coastal Erosion Impacts

LOCATION	DATE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Volusia County	9/14/1999	0/0	$56,444,488 (2009 dollars)	Hurricane Floyd caused significant beach erosion in Volusia County. Of the property damage estimates, over $13 million was attributed to beach erosion.
St. Lucie and Volusia Counties	10/14/1999	0/0	$68,539,735 (2009 dollars)	Hurricane Irene caused beach loss of four to ten feet in the affected areas with damage in the millions.
Brevard and Volusia Counties	9/04/2001	0/0	$6,333,850 (2009 dollars)	Storm tide from a tropical storm reached two feet above normal, causing significant beach erosion.
St. Lucie and Volusia Counties	9/25/2004	0/0	$440,408,221 (2009 dollars)	Severe beach erosion was reported from Hurricane Jeanne, a category 3 storm.
Volusia County	8/21/2008	0/0	Unknown	New Smyrna Beach experienced a loss of 50 feet of new sand due to wind gust of over 45 MPH from Tropical Storm Fay. Even Orange and Seminole counties experienced riverine erosion along the St. Johns River.
St. Johns, Flagler, Volusia and Brevard Counties	10/6/16	0/0	$15.8 million	Under executive authority, Governor Rick Scott announced on January 27, 2017, that emergency funding of $15.8 million would be made available for emergency beach and dune repairs in response to the damage caused by Hurricane Matthew. The emergency funding was intended for



[5] Critically Eroded Beaches in Florida Office of Resilience and Coastal Protection Florida Department of Environmental Protection July 2023

LOCATION	DATE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
				immediate use to address critically eroded beaches where there was an imminent threat to beachfront structures, such as roadways, homes and businesses.
Volusia County	September-November 2022	0/0	Unknown	Several structures either partially or fully collapsed into the ocean throughout Volusia County. Elsewhere, significant damage was noted to dunes, beach access crossovers, seawalls, piers, and boardwalks, many of which were already in a weakened state due to Hurricane Ian. Numerous structures, including homes, condominiums, and hotels were deemed unsafe and required additional analysis by engineers as well as county and state officials. Elevated water levels along the intracoastal waters resulted in damage to numerous boat docks and marinas throughout the county.

Source: National Climatic Data Center

The severity of coastal erosion is typically measured through a quantitative assessment of annual shoreline change for a given beach cross-section of profile (feet or meters per year) over a long period of time. Erosion rates vary as a function of shoreline type and are influenced primarily by episodic events but can be used in land use and hazard management to define areas of critical concern.

Section 5: Figure 2: Critical Erosion Areas in Volusia County

Source: Florida Department of Environmental Protection, Division of Beaches and Coastal Systems, 2024

Probability of Future Occurrences

The probability of the continuing occurrence of coastal erosion in the coastal areas of Volusia County is high. Florida's Bureau of Beaches and Coastal Systems estimates an average of a one-foot loss annually for Volusia County in stable or accretionary areas. The area between Ormond Beach and Daytona Beach Shores are eroding at a rate between zero and 0.5 feet annually, according to a 2000 study. Northern areas of the county, including the North Peninsula State Recreation Area, lose between 0.5 and 1.5 feet annually. Areas south of Ormond Beach to Daytona Beach Shores stretch have lower expected erosion rates due to extensive armoring (e.g., beach walls and revetments). However, natural erosion is occurring southward from South of Ponce de Leon Inlet. Loss rates are as high as 1.5 feet per year and decrease heading in a southerly direction. The damaging impacts of coastal erosion are lessened through continuous (and costly) beach nourishment and structural shoreline protection measures. However, it is likely that the impacts of coastal erosion will increase in severity due to future episodic storm events.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered.

5.4 DROUGHT

Background

Drought is a normal part of virtually all climatic regions, including areas with high and low average rainfall. Drought is the consequence of a natural reduction in the amount of precipitation expected over an extended period of time, usually a season or more in length. High temperatures, high winds, and low humidity can exacerbate drought conditions. In addition, human actions and demands for water resources can hasten drought-related impacts. Droughts are typically classified into one of four types[6]:

- **Meteorological:** The degree of dryness or departure of actual precipitation from an expected average or normal amount based on monthly, seasonal, or annual time scales.
- **Hydrologic:** The effects of precipitation shortfalls on stream flows and reservoir, lake, and groundwater levels.
- **Agricultural:** Soil moisture deficiencies relative to water demands of plant life, usually crops.
- **Socioeconomic:** The effect of demands for water exceeding the supply as a result of a weather-related supply shortfall.

Droughts are slow-onset hazards, but over time can have very damaging effects to crops, municipal water supplies, recreational uses, and wildlife. If droughts extend over a number of years, the direct and indirect economic impact can be significant. The National Weather Service alerts are displayed in **Section 5 Figure 2**.

Location and Spatial Extent

The Palmer Drought Severity Index (PDSI) is based on observed drought conditions and range from -0.5 (incipient dry spell) to -4.0 (extreme drought). Evident in **Section 5: Figure 3,** the Palmer Drought Severity Index Summary Map for the United States, droughts affect most areas of the United States but are less severe in the Eastern United States.

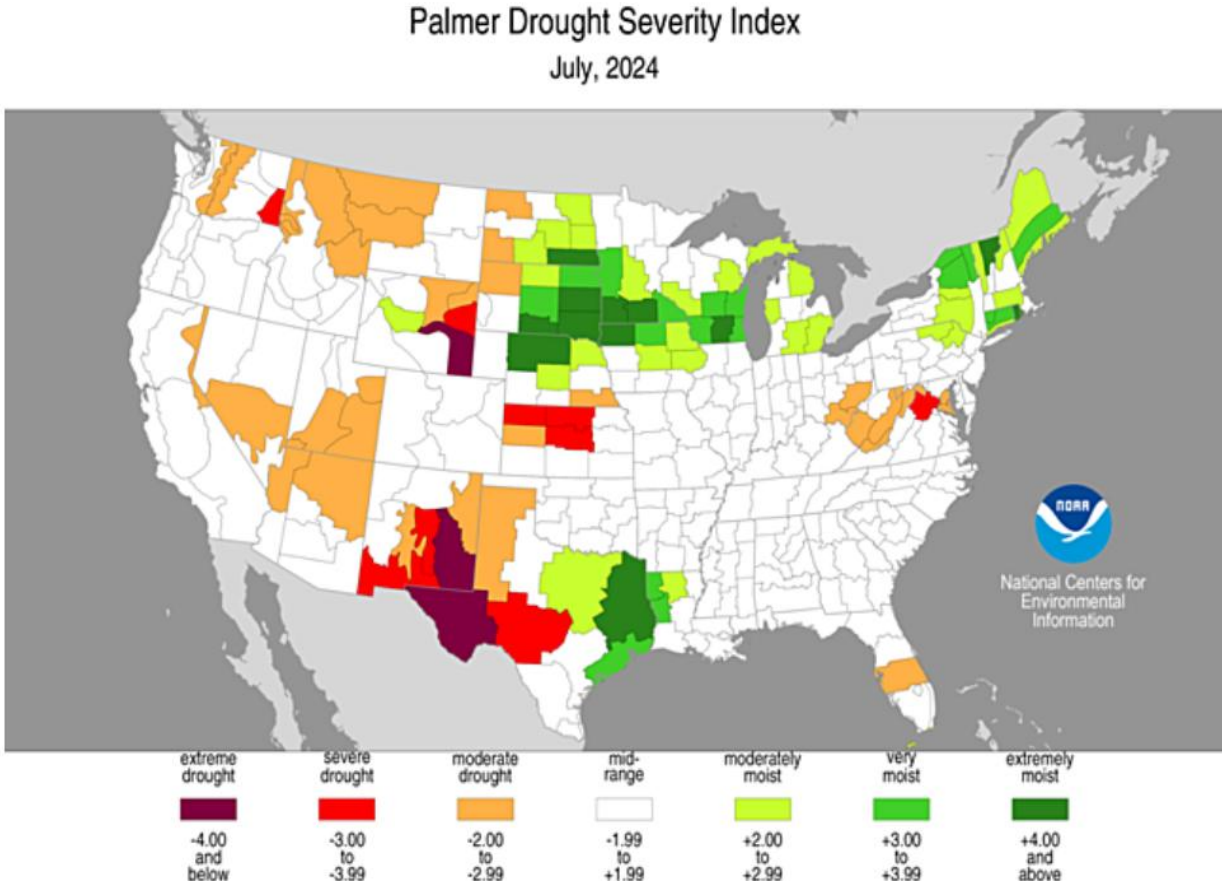
Drought typically covers a large area and cannot be confined to any geographic or political boundaries; thus, Volusia County and all its jurisdictions are equally susceptible. According to the Palmer Drought Severity Index, Florida has a relatively low risk for drought hazard. However, local areas may experience much more severe and/or frequent drought events than what is represented on the Palmer Drought Severity Index map. Further, it is assumed that Volusia County would be uniformly exposed to drought, making the spatial extent potentially widespread. During long periods of drought, disruption in the water cycle can have potentially damaging effects, including substantial crop loss in the northwestern portion of the county. Periods of drought can exacerbate the ignition of wildfires that can damage the natural and built environment, as has occurred before in Volusia County.

As of October 2019, the Keech Byran Drought Index (KBDI) for Volusia is in the less than 300 to 301-400 range, a relatively low score on a scale that measures up to from 0 (wet) to 800 (arid conditions). The score rose to as high as 582 in April 2013.

One of the most severe cases of drought in Florida occurred from October 2010 until June of 2012 in which a major portion of the state displayed D3 (Drought Extreme) conditions. During this extensive period, the two-month period of April and May of 2012, showed the highest level of drought concern with portions of the state under a D-4 Drought Exceptional condition (The National Drought Mitigation Center, 2014).

[6] Multi-Hazard Identification and Risk Assessment: A Cornerstone of the National Mitigation Strategy, FEMA

Thus, Volusia County can experience the full array of drought conditions, from D0 to D4. NOAA describes D4 events as having "extensive and widespread crop and pasture losses, fire risk, shortages of water in reservoirs, stream and wells that yield water emergencies. D4 can loosely be likened to a "once-in-a-generation" type of drought noted by the second percentile, or a 1 in 50-year drought.



Section 5: Figure 2: Drought Monitor Intensities

National Weather Service Alerts	
Alert	Criteria
D0 Abnormally Dry	Going into drought: short-term dryness slowing planting, growth of crops or pastures. Coming out of drought: some lingering water deficits; pastures or crops not fully recovered.
D1 Moderate Drought	Some damage to crops, pastures, streams, reservoirs, or wells low, some water shortages developing or imminent, and voluntary water-use restrictions requested.
D2 Severe Drought	Crop or pasture losses are likely, water shortages common and water restrictions imposed.
D3 Extreme Drought	Major crop and pasture losses with widespread water shortages or restrictions.
D4 Exceptional Drought	Exceptional and widespread crop and pasture loss, shortages of water in reservoirs, streams, and wells creating water emergencies.

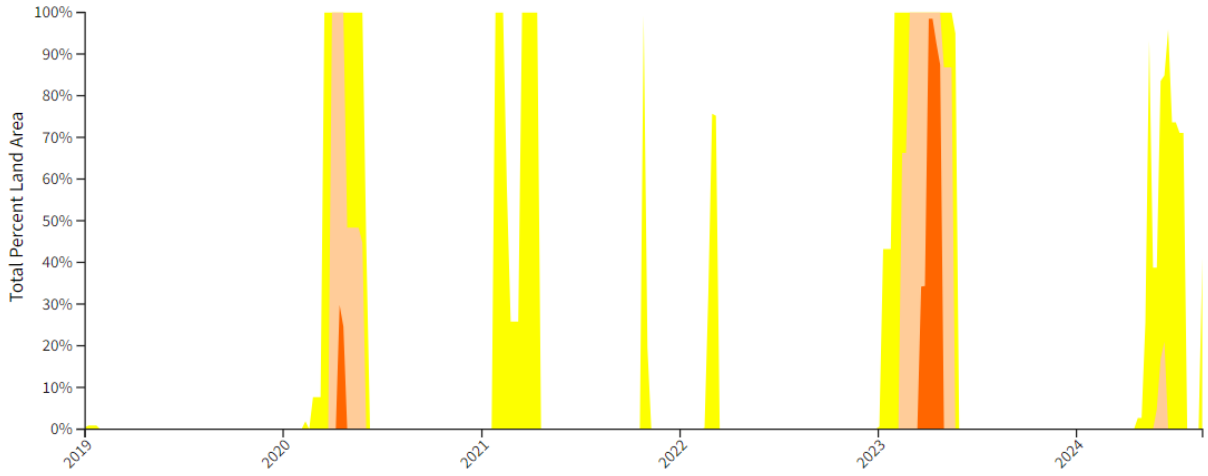
Source: NOAA (Note: This map updates frequently. This is only a snapshot in time and not a long-term trend or view)[7]

Historical Occurrences



Secondary research was conducted to determine the historical drought occurrences in Volusia County. Volusia County is part of the St. Johns River Water Management District, which monitors well levels throughout its jurisdiction. The Keetch Bryam Drought Index is a numerical scale (0-800) that measures the amount of moisture in the soil. A zero indicates wet, full saturation conditions while an 800 represents extreme drought conditions. It is often used to assess the danger of wildfires but is also an indication of drought. Therefore, it is reported where information is available. The following highlights some of the events from the years.

1981: Drought conditions were reported throughout Southern Florida. Three firefighters narrowly escaped injury while fighting drought-related wildfire. Officials from St. Johns River Water Management District ordered a mandatory 15 percent reduction in water use for public water supply, industrial, commercial and self-supplied users[8].

[7] https://www.ncei.noaa.gov/access/monitoring/historical-palmers/maps/psi/202301-202407
[8] "Winds, Dry Weather Worsen Central Florida Fires. Ocala Star-Banner. Associated Press. July 1, 1981.

- **1985:** A short, six-month drought was reported in Volusia County. In addition to sparking wildfires, it led to a water warning calling for voluntary water usage restrictions[9]. On June 20, 1985, the water warning was expanded throughout St. Johns Water Management District. Volusia County had been placed under warning months earlier[10]. On August 14, the warning was lifted as counties were able to meet usage demands due to recent rainfall.
- **1998:** Volusia County reported a Drought Index reading of 700. Wildfires were abundant throughout the County. This year was reported as having the driest conditions in 50 years. The drought did not officially end until 2002[11].
- **January 1999:** Volusia County reported a Drought Index of 500.
- **May 2000:** The May Drought Index was reported at 432 – 570. By early 2001 the Drought Index average for Volusia County was 601.
- **February 2001:** During this drought, drought index D4 covered 39.08% of Florida.
- **April 2006 – August 2008:** This prolonged drought covered much of the state in D2 and D3 conditions.
- **October 2010 – June 2012:** This prolonged drought covered much of the state in D1 and D2 conditions. D3 conditions peaked in June 2012, covering more than 80% of the state.
- **Spring 2024:** Volusia County was in a drought nearly the entire first quarter of the year, reaching D2 conditions as shown in **Section 5 Figure 4**. [12]

Section 5: Figure 4: Drought Conditions for Volusia County

Source: NOAA

Probability of Future Occurrences

It is assumed that all of Volusia County is uniformly exposed to a drought event. As with any location, some areas of the county may be affected more severely than others during a drought. Given the

[9] "Fires Still Rage in Volusia County." Evening Independent. Associated Press.
[10] "St. John's Water District Expands Warning Area." Gainesville Sun. Associated Press. June 20, 1985.

[12] https://www.drought.gov/states/florida/county/volusia

frequency of previous events, warm temperatures, and average rainfall, the probability of future drought events is high.

In partnership with County and municipal staff and the St. Johns River Water Management District, a contingency plan is in place to restrict water use across the county in an effort assist with water conservation efforts during periods of drought. Some direct impacts related to drought include reduced crop production, increased fire hazards, reduced water levels at major lakes and rivers, damage to fish habitat, and income loss for the agriculture industry.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered.

5.5 EXTREME TEMPERATURES

Background

Extreme temperature generally refers to temperatures that are unusually high or low compared to typical weather conditions for a specific location and time of year. However, defining what constitutes "extreme" can be challenging due to context, location, history, and duration. Volusia County defines extreme temperature in two ways.

- **Extreme cold** may include snow, sleet, freezing rain, or a mix of these wintry forms of precipitation. A winter storm can range from moderate snow over a period of a few hours to blizzard conditions with blinding wind-driven snow that lasts for several days. Ice storms occur when moisture falls and freezes immediately upon impact on trees, power lines, communication towers, structures, roads and other hard surfaces. Winter storms and ice storms can bring down trees, cause widespread power outages, damage property, and cause fatalities and injuries to human life. All winter storm events have the potential to present dangerous conditions to Volusia County.
- **Extreme heat** is defined as temperatures that hover 9 degrees or more above the average high temperature of 90°F for the region and last for 3 or more consecutive days. Humid or muggy conditions, which add to the discomfort of high temperatures, occur when a "dome" of high atmospheric pressure traps hazy, damp air near the ground.

Location and Spatial Extent

The entirety of Volusia County and its jurisdictions are susceptible to extreme temperatures. Volusia County, being in the southern portion of the nation, rarely experiences extreme cold events, and thus has a much lower risk than more northern areas of the country. Typically, there have not been many winter storms that have caused damage in Volusia County. Volusia County does succumb more frequently to extreme heat events.

A severe winter storm occurs when the surface air temperature is expected to be 32°F or below over a widespread area for at least 3 or more consecutive days (this is the minimum extent of a severe winter storm). Use of the term is usually restricted to aversive situations or occasions when wind or other conditions prevent frost. "Killing" may be used during the growing season when the temperature is expected to be low enough for a sufficient duration to kill all but the hardiest herbaceous crops. Extreme cold can immobilize an entire region. Even areas, such as Volusia County, that normally experience mild winters can be hit with a major extreme cold winter event. Winter storms can result in ice, localized flooding, closed highways, blocked roads, downed power lines and hypothermia.

There is a low probability that Volusia County and its jurisdictions will experience 72 consecutive hours of temperatures below 32°F on an annual basis. However, outlier storms (such as the Great Blizzard of 1899) have been observed within Volusia County and are often the result of arctic activity that affects the entire North American continent. These events are of low probability on an annual basis but can occur.

Volusia County and its jurisdictions are more likely to experience freezing temperatures for much shorter durations of time. More specifically, temperatures tend to dip below the freezing threshold during nighttime from the months of November to February.

The extent of extreme heat is determined as 3 -10 consecutive days of 99°F or higher and at least 50% of the County would be impacted during an event. Trends show increasing temperatures for longer durations. This puts the entire county and its residents at much greater risk of extreme heat events.

Historical Occurrences

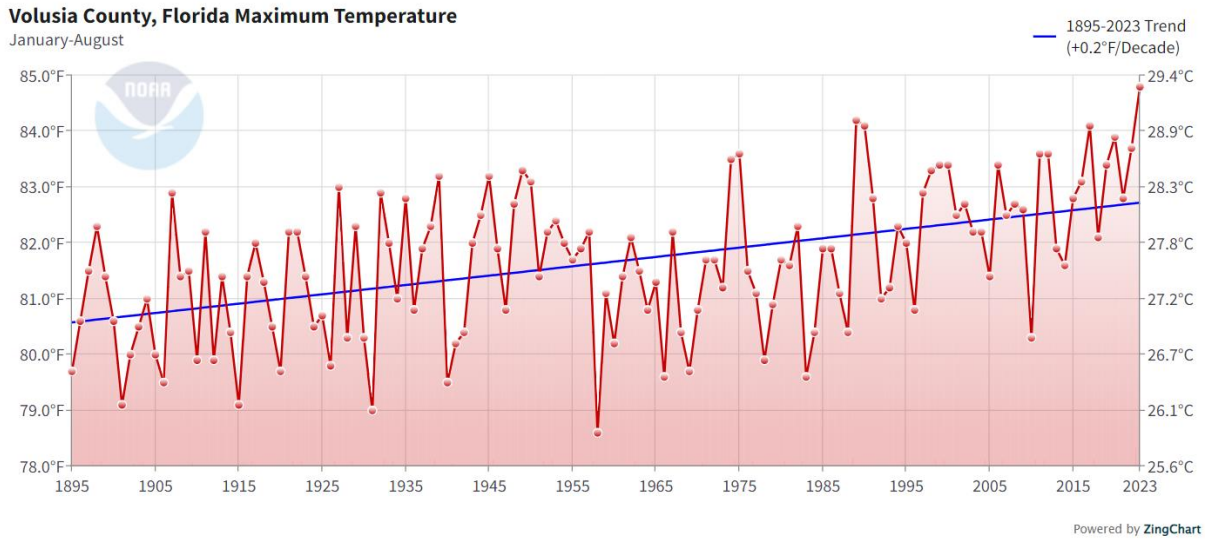
Temperatures within Volusia County, Florida were recorded as low as 6 degrees Fahrenheit in December 1962, according to the National Oceanographic and Atmospheric Administration. Temperatures dropped to 6 degrees for five consecutive days, although the temperature did not sustain at this level continuously. According to a previous Volusia County Emergency Operations Management manager, there were also two severe winter freezes in the mid to late 80's. These events killed many orange groves in Volusia County and around the state. There were no reports of death, injuries, or property damage as a result of the winter weather.

Despite the rare chance of winter storm occurrence, one snow event was reported in 2008 according to NOAA National Climatic Data Center (NCDC). On January 3, 2008, cold breezes off the Atlantic produced brief snow flurries along the coast of Volusia County. On January 9, 2010, sleet was reported in Volusia County.

However, freezing temperatures are not likely to persist for more than 24 hours at a time. In most circumstances, temperatures will only dip below freezing for a small number of hours during the nighttime. A number of these events were reported in Volusia County in the 2014- and 2015-time frame, one of the most recent and severe being the 'polar vortex' super storm on January 6th and 7th, 2014. The early months of 2025 brought freezing temperatures across the state. Volusia County opened cold weather shelters and issued numerous freeze and cold weather advisories for residents.

According to scientists at NASA's Goddard Institute for Space Studies (GISS) in New York, July 2023 was hotter than any other month in the global temperature record. Temperatures above 95F occur most often in June, July, August, and occasionally in May and September.

Probability of Future Occurrences



There is a low probability of future winter storm occurrences in Volusia County; however, outlier storms such as the 1899 Blizzard can occur with an extremely low probability. Winter storm events will remain an infrequent occurrence in Volusia County. Given the average winter temperature of 61.5 degrees Fahrenheit, it is highly unlikely that a winter event beyond light snow will occur.

It is assumed that Volusia County experiences extreme heat periodically and will continue to do so. The average temperature and number of consecutive days of extreme heat are likely to increase, bringing new challenges to human health and infrastructure. The historical county maximum temperature in January through August in 1895 was 79.7 degrees, whereas the current day maximum temperature is 84.8 degrees.[13] Based on the data produced by NOAA shown in **Section 5: Figure 5**, extreme heat trends are increasing.

[13]Source: NOAA National Centers for Environmental information, Climate at a Glance: County Time Series, published August 2024, retrieved on August 13, 2024, from https://www.ncei.noaa.gov/access/monitoring/climate-at-a-glance/county/time-series

Future impacts throughout Volusia County could include damage to crops, nurseries and tree farms (e.g., Pierson is the fern capital of the world), and other vegetation; sleet could increase the number of vehicular accidents); and the increased use of alternate heating sources in homes could cause potential structural fires. Also, agriculture may be disproportionately affected.

Section 5: Figure 5: Florida Maximum Annual Temperature Since 1895

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered.

5.6 FLOOD

Background

Flooding is the most frequent and costly natural hazard in the United States, a hazard that has caused more than 10,000 deaths since 1900. Nearly 90 percent of presidential disaster declarations result from natural events where flooding was a major component.

Floods generally result from excessive precipitation and can be classified under two categories: general floods, precipitation over a given river basin for a long period of time along with storm-induced wave or tidal action; and flash floods, the product of heavy localized precipitation in a short time period over a given location. The severity of flooding events is typically determined by a combination of several major factors, including stream and river basin topography and physiography; precipitation and weather patterns; recent soil moisture conditions; and the degree of vegetative clearing and impervious surface.

- A **general flood** is usually a long-term event that may last for several days. The primary types of general flooding include riverine, coastal, and urban flooding. Riverine flooding is a function of excessive precipitation levels and water runoff volumes within the watershed of a stream or river. Coastal flooding is typically a result of storm surge, wind-driven waves and heavy rainfall produced by hurricanes, tropical storms and other large coastal storms[14]. Urban flooding occurs where manmade development has obstructed the natural flow of water and decreased the ability of natural groundcover to absorb and retain surface water runoff.

- Most **flash flooding** is caused by slow-moving thunderstorms in a local area or by heavy rains associated with hurricanes and tropical storms. However, flash flooding events may also occur from a dam or levee failure within minutes or hours of heavy amounts of rainfall, or from a sudden release of water held by a retention basin or other stormwater control facility. Although flash flooding occurs most often along mountain streams, it is also common in urbanized areas where much of the ground is covered by impervious surfaces.

Section 5: Figure 6: Flood Waters Covering Streets

Maytown Road experienced extreme flooding during the 2009 Volusia County rainstorms

[14] While briefly mentioned here, coastal flooding is more thoroughly addressed under the "rising coastal water" hazard.

The periodic flooding of lands adjacent to rivers, streams and shorelines (land known as floodplain) is a natural and inevitable occurrence that can be expected to take place based upon established recurrence intervals. Floodplains are designated by the frequency of floods that is large enough to cover them. There are two ways to determine the frequency of flood events

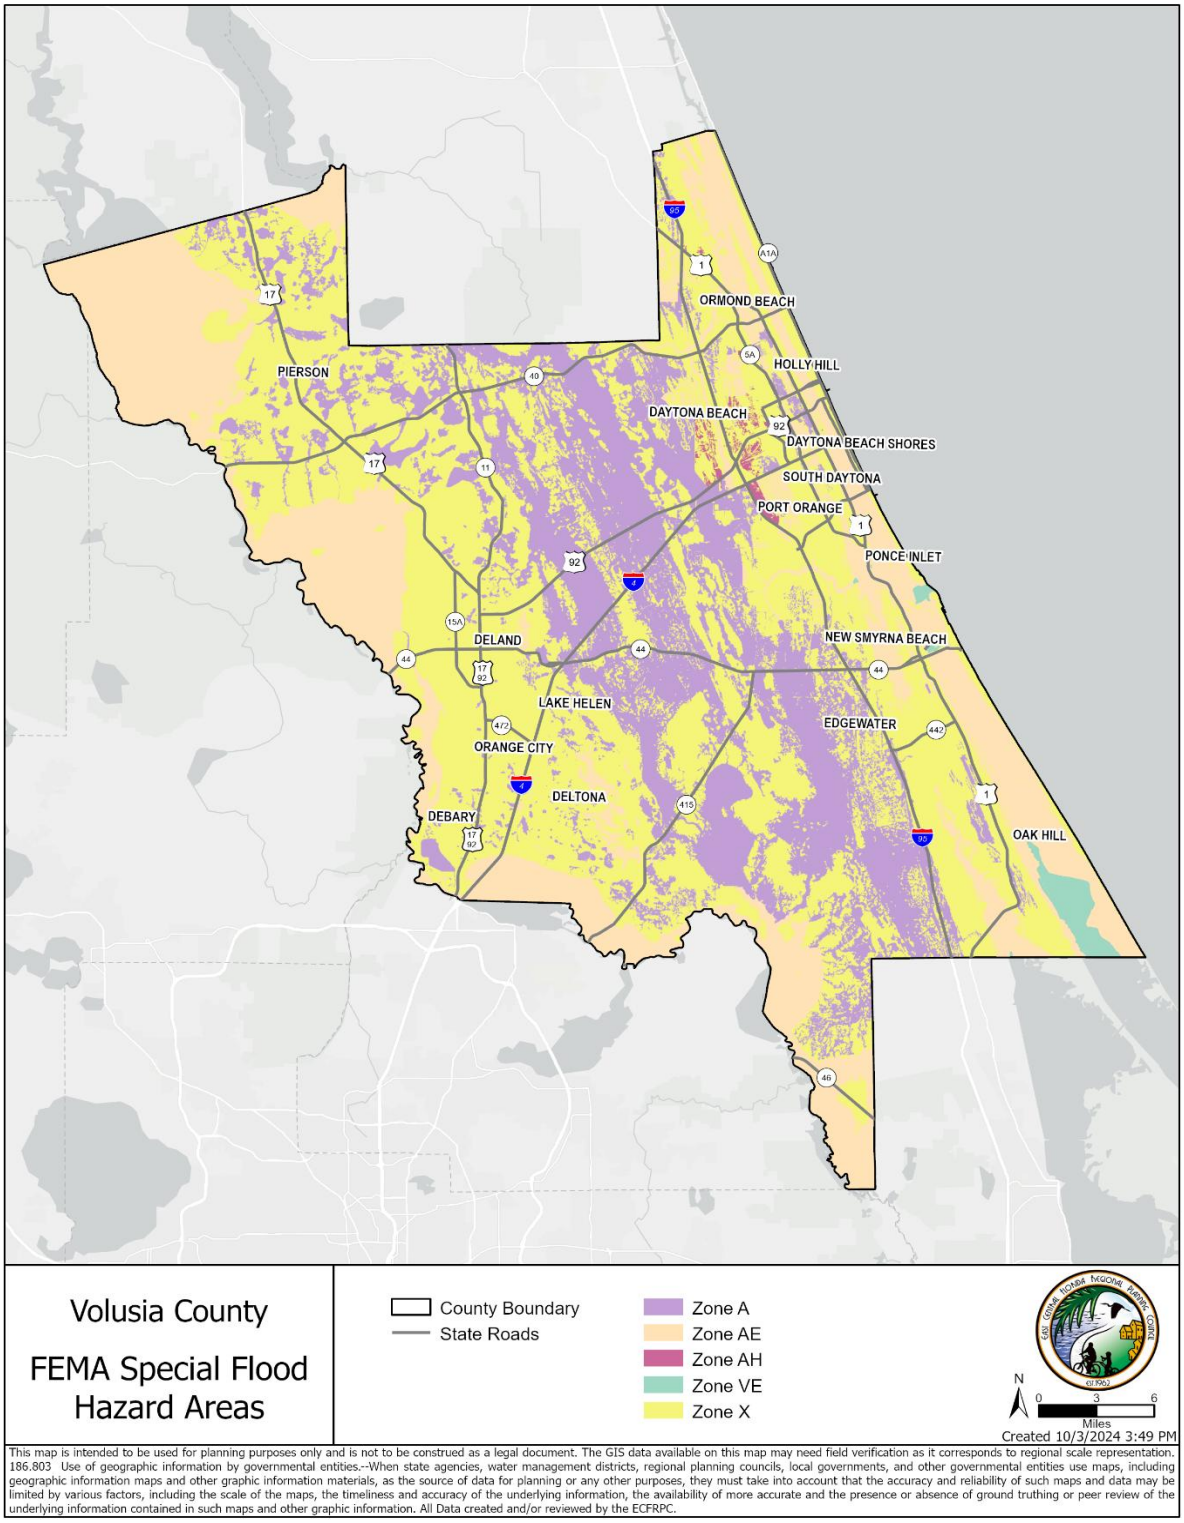
1. By plotting a graph of the size of all known floods for an area and determining how often floods of a particular size occur, and
2. the chance of occurrence in a given year, which is the percentage of the probability of flooding each year.

For example, the 1 percent annual chance flood refers to an area in the 100-year floodplain and has a 1 percent chance of occurring in any given year. Similarly, the 0.2 percent flood covers the 500-year floodplain and has a 0.2 percent chance of occurring in any given year. The recurrence interval of a flood is defined as the average time interval, in years, expected between a flood event of a particular magnitude and an equal or larger flood. Flood magnitude increases with increasing recurrence intervals.

Location and Spatial Extent

All areas of Volusia County are susceptible to riverine and urban (stormwater) flooding, and its coastal communities are also very susceptible to tidal and coastal flooding due to coastal storm events including storm surge.[15] **Section 5: Figure 8** illustrates the location and extent of currently mapped Special Flood Hazard Areas for Volusia County based on best available FEMA Digital Flood Insurance Rate Map (DFIRM) data.[16] As displayed in the image, the hazard differs across the county. The differences include Zones A/AE (100-year floodplain), Zone VE (100-year coastal flood zones, associated with wave action) and Zone X (500-year floodplain). It is important to note that while FEMA digital flood data is recognized as best available data for planning purposes, it does not always reflect the most accurate and up-to-date flood risk. Impacts have included flooding of hundreds of homes, schools, and roads, including the blockage of I-95 in Ormond Beach during a 2004 flash flood. Flooding and flood-related losses sometimes occur outside of delineated “100 year” special flood hazard areas during 500-year storm events or when rain events are exacerbated by strong winds. Changes in topography (and associated water runoff) generally do not impact Volusia County due to its flat terrain.

Water can rise to exceptional levels during hurricane, storm surge, flash flood and thunderstorm conditions. Water levels have historically risen to 6 feet within southwestern Volusia County following one of these events, with increased water heights for coastal communities due to Florida’s semidiurnal tides. Roadway flooding has been seen rising between 1 and 5 feet.



There are a number of areas that are disproportionately affected to flooding, including areas adjacent to the St. Johns River (Maytown to Enterprise).

Probability of Future Occurrences

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from flooding and that future mitigation and adaptation strategies related to this hazard should be considered.

[15] Storm surge is addressed separately within this section.

Section 5: Figure 7: Special Flood Hazard Areas in Volusia County

Source: Federal Emergency Management Agency

Historical Occurrences

According to the National Climatic Data Center, there have been over 20 reported flood events in Volusia County since 1994. According to the data as shown in **Section 5: Table 5**, there was over $20 million in property damage (not including recorded agricultural losses) during this period.

Section 5: Table 5: Historical Flood Impacts in Volusia County

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Peninsular	9/15/1994	Flood	0/0	$757,242	Two synoptic-scale systems, one tropical and one non-tropical brought heavy rain to most of peninsular Florida the last half of September. Other sections of Florida, particularly northeast and east central, experienced urban flooding which closed roads and flooded schools and homes in Duval County and flooded subdivisions in Flagler, Volusia, St. Johns and Brevard counties.
Countywide	10/11/1994	Flood	0/0	$757,242	Heavy rains across much of northeast Florida caused widespread flooding of roadways and vehicles and minor flooding of schools, businesses and residences. Strong onshore winds caused significant beach erosion and minor coastal flooding along portions of the northeast coast.
Oak Hill	9/19/1999	Flash Flood	0/0	$13,439	Heavy rain of 2 to 4 inches produced flooding in Oak Hill. Two homes had minor flooding.
Edgewater	9/14/2001	Flash Flood	0/0	$316,693	Rainfall from Tropical Storm Gabrielle flooded about 25 homes and apartments in Edgewater and New Smyrna Beach. About 5 homes were flooded along the Tomoka River in Daytona Beach. Roadway and small stream flooding was reported over much of the county.
Ponce Park	11/14/2001	Flash Flood	0/0	$633,385	Showers and thunderstorms dumped over 5 inches of rain in coastal sections of Volusia County. Thirty-five homes in the Ponce Inlet, Daytona Beach and Ormond by the Sea areas received some water damage.
Deltona	8/19/2002	Urban Flood	0/0	$0	Thunderstorms produced street flooding in Deltona.
Ormond Beach	8/8/2004	Flash Flood	0/0	$0	Heavy rain in the morning hours brought 24-hour rain totals to near 7 inches. Widespread street flooding with water in two homes in Ormond Beach was reported. A lane of Interstate 95 was blocked by flood waters.
Countywide	9/5/2004	Flash Flood	0/0	$0	From 10 to 12 inches of rain from the northern rain bands of Hurricane Frances produced widespread flooding of homes, businesses and roads across coastal communities as well as in Deltona, and DeLand.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Countywide	9/9/2004	Flood	0/0	$5,564,516	Hurricane Frances produced 6 to 10 inches of heavy rain over much of the middle and upper St. Johns River Basin. Beginning on September 9th, water levels began to reach flood stage on the middle basin mainly around Geneva, and Sanford. Levels continued to rise well above flood stage and began to fall slightly until Hurricane Jeanne followed the same track across the state. Significant flooding followed with a record crest of 10.1 feet being reached at Lake Harney Gage. Many homes were flooded near Stone Island.
Countywide	8/21/2008	Flash Flood	0/0	$13,400,000	As Tropical Storm Fay drifted north in the Volusia County offshore waters, hours of torrential rain fell across southern Volusia County. Close to 200 homes were flooded. The damage was nearly $13 million. Torrential rain from Tropical Storm Fay produced widespread flooding across Brevard and central and southern Volusia counties.
Deltona	5/19/2009	Flood	0/0	$68,600,000	Multiple rounds of heavy rainfall over five days led to several feet of standing water in many areas of eastern Volusia County. Rainfall reached 18 to 28 inches in several coastal areas.
Ormond Beach	5/22/2009	Flash Flood	0/0	N/A	High levels of pre-existing flood waters were exacerbated as two to four inches of additional rainfall occurred in less than three hours. Standing water rose to three feet or higher in several locations. Flood waters entered additional homes. Flash flood damage estimates were included collectively in the five-day flood event from May 19-24.
Isleboro	9/23/2014	Flash Flood	0/0	$562,000	A very moist atmosphere coupled with a series of upper-level disturbances resulted in several persistent rain bands. Significant urban and small stream flooding affected portions of Melbourne/Palm Bay and Lake Mary/Winter Park. Flash flooding resulted in rapid water accumulation in New Smyrna Beach and from Holly Hill to Daytona Beach to Port Orange, where numerous roadways became impassable and over 100 homes sustained damage from the rising flood waters. Rainfall totals during the 24-hour period of greatest impact reached 6-12 inches. Flood damage estimates within Volusia County were 3.65 million dollars. No injuries reported.
Holly Hill	9/24/2014	Flash Flood	0/0	$3,090,000	Same as above.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Ormond-by-the-Sea	10/6/2016	Flood	0/0	$0	Associated with Hurricane Matthew (see Hurricanes)
Seville	9/10/2017	Flood	0/0	$0	Associated with Hurricane Irma. (see Hurricanes)
Ormond-by-the-Sea	11/23/2017	Flood	0/0	$0	A strong thunderstorm embedded within a rain area ahead of a cold front intensified as it traveled quickly northeast across Volusia County. Mobile homes were damaged well inland in DeLand, then over 30 minutes later, the storm damaged mobile homes in Daytona Beach.
Daytona Beach	11/5/2021	Flood	0/0	$500,000	A very slow-moving front produced persistent heavy rains across a portion of Volusia County. The total of twenty-four-hour rain totals were 6-10 inches, however most of the rain fell in less than 12 hours, impacting Daytona Beach and Port Orange. As much as 5-6 inches accumulated between 1500 and 1800 LST. Numerous roadways were flooded, with as much as 1-2 feet of standing water in some localized areas, resulting in road closures.
Volusia County	9/28/2022	Flood	4/0	$3,400,000	Rainfall totals averaging between 10 to 16 inches, with locally higher amounts of up to 20 inches were reported particularly in the coastal part of the county, resulting in widespread residential, street, urban, and poor drainage flooding. A county damage assessment indicated 3554 structures affected, 2602 with minor damage, 645 with major damage, and 48 destroyed, mainly due to widespread and historic flooding. The combined effects of Hurricane Ian led to a total estimated damage of approximately $340M.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Volusia County	11/08/2022	Flood	0/0	$0	Rainfall totals of 3-6 inches, which fell between 0700EST on the 8th and 1500EST on the 10th led to generally nuisance type to minor street flooding across portions of Volusia County. The St. Johns River at Astor, which was already in moderate flood stage due to the remnant effects of Hurricane Ian, experienced water level rises as early as the 8th due to increasing north to northeast winds impeding the river's flow. Renewed flooding was reported along numerous streets and communities along the river in Astor. At DeLand, already in minor flood stage, river gauges recorded a rise into moderate flood stage on the 9th.
West Holly Hill	9/30/2023	Flood	0/0	$0	Volusia County Fire Rescue reported flooding of several areas in Ormond Beach due to excessive rainfall.
Ormond Beach	9/30/2023	Flood	0/0	$0	Heavy rainfall led to flooding in Ormond Beach in Volusia County.
Volusia County	10/10/2024	Flood	0/0	$240,000,000	Volusia County Emergency Management reported significant urban, street, and low-lying flooding as a result of 6 to 12 inches of rain in association with Hurricane Milton. A period of very heavy rainfall rates associated with the core of the storm led to flash flooding during the overnight period (Oct 9 - 10). The heavy rain that fell as a result of the storm also led to a long-term river flood event along the St. Johns with the river near Geneva entering major flood on Oct 14, peaking at 10.15 feet on Oct 15. At DeLand, the river rapidly rose to major flood stage on Oct 11, peaking at 5.49 ft on Oct. 14. Downstream at Astor, the river was already in a minor flood stage at the beginning of the event and quickly rose to major the morning of Oct 10, peaking at 4.81 ft on Oct 12, a new record for the site.

NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER

According to the emergency management officials from the Volusia County jurisdictions, another significant flood occurred during the Memorial Day Weekend in May 2009 that was not included in the

[17]https://www.ncdc.noaa.gov/stormevents/listevents.jsp?eventType=%28Z%29+Flood&beginDate_mm=05&beginDate_dd=01&beginDate_yyyy=2017&endDate_mm=05&endDate_dd=31&endDate_yyyy=2024&county=VOLUSIA%3A127&hailfilter=0.00&tornfilter=0&windfilter=000&sort=DT&submitbutton=Search&statefips=12%2CFLORIDA

NCDC database. This event caused high rains and four feet of storm surge. There was approximately $68 million in damage along the coastline from Ormond Beach to New Smyrna Beach. Approximately 1,000, infrastructure and various critical facilities were damaged. Daytona Beach, alone, had approximately 650 damaged homes.

Historical Summary of Insured Flood Losses

All jurisdictions in Volusia County participate in the National Flood Insurance Program (NFIP). **Section 5: Table 6** provides flood insurance policy and claim summary information for each of the participating jurisdictions. The reported losses include both inland (freshwater) and coastal flooding events. It should be emphasized that these numbers include only those losses to structures that were insured through the NFIP policies, and for losses in which claims were sought and received. It is likely that many additional instances of flood losses in Volusia County were either uninsured, denied claims payment, or not reported.

Section 5: Table 6: NFIP Policy and Claim Information

JURISDICTION	TOTAL CLAIMS SINCE 1978	TOTAL PAID SINCE 1978
Daytona Beach	1,701	$81,477,671
Daytona Beach Shores	175	$3,778,724
DeBary	108	$4,846,401
DeLand	19	$363,712
Deltona	125	$3,178,258
Edgewater	252	$7,528,013
Holly Hill	400	$10,505,116
Lake Helen	3	$14,481
New Smyrna Beach	1,229	$50,878,748
Oak Hill	18	$554,185
Orange City	19	$946,274
Ormond Beach	768	$11,608,018
Pierson	1	$8,834
Ponce Inlet	255	$7,965,454
Port Orange	1,451	$62,222,337
South Daytona	1,088	$54,614,519
Volusia County	2,391	$68,055,722
TOTAL	**10,003**	**$368,546,467**

Repetitive Loss Properties

FEMA defines a repetitive loss property as any insurable building for which two or more claims of more than $1,000 were paid by the NFIP within any rolling 10-year period, since 1978. A repetitive loss property may or may not be currently insured by the NFIP. Currently there are over 122,000 repetitive loss properties nationwide.

According to Volusia County repetitive loss property records (as of January 2025), there are over 1,000 repetitive loss properties located in Volusia County. Without mitigation, these properties will likely continue to experience flood losses. **Section 5: Figure 8** displays the general location of RL properties.

Section 5: Table 7: Repetitive Loss Properties Information

JURISDICTION	NUMBER OF RL PROPERTIES		
	TOTAL	NUMBER OF PROPERTIES BY LAND USE (Data provided by jurisdictions in 2025)	LOSSES BY LAND USE (Data provided by jurisdictions in 2020 LMS update)
Daytona Beach	235	-	2 RESIDENTIAL
Daytona Beach Shores	9	-	NONE

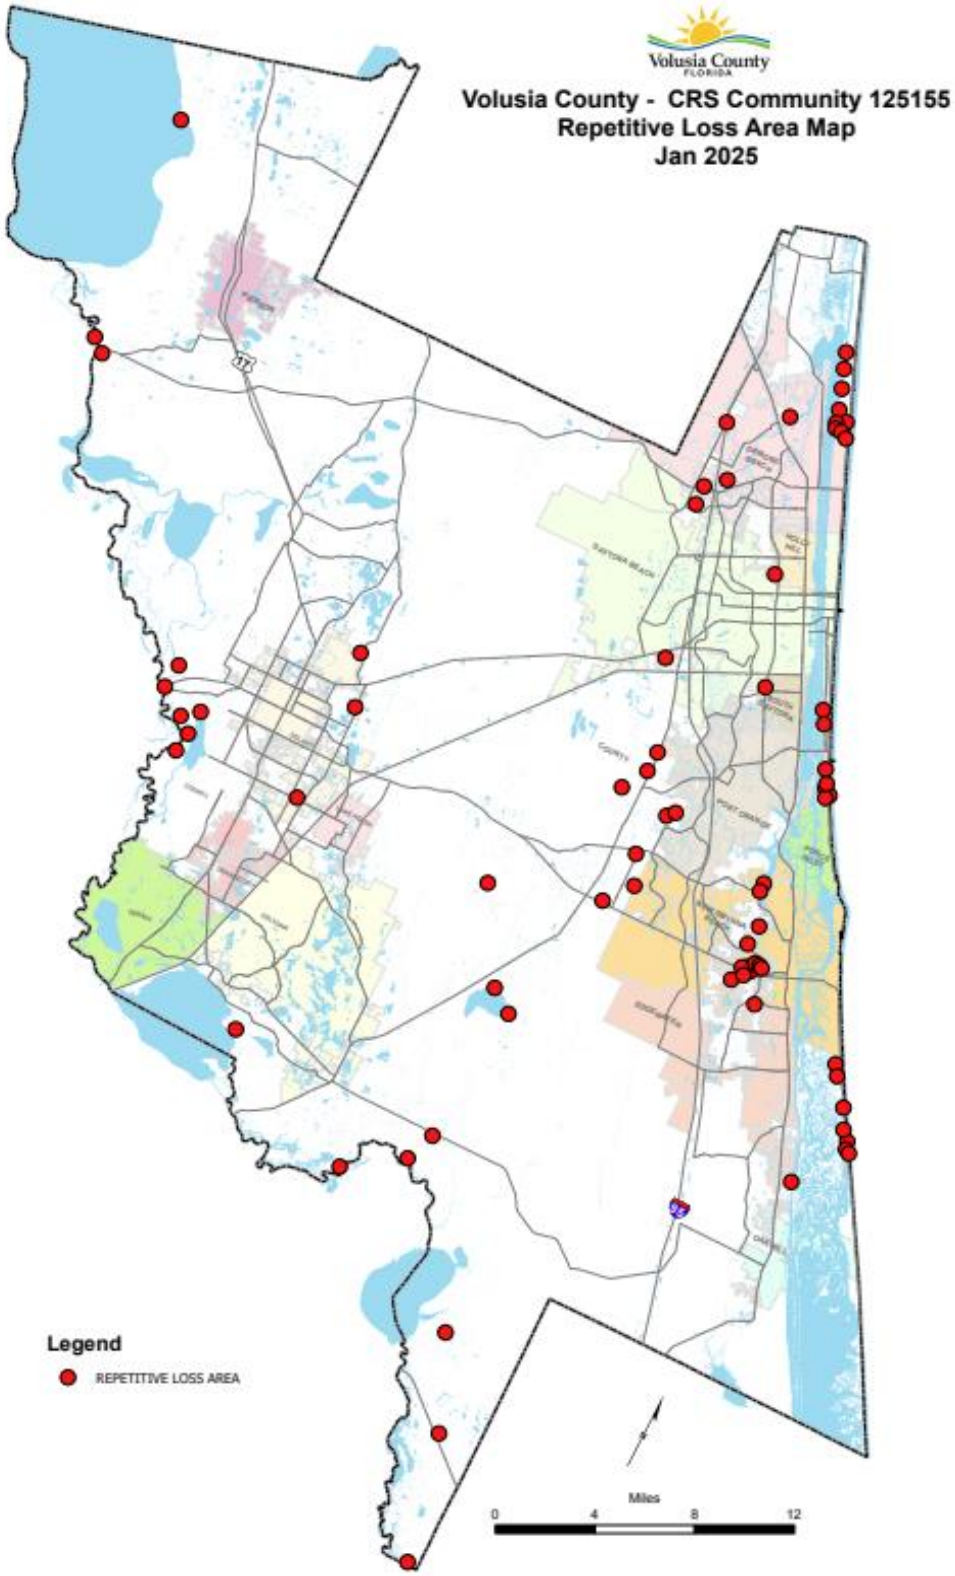
Not all jurisdictions have severe repetitive loss properties. Those that have them identified for the 2025 update are:

- Port Orange, 50 Residential

Probability of Future Occurrences



Flood events will remain a frequent occurrence in Volusia County, and the probability of future occurrences is high. The probability of future flood events based on magnitude and according to best

available data is illustrated in Figure 5.10, which indicates those areas susceptible to the 1 percent annual chance flood (100-year floodplain); the 1 percent annual chance flood with wave action (100-year coastal floodplain); and the 0.2 percent annual chance flood (500-year floodplain). Further, as described in other hazard profiles, it is highly likely that Volusia County will continue to experience inland and coastal flooding associated with large tropical storms, hurricanes and storm surge events.

Anticipated sea level rise will increase the probability and intensity of future tidal flooding. Rising sea level over time will decrease the return period (increasing the frequency) of significant flood events. For example, sea level rise of 1 foot over a typical project analysis period (50 years) may cause a flood event currently of annual probability of 2 percent (50-year flood) to become an event of 10 percent annual probability (10-year flood). This rise in sea level will increase the probability of the loss of coastal wetlands and erosion of sandy beaches that act as protective buffers against flood events.

There are repetitive loss properties within 13 of the 16 jurisdictions within Volusia County. This includes 1,280 properties in total. Countywide distribution of repetitive loss properties is somewhat weighted to the east, as a majority of the repetitive loss properties in the county are in Port Orange, South Daytona, and Daytona Beach. The western side of the county also has several repetitive loss properties, most notably the cluster within the Stone Island residential area in the southwestern portion of the county. Data collected showed that many properties have not undergone mitigation efforts; however, there is insufficient data to measure an actual percentage for the entire county.

5.8 PUBLIC HEALTH EMERGENCY

Background

Public heath emergencies may be accidental, natural, or intentional. Under section 319 of the Public Health Service Act (42 U.S.C § 319), the Secretary of the Department of Health and Human Services (HSS) can declare a public health emergency.

Public health is the science and art of preventing disease, prolonging life, and promoting health through organized efforts and informed choices of society, organizations, the public, private communities, and individuals. According to the Centers for Disease Control and Prevention (CDC), disease outbreaks are identified by the occurrence of more cases of disease(s) than normally expected within a specific place, or among a group of people over a specified period of time. Potential health threats come from an increasing range of health hazards, including infectious diseases, HazMat incidents, food contamination, and threats associated with climate change including extreme weather events. Public health emergencies include medical surges (often from mass casualty events) that require hospitals to act beyond normal capacity. Pandemics are included in this category.

Location and Spatial Extent

All Volusia County residents face risks associated with public health emergencies. Risk factors, including income, gender, age, migration, health/nutritional status, displacement, and unplanned urbanization, increase people's exposure and vulnerability to these threats and hazards.

All Volusia County residents are at risk of public health emergencies such as pandemic influenza, pneumonic plague, epidemic, food contamination, etc. Youth (under 18) and the elderly (over 65) are especially vulnerable as their immune systems are more susceptible. Risks may also be increased in people of any age who have other serious health problems — such as heart or lung conditions, weakened immune systems, obesity, or diabetes. This is similar to what is seen with respiratory illnesses, such as the flu (influenza) and COVID-19.

Historical Occurrences

In 2016 and 2017 the Zika Virus cases were on the rise and led to several birth defects. In October of 2022, Dengue was reported in a Volusia County resident. In June 2023, four cases of Malaria were reported, treated, and recovered in Sarasota, Florida. Although rare, there have also been cases of West Nile Virus that led to encephalitis in the County.

Then in March 2020, the first cases of COVID-19 were reported in Florida. On March 11, 2020, the World Health Organization (WHO) officially declared COVID-19 a pandemic. By April, the governor had declared an executive order to restrict activities within the state unless deemed essential. The pandemic was declared over in May 2023, but continues to impact Florida's population through the time this plan was published.

Probability of Future Occurrences

Public health emergencies are expected to increase. Volusia County and the surrounding areas bring many tourists, which can be a contributor to the spread of health concerns or diseases. Although international

travel is a contributing factor, climate change and a growing population will continue to influence public health.

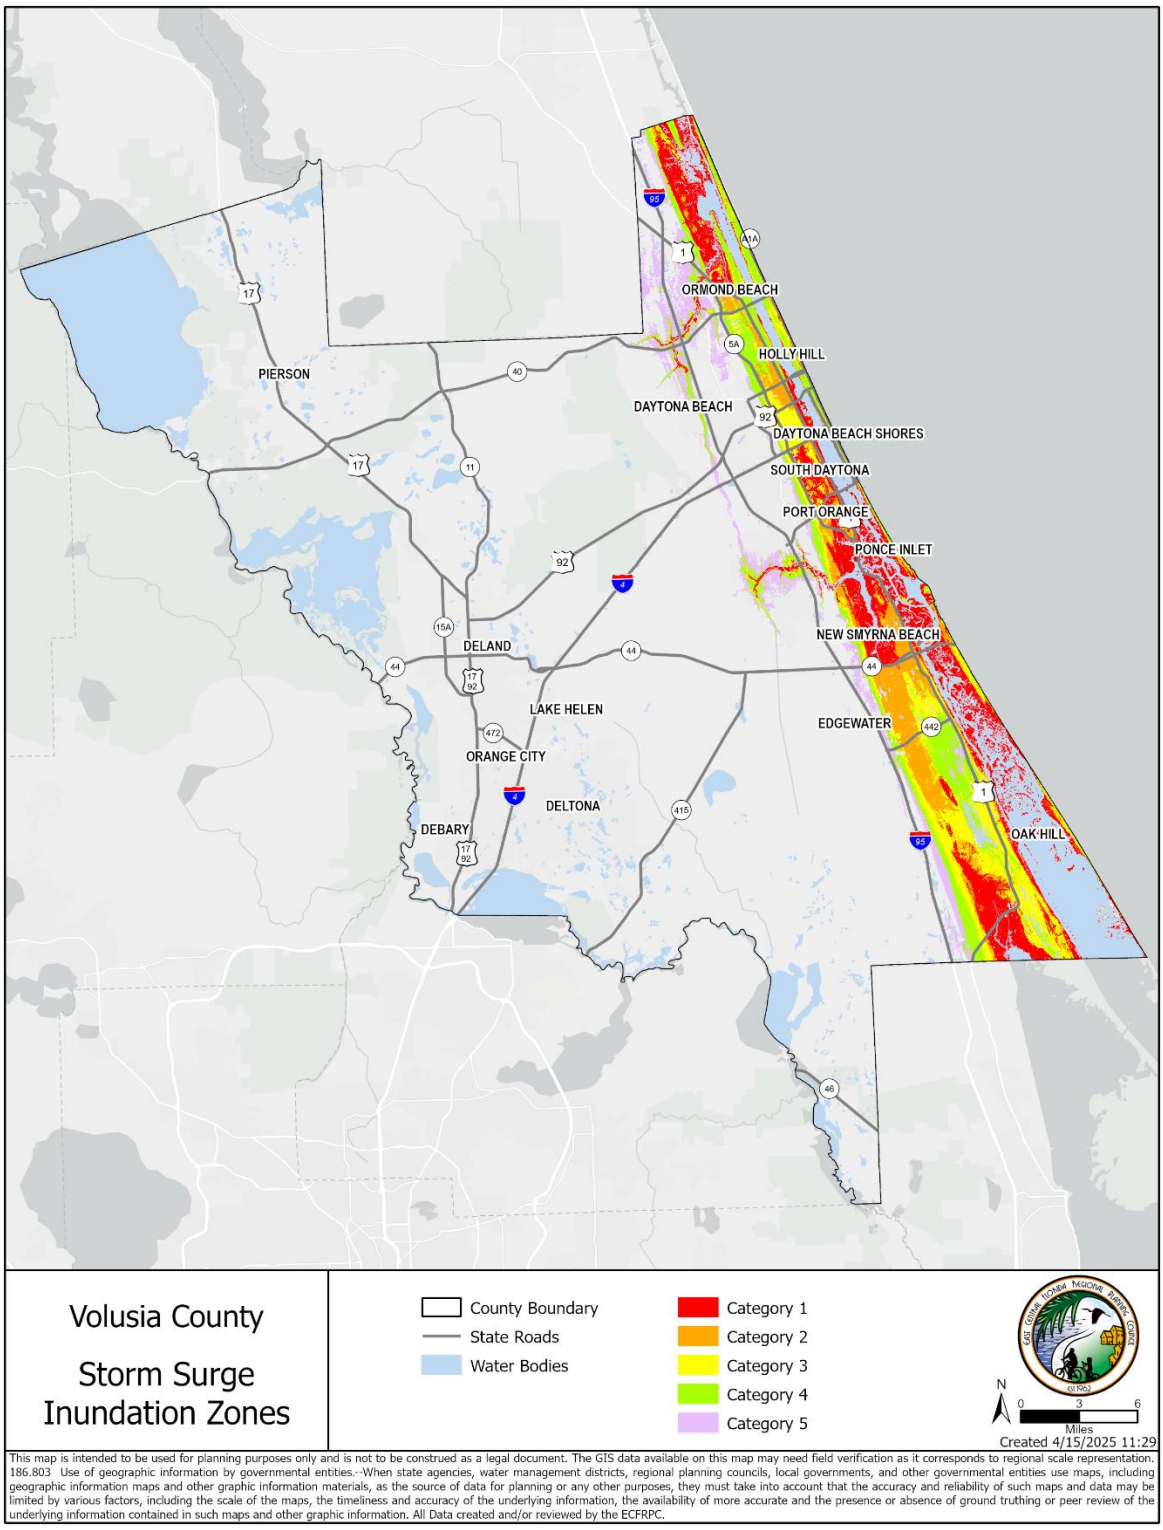
5.9 RISING COASTAL WATERS

Background

Rising coastal waters is a hazard that refers to unprecedented water levels along the coast, usually leading to inland affects. This hazard encompasses:

- **Storm Surge**: Storm surge occurs when the water level of a tidally influenced body of water increases above the normal astronomical high tide and is most common in conjunction with coastal storms with massive low-pressure systems with cyclonic flows such as hurricanes, tropical storms and nor'easters. The low barometric pressure associated with these storms causes the water surface to rise, and storms making landfall during peak tides have surge heights and more extensive flood inundation limits. Storm surges will inundate coastal floodplains by dune over wash, tidal elevation rise in inland bays and harbors, and backwater flooding through coastal river mouths. The duration of a storm is the most influential factor affecting the severity and impact of storm surges.
- **Sea Level Rise (SLR)**: Sea level rise is caused by warming of the earth's climate, the associated thermal expansion of water molecules, and generally impacts coastal, lagoon-adjacent and river-adjacent areas that are hydrologically connected to the ocean.
- **Tsunami**: In the open ocean, tsunami waves travel at speeds of up to 600 miles per hour but are too small to be observed, and the time between wave crests may be five to 90 minutes. As the waves approach shallow coastal waters, they slow down and may rise to several feet or, in rare cases, tens of feet. Although the waves slow down as they reach shallow water, the energy remains constant and when tsunami waves crash into the shoreline they may be as high as 100 feet. The first wave is almost never the largest; successive waves may be spaced tens of minutes apart and continue arriving for many hours. The coastal areas at greatest risk are less than 50 feet above sea level and within one mile of the shoreline. Tsunamis can cause great loss of life and property damage where they come ashore, and most tsunami deaths are the result of drowning. Associated risks include water pollution, damaged gas lines, and flooding.

Location and Spatial Extent



All of Volusia County and its jurisdictions are subject to rising coastal water inundation. Municipalities such as Ormond Beach, Holly Hill, Daytona Beach, Daytona Beach Shores, South Daytona, Port Orange, Ponce Inlet, New Smyrna Beach, Edgewater, and Oak Hill are most susceptible to rising coastal waters given their proximity to the coast.

- **Storm Surge**: As shown in **Section 5 Figure 9**, the entire east side of Volusia County is at high risk of storm surge inundation in addition to most riverine floodplains along major rivers in southern portions of the area. While areas not located immediately along the coast or major rivers may not be directly impacted by storm surge inundation except in extreme storm events, they might experience flooding caused by storm surge and extremely high tides that affect the drainage of areas further inland.
- **Sea Level Rise**: In Volusia County, areas susceptible to sea level rise include jurisdictions in close proximity to the Atlantic Ocean, the Indian River Lagoon, the Halifax River, the St. Johns River, and smaller riverine systems that provide hydro connectivity into the interior of the County. The extent of sea level rise would go beyond coastal communities, like Ormond Beach and New Smyrna Beach. Inland communities along waterways, such Astor and Eustis, will be impacted

during periods of high-water inundation since the water systems will be over capacity and exiting the system at slower rates.

- **Tsunami**: Tsunami activity is a greater risk along the Pacific Rim states (Washington, Oregon, California, Alaska, and Hawaii), but is still possible along the East Coast of the United States. In fact, as many as 40 tsunami or tsunami-like events have been reported along the East Coast since the early 1600s. Additionally, models and methodologies do not currently exist to accurately assess the tsunami hazard as it would relate to an inland community along the East Coast. The potential location and extent of the tsunami hazard for Volusia County is similar and slightly more extensive than the established flood hazard area. A tsunami event could cover all of Volusia County based on severity. However, the coastal jurisdictions are most at risk. The areas of Volusia County most at risk of a tsunami hazard are similar to those of storm surge and sea level rise. A tsunami's extent could go beyond the coastal areas, although they are at the greatest risk. High velocity waves that could cause severe catastrophic damage to structures and infrastructure. Its extent could result in massive amounts of vegetative and construction debris, boats would be washed ashore, impacted buildings could collapse, trees could be uprooted, above ground power poles and lines could collapse, and underground utilities could be unearthed and destroyed.

Section 5: Figure 9: Current Day Storm Surge Predications Based on Hurricane Category

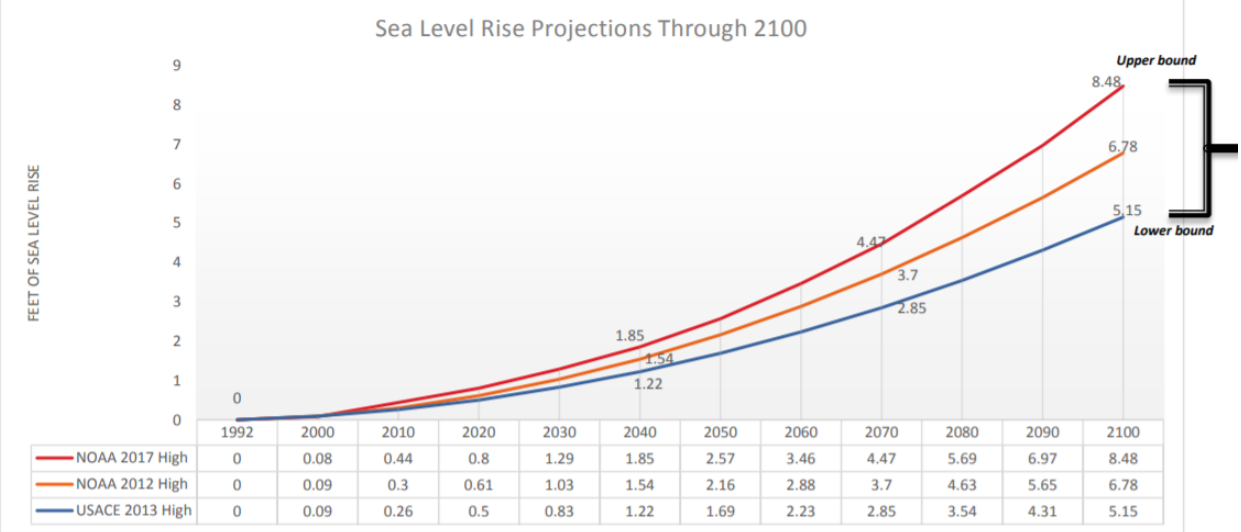
Source: ECFRPC, NOAA

Historical Occurrences

Volusia County has experienced numerous rising water events associated with hurricanes, nor'easters and tropical storms. Water can rise to exceptional levels during hurricanes, storm surge, flash flood and thunderstorm conditions.

- **Storm Surge**: Water levels from storm surge have historically risen to 6 feet within Volusia County following one of these events, with increased water heights for coastal communities due to Florida's semidiurnal tides. Roadway flooding has been seen rising between 1 and 5 feet. Hurricane Nicole in 2022 produced an impactful storm surge along a large portion of the east coast of Florida, battering beaches with elevated water levels and wave action. Florida was previously hit by Hurricane Ian in late September which caused beach erosion along the east coast and freshwater flooding from rainfall in rivers and canals. The impact of Ian likely left the area more vulnerable to storm surge from Nicole. Additionally, Nicole's large wind field and its initial subtropical characteristics increased the potential for widespread wave and storm surge impacts. Port Orange, South Daytona, Ormond Beach, and Daytona Beach were most impacted during Hurricane Nicole, however most of this was from the tides increasing and influencing the intracoastal waterways. Please refer to the Hurricane Historical Occurrences listing for more information.
- **Sea Level Rise**: Sea level rise is currently impacting south and central Florida, with nearshore, high-tide flooding becoming a more frequent sea level rise-associated hazard in some locations. Historical occurrences of sea level rise are not easy to measure due to a lack of data existing from the early 20th Century as well as the time period of two epochs (38 years) needed to calculate the mean impacts of sea level rise, by location. As data collection and monitoring improve, the ability for the County to track historical occurrences will improve. One indicator of sea level rise is the frequency or nearshore, high tide flood events, also known as nuisance flooding. In 2016, a NOAA study found that nuisance flooding frequency was increasing to the north and south of Volusia County (in Mayport, FL; Fernandina Beach, FL; and Key West, FL). It is expected that these events will continue to increase in frequency in the future.
- **Tsunami**: In August 2008, a qualitative tsunami hazard assessment prepared by NOAA and USGS indicated that the U.S. Atlantic coast has a very low tsunami risk[18]. This qualitative assessment was based on National Geophysical Data Center (NGDC) and United States Geological Survey (USGS) databases. Specifically, Atlantic coast tsunami vulnerability was deemed very low based on very low wave runup, low tsunami hazard frequency, and no reported fatalities. Although an East Coast tsunami would be rare, two offshore areas are currently under investigation according to a 2002 National Geophysical Data Center report. One area of interest consists of large cracks northeast of Cape Hatteras, North Carolina that could foretell the early stages of an underwater landslide resulting in a tsunami. The other area of interest consists of submarine canyons approximately 150 kilometers from Atlantic City, New Jersey. Significant factors for consideration regarding these areas are recent discoveries along the East Coast that demonstrate the existence of pressurized hydrates and pressurized water layers on the continental shelf. This has produced speculation among the scientific community on possible triggers that could cause sudden and perhaps violent releases of compressed material that could factor into landslide events and the resulting tsunami waves. Although different from a tsunami, a rogue wave is relatively large (i.e., larger in height than a tsunami) and spontaneous ocean waves can cause similar impacts. On July

[18] NOAA and USGS. 2008. *U.S. States and Territories National Tsunami Hazard Assessment: Historical Record and Sources for Waves.* August 2008.



3, 1992, a 27-mile-long, 18-foot rogue wave came onshore between Ormond Beach to New Smyrna Beach, centered at Daytona Beach. Sailboats crashed ashore, 200 cars were damaged and approximately 75 people were injured resulting in two hospitalizations. It is theorized that an underwater landslide caused the rogue wave, potentially categorizing this wave as a type of tsunami, or it was the result of a squall line.

Probability of Future Occurrences

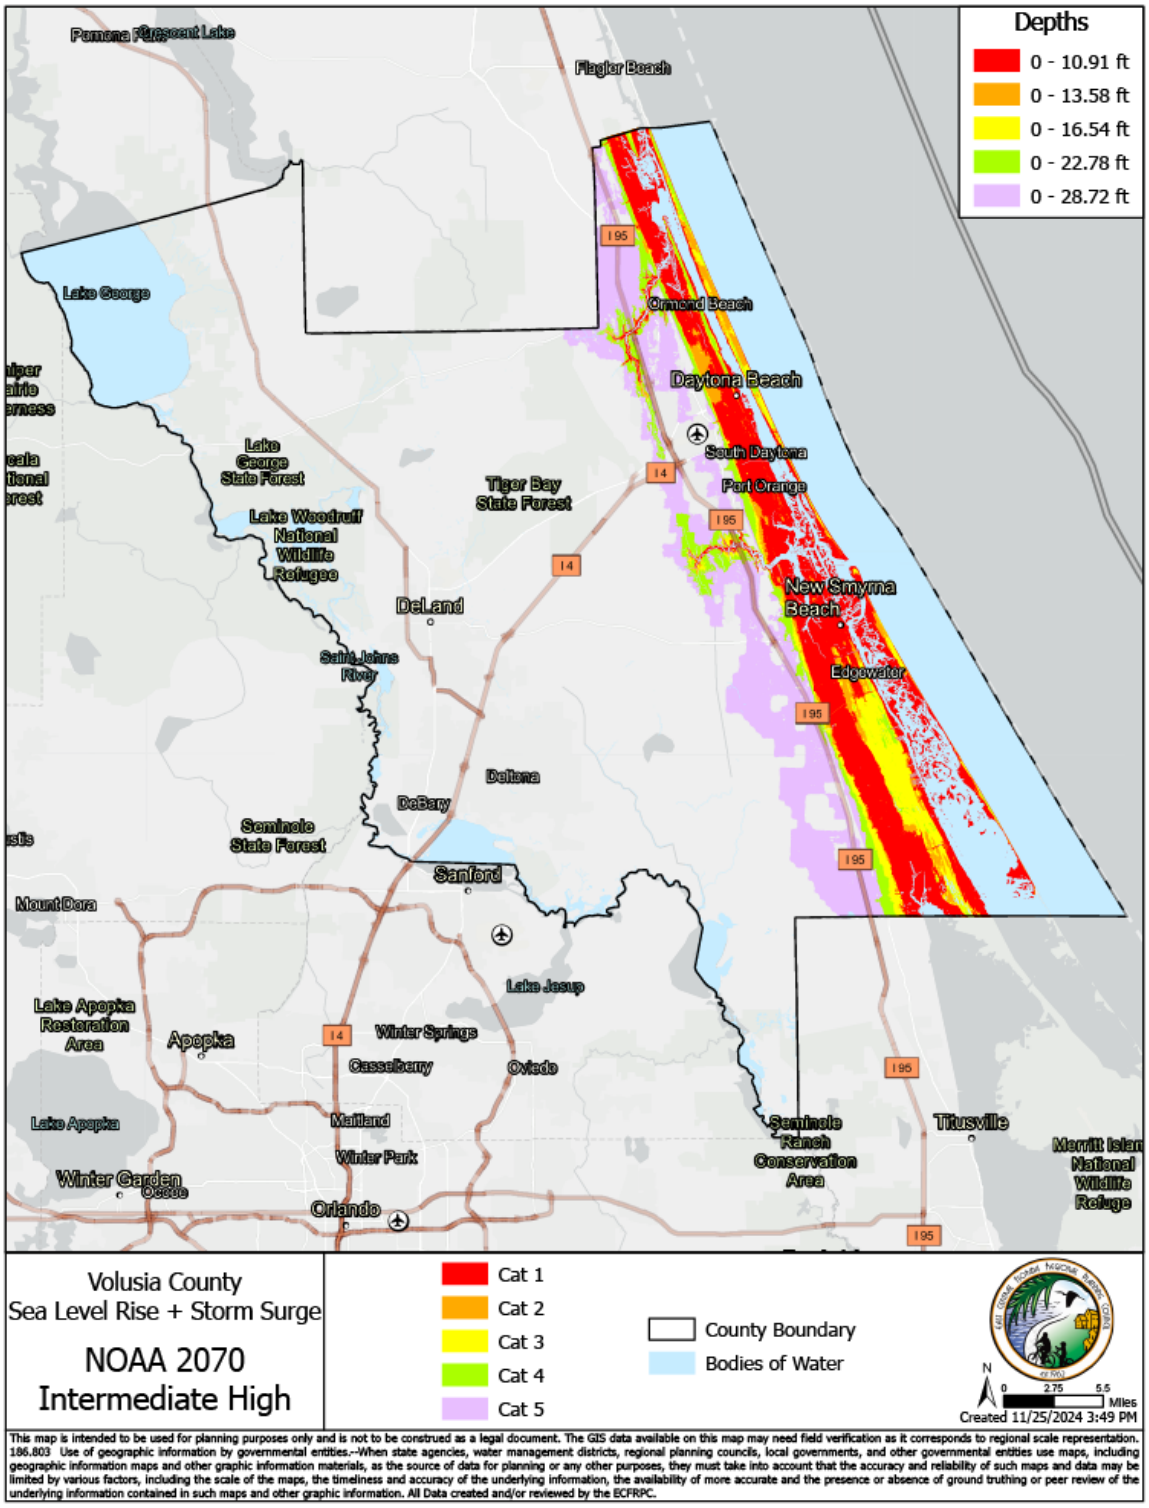
There is a high probability that Volusia County will continue to experience rising coastal water associated with large tropical storms, hurricanes and squalls combined with high tides, based on the frequency of tropical cyclones as shown in **Section 5 Figure 11 and 12.**

As noted in previous sections (under Flood), anticipated sea level rise will increase the probability and intensity of future storm surge events. This rise in sea level will increase the probability and intensity of rising coastal water events but will also contribute to the loss of coastal wetlands and erosion of sand beaches that act as protective buffers against storm surge events. The National Oceanic and Atmospheric Administration (NOAA) and the U.S. Army Corps of Engineers have published numerous "sea level rise curves" that project the future impacts of sea level rise, in feet. The following sea level rise curves are being used to assess the potential impacts of sea level rise by municipalities in Volusia County.

Section 5: Figure 10: Sea Level Rise Projections

	1992	2000	2010	2020	2030	2040	2050	2060	2070	2080	2090	2100
NOAA 2017 High	0	0.08	0.44	0.8	1.29	1.85	2.57	3.46	4.47	5.69	6.97	8.48
NOAA 2012 High	0	0.09	0.3	0.61	1.03	1.54	2.16	2.88	3.7	4.63	5.65	6.78
USACE 2013 High	0	0.09	0.26	0.5	0.83	1.22	1.69	2.23	2.85	3.54	4.31	5.15

The probability of a future tsunami event affecting Volusia County is very low, as indicated in the 2008 NOAA-USGS tsunami hazards assessment. However, the consequences of even a moderate tsunami striking Volusia County would devastate lives, development, and the ability of the county to function.



The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered. The figures below represent the NOAA intermediate high projection for rising coastal waters in 2040 and 2070 with storm surge.

Section 5: Figure 11: 2040 Intermediate High Storm Surge

Source: ECFRPC, Volusia County Vulnerability Assessment

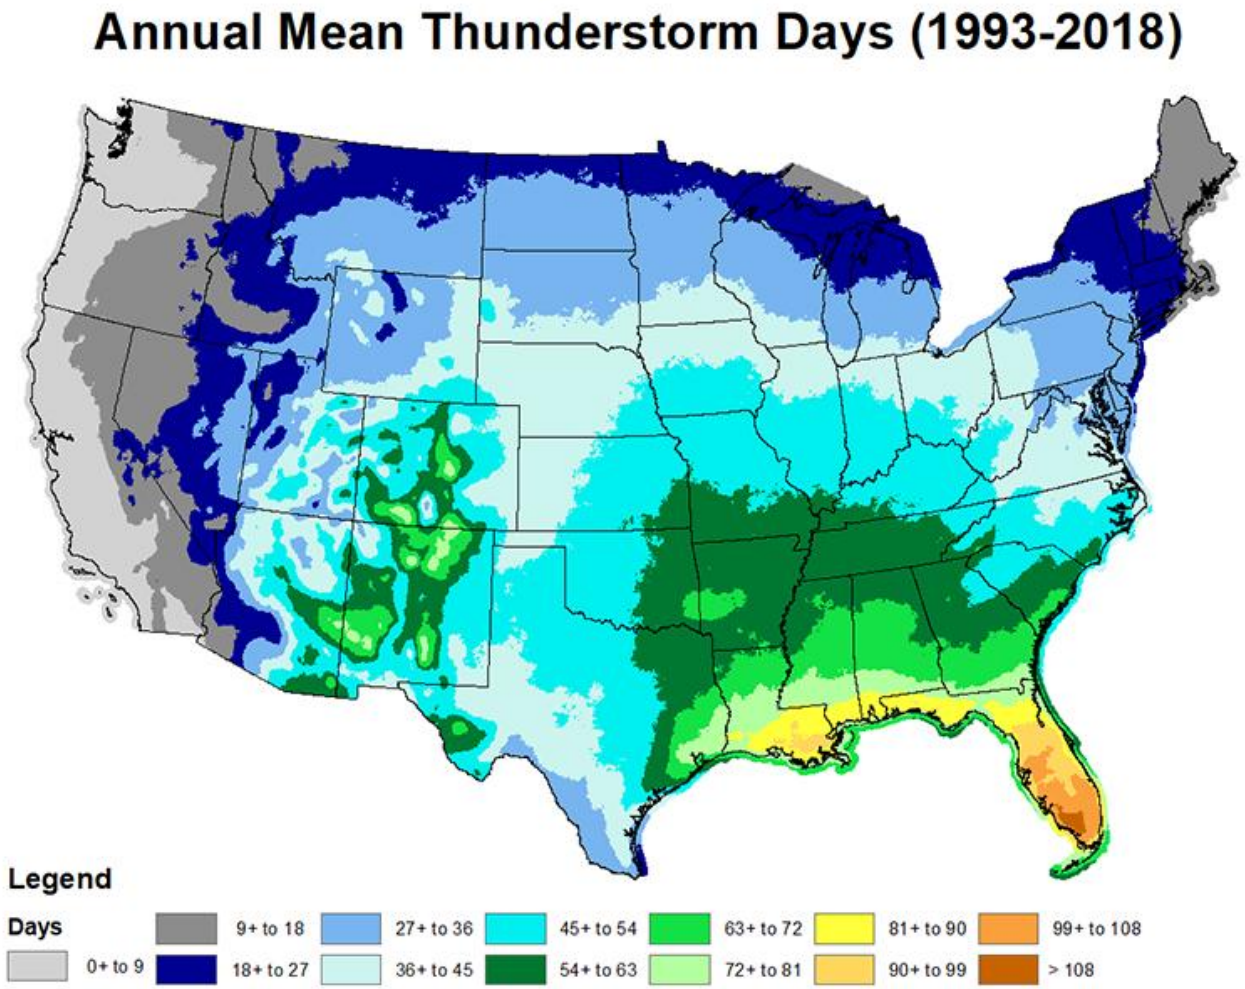
Section 5: Figure 12: 2070 Intermediate High Storm Surge

Source: ECFRPC, Volusia County Vulnerability Assessment

5.10 SEVERE WEATHER

Background

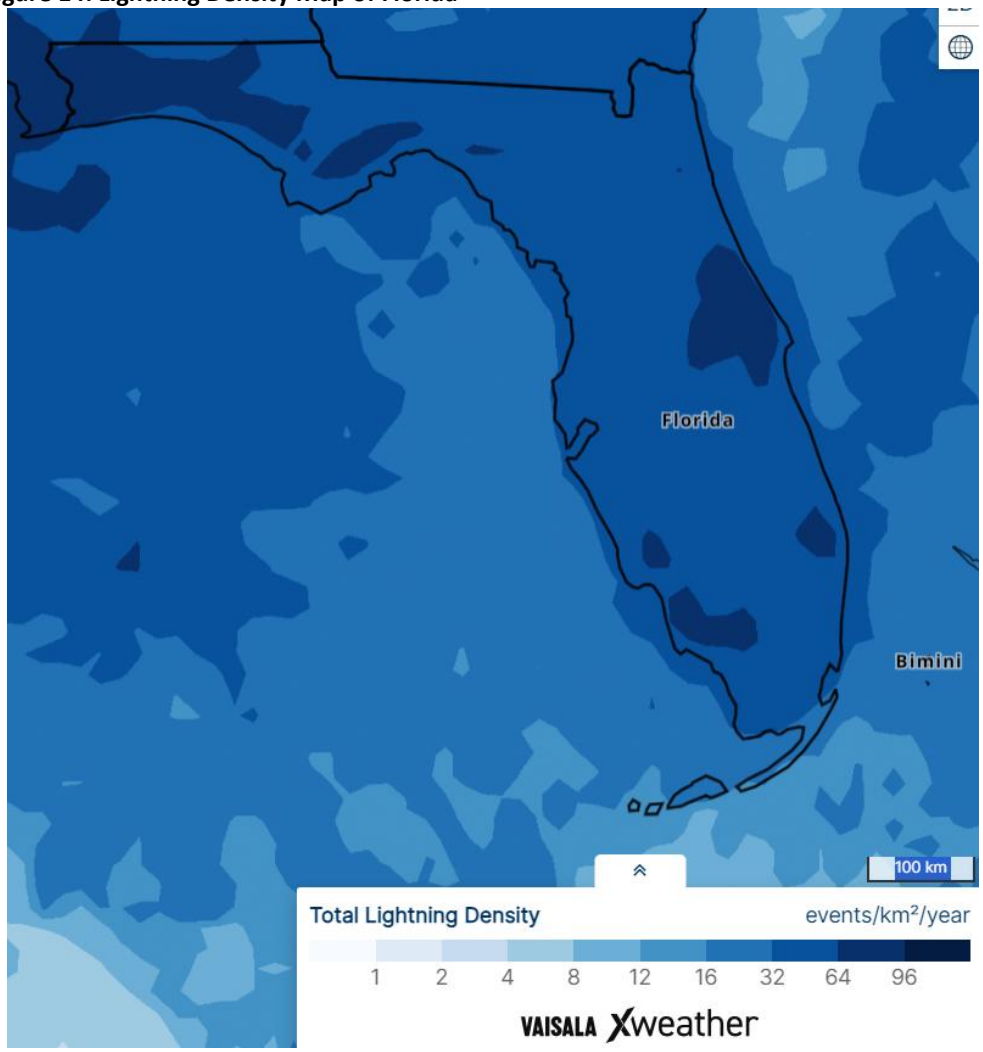
Severe weather refers to any significant or intense weather conditions that can cause damage, disruption, or pose a threat to safety. It encompasses a range of phenomena that are more extreme than typical weather conditions. Volusia County experiences severe weather in a variety of ways.



- **Hail** frequently accompanies thunderstorms and has potential to cause substantial damage. Early in the developmental stages of hail, ice crystals form within a low-pressure front due to the rapid rise of warm air into the upper atmosphere and the subsequent cooling of the air mass. Frozen droplets gradually accumulate on the ice crystals until they develop sufficient weight to fall as precipitation. Hail precipitation falls in spheres or irregularly shaped masses greater than 0.75 inches in diameter. The size of hailstones is a direct function of the size and severity of the storm. High velocity updraft winds are required to keep hail in suspension in thunderclouds. The strength of the updraft is a function of the intensity of heating at the Earth's surface. Higher temperature gradients relative to elevation above the surface result in increased suspension time and hailstone size.
- **Lightning** is a discharge of electrical energy resulting from the buildup of positive and negative charges within a thunderstorm, creating a "bolt" when the buildup of charges becomes strong enough. This flash of light usually occurs within the clouds or between the clouds and the ground. A bolt of lightning can reach temperatures approaching 50,000 degrees Fahrenheit. Lightning rapidly heats the sky as it flashes but the surrounding air cools following the bolt. This rapid heating and cooling of the surrounding air causes thunder which often accompanies lightning strikes. While most often affiliated with severe thunderstorms, lightning often strikes outside of heavy rain and might occur as far as 10 miles away from any rainfall.
    - According to FEMA, an average of 300 people are injured and 80 people are killed in the United States each year by lightning. Direct lightning strikes also can cause significant damage to buildings, critical facilities, and infrastructure. Lightning is also responsible for igniting wildfires that can result in widespread damage to property before firefighters have the ability to contain and suppress the resultant fire[19].
- **Thunderstorms** are common throughout Florida and occur throughout the year. Although thunderstorms generally affect a small area, they are very dangerous given their ability to produce accompanying hazards including high winds, hail, and lightning which all may cause serious injury or death, in addition to property damage[20].
    - According to the National Weather Service, more than 100,000 thunderstorms occur each year, though only about 10 percent of these storms are classified as "severe." A severe thunderstorm occurs when the storm produces one of three elements: 1) Hail of three-quarters of an inch; 2) Tornado; 3) Winds of at least 58 miles per hour.
    - Three conditions need to occur for a thunderstorm to form. First, it needs moisture to form clouds and rain. Second, it needs unstable air, such as warm air that can rise rapidly (this often referred to as the "engine" of the storm). Finally, thunderstorms need lift, which comes in the form of cold or warm fronts, sea breezes, mountains, or the sun's heat. When these conditions occur, air masses of varying temperatures meet, and a

[19]Wildfires are discussed in Section 5.14.
[20] Lightning and Hail are discussed in detail as separate hazards in this section.

thunderstorm is formed. These storm events can occur singularly, in lines, or in clusters. Further, they can move through an area very quickly or linger for several hours.



Severe weather can affect all jurisdictions within Volusia County and their duration can span from localized events (less than 10 minutes locally) to hours-long events (primarily in the case of hurricanes or large tropical systems).

Section 5: Figure 13: Average Annual Number of Thunder Events

Source: NOAA.

Section 5: Figure 14: Lightning Density Map of Florida

Source: Vaisala U.S. National Lightning Detection Network 2024. https://interactive-lightning-map.vaisala.com/

Location and Spatial Extent

Severe storms are common and impact the entirety of Volusia County. Volusia County and its jurisdictions are in a region of the country that is particularly susceptible to these types of events.

Hail is often produced during a thunderstorm event which has no geographic limitations on the area it affects. Therefore, it is assumed that all of Volusia County is uniformly at risk to hail events. Impacts typically include downed power lines and trees and damage to vehicles and mobile homes. In terms of extent for Volusia County, tennis ball-sized hail (2.5-inch diameter based on NOAA hail conversions) has been observed on many occasions within Volusia County and is a probable occurrence on an annual basis. Larger hail conditions are less likely, but possible. The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from hail and that future mitigation and adaptation strategies related to this hazard should be considered.

Lightning occurs randomly and is, therefore, impossible to predict where it will strike. It is assumed that all of Volusia County is uniformly exposed to lightning which strikes in very small, specific geographic areas. Impacts from lightning have included deaths and injuries, damage to electrical systems, and fires that have destroyed residential and commercial property. The most threatening and common type of lightning is cloud-to-ground lightning, where the extent of the threat causes lightning to make contact with whatever object is below. **Section 5 Figure 14** displays the spatial extent of the hazard.

Severe thunderstorms and their related hazardous elements (including lightning, hail, and straight-line winds) are not confined to any geographical boundaries and typically are widespread events. Thunderstorms can occur in all regions of the United States, but they are most common in the central and southern states because atmospheric conditions in those regions are favorable for generating these powerful storms as shown in **Section 5 Figure 13**. Therefore, it is assumed that Volusia County would be uniformly exposed to these hazards and that the extent of that impact would potentially be large. The extent of thunderstorm severity varies on an event-by-event-basis and is generally subject to the atmospheric conditions present at the time. While light thunderstorms are more common in frequency, severe thunderstorms (with associated Severe Thunderstorm Warnings) which include the added impacts of lightning and (more rarely) hail occur several times per year in Volusia County. The extent of severe thunderstorms are watches and warnings. A Severe Thunderstorm Watch is issued when severe thunderstorms are possible in and near the watch area. It does not mean that they will occur. It only means they are possible. A Severe Thunderstorm Warning is issued when severe thunderstorms are occurring or are imminent in the warning area.

Historical Occurrences

According to the National Climatic Data Center, there have been numerous recorded hail events in Volusia County as shown in **Section 5: Table 8**[21]. Hail sizes for these events range from 1.00 inches to 2.75 inches in diameter. The emergency management officials from the Volusia County jurisdiction determined that only hail that was greater than one inch in diameter was to be listed.

Seville	7/5/2008	1.00	0/0	$0	Quarter-sized hail was reported. A sea breeze thunderstorm produced hail and wind gusts in interior parts of E.C.F.
Seville	6/13/2009	1.00	0/0	$0	Numerous strong storms developed over east central Florida, with a few strengthening to severe levels and producing wind damage and large hail.
DeLeon Springs	3/31/2009	1.00	0/0	$0	A northward-lifting warm front combined with active sea breeze boundaries within an unstable atmosphere produced several severe thunderstorms with nickel to quarter sized hail and localized severe winds.
Ponce Park	2/22/2010	1.00	0/0	$0	Isolated thunderstorms developed in an unstable environment well ahead of a cold front. One of the storms became strong and produced small hail as it moved east out of the Ocala National Forest. The storm strengthened as it approached the coast, producing large hail on the barrier island east of central Daytona Beach.
Harbor Point	5/13/2011	1.00	0/0	$0	The collision of the east and west coast sea breezes formed a broken line of thunderstorms across East Central Florida. A couple of these pulse storms became severe in Orange and Volusia Counties.
Ormond by the Sea	3/31/2011	1.00	0/0	$0	A pre-frontal squall line moved rapidly across central Florida, bringing strong to severe thunderstorms with large hail and funnel clouds.
Glencoe	5/17/2012	1.75	0/0	$0	The east coast sea breeze formed in the early afternoon and

LOCATION	DATE	MAGNITUDE (inches)	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					propagated inland, eventually colliding with the west coast sea breeze over the central peninsula. Storms moved to the east and northeast and produced large hail over Brevard and Volusia Counties.
Deltona	4/20/2012	1.75	0/0	$0	Several severe thunderstorms occurred as low to mid-level southwest winds brought a warm and very moist air mass into east central Florida. Much cooler and drier air above this moisture laden air allowed for vigorous storm development which acted to produce severe wind gusts and hail in many of the thunderstorms that developed.
Barberville	4/20/2012	1.25	0/0	$0	Several severe thunderstorms occurred as low to mid-level southwest winds brought a warm and very moist air mass into east central Florida. Much cooler and drier air above this moisture laden air allowed for vigorous storm development which acted to produce severe wind gusts and hail in many of the thunderstorms that developed.
DeBary	4/20/2012	1.00	0/0	$0	Several severe thunderstorms occurred as low to mid-level southwest winds brought a warm and very moist air mass into east central Florida. Much cooler and drier air above this moisture laden air allowed for vigorous storm development which acted to produce severe wind gusts and hail in many of the thunderstorms that developed.
DeLand Osteen	5/17/2012	0.75 (DeLand) 0.88 (Osteen)	0/0	$0	The east coast sea breeze formed in the early afternoon and

LOCATION	DATE	MAGNITUDE (inches)	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Glencoe		1.75 (Glencoe)			propagated inland, eventually colliding with the west coast sea breeze over the central peninsula. Storms moved to the ENE, producing large hail over Volusia County.
Daytona Airport	6/24/2014	0.88	0/0	$0	A thunderstorm developed rapidly along the east coast sea breeze over coastal Volusia County.
DeLeon Springs	6/26/2014	0.88	0/0	$0	A weather spotter observed hail up to nickel size in De Leon Springs as a strong thunderstorm affected the area.
Deltona	5/20/2015	1.00	0/0	$0	Strong thunderstorms developed over the mainland and became severe as they interacted with the east coast sea breeze over central Volusia and eastern Seminole County. Large hail, up to quarter-sized, was reported across sections of Deltona and Oviedo.
DeLeon Springs	7/6/2015	0.75	0/0	$0	Thunderstorms developed along the west coast sea breeze and became strong as they approached Volusia County, producing small hail and some minor tree damage in De Leon Springs.
DeLeon Springs	7/6/2016	1.00	0/0	$0	An isolated thunderstorm quickly became severe and hail up to quarter size as it moved slowly southeast across Deleon Springs.
Enterprise	2/15/2017	0.88	0/0	$0	Scattered thunderstorms developed ahead of a strong cold front, bringing small hail to Enterprise in Volusia County.
Harbor Point New Smyrna Beach Enterprise	6/1/2017	1.00 – 1.25	0/0	$0	A sea breeze collision produced a severe thunderstorm over east central Volusia County during the late afternoon. Several reports of quarter to half dollar sized hail

LOCATION	DATE	MAGNITUDE (inches)	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					were received from Port Orange to New Smyrna Beach.
Enterprise	7/20/2017	1.00	0/0	$0	A collision of the east and west coast sea breeze over the interior of Central Florida produced two severe thunderstorms that resulted in quarter-sized hail in Orange and Volusia Counties. A funnel cloud was also reported in Osceola County.
Ormond Beach DeLeon Springs Daytona Beach Holly Hill	3/20/2018	1.00 – 2.00	0/0	$0	A deepening mid-level trough and associated strong cold front moved across north/central Florida. Conditions ahead and along the cold front were favorable for severe thunderstorms as 80-90 knot jet maxima produced sufficient upper level divergence. These conditions produced an enhanced risk of severe weather, sparking several rounds of severe thunderstorms, which affected Volusia, Seminole, Orange, Brevard and Okeechobee Counties.
New Smyrna Beach	4/9/2019	0.88	0/0	$0	An area of low pressure and a weak cold front moved across central Florida sparking numerous showers and thunderstorms across the area. Deep moisture was in place across the area, and instability had increased through the day due to daytime heating. The instability, combined with lift associated with the approaching cold front and cold temperatures in the middle part of the atmosphere, allowed a few thunderstorms to become severe. In Volusia County, a strong storm produced nickel sized hail. In Seminole County, damaging winds caused numerous trees to be uprooted. In Brevard County, a

LOCATION	DATE	MAGNITUDE (inches)	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					severe thunderstorm produced a strong wind gust at the Cape.
Deltona	5/4/2019	0.75 – 1.00	0/0	$0	An area of high pressure located over the central Atlantic was the dominant feature affecting weather over central Florida. This led to west to southwest winds at the surface that pushed deep moisture from the Gulf across the area. Hot daytime temperatures, and cold temperatures in the middle atmosphere provided the necessary ingredients for strong to severe thunderstorms to develop. These storms developed along the sea breezes and outflow boundaries that were produced. One thunderstorm became severe in southwestern Volusia County where it produced hail and damaging winds.
Glencoe Hucomer	5/31/2019	0.88 – 1.00	0/0	$0	The Atlantic high-pressure ridge located south of Florida resulted in southwest winds across central Florida. This pushed deep moisture over the area, and when combined with daytime heating and cold temperatures in the middle atmosphere provided conditions for showers and thunderstorms to develop. One thunderstorm in eastern Volusia County interacted with the sea breeze front. This storm quickly became severe as it moved very slowly southward over New Smyrna Beach and Edgewater, and several reports of hail were received in these areas.
Cassadaga	5/21/2020	1.00	0/0	$0	The public reported quarter sized hail near the intersection of

LOCATION	DATE	MAGNITUDE (inches)	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					Courtland Boulevard and Lockwood Boulevard in Deltona.
Orange City Deltona	8/9/2020	1.00-1.75	0/0	$0	Afternoon thunderstorms that developed along the sea breeze collision became severe, producing large hail in Volusia County, and damaging winds in Volusia and Orange Counties.
Blake	8/18/2020	1.00	0/0	$0	Numerous thunderstorms developed along the outflow boundary and sea breeze collisions. These storms produced two tornadoes in western Volusia County, including a rare August EF-2. In addition, other thunderstorms produced strong winds and hail along the Volusia and Brevard County coasts.
West Holly Hill Daytona Beach Daytona Beach Shores South Daytona Ponce Inlet Blake	3/6/2021	0.75-1.50	0/0	$0	Daytona International Speedway Emergency Management reported half dollar sized hail west of Interstate 95 near LPGA Boulevard. They also reported small hail had accumulated on the ground and was 4 to 5 inches deep in some spots.
Ormond by the Sea	4/18/2021	1.00	0/0	$0	An isolated severe thunderstorm developed over Flagler County near a stationary front. The storm moved quickly southeast along the Flagler-Volusia County line and produced large hail just south of the county line, in Ormond Beach.
New Smyrna Beach Coronado Beach	3/16/2022	1.75	0/0	$0	Numerous afternoon thunderstorms developed across east-central Florida, with several becoming severe. These severe storms produced large hail in Brevard, Seminole, and Volusia County, with wind damage to trees also occurring in Volusia County.

LOCATION	DATE	MAGNITUDE (inches)	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Orange City DeLand	5/21/2022	1.00-1.25	0/0	$0	Numerous afternoon thunderstorms developed across east-central Florida as the east coast sea breeze moved inland from the coast and eventually collided with the west coast sea breeze. Many storms became severe and produced quarter to half dollar sized hail over parts of Seminole, Volusia, and Lake Counties.
Cassadaga	6/6/2022	1.00	0/0	$0	Numerous severe thunderstorms developed across east-central Florida along the east coast sea breeze, and along the main sea breeze collision. Many storms became severe over Seminole and Volusia Counties where hail and wind damage occurred. Then, as storms moved offshore, they produced severe wind gusts along the coast in Brevard, Indian River, and Martin Counties. One storm produced an EF-0 tornado in Saint Lucie County west of Fort Pierce.
Lake Helen	5/18/2023	1.00	0/0	$0	Strong storms produced severe hail near Lake Helen in Volusia County.

Source: National Climatic Data Center

NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER

According to the National Climatic Data Center, there have been recorded lightning events in Volusia County as listed in **Section 5: Table 9**. However, these are only the lightning events that have been reported to NCDC. According to emergency managers from various Volusia County jurisdictions thousands of lightning strikes occur each day during the summer afternoon thunderstorms. For example, in 1997 the Port Orange Police Department was struck by lightning twice in a two-week period, each time knocking out the 911 consoles. In addition, during September 2007, there was a lightning event that occurred in Port Orange causing damages totaling $310,000 to a property which had an appraisal value of $350,000 and another which occurred in August 2009, in DeBary causing damages of $500,000 to a church which had burned to the ground. Volusia has the second greatest number of lightning strikes in Florida, behind the Tampa Bay area. The corridor between I-75 and I-95 in the North Central Florida area experiences a high number of lightning strikes.

Section 5: Table 9: Historical Lightning Occurrences

LOCATION	DATE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Holly Hill	7/23/1994	0/1	$0	A 17-year-old male riding a bike was hospitalized with burns to his chest after lightning struck the boy.
New Smyrna Beach	9/18/1994	1/1	$0	A fast-moving thunderstorm, which had produced rain for only a few minutes, produced the flash which struck the victims directly. One death and one injury resulted.
New Smyrna Beach	6/24/1995	0/1	$0	A lifeguard on top of a high observation tower was struck and injured by lightning.
Ormond Beach	6/28/1995	0/1	$0	A woman was injured by lightning while talking on a telephone in her home.
Daytona Beach	9/23/1995	1/1	$0	Two men were struck by a lone lightning bolt. Both men were hospitalized in critical condition. One of the two died three days later.
DeBary	6/15/1996	0/0	$285,935	Fires started by lightning destroying two condominiums.
New Smyrna Beach	6/19/1996	0/0	$100,077	Fire started by lightning severely damaged a house.
Edgewater	8/20/1997	0/1	$0	Lightning knocked a plumber unconscious while he was under a mobile home.
New Smyrna Beach	8/3/1999	0/0	$4,032	A Volusia County Sheriff's Office horse was killed by lightning while standing under a tree.
Daytona Beach	7/4/2002	0/0	$24,597	Lightning started a fire that damaged an apartment building in Daytona Beach.
Daytona Beach	7/4/2002	0/8	$0	Eight spectators were struck and injured by lightning at Daytona Beach International Speedway. Two of the victims were hospitalized. Six were treated and released at the scene.

LOCATION	DATE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Port Orange	8/3/2002	1/0	$0	A 62-year-old man was killed by lightning outside his home.
Edgewater	8/20/2002	0/0	$18,448	Lightning started a fire that damaged a carpet store in Edgewater.
Oak Hill	7/21/2003	0/0	$35,822	Fire started by lightning destroyed a mobile home.
Deltona	8/25/2003	0/0	$298,513	Fire from a lightning strike destroyed a church in Deltona.
Port Orange	9/14/2003	0/0	$298,513	Lightning struck a warehouse in Port Orange.
Daytona Beach	6/3/2004	0/2	$0	Two spectators suffered minor injuries from a lightning strike at Daytona Beach International Speedway.
Pierson	7/7/2004	0/2	$0	Two convenience store workers were briefly hospitalized after being injured by a lightning strike while working in the store kitchen.
Edgewater	5/24/2005	0/1	$0	A 27-year-old man was seriously injured by lightning while in a wooded area near Edgewater.
DeLand	7/29/2005	0/0	$0	Lightning strikes down trees and power lines in DeLand.
DeBary	5/26/2006	0/1	$0	A woman carrying a child outside was struck by lightning. The child was uninjured. The woman was transported to a hospital in critical condition.
Deltona	6/25/2007	0/0	$26,523	Lightning heavily damaged a home in Deltona.
Ponce Park	9/12/2007	0/2	$0	A small boat was struck by lightning in the Halifax River, resulting in minor injuries for two people.
DeBary	7/16/2008	0/0	$4,120	Lightning ignited a barn fire near DeBary.
DeBary	7/16/2008	0/0	$500,000	A lightning strike from an intense thunderstorm started a fire with burned a church to the ground.
Holly Hill	7/24/2009	0/1	$0	Sea breeze boundaries collided over coastal Volusia County, resulting in the rapid development of a severe storm near Ormond Beach. This cell then back-built south-southwest along a boundary during the late afternoon, producing a complex of strong to severe cells farther inland. A waterspout developed within the initial severe cell offshore of Ormond Beach and moved onto the beach as a tornado, reaching the adjacent backyard of several homes just beyond the beach. This vortex meandered

LOCATION	DATE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
				south along the beach and near-shore Atlantic waters for about ten minutes. Early in the evening, another tornado (EF-0) developed inland over Port Orange and damaged 150 mobile homes before lifting.
Daytona Beach and South Peninsula	8/05/2009	0/1	$0	Strong thunderstorms produced frequent cloud to ground lightning strikes across Volusia County. Two individuals were injured by lightning strikes in separate incidents about 30 minutes apart within Daytona Beach and South Peninsula.
DeBary	8/20/2009	0/0	$4,000	Sea breeze thunderstorms produced lightning across central Florida. Lightning ignited a barn fire near DeBary.
Blake	6/9/2015	0/1	$0	Lightning associated with thunderstorms developing along the east coast sea breeze injured a boy fishing in the water at Daytona Beach Shores.
Harbor Point	6/26/2015	1/0	$0	Thunderstorms developed over northern Volusia County along the east coast sea breeze. Lightning struck and killed a 25-year-old male in Port Orange as he worked outdoors.
Blake	6/24/2016	1/2	$0	Lightning from a thunderstorm located about 4 miles to the north struck a woman walking at waters edge on Daytona Beach Shores, resulting in a fatality.
Ponce Park	8/14/2016	0/1	$0	A severe thunderstorm produced wind damage to trees and structures in Lake County during the middle of the afternoon. About an hour later, another storm produced lightning which injured a man on a Volusia County beach.
Ellison Acres	1/7/2017	0/1	$0	A line of strong thunderstorms moved quickly east across Volusia County early in the morning, crossing Ponce Inlet prior to sunrise. A fisherman on the north jetty was injured when lightning struck his fishing pole.
Ormond by the Sea	7/22/2017	0/1	$0	Lightning struck close to a woman standing in shallow water in Ormond by the Sea, resulting in injuries.
Maytown	8/5/2017	0/0	$200,000	An afternoon thunderstorm produced a lightning strike that hit a house in Oak Hill. The house caught fire and suffered extensive damage. No injuries or fatalities were reported.

LOCATION	DATE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Ellison Acres	6/14/2018	0/3	$0	Numerous showers and thunderstorms developed along the collision of the east and west coast sea breeze in eastern Orange and eastern Seminole County. One storm became strong and produced penny-sized hail just east of Geneva. Then, as these storms pushed east towards the coast, one storm produced a lightning strike that injured three people that were near the edge of the boardwalk in New Smyrna Beach.
Harbor Point	6/21/2018	0/0	$275,000	This storm produced a severe wind gust in Melbourne Beach. In Port Orange, a home was destroyed after being struck by lightning and catching fire.
DeLand	8/28/2018	0/1	$0	A woman standing in a parking lot in DeLand was struck and seriously injured by a lightning strike.
Ormond Beach	6/9/2019	1/0	$0	A motorcyclist was killed when he was struck by lightning while on Interstate 95 in Volusia County.
Mission City	7/19/2022	1/1	$0	Lightning struck and injured two people at two different locations in New Smyrna Beach. A 27-year-old man was seriously injured and transported to a local hospital, where he later died from his injuries. A 66-year-old man suffered minor injuries after lightning struck nearby.
Deltona	5/22/2023	1/0	$0	Lightning struck and killed a 24-year-old man while he was working on a roof in Volusia County, causing him to fall off of the roof.

NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER

Section 5: Table 10 shows historic thunderstorm events, including thunderstorm winds and high winds, which resulted in property damage in Volusia County. (Other windstorms, such as tornadoes and hurricanes, are addressed separately.)

Section 5: Table 10: Historical Thunderstorm Occurrences Resulting in Property Damage

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Pierson	3/27/2000	Thunderstorm Winds	0/0	$19,572	Severe thunderstorm winds blew down trees on a house near Pierson.
Deltona	7/26/2000	Thunderstorm Winds	0/1	$15,657	Thunderstorm winds blew down power lines and trees in the Deltona Area. One woman was injured when a tree fell on her car as she was driving in Deltona.
Orange City	9/03/2000	Thunderstorm Winds	0/0	$39,143	Thunderstorm winds blew down numerous trees and power lines in Orange City. Falling trees damaged six residences.
Emporia	9/04/2000	Thunderstorm Winds	0/0	$13,048	Thunderstorm winds blew down a large shed cover at a fern nursery.
Daytona Beach	3/13/2001	Thunderstorm Winds	0/1	$38,003	Strong microburst winds hit the barrier island in Daytona Beach destroying a large tent and a beach tollbooth. One person was injured.
Daytona Beach	6/16/2001	Thunderstorm Winds	0/0	$19,002	Thunderstorm winds blew a 50-foot section off the roof of a restaurant in Daytona Beach.
New Smyrna Beach	8/21/2001	Thunderstorm Winds	0/0	$20,268	Thunderstorm winds swept across the New Smyrna Beach Airport overturning a small plane and damaging six others.
DeBary	8/05/2002	Thunderstorm Winds	0/0	$12,299	Thunderstorm winds blew down trees on a mobile home in Debary.
Deltona	3/07/2003	Thunderstorm Winds	0/0	$1,194	Thunderstorm winds blew down numerous trees and power lines in Deltona.
Deltona	3/19/2003	Thunderstorm Winds	0/0	$119,405	Strong thunderstorm winds swept across the Deltona area blowing down dozens of trees that damaged houses and vehicles.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Holly Hill	7/12/2003	Thunderstorm Winds	0/0	$21,493	Thunderstorm winds destroyed a large gas station roof awning in Holly Hill.
Osteen	4/08/2004	Thunderstorm Winds	0/0	$255,040	Thunderstorm winds produced widespread damage to a mobile home community southwest of Osteen. Many of the homes had damage to attached sunrooms, awnings and sheds. About 15 trees were blown down. The event was accompanied by a large amount of small hail.
Port Orange	6/16/2005	Thunderstorm Winds	0/0	$45,020	Thunderstorm winds overturned a mobile home and damaged two others east of Port Orange.
Daytona Beach	6/17/2005	Thunderstorm Winds	0/0	$11,255	Thunderstorm winds blew down a large tree which damaged a truck.
Deltona	5/28/2006	Thunderstorm Winds	0/0	$27,318	Thunderstorm winds downed power lines and power transformers in Deltona. downed trees
Daytona Beach International Airport	7/15/2007	Thunderstorm Winds	0/0	$21,218	Thunderstorm winds peeled back part of a roof on an apartment complex on the barrier island. A band of thunderstorms moved from central Florida to the coast and Lake Okeechobee producing hail, strong winds and funnel clouds.
DeLand	4/03/2008	Thunderstorm Winds	0/0	$1,030	Thunderstorm winds blew down large tree branches that took out power lines in DeLand. Afternoon pulse thunderstorms produced wind damage in DeLand.
Edgewater	4/05/2008	Thunderstorm Winds	0/0	$8,240	Thunderstorm winds blew down trees and power lines in Edgewater. A pre-frontal squall line produced widespread wind damage and hail across central Florida.
New Smyrna Beach	4/05/2008	Thunderstorm Winds	0/0	$12,360	Thunderstorm winds blew down trees and power lines in New Smyrna Beach. A pre-frontal squall line produced widespread wind damage and hail across central Florida.
Ormond Beach	6/19/2008	Thunderstorm Winds	0/0	$2,060	Ormond Beach dispatch reported trees down on power lines at Nova

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					Road. The daily east coast sea breeze pushed inland and produced thunderstorms over coastal sections of Central Florida.
Fatio	6/21/2008	Thunderstorm Winds	0/0	$5,150	Law enforcement reported three trees down across County Road 42. The daily east coast sea breeze pushed inland and produced thunderstorms over coastal and interior sections of Central Florida.
Beresford	6/21/2008	Thunderstorm Winds	0/0	$1,030	Law enforcement reported a large tree down across State Road 44. The daily east coast sea breeze pushed inland and produced thunderstorms over coastal and interior sections of Central Florida.
DeBary, Holly Hill, Osteen, and Daytona Beach	10/9/2008	Thunderstorm Winds	0/0	$0	A north moving warm front produced widespread thunderstorms across central Florida.
Orange City	4/14/2009	Thunderstorm Winds	0/0	$0	A squall line well ahead of a cold front produced numerous thunderstorms with damaging straight-line winds, large hail and a brief, weak tornado. Several Line Echo Wave Pattern (LEWP) features were apparent on radar with rotating comma head signatures.
Harbor Point	6/18/2009	Thunderstorm Winds	0/0	$0	Numerous strong storms impacted central Florida ahead of a stalled frontal boundary far to the north. Local sea breeze interactions combined with a large-scale outflow boundary propagating to the region prompted the storm development. Many storms produced small hail and wind gusts 45-55 mph, with two storms strengthening to severe levels and resulting in damaging wind gusts.
DeLand	6/13/2009	Thunderstorm Winds	0/0	$0	Numerous strong storms developed over east central Florida, with a few strengthening to severe levels and producing wind damage and large hail.
DeLand	3/31/2009	Thunderstorm Winds	0/0	$0	A northward-lifting warm front combined with active sea breeze

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					boundaries within an unstable atmosphere produced several severe thunderstorms with nickel to quarter sized hail and localized severe winds.
Lake Harney	8/3/2009	Thunderstorm Winds	0/0	$0	Thunderstorms along the east coast sea breeze boundary progressed inland and intensified to produce minor wind damage and a funnel cloud.
DeLand	1/21/2010	Thunderstorm Winds	0/0	$0	Numerous strong thunderstorms moved across the county, well ahead of a cold front during the late afternoon and evening. One of the storms became severe and produced localized wind damage. A funnel cloud was also observed by the Daytona Beach Airport (KDAB) weather observer.
Ormond Beach	6/3/2010	Thunderstorm Winds	0/0	$0	Numerous strong thunderstorms lifted northeast across east-central Florida from mid-afternoon through early evening. Two of the storms became severe and produced damaging winds which downed several trees and large limbs within Orange and Volusia Counties.
DeLand	8/22/2010	Thunderstorm Winds	0/0	$0	Saturated grounds from previous rains, along with recent heavy rain and 30 mph wind gusts from a thunderstorm passing 30 minutes earlier, caused a large pine tree to topple as a vehicle was traveling beneath, resulting in a fatality.
Ormond Beach	4/5/2011	Thunderstorm Winds	0/0	$0	A pre-frontal squall line crossed central Florida during the morning and early afternoon. A few of the storms became strong to severe and produced high winds and a funnel cloud, primarily across Volusia and Brevard Counties.
Volusia County	6/17/2011	Thunderstorm Winds	0/0	$0	Numerous strong to severe storms formed along the east coast sea breeze across the central Florida interior and Volusia County, producing dime to quarter sized hail and winds of 50 to 60 mph.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Volusia County	3/30/2011	Thunderstorm Winds	0/0	$0	A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph.
DeBary	3/30/2011	Thunderstorm Winds	0/0	$0	A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph.
DeBary	3/30/2011	Thunderstorm Winds	0/0	$0	A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph.
Deltona	3/30/2011	Thunderstorm Winds	0/0	$0	A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph.
DeLand	8/13/2011	Thunderstorm Winds	0/0	$5,000	An isolated severe thunderstorm developed along a boundary collision in central Volusia County and produced wind damage.
Glencoe	5/17/2012	Thunderstorm Winds	0/0	$0	The east coast sea breeze formed in the early afternoon and propagated inland, eventually colliding with the west coast sea breeze over the central peninsula. Storms moved to the east and northeast and produced large hail over Brevard and Volusia Counties.
Oak Hill	8/8/2012	Thunderstorm Winds	0/0	$0	A line of storms developed along the west coast sea breeze and intensified as it interacted with the

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					east coast sea breeze. One of the storms in this line became severe near Haulover Canal.
Volusia County	6/30/2013	Thunderstorm Winds	0/0	$0	Deep southwesterly flow led to the development of several strong to severe thunderstorms, which moved from the Orlando area to the coast of Volusia and Brevard Counties. Peak winds gusts reached 66 mph in Orlando. Thunderstorm winds also peeled back part of a roof from a home in Port Orange.
Volusia County	9/11/2013	Thunderstorm Winds	0/0	$10,000	An isolated heavy shower moved onshore from the Atlantic late at night and produced wind damage to the upper story of an apartment complex.
Deltona	12/15/2013	Thunderstorm Winds	0/0	$1,000	A broken line of showers and thunderstorms moved rapidly southeast across Volusia County. Two cells along the line caused minor wind damage to trees, but no structural damage. Part of a tree fell onto powerlines and a vehicle in Deltona, and tree limbs temporarily blocked a road in Osteen.
Coronado Beach	02/12/2014	Thunderstorm Winds	0/0	$0	A squall line developed out ahead of a cold front over the eastern Gulf of Mexico. Thunderstorms within the squall line produced damaging winds and large hail (although hail was not reported in Volusia County)
Daytona Beach	04/01/2014	Thunderstorm Winds	0/0	$0	A broken line of showers moved northeast across Volusia and Brevard Counties. A severe thunderstorm developed near the northern edge of the line and caused localized wind damage near Daytona Beach International Airport and Embry-Riddle Aeronautical University Campus.
Cassadaga Lake Helen	6/10/2014	Thunderstorm Winds	0/0	$5,000	Thunderstorms developed over the interior and produced locally damaging winds along with quarter sized hail.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Daytona Beach International Airport	6/24/2014	Thunderstorm Winds	0/0	$0	A thunderstorm developed rapidly along the east coast sea breeze over coastal Volusia County and produced severe wind gusts and hail up to nickel size at Daytona Beach Airport.
DeLeon Springs	7/14/2014	Thunderstorm Winds	0/0	$0	Strong thunderstorms moved into western Volusia County and interacted with the east coast sea breeze.
Coronado Beach	7/25/2014	Thunderstorm Winds	0/0	$245,000	An EF-1 tornado touched down within a rural airpark and affected adjacent neighborhoods. Several buildings and small planes were damaged at the airpark, and many trees were damaged or uprooted within the adjacent neighborhood as the tornado tracked northeast. The thunderstorm which produced the tornado was also responsible for wind damage to a fence and the roof of an apartment building on the barrier island in New Smyrna Beach.
Orange City	6/1/2015	Thunderstorm Winds	0/0	$0	Several strong to severe thunderstorms developed along the east coast sea breeze as it pushed inland to the Interstate 4 corridor during the afternoon and interacted with other outflow boundaries. Large hail, up to golf ball sized was reported across DeBary, Sanford, Lake Mary, Altamonte Springs and Oakland. Strong winds also felled numerous trees and large tree branches leading to damage to homes and cars in DeBary, Astatula, and Lake Mary.
Lake Helen	3/24/2016	Thunderstorm Winds	0/0	$2,000	An upper-level weather disturbance, together with a very unstable airmass and mesoscale boundaries resulted in numerous strong thunderstorms across the central Florida peninsula. Two of the storms produced large hail, from quarter to golf ball size.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Edgewater	9/13/2016	Thunderstorm Winds	0/0	$5,000	A tropical disturbance, with a well-defined surface circulation, moved onshore near Vero Beach during the early morning hours, then lifted northward along the coast to Volusia County (and beyond) through the evening. By late evening, the system was upgraded to Tropical Storm Julia, as it approached Jacksonville. A rain band associated with the system spawned an EF-0 tornado in southern Brevard County during the early afternoon, resulting in damage to a few residences. Other passing rain bands produced strong wind gusts along the coast of Brevard and Volusia Counties, one of which resulted in damage to a home in Edgewater. A funnel cloud was also sighted in Lake County.
Hucomer	9/29/2016	Thunderstorm Winds	0/0	$0	A thunderstorm became severe over southeast Volusia County and produced damage to several trees and powerlines in the town of Edgewater.
New Smyrna Beach Fatio	1/22/2017	Thunderstorm Winds	0/0	$0	An unusually strong jet stream aided development of an intense squall line which moved rapidly across east central Florida during the evening of January 22. Several thunderstorms developed ahead of the main squall line and became severe, as well as other storms within the squall line itself. Reports of quarter sized hail, wind gusts over 60 mph and funnel clouds were received. A localized area of tree damage also occurred.
DeLand Municipal Airport Holly Hill	11/23/2017	Thunderstorm Winds	0/0	$50,000	A strong thunderstorm embedded within a rain area ahead of a cold front intensified as it traveled quickly northeast across Volusia County. Mobile homes were damaged well inland in DeLand, then over 30 minutes later, the storm damaged mobile homes in

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					Daytona Beach. Rain totals reached five to seven inches in a short period of time from Ormond-by-the-Sea to Holly Hill. High levels of standing water and some impassible roadways occurred.
DeLand Municipal Airport Allandale	4/15/2018	Thunderstorm Winds	0/0	$0	The Storm Prediction Center had designated a slight change of severe weather for all of east central Florida. A high amplitude shortwave over the Mississippi River Valley quickly moved south across the Florida peninsula during the afternoon and evening hours. A cold front associated with the intensifying trough was also observed crossing the Florida peninsula. Ahead of the cold front moderate thermodynamic instability with 700mb temperatures between -7 to -8 degrees Celsius, and 500mb between -9 to -10 degrees Celsius, resulting in lapse rates of 6-6.5 C/km. 90 knot winds atop a hot streak over the north central Gulf of Mexico created resulting flow from the southwest. Numerous showers and thunderstorms developed along the cold front, eventually forming a line that crossed across all of east central Florida.
Ormond Beach	7/22/2018	Thunderstorm Winds	1/1	$0	One person was killed, and another injured in Ormond Beach when winds from a non-severe thunderstorm knocked over a large, mostly dead tree onto them.
Deltona	5/4/2019	Thunderstorm Winds	0/0	$0	An area of high pressure located over the central Atlantic was the dominant feature affecting weather over central Florida. This led to west to southwest winds at the surface that pushed deep moisture from the Gulf across the area. Hot daytime temperatures, and cold temperatures in the middle atmosphere provided the necessary

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					ingredients for strong to severe thunderstorms to develop.
DeLand	6/9/2019	Thunderstorm Winds	0/0	$0	Rich moist air was moving across the Florida peninsula as the area was sandwiched between the Atlantic high pressure to the south and a low-pressure system over the eastern half of the U.S. This combination of weather systems provided substantial energy in the atmosphere, that when combined with daytime heating and southwest winds at the surface led to the development of numerous strong thunderstorms across east central Florida. As these storms pushed across the peninsula they produced and interacted with many outflow boundaries and the east coast sea breeze. Several storms became severe as they moved over Seminole and Volusia Counties, where wind damage was reported. Also, a motorcyclist was killed when he was struck by lightning while on Interstate 95 in Volusia County.
Daytona Beach	09/18/2019	Thunderstorm Wind	0/0	$0	A strong storm came onshore in Volusia County and quickly became severe over Daytona Beach. Observations of 50 knot or greater winds occurred at three separate, but close by locations.
Fatio	04/20/2020	Thunderstorm Wind	0/0	$0	As a broken line of severe thunderstorms moved through Seminole County, one storm produced a brief waterspout/tornado on and near Lake Jesup. A second thunderstorm produced damaging winds in Volusia County, while a third thunderstorm produced damaging winds and hail in Martin County.
Cassadaga	05/28/2020	Thunderstorm Wind	0/0	$0	Scattered strong to severe storms moved across Lake and Volusia counties producing minor wind damage and small hail.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Daytona Beach	06/06/2020	Thunderstorm Wind	0/0	$5,000	A National Weather Service damage survey confirmed straight-line winds estimated at 55-65 mph impacted the Daytona Flea and Farmers Market in Daytona Beach. Damage consisted of the removal of a large portion of a corrugated roof, with metal roofing peeled back on several adjacent buildings. Roof debris was blown downwind 100 yards onto adjacent portions of Interstate 95, causing the roadway to be closed for several hours. No other damage was noted in the area and there were no injuries or fatalities.
DeBary	08/09/2020	Thunderstorm Wind	0/0	$0	Afternoon thunderstorms that developed along the sea breeze collision became severe, producing large hail in Volusia County, and damaging winds in Volusia and Orange Counties.
Coronado Beach	08/18/2020	Thunderstorm Wind	0/0	$0	Numerous thunderstorms developed along the outflow boundary and sea breeze collisions. These storms produced two tornadoes in western Volusia County, including a rare August EF-2. In addition, other thunderstorms produced strong winds and hail along the Volusia and Brevard County coasts.
DeLand	08/20/2020	Thunderstorm Wind	0/0	$0	A thunderstorm became severe as it moved north through DeLand where it caused damage to planes and hangers at the airport, as well as nearby homes.
Samsula	10/28/2021	Thunderstorm Wind	0/0	$1,000	Numerous thunderstorms were moving across Volusia County, where one storm became strong and produced localized wind damage in New Smyrna Beach.
DeLand	03/01/2022	Thunderstorm Wind	0/0	$10,000	A strong thunderstorm that moved through DeLand in Volusia County produced minor wind damage that resulted in old trees falling into several power lines.

LOCATION	DATE	TYPE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Samsula	03/16/2022	Thunderstorm Wind	0/0	$0	Numerous afternoon thunderstorms developed across east-central Florida, with several becoming severe. These severe storms produced large hail in Brevard, Seminole, and Volusia County, with wind damage to trees also occurring in Volusia County.
Edgewater	07/19/2022	Thunderstorm Wind	0/0	$3,000	Strong thunderstorms that developed along the sea breeze collision moved east and offshore of Volusia County. One storm became severe where it produced wind damage in Edgewater.
Orange City	08/17/2022	Thunderstorm Wind	0/0	$4,000	A thunderstorm became severe in western Volusia County where it produced tree and powerline damage in Orange City.

Source: National Climatic Data Center

NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER

Probability of Future Occurrences

Severe weather events will continue to have high occurrences in the future. Based on the frequency of hail events in the past, the probability of future hail occurrences in Volusia County is high. Over the past 45 years, Volusia County has been impacted by two or more hail events per year. It can be expected that future hail events will continue to cause minor to severe damage to property and vehicles throughout Volusia County.

The probability of occurrence for future lightning events in Volusia County is high. According to NOAA, Volusia County is in an area of the country that experiences 8-16 lightning flashes per square kilometer per year (approximately 20,224 to 40,448 flashes countywide per year). Given this regular frequency of occurrence, it can be expected that future lightning events will continue to threaten life and property throughout Volusia County.

Thunderstorms are frequent in Volusia County. During the summer, Volusia County experiences thunderstorms nearly every afternoon. They will undoubtedly continue to occur, thereby threatening the lives, safety, and property in Volusia County. Therefore, the probability of future occurrences is high.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from thunderstorms and that future mitigation and adaptation strategies related to this hazard should be considered.

5.11 TORNADO

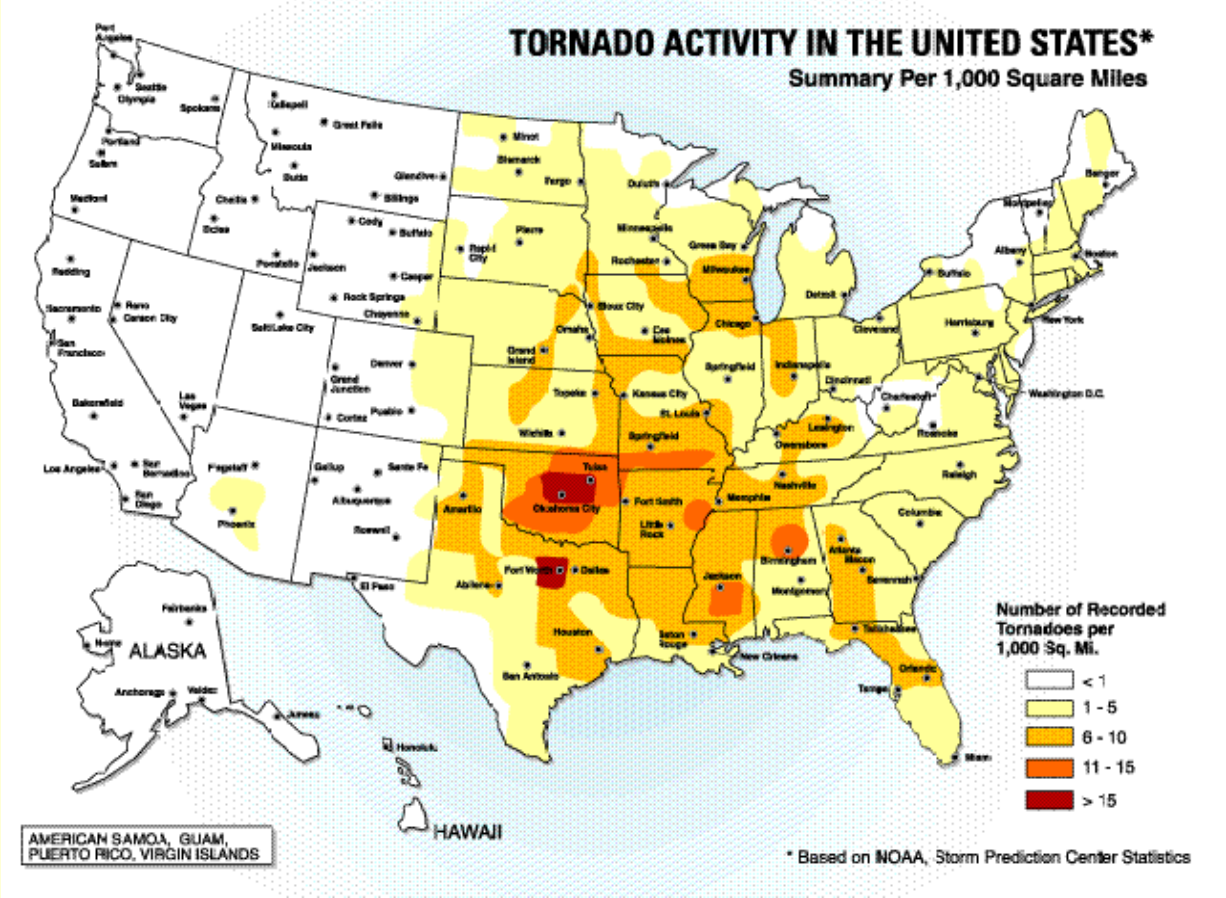
Background

A tornado is a violent windstorm characterized by a twisting, funnel-shaped cloud extending to the ground. Tornadoes are most often generated by thunderstorm activity (but sometimes result from hurricanes and other tropical storms) when cool, dry air intersects and overrides a layer of warm, moist air forcing the warm air to rise rapidly. The damage caused by a tornado is a result of the high wind velocity and wind-blown debris, also accompanied by lightning or large hail. According to the National Weather Service, tornado wind speeds normally range from 40 to more than 300 miles per hour and are a few yards wide. The most violent tornadoes have rotating winds of 250 miles per hour or more and can cause extreme destruction, carving a path over a mile wide and several miles long and turning normally harmless objects into deadly missiles.

Over 800 tornadoes are reported nationwide annually, resulting in an average of 80 deaths and 1,500 injuries (NOAA, 2007). They are more likely to occur during the months of March through May and can occur at any time of day but are likely to form in the late afternoon and early evening. Further, the tornadoes associated with tropical cyclones are most frequent in September and October when the incidence of tropical storm systems is greatest. The destruction caused by tornadoes ranges from light to inconceivable depending on the intensity, size and duration of the storm. Typically, tornadoes cause the greatest damage to structures of light construction, including residential dwellings (particularly mobile homes). The magnitude of tornadic activity is reported using the Enhanced Fujita Scale. However, tornado magnitudes prior to 2005 were classified using the traditional version of the Fujita Scale.

Section 5: Table 11: Enhanced Fujita Scale for Tornadoes (Effective 2005 and after)

F-SCALE NUMBER	INTENSITY	WIND SPEED (MPH)	TYPE OF DAMAGE DONE
F0	GALE	65–85	Some damage to chimneys; breaks branches off trees; pushes over shallow-rooted trees; damages to sign boards.
F1	MODERATE	86–110	Peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed.
F2	SIGNIFICANT	111–135	Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated.
F3	SEVERE	136–165	Roof and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted.
F4	DEVASTATING	166–200	Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown and large missiles generated.
F5	INCREDIBLE	Over 200	Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel re-enforced concrete structures badly damaged.



Section 5: Table 12: The Fujita Scale (Effective Prior to 2005)

F-SCALE NUMBER	INTENSITY	WIND SPEED (MPH)	TYPE OF DAMAGE DONE
F0	GALE	40–72	Some damage to chimneys; breaks branches off trees; pushes over shallow-rooted trees; damages to sign boards.
F1	MODERATE	73–112	Peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed.
F2	SIGNIFICANT	113–157	Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated.
F3	SEVERE	158–207	Roof and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted.
F4	DEVASTATING	208–260	Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown, and large missiles generated.
F5	INCREDIBLE	261–318	Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel re-enforced concrete structures badly damaged.
F6	INCONCEIVABLE	319–379	These winds are very unlikely. The small area of damage they might produce would probably not be recognizable along with the mess produced by F4 and F5 wind that would surround the F6 winds. Missiles, such as cars and refrigerators would do serious secondary damage that could not be directly identified as F6 damage. If this level is ever achieved, evidence for it might only be found in some manner of ground swirl pattern, for it may never be identifiable through engineering studies.

Source: National Weather Service

According to the NOAA Storm Prediction Center (SPC), the highest concentration of tornadoes in the United States has been in Oklahoma, Texas, Kansas and Florida. Although the Great Plains region of the Central United States does favor the development of the largest and most dangerous tornadoes (earning the designation of "tornado alley"), Florida experiences the greatest number of tornadoes per square mile of all U.S. states (SPC, 2002). **Section 5: Figure 15** shows tornado activity in the United States based on the number of recorded tornadoes per 1,000 square miles.

Section 5: Figure 15: U.S. Tornado Activity

Source: Federal Emergency Management Agency

Location and Spatial Extent

Based on historic data, tornadoes occur throughout the state of Florida at a rate of 1-10 confirmed touchdowns per 1,000 square miles. Florida tornadoes typically impact a relatively small area; however, events are completely random, and it is not possible to predict specific areas that are more susceptible to a tornado strike over time. Therefore, it is assumed that all of Volusia County and its jurisdictions are uniformly exposed to this hazard. **Section 5 Figure 16** displays were where the hazard has been identified.

April, May, and June are considered the peak months for Florida tornadoes. A review of historical data shows that tornadoes within Volusia County are typically in the F0, F1 and, more rarely, the F2 range. F3 and F4 tornadoes are very rare, with three occurring since 1950. The county has never experienced a F5 tornado on record.

Historical Occurrences

According to the National Climatic Data Center, these events occurred in the Volusia County study area as listed in **Section 5: Table 13**.

New Smyrna Beach	11/2/1997	F3	0/32	$19,566,485	A rapidly intensifying tornado initially touched down in New Smyrna Beach about 1 mile west of U.S. Highway 1 between Enterprise and Wayne Avenues. The tornado moved east northeast at about 50 mph damaging several homes and downing trees and power lines. It lifted just west of Highway 1 after passing Chisholm Elementary School. The tornado then struck New

LOCATION	DATE	MAGNITUDE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					Smyrna Beach High School producing Fujita Scale F1 damage. As the tornado intensified to a strong F3 category, it passed through the Venetian Villas subdivision and the Diamond Head Condominiums. A number of large well-built homes were destroyed. Many of the units in the 10 story Diamond Head Condominiums received major damage as high winds blew out exterior glass walls and blew furniture into the adjoining Indian River Lagoon. The tornado then crossed the Intracoastal Waterway and passed over the barrier island between Robinson Road and East Street where a number of large well-built homes were almost completely destroyed. The tornado then moved over the Atlantic Ocean. In all 32 people were injured, six requiring hospitalizations. Thirty-one homes were destroyed and 290 were damaged. Damage estimates were near 14 million dollars.
Emporia	2/16/1998	F0	0/0	$111,808	Sixteen mobile homes were damaged, and one was destroyed.
Daytona Beach	2/22/1998	F2	1/3	$5,504,681	This tornado cell caused extensive damage and two deaths throughout Volusia County. In Daytona Beach one person was killed and three others were injured while in a mobile home. In Osteen, a man staying in a recreational vehicle was killed.
Osteen	2/23/1998	F3	1/0	$1,376,170	
Oak Hill	2/23/1998	F2	0/0	$688,085	
Port Orange	7/28/1998	F0	0/0	$137,617	Thirty-three mobile homes were damaged with this F0 tornado.
New Smyrna Beach	9/17/2000	F0	0/0	$13,048	This tornado caused minor damage including power outages and downed signs and trees.
Daytona Beach	3/13/2001	F1	0/5	$6,333,850	This F1 damaged over 100 houses and dozens of vehicles, many due to fallen trees. Five people were injured.

LOCATION	DATE	MAGNITUDE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
New Smyrna Beach	9/14/2001	F0	0/0	$70,939	This tornado was a result of a rainstorm associated with Tropical Storm Gabriel. Twelve mobile homes were damaged and three were destroyed.
Daytona Beach	8/8/2004	F0	0/0	$0	A waterspout came ashore, blowing branches from trees.
South Daytona	8/13/2004	F1	0/0	$0	This tornado cell was associated with Hurricane Charley. It caused minor damage to homes, commercial buildings, and trees.
Daytona Beach Shores	8/13/2004	F0	0/1	$0	
DeLand	12/25/2006	F2	0/5	$2,731,818	An F2 tornado touched down just west of North Stone Street in DeLand and moved northeast crossing Highway 17. It moved across the Fernwood mobile home community and continued northeast over Meadowlea Estates mobile home community. It lifted just north of Carter Road. Fifty-two residences were destroyed and 162 were damaged. Five people were seriously injured.
Daytona Beach International Airport	12/25/2006	F2	0/6	$54,636,350	The same system that caused fived injuries and damaged 162 homes in DeLand touched down at Daytona Beach International, destroying 40 Embry Riddle University aircraft and the two-story administration building. East of Embry Riddle Aeronautical University, 48 apartments units were destroyed and 200 were damaged.
Beresford	2/2/2007	F3	0/42	$55,166,800	The tornado that killed 13 people in Lake County moved east across the St. Johns River, crossed into Volusia county at Lake Beresford and moved across DeLand as an F3 tornado. It was still moving east northeast at 50 MPH as it damaged 277 and destroyed 106 residences in the DeLand area. There were no fatalities in Volusia County but 42 people were injured.
New Smyrna Beach (Airport)	2/2/2007	F1	0/0	$6,365,400	

LOCATION	DATE	MAGNITUDE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
Lake George	7/7/2007	F0	0/0	$31,827	Tornado-force winds caused damage to a restaurant and apartment complex.
Port Orange and Ormond Beach	7/24/2009	F0	0/1	$ 2,500,000	This tornado was caused by a sea breeze merger, when winds from both coasts meet and cause the rotation. Although it was classified as the mildest of twisters, it caused damage to 163 homes in Port Orange. Of these, seven were totally destroyed, eight had major damage, and twenty-six had moderate damage. The same system produced a waterspout that came ashore in Ormond Beach, destroying a catamaran.
Edgewater	8/7/2010	F0	0/0	$58,000	A waterspout formed within a thunderstorm over the intracoastal river, then moved onshore the adjacent barrier island in New Smyrna Beach and produced minor damage as it crossed to the Atlantic coast.
Edgewater	8/11/2010	F0	0/0	$5,000	Scattered thunderstorms trained northward near the Florida east-central coast, within a strong southerly flow due in part to the presence of Tropical Depression Five remnants near the central Gulf coast. Around mid-day, a waterspout developed over the intracoastal river and moved onshore the mainland in Edgewater, producing minor damage. Several hours later, another storm developed rotation and produced a brief touchdown in a

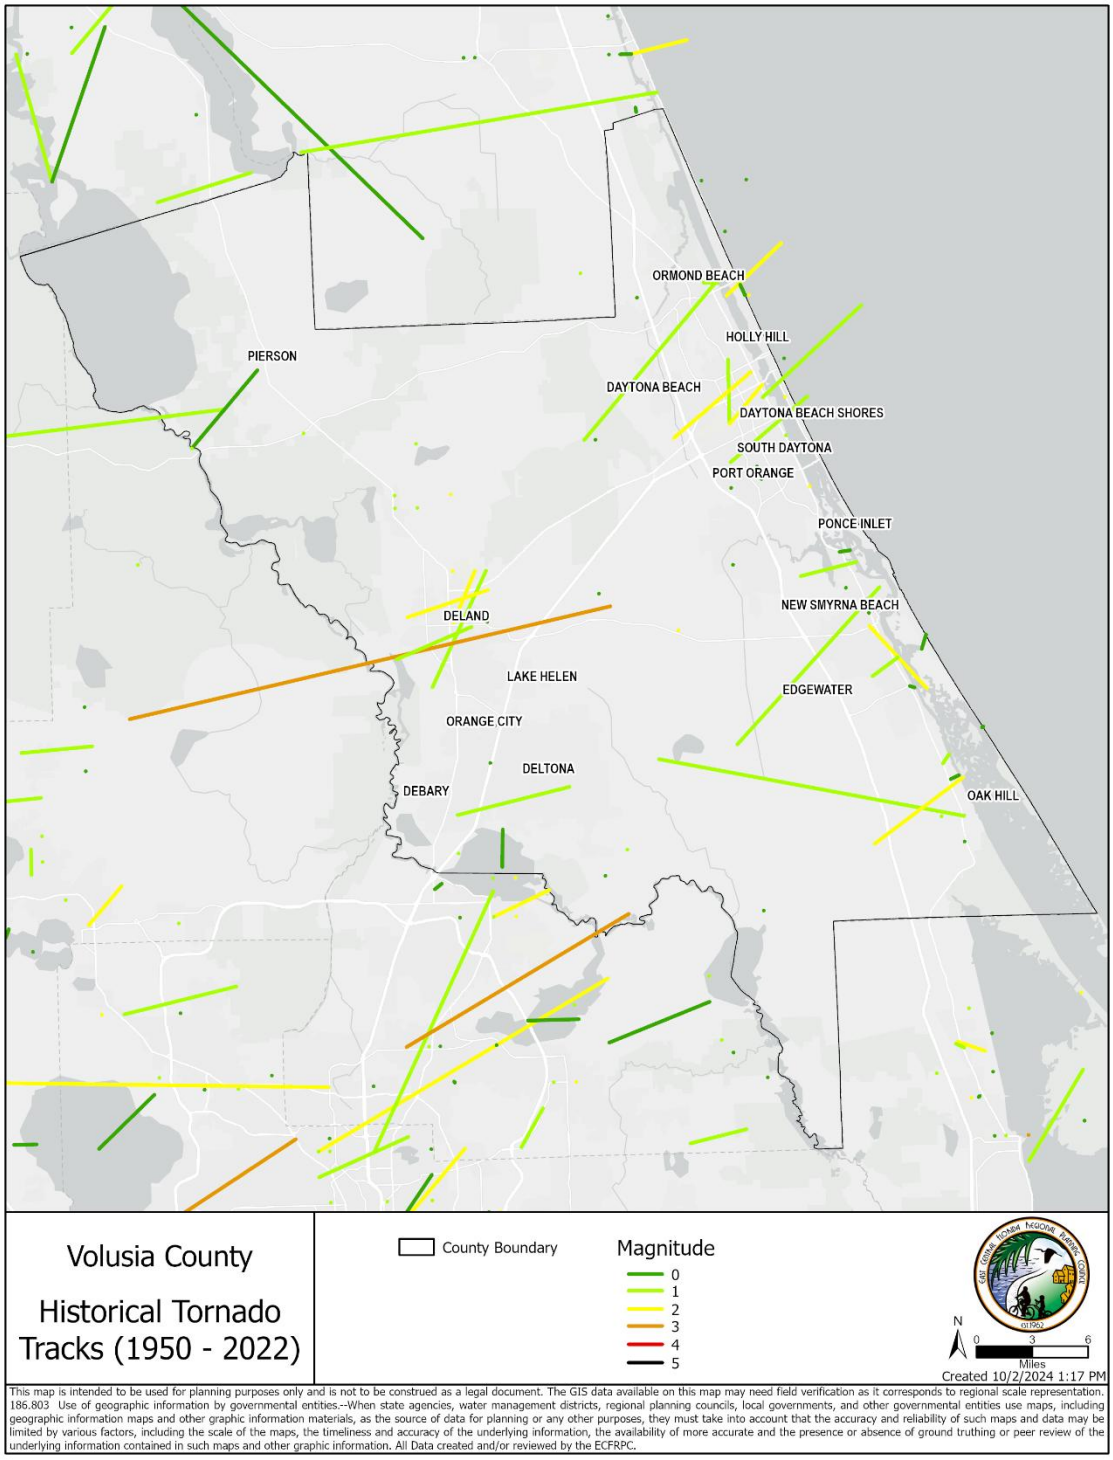
					wooded area, farther inland over southern Volusia County.
Glencoe	8/11/2010	F0	0/0	$0	Scattered thunderstorms trained northward near the Florida east-central coast, within a strong southerly flow due in part to the presence of Tropical Depression Five remnants near the central Gulf coast. Around mid-day, a waterspout developed over the intracoastal river and moved onshore the mainland in Edgewater, producing minor damage. Several hours later, another storm developed rotation and produced a brief touchdown in a wooded area, farther inland over southern Volusia County.
Volusia County	12/10/2012	F0	0/0	$1,000	Very moist southwest winds developed across east-central Florida well in advance of a cold front and associated upper level disturbance. Strong daytime heating, combined with moderate low-level wind shear, resulted in numerous strong storms, two of which produced tornadoes. The first tornado began as a waterspout over Lake Apopka, then crossed the northeast shore of the lake and remained on the ground for a short distance. Although the waterspout/tornado affected a rural area, several citizens witnessed the event. The second tornado impacted a mobile home park and adjacent wooded area in Edgewater, then became a waterspout as it crossed the intracoastal river, before moving across the barrier island as a tornado. Significant damage occurred at the mobile home park, with only minor damage on the barrier island. Several funnel clouds were also observed.
Volusia County	12/10/2012	F1	0/2	$1.7 Million	
Edgewater	7/25/2014	F0	N/A	N/A	A tornado struck down in Edgewater at Park Avenue and Wildwood Drive near Massey Air Park at 4:30pm, causing damage to several hangars



LOCATION	DATE	MAGNITUDE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					and planes. Winds reached 65 to 85 mph.
Ormond Beach	9/10/2017	F1	0/0	$0	Associated with Hurricane Irma.
Ariel	6/9/2018	F0	0/0	$10,000	After storms developed over Orlando, they pushed east towards the southeastern Volusia County coastline. One storm managed to produce a very weak, short-lived tornado (land spout) in Oak Hill.
Beresford	01/04/2020	EF1	0/0	$25,000	A severe thunderstorm moving across central Florida produced two tornadoes, one in Okahumpka in Lake County, then another in DeLand in Volusia County.
Enterprise	06/06/2020	EF0	0/0	$0	A waterspout that came onshore and developed into a tornado. Based on this report, along with only minor damage to trees near the lakefront, peak winds were estimated between 45 and 55 mph.
DeLand	08/18/2020	EF2	1/0	$8,010,339	The tornado generally tracked east-northeast across the city resulting in many downed medium to large tree branches, downed power lines, and numerous large trees being uprooted, which led to many local and major roadways being blocked. Many homes and vehicles suffered moderate to major damage as large tree branches or entire trees fell on them. There were 163 damaged structures, with 49 sustaining minor damage, 40 sustaining major damage, and 5 that were destroyed.
Orange City	08/18/2020	EF0	0/0	$40,000	The tornado tracked along a 0.1 mile long path, with maximum winds estimated between 65-75 mph. The tornado had a maximum width of approximately 70 yards.
Isleboro	08/02/2021	EF0	0/0	$0	Based on information provided by the Volusia County Sheriffs Office, a short-lived tornado touched down just west of U.S. Highway 1, near the

LOCATION	DATE	MAGNITUDE	DEATHS/ INJURIES	PROPERTY DAMAGE	DESCRIPTION
					intersection of Sleepy Hollow Road, in New Smyrna Beach. Peak winds are estimated around 55-65 mph.
Coronado Beach	07/22/2023	EF0	0/0	$0	Thunderstorms produced a landspout tornado in Volusia County and a severe wind gust in Brevard County.

NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER

Section 5: Figure 16: Locations of Historical Tornado Events in Volusia County

Source: National Oceanic and Atmospheric Administration

Probability of Future Occurrences

The probability of a future tornado affecting Volusia County is high. According to historical records, Volusia County experiences, on average, more than one (1.2) confirmed tornado event annually. While many of these events are small in terms of size, intensity and duration, a greater number of stronger storms (i.e., F2 and F3 tornadoes) have been reported in the past decade. Further, even minor tornadoes can cause substantial damage. In conclusion, tornadoes pose a significant threat to lives and property in Volusia County.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from tornadoes and that future mitigation and adaptation strategies related to this hazard should be considered.

5. TROPICAL CYCLONES

Background

Hurricanes and tropical storms are classified as tropical cyclones and defined as any closed circulation developing around a low-pressure center in which the winds rotate counterclockwise in the Northern Hemisphere (or clockwise in the Southern Hemisphere) and whose diameter averages 10 to 30 miles across. A tropical cyclone refers to any such circulation that develops over tropical waters. Tropical cyclones act as a "safety-valve," limiting the continued build-up of heat and energy in tropical regions by maintaining the atmospheric heat and moisture balance between the tropics and the pole-ward latitudes. The primary damaging forces associated with hurricanes and tropical storms are high-level sustained winds, heavy precipitation, and tornadoes. Coastal areas are also vulnerable to the additional forces of storm surge, wind-driven waves and tidal flooding which can be more destructive than cyclone wind.

The key energy source for a tropical cyclone is the release of latent heat from the condensation of warm water. Their formation requires a low-pressure disturbance, warm sea surface temperature, rotational force from the spinning of the earth and the absence of wind shear in the lowest 50,000 feet of the atmosphere. Many hurricanes and tropical storms form in the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico during the official Atlantic hurricane season, which encompasses the months of June through November. The peak of the Atlantic hurricane season is early to mid-September, and the average number of storms that reach hurricane intensity per year in this basin is about six.

As an incipient hurricane develops, barometric pressure (measured in millibars or inches) at its center falls and winds increase. If the atmospheric and oceanic conditions are favorable, it can intensify into a tropical depression. When maximum sustained winds reach or exceed 39 miles per hour, the system is designated a tropical storm, given a name, and is closely monitored by the National Hurricane Center in Miami, Florida. When sustained winds reach or exceed 74 miles per hour the storm is deemed a hurricane. Hurricane intensity is further classified by the Saffir-Simpson Scale (**Section 5: Table 14**), which rates hurricane intensity on a scale of 1 to 5, with 5 being the most intense[22].

Section 5: Table 14: Saffir-Simpson Scale

CATEGORY	MAXIMUM SUSTAINED WIND SPEED (MPH)	MINIMUM SURFACE PRESSURE (MILLIBARS)	STORM SURGE (FEET)
Tropical Storm	39–73	n/a	0–2
1	74–95	Greater than 980	3–5
2	96–110	979–965	6–8
3	111–129	964–945	9–12
4	130–156	944–920	13–18
5	157 +	Less than 920	19+

Source: National Hurricane Center

The Saffir-Simpson Scale categorizes hurricane intensity linearly based upon maximum sustained winds, barometric pressure and storm surge potential, which are combined to estimate potential damage.

[22] Although a tropical storm is not part of the Saffir-Simpson Scale, it is listed here for comparative purposes.

Categories 3, 4, and 5 are classified "major" hurricanes. Hurricanes within this range comprise only 20 percent of total tropical cyclone landfalls, but they account for over 70 percent of the damage in the United States. **Section 5: Table 15** describes the damage that could be expected for a tropical storm and each category of hurricane. Damage during hurricanes may also result from spawned tornadoes, storm surge and inland flooding associated with heavy rainfall that usually accompanies these storms.

Section 5: Table 15: Hurricane Damage Classifications

STORM CATEGORY	DAMAGE LEVEL	WIND SPEED	DESCRIPTION OF DAMAGES	PHOTO EXAMPLE
Tropical Storm	MINOR	39-73 mph	Breaks twigs and branches off trees, damages signboards, and windows may break.	
1	MINIMAL	74-95 mph	No real damage to building structures. Damage primarily to unanchored mobile homes, shrubbery, and trees. Also, some coastal flooding and minor pier damage.	
2	MODERATE	96-110 mph	Some roofing material, door, and window damage. Considerable damage to vegetation, mobile homes, etc. Flooding damages piers and small craft in unprotected moorings may break their moorings.	
3	EXTENSIVE	111-129 mph	Some structural damage to small residences and utility buildings, with a minor amount of curtainwall failures. Mobile homes are destroyed. Flooding near the coast destroys smaller structures, with larger structures damaged by floating debris. Terrain may be flooded well inland.	
4	EXTREME	130-156 mph	More extensive curtainwall failures with some complete roof structure failure on small residences. Major erosion of beach areas. Terrain may be flooded well inland.	
5	CATASTROPHIC	157+ mph	Complete roof failure on many residences and industrial buildings. Some complete building failures with small utility buildings blown over or away. Flooding causes major damage to lower floors of all structures near the shoreline. Massive evacuation of residential areas may be required.

Location and Spatial Extent

Tropical cyclones threaten the entire Atlantic and Gulf seaboard of the United States. Coastal jurisdictions are directly exposed to the brunt of a land-falling storm due to where the hazards occur, but its impact is often felt hundreds of miles inland. Volusia County is susceptible to all the hazards wrought by hurricanes and tropical storms as shown **Section 5 Figure 17**. All areas throughout the county are susceptible to the accompanying hazard effects including extreme wind, flooding, and tornadoes. In addition, the coastal areas of the county are extremely susceptible to the added effects of rising coastal water (storm surge and others), wave action, coastal erosion and tidal flooding[23]. This includes the cities and towns of Ormond Beach, Holly Hill, Daytona Beach, South Daytona, Daytona Beach Shores, Port Orange, Ponce Inlet, New Smyrna Beach, Edgewater and Oak Hill.

The extent of tropical cyclones in terms of strength in Volusia County is consistent when reviewing historical data. Storms hitting the county are primarily in the Tropical Storm to Category 1 range, with winds seldom exceeding 95 miles per hour. A hurricane of any size could impact the entire county.

Historical Occurrences

Section 5: Table 16 provides for each event the date of occurrence, name (if applicable), maximum wind speed (as recorded within 100 miles of Volusia County) and Category of the storm based on the Saffir-Simpson Scale.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from hurricanes that future mitigation and adaptation strategies related to this hazard should be considered.

[23] Distinct hazard area locations for flooding, rising coastal water, and coastal erosion are discussed elsewhere in this section.

Section 5: Figure 17: Historical Storm Tracks within 75 Miles of Volusia County

Source: National Oceanic and Atmospheric Administration

Some of the notable tropical cyclone events that occurred in Volusia County within the last two decades are described below:

Tropical Storm Gordon, 1994: Tropical Storm Gordon made landfall in South Florida on November 13, 1994. Gordon caused a total of 8 deaths, 43 injuries, and $400 million in damages ($605,793,853; 2009 dollars). It affected a number of Florida Counties, including Dade and Brevard, but Volusia was hit especially hard. Volusia County experienced $500,000 in both agricultural and property damage. Single-family, multi-family, and mobile home structures (a total of 1236 units) reported flood damage and losses were estimated at over $26 million.

Hurricane Floyd, 1999: On September 15, 1999, the center of Hurricane Floyd passed about 115 statute miles off the coast of Central Florida, causing substantial damage to the coastal counties of Brevard and Volusia. Winds gusts near 70 miles per hour were reported in both counties. In total, Floyd caused over $61 million in property damage, but there were no reports of deaths or injuries ($81,978,899; 2009 dollars). Over $42 million in damages were reported in Volusia County, $10 million of which was attributed directly to coastal erosion. In addition, over 300 homes were damaged by wind and trees.

Hurricane Irene, 1999: Hurricane Irene reached hurricane status over the Florida Straits and the calm of the center moved over Key West on October 15, 1999. Most of the hurricane force winds were confined to the east of Irene's center over the lower to middle Keys. As Hurricane Irene moved across Southeast Florida, it brought tropical storm conditions with sustained winds between 39 and 73 miles per hour. Hurricane Irene caused considerable damage in South Florida due to flooding. In some residential areas, flooding lasted for a week, displacing several hundred people and isolating thousands more. Volusia County estimated that damages to approximately 185 properties; totaling more than $16.8 million. The total losses (agricultural and property) were estimated near $800 million in of the state of Florida. An estimated 700,000 customers lost electricity. There were eight indirect deaths reported in Florida.

Hurricane Charley, 2004: Hurricane Charley produced wind gusts over 80 miles per hour as it traversed Volusia County on August 13, 2004. The storm caused over $106 million in property damage in Volusia County. In addition, two fatalities were attributed to Hurricane Charley. Widespread power outages, roadway flooding, and fallen trees also occurred. A strong F1 tornado also touched down in South Daytona Beach contributing to the total damage from the event.

Hurricane Frances, 2004: Hurricane Frances, a Category 2 storm, made landfall on September 4, 2004, in Martin County, Florida. As it moved north, Volusia County experienced a hurricane force wind for several hours. Daytona Beach International Airport recorded wind gusts of 94 miles per hour. In addition to wind impacts, over 13 inches of rain fell in Volusia County which caused substantial flooding. Wind and flooding impacts resulted in damages of over $390 million within Volusia County. Total damage estimates for all impacted counties include over $4.8 billion for property damage and $93.2 million for crop damage. Despite widespread and severe damage, no deaths or injuries were reported.

Hurricane Jeanne, 2004: Hurricane Jeanne made landfall on the east coast of Florida on September 26, 2004, with winds estimated at 120 mph. Widespread rainfall of up to eight inches accompanied Hurricane Jeanne as it moved across eastern, central and northern Florida. A narrower band of 11 to 13 inches was observed in the vicinity of the eye wall track over Osceola, Broward and Indian River counties of east central Florida. A storm surge of approximately four feet above normal astronomical tide levels was measured at Trident Pier at Port Canaveral, Florida about an hour after landfall. Storm surge flooding of

up to six feet above normal tides likely occurred along the Florida east coast from the vicinity of Melbourne southward to Ft. Pierce. Damages were estimated to be over $59 million in Volusia County. The American Insurances Service Group reported that Frances caused a total of $4.11 billion in Florida. There were three direct deaths reported in Florida, with total deaths exceeding 3,000.

Tropical Storm Fay, 2008: Moving over Key West, Tropical Storm Fay made its first Florida landfall on August 18, 2008. As the tropical storm drifted north in Volusia County offshore waters, hours of heavy rain fell across southern Volusia County. Tropical Storm Fay's primary impact was inland flooding. Rainfall amounts ranged from three to five inches over Miami-Dade and Broward counties and seven to 10 inches over northern Collier, Hendry and Glades counties near the center path of Fay. Storm surges were relatively minimal for this tropical storm. In Florida, wind damage was confined to mostly downed trees and power lines, plus minor roof damage to homes. Homes, personal property and motor vehicles were the primary damage losses in the United States. Volusia County reported damages in excess of $13.5 million. The total damage estimate, compiled by Property Claim Services, is $245 million, including $195 million in Florida. Flood damage losses reported by the National Flood insurance Program were about $36 million.

Tropical Storm Sandy, 2012: A New Smyrna Beach mesonet site (XNSB) recorded sustained north winds of 43 mph and other spotter reports confirmed tropical storm winds along the immediate coast of Volusia County. Gusts of 50-55 mph occurred, especially during passing squalls. Hurricane Sandy moved slowly northwest, parallel to the Florida Coast, approximately 200-250 miles offshore.

Hurricane Matthew, 2016: Matthew paralleled the Florida coast, remaining just offshore as a Category 3 hurricane. The eye reached its closest point of approach to land, only 25 miles east of Cape Canaveral near 0800LST on October 7, and was 35 miles east of Daytona Beach around 1100LST, as it continued moving northwest, just offshore the northeast Florida coast. Hurricane force winds (sustained or frequent gusts) affected coastal areas from Vero Beach northward, extending inland across the mainland portions of Brevard and Volusia Counties, with tropical storm force winds experienced across much of the remainder of east-central Florida.

Hurricane Irma, 2017: Hurricane Irma made a northerly turn toward Florida on Sunday, September 10. Hurricane Irma had maximum sustained winds of 185 MPH at its peak in the Atlantic Ocean, which maintained for over 35 hours, making it one of the strongest storms on record in the Atlantic basin. Making its second continental U.S. landfall, Irma slowly weakened as it continued north northwestward across north Florida and southwest Georgia through Monday September 11.

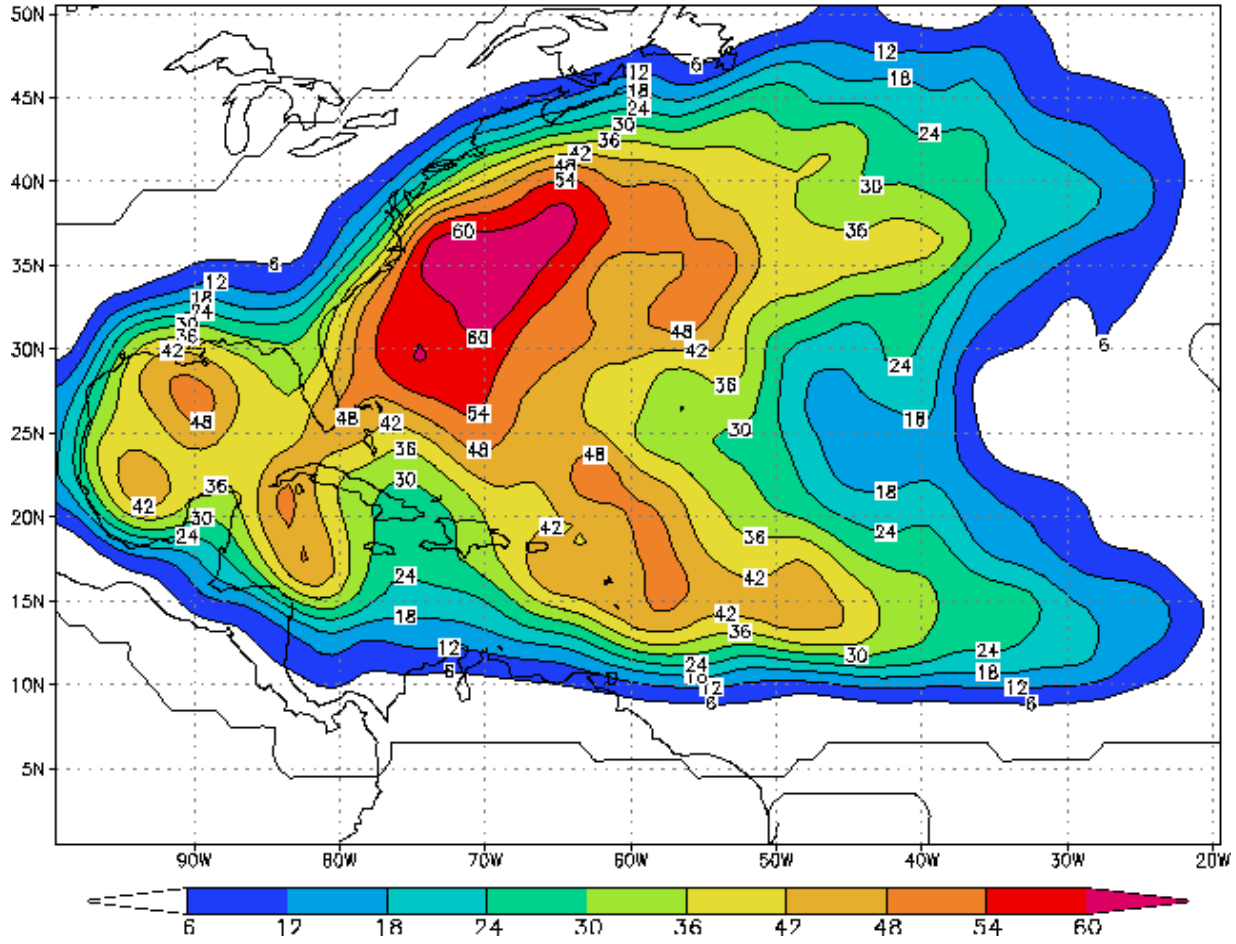
Hurricane Dorian, 2019: On September 1, Dorian reached Category 5 intensity, with maximum sustained winds of 185 mph, and a maximum central pressure of 910 mb (26.87 inHg) while making landfall in Elbow Cay, Bahamas. Dorian made another landfall on Grand Bahama several hours later. The ridge of high-pressure steering Dorian westward collapsed on September 2, causing Dorian to stall just north of Grand Bahama for about a day. It is the strongest known system to impact the Bahamas. A combination of cold-water upwelling and an eyewall replacement cycle weakened Dorian to a Category 2 hurricane the next day. On the morning of September 3, Dorian began to move slowly towards the north-northwest.

Hurricane Ian, 2022: After making landfall as a major hurricane in southwest Florida near Cayo Costa, Ian crossed the peninsula and into east central Florida (southern Osceola County) as a Category 1 Hurricane with estimated maximum sustained winds of 75 mph. The system was downgraded to a tropical storm shortly thereafter and emerged into the Atlantic Ocean near Cape Canaveral. Ian's slow movement and

large wind field led to a long period of tropical storm force winds across all east central Florida, as well as hurricane force gusts in squalls and historic rainfall and flooding across parts of the area. Widespread rainfall totals of 4 to 8 inches were reported throughout the area, with a corridor of 10 to 20 inches across Osceola, Orange, Seminole, Volusia, and northern Brevard counties. The maximum observed rainfall total was 21.09 inches in Spruce Creek, Volusia County. The St. Johns River experienced historic rises with record crests set at Astor, DeLand, Sanford, and Lake Harney in the days and weeks following Ian's heavy rainfall. A tornado briefly touched down and crossed US-192 in rural Brevard County with no damage to structures reported. Persistent onshore flow before and during the storm led to water level rises (storm surge) of 1-3 feet along east central Florida, bringing moderate to severe beach erosion, with the most significant effects noted in Volusia County. Collectively, the effects of Hurricane Ian led to 15 storm-related fatalities (6 direct and 9 indirect) and between $800-900M in property damage across east central Florida.

Hurricane Nicole, 2022: Hurricane Nicole made landfall near Vero Beach, Florida as a Category 1 Hurricane on Thursday, November 10, 2023, with estimated maximum sustained winds of 75 mph. The system was originally classified as a subtropical storm after forming several hundred miles east of the Bahamas before it gained tropical characteristics as it approached Grand Bahama and Abaco Island. The interplay between Nicole and an expansive area of high pressure over the eastern United States produced a large wind field of tropical storm force over the western Atlantic, with a long northeast fetch that stretched over 1000 miles. These onshore winds generated very large seas more than 30 feet offshore, which over multiple unusually high tide cycles led to moderate to severe beach erosion across east central Florida. Damage to coastal structures was extensive, particularly across Volusia County where an already weakened shoreline due to Hurricane Ian succumbed to the long-duration high surf event.

Hurricane Helene, 2024: Volusia County began experiencing impacts from Hurricane Helene overnight on September 25 as the storm advanced closer to the Big Bend area. Hurricane Helene’s closest approach to Volusia County occurred on the afternoon of September 26. Volusia County experienced 0.5 to 1.5 inches of rain and wind gusts between 45 to 55 mph. There were no injuries, fatalities, or evacuations and damage consisted of fallen trees and powerlines. Throughout Hurricane Helene, Volusia County had tornado watches, tornado warnings, and wind advisories.



Hurricane Milton, 2024: Volusia County began experiencing impacts from Hurricane Milton on Wednesday, October 09 as the storm advanced closer to the west coast and approached landfall. Hurricane Milton’s closest approach to Volusia County occurred overnight from October 09 to October 10. Volusia County experienced 7 to 17 inches of rain and wind gusts between 50 and 99 mph with one observation near Ponce Inlet recorded at 99 mph. The St. John’s River entered major flood stage at both Astor and DeLand. There were two direct fatalities and two indirect fatalities due to Milton. Damage consisted of downed trees, powerlines, and flooding with many public, residential, and commercial property damages. Throughout Hurricane Milton, Volusia County had tropical storm warnings, hurricane watches, hurricane warnings, tornado watches, tornado warnings, flood watches, flood warnings, and wind advisories

Probability of Future Occurrences

The probability of future hurricanes and tropical storm events for Volusia County is high. According to NOAA statistical data, Volusia County is in an area with an annual probability of a named storm between 36 and 42 percent.

Section 5 Figure 18 below shows for any location what the chance is that a tropical storm or hurricane will affect the area sometime during the Atlantic hurricane season. This illustration was created by NOAA's Hurricane Research Division using data from 1944 to 1999 and counting hits when a storm or hurricane was within approximately 100 miles (165 km) of each location.

Section 5: Figure 18: Empirical Probability of a Named Hurricane or Tropical Storm

Source: National Oceanic and Atmospheric Administration

The probability of storm occurrences will vary significantly based on the return interval for different categories of magnitude. The probability of less intense storms (lower return periods) is higher than more intense storms (higher return periods). The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from tropical cyclones and that future mitigation and adaptation strategies related to this hazard should be considered.

5.12 WILDLAND FIRE

Background

A wildfire is any fire occurring in a wildland area (i.e. grassland forest, brush land) except for fire under prescription.[24] Wildland fires are part of the natural management of forest ecosystems but may also be caused by human factors. Nationally, over 80 percent of forest fires are started by negligent human behavior such as smoking in wooded areas or improperly extinguishing campfires. The second most common cause for wildland fire is lightning.

There are three classes of wildland fires: surface, ground and crown fire. A surface fire is the most common of these three classes and burns along the floor of a forest, moving slowly and killing or damaging trees. A ground fire (muck fire) is usually started by lightning or human carelessness and burns on or below the forest floor. Crown fires spread rapidly by wind and move quickly by jumping along the tops of trees. Wildland fires are usually signaled by dense smoke that fills the area for miles around.

Wildfire probability depends on local weather conditions, outdoor activities such as camping, debris burning, and construction, and the degree of public cooperation with fire prevention measures. Drought conditions and other natural hazards (such as tornadoes, hurricanes, etc.) increase the probability of wildland fire by producing fuel in both urban and rural settings. Forest damage from hurricanes and tornadoes may also block interior access roads and fire breaks; pull down overhead power lines, or damage pavement and underground utilities.

Many individual homes and cabins, subdivisions, resorts, recreational areas, organizational camps, businesses and industries are located within high wildfire hazard areas. Further, the increasing demand for outdoor recreation places more people in wild lands during holidays, weekends and vacation periods. Unfortunately, wildland residents and visitors are rarely educated or prepared for wildfire events that can sweep through the brush and timber and destroy property within minutes.

Wildfires can result in severe economic losses as well. Businesses that depend on timber, such as paper mills and lumber companies, often experience losses that are passed on to consumers through higher prices. In some cases, this has resulted in the loss of jobs. The high cost of responding to and recovering from wildfires can deplete state resources and increase insurance rates. The economic impact of wildfires can also be felt in the tourism industry if roads and tourist attractions are closed due to health and safety concerns.

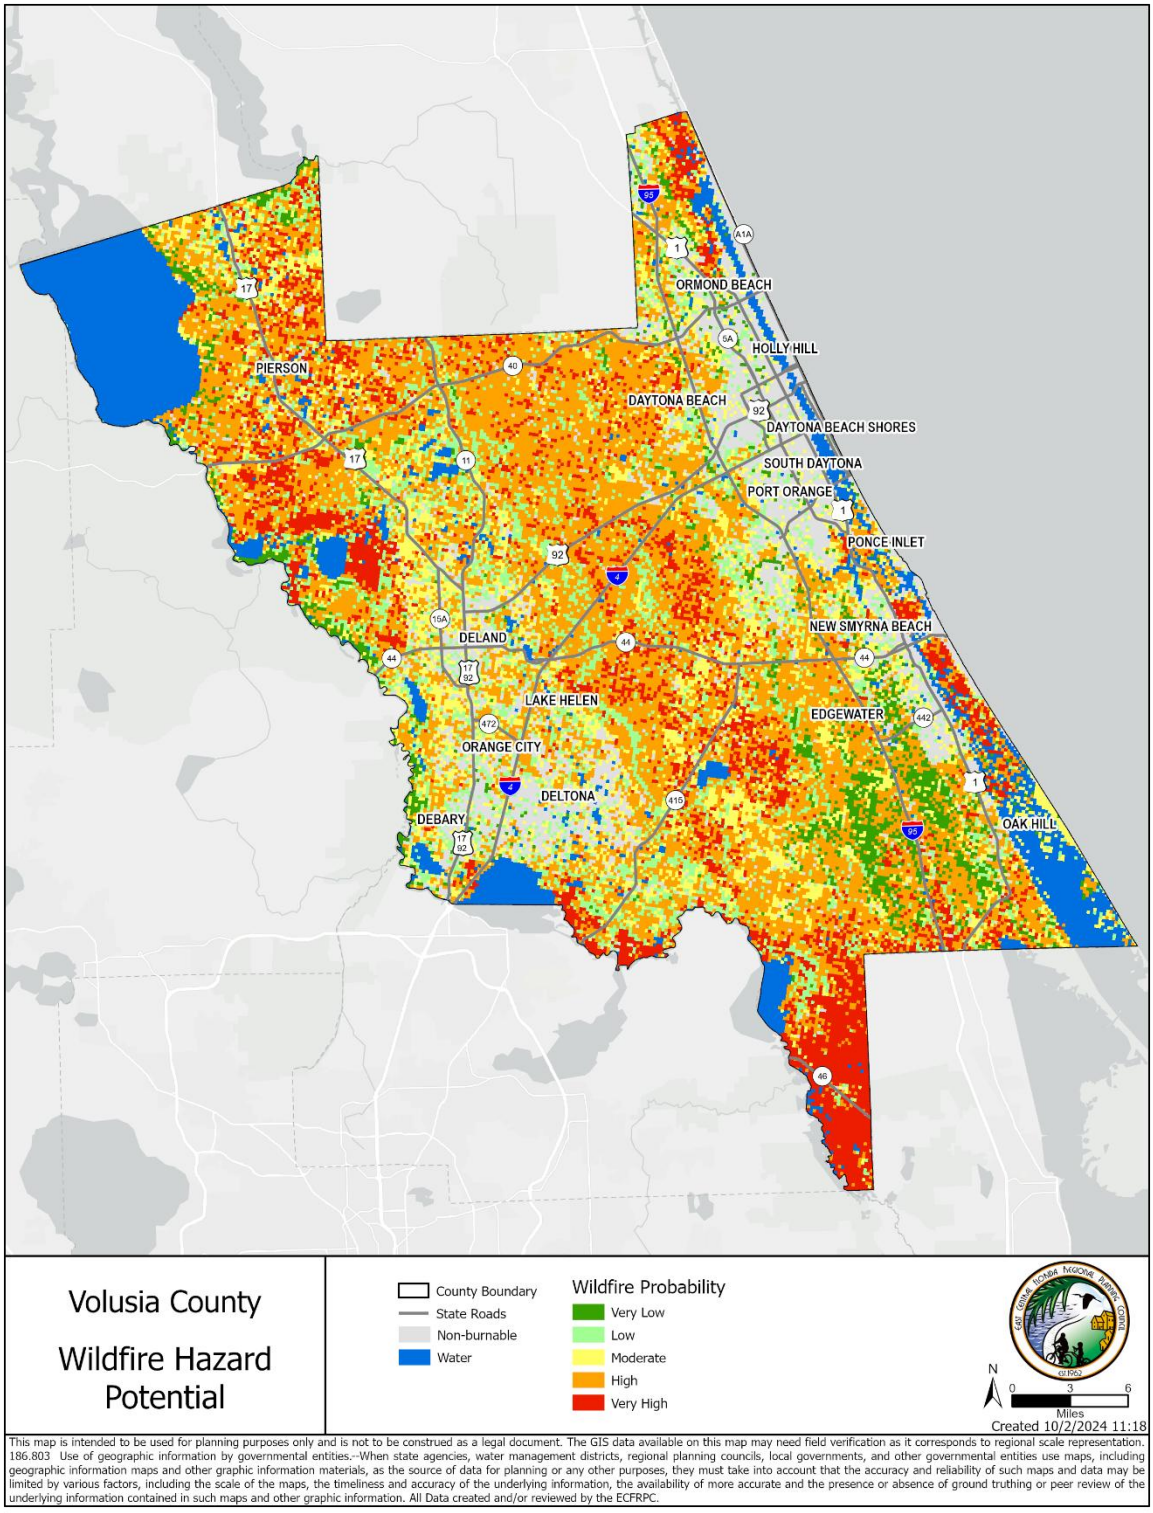
State and local governments can impose fire safety regulations on home sites and developments to help curb wildfire. Land treatment measures such as fire access roads, water storage, helipads, safety zones, buffers, firebreaks, fuel breaks and fuel management can be designed as part of an overall fire defense system to aid in fire control. Fuel management, prescribed burning, and cooperative land management planning can also be encouraged to reduce fire hazards.

[24] Prescription burning, or “controlled burn,” undertaken by land management agencies is the process of igniting fires under selected conditions, in accordance with strict parameters.

Location and Spatial Extent

Volusia County and its jurisdictions are not uniformly exposed to wildland fire risk. Although the county typically receives a high amount of precipitation each year (around 50 inches), there is a risk of wildfire due to the hot, dry summer months. Further, drought and drought-like conditions may occur which could increase the probability of wildfire occurrence.

The wildfire potential for Volusia County is shown in **Section 5: Figure 19**. All areas of the county may be susceptible to wildfire, and the wildland-urban interface is an area of concern as more property may be at risk of fire damage in these areas. This hazard occurs in the southern, western, and central parts of the county most likely; although, there are pockets of wildland fire locations dispersed across the county.



The extent of fire weather can be determined in two ways. A Fire Weather Watch is issued to alert fire officials and firefighters of potentially dangerous fire weather conditions within the next 24 to 36 hours. They are issued when the following three criteria are met:

1. Surface relative humidity (RH) less than 30 % for VA and MD; RH less than or equal to 25% for WV AND
2. Sustained surface wind of 20 MPH or greater AND
3. 10-hour fuel moisture less than 8% for VA; less than or equal to 8% for MD and WV

A Red Flag Warning is issued to alert fire officials and firefighters of potentially dangerous fire weather conditions within the next 12 to 24 hours. They are issued when the following three criteria are met:

1. Surface relative humidity (RH) less than 30 % for VA and MD; RH less than or equal to 25% for WV AND
2. Sustained surface wind of 20 MPH or greater AND
3. 10-hour fuel moisture less than 8% for VA; less than or equal to 8% for MD and WV

Section 5: Figure 19: Wildland Fire Risk in Volusia County

Source: U.S. Forest Service

Historical Occurrences

According to the Florida Division of Forestry, Florida experiences an average of 3,060 wildfires annually, burning nearly 154,000 acres[25]. The most common cause of Florida wildfire events is lightning which ignited over 700 fires annually between 2000 and 2009. Volusia County experienced 1,306 fires that burned over 22,600 acres between January 2000 and August 2009. Lightning caused nearly half of these fires. **Section 5: Table 17** lists the number of reported wildfire occurrences in Volusia County between the years 2001 and 2018.

Section 5: Table 17: Historical Wildfire Occurrences in Volusia County (2001-2018)

YEAR	2001	2002	2003	2004	2005	2006	2007	2008	2009	Annual Average
# of Fires	116	31	71	145	64	213	195	121	127	120
Acres Burned	383	371	2,011	746	198	5,037	1,826	1,482	8,839	2,321
YEAR	2010	2011	2012	2013	2014	2015	2016	2017	2018	Annual Average
# of Fires	128	237	208	104	74	104	174	132	TBD	145
Acres Burned	672	8,952	3,832	1,404	626	788	1,421	1,150	TBD	2,355

Source: Florida State Fire Marshal Report

It should also be noted that 1998 was a particularly significant year for wildland fires in Volusia County. That year, drought conditions were prevalent throughout the County. A total of 233 wildfires were reported, the largest single cause being lightning. In all, over 163,000 acres were burned. The fires threatened 29,000 homes and hindered travel as wildfires jumped highways. However, after weeks of burning, just six houses, one mobile home, and two businesses were destroyed, totaling $2.1 million ($2,889,598; 2009 dollars). Timber, conversely, took the brunt of the damage with losses of over $60 million ($85,570,222; 2009 dollars). No fatalities or civilian injuries were reported but ten firefighters did have minor injuries.

These events have had devastating impacts on Volusia County. Homes and businesses have been damaged or destroyed, causing economic and social hardship, while several agricultural resources (such as timber, as described above) have been lost in these events. Families and vulnerable populations can be displaced temporarily or permanently by these events, while businesses can be lost forever. Human life is also at great risk to fires, as fires can quickly consume buildings and prevent escape. Smoke inhalation is a common cause of death due to fire, rather than the fire itself. Updating and enforcing building codes can help prevent fire disasters.

One of the largest fires recorded in Volusia County over the last decade was the Iron Horse Fire, which occurred in 2011 in southeastern Volusia County. Approximately 17,000 acres burned during this event, and a full Fire Operations Center (FOC) activation was executed. One mobile home, three outbuildings and three camp structures were destroyed, while 140 total structures were threatened. Interstate 95 was completely shut down due to smoke limiting driver visibility (intermittently over a two-day period), and a firefighter was injured during the event. Also, in 2011, the Maytown Road Fire burned approximately

[25] Average information based on information between January 2000 and August 2009.

2,500 acres of land and affected local weather conditions by increasing cloud coverage. In 2012, several smaller fires affected the DeLand and DeBary areas of Volusia County.

In March 2013, the Durrance Road Fire destroyed 1,100 acres and forced evacuations of unincorporated areas of Volusia County near the Flagler County line west of Interstate 95. Approximately 300 homes were evacuated during this event. Interstate 95 from US1 to SR40 was shut down due to smoke.

Probability of Future Occurrences

There is a high probability of future wildfire events in Volusia County, especially during drought cycles and abnormally dry conditions, based on prior occurrence. Volusia County experienced nearly 130 wildfires per year from 2000 – 2008. As development continues to grow, there is an increasing chance for wildfires to reach the urban interface. This will increase the probability of economic loss and fatalities.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from wildfire and that future mitigation and adaptation strategies related to this hazard should be considered.

MANMADE HAZARDS

5.13 CIVIL DISTURBANCE

Background

Civil disturbances can occur due to socio-economic, political or other reasons. Events of civil disturbances can be classified as armed violence, riots, protests, and threats against the military or the government. The proper planning and prevention methods aid in the mitigation of such events. For threats of civil disturbance utilizing armed violence, it is likely that joint jurisdictional management of operations will take effect, coordinated at the county level between the Sheriff's Office, Florida Department of Law Enforcement (FDLE), and the Office of Emergency Management. These types of events typically occur in public places.

According to FEMA, civil disturbance is an activity such as a demonstration, riot, or strike that disrupts a community, and requires intervention to maintain public safety and order. Most protestors are law abiding citizens who intend their protest to be nonviolent. However, sometimes these situations become highly emotional and tense and can turn a peaceful crowd into a violent riot. Most crowds are orderly, nonviolent, and do not cause problems for authorities, but there are three types of crowds that can create a civil disturbance:

- **Public Disorder**: the basic breach of civic order, meaning the crowd tends to disrupt the normal flow of operations around them, such as traffic
- **Public Disturbance**: a demonstration that is designed to cause turmoil and disruption. These crowds chant, yell, and sing to voice collective opinions
- **Riot**: when a disturbance turns violent. The crowd suddenly becomes a mob that violently expresses itself by destroying property, assaulting others, and creating an extremely volatile environment

Location and Spatial Extent

Civil disturbances tend to occur in urban areas but can occur anywhere. These types of events typically occur in public gathering places, including court houses or civic spaces. While the spatial extent of the hazard would be 25% or less, civil disturbances could have county-wide effects.

Historical Occurrences

Civil Disturbances have been occurring since the beginning of time. There are several examples of civil disturbances in Florida in recent years. Some significant events that have impacted Central Florida and Volusia County through racially charged protests are outlined.

- **2012**: Trayvon Martin's death in Sanford, Florida. There were public protests, school walk outs, and thousands of planned rallies across the nation.
- **2020**: George Floyd's death in Minneapolis, Minnesota; Breonna Taylor's death in Louisville, Kentucky; Ahmaud Arbery's death in Brunswick, Georgia.
- **2021**: Othal Wallace's arrest for the death of Daytona Beach police officer.

Probability of Future Occurrences

It is likely that occurrences of civil disturbance will continue in the future. There have been several in Florida in previous years and protesting is a fundamental right protected by the US Constitution; therefore, civil disturbances will continue into the future.

5.14 MASS MIGRATION

Background

Mass-migration occurs when people of one geographic area move in large numbers to another geographic location. According to United States Code Title 8, Chapter 12 (8 U.S.C. § 1101), the definition of mass migration is a migration of undocumented aliens that is of such magnitude and duration that it poses a threat to the national security of the United States.

This usually refers to an event, or series of events, that may take place over the course of several years or even decades. The event could be economic, social, or political in nature but it is something that causes a mass exodus.

Location and Spatial Extent

There are no particular geographic areas in Volusia County with a more ideal jurisdiction for this hazard to take effect. Volusia County contains the intersection of the state's two busiest highway systems, I-95 and Interstate 4 (I-4). Because Volusia County is the intersection of these two major state transportation networks, people traveling from any direction of the state might travel to or through the area as refugees. The county also contains State Road A1A (SR A1A) which runs north and south through the entire county. Florida's proximity to the Caribbean basin makes it a vulnerable point of entry for a massive influx of refugees entering the United States. The spatial extent of this hazard would affect less than 25% of the geographical area.

Historical Occurrences

The United States has often been seen as a golden refuge for many immigrants, especially those in poor economic circumstances. Major policy changes can be a driving cause for mass migration. Since 1995, the "wet-foot, dry-foot" policy has allowed Cubans who reach American soil a fast-tracked path to citizenship. The policy was reversed by Former President Barak Obama in 2016, making the Cuban immigration process the same as any other immigrant. President Donald Trump's first administration took a strict stance on immigration, leading many Cubans to flock to America before he took office. The U.S. recorded increased Cuban Refugees from 2015 and 2016. According to the US Coast Guard, 7,358 Cubans tried to enter the U.S. illegally in the 2015-2016 fiscal year and were intercepted. Meanwhile 50,082 Cubans managed to enter (38,310 illegally and 11,772 with visas) in that same period.

Section 5: Table 18: Mass Migration Occurrences

Year	Description
2010	January – Operation Haiti Relief after an earthquake brought displaced and some injured people through Orlando Sanford International Airport.
2017	Hurricane Maria – mass migration of evacuees from the island of Puerto Rico to the Central Florida area after the hurricane. Over 250 families resettled in Seminole County and over 6,500 in Central Florida.
2024	March of 2024, overwhelming gang violence and the overthrow of the Haitian government caused mass evacuations of American citizens from Haiti back to the United States.

While Florida typically has a fast-growing population, many local municipalities are facing pressures from the booming population moving legally from other parts of the country in recent years. In the post-World War II era after 1946, Florida's percentage increase in population each year fluctuated but has always been positive. Between 2010 and 2020, national growth dipped from 0.9% to 0.5% each year while Florida's increases ranged from 1.0% to 2.0%. In 2022, Florida's growth was nearing 1.9%, not high compared to past gains but still the fastest among the states.

Probability of Future Occurrences

It is possible that any Florida county could be impacted by refugees and migrants. Florida is in proximity to islands such as Cuba, Puerto Rico, Dominican Republic and Haiti, and the Gulf Coast is within proximity of Mexico. Mass migration can also occur domestically due to an impending hazard causing large groups of citizens to head north or inland to other counties to evacuate. The probability of a migration influx in Florida is perceived to be high, and planning must be done to ensure safety and security. As political unrest and large-scale natural disasters continue to increase within the Caribbean and South American regions, people will continue to migrate throughout Florida.

The overall vulnerability of mass migration and repatriation in Volusia County and its jurisdictions is low. While lack of housing and community resources could be a concern with mass migration, due to the low probability and lack of physical impacts, Volusia County is not extremely vulnerable to this hazard. Each jurisdiction is equally vulnerable to this possibility.

5.15 TERRORISM

Background

Terrorism includes any attempt to attack, cripple or damage public goods, public infrastructure or citizens on a large scale. Volusia County should be prepared for a terrorist-related event that could occur with or without notice. Since terrorism can take many different forms, including weapons of mass destruction, and be directed at many kinds of targets, it poses some very complex, technical problems in planning and response. **Section 5: Table 19** displays the types of terrorism Volusia County is susceptible to.

Section 5: Table 19: Types of Possible Terrorism

Types of Terrorism	Description
Agro-Terrorism	The deliberate introduction of disease-causing organisms and chemicals into the food supply through agriculture. It could impact the public if crops or agricultural foods contaminated with disease-causing organisms were to enter the food chain. The secondary effects of which can be disease, famine and massive economic loss.
Cyber Terrorism	Unlawful attacks and threats of attack against computers, networks, and the information stored therein; and used to intimidate or coerce a government or its people in furtherance of political or social objectives.
Domestic Terrorism	Violent, criminal acts committed by individuals and/or groups to further ideological goals stemming from domestic influences, such as those of a political, religious, social, racial, or environmental nature.
International Terrorism	Violent, criminal acts committed by individuals and/or groups who are inspired by, or associated with, designated foreign terrorist organizations or nations (state-sponsored).

Location and Spatial Extent

Violent events can happen at any time at any place. Terrorism can be targeted at large gatherings, such as concerts or shopping malls, as has been seen in previous occurrences across the country. Event centers like the Daytona Beach Speedway and the Daytona Beach Ocean Center are indicated locations. But because terrorism thrives on fear, places such as community spaces, civic buildings, or historical monuments need additional precautions. A terrorist attack would most likely be very localized and isolated and impact less than 25% of the geographic area of the County, however effects could be county-wide.

Historical Occurrences

The nation as a whole has been affected by various acts of terrorism. Cyber terrorism is becoming an increasing threat, and residents are particularly vulnerable to subtle attacks such as credit card fraud. **Section 5: Table 20** outlines two major acts of terrorism.

Section 5: Table 20: Historical Occurrences of Terrorism

Year	Description
2016	At 2:00 AM on June 12, 2016, an active shooter walked into Pulse Nightclub in Downtown Orlando, FL, and opened fire into the crowd of approximately 300 people. One hundred two (102) people were directly impacted as 49 people were killed and 53 were injured. Another five people had non–gunshot related injuries. The attack began as an active shooter incident, transitioned into a hostage situation, and ended around 5:15 AM. It was one of the deadliest terrorist attacks in the United States since September 11, 2001. With assistance from various agencies and organizations around the area, victims were evacuated and transported.
2023	ABB (a leading technology electrification and automation company that works with public and private organizations) determined that an unauthorized third-party accessed the company's systems. Black Basta ransomware was deployed that shut down business operations. The company was forced to terminate VPN connections with various customers to prevent the spread of the ransomware to other networks.

Probability of Future Occurrences

Any community can be impacted by terrorism. Each year domestic terrorism increases across the country and becomes more deadly. There are no discernable patterns or methods to indicate the probability of future occurrence. Because terrorist attacks can take many forms and include many types of weapons, it is difficult to reduce the county's overall vulnerability to these incidents. First response agencies attempt to reduce vulnerability through prevention tactics and intelligence sharing. No jurisdiction in Volusia County is more vulnerable to attack than another.

TECHNOLOGICAL HAZARDS

5.16 COASTAL OIL SPILL

Background

Coastal oil spills pose a threat to human health and safety and frequently result in significant impacts to natural and cultural resources. Thousands of oil spills occur in U.S. waters each year. Most of these spills are small (e.g., oil spills while refueling ships), but these spills can still cause harm, especially if they happen in sensitive environments, like beaches, mangroves, and wetlands. Large oil spills are major and dangerous disasters. This tends to happen when pipelines break, big oil tanker ships sink, or drilling operations fail. Consequences to ecosystems and economies can be felt for decades following a large oil spill.

An oil spill is the release of liquid petroleum hydrocarbon into the environment, especially marine areas, due to human activity. The term is usually applied to marine oil spills, where oil is released into the ocean or coastal waters, but spills may also occur on land.

Location and Spatial Extent

Oil spills can happen anywhere oil is drilled, transported, or used. While oil spills would primarily affect the Gulf coast of Florida, oil spills can negatively affect tourism and ecological conditions on the Atlantic coast of Florida. The location of these incidents would be located within these large bodies of water.

Historical Occurrences

In 2010, an explosion occurred on the Deepwater Horizon drilling platform in the Gulf of Mexico. The explosion, which killed 11 men, caused the rig to sink and started a catastrophic oil leak from the well. The spill took three months to cap and approximately 134 million gallons of oil spilled into the Gulf, becoming the largest offshore oil spill in U.S. history. The economic impacts to commercial and recreational fishing for the period between 2010–2020 are a loss of roughly 24,000 job-years, $2.1 billion in industry output, $1.1 billion in total value-added or Gross Regional Product, $650 million in labor income, $140 million in state and local tax revenues, and $160 million in federal tax revenues. In addition, The Deepwater Horizon spill resulted in the largest natural resource damage assessment ever undertaken. The parties responsible owed a record-setting settlement with BP Exploration & Production for an unprecedented $5.5 billion Clean Water Act penalty and up to $8.8 billion in natural resource damages.

Although this incident did not happen in Volusia County, it severely impacted the state of Florida because the spill took place off the shore of Louisiana and impacted the Gulf of Mexico which runs along Florida's west coast. The economic condition of the county could be seriously impacted by a coastal oil spill event. During the Deepwater Horizon oil spill, tourism in Volusia County suffered since people thought all of Florida was impacted. In the event of another spill, the charter fishing industry would likely be devastated. If a coastal oil spill were to occur in Volusia County, tourism would greatly decrease, and tax revenue would be severely impacted.

Probability of Future Occurrences

Although there are no documented major oil refineries in the central Florida region, there are thousands in the Gulf of Mexico. The likelihood of a coastal oil spill directly impacting Volusia County is low, but any ships transporting oil in the Atlantic Ocean pose a threat.

5.17 CRITICAL INFRASTRUCTURE FAILURE

Background

Critical infrastructure failures refer to the disruption of public utility services such as drinking water, stormwater and wastewater collection/treatment, electric power, transportation, supply chains systems that support food and fuel, and communications. These services contribute to the economic well-being and public health and safety of the communities they serve. A critical infrastructure failure can occur from a cascading emergency such as terrorism or a hurricane.

Widespread power outages can occur without warning. Generally warning times will be short in the case of technological failure, such as a fire at a sub-station, traffic accident, human error, or terrorist attack. In cases where a power failure is caused by natural hazards, greater warning time is possible. For example, high wind events such as tornados and hurricanes often cause widespread power failure and are often forecasted before they affect a community so that residents can prepare.

The Federal Highway Administration's (FHWA) 2000 Traffic Incident Management Handbook defines a major traffic disturbance as "any non-recurring event that causes a reduction of roadway capacity or an abnormal increase in demand". Under this definition, events such as traffic crashes, disabled vehicles, spilled cargo, highway maintenance, reconstruction projects, and special non-emergency events (e.g., ball games, concerts, or any other event that significantly affects roadway operations) are classified as an incident.

Location and Spatial Extent

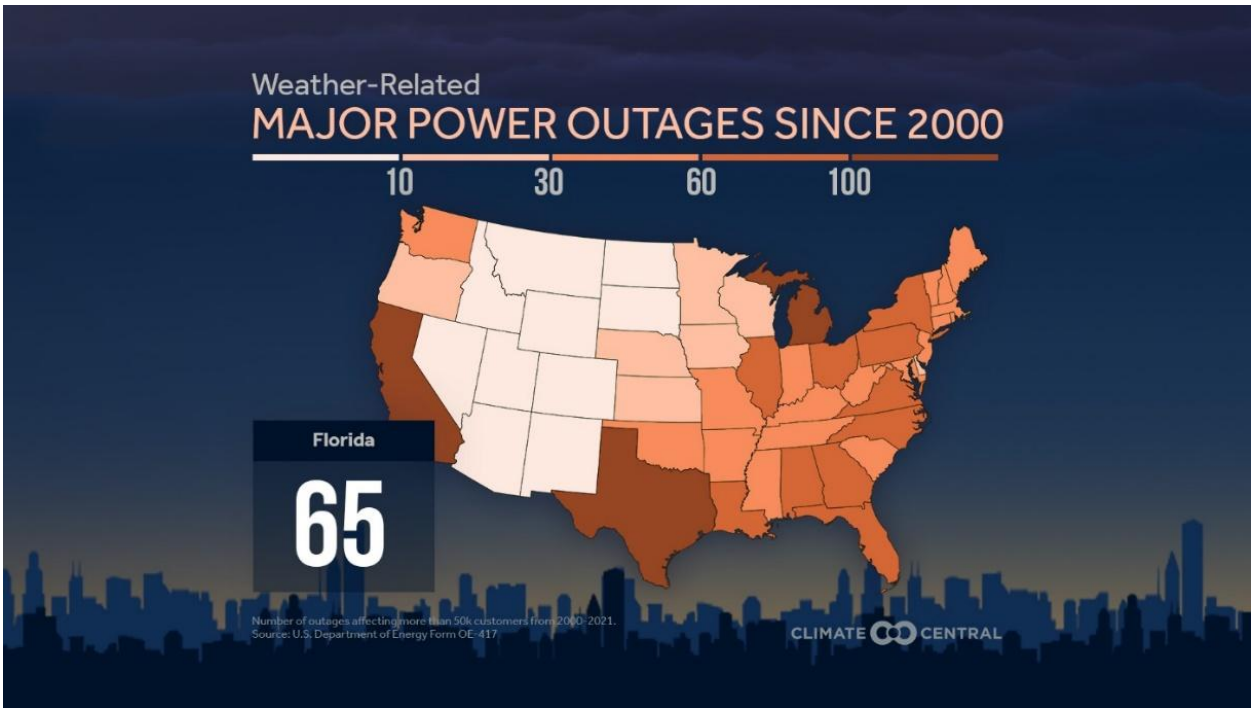
All of Volusia County is at risk of critical infrastructure failure as there are numerous facilities throughout the county, making a direct location difficult to identify. Locations could range from traffic light intersections to wastewater facilities. Impacts from disruption could impact more than 50% of the county, but most likely would have county-wide effects. Critical infrastructure failures are usually localized and are usually the result of a natural hazard event involving flooding or high winds, like hurricanes. A major transportation incident would mostly involve a highway or roadway, but the county's airports and proximity to major water systems poses a threat to an incident taking place.

Historical Occurrences

Many critical infrastructure failures resulted as a cascading impact from a natural hazard, such as a hurricane. As recently as October 2024, Hurricane Milton swept through Florida and resulted in more than 3.2 million power losses. 77% of all homes and businesses in the combined Volusia County/Flagler County area, according to newly revised numbers from the Florida Public Service Commission. At least 305,152 customers lost power out of the 395,582 total served in the two-county area.

In May 2024, the strongest geomagnetic storm in twenty years hit Earth causing disruptions to power grids, broadband technology, and GPS satellites in space.

Probability of Future Occurrences



While the probability of future utility service disruption in Volusia County is difficult to predict, past outages indicate that significant failures have and will occur because of natural hazards, technological

failures, and outdated utility infrastructure. As infrastructure ages beyond its intended lifespan, it is likely to become less reliable and lead to higher likelihoods of failure.

In addition, climate change may also impact the probability of utility failure occurrences because of an increase in the frequency and intensity of severe weather events. Storms with high winds will increase the chance that the power-related infrastructure will be impacted. Extreme temperatures are predicted to have an impact as well. During the hot summer months, the potential for power overload will grow as demand for power increases due to air conditioning units having to work harder. Extreme heat can also lead to transformer failures because the electric distribution equipment does not have the opportunity to cool sufficiently between periods of heavy use, leading to blackouts. **Section 5 Figure 20** displays the number of weather-related major power outages since 2000.

The power grid is essential, yet vulnerable. Florida is the third-largest electricity consumer in the nation. Disruptions can be minimized by providing a diverse set of utility service sources. If a particular system fails or is attacked, alternative sources can minimize impacts and provide the support to get operations back to normal.

Section 5: Figure 20: Weather-Related Major Power Outages Since 2000

Source: Climate Central[26]

[26] https://www.climatecentral.org/graphic/surging-weather-related-power-outages?graphicSet=Weather-related+Outages+by+State&location=Florida&lang=en on December 26, 2024

As population continues to rise in the area and the need for transportation increases, accidents will continue to rise. While most are expected to be minor, the possibility of a major event increases. Automobiles pose the most risk, but other examples include:

- **Aviation**: Volusia County has numerous airports throughout the county which present the possibility of traffic disruptions in the event of an aviation-related crash. General aviation aircraft pass over the county en-route to and from Daytona, Orlando, Sanford, Jacksonville, and other small airports located around Volusia County.
- **Marine**: The county is located on the Atlantic Ocean, Halifax River, Indian River Lagoon, and Mosquito Lagoon which provides traffic on water transportation routes. The Tomoka River and other local waterways consists of mostly recreational/sports activities.

5.18 HAZMAT / INDUSTRIAL INCIDENT

Background

Hazardous material (HazMat)/industrial incidents include events when liquid, solid or gaseous chemicals that are harmful or fatal to humans or ecological infrastructure are dispersed. HazMat events occur when liquid, solid, gaseous chemicals, or a combination of all three (which may include dust, fumes, gas, vapor, mist, and smoke)—diffuse into the environment and become harmful or fatal to humans, infrastructure, or ecosystems.

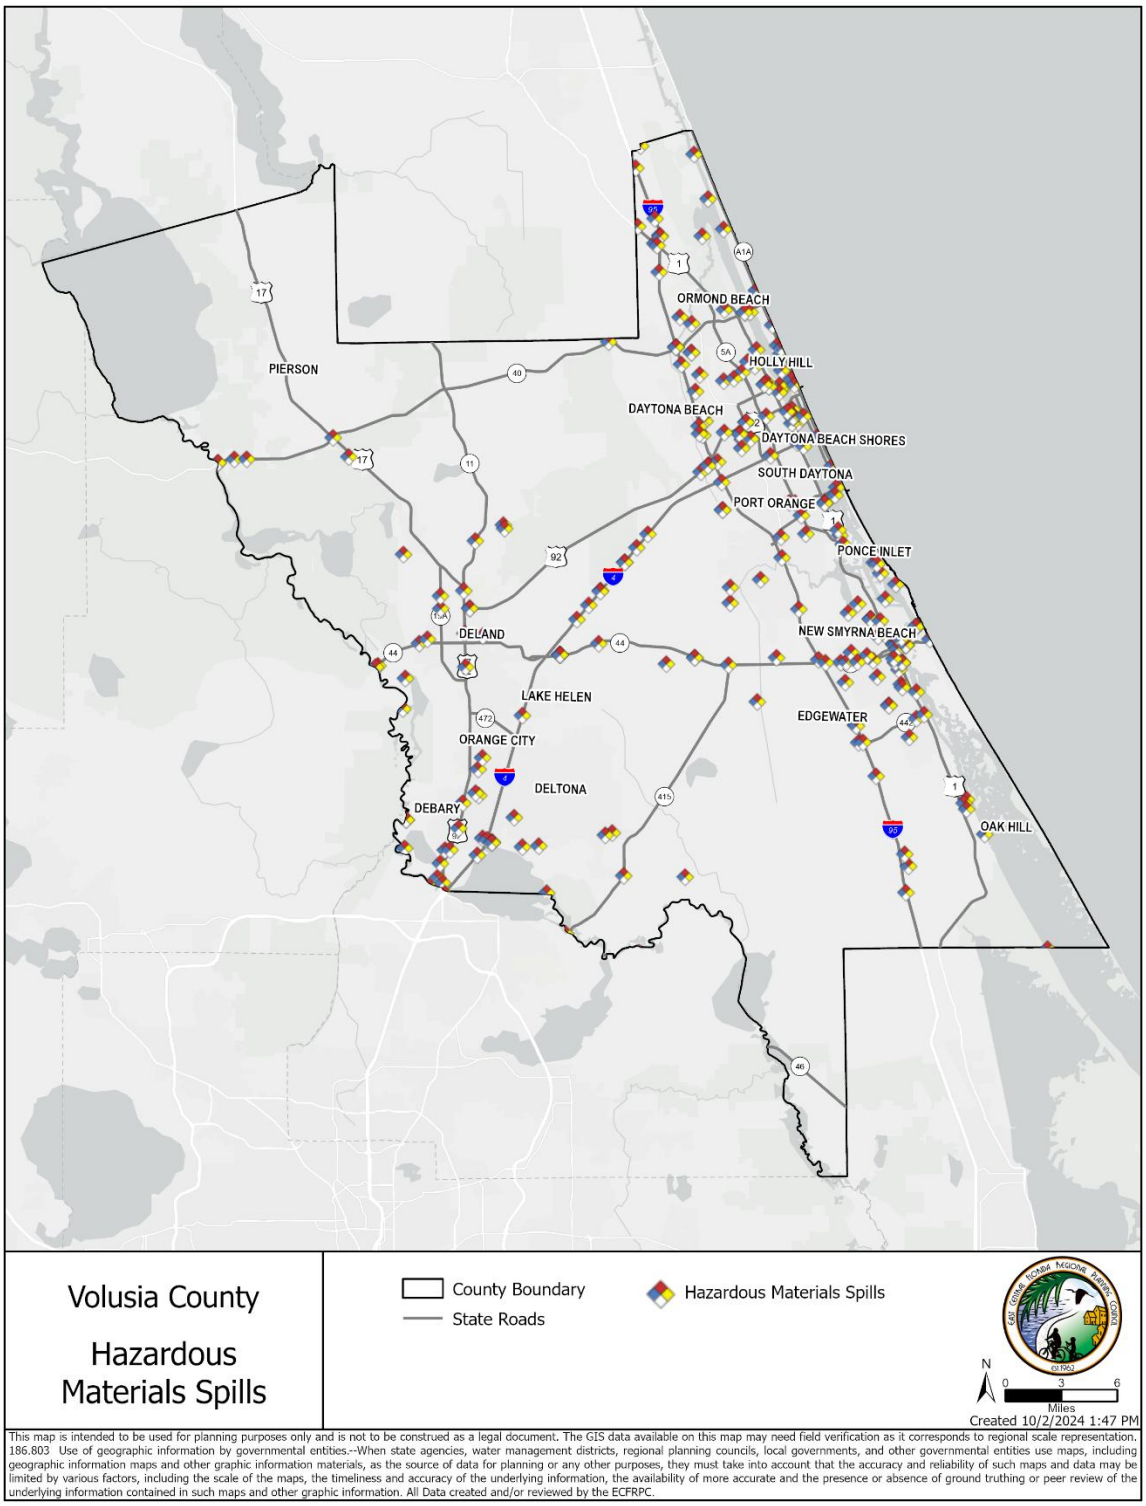
Hazardous waste is dangerous, and can be ignited, corrosive, reactive, or toxic. Paint products, pool chemicals, household cleaners, and pesticides are common examples, but can also include toxic chemicals, fuels, nuclear waste products, biological, chemical, and radiological agents.

Location and Spatial Extent

There are numerous facilities and plants throughout the county that hold hazardous material. This includes residential and commercial swimming pools that keep dangerous chemicals (liquid, powdered, and gas chlorine, acids, etc.). These chemicals are stored in bulk in several retail stores throughout the county. Chemicals are also used in water and wastewater treatment facilities in Volusia County. Additional threats are created by the transportation of hazardous materials on I-95 and other roadways. The Florida East Coast Railway also runs through the eastern part of the county, which transports hazardous materials along Florida's east coast. **Section 5 Figure 21** displays the variety of locations this hazard can occur at, ranging from waterway systems to major traffic corridors.

Any hazardous material accident would have very localized impacts and would account for less than 25% of the county's geographic area.

Historical Occurrences



Section 5 Figure 21 displays recent HazMat incidents in the county. In Ormond Beach on September 7th, 2018, a toxic industrial chemical, Sodium Hypochlorite, was accidentally released from an aboveground tank into a nearby storm drain. A city employee reported that 1,484 gallons of 7% chlorine was released and that the drain discharged into the Halifax River. A dechlorinator was added to the storm drain as part of the cleanup effort.

As recently as May 10, 2022, a citizen reported a possible HazMat issue just south of the Granada Bridge. The citizen reported that approximately two-dozen old, abandoned boats were leaking oil and fuel into the Indian River Lagoon and Halifax River. The boats have been abandoned in this location for 3 to 4 years. This was classified as a petroleum spill and oil release, and although major waterways were affected, no cleanup actions were reported.

Probability of Future Occurrences

It is likely that HazMat incidents will continue, whether they are reported or not.

Section 5: Figure 21: Hazardous Spill in County 2019-2024

Source: FDEP

5.18 CONCLUSIONS ON HAZARD RISK

The hazard profiles presented in this section were developed using best available data and result in what may be considered principally a qualitative assessment as recommended by FEMA in its "How-to" guidance document titled *Understanding Your Risks: Identifying Hazards and Estimating Losses* (FEMA Publication 386-2). It relies heavily on historical and anecdotal data, stakeholder input, and professional and experienced judgment regarding observed and/or anticipated hazard impacts. It also carefully considers the findings in other relevant plans, studies and technical reports.

Hazard Risk Scoring

Volusia County threats and hazards are scored using the Calculation and Rating Score Development (CPRI). Frequency (probability), impact (magnitude/severity), warning time, and duration are the main factors used to assign a score to every hazard. To provide a comprehensive assessment of each hazard, the hazards were scored based on several vulnerability factors including area(s) of impact, health and safety of the population, property, environment, and economic vulnerability. Each of these factors, considered magnitude/severity, has been assigned a number between one and four, based on risk, with four being the greatest. The values then were summed and multiplied by the probability of occurrence factor, which is also a one to four scale. Warning time and duration of each hazard are also considered and factored into the scoring. The resulting value is a risk rating for each hazard. **Section 5: Table 21** provides the CPRI scoring categories and rating system. Further, the Vulnerability Assessment (Section 6) also provides information on hazard vulnerability at the jurisdictional level.

CPRI Calculation and Rating Score Development

CPRI = [(Probability X .45) + (Magnitude X .30) + (Warning Time X .15) + (Duration X .10)]

Section 5: Table 21: CPRI Scoring Categories

CPRI CATEGORY	DEGREE OF RISK			ASSIGNED WEIGHTING FACTOR
	LEVEL ID	DECRIPTION	INDEX VALUE	
Frequency (Probability)	Highly Likely	• Common events with a well-documented history of occurrence. • Annual probability is greater than 1.	4	45%
	Likely	• Frequent occurrences with at least two or more documented historical events. • Annual probability is between 1 and 0.1.	3	
	Possible	• Infrequent occurrences with at least one documented or anecdotal historic event. • Annual probability is between 0.1 and 0.01.	2	
	Unlikely	• Rare with no documented history of occurrences or events. • Annual probability of less than 0.01.	1	
Magnitude / Severity	Catastrophic	• Severe property damages (greater than 50% of critical and non-critical facilities and infrastructure). • Injuries or illnesses result in permanent disability and multiple deaths. • Shut down of critical facilities for more than 1 month.	4	30%
	Critical	• Moderate property damages (greater than 25% and less than 50% of critical and non-critical facilities and infrastructure). • Injuries or illnesses result in permanent disability and at least 1 death. • Shut down of critical facilities for more than 1 week and less than 1 month.	3	
	Limited	• Slight property damages (greater than 5% and less than 25% of critical and non-critical facilities and infrastructure). • Injuries or illnesses do not result in permanent disability and there are no deaths. • Moderate quality of life lost. • Shut down of critical facilities for more than 1 day and less than 1 week.	2	
	Negligible	• Negligible property damage (less than 5% of critical and non-critical facilities and infrastructure).	1	

		• Injuries or illnesses are treatable with first aid and there are no deaths. • Negligible quality of life lost. • Shut down of critical facilities for less than 24 hours.		
Warning Time	Less than 6 hours	Self-explanatory.	4	15%
	6 to 12 hours	Self-explanatory.	3	
	12 to 24 hours	Self-explanatory.	2	
	More than 24 hours	Self-explanatory.	1	
Duration	More than 1 week	Self-explanatory.	4	10%
	Less than 1 week	Self-explanatory.	3	
	Less than 1 day	Self-explanatory.	2	
	Less than 6 hours	Self-explanatory.	1	

Final Determinations

The conclusions drawn from the hazard profiling process for Volusia County resulted in the classification of risk for each identified hazard according to three categories: High, Moderate and Low Risk. For the purposes of these classifications, risk is expressed in relative terms according to the estimated impact that a hazard will have on human life and property throughout all of Volusia County. A more quantitative analysis to estimate potential dollar losses for each hazard has been performed separately and is described in the *Vulnerability Assessment* section.

It should be noted that although some hazards are classified below as posing low risk, their occurrence of varying or unprecedented magnitudes is still possible in some cases and their assigned classification will continue to be evaluated during future updates.

Hazard	Probability				Magnitude/Severity				Warning Time				Duration				CPRI Score
	Unlikely	Possibly	Likely	Highly Likely	Negligible	Limited	Critical	Catastrophic	< 6 hours	6 - 12 hours	12 - 24 hours	> 24 hours	< 6 hours	< 24 hours	< 1 week	> 1 week	
NATURAL HAZARDS																	
AGRICULTURE	X				X					X						X	1.6
COASTAL EROSION				X			X					X				X	3.25
DROUGHT			X				X					X			X		2.7
EXTREME TEMPERATURES			X				X					X			X		2.7
FLOOD				X				X				X			X		3.45
PUBLIC HEALTH EMERGENCIES		X				X				X						X	2.35
RISING COASTAL WATER				X				X				X			X		3.75

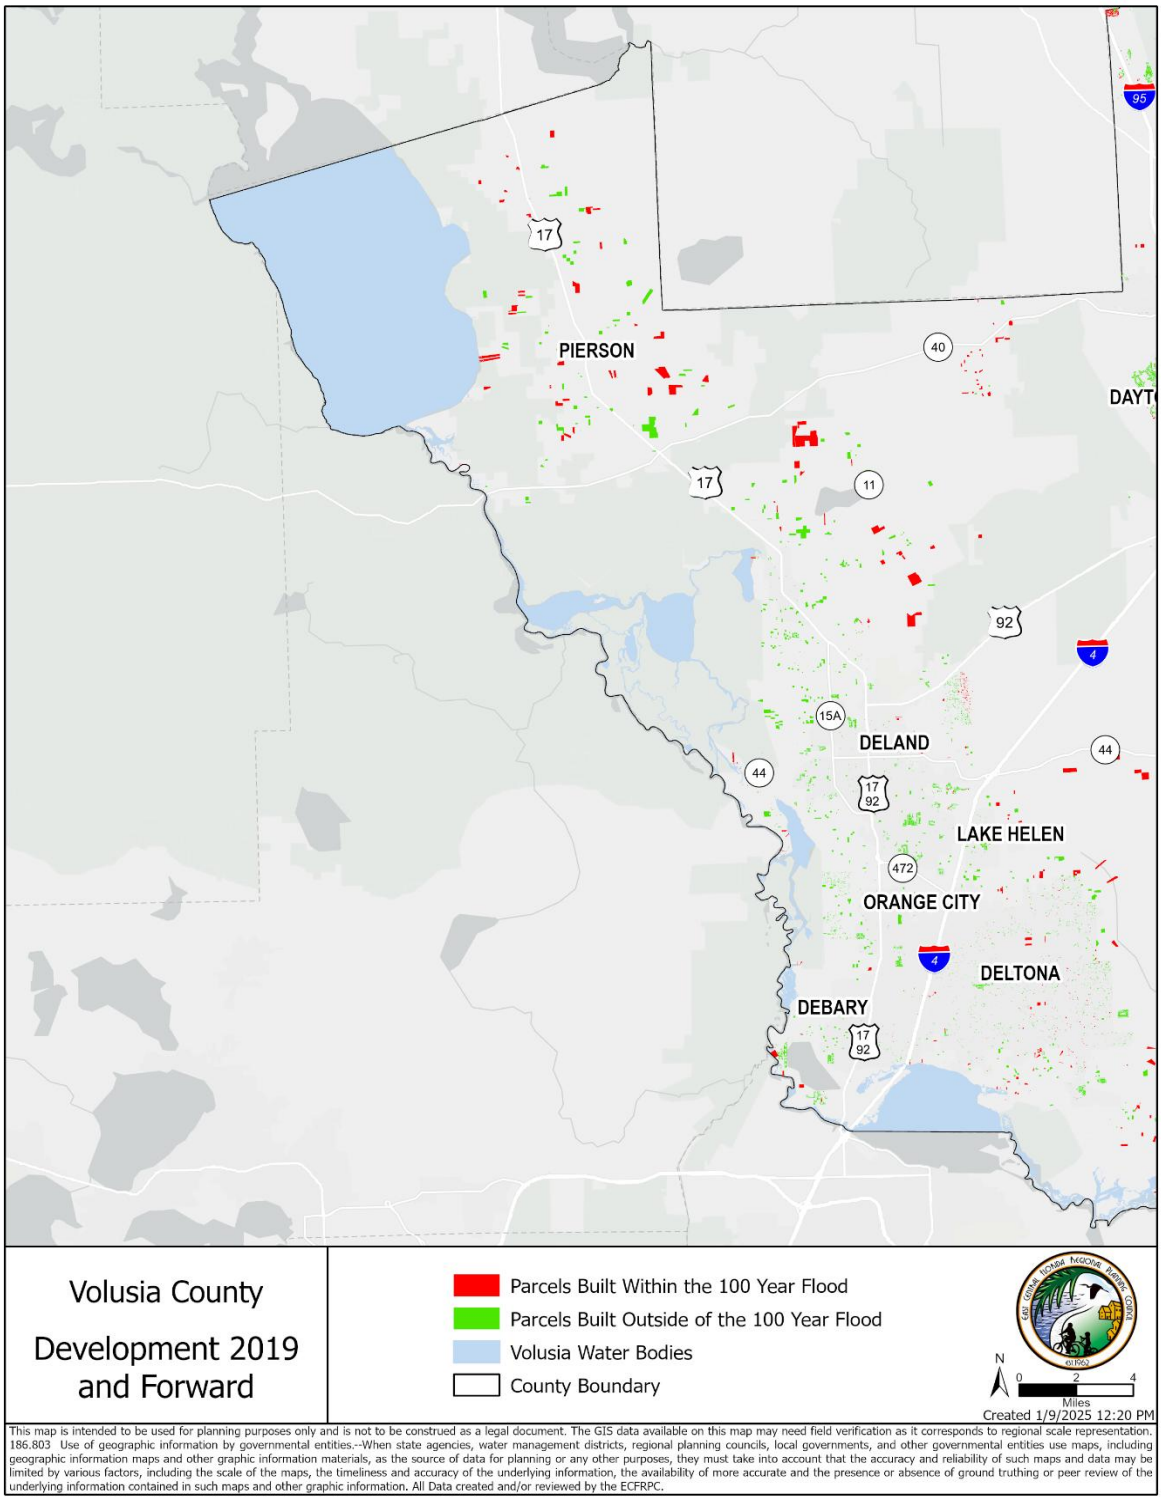
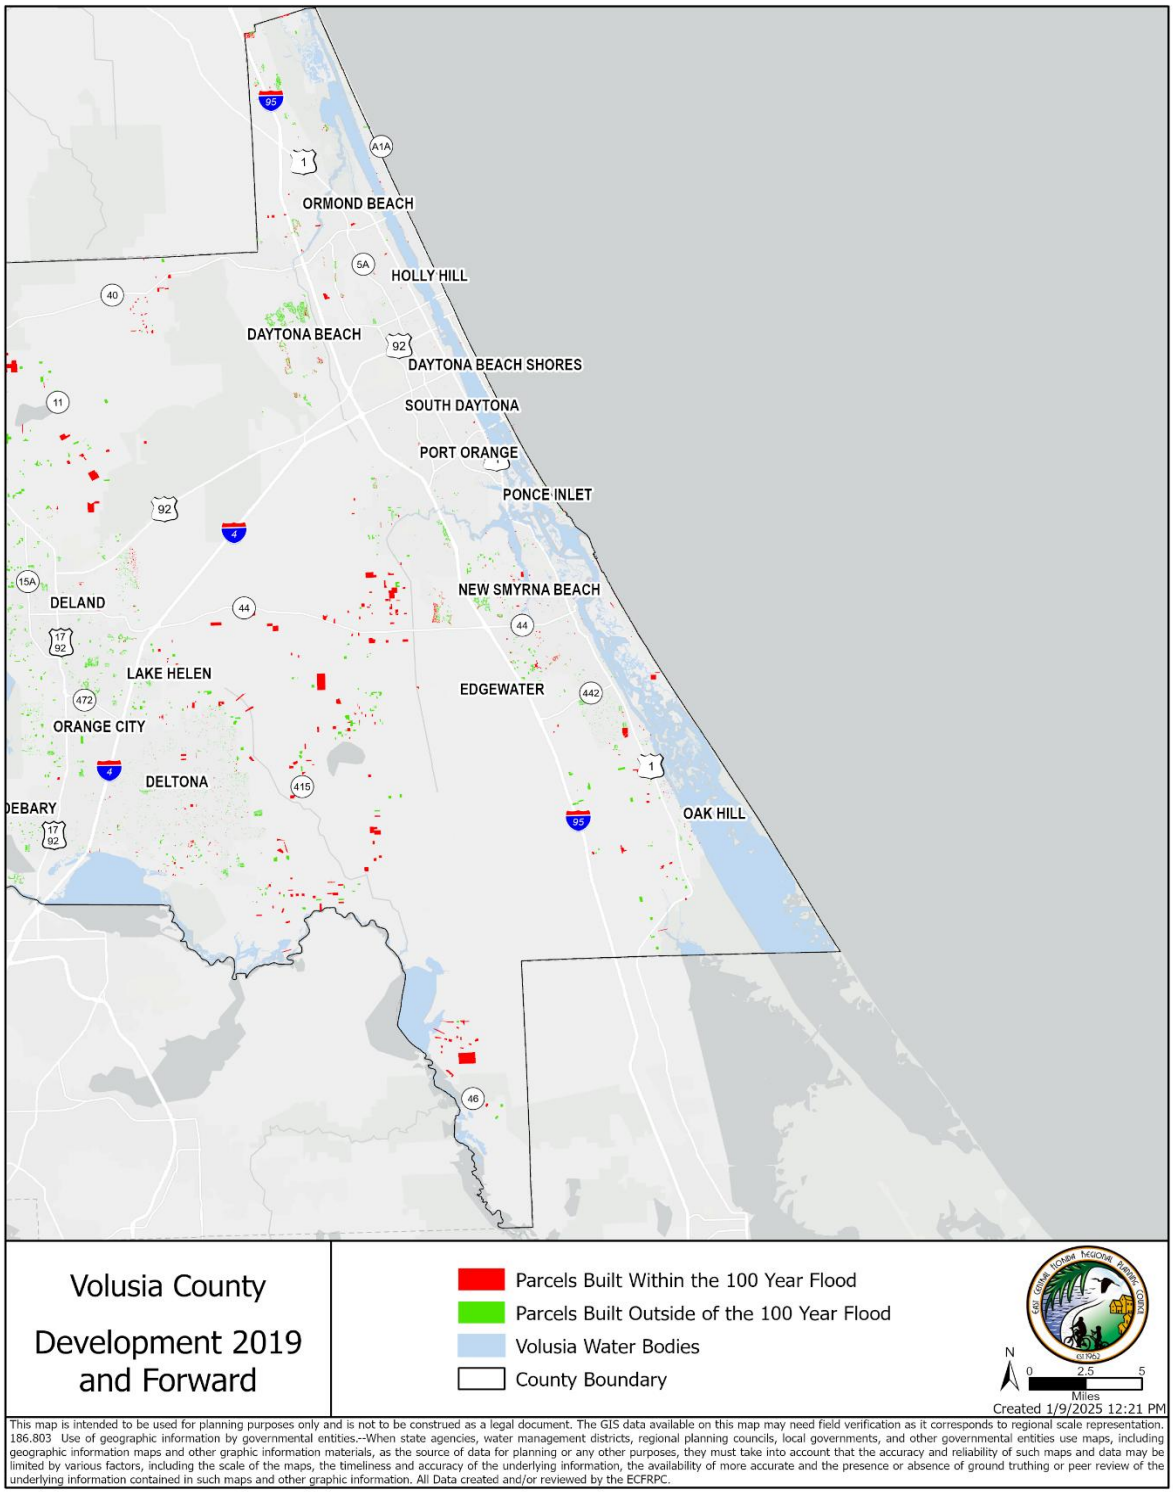
Section 5: Table 22: Conclusions on Hazard Risk for Volusia County (Natural Hazards)



5.19 DEVELOPMENT SINCE 2020 (LAST LMS SUBMITTAL)

The maps on the next page in Section 5 **Figure 22 and Figure 23** shows development in Volusia County from 2019 to 2024 with exposure to the 100-year floodplain. While the eastern portion of the county is susceptible to more hazards than the western portion, the eastern side has seen the largest growth in the number of properties built since 2019. Areas such as Ormond Beach, Daytona Beach, Holly Hill, South Daytona, Ponce Inlet, and New Smyrna Beach have experienced growth since 2020, much of it along the barrier islands to the east of the Halifax River, Indian River Lagoon, and Mosquito Lagoon. These areas are susceptible to tropical cyclones, flooding, and rising coastal waters. The western portion of the county has also experienced growth. Deltona, DeBary, DeLand and Orange City are typically more susceptible to wildland fires and flooding.



Since 2019, 6,005 properties have been built in the 100-year floodplain countywide. The total county taxable value of these new properties is $1,970,544,855 according to the ECFRPC analysis. The jurisdiction experiencing the most development is New Smyrna Beach. Daytona Beach is a close second.

For more information on recent developments in the hazard zones covered in this report, view the Vulnerability Assessment in Section 6.

SECTION 6 – VULNERABILITY ASSESSMENT

44 CFR Requirement

44 CFR Part 201.6(c)(2)(ii): The risk assessment shall include a description of the jurisdiction's vulnerability to the hazards described in paragraph (c)(2)(i) of this section. The description shall include an overall summary of each hazard and its impact on the community. The plan should describe vulnerability in terms of: (A) The types and numbers of existing and future buildings, infrastructure, and critical facilities located in the identified hazard areas; (B) An estimate of the potential losses to vulnerable structures identified in paragraph (c)(2)(ii)(A) of this section and a description of the methodology used to prepare the estimate; (C) Providing a general description of land uses and development trends within the community so that mitigation options can be considered in future land use decisions.

6.1 OVERVIEW

This section builds upon the information provided in Section 5: *Hazard Profiles* by identifying and characterizing an inventory of assets in Volusia County and then assessing the potential impact and number of damages that can be expected to be caused by each identified hazard event. The primary objective of the vulnerability assessment is to quantify exposure, and the potential loss estimates for each hazard. In so doing, Volusia County and its participating jurisdictions and partners may better understand their unique risks to identify hazards and be better prepared to evaluate and prioritize specific hazard mitigation actions.

This section begins with an explanation of the methodology applied to complete the hazard vulnerability assessment, followed by a summary description of the asset inventory as compiled for Volusia County. The remainder of this section focuses on the results of the assessment and is organized by hazard as listed below.

- **Natural**
  - Agriculture
  - Coastal Erosion
  - Drought
  - Extreme Temperature
  - Flood
  - Public Health Emergencies
  - Rising Coastal Waters
  - Severe Weather
  - Tornado
  - Tropical Cyclones
  - Wildland Fire
- **Manmade**
  - Civil Disturbance
  - Mass Migration
  - Terrorism

- **Technological**
  - Coastal Oil Spill
  - Critical Infrastructure Failure
  - HazMat/ Industrial Incident

6.2 ASSESSMENT METHODOLOGY

This vulnerability assessment was conducted utilizing three distinct methodologies based on an appropriate analysis of that hazard:

1. Geographic Information System (GIS)-based analysis
2. A qualitative analysis based on the risk to people, property, the environment, government operations, the public, first responders, continuity of operations, facilities and infrastructure, economic conditions, and public confidence in governance.

Each approach provides estimates for the potential impact of hazards by using a common, systematic framework for evaluation, including historical occurrence information. The results of the vulnerability assessment are provided for each identified hazard. The versions of HAZUS used for this assessment were 6.1 and 7.0. All versions of HAZUS are designed to conduct the same analyses for the same purposes.

GIS-Based Analysis

For the GIS-based assessment, digital data was collected from local, state and national sources. ESRI® ArcPro 3.4.0 was used to assess risk utilizing digital data including local tax records for individual properties and georeferenced point locations. Using these data layers, risk was assessed by estimating the assessed building value associated with properties determined to be in identified hazard areas. The critical asset inventory was compiled from FEMA's built-in asset inventory within HAZUS, the ECFRPC's critical asset inventory compiled for FDEP's statewide Resilient Florida Vulnerability Assessment, and additional assets provided by Volusia's jurisdictions. Parcel and land use data was retrieved from Volusia County's GIS Department and Property Appraiser.

To estimate population in hazard areas, Census 2020 population data by census block was obtained from HAZUS 7.0 and census blocks intersecting with hazard areas were used to determine improved property value, land value, building value, assessed value, taxable county value were obtained from Volusia County's Property Appraiser and properties intersecting with hazard areas were used to determine financial exposure and potential financial loss.

Census 2020 data was used for analyses as it is available by census block. There are other population estimates that are provided by reputable sources; however, they are only available at the jurisdiction level (e.g., county or city). When the next decennial census population data is available the county will consider reassessing the populations that are vulnerable to various hazards.

The objective of the GIS-based analysis was to determine the estimated vulnerability of people, buildings and critical facilities to the identified hazards for Volusia County using the best available geospatial data. In so doing, local databases made available through Volusia County such as local tax assessor records, parcel boundaries and critical facilities data were used in combination with digital hazard data. The results

of the analysis provided an estimated number of people, as well as the numbers and values of buildings and critical facilities determined to be potentially at risk to those hazards with delineable geographic hazard boundaries.

Financial exposure of parcels to hazards was assessed by intersecting parcel data to the extent of the hazards. Per the guidance of Volusia County Emergency Management, financial exposure to hazards for parcels with stacked properties was handled in two manners. Hazard analysis regarding wind, wildland fire, and sea level rise was conducted for all properties within a parcel, capturing the financial exposure of each floor within condominiums and other buildings. Hazard analysis regarding storm surge and FEMA flood zones was conducted only for first floor properties.

For storm surge, the data was retrieved from the National Oceanic and Atmospheric Administration's National Hurricane Center. The storm surge data is derived from the Maximum of the Maximum Envelope of High Water (MEOW), or MOM, which provides a worst case snapshot for a particular storm category. Each MOM considers combinations of forward speed, trajectory, and initial tide level. No single hurricane will produce the regional flooding depicted in the MOMs. Instead, the product is intended to capture the worst-case high-water value at a particular location for hurricane evacuation planning. The MOMs are also used to develop the nation's evacuation zones.

For wildland fire risk, the U.S. Forest Service's Wildfire Hazard Probability dataset was used to evaluate the wildfire risk for Volusia's critical assets. The Wildfire Hazard Probability dataset recognizes impervious surfaces as "non-burnable." As the majority of Volusia's critical assets are built on top of paved surfaces, they were marked as non-burnable by the dataset. However, due to the nature of wildfire and its ability to jump onto structures although they may be built upon impervious surfaces, geostatistical methods were employed to interpolate the fire risk for areas originally marked as non-burnable. The raster dataset provided by the U.S. Forest Service was altered to remove cells marked as non-burnable. This altered raster was run through Empirical Bayesian Kriging (EBK) to generate new wildfire risk scores for areas previously categorized as non-burnable. EBK is a geostatistical method utilized for making spatial predictions based upon existing patterns. Using EBK to fill in the gaps of the Wildfire Hazard Probability dataset allowed for a more comprehensive analysis of wildfire risk for the County's critical assets.

For tropical cyclone wind hazards, HAZUS 6.1 was used to run a probabilistic hurricane wind analysis. Probabilistic hurricane analysis is a method of predicting the likelihood of hurricane-related events by using a range of possible outcomes. This method can help to estimate the risk of hurricane damage and inform decision making. Return periods of 10, 20, 50, 100, and 500 were used to analyze peak wind gusts across Volusia County.

6.3 ASSET INVENTORY

An inventory of Volusia County's georeferenced assets was created in order to identify and characterize those properties potentially at risk to the identified hazards. By understanding the type and number of assets that exist and where they are located in relation to known hazard areas, the relative risk and vulnerability for such assets can be assessed. Three categories of assets were created and assessed through GIS analysis, including:

1. Improved Property: Includes properties with improved property (i.e., structures)

2. Critical Assets: Includes Volusia County's emergency operations centers, fire stations, police stations, schools and hospitals. This was derived from the FEMA HAZUS asset inventory and critical assets identified through the Volusia 2024 VA.

3. Transportation Infrastructure: Includes primary roads and active railroads.

Improved Property

Section 6 Table 1 displays total assessed value of improvements for unincorporated Volusia County and the incorporated areas with improved property.

Section 6: Table 1: Total Value of Improved Properties

JURISDICTION	TOTAL IMPROVED VALUE OF IMPROVED PROPERTIES
Daytona Beach	$11,412,838,706.00
Daytona Beach Shores	$2,643,078,172.00
DeBary	$2,829,659,586.00
De Land	$4,555,243,217.00
Deltona	$8,243,140,783.00
Edgewater	$2,478,786,764.00
Holly Hill	$1,108,379,506.00
Lake Helen	$273,588,377.00
New Smyrna Beach	$7,693,963,655.00
Oak Hill	$232,951,847.00
Orange City	$1,439,235,489.00
Ormond Beach	$6,202,742,902.00
Pierson	$145,434,493.00
Ponce Inlet	$1,426,666,290.00
Port Orange	$6,642,257,338.00
South Daytona	$1,215,618,172.00
Unincorporated	$14,307,435,560.00
TOTAL	**$72,851,020,857.00**

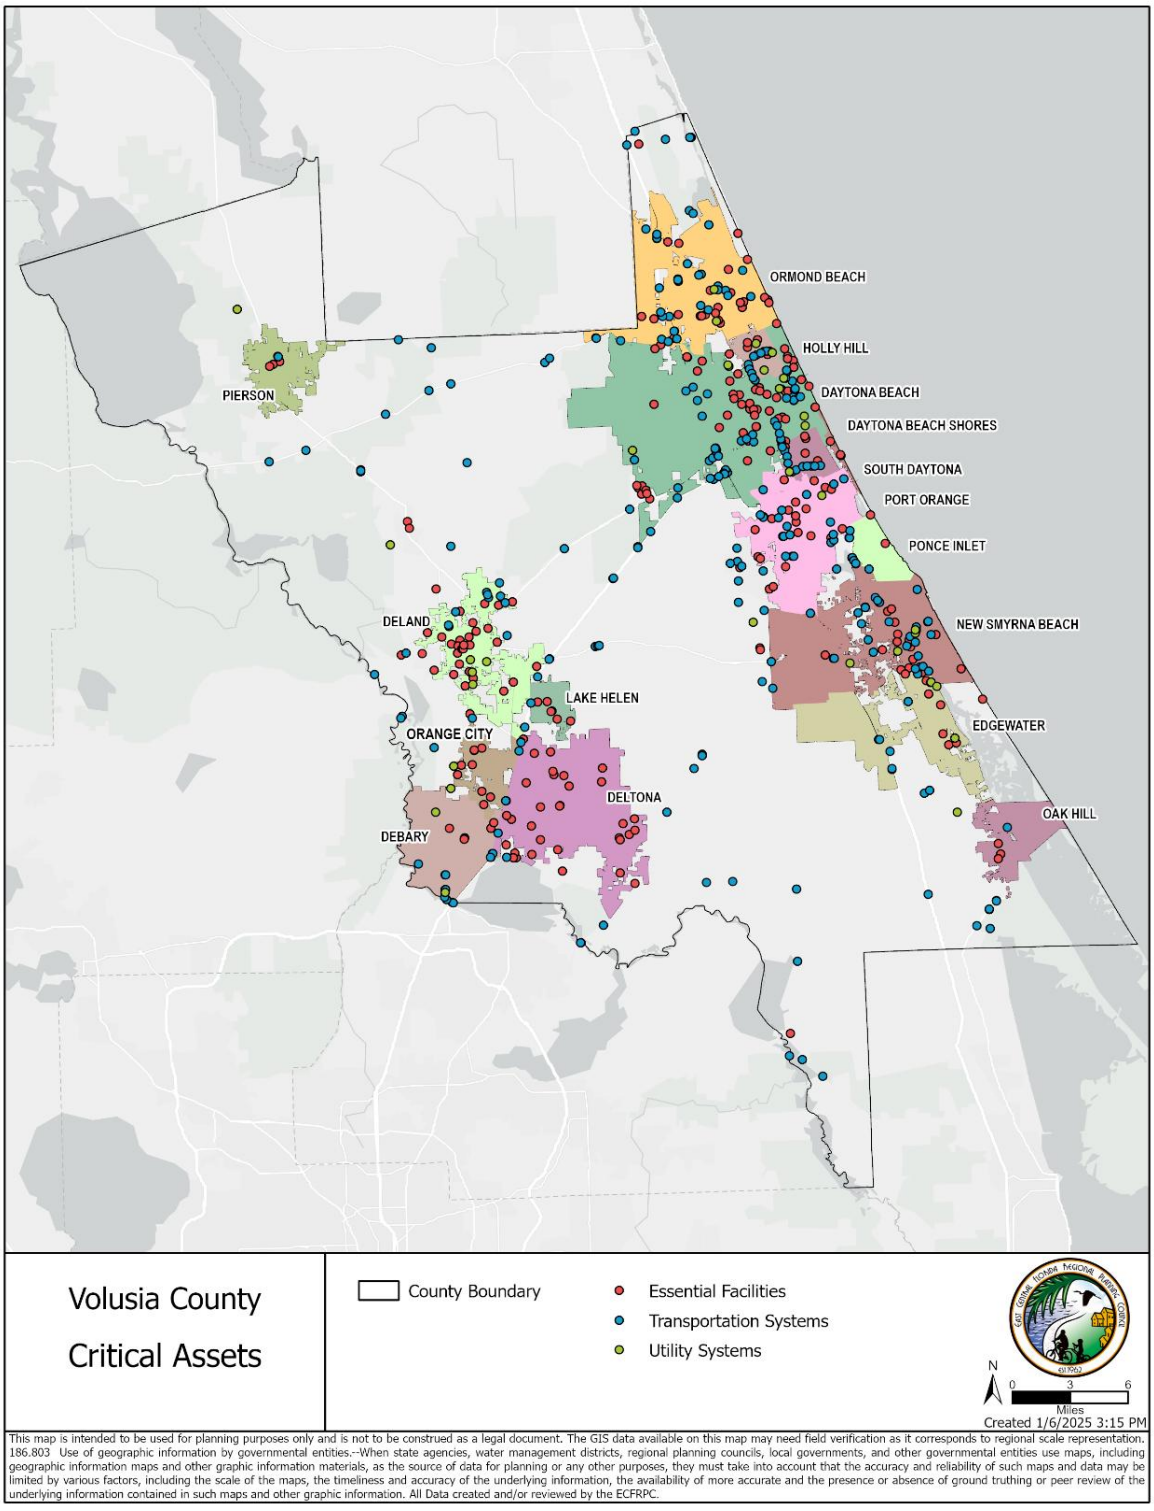
Critical Assets

Section 6 Table 2 lists Volusia County's critical facilities, as identified by each jurisdiction in Volusia County. A full listing of the critical facilities and their exposure to each hazard included in this vulnerability assessment is in **Appendix E**. This information is not available for public distribution as it contains sensitive information. The critical facilities data is on file with Volusia County Emergency Management.



Section 6: Table 2: Number of Critical Facilities

6.4 AGRICULTURE

Vulnerability

Agriculture in Volusia County is a sector that encompasses crops, livestock, and environmental resources. This sector is vulnerable to a variety of threats, including infestations, invasive species, and diseases. Infestation or disease in agriculture refers to the significant increase of biological entities such as insects, rodents, bacteria, or viruses in a given area, which can adversely affect crops, threaten human and animal health, damage valuable crops, or lead to the loss of significant environmental resources.

In Volusia County, common agricultural threats include infestations by mosquitoes, citrus greening, southern pine beetle, Florida dampwood termites, rats, and noxious plants like the Brazilian pepper tree. These threats can impact key agricultural crops such as citrus, vegetables, and ornamental plants. For instance, citrus greening, a bacterial disease, severely affects citrus crops, leading to significant economic losses. Similarly, the southern pine beetle can devastate pine forests, impacting timber production, while invasive species like the Brazilian pepper tree can outcompete native plants and disrupt local ecosystems. Livestock in Volusia County, including cattle, poultry, and horses, are also at risk from various diseases. Diseases such as foot-and-mouth disease and avian influenza can spread rapidly, causing substantial harm to livestock and posing a risk to human health. Contaminated water supplies used for irrigation or livestock drinking water can exacerbate these issues, leading to widespread problems for all residents in and near Volusia County.

The overall vulnerability of Volusia County and its jurisdictions to agricultural diseases and pests is low. Although there is not a large percentage of farmland in the county, disease can spread quickly if response is not immediate. The cities of Oak Hill and Pierson and unincorporated parts of Volusia County are most vulnerable to agricultural incidents because this is the largest area of farmland countywide. Climate change may exacerbate agricultural threats via the movement of invasive species. **Section 6: Figure 2** displays the areas of the county with the most vulnerability. The Western and Southern portions of the county are at highest risk.

Impacts

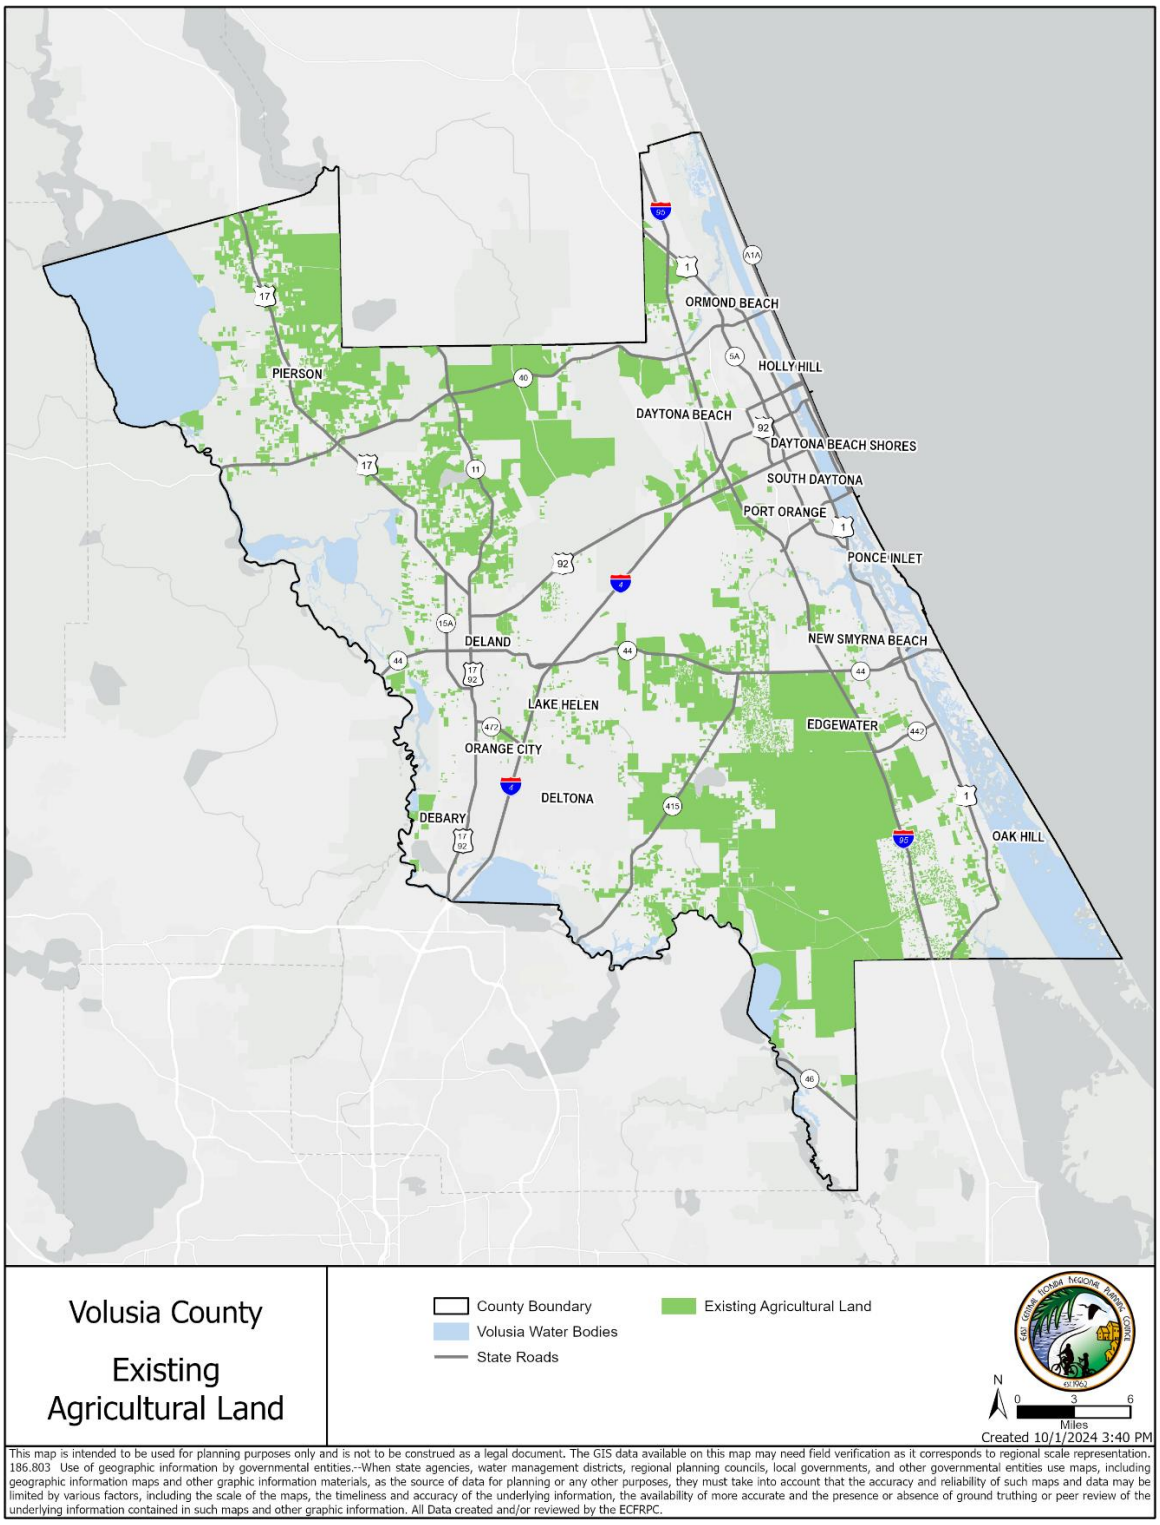
Environmental impacts include ecosystem disruption through the destruction of crops, contamination of soil and water, and displacement of native species by invasive plants. These disruptions can lead to the loss of biodiversity, affecting the region's ecological balance. There are many natural springs located on the west side of the county, such as Blue Springs, DeLeon Springs, Green Springs, and Gemini Springs, that attract tourism and protect native species.

On top of having profound ecological impacts, invasive species cost Floridians over $500 million each year; these costs include monitoring, testing, management, eradication, and restoration efforts. Future conditions may exacerbate the concern. Temperature changes, extended growing seasons, and altered rainfall patterns can support the spread of organisms into new territories. Additionally, as climate zones shift, the natural predators of pests might not migrate at the same rate, potentially leading to an imbalance where pest populations can grow unchecked. The probability of invasive species continuing to impact Volusia County is considered likely, occurring once a year or more. The economic impact of agricultural infestations and diseases in Volusia County can be profound, especially for the South and Western parts of

the county where there is a significant agriculture presence. Financial losses can result from crop destruction, decreased yields, and the costs associated with pest control and disease management. This is particularly relevant for Enterprise and Pierson.

Public health, especially of residents living in proximity to agriculture, is another critical area affected by agricultural threats. Additionally, vector-borne diseases spread by pests like mosquitoes, such as West Nile virus, dengue fever, and Zika virus, pose direct health risks to the public.

Responders dealing with agricultural infestations or disease outbreaks face health risks if exposed to harmful organisms or chemicals. Ensuring the safety of responders requires robust safety protocols, including the use of personal protective equipment (PPE) and decontamination procedures. Despite these risks, the continuity of operations in most sectors is unlikely to be significantly impacted by agricultural infestations or diseases. Essential services and functions can generally continue with minimal interruption. However, ensuring the continuity of operations for emergency response agencies is critical to effectively managing these threats.



Agricultural infestations and diseases are also unlikely to directly impact property, facilities, or infrastructure in urbanized areas of the county. The primary effects are concentrated on the agricultural lands. To mitigate these risks, it is essential to implement robust surveillance systems to detect and respond to biological threats quickly. Regular monitoring of crops, livestock, and the environment for signs of infestation or diseases is crucial. Education and training programs for farmers, agricultural workers, and first responders are necessary to ensure they can recognize and respond to agricultural threats effectively.

Clear communication channels between local, state, and federal agencies are vital for a coordinated response. This includes mutual aid agreements and support from the Florida Division of Emergency Management (FDEM). Emergency preparedness plans should be developed and regularly updated to include specific protocols for addressing agricultural infestations and diseases, covering containment, decontamination, and recovery processes.

Investing in research to develop resilient crop varieties and livestock breeds that are less susceptible to diseases is also important. Promoting the development of rapid detection technologies for pests and pathogens can enhance the county's ability to respond to agricultural threats. Every jurisdiction must integrate pest management (IPM) practices that can control pest populations using environmentally sustainable methods, such as biological control, habitat manipulation, and resistant crop varieties.

In conclusion, while Volusia County's agricultural sector faces low risks from infestations, invasive species, and diseases, proactive measures can significantly reduce these risks and mitigate their impacts. By enhancing surveillance, improving coordination, and investing in education and research, the county can better protect its agricultural assets and ensure food security. Comprehensive planning and preparedness efforts can minimize the overall public health, environmental, and economic impacts of agricultural threats. Existing land use was derived from parcel data provided by Volusia County GIS as seen in **Section 6 Figure 2**.

Section 6: Figure 2: Existing Agricultural Land in Volusia County

Source: Volusia County Property Appraiser, ECFRPC

6.5 COASTAL EROSION

Vulnerability

Coastal erosion is a significant concern for Volusia County, with all coastal areas prone to this natural process. Nearly half of the county's 47 miles of shoreline are considered critically eroded. While the population is not explicitly threatened by coastal erosion, the economic impact on beachfront properties can be substantial. Coastal erosion is typically measured as the annual shoreline change for a given beach cross-section over a long period.

Coastal erosion poses a considerable threat to beachfront properties within five jurisdictions of the county, as well as unincorporated areas. More than 5,000 properties are at direct risk, representing over $800 million in property value. Properties at the highest risk are those with low elevations, as wave action and dune degradation can compromise the integrity of the lot foundation. Properties with lower foundations, or those not elevated above the base flood elevation, are at higher risk for water damage, loss of personal property, electrical damage, structural collapse, and, in rare instances, loss of life.

Daytona Beach Shores and New Smyrna Beach are particularly vulnerable to coastal erosion due to their extensive shoreline properties. Additionally, storm surge presents a unique financial challenge, as beachfront properties are typically high value. Volusia County has engaged in beach renourishment activities and hardening shorelines with gray infrastructure, such as seawalls, and green infrastructure, such as living shorelines. Continued development along the shorelines and storm surges increasing in intensity and frequency contribute to the vulnerability of the coastal cities in Volusia County.

Impacts

The county's Lifeguard Headquarters and Administration Building, located on the beach in Daytona Beach, provides public safety and lifeguard services to the entire beach area. The Ponce Inlet Lighthouse, another significant site, has undergone extensive work by the U.S. Army Corps of Engineers to re-nourish the sand and install rock jetties to protect the area.

There are two piers with restaurants vulnerable to storm surge, including Joe’s Crab Shack on the Main Street Pier, which is a major tourist attraction in Daytona Beach’s Boardwalk Entertainment Area. The entire shoreline, along with condominiums, residential homes, businesses, and restaurants, can be susceptible to coastal erosion depending on the strength and direction of storms. The North Peninsula State Recreation Area in Ormond-By-The-Sea and the A1A roadway in that area are at higher risk than other county areas, although it remains mostly undeveloped.

Coastal erosion can be a consequence of tropical storms, hurricanes, and nor'easters. Homes and structures built along the coastline may be damaged or even destroyed during these events, with protective dunes potentially obliterated. All property along the coast of Volusia County is at risk, with private property in some areas losing inches or feet of beach each year. Coastal erosion has caused over $400 million in damage.

The environment is highly vulnerable to coastal erosion. Erosion can occur via wind or water, leading to sedimentation in waterways, loss of habitat for coastal ecosystems, and changes in coastal geomorphology. Protective dunes on the shore may be reduced or washed away in hurricanes and high surf, further exacerbating erosion issues.

Responders are not directly impacted by coastal erosion, and the Volusia County Emergency Management Division will not face issues in continuing operations and delivering services due to this hazard. Although coastal erosion does not directly threaten program operations, as the Volusia County Emergency Operations Center is located 20 miles inland, the public faces numerous consequences. Homes can collapse into the ocean, and critical utilities and roadways may be compromised if beaches erode, and water inundates their systems. Coastal erosion also affects many public beaches in Volusia County, leading to the loss of recreational areas and potential destruction of private property and homes. In some rare cases, homes and businesses may fall into the ocean.

The consequences for the environment from coastal erosion are severe. Erosion by wind or water can deplete coastal ecosystems, reduce protective dunes, and cause sand and soil to enter water and sewer systems, leading to public and environmental issues. Coastal erosion is costly, with beach nourishment expenses averaging around $2.00 per cubic yard, placing a financial burden on local economies.
Despite these challenges, public confidence in government should not be significantly impacted by coastal erosion, as rapidly eroding beaches remain a high priority for nourishment efforts.

Coastal erosion also impacts tax revenue as some residents may choose to move away or cannot afford to fix a property after a storm. This can lead to condemned buildings that are unsightly and unsafe.

Section 6 Table 4 provides the number of people and number and value of improved properties that are susceptible to coastal erosion. Coastal erosion is very likely to continue impacting the coastal areas of Volusia County. Jurisdictions with critically eroded beaches in Volusia County actively participate in the federal beach nourishment program.

Section 6: Table 4: Total Exposure from Coastal Erosion for Ocean Shorelines & Lagoons

JURISDICTION	AT-RISK AREAS (within 250 feet of shoreline)		
	Total Number of Properties at Risk	Total Improved Value of Buildings at Risk	Total County Taxable Value
Daytona Beach	3914	$1,573,304,260.00	$1,137,404,025.00
Daytona Beach Shores	522	$317,920,506.00	$263,536,865.00
Edgewater	318	$351,929,936.00	$224,619,720.00
Holly Hill	647	$255,000,654.00	$200,624,664.00
New Smyrna Beach	3947	$2,905,660,684.00	$2,029,296,261.00
Oak Hill	391	$164,494,791.00	$92,141,021.00
Ormond Beach	1362	$1,303,941,624.00	$953,112,793.00
Ponce Inlet	615	$368,335,931.00	$255,695,564.00
Port Orange	777	$377,236,994.00	$230,213,454.00
South Daytona	439	$196,332,861.00	$140,465,685.00
Unincorporated	5080	$2,701,737,784.00	$1,903,028,923.00

6.6 DROUGHT

Vulnerability

Volusia County and its jurisdictions are uniformly vulnerable to drought and overall vulnerability to drought is high. During the dry months of the year, drought can cause serious consequences and have compounding effects. Tactics such as water usage restrictions are implemented to save water. Extreme temperature events are increasing in frequency and intensity deepening vulnerabilities. Volusia County and its jurisdictions have continued to increase in population and the continuous growth is expected to worsen residents' vulnerabilities the water shortages.

Impacts

Typically associated with crop damage rather than damage to the built environment, droughts can have significant secondary effects. Historical data indicate that drought conditions have led to wildfires in the years 1985, 1988, 1998, and 2009. These conditions can impact the Florida Aquifer, affecting the water supply for Volusia County residents, many of whom rely on personal wells or the county's public water supply, which is also drawn from wells.

Drought can lead to substantial crop loss, livestock reductions, and disruption of fish habitats. Furthermore, it is often associated with an increased wildfire threat, placing both human and wildlife populations at heightened risk. The environment is at risk from drought. Vegetation and sensitive ecosystems can suffer without adequate water, and stream flows may be reduced, impacting riparian and riverine ecosystems. Reduced lake and canal depths can impact boating traffic and access to certain waterways, diminishing property values in these locations. Notably, the Lake Beresford area in DeLand, which attracts tourists for fishing and houseboat rentals, could suffer from severe drought conditions. The St. John's River, which runs from south to north, can also be affected by droughts occurring as far south as Lake Okeechobee.

Although droughts do not directly affect the building stock within the county, they can cause numerous indirect losses to personal property and critical facilities. For instance, agricultural areas, especially in the northwest part of the county including the Town of Pierson, are particularly vulnerable. Losses within the agricultural industry can have a cascading effect on local businesses, such as those selling tools or heavy machinery, resulting in indirect financial losses. Consequently, residents may lose jobs, leading to a net economic loss for the county. Therefore, the most significant losses from drought are financial rather than physical, unlike other hazards.

The secondary physical impact of drought is the potential for sinkholes. Both excess rainfall (flooding) and drought conditions can negatively affect Florida's limestone bedrock. Thus, sinkholes represent a primary physical risk to the county's building stock due to drought conditions. The western portion of the county is particularly vulnerable to this because sinkholes happen more commonly than the eastern side of the county. Droughts can also result in increased wildfire activity. For instance, the 1998 drought directly contributed to wildfires that burned over 163,000 acres. Drought can significantly impact the county's economy, with the agricultural and natural resources industries contributing $781 million annually. An extended period of drought could seriously harm this sector.

Public confidence in government is unlikely to be significantly affected by a drought occurrence, as these are common occurrences in Florida. Insurance and assistance programs are widely available to farmers.

The public may not always experience direct consequences of drought, but government-imposed water restrictions may affect residential lawns and gardens. Chapter 50, Article III Minimum Environmental Standards, Division 8 Water Conservation references watering restrictions required for all jurisdictions within Volusia County.

Overall, program operations are not impacted by drought conditions. Responders are generally not impacted by drought, although caution and adequate hydration are necessary during extreme heat. Historically, the Volusia County Emergency Management Division has not faced issues continuing operations and delivering services during droughts events.

While homes, businesses, critical facilities, and infrastructure are generally not significantly impacted by drought and extreme heat, certain hydrologic processes, such as irrigation capacities and tourism-related activities (e.g., lakes and golf courses), can be affected. The St. Johns River Water Management District may restrict lawn irrigation, impacting residences and golf courses. Additionally, wells may reach dangerously low levels.

People are at risk from drought due to its negative effects on agriculture and livestock, which may impact long term food supplies. Farmers are the most directly affected by drought. Property may be at high risk from drought under extreme circumstances. Extended drought periods can significantly impact agricultural products and farmlands, particularly the fern industry in Volusia County, which experienced droughts in 1981, 1985, 1998, 1999, and 2000.

6.7 EXTREME TEMPERATURE

Vulnerability

Overall vulnerability to extreme temperature is medium in Volusia County and its jurisdictions. While property is unlikely to be affected by extreme temperature conditions, unhoused populations are highly vulnerable to extreme heat with approximately 700 unhoused citizens between Flagler and Volusia counties on any given day as of 2024[1]. Extreme temperatures can also pose greater vulnerabilities on outside workers, the elderly, and infant populations. Extreme temperatures would make all of Volusia County and its jurisdictions equally vulnerable.

Agricultural areas are the most vulnerable areas to extreme temperatures. However, damage to critical facilities, businesses and homes can occur as a result of these events. Annualized losses for these events are very hard to measure. Existing fauna and animals are also vulnerable to extreme temperatures with the possibility of migration or fatalities.

Impacts

Extreme temperatures have significant impacts when they occur. Winter storms can range from moderate snow over a few hours to blizzard conditions lasting several days. Ice storms, which occur when moisture falls and freezes upon impact, can cause widespread power outages, bring down trees, damage property, and result in fatalities and injuries. Extreme heat events are more common and pose significant challenges to Volusia County. Extreme heat is defined as temperatures that hover 9 degrees or more above the average high temperature of 90°F for the region and last for three or more consecutive days. These events can lead to widespread impacts:

All existing and future buildings, facilities, and populations in Volusia County are considered to be exposed to extreme temperature. The potential impacts include:

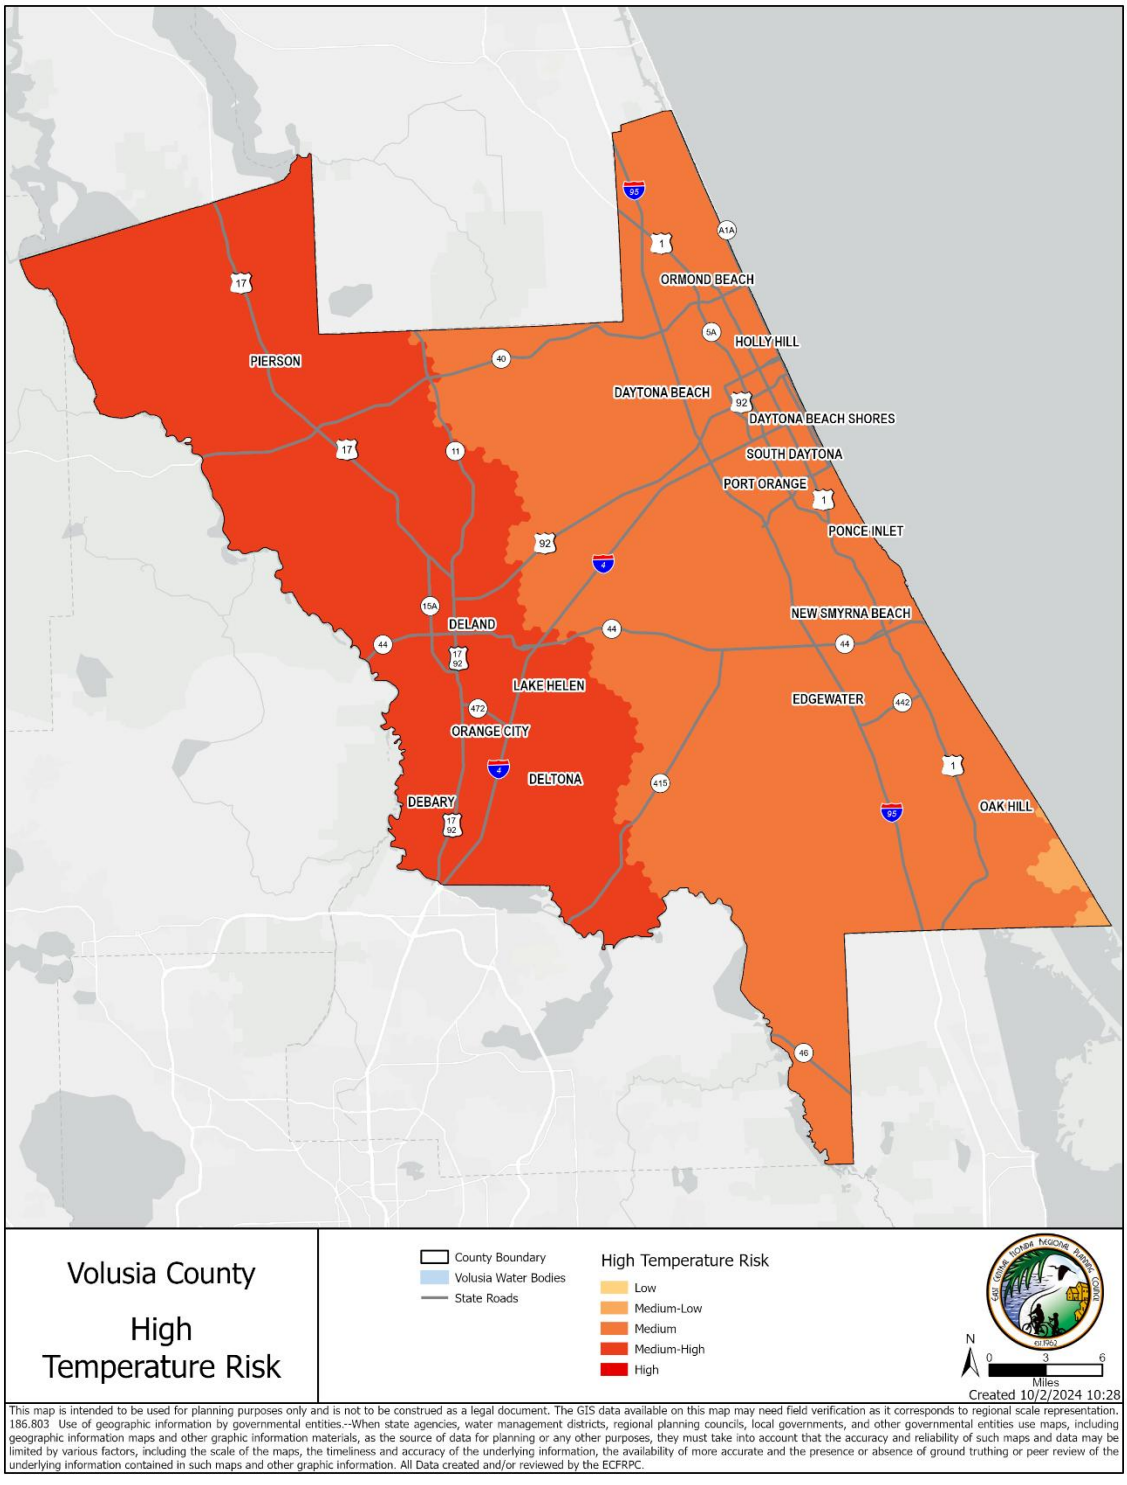
- **Public Risks:** All populations of Volusia County are vulnerable to extreme temperatures. Hypothermia and frostbite or heat illness are significant concerns, especially for vulnerable populations such as the elderly, young children, and the unhoused. Power outages can lead to HVAC failures, increasing the risk of illnesses. Heat exhaustion and heatstroke are serious health concerns, particularly for the elderly, children, outdoor workers, and those with pre-existing health conditions. Increased electricity demand for air conditioning can strain the power grid and lead to outages, leaving residents without cooling during the hottest periods. There is a growing concern for the unhoused population and extreme heat as climate change continues to impact frequency of events.
- **Responders' Risks:** Icy conditions can hinder emergency response, delaying response times. First responders must be prepared for the cold and heat to ensure they have the necessary equipment to operate safely. First responders must take precautions during extreme heat events to avoid heat-related illnesses. Ensuring adequate hydration and monitoring for signs of heat exhaustion and heatstroke are critical.
- **Property and Infrastructure:** Ice can accumulate on power lines, leading to outages that affect homes, businesses, and critical facilities. Burst pipes due to freezing temperatures can lead to

[1] https://www.vfcch.org/#:~:text=There%20are%20over%20600%2C000%20people,in%20Volusia%20and%20Flagler%20Counties.

significant water damage. Winter storms tend to affect transportation infrastructure (such as bridges and boat traffic) in addition to power sources. Consecutive high heat days may overload the electrical grid, also leading to power outages. Prolonged high temperatures can cause roads and bridges to expand and crack, leading to maintenance challenges. Power lines and transformers are also more likely to fail under high demand and heat stress.

- **Environmental Impact:** Wildlife may struggle to find food and shelter, and plants not adapted to extreme temperatures may be damaged or killed. Water bodies can warm, leading to reduced oxygen levels that harm aquatic life. Vegetation can suffer from heat stress, leading to reduced crop yields and increased wildfire risk.
- **Economic Impact:** Agricultural areas, particularly the Town of Pierson known as the "Fern Capital of the World," are vulnerable to severe financial losses. Transportation infrastructure, such as bridges and boat traffic, can also be affected, impacting the economy further. Moreover, areas heavy with agriculture could be at greater risk from an economic perspective, as these land uses can incur heavy losses during extreme temperatures. Extreme heat is associated with drought, thus can severely impact the agricultural sector. The annual economic impact of Volusia County's agriculture and natural resources industries is $781 million. An extended period of heat could seriously impact this.

Consequences for the public from extreme temperatures are the potential loss of power, with the unhoused population being the most affected. Shelters may need to be opened during these events. Public confidence in government is likely to remain stable during such events as they are rare in the county.



Responders are not expected to be adversely impacted due to the limited duration of extreme temperatures in Volusia County. Government operations are expected to continue during these events, with Volusia County Emergency Management maintaining operations through redundant power, IT, and communication systems.

Consequences of extreme heat on the public are not always direct but include impacts on agriculture and the food supply. Water restrictions may be implemented, affecting residential lawns and gardens.
Responders must exercise caution in extreme heat, ensuring adequate hydration. Historically, Volusia County Emergency Management has not faced significant issues in continuing operations during extreme heat events. Program operations are expected to continue without significant disruptions.

The data used for the extreme high temperature risk map in **Section 6 Figure 3** was derived from the ECFRPC's Resilience Collaborative Risk Assessment. Dr. Christopher Emrich from the University of Central Florida developed this data through the VMAP platform.

Overall, extreme heat poses a more consistent threat to Volusia County compared to extreme cold. While extreme cold events are rare, they can cause significant disruption and damage when they occur. Extreme heat is more common and presents ongoing challenges to public health, infrastructure, and the environment. Both types of extreme temperatures require effective preparedness and response plans to mitigate the impacts on the county's residents, infrastructure, and natural resources.

Section 6: Figure 3: Extreme Heat Risk in Volusia County[2]

[2] https://www.hazardrisk.org/

6.8 FLOOD

Vulnerability

Flooding is one of the most destructive and costly natural hazards, not only in Volusia County but across the United States. FEMA identifies flooding as the most expensive natural hazard in terms of damage, with long-term psychological and economic impacts for affected communities. While all 50 states are at risk for flooding, Volusia County faces unique vulnerabilities due to its geography, environmental systems, and population distribution.

The overall vulnerability to floods in Volusia County and its jurisdictions are high. With several large bodies of water in the county and municipalities including Lake Monroe, Indian River Lagoon, Tomoka River, Halifax River, and the St. John's River; the community is very vulnerable to flooding. Enforcing floodway restrictions and building codes reduces vulnerability; however, with heavy rains caused by severe weather and tropical cyclones, flooding is possible in any jurisdiction of the county.

Flooding in Volusia County typically results from prolonged rainfall, storm surges, or overflow from rivers and streams. Although flash flooding, characterized by rapidly rising water, does not occur in the county, localized flooding can cause significant damage and disruption. An inch of water in a home can cause extensive property damage and standard homeowner's or renter's insurance policies do not cover flood-related losses, making homeowners vulnerable. A separate National Flood Insurance Program (NFIP) policy must be purchased to provide coverage. Unfortunately, many residents without flood insurance may receive little to no assistance in repairing their homes and property following a flood event. The frequency of flooding events has continued to increase and each year the recovery costs rise.

Properties most vulnerable to flooding damage are those with the lowest elevations. While a flood zone can envelop properties at a specified range of elevations, the variability in the elevations within those zones make certain buildings more prone to flooding damage than others. Additionally, structures that are located below the roadway system adjacent to the building (without a bio-swale buffer) are at extreme risk for flooding, as transportation networks are among the first areas to become inundated in a flood situation.

Many critical facilities are located within the 100-year floodplain. Adverse to the results when analyzing properties within each zone on a county level, the majority of critical facilities that are located within a flood zone in Volusia County are located within Flood Zone 'A'. A majority of the critical facility structures located within the 100-year floodplain are located in Volusia County's beach side communities. These include fire stations in New Smyrna Beach, Ponce Inlet, Daytona Beach Shores, Daytona Beach and Ormond Beach. There are hospitals at risk in low lying areas in Orange City and DeLand. Maytown Road in Oak Hill to Osteen/Enterprise is not an evacuation route because of repeated flooding. It is recommended that the County and all jurisdictions within the county enact policies to limit or disallow future development within the 100-year floodplain.

To assess flood risk, a GIS-based analysis was used to estimate exposure to flood events using FEMA's preliminary Digital Flood Insurance Rate Map (DFIRM) data in combination with local tax assessor records. The determination of assessed value at-risk (exposure) was calculated using GIS analysis by summing the total assessed building values for improved properties that were confirmed to be located

within an identified Zone A/AE (100-year floodplain), Zone VE (100-year coastal flood zone, associated with wave action), and Zone X (500-year floodplain). This analysis is parent parcel data. It is recommended that the flood analyses be revised once new flood maps are available. Flooding can impact all populations, primarily those who live, work or recreate anywhere within the county. Flooding can also cause property loss to structures located within the 100-year floodplain.

Section 6 Table 5 lists the number of properties that are in both 100-year (A/AE) flood zone and 500 (X) flood zone, and the total value of the properties in the zones. This includes the entire property, although only a portion of the property may be located within the flood zone. The table corresponds with **Section 6 Figure 5**, which depicts all flood hazard zones. For a listing and generalized map of all Repetitive Loss Properties within the County and its 16 jurisdictions, please reference the 2025 Floodplain Management Plan. The table below summarizes types of flooding advisories.

Section 6: Figure 4: National Weather Service Alerts

Alert	Criteria
Flood Watch	Atmospheric conditions over a large area, varying in size from multiple counties to multiple states, support the development of heavy rain and/or thunderstorms that are capable of producing flooding. A flood watch implies a longer period of relatively lighter rains, adding up to a large amount of rain. Longer-term flooding implies a slower or steadier rise in the water levels of creeks, streams and larger rivers. Roads can also become flooded, but it is usually more gradual, allowing motorists to monitor conditions more closely.
Flood Warning	A Flood Warning is issued by the National Weather Service when heavy rain has been occurring, and flooding is either occurring or will occur within a specified time, usually within 60 minutes.
Flash Flood Watch	Implies a shorter period of heavier rain. Generally, if flooding is expected within six hours of the onset of rain, a Flash Flood Watch is most appropriate. Flash flooding by definition suggests rapidly rising water, such as a surge of water heading rapidly downstream in a creek or small river. It could also be rapidly rising water on roadways, which can cause motorists to become stranded in vehicles, or even worse, washed into creeks and small rivers due to rapid runoff.
Flash Flood Warning	Atmospheric conditions over a large area, varying in size from multiple counties to multiple states, support the development of heavy rain and/or thunderstorms that are capable of producing flash flooding: A Flash Flood Warning is issued by the National Weather Service when heavy rain has been occurring, and flash flooding is either occurring or will occur within a specified time, usually within 60 minutes.
Urban and Small Stream Advisory	Flooding of small streams, streets and low-lying areas, such as railroad underpasses and urban storm drains is occurring.

Source: National Weather Service

Impacts

Flooding can devastate homes and businesses, washing away entire structures or causing irreparable damage. Roads and bridges may be washed out, limiting access to essential services and isolating

communities. In some cases, flooding is a secondary hazard following a hurricane or tropical storm. Critical infrastructure, including utilities, emergency response facilities, and government buildings, is also at risk.

Structural damage because of flooding can result in a loss of electricity, which can cause communication problems throughout the county. Moreover, physical damage due to water can result in the loss of personal property (for business owners and homeowners), while heavy, often expensive equipment located within critical facilities can be damaged.

The Volusia County Emergency Operations Center is not located within an SFHA, but access roads and surrounding areas may be impacted by severe flooding. During extreme flood events, access to the EOC could become difficult. Contingency plans, such as the use of Volusia County Sheriff's Office helicopter assets or all-terrain vehicles, are in place to maintain operations.

Flooding poses a significant risk to Volusia County's sensitive ecosystems. Riverbed erosion caused by floodwaters introduces sediments into waterways, potentially clogging stormwater systems and affecting water quality downstream. Floods can also carry hazardous materials and pollutants into rivers and streams, damaging aquatic habitats and riparian ecosystems. Additionally, nutrient-rich runoff, such as water released from Lake Okeechobee into the Intracoastal Waterway, can lead to algal blooms and oxygen depletion in rivers, causing fish die-offs. Although historical data on environmental impacts specific to Volusia County is limited, these events highlight the need for proactive monitoring and mitigation efforts.

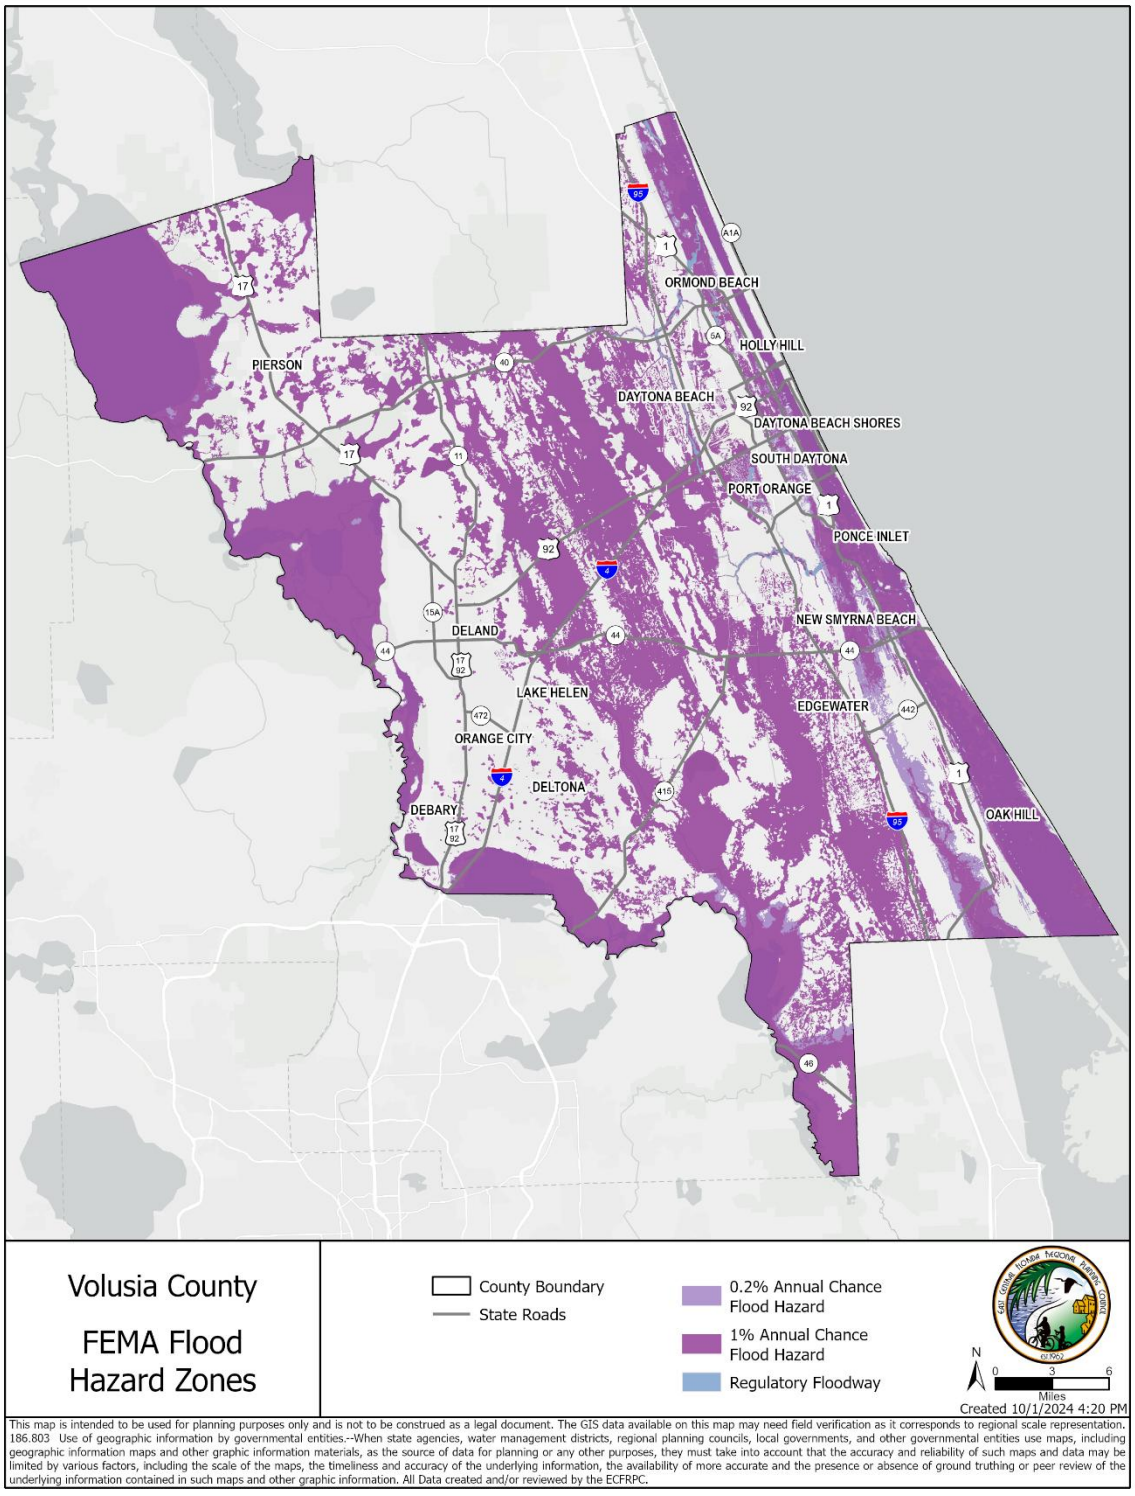
The consequences of flooding on the public can be severe. Floodwater can trap individuals in vehicles or homes, leading to injuries or fatalities. Recovery from a flood is often costly and time-consuming, taking weeks, months, or even years for individuals and communities to fully recover. For uninsured residents, the financial burden can be insurmountable.

Economically, flooding disrupts transportation, agriculture, business continuity, and government services. Agricultural areas, a key component of Volusia County's economy, are particularly vulnerable to flood damage. Historical data shows that between 1994 and 2009, 11 major flood events caused over $100 million in agricultural related damage in the county. The frequency of flooding events has continued to increase and each year the recovery costs rise.

Responders face significant challenges during flood events, including swift water rescues and navigating damaged or obstructed infrastructure. For instance, during Tropical Storm Fay, responders conducted numerous water rescues, highlighting the risks to both citizens and emergency personnel. Despite these challenges, the VCEOC has historically remained operational during flood events. Mutual aid agreements, including the Emergency Management Assistance Compact (EMAC), allow Volusia County to request additional resources and support during significant incidents.

To reduce the impact of flooding and maintain public confidence, Volusia County has implemented several education and mitigation initiatives. In collaboration with FEMA, NOAA, USACE, FDEM, ECFRPC, and the Florida Department of Insurance, the county provides residents with information on flood risks and the importance of flood insurance. During the NFIP mapping process, public outreach efforts invited residents to learn about flood vulnerabilities and mitigation options.

Volusia County Emergency Management has distributed over 5,000 NOAA weather radios to mobile home residents and created social media campaigns to disseminate critical information during flood events. The county has also developed an app for mobile devices.



Mitigation activities, combined with education and public awareness campaigns, play a crucial role in reducing the financial and social burden of flooding while fostering community resilience. These efforts ensure that residents and businesses are better prepared to recover quickly and effectively after a flood event.

Section 6: Table 5: Property Exposure to Flood Hazard Zones

Jurisdiction	Number of Properties	Total Improved Value	County Taxable Value
Daytona Beach	13,847	$6,658,435,543	$4,082,706,747
Daytona Beach Shores	507	$437,389,147	$373,912,678
DeBary	1,387	$590,820,327	$340,103,975
DeLand	369	$234,887,960	$120,198,104
Deltona	5,522	$1,545,648,555	$668,644,860
Edgewater	1,564	$690,712,173	$417,012,709
Holly Hill	3,160	$18,630,680	$14,443,385
Lake Helen	288	$755,792,246	$502,823,799
New Smyrna Beach	10,556	$78,324,628	$36,649,988
Oak Hill	891	$5,286,195,924	$3,238,539,783
Orange City	74	$268,013,123	$143,174,110
Ormond Beach	5,093	$254,676,169	$131,349,031
Pierson	163	$2,993,289,460	$2,032,959,092
Ponce Inlet	1,083	$37,715,903	$17,576,761
Port Orange	8,567	$683,896,424	$450,947,795
South Daytona	4,311	$3,029,147,801	$1,859,130,800
Unincorporated	31,415	$1,285,011,052	$765,792,886
TOTAL	**88,797**	**$24,848,587,115**	**$15,195,966,503**

6.10 PUBLIC HEALTH EMERGENCIES

Vulnerability

Public health emergencies encompass a range of incidents, including disease outbreaks, pandemics, and mass casualty events that place extraordinary strain on healthcare systems. These emergencies may arise from natural causes, accidental exposure, or intentional acts, such as bioterrorism. Under Section 319 of the Public Health Service Act (42 U.S.C. § 319), the Secretary of the Department of Health and Human Services (HHS) has the authority to declare a public health emergency, which often prompts hospitals and other healthcare providers to exceed their normal operating capacities.

Volusia County's overall vulnerability to public health emergencies is medium. The people of Volusia County are highly vulnerable to the spread of disease due to the population size and proximity to tourist hotspots with travelers from all over the country and the world. All jurisdictions in the county are similarly vulnerable.

All residents of Volusia County are potentially vulnerable to public health emergencies, though the severity of impact often varies across demographic groups. Particularly at risk are the very young and the elderly, whose immune systems are more susceptible to illness. Volusia County has previously experienced isolated cases of imported malaria and West Nile virus (WNV) encephalitis, though WNV is asymptomatic in 80% of cases. Recent outbreaks of dengue fever (DEN-1) in nearby Martin County underscore the potential for emerging infectious diseases to pose a future threat. Communities with high density are more likely to spread illnesses faster, such as Daytona Beach and Deltona.

Impacts

Although public health emergencies primarily impact human health, agriculture could serve as the source of an outbreak in rare cases, such as with foodborne illnesses or zoonotic diseases transmitted from livestock to humans. The residents with the highest risk for this type of transmission are those in agricultural parts of the county. See Agriculture for further details on vulnerable locations. However, property and infrastructure are not directly at risk in these scenarios.

The environment is unlikely to be directly affected by most public health emergencies, except in cases of bioterrorism or hazardous materials (HAZMAT) incidents, where contamination could impact air, soil, or water quality. For further details on these scenarios, see the HAZMAT/Terrorism sections of this report.

Public health emergencies can disrupt program operations, especially if key personnel become ill or are otherwise unavailable. Historically, Volusia County's Emergency Operations Center has not experienced significant operational disruptions due to public health emergencies. However, in the event of a widespread outbreak or pandemic, reduced staffing levels may necessitate virtual communications or remote work for some personnel. In extreme cases, the county may rely on support from neighboring jurisdictions through the Emergency Management Assistance Compact.

If the primary Volusia County Emergency Operation Center becomes contaminated, operations may shift to an alternate location to maintain continuity. Detailed contingency plans are outlined in the Volusia County Emergency Management (VCEM) Continuity of Operations Plan (COOP).

The consequences of public health emergencies for residents can range from temporary illness to long-term health issues or death, depending on the nature and scale of the event. Overwhelmed healthcare facilities may lead to crowded hospitals, long wait times for treatment, and limited availability of medications or vaccines.

Emergency responders are also at risk during public health emergencies, as they may be exposed to contagious diseases or hazardous substances. To protect themselves, responders may need vaccinations, protective equipment, and training to safely navigate these incidents.

A widespread public health emergency could have significant economic repercussions for Volusia County. High infection rates may reduce workforce availability, leading to interruptions in business operations and consumer spending. Early detection, vaccination programs, and public health interventions are critical for minimizing these economic disruptions. Tourism activities could also be slowed or halted, disrupting the entire county.

Maintaining public confidence in governance is a key component of managing a public health emergency. The Volusia County Health Department plays a vital role in monitoring air and water quality, tracking emerging infectious diseases, and providing educational resources to residents. The department also coordinates hospital preparedness programs and healthcare coalitions to ensure a robust response to public health threats. Through its transparency and preparedness efforts, including online resources and public outreach campaigns, VCHD demonstrates its capacity to protect public health. This proactive approach minimizes the potential for a loss of public confidence during a crisis.

6.11 RISING COASTAL WATERS

Vulnerability

Rising coastal water is a significant hazard for Volusia County, encompassing storm surge, sea level rise, and tsunamis. This combination of immediate, catastrophic threats and long-term challenges has the potential to impact on the county's population, property, environment, economy, and government operations. The risks are particularly acute in coastal and low-lying areas near the Atlantic Ocean, Indian River Lagoon, Halifax River, St. Johns River, and other water-adjacent regions.

The municipalities most at risk are displayed in **Section 6 Table 6** and **Figure 6.** Rising coastal water poses the greatest risk to: Daytona Beach, Daytona Beach Shores, Edgewater, Holly Hill, New Smyrna Beach, Oak Hill, Ormond Beach, Ponce Inlet, Port Orange, south Daytona, and Unincorporated Volusia County due to its geographic proximity to the coast. Continued development along the shoreline also increases vulnerability to rising coastal waters for existing and future residents in these jurisdictions.

Residents in coastal areas of Volusia County face varying levels of risk from rising coastal water events.

- **Storm Surge:** The eastern portion of the county is highly susceptible to storm surge during hurricanes, with the worst-case scenario (Category 5 hurricane) potentially causing inundation almost as far inland as Interstate 95. Vulnerable populations in areas like Ponce Inlet, Daytona Beach Shores, and Ormond Beach face the highest immediate risks.
- **Tsunamis:** Although the U.S. Atlantic coast has a very low tsunami risk, the potential for significant impact exists. Coastal populations could experience rapid inundation, particularly in densely populated areas along the Halifax River and Atlantic coast. Tsunami events would likely allow for a minimum six-hour warning, enabling evacuation of at-risk populations. The most likely scenario for a tsunami in Volusia County would be triggered by a seismic event in Puerto Rico or off the western coast of Africa. Such events can affect populations thousands of miles away.
- **Sea Level Rise:** Sea level rise is currently being studied as a vulnerability to properties located near oceans, and many areas of eastern Volusia County would be inundated with water if sea level rise occurs as modeled by the U.S. Army Corps of Engineers. This long-term hazard poses no immediate threat to life but increases vulnerability to storm surge and coastal flooding over time. Impacts to residents in areas near the Indian River Lagoon, Halifax River, and St. Johns River are expected to escalate between 2040 and 2070.

Impacts

Rising coastal water poses substantial risks to property across Volusia County.

- **Storm Surge:** Coastal and low-lying areas east of Interstate 95, including properties along Spruce Creek and the Tomoka River, are vulnerable to storm surge inundation. Key at-risk locations include:
    - Barrier islands in Daytona Beach Shores and Ponce Inlet, which contain critical facilities like fire stations and city halls.
    - Infrastructure along the Halifax River, Indian River Lagoon, and Mosquito Lagoon, such as bridges (Main Street, Highbridge, Silver Beach, and North Bridge in New Smyrna Beach).
    - Iconic landmarks like the Ponce Inlet Lighthouse and Daytona Beach's Main Street Pier.
- **Tsunamis:** Property impacts would mirror those of a major storm surge, with debris transported inland, structural foundations compromised, and critical infrastructure disrupted.

- **Sea Level Rise:** Long-term property damage is expected in coastal areas adjacent to the Atlantic Ocean, Indian River Lagoon, Halifax River, and St. Johns River. Facilities near water bodies may require relocation, especially those handling hazardous materials. Saltwater intrusion could deteriorate stormwater infrastructure, including outfalls, lift stations, and pump stations, while older structures face heightened risks of damage.

The environmental impacts of rising coastal water in Volusia County are significant and varied.

- **Storm Surge and Tsunamis:** These events can devastate ecosystems, introducing saltwater into sensitive estuaries like the Indian River Lagoon and Halifax River. Saltwater intrusion into aquifers, the county's primary drinking water source, would be particularly harmful. Inundation could also damage dune systems and spread sewage and pollutants into the environment.
- **Sea Level Rise:** Coastal and riverbank ecosystems, including beaches and dune systems, are at risk of long-term degradation. Sensitive habitats, such as those for marine turtles, could face irreversible damage. Saltwater intrusion into stormwater infrastructure may exacerbate environmental harm.

The economic consequences of rising coastal water are profound. **Section 6 Table 7** and **Table 8** display financial exposures.

- **Storm Surge:** Damage to homes, businesses, and tourism infrastructure would result in substantial economic losses. A Category 5 hurricane could result in damages exceeding $1 billion, while impacts on tourism—a cornerstone of the county's economy—would be severe.
- **Sea Level Rise:** Gradual loss of property values, businesses, and community assets such as beaches will weaken the economic foundation of coastal areas. Investments in mitigation can reduce long-term risks but require substantial funding in the near term.
- **Tsunamis:** Like storm surge, tsunamis would devastate tourism, disrupt businesses, and impact the property tax base.

Public confidence in government could be significantly influenced by how rising coastal water events are managed.

- **Storm Surge and Tsunamis:** Delays in recovery or perceived inefficiencies could diminish public trust.
- **Sea Level Rise:** Public dissatisfaction could stem from either perceived inaction or over-investment in mitigation efforts. Balancing proactive measures with economic constraints is critical.

Rising coastal water could strain government operations and continuity.

- **Storm Surge and Tsunamis:** Response and recovery operations could be overwhelmed by the scale of damage, requiring mutual aid from adjacent counties, the state, and FEMA. Program operations may take months to return to normal.
- **Sea Level Rise:** While its effects are gradual, proactive relocation of facilities and infrastructure will be necessary to maintain operational continuity.

Volusia County has taken substantial steps to address these hazards, including participation in:

- The East Central Florida Regional Resiliency Action Plan and Resilience Collaborative.
- Sea level rise studies conducted by the Florida Department of Environmental Protection (FDEP).
- Development of a tsunami response plan and analysis of storm surge vulnerabilities.

These efforts, combined with the county's focus on adaptive strategies, demonstrate a commitment to protecting its residents, economy, and natural resources from the multifaceted threats posed by rising coastal water.

The interconnected challenges of storm surge, sea level rise, and tsunamis necessitate a comprehensive and adaptive approach. By leveraging regional collaboration, scientific research, and proactive planning, Volusia County can mitigate risks and build resilience to safeguard its future against the impacts of rising coastal water.

Storm surge data was obtained from the NOAA National Hurricane Center, which uses the hydrodynamic Sea, Lake, and Overland Surges from Hurricanes (SLOSH) model to simulate storm surges from tropical cyclones. Storm surge composites – Maximum Envelopes of Water (MEOWs) and Maximum of MEOWs (MOMs) – are created to assess and visualize storm surge risk under varying conditions. This analysis used MOMs, which show maximum storm surge heights for each hurricane category.[3]

6.12 SEVERE WEATHER

Vulnerability

Severe weather, including hail, lightning, and thunderstorms, is a recurring concern in Volusia County. Each hazard poses unique threats to populations, property, and infrastructure, but come with little to no warning. It encompasses a range of phenomena that are more extreme than typical weather conditions. Severe weather events can impact all areas of Volusia County, depending on the location of the storm, its direction, and its lateral speed across the Earth's lower atmosphere. These events can cause damage to structures, disruption of utilities and surface/air transportation.

Vulnerability to severe weather is medium due to its frequency in nature combined with our ability to monitor and predict when severe weather will impact Volusia County and its jurisdictions. While severe weather can have damaging effects on people and property, widespread awareness and lead time before storms reduces our overall vulnerability to its effects. Vulnerability to severe weather is consistent throughout all jurisdictions.

Hailstorms can occur unpredictably across Volusia County, impacting all buildings, facilities, and populations equally. Hailstones in Florida are typically penny to quarter-sized but can occasionally grow as large as golf balls or baseballs, causing significant damage to property and infrastructure. Vulnerable areas of structures include roofs, windows, and pool screens, as well as exposed personal property like vehicles and outdoor decor. Communication facilities may be at a higher risk of a lightning strike, while school assets such as football stadiums with lighting could also be at an increased level of vulnerability. Structures that are isolated in areas of low tree coverage are at a higher risk for lightning strikes. Jurisdictions within the county where this could be more common include DeLand, Lake Helen, Orange City, and Pierson. These areas are generally more rural in nature and have a higher rate of isolated critical facilities and structures.

In situations where tornadoes are present, hail may have a higher likelihood of being present. Moreover, structures that have partial or full tree coverage could have lessened property damage due to hail as a result of the slowing speed of the hail before impact with property. Severe hail can also damage emergency vehicles and communication systems, disrupting response efforts.

Beachside structures located near or along the Atlantic Ocean are also at a higher vulnerability to lightning damage due to historical occurrences. There are not many critical facilities located along the Atlantic Ocean in Volusia County, as the majority of those facilities are located inland along the barrier islands or are located west of the Intracoastal Waterway. Vulnerable areas for lightning include recreational spaces, golf courses, and the county's 47 miles of Atlantic Ocean beaches, where tourists and residents engaging in outdoor activities face heightened risks. Lightning is a dangerous threat to people in the United States, particularly those who are outside during the summer. The number one area for fatalities due to lightning strikes is open fields, making Volusia County's 47 miles of Atlantic Ocean beach among the most dangerous in the County. This heightens the risk for the tourist population who may be unaware of the imminent danger of quickly approaching tropical systems that emit lightning.

Communication systems and power sources are among the most vulnerable land uses to this hazard due to their electrical nature. Volusia County has approximately 30 golf courses, along with private and public recreational facilities, the Daytona Beach International Speedway and 2 additional smaller outdoor

racetracks, 2 intracoastal waterways traversing the county, school facilities, and parks located throughout the County. Individuals participating in the following recreational activities could be vulnerable to lightning including: golf, football, baseball, soccer, surfing, horseback riding, walking, jogging, tennis, boating, fishing, kite flying, kayaking, paddle boarding, beach activities, picnicking, camping, hiking, gardening, hunting, swimming, basketball, softball, cycling, wind surfing, lacrosse, archery, track and field events, stock car races, outdoor festivals and numerous other outdoor activities. It is estimated that at least 75% of the population participates in at least one of these recreational activities and is thus vulnerable to lightning.

Thunderstorms are frequent throughout the year in Volusia County, often bringing high winds, hail, and lightning. From 2019 to 2024, the county experienced 14 severe thunderstorm events, causing $23,000 in property damage. Downed trees, power outages, and damage to homes and infrastructure are common consequences. Unhoused populations, outdoor event spectators, and those engaging in recreational activities are particularly vulnerable.

Impacts

Lightning can spark structure fires, damage electrical systems, and contribute to wildfire during dry seasons. Critical facilities with tall antennas, isolated structures, or those in rural areas like DeLand, Lake Helen, Orange City, and Pierson are at increased risk of lightning strikes. Beachside properties, including hotels and utilities, are also vulnerable. As it cannot be predicted where lightning may strike, all existing and future buildings, facilities and populations in Volusia County are exposed to this hazard and could potentially be impacted. As the lightning capital of the U.S., Florida experiences a high frequency of lightning strikes, with Volusia County recording approximately 4,000 lightning strikes weekly during summer.

Beachside structures located near or along the Atlantic Ocean are also at a higher vulnerability to lightning damage. Many utilities are in these locations. Most of the buildings located along the beach are hotels, businesses and high-rise condos. There are not many critical facilities located along the Atlantic Ocean in Volusia County, as the majority of those facilities are located inland along the barrier islands or are located west of the Intracoastal Waterway.

Thunderstorms frequently occur in Volusia County. Since it cannot be predicted where thunderstorms may occur, all existing and future buildings, facilities and populations are exposed to this hazard and could potentially be impacted. Thunderstorm winds can disrupt transportation and utilities, while heavy rain may lead to localized flooding. Critical roadways may be blocked by downed trees or power lines, complicating emergency response. Thunderstorms can also exacerbate other hazards, such as hail and lightning, increasing their overall impact on the county.

While severe weather generally has minimal long-term environmental impacts, it can cause immediate issues such as downed vegetation, localized flooding, and occasional wildfires. Economically, damages are often covered by insurance, limiting their broader impact on the local economy.

Volusia County Emergency Management has systems in place to maintain operations during severe weather events. Redundant communication systems, backup power, and a Continuity of Operations Plan (COOP) ensure the county can respond effectively, even in catastrophic scenarios. However, responders

may face challenges such as blocked roads, downed power lines, and unsafe conditions caused by lightning or hail.

Public confidence in government is unlikely to be significantly affected by severe weather events, as Volusia County provides timely information through NOAA weather radios, social media, and the county's website. Recovery efforts for most severe weather events are typically completed within days.

6.13 TORNADO

Vulnerability

Historical evidence confirms that Volusia County is vulnerable to tornadoes, which can result from severe thunderstorms, tropical storms, or hurricanes. These hazards are unpredictable, with no specific area immune from their potential impacts. All buildings, facilities, and populations in Volusia County are considered exposed to tornadoes, regardless of location. Vulnerable populations, such as the unhoused, elderly, and lower-income residents, are particularly at risk, as are those living in mobile home parks and manufactured housing communities. Volusia County has mobile home/manufactured home parks throughout the county, both east and west sides which are equally vulnerable to impacts of tornadoes. Many of the parks are 55 and older only while others have very old mobile homes that are not built to today's standards, leaving the elderly and low-income populations more at risk. Many of these structures, particularly older ones, are not built to current building standards, making them highly susceptible to damage from high winds and flying debris. **Section 6 Table 9** displayed each jurisdiction's number of homes and when the homes were built. Daytona Beach and Unincorporated Volusia have the highest number of homes built pre-1969, making residents of those jurisdictions more vulnerable.

Impacts

While tornadoes are relatively rare in Volusia County compared to other hazards, they can have devastating effects when they occur. The strongest tornado to impact Volusia County was an EF3, capable of leveling well-constructed buildings, uprooting trees, and creating automobile-sized projectiles that can travel for miles. Although large tornadoes are uncommon, their potential for destruction makes them a significant threat to both life and property.

Two primary types of tornadoes typically impact Volusia County. Larger tornadoes, in the EF2 to EF4 range, often form in central Florida near the Orlando metropolitan area and tend to move from the west-southwest to the east-northeast. These tornadoes cover large areas and are more likely to affect the western portions of Volusia County, particularly near its borders with Seminole and Lake Counties. Historical patterns suggest that tornado activity often reaches the eastern coastline after being detected in Central Florida, offering some warning for communities in the storm's path.

Smaller tornadoes, typically in the EF0 to EF1 range, occur more frequently in Volusia County and are less predictable. These tornadoes do not follow consistent geographic patterns, and their touchdowns can appear randomly. Despite this, a disproportionate number of these smaller tornadoes have been observed near the Intracoastal Waterway. Rarely have tornadoes been recorded crossing Interstate 95 in Volusia County, further illustrating the widespread vulnerability of the area to these storms.

The consequences of tornadoes on property, infrastructure, and the environment can be severe. Tornadoes can demolish homes, businesses, and critical facilities, while also disrupting utilities such as power and communication systems. Roads may become impassable due to debris, downed trees or power lines, and complicated emergency response efforts. Older structures are particularly vulnerable, as building codes have become more stringent over time to better withstand high winds. Infrastructure in the western portions of the county faces higher risks from larger tornadoes, which develop over longer periods and allow less time for mitigation or protective measures. Thus, critical facilities at the highest risk for strong tornado damage (and loss of human life) would generally be those located in the western portion of the

county due to the shorter duration of time allowed for mitigation of these properties in the event of an incoming storm.

The environmental impacts of tornadoes vary depending on their intensity. Even weaker EF0 tornadoes can uproot trees and vegetation, while stronger tornadoes can scatter debris over great distances, sometimes miles from the point of origin. This debris can contaminate waterways or cause secondary hazards if it includes hazardous materials from damaged vehicles or storage facilities. Agencies such as Volusia County Environmental Management and the County Health Department would monitor these environmental impacts to mitigate risks.

Emergency response efforts in the aftermath of a tornado are critical but can be challenging. Search and rescue operations may be required in heavily impacted areas, and responders may encounter destroyed communication systems, missing landmarks, and blocked roadways. Power lines and debris present additional hazards, necessitating extreme caution for first responders. Despite these challenges, the Volusia County Emergency Operations Center is fortified to withstand an EF4 tornado, ensuring its continued operation even during severe events. In the unlikely event of direct damage to the VCEOC, alternative plans outlined in the COOP would allow emergency services to continue without significant interruption.

Tornadoes also pose economic risks to the county. While smaller tornado events may only have a localized impact, larger tornado outbreaks can devastate entire communities, crippling local economies and requiring substantial recovery resources. Assistance from the Volusia County Community Organizations Active in Disaster (COAD), including the American Red Cross, would be mobilized to support affected residents and businesses.

Public awareness and preparedness play crucial roles in mitigating the impacts of tornadoes. The county utilizes NOAA weather radios, social media platforms, and premade media materials to disseminate information during and after tornado events. Some communities in Volusia County are equipped with tornado sirens and safe rooms, further enhancing public safety during these hazardous events.

In conclusion, while tornadoes are not as frequent as other hazards in Volusia County, their potential for catastrophic damage makes them a significant concern. All areas and populations within the county are at risk, and continued efforts in preparedness, infrastructure hardening, and public education remain essential to minimizing their impact and ensuring the safety and resilience of the community.

Section 6: Table 9: Year Range of Built Homes for each Municipality

6.14 TROPICAL CYCLONE

Vulnerability

Tropical cyclones, encompassing hurricanes and tropical storms, pose significant risks to Volusia County. The overall vulnerability of tropical cyclones is high within all jurisdictions of Volusia County. The possibility of harm to humans, high property damage, and potential infrastructure losses all combine to make tropical cyclones one of the highest threat hazards. Volusia County is vulnerable to tropical cyclones to a similar level in all jurisdictions because of the spatial extent of a hurricane or tropical storm. The LMS works to protect critical infrastructure and residents in order to reduce the vulnerability of the community.

These events often affect large areas and cross jurisdictional boundaries, exposing all existing and future buildings, facilities, and populations to potential impacts. Volusia County has a lower risk compared to other areas of the state such as the western panhandle and southeastern Florida.

The county's coastal region, home to over 45% of the population, is particularly vulnerable. Vulnerable populations, including the unhoused, disabled, elderly, and lower-income residents, face heightened risks during these events. Additionally, residents living on the barrier islands or adjacent to the Intracoastal Waterway system are particularly susceptible due to their proximity to storm surge zones and areas prone to flooding.

Impacts

Critical infrastructure, including communication systems and power sources, is vulnerable to tropical cyclones. These storms bring a combination of high winds, flooding, coastal erosion, and heavy precipitation, making it challenging to estimate total potential losses. Historical data suggest that Volusia County is at a relatively lower risk for direct impacts compared to areas like the western Florida Panhandle or southeastern Florida. However, regions closer to the Atlantic Ocean or in the southeastern part of the county face the highest risk of wind damage.

This area also drives much of the county's tourism, which faces significant disruption during tropical cyclone events. One of Volusia County's most significant hurricane seasons on record occurred in 2004, with Hurricanes Charley, Frances, and Jeanne causing back-to-back impacts. While Charley was the only storm to bring hurricane-force winds to the county, the cumulative effects of these storms caused extensive damage to homes, infrastructure, and the environment. Over 40% of homes sustained damage, and the total economic losses exceeded $560 million. Annualized losses to residential buildings in the county are estimated at over $280 million, with an additional $70 million in annualized losses for non-residential structures.

Beyond high winds, tropical cyclones bring cascading hazards, including inland flooding, tornadoes, storm surge, and severe beach erosion. These hazards significantly impact on the environment, causing downed trees, eroded coastal dunes, and loss of animal habitat, like sea turtle nesting areas. Additionally, debris and hazardous materials may wash into waterways, further harming sensitive ecosystems. The monetary cost of erosion alone is challenging to calculate as it often occurs alongside other impacts. Agencies such as Volusia County Environmental Management and the County Health Department play vital roles in monitoring and mitigating environmental consequences.

Program operations and emergency response efforts can be strained during a major tropical cyclone, particularly a Category 3 or higher hurricane. While routine operations generally continue during tropical depressions or weaker storms, a direct hit from a significant hurricane could severely disrupt county functions. In such cases, Volusia County may require assistance from neighboring counties, the state, or FEMA through mutual aid agreements like the Emergency Management Assistance Compact (EMAC). Recovery may take months or even years to return operations to pre-storm levels, depending on the storm's severity.

The public faces numerous challenges during and after tropical cyclones, including injuries, fatalities, destruction of homes and businesses, and prolonged disruptions to essential services like water, power, and sewage. Recovery is often costly, time-consuming, and emotionally taxing for affected residents, even with insurance or disaster assistance. These events can have lasting psychological impacts, especially on those who experience repeated storm impacts. All residents are vulnerable.

Responders face extreme challenges in tropical cyclone events. Downed trees, power lines, damaged infrastructure, and impassable roads complicate rescue and recovery efforts. Critical facilities such as the EOC, fire stations, hospitals, and government buildings may also sustain damage, limiting their functionality. Responders must operate with heightened awareness of their risks, especially in hazardous conditions caused by the storm.

The economic consequences of tropical cyclones are substantial. The 2004 hurricane season remains the costliest disaster in Volusia County's history, with damages to tourism alone amounting to millions of dollars per day. Recovery from a single major hurricane can take years, with long-term financial impacts on the county and affected communities.

To mitigate these risks and maintain public confidence, the Volusia County Emergency Management has implemented various preparedness and public awareness initiatives. These include a video disaster preparedness guide, behavioral surveys following hurricane evacuations, public presentations, and an annual media campaign in collaboration with local outlets like the Daytona Beach News Journal. During hurricane events, the Public Information Office (PIO) uses pre-prepared materials and social media campaigns to provide timely updates. Year-round preparedness information is also disseminated through the county's weekly video magazine broadcast on WDSC.

Through these efforts, Volusia County Emergency Management aims to ensure residents are informed and confident in the county's ability to respond to and recover from tropical cyclones. These storms remain a significant threat to Volusia County, necessitating ongoing vigilance and community resilience to minimize the impacts.

Section 6: Tables 10-14 display individual municipalities vulnerability and potential financial impacts. **Section 6: Figures 7-11** display the jurisdictions most vulnerable to tropical cyclone wind.

Section 6: Table 10:Total Exposure and Potential Losses from Tropical Storm 10 Year Wind Event

JURISDICTION	Category Storm	Total Properties Impacted	Total Improved Value	Total County Taxable Value

6.15 WILDLAND FIRE

Vulnerability

Overall vulnerability to wildland fires is medium. Wildland fires can happen quickly and cause widespread damage. Volusia County faces a uniform risk of wildland fires, particularly during hot, dry summer months and periods of drought. Wildland fires most frequently affect wooded areas with low population densities, posing a heightened threat to rural areas. Although large population centers generally have lower risk, wildland fires can still cause significant damage to structures and critical infrastructure and pose serious health hazards, including injuries and fatalities from smoke inhalation.

The build year of a property is a critical metric in assessing wildland fire vulnerability due to the evolution of building codes over time. Modern codes restrict the use of flammable materials and promote mitigation strategies, reducing the risk for newer structures. While Volusia County has an older building stock overall, properties within fire hazard zones tend to be newer compared to those vulnerable to other hazards. Areas such as Ormond Beach's rural regions along SR 40 west of I-95 are particularly susceptible, with heavily wooded single-family subdivisions like Timber Creek, Hunters Ridge, Breakaway Trails, and Plantation Pines being at heightened risk.

In terms of land use, low-density residential properties dominate the fire hazard zones. Agricultural areas and extensive woodlands throughout the county also contribute significantly to the overall vulnerability. Wildland fires can spread through two primary mechanisms: burning ashes from tree lines that can “jump” across roadways or other barriers, and the less visible but equally dangerous underground energy transfer, where fires spread beneath the surface. This heightens the danger for residents in isolated rural areas surrounded by dense vegetation.

Impacts

The public faces direct consequences when wildland fires impact homes or businesses. Fires can destroy property, disrupt utility services, and limit access to roadways. Smoke and ash also contribute to air pollution, exacerbating health risks, particularly for vulnerable populations.

Responders face significant challenges during wildland fire events. The unpredictable and dynamic nature of fires, driven by changing wind and environmental conditions, requires substantial resources and strategic planning. Smoke inhalation poses health risks to emergency personnel, emphasizing the importance of protective measures during response efforts.

While wildland fires are a natural part of the ecosystem, they can severely impact the environment. Beyond damaging native vegetation and wildlife habitats, wildfires contribute to air and water pollution. Smoke and ash can contaminate waterways, while the loss of tree cover can exacerbate soil erosion. Volusia County Fire Services and the Health Department actively monitor and address air and water quality concerns during wildfire events.

Despite these challenges, Volusia County Emergency Management anticipates no significant disruptions to operations or service delivery during a wildland fire. The county's COOP ensures uninterrupted emergency management functions even in the event of a direct impact on the Emergency Operations Center.

Economically, wildland fires in Volusia County tend to have localized impacts. However, larger fires that are difficult to control may disrupt events or industries critical to the county's economy. For example, smoke from past wildland fires led to the postponement of the Coke Zero race. Small, rural communities are particularly vulnerable, as fire could devastate local economies. Recovery efforts would rely on organizations such as the County Community Organizations Active in Disaster and the American Red Cross.

Public confidence in government typically remains stable during wildfire events, supported by Volusia County's preparedness and outreach efforts. The county maintains premade media materials and actively uses social media and NOAA weather radios to provide timely updates. The success of past wildfire responses, such as the 1998 fires where 29,000 homes were at risk but only six homes, one mobile home, and two businesses were lost, continues to bolster public confidence.

While wildland fires pose a persistent hazard in Volusia County, ongoing mitigation efforts, strategic response plans, and public outreach programs aim to reduce risks and strengthen resilience for residents and communities.

Section 6 Table 15 lists the number of properties and the property values that are in the high, moderate, and low-risk wildfire zones for each jurisdiction. The table depicts exposure to different fire hazard zones utilizing 2024 property data.

Section 6: Table 15: Financial Exposure to Hazard Zones – Cumulative Financial Values within Zones

Fire Class	Jurisdiction	Properties in Zone	Improved Value	County Taxable Value
High	Daytona Beach	3,960	$1,621,910,972	$1,100,871,625
High	DeBary	595	$123,696,392	$71,260,689
High	DeLand	1,996	$557,354,485	$315,406,868
High	Deltona	4,860	$1,360,101,355	$614,732,256
High	Edgewater	218	$78,888,888	$63,852,351
High	Flagler Beach	87	$18,630,680	$14,443,385
High	Lake Helen	41	$5,131,605	$3,953,680
High	New Smyrna Beach	3,791	$2,390,211,297	$1,658,049,388
High	Oak Hill	81	$25,793,217	$17,252,942
High	Orange City	453	$176,845,248	$88,972,631
High	Ormond Beach	731	$312,658,433	$189,904,269
High	Pierson	449	$64,216,525	$26,878,577
High	Ponce Inlet	231	$155,549,724	$96,787,982
High	Port Orange	799	$230,558,080	$144,915,655
High	Unincorporated - Northeast	1,335	$540,111,625	$278,077,559
High	Unincorporated - Silver Sands	706	$417,407,739	$296,803,246
High	Unincorporated - Southeast	5,963	$521,456,019	$188,861,028
High	Unincorporated - Westside	11,761	$2,225,133,609	$969,991,162
Moderate	Daytona Beach	31,147	$12,533,260,053	$7,919,658,941
Moderate	Daytona Beach Shores	2,893	$1,350,116,182	$1,103,966,152
Moderate	DeBary	9,920	$3,241,368,607	$1,798,776,829
Moderate	DeLand	14,393	$4,828,128,637	$2,923,508,334
Moderate	Deltona	30,375	$8,169,433,604	$4,035,835,045
Moderate	Edgewater	8,964	$2,519,384,642	$1,420,329,636
Moderate	Holly Hill	5,800	$1,361,329,064	$918,257,259
Moderate	Lake Helen	1,689	$393,647,375	$194,327,113
Moderate	New Smyrna Beach	15,921	$7,558,573,110	$4,981,167,216
Moderate	Oak Hill	1,263	$297,652,301	$162,899,267
Moderate	Orange City	3,354	$1,236,228,469	$839,929,754
Moderate	Ormond Beach	14,772	$5,778,695,551	$3,582,902,957
Moderate	Pierson	810	$154,118,140	$56,040,892
Moderate	Ponce Inlet	2,989	$1,655,563,637	$1,191,977,161
Moderate	Port Orange	22,399	$7,791,882,881	$4,649,882,613

6.16 CIVIL DISTURBANCE

Vulnerability

The overall vulnerability of civil disturbances in Volusia County is low as there is no major political critical infrastructure like those of Tallahassee. While moderate human impact is possible, civil disorder can spread quickly and disrupt the public's confidence in the jurisdictions' governance. There are no major civil disturbances recorded, but all jurisdictions of Volusia County are vulnerable to civil disorder. The infrastructure most vulnerable is those around municipal buildings. The City of DeLand is most vulnerable due to the municipal complex hosting many of the county-wide departments.

Impacts

Civil disturbances, while relatively rare, pose a potential risk to public safety, property, and the overall perception of stability in Volusia County. These events typically arise from social, political, or economic grievances and can escalate quickly, resulting in harm to individuals, damage to property, and disruptions to community operations.

The public is the most directly affected by civil disturbances, particularly individuals in the immediate vicinity of the event. Bystanders may be injured or, in severe cases, killed during such incidents. The risk is heightened during large gatherings, such as major NASCAR events, Biketoberfest, or Bike Week, when Volusia County hosts hundreds of thousands of visitors. These annual events spread throughout the county, but are concentrated in cities such as Daytona Beach, Daytona Beach Shores, and Ormond Beach. Civil disturbances during these events could lead to mass casualties, panic, and chaos, straining local emergency response systems.

Private and public properties are at significant risk during civil disturbances. Rioters may engage in vandalism, looting, or arson, causing extensive damage. The financial toll of such actions can reach hundreds of thousands of dollars, disrupting businesses, displacing residents, and burdening local governments with costly repairs. Florida's history includes seven major riots, such as the 1980 and 1982 Miami riots and the 1996 St. Petersburg riots, which highlight the potential for widespread property destruction.

The environment may experience moderate consequences from civil disturbances. Fires resulting from arson can release toxic gases, fumes, and fluids into the air, soil, and water, posing risks to human health and local ecosystems. Additionally, burned vehicles and structures can leave behind hazardous debris that require specialized cleanup and disposal efforts.

Volusia County's program operations are not expected to be significantly disrupted by a civil disturbance. The Volusia County Emergency Operations Center (VCEOC) is a secure facility, designed to maintain continuity of operations even during extreme events. In the event of a large-scale disturbance, mutual aid agreements with neighboring counties can provide additional resources to manage the situation.

Responders face unique challenges during civil disturbances. They must navigate highly volatile situations where they may be targeted by individuals instigating violence. The risk of injury or death is real, requiring responders to exercise extreme caution and rely on specialized training to de-escalate tensions while ensuring public safety.

The impact of civil disturbances on property and infrastructure can be substantial. Homes, businesses, and critical facilities, such as government buildings and transportation hubs, may be damaged or destroyed. Streets may become blocked or impassable, complicating response efforts and further exacerbating the situation.

The economic fallout from a civil disturbance can be severe. Damaged homes and businesses require costly repairs, and disruptions to local commerce may reduce tax revenue. If civil disturbances occur during major tourist events, the county's reputation as a safe destination may suffer, deterring future visitors and negatively impacting the local economy. Businesses reliant on tourism could face prolonged downturns, compounding financial losses.

Public confidence in government can be adversely affected by civil disturbance, particularly if the response is perceived as slow or inadequate. Effective and timely action by law enforcement and emergency management is critical to maintaining trust. Volusia County must demonstrate its capacity to manage such events to reassure residents and visitors that their safety is a priority.

Civil disturbances pose a range of risks, from direct harm to individuals and property to broader economic and social consequences. By leveraging secure facilities like the Volusia County Emergency Operations Center, mutual aid agreements, and specialized training for responders, Volusia County is prepared to address these challenges. Proactive communication and decisive action during a disturbance are essential to mitigating impacts and maintaining public trust.

6.17 MASS MIGRATION

Vulnerability

The overall vulnerability of mass migration in Volusia County and its jurisdictions is low. While lack of affordable housing and community resources could be a concern with mass migration, due to the low probability and lack of physical impacts, Volusia County is not very vulnerable to this hazard. While it is possible people migrating to the county may choose a more urban area to move to such as Daytona Beach, each jurisdiction is equally vulnerable to this possibility.

Impacts

The citizens of Volusia County face minimal direct risk from a mass migration event. However, an influx of migrants, whether due to political upheaval, natural disasters, or humanitarian crises in neighboring regions or countries, could present logistical and social challenges. The likelihood of such an event remains low, but the county must remain prepared to manage a sudden increase in population to ensure the safety and well-being of all residents, including the migrants themselves.

Property within Volusia County would not be directly at risk from a mass migration event. Migrants arriving in the county are unlikely to cause physical damage to homes, businesses, or infrastructure. However, depending on the scale of the event, temporary facilities such as shelters, processing centers, or housing accommodations may need to be established, potentially requiring the repurposing of public spaces or other properties. Additionally, there may be a strain on available affordable housing, spiking up rent prices for existing residents.

The environment would experience minimal impact from a mass migration event. Temporary facilities and increased resource use may place localized stress on certain systems, such as water and waste management, but these effects would likely be short-term and manageable with proper planning and resources. Environmental risks could be mitigated through coordinated efforts to ensure that shelter locations and services are established in environmentally sustainable ways.

Programming operations within the county would also experience minimal disruption. Volusia County Emergency Management Department and other relevant agencies have contingency plans in place to address scenarios involving a sudden population influx. Should the situation exceed local resources, mutual aid agreements with adjacent counties and support from state and federal agencies would ensure that operations continue with minimal interruption.

The public is unlikely to experience significant, direct consequences from a mass migration event, though there may be concerns or perceptions about how the government is managing the situation. With effective communication and transparent planning, the direct impacts on the daily lives of Volusia County residents would remain minimal.

Responding to the event would play a critical role in managing a mass migration event. Law enforcement, public health, and emergency management personnel would be responsible for organizing, processing, screening, and housing the migrant population. Although the physical and mental demands on responders may increase during such an event, their training and preparedness would help ensure the situation is managed effectively and humanely.

The county's economy is unlikely to be significantly impacted by a mass migration event. Migrants are typically transient and may not remain in the county for an extended period. Temporary costs associated with shelter, food, and medical services would likely be covered by state or federal aid. Long-term economic impacts would depend on whether migrants integrate into the local population and contribute to the economy or if the county becomes a hub for repeated migration events.

Public confidence in government could be affected by a mass migration event, particularly if the public perceives that the government is unprepared or inefficient in managing the situation. Delays in organizing processing, screening, or housing for migrants could lead to frustration among residents. To mitigate these risks, Volusia County would need to maintain open and consistent communication with the public, emphasizing its plans and progress in addressing the situation and ensuring that public safety and order are upheld.

Continuity of operations for the county government would not be significantly impacted by a mass migration event. In a larger-scale scenario, mutual aid from surrounding counties, as well as state and federal resources, would provide additional support. The Volusia County Emergency Operations Center would coordinate these efforts to ensure that essential services continue without interruption.

Overall, the consequences of a mass migration event for property, facilities, and infrastructure in Volusia County would be minimal. Temporary strains on resources and systems may occur, but with proper planning and coordination, these challenges would be manageable. The county's proactive approach to emergency management ensures that any potential impacts from a mass migration event are addressed efficiently and effectively, preserving the safety and well-being of all individuals in the community.

6.18 TERRORISM

Vulnerability

Terrorism remains a persistent and evolving threat, with a wide array of potential impacts ranging from physical destruction and loss of life to disruptions of critical services and public confidence. In Volusia County, these risks are particularly relevant due to its high-profile events, significant agricultural sector, and increasing reliance on digital infrastructure. This assessment examines the vulnerabilities and consequences of various forms of terrorism, including agroterrorism, cyber terrorism, and conventional attacks.

Overall vulnerability to a terrorist attack is moderate within Volusia County and its jurisdictions. Human and property impacts could be severe and widespread depending on the nature of the attack. Because terrorist attacks can take many forms and include many types of weapons, it is difficult to reduce the county's overall vulnerability to these incidents. First response agencies attempt to reduce vulnerability through prevention tactics and intelligence sharing. No jurisdiction in Volusia County is more vulnerable to attack than another.

Impacts

The public faces significant risks in the event of a terrorist attack. Volusia County is home to numerous mass gatherings, such as NASCAR events at Daytona International Speedway, which attract over 100,000 spectators, as well as Bike Week and Biketoberfest, which draw an estimated 500,000 participants annually. These events represent potential targets for terrorism due to their large crowds and national visibility.

The consequences of an attack at such an event could include:

- Serious injuries and fatalities.
- Long-term psychological impacts, including post-traumatic stress disorder (PTSD) and heightened public anxiety about future events.
- Economic impacts due to decreased attendance at events and diminished tourism.

Agroterrorism presents another unique threat to public health. Contamination of agricultural products could introduce pathogens into the food supply, leading to widespread illness and potential fatalities. Such an event would not only harm individuals directly but could also undermine trust in food safety systems.

Property, facilities, and infrastructure are all at risk in a terrorist event. A physical attack involving explosives, arson, or a dirty bomb could result in:

- Extensive damage to buildings and critical infrastructure, including transportation networks, energy facilities, and communication systems.
- Severe financial losses for private businesses and public institutions.
- Long-term closures of impacted facilities, potentially disrupting essential services.

In agroterrorism scenarios, farms and processing facilities could suffer catastrophic losses if disease-causing agents spread among crops or livestock. The costs of containment, eradication, and recovery could be significant, particularly for Volusia County's $781 million agricultural industry.

The environment could suffer both immediate and long-term damage depending on the type of terrorist event:

- **Dirty Bombs and Explosions**: Contamination of air, soil, and water with hazardous materials could render areas uninhabitable for years, requiring costly cleanup efforts.
- **Arson and Large-Scale Fires**: Toxic smoke and fumes could impact air quality, while firefighting runoff could contaminate waterways.
- **Agroterrorism**: Introduction of pathogens or chemicals into agricultural systems could damage ecosystems and potentially spread beyond the initial target area.

Terrorism can severely impact the economy in several ways:

- **Tourism Declines**: Volusia County relies heavily on tourism revenue, particularly from its internationally recognized events. A major attack would likely deter visitors, leading to substantial financial losses for local businesses.
- **Agricultural Losses**: Agroterrorism could devastate the local economy by damaging crops and livestock, disrupting supply chains, and necessitating extensive containment measures.
- **Cyber Terrorism**: If key industries, such as banking, utilities, or retail, were targeted, there could be cascading economic effects due to loss of revenue and reduced consumer confidence.

Cyber terrorism involves the use of digital means to disrupt critical infrastructure, steal sensitive information, or sow chaos. Potential impacts on Volusia County include:

- **Public Impacts**: Extended power outages could lead to food spoilage, loss of refrigeration-dependent medication, and disruptions to life-saving medical devices like oxygen concentrators.
- **Economic Impacts**: Businesses relying on e-commerce or digital payment systems could face significant losses. Additionally, interruptions to public services, such as water or electricity, could result in substantial recovery costs.
- **Public Confidence**: Cyber terrorism targeting essential systems (e.g., water treatment, healthcare, or emergency communication networks) could erode trust in government, particularly if recovery efforts are perceived as slow or ineffective.

While cyber terrorism typically does not cause direct harm to the environment, indirect consequences—such as industrial accidents triggered by compromised control systems—remain a concern.

Public confidence in government could be significantly impacted by any form of terrorism. Perceptions of inadequate preparation, delayed response, or insufficient recovery efforts can erode trust in public institutions. This risk is particularly pronounced in:

- Large-scale attacks, such as those involving mass casualties or significant property damage.
- Agroterrorism incidents that highlight vulnerabilities in the food supply chain.
- Cyber terrorism events that disrupt daily life and expose weaknesses in critical infrastructure.

A proactive and transparent public affairs strategy is essential to maintaining confidence during and after a terrorist event. Efforts should focus on clear communication, visible leadership, and timely updates on response and recovery efforts.

Responders face heightened risks in terrorist events. Physical attacks may involve secondary explosive devices or hazardous conditions, while agroterrorism and cyber terrorism may expose responders to novel threats, such as contaminated materials or compromised communication systems. Ensuring responder safety requires:

- Access to specialized training and equipment.
- Clear protocols for identifying and mitigating risks in dynamic and dangerous environments.
- Coordination with mutual aid partners and state-level resources.

Continuity of operations for Volusia County is generally robust due to the secure design of the Volusia County Emergency Operations Center. However, certain scenarios could present challenges:

- **Direct Attack on VCEOC**: Although unlikely, a direct attack could necessitate a temporary relocation to the alternate EOC.
- **Cyber Terrorism**: Disruptions to digital systems could temporarily affect access to information or communication channels. However, redundancies and mutual aid agreements are in place to minimize these effects.

Terrorism represents a complex and multifaceted threat to Volusia County, with the potential to impact public safety, property, the environment, and the economy. While the likelihood of an event is difficult to predict, ongoing investments in preparedness, training, and public awareness are essential for mitigating risks and ensuring resilience. Whether facing agroterrorism, cyber terrorism, or a conventional attack, Volusia County is committed to protecting its residents, preserving its resources, and maintaining public trust.

6.19 COASTAL OIL SPILL

Vulnerability

A coastal oil spill could significantly impact public health, particularly for individuals with pre-existing respiratory conditions. Exposure to fumes and airborne contaminants near the coastline may exacerbate these issues, prompting the Volusia County Health Department and Environmental Management to closely monitor air, water, sediment, and waste generated during cleanup operations. Although these efforts would mitigate health risks to the public, some localized impacts are inevitable for those in proximity to the affected areas. The most vulnerable areas are along major waterways that support transport ships, such as Ormond Beach, Holly Hill, Daytona Beach Shoes, Ponce Inlet, and New Smyrna Beach.

Impacts

While property is not typically at direct risk from an oil spill, contamination of docks, boats, and other coastal facilities is possible if the spill enters waterways such as the Ponce de Leon Inlet. This could require extensive cleaning and decontamination efforts to restore usability and prevent further environmental harm.

The environment, however, faces the greatest risk in the event of a coastal oil spill. Sensitive ecosystems, including turtle nesting sites, estuaries, and nearshore marine habitats, could suffer long-lasting damage. Sand and sediment along the beaches would be heavily contaminated, requiring labor-intensive cleanup and rehabilitation to restore the natural environment. The ecological consequences of an oil spill could linger for years, disrupting the delicate balance of marine and coastal ecosystems.

Although program applications within the county are not likely to be adversely affected by a coastal oil spill, responders tasked with addressing the spill face considerable challenges. The use of personal protective equipment (PPE) is essential to prevent exposure to hazardous materials, and the physically demanding nature of cleanup operations adds an additional layer of complexity. Coordination between local, state, and federal agencies will be critical to ensure the safety and effectiveness of the response effort.

Continuity of operations within Volusia County would remain largely intact, as the spill's direct effects are unlikely to extend beyond the immediate coastal zone. However, economic and social disruptions could strain government resources and necessitate long-term recovery planning. The economic ramifications of a coastal oil spill would be severe. Tourism—a cornerstone of Volusia County's economy—would likely grind to a halt as visitors avoid beaches perceived to be contaminated. The charter fishing industry, another vital economic sector, would be devastated as fish stocks and marine habitats are impacted. Many businesses along the coastline may face permanent closure due to prolonged loss of revenue, and the county's tax base could shrink significantly, compounding the financial strain on recovery efforts.

Public confidence in government would also be tested during a coastal oil spill event. The protracted nature of cleanup and environmental restoration, which could take months or even years, would likely frustrate residents and stakeholders. Effective communication from the Volusia County Public Information Office (PIO) would be essential to maintaining public trust. By providing consistent updates and demonstrating transparent collaboration between government agencies and private industry, officials could reassure the public that every effort is being made to address the spill and restore the county's natural and economic resources.

In conclusion, while a coastal oil spill may have minimal immediate effects on most residents and infrastructure, the long-term environmental, economic, and public confidence impacts could be profound. Preparing for such an event through detailed planning, interagency coordination, and robust public communication strategies will be vital to mitigating its consequences.

6.20 CRITICAL INFRASTRUCTURE FAILURE

Vulnerability

Critical infrastructure failure refers to the disruption of essential services such as drinking water, stormwater and wastewater systems, electric power, transportation, supply chains for food and fuel, and communication networks. These systems are vital to maintaining public health, safety, and economic stability. Failures in these systems are often caused by cascading emergencies like natural disasters, such as hurricanes or floods, or man-made events, including terrorism and cyberattacks. In urbanized areas of Volusia County, where the population is highly dependent on these systems, disruptions have the potential to affect more than half of the population, with the most severe cases resulting in widespread county-wide impacts. Those most vulnerable are Deltona, Port Orange, Daytona Beach, and Ormond Beach. The risks are further exacerbated by climate change, which is increasing the frequency and intensity of extreme weather events.

The overall vulnerability of Volusia County and its jurisdictions to critical infrastructure disruption is medium. Because critical infrastructure failure can be caused by many different forces, it is one of the hazards with the highest vulnerability. Severe weather, tropical cyclones, tornadoes, and geomagnetic storms are just some examples of harmful incidents that may cause a disruption.

The power grid is among the most critical and vulnerable pieces of infrastructure in Volusia County. Utility substations and transmission lines near coastal and urban areas, such as Daytona Beach, Deltona, and Ormond Beach, are particularly at risk. High winds and storm surges associated with hurricanes can lead to widespread power outages, while aging infrastructure is susceptible to overheating during peak demand periods in the hot summer months. Water and wastewater systems are similarly vulnerable, particularly those located in flood-prone areas like the St. Johns River Basin. Flooding from severe storms can disrupt water treatment operations, resulting in water contamination or sewage overflows. Rising sea levels pose a long-term threat to coastal water facilities.

Impacts

Transportation systems in Volusia County are also at significant risk. Major highways like I-95 and I-4, along with bridges, railroads, and the Daytona Beach International Airport, could be disrupted by extreme weather events such as high winds and flooding. Proximity to water systems, including the Halifax River, Indian River Lagoon, Mosquito Lagoon, and the Intracoastal Waterway, increases the vulnerability of transportation infrastructure to storm surges. Similarly, communication networks, including cellular towers, fiber optic lines, and data centers in urban hubs, are susceptible to physical damage from hurricanes and flooding, as well as cyberattacks.

Environmental impacts from critical infrastructure failures can be severe. Disruptions to wastewater facilities may result in untreated sewage spills, contaminating rivers, lakes, and coastal waterways, which can harm aquatic ecosystems and degrade water quality. Stormwater management systems may also fail during prolonged power outages, leading to localized flooding and habitat destruction. Additionally, increased reliance on backup generators during power outages can contribute to air pollution.

The economic consequences of critical infrastructure failures are significant. Prolonged outages can result in the closure of businesses, disrupt tourism, and interrupt supply chains, with Daytona Beach's event-driven economy particularly susceptible. Repairing damaged infrastructure can cost millions, placing a

strain on local budgets. Furthermore, frequent failures may lead to increased insurance premiums for businesses and residents alike.

Social impacts are equally concerning. Interruptions in water treatment can lead to the spread of waterborne diseases, while power outages during extreme heat can exacerbate heat-related illnesses. Transportation failures may isolate communities, preventing access to essential services such as medical care. Vulnerable populations, including the elderly, disabled, and low-income residents, are disproportionately affected by such disruptions, further exacerbating existing social inequities.
Emergency managers and first responders face significant challenges during critical infrastructure failures. Damage to roadways and communication systems can delay response times and hinder coordination efforts. Prolonged failures often require an extended deployment of resources, potentially overloading emergency services. Responders are also at risk of exposure to hazardous environments, such as contaminated water and extreme heat, while working to restore infrastructure and assist affected residents. Community outreach efforts are essential to educate residents about emergency preparedness and available resources, thereby enhancing overall resilience to infrastructure failures.

6.21 HAZMAT / INDUSTRIAL INCIDENT

Vulnerability

The citizens of Volusia County face daily risks from hazardous materials (HAZMAT) due to the presence of both fixed and mobile sources. These include industrial facilities, railroads, highways, and even potential intentional uses such as terrorism. With two major interstate highways, two significant rivers, and two railroads running through the county, HAZMAT incidents are a constant possibility. While most of these involve minor petroleum spills or sewage discharges, the potential exists for far more severe events. Overall vulnerability of hazardous materials incidents is low in Volusia County and its jurisdictions. Citizens may encounter risks from hazardous materials at schools, in their homes, on roadways, through their food supply, or at public venues such as stadiums and other large gathering spaces. While the spatial extent of these incidents would likely be low, the impact on humans could be substantial. The consequences of a hazardous material incident could range from illness and injury to death, with the most severe incidents—such as radiological releases or large-scale explosions—possibly leading to the displacement of residents for extended periods until cleanup is complete. Having major bodies of water such as Tomoka River, Halifax River, Indian River Lagoon, Mosquito Lagoon, and the St. Johns River also leaves room for vulnerability because some hazardous materials may be spread through the waterways.

Property in Volusia County is highly vulnerable to hazardous materials incidents. Chemical spills, explosions, or acts of bioterrorism could devastate individual homes, businesses, and critical infrastructure. Structural damage from explosions or corrosive chemical exposure can leave properties uninhabitable or in need of significant repair. Hazardous materials may also erode or corrode infrastructure such as roads, bridges, and pipelines, further compounding recovery challenges. Even in less catastrophic cases, incidents such as traffic accidents involving hazardous materials can result in destruction of vehicles, roadways, and signage.

Impacts

The environment is particularly susceptible to the harmful effects of hazardous materials, whether the release is accidental, intentional, or natural. These materials can rapidly spread through air, water, and the food supply, contaminating ecosystems and threatening both human and wildlife populations. Sensitive habitats, such as wetlands and coastal areas, could be irreparably damaged. Cleanup efforts can take days, weeks, months, or even years, and in some cases, environmental recovery may never fully restore the original ecosystem balance.

While the Volusia County Emergency Operations Center itself is not located near major hazardous materials facilities, its operations could be impacted in extreme cases. For instance, in the event of significant structural damage or service disruptions, staff may need to relocate to its alternate site as outlined in the Volusia County Emergency Management Department COOP. Despite these risks, the county's environmental management teams, in coordination with Fire Services HAZMAT units, are prepared to respond to large-scale incidents.

Volusia County has a HazMat team available to respond. Responders are at the forefront of mitigating the impacts of HAZMAT incidents. Specialized teams, including HAZMAT, Radiological Material (RMAT), and Explosive Ordnance Disposal (EOD) units, are trained and equipped to manage these complex situations. Protective gear and specialized equipment are vital to ensure their safety as they identify hazardous materials, mitigate risks, and oversee cleanup efforts. Despite their training, responders remain at risk due

to the unpredictable nature of these incidents and the potential for secondary hazards such as fires or explosions.

The economic consequences of a HAZMAT incident in Volusia County could vary widely depending on the scale of the event. While smaller incidents may disrupt transportation or local industries temporarily, larger events—such as a chemical facility disaster or a radiological release—could result in long-term economic strain. The BP oil spill in 2011, which cost approximately $40 billion to address, serves as an extreme example of the potential financial toll of such events. Even less catastrophic incidents can lead to costly disruptions if key transportation routes or industries are forced to shut down.

Public confidence in the local government may also be tested by a HAZMAT incident. Smaller, localized events are unlikely to affect the public's trust, as these are relatively common and manageable occurrences. However, a large-scale chemical or radiological release, or an incident involving terrorism, could erode public confidence in the government's ability to protect its citizens. In such cases, the Volusia County leadership must prepare to launch a robust public information campaign through its website and social media channels, ensuring transparent communication and providing timely updates on the response and recovery efforts.

In conclusion, while Volusia County is prepared to handle the frequent minor HAZMAT incidents that occur, the potential for a large-scale event remains a significant concern. Proactive planning, coordinated response efforts, and clear communication are essential to mitigating the risks and consequences of hazardous materials incidents on the public, property, environment, and economy.

6.18 CONCLUSIONS ON HAZARD VULNERABILITY

Volusia County is vulnerable to a wide array of hazards spanning natural, manmade, and technological categories, each presenting unique risks and requiring tailored mitigation and preparedness strategies. Assessing vulnerabilities across these diverse hazards is essential to building a safer, more resilient community.

- **Improved Understanding for All Hazards:**
  Analyzing vulnerabilities provides a clearer picture of who and what is at risk for each hazard type. For example:
  - **Natural Hazards:** Understanding flood-prone areas and vulnerable coastal regions allows for targeted mitigation like enhanced stormwater management, improved floodplain regulations, and strengthened coastal infrastructure. Similarly, identifying populations at risk from extreme temperatures or public health emergencies helps tailor outreach and response efforts.
  - **Manmade Hazards:** Civil disturbances, mass migration, and terrorism require assessments of social dynamics, key facilities, and potential response bottlenecks. For example, mapping critical facilities and public spaces allows emergency managers to better plan for security, evacuation, and resource allocation.
  - **Technological Hazards:** Evaluating risks from coastal oil spills, hazardous materials incidents, and industrial accidents ensures that high-risk areas, particularly those near industrial zones or transportation corridors, are prioritized for safety inspections and emergency planning.

By improving understanding across these hazard categories, Volusia County can enhance risk awareness among stakeholders and better align resources to the most pressing needs.

- **Baseline for Policy Development and Strategic Planning:**
  A comprehensive vulnerability assessment serves as the foundation for creating effective policies and mitigation plans. For instance:
  - For **rising coastal waters and coastal erosion**, the assessment may inform zoning policies that restrict development in highly vulnerable areas or incentivize green infrastructure solutions to stabilize shorelines.
  - For **drought and agriculture**, policies that promote sustainable water use and crop diversification can be informed by understanding long-term climate trends and agricultural vulnerabilities.
  - For **technological hazards**, findings can influence regulations to enhance safety standards for industrial facilities or mandate periodic safety drills for oil transport and hazardous materials handling.

These informed policies can reduce risks, improve land-use decisions, and foster greater resilience in the face of evolving threats.

- **Risk Comparison for Balanced Mitigation Efforts:**
  Assessing vulnerabilities across all hazard types enables the county to compare risks and prioritize mitigation measures. For example:

  - Coastal and flood-prone areas might see investments in seawalls or elevating infrastructure, while inland areas might benefit from improved wildfire prevention strategies and drought-resistant infrastructure.
  - **Public health emergencies**, such as pandemics, might require investments in healthcare infrastructure, while terrorism or civil disturbance risks may necessitate enhanced security measures and community engagement initiatives.

This comparative approach ensures that resources are allocated equitably and effectively, allowing the county to address both high-impact, high-frequency hazards like severe weather and tropical cyclones, as well as lower-probability but potentially devastating events like terrorism or industrial incidents.

- **Enhancing Emergency Management Capabilities:**
  Vulnerability assessments also identify gaps in current capabilities, enabling targeted improvements. For example:
  - Understanding response times and challenges in rural areas supports enhancements in wildland fire management and tornado response strategies.
  - Identifying critical infrastructure at risk of failure ensures redundancy and continuity planning for essential services.
  - Highlighting social vulnerabilities, such as lower-income or elderly populations, support targeted outreach, evacuation planning, and sheltering options.

By strengthening emergency management capabilities, Volusia County can reduce disaster impacts, speed recovery, and build public confidence in its resilience strategies.

In summary, assessing vulnerabilities across Volusia County's full hazard profile is a cornerstone of effective disaster mitigation. It provides clarity on risks, informs strategic policy development, and supports equitable resource allocation. These efforts are critical to ensure the county's ability to withstand, adapt to, and recover from a wide range of threats, safeguarding the well-being of its residents and the environment.

SECTION 7 – CAPABILITY ASSESSMENT

This section of the Plan discusses the capability of Volusia County and the participating municipal jurisdictions to implement hazard mitigation activities. It consists of the following four subsections:

- **What is a Capability Assessment?**
- **Conducting the Capability Assessment**
- **Capability Assessment Findings**
- **Public Capability Assessment**
- **Existing County-Wide Efforts**
- **Conclusions of the Capability Assessment**

7.1 WHAT IS A CAPABILITY ASSESSMENT?

The purpose of conducting a capability assessment is to determine the ability of a local jurisdiction to implement a comprehensive mitigation strategy, and to identify potential opportunities for establishing or enhancing specific mitigation policies, programs or projects.[1] As in any planning process, it is important to try to establish which goals, objectives and/or actions are feasible, based on an understanding of the organizational capacity of those agencies or departments tasked with their implementation. A capability assessment helps to determine which mitigation actions are practical and likely to be implemented over time, given the local government's planning and regulatory framework. This capability assessment also highlights the positive mitigation measures already in place, or being implemented at the local government level, which should continue to be supported and enhanced through future mitigation efforts.

The capability assessment completed for Volusia County and its jurisdictions serves as a critical planning step and an integral part of the foundation for designing an effective multi-jurisdictional hazard mitigation strategy. The *Capability Assessment* helps identify and target meaningful mitigation actions for incorporation in the *Mitigation Strategy* portion of the Hazard Mitigation Plan. It helps establish the goals and objectives for the Volusia County Region to pursue under this Plan and ensures that those goals and objectives are realistically achievable under given local conditions.

7.2 CONDUCTING THE CAPABILITY ASSESSMENT

In order to facilitate the inventory and analysis of local government capabilities throughout Volusia County, a detailed *Capability Assessment Survey*[2] was distributed to Volusia County staff and to staff from participating local municipal jurisdictions. The survey questionnaire, which was completed by applicable local government officials, requested information on a variety of "capability indicators" such as existing

[1] While the Interim Final Rule for implementing the Disaster Mitigation Act of 2000 does not require a local capability assessment to be completed for local hazard mitigation plans, it is a critical step to develop a mitigation strategy that meets the needs of each jurisdiction while taking into account their own unique abilities. The Rule does state that a community's mitigation strategy should be "based on existing authorities, policies, programs and resources, and its ability to expand on and improve these existing tools" (44 CFR, Part 201.6(c)(3)).

[2] The *Capability Assessment Survey* instrument used to assess county and municipal capabilities is available through Volusia County upon request.

local plans, policies, programs or ordinances that contribute to and/or hinder the community's ability to implement hazard mitigation actions.

At a minimum these survey results provide an inventory of existing local plans, ordinances, programs and resources in place or under development in addition to their overall effect on hazard loss reduction. The survey instrument thereby not only helps accurately assess each jurisdiction's degree of local capability, but also serves as a good source of introspection for those jurisdictions wishing to improve their capability. The identification of opportunities and specific actions to be proposed as part of the community's mitigation strategy often develops as an outcome of completing a capability assessment.

7.3 CAPABILITY ASSESSMENT FINDINGS

The findings of the capability assessment are summarized in this Plan to provide insight into the capacity of Volusia County and the participating jurisdictions to implement hazard mitigation activities. All information is based upon the responses provided by local government officials to the *Capability Assessment Survey*.

7.3.1 Planning and Regulatory Capability

Planning and regulatory capability is based on the implementation of plans, ordinances and programs that demonstrate a local jurisdiction's commitment to guiding and managing growth, development and redevelopment in a responsible manner while maintaining the general welfare of the community. It includes emergency response and mitigation planning, comprehensive land use planning and transportation planning in addition to the enforcement zoning or subdivision ordinances and building codes that regulate how land is developed, and structures are built, as well as protecting environmental, historic and cultural resources in the community. Although some conflicts can arise, these planning initiatives generally present significant opportunities to integrate hazard mitigation principles and practices into the local decision-making process.

This assessment is designed to provide a general overview of the key planning and regulatory tools or programs in place or under development for Volusia County and the participating jurisdictions, along with their potential effect on loss reduction. This information will help identify opportunities to address existing gaps, weaknesses or conflicts with other initiatives in addition to integrating the implementation of this Plan with existing planning mechanisms, where appropriate.

Section 7: Table 1 provides a summary of the relevant local plans, ordinances and programs already in place or under development for Volusia County and the participating jurisdictions. An (x) mark indicates that the given item is currently in place and being implemented by the local jurisdiction, or that it is currently being developed for future implementation. A more detailed discussion on each jurisdiction's planning and regulatory capability follows, along with the incorporation of additional information based on the narrative comments provided by local officials in response to the survey questionnaire.

Following the inventory of local plans, programs and policies is a description of each element upon which the local jurisdiction's capability score was based.

SECTION 7: CAPABILITY ASSESSMENT

The project team at the East Central Florida Regional Planning Council developed the Local Mitigation Strategy with numerous resources, including existing plans, technical information and mapping software.

ESRI ArcGIS software and HAZUS was used to develop vulnerability profiles for the hazards covered throughout this report. Data collection by the project team included municipal critical facilities, stormwater facilities and lift/pump stations, as well as parcel data collected from the Volusia County Property Appraiser. Numerous GIS files were also downloaded from Volusia County I.T. for consideration, research, and use.

Technical plans were also reviewed for consistency with the Local Mitigation Strategy. This primarily included the county's Integrated Floodplain Management Plan, which was reviewed and updated alongside the 2025 LMS. The data collection, data analysis and risk profile methodologies used for the Local Mitigation Strategy and the Floodplain Management Plan are identical. The additional plans listed on the previous page **Section 7: Table 1: Relevant Plans, Ordinances and Programs**, including the Volusia County Continuation of Operations Plan and others, were also reviewed as made available.

Technical information was collected primarily from the Volusia County Emergency Management Department and the National Climatic Data Center, which compiles countywide reports on past hazard events, estimated losses, and other critical information for tracking the County's vulnerabilities.

7.3.2 Emergency Management

Hazard mitigation is widely recognized as one of the four primary phases of emergency management. Other phases include preparedness, response and recovery. Each phase is interconnected with hazard mitigation as **Section 7: Figure 1** suggests. Planning for each phase is a critical part of a comprehensive emergency management program and a key to the successful implementation of hazard mitigation actions. As a result, the *Capability Assessment Survey* asked several questions regarding emergency management plans in order to assess the jurisdiction's willingness to plan and their level of technical planning proficiency.

Section 7: Figure 1: The Phases of Emergency Management

Local Mitigation Strategy (LMS): Also called a hazard mitigation plan, the local mitigation strategy represents a community's blueprint for how it intends to reduce the impact of natural and human-caused hazards on people and the built environment. The essential elements of a local mitigation strategy include a risk assessment, capability assessment, mitigation strategy and the mitigation projects list.

- Volusia County and its jurisdictions developed the first version of their local mitigation strategy in 1999 (adopted 2000) and updated the plan in 2009,2014, and 2019. The plan is currently undergoing a revision that will be completed in January 2025.

Disaster Recovery Plan: A disaster recovery plan serves to guide the physical, social, environmental and economic recovery and reconstruction process following a disaster. In many instances, hazard mitigation principles and practices are incorporated into local disaster recovery plans with the intent of capitalizing on opportunities to break the cycle of repetitive disaster losses.

- A potential mitigation action that should be considered is for all participating jurisdictions to develop their own disaster recovery plan that would incorporate mitigation opportunities into the disaster recovery process.

Emergency Operations Plan: An emergency operations plan outlines responsibility and the means by which resources are deployed to respond to an emergency or disaster. Many communities choose to update their emergency operations plan before events occur to better prepare for future disasters. This is an example of hazard mitigation.

- Volusia County Emergency Management maintains the emergency operations plan that also covers their respective jurisdictions. In general, emergency operations planning has been determined to have a moderate effect on loss reduction, as its emphasis focuses on preparedness and response operations rather than hazard mitigation activities.

Continuity of Operation Plan: A continuity of operations plan establishes a chain of command line of succession, and plans for backup or alternate emergency response resources in case of an extreme emergency. Developing a continuity of operation plan is an example of hazard mitigation.

- Each of the other jurisdictions is encouraged to consider preparing their own continuity of operations plans as a possible mitigation action for inclusion this Plan.

7.3.3 General Planning

The implementation of hazard mitigation activities should involve agencies and individuals beyond the emergency management profession. Other stakeholders may include local planners, public works officials, economic development specialists and others. Because in many instances, concurrent local planning efforts help achieve or complement hazard mitigation goals, even though they are not specifically designed as such, the *Capability Assessment Survey* asked questions regarding each jurisdiction's general planning capabilities and the degree to which hazard mitigation is integrated into other ongoing planning efforts.

Comprehensive Land Use Plan: A comprehensive land use plan establishes the overall vision for a community and serves as a guide for future governmental decision making. Typically, a comprehensive plan is comprised of a summary of current and expected demographic conditions, land use, transportation elements and community facilities. Given the broad nature of the plan and its regulatory standing in many communities, the integration of hazard mitigation measures into the comprehensive plan can greatly enhance the likelihood of achieving risk reduction goals, objectives and actions.

- All jurisdictions within the region have a comprehensive land use plan as required by state law.

Capital Improvements Plan: A capital improvements plan guides the scheduling of spending for public improvement projects. A capital improvements plan can serve as an important mechanism to guide future development away from identified hazard areas. Limiting public spending in hazardous areas is one of the most effective long-term mitigation actions available to local governments.

- Volusia County has a Capital Improvements Element (CIE) that is part of the Comprehensive Plan. The Capital Improvement Plan should be considered a local funding source for mitigation projects recommended as part of the Local Mitigation Strategy and the implementation of those actions will help to reduce disaster damages.

Historic Preservation Plan: A historic preservation plan is intended to preserve historic structures or districts within a community. An often overlooked aspect of the historic preservation plan is the assessment of buildings and sites located in areas subject to natural hazards to include the identification of the most effective way to reduce future damages.[3] This may involve retrofitting or relocation techniques that account for the need to protect buildings that do not meet current building standards or are within a historic district that cannot easily be relocated out of harms way.

Zoning Ordinances: Zoning dictates the means by which land use is controlled by a local government. As part of a community's police power, zoning is used to protect the public health, safety and welfare of those within a given jurisdiction. A zoning ordinance is the mechanism through which zoning is implemented. Since zoning regulations enable municipal governments to limit the type and density of development, it can serve as a powerful tool, especially when applied in identified hazard areas.

Subdivision Ordinances: A subdivision ordinance is generally intended to regulate the development of housing, commercial and industrial uses, including associated public infrastructure, as land is subdivided into buildable lots for sale or future development. Subdivision design that accounts for natural hazards can dramatically reduce the exposure of future development.[4]

Building Codes, Permitting and Inspections: Building Codes regulate construction standards. In many communities' permits must be issued and inspections of work must take place for new construction. Decisions regarding the adoption of building codes (that account for hazard risk), the type of permitting process required both before and after a disaster, and the enforcement of inspection protocols all affect the level of hazard risk faced by a community. All Volusia County jurisdictions have adopted and enforce the Florida Building Code.

The adoption and enforcement of building codes by local jurisdictions is routinely assessed through the Building Code Effectiveness Grading Schedule (BCEGS) program developed by the Insurance Services Office, Inc. (ISO).[5] Under the BCEGS program, ISO assesses the building codes and enforcement of these codes in a particular community, with special emphasis on mitigation of losses from natural hazards. The results of BCEGS assessments are routinely provided to ISO's member private insurance companies, which in turn may offer ratings credits for new buildings constructed in communities with strong BCEGS classifications. The concept behind this is that communities with well-enforced, up-to-date codes should have fewer losses, and insurance rates can reflect that in these communities.

In conducting the assessment ISO collects information related to personnel qualifications and continuing education, as well as the number of inspections performed per day. This type of information, combined with local building codes, is used to determine a grade for that jurisdiction. The grades range from 1 to 10, with the lower grade being more ideal. A BCEGS grade of 1 represents exemplary commitment to building code enforcement, and a grade of 10 indicates less than minimum recognized protection. **Section**

7.3.4 Floodplain Management and National Flood Insurance Program (NFIP)

Flooding represents the greatest natural hazard facing the nation. At the same time the tools available to reduce the impacts associated with flooding are among the most developed when compared to other hazard-specific mitigation techniques. In addition to approaches that cut across hazards such as education, outreach, and the training of local officials, the *National Flood Insurance Program* (NFIP) contains specific regulatory measures that enable government officials to determine where and how growth occurs relative to flood hazards. Participation in the NFIP is voluntary for local governments; however, program participation is strongly encouraged by FEMA as a first step for implementing and sustaining an effective hazard mitigation program. It is therefore used as part of this assessment as a key indicator for measuring local capability.

In order for a county or municipality to participate in the NFIP they must adopt a local flood damage prevention ordinance which requires jurisdictions to follow established minimum building standards in the floodplain. These standards require that all new buildings and substantial improvements to existing buildings will be protected from damage by a 100-year flood event, and that new development in the floodplain will not exacerbate existing flood problems or increase damage to other properties.

A key service provided by the NFIP is the mapping of identified flood hazard areas. Once completed, the Flood Insurance Rate Maps (FIRMs) are used to assess flood risk, regulate construction practices and set flood insurance rates.[6] FIRMs are an important source of information to educate residents, government officials and the private sector about the likelihood of flooding in their community. The most recent adopted map is shown in **Section 7: Figure 2**.

[6] https://www.volusia.org/services/public-protection/emergency-management/types-of-disasters/floods/flood-maps.stml

The adoption of the NFIP and local flood damage prevention ordinance for each jurisdiction can be found in each land development municipal Code of Ordinances and/or Land Development Code. The following list identifies each participating jurisdiction adoption of NFIP standards:

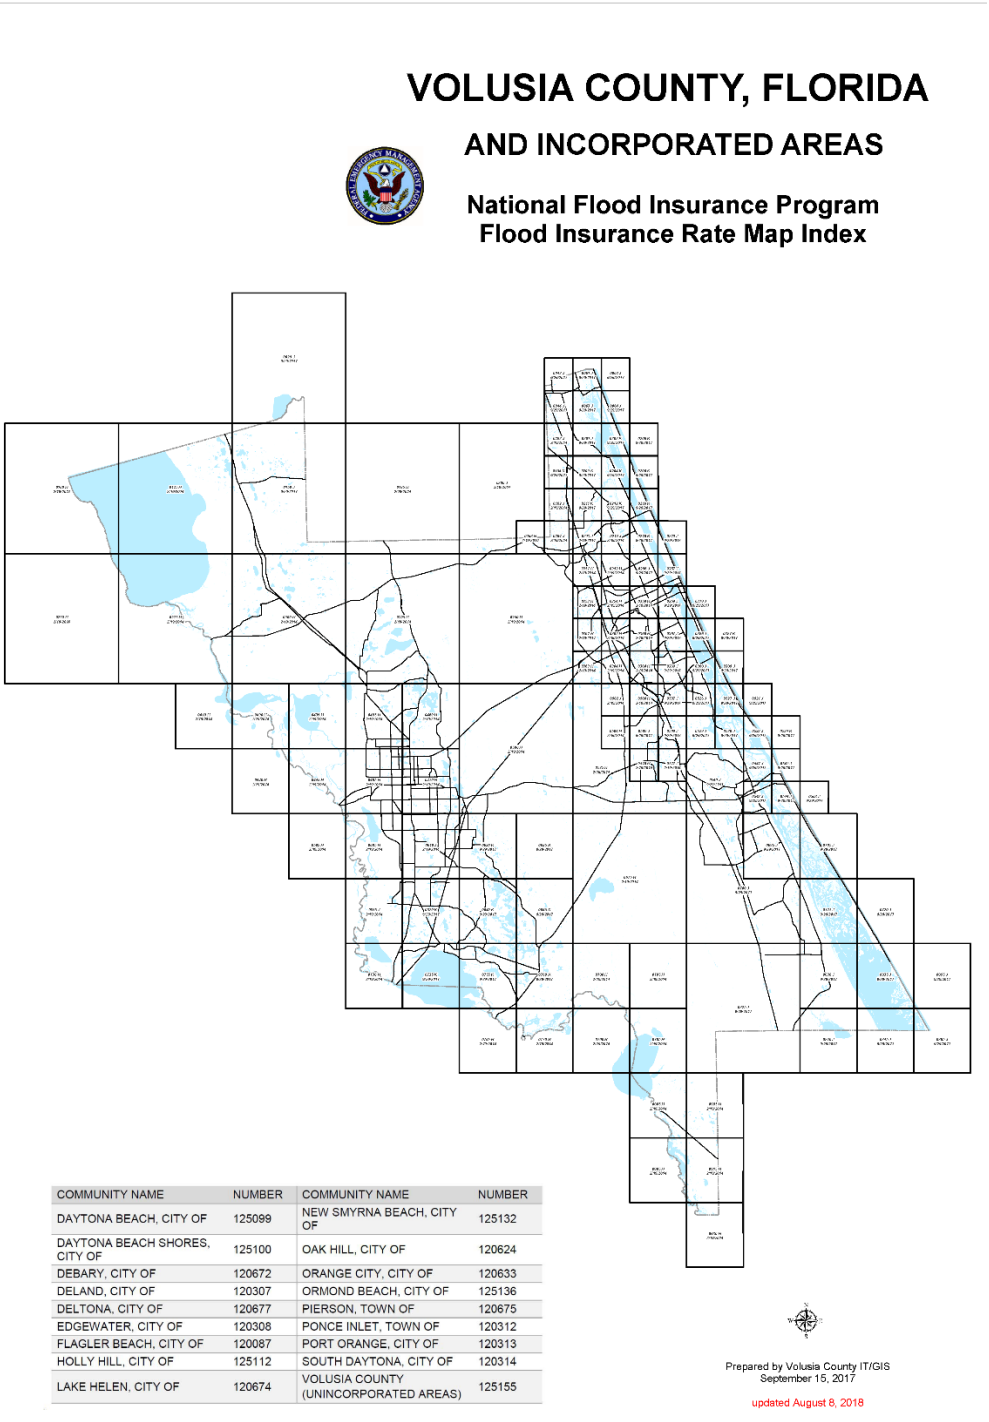
- Daytona Beach
  - Daytona Beach, FL, Code of Ordinances § 7-4 (2014).
- Daytona Beach Shores
  - Daytona Beach Shores, FL, Code of Ordinances Appendix G, Chapter 10, Article I, Section 10-1 (2013).
- DeBary
  - DeBary, FL, Code of Ordinances Chapter 14, Article II, Division 1, Section 14-33 (2014).
- DeLand
  - DeLand, FL, Code of Ordinances Chapter 11, Article VI, Section 33-61 (2013).
- Deltona
  - Deltona, FL, Code of Ordinances Chapter 90, Article I (2014).
- Edgewater
  - Edgewater, FL, Code of Ordinances Chapter 7, Article I, Section 7 (2014).
- Holly Hill
  - Holly Hill, FL, Code of Ordinances Chapter 94, Article II (2013).
- Lake Helen
  - Lake Helen, FL Code of Ordinances Part I, Article 10 (2021).
- New Smyrna Beach
  - New Smyrna Beach, FL, Part II Code of Ordinances Chapter 26, Article VIII (2014).
- Oak Hill
  - Oak Hill, FL, Code of Ordinances Chapter 24, Article VII (2013).
- Orange City
  - Orange City, FL, Code of Ordinances Chapter 5, Article I, Section 5.2 (2009).
- Ormond Beach
  - Ormond Beach, FL, Land Development Code Chapter 3, Article II, Section 3-20 (2013).
- Pierson
  - Pierson, FL, Code of Ordinances Chapter 9, Article IV, Division 2, Section 9-162 (2014).
- Ponce Inlet
  - Ponce Inlet, FL, Code of Ordinances Part IV, Chapter VI (2017).
- Port Orange
  - Port Orange, FL. Land Development Code Chapter 8, Article I, Section 1 (2014).
- South Daytona
  - South Daytona, FL, Land Development Code Section VII, Section 7.2 (2017).
- Volusia County
  - Volusia County, FL Code of Ordinances Chapter 72, Article III, Division 7 (2013).

Volusia County Government has several mutual aid agreements with public works departments throughout the county, as well as a Memorandum of Understanding (MOU) between Volusia County and all jurisdictions within the county (adopted in 2014). Local municipalities and the county can also apply for assistance on the federal level. The county refers to the Emergency

Management Assistance Compact. The county and many municipalities participate in the CRS (Community Rating System) to lower mitigation costs for residents.

Volusia Prepares is a multi-jurisdictional, public-private partnership that maintains a comprehensive, county-wide local mitigation strategy and acts as the Hazard Mitigation Representative. Other county and municipal agencies perform routine mitigation-related functions, including but not limited to the following:

- Considering hazard mitigation issues in the county's comprehensive plan and land development code.
- Enforcement of the county's flood plain ordinance.
- Issuance of building permits and enforcing building codes.
- Conducting fire inspections.
- Conducting public information and education programs related to hazard mitigation.



In the post-disaster time frame, the Planning Committee may be requested by the Chair of the Steering Committee to form one or more teams to identify the mitigation opportunities and needs highlighted by the experience with the event. The Chair will request the assistance of the County Emergency Management Division in identifying such individuals and notifying them of the upcoming assessment process. This post-event assessment process will also be utilized, when applicable, to evaluate the effectiveness in mitigation initiatives in place. At a minimum, representatives from the impacted local jurisdictions will be represented on such teams, as will personnel from the County Emergency Management Division serving as Volusia Prepares support staff.

The Emergency Management Division coordinates with the CRS Coordinator, the Growth and Resource Management Department and the Property Appraisers Office to identify substantially damaged structures in SFHAs throughout the entire county and its jurisdictions. Once an incident occurs the Property Appraisers Office will send out teams to conduct the initial assessment of damaged areas and structures. The Property Appraisers Office will work with the municipalities and generate a list of the damaged structures, destroyed, major, minor, and affected, and provide to the Emergency Management Division to disseminate to the state and Emergency Management Partners. The Growth and Resource Management Department will then send out teams to take pictures, leave door hangers, identify if structures are substantially damaged, and mail out letters to the owners of the substantially damaged structures in the SFHAs, to come in for permits. A database will be created after each incident of the substantially damaged structures. The substantially damaged structures in a SFHA database will be shared with the Emergency Management Division. Within 45 days of the incident, the CRS Coordinator will facilitate a meeting with all participating community CRS coordinators and/or floodplain managers from the municipalities to discuss the substantially damaged structures in SFHAs within their jurisdictions. To maintain awareness for mitigation projects, the Emergency Management Division compares mitigation projects to the substantially damaged in a SFHA database.

Support Agencies responsible for implementation and enforcement of local floodplain management regulations to regulate and permit development in SFHAs:

- Sheriff's Office
- Property Appraiser
- Growth & Resource Management
- Public Works
- Accounting Services
- Budget and Administration Services
- Purchasing Department
- Community Services
- Emergency Services Department
- Municipalities

An additional indicator of floodplain management capability is the active participation of local jurisdictions in the *Community Rating System* (CRS). The CRS is an incentive-based program that encourages counties and municipalities to undertake defined flood mitigation activities that go beyond the minimum requirements of the NFIP, adding extra local measures to provide protection from flooding. All of the 18 creditable CRS mitigation activities are assigned a range of point values. As points are accumulated and reach identified thresholds, communities can apply for an improved CRS class. Class ratings, which run from 10 to 1, are tied to flood insurance premium reductions. As class ratings improve (the lower the number the better), the percent reduction in flood insurance premiums for NFIP policyholders in that community increases.

Community participation in the CRS is voluntary. Any community that is in full compliance with the rules and regulations of the NFIP may apply to FEMA for a CRS classification better than class 10. The CRS application process has been greatly simplified over the past several years, based on community comments intended to make the CRS more user friendly, and extensive technical assistance available for communities who request it.

Volusia County and its 16 jurisdictions are all participants in the National Flood Insurance Program (NFIP) and many jurisdictions participate in the Community Rating System (CRS). Compliance with the NFIP is maintained through:

- Jurisdiction participation in the Volusia Prepares Working Group (quarterly)
- Quarterly submittal of Mitigation Initiatives by jurisdiction
- Complying with NFIP through County/Municipal Floodplain Ordinances (exceed CFR-44)
- Compliance with Florida Building Code

Section 7: Table 3: CRS Premium Discounts, By Class

CRS CLASS	PREMIUM REDUCTION
1	45%
2	40%
3	35%
4	30%
5	25%
6	20%
7	15%
8	10%

Orange City	NA	NA
Ormond Beach	5	25%
Pierson	NA	NA
Ponce Inlet	5	25%
Port Orange	5	25%
South Daytona	7	15%
Volusia County	5	25%

Floodplain Management Plan: A floodplain management plan (or a flood mitigation plan) provides a framework for action regarding the corrective and preventative measures put in place to reduce flood-related impacts. Floodplain management plans are similar to hazard mitigation plans except for the fact that they focus solely on flood hazards and identify specific actions to address flooding problems within a jurisdiction.

- All jurisdictions have a floodplain management plan, located within the County Floodplain Management Plan.

Stormwater Management Plan: A stormwater management plan is designed to address flooding associated with stormwater runoff. The stormwater management plan is typically focused on design and construction measures intended to reduce the impact of minor urban flooding. Stormwater management plans are an excellent way for local governments to regulate stormwater flow within the jurisdiction and to prevent future stormwater problems.

7.3.5 Gaps and Capability Improvements

Small jurisdictions within Volusia County do not have the necessary resources to expand operations beyond what is needed for day-to-day operations. These municipalities rely on support from the County to develop plans and execute necessary safety measures, particularly in times of disaster. Municipalities such as DeBary, Oak Hill, and Pierson fall into this category. These communities often resort to the County's policies to guide their own.

Municipalities such as Daytona Beach, Deltona, New Smyrna Beach, and Ormond Beach have numerous policies in place to support hazard mitigation efforts as described throughout this report. Cities such as DeLand, Edgewater, and Port Orange have more than half of policies listed that support mitigation, but still face serious, ongoing damage from hazards, particularly flooding. Policy gaps and continued development increase the vulnerability to hazards within these jurisdictions.

It is recommended within the next five years that each jurisdiction reviews the existing policies for relevance, adopts additional policies mentioned in this document, and reassess developed or developing areas that are considered high risk as identified in Vulnerability Assessments. If a jurisdiction has not completed a Vulnerability Assessment, this can be accomplished through the Resilient Florida Grant Program.[8] Additionally, within the next five years, all municipalities are encouraged to participate in all LMS quarterly meetings and engage in county-wide resilience working groups to improve their capabilities to respond, mitigate, and recover from disasters.

7.4 PUBLIC CAPABILITY ASSESSMENT

As described in Section 2 of the plan, the public engagement sessions and surveys provided insight into residents' capabilities to respond and recover from disasters. The feedback received provides an opportunity for stakeholders to be involved in the planning process.

Residents from the community were invited to the LMS Working Group quarterly meetings, and two public engagement sessions. All residents were encouraged to speak on hazard concerns witnessed in the past five years to provide insight into Volusia County Emergency Management on individual and community level capabilities. The main concern of the public was about hurricane and flooding damage. Key takeaways from the public engagement sessions were:

- Flood mitigation efforts are ad hoc and there is no sole department or person overseeing mitigation efforts.
- There is no true definition of success or metrics on how to measure mitigation efforts to ensure they are working as intended.
- Maintenance and pre-storm preparations do not meet the public's needs for safety and security.
- Local building codes, zoning, and construction practices should be reevaluated to safeguard public confidence.

Additionally, the homeowner surveys collected information on the public's capabilities to respond and recover from disasters. There were 136 responses to this survey. Key takeaways were:

- 82% responded yes to noticing an increase in flood events.
- 49% responded yes to having flood insurance on their property.
- 56% responded no to implementing individual mitigation measures on their property.
- Of the 29% of those who have implemented individual mitigation measures on their property, 29% were landscaping/drainage improvements and 10% installed flood barriers.
- 51% have not implemented individual mitigation measures on their property due to financial setbacks and 20% claimed perceived difficulty.

7.5 EXISTING COUNTY-WIDE EFFORTS

Volusia County has invested resources into various plans and studies prior to this plan's update that contribute towards hazard mitigation and resilience. These plans and studies were reviewed during the update of this plan and discussed during LMS Working Group quarterly meetings by the various stakeholders and departments that completed them. Examples include:

- 2012 Volusia County Sustainability Action Plan
- 2017 Resilient Volusia County Phase 1
- 2018 East Central Florida Regional Resilience Collaborative
- 2019 East Central Florida Regional Resiliency Action Plan (RRAP)
- 2020 Planning for the Financial, Socio-Economic and Infrastructure-Related Effects of Sea Level Rise on Future Hurricane Storm Surge Intensity Report
- 2021 Resilient Volusia County Phase 2- Adaptation Action Areas Report
- 2023 Enhanced State Hazard Mitigation Plan
- 2024 East Central Florida Regional Risk Assessment
- Florida Statewide Regional Evacuation Study Program Regional Hazard Analysis
- Numerous vulnerability assessments throughout cities and county
- Numerous basin studies throughout cities and county

7.6 CONCLUSIONS OF THE CAPABILITY ASSESSMENT

The capability of Volusia County and the participating jurisdictions varies greatly from jurisdiction to jurisdiction. **Table 7.6** lists the total number of jurisdictions that have plans, ordinances and programs in place or under development.

Section 7: Table 5: Relevant Plans, Ordinances and Programs

Plan, Ordinance or Program	Total Number of Jurisdictions
Local Mitigation Strategy	17
Comprehensive Land Use Plan	17
Floodplain Management Plan	17
Open Space Management Plan	8
Stormwater Management Plan	15
Natural Resource Protection Plan	10
Flood Response Plan	11
Emergency Operations Plan	17
Continuity of Operations Plan	11
Evacuation Plan	14
Disaster Recovery Plan	11
Capital Improvements Plan	17
Economic Development Plan	11
Historic Preservation Plan	8
Floodplain Ordinance (or Flood Damage Prevention Ordinance)	17
Zoning Ordinance	17
Subdivision Ordinance	13
Unified Development Ordinance	9
Post-disaster Redevelopment / Reconstruction Ordinance	4
Building Code	17
Fire Code	17
National Flood Insurance Program	17
NFIP Community Rating System	11

Capability *Assessment* and *Risk Assessment* serve as the foundation for a meaningful hazard mitigation strategy. During the process of identifying the goals and mitigation actions each jurisdiction must consider not only their level of hazard risk but also their existing capability to minimize or eliminate that risk.

In jurisdictions where the overall risk of hazard is high, specific mitigation actions that account for these conditions should be considered. This may include less costly actions such as minor ordinance revisions or public awareness activities. If necessary, specific capabilities may need to be improved to better address recurring threats. Similarly, in cases where the hazard vulnerability is low, more emphasis can be placed on actions that may impact future vulnerability, such as guiding development away from known hazard areas using various regulatory measures.

Use of Social Media and Other Media for Warning and Loss Prevention

Volusia County Emergency Management uses its X, formally known as Twitter, and Facebook account to provide warning to residents about incoming storms and other natural hazards. In unison with social media, the County Public Information Officer and Emergency Manager stay in communication with local television stations as well as national television stations such as The Weather Channel before, during and after storm and natural hazard events). Coordination with media sources often includes tips for residents for property mitigation (such as sandbagging) and tips for residents to stay safe after a storm (including staying away from downed power lines and standing water).

As of 2024, Volusia County Emergency Management launched an app focused on public outreach on emergency preparedness. This app sends out push notifications and public safety messages in real-time. The app provides information on topics such as state of emergencies, current events, weather conditions, sheltering, and disaster assistance.

SECTION 8 – MITIGATION STRATEGY

This section of the Plan provides the blueprint for Volusia County and the participating jurisdictions to become less vulnerable to its identified hazards. It is based on general consensus of the Volusia Prepares LMS Working Group (LMS Working Group) and the findings and conclusions of the *Capability Assessment* and *Risk Assessment*. It consists of the following five subsections:

- **Introduction**
- **Mitigation Goals**
- **Identification and Analysis of Mitigation Techniques**
- **Selection of Mitigation Techniques for Volusia County**
- **Mitigation Success Stories**
- **Plan Update Requirement**

8.1 INTRODUCTION

The intent of the Local Mitigation Strategy is to provide Volusia County and the participating jurisdictions with the goals that will serve as guiding principles for future mitigation policy and project administration, along with an analysis of mitigation techniques deemed available to meet those goals and reduce the impact of identified hazards. It is designed to be comprehensive, strategic and functional in nature:

- In being comprehensive, the development of the strategy includes a thorough review of all hazards and identifies extensive mitigation measures intended to not only reduce the future impacts of high-risk hazards, but also to assist the County and participating jurisdictions achieve compatible economic, environmental and social goals.

- In being strategic, the development of the strategy ensures that all policies and projects proposed for implementation are consistent with pre-identified, long-term planning goals.

- In being functional, each proposed mitigation action is linked to established priorities and assigned to specific departments or individuals responsible for their implementation with target completion deadlines. When necessary, funding sources are identified that can be used to assist in project implementation.

The first step in designing the LMS includes the identification of countywide mitigation goals. Mitigation goals represent broad statements that are achieved through the implementation of more specific, action-oriented objectives. These actions include both hazard mitigation policies (such as the regulation of land in known hazard areas through a local ordinance), and hazard mitigation projects that seek to address specifically targeted hazard risks (such as the acquisition and relocation of a repetitive loss structure).

The second step involves the identification, consideration and analysis of available mitigation measures to help achieve the identified mitigation goals. This is a long-term, continuous process, sustained through the development and maintenance of this Plan. Alternative mitigation measures will continue to be

considered as future mitigation opportunities become identified, as data and technology improve, as mitigation funding becomes available, and as this Plan is maintained over time.

The third and last step in designing the LMS is the selection and prioritization of specific mitigation actions, referred to as Hazard Mitigation Initiatives, for Volusia County and participating jurisdictions. The Mitigation Action Plan (MAP) represents an unambiguous and functional plan for action and is considered to be the most essential outcome of the mitigation planning process.

The MAP includes a prioritized listing of proposed hazard mitigation actions (policies and projects) for Volusia County and its participating jurisdictions and partners to carry out with accompanying information such as those departments or individuals assigned responsibility for their implementation, potential funding sources and an estimated target date for completion, serving as an important tool for monitoring success or progress over time. The cohesive collection of actions listed in the MAP can also serve as an easily understood menu of mitigation policies and projects for those local decision makers who want to quickly review the recommendations and proposed actions.

In preparing the Mitigation Action Plan for Volusia County, the LMS Working Group considered the overall hazard risk and capability to mitigate the effects of hazards as determined through the risk and capability assessment process, in addition to meeting the adopted countywide mitigation goals and unique needs of the community. Prioritizing the proposed mitigation actions was based on the following 11 factors:

- Population Benefited
- Health and Safety Considerations
- Environmental Impact
- Consistency with Other Plans and Programs
- Reduces Risk of Future Property Damage
- Supports Essential or Critical Services
- Probability of Receiving Funding for Implementation
- Feasibility of Implementation
- Community Rating System
- Repetitive Loss Mitigation
- Benefit Cost Ratio (to be conducted prior to submitting a project for grant consideration)

The mitigation initiative scoring system is provided in **Section 8: Table 1**.

Section 8: Table 1: Mitigation Initiative Scoring System

Prioritization Criteria	Scoring				
Population Benefited	**4** - Project will benefit a multi-jurisdictional area.	**3** - Project will benefit a jurisdictional area.	**2** - Project will benefit less than 100% of a jurisdiction (i.e., neighborhood).		
Health and Safety Considerations *Add 1 point for projects that benefit a multi-jurisdictional area.	**4** - Project would benefit 75% or more of the population.	**3** - Project would benefit 50-74% of the population.	**2** - Project would benefit 25-49%of the population.	**1** - Project would benefit less than 25% of the population.	
Environmental Impact	**1** - Project improves the environment.	**0** - Risk to the environment is undetermined.	**(-1)** - Project poses risk to the environment.		
Consistence with other Plans and Programs	**4** - Project is incorporated into the LMS, CEMP and Comprehensive Plan, and supports the National Flood Insurance Program (i.e., for flood related projects).	**3** - Project is incorporated into at least two of these plans.	**2 -** Project is incorporated into at least one of these plans.	**1** - Project is consistent with other local standards, aside from LMS, CEMP and Comprehensive Plan.	
Reduces Risk of Future Property Damage	**4 -** Mitigates a hazard of high frequency or risk.	**3 -** Mitigates a hazard of moderate frequency or risk.	**2 -**Mitigates a hazard of low frequency or risk.	**1 -** Mitigates a hazard of very low frequency or risk.	
Supports Essential or Critical Services	**5** - Project will ensure continuity of operations for essential infrastructure or services.	**3** - Project will support infrastructure or services with loss/damage history.	**1** - Project will support infrastructure or services without loss/damage history.	**0** - Project's operation will have no impact on community infrastructure or services if disrupted.	
Probability of Receiving Funding for Implementation	**4** - Limited funding potential exists.	**3** -Potential funding sources are other state or federal grants or similar funding sources.	**2** - Potential funding is readily available through emergency preparedness or mitigation funding sources.	**0** - Potential funding is readily available through local funding sources (e.g., budgeting, capital improvements).	
Feasibility of Implementation	**4** - Project would be relatively easy to implement in one year.	**3** - Project would be easy to implement in three years.	**2** - Project would be easy to implement in five years.	**0** - Project would be difficult to implement.	
Community Rating System	**4** - Project supports all four elements of CRS flood-related activities (public information, mapping and regulations, damage reduction and flood preparedness).	**3** - Project supports three CRS elements.	**2** - Project supports two CRS elements.	**1** - Project supports one CRS element.	**0** - Project does not support any CRS element.
Repetitive Loss Mitigation	**4** - Project protects 50% or more of Repetitive Loss (RL) structures.	**2** - Project protects less than 50% of RL structures.	**0** - Project does not protect a RL structure.		
Benefit Cost Ratio	**5** - Project has a Benefit Cost Ratio (BCR) of "1" or higher, using FEMA approved software.	**3** - Project has a BCR of less than "1" using FEMA approved software.	**0** - The BCR cannot be determined.		

8.2 MITIGATION GOALS

44 CFR Requirement

44 CFR Part 201.6(c)(3)(i):
The mitigation strategy shall include a description of mitigation goals to reduce or avoid long-term vulnerabilities to the identified hazards.

For the 2025 plan update, the LMS Working Group used the goal listing updated and developed as part of the 2020 plan update. Each of the following goal statements represent a broad target for Volusia County and its participating jurisdictions and partners to achieve through the implementation of its more detailed Mitigation Action Plan provided in Section 9: *Mitigation Action Plan*. They are intended to reflect the unique needs and wishes of the communities of Volusia County to have a more "disaster resilient" future.

Section 8: Table 2: LMS Working Group Mitigation Goals

GOAL 1: Strengthen effective hazard mitigation programming through policies, regulations, and technology through local government collaborations.
***Objective 1*:** Develop a mechanism to track mitigation projects for active reporting among jurisdictions.
***Objective 2*:** Support the efforts of each jurisdictions' Community Rating Systems program.
***Objective 3*:** Review, develop and enforce policies, plans and regulations to discourage or prohibit inappropriate location of structures or infrastructure components in high-risk areas.
***Objective 4*:** Leverage available information and data from sources, such as individual vulnerability assessments, the Regional Resilience Action Plan, and Adaption Action Areas to further mitigation efforts.
***Objective 5*:** Seek funding to implement and further existing forecasting technology.
***Objective 6*:** Strengthen surveying strategies before and after a disaster for more comprehensive damage assessments.
GOAL 2: Local government will endeavor to have resilient critical infrastructure that supports operations before, during, and after disasters.
Objective 1: Educate local partners on the need for financial planning to reduce risk and recover critical infrastructure quickly after a disaster.
Objective 2: Implement adaptation strategies and encourage routine maintenance of critical infrastructure through physical and geological enhancements using available technology.
***Objective 3*:** Evaluate utility, telecommunications, and information technology systems with external agency partners to determine potential mitigation opportunities.
***Objective 4*:** Assess transportation routes, systems, and infrastructure to identify potential relocation, retrofit, or modification opportunities to ensure safe passage before, during and after disaster events.
***Objective 5*:** Prioritize the functions of emergency service operations and their facilities.
Objective 6: Annually seek opportunities and apply for funding to expand future shelter capacity and for existing shelter retrofits.

GOAL 3: Encourage economic sustainability within the community.

Objective 1: Local government will encourage businesses and industries to make employment facilities and operations more disaster resilient.

Objective 2: Develop partnerships to enhance communication between private sector businesses and local governments.

Objective 3: Offer training to local businesses and professional organizations on all hazard preparedness.

Objective 4: Review the needs of key supply chain demands in the community by establishing programs, facilities or resources to support business continuity.

GOAL 4: Enhance the whole community's understanding of the hazards and the techniques used to minimize vulnerability.

Objective 1: Provide information through outreach activities to further the public's understanding of local hazards and residential vulnerabilities.

Objective 2: Inform tourists on the hazard risks and preparedness.

Objective 3: Collaborate with private sector associations and businesses to further disaster preparedness and business continuity.

Objective 4: Encourage each jurisdiction to participate in trainings and exercises and share resources with one another.

8.3 IDENTIFICATION AND ANALYSIS OF MITIGATION TECHNIQUES

44 CFR Requirement

44 CFR Part 201.6(c)(3)(ii):
The mitigation strategy shall include a section that identifies and analyzes a comprehensive range of specific mitigation actions and projects being considered to reduce the effect of each hazard, with particular emphasis on new and existing buildings and infrastructure.

In formulating the LMS for Volusia County, a wide range of activities were considered to help achieve the established mitigation goals in addition to addressing any specific and targeted hazard concerns. These activities were discussed by the LMS Working Group at meetings held over the course of plan development. In general, all activities considered by the LMS Working Group can be classified under one of the following six (6) broad categories of mitigation techniques.

1. Prevention
Preventative measures are intended to keep hazard problems from getting worse and are typically administered through government programs or regulatory actions that influence the way land is developed and buildings are built. They are particularly effective in reducing a community's future vulnerability, especially in areas where development has not occurred or capital improvements have not been substantial. Examples of preventative activities include:

- Planning and zoning
- Building codes
- Open space preservation
- Floodplain regulations
- Stormwater management regulations
- Drainage system maintenance
- Capital improvements programming
- Riverine / fault zone setbacks

2. Property Protection
Property protection measures involve the modification of existing buildings and structures to help them better withstand the forces of a hazard, or removal of the structures from hazardous locations. Examples include:

- Acquisition
- Relocation
- Building elevation
- Critical facilities protection
- Retrofitting (e.g., wind proofing, floodproofing, seismic design techniques, etc.)
- Safe rooms, shutters, shatter-resistant glass
- Insurance

3. Natural Resource Protection

Natural resource protection activities reduce the impact of natural hazards by preserving or restoring natural areas and their protective functions. Such areas include floodplains, wetlands, steep slopes and sand dunes. Parks, recreation or conservation agencies and organizations often implement these protective measures. Examples include:

- Floodplain protection
- Watershed management
- Riparian buffers
- Forest and vegetation management (e.g., fire resistant landscaping, fuel breaks, etc.)
- Erosion and sediment control
- Wetland preservation and restoration
- Habitat preservation
- Slope stabilization

4. Structural Projects

Structural mitigation projects are intended to lessen the impact of a hazard by modifying the environmental natural progression of the hazard event through construction. They are usually designed by engineers and managed or maintained by public works staff. Examples include:

- Reservoirs
- Dams / levees / dikes / floodwalls
- Diversions / detention / retention
- Channel modification
- Storm sewers

5. Emergency Services

Although not typically considered a “mitigation” technique, emergency service measures do minimize the impact of a hazard event on people and property. These commonly are actions taken immediately prior to, during, or in response to a hazard event. Examples include:

- Warning systems
- Evacuation planning and management
- Emergency response training and exercises
- Sandbagging for flood protection
- Installing temporary shutters for wind protection

6. Public Education and Awareness

Public education and awareness activities are used to advise residents, elected officials, business owners, potential property buyers, and visitors about hazards, hazardous areas, and mitigation techniques they can use to protect themselves and their property. Examples of measures to educate and inform the public include:

- Outreach projects
- Speaker series / demonstration events

- Hazard map information
- Real estate disclosure
- Library materials
- School children educational programs
- Hazard expositions

8.4 SELECTION OF MITIGATION TECHNIQUES FOR VOLUSIA COUNTY

In order to determine the most appropriate mitigation techniques for Volusia County, the LMS Working Group thoroughly reviewed and considered collective findings of various community assessments. Other considerations included each individual mitigation action's effect on overall risk to life and property, health and safety, the environment, plan consistency, its ease of implementation and general cost-effectiveness, and funding availability (if necessary).

FEMA guidance for meeting the planning requirements of the Disaster Mitigation Act of 2000 specifies that local governments should prioritize their mitigation actions based on the level of risk a hazard poses to life and property. In response to this requirement, the LMS Working Group used and completed a Mitigation Techniques Matrix (**Section 8: Table 3**) to make certain they addressed, at a minimum, those hazards posing the greatest threat.

Section 8: Table 3: Mitigation Techniques Matrix for Volusia County

MITIGATION TECHNIQUE	HIGH RISK HAZARDS			
	FLOOD	TROPICAL CYCLONES	RISING COASTAL WATERS	TORNADO
Prevention	✓	✓	✓	✓
Property Protection	✓	✓	✓	✓
Natural Resource Protection	✓	✓	✓	
Structural Projects	✓	✓	✓	✓
Emergency Services	✓	✓	✓	✓
Public Education & Awareness	✓	✓	✓	✓

The Mitigation Techniques Matrix provides the LMS Working Group with the opportunity to cross-reference each of the priority high risk hazards, the aforementioned comprehensive range available mitigation techniques, including prevention; property protection; natural resource protection; structural projects; emergency services; and public education and awareness. However, it is important to note that Volusia County's Mitigation Action Plan includes an array of actions targeting multiple hazards and is not necessarily limited to only those classified as high risk.

Additional mitigation strategies range from:

- Seawalls
- Breakwaters
- Habitat restoration
- Beach renourishment
- Living Shorelines
- Elevating major roadways
- Raising vulnerable structures
- Water pump systems
- Underground utilities
- Permeable pavement
- Low impact development
- Floodproofing structures
- Rain gardens
- Increase density standards
- Land acquisition
- Public Outreach and Education

8.5 PLAN REVISIONS

Because of FEMA requirements for plan updates, the Mitigation Action Plan was reviewed by each agency responsible identified for implementing the action. For each action, an update on the implementation status (completed, deleted, or deferred) was provided and milestones achieved or impediments to implementation of the actions were identified to adjust the project list as necessary.

The current goals and objectives were updated and refined through a series of virtual and in-person meetings in 2024. All members of the Volusia Prepares Working Group were invited to participate in the meetings outside the quarterly meetings. All feedback was evaluated and incorporated into the outlined goals and objectives.

Flooding, rising coastal waters, and tropical cyclones were the top concerns for the LMS Volusia Prepares Working Group and residents throughout Volusia County. These hazards are complex issues with multiple contributing factors, often specific to a given site. Effective mitigation requires accurate data collection and analysis to identify areas that have experienced repeated damage. Prioritization should be given to these locations, followed by those that have been damaged most recently, ensuring that resources are allocated efficiently to address the most impacted areas first. Given the constraints of available resources, it is essential to focus on areas where mitigation efforts will have the greatest impact.

Public concerns regarding such hazards have frequently attributed the issue to new development. While development can be a contributing factor in certain locations—such as Venetian Bay in New Smyrna Beach, Old Dixie Highway in Ormond Beach, the west side of Daytona Beach, and new miscellaneous subdivisions throughout the county—these hazards are typically the result of a combination of factors. Addressing existing challenges requires a site-specific approach that considers a broad range of contributing causes and solutions.

SECTION 9 – MITIGATION ACTION PLAN

44 CFR Requirement

44 CFR Part 201.6(c)(3)(iii): The mitigation strategy shall include an action plan describing how the actions identified in paragraph (c)(2)(ii) of this section will be prioritized, implemented, and administered by the local jurisdiction.

This section includes the listing of the mitigation actions proposed by Volusia County and its participating jurisdictions and partners. It has been designed to achieve the mitigation goals and objectives established in Section 8: Mitigation Strategy and will be maintained on a regular basis according to the plan maintenance procedures established in Section 10: Plan Maintenance Procedures.

As described in the previous section, the Mitigation Action Plan, or MAP, represents an unambiguous and functional plan for action. Each proposed mitigation action has been identified as an effective measure (policy or project) to reduce hazard vulnerability for Volusia County.

Most importantly, implementation mechanisms are provided for each action, including the designation of a lead agency or department responsible for implementing the action. Specific information regarding project cost and timeframe for its completion is on file with Volusia County Emergency Management. These implementation mechanisms ensure that Volusia County Local Mitigation Strategy remains a functional document that can be monitored for progress over time.

Section 9: Table 1: Key Elements of the Mitigation Action Plan

Priority	Indicates whether the action is a "low" priority, "moderate" priority or "high" priority based on the established prioritization criteria: Low = <10; Moderate = 11-24; High = 25+
Jurisdiction	Identifies the geographic location where the initiative is located.
Responsible Organization	Identifies the local agency, department or organization that is best suited to implement the proposed action, project or initiative.
Hazard(s)	Lists the hazard(s) the proposed action is designed to mitigate against.
Mitigation Technique Category	It indicates the mitigation technique that the proposed action is designed to help achieve. Categories include E = Emergency Services; P = Prevention; PE = Public Education; PP = Property Protection; S = Structural
Initiative	Identifies a specific action that, if accomplished, will reduce vulnerability and risk in the impact area. Actions may be in the form of local policies (i.e., regulatory or incentive-based measures), programs or structural mitigation projects and should be consistent with any pre-identified mitigation goals and objectives. An identification number is provided. The county has additional information on files for each initiative (e.g., location, damage history, specific mitigation measure, estimated cost, etc.)
Funding	If applicable, it indicates how the cost to complete the action will be funded. For example, funds may be provided from existing operating budgets or general funds, a previously established contingency fund, a cost-sharing federal or state grant program, etc. The default funding source for initiatives within this listing is the Hazard Mitigation Grant Program (HMGP). Outside of the HMGP, funding sources for these projects are typically determined on the local level for "proactive" projects that do not need a disaster declaration to be funded. However, most of the projects on this listing do not have a set funding source, which defaults the project to HMGP. If identified, specific funding sources will be attributed to initiatives.
Approved by LMS Working Group	Identifies the date when the initiative was approved by the LMS Working Group
Completion Date	Indicates when the action was completed. Remember that some actions will require only a minimal amount of time, while others may require a long-term or continuous effort. Projects are "deferred" or "terminated" from list listing at the discretion of the jurisdiction that is implementing those changes. When initiatives are deferred or deleted on the jurisdictional level, countywide representatives are notified via the LMS Working Group (or Volusia Prepares), and the countywide initiative listing is updated at that time.
Status	The status indicators for each initiative is as follows: • C = Current • D = Deferred ****See notes under "Completion Date" above**** • N = New • T = Terminated ****See notes under "Completion Date" above**** • U = Updated • CF = Completed with other funding • W = Withdrew • L = Looking for other funding

Each mitigation initiative has been scored by the responsible jurisdiction. The scoring system is included in Section 8: Mitigation Strategy.

Prioritizing the proposed mitigation actions was based on the following 11 factors:

- Population Benefited
- Health and Safety Considerations
- Environmental Impact
- Consistency with Other Plans and Programs
- Reduces Risk of Future Property Damage
- Supports Essential or Critical Services
- Probability of Receiving Funding for Implementation
- Feasibility of Implementation
- Community Rating System
- Repetitive Loss Mitigation
- Benefit Cost Ratio (to be conducted prior to submitting a project for grant consideration)

Each mitigation initiative was scored on 10 of these 11 factors. The jurisdictions have not run an official benefit cost analysis (BCA) for the initiatives at this time. The jurisdictions did include a general BCA in the mitigation initiative application that was submitted to Volusia County Emergency Management. However, the BCA will be run for the initiatives following a disaster to factor in all known damage costs.

The mitigation initiatives are not listed in exact priority order, though each has been assigned a priority level of “low”, “moderate”, or “high”.

All mitigation initiatives included in the Action Plan that propose to reduce flood hazard vulnerability advance the intent of the National Flood Insurance Program (NFIP), as they will meet the current local floodplain regulations adopted by the jurisdictions as required by the NFIP. Two of the scoring factors used to determine the priority of the actions specifically address the intent of the NFIP and the Community Rating System (CRS). These two factors consider whether the initiative supports elements of the CRS and reduces repetitive flood losses.

Volusia County is highly committed to reducing flood losses in support of the NFIP and has predominantly used local funding to implement these projects. Examples of these initiatives include acquiring and relocating repetitive loss structures, relocating critical facilities from the 100-year floodplain, floodproofing equipment at water treatment plants, performing drainage improvement projects and creating new topographic maps based on newly collected Light Detection and Ranging (LiDAR) data. Approximately half of open disaster mitigation initiatives support flood hazard vulnerability reduction.

The open mitigation initiatives are listed in the Action Plan in **Section 9: Table 2** If a mitigation initiative does not have a status indicator, it is considered “open.

In 2019, the East Central Florida Regional Planning Council and Volusia County Emergency Management mapped the locations of all mitigation projects, by type, as part of a project with the Florida Department of Environmental Protection. These maps are available upon request.

Section 9: Table 2: Mitigation Action Plan: Open Mitigation Initiatives by Jurisdiction (as of 1/28/2025)

Project #	Priority	Jurisdiction	Responsible Organization	Hazard(s)	Mitigation Technique Category	Initiative	Funding	Est. Cost	Approved by LMS Working Group	Anticipated Completion Date	Status
VOL-0546	Ian (2)	Ormond Beach	Public Works	Flood	P PP S	VOL -0546 Fleming Avenue Pump Station Central Park Flood Mitigation	HMGP	$12,561,200.00	10/3/2019	12/31/2028	C

SECTION 10 – PLAN MAINTENANCE PROCEDURES

44 CFR Requirement

44 CFR Part201.6(c)(4)(i):
The plan shall include a plan maintenance process that includes a section describing the method and schedule of monitoring, evaluating and updating the mitigation plan within a five-year cycle.

44 CFR Part 201.6(c)(4)(ii):
The plan maintenance process shall include a process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms such as comprehensive or capital improvement plans, when appropriate.

This section of the Plan discusses how the Mitigation Strategy and Mitigation Action Plan will be implemented and how the LMS will be evaluated and enhanced over time. This section also discusses how the public will continue to be involved in a sustained hazard mitigation planning process. It consists of the following three subsections:

- **Implementation**
- **Monitoring, Evaluation and Enhancement**
- **Continued Public Involvement**

10.1 IMPLEMENTATION

Each agency, department or other partners participating under the Volusia County Multi-Jurisdictional LMS is responsible for implementing specific mitigation actions as prescribed in the Mitigation Action Plan. Every proposed action listed in the Mitigation Action Plan is assigned to a specific "lead" agency or department in order to assign responsibility and accountability and increase the likelihood of subsequent implementation.

In addition to the assignment of a local lead department or agency, an implementation time period or a specific implementation date has been assigned in order to assess whether actions are being implemented in a timely fashion. Volusia County and its participating jurisdictions and partners will seek outside funding sources to implement mitigation projects in both the pre-disaster and post-disaster environments. When applicable, potential funding sources have been identified for proposed actions listed in the Mitigation Action Plan.

Volusia County will integrate this Mitigation Plan into relevant County government decision making processes or mechanisms. This includes integrating the Mitigation Plan requirements into other local planning documents, processes or mechanisms, such as comprehensive or capital improvement plans, when appropriate. Members of the LMS Working Group will ensure that the goals and strategies of new and updated local planning documents for their agencies or departments are consistent and do not conflict with the goals and actions of the LMS and will not contribute to increased hazard vulnerability in the County.

Opportunities to integrate the requirements of this Plan into other local planning mechanisms shall continue to be identified through future meetings of the LMS Working Group and through the five-year review process described herein. Although it is recognized that there are many possible benefits to integrating components of this Plan into other local planning mechanisms, the development and maintenance of this stand-alone Mitigation Plan is deemed by the Volusia County LMS Working Group to be the most effective and appropriate method to implement local hazard mitigation actions at this time.

10.2 MONITORING, EVALUATION AND ENHANCEMENT

Periodic revisions and updates of the LMS are required to ensure that the goals of the Plan are kept current and account for potential changes in hazard vulnerability and mitigation priorities. In addition, revisions may be necessary to ensure that the Plan is in full compliance with applicable federal and state regulations. Periodic evaluation of the Plan will also ensure that specific mitigation actions are being reviewed and carried out according to the Mitigation Action Plan.

The Volusia County LMS Working Group will continue to meet at least annually and following any disaster events warranting a reexamination of the mitigation actions being implemented or proposed for future implementation. This will ensure that the Plan is continuously updated to reflect changing conditions and needs within Volusia County. If determined appropriate or as requested, an annual report on the Plan will be developed and presented to the Volusia County Council in order to report progress on the actions identified in the Plan and to provide information on the latest legislative requirements and/or changes to those requirements.

10.2.1 Five (5) Year Plan Review

The Plan will be thoroughly reviewed by the LMS Working Group every five years to determine whether there have been any significant changes in Volusia County that may, in turn, necessitate changes in the types of mitigation actions proposed. New development in identified hazard areas, increased exposure to hazards, the increase or decrease in capability to address hazards, and changes to federal or state legislation are examples of factors that may affect the necessary content of the Plan.

The plan review provides Volusia County officials with an opportunity to evaluate those actions that have been successful and to explore the possibility of documenting potential losses avoided due to the implementation of specific mitigation measures. The plan review also provides the opportunity to address mitigation actions that may not have been successfully implemented as assigned. Volusia County Emergency Management Services department will be responsible for reconvening the LMS Working Group and conducting the five-year review.

During the five-year plan review process, the following questions will be considered as criteria for assessing the effectiveness and appropriateness of the Plan:

- Do the goals address current and expected conditions?
- Has the nature or magnitude of risks changed?
- Are the current resources appropriate for implementing the Plan?
- Are there implementation problems, such as technical, political, legal or coordination issues with other agencies?

- Have the outcomes occurred as expected?
- Did the County and participating agencies and other partners participate in the plan implementation process as assigned?

Following the five-year review, any revisions deemed necessary will be summarized and implemented according to the reporting procedures and plan amendment process outlined herein. Upon completion of the review and update/amendment process, the Volusia County LMS will be submitted to the State Hazard Mitigation Officer at the Florida Division of Emergency Management (FDEM) for final review and approval in coordination with the Federal Emergency Management Agency (FEMA).

5-Year Update Summary
Review Group Lead as of 2024: Aubrie Austin, Volusia County Emergency Management
Review Group Name: Volusia Prepares Working Group (see members in Section 2).
Interim LMS Review: LMS can be reviewed or commented on at any quarterly Volusia Prepares Meeting
2030 Review Date: The Volusia Prepares group will begin review no less than 365 days before the 2030-35 plan submittal date. This will ensure ample time to hire a contractor to complete the plan with all necessary community and municipal outreach completed.
Review Forum: Volusia Prepares Working Group Meetings (Quarterly)

10.2.2 Disaster Declaration

Following a disaster declaration, the Volusia County LMS will be revised as necessary to reflect lessons learned, or to address specific issues and circumstances arising from the event. It will be the responsibility of the Volusia County Emergency Management Services department to reconvene the LMS Working Group and ensure the appropriate stakeholders are invited to participate in the plan revision and update process following declared disaster events.

10.2.3 Reporting Procedures

The results of the five-year review will be summarized by the LMS Working Group in a report that will include an evaluation of the effectiveness of the Plan and any required or recommended changes or amendments. The report will also include an evaluation of implementation progress for each of the proposed mitigation actions, identifying reasons for delays or obstacles to their completion along with recommended strategies to overcome them.

10.2.4 Plan Amendment Process

Upon the initiation of the amendment process, Volusia County and its participating jurisdictions and partners will forward information on the proposed change(s) to all interested parties including, but not limited to, all directly affected County departments, residents, and businesses. Information will also be forwarded to the Florida Division of Emergency Management. This information will be disseminated in order to seek input on the proposed amendment(s) for not less than a 45-day review and comment period.

At the end of the 45-day review and comment period, the proposed amendment(s) and all comments will be forwarded to the LMS Working Group for final consideration. The committee will review the proposed

amendments along with the comments received from other parties, and, if acceptable, the committee will submit a recommendation for the approval and adoption of changes to the Plan to the Volusia County Council within 60 days.
In determining whether to recommend approval or denial of a Plan amendment request, the following factors will be considered by the LMS Working Group:

- There are errors, inaccuracies or omissions made in the identification of issues or needs in the Plan;
- New issues or needs have been identified which are not adequately addressed in the Plan;
- There has been a change in information, data, or assumptions from those on which the Plan is based.

Upon receiving the recommendation from the LMS Working Group and prior to adoption of the Plan, the County will hold a public hearing if deemed necessary. The Volusia County Council will review the recommendation from the LMS Working Group (including the factors listed above) and any oral or written comments received at the public hearing. Following that review, the County Council will take one of the following actions:

- Adopt the proposed amendments as presented
- Adopt the proposed amendments with modifications
- Refer to the amendments request back to the LMS Working Group for further revision, or
- Defer the amendment request back to the LMS Working Group for further consideration and/or additional hearings

10.2.5 Plan Integration

It is recommended that the findings from the LMS be integrated into individual jurisdictional plans to demonstrate the commitment to reducing hazard risk. Individual jurisdictions have been utilizing these findings in a variety of ways, such as identifying high risk areas through vulnerability assessments and incorporating the LMS project list into jurisdictional capital improvement plans.

There are opportunities for Volusia County and its jurisdictions to integrate the LMS into more specific plans. There are various reasons why hazards have profound impacts on the community. Potential causes of hazards that have been identified by members of the community include, but are not limited to:

- Inadequate maintenance of storm drains, lift stations, and canals
- Insufficient maintenance of stormwater retention and detention systems
- Encroachment upon or reduction of conservation areas
- Loss of vegetation and tree cover
- Increased impervious surface coverage, such as new residential dwellings and parking lots
- Severe rain events occurring on already saturated ground (e.g., Hurricanes Milton and Ian)
- Severe coastal erosion due to stronger and more frequent storm events
- Inadequate or antiquated stormwater retention and detention infrastructure in development
- Outdated or poorly designed stormwater conveyance systems
- Impacts from climate change, such as sea level rise

These concerns are multifaceted and require that findings of the LMS be integrated into existing plans in each participating jurisdiction. To provide the most effective hazard mitigation for Volusia County and its jurisdictions, local plans should address these concerns and dedicate resources to solving them.

Several measures are currently under consideration to reduce hazard risk in Volusia County and its jurisdictions. In 2023, Volusia County's Environmental and Natural Resources Advisory Committee (ENRAC) recommended a hybrid approach to Low Impact Development (LID); however, implementation was restricted due to Florida SB 250. With that limitation no longer in place, adopting mandatory LID and Green Infrastructure practices could provide effective hazard mitigation solutions. Updates to individual jurisdictions' stormwater ordinances are also forthcoming for review and potential approval. Additional mitigation strategies include infrastructure retrofits to improve stormwater management and strategic land-use planning to assess the suitability of future development.

Addressing hazard mitigation requires collaboration among policymakers, engineers, planners, and resilience experts. Local governments, alongside regional partners such as the East Central Florida Regional Planning Council, have access to technical expertise and data-driven recommendations to guide decision-making. It is critical to assess and implement these expert recommendations to enhance community resilience and reduce future hazard impacts. See Section 8 for further details on mitigation strategies.

10.3 CONTINUED PUBLIC INVOLVEMENT

44 CFR Requirement

44 CFR Part 201.6(c)(4)(iii):
The plan maintenance process shall include a discussion on how the community will continue public participation in the plan maintenance process

Public participation is an integral component to the mitigation planning process and will continue to be essential as this Plan evolves over time. As described above, significant changes or amendments to the Plan shall require a public hearing prior to any adoption procedures.

Other efforts to involve the public in the maintenance, evaluation and revision process will be made as necessary. These efforts may include:

- Advertising meetings of the LMS Working Group in local newspapers, public bulletin boards and/or County office buildings
- Designating willing and voluntary citizens and private sector representatives as official members of the LMS Working Group
- Utilizing local media to update the public of any maintenance and/or periodic review activities taking place
- Utilizing the Volusia County website to advertise any maintenance and/or periodic review activities taking place, and
- Keeping copies of the Plan in public libraries
- Continuing to engage the Program for Public Information

APPENDIX B: BYLAWS OF "VOLUSIA PREPARES"

Bylaws of "Volusia Prepares"
The Volusia County Local Mitigation Strategy Steering Committee

ARTICLE I: PURPOSES OF THE TASK FORCE

The purpose of the Volusia County Local Mitigation Strategy Task Force, otherwise known as "Volusia Prepares", is to decrease the vulnerability of the citizens, governments, businesses and institutions of Volusia County to the future human, economic and environmental costs of natural, technological, and societal disasters. The Task Force will develop, monitor, implement, and maintain a comprehensive plan for hazard mitigation which will be intended to accomplish this purpose.

ARTICLE II: MEMBERSHIP

Participation in Volusia Prepares is voluntary by all entities. Membership in Volusia Prepares is open to all jurisdictions, organizations and individuals supporting its purposes

ARTICLE III: ORGANIZATIONAL STRUCTURE

The organizational structure of Volusia Prepares shall consist of a Steering Committee and subcommittees as deemed necessary by the Steering Committee.

A. The Steering Committee

Volusia Prepares shall be guided by a Steering Committee consisting of designated representatives of the following:

- One representative from the government of Volusia County and each participating incorporated municipality,
- One representative from organizations and associations representing key business, industry, and community interest groups of Volusia County, and
- Other such individuals appointed by a majority vote of the Steering Committee.

Members of the Steering Committee will be designated by formal appointment or other action to serve as the official representative and spokesperson for the jurisdiction or organization regarding the activities and decisions of Volusia Prepares. To maintain good standing, members of the Steering Committee must not have more than two unexcused absences from meetings during the course of a year. Three or more unexcused absences during the course of one calendar year may result in HMGP grant funding ineligibility for those jurisdiction(s) during the next Presidentially declared disaster.

B. Subcommittees

Volusia Prepares may have permanent and/or temporary subcommittees as deemed necessary by the Steering Committee. Membership in the subcommittees is not restricted. There are no requirements for individuals to maintain good standing as members of a permanent or temporary subcommittee.

C. Program Staff

The Volusia County Emergency Management Division, or other agency as so designated by the Steering Committee, will serve as the program staff for Volusia Prepares, and assist in the coordination and support of Volusia Prepares activities.

ARTICLE IV: OFFICERS

Any member in good standing of the Steering Committee is eligible for election as an officer. The Steering Committee will have a chair elected by a majority vote of a quorum of the members. The Steering Committee will also elect by majority vote a vice chair. Representatives of both local government and any participating private sector organizations will be eligible for election as an officer. Each will serve a term of one year, and be eligible for re-election for an unlimited number of terms. The chair and vice chair of the Steering Committee are also considered to be chair and vice chair of Volusia Prepares.

The chair of the Steering Committee will preside at each meeting of the Steering Committee, as well as establish temporary subcommittees and assign personnel to them. The vice chair will fulfill the duties and responsibilities of the chair in his or her absence.

The chair of each permanent or temporary subcommittee will be designated from the members in good standing of the Steering Committee by its chair, and will serve at the pleasure of the chair of the Steering Committee.

ARTICLE V: RESPONSIBILITIES

A. Steering Committee

The Steering Committee will be responsible for oversight and coordination of all actions and decisions by the Task Force, and is solely responsible for formal actions in the name of Volusia Prepares, including the release of reports, development of resolutions, issuance of position papers, and similar activities. The Steering Committee makes assignments to the subcommittees, coordinates their work, and takes action on their recommendations. Their goal is to make Volusia County disaster resistant by preventing or reducing the personal and economic loss from natural or man-made hazards through a partnership between government, businesses, organizations, associations, and citizens.

Objectives:

1. Keep the Volusia County Local Mitigation Strategy (LMS) document current (incorporating new projects, objectives, and goals).
2. Develop and maintain overall policies and procedures and integrate priorities of mitigation efforts.
3. Facilitate comprehensive effectiveness by coordinating with subcommittees.
4. Vote on proposed action plans and initiatives.
5. Develop a strategy to constantly identify and recruit new partners.
6. Develop a systematic method to share knowledge and market the need for being disaster resistant.
7. Promote accomplishments to elected officials and community.

B. Subcommittees

If established by the Steering Committee, subcommittees will have responsibilities as assigned by the Steering Committee members.

C. Program Staff

Technical, clerical and other types of support activities to the Steering Committee and subcommittees will be provided through the Volusia County Emergency Management Division or other agency or organizational staff as designated by the Steering Committee. The Steering Committee will also designate an agency of Volusia County to serve as the legal representative and agent of Volusia Prepares, and to be empowered under County statutes to accept and disburse funds, enter into contracts, hire staff, and take such other actions as necessary in support of, or for the benefit of, the Task Force. Other jurisdictions and organizations may also provide such services on a voluntary basis upon request of the chair of the Steering Committee.

ARTICLE VI: ACTIONS BY THE TASK FORCE

A. Authority for Actions

Only the Steering Committee has the authority to take final actions in the name of Volusia Prepares. Actions by subcommittees or program staff are not considered as final until affirmed by action of the Steering Committee.

B. Meetings, Voting and Quorum

Meetings of the Steering Committee and its subcommittees will be conducted in accord with Robert's Rules of Order, if and when deemed necessary by chair of the meeting. Regular meetings of the Steering Committee will be scheduled at least quarterly with a minimum of 10 working days' notice. Subcommittees will meet at least quarterly prior to Steering Committee meetings, or more frequently as deemed necessary, at the discretion of their chairperson.

All final actions and decisions made in the name of Volusia Prepares will be by affirmative vote of a quorum of the Steering Committee. A quorum shall be 50 percent of the members of the Steering Committee in good standing at the time of the vote. Each member of the Steering Committee will have one vote. Voting by proxy, written or otherwise, is permitted.

C. Special Votes

Special votes may be taken under emergency situations or when there are other extenuating circumstances as determined by the chair and/or vice chair of the Steering Committee. Special votes may be made by telephone, email, webinar, or any electronic means, or first class mail, and shall be in accord with all applicable quorum rules for such actions.

D. Public Hearings

When required by statute or the policies of Volusia County, or when deemed necessary by the Steering Committee, a public hearing regarding actions under consideration for implementation by Volusia Prepares will be held.

E. Documentation of Actions

All meetings and other forms of action by the Steering Committee and permanent subcommittees (if established) will be documented and made available for inspection by the public.

ARTICLE VII: ADOPTION OF AMENDMENTS AND CHANGES TO THE BYLAWS AND *"VOLUSIA PREPARES"* LOCAL MITIGATION STRATEGY DOCUMENT

The Bylaws of Volusia Prepares and the *"Volusia Prepares"* Local Mitigation Strategy document may be adopted and/or amended by a two-thirds majority vote of the members in good standing of the Steering Committee at any time. All proposed changes to the bylaws and *"Volusia Prepares"* Local Mitigation Strategy document will be provided to each member of the Steering Committee prior to voting on the proposed changes. Routine changes, additions, deletions, and deferment of mitigation initiatives and any other changes to the document may be made at any time by majority vote. Voting may be by telephone, email, webinar, or any electronic means, or first class mail. A 45-day public review and comment period shall apply to the five-year FEMA required update of the *"Volusia Prepares"* LMS Document.

ARTICLE VIII: DISSOLUTION OF THE TASK FORCE

The Task Force may be dissolved by affirmative vote of 100% of the members in good standing of the Steering Committee at the time of the vote, by order of a court of competent jurisdiction, and/or by instruction of the Volusia County governing body. At the time of dissolution, all remaining documents, records, equipment and supplies belonging to the Task Force will be transferred to Volusia County for disposition.

2023 Florida Local Mitigation Strategy (LMS) Crosswalk

DESCRIPTION:
The Florida Local Mitigation Strategy (LMS) Crosswalk is informed by the FEMA Local Mitigation Planning Policy Guide (effective April 19, 2023). Each requirement listed below is a required Element of the FEMA Policy Guide. There is a difference in formatting when comparing the FL Crosswalk with FEMA's Policy Guide Elements. This is to prevent the possibility of skipping various components of each FEMA requirement. You will notice the specific FEMA requirement is listed in parenthesis next to each FL Crosswalk Element (e.g., P1 in the FL Crosswalk is equivalent to FEMA Element A1-a). As such, multiple FL Crosswalk Elements may correspond to the same FEMA Element.

INSTRUCTIONS:
Enter the requested information in each field below: 1) In the FL Crosswalk Tab, please identify the "Location in Plan" using the corresponding page numbers for each requirement. 2) In the Jurisdiction Checklist Tab, please add each of the "participating" jurisdictions. *Please do not edit the following sections: *Met, Not Met, Reviewer Comments*. If revisions are required, the State reviewer will put revisions in the Required Revisions section. As revisions are made, please feel free to add comments about the revisions in the same section. **Do not remove any State comments.** *Additionally, a Project List Template can be found in a separate tab below.

Date Plan APA:	
Date Plan Approved:	

Planning Process (FEMA Element A)		Location in Plan	Met	Not Met	Reviewer Comments	Required Revisions
P1 (A1-a)	The plan must document the current planning process.	Section 2.3-2.6 Pg. 8 - 13	x		The planning process was documentent well.	
P2 (A1-b)	The plan must list the jurisdiction(s) in the current plan that will seek approval.	Section 1.3, Section 2.4 (Table 2.1) Pg. 5	x		The list of unincorporated jurisdiction of Volusia County and participating incorporated municipalities.	
P3 (A1-b)	The plan must list the representative from **each jurisdiction** that will seek approval and how they participated in the planning process. (At a minimum, it must identify the jurisdiction represented and the person's agency and title within the jurisdiction.)	Section 2.4 (Table 2.1) Pg, 10 - 11		x		**Needs particiapnts on the LMSWG agency and title within the juridiction.**
P4 (A2)	The plan must provide documentation of an opportunity for stakeholders to be involved in the current planning process. Documentation of this opportunity must identify how **each of the stakeholders** (see below) were presented with this opportunity, as applicable.	Sections 2.4; 2.5; Appendix D Pg. 10 - 14, Pg. 367	x		All Volusia County Jurisdiction and its stakeholders were given oportunities to participant in the LMS planning process.	
P5 (A3)	The plan must document how the public had an opportunity to be involved in the current planning process and what that participation entailed, including how underserved communities and vulnerable populations within the planning area were provided an opportunity to be involved.	Section 2.6; Section 7.4 Pg. 14, Pg, 233 Pg. 367-419	x		VCEM engaged community leaders from low-income and underserved communitiees to request input on risk and hazards *Appendix D Pg, 367-419 shows the responses from the surveys.*	
P6 (A4)	The plan must document what existing plans, studies, reports and technical information were reviewed and how they were incorporated, if appropriate, into the development/update of the plan.	Section 3; Section 6; Section 7.3.; Table 7.1; Section 7.5	x			
P7 (A4)	For jurisdictions with structures for which National Flood Insurance Program (NFIP) coverage is available, regulatory flood mapping products are required to be incorporated, if applicable. Participants may use other jurisdiction-specific materials, including non-regulatory flood mapping products, that improve upon NFIP regulatory flood mapping products.	Section 5.6; Section 6.8 Pg. 227 - 229	x		Volusia County FIRM map is on Pg. 229 and the Jurisdictions that have adopted the NFIP are on Pg. 227	

FEMA Guidance Notes:

Document means to provide factual evidence for how the participants developed/updated the plan. Documentation may include narrative descriptions, copies of meeting minutes, sign-in sheets, or newspaper articles. Examples of documentation of public involvement/feedback may include, but are not limited to, narratives, materials from open meetings, screenshots of social media postings and/or interactive websites with drafts for public review and comment, questionnaires or surveys through utility bills, etc.

Involvement means being engaged and actively participating in the development of the plan; providing input and directly providing, affecting or editing plan content as the representative of the participating jurisdiction(s) or organization.

Stakeholders include local and regional agencies involved in hazard mitigation activities; agencies that have the authority to regulate development; neighboring communities; representatives of business, academia, and other private organizations; representatives of nonprofit organizations.

An opportunity to be involved in the planning process means that these stakeholders are invited to be engaged or are asked to provide information or input to inform the plan's content.

Public Participation: The opportunity must occur during the plan's development, meaning prior to the plan's submission for formal review. In addition, the plan must document how public feedback was included throughout the planning process.

Examples for P6: state hazard mitigation plan; local plans (such as comprehensive/master/general land use, economic development, capital improvement, affordable housing, resource management, resilience, climate, etc.); and hazard-specific reports and plans (such as Community Wildfire Protection Plans).

Reviewer Notes
P2/P3. Ensure the list of participating jurisdictions is consistent throughout the Plan and listed fully on the Jurisdiction Checklist tab. Consider adding special districts, state agencies, WMDs, universities, and other eligible entities - any group that will have a project on the project list and apply for HMA grants. Note that if jurisdictions do not participate in the planning process but want to adopt/apply for grants later on, there are additional steps they will need to complete - it is best for them to be included from the beginning. P4. The specific entities may be defined by each jurisdiction based on the unique characteristics of the local government, including special districts. The purpose of inviting input is to integrate natural hazard risk reduction across all community systems, as well as encourage implementation of mitigation actions. Discuss how organizations that provide support to underserved communities and vulnerable populations were given the opportunity to be involved. **Community Lifelines:** Safety and Security; Food, Hydration, Shelter; Health and Medical; Energy; Communications; Transportation; Hazardous Materials; Water Systems P5. Include information about how underserved communities and vulnerable populations were provided an opportunity to be involved in the planning process. P6. Element may be met with a narrative of resources utilized (including bullet list) and citations used throughout or a bibliography. See examples in FEMA Guidance Notes section. Gaps and limitations may be addressed as actions in the mitigation strategy, in particular for items that require additional assistance. P7. Regulatory flood maps are required to be in the Plan. This may be best located in the Risk Assessment section, however, it must be somewhere in the Plan.

Risk Assessment (FEMA Element B)		Location in Plan	Met	Not Met	Reviewer Comments	Required Revisions
R1 (B1-a)	The plan must include a **description** of all natural hazards that can affect the jurisdiction(s) in the planning area and their assets, such as dams, located outside of the planning area.	Section 5 Pg. 38-112	x		The Plan has the descriptions of the hazards	
R2 (B1-a)	The plan must provide rationale for the omission of any natural hazards that are commonly recognized to affect the jurisdiction(s) in the planning area.	Section 4 Pg. 28		x		**The plan omits hazards but, doesn't designate which ones were omittted. State which hazards were omitted within the plan, the rationale is there.**
R3 (B1-b)	The plan must include information on **location** for each identified hazard.	Section 5 Pg. 38-131		x		Indicate where the identified hazards are within the jurisdiction and not just uniformly exposed to . ***For example is it Volusia County and its Jurisdictions.*** If the Juridictions and the County differ than expand on where hazard occurs in those areas.
R4 (B1-c)	The plan must provide the **extent** of the hazards that can affect the planning area.	Section 5 Pg. 38-131		x		Rising Coastal Waters - Sea Level Rise & Tsunamis; Severe Weather - all; Wildland Fire Advisories can be used, what constitutes as a wildfire?
R5 (B1-d)	The plan must include information on **previous occurrences** for each hazard that affects the planning area. At a minimum, this includes any state and federal major disaster declarations for the planning area since the last update.	Section 5 Pg. 38-131		x		What were the previous occurences for Volusia County and its Jurisdiction within a five or ten year span. **Some of the hazard profile the occurences from 1895 - 2023**
R6 (B1-e)	The plan must include the **probability** of future events for the identified hazards that can affect the planning area.	Section 5 Pg. 38-131		x	p 43 - talks about hail in erosion p 48 - winter storms in drough 51 - hail in extreme temp 69 - hurricanes in rising waters - double sentence in probability for sea level rise	**How did you determine high or low probabilities for the hazards?**
R7 (B1-f)	For multi-jurisdictional plans, when hazard risks differ across the planning area and between participating jurisdictions, the plan must specify the unique and varied risk information for each applicable jurisdiction and their assets outside the planning area.	Section 6; Appendix E; Appendix F	x			
R8 (B2-b)	The plan must describe the potential **impacts** on each participating jurisdiction and its identified assets.	Section 6 Pg. 40-131	x			
R9 (B2-a)	The plan must describe the **overall vulnerability** of each participant to the identified hazards.	Section 6; Appendix E; Appendix F	x			
R10 (B2-a)	For plan updates, the risk assessment must meet Element E1-a (Changes in Development).	Section 3.5; Section 5.19; Section 7	x		*Very well detailed on how the population and land use development have changed the risks* p 18 - has population increasing over planning cycle p 24 - permit data over 24 yrs p 150 - changes in development	
R11 (B2-c)	The plan must address repetitively flooded NFIP-insured structures by including the estimated numbers and types (residential, commercial, institutional, etc.) of repetitive/severe repetitive loss properties for **each jurisdiction**.	Section 5.6 Pg. 59		x		**Missing Severe Repetitive Loss data. Need the types of structures for repetitive loss data.**

FEMA Guidance Notes:

Description means to provide a narrative description or definition.

Location is defined as the unique geographic boundaries within the planning area, or assets that may be affected by the identified hazard. If maps are used, provide sufficient detail and scale to clearly identify the hazard locations within and/or affecting assets owned by the participating jurisdiction(s). If narrative descriptions are used, the must contain enough detail to clearly identify the area(s) that will be affected by the hazard.

Extent is defined as the range of anticipated intensities of the identified hazards. Extent is most commonly expressed using various scientific scales. When using scales, the plan must document how the scale applies to each jurisdiction.

Previous Occurrences should include an emphasis on significant events, as determined by the community.

Probability can be defined as historical frequencies, statistical probabilities, hazard probability maps and/or general descriptors. It must include the effects of future conditions, including climate change (e.g., long-term weather patterns, average temperature and sea levels), on the type, location, and range of anticipated intensities of identified hazards.

Impacts are the consequences of effects of each hazard on the identified assets. The narrative must include the **effects of climate change**, changes in population patterns, and changes in land use and development. Gaps and limitations may be addressed as actions in the mitigation strategy, in particular for items that require additional assistance.

Vulnerability is the description of which assets, including structures, systems, populations and other assets, are at risk from the identified hazards. The description must include current and future assets (including people) and the risk that makes them susceptible to damage from the identified hazards.

Assets are, but not limited to, people (underserved communities and socially vulnerable populations); structures (facilities, lifelines, critical infrastructure); systems (networks and capabilities); natural, historic, and cultural resources; activities that have value to the community.

Changes in development means recent development, potential development, or conditions that may affect the risks and vulnerabilities of the jurisdictions or shifts in the needs of underserved communities or gaps in social equity. This can also include changes in local policies, standards, codes, regulations, land use regulations and other conditions.

Reviewer Notes
Jurisdictional risk should be discussed throughout the risk assessment. If variations in extent, probability, impact, vulnerability, etc., are seen throughout the planning area (county and municipalities) then this must be discussed. R1/R2. Commonly recognized hazards include those found in the State Hazard Mitigation Plan. Identify all the types of hazards that can occur, e.g., the different types of flood hazards (flash, riverine, storm surge, debris flows, ice jams, dam/levee failure, etc.) R3. Maps may be helpful to meet location, however, provide a more detailed narrative when showing jurisdictional risk. Identify locations/jurisdictions throughout the planning area that are more at risk to the hazard. R4. Scale or metric must be included in the Plan for each hazard. Look for explanations of how extent differs across jurisdictions as applicable. R5. If there were no occurrences since the previous update, it must be stated. R6. General descriptors must have a scale explaining the metrics (e.g., low, medium, high). Probability must include the effects of future conditions, including climate change (e.g., long-term weather patterns, average temperature and sea levels), on the type, location, and range of anticipated intensities of identified hazards. R8. The discussion of impacts should differ or be separate from the vulnerability analysis. Impacts are the consequence of the hazard on the assets found within the planning area (people, property, critical infrastructure, natural resources, etc.). Discussion must include the **effects of climate change, changes in populations patterns, and changes in land use/development.** R9. Vulnerability should explain **why** each participant (jurisdiction) is vulnerable to the hazards. This should include a discussion of current and future assets, including people and vulnerable populations. R11. Repetitive loss data should include RL and SRL data and should include the **estimated numbers** and **types** of structure for each jurisdiction.

Mitigation Strategy (FEMA Element C)		Location in Plan	Met	Not Met	Reviewer Comments	Required Revisions
S1 (C1-a)	The plan must describe how the existing authorities, policies, programs, funding, and resources of **each participant** are available to support the mitigation strategy. This must include a discussion of the existing building codes and land use and development ordinances or regulations. Capabilities may be described in a table or narrative.	Section 7; Table 7.1 Pg, 219-232	x		Pg, 219-230 Details the capabilities method used for Vousia County and and the table on pg. 221 shows relevant capabilties for each participating jurisdiction.	
S2 (C1-b)	The plan must describe the ability of **each participant** to expand on and improve the capabilities described in the plan (see S1).	Section 7; Table 7.1 Pg. 231	x		Pg. 231 - 232 highlights the gaps and capabilities that Volusia County need to improve on.	
S3 (C2-a)	The plan must describe participation in the NFIP for **each participant**, as applicable, in accordance with NFIP regulatory requirements (see reviewer notes).	Section 5.6; Section 7		x	S3.1 - p227 and S3.2 P 229.	**S3.3 - p 227 - how do they regulate, this needs to be expanded upon instead of saying to refer to code for further info** **S3.4 - p 227 - states who for the county is the POC, but must be stated for all participants** **S3.5 - p 228 - stating that the county is building an SOP is not sufficient for the county, but it also needs to be defined for all of the jurisdictions**
S4 (C3-a)	The plan must include **goals** to reduce the risk of the identified hazards.	Section 8 Pg. 241 - 242	x		The Section 8: Table 2 shows the LMSWG Mitigation Goals and Objectives	
S5 (C4-a)	The mitigation strategy must include an analysis of a comprehensive range of actions or projects that the participants considered to specifically address vulnerabilities identified in the risk assessment.	Section 8.3; Section 8.4 Pg. 245	x			
S6 (C4-b)	**Each plan participant** must identify one or more mitigation actions the participant(s) intends to implement for each hazard addressed in the risk assessment.	Section 9 Pg. 251 - 264	x		In Section 9 of the Mitigation Action Plan - Identified one or more projects to be implemented to address the hazads in the risk assessment	
S7 (C5-a)	The plan must describe the criteria used for prioritizing the implementation of the actions. The criteria must include an emphasis on the extent to which benefits are maximized, in relation to the associated costs of the action.	Table 8.1; Section 9 Pg. 239, 251-264	x		Pg. 239 described the prioritized method for mitigation initiatives for the plan	
S8 (C5-b)	The action plan must identify who is responsible for administering each action, along with the action's potential funding sources and expected time frames for completion.	Section 9; Table 9.2 Pg. 251 - 264	X			

FEMA Guidance Notes:

Discussion means a narrative or other materials that provide context on a section of the plan. Describing current capabilities provides a rationale for which mitigation projects can be undertaken to address the vulnerabilities identified in the Risk Assessment.

For C1-b: If participants do not have the ability or authority to expand and/or improve their capabilities, the plan must describe the lack of ability or authority.

For C2-a: The following information must be provided for each participant: adoption of NFIP minimum floodplain management criteria via local regulation; adoption of the latest effective Flood Insurance Rate Map (if applicable); Implementation and enforcement of local floodplain management regulations to regulate and permit development in SFHAs; appointment of a designee or agency to implement the addressed commitments and requirements of the NFIP; and description of how participants implement the substantial improvement/substantial damage provisions of their floodplain management regulations after an event. Simply stating "The community will continue to comply with the NFIP" is not sufficient to meet the requirement.

Goals are broad, long-term policy and vision statements that explain what is to be achieved by implementing the mitigation strategy. The goals must be consistent with the hazards identified in the plan. Goals may be presented as general statements applying to more than one hazard, or they may be itemized to each of the identified hazards.

A mitigation action is a measure, project, plan, or activity proposed to reduce current and future vulnerabilities described in the risk assessment. These actions must be achievable and demonstrate how the mitigation activities reduce the risks identified in the risk assessment.

Analyzing a comprehensive range means considering mitigation alternatives spanning all types of solutions. These may include local plan and regulations, structure and infrastructure projects, natural systems protection, and education and awareness programs.

For C4-a: Actions considered must emphasize reducing risk to existing buildings, structures and infrastructure, as well as limiting risk to new development and redevelopment. The range of actions considered should include mitigation actions that benefit underserved communities and socially vulnerable populations.

For C5-b: The plan must identify applicable potential funding sources, with details beyond generic terms such as "federal," "state" and/or "local." The plan must provide the **position, office, department, or agency** responsible for implementing/administrating the identified mitigation actions.

Reviewer Notes
S1. Capabilities must be discussed for each participating jurisdiction. Gaps and lack of capability should be discussed as applicable. S2. Describe the ability of each participating jurisdiction to expand and improve capability throughout the next planning cycle (5-years). S3. The following information must be provided for each participant. **1.** Adoption of NFIP minimum floodplain management criteria via local regulation. **2.** Adoption of the latest effective Flood Insurance Rate Map (FIRM), if applicable. **3.** Implementation and enforcement of local floodplain management regulations to regulate and permit development in SFHAs. **4.** Appointment of a designee or agency to implement the addressed commitments and requirements of the NFIP. **5.** Description of how participants implement the substantial improvement/substantial damage provisions of their floodplain management regulations after an event. S5. The range of actions considered should include mitigation actions that benefit underserved communities and socially vulnerable populations. Actions must be clearly linked to the vulnerabilities and impacts identified in the risk assessment. S6. Each participating jurisdiction should have a project on the project list. If this is not possible due to lack of capability, consider adding multi-jurisdictional projects, county-wide projects (such as planning/education), or something similar. If that is not feasible, include a narrative for the lack of capability within the Plan. S8. Include the **position/office/department/agency** responsible for implementing the projects, potential funding sources, and a timeframe for completion. Generic terms should be avoided or defined (e.g., short-term, medium-term, and long-term).

Plan Maintenance (FEMA Element D)		Location in Plan	Met	Not Met	Reviewer Comments	Required Revisions
M1 (D1-a)	The plan must describe how the participant(s) will continue to seek public participation after the plan has been approved and during the plan's implementation, monitoring, and evaluation.	Section 10.3 Pg. 266		x		**How would you continue to seek public participation? Would you continue to engage with community leaders in low-income and vulnerable areas to particpate in the annual meeting or after any disaster event warranting re-examination?**
M2 (D2-a)	The plan must identify how, when and by whom the plan will be tracked for implementation over its five-year cycle (**monitoring**).	Section 10.2 Pg. 266-267		x		**Who is responsible for Monitoring? For example: If all the Volusia County and its jurisdiction are under the LMS for tracking *monitoring* would; the chair person of the LMS group have authority?**
M3 (D2-b)	The plan must identify how, when and by whom the plan will be assessed for effectiveness at achieving its stated purpose and goals (**evaluating**).	Section 10.2 Pg. 266-267		x		**Who is responsible for Evaluating? For example: If all the Volusia County and its jurisdiction are under the LMS for tracking *evaluating* would; the chair person of the LMS group have authority?**
M4 (D2-c)	The plan must identify how, when and by whom the plan will be reviewed and revised at least once every five years (**updating**).	Section 10.2 Pg. 266-267		x		**Who is responsible for Updaing? For example: If all the Volusia County and its jurisdiction are under the LMS for**
M5 (D3-a)	The plan must describe the community's process to **integrate** the plan's data, information, and hazard mitigation goals and actions into other **planning mechanisms**.			x		**What is the process for all jurisdictions for integrating the plans data?**
M6 (D3-c)	A multi-jurisdictional plan must describe **each participant's** individual process for integrating information from the mitigation strategy into their identified planning mechanisms.			x		**What is the process for all jurisdictions to integrate information from the mitigation strategy into their identified planning mechanisms?**
M7 (D3-b)	The plan must identify the local planning mechanisms where hazard mitigation information/actions may be integrated. The identified list of planning mechanisms must be applicable to the plan participant(s) and not contradict the identified capabilities.	Pg. 220-232	x		The plan did a thorough description identifing the local planning capabilities that were integrated.	

FEMA Guidance Notes:

For D1-a: The plan may contain a narrative description or an itemized list of steps, demonstrating the prescribed method that will be followed to obtain future public participation.
Monitoring means tracking the implementation of the plan over time. For example, monitoring may include a system for tracking the status of the identified hazard mitigation actions.
Evaluating means assessing the effectiveness of the plan at achieving its stated purpose and goals.
Updating means reviewing and revising the plan at least once every five years.
Integrate means to include hazard mitigation principles, vulnerability information and mitigation actions into other existing community planning to leverage activities that have co-benefits, reduce risk and increase resilience.
Planning mechanisms refer to the governance structures used to manage local land use development and community decision-making.
For a multi-jurisdictional integration plan, this element may be met with a general narrative description if the process is applicable to each of the plan participants; however, any participant who cannot apply the same process as other plan participants must include their unique process for integration.

Reviewer Notes

M1. Examples of continued public involvement could include periodic presentations on the plan's progress to elected officials, schools or other community groups, annual questionnaires or surveys, public meetings, postings on social media, and interactive websites.

M2/M3/M4. Discuss **who, when, and how** the plan will be **monitored, evaluated, and updated** (five-year update). Can be narrative or itemized list of steps demonstrating the prescribed method that will be followed to monitor the plan after plan approval and during the plan's implementation.

M5. We are looking for the **process** of how each participating jurisdiction integrates information from the LMS Plan into other planning mechanisms (e.g., CEMP, Comprehensive Plan, codes and regulations, hazard plans, resiliency plans, etc.).

M6. Is the process identified in M5 applicable to all participating jurisdictions? This element may be met with a general narrative description if the process is applicable to each of the plan participants; however, any participant who cannot apply the same process as other plan participants must include their unique process for integration.

M7. Related to M5, what are the planning mechanisms that information from the LMS Plan may be incorporated into? A narrative or bullet list will suffice. List planning mechanisms from each jurisdiction along with county plans.

Plan Update (FEMA Element E)		Location in Plan	Met	Not Met	Reviewer Comments	Required Revisions
U1 (E1-a)	The plan must describe changes in development that have occurred in hazard-prone areas and how they have increased or decreased the vulnerability of **each jurisdiction** since the previous plan was approved.	Section 5.19	x		*Very well detailed on how the population and land use development have changed the risks* p 18 - has population increasing over planning cycle p 24 - permit data over 24 yrs p 150 - changes in development	
U2 (E2-a)	The plan must describe how it was revised due to a change in priorities for **each jurisdiction**.	Section 8.5 Pg. 247	x		The plan descibes the revsions that were made from the previous plan.	
U3 (E2-b)	The plan must describe the status of all hazard mitigation actions in the previous plan by identifying whether they have been completed or not, for each jurisdiction.	Initiative List Pg. 251 - 258	x		p 249 gives reasoning	
U4 (E2-c)	The updated plan must explain how the jurisdiction(s) integrated information from the mitigation plan into other planning mechanisms, as a demonstration of progress in local hazard mitigation efforts. If information from the previous plan was not integrated into other planning mechanisms, this must be stated.			x		**M5 and M6 helps meet this requirement for U-4**

FEMA Guidance Notes:
Changes in development means recent development, potential development, or conditions that may affect the risks and vulnerabilities of the jurisdictions or shifts in the needs of underserved communities or gaps in social equity. This can also include changes in local policies, standards, codes, regulations, land use regulations and other conditions. If no development changes affected the jurisdiction's overall vulnerability, this must be stated with the plan.
Description of Priorities: A description of priorities is defined by the participant(s). If the participant(s) has no change in priorities since the last approval of the mitigation plan, this must be stated. This can be a narrative or with detailed statements in appropriate sections of the plan.
Actions: For actions that are not complete, the plan must state whether the action is no longer relevant or will be included in the updated action plan.

Reviewer Notes

U1. This element is also linked to Element R10 in the risk assessment section. Make sure to discuss change in vulnerability (positive, negative, or none) to hazards from changes in development that has occurred over the last five years (planning cycle).

U2. How was the plan revised and was it due to a change in priority? Examples include new leadership, recent hazard events, input from the public, etc. We are usually referencing the goals and objectives, risk assessment, mitigation strategy, project prioritization method, or similar sections of the plan when looking for this information.

U3. Include information about completed, deleted, or deferred projects from the previous version of the plan.

U4. This element is related to M5 and M7. To meet U4, discuss if any integration of information from the LMS into other planning mechanisms has occurred since the previous update, such as a recent update of the CEMP or in the jurisdictions' codes and ordinances. Think of integration within all participating jurisdictions.

Plan Adoption (FEMA Element F)		Location in Plan	Met	Not Met	Reviewer Comments	
A1 (F1-a)	The jurisdiction must provide documentation of plan adoption, usually a resolution by the governing body or other authority, to receive approval.	Appendix A				
A2 (F2-a)	To receive approval, the participants must adopt the plan and provide documentation that the adoption has occurred.	Appendix A				

FEMA Guidance Notes:
Jurisdiction Adoption: **At least one** adoption resolution should be transmitted through the State to FEMA for the LMS Plan to be officially approved. The remaining resolutions may be transmitted as they are completed.
Documentation may be provided in the form of meeting minutes, resolutions, signed letter or any other method to demonstrate that official adoption by the participant has occurred.
Participants that submit their adoption documentation separately from the other multi-jurisdictional plan participants will not receive a new expiration date.
Participating jurisdictions that adopt the plan **more than one year** after Approvable Pending Adoption (APA) status has been issued must either: Validate that their information in the plan remains current with respect to both the risk assessment and their mitigation strategy OR Make the necessary updates before submitting the adoption resolution to FEMA.

Reviewer Notes

Ideally, all jurisidictions will formally adopt the Approved Pending Adoption (APA) plan before the current expiration date. This will depend on State review time and required revisions. Jurisdictions must adopt the LMS Plan within one year of APA status. Beyond one year, jurisdictions will need to validate the accurracy of their information within the Plan in order to receive FEMA approval.

High Hazard Potential Dams (FEMA Element G) *Eligibility Requirement for HHPD Grant Program*		Location in Plan	Met	Not Met	Reviewer Comments	Required Revisions
D1 (HHPD1-a)	The plan must describe how the local government worked with the local dam owners and/or the state dam safety agency (FDEP).	N/A				
D2 (HHPD1-b)	The plan incorporates information shared by the state and/or local dam owners.	N/A				
D3 (HHPD2-a)	The plan describes the **risks and vulnerabilities** to and from HHPDs (included in risk assessment).	N/A				
D4 (HHPD2-b)	The plan documents the limitations and describes how to address deficiencies (in the risk assessment).	N/A				
D5 (HHPD3-a)	The plan addresses how to reduce vulnerabilities to and from HHPDs as part of its own goals or with other long-term strategies. The plan does not need to include a goal specific to HHPDs alone.	N/A				
D6 (HHPD3-b)	The plan links proposed actions to reduce long-term vulnerabilities that are consistent with its goals.	N/A				
D7 (HHPD4-a)	The plan must describe **specific actions** to address HHPDs (project list).	N/A				
D8 (HHPD4-b)	The plan describes the criteria used to prioritize actions related to HHPDs.	N/A				
D9 (HHPD4-c)	The plan identifies the position, office, department or agency responsible for implementing and administering the action to mitigate hazards to or from HHPDs.	N/A				

FEMA Guidance Notes:

Note: Ensure sensitive and/or personally identifiable information is protected.

Information shared by the state and/or local dam owners includes: inundation maps, EAP, Floodplain Plans, dam breach modeling software, as well as more detailed studies.

Risk and vulnerabilities can include potential cascading impacts of storms, wildfires, etc. on dams that may affect upstream and downstream flooding; potential significant economic, environmental or social impacts, as well as multi-jurisdictional impacts, from a dam incident; location and size of populations at risk, and potential impacts to institutions and critical infrastructure/facilities/lifelines; and/or methodology and/or assumptions for risk data and inundation modeling.

Specific actions include rehabilitating/removing dams; adopting and enforcing land use ordinances in inundation zones; elevating structures in inundation zones; and/or adding flood protection, such as berms, floodwalls or floodproofing, in inundation zones.

Reviewer Notes
These elements are optional, but are an eligibility requirement of the Rehabilitation of High Hazard Potential Dam Grant Program. Consider including this information in your LMS Plan if you have **high** hazard or **significant** hazard dams in the planning area. If there are any gaps or limititations, this should be discussed as applicable.

MULTI-JURISDICTION SUMMARY SHEET

INSTRUCTIONS: For multi-jurisdictional plans, this Summary Spreadsheet lists each participating jurisdiction, and outlines whether they met each required Element. As jurisdictions adopt the approved plan, Column H will be filled out. This Summary Sheet does not imply that a jurisdiction-specific mitigation plan be developed for each jurisdiction, instead **simply fill in the names and type of each jurisdiction (columns B and C)** participating in the Plan.

MULTI-JURISDICTIONAL SUMMARY SHEET							
#	Jurisdiction Name	Type of Jurisdiction (school board, non-profit, special district, city, town, etc.)	Requirements Met (Y/N)				
			A. Planning Process	B. Hazard Identification & Risk Assessment	C. Mitigation Strategy	D. Plan Review, Evaluation & Implementation	E. Plan Adoption
1	County		X	Y	Y	Y	
2	Daytona Beach		Y	Y	Y	Y	
3	Daytona Beach Shores		Y	Y	Y	Y	
4	DeBary		Y	Y	Y	Y	
5	DeLand		Y	Y	Y	Y	
6	Deltona		Y	Y	Y	Y	
7	Edgewater		Y	Y	Y	Y	
8	Holly Hill		Y	Y	Y	Y	
9	Lake Helen		Y	Y	Y	Y	
10	New Smyrna Beach		Y	Y	Y	Y	
11	Oak Hill		Y	Y	Y	Y	
12	Orange City		Y	Y	Y	Y	
13	Ormond Beach		Y	Y	Y	Y	
14	Pierson		Y	Y	Y	Y	
15	Ponce Inlet		Y	Y	Y	Y	
16	Port Orange		Y	Y	Y	Y	
17	South Daytona		Y	Y	Y	Y	
18	School District		Y	Y			
19	Advent Health		Y	Y			
20	Daytona Beach Airport		Y	Y			

This Hazard Review Checklist will be filled out by the FDEM State Reviewers during their review.

HAZARD REVIEW CHECKLIST

Hazard Name	Description of Hazard	Location	Extent	Previous Occurrences (Updated)	Probability	Impacts	Effects of Climate Change	Overall Vulnerability	Jurisdictional Risk Assessment *(Y/N)*
Coastal Erosion	39	39 - names specific areas of the beach	43 - defined by the erosion rate	40-41 - description of historical	43 - Probability defined when you are talking about Loss rates	164 - 166	164 - 166	164 - 166	Y
Drought	44	44	45 - Drought monitor intensities	46-47	47 - high	167 - 168	167 - 168	167 - 168	Y
Cold	49	49 - What areas in Volusia would be impacted by the hazard?	49 - surface air for 3 or more days	50	49-50 - low	169 - 171	169 - 171	169 - 171	Y
Heat	49	49 171 High temp risk map	50 - 3-10 days 99+	None - What was the previous occurrence within the last 5 years?	50 - low	169 - 171	169 - 171	169 - 171	Y
Flood	52	p 54 - FIRM map 176 - FEMA Hazard Zones	53 - defines floodplains 173 - Advisories	55-58	60 - high	172 - 176	172 - 176	172 - 176	Y

Storm Surge	65	67 - storm surge map	65	68	69 - high Double sentence about sea level rise increase	179 - 184	179 - 184	179 - 184	Y
Sea Level Rise	65	65	66 - no extent	68 - nothing since 2016, state so	69 - low	179 - 184	179 - 184	179 - 184	Y
Tsnuamis	65	66	66 - no extent	68 - nothing since 2008 - state so	69 - low	179 - 184	179 - 184	179 - 184	Y
Hail	72	74 - entirety of county - Could this be Volusia County and its Jurisdictions?	what are the advisories?	76 - 83	100 - high	185 - 187	74 185 - 187	185 - 187	Y
Lightning	72	75	what are the advisories?	84 - 87	100 - high	186 - 187	74 185 - 188	186 - 187	Y
Thunderstorms	72	75	what are the advisories?	88 - 99	100 - high	187 - 187	74 185 - 189	187 - 187	Y
Tornado	101	103 - uniformly exposed	101	103 - 114	116 - high	188 - 190	116 188 - 190	188 - 190	Y
Tropical Cyclones	117	119 - emphasis on coastal areas	117	120 - 121	126 - high	191 - 199	191 - 199	191 - 199	Y
Wildland Fire	127	128 - uniformly exposed, WUI map	what constitutes as a wildfire?	130 - nothing after 2018, state so	131 - high	127 in the background has good impacts 200 - 203	200 - 203	201 - 203	Y

APPENDIX D: MEETING INFORMATION

Meeting Information

This section of the Volusia Local Mitigation Strategy includes documentation (agendas, sign-in sheets, other items) for the meetings held as part of the planning process. The planning team held four meetings, which are summarized below:

- **Public Kickoff Meeting**
  - September 20, 2024
  - The Working Group's Quarter 3 Meeting was open to the public. This meeting was held at the Volusia County Emergency Operations Center, 3825 Tiger Bay Road. The goal was to begin the public engagement process. The objective was to inform the Working Group and the public on the progress made up to that point and to discuss any updates needed to the priority project list.

- **Public Engagement Meetings**
  - November 25 and 26, 2024
  - Two public meetings were held to inform the public of the planning process and the overall scope of the 2025 Volusia County Local Mitigation Strategy. Maps and a draft plan were provided and general items within the plan were discussed. Special attention was given to community members' needs and recommendations for the plan.

- **Volusia Prepares Meeting and Conclusion Meeting for Public**
  - December 13, 2024
  - The next Local Mitigation Strategy Meeting was held at the Volusia County Emergency Operations Center, 3825 Tiger Bay Road. The purpose of this meeting was to show the jurisdictions and the public the draft plan and obtain comments and feedback.

Documentation for these meetings is found on the following pages of this appendix, including:

- Sign-In Sheets
- Agendas
- Press Releases
- Presentation Slides

Good Afternoon Everyone,

This is a friendly reminder about the upcoming Volusia Prepares (LMS) quarterly meeting, scheduled for this Friday, September 20th, at 9:00 AM at the Emergency Operations Center.

Please find the meeting agenda and minutes from our last quarterly meeting attached.

If you have any questions or need further information, feel free to reach out

Best Wishes,
Yolanda

2025-2030 LOCAL MITIGATION STRATEGY PUBLIC KICKOFF

Volusia County Emergency Management and the East Central Florida Regional Planning Council

September 20, 2024

Images: Volusia County Emergency Management Logo and East Central Florida Regional Planning Council Logo

Overview of LMS & FMP

- Local Mitigation Strategy (LMS) is a 5-year plan that anticipates damage and disruption that could result from a disaster and then determines how best to eliminate or at least reduce this damage.
  - Focuses on most relevant hazards
- The Floodplain Management Plan (FMP) is a plan that supports the National Flood Insurance Program to: identify known flood problem areas, establish goals, objectives, and implementation programs, and support the reduction in flood insurance costs.

LMS & FMP- Goals & Objectives

- LMS Working Group
  - Updated LMS goals and objectives have been updated through Working Group meetings
  - FMP goals and objectives have been updated based on conversations in these meetings
  - Awaiting feedback from Working Group: requested no later than **Sept. 30**

LMS Updated Goals

Strengthen	GOAL 1: Strengthen effective hazard mitigation programming through policies, regulations, and technology through local government collaborations.
Endeavor	GOAL 2: Local government will endeavor to have resilient critical infrastructure that supports operations before, during, and after disasters.
Encourage	GOAL 3: Encourage economic sustainability within the community.
Enhance	GOAL 4: Enhance the whole community's understanding of the hazards and the techniques used to minimize vulnerability.

Individual Jurisdictional Goals & Objectives within the FMP

Each municipality has a section within the FMP stating goals and objectives to be worked towards in the next five years

Working Group: feedback and updates to those goals **Sept 30**

Additional Plan Updates

- Broad overview of the section updates:
  - Community profile has been updated to include most recent census data
  - Hazards have been refined to include additional risks and broaden the scope of disasters
  - Hazard profiles have been updated to include recent occurrences within the past 5 years
  - Vulnerability assessment is being conducted in partnership with Volusia County's Environmental Management
  - Capability assessment will be using information collected from surveys

- Mitigation plan and strategies will mainly consist of the Quarter 3 priority list
- AI data and maps are being updated currently
- Public meetings are October 7 & 8
  - Daytona Beach Library and Deland Library

THANK YOU!

Please join us for a deeper dive into the draft in October!

LOCAL MITIGATION STRATEGY QUARTER 4 MEETING

Prepared by the East Central Florida Regional Planning Council with Volusia County Emergency Management

Friday, December 13, 2024

Images: Volusia County Emergency Management Logo and East Central Florida Regional Planning Council Logo

Overview of LMS & FMP

- Local Mitigation Strategy (LMS) is a 5-year plan that anticipates damage from a disaster to determine how to eliminate or reduce damage.
  - All hazards
  - Whole community
- The Floodplain Management Plan (FMP) is a plan that supports the National Flood Insurance Program to: identify known flood problem areas, establish goals, implement programs, and reduce flood insurance costs.

Identified Natural Hazards in LMS

- Agriculture
- Coastal Erosion
- Drought
- Extreme Temperature (heat & cold)
- Flood
- Tropical Cyclones
- Public Health Emergencies
- Rising Coastal Waters (storm surge, sea level rise, & tsunamis)
- Severe Weather (hail, lightning, & thunderstorms)
- Tornado
- Wildland Fire

Identified Manmade/Technological Hazards in LMS

- Civil Disturbance
- Mass Migration
- Terrorism
- Coastal Oil Spill
- Critical Infrastructure Failure
- HazMat/Industrial Incident

LMS Example Projects

- Generators
- Home elevations
- Basin Improvements
- Hardening lift stations
- Sewer improvements

Survey Results Overview

- Public Survey for residents: 136
- HOA: 4
- Local businesses: 6

Public Survey

- 50% have lived in home for 10+ years
- 61% are very concerned about flooding in their home (83 people)
- 39% had flooding in 2022; 25% had flooding in 2024
- 82% of residents have noticed an increase in duration and frequency

HOA Survey

- 75% believe property owners are very concerned about flooding
- All have noticed an increase in flooding
- Communities represented: DeBary, Deland, Port Orange, Unincorporated Volusia

Business Survey

- 50% are NOT concerned about flooding
- 33% of participants have flooded
- Financial impacts of concern: loss of business, days, employees unable to work, profit loss, property damage

Additional Public Feedback

- Public comments brought up in two outreach sessions will be consolidated and incorporated into the LMS
  - November 25 and 26, 2024
- Additional comments taken today

THANK YOU!

2025-2030 LOCAL MITIGATION STRATEGY AND FLOODPLAIN MANAGEMENT PLAN PUBLIC MEETINGS

Prepared by the East Central Florida Regional Planning Council with Volusia County Emergency Management

November 25 & 26, 2024

Images: Volusia County Emergency Management Logo and East Central Florida Regional Planning Council Logo

History

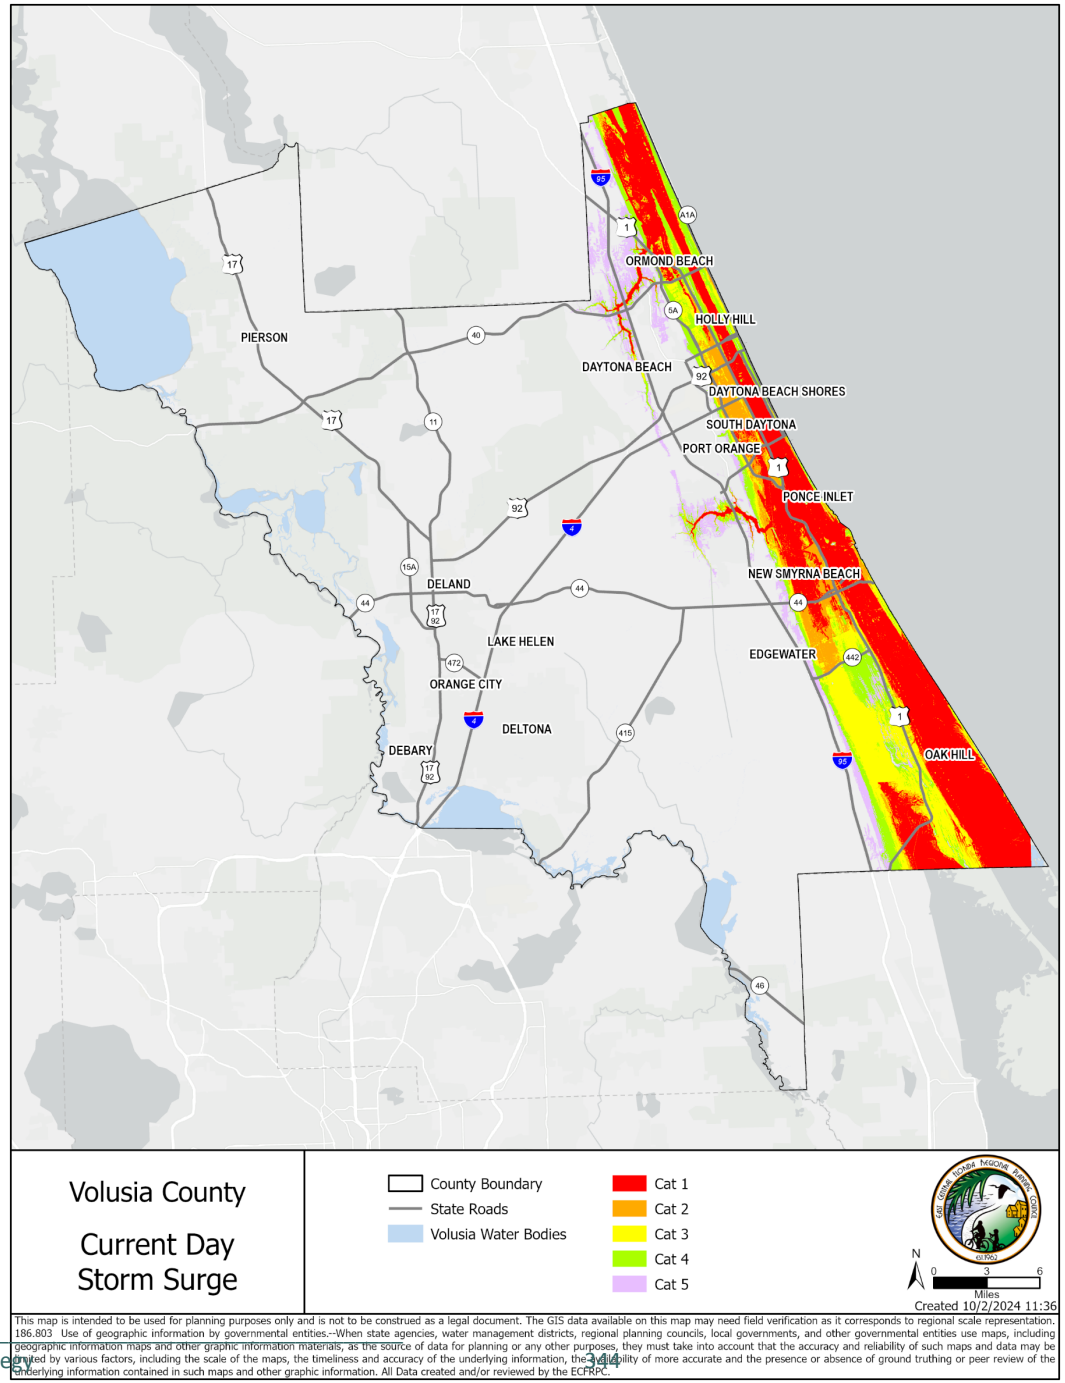
- Volusia County's hazard mitigation planning efforts began in 1997 with the formation of the Volusia Prepares Committee
- First LMS in 1999 (adopted 2000), as part of the Florida Department of Community Affairs LMS Initiative
- The previous version of the LMS, prior to this 2025 version, was updated and adopted in 2020

Overview of LMS & FMP

- Local Mitigation Strategy (LMS) is a 5-year plan that anticipates damage from a disaster to determine how to eliminate or reduce damage.
  - All hazards
  - Whole community
- The Floodplain Management Plan (FMP) is a plan that supports the National Flood Insurance Program to: identify known flood problem areas, establish goals, implement programs, and reduce flood insurance costs.

LMS Updated Goals

Strengthen	GOAL 1: Strengthen effective hazard mitigation programming through policies, regulations, and technology through local government collaborations.
Endeavor	GOAL 2: Local government will endeavor to have resilient critical infrastructure that supports operations before, during, and after disasters.
Encourage	GOAL 3: Encourage economic sustainability within the community.
Enhance	GOAL 4: Enhance the whole community's understanding of the hazards and the techniques used to minimize vulnerability.



LMS & FMP- Project Lists

- Create a Master Initiatives List
- Makes county eligible for the Hazard Mitigation Grant Program (HMGP) funding through Florida's Division of Emergency Management (FDEM) and FEMA
- Grant funds are intended to bring mitigation projects to fruition that would end up on a wish list otherwise.

Community Profile

- Age (2022):
  - Median age for the County was **46.6 years**
  - State median age of **42.7 years** of age
  - Roughly 25% of residents in Volusia are over 65
- Housing (2022):
  - Median value of owner-occupied housing units was **$251,400**
  - **$178,700** average in Florida
  - **$193,500** national average

Image of current day storm surge impacting Volusia County. This map is organized by hurricane category using the SLOSH model (Sea, Lake, and Overland Surges from Hurricanes model is a computer program that estimates storm surge heights caused by tropical cyclones). This map has been approved by FDEM.

Overview of Required Updates

- Community profile has been updated to include most recent census data
- Hazards have been refined to include additional risks and broaden the scope of disasters
- Hazard profiles have been updated to include recent occurrences within the past 5 years
- Vulnerability assessment is being conducted in partnership with Volusia County's Environmental Management and information from the County's Property Appraiser

Overview of Required Updates (Continued)

- Capability assessment will use information collected from surveys
- Mitigation plan and strategies will consist of the Quarter 3 & 4 priority list
- All data and maps are being updated currently

We Need You!

- Public participation is vital to the success of the LMS/FMP
- Understanding individual homeowners' capabilities to withstand and respond to disasters is crucial for county to understand the **NEEDS** of the whole community

APPENDIX E: CRITICAL FACILITY VULNERABILITY ASSESSMENT

This section of the Local Mitigation Strategy cross-references the locations of all critical facilities within Volusia County and its jurisdictions with environmental layers pertaining to the following hazard layers:

- Storm Surge Threat
- Fire Risk Zone
- Wind Risk
- FEMA Flood Zone

There are over 500 critical facilities identified within Volusia County and its jurisdictions. The critical facilities covered in this report cover the following types of facilities.

- Transportation
- Public Buildings
- Waste Water Systems
- Medical Facilities
- Schools
- Educational Facilities

Also covered in this section are **Water and Sewage Treatment Facilities**.

The tables on the following pages depict the critical facilities, by jurisdiction and facility type, that are located within Volusia County, Florida. Each critical facility is cross-referenced with the hazard zones to depict risk for the hazards listed above. This analysis involves numerous sources, such as:

- HAZUS
- National Hurricane Center
- U.S. Forest Service
- FEMA
- American Society of Civil Engineers
- ECFRPC
- Volusia County and Jurisdictions
- FDEP

Table 1: Jurisdictional Summary of Critical Assets

Jurisdiction	Jurisdiction Type	# of Assets	Total Financial Exposure (Assets)	Mean Year Built (Assets)
Volusia County	County	578	$10,940,822,969	1984
Daytona Beach	City	74	$3,407,757,509	1975
Daytona Beach Shores	City	2	$8,741,800	1984

APPENDIX G: HAZARD IDENTIFICATION RISK ANALYSIS (HIRA) CAPABILITY TARGETS

This section of the report details the core capability targets and resource requirements for some natural, man-made, and technological hazards covered in the Local Mitigation Strategy. The tables provided for each hazard are based on the template created as part of the Threat and Hazard Identification and Risk Assessment Guide (Second Edition) created by the U.S. Department of Homeland Security.

The following hazards are covered within this portion of the THIRA analysis:

- Drought
- Extreme Temperatures
- Flood
- HazMat Incident
- Public Health Emergency
- Sea Level Rise
- Severe Weather
- Storm Surge
- Terrorism
- Tornado
- Tropical Cyclone
- Wildland Fire

Drought

Drought	
Context Description	It is the beginning of summer. East central Florida is in a severe drought, as it has not rained in two months in Volusia County. The drought has caused brushfires to start in the western portions of the County. Dehydration-related deaths in the County have reached 10 since January.
Core Capability	
Capability Target	Community Resilience; Prescribed Burns, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Aerial Reconnaissance and GIS Mapping of Fire, Aerial Firefighting Services (Regional, State, Federal), Inter-County Cooperation and Resource Sharing, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Threat/Hazard Identification, Health/Medical Services, Rapid Medical Air Transport
Resource Requirement	
Resources	**Number Required**

Extreme Temperatures

Extreme Temperatures	
Context Description	It is mid-August and temperatures reach 110 degrees Fahrenheit for five straight days. Students returning to school are beginning to be hospitalized for heat stroke and other heat-related illnesses, and multiple elderly residents have passed away as a result of heat stroke.
Core Capability	
Capability Target	Health/Medical Services; Rapid Medical Air Transport; Mass Care Services; Public Info/Warning Systems; Social Media and Media Outreach; School District Coordination with Schools; Medical Training for School Staff Member(s); Intensive Care Unit; Response for Environmental/Health/Safety; Fatality Management; Coordination with the Federal/State Government; Coordination with the Red Cross
Resource Requirement	
Resources	**Number Required**

Flood

Flooding	
Context Description	A large tropical low has formed off of the coast of Florida and has been held stationary by the presence of a low pressure system moving southward from northern Florida for over three days. An estimated 50% of the parcels within Flood Zone 'A' are affected, 50% of the parcels within Flood Zones 'AH', 'AO' and 'AE' are affected, 75% of the parcels within Flood Zone 'VE' are affected, and 1% of the parcels within Flood Zone X (500-Year Floodplain) are affected. The storm affects the building and assessed values of the parcels hit by an estimated 10%.
Core Capability	
Capability Target	Community Resilience, Critical Transportation, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification
Resource Requirement	
Resources	**Number Required**

HazMat Incident

HazMat Incident	
Context Description	A train traveling along the Florida East Coast Railway crashes into Dubious Chemz, a chemical facility located along the Florida East Coast Railway line in unincorporated Volusia County. The train is not carrying hazardous materials, but the impact with the chemical facility triggers a simultaneous release of 26,000 pounds of chlorine stored in the facility into the air. Wind is registered at 5 miles per hour from the east southeast, humidity is 50% and the air temperature is 85 degrees Fahrenheit. The constant chemical leak lasts for exactly one hour, at which point all 26,000 pounds of chlorine have been released.
Core Capability	
Capability Target	Community Resilience, Critical Transportation, Economic Recovery, Response for Environmental/Health/Safety, Fatality Management, Forensics/Attribution, Health/Social Services, Infrastructure Systems, Intelligence/Information Sharing, Interdiction/Disruption, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security and Protection, Operational Communication, Operational Coordination, Planning, Public/Private Services and Response, Health/Medical Services, Public Info/ Warning, Risk Resilience Management, Risk Management Programs, Screen/ Search/ Detect, Situational Assessment, Threat/Hazard Identification
Resource Requirement	
Resources	**Number Required**

Public Health Emergency

Public Health Emergency	
Context Description	An airplane landing at Daytona Municipal Airport carrying 234 passengers becomes overwhelmed by a NLV-like pandemic that sickens 80% of the passenger. After the passengers de-board the plane without a health check, the virus is airborne, has a 20% spread rate (20% of people who come in contact with the infected become infected) and is caught when a person with the sickness comes within 1 foot of a person with the pandemic. Moreover, of the 234 passengers affected with the sickness, those 234 passengers come in contact (or spread the disease) with an average of 7.5 persons per hour. The disease does not inflict casualties until at least 12 to 18 hours after the initial infection period, adding to the number of individuals who can be exposed to the disease from those infected individuals that are still alive.
Core Capability	
Capability Target	Access Control/ID Verification, Community Resilience, Economic Recovery, Response for Environmental/Health/Safety, Fatality Management, Health/Social Services, Intelligence/Information Sharing, Interdiction/ Disruption, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/ Rescue, On-Scene Security and Protection, Operational Communication, Operational Coordination, Physical Protective Measures, Planning, Public/ Private Services and Response, Health/Medical Services, Public Info/ Warning, Risk Resilience Management, Risk Management Programs, Screen/ Search/ Detect, Situational Assessment, Supply Chain Integrity, Threat/Hazard Identification
Resource Requirement	
Resources	**Number Required**

APPENDIX G: HAZARD IDENTIFICATION RISK ANALYSIS (HIRA) CAPABILITY TARGETS

Sea Level Rise

Sea Level Rise	
Context Description	It is the year 2070. A neighborhood located on the barrier islands is beginning to flood frequently due to sea level rise, subsidence and other factors. Property owners are having a hard time selling their properties and the value of the properties is decreasing.
Core Capability	
Capability Target	Pre-Planning as part of the HMGP Program (Demolition, etc.); Sea Level Rise Vulnerability Assessments and Identified Countermeasures; Gray/Green Infrastructure (Sea Walls); Other Protective Measures; Community Resilience; Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction
Resource Requirement	
Resources	**Number Required**

Severe Weather

Severe Weather	
Context Description	A youth sports team is caught in a severe thunderstorm and multiple members of the team are struck by lightning. The sports complex is located in a rural area of west Volusia, not close to any hospital facilities. Some patients need immediate hospital care while others have very minor injuries.
Core Capability	
Capability Target	Health/Medical Services; Rapid Medical Air Transport; Mass Care Services; Mass Search/Rescue; Public Info/Warning Systems; Social Media; National Weather Service Coordination; Regional EMS Support; Inter-Local Agreements for Medical Response; Intensive Care Unit; Medical Specialists
Resource Requirement	
Resources	**Number Required**

Storm Surge

Storm Surge	
Context Description	A Category 3 Hurricane hits Volusia County, affecting a large portion of the county with storm surge damage. An estimated 60% of the parcels within the Category 1 Storm Surge zone are affected, 45% of the parcels within the Category 2 zone are affected, 30% of the parcels within the Category 3 zone are affected, 2% of the parcels within the Category 4 zone are affected and 1% of the parcels within the Category 5 zone are affected.
Core Capability	
Capability Target	Community Resilience, Critical Transportation, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification
Resource Requirement	
Resources	**Number Required**

Terrorism

Terrorism	
Context Description	A terrorist of unknown domestic or international origin detonates an explosive at the Daytona 500 car race while attendees are exiting the stadium. There are immediate casualties, both fatal and non-fatal, including fatal injuries to the perpetrator. It is unknown whether or not the perpetrator acted alone.
Core Capability	
Capability Target	Federal Coordination of Assets and Intelligence (FBI, CIA); State Coordination of Assets and Intelligence (FDLE); Regional Coordination of Assets and Equipment (CFIX); COOP Planning; Economic Recovery Planning; Mass Care Services; Mass Search/Rescue; On-Scene Law Enforcement Response; Health/Medical Services; Physical Protective Measures; Public Information; Coordination through the Media, Social Media and Law Enforcement; Operational Communication, Operational Coordination
Resource Requirement	
Resources	**Number Required**

Tornado

Tornado	
Context Description	A Category 3 Hurricane spawns several F1 tornadoes near the Ponce Inlet area. 100% of the parcels that are directly hit by the tornado are affected with 100% damage (as a percentage of building value), 50% of the parcels within 1/8 of a mile are affected with 75% damage, 20% of the parcels closer than 1/4 mile but farther than 1/8 mile away are affected with 20% damage, 5% of the parcels closer than 1/2 mile but farther than 1/4 mile away are affected with 2% in damage, and 1% of the parcels father than 1/2 mile away but less than one mile away are affected with minor, variable damage.
Core Capability	
Capability Target	Community Resilience, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification
Resource Requirement	
Resources	**Number Required**

Tropical Cyclone

Tropical Cyclone	
Context Description	A Category 3 Hurricane hits Volusia County from the Atlantic Ocean, affecting a large portion of the county with wind damage. An estimated 60% of the parcels within the 111-115 Wind Zone are affected, while 25% of the parcels within the 106-110 Wind Zone and 10% of the parcels within the 105-110 Wind Zone are affected.
Core Capability	
Capability Target	Community Resilience, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification
Resource Requirement	
Resources	**Number Required**

Wildland Fire

Wildland Fire	
Context Description	A wildfire spawns and spreads within a 'Very High Risk' area within Volusia County. The fire spreads, and as a result, 1% of the parcels within the 'Very High Risk' zone are affected, 0.5% of the parcels within the 'High Risk' zone are affected, 0.25% of the parcels within the 'Low Risk' zone are affected, and 0.1% of the parcels within the 'No Risk' or 'None' zone are affected. The fire affects parcels uniformly across hazard zones.
Core Capability	
Capability Target	Community Resilience, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/ Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification; Prescribed Burns
Resource Requirement	
Resources	**Number Required**

RESOLUTION NO. 14-25

A RESOLUTION OF THE CITY OF NEW SMYRNA BEACH ACCEPTING AND ADOPTING THE JANUARY 2025 MULTI-JURISDICTIONAL LOCAL MITIGATION STRATEGY; PROVIDING FOR CONFLICTING RESOLUTIONS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of New Smyrna Beach is vulnerable to an array of natural hazards that can cause the loss of life and damages to public and private property; and

WHEREAS, the City of New Smyrna Beach desires to seek ways to mitigate situations that may aggravate such circumstances; and

WHEREAS, the development and implementation of a local mitigation strategy can result in actions that reduce the long-term risk to life and property from natural hazards; and

WHEREAS, it is the intent of the City Commission to protect its citizens and property from the effects of natural hazards by preparing and maintaining a local mitigation strategy; and

WHEREAS, it is also the intent of the City Commission to fulfill its obligation under Section 322: Mitigation Planning, of the Robert T. Stafford Disaster Relief and Emergency Assistance Act to remain eligible to receive certain types of federal assistance in the event of a declared disaster affecting the City of New Smyrna Beach; and

WHEREAS, Volusia County originally facilitated the development of a multi-jurisdictional local mitigation strategy that includes New Smyrna Beach in the year 2000 with input from the appropriate local and state officials; and

WHEREAS, Volusia County facilitated the update of the multi-jurisdictional local mitigation strategy in 2009 that includes the City of New Smyrna Beach with input from the appropriate local and state officials; and

WHEREAS, Volusia County facilitated the update of the multi-jurisdictional local mitigation strategy in 2020 that includes the City of New Smyrna Beach with input from the appropriate local and state officials; and

WHEREAS, the Florida Division of Emergency Management and the Federal Emergency Agency have revised the updated local mitigation strategy prepared for the City of New Smyrna Beach for legislative compliance and has approved the plan pending the completion of local adoption procedures.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF NEW SMYRNA BEACH, FLORIDA:

SECTION 1: That the City of New Smyrna Beach hereby accepts and adopts the January 2025 Multi-Jurisdictional Local Mitigation Strategy.

SECTION 2: That the City agrees to take such other official action as may be reasonably necessary to carry out the proposed actions of the Plan.

SECTION 3: That all other resolutions or parts thereof that are in conflict with this resolution are hereby rescinded and repealed.

SECTION 4: That this resolution shall take effect immediately upon its final adoption.

APPROVED AS TO FORM AND CORRECTNESS:

Carrie Avallone

CARRIE AVALLONE
City Attorney

DATE: 5/19/2025

THE CITY OF NEW SMYRNA BEACH - DEVELOPMENTAL SERVICES

CONSIDER THE APPROVAL OF CONTRACT RENEWALS FOR ENGINEERING SERVICES FOR MARINE APPLICATIONS FOR DREDGING & MARINE CONSULTANTS, LLC AND TAYLOR ENGINEERING.

May 27, 2025

Background:

The City entered into agreements for Professional Engineering Services for Marine Applications on June 29th, 2016 with Dredging & Marine Consultants, LLC (DMC) and Taylor Engineering. These two (2) firms were selected in response to Request for Qualifications (RFQ) 04-16-ENG.

The agreements with each firm were for a term of five years, with the option for up to five possible one-year renewals based on satisfactory performance. The one-year renewal contracts are set to expire at the end of June 2025. The two (2) firms have successfully performed professional Engineering Services for Marine services for the City over the past five years, and currently have assignments that are expected to continue into 2026. If approved, this renewal would be the fifth and final of the five optional one-year renewals.

Findings:

Staff recommends the City Commission approve one-year contract renewals with Dredging & Marine Consultants, LLC. and Taylor Engineering, Inc.

Fiscal Analysis:

Each work order is dependent upon the requested services and will be charged based on the fee structure provided by each firm in their proposal. The funding for the consultants is budgeted under other professional services line # 001.51.515.51501.551001.

Strategic Plan Item:
No

REQUEST FOR QUALIFICATIONS

The City of New Smyrna Beach is accepting sealed qualifications for **RFQ 04-16-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS ONLY.** All Requests for Qualifications must be received at City Hall, 210 Sams Avenue, New Smyrna Beach, Florida, no later than 3:00 pm March 29, 2016, at which time all RFQ will be publicly opened and the name of each proposer or Professional Consultant shall be read aloud, per Florida Statute 119.071(1)(b)(3).

Sealed qualifications received after the designated time will be returned unopened.

There will be no pre-qualification meeting for this RFQ.

Qualification documents are available electronically. For further information, please contact Purchasing Coordinator, Carole Wimmer via email at cwimmer@cityofnsb.com.

All questions must be sent by e-mail to cwimmer@cityofnsb.com. Only written responses to written questions will be considered official, and will be included as part of the RFQ as an addendum.

RFQ proposal documents shall be sealed in an envelope and plainly marked, **"RFQ 04-16-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS ONLY."**

The City reserves the right to accept or reject any or all RFQ proposals (in whole or in part) with or without cause, to waive technicalities, irregularities or informalities, or to accept an RFQ which in its judgment best serves the City. Criteria utilized by the City for determining the most responsible qualifier(s) includes, but is not limited to, whether the qualifier meets the City's published specifications; the qualifier's experience, skill, ability, financial capacity; and any other factors which could reasonably be asserted as being relevant to successful performance.

REQUEST FOR QUALIFICATIONS
RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS ONLY

1. INTRODUCTION/OVERVIEW

A. Purpose/Objective

Pursuant to the Consultants Competitive Negotiation Act (CCNA) 287.055, the City of New Smyrna Beach (herein after, "City") has issued this Request for Qualifications (hereinafter, "RFQ") with the sole purpose and intent of obtaining qualifications from interested and qualified firms, licensed to do business in the State of Florida, offering to provide Continuing Professional Engineering Services for Marine Applications only, in accordance with the specifications stated and/or attached herein/hereto. The successful proposer(s) will hereinafter be referred to as "Professional Consultant".

If awarded, a contract to provide these services shall be effective on the date it is approved by the City of New Smyrna Beach, City Commission (herein after, the "Commission"), signed by all required parties and filed with the City Clerk. The term of the contract shall be for five (5) years, unless terminated earlier, as provided herein. At the option of the parties, this Agreement may be renewed for five (5) additional one (1) year terms.

As is more fully explained in Section "5E" of this RFQ (Qualification Evaluation Committee and Evaluation Factors), an award, if made, will be made to the best overall Professional Consultant(s) whose qualifications proposal is most advantageous to the City, taking into consideration the evaluation factors set forth in this RFQ. The City will not use any other factors or criteria in the evaluation of the qualifications received.

B) Background

There are approximately 28 shoreline miles within the City limits including both private and publicly maintained facilities. This includes a City owned and maintained Marina, several boat ramps that facilitate commercial & residential watercraft, an array of Park features over and into tidally influenced waters, floating docks, pump out stations, static docks and boardwalks for recreational activities. The infrastructure being exposed to an aggressive environment periodically needs to be analyzed and replaced as well as any expansion of the amenities will require a Professional Consultant familiar with funding options, permitting requirements and the latest technical expertise associated with marine applications.

New Smyrna Beach is approximately 38 square miles in size and serves a population of approximately 23,000. The City's fiscal year begins on October 1st and ends on September 30th. The Finance Department maintains the funds and accounts of the City. The Finance Department is responsible for the custody and accounting of funds of each department. The Comprehensive Annual Financial Report for City of New

Smyrna Beach for the Fiscal Year ended September 30, 2014 can be found on the City's website, http://www.cityofnsb.com.

The City was created in 1887 by adoption of its first charter, which was eventually replaced by the present charter through Chapter 224.08, Special Acts of Florida, 1943. The legislative branch of the City is composed of an elected five-member City Commission consisting of the Mayor and four commissioners. The City Commission is governed by the City Charter and by state and local laws and regulations. In addition, the City includes as a part of the annual financial report the fiscal information of the City of New Smyrna Beach Utilities Commission, a component unit of the City, which has been discretely reported in accordance with the financial statement presentation Standards No. 39 "Determining Whether Certain Organizations Are Component Units – an amendment of GASB Statement No. 14".

The City of New Smyrna Beach operates under a Commission-Manager form of government and provides a full range of municipal services including: general government administration, law enforcement and fire protection, community redevelopment, stormwater management, sanitation and solid waste, as well as construction and maintenance of infrastructure, recreational, and other cultural facilities. The City also operates a municipal airport, golf course, and marina.

C) Inquiries

Direct questions related to this RFQ to Carole Wimmer, Purchasing Coordinator, in writing to cwimmer@cityofnsb.com. Please include the heading and paragraph letter or number for each question in order to ensure that questions asked are responded to correctly.

Professional Consultants must clearly understand that the only official answer or position of the City will be the one stated in writing by cwimmer@cityofnsb.com. All questions must be submitted in writing, and will be posted, along with the answers, as an addendum to this solicitation, and electronically distributed to firms registered for this solicitation and posted on Onvia DemandStar.

D) Method of Source Selection

The City of New Smyrna Beach is using the Competitive Sealed Qualifications methodology of source selection for this procurement, as authorized by the City Purchasing Policy.

The City may, as it deems necessary, conduct discussions with responsible Professional Consultants determined to be in contention for being selected for award for the purpose of clarification to assure full understanding of, and responsiveness to solicitation requirements.

E) Pre-Proposal Conference

☒ A pre-proposal conference is not applicable for this solicitation.

F) Schedule of Events

The following projected timetable should be used as a working guide for planning purposes only. The City reserves the right to adjust this timetable as required during the course of the RFQ process.

Event	Date
Issue RFQ Notice	February 27, 2016
Last Date for Receipt of Written Questions	March 10, 2016 @ 5:00 pm
Addendum Issued (If Applicable)	March 15, 2016
Qualifications Proposal Opening Date	March 29, 2016 @ 3:00 pm
Evaluation of Qualification Submittals	April 4-5, 2016 @ 10:00am
Notification of Recommendation	April 12, 2016
Commission Action	April 26, 2016

2) GENERAL REQUIREMENTS

The objective of this solicitation is to obtain the services of consultants with the capability to provide professional engineering services for marine application only. The selected firm(s) will be responsible for reviewing existing City of New Smyrna Beach Codes, Resolutions/ Ordinances and all applicable State of Florida Codes, as well as incorporating the information into complete documents including final plans (working drawings), technical specifications, construction estimates and related bid documents necessary for the bidding and construction of marine oriented projects. The City reserves the right to utilize the firm to provide any facet of the improvement process including design, construction administration, inspection services only, value engineering, etc.

The City has other engineering consultants, awarded under other public solicitations. This solicitation is not intended to address or override those existing contracts. This RFQ is for marine application only.

A) MINIMUM QUALIFICATIONS

- The selected firms shall be registered engineering firms licensed with the State of Florida. All professional services shall be performed under the direction of a professional registered with the State of Florida with specific experience in the field of maritime engineering.

- The firm or team shall be licensed in accordance with Florida Statutes, Chapter 287(h).

- The selected firms must be able to provide proof of stable financial stability for the past three (3) years;

- Team Project Manager must be licensed in the State of Florida as a Professional Engineer and have a minimum of seven (7) years of experience in engineering, planning, and have served as project manager on similar projects

on a minimum of three (3) previous occasions;

- Team Members and sub-consultants must be licensed in the State of Florida and have a minimum of three (3) years of experience in providing engineering, planning or services as noted in this solicitation.

- Firms shall provide examples of no less than three (3) previous projects locating funding opportunities, working with programs such as Florida Inland Navigational District (FIND), Water Ward, Clean Vessel Act, etc., as well as working with grant and permitting agencies.

- Firms shall provide no less than three (3) examples of budgets and timelines showing the original budget and timelines and the associated actual budgets and timelines.

All work will normally be performed by the Professional Consultant at an off-site location (not in the City's offices). The Professional Consultant will be required to provide their own equipment.

The City and the firm(s) shall negotiate project terms per Florida Statute 287.055. A purchase order or similar document will be issued for each project. Any professional services not listed below will be for projects that do not exceed $2,000,000 in basic construction costs or $200,000 for professional services pursuant to Florida Statute 287.055.

B) Purpose/Intent

The City of New Smyrna Beach (City), pursuant to the "Consultants' Competitive Negotiation Act" (CCNA), Section 287.055, Florida Statutes, which governs the acquisition of professional engineering, landscaping, architectural, and surveying and mapping services, and as may be amended, hereby requests Qualification and Performance Data from Professional Consultants practicing in the following types of work categories: (Firms do not have to have each discipline on staff and may utilize a team approach for general and specific projects, but in no case shall less than 70% of the contract work be performed by the professional Consultant. The licensed Professional Consultant shall be an employee of the prime firm.)

1. Dredging and Marine Design and Permitting

2. Site Development Improvements associated with marine facilities, including but not limited to storm water, water and sewer, and structure (i.e. boardwalk, dock, restroom, pavilion, etc.) enhancements.

3. Seawall design and construction administration

4. Boat ramp, floating dock, and similar projects

5. Other as required

C) Instructions

Proposers will have the option of submitting qualifications for one (1) or any combination of professional engineering consulting work types listed above.

Firms and individuals (hereinafter "Professional Consultant") shall be duly licensed and registered to practice in the State of Florida, and desire to render such services to the City. This work may include permitting, bidding services, construction administration, and all related miscellaneous services.

Florida law requires the City to make a determination of a consultant's qualification to perform professional engineering. The information in the RFQ (qualification package) will be used by the City to make this determination. Additionally, evaluation points will be assigned to information contained in the package to aid in reducing the total number of submittals to no less than three firms (short list).

D) Interpretations

Any questions concerning this RFQ should be submitted in writing to: Carole Wimmer, City of New Smyrna Beach, 210 Sams Avenue, New Smyrna Beach, FL 32168 or cwimmer@cityofnsb.com. Responses to inquiries will answered via an Addendum, e-mailed to vendors who have submitted questions, or have contacted the City regarding the solicitation, and posted on Onvia DemandStar. It is the responsibility of the proposer to review responses.

E) Clarification and addenda to RFQ Specifications

If any Professional Consultant contemplating submitting a response under this Request for Qualifications RFQ 04-16-ENG is in doubt as to the true meaning of the specifications or other documents or any part thereof, the Professional Consultant shall submit to the City, prior to the deadline for questions, February 29 at 5:00 PM EST, a request for clarification. All such requests for clarification must be made in writing, and the person submitting the request will be responsible for its timely delivery. All responses will be issued as an Addendum, e-mailed to vendors who have submitted requests for clarification, or questions, and posted on Onvia DemandStar, per the timeline listed on this RFQ.

Any interpretation of the RFQ, if made, will be made only by an addendum duly issued by the City. The City shall issue an informational addendum if clarification or minimal changes are required. The City shall issue a formal addendum if there are substantial changes which impact the technical submission of the RFQ. A copy of such addendum will be posted on DemandStar. In the event of conflict with the original RFQ documents, the addendum shall govern all other RFQ and contract documents to the extent specified. Subsequent addenda shall govern over prior addenda only to the extent specified.

F) Awards

The City reserves the right to reject any or all responses, or any portion thereof,

deemed necessary for the best interest of the City. All awards made as a result of this RFQ shall conform to applicable Florida Statutes. The City is not responsible for any expenses incurred by a Professional Consultant in preparing and submitting an RFQ or related documents.

G) RFQ Opening

Responses to this RFQ shall be opened and publically read March 29, 2016 at 3:00 pm at City Hall, 210 Sams Avenue, New Smyrna Beach, FL 32168. All responses received aft 3:00 shall be returned, unopened.

3) CITY'S RIGHT TO INSPECT - N/A

4) TERMS AND CONDITIONS OF CONTRACT

The City has developed standard contracts/agreements. The selected Professional Consultant(s) shall be required to sign a standard City contract within twenty-one (21) days of Notice of Selection for Award.

A contract resulting from this RFQ shall be subject to the terms and conditions set forth in a standard City contract. The City reserves the right to include in any contract document such terms and conditions as it deems necessary for the proper protection of the rights of the City. The City shall not be obligated to sign any contracts, maintenance and/or service agreements or other documents supplied by the Professional Consultant.

5) INSTRUCTIONS FOR STATEMENT OF QUALIFICATIONS

A) Compliance with the RFQ

Qualifications must be in strict compliance with this RFQ. Failure to comply with all provisions of the RFQ may result in disqualification.

B) Acknowledgment of Insurance Requirements

By signing the Insurance Requirements included in this RFQ, Professional Consultant acknowledges these conditions include Insurance Requirements.

It should be noted by the Professional Consultant that, in order to meet the City's requirements, there may be additional insurance costs to the Professional Consultant's firm. It is, therefore, imperative that the Professional Consultant discuss these requirements with the Professional Consultant's insurance agent, as noted on the Insurance Check List, so that allowances for any additional costs can be made by the Professional Consultant.

The Professional Consultant's obligation under this provision shall not be limited in any way by the agreed upon contract price, or the Professional Consultant's limit of, or lack of, sufficient insurance protection.

Professional Consultant also understands that the evidence of required insurance may be required within five (5) business days following notification of its offer being accepted; otherwise, the City may rescind its acceptance of the Professional Consultant's qualification.

The specific insurance requirements for this solicitation are included as part of this solicitation.

C) Acknowledgment of Bonding Requirements

By signing its Proposal, and if applicable, Professional Consultant acknowledges that it has read and understands the bonding requirements for this qualification. Requirements for this solicitation are checked.

☒ Not Applicable

☐ Bid Bond: Shall be submitted with qualification response in the form of certified funds, cashiers' check, or an irrevocable letter of credit, a cash bond posted with the City Clerk, or bid bond in a sum equal to 5% of the cost bid. All checks shall be made payable to the City of New Smyrna Beach on a bank or trust company located in the State of Florida and insured by the Federal Deposit Insurance Corporation.

The Bid Bond shall be retained by the City as liquidated damages if the successful Professional Consultant fails to execute and deliver to the City the unaltered contract, or fails to deliver any required Performance and Payment Bonds or Certificates of Insurance, all within twenty-one (21) calendar days after receipt of the Notice of Selection for Award. Bid Bonds shall be executed by a corporate surety licensed under the laws of the State of Florida to execute such bonds, with conditions that the surety will, upon demand, forthwith make payment to the City upon said bond. The Bid Bonds of the three (3) highest ranked Professional Consultants shall be held until the contract has been executed by the successful Professional Consultant and same has been delivered to the City together with the required bonds and insurance, after which all three (3) Bid Bonds shall be released to the respective Bidders. All other Bid Bonds shall be released within fourteen (14) calendar days of the Evaluation Committee meeting date. No bids including alternates shall be withdrawn within one hundred and eighty (180) days after the qualification closing date thereof. If a qualification is not accepted within said time period it shall be deemed rejected and the Bid Bond shall be released to the Professional Consultant. In the event that the City awards the contract prior to the expiration of the one hundred and eighty (180) day period without selecting any or all alternates, the City shall retain the right to subsequently award to the successful Professional Consultant said alternates at a later time and approved by the Finance Director or designee, and the successful Professional Consultant.

☐ Performance and Payment Bonds: For projects in excess of $200,000, bonds shall be submitted with the executed contract by Professional Consultants receiving award, and written for 100% of the Contract award amount, the cost borne by the Professional Consultant receiving an award. The Performance and Payment Bonds shall be underwritten by a surety authorized to do business in the State of Florida and

otherwise acceptable to Owner; provided, however, the surety shall be rated as "A-" or better as to general policy holders rating and Class V or higher rating as to financial size category and the amount required shall not exceed 5% of the reported policy holders' surplus, all as reported in the most current Best Key Rating Guide, published by A.M. Best Company, Inc. of 75 Fulton Street, New York, New York 10038.
Should the contract amount be less than $500,000, the requirements of Section 287.0935, F.S. shall govern the rating and classification of the surety.

All performance security under the subsequent contract shall be in force throughout the final completion and acceptance of the project awarded.

If the surety for any bond furnished by Contractor is declared bankrupt, becomes insolvent, its right to do business is terminated in the State of Florida, or it ceases to meet the requirements imposed by the Contract Documents, the Contractor shall, within five (5) calendar days thereafter, substitute another bond and surety, both of which shall be subject to the Owner's approval.

D) Delivery of Request for Qualifications (RFQ)

To be considered,

- one (1) original, unbound paper version, marked "Original,"
- three (3) copies, marked "Copy 1 of 3, 2 of 3, etc.,"
- one (1) electronic copy of the RFQ proposal on a USB flash drive

must be received by the Purchasing Coordinator in the Finance Department, City of New Smyrna Beach, 210 Sams Ave, New Smyrna Beach, Florida, 32168, on or before **Tuesday, March 29, 2016 at 3:00 pm.**

RFQ responses shall be submitted in sealed envelopes and clearly identified as **" RFQ 04-16-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS"** referenced on the outside of the envelope. All RFQ proposals received after the specified time and date will not be accepted. The City shall not be responsible for late deliveries or mail delays. The City of New Smyrna Beach reserves the right to reject any or all RFQ proposals submitted. During the evaluation process, additional information or clarifications from Professional Consultants may be required. List the RFQ Number on the outside of the box or envelope and note "Request for Qualifications enclosed." See Request for Qualifications Label, attached.

The City of New Smyrna Beach reserves the right to retain all RFQ proposals submitted regardless of whether that proposal is selected. Submission of a proposal indicates acceptance by the firm of the conditions contained in this request for qualifications, unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of New Smyrna Beach and the firm selected.

There is no expressed or implied obligation for the City of New Smyrna Beach to reimburse responding firms for any expenses incurred in preparing proposals in response to this request.

All Requests for Qualifications are to be delivered before 3:00 p.m., local time, on or before March 29, 2016 to:

City of New Smyrna Beach
Finance Department
2nd Floor
210 Sams Avenue
New Smyrna Beach, Florida 32168

The City shall not bear the responsibility for Requests for Qualifications delivered to the Finance Department past the stated date and/or time indicated, or to an incorrect address by Professional Consultant's personnel or by the Professional Consultant's outside carrier. However, the Purchasing Coordinator, or designee, shall reserve the right to accept qualifications received after the posted close time only under the following condition:
The tardy submission of the qualification is due to the following circumstances, which shall include but not be limited to: late delivery by commercial carrier such as Fed Ex, UPS, DHL, or courier where delivery was scheduled before the deadline.

RFQ Opening: RFQ Proposals shall be opened and the name of the submitters shall be read publically. No discussion of the Proposals will occur at this time.

E) Evaluation of Requests for Qualifications

After qualifications opening has been completed, the Evaluation Committee shall review and score each Qualification individually, based on the evaluation criterion set forth in 5E of this proposal.

The committee may schedule presentations or demonstrations from top-ranked firm(s) and obtain guidance from third party subject matter experts. The final recommendation will be decided based on review of scores and consensus of the committee.

The City reserves the right to withdraw this RFQ at any time and for any reason, and to issue such clarifications, modifications, and/or amendments as it may deem appropriate.

Receipt of a qualification by the City or a submission of a proposal to the City offers no rights upon the Professional Consultant nor obligates the City in any manner. Acceptance of the qualification does not guarantee issuance of any other governmental approvals.

Technical Evaluation Criteria:

The Evaluation Committee will first evaluate and rank responsive proposals on the criteria listed below. The criteria are itemized with their respective weights for a maximum total of 100 points. A list of a minimum of three (3) firms will be developed and advanced to the City Commission. A proposer may receive the maximum points or a portion of this score, depending upon the merit of its proposal, as evaluated by the committee, in accordance with the following.

Qualifications of the: • Firm • Project Manager • Support Staff	**40**
Experience: Provide examples of no less than three (3) previous projects working with: • Grant and permitting agencies • Site development projects • Original budget vs. actual budget • Estimated timelines vs. actual timelines • Project manager's management capabilities	**40**
References: • Recent experience in similar work Verification and reference responses	**20**
Grand Total	**100**

F) Ambiguity, Conflict, or Other Errors in the RFQ

If a Professional Consultant discovers any ambiguity, conflict, discrepancy, omission, or other error in the RFQ, Professional Consultant shall immediately notify the Purchasing Coordinator, noted herein, of such error in writing and request modification or clarification of the document. The Purchasing Coordinator will make modifications by issuing a written revision, posting the revision on Onvia/DemandStar, and providing written notice to all parties who have received this RFQ from the Finance Department. No interpretation shall be considered binding unless provided in writing by the City of New Smyrna Beach.

The Professional Consultant is responsible for clarifying any ambiguity, conflict, discrepancy, omission, or other error in the RFQ prior to submitting the qualification or it shall be waived.

G) Qualification, Presentation, and Protest Costs

The City will not be liable in any way for any costs incurred by any Professional Consultant in the preparation of its qualification in response to this RFQ, nor for the presentation of its qualification and/or participation in any discussions, negotiations, or, if applicable, any protest procedures.

H) Acceptance or Rejection of Requests for Qualification

The right is reserved by the City to waive any irregularities in any qualification, to reject any or all qualifications, to re-solicit for qualifications, if desired, and upon recommendation and justification by the City to accept the qualification which in the judgment of the City is deemed the most advantageous for the public and the City.

Any qualification which is incomplete, conditional, obscure, or which contains irregularities of any kind, may be cause for rejection. In the event of default of the successful Professional Consultant, or their refusal to enter into the City contract, the City reserves the right to accept the qualification of any other Professional Consultant or to re-advertise using the same or revised documentation, at its sole discretion.

I) Requests for Clarification of Qualifications

Requests by the Purchasing Coordinator to a Professional Consultant(s) for clarification of qualification(s) shall be in writing. Professional Consultant's failure to respond to request for clarification may deem Professional Consultant to be non-responsive, and may be just cause to reject its qualification.

J) Validity of Qualifications

No qualification can be withdrawn after it is filed, unless the Professional Consultant makes their request in writing to the City prior to the time set for the closing of Qualifications.

All qualifications shall be valid for a period of one hundred eighty (180) days from the submission date to accommodate evaluation and selection process.

K) Response Format

The qualification shall be deemed an offer to provide services to the City. In submitting a qualification, the Professional Consultant declares that he/she understands and agrees to abide by all specifications, provisions, terms and conditions of same, and all ordinances and policies of the City. The Professional Consultant agrees that if the contract is awarded to him/her, he/she will perform the work in accordance with the provisions, terms and conditions of the contract.

To facilitate the fair evaluation and comparison of qualifications, all qualifications must conform to the guidelines set forth in this RFQ.

Any portions of the qualification that do not comply with these guidelines must be so noted and explained in the Acceptance of Conditions section of the qualification. However, any qualification which contains such variances may be considered non-responsive.

Qualifications should be prepared simply and economically, providing a straightforward concise description of the Professional Consultant's approach and

ability to meet the City's needs, as stated in the RFQ. All copies of the qualification should be bound and tabbed for uniformity and ease of handling. The utilization of recycled paper for qualification submission is strongly encouraged.

The one (1) hard copy original, three (3) hard copy copies, and one (1) electronic thumb drive copy of RFQ submittal(s) for each professional consultant work-type category shall be secured in a tabbed booklet with a table of contents. Booklets shall be no larger than a 1-1/2" three-ring binder or equivalent and be presented in the following order:

Tab 1: Qualifications of Firm

- Provide evidence of current license and registration to perform the specified services in the State of Florida.
- Provide insurance certifications, including Longshoreman and Builders Risk, if applicable. Also required is Errors and Omissions or Professional Malpractice Coverage.
- Location of office where majority of work will be performed.
- Provide an overview of the firm, including number of years in business, number of personnel, and other pertinent information, expertise, credentials (resumes or curriculum vitae) and introduction of the proposed team member(s). Please identity the intended Project Manager who would be assigned to perform the specified services for the City, and provide examples of his/her management capabilities.
- Statement of Professional Consultant's commitment/ability to consistently use the same personnel throughout the project.
- Is firm a certified minority business enterprise, as defined by the Florida Small and Minority Business Assistance Act?
- Provide demonstration/summary of Professional Consultant's workload/performance capability to meet budget and time requirements, and ability to perform the work as and when requested by the City.

Tab 2: Experience

- Provide documentation/summary of experience of no less than three (3) previous projects for <u>each</u> of the items below.
    - Grant, regulatory, and permitting agencies
    - Site development projects
    - Original budget vs. actual budget
    - Estimated timelines vs. actual timelines
    - List of projects and clients where similar work has recently been performed, including a description of each project, with a brief statement of the project approach.
    - Summary statement of all citations, violations, and litigation existing or continuing within the last three (3) years, including the disposition or current status of them.

Tab 3: Client References

- Provide a listing of a minimum of five (5) of the company's projects/customers similar in size and scope to the services described in the RFQ, both present and past customers. If applicable, please list examples of services rendered in the State of Florida, particularly within municipalities. This list must include complete and current addresses, contact person(s), e-mail addresses, telephone and fax numbers, and length of contract.

Tab 4: Other

- Firm may provide other qualifications/performance data for consideration.
- List of ongoing projects either in the design or construction phase.

Each RFQ package submitted shall be signed by the individual Professional Consultant or his/her authorized principals of the Professional Consultant's firm if other than an individual. The RFQ submittal shall be signed by a representative who is authorized to contractually bind the qualifier.

All attachments to the Request for Qualifications and Performance Data requiring execution by the Consultant must be executed and returned with the submittal.

All RFQ submittals must be delivered as specified. Any attachments must be clearly identified as per "Tab Format" requirements. To be considered, the Professional Consultant must respond to all parts of the RFQ. Any other information thought to be relevant, but not applicable to the enumerated categories, should be provided as an appendix to the RFQ submittal. If publications are supplied by the Professional Consultant to respond to a requirement, the response should include reference to the document number and page number. This will provide quick reference for the evaluation committee. RFQ submittals not providing this reference will be considered to have no reference material included in the additional documents.

Sub consultants (if applicable) licenses and detailed information is not required at the time of this RFQ, however, will be required prior to them working on any specific project for the City.

6) GENERAL TERMS AND CONDITIONS

A) Licenses

The Contractor is required to possess the correct occupational license, professional license, and any other authorizations necessary to carry out and perform the work required by the project pursuant to all applicable Federal, State and Local Law, Statute, Ordinances, and rules and regulations of any kind. If required and/or requested, copies of the required licenses must be submitted with the qualification response indicating that the entity proposing, as well as the team assigned to the City account, are properly licensed to perform the activities or work included in the contract documents. A Contractor, with an office within the City is also required to have a business tax receipt and certificate of use.

B) Principals/Collusion

By submission of this Qualification, the undersigned, as Proposer, does declare that the only person or persons interested in this Qualification as principal or principals is/are named therein and that no person other than therein mentioned has any interest in this Qualification or in the contract to be entered into; that this Qualification is made without connection with any person, company or parties making a Qualification, and that it is in all respects fair and in good faith without collusion or fraud.

C)Taxes

The City is exempt from Federal Excise and State of Florida Sales Tax.

D) Relation of City

It is the intent of the parties hereto that the Contractor shall be legally considered an independent Contractor, and that neither the Contractor nor their employees shall, under any circumstances, be considered employees or agents of the City, and that the City shall be at no time legally responsible for any negligence on the part of said Contractor, their employees or agents, resulting in either bodily or personal injury or property damage to any individual, firm, or corporation.

E) Term Contracts

If funds are not appropriated for continuance of a term contract to completion, cancellation will be accepted by this Contractor on thirty (30) days prior written notice.

F) Termination

Should the Contractor be found to have failed to perform his services in a manner satisfactory to the City, the City may terminate this Agreement immediately for cause; further the City may terminate this Agreement for convenience with a thirty (30) day written notice. The City shall be sole judge of non-performance.

G) Liability

Neither party will be held responsible for failure to complete contract due to causes beyond its control, including, but not limited to, work stoppage, fires, civil disobedience, riots, rebellions, Acts of Nature and similar occurrences making performance impossible or illegal.

The Contractor shall hold and save the City of New Smyrna Beach, its officers, agents, and employees harmless against claims by third parties resulting from the Contractor's or suppliers breach of contract or negligence, including all attorney's fees and costs, and shall pay any and all damages, fees, and costs assessed on behalf of the City. The City expressly reserves all rights, privileges, and benefits of sovereign immunity.

H) Assignment

The Contractor(s) shall not assign, transfer, convey, sublet or otherwise dispose of this contract, or of any or all of its rights, or interest therein, or his or its power to execute such contract to any person, company or corporation without prior written consent of the City.

I) Lobbying

All firms are hereby placed on **NOTICE** that the City does not wish to be lobbied, either individually or collectively about a matter for which a firm has submitted a Qualification.

During the qualification process, **from Qualification announcement to final Commission approval**, no firm or its agent shall contact any other employee of the City in reference to this Qualification, with the exception of the Purchasing Coordinator. Failure to abide by this provision may serve as grounds for disqualification for award of this contract to the firm.

J) Single Qualification

Each Professional Consultant must submit, with their qualification, the required forms included in this RFQ. Only **one** qualification from a legal entity as a primary will be considered. A legal entity that submits a qualification as a primary or as part of a partnership or joint venture submitting as primary may not then act as a sub-consultant to any other firm submitting under the same RFQ.

All submittals in violation of this requirement will be deemed non-responsive and rejected from further consideration.

K) Public Entity Crime

A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit qualifications, or contract to provide any goods or services to a public entity; may not submit a bid, bid, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, bids, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity for a period of 36 months following the date of being placed on the convicted vendor list.

L) Conflict of Interest

Professional Consultant shall complete the Conflict of Interest Affidavit included as an attachment to this RFQ document. Disclosure of any potential or actual conflict of interest is subject to City staff review and does not in and of itself disqualify a firm from consideration.

These disclosures are intended to identify and or preclude conflict of interest situations during contract selection and execution.

M) Prohibition of Gifts to City Employees

No organization or individual shall offer or give, either directly or indirectly, any favor, gift, loan, fee, service or other item of value to any City employee, as set forth in Chapter 112, Part III, Florida Statutes, the current City Ethics Ordinance, and City Administrative Policy. Violation of this provision may result in one or more of the following consequences: a. Prohibition by the individual, firm, and/or any employee of the firm from contact with City staff for a specified period of time; b. Prohibition by the individual and/or firm from doing business with the City for a specified period of time, including but not limited to: submitting bids, RFQ, and/or quotes; and, c. immediate termination of any contract held by the individual and/or firm for cause.

N) Immigration Reform and Control Act

Professional Consultant acknowledges, and without exception or stipulation, any firm(s) receiving an award shall be fully responsible for complying with the provisions of the Immigration Reform and Control Act of 1986 as located at 8 U.S.C. 1324, et seq. and regulations relating thereto, as either may be amended. Failure by the awarded firm(s) to comply with the laws referenced herein shall constitute a breach of the award agreement and the City shall have the discretion to unilaterally terminate said agreement immediately.

O) Florida Public Records Act

All material submitted regarding this RFQ becomes the property of the City. RFQ documents may be reviewed by any person ten (10) days after the public opening. The Professional Consultant should take special note of this as it relates to any proprietary information that might be included in its offer.

Any resulting contract may be reviewed by any person after the contract has been executed by the City. The City has the right to use any or all information/material submitted in response to this RFQ and/or any resulting contract from same. Disqualification of a Professional Consultant does not eliminate this right. This section is further subject to F.S. 119.01 et. seq.

RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is an Addendum to the **REQUEST FOR QUALIFICATIONS 04-16-ENG for CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY** issued on February 27, 2016.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

Instructions:

This page of Addendum #1 shall be signed and returned with the proposal. No proposals shall be accepted without an executed addendum signature page. Please provide a signed copy of this addendum your proposal.

Received by:

The following represents clarifications, additions, deletions, and/or modifications to the above referenced RFQ and shall become part of the referenced Bid and shall be binding as if originally contained therein.

Question 1: Is this RFQ for a completely new Contract or, is there an incumbent for this work? If there is an incumbent, would you tell me who that is?

Answer 1: There are no incumbents. This is a first-time RFQ.

Question 2: Is the City planning on choosing only one consultant under this contract?

Answer 2: No, per the RFQ language, a list of a minimum of three (3) firms will be developed and advanced to the City Commission.

Question 3: For the budget and timelines to be provided, is it necessary to provide construction budgets and timelines? What if we were only involved in the design/permitting and not construction?

Answer 3: The word "construction" does not appear in the requirement for budgets and timelines. This is what it says:

Experience: Provide examples of no less than three (3) previous projects working with:

- Grant and permitting agencies
- Site development projects
- Original budget vs. actual budget
- Estimated timelines vs. actual timelines
- Project manager's management capabilities

We are asking for the budget and timeline information for whatever part of the project for which you had responsibility.

Question 4: Are there specific projects already identified under this effort or, will projects be identified by the selected consultant?

Answer 4: There are no specific projects identified at this time. The City will identity the projects as needed, and select one of the firms from the approved list.

Question 5: What projects and budgets are anticipated to be awarded under this RFQ?

Answer 5: Please see Answer 4. This RFQ is to establish a pool of qualified firms for the City to use, as needed, for projects during the contract term. These projects and budgets are unknown.

Question 6: The deadline for submitting questions is stated as March 10, 2016 on page 2 and 9, but as February 29, 2016 in Section E, page 11 of 22. Can you clarify the deadline for submitting questions?

Answer 6: Pages 2 and 9 are correct. The deadline is March 10.

END OF ADDENDUM #1

RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 2** to the **REQUEST FOR QUALIFICATIONS 04-16-ENG for CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY** issued on February 27, 2016.

This addendum is issued to clarify the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

Instructions:

This page of Addendum #2 shall be signed and returned with the proposal. No proposals shall be accepted without an executed addendum signature page. Please provide a signed copy of this addendum your proposal.

The following represents clarifications, additions, deletions, and/or modifications to the above referenced RFQ and shall become part of the referenced Bid and shall be binding as if originally contained therein.

The bid document references documents which were not part of the Request for Qualification document, but will be required of any firms moving forward in the evaluation process. The language in the documents says this:

> All attachments to the Request for Qualifications and Performance Data requiring execution by the Consultant must be executed and returned with the submittal.

There were no attachments to the RFQ, so that isn't required at this time.

That form packet will be provided for completion to firms who are short-listed.

The information required for the opening March 29, 2016 at 3:00 pm is listed in the document you received, and Addendum 1.

The Response Format, Section K shows the information required in Tab format. Insurance Certifications are required, as listed in Tab 1.

Please be sure to sign and return this addendum and Addendum 1.

Thank you.

CONTRACT RENEWAL
FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS
DREDGING & MARINE CONSULTANTS, LLC

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS, via RFQ 04-16-ENG; and

WHEREAS, the City accepted the qualifications of Dredging & Marine Consultants, LLC, (Firm); and

WHEREAS, the parties desire to enter into the second of five optional one year renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND DREDGING & MARINE CONSULTANTS, LLC, AGREE AS FOLLOWS:

1. The City and Dredging & Marine Consultants, LLC, agree to all the terms and conditions as stated and contained in RFQ 04-16-ENG, including any/all Attachments, Addenda, and firm's Request for Proposals Response submitted, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year, and is the second of five (5) optional one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from June 29, 2022 and will continue for a year from that date.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS;
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 29 day of June, 2016, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and DREDGING & MARINE CONSULTANTS, LLC, a Florida corporation, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 04-16-ENG, Continuing Professional Engineering Services for Marine Applications Only. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services for Marine Applications including improvements to the City's Coastal and Marine infrastructure and facilities as follows: City marina, waterfront parks and waterways facilities structures such as seawalls, ramps, docks, boardwalks, piers, sidewalks, trails, parking, restrooms, shade structures, dredging, coastal systems planning, design, permitting, environmental floral and faunal assessment, construction engineering and inspection services, grant writing and management; and other City shoreline armoring, stabilization and protection and;

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for marine, coastal, shoreline protection, site civil, environmental and drainage engineering and/or other such

services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Marine/Dredging/ Civil/Environmental/Waterways Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and

mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto such as emergency hurricane/storm damage related investigations.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria,

assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at

all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

(d) The services of the CONSULTANT to be furnished herein expressly do not include the preparation of property, boundary, topographic, right of way, or other forms of survey. Such survey services may be provided as supplementary and special services pursuant to supplementary provisions of this AGREEMENT for which the CONSULTANT shall be compensated in accordance with the provisions hereof relating to "additional services."

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon

written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written

interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Brevard and Volusia counties, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by

the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

RE: RFQ 04-16-ENG: Continuing Professional Engineering Services for Marine Applications Only Transmittal Letter

Dear Selection Committee:

Dredging & Marine Consultants, LLC (DMC) is grateful to have this opportunity to submit this qualifications package to City of New Smyrna Beach for the above referenced services. As a multi-disciplinary Engineering and Environmental firm established in Port Orange since 2002, DMC is excited to have this opportunity so we can directly work with the City its many waterfront projects. As indicated by our name, we specialize in marine related projects; DMC has worked as a sub-consultant for the City for almost a decade, and has helped the City secure funding through Florida Inland Navigation District for many of its projects. We are thrilled to have been an integral part of the City's growth and look forward to continuing to assist in improving the City's waterfront and coastal facilities. DMC can provide all the necessary skills the City has requested and has assembled a comprehensive team that we have worked with on multiple marine related projects; including projects for the City of New Smyrna Beach. Our sub-consultants include, Mr. Gerard J. Pendergast Architect, PLC; (Building Architect), Marquis Halback, Inc. (Landscape Architect), Sliger & Associates, Inc.; (Boundary and Topographic Surveyors), Arc Surveying & Mapping, Inc. (Hydrographic Surveyors), Pace Analytical Services, Inc. (Sediment and Water Testing), and Universal Engineering & Testing, Inc. (Geotechnical Investigations and Testing). This team brings local, state and nationwide experience in waterfront park development and is capable of producing signature designs for the City. Our engineers and scientists work hand-in-hand to provide well thought out, cost effective, pragmatic and resilient final products for our clients based on over 100 years of combined experience in the land-based, freshwater, estuarine and coastal environments within the State of Florida. We believe the hands on management, good communication and in-depth design and permitting experience DMC has demonstrated on previous City projects is the perfect fit to successfully develop the City's marine waterfront!

DMC has worked with many local governments, including the City of New Smyrna Beach and Volusia County, on multiple waterfront park projects, and the development of existing waterfront park amenities We believe that the City will greatly benefit from a team like DMC's that can provide comprehensive services and meet the aggressive timeline with deliverables. Furthermore our team is experienced in hosting public workshops, planning, design, engineering, permitting, environmental assessments, surveys, and coordination and reporting with regulatory agencies as well as the grant funding agencies. Besides FIND, DMC has assisted many of our clients in successfully securing funds such as Volusia ECHO, FRDAP, NRCS, CDBG, FEMA and FWC-FBIP. One of the key strengths of DMC, in addition to our expertise with marine applications, is our ability to listen to the needs of our clients, and offer guidance in planning and phasing projects so we can leverage grant funding to minimize the City capital layout.

4643 S. Clyde Morris Blvd., Unit 302 • Port Orange, FL 32129 • Phone: 386-304-6505 • Fax: 386-304-6506
spatel@dmces.com • www.dmces.com

I will be the Point of Contact for any work authorization under this solicitation and can be contacted at **4643 S. Clyde Morris Blvd., Unit 302, Port Orange, FL 32129; Tel: (386) 304-6505; Fax: (386) 304-6506; Mobile: (386) 846-4760; email: spatel@dmces.com.** I am authorized to represent DMC for any contractual services. I have been active in many organizations such as Volusia County Association for Responsible Development (VCARD Current Chair) and have facilitated workshops on waterfront developments and the CRAs in Volusia County. I am personally committed to ensuring that our work will create positive accomplishments that not only residents and visitors to the City of New Smyrna Beach can be proud of, but ones that the DMC team can proudly claim to be a part of for years to come.

I along with our project managers; Steve Kuhn, P.E., and Niles Cyzycki, B.Sc., will be involved in every aspect of any project to ensure the City that our qualified team will lead you comfortably and confidently within project budget, in a timely and responsive manner, as we do for all our projects. We will ensure consistent communication and updates on the project. **Our goal is to manage projects so that the City's Project Manager does not have to invest more than supervision time!** We look forward to continuing our professional relationship and being a part of the team that works on this exciting opportunity.

Over the last 13 years, we have proudly distinguished our company as a LOCAL Volusia County marine engineering firm for most of the Volusia County cities, as well as for the County as its current Coastal Consultant. We offer a holistic approach to all our projects so that the most efficient engineering and fiscal solution can be applied to any project we undertake.

Marine projects are our strength and we take great pride in bringing first-class concepts, designs and a qualified team to assist the City with **growing and enhancing its Marine Facilities!** We would be honored to be selected as one of YOUR CONSULTANTS for these MARINE services and would be available to present our capabilities further through a presentation, if needed. Thank you.

Respectfully,
Dredging & Marine Consultants, LLC.

Shailesh K. Patel, M.Sc., CPSSc.
Principal/ Managing Member

CITY OF NEW SMYRNA BEACH

ADDENDUM NUMBER 1

RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is an Addendum to the **REQUEST FOR QUALIFICATIONS 04-16-ENG for CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY** issued on February 27, 2016.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

Instructions:

This page of Addendum #1 shall be signed and returned with the proposal. No proposals shall be accepted without an executed addendum signature page. Please provide a signed copy of this addendum your proposal.

Received by:

Proposer Signature

Dredging & Marine Consultants, LLC

Firm Name

The following represents clarifications, additions, deletions, and/or modifications to the above referenced RFQ and shall become part of the referenced Bid and shall be binding as if originally contained therein.

Question 1: Is this RFQ for a completely new Contract or, is there an incumbent for this work? If there is an incumbent, would you tell me who that is?

Answer 1: There are no incumbents. This is a first-time RFQ.

Question 2: Is the City planning on choosing only one consultant under this contract?

Answer 2: No, per the RFQ language, a list of a minimum of three (3) firms will be developed and advanced to the City Commission.

Question 3: For the budget and timelines to be provided, is it necessary to provide construction budgets and timelines? What if we were only involved in the design/permitting and not construction?

Answer 3: The word "construction" does not appear in the requirement for budgets and timelines. This is what it says:

Experience: Provide examples of no less than three (3) previous projects working with:

- ☐ Grant and permitting agencies
- ☐ Site development projects
- ☐ Original budget vs. actual budget
- ☐ Estimated timelines vs. actual timelines
- ☐ Project manager's management capabilities

We are asking for the budget and timeline information for whatever part of the project for which you had responsibility.

Question 4: Are there specific projects already identified under this effort or, will projects be identified by the selected consultant?

Answer 4: There are no specific projects identified at this time. The City will identity the projects as needed, and select one of the firms from the approved list.

Question 5: What projects and budgets are anticipated to be awarded under this RFQ?

Answer 5: Please see Answer 4. This RFQ is to establish a pool of qualified firms for the City to use, as needed, for projects during the contract term. These projects and budgets are unknown.

Question 6: The deadline for submitting questions is stated as March 10, 2016 on page 2 and 9, but as February 29, 2016 in Section E, page 11 of 22. Can you clarify the deadline for submitting questions?

Answer 6: Pages 2 and 9 are correct. The deadline is March 10.

END OF ADDENDUM #1

RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 2** to the **REQUEST FOR QUALIFICATIONS 04-16-ENG for CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY** issued on February 27, 2016.

This addendum is issued to clarify the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

Instructions:

This page of Addendum #2 shall be signed and returned with the proposal. No proposals shall be accepted without an executed addendum signature page. Please provide a signed copy of this addendum your proposal.

Firm Name

The following represents clarifications, additions, deletions, and/or modifications to the above referenced RFQ and shall become part of the referenced Bid and shall be binding as if originally contained therein.

The bid document references documents which were not part of the Request for Qualification document, but will be required of any firms moving forward in the evaluation process. The language in the documents says this:

> All attachments to the Request for Qualifications and Performance Data requiring execution by the Consultant must be executed and returned with the submittal.

There were no attachments to the RFQ, so that isn't required at this time.

That form packet will be provided for completion to firms who are short-listed.

The information required for the opening March 29, 2016 at 3:00 pm is listed in the document you received, and Addendum 1.

The Response Format, Section K shows the information required in Tab format. Insurance Certifications are required, as listed in Tab 1.

Please be sure to sign and return this addendum and Addendum 1.

Thank you.

Qualifications of Firm

Licenses/Insurance:

Dredging & Marine Consultants, LLC (DMC) is a licensed by the State of Florida to provide Engineering services. We have the required State registrations and tax receipts to conduct work in Florida and carry the necessary insurance coverages. All applicable licenses, registrations, and insurance certificates are included at the end of this Tab.

Location of Office Conducting Work:

DMC corporate office is located in Port Orange, FL and all project coordination, management, marine engineering and environmental work will be coordinated and completed from this office. The office is located at 4643 S. Clyde Morris Blvd., Unit 302, Port Orange, FL 32129.

Firm Overview:

DMC, established in 2002, is a Limited Liability Company registered in Florida with offices located in Port Orange, Volusia County; Fort Pierce, St. Lucie County, St. Augustine; St. Johns County & Tavares, Lake County. DMC offers the following services:

PLANNING

- Feasibility Assessment
- Public Involvement & Consensus Building
- Grants & Funding Sources
- Bid Preparation & Management
- Hurricane Planning and Recovery

ENGINEERING

- Site Civil & Stormwater Engineering
- Dredging & Material Management
- Shoreline Stabilization & Protection
- Marinas, Seawalls, Docks & Ramps
- Road, Bridge & Drainage Design

ENVIRONMENTAL

- Ecological Resource Surveys
- Environmental Monitoring & Compliance
- Water Quality & Sediment Collection
- Biological, Chemical & Physical Analyses
- Coastal Reef Management

PERMITTING

- Regulatory Agency Coordination
- Mitigation Planning & Monitoring
- Environmental Resource Permitting
- Threatened & Endangered Species Relocation
- Sovereign Submerged Lands Lease Preparation

INSPECTION

- Construction Inspection & Reporting
- Existing Structures Assessment
- Environmental Compliance Monitoring
- As-built Certification & Project Close-out
- ADA Compliance & Safety

Our team of professional engineers, biologists, ecologists and field inspectors will assist you with all aspects of your marine related civil and structures design, planning, grants management, engineering, environmental assessments, including gopher tortois agents for excavation and relocation, permitting, bidding, and construction inspection and management. Our team has a combined 100+ years of experience in the design and permitting of public works and private projects in all types of Florida environments, including freshwater, estuarine and coastal systems. In addition, we offer our clients efficiency and value through a unique complement of engineers and environmental scientists working together on any project. We have established a good working relationship with regulatory agencies, contractors and product manufacturers that allows us to "design-permit-build" your project. We interact with many Florida Marine Contractors and keep abreast of the latest marine products and qualified contractors, helping to implement client projects successfully. Our experience in implementing projects enables us to prepare and solicit bids, review bids with the client, recommend contractors, and conduct an effective pre-construction meeting to get construction started on the right track. During construction, DMC inspects and manages the project thoroughly to ensure engineering and environmental monitoring and compliance. Once completed to specification, the project will be signed, sealed and certified by our project engineer. We also assist with grant writing and grants administration, if required. One of DMC's strengths is assisting clients with assessing and inspecting the condition of their marine and stormwater facilities, systems and structures to prioritize and budget work required as part of the Capital Improvement Projects (CIP).

DMC's personnel assigned to any project under this solicitation will consist of the following technical and administrative staff from all our offices:

Shailesh K. Patel, MSc., CPSSc. – Principal, QA/QC, Public Engagement, Planning & Coordination
Steven Kuhn, P.E. – Sr. Engineer; Site Civil Engineering and Waterfront Structures
Niles C. Cyzycki. B.Sc. – Sr.Ecologist; Permitting, Environmental Assessments, Grants Writing
Curtis N. Todd, P.E. – Sr. Engineer; Site Drainage, Shoreline Stabilization and Structures
Will Cornelius , P.E. – Geotechnical Engineer; Foundations, Seawalls structures and Soils Engineer
Joel Steward, MSc. – Sr. Biologist; Water Quality and Shoreline Habitat
Joseph Rivera – Construction Inspector
Ankeet Rama – AutoCAD/GIS Technician
Jaye S. Patel – Office Manager/Finance

Serving the governments and citizens of the State of Florida responsibly and professionally is our primary objective. We look forward to listening to your needs and working with you to successfully achieve your goals.

Consultant Project Manager:

DMC's philosophy of selecting a Project Manager is based on the specific project requirements and ability of the staff member to effectively and responsibly communicate with our client. Mr. Stephen Kuhn, P.E. has a Civil Engineering background with project experience in boardwalks, seawalls, and boat launch design in addition to his site planning and stormwater experience. He will serve as the designated Engineering Project Manager. He is currently working on the City of Port Orange's second phase of Riverwalk Park, City of Holly Hill's redesign of the Sunrise Park Boat Launching Facility and the City of Edgewater's Conceptual Master Plan for the Whistlestop Park which recently had a $3.5 million dollar referendum approved by local voters. As per DMC's Project Management Protocol to meet our needs, we assign a co-manager and Mr. Niles Cyzycki will serve in that capacity on all projects. Niles has worked on every project we have designed for the City of New Smyrna, lives in the City of New Smyrna Beach and is very familiar with the local marine and coastal issues. In addition to these two highly qualified individuals that will manage the projects, Mr. Shailesh Patel, Principal, is always be available to City staff to ensure that our team is serving the City's needs on budget and on schedule. DMC has worked extensively as a sub-consultant on City projects with Mr. Kyle Fegley and Mr. Khalid Resheidat at the City and you can verify this management style. Our goal has always been to have our Client Project Manager invest minimal time on DMC managed projects. In addition, to this staff we have two other professional engineers, Mr. Curtis Todd, P.E., who has worked on many of the City's past projects and Mr. Will Cornelius II, P.E., with geotechnical and waterfront structures design experience. The resumes of these and other key personnel are included in this qualifications package.

Consultants Commitment to use Same Personnel:

DMC has served the City as a sub-consultant in multiple projects in the past and we have always maintained the same staff continuity on all our projects. We will continue to commit to utilizing the same staff. This is why we believe that our Project Management protocol of having a Manager and co-manager serves our clients well. There is no disruption in communication even when one staff member is out of office or on vacation, we remain available and responsive to our clients at all times!

Certified Minority Business:

DMC is a State of Florida Certified Minority Business Enterprise (MBE), a FDOT Disadvantaged Business Enterprise (DBE) and South Florida Water Management District Certified Small Business Enterprise (SBE). A copy of these certifications are presented at the end of this Tab.

Consultants Workload/ Performance Capability:

We have provided the names of individuals we have interacted with at the City of New Smyrna Beach as well as other client references so that you can contact them on our Performance Capability. Workload is not an issue at DMC, as we have weekly project Manager's meetings to identify and prioritize staff and direct staff resources where needed. A healthy on-going work load is always desired because that is how we stay in business, but we never lose sight of the fact that we have to prioritize projects based on deliverables, grant deadlines and securing

permits. We have assisted the City with submitting grants through FIND and FWC, have presented these projects to the Funding agency review boards and been successful in securing all the grants we have applied to for the City. We add that we have also been a resource to the City when the staff has had questions on seawalls, shoreline habitat, marina sewer pumps, floating docks and potential seawall issues. We have been not only responsive in calling back or emailing, but have taken the time to meet the staff at site to better understand the concerns so that we can offer the best possible solutions. We feel this is another aspect of performance capability.

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

REGISTERED VENDOR NO.: 108651

February 15, 2016

CERTIFICATION EXPIRATION DATE
February 15, 2019

Shailesh K. Patel, Manager
Dredging & Marine Consultants, LLC
4643 S. Clyde Morris Blvd., Unit 302
Port Orange, FL 32129

Dear Mr. Patel

Congratulations, the South Florida Water Management District (District) has recertified your firm as a Small Business Enterprise (SBE). This certification is valid for three (3) years and may only be applied when business is conducted in the following area(s):

Professional Engineering Services

Your submittal of bids or proposals to supply other products or services outside of the specialty area(s) noted above will not count toward SBE participation. If you require certification in other specialty areas, please contact the Procurement Bureau, SBE Section, for additional information.

Renewal is required every three (3) years and should be requested a minimum of 45 days prior to the above expiration date.

If any changes occur within your company during the certification period such as ownership, affiliate company status, address, telephone number, licensing status, gross revenue, or any information that relates to your SBE Certification status, you must notify this office in writing immediately. It is imperative that we maintain current information on your company at all times. *FAILURE TO REPORT CHANGES MAY RESULT IN DECERTIFICATION.*

Certification is not a guarantee that your firm will receive work, nor an assurance that your firm will remain in the District's vendor database.

We look forward to a mutually beneficial working relationship.

Sincerely,

Sandra Hammerstein

SHAILESH "S.K." PATEL, M.SC., CPSSC.

PRESIDENT, SENIOR SOIL SCIENTIST

Shailesh Patel founded **DMC** in 2002 and serves as the Principal Point of Contact for all projects. He has 20 years of experience in the engineering and environmental consulting business and in particular developing viable projects for private, municipal, and county entities. He has worked on numerous waterfront parks, watershed water quality and land development projects that have included the planning, design, engineering, facilities inspection, permitting, environmental, sediment and materials assessments, including full construction administration and inspection services, including permit compliance. His vast experience spans the fields of dredging, waterfront facilities and related structures, including buildings, parks, mining wastes, drainage and stormwater management, erosions related to walkways and roadways, wetlands and associated mitigation. He is active in many technical and civic service organizations and has twice served as the President of the Florida Lake Management Society and is currently the Chair of Volusia County Association for Responsible Development. He has managed or assisted with numerous controversial public dredging and marina projects from initial feasibility studies, involving the public, to bidding, implementation and Inspection to post-construction project close-out. Shailesh continues to add to his extensive knowledge of designing cost-effective, environmentally-sound and safe lake, estuary, and canal/channel dredging and shoreline stabilization and land development projects, including sediment treatment, management, disposal operations, beneficial uses of dredged sediments, source control and impacts of tidal, storm or hurricane surges on protection of structures. He is very knowledgeable in dealing with "muck" sediment dredging and handling and was invited by the Maryland Port Authority to share his experience on this topic and has assisted the Florida Department of Environmental Protection with promulgating ways to provide TMDL credits for "muck" removal within the Indian River Lagoon. He is well spoken and understands the value of effective listening and communication with our clients and the public. He has presented project technical information to City and County councils for many projects for better decision and policy making. He has the ability to visualize the long-term needs of clients and understand the economic, social, fiscal and political climates and has worked on many highly visible and challenging and often controversial projects so that they can be implemented. His biggest attribute is to be able to forge a good relationship and open communication with various stake holders on large scale projects and keep the various stakeholders focused on the goal of long-term projects. He continually participates in professional, scientific, and marine construction conferences to keep abreast of advances in dredging, water quality, and latest marine products to educate the public and clients. He passionately promotes responsible development and resource protection along our waterways and waterfront communities.

EDUCATION

- Candidate to Ph.D, Soil & Water Science, University of Florida, Ongoing
- Annual FLMS Workshop Presenter, Managing a Sediment Removal Project
- Small Business Development, BCC, 2002
- Dredging Engineering Short Course, Texas A&M, 2002
- BCI Engineers & Scientists, Inc. Project Manager's Training, 2001
- M.Sc. (Soil & Water Science) University of Florida, 1989
- B.S. (Plant Science & Technology) NC A&T SU, 1986

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- American Society of Agronomy, Certified Professional Soil Scientist No. 24815
- National Dredging Team
- Florida Lakes Management Society (Vice President 2002-2003, President 2003-2004 & 2008-2009)
- North American Lakes Management Society (SENALMS Conference Chair 2003)
- Indian River Lagoon Program Technical Advisory Committee
- Tampa Bay National Estuary Program Technical Advisory Committee
- Charlotte Harbor National Estuary Program Technical Advisory Committee
- Soil Science Society of America
- Western Dredging Association
- Environmental and Natural Resources Advisory Committee, Volusia County
- Volusia County Association For Responsible Development Executive Council
- Lake/Education Action Drive
- Water Environment Federation
- National Association of Environmental Professionals & Florida Stormwater Assoc.
- Florida Marine Contractors Association

PROJECT EXPERIENCE

- Meeting with clients and citizens to discuss project objectives
- Public engagement and consensus building
- Long-range vision and strategic fiscal planning
- Leveraging of funds and strategies for additional funding and applicable grants
- Grants Preparation, presentations, administration and reporting
- Assisting in developing sediment removal projects through public participation and education
- Developing a forum for transferring technical, political and financial information
- Assisting client with all aspects of preparing applications to secure funding and necessary permits
- Addressing public concerns throughout project design phase
- Meeting with regulatory personnel to address permitting issues
- Evaluating the availability of upland areas to retain the dredged sediment
- Identifying beneficial uses for dredged sediments
- Evaluating innovative techniques to enhance the dewatering using centrifuges, belt-presses, and rotary or static screens
- Optimizing storage capacity of the upland sites using chemical polymers
- Dredged material separation using hydrocyclones
- Evaluating the impacts of dredging on abutting structures such as seawalls and road and railway bridges
- Design aspects of seawalls, rock revetments, geotextiles, ramps piers, docks
- Determining environmental impacts on wetlands, threatened and endangered aquatic plant and animal species
- Mitigation planning and monitoring
- Engineering design, plans, and preparation of technical and bid specifications
- Assisting clients with bid review and contractor selection
- Construction inspection, management, and administration
- Project monitoring for permit and technical specification compliance
- Project management and closure; including updates, adjustments and overall evaluation

PARTIAL LIST OF PROJECT EXPERIENCE

Swoope Site Public Boat Launching Facility, City of New Smyrna Beach, FL – Principal Project Manager. Coordinated efforts and strategies with FDEP and USACOE to minimize resource impacts and provide a more acceptable project. Assisted the City in identifying strategies for additional funding from the Florida Inland Navigation District and Volusia County Port Authority for engineering and construction. Assisted with bidding, technical specifications and response to contractor submittals including Construction Inspection.

North Causeway Public Boat Ramp and Fishing Pier Improvements, City of New Smyrna Beach, FL – Principal Project Manager. Assisted the City with evaluating the failures behind the old seawall and preparing a report and costs to assist with repair and FIND grant application. Coordinated efforts with Prime consultant to develop strategies for FDEP and USACOE permits and minimize resource impacts. Assisted with bidding, technical specifications and response to contractor submittals, including Construction Inspection.

Riverside Park Bulkhead & Wharf Repair, City of New Smyrna Beach, FL – Principal Project Manager. Coordinated efforts and strategies prime consultant to design and seek additional funds from FIND. Coordinated in generating repair reports and costs. Also assisted with generating plans and bids for the project as well as in inspection during construction to ensure proper marine considerations are implemented. Secured FDEP and USACOE permits and added a design for a access floating dock system that is along the seawall.

Ballough Road Bridge Expansion and Marina Village, City of Daytona Beach, FL – Senior Project Manager. Coordination of subconsultant work that include Bridge Engineers, Traffic Engineers and other supporting staff. Mainaining communication with City staff to keep project on track with concepts and meeting strategic goals. Work includes coordinating with private owners, and landscaping and utility upgrades and relocations.

Riverfront Day (Transient) Dockage, City of Daytona Beach, FL – Senior Project Manager. Coordination with on-going City design to ensure there is a flawless connection of the Floating dock system. Assisting with FIND funded project that DMC assisted with generating costs for construction. Ensuring that various design options are considered for most effective and least costly option for construction.

Riverwalk Park Conceptual Design and Public Input, Phases 1A and 1B, City of Port Orange, FL – Senior Project Manager. Instrumental in building public consensus and incorporate design features in strategic locations of this 8 acres project area. Assisted the City in phasing project so that the City dollars could be leveraged with other funding sources besides FIND, such as the Volusia ECHO grants and FRDAP grants. Assisted with generating design and construction costs and project timeline, understanding the complexity of the project area and historic uses.

Sunrise Park South Access Channel Dredging and Boat Ramp Improvements, City of Holly Hill, FL – Senior Project Manager. Assisted the City with developing FIND grant request information for design and construction. Coordinating the permitting work with the State and Federal Agency staff to ensure prompt permit processing to meet grant deadlines.

PROJECT EXPERIENCE CONTINUED

Whistlestop Park Conceptual Planning, City of Edgewater, FL – Senior Project Manager. Worked with City Manager, Finance Director and other key staff at the City to incorporate Public input of priority preferences for Park amenities. Presented to the City Council to seek input of various concepts generated and developed a final conceptual plan. Then presented to the Parks and Recreation Board to seek their input and offer suggestions with the ultimate goal of developing probable construction costs and Bond referendum for voters which was recently passed to proceed with the Project.

Daytona Beach Pier Assessment, City of Daytona Beach, FL – Project Manager. Evaluated the underside of the historic Daytona Pier. The objective of our task was to determine the structural strength of the existing pier pilings and hardware and the level of deterioration and corrosion to recommend additional support. The structure was evaluated to withstand Hurricane Category 2 wind and wave forces. The project has been armored and the new above deck facility (restaurant) is almost complete.

Sun Splash Park Seawall Extension & Stormwater Design, City of Daytona Beach, FL – Project Manager/ Point-of-Contact Coordinated with County staff to construct a public friendly addition to an existing seawall and stormwater maintenance system. Reviewed project drawings for compliance with all environmental codes. Successfully completed permitting through DEP's Coastal Construction Control Line Division.

Russell Property ADA Compliant Canoe & Kayak Landing Facility, Port Orange, FL – Principal Project Manager. Made presentation to the City Council on project costs and funding strategies to build the project. Coordinated efforts with FDEP and the USACOE. Assisted the City in developing the bid package, technical specifications, preconstruction meeting, responded to FRI from contractors and reviewed bids to make recommendation to the City.

B-23 Canal Dredging and Seawall Replacement (sub to Quentin L. Hampton), City of Port Orange, FL – Dredging Consultant/Project Manager. Coordinated evaluation of seawalls and cost estimation of work required to complete engineering design, permitting, technical specification preparation, bidding assistance and construction administration services as well as project construction for funding. Assist Prime consultant to handle all aspects of engineering and permitting of 30,000 CY dredging and 5,000 linear feet of seawall replacement along canal. Address stormwater and drainage issues from uplands. Public and City Council meetings, presentations and updates. Collected necessary environmental and sediment data.

Port Orange Causeway Park Shoreline Protection – City of Port Orange, FL – Project Manager – Responsible for coordinating surveys of 24 sites within the City Parks, engineering design, permitting, technical specification preparation, bidding assistance and construction administration services. Project currently on hold by City due to funding agency requirements. Project includes evaluating existing seawalls and shoreline for stabilization Collected necessary data, including right-of-way and property survey and shoreline profile survey at the project locations.

Palatka Riverfront Park Improvements, Palatka, FL – Project Manager - Assisted prime consultant with all the water related structures; ramp, boat docking, marina, mitigation planning, geotechnical testing, permitting with FDEP and USACOE. DMC assisted the client with securing funds to leverage the development of the overall project. Also assisted the client with estimating costs for various components of the project as part of the long term strategy to develop the project.

PROJECT EXPERIENCE CONTINUED

Summerall Park Boat Ramp and Park Improvements, City of Tavares, FL – Project Manager- Coordinated design, permitting and construction inspection and well as coordinate all CDBG reporting with Lake County for the City. Improved a single lane boat ramp and dredged the access for safe boating and mooring. Reviewed and provided a mitigation plan as completed a three year monitoring program to secure project acceptance from FDEP. Facilitated a comprehensive coordination effort between the FDEP, FFWCC, LCWA, Lake County, and the City.

Wooton Park Boat Ramp Extension Dredging, City of Tavares, FL – Project Ecologist. Completed successful time sensitive Environmental Resource Permitting. Assisted in assessing the shoreline vegetation along with sampling and evaluation of resources within the channel template to be dredged along boat ramp.

Wooton Park Improvement, City of Tavares, FL – Project Manager. Coordinated and assisted the City staff with a conceptual plan of Wooten Park improvements. This included both upland and water related features. The goal is to make this a well utilized public park and facility, the "Jewel of Lake County" and surrounding areas. Met with potential park users to incorporate their ideas. Project includes boat ramp and channel access improvements, shoreline improvements, seaplane docking facility, docks, etc., coordinating efforts with regulatory agencies and City staff on resources, impacts and regulatory permits.

Ed Stone Park Seawall Replacement, Volusia County, FL – Principal Project Manager - Overall project strategy on replacing 122 ft. of cement-bag wall with an aluminum sheetwall to match the type of existing seawall along the rest of the shoreline without impacting shoreline resources. Coordinated efforts with the County to provide reasonable costs and ADA compliance. Talked with local fishermen and park users to accommodate utility and enhance access for fishing

Riverwalk Park Phase 1B, City of Port Orange, FL – Project Engineer. Performed stormwater design and calculations for permitting and design of all hardscape for Port Orange's approximately 9 acre premier riverfront park. Provided QA/QC for all plan submissions during the project development process. Finalized site grading, utility connection placement and

Lake Rowell Sediment Core Sampling, FFWCC, Bradford County, FL – Project Manager - Directed and coordinated collection of sediment to depths of up to 15 feet throughout the 350 acre lake. Also, developed sampling plan to capture sediments of various composition and possible chemistry that could impact permitting and material processing, dewatering and management.

Stevenson Creek Sediment Characterization & Removal Feasibility Study, City of Clearwater, Pinellas County, FL – Project Manager. Characterized, determined, and evaluated the feasibility of removing 127,000 cubic yards of sediments to provide water quality and some navigation improvements. In addition, the project included identifying additional funding sources, identifying potential disposal sites, best option and cost for removal of sediments. Currently assisting City to coordinate engineering efforts with USACOE (Jacksonville District) to implement project.

Smith's Creek Maintenance Dredging Project, City of Flagler Beach, FL – Project Manager. Project required complete engineering, permitting, and assisting City with securing funds to implement project. Provide navigation access by dredging 10,000 cubic yards from the Intracoastal waterway access channel to residential canals. Involved overseeing engineering design, technical specification and bid preparation, contractor selection, seawall and bank protection, prioritizing dredging based on funding, assisted in securing $165,000 in funding from the Florida Inland Navigation District, securing permit, and addressing resident concerns.

PROJECT EXPERIENCE CONTINUED

Lake Lotus Sediment Removal Feasibility Study, Florida Department of Transportation District 5, Seminole County, FL – Project Manager. Provide engineering services for a preliminary characterization, beneficial uses, and removal feasibility of sediments. This project included determining potential sources of fine grained and organic sediments, estimating its volume, providing best option and cost for removal, interaction with land owners, and permit consideration.

Marsh Park Maintenance Dredging Project at Lake Yale, Lake County Water Authority, Lake County, FL – Project Manager. Provide navigation access from Park boat ramp to Lake Yale. Project designed to remove approximately 2,000 cubic yards of fined-grained, dominantly sandy sediments. Involved in site evaluation, sediment sampling, and securing permit. Coordinated with various agencies to ensure each entity's goals were met.

Taylor Creek Emergency Shoreline Stabilization, St. Lucie County, FL – Project Manager – Assisted the County to secure FDEP, USACOE and SFWMD permits to design and meet NRCS funding deadlines. Designed, permitted and constructed the project on time for the County

Taylor Creek Restoration Dredging Site Assessments, Phase 2 & 3, St. Lucie County, FL – Project Manager - Dredging and Shoreline Stabilization of SFWMD diversion canal. Coordinated efforts with FDEP, SFWMD, USACOE and FFWCC to complete all biological and ecological assessments, including threatened and endangered species, particularly seagrasses, mangroves, gopher tortoise survey and relocation, scrub jay survey and endangered plant survey. Assessed seven separate parcels for spoil site location. Prepared and conducted pre-bid and pre-construction meetings and construction inspections.

Taylor Creek Restoration Dredging Project, St. Lucie County, FL – Project Manager. Characterized, determined, and evaluated the feasibility of removing approximately 200,000 cubic yards sediments to provide navigation and water quality improvements. Includes permitting, public education and consensus building, identifying and securing over $1,500,000 funding, selection of pipeline route and disposal site, engineering, construction, and environmental monitoring and reporting. 2,800 linear feet of shoreline stabilization, environmental and threatened and Endangered Species assessments, cross-sections and sediment disposal based on permitting requirements. Prepare technical bid documents and review bids. Responsible for public/commission meetings, presentations and updates. Phase 1 and 3 are complete and Phase 2 is ongoing. The phase 2 Upland Dredged Material Management Area has been permitted.

Home Depot Stormwater Improvements, Palatka, FL – Project Manager. Responsible for design of 100 feet of spreader swale and 10 feet high concrete retaining wall for stormwater pond improvements. Project included coordination with St. Johns River Water Management District for permit modification to resolve an outstanding notice of non-compliance by the District. The project is now under compliance.

Turkey Creek Middle-Reach Sump Project, City of Palm Bay, FL – Project Manager. Provided design to evaluate the potential of creating a sump within the residential canal to "trap" sediments originating from upstream locations of the creek and watershed. The intent of the design was to provide data for regulatory agency review and consideration to permit and implement the design. The project involved citizen, City, funding agency and regulatory agency coordination and meetings to identify public concerns and meet goals. Design was approved by City and regulatory agency and is currently in permitting phase.

PROJECT EXPERIENCE CONTINUED

Turkey Creek Restoration Dredging Project, City of Palm Bay, FL – Project Manager. Characterized, determined, and evaluated the feasibility of removing 380,000 cubic yards of muck sediments to provide navigation and water quality improvements. Included permitting, public education, pipeline route evaluation and coordination with funding agencies, engineering, construction, technical specification and bid preparation, assist client with contractor selection and environmental monitoring and reporting. Additional work included application of innovative technologies such as hydrocyclone and belt-press dewatering to manage dredge sediment.

Square Lake/East Slough Restoration Project, Palm Beach County – Project Manager – Coordinated efforts to created and implemented environmental compliance plan, turbidity monitoring, notification and daily reporting to regulatory agencies as part of a construction project. Worked with a Contractor to provide support during construction phase of the dredging project and provide best management practices.

Panama City Dredging and Seawall Projects, City of Panama City, FL – Project Manager. Overall project manager and coordinator. Identify engineering needs for City's dredging, seawall and shoreline protection at four sites. Two projects also involved seawall design and permitting. The project required resource impact avoidance. Prepare permits with FDEP and the USACOE or qualify projects for exemption from permitting and all aquatic and shoreline vegetation assessments. Provide dredge templates, prepare technical specification and bid documents.

Ponce Inlet Side Channel Maintenance Dredging, Ponce Inlet Port Authority, Town of Ponce Inlet, FL – Project Manager – Coordinated with the Client to determine dredge channel configuration and on-beach spoil disposal through FDEP's Coastal Construction Control Line Division.

Halifax Mobile Home Park – City of Port Orange, FL – Project Manager. Determine specific needs of the proposed usage and design prior to staring design. Provide physical surveys and practical design needs. Prepared conceptual design for approval of City. Prepared technical specifications and plans for the City.

Waterway and Canal Maintenance Dredging, City of Port St. Lucie, FL – Project Manager. Overall project management and coordination, evaluating residential canals for sediment removal to benefit water quality and navigation. Evaluate seawalls and docks on ten canals approximately 5 miles, vegetation and other environmental resources. Permitting, cost estimation, dredging options and disposal drainage issues were also evaluated. Constant public notification and involvement was critical to the success of this project. The project required interdepartmental coordination to facilitate a acceptable disposal site.

Lake Jesup Aquatic Enhancement, Sanford, FL – Project Manager - Assisted Prime consultant with dredging and disposal options to remove 800,000 CY of organic sediment. Provide 300 acre upland disposal design and drainage options.

Reed Canal Access Channel, Halifax River (ICW), City of South Daytona, FL – Project Manager- Overall project manager responsible for coordination with sub-consultants and delegation of responsibilities. Presentation and discussion on behalf of client at several staff meetings with SJRWMD. Reviewed grant applications, cost estimates, permit documents and dredging methodology and all benthic and mitigation options for impacts. The overall intent of this project is to vitalize the waterfront of the City to generate a larger tax-base by creating a viable waterfront for private development.

PROJECT EXPERIENCE CONTINUED

Canal Conveyance Capacity Program Phase 1, South Florida Water Management District – Project Manager for DMC – Assisted Mactec Engineering with establishing protocol for field analyses of canal bank erosion for approximately 45 miles of canals as part of the SFWMD's Canal Conveyance Capacity Program. Review reports, assess costs for dredge and repair areas of concern discovered during field reconnaissance. Assisted with final report review.

Canal Conveyance Capacity Program Phase 2, South Florida Water Management District – Senior Environmental Manager and QA/QC officer - Negotiated project scope and budgets, coordinated work with subconsultant team on project deliverables and established protocol for reporting for approximately 5 miles of existing G-16 drainage canal for the SFWMD Canal Conveyance Capacity Program in Broward County. Reviewed as-built plans, sediment and water quality data reports, assisted with strategies for shoreline erosion and repair options, sediment dredging options and management of dredged materials. QA/QC review of all intermediate and final reports to the SFWMD.

Sippo Lake - Initial Feasibility of Rapid Dewatering (MS Consultants, Inc., Canton, Ohio), Stark County Park District, Stark County, Ohio – Project Assistant to Principal. Evaluate cost-effective technologies to dredge and dewater 300,000 cubic yards of highly organic sediment and strategies to reduce cost. Polymers/thickeners were used in conjunction with rotary screen to dewater sediments.

Crane Creek Post-Dredge Assessment Project, St. Johns River Water Management District, FL – Project Manager. Evaluate the effectiveness of muck removal from crane creek. Identify and model the trapping efficiency and determine new material from watershed versus redistributed creek sediment within the dredged areas. This is a three-year ongoing study.

Investigation and Demonstration of Beneficial Uses of Muck Sediment from the Indian River Lagoon, St. Johns River Water Management District, FL – Project Manager. Project involved the use and analysis of dredged sediments to demonstrate uses and potential uses of dredged sediments from the Indian River Lagoon Estuary. A public workshop was also conducted as a continuation of this project and has resulted in a better understanding in the need to dredge estuary creeks that are contributing sediments and impacting the water quality and benthic communities.

Dredging & Marine Consultants
DMC
ENGINEERS • SCIENTISTS

STEPHEN J. KUHN, P.E.
PROJECT MANAGER/ ENGINEER

Mr. Kuhn has 13 years of experience as an engineer in Florida, previously working with AMEC Foster Wheeler (formerly BCI Engineers & Scientists, Inc.). He has been with DMC for two years and has worked on several marine projects related to Park design, redesigns for better waterfront accessibility that include, ramps, docks, shoreline armoring, parking reconfiguration and stormwater management designs. He has worked extensively in both public and private sector projects and has extensive knowledge and experience working with the Florida Department of Transportation, the Southwest Florida Water Management District, the St. Johns River Water Management District, the South Florida Water Management District, Florida Department of Environmental Protection, and various local regulatory agencies. Mr. Kuhn's area of expertise besides design, management, and engineering includes permitting and construction inspection and management. In addition, he has considerable experience in the areas of new and existing residential, commercial and industrial site designs and layout, including site access, grading, parking lot layout, NPDES compliance, flood routing modeling and Best Management Practices retrofitting and protection and utilization of site resources and its protection.

EDUCATION

- B.S., Environmental Engineering, University of Florida, 1998
- BCI Engineers & Scientists, Inc. Project Manager's Training, 2010

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- Professional Engineer, State of Florida, No. 67486
- FDEP Certified Erosion and Sediment Control Specialist

AREAS OF EXPERTISE

- Parks and Waterfront Planning Design and Redesigns
- Shoreline Stabilization
- Ramp, Seawall and Dock Design
- Stormwater, Drainage Design and Permitting
- Project Management, Civil Site Design and Value Engineering
- Technical Specification and Bid Preparation
- Environmental Resource Permitting
- NPDES Compliance
- Stormwater Management System Inspection and Recertification
- Hydrologic and Flood Routing Modeling
- Construction Site Engineering
- Construction Inspection and Compliance Monitoring
- Stormwater Monitoring and Sampling
- Shop-Drawing Review and Approval
- Pollutant Load Modeling and Best Management Practices Recommendations

PROJECT EXPERIENCE (DMC)

Ballough Rd. Bridge Expansion and Marina Village Conceptual Plan, City of Daytona Beach, FL – Project Engineer. Assisted with development if a conceptual design for bridge replacement to provide improved access to planned commercial/residential development. Designed new public boat ramp and trailer parking area, seawall, floating dock and stormwater management system serving the facility.

Blue Lake Boat Ramp Improvements, Volusia County, Florida – Project Engineer. Site grading, pavement design, stormwater design, permitting, ADA compliance and plans preparation for improvements to a county boat ramp facility.

Sunrise Park Boat Ramp Improvements, City of Holly Hill, FL – Project Engineer. Site grading, stormwater design, permitting and plans preparation for improvements to an approximately 2 acre public boat ramp facility and its associated parking area. Stormwater design required to achieve pollutant loading reductions sufficient to comply with established TMDL for receiving water body. Design components include a boat launch, truck & trailer parking, floating accessory docks, dredging, channel markers and shoreline stabilization.

Whistle Stop Park Conceptual Planning, City of Edgewater, FL – Project Engineer. Performed site reconnaissance, existing structure inventory and conceptual design for 15-acre municipal park in Edgewater. A $3.5 million dollar redesign of this park has been approved by City of Edgewater residents.

Riverwalk Park Phase 1B, City of Port Orange, FL – Project Engineer. Performed stormwater design for permitting and design of all hardscape for Port Orange's approximately 9 acre premier riverfront park. Provided QA/QC for all plan submissions during the project development process. Finalized site grading, utility connection, ADA compliance, placement and stormwater design. Developed project technical specifications.

Palatlakaha River Control Structure M-5 and M-6 Modifications, Lake County Water Authority – Project Engineer. Design and permitting of modifications to existing flood control structures by replacing radial hoist gates with fixed sheet pile weirs. Tasks included design of weirs and scour prevention measures, permitting, preparation of SSL easements, preparation of technical specifications.

Kingsway Canal Shoreline Improvements, City of Port St. Lucie, FL – Drainage Engineer. Provided QA/QC of 90% plans and cost estimates, and value engineering. Assisted with design of drainage connections to new seawalls in canal.

PROJECT EXPERIENCE (AMEC FOSTER WHEELER)

Florida Department of Transportation – Districts One, Five and Seven
Coordinated NPDES compliance for three districts including inspection and recertification of stormwater management facilities, developing maintenance recommendations, tracking new facility construction and pollutant loading modeling for TMDL compliance. Maintained up-to-date Microsoft Access and GIS databases to effectively track stormwater facilities, inspections, maintenance and permitting activities.

PROJECT EXPERIENCE (AMEC FOSTER WHEELER) CONTINUED

Eloise Redevelopment and Revitalization CDBG Project, Polk County, Florida
Served as Engineer of Record for neighborhood revitalization project completed in four phases under CDBG program. Oversaw permitting, development of construction plans, specifications and bid documents, shop drawing review, and preparation of as-built plans for design of roadways, sanitary sewer, potable water and stormwater management systems.

Downtown Drainage Improvements & Master Plan Update, City of Dade City, Florida
Played a key role in stormwater master plan update and design of stormwater management system for downtown area affected by chronic flooding. Built stormwater structure GIS geodatabase, conducted GIS analysis of watershed, performed flood routing modeling, prepared construction plans, and coordinated permitting process.

Eastside Canal Capital Improvement Project #3 Phase 1, City of Plant City, Florida
Designed gabion walls and other improvements for a drainage canal serving a downtown area subject to flooding, and exhibited proficiency in design and flood routing modeling, preparing specifications and bid documents, preparing as-built plans, and permitting.

Kitching Creek Stormwater Treatment Area Water Quality Sampling, Martin County, Florida
Participated in water quality monitoring project for stormwater treatment pond near Hobe Sound, Florida, constructed under a 319(c) grant issued by FDEP. Assisted with development of project QAPP, programmed and set-up ISCO automated water samplers and Campbell Scientific dataloggers, supervised sample collection, performed complex data collection and analysis, and prepared reports of findings.

St. Clemente Low Income Senior Housing Project, Plant City, Florida
Prepared construction plans and specifications, including site layout and design, design of utility connections, flood routing modeling, and stormwater management system design for multistory senior assisted living facility. Designed sanitary lift station upgrade, participated in wetlands delineation and permitting, and coordinated permitting through water management district, county and city code offices.

Lake Worth CDBG Project, City of Lake Wales, Florida
Upgraded antiquated and failing stormwater line causing localized street flooding by devising flood routing model, designing new stormwater line and treatment pond, generating construction plans and specifications, and navigating permitting through water management district.

Cassel Creek Stormwater Quality Monitoring and Conceptual Treatment Facility Design, Seminole County, Florida,
Actively supported water quality monitoring and stormwater retrofit project for highly urbanized watershed by building flood routing model, setting up ISCO samplers and Campbell Scientific dataloggers, collecting samples and analyzing data, identifying retrofit alternatives, and creating reports.

NILES CYZYCKI
ECOLOGIST

Mr. Cyzycki has been with **DMC** for 8 years and has over 10 years as an ecologist specializing in Florida ecosystems. Niles has worked extensively in both the public and private side of environmental permitting, giving him, and DMC, the knowledge and experience to work within governmental framework and perform any ecological permitting. Over the last decade Niles has been involved in every project DMC has undertaken for New Smyrna Beach and as resident of the City has an extensive knowledge of the local marine environment. As a knowledgeable construction inspector he has the field experience that will result in a successful project for both client and contractor. A third generation Floridian, Niles understands the delicate balance of responsible development and environmental protection.

EDUCATION

- B.S., Environmental Studies, Certificate in Urban and Regional Planning, Florida State University, 2004

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- FWC Authorized Gopher Tortoise Agent #GTA-10-00002
- DEP Qualified Stormwater Management Inspector #12876
- DEP Wetland Delineation Training and Uniform Mitigation Assessment Method (UMAM)
- Certified as a Florida Master Naturalist through University of Florida's IFAS extension
- Member of Florida Association of Benthologists
- FEMA Coursework: IS-00700, IS-00100, and IS-00200
- DEP SOP Groundwater, Surface Water and Wastewater Sampling Training

AREAS OF EXPERTISE

- Environmental Resource Permitting
- Mitigation Design and Planning
- Uniform Mitigation Assessment Method (UMAM)
- Environmental Assessment
- Gopher Tortoise and Protected Species Management
- Creation and Implementation of Environmental Compliance Plans
- Turbidity Monitoring
- Disposal Site identification
- Sediment and Water Sampling and Testing
- Project Management
- Wetland Delineation
- Bid Preparation
- Construction Inspections
- Permit Compliance Monitoring and Reporting

PROJECT EXPERIENCE

Swoope Site Public Boat Launching Facility, City of New Smyrna Beach, FL – Project Manager. Completed all environmental resource permitting through FDEP and the Corps. Conducted submerged aquatic vegetation (SAV) survey, protected vegetation survey and coordinated with engineers to avoid impacts to environmental resources. Secured $500,000 in grant funds from Florida Inland Navigation District for engineering and construction. Assisted with bidding, technical specifications and response to contractor submittals.

Calore Canal, City of New Smyrna Beach, FL – Project Ecologist. Completed all environmental resource permitting through FDEP and the Corps. Conducted submerged aquatic vegetation (SAV) survey, protected vegetation survey and coordinated with engineers to avoid impacts to environmental resources. Assisted with bidding, technical specifications and response to contractor submittals.

North Causeway Boatramp and Fishing Pier Improvements, City of New Smyrna Beach, FL – Project Manager. Assisted with the assessing of the existing structures and directed design of the associated repairs. In addition, assembled a cost estimate for construction and was involved with bidding, preparing technical specifications, response to contractor submittals and construction inspection.

B-23 Canal Dredging and Seawall Repair, City of Port Orange, FL – Project Manager. Successful Environmental Resource Permitting through DEP and ACOE. Prepared detailed cost estimates for different methods of dredging and seawall replacement. Conducted presentations and directed meetings with City Staff, City Commissioners, and Concerned Citizens to inform and provide options. Coordinated cooperation between City, Florida Inland Navigation District, and Army Corps to provide the most cost effective dredging solution. Assisted with bidding, pre-bid meeting, technical specifications, response to contractor submittals and certified contractor pay requests. Performed onsite construction inspection and provided weekly reports to client on construction progress.

Riverwalk Park, Port Orange, FL– Project Manager. Coordinated architect, landscape architect, electrical engineer, geotechnical investigation and surveying to design the City's premier waterfront park. Design included a new timber boardwalk, kayak/canoe launch, trailway, splashpark, playground, two (2) restroom/concession buildings, a wavebreak and landscaping/irrigation. Completed all environmental resource permitting. Assisted with bidding, pre-bid meeting, technical specifications, response to contractor submittals and certified contractor pay requests. Performed onsite construction inspection and attended bio-weekly progress meetings with City and contractor staff.

Causeway Park & Public Shoreline Stabilization, City of Port Orange, FL– Ecologist/Project Manager. Provided environmental resource permitting review, site assessment, bid document preparation, coordination with regulatory agencies and funding agencies such as DCA. Oversaw and inspected all construction and acted as liaison between contractor and City. Conducted interviews and fulfilled requirements of Davis-Bacon Act.

City of Port Orange Parks & Public Shoreline Protection, City of Port Orange, FL – Project Manager/ Ecologist - Shoreline stabilization and armoring of city parks. Evaluated 23 sites for potential ecological impacts. Completed environmental resource permitting through FDEP, SJRWMD, and ACOE. Assisted with construction inspection and reporting. Involved in Bid preparation, Pre-bid meeting, Grant compliance, and Contractor Coordination. This project included the B-23 Canal.

Palatka Riverfront Park Improvements, Palatka, FL – Ecologist - Assisted with mitigation planning, and completed all permitting with FDEP and USACOE. DMC assisted the client with securing funds to leverage the development of the overall project and with estimating costs for various components of the project as part of the long term strategy to develop the project.

PROJECT EXPERIENCE (CONT'D)

Square Lake/East Slough Restoration Project, Palm Beach County – Onsite Inspector. Created and implemented environmental compliance plan, turbidity monitoring, notification and daily reporting to regulatory agencies.

Panama City Dredging and Seawall Projects, Panama City FL – Project Ecologist - This project involved field data collection and dredge plan design in relation to submerged and shoreline vegetation. Assisted with plant identification in water and uplands as well as permitting. Assisted with Bid document preparation and review. Reviewed project drawings and assisted with permit responses pertaining to ecological issues.

Lake Rowell Sediment Core Sampling, Florida Wildlife Conservation Commission, Lake Rowell, FL – Ecologist. Complete chemical and physical sampling to a depth of fifteen feet below sediment surface throughout a 350 acre lake in compliance with FDEP Sediment Sampling Standard Operating Procedures.

Russell Property ADA Compliant Canoe & Kayak Landing Facility, Port Orange, FL – Project Manager. Completed all environmental resource permitting through FDEP and the Corps. Coordinated all geotechnical investigation and surveying. Conducted protected vegetation survey and coordinated with engineers to avoid impacts to environmental resources. Assisted with bidding, pre-bid meeting, technical specifications, response to contractor submittals and certified contractor pay requests. Performed onsite construction inspection and provided weekly reports to client on construction progress of the observation deck, and a kayak and canoe accessible floating dock.

Waterways & Canals Dredging, City of Port St. Lucie, FL – Project Manager/Ecologist. Assessment of 11 residential canals connected to the St. Lucie River North Fork (an aquatic preserve) for dredging feasibility. Completed all sediment sampling, shoreline and submerged aquatic vegetation surveys, dock and seawall condition surveys, and successful Environmental Resource Permitting through DEP and ACOE. Coordinated hydrographic and upland surveys. Complete Dock and Seawall condition survey. Assisted in dredging methodology and potential disposal/offload site development.

Reed Canal Access Channel, Halifax River (ICW), City of South Daytona, FL – Ecologist. Project to create navigation access channel. Assisted with environmental resource permitting, conducted physicochemical sampling of water, sediment, and benthic community. Assisted in dredging methodology and potential disposal/offload site development. Prepared grant applications, cost estimates, and project presentations.

Ponce Inlet Side Channel Maintenance Dredging, Ponce Inlet Port Authority, Town of Ponce Inlet, FL – Project Manager, Ecologist. Complete permitting of channel dredging and on-beach spoil disposal through DEP's Coastal Construction Control Line Division. Coordination of Topo and Hydro Survey, Geotechnical Investigation, Resource Surveys, and Commercial Operations dependent on adequate navigation.

Sunplash Park Seawall Extension, Volusia County, FL – Project Manager/Ecologist. Coordination with County staff to construct a public friendly addition to an existing seawall and stormwater maintenance system. Reviewed project drawings for compliance with all environmental codes. Successfully completed permitting through DEP's Coastal Construction Control Line Division. Performed onsite construction inspection and provided weekly reports to client on construction progress.

PROJECT EXPERIENCE (CONT'D)

Dredge Material Disposal Site Assessments, St. Lucie County, FL – Ecologist. Assessed seven upland sites as potential temporary and permanent sediment disposal areas. Sites were evaluated for environmental resources, threatened and endangered species (including scrub jays and gopher tortoises), engineering practicality, and proximity to dredge project. Coordinated with the county's environmental, public works, and airport staff as well as with state and federal regulatory agencies.

Taylor Creek Emergency Shoreline Stabilization, St. Lucie County, FL – Project Manager, Ecologist, Onsite Inspector. Completed Permitting through DEP, ACOE, and SFWMD. Coordinated all necessary survey and geotechnical work. Inspected construction and ensured project completion within NRCS grant timeline. Assisted with as-built review, materials confirmation, and contract closeout.

Taylor Creek Restoration Dredging and Shoreline Stabilization, Phase 2 & 3, St. Lucie County, FL – Dredging and Shoreline Stabilization of SFWMD diversion canal. Assisted with all biological and ecological assessments, including threatened and endangered species, particularly seagrasses, mangroves, gopher tortoise survey and relocation, scrub jay survey and endangered plant survey. Assessed 7 separate parcels for spoil site location. Coordinated with FDEP, ACOE, SFWMD, and FWC to obtain permits. Prepared and conducted pre-bid and pre-construction meetings and construction inspections.

Anclote River Maintenance Dredging, City of Tarpon Springs, FL– Onsite Inspector. Prepared and implemented environmental compliance plan, turbidity monitoring and daily inspection. Created weekly reports for compliance with regulatory agencies and County. Coordinated work with City staff and Client (Contractor)

Summerall Park Boat Ramp and Park Improvements, City of Tavares, FL – Ecologist- Completed resource survey, sediment sampling and analyses, mitigation plan, and environmental permitting.

Wooton Park Boat Ramp Extension Dredging, City of Tavares, FL – Project Ecologist. Completed successful time sensitive Environmental Resource Permitting. Assisted in assessing the shoreline vegetation along with sampling and evaluation of resources within the channel template to be dredged along boat ramp.

Canal Conveyance Capacity Program Phase 1, South Florida Water Management District – Ecologist/ Inspector. Field reconnaissance of 45 miles of canals for conveyance capacity. Report writing on feasibility and cost estimate to dredge and repair areas of concern discovered during field reconnaissance. Assess all canal wetland and vegetation impacts.

Canal Conveyance Capacity Program Phase 2, South Florida Water Management District - Ecologist/ Inspector. Assessment of approximately 5 miles of existing G-16 drainage canal for the SFWMD Canal Conveyance Capacity Program in Broward County. Reviewed as-built plans and surveyed the entire canal right-of-way including: documentation of existing conditions, focusing on areas of potential canal bank erosion and failure, outfall pipe and structure replacement needs and sediment accumulation mapping within the canal. Completed water quality and sediment testing for both physical and chemical parameters. The chemical parameters included metals, nutrients, pesticides, herbicides, PAHs, Oil and Grease, specific conductance and pH. Provided a Final report documenting all the conditions, findings and recommendations for repair and associated costs.

Dredging & Marine Consultants
DMC
ENGINEERS • SCIENTISTS

CURTIS N. TODD, P.E.
SENIOR PRINCIPAL ENGINEER

Mr. Todd has been with **DMC** for 10 years and has over 35 years of experience in the field of Civil and Marine Structures Design & Engineering. He is knowledgeable in dredging, transportation design, site development, waterway parks and infrastructure projects. He has designed and permitted a vast number of projects, ranging from stormwater structures and surface water management; dredging, seawalls, boat ramps, docks, marinas and shore stabilization; residential, commercial, industrial and recreational development plans; roadway and interchange designs, bridges; permitting to construction, inspection and compliance monitoring. He brings his experiences of design from all parts of the state as well as nationally. Mr. Todd also coordinates site plans with Architects to provide well designed multifaceted projects. He has permitting experience with local, county, state and federal government agencies, including Water Management Districts, Florida Department of Transportation, Florida Department of Environmental Protection and the U.S. Army Corps of Engineers.

EDUCATION

- Pre-Engineering – Southern Illinois University, Carbondale, Illinois
- Civil Engineering – University of Akron, Akron, Ohio

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- Professional Engineer Registration, Florida, No. 37136

PROJECT EXPERIENCE

Surfside Estates, Beverly Beach, FL – Senior Project Engineer. Responsible for all engineering, design, permitting with City and FDOT on roadway entry redesign, plans, specifications and on-going construction inspection.

Halifax Harbor Marina North & South Basin Dredging, Daytona Beach, FL – Project Engineer. Assisted with upland disposal site drainage and containment issues. Verified material behavior and property assessment.

Sunsplash Park Seawall Extension & Stormwater Improvements, Daytona Beach, FL – Project Engineer. Designed and engineered a public friendly addition to an existing seawall and stormwater maintenance system located in Daytona Beach. Plans included sidewalk reconfiguration, a beach access structure and additional park amenities. Reviewed project drawings for compliance with all environmental codes. Successfully completed permitting through DEP's Coastal Construction Control Line Division.

Sun Glow Pier Seawall and Beach Access Structure Replacement, and Stormwater Improvements, Daytona Beach Shores, FL – Sr. Project Engineer responsible for replacement design of a collapsed seawall and adjoining parking lot and beach access facility. The plans included an exfiltation trench drainage design for the parking lot area.

PROJECT EXPERIENCE (CONT'D)

Riverside Park Pier & Bulkhead Replacement Design, New Smyrna Beach, FL – Coastal Engineer. Assisted with design of approximately 1000 linear feet of bulkhead repair including deadmen replacement, epoxy injection of concrete sheet-pilings and cap replacement. Reviewed plans for constructability and provided complete cost estimation.

Home Depot Stormwater Improvements, Palatka, FL – Sr. Project Engineer. Responsible for design of 100 feet of spreader swale and 10 feet high concrete retaining wall for stormwater pond improvements. Project included coordination with St. Johns River Water Management District for permit modification.

Palatka Riverfront Park Improvements, Palatka, FL – Project Engineer. Reviewed all plans related to all water related structures; ramp, boat docking, marina, assisted the client with estimating costs for various components of the project as part of the long term strategy to develop the park. Completed project QA/QC.

B-23 Canal Dredging and Seawall Repair, Port Orange, FL – Project Engineer/Engineer of Record. Reviewed plans for constructability, designed seawall repair components and provided in-field inspection of existing structures. Evaluated impacts to shoreline trees and compliance with City codes.

City of Port Orange Parks & Public Shoreline Protection, Port Orange, FL – Project Engineer/Engineer of record. Responsible for design of re-armoring 225 linear feet of cap stone and 215 feet of rock revetment for Causeway Park and avoiding shoreline and wetland impacts. Project included bidding, construction administration, inspection and project closeout. Coordinated all design work with FDOT and SJRWMD to meet its requirements. Provided all documentation to acquire lease agreement with City (client) and FDOT to use its right-of-way. Project included the B-23 Canal and right-of-ways.

Port Orange Causeway Park Shoreline Stabilization, Port Orange, FL – Project Engineer. Responsible for design of re-armoring 225 linear feet of cap stone and 215 feet of rock revetment for Causeway Park, ensuring new structures will not impede existing stormwater and surface drainage. Project included bidding, construction administration, inspection and project closeout. Provide QA/QC for project design, coordination with FDOT for right-of-away use.

Russell Property ADA Compliant Canoe & Kayak Landing Facility, Port Orange, FL – Project Engineering/ Engineer of Record. Ensured all design work conformed to FDEP rules for construction of piers over and in Outstanding Florida Waters. Provided all documentation to acquire lease agreement with City (client) and FDOT to use its right-of-way.

Taylor Creek Restoration Dredging, Phase 2, St. Lucie County, FL – Project Engineer. Evaluated seven potential upland disposal areas. Designed a new 20 acre disposal area to contain 90,000+ cubic yards of dredge spoil. Engineer of record for site survey coordination, monitoring well installation and compliance, geotechnical drilling, soils analyses and final berm cross-section and design, including stormwater management of the site.

Taylor Creek Restoration Shoreline Dredging, Phase 3, St. Lucie County, FL – Engineer of Record. Reviewed design of the rock revetment structure along 2, 000+ linear foot of shoreline along the C-25 Canal (Taylor Creek).

PROJECT EXPERIENCE (CONT'D)

Conveyance Capacity Evaluation Project, South Florida Management District (SFWMD), FL – Design Engineer. Assisted in collecting design and construction information for the reporting and analysis of 96 miles of canals in SFWMD area.

Aesop's Park-Dog Park and Park Improvements, Tavares, FL – Project Engineer. Responsible for engineering, permitting, and all bid drawings and specifications for the design of dog park, pavilion, waterline and resource impact minimization of associated facilities. Reviewed quotes for contractors to make recommendations to City.

Summerall Park Boat Ramp and Park Improvements, Tavares, FL – Sr. Project Engineer. Responsible for design of ADA boat ramp system, which included 30 long aluminum access ramp and a 20' long floating dock. Additional park improvements consisted of ADA restroom building, pavilion and parking facilities. Coordinated all stormwater, parking, dredging, boundary surveys, property verification, material disposal, and Americans with Disabilities Act (ADA) compliance for access to accessory docks.

Woodlea Sports Complex, Tavares, FL – Project Engineer. Responsible for design of 40-acre sports park, which includes 10 playing fields for baseball, softball and soccer in accordance with the City's master plan. Design includes grading, stormwater, parking, traffic flow, amenities, buildings, wetland conservation and ADA compliance.

Wooton Park Boat Ramp Dredging, Tavares, FL – Design Engineer. Evaluated the potential redesign of the Wooton Park Boat Ramp. Also assessed possible upland structure in relation to drainage for conceptual plan.

Wooton Park Marina and Seaplane Base, Tavares, FL – Design Engineer. Evaluated the 88-slip floating dock marina with special floating dock slips to accommodate pontoon type and belly-landing type seaplanes. The facility also includes an overwater fueling station and boat ramp, both accommodating seaplanes. Performed construction inspection of the jetting of concrete piles and lateral load testing of piles for this system.

Ed Stone Park Seawall Replacement, Volusia County, FL – Project Engineer. Designed and engineered the replacement of an existing deteriorating sand-cement seawall with a safer, more user-friendly seawall.

Southport Business Center, Charlotte County, FL – Design Engineer. Responsible for design of the Southport Business Center.

Drainage Improvements, City of Atlantis, FL – Design Engineer. Responsible for the development of drainage plans for drainage improvements for the City of Atlantis, FL. The project involved coordination with the necessary permitting agencies, development of contract specifications, assisting with bidding and construction services.

Palm Tran Bus Satellite Facility, Delray Beach, FL – Design Engineer. Developed paving, drainage, water and sewer plans form a Palm Tran Satellite Bus Maintenance and Administration Facility. The site consisted of 7.5 acres, which also included the design of a wastewater lift station. Project included applying for and obtaining permit approval for water and sewer facilities from its appropriate regulatory agencies. This project also included detention pond and exfiltration trench design.

WILL B. CORNELIUS II, P.E.
GEOTECHNICAL ENGINEER

Mr. Cornelius has over 12 years of experience as a project engineer and manager for various geotechnical and construction materials testing and inspection projects in Florida and the Caribbean. In addition to strong client interaction and management skills, Will has technical knowledge and practical experience with a wide range of projects, including canals, levees, drainage and water management facilities, bridges, roadways, infrastructure, power plants, hospitals and residential and commercial developments. His geotechnical duties have included managing field subsurface explorations and providing foundation and site preparation recommendations. He has also monitored the implementation of conventional site preparation procedures and specialty ground improvement techniques such as Vibro-Replacement, Jet Grouting, and Rigid Inclusions, as well as the construction of deep foundation systems and earth retaining structures for numerous projects. Will has vast experience in construction inspection particularly related to earthen damns and canal and shoreline bank compaction and stability analysis.

EDUCATION

- B.S., Civil Engineering, University of Central Florida, 2002
- M.S., Structures and Geotechnical Engineering, University of Central Florida, 2004

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- Professional Engineer, Florida No. 67538
- Florida Engineering Society (FES)
- Florida Institute of Consulting Engineers (FICE)
- National Society of Professional Engineers (NSPE)

AREAS OF EXPERTISE

- Geotechnical Engineering
- Evaluations of Existing Canals, Levees and Earthen Dams
- Slope Stability and Seepage Analyses
- Driven Pile Foundation Design
- Seawall and Bulkhead Design
- Bidding Assistance
- Technical Specifications for Geotechnical Aspects
- Construction Materials Testing and Inspections
- Field Resolutions
- Field Inspections of Existing Canals, Levees and Earthen Dams
- Soil and Concrete Field and Laboratory Test Reports
- Project and Construction Inspection Management
- Compliance with Geotechnical Specifications
- QA/QC During Construction

PROJECT EXPERIENCE

Platts Creek Stormwater Structure Improvements, St. Lucie County, Florida – Project Engineer. Coordinated the topographic survey field work and performed geotechnical site investigation of the existing conditions, and is currently designing plans necessary for the repair of the existing undermined wall and other desired improvements at the Platts Creek Stormwater Structure.

PROJECT EXPERIENCE (CONT'D)

Kingsway Canal Shoreline Improvements, Port St. Lucie, St. Lucie County, Florida – Project Engineer. Designed 16,375 linear feet of steel sheet pile bulkhead wall along the Kingsway Canal in Port St. Lucie. Also prepared a cost estimate, provided QA/QC review of grading and stormwater design, and coordinated additional topographic survey field work.

Taylor Creek (Site 7) Shoreline Emergency Repair Visual Inspections, St. Lucie County, Florida – Project Engineer. Performed a visual inspection of the 6 year old steel sheet pile bulkhead wall located on the east side of Taylor Creek in Fort Pierce, to observe the general condition of the bulkhead wall and to make note of any conditions that would merit remedial actions. Observations were submitted in a written report upon conclusion of the visual inspections.

Taylor Creek Restoration Dredging Phase II, St. Lucie County, Florida – Project Engineer. Observed the reconstruction activities of a portion of an interior slope of the Dredged Material Management Area (DMMA) that was damaged during the dredging activities, assisted with the monitoring of dredged material removal activities from the DMMA site, and submitted As-Built Certifications to FDEP and USACE.

Old Fort Park Stormwater Baffle Box Project Phases I & II, St. Lucie County, Florida – Project Engineer. Coordinated the topographic survey and geotechnical exploration field work, and is currently assisting with the engineering design and permitting services associated with Phase I of the Stormwater Baffle Box project. Will also assist with Phase II of the project, which includes shoreline habitat evaluation and design and associated permitting services.

Technical Evaluation of the Western Perimeter Levee of STA-3/4, Palm Beach County, Florida
Responsibilities included coordinating the subsurface explorations and laboratory tests, and serving as the project engineer for the various tasks associated with the evaluation of the existing 2.7± mile levee.

MacArthur Boulevard Reconstruction Project, Stuart, Martin County, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for this project, which included recommendations for the reconstruction of the roadway that was impacted during the hurricane events of 2004, sheet pile retaining walls, and beach renourishment.

Lykes Brothers BMPs 2, 3 and 4 & 5, Glades and Highlands Counties, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for these projects, which included recommendations for the proposed impoundment dikes, borrow canals and pump houses. Recommendations for the installation of driven piles to support two proposed 36-inch pipe crossings over an existing Lykes Brothers canal were also provided.

Langford Landing Docking Facilities, Jensen Beach, Martin County, Florida
Responsibilities included coordinating the subsurface exploration and preparing a geotechnical engineering evaluation for this project, which included recommendations for the installation of driven piles for the proposed 62-slip marina on the St. Lucie River.

Western Palm City Corridor, Martin County, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for this project, which included recommendations for the 5.5± mile roadway, mast-arm lighting and bridges spanning the C-23 Canal and Bessey Creek.

PROJECT EXPERIENCE (CONT'D)

Torrey Pines Institute for Molecular Studies, Port St. Lucie, St. Lucie County, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for this project, which included recommendations for the support of the columns of the three-story research laboratory building on augercast concrete piles and the support of the tilt-up and weight bearing walls on conventional shallow foundations. During construction, responsibilities included monitoring the load test performed on a test pile, monitoring the installation of production augercast piles, and subsequent engineering analyses and reporting.

Civic Center at City Center, Port St. Lucie, St. Lucie County, Florida
Responsibilities included coordinating the subsurface exploration and preparing a geotechnical engineering evaluation for this project, which included site preparation and foundation design recommendations for the construction of the new civic center building. To accommodate the structure, recommendations for the reclamation of a portion of an existing retention pond and a retaining wall were also provided.

FPL St. Lucie Power Plant – LLW Storage Facility, St. Lucie County, Florida
Responsibilities included coordinating the subsurface explorations and preparing a geotechnical engineering evaluation for this project, which included recommendations for the implementation of the Vibro-Replacement ground improvement technique to allow the support of the proposed structure on shallow foundations. During construction, responsibilities included monitoring the implementation of the Vibro-Replacement technique.

Floresta Drive Pedestrian Bridge Project, Port St. Lucie, St. Lucie County, Florida
Responsibilities included coordinating the subsurface exploration and preparing a geotechnical engineering evaluation for this bridge project over the Elkcam Canal, which included an augered, cast-in-place pile foundation system.

Old Dixie Highway Pedestrian Bridge, Indian River County, Florida
Responsibilities included coordinating the subsurface explorations and preparing a geotechnical engineering evaluation for this pedestrian bridge over the North Relief Canal that included a driven pile foundation system.

JOEL SCOTT STEWARD
ESTUARY WATER RESOURCES MANAGER

Joel Steward has 33 years of experience in water quality and estuarine ecology with an emphasis on eutrophication science and water quality criteria related to seagrass and shellfish protection. Mr. Steward specializes in estuarine environmental planning, including remediation strategies that require involvement of multiple agencies or partnerships; developing and overseeing diagnostic and other research projects; and managing environmental watershed projects. He managed several state-mandated and regional planning initiatives such as the Indian River Lagoon (IRL) Reconnaissance Report (NOAA and FDER/CZM), Indian River Lagoon Surface Water Improvement and Management (SWIM) Plan, Turkey Creek and Sebastian River watershed initiatives, the C-1 Canal Re-diversion Project, an IRL muck-sediment dredging prioritization plan; and he assisted in the development of other plans such as the IRL restoration plan for impounded wetlands, the National Estuary Program plan for the IRL system and the SWIM plan for the Northern Coastal Basins (Tolomato, Matanzas, and Halifax R. estuaries). Mr. Steward was the lead scientist on many applied research projects that have led to the establishment of major resource management targets for water quality (and desirable trophic state) and the improvement or protection of shellfish, seagrass, and coastal wetland habitats. Examples of these research projects include the determination of restored seagrass depth limits and related light targets, salinity targets and related freshwater discharge criteria, nutrient loading limits for the IRL and NCB systems (the IRL loading limits were adopted by FDEP as TMDLs), and proposed numeric nutrient criteria for the IRL and NCB systems. Mr. Steward also directs the water quality and habitat monitoring program for the IRL system that focuses on assessing seagrass coverages and their water quality requirements, and the state of coastal wetland resources. He has also been the lead technical manager for watershed-scale projects including the Turkey Creek muck dredging project and the C-1 Re-diversion Project, which were both originally proposed and initiated by Mr. Steward. Currently, he is working with a team of experts that are evaluating the algal blooms that caused faunal and floral resources impacts within the Indian River Lagoon.

EDUCATION

- B.S. Biology, College of William & Mary
- M.S. Bio-Environmental Oceanography, Florida Institute of Technology

PROFESSIONAL AWARDS

- Marine Resources Council: 1988 Outstanding Service Award toward coastal restoration
- NOAA: 1992 Coastal Zone Management Excellence Award nominee
- SJRWMD: 2008 Employee of the Year nominee

PROFESSIONAL AFFILIATIONS

- American Society of Limnology & Oceanography
- Coastal and Estuarine Research Federation
- Southeastern Estuarine Research Society
- Florida's Marine Numeric Nutrient Criteria Committee
- Co-Chair of IRL NEP Technical Advisory Committee

AREAS OF EXPERTISE:

- Scientific acumen
- Versatility and integrity
- Technical/scientific writing and meeting presentations
- Resource management planning
- Project design
- Coastal resource knowledge (specifically NE Florida)
- Supervisory and communication skills

PROJECT EXPERIENCE

Manages a wide range of environmental assessment, protection, and restoration projects in the coastal watersheds of Northeast and East Central Florida (extending over 1/3 of Florida's east coast), including:

- Monitoring of seagrasses and associated water quality, coastal wetlands, potentially toxic substances (metals, organics), and algal blooms;
- Comprehensive ecosystem restoration planning (e.g., developed the state's Indian River Lagoon (IRL) Surface Water Improvement and Management Plan, a precursor of the IRL National Estuary plan);
- Ecological process/ diagnostic studies with an emphasis on eutrophication and related target setting (e.g., estuarine TMDLs and numeric nutrient criteria for Florida);
- Feasibility studies for seagrass and water quality restoration strategies;
- Watershed planning specific to nutrient and TSS load reduction strategies; and
- Management of restoration projects (e.g., muck sediment dredging, shoreline stabilization, surface water treatment, etc.);
- Other earlier work (1983 – 1985) included an investigation of drought effects on water quality in the Middle St. Johns River and a District-wide environmental evaluation of the reuse of treated wastewater;
- Supervision of 13 staff and the administration of multi-million dollar annual budgets

St. Johns River Water Management District (SJRWMD) - Technical Program Manager, Coastal Basins, Division of Environmental Sciences. Coastal Basins supervisor, lead scientist and programs manager.

(Positions held during 1980 – 2011):

1980 – 83	Laboratory Chemist. Environmental water quality analyses (trace metals, TSS, TDS, alkalinity, chlorophylls, etc.)
1984 – 86	Environmental Scientist II
1987	Environment Scientist III
1987 – present	Technical Program Manager

The types of project work conducted while in the Environmental Scientist and TPM positions listed above are reflected in the reports and presentations provided on the following pages.

Swoope Boat Ramp
New Smyrna Beach, Florida

Tab 2
Experience

The project sheets that follow this cover page illustrate DMC's marine engineering, planning and permitting experience along Florida's east coast. Each project brings a new set of challenges and we believe a holistic approach to every project provides the greatest insurance for success. Our team has over 100 years experience in the design of marine and waterfront projects. Let DMC guide you through your next project!

DMC has not submitted or been granted a change order related to engineering services during any of the projects depicted in the following project sheets. We believe that clear communication with our clients at the very beginning of the project eliminates the need for changes in the scope and unwanted changes in engineering fees. This relates to timelines as well, clear communication with the client about long lead items such as environmental resource permitting is necessary to develop a project schedule that can be met.

DMC has not received any citations, violations or been involved in any litigation within the last three (3) years.

Riverside Park Bulkhead & Wharf Repair

City of New Smyrna Beach, Florida

Project Completed: **2012**
Engineering Fees: **$93,200**
Construction Cost: **$950,000**

Dredging & Marine Consultants, LLC **(DMC) working as a sub-consultant to Quentin Hampton and Associates, Inc. assisted the City of New Smyrna with assessing and designing the repair of the failing bulkhead at Riverside Park. This park is the center of the community and plays host to countless art festivals, concerts, fishing tournaments, a water taxi, etc. Project tasks included an existing structure assessment and corresponding report, City staff and stakeholder consensus building, construction cost estimation, FIND grant application assistance, design and permitting.**

Swoope Site
Public Boat Launching Facility
City of New Smyrna Beach, Florida

Completed: *2014*
Engineering Fees: $93,200
Construction Cost: $950,000

DMC was selected by the City of New Smyrna Beach to design and permit a public boat ramp and parking facility capable of holding 50 trucks and trailers. DMC worked with Quentin Hampton & Associates to develop a master plan for the project and will be responsible for all marine components, environmental resource permitting and compatibility with new stormwater systems. In addition, DMC submitted applications for Phase 1 (Design & Permitting) and Phase 2 (Construction) grants through the Florida Inland Navigation District (FIND). DMC was successful in securing nearly $50,000 for Phase 1 and $490,000 in Phase 2 construction funds for the City.

North Causeway Boat Ramp & Fishing Pier Improvements

City of New Smyrna Beach, Florida

Project Completed: **2015**
Engineering Fees: **$24,260**
Construction Cost: **$825,000**

Dredging & Marine Consultants, LLC **(DMC) worked as a sub-consultant to Quentin Hampton and Associates, Inc. to assist the City of New Smyrna with assessing and designing the repair of the failing bulkhead and fishing pier at the North Causeway Boat Ramp. This facility is heavily used and needed to be repaired in order to provide a safe launching facility for the community. DMC assessed the existing structures, designed and permitted repairs, provided construction cost estimation, FIND grant application assistance and construction inspection.**

Services Provided:

- **Existing Structure Evaluation**
- **Repair Recommendations**
- **Cost Estimation of Repairs**
- **Engineering and Design**
- **FIND Grant Writing Assistance**
- **Construction Engineering Inspection Assistance**

Calore Canal Dredging

City of New Smyrna Beach

Project Completed: 2014
Engineering Fees: $27,000
Construction Cost: $120,000

DMC staff coordinated or completed all planning, surveying, materials testing, environmental assessment, engineering and permitting to dredge approximately 5,000 cubic yards from a residential canal. Coordination and planning with the residents of the canal was crucial to keeping the project on-track and ensuring that all parties where satisfied with the project outcome. DMC evaluated the site for any resources or potential resource impacts, including identifying any threatened and endangered flora and fauna within the projects area. This included in-water submerged aquatic vegetation (SAV) surveying. DMC generated all engineering and design drawings (plans) for the dredging and sediment disposal project.

Services Provided:

- Coordination of Surveying and Geotechnical Testing
- Complete Environmental Resource Permitting
- Dredge Template and Dredge Material Disposal Planning
- Submerged Aquatic Vegetation Survey
- Resident Coordination
- Cost Estimation

B-23 Canal Restoration Dredging & Seawall Replacement

City of Port Orange, Florida

Project Completed: Dredging 2011 / Seawall 2013
Engineering Fees: $87,000
Construction Cost: $1,800,000

Dredging and Marine Consultants, LLC (DMC) engineers and scientists were tasked with designing and permitting the restoration dredging and seawall replacement of the B-23 Canal. Permitting and coordination was completed through the Florida Department of Environmental Protection, U.S. Army Corps of Engineers and the Florida Inland Navigation District. This maintenance dredging project was part of the overall Rose Bay Restoration Project in Port Orange, Florida and DMC was able to coordinate the use of the same dredge equipment and disposal area as a cost saving measure for the City. In addition, DMC designed and oversaw the construction of shoreline stabilization at the MSA 434A Disposal Site as well as directed the facilities cleanup and sod establishment as part of the project closeout.

Services Provided:

- **Engineering and Design**
- **Sediment Sampling and Characterization**
- **Geotechnical Investigation Coordination**
- **Removing 20,000 CY of Sediments**
- **Design Replacement of 5,000 Linear ft of Seawall**
- **Public Engagement, Consensus Building and Presentations**
- **Construction Inspection and Management**

Port Orange Riverwalk Park

City of Port Orange, Florida

Project Completed: March 2016
Engineering Fees: $209,960
Estimated Construction Cost: $4.7 Million

DMC was tasked by the City of Port Orange to develop, design, permit and bid construction of the City's premier waterfront park. DMC staff conducted an environmental resource survey of the complete property in order to better guide the locating of the many improvements associated with park development. DMC also coordinated with the public and multiple stakeholders to develop a conceptual plan that will revitalize the local waterfront district. DMC developed construction plans and the project is currently under construction.

Services Provided:

- **Public Engagement and Consensus Building**
- **Coastal Structure and Stormwater Engineering**
- **Existing Conditions Report & Recommendations**
- **Environmental Resource Surveying**
- **Utility Coordination**
- **Environmental Resource Permitting with SJRWMD and USACOE**
- **Existing Seawall Rehabilitation**

Port Orange Riverwalk Park Phase 1A Construction Management

City of Port Orange, Florida

Project Completed: March 2016
Engineering Fees: $15,455

DMC was tasked by the City of Port Orange to review bids, shop drawing submittals, requests for information and provide engineering solutions during construction of Riverwalk Park Phase 1A. This included inspection of all waterfront components including a wavebreak, timber boardwalk, canal cross-over bridge and a kayak/canoe launch. In addition, DMC reviewed and approved pay applications throughout the construction, attended bi-weekly construction meetings and will provide as-built certification.

Services Provided:

- **Onsite Inspection**
- **Shop Drawing Review and Approval**
- **RFI Response**
- **Progress Meeting Attendance**
- **Pay Application Approval**
- **As-built Review and Certification**
- **Engineering Design & Bidding**

City of Port Orange Parks & Public Shoreline Protection

City of Port Orange, Florida

Project Completed: 2009
Engineering Fees: $100,000
Construction Cost: $320,000

Dredging and Marine Consultants, LLC (DMC), as a sub-consultant to Quentin L. Hampton, Inc., assisted the City with the evaluation of 23 public shoreline parcels and parks that were significantly impacted by the 2004-2005 hurricanes. Over 2 miles of natural and poorly armored shoreline were evaluated with structures such as rock revetments, natural vegetated shoreline and seawalls for floral resource impacts, current structural integrity, existing natural resources, and potential for improvement. Areas in need of repairs were identified and the required redesigns were performed to minimize cost of construction. DMC assisted with securing a Community Development Block Grant of $575,000 and coordinated work with DCA. DMC secured permits and exemptions from FDEP, SJRWMD, USACOE and DOT. DMC prepared construction bid documents, funding updates/reporting, and construction inspection.

***Services Provided*:**

- **Coastal Engineering**
- **Rock Revetment and Seawall Restoration Design**
- **Complete Environmental Resource Permitting through FDEP, SJRWMD, USACOE, and DOT**
- **Project Bidding**
- **Progress Reporting for Grant Agency**

Sunglow Seawall Repair & Stormwater Improvements

Volusia County, Florida

Project Completed: 2012
Engineering Fees: $23,687
Construction Cost: 350,000

Volusia County selected Dredging & Marine Consultants, LLC to design and permit the repair of the failed Sunglow Pier and Condo Association seawall and stormwater system. DMC engineers were able to improve the stormwater treatment and parking layout of this narrow beach access area. In addition, DMC provided construction administration and onsite solutions to this complex repair timetable for construction that was limited due to turtle nesting season.

Sunsplash Park Seawall Extension & Park Design

Volusia County

Project Completed: 2011
Engineering Fees: $21,400
Construction Cost: $330,000

Volusia County selected Dredging & Marine Consultants, LLC to design and permit the extension of their beach front seawall at Sun Splash Park in Daytona Beach. Storm surge and uncontrolled stormwater runoff had caused severe erosion along an 87 foot long section of unarmored shoreline bordering the park. DMC designed and successfully permitted the seawall extension, stormwater containment, sidewalk reconfiguration, beach access structure and native vegetation planting.

Taylor Creek Emergency Shoreline and Stormwater Stabilization

St. Lucie County, Florida

Project Completed: **2009**
Engineering Fees: **$185,000**
Construction Cost: **$376,000**

Dredging & Marine Consultants, LLC (DMC) successfully designed and permitted a 210 foot long retaining wall with rip-rap toe scour protection in Taylor Creek. Extreme erosion caused by years of high velocity discharge from Lake Okeechobee threatened a shopping center stormwater pond and parking lot. This erosion was accelerated during Tropical Storm Fay and enabled St. Lucie County to obtain a grant from NRCS to make the necessary repairs. DMC was tasked with completing this entire project in just 6 months, which was accomplished.

Summerall Park Waterfront and ADA Access Improvements

City of Tavares, Florida

Completed: 2009
Engineering Fees: $34,450
Construction Cost: $71,000

Dredging & Marine Consultants, LLC (DMC) permitted and designed an access channel to allow safe small boat access to the Dora Canal from the Summerall Park boat ramp through an environmentally sensitive area. In addition, DMC designed and successfully permitted the replacement of the existing dilapidated boat ramp, added an ADA compliant parking space, ramp, floating dock, restroom and pavilion. As project managers, DMC completed a submerged lands determination, bathymetric survey, shoreline and submerged vegetation survey, all environmental resource permitting, chemical and physical sampling of sediment, bidding, and inspection required to dredge approximately 550 cubic yards of sediment. DMC fulfilled all CDBG funding requirements as well as mitigation replanting and monitoring requirements.

Other

Our comprehensive team consists of firms with offices in the east central and northeast Florida area as illustrated in the map below. Additional information on our sub-consultant team members is presented in this tab, DMC has a very successful working relationship with these firms and we interact directly with the Principals/Branch Managers to provide the needed responsiveness and resources for our projects. In addition, these firms are extremely knowledgeable in working in marine and coastal systems. Our comprehensive team consists of the following firms or individuals, including DMC:

Dredging & Marine Consultants, LLC (Port Orange) - marine and coastal engineering, dredging planning & engineering, shoreline stabilization, waterfront parks planning, environmental resource permitting, site civil design, environmental assessments, cost or value engineering, construction management, and grant assistance.
Gerard J. Pendergast Architect, PLC (New Smyrna Beach) **–** building & structures architecture
Marquis Halback, Inc. (St. Augustine) - landscape architecture
Universal Engineering Sciences (Daytona Beach) – geotechnical testing
Arc Surveying & Mapping, Inc. (Jacksonville) – hydrographic surveying
Sliger & Associates, Inc. (Port Orange) - boundary and topographic surveying
Pace Analytical Services, Inc. (Ormond Beach) - sediment and water chemical testing

DMC Ongoing Projects

DMC has the following ongoing projects in the design or construction phase:

- City of Edgewater: Kennedy Park Seawall Restoration
- City of Port Orange: Riverwalk Park Phase 1A & 1B, Causeway Park Dock Replacement and City Center Shoreline Stabilization
- Volusia County: Blue Lake Boatramp, Shell Harbor Boat Launching Facility, Ponce Inlet Side Channel Dredging and Lemon Bluff Boat Launching Facility
- City of Daytona Beach: Ballough Rd. Bridge Expansion & Marina Village and Day Docks
- City of Holly Hill: Sunrise Park Boat Launch Facility Improvements
- City of Ormond Beach: Cassen Park Docking Facility and Breakwater
- St. Lucie County: Platts Creek Stormwater Repair, Old Fort Baffle Box and North Causeway Channel Markers
- Lake County Water Authority: Palatlakaha River M-5 & M-6 Structures Modification
- City of Tavares: Woodlea Sports Complex Lighting and Wooton Pavilion Storage Expansion

GERARD J. PENDERGAST ARCHITECT, PLC

FIRM OVERVIEW

Founded in New Smyrna Beach and Established in 2002, Gerard J Pendergast Architect, PLC has made a difference in the community. Mr. Pendergast "J" has worked closely with the City of New Smyrna Beach to develop a prototype restroom for public parks, including waterfront. He serves on many community boards and committees and works tirelessly for the architectural improvement of the area.

Gerard J. Pendergast Architect, PLC is a full service architectural firm with broad experience in multiple project types, commercial, residential, and public agency. Our team is capable of managing projects from the early stages of planning to certification of completion. By combining sound design and diligent management projects are completed on time and within budget. Personal service is reflective of the attention to detail every project receives. Successful projects are the main reason why the majority of our business is generated from repeat clients.

The firms standard of planning and design services produce innovative and sustainable solutions that meet our clients objectives and create works that tell the story of Florida's cultural, historical, environmental and artistic heritage.

The majority of my project team lives and work in Volusia County. In the event additional Architectural Staff is needed recruitment will be from Florida Architectural Universities and will provide additional professional employment in New Smyrna.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

The project consists of constructing a new boat ramp, parking and restroom facility at an existing City site that currently is shared by Volusia County and UCNSB. The items to be constructed include a 40 ft wide boat ramp with floating docks, a two stall restroom building with solar power, drainage system – eleven (11) structures and 950 LF of storm pipe with retention area, grinder lift station with 2,300 LF of 1½ inch force main, 9,000 SY of asphalt pavement and 5,500 SY of shell parking area, and numerous site improvements such as sidewalk, benches, railings, etc.

QLH obtained the services of J. Pendergast, Architect, to provide the restroom building design and construction documents. The restroom building is completely off the grid using photovoltaic panels and a standby battery system. The facility was designed for ease of maintenance and long term durability. It was built successfully at other municipal locations.

The construction cost for this entire project is $1,286,000.

Bridge of Lions Rehabilitation

Understanding the Past, Planning for the Future

Built in 1927, this historic bridge has undergone a complete rehabilitation.

As a member of the Bridge Design Team and responsible for the Public Participation Program and conceptual design, **Marquis Halback, Inc.** provided historic research and analysis, as well as landscape architectural design services for the improvement of the bridge's historic approaches and parks located on the east and west ends.

The final design focused on solving modern urban challenges, where issues like traffic and pedestrian circulation were addressed within the most appropriate historic context.

Matanzas River Historic Seawall

Preserving Yesterday, Protecting for Tomorrow

The Seawall Reconstruction Project is a result of tropical storm and hurricane damage to the historic seawall built in 1833 by West Point cadet engineers.

Marquis Halback, Inc. was hired to determine the feasibility of this flood control project. Duties included researching pertinent issues, synthesizing the information into easily understandable graphics and reports, and presenting it to citizens in a series of carefully planned public meetings and design workshops.

By integrating the City's goals, citizens' priorities, and solid urban design and engineering principles, the project has been funded by FEMA.

Florida State Parks

Little Manatee River State Park & Deleon Springs State Park

The landscape architect was commissioned as prime consultant to develop plans for Little Manatee River Sate Park. Following the development of a master plan, **Frederick Halback**'s team developed 2.5 miles of roadway, parking areas, picnic facilities, canoe launches, camping areas, and trailheads for hiking and horseback riding.

At Deleon Springs State Park, the landscape architect worked with the State of Florida Department of Natural Resources to develop plans for an improved entry road, parking, swimming area and bulkhead that blended into the natural surroundings. Today, the spring is visited by thousands of park guests who swim, fish, and paddle canoes in the beauty of 'Real Florida.'

Lake Eola Park

Downtown's Living Room

Lake Eola Park returned to the public an important downtown open space. **Frederick Halback** developed a timeless plan and as the prime consultant addressed a multitude of issues, such as downtown economic development, image, event production, urban linkages, and safety.

Working with the City, Civic Groups, Police, adjacent businesses and residential participants, a comprehensive plan was developed. The urban park provides over one (1) mile of lake front for major downtown events, from art festivals to concerts, holiday events, and fireworks.

It is the downtown living room used by locals and visitors and has become the most photographed element of downtown.

About Universal Engineering Sciences

WHO WE ARE

Universal Engineering Sciences, Inc., is one of the oldest and most recognized professional engineering consulting firms in the State of Florida serving the southeastern United States. Our broad client base includes many prominent corporations, developers, designers, planners, contractors, public sector agencies, municipalities, architectural, engineering firms and amusement companies. Universal has earned a reputation for providing responsive, reliable service, sound technical engineering support, and stability in the industry. The company has been ranked each year consecutively by Engineering News-Record as one of the Top 500 Engineering Design Firms in America since 1985. Universal's long-term presence in the design and construction industry provides several additional advantages; most important are: local experience, quality service, and reliability.

WHAT WE DO

Our wide range of in-house services includes: geotechnical engineering, subsurface exploration and environmental drilling, construction materials testing and threshold inspection, building code compliance inspection and plan review, geophysical services, and a wide range of environmental sciences. We have been providing our dynamic line of services to clients across the United States in the design and construction industry since 1964.

HOW WE'RE DIFFERENT

Universal's uniqueness is due, in part, to our being completely family-owned and operated. The company was founded in Merritt Island, Florida, in 1964 by Mr. Sy Israel, who remains actively involved in the firm as our chairman and chief executive officer. His son, Mark C. Israel, PE, is president of the company, running the day-to-day operations. Unlike many large corporations and conglomerates, both Sy Israel and Mark Israel are accessible to clients and staff—they are involved and they care! This factor, combined with the stability of ownership and management staff, as well as our committed to service philosophy, has contributed to our continued success, growth and longevity in the business. Universal's family-oriented work environment and excellence-in-service incentive programs help maintain the long-term employment of many highly qualified and dedicated professional and technical personnel committed to providing our clients with superior customer service, rapid response times, technical accuracy and on-time reporting.

WHERE WE ARE

Universal's corporate office, located in Orlando, Florida, is supported by 17 additional branch offices strategically located throughout Florida and Georgia. This coverage ensures that our clients receive responsive, quality service, and that we will always be there when you need us. The Universal family is currently comprised of nearly 600 experienced professionals and support specialists who are dedicated to solving problems, developing innovative ideas and time and cost-saving techniques (value engineering) for our clients. The continued growth of our "family" can be attributed to our wide range of satisfied clients, continued referrals, repeat business and market-expanding efforts.

WHY YOU NEED US

Universal's history, experience, organization and approach to doing business all combine to make us a unique engineering firm. Our priority is to see that our clients' objectives are met within budget; projects are implemented on schedule; and all quality and service requirements are fully satisfied. Our philosphy is to meeting the needs of our clients by doing whatever it takes.

Arc Surveying & Mapping, Inc.

Arc Surveying & Mapping, Inc. is a multi disciplined company with offices in Jacksonville and Melbourne, Florida and Memphis, Tennessee. Since 1986 Arc has helped public and private sector clients to achieve their goals by collecting and providing accurate, reliable, cost effective topographic and hydrographic data.

Arc is staffed by an innovative team of professionals, each committed to excellence. Our surveyors and mappers are equipped with modern topographic and hydrographic equipment and can transmit digital survey data directly from any jobsite to Arc offices or those of our clients.

Arc is especially proficient with surveys that require quick turn around, such as large earthwork construction, dredging and navigation projects. Clients include the ACOE, DOT, NOAA, USCG, many construction companies and most major engineering companies.

Arc's maps are available in all computer formats, including MicroStation and AutoCAD. The company is continually raising the competitive bar by providing clients with interactive 3D models and holograms which are among the most compelling visualization products in the world.

SLIGER & ASSOCIATES
incorporated

Founded in 1974 by Gus A. Sliger, former Chairman of the Florida State Board of Land Surveyors, Sliger & Associates, Inc. is the largest full-service professional land surveying firm in East Central Florida. When performance, reliability, and professionalism count, our reputation speaks for itself.

For more than thirty years, Sliger & Associates' team of professionals has provided complete customer service, consistent timeliness and accuracy, pioneering use of industry technology, great employees, and commitment to community service. When performance, reliability, and professionalism count, our reputation speaks for itself. We have successfully served the governments, businesses, and citizens of Central Florida since 1974.

Sliger & Associates brings more than 300 years of combined surveying experience to every project. Along the way, we pioneered much of the surveying technology in our area. Sliger & Associates was one of the first surveying companies to utilize GPS, robotics, laser and digital data collection in surveying. Sliger & Associates brings more than 300 years of combined surveying experience to every project. Sliger & Associates is licensed and qualified to provide most any type of survey, including: As-Built, Boundary, Condominium, Construction Layout, Control, Hydrographic, Mean High Water Line, Quantity, Right of Way, Topographic and Special Purpose surveys.

We currently have 25 employees who comprise our team of four Professional Land Surveyors, five Field Crews, a complete CADD department, an independent Research Department, and Administrative support.

RE: RFQ 04-16-ENG: Continuing Professional Engineering Services for Marine Applications Only Transmittal Letter

Dear Selection Committee:

Dredging & Marine Consultants, LLC (DMC) is grateful to have this opportunity to submit this qualifications package to City of New Smyrna Beach for the above referenced services. As a multi-disciplinary Engineering and Environmental firm established in Port Orange since 2002, DMC is excited to have this opportunity so we can directly work with the City its many waterfront projects. As indicated by our name, we specialize in marine related projects; DMC has worked as a sub-consultant for the City for almost a decade, and has helped the City secure funding through Florida Inland Navigation District for many of its projects. We are thrilled to have been an integral part of the City's growth and look forward to continuing to assist in improving the City's waterfront and coastal facilities. DMC can provide all the necessary skills the City has requested and has assembled a comprehensive team that we have worked with on multiple marine related projects; including projects for the City of New Smyrna Beach. Our sub-consultants include, Mr. Gerard J. Pendergast Architect, PLC; (Building Architect), Marquis Halback, Inc. (Landscape Architect), Sliger & Associates, Inc.; (Boundary and Topographic Surveyors), Arc Surveying & Mapping, Inc. (Hydrographic Surveyors), Pace Analytical Services, Inc. (Sediment and Water Testing), and Universal Engineering & Testing, Inc. (Geotechnical Investigations and Testing). This team brings local, state and nationwide experience in waterfront park development and is capable of producing signature designs for the City. Our engineers and scientists work hand-in-hand to provide well thought out, cost effective, pragmatic and resilient final products for our clients based on over 100 years of combined experience in the land-based, freshwater, estuarine and coastal environments within the State of Florida. We believe the hands on management, good communication and in-depth design and permitting experience DMC has demonstrated on previous City projects is the perfect fit to successfully develop the City's marine waterfront!

DMC has worked with many local governments, including the City of New Smyrna Beach and Volusia County, on multiple waterfront park projects, and the development of existing waterfront park amenities We believe that the City will greatly benefit from a team like DMC's that can provide comprehensive services and meet the aggressive timeline with deliverables. Furthermore our team is experienced in hosting public workshops, planning, design, engineering, permitting, environmental assessments, surveys, and coordination and reporting with regulatory agencies as well as the grant funding agencies. Besides FIND, DMC has assisted many of our clients in successfully securing funds such as Volusia ECHO, FRDAP, NRCS, CDBG, FEMA and FWC-FBIP. One of the key strengths of DMC, in addition to our expertise with marine applications, is our ability to listen to the needs of our clients, and offer guidance in planning and phasing projects so we can leverage grant funding to minimize the City capital layout.

4643 S. Clyde Morris Blvd., Unit 302 • Port Orange, FL 32129 • Phone: 386-304-6505 • Fax: 386-304-6506
spatel@dmces.com • www.dmces.com

I will be the Point of Contact for any work authorization under this solicitation and can be contacted at **4643 S. Clyde Morris Blvd., Unit 302, Port Orange, FL 32129; Tel: (386) 304-6505; Fax: (386) 304-6506; Mobile: (386) 846-4760; email: spatel@dmces.com.** I am authorized to represent DMC for any contractual services. I have been active in many organizations such as Volusia County Association for Responsible Development (VCARD Current Chair) and have facilitated workshops on waterfront developments and the CRAs in Volusia County. I am personally committed to ensuring that our work will create positive accomplishments that not only residents and visitors to the City of New Smyrna Beach can be proud of, but ones that the DMC team can proudly claim to be a part of for years to come.

I along with our project managers; Steve Kuhn, P.E., and Niles Cyzycki, B.Sc., will be involved in every aspect of any project to ensure the City that our qualified team will lead you comfortably and confidently within project budget, in a timely and responsive manner, as we do for all our projects. We will ensure consistent communication and updates on the project. **Our goal is to manage projects so that the City's Project Manager does not have to invest more than supervision time!** We look forward to continuing our professional relationship and being a part of the team that works on this exciting opportunity.

Over the last 13 years, we have proudly distinguished our company as a LOCAL Volusia County marine engineering firm for most of the Volusia County cities, as well as for the County as its current Coastal Consultant. We offer a holistic approach to all our projects so that the most efficient engineering and fiscal solution can be applied to any project we undertake.

Marine projects are our strength and we take great pride in bringing first-class concepts, designs and a qualified team to assist the City with **growing and enhancing its Marine Facilities!** We would be honored to be selected as one of YOUR CONSULTANTS for these MARINE services and would be available to present our capabilities further through a presentation, if needed. Thank you.

Respectfully,
Dredging & Marine Consultants, LLC.

Shailesh K. Patel, M.Sc., CPSSc.
Principal/ Managing Member

CITY OF NEW SMYRNA BEACH

ADDENDUM NUMBER 1

RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is an Addendum to the **REQUEST FOR QUALIFICATIONS 04-16-ENG for CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY** issued on February 27, 2016.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

Instructions:

This page of Addendum #1 shall be signed and returned with the proposal. No proposals shall be accepted without an executed addendum signature page. Please provide a signed copy of this addendum your proposal.

Received by:

Proposer Signature

Dredging & Marine Consultants, LLC

Firm Name

The following represents clarifications, additions, deletions, and/or modifications to the above referenced RFQ and shall become part of the referenced Bid and shall be binding as if originally contained therein.

Question 1: Is this RFQ for a completely new Contract or, is there an incumbent for this work? If there is an incumbent, would you tell me who that is?

Answer 1: There are no incumbents. This is a first-time RFQ.

Question 2: Is the City planning on choosing only one consultant under this contract?

Answer 2: No, per the RFQ language, a list of a minimum of three (3) firms will be developed and advanced to the City Commission.

Question 3: For the budget and timelines to be provided, is it necessary to provide construction budgets and timelines? What if we were only involved in the design/permitting and not construction?

Answer 3: The word "construction" does not appear in the requirement for budgets and timelines. This is what it says:

Experience: Provide examples of no less than three (3) previous projects working with:

- ☐ Grant and permitting agencies
- ☐ Site development projects
- ☐ Original budget vs. actual budget
- ☐ Estimated timelines vs. actual timelines
- ☐ Project manager's management capabilities

We are asking for the budget and timeline information for whatever part of the project for which you had responsibility.

Question 4: Are there specific projects already identified under this effort or, will projects be identified by the selected consultant?

Answer 4: There are no specific projects identified at this time. The City will identity the projects as needed, and select one of the firms from the approved list.

Question 5: What projects and budgets are anticipated to be awarded under this RFQ?

Answer 5: Please see Answer 4. This RFQ is to establish a pool of qualified firms for the City to use, as needed, for projects during the contract term. These projects and budgets are unknown.

Question 6: The deadline for submitting questions is stated as March 10, 2016 on page 2 and 9, but as February 29, 2016 in Section E, page 11 of 22. Can you clarify the deadline for submitting questions?

Answer 6: Pages 2 and 9 are correct. The deadline is March 10.

END OF ADDENDUM #1

CITY OF NEW SMYRNA BEACH

ADDENDUM NUMBER 2

RFQ 04-16-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 2** to the **REQUEST FOR QUALIFICATIONS 04-16-ENG for CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATION ONLY** issued on February 27, 2016.

This addendum is issued to clarify the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

Instructions:

This page of Addendum #2 shall be signed and returned with the proposal. No proposals shall be accepted without an executed addendum signature page. Please provide a signed copy of this addendum your proposal.

Received by:

Proposer Signature

Dredging & Marine Consultants, LLC

Firm Name

The following represents clarifications, additions, deletions, and/or modifications to the above referenced RFQ and shall become part of the referenced Bid and shall be binding as if originally contained therein.

The bid document references documents which were not part of the Request for Qualification document, but will be required of any firms moving forward in the evaluation process. The language in the documents says this:

> All attachments to the Request for Qualifications and Performance Data requiring execution by the Consultant must be executed and returned with the submittal.

There were no attachments to the RFQ, so that isn't required at this time.

That form packet will be provided for completion to firms who are short-listed.

The information required for the opening March 29, 2016 at 3:00 pm is listed in the document you received, and Addendum 1.

The Response Format, Section K shows the information required in Tab format. Insurance Certifications are required, as listed in Tab 1.

Please be sure to sign and return this addendum and Addendum 1.

Thank you.

Qualifications of Firm

Licenses/Insurance:

Dredging & Marine Consultants, LLC (DMC) is a licensed by the State of Florida to provide Engineering services. We have the required State registrations and tax receipts to conduct work in Florida and carry the necessary insurance coverages. All applicable licenses, registrations, and insurance certificates are included at the end of this Tab.

Location of Office Conducting Work:

DMC corporate office is located in Port Orange, FL and all project coordination, management, marine engineering and environmental work will be coordinated and completed from this office. The office is located at 4643 S. Clyde Morris Blvd., Unit 302, Port Orange, FL 32129.

Firm Overview:

DMC, established in 2002, is a Limited Liability Company registered in Florida with offices located in Port Orange, Volusia County; Fort Pierce, St. Lucie County, St. Augustine; St. Johns County & Tavares, Lake County. DMC offers the following services:

PLANNING

- Feasibility Assessment
- Public Involvement & Consensus Building
- Grants & Funding Sources
- Bid Preparation & Management
- Hurricane Planning and Recovery

ENGINEERING

- Site Civil & Stormwater Engineering
- Dredging & Material Management
- Shoreline Stabilization & Protection
- Marinas, Seawalls, Docks & Ramps
- Road, Bridge & Drainage Design

ENVIRONMENTAL

- Ecological Resource Surveys
- Environmental Monitoring & Compliance
- Water Quality & Sediment Collection
- Biological, Chemical & Physical Analyses
- Coastal Reef Management

PERMITTING

- Regulatory Agency Coordination
- Mitigation Planning & Monitoring
- Environmental Resource Permitting
- Threatened & Endangered Species Relocation
- Sovereign Submerged Lands Lease Preparation

INSPECTION

- Construction Inspection & Reporting
- Existing Structures Assessment
- Environmental Compliance Monitoring
- As-built Certification & Project Close-out
- ADA Compliance & Safety

Our team of professional engineers, biologists, ecologists and field inspectors will assist you with all aspects of your marine related civil and structures design, planning, grants management, engineering, environmental assessments, including gopher tortois agents for excavation and relocation, permitting, bidding, and construction inspection and management. Our team has a combined 100+ years of experience in the design and permitting of public works and private projects in all types of Florida environments, including freshwater, estuarine and coastal systems. In addition, we offer our clients efficiency and value through a unique complement of engineers and environmental scientists working together on any project. We have established a good working relationship with regulatory agencies, contractors and product manufacturers that allows us to "design-permit-build" your project. We interact with many Florida Marine Contractors and keep abreast of the latest marine products and qualified contractors, helping to implement client projects successfully. Our experience in implementing projects enables us to prepare and solicit bids, review bids with the client, recommend contractors, and conduct an effective pre-construction meeting to get construction started on the right track. During construction, DMC inspects and manages the project thoroughly to ensure engineering and environmental monitoring and compliance. Once completed to specification, the project will be signed, sealed and certified by our project engineer. We also assist with grant writing and grants administration, if required. One of DMC's strengths is assisting clients with assessing and inspecting the condition of their marine and stormwater facilities, systems and structures to prioritize and budget work required as part of the Capital Improvement Projects (CIP).

DMC's personnel assigned to any project under this solicitation will consist of the following technical and administrative staff from all our offices:

Shailesh K. Patel, MSc., CPSSc. – Principal, QA/QC, Public Engagement, Planning & Coordination
Steven Kuhn, P.E. – Sr. Engineer; Site Civil Engineering and Waterfront Structures
Niles C. Cyzycki. B.Sc. – Sr.Ecologist; Permitting, Environmental Assessments, Grants Writing
Curtis N. Todd, P.E. – Sr. Engineer; Site Drainage, Shoreline Stabilization and Structures
Will Cornelius , P.E. – Geotechnical Engineer; Foundations, Seawalls structures and Soils Engineer
Joel Steward, MSc. – Sr. Biologist; Water Quality and Shoreline Habitat
Joseph Rivera – Construction Inspector
Ankeet Rama – AutoCAD/GIS Technician
Jaye S. Patel – Office Manager/Finance

Serving the governments and citizens of the State of Florida responsibly and professionally is our primary objective. We look forward to listening to your needs and working with you to successfully achieve your goals.

Consultant Project Manager:

DMC's philosophy of selecting a Project Manager is based on the specific project requirements and ability of the staff member to effectively and responsibly communicate with our client. Mr. Stephen Kuhn, P.E. has a Civil Engineering background with project experience in boardwalks, seawalls, and boat launch design in addition to his site planning and stormwater experience. He will serve as the designated Engineering Project Manager. He is currently working on the City of Port Orange's second phase of Riverwalk Park, City of Holly Hill's redesign of the Sunrise Park Boat Launching Facility and the City of Edgewater's Conceptual Master Plan for the Whistlestop Park which recently had a $3.5 million dollar referendum approved by local voters. As per DMC's Project Management Protocol to meet our needs, we assign a co-manager and Mr. Niles Cyzycki will serve in that capacity on all projects. Niles has worked on every project we have designed for the City of New Smyrna, lives in the City of New Smyrna Beach and is very familiar with the local marine and coastal issues. In addition to these two highly qualified individuals that will manage the projects, Mr. Shailesh Patel, Principal, is always be available to City staff to ensure that our team is serving the City's needs on budget and on schedule. DMC has worked extensively as a sub-consultant on City projects with Mr. Kyle Fegley and Mr. Khalid Resheidat at the City and you can verify this management style. Our goal has always been to have our Client Project Manager invest minimal time on DMC managed projects. In addition, to this staff we have two other professional engineers, Mr. Curtis Todd, P.E., who has worked on many of the City's past projects and Mr. Will Cornelius II, P.E., with geotechnical and waterfront structures design experience. The resumes of these and other key personnel are included in this qualifications package.

Consultants Commitment to use Same Personnel:

DMC has served the City as a sub-consultant in multiple projects in the past and we have always maintained the same staff continuity on all our projects. We will continue to commit to utilizing the same staff. This is why we believe that our Project Management protocol of having a Manager and co-manager serves our clients well. There is no disruption in communication even when one staff member is out of office or on vacation, we remain available and responsive to our clients at all times!

Certified Minority Business:

DMC is a State of Florida Certified Minority Business Enterprise (MBE), a FDOT Disadvantaged Business Enterprise (DBE) and South Florida Water Management District Certified Small Business Enterprise (SBE). A copy of these certifications are presented at the end of this Tab.

Consultants Workload/ Performance Capability:

We have provided the names of individuals we have interacted with at the City of New Smyrna Beach as well as other client references so that you can contact them on our Performance Capability. Workload is not an issue at DMC, as we have weekly project Manager's meetings to identify and prioritize staff and direct staff resources where needed. A healthy on-going work load is always desired because that is how we stay in business, but we never lose sight of the fact that we have to prioritize projects based on deliverables, grant deadlines and securing

permits. We have assisted the City with submitting grants through FIND and FWC, have presented these projects to the Funding agency review boards and been successful in securing all the grants we have applied to for the City. We add that we have also been a resource to the City when the staff has had questions on seawalls, shoreline habitat, marina sewer pumps, floating docks and potential seawall issues. We have been not only responsive in calling back or emailing, but have taken the time to meet the staff at site to better understand the concerns so that we can offer the best possible solutions. We feel this is another aspect of performance capability.

The issuance of this business tax does not constitute a permit to act in violation of any city codes, regulations or ordinances.

The renewal period for Business Taxes starts July 1st and runs through September 30th. We mail the Local Business Tax renewals in July **as a courtesy reminder** to allow time for processing payments, printing, and mailing renewed Receipts. **It is the receipt holder's responsibility to renew before the expiration date to avoid penalties.**

Should a business fail to pay their business tax before January 31st, the City will enforce payment of the tax with an additional $250.00 fee as stated in Florida Statute 205.053(3): provides any business owner who does not pay the required business tax within 150 days after the initial notice of tax due, and who does not obtain the required Receipt is subject to civil actions and penalties, including court costs, reasonable attorney's fees, additional administrative costs incurred as a result of collection efforts and an additional penalty of up to $250.00.

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

REGISTERED VENDOR NO.: 108651

February 15, 2016

CERTIFICATION EXPIRATION DATE
February 15, 2019

Shailesh K. Patel, Manager
Dredging & Marine Consultants, LLC
4643 S. Clyde Morris Blvd., Unit 302
Port Orange, FL 32129

Dear Mr. Patel

Congratulations, the South Florida Water Management District (District) has recertified your firm as a Small Business Enterprise (SBE). This certification is valid for three (3) years and may only be applied when business is conducted in the following area(s):

Professional Engineering Services

Your submittal of bids or proposals to supply other products or services outside of the specialty area(s) noted above will not count toward SBE participation. If you require certification in other specialty areas, please contact the Procurement Bureau, SBE Section, for additional information.

Renewal is required every three (3) years and should be requested a minimum of 45 days prior to the above expiration date.

If any changes occur within your company during the certification period such as ownership, affiliate company status, address, telephone number, licensing status, gross revenue, or any information that relates to your SBE Certification status, you must notify this office in writing immediately. It is imperative that we maintain current information on your company at all times. *FAILURE TO REPORT CHANGES MAY RESULT IN DECERTIFICATION.*

Certification is not a guarantee that your firm will receive work, nor an assurance that your firm will remain in the District's vendor database.

We look forward to a mutually beneficial working relationship.

Sincerely,

Sandra Hammerstein

SHAILESH "S.K." PATEL, M.SC., CPSSC.

PRESIDENT, SENIOR SOIL SCIENTIST

Shailesh Patel founded **DMC** in 2002 and serves as the Principal Point of Contact for all projects. He has 20 years of experience in the engineering and environmental consulting business and in particular developing viable projects for private, municipal, and county entities. He has worked on numerous waterfront parks, watershed water quality and land development projects that have included the planning, design, engineering, facilities inspection, permitting, environmental, sediment and materials assessments, including full construction administration and inspection services, including permit compliance. His vast experience spans the fields of dredging, waterfront facilities and related structures, including buildings, parks, mining wastes, drainage and stormwater management, erosions related to walkways and roadways, wetlands and associated mitigation. He is active in many technical and civic service organizations and has twice served as the President of the Florida Lake Management Society and is currently the Chair of Volusia County Association for Responsible Development. He has managed or assisted with numerous controversial public dredging and marina projects from initial feasibility studies, involving the public, to bidding, implementation and Inspection to post-construction project close-out. Shailesh continues to add to his extensive knowledge of designing cost-effective, environmentally-sound and safe lake, estuary, and canal/channel dredging and shoreline stabilization and land development projects, including sediment treatment, management, disposal operations, beneficial uses of dredged sediments, source control and impacts of tidal, storm or hurricane surges on protection of structures. He is very knowledgeable in dealing with "muck" sediment dredging and handling and was invited by the Maryland Port Authority to share his experience on this topic and has assisted the Florida Department of Environmental Protection with promulgating ways to provide TMDL credits for "muck" removal within the Indian River Lagoon. He is well spoken and understands the value of effective listening and communication with our clients and the public. He has presented project technical information to City and County councils for many projects for better decision and policy making. He has the ability to visualize the long-term needs of clients and understand the economic, social, fiscal and political climates and has worked on many highly visible and challenging and often controversial projects so that they can be implemented. His biggest attribute is to be able to forge a good relationship and open communication with various stake holders on large scale projects and keep the various stakeholders focused on the goal of long-term projects. He continually participates in professional, scientific, and marine construction conferences to keep abreast of advances in dredging, water quality, and latest marine products to educate the public and clients. He passionately promotes responsible development and resource protection along our waterways and waterfront communities.

EDUCATION

- Candidate to Ph.D, Soil & Water Science, University of Florida, Ongoing
- Annual FLMS Workshop Presenter, Managing a Sediment Removal Project
- Small Business Development, BCC, 2002
- Dredging Engineering Short Course, Texas A&M, 2002
- BCI Engineers & Scientists, Inc. Project Manager's Training, 2001
- M.Sc. (Soil & Water Science) University of Florida, 1989
- B.S. (Plant Science & Technology) NC A&T SU, 1986

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- American Society of Agronomy, Certified Professional Soil Scientist No. 24815
- National Dredging Team
- Florida Lakes Management Society (Vice President 2002-2003, President 2003-2004 & 2008-2009)
- North American Lakes Management Society (SENALMS Conference Chair 2003)
- Indian River Lagoon Program Technical Advisory Committee
- Tampa Bay National Estuary Program Technical Advisory Committee
- Charlotte Harbor National Estuary Program Technical Advisory Committee
- Soil Science Society of America
- Western Dredging Association
- Environmental and Natural Resources Advisory Committee, Volusia County
- Volusia County Association For Responsible Development Executive Council
- Lake/Education Action Drive
- Water Environment Federation
- National Association of Environmental Professionals & Florida Stormwater Assoc.
- Florida Marine Contractors Association

PROJECT EXPERIENCE

- Meeting with clients and citizens to discuss project objectives
- Public engagement and consensus building
- Long-range vision and strategic fiscal planning
- Leveraging of funds and strategies for additional funding and applicable grants
- Grants Preparation, presentations, administration and reporting
- Assisting in developing sediment removal projects through public participation and education
- Developing a forum for transferring technical, political and financial information
- Assisting client with all aspects of preparing applications to secure funding and necessary permits
- Addressing public concerns throughout project design phase
- Meeting with regulatory personnel to address permitting issues
- Evaluating the availability of upland areas to retain the dredged sediment
- Identifying beneficial uses for dredged sediments
- Evaluating innovative techniques to enhance the dewatering using centrifuges, belt-presses, and rotary or static screens
- Optimizing storage capacity of the upland sites using chemical polymers
- Dredged material separation using hydrocyclones
- Evaluating the impacts of dredging on abutting structures such as seawalls and road and railway bridges
- Design aspects of seawalls, rock revetments, geotextiles, ramps piers, docks
- Determining environmental impacts on wetlands, threatened and endangered aquatic plant and animal species
- Mitigation planning and monitoring
- Engineering design, plans, and preparation of technical and bid specifications
- Assisting clients with bid review and contractor selection
- Construction inspection, management, and administration
- Project monitoring for permit and technical specification compliance
- Project management and closure; including updates, adjustments and overall evaluation

PARTIAL LIST OF PROJECT EXPERIENCE

Swoope Site Public Boat Launching Facility, City of New Smyrna Beach, FL – Principal Project Manager. Coordinated efforts and strategies with FDEP and USACOE to minimize resource impacts and provide a more acceptable project. Assisted the City in identifying strategies for additional funding from the Florida Inland Navigation District and Volusia County Port Authority for engineering and construction. Assisted with bidding, technical specifications and response to contractor submittals including Construction Inspection.

North Causeway Public Boat Ramp and Fishing Pier Improvements, City of New Smyrna Beach, FL – Principal Project Manager. Assisted the City with evaluating the failures behind the old seawall and preparing a report and costs to assist with repair and FIND grant application. Coordinated efforts with Prime consultant to develop strategies for FDEP and USACOE permits and minimize resource impacts. Assisted with bidding, technical specifications and response to contractor submittals, including Construction Inspection.

Riverside Park Bulkhead & Wharf Repair, City of New Smyrna Beach, FL – Principal Project Manager. Coordinated efforts and strategies prime consultant to design and seek additional funds from FIND. Coordinated in generating repair reports and costs. Also assisted with generating plans and bids for the project as well as in inspection during construction to ensure proper marine considerations are implemented. Secured FDEP and USACOE permits and added a design for a access floating dock system that is along the seawall.

Ballough Road Bridge Expansion and Marina Village, City of Daytona Beach, FL – Senior Project Manager. Coordination of subconsultant work that include Bridge Engineers, Traffic Engineers and other supporting staff. Mainaining communication with City staff to keep project on track with concepts and meeting strategic goals. Work includes coordinating with private owners, and landscaping and utility upgrades and relocations.

Riverfront Day (Transient) Dockage, City of Daytona Beach, FL – Senior Project Manager. Coordination with on-going City design to ensure there is a flawless connection of the Floating dock system. Assisting with FIND funded project that DMC assisted with generating costs for construction. Ensuring that various design options are considered for most effective and least costly option for construction.

Riverwalk Park Conceptual Design and Public Input, Phases 1A and 1B, City of Port Orange, FL – Senior Project Manager. Instrumental in building public consensus and incorporate design features in strategic locations of this 8 acres project area. Assisted the City in phasing project so that the City dollars could be leveraged with other funding sources besides FIND, such as the Volusia ECHO grants and FRDAP grants. Assisted with generating design and construction costs and project timeline, understanding the complexity of the project area and historic uses.

Sunrise Park South Access Channel Dredging and Boat Ramp Improvements, City of Holly Hill, FL – Senior Project Manager. Assisted the City with developing FIND grant request information for design and construction. Coordinating the permitting work with the State and Federal Agency staff to ensure prompt permit processing to meet grant deadlines.

PROJECT EXPERIENCE CONTINUED

Whistlestop Park Conceptual Planning, City of Edgewater, FL – Senior Project Manager. Worked with City Manager, Finance Director and other key staff at the City to incorporate Public input of priority preferences for Park amenities. Presented to the City Council to seek input of various concepts generated and developed a final conceptual plan. Then presented to the Parks and Recreation Board to seek their input and offer suggestions with the ultimate goal of developing probable construction costs and Bond referendum for voters which was recently passed to proceed with the Project.

Daytona Beach Pier Assessment, City of Daytona Beach, FL – Project Manager. Evaluated the underside of the historic Daytona Pier. The objective of our task was to determine the structural strength of the existing pier pilings and hardware and the level of deterioration and corrosion to recommend additional support. The structure was evaluated to withstand Hurricane Category 2 wind and wave forces. The project has been armored and the new above deck facility (restaurant) is almost complete.

Sun Splash Park Seawall Extension & Stormwater Design, City of Daytona Beach, FL – Project Manager/ Point-of-Contact Coordinated with County staff to construct a public friendly addition to an existing seawall and stormwater maintenance system. Reviewed project drawings for compliance with all environmental codes. Successfully completed permitting through DEP's Coastal Construction Control Line Division.

Russell Property ADA Compliant Canoe & Kayak Landing Facility, Port Orange, FL – Principal Project Manager. Made presentation to the City Council on project costs and funding strategies to build the project. Coordinated efforts with FDEP and the USACOE. Assisted the City in developing the bid package, technical specifications, preconstruction meeting, responded to FRI from contractors and reviewed bids to make recommendation to the City.

B-23 Canal Dredging and Seawall Replacement (sub to Quentin L. Hampton), City of Port Orange, FL – Dredging Consultant/Project Manager. Coordinated evaluation of seawalls and cost estimation of work required to complete engineering design, permitting, technical specification preparation, bidding assistance and construction administration services as well as project construction for funding. Assist Prime consultant to handle all aspects of engineering and permitting of 30,000 CY dredging and 5,000 linear feet of seawall replacement along canal. Address stormwater and drainage issues from uplands. Public and City Council meetings, presentations and updates. Collected necessary environmental and sediment data.

Port Orange Causeway Park Shoreline Protection – City of Port Orange, FL – Project Manager – Responsible for coordinating surveys of 24 sites within the City Parks, engineering design, permitting, technical specification preparation, bidding assistance and construction administration services. Project currently on hold by City due to funding agency requirements. Project includes evaluating existing seawalls and shoreline for stabilization Collected necessary data, including right-of-way and property survey and shoreline profile survey at the project locations.

Palatka Riverfront Park Improvements, Palatka, FL – Project Manager - Assisted prime consultant with all the water related structures; ramp, boat docking, marina, mitigation planning, geotechnical testing, permitting with FDEP and USACOE. DMC assisted the client with securing funds to leverage the development of the overall project. Also assisted the client with estimating costs for various components of the project as part of the long term strategy to develop the project.

PROJECT EXPERIENCE CONTINUED

Summerall Park Boat Ramp and Park Improvements, City of Tavares, FL – Project Manager- Coordinated design, permitting and construction inspection and well as coordinate all CDBG reporting with Lake County for the City. Improved a single lane boat ramp and dredged the access for safe boating and mooring. Reviewed and provided a mitigation plan as completed a three year monitoring program to secure project acceptance from FDEP. Facilitated a comprehensive coordination effort between the FDEP, FFWCC, LCWA, Lake County, and the City.

Wooton Park Boat Ramp Extension Dredging, City of Tavares, FL – Project Ecologist. Completed successful time sensitive Environmental Resource Permitting. Assisted in assessing the shoreline vegetation along with sampling and evaluation of resources within the channel template to be dredged along boat ramp.

Wooton Park Improvement, City of Tavares, FL – Project Manager. Coordinated and assisted the City staff with a conceptual plan of Wooten Park improvements. This included both upland and water related features. The goal is to make this a well utilized public park and facility, the "Jewel of Lake County" and surrounding areas. Met with potential park users to incorporate their ideas. Project includes boat ramp and channel access improvements, shoreline improvements, seaplane docking facility, docks, etc., coordinating efforts with regulatory agencies and City staff on resources, impacts and regulatory permits.

Ed Stone Park Seawall Replacement, Volusia County, FL – Principal Project Manager - Overall project strategy on replacing 122 ft. of cement-bag wall with an aluminum sheetwall to match the type of existing seawall along the rest of the shoreline without impacting shoreline resources. Coordinated efforts with the County to provide reasonable costs and ADA compliance. Talked with local fishermen and park users to accommodate utility and enhance access for fishing

Riverwalk Park Phase 1B, City of Port Orange, FL – Project Engineer. Performed stormwater design and calculations for permitting and design of all hardscape for Port Orange's approximately 9 acre premier riverfront park. Provided QA/QC for all plan submissions during the project development process. Finalized site grading, utility connection placement and

Lake Rowell Sediment Core Sampling, FFWCC, Bradford County, FL – Project Manager - Directed and coordinated collection of sediment to depths of up to 15 feet throughout the 350 acre lake. Also, developed sampling plan to capture sediments of various composition and possible chemistry that could impact permitting and material processing, dewatering and management.

Stevenson Creek Sediment Characterization & Removal Feasibility Study, City of Clearwater, Pinellas County, FL – Project Manager. Characterized, determined, and evaluated the feasibility of removing 127,000 cubic yards of sediments to provide water quality and some navigation improvements. In addition, the project included identifying additional funding sources, identifying potential disposal sites, best option and cost for removal of sediments. Currently assisting City to coordinate engineering efforts with USACOE (Jacksonville District) to implement project.

Smith's Creek Maintenance Dredging Project, City of Flagler Beach, FL – Project Manager. Project required complete engineering, permitting, and assisting City with securing funds to implement project. Provide navigation access by dredging 10,000 cubic yards from the Intracoastal waterway access channel to residential canals. Involved overseeing engineering design, technical specification and bid preparation, contractor selection, seawall and bank protection, prioritizing dredging based on funding, assisted in securing $165,000 in funding from the Florida Inland Navigation District, securing permit, and addressing resident concerns.

PROJECT EXPERIENCE CONTINUED

Lake Lotus Sediment Removal Feasibility Study, Florida Department of Transportation District 5, Seminole County, FL – Project Manager. Provide engineering services for a preliminary characterization, beneficial uses, and removal feasibility of sediments. This project included determining potential sources of fine grained and organic sediments, estimating its volume, providing best option and cost for removal, interaction with land owners, and permit consideration.

Marsh Park Maintenance Dredging Project at Lake Yale, Lake County Water Authority, Lake County, FL – Project Manager. Provide navigation access from Park boat ramp to Lake Yale. Project designed to remove approximately 2,000 cubic yards of fined-grained, dominantly sandy sediments. Involved in site evaluation, sediment sampling, and securing permit. Coordinated with various agencies to ensure each entity's goals were met.

Taylor Creek Emergency Shoreline Stabilization, St. Lucie County, FL – Project Manager – Assisted the County to secure FDEP, USACOE and SFWMD permits to design and meet NRCS funding deadlines. Designed, permitted and constructed the project on time for the County

Taylor Creek Restoration Dredging Site Assessments, Phase 2 & 3, St. Lucie County, FL – Project Manager - Dredging and Shoreline Stabilization of SFWMD diversion canal. Coordinated efforts with FDEP, SFWMD, USACOE and FFWCC to complete all biological and ecological assessments, including threatened and endangered species, particularly seagrasses, mangroves, gopher tortoise survey and relocation, scrub jay survey and endangered plant survey. Assessed seven separate parcels for spoil site location. Prepared and conducted pre-bid and pre-construction meetings and construction inspections.

Taylor Creek Restoration Dredging Project, St. Lucie County, FL – Project Manager. Characterized, determined, and evaluated the feasibility of removing approximately 200,000 cubic yards sediments to provide navigation and water quality improvements. Includes permitting, public education and consensus building, identifying and securing over $1,500,000 funding, selection of pipeline route and disposal site, engineering, construction, and environmental monitoring and reporting. 2,800 linear feet of shoreline stabilization, environmental and threatened and Endangered Species assessments, cross-sections and sediment disposal based on permitting requirements. Prepare technical bid documents and review bids. Responsible for public/commission meetings, presentations and updates. Phase 1 and 3 are complete and Phase 2 is ongoing. The phase 2 Upland Dredged Material Management Area has been permitted.

Home Depot Stormwater Improvements, Palatka, FL – Project Manager. Responsible for design of 100 feet of spreader swale and 10 feet high concrete retaining wall for stormwater pond improvements. Project included coordination with St. Johns River Water Management District for permit modification to resolve an outstanding notice of non-compliance by the District. The project is now under compliance.

Turkey Creek Middle-Reach Sump Project, City of Palm Bay, FL – Project Manager. Provided design to evaluate the potential of creating a sump within the residential canal to "trap" sediments originating from upstream locations of the creek and watershed. The intent of the design was to provide data for regulatory agency review and consideration to permit and implement the design. The project involved citizen, City, funding agency and regulatory agency coordination and meetings to identify public concerns and meet goals. Design was approved by City and regulatory agency and is currently in permitting phase.

PROJECT EXPERIENCE CONTINUED

Turkey Creek Restoration Dredging Project, City of Palm Bay, FL – Project Manager. Characterized, determined, and evaluated the feasibility of removing 380,000 cubic yards of muck sediments to provide navigation and water quality improvements. Included permitting, public education, pipeline route evaluation and coordination with funding agencies, engineering, construction, technical specification and bid preparation, assist client with contractor selection and environmental monitoring and reporting. Additional work included application of innovative technologies such as hydrocyclone and belt-press dewatering to manage dredge sediment.

Square Lake/East Slough Restoration Project, Palm Beach County – Project Manager – Coordinated efforts to created and implemented environmental compliance plan, turbidity monitoring, notification and daily reporting to regulatory agencies as part of a construction project. Worked with a Contractor to provide support during construction phase of the dredging project and provide best management practices.

Panama City Dredging and Seawall Projects, City of Panama City, FL – Project Manager. Overall project manager and coordinator. Identify engineering needs for City's dredging, seawall and shoreline protection at four sites. Two projects also involved seawall design and permitting. The project required resource impact avoidance. Prepare permits with FDEP and the USACOE or qualify projects for exemption from permitting and all aquatic and shoreline vegetation assessments. Provide dredge templates, prepare technical specification and bid documents.

Ponce Inlet Side Channel Maintenance Dredging, Ponce Inlet Port Authority, Town of Ponce Inlet, FL – Project Manager – Coordinated with the Client to determine dredge channel configuration and on-beach spoil disposal through FDEP's Coastal Construction Control Line Division.

Halifax Mobile Home Park – City of Port Orange, FL – Project Manager. Determine specific needs of the proposed usage and design prior to staring design. Provide physical surveys and practical design needs. Prepared conceptual design for approval of City. Prepared technical specifications and plans for the City.

Waterway and Canal Maintenance Dredging, City of Port St. Lucie, FL – Project Manager. Overall project management and coordination, evaluating residential canals for sediment removal to benefit water quality and navigation. Evaluate seawalls and docks on ten canals approximately 5 miles, vegetation and other environmental resources. Permitting, cost estimation, dredging options and disposal drainage issues were also evaluated. Constant public notification and involvement was critical to the success of this project. The project required interdepartmental coordination to facilitate a acceptable disposal site.

Lake Jesup Aquatic Enhancement, Sanford, FL – Project Manager - Assisted Prime consultant with dredging and disposal options to remove 800,000 CY of organic sediment. Provide 300 acre upland disposal design and drainage options.

Reed Canal Access Channel, Halifax River (ICW), City of South Daytona, FL – Project Manager- Overall project manager responsible for coordination with sub-consultants and delegation of responsibilities. Presentation and discussion on behalf of client at several staff meetings with SJRWMD. Reviewed grant applications, cost estimates, permit documents and dredging methodology and all benthic and mitigation options for impacts. The overall intent of this project is to vitalize the waterfront of the City to generate a larger tax-base by creating a viable waterfront for private development.

PROJECT EXPERIENCE CONTINUED

Canal Conveyance Capacity Program Phase 1, South Florida Water Management District – Project Manager for DMC – Assisted Mactec Engineering with establishing protocol for field analyses of canal bank erosion for approximately 45 miles of canals as part of the SFWMD's Canal Conveyance Capacity Program. Review reports, assess costs for dredge and repair areas of concern discovered during field reconnaissance. Assisted with final report review.

Canal Conveyance Capacity Program Phase 2, South Florida Water Management District – Senior Environmental Manager and QA/QC officer - Negotiated project scope and budgets, coordinated work with subconsultant team on project deliverables and established protocol for reporting for approximately 5 miles of existing G-16 drainage canal for the SFWMD Canal Conveyance Capacity Program in Broward County. Reviewed as-built plans, sediment and water quality data reports, assisted with strategies for shoreline erosion and repair options, sediment dredging options and management of dredged materials. QA/QC review of all intermediate and final reports to the SFWMD.

Sippo Lake - Initial Feasibility of Rapid Dewatering (MS Consultants, Inc., Canton, Ohio), Stark County Park District, Stark County, Ohio – Project Assistant to Principal. Evaluate cost-effective technologies to dredge and dewater 300,000 cubic yards of highly organic sediment and strategies to reduce cost. Polymers/thickeners were used in conjunction with rotary screen to dewater sediments.

Crane Creek Post-Dredge Assessment Project, St. Johns River Water Management District, FL – Project Manager. Evaluate the effectiveness of muck removal from crane creek. Identify and model the trapping efficiency and determine new material from watershed versus redistributed creek sediment within the dredged areas. This is a three-year ongoing study.

Investigation and Demonstration of Beneficial Uses of Muck Sediment from the Indian River Lagoon, St. Johns River Water Management District, FL – Project Manager. Project involved the use and analysis of dredged sediments to demonstrate uses and potential uses of dredged sediments from the Indian River Lagoon Estuary. A public workshop was also conducted as a continuation of this project and has resulted in a better understanding in the need to dredge estuary creeks that are contributing sediments and impacting the water quality and benthic communities.

DMC
ENGINEERS • SCIENTISTS

STEPHEN J. KUHN, P.E.
PROJECT MANAGER/ ENGINEER

Mr. Kuhn has 13 years of experience as an engineer in Florida, previously working with AMEC Foster Wheeler (formerly BCI Engineers & Scientists, Inc.). He has been with DMC for two years and has worked on several marine projects related to Park design, redesigns for better waterfront accessibility that include, ramps, docks, shoreline armoring, parking reconfiguration and stormwater management designs. He has worked extensively in both public and private sector projects and has extensive knowledge and experience working with the Florida Department of Transportation, the Southwest Florida Water Management District, the St. Johns River Water Management District, the South Florida Water Management District, Florida Department of Environmental Protection, and various local regulatory agencies. Mr. Kuhn's area of expertise besides design, management, and engineering includes permitting and construction inspection and management. In addition, he has considerable experience in the areas of new and existing residential, commercial and industrial site designs and layout, including site access, grading, parking lot layout, NPDES compliance, flood routing modeling and Best Management Practices retrofitting and protection and utilization of site resources and its protection.

EDUCATION

- B.S., Environmental Engineering, University of Florida, 1998
- BCI Engineers & Scientists, Inc. Project Manager's Training, 2010

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- Professional Engineer, State of Florida, No. 67486
- FDEP Certified Erosion and Sediment Control Specialist

AREAS OF EXPERTISE

- Parks and Waterfront Planning Design and Redesigns
- Shoreline Stabilization
- Ramp, Seawall and Dock Design
- Stormwater, Drainage Design and Permitting
- Project Management, Civil Site Design and Value Engineering
- Technical Specification and Bid Preparation
- Environmental Resource Permitting
- NPDES Compliance
- Stormwater Management System Inspection and Recertification
- Hydrologic and Flood Routing Modeling
- Construction Site Engineering
- Construction Inspection and Compliance Monitoring
- Stormwater Monitoring and Sampling
- Shop-Drawing Review and Approval
- Pollutant Load Modeling and Best Management Practices Recommendations

PROJECT EXPERIENCE (DMC)

Ballough Rd. Bridge Expansion and Marina Village Conceptual Plan, City of Daytona Beach, FL – Project Engineer. Assisted with development if a conceptual design for bridge replacement to provide improved access to planned commercial/residential development. Designed new public boat ramp and trailer parking area, seawall, floating dock and stormwater management system serving the facility.

Blue Lake Boat Ramp Improvements, Volusia County, Florida – Project Engineer. Site grading, pavement design, stormwater design, permitting, ADA compliance and plans preparation for improvements to a county boat ramp facility.

Sunrise Park Boat Ramp Improvements, City of Holly Hill, FL – Project Engineer. Site grading, stormwater design, permitting and plans preparation for improvements to an approximately 2 acre public boat ramp facility and its associated parking area. Stormwater design required to achieve pollutant loading reductions sufficient to comply with established TMDL for receiving water body. Design components include a boat launch, truck & trailer parking, floating accessory docks, dredging, channel markers and shoreline stabilization.

Whistle Stop Park Conceptual Planning, City of Edgewater, FL – Project Engineer. Performed site reconnaissance, existing structure inventory and conceptual design for 15-acre municipal park in Edgewater. A $3.5 million dollar redesign of this park has been approved by City of Edgewater residents.

Riverwalk Park Phase 1B, City of Port Orange, FL – Project Engineer. Performed stormwater design for permitting and design of all hardscape for Port Orange's approximately 9 acre premier riverfront park. Provided QA/QC for all plan submissions during the project development process. Finalized site grading, utility connection, ADA compliance, placement and stormwater design. Developed project technical specifications.

Palatlakaha River Control Structure M-5 and M-6 Modifications, Lake County Water Authority – Project Engineer. Design and permitting of modifications to existing flood control structures by replacing radial hoist gates with fixed sheet pile weirs. Tasks included design of weirs and scour prevention measures, permitting, preparation of SSL easements, preparation of technical specifications.

Kingsway Canal Shoreline Improvements, City of Port St. Lucie, FL – Drainage Engineer. Provided QA/QC of 90% plans and cost estimates, and value engineering. Assisted with design of drainage connections to new seawalls in canal.

PROJECT EXPERIENCE (AMEC FOSTER WHEELER)

Florida Department of Transportation – Districts One, Five and Seven
Coordinated NPDES compliance for three districts including inspection and recertification of stormwater management facilities, developing maintenance recommendations, tracking new facility construction and pollutant loading modeling for TMDL compliance. Maintained up-to-date Microsoft Access and GIS databases to effectively track stormwater facilities, inspections, maintenance and permitting activities.

PROJECT EXPERIENCE (AMEC FOSTER WHEELER) CONTINUED

Eloise Redevelopment and Revitalization CDBG Project, Polk County, Florida
Served as Engineer of Record for neighborhood revitalization project completed in four phases under CDBG program. Oversaw permitting, development of construction plans, specifications and bid documents, shop drawing review, and preparation of as-built plans for design of roadways, sanitary sewer, potable water and stormwater management systems.

Downtown Drainage Improvements & Master Plan Update, City of Dade City, Florida
Played a key role in stormwater master plan update and design of stormwater management system for downtown area affected by chronic flooding. Built stormwater structure GIS geodatabase, conducted GIS analysis of watershed, performed flood routing modeling, prepared construction plans, and coordinated permitting process.

Eastside Canal Capital Improvement Project #3 Phase 1, City of Plant City, Florida
Designed gabion walls and other improvements for a drainage canal serving a downtown area subject to flooding, and exhibited proficiency in design and flood routing modeling, preparing specifications and bid documents, preparing as-built plans, and permitting.

Kitching Creek Stormwater Treatment Area Water Quality Sampling, Martin County, Florida
Participated in water quality monitoring project for stormwater treatment pond near Hobe Sound, Florida, constructed under a 319(c) grant issued by FDEP. Assisted with development of project QAPP, programmed and set-up ISCO automated water samplers and Campbell Scientific dataloggers, supervised sample collection, performed complex data collection and analysis, and prepared reports of findings.

St. Clemente Low Income Senior Housing Project, Plant City, Florida
Prepared construction plans and specifications, including site layout and design, design of utility connections, flood routing modeling, and stormwater management system design for multistory senior assisted living facility. Designed sanitary lift station upgrade, participated in wetlands delineation and permitting, and coordinated permitting through water management district, county and city code offices.

Lake Worth CDBG Project, City of Lake Wales, Florida
Upgraded antiquated and failing stormwater line causing localized street flooding by devising flood routing model, designing new stormwater line and treatment pond, generating construction plans and specifications, and navigating permitting through water management district.

Cassel Creek Stormwater Quality Monitoring and Conceptual Treatment Facility Design, Seminole County, Florida,
Actively supported water quality monitoring and stormwater retrofit project for highly urbanized watershed by building flood routing model, setting up ISCO samplers and Campbell Scientific dataloggers, collecting samples and analyzing data, identifying retrofit alternatives, and creating reports.

NILES CYZYCKI
ECOLOGIST

Mr. Cyzycki has been with **DMC** for 8 years and has over 10 years as an ecologist specializing in Florida ecosystems. Niles has worked extensively in both the public and private side of environmental permitting, giving him, and DMC, the knowledge and experience to work within governmental framework and perform any ecological permitting. Over the last decade Niles has been involved in every project DMC has undertaken for New Smyrna Beach and as resident of the City has an extensive knowledge of the local marine environment. As a knowledgeable construction inspector he has the field experience that will result in a successful project for both client and contractor. A third generation Floridian, Niles understands the delicate balance of responsible development and environmental protection.

EDUCATION

- B.S., Environmental Studies, Certificate in Urban and Regional Planning, Florida State University, 2004

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- FWC Authorized Gopher Tortoise Agent #GTA-10-00002
- DEP Qualified Stormwater Management Inspector #12876
- DEP Wetland Delineation Training and Uniform Mitigation Assessment Method (UMAM)
- Certified as a Florida Master Naturalist through University of Florida's IFAS extension
- Member of Florida Association of Benthologists
- FEMA Coursework: IS-00700, IS-00100, and IS-00200
- DEP SOP Groundwater, Surface Water and Wastewater Sampling Training

AREAS OF EXPERTISE

- Environmental Resource Permitting
- Mitigation Design and Planning
- Uniform Mitigation Assessment Method (UMAM)
- Environmental Assessment
- Gopher Tortoise and Protected Species Management
- Creation and Implementation of Environmental Compliance Plans
- Turbidity Monitoring
- Disposal Site identification
- Sediment and Water Sampling and Testing
- Project Management
- Wetland Delineation
- Bid Preparation
- Construction Inspections
- Permit Compliance Monitoring and Reporting

PROJECT EXPERIENCE

Swoope Site Public Boat Launching Facility, City of New Smyrna Beach, FL – Project Manager. Completed all environmental resource permitting through FDEP and the Corps. Conducted submerged aquatic vegetation (SAV) survey, protected vegetation survey and coordinated with engineers to avoid impacts to environmental resources. Secured $500,000 in grant funds from Florida Inland Navigation District for engineering and construction. Assisted with bidding, technical specifications and response to contractor submittals.

Calore Canal, City of New Smyrna Beach, FL – Project Ecologist. Completed all environmental resource permitting through FDEP and the Corps. Conducted submerged aquatic vegetation (SAV) survey, protected vegetation survey and coordinated with engineers to avoid impacts to environmental resources. Assisted with bidding, technical specifications and response to contractor submittals.

North Causeway Boatramp and Fishing Pier Improvements, City of New Smyrna Beach, FL – Project Manager. Assisted with the assessing of the existing structures and directed design of the associated repairs. In addition, assembled a cost estimate for construction and was involved with bidding, preparing technical specifications, response to contractor submittals and construction inspection.

B-23 Canal Dredging and Seawall Repair, City of Port Orange, FL – Project Manager. Successful Environmental Resource Permitting through DEP and ACOE. Prepared detailed cost estimates for different methods of dredging and seawall replacement. Conducted presentations and directed meetings with City Staff, City Commissioners, and Concerned Citizens to inform and provide options. Coordinated cooperation between City, Florida Inland Navigation District, and Army Corps to provide the most cost effective dredging solution. Assisted with bidding, pre-bid meeting, technical specifications, response to contractor submittals and certified contractor pay requests. Performed onsite construction inspection and provided weekly reports to client on construction progress.

Riverwalk Park, Port Orange, FL– Project Manager. Coordinated architect, landscape architect, electrical engineer, geotechnical investigation and surveying to design the City's premier waterfront park. Design included a new timber boardwalk, kayak/canoe launch, trailway, splashpark, playground, two (2) restroom/concession buildings, a wavebreak and landscaping/irrigation. Completed all environmental resource permitting. Assisted with bidding, pre-bid meeting, technical specifications, response to contractor submittals and certified contractor pay requests. Performed onsite construction inspection and attended bio-weekly progress meetings with City and contractor staff.

Causeway Park & Public Shoreline Stabilization, City of Port Orange, FL– Ecologist/Project Manager. Provided environmental resource permitting review, site assessment, bid document preparation, coordination with regulatory agencies and funding agencies such as DCA. Oversaw and inspected all construction and acted as liaison between contractor and City. Conducted interviews and fulfilled requirements of Davis-Bacon Act.

City of Port Orange Parks & Public Shoreline Protection, City of Port Orange, FL – Project Manager/ Ecologist - Shoreline stabilization and armoring of city parks. Evaluated 23 sites for potential ecological impacts. Completed environmental resource permitting through FDEP, SJRWMD, and ACOE. Assisted with construction inspection and reporting. Involved in Bid preparation, Pre-bid meeting, Grant compliance, and Contractor Coordination. This project included the B-23 Canal.

Palatka Riverfront Park Improvements, Palatka, FL – Ecologist - Assisted with mitigation planning, and completed all permitting with FDEP and USACOE. DMC assisted the client with securing funds to leverage the development of the overall project and with estimating costs for various components of the project as part of the long term strategy to develop the project.

PROJECT EXPERIENCE (CONT'D)

Square Lake/East Slough Restoration Project, Palm Beach County – Onsite Inspector. Created and implemented environmental compliance plan, turbidity monitoring, notification and daily reporting to regulatory agencies.

Panama City Dredging and Seawall Projects, Panama City FL – Project Ecologist - This project involved field data collection and dredge plan design in relation to submerged and shoreline vegetation. Assisted with plant identification in water and uplands as well as permitting. Assisted with Bid document preparation and review. Reviewed project drawings and assisted with permit responses pertaining to ecological issues.

Lake Rowell Sediment Core Sampling, Florida Wildlife Conservation Commission, Lake Rowell, FL – Ecologist. Complete chemical and physical sampling to a depth of fifteen feet below sediment surface throughout a 350 acre lake in compliance with FDEP Sediment Sampling Standard Operating Procedures.

Russell Property ADA Compliant Canoe & Kayak Landing Facility, Port Orange, FL – Project Manager. Completed all environmental resource permitting through FDEP and the Corps. Coordinated all geotechnical investigation and surveying. Conducted protected vegetation survey and coordinated with engineers to avoid impacts to environmental resources. Assisted with bidding, pre-bid meeting, technical specifications, response to contractor submittals and certified contractor pay requests. Performed onsite construction inspection and provided weekly reports to client on construction progress of the observation deck, and a kayak and canoe accessible floating dock.

Waterways & Canals Dredging, City of Port St. Lucie, FL – Project Manager/Ecologist. Assessment of 11 residential canals connected to the St. Lucie River North Fork (an aquatic preserve) for dredging feasibility. Completed all sediment sampling, shoreline and submerged aquatic vegetation surveys, dock and seawall condition surveys, and successful Environmental Resource Permitting through DEP and ACOE. Coordinated hydrographic and upland surveys. Complete Dock and Seawall condition survey. Assisted in dredging methodology and potential disposal/offload site development.

Reed Canal Access Channel, Halifax River (ICW), City of South Daytona, FL – Ecologist. Project to create navigation access channel. Assisted with environmental resource permitting, conducted physicochemical sampling of water, sediment, and benthic community. Assisted in dredging methodology and potential disposal/offload site development. Prepared grant applications, cost estimates, and project presentations.

Ponce Inlet Side Channel Maintenance Dredging, Ponce Inlet Port Authority, Town of Ponce Inlet, FL – Project Manager, Ecologist. Complete permitting of channel dredging and on-beach spoil disposal through DEP's Coastal Construction Control Line Division. Coordination of Topo and Hydro Survey, Geotechnical Investigation, Resource Surveys, and Commercial Operations dependent on adequate navigation.

Sunplash Park Seawall Extension, Volusia County, FL – Project Manager/Ecologist. Coordination with County staff to construct a public friendly addition to an existing seawall and stormwater maintenance system. Reviewed project drawings for compliance with all environmental codes. Successfully completed permitting through DEP's Coastal Construction Control Line Division. Performed onsite construction inspection and provided weekly reports to client on construction progress.

PROJECT EXPERIENCE (CONT'D)

Dredge Material Disposal Site Assessments, St. Lucie County, FL – Ecologist. Assessed seven upland sites as potential temporary and permanent sediment disposal areas. Sites were evaluated for environmental resources, threatened and endangered species (including scrub jays and gopher tortoises), engineering practicality, and proximity to dredge project. Coordinated with the county's environmental, public works, and airport staff as well as with state and federal regulatory agencies.

Taylor Creek Emergency Shoreline Stabilization, St. Lucie County, FL – Project Manager, Ecologist, Onsite Inspector. Completed Permitting through DEP, ACOE, and SFWMD. Coordinated all necessary survey and geotechnical work. Inspected construction and ensured project completion within NRCS grant timeline. Assisted with as-built review, materials confirmation, and contract closeout.

Taylor Creek Restoration Dredging and Shoreline Stabilization, Phase 2 & 3, St. Lucie County, FL – Dredging and Shoreline Stabilization of SFWMD diversion canal. Assisted with all biological and ecological assessments, including threatened and endangered species, particularly seagrasses, mangroves, gopher tortoise survey and relocation, scrub jay survey and endangered plant survey. Assessed 7 separate parcels for spoil site location. Coordinated with FDEP, ACOE, SFWMD, and FWC to obtain permits. Prepared and conducted pre-bid and pre-construction meetings and construction inspections.

Anclote River Maintenance Dredging, City of Tarpon Springs, FL– Onsite Inspector. Prepared and implemented environmental compliance plan, turbidity monitoring and daily inspection. Created weekly reports for compliance with regulatory agencies and County. Coordinated work with City staff and Client (Contractor)

Summerall Park Boat Ramp and Park Improvements, City of Tavares, FL – Ecologist- Completed resource survey, sediment sampling and analyses, mitigation plan, and environmental permitting.

Wooton Park Boat Ramp Extension Dredging, City of Tavares, FL – Project Ecologist. Completed successful time sensitive Environmental Resource Permitting. Assisted in assessing the shoreline vegetation along with sampling and evaluation of resources within the channel template to be dredged along boat ramp.

Canal Conveyance Capacity Program Phase 1, South Florida Water Management District – Ecologist/ Inspector. Field reconnaissance of 45 miles of canals for conveyance capacity. Report writing on feasibility and cost estimate to dredge and repair areas of concern discovered during field reconnaissance. Assess all canal wetland and vegetation impacts.

Canal Conveyance Capacity Program Phase 2, South Florida Water Management District - Ecologist/ Inspector. Assessment of approximately 5 miles of existing G-16 drainage canal for the SFWMD Canal Conveyance Capacity Program in Broward County. Reviewed as-built plans and surveyed the entire canal right-of-way including: documentation of existing conditions, focusing on areas of potential canal bank erosion and failure, outfall pipe and structure replacement needs and sediment accumulation mapping within the canal. Completed water quality and sediment testing for both physical and chemical parameters. The chemical parameters included metals, nutrients, pesticides, herbicides, PAHs, Oil and Grease, specific conductance and pH. Provided a Final report documenting all the conditions, findings and recommendations for repair and associated costs.

Dredging & Marine Consultants
DMC
ENGINEERS • SCIENTISTS

CURTIS N. TODD, P.E.
SENIOR PRINCIPAL ENGINEER

Mr. Todd has been with **DMC** for 10 years and has over 35 years of experience in the field of Civil and Marine Structures Design & Engineering. He is knowledgeable in dredging, transportation design, site development, waterway parks and infrastructure projects. He has designed and permitted a vast number of projects, ranging from stormwater structures and surface water management; dredging, seawalls, boat ramps, docks, marinas and shore stabilization; residential, commercial, industrial and recreational development plans; roadway and interchange designs, bridges; permitting to construction, inspection and compliance monitoring. He brings his experiences of design from all parts of the state as well as nationally. Mr. Todd also coordinates site plans with Architects to provide well designed multifaceted projects. He has permitting experience with local, county, state and federal government agencies, including Water Management Districts, Florida Department of Transportation, Florida Department of Environmental Protection and the U.S. Army Corps of Engineers.

EDUCATION

- Pre-Engineering – Southern Illinois University, Carbondale, Illinois
- Civil Engineering – University of Akron, Akron, Ohio

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- Professional Engineer Registration, Florida, No. 37136

PROJECT EXPERIENCE

Surfside Estates, Beverly Beach, FL – Senior Project Engineer. Responsible for all engineering, design, permitting with City and FDOT on roadway entry redesign, plans, specifications and on-going construction inspection.

Halifax Harbor Marina North & South Basin Dredging, Daytona Beach, FL – Project Engineer. Assisted with upland disposal site drainage and containment issues. Verified material behavior and property assessment.

Sunsplash Park Seawall Extension & Stormwater Improvements, Daytona Beach, FL – Project Engineer. Designed and engineered a public friendly addition to an existing seawall and stormwater maintenance system located in Daytona Beach. Plans included sidewalk reconfiguration, a beach access structure and additional park amenities. Reviewed project drawings for compliance with all environmental codes. Successfully completed permitting through DEP's Coastal Construction Control Line Division.

Sun Glow Pier Seawall and Beach Access Structure Replacement, and Stormwater Improvements, Daytona Beach Shores, FL – Sr. Project Engineer responsible for replacement design of a collapsed seawall and adjoining parking lot and beach access facility. The plans included an exfiltation trench drainage design for the parking lot area.

PROJECT EXPERIENCE (CONT'D)

Riverside Park Pier & Bulkhead Replacement Design, New Smyrna Beach, FL – Coastal Engineer. Assisted with design of approximately 1000 linear feet of bulkhead repair including deadmen replacement, epoxy injection of concrete sheet-pilings and cap replacement. Reviewed plans for constructability and provided complete cost estimation.

Home Depot Stormwater Improvements, Palatka, FL – Sr. Project Engineer. Responsible for design of 100 feet of spreader swale and 10 feet high concrete retaining wall for stormwater pond improvements. Project included coordination with St. Johns River Water Management District for permit modification.

Palatka Riverfront Park Improvements, Palatka, FL – Project Engineer. Reviewed all plans related to all water related structures; ramp, boat docking, marina, assisted the client with estimating costs for various components of the project as part of the long term strategy to develop the park. Completed project QA/QC.

B-23 Canal Dredging and Seawall Repair, Port Orange, FL – Project Engineer/Engineer of Record. Reviewed plans for constructability, designed seawall repair components and provided in-field inspection of existing structures. Evaluated impacts to shoreline trees and compliance with City codes.

City of Port Orange Parks & Public Shoreline Protection, Port Orange, FL – Project Engineer/Engineer of record. Responsible for design of re-armoring 225 linear feet of cap stone and 215 feet of rock revetment for Causeway Park and avoiding shoreline and wetland impacts. Project included bidding, construction administration, inspection and project closeout. Coordinated all design work with FDOT and SJRWMD to meet its requirements. Provided all documentation to acquire lease agreement with City (client) and FDOT to use its right-of-way. Project included the B-23 Canal and right-of-ways.

Port Orange Causeway Park Shoreline Stabilization, Port Orange, FL – Project Engineer. Responsible for design of re-armoring 225 linear feet of cap stone and 215 feet of rock revetment for Causeway Park, ensuring new structures will not impede existing stormwater and surface drainage. Project included bidding, construction administration, inspection and project closeout. Provide QA/QC for project design, coordination with FDOT for right-of-away use.

Russell Property ADA Compliant Canoe & Kayak Landing Facility, Port Orange, FL – Project Engineering/ Engineer of Record. Ensured all design work conformed to FDEP rules for construction of piers over and in Outstanding Florida Waters. Provided all documentation to acquire lease agreement with City (client) and FDOT to use its right-of-way.

Taylor Creek Restoration Dredging, Phase 2, St. Lucie County, FL – Project Engineer. Evaluated seven potential upland disposal areas. Designed a new 20 acre disposal area to contain 90,000+ cubic yards of dredge spoil. Engineer of record for site survey coordination, monitoring well installation and compliance, geotechnical drilling, soils analyses and final berm cross-section and design, including stormwater management of the site.

Taylor Creek Restoration Shoreline Dredging, Phase 3, St. Lucie County, FL – Engineer of Record. Reviewed design of the rock revetment structure along 2, 000+ linear foot of shoreline along the C-25 Canal (Taylor Creek).

PROJECT EXPERIENCE (CONT'D)

Conveyance Capacity Evaluation Project, South Florida Management District (SFWMD), FL – Design Engineer. Assisted in collecting design and construction information for the reporting and analysis of 96 miles of canals in SFWMD area.

Aesop's Park-Dog Park and Park Improvements, Tavares, FL – Project Engineer. Responsible for engineering, permitting, and all bid drawings and specifications for the design of dog park, pavilion, waterline and resource impact minimization of associated facilities. Reviewed quotes for contractors to make recommendations to City.

Summerall Park Boat Ramp and Park Improvements, Tavares, FL – Sr. Project Engineer. Responsible for design of ADA boat ramp system, which included 30 long aluminum access ramp and a 20' long floating dock. Additional park improvements consisted of ADA restroom building, pavilion and parking facilities. Coordinated all stormwater, parking, dredging, boundary surveys, property verification, material disposal, and Americans with Disabilities Act (ADA) compliance for access to accessory docks.

Woodlea Sports Complex, Tavares, FL – Project Engineer. Responsible for design of 40-acre sports park, which includes 10 playing fields for baseball, softball and soccer in accordance with the City's master plan. Design includes grading, stormwater, parking, traffic flow, amenities, buildings, wetland conservation and ADA compliance.

Wooton Park Boat Ramp Dredging, Tavares, FL – Design Engineer. Evaluated the potential redesign of the Wooton Park Boat Ramp. Also assessed possible upland structure in relation to drainage for conceptual plan.

Wooton Park Marina and Seaplane Base, Tavares, FL – Design Engineer. Evaluated the 88-slip floating dock marina with special floating dock slips to accommodate pontoon type and belly-landing type seaplanes. The facility also includes an overwater fueling station and boat ramp, both accommodating seaplanes. Performed construction inspection of the jetting of concrete piles and lateral load testing of piles for this system.

Ed Stone Park Seawall Replacement, Volusia County, FL – Project Engineer. Designed and engineered the replacement of an existing deteriorating sand-cement seawall with a safer, more user-friendly seawall.

Southport Business Center, Charlotte County, FL – Design Engineer. Responsible for design of the Southport Business Center.

Drainage Improvements, City of Atlantis, FL – Design Engineer. Responsible for the development of drainage plans for drainage improvements for the City of Atlantis, FL. The project involved coordination with the necessary permitting agencies, development of contract specifications, assisting with bidding and construction services.

Palm Tran Bus Satellite Facility, Delray Beach, FL – Design Engineer. Developed paving, drainage, water and sewer plans form a Palm Tran Satellite Bus Maintenance and Administration Facility. The site consisted of 7.5 acres, which also included the design of a wastewater lift station. Project included applying for and obtaining permit approval for water and sewer facilities from its appropriate regulatory agencies. This project also included detention pond and exfiltration trench design.

WILL B. CORNELIUS II, P.E.
GEOTECHNICAL ENGINEER

Mr. Cornelius has over 12 years of experience as a project engineer and manager for various geotechnical and construction materials testing and inspection projects in Florida and the Caribbean. In addition to strong client interaction and management skills, Will has technical knowledge and practical experience with a wide range of projects, including canals, levees, drainage and water management facilities, bridges, roadways, infrastructure, power plants, hospitals and residential and commercial developments. His geotechnical duties have included managing field subsurface explorations and providing foundation and site preparation recommendations. He has also monitored the implementation of conventional site preparation procedures and specialty ground improvement techniques such as Vibro-Replacement, Jet Grouting, and Rigid Inclusions, as well as the construction of deep foundation systems and earth retaining structures for numerous projects. Will has vast experience in construction inspection particularly related to earthen damns and canal and shoreline bank compaction and stability analysis.

EDUCATION

- B.S., Civil Engineering, University of Central Florida, 2002
- M.S., Structures and Geotechnical Engineering, University of Central Florida, 2004

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS

- Professional Engineer, Florida No. 67538
- Florida Engineering Society (FES)
- Florida Institute of Consulting Engineers (FICE)
- National Society of Professional Engineers (NSPE)

AREAS OF EXPERTISE

- Geotechnical Engineering
- Evaluations of Existing Canals, Levees and Earthen Dams
- Slope Stability and Seepage Analyses
- Driven Pile Foundation Design
- Seawall and Bulkhead Design
- Bidding Assistance
- Technical Specifications for Geotechnical Aspects
- Construction Materials Testing and Inspections
- Field Resolutions
- Field Inspections of Existing Canals, Levees and Earthen Dams
- Soil and Concrete Field and Laboratory Test Reports
- Project and Construction Inspection Management
- Compliance with Geotechnical Specifications
- QA/QC During Construction

PROJECT EXPERIENCE

Platts Creek Stormwater Structure Improvements, St. Lucie County, Florida – Project Engineer. Coordinated the topographic survey field work and performed geotechnical site investigation of the existing conditions, and is currently designing plans necessary for the repair of the existing undermined wall and other desired improvements at the Platts Creek Stormwater Structure.

PROJECT EXPERIENCE (CONT'D)

Kingsway Canal Shoreline Improvements, Port St. Lucie, St. Lucie County, Florida – Project Engineer. Designed 16,375 linear feet of steel sheet pile bulkhead wall along the Kingsway Canal in Port St. Lucie. Also prepared a cost estimate, provided QA/QC review of grading and stormwater design, and coordinated additional topographic survey field work.

Taylor Creek (Site 7) Shoreline Emergency Repair Visual Inspections, St. Lucie County, Florida – Project Engineer. Performed a visual inspection of the 6 year old steel sheet pile bulkhead wall located on the east side of Taylor Creek in Fort Pierce, to observe the general condition of the bulkhead wall and to make note of any conditions that would merit remedial actions. Observations were submitted in a written report upon conclusion of the visual inspections.

Taylor Creek Restoration Dredging Phase II, St. Lucie County, Florida – Project Engineer. Observed the reconstruction activities of a portion of an interior slope of the Dredged Material Management Area (DMMA) that was damaged during the dredging activities, assisted with the monitoring of dredged material removal activities from the DMMA site, and submitted As-Built Certifications to FDEP and USACE.

Old Fort Park Stormwater Baffle Box Project Phases I & II, St. Lucie County, Florida – Project Engineer. Coordinated the topographic survey and geotechnical exploration field work, and is currently assisting with the engineering design and permitting services associated with Phase I of the Stormwater Baffle Box project. Will also assist with Phase II of the project, which includes shoreline habitat evaluation and design and associated permitting services.

Technical Evaluation of the Western Perimeter Levee of STA-3/4, Palm Beach County, Florida
Responsibilities included coordinating the subsurface explorations and laboratory tests, and serving as the project engineer for the various tasks associated with the evaluation of the existing 2.7± mile levee.

MacArthur Boulevard Reconstruction Project, Stuart, Martin County, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for this project, which included recommendations for the reconstruction of the roadway that was impacted during the hurricane events of 2004, sheet pile retaining walls, and beach renourishment.

Lykes Brothers BMPs 2, 3 and 4 & 5, Glades and Highlands Counties, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for these projects, which included recommendations for the proposed impoundment dikes, borrow canals and pump houses. Recommendations for the installation of driven piles to support two proposed 36-inch pipe crossings over an existing Lykes Brothers canal were also provided.

Langford Landing Docking Facilities, Jensen Beach, Martin County, Florida
Responsibilities included coordinating the subsurface exploration and preparing a geotechnical engineering evaluation for this project, which included recommendations for the installation of driven piles for the proposed 62-slip marina on the St. Lucie River.

Western Palm City Corridor, Martin County, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for this project, which included recommendations for the 5.5± mile roadway, mast-arm lighting and bridges spanning the C-23 Canal and Bessey Creek.

PROJECT EXPERIENCE (CONT'D)

Torrey Pines Institute for Molecular Studies, Port St. Lucie, St. Lucie County, Florida
Responsibilities included coordinating the subsurface explorations and preparing geotechnical engineering evaluations for this project, which included recommendations for the support of the columns of the three-story research laboratory building on augercast concrete piles and the support of the tilt-up and weight bearing walls on conventional shallow foundations. During construction, responsibilities included monitoring the load test performed on a test pile, monitoring the installation of production augercast piles, and subsequent engineering analyses and reporting.

Civic Center at City Center, Port St. Lucie, St. Lucie County, Florida
Responsibilities included coordinating the subsurface exploration and preparing a geotechnical engineering evaluation for this project, which included site preparation and foundation design recommendations for the construction of the new civic center building. To accommodate the structure, recommendations for the reclamation of a portion of an existing retention pond and a retaining wall were also provided.

FPL St. Lucie Power Plant – LLW Storage Facility, St. Lucie County, Florida
Responsibilities included coordinating the subsurface explorations and preparing a geotechnical engineering evaluation for this project, which included recommendations for the implementation of the Vibro-Replacement ground improvement technique to allow the support of the proposed structure on shallow foundations. During construction, responsibilities included monitoring the implementation of the Vibro-Replacement technique.

Floresta Drive Pedestrian Bridge Project, Port St. Lucie, St. Lucie County, Florida
Responsibilities included coordinating the subsurface exploration and preparing a geotechnical engineering evaluation for this bridge project over the Elkcam Canal, which included an augered, cast-in-place pile foundation system.

Old Dixie Highway Pedestrian Bridge, Indian River County, Florida
Responsibilities included coordinating the subsurface explorations and preparing a geotechnical engineering evaluation for this pedestrian bridge over the North Relief Canal that included a driven pile foundation system.

JOEL SCOTT STEWARD
ESTUARY WATER RESOURCES MANAGER

Joel Steward has 33 years of experience in water quality and estuarine ecology with an emphasis on eutrophication science and water quality criteria related to seagrass and shellfish protection. Mr. Steward specializes in estuarine environmental planning, including remediation strategies that require involvement of multiple agencies or partnerships; developing and overseeing diagnostic and other research projects; and managing environmental watershed projects. He managed several state-mandated and regional planning initiatives such as the Indian River Lagoon (IRL) Reconnaissance Report (NOAA and FDER/CZM), Indian River Lagoon Surface Water Improvement and Management (SWIM) Plan, Turkey Creek and Sebastian River watershed initiatives, the C-1 Canal Re-diversion Project, an IRL muck-sediment dredging prioritization plan; and he assisted in the development of other plans such as the IRL restoration plan for impounded wetlands, the National Estuary Program plan for the IRL system and the SWIM plan for the Northern Coastal Basins (Tolomato, Matanzas, and Halifax R. estuaries). Mr. Steward was the lead scientist on many applied research projects that have led to the establishment of major resource management targets for water quality (and desirable trophic state) and the improvement or protection of shellfish, seagrass, and coastal wetland habitats. Examples of these research projects include the determination of restored seagrass depth limits and related light targets, salinity targets and related freshwater discharge criteria, nutrient loading limits for the IRL and NCB systems (the IRL loading limits were adopted by FDEP as TMDLs), and proposed numeric nutrient criteria for the IRL and NCB systems. Mr. Steward also directs the water quality and habitat monitoring program for the IRL system that focuses on assessing seagrass coverages and their water quality requirements, and the state of coastal wetland resources. He has also been the lead technical manager for watershed-scale projects including the Turkey Creek muck dredging project and the C-1 Re-diversion Project, which were both originally proposed and initiated by Mr. Steward. Currently, he is working with a team of experts that are evaluating the algal blooms that caused faunal and floral resources impacts within the Indian River Lagoon.

EDUCATION

- B.S. Biology, College of William & Mary
- M.S. Bio-Environmental Oceanography, Florida Institute of Technology

PROFESSIONAL AWARDS

- Marine Resources Council: 1988 Outstanding Service Award toward coastal restoration
- NOAA: 1992 Coastal Zone Management Excellence Award nominee
- SJRWMD: 2008 Employee of the Year nominee

PROFESSIONAL AFFILIATIONS

- American Society of Limnology & Oceanography
- Coastal and Estuarine Research Federation
- Southeastern Estuarine Research Society
- Florida's Marine Numeric Nutrient Criteria Committee
- Co-Chair of IRL NEP Technical Advisory Committee

AREAS OF EXPERTISE:

- Scientific acumen
- Versatility and integrity
- Technical/scientific writing and meeting presentations
- Resource management planning
- Project design
- Coastal resource knowledge (specifically NE Florida)
- Supervisory and communication skills

PROJECT EXPERIENCE

Manages a wide range of environmental assessment, protection, and restoration projects in the coastal watersheds of Northeast and East Central Florida (extending over 1/3 of Florida's east coast), including:

- Monitoring of seagrasses and associated water quality, coastal wetlands, potentially toxic substances (metals, organics), and algal blooms;
- Comprehensive ecosystem restoration planning (e.g., developed the state's Indian River Lagoon (IRL) Surface Water Improvement and Management Plan, a precursor of the IRL National Estuary plan);
- Ecological process/ diagnostic studies with an emphasis on eutrophication and related target setting (e.g., estuarine TMDLs and numeric nutrient criteria for Florida);
- Feasibility studies for seagrass and water quality restoration strategies;
- Watershed planning specific to nutrient and TSS load reduction strategies; and
- Management of restoration projects (e.g., muck sediment dredging, shoreline stabilization, surface water treatment, etc.);
- Other earlier work (1983 – 1985) included an investigation of drought effects on water quality in the Middle St. Johns River and a District-wide environmental evaluation of the reuse of treated wastewater;
- Supervision of 13 staff and the administration of multi-million dollar annual budgets

St. Johns River Water Management District (SJRWMD) - Technical Program Manager, Coastal Basins, Division of Environmental Sciences. Coastal Basins supervisor, lead scientist and programs manager.

(Positions held during 1980 – 2011):

1980 – 83	Laboratory Chemist. Environmental water quality analyses (trace metals, TSS, TDS, alkalinity, chlorophylls, etc.)
1984 – 86	Environmental Scientist II
1987	Environment Scientist III
1987 – present	Technical Program Manager

The types of project work conducted while in the Environmental Scientist and TPM positions listed above are reflected in the reports and presentations provided on the following pages.

Swoope Boat Ramp
New Smyrna Beach, Florida

Tab 2
Experience

The project sheets that follow this cover page illustrate DMC's marine engineering, planning and permitting experience along Florida's east coast. Each project brings a new set of challenges and we believe a holistic approach to every project provides the greatest insurance for success. Our team has over 100 years experience in the design of marine and waterfront projects. Let DMC guide you through your next project!

DMC has not submitted or been granted a change order related to engineering services during any of the projects depicted in the following project sheets. We believe that clear communication with our clients at the very beginning of the project eliminates the need for changes in the scope and unwanted changes in engineering fees. This relates to timelines as well, clear communication with the client about long lead items such as environmental resource permitting is necessary to develop a project schedule that can be met.

DMC has not received any citations, violations or been involved in any litigation within the last three (3) years.

Riverside Park Bulkhead & Wharf Repair

City of New Smyrna Beach, Florida

Project Completed: **2012**
Engineering Fees: **$93,200**
Construction Cost: **$950,000**

Dredging & Marine Consultants, LLC **(DMC) working as a sub-consultant to Quentin Hampton and Associates, Inc. assisted the City of New Smyrna with assessing and designing the repair of the failing bulkhead at Riverside Park. This park is the center of the community and plays host to countless art festivals, concerts, fishing tournaments, a water taxi, etc. Project tasks included an existing structure assessment and corresponding report, City staff and stakeholder consensus building, construction cost estimation, FIND grant application assistance, design and permitting.**

Swoope Site
Public Boat Launching Facility
City of New Smyrna Beach, Florida

Completed: *2014*
Engineering Fees: $93,200
Construction Cost: $950,000

DMC was selected by the City of New Smyrna Beach to design and permit a public boat ramp and parking facility capable of holding 50 trucks and trailers. DMC worked with Quentin Hampton & Associates to develop a master plan for the project and will be responsible for all marine components, environmental resource permitting and compatibility with new stormwater systems. In addition, DMC submitted applications for Phase 1 (Design & Permitting) and Phase 2 (Construction) grants through the Florida Inland Navigation District (FIND). DMC was successful in securing nearly $50,000 for Phase 1 and $490,000 in Phase 2 construction funds for the City.

North Causeway Boat Ramp & Fishing Pier Improvements

City of New Smyrna Beach, Florida

Project Completed: **2015**
Engineering Fees: **$24,260**
Construction Cost: **$825,000**

Dredging & Marine Consultants, LLC **(DMC) worked as a sub-consultant to Quentin Hampton and Associates, Inc. to assist the City of New Smyrna with assessing and designing the repair of the failing bulkhead and fishing pier at the North Causeway Boat Ramp. This facility is heavily used and needed to be repaired in order to provide a safe launching facility for the community. DMC assessed the existing structures, designed and permitted repairs, provided construction cost estimation, FIND grant application assistance and construction inspection.**

Services Provided:

- **Existing Structure Evaluation**
- **Repair Recommendations**
- **Cost Estimation of Repairs**
- **Engineering and Design**
- **FIND Grant Writing Assistance**
- **Construction Engineering Inspection Assistance**

Calore Canal Dredging

City of New Smyrna Beach

Project Completed: 2014
Engineering Fees: $27,000
Construction Cost: $120,000

DMC staff coordinated or completed all planning, surveying, materials testing, environmental assessment, engineering and permitting to dredge approximately 5,000 cubic yards from a residential canal. Coordination and planning with the residents of the canal was crucial to keeping the project on-track and ensuring that all parties where satisfied with the project outcome. DMC evaluated the site for any resources or potential resource impacts, including identifying any threatened and endangered flora and fauna within the projects area. This included in-water submerged aquatic vegetation (SAV) surveying. DMC generated all engineering and design drawings (plans) for the dredging and sediment disposal project.

Services Provided:

- Coordination of Surveying and Geotechnical Testing
- Complete Environmental Resource Permitting
- Dredge Template and Dredge Material Disposal Planning
- Submerged Aquatic Vegetation Survey
- Resident Coordination
- Cost Estimation

B-23 Canal Restoration Dredging & Seawall Replacement

City of Port Orange, Florida

Project Completed: Dredging 2011 / Seawall 2013
Engineering Fees: $87,000
Construction Cost: $1,800,000

Dredging and Marine Consultants, LLC (DMC) engineers and scientists were tasked with designing and permitting the restoration dredging and seawall replacement of the B-23 Canal. Permitting and coordination was completed through the Florida Department of Environmental Protection, U.S. Army Corps of Engineers and the Florida Inland Navigation District. This maintenance dredging project was part of the overall Rose Bay Restoration Project in Port Orange, Florida and DMC was able to coordinate the use of the same dredge equipment and disposal area as a cost saving measure for the City. In addition, DMC designed and oversaw the construction of shoreline stabilization at the MSA 434A Disposal Site as well as directed the facilities cleanup and sod establishment as part of the project closeout.

Services Provided:

- **Engineering and Design**
- **Sediment Sampling and Characterization**
- **Geotechnical Investigation Coordination**
- **Removing 20,000 CY of Sediments**
- **Design Replacement of 5,000 Linear ft of Seawall**
- **Public Engagement, Consensus Building and Presentations**
- **Construction Inspection and Management**

Port Orange Riverwalk Park

City of Port Orange, Florida

Project Completed: March 2016
Engineering Fees: $209,960
Estimated Construction Cost: $4.7 Million

DMC was tasked by the City of Port Orange to develop, design, permit and bid construction of the City's premier waterfront park. DMC staff conducted an environmental resource survey of the complete property in order to better guide the locating of the many improvements associated with park development. DMC also coordinated with the public and multiple stakeholders to develop a conceptual plan that will revitalize the local waterfront district. DMC developed construction plans and the project is currently under construction.

Services Provided:

- **Public Engagement and Consensus Building**
- **Coastal Structure and Stormwater Engineering**
- **Existing Conditions Report & Recommendations**
- **Environmental Resource Surveying**
- **Utility Coordination**
- **Environmental Resource Permitting with SJRWMD and USACOE**
- **Existing Seawall Rehabilitation**
- **Boardwalk & Crossover Design**
- **Kayak/Canoe Launch Design**
- **Splashpark and Playground Design**
- **Restrooms, Trailways and Pavilions**
- **Engineering Design & Bidding**

Port Orange Riverwalk Park Phase 1A Construction Management

City of Port Orange, Florida

Project Completed: March 2016
Engineering Fees: $15,455

DMC was tasked by the City of Port Orange to review bids, shop drawing submittals, requests for information and provide engineering solutions during construction of Riverwalk Park Phase 1A. This included inspection of all waterfront components including a wavebreak, timber boardwalk, canal cross-over bridge and a kayak/canoe launch. In addition, DMC reviewed and approved pay applications throughout the construction, attended bi-weekly construction meetings and will provide as-built certification.

Services Provided:

- **Onsite Inspection**
- **Shop Drawing Review and Approval**
- **RFI Response**
- **Progress Meeting Attendance**
- **Pay Application Approval**
- **As-built Review and Certification**
- **Engineering Design & Bidding**
- **Cost Estimation**

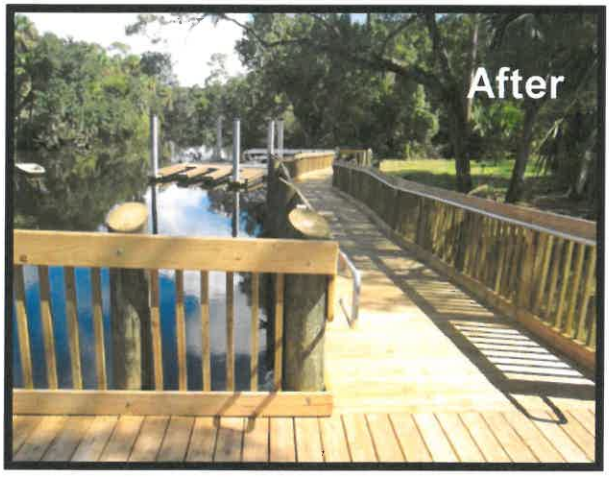
Russell Property ADA Dock and Kayak/Canoe Landing



City of Port Orange, Florida

Project Completed: **2012**
Engineering Fees: **$79,300**
Construction Cost: **$110,000**

The City of Port Orange contracted Dredging & Marine Consultants, LLC (DMC) to engineer, permit, and estimate cost for an ADA accessible kayak and canoe launching and landing facility at their newly acquired property on Spruce Creek, an Outstanding Florida Water. DMC also created ADA parking and sidewalks for disabled citizen access.

City of Port Orange Parks & Public Shoreline Protection

City of Port Orange, Florida

Project Completed: 2009
Engineering Fees: $100,000
Construction Cost: $320,000

Dredging and Marine Consultants, LLC (DMC), as a sub-consultant to Quentin L. Hampton, Inc., assisted the City with the evaluation of 23 public shoreline parcels and parks that were significantly impacted by the 2004-2005 hurricanes. Over 2 miles of natural and poorly armored shoreline were evaluated with structures such as rock revetments, natural vegetated shoreline and seawalls for floral resource impacts, current structural integrity, existing natural resources, and potential for improvement. Areas in need of repairs were identified and the required redesigns were performed to minimize cost of construction. DMC assisted with securing a Community Development Block Grant of $575,000 and coordinated work with DCA. DMC secured permits and exemptions from FDEP, SJRWMD, USACOE and DOT. DMC prepared construction bid documents, funding updates/reporting, and construction inspection.

***Services Provided*:**

- **Coastal Engineering**
- **Rock Revetment and Seawall Restoration Design**
- **Complete Environmental Resource Permitting through FDEP, SJRWMD, USACOE, and DOT**
- **Project Bidding**
- **Progress Reporting for Grant Agency**
- **Construction Inspection**

Sunglow Seawall Repair & Stormwater Improvements

Volusia County, Florida

Project Completed: 2012
Engineering Fees: $23,687
Construction Cost: 350,000

Volusia County selected Dredging & Marine Consultants, LLC to design and permit the repair of the failed Sunglow Pier and Condo Association seawall and stormwater system. DMC engineers were able to improve the stormwater treatment and parking layout of this narrow beach access area. In addition, DMC provided construction administration and onsite solutions to this complex repair timetable for construction that was limited due to turtle nesting season.

Sunsplash Park Seawall Extension & Park Design

Volusia County

Project Completed: **2011**
Engineering Fees: **$21,400**
Construction Cost: **$330,000**

Volusia County selected Dredging & Marine Consultants, LLC to design and permit the extension of their beach front seawall at Sun Splash Park in Daytona Beach. Storm surge and uncontrolled stormwater runoff had caused severe erosion along an 87 foot long section of unarmored shoreline bordering the park. DMC designed and successfully permitted the seawall extension, stormwater containment, sidewalk reconfiguration, beach access structure and native vegetation planting.

Taylor Creek Emergency Shoreline and Stormwater Stabilization

St. Lucie County, Florida

Project Completed: **2009**
Engineering Fees: **$185,000**
Construction Cost: **$376,000**

Dredging & Marine Consultants, LLC (DMC) successfully designed and permitted a 210 foot long retaining wall with rip-rap toe scour protection in Taylor Creek. Extreme erosion caused by years of high velocity discharge from Lake Okeechobee threatened a shopping center stormwater pond and parking lot. This erosion was accelerated during Tropical Storm Fay and enabled St. Lucie County to obtain a grant from NRCS to make the necessary repairs. DMC was tasked with completing this entire project in just 6 months, which was accomplished.

Summerall Park Waterfront and ADA Access Improvements

City of Tavares, Florida

Completed: **2009**
Engineering Fees: **$34,450**
Construction Cost: **$71,000**

Dredging & Marine Consultants, LLC (DMC) permitted and designed an access channel to allow safe small boat access to the Dora Canal from the Summerall Park boat ramp through an environmentally sensitive area. In addition, DMC designed and successfully permitted the replacement of the existing dilapidated boat ramp, added an ADA compliant parking space, ramp, floating dock, restroom and pavilion. As project managers, DMC completed a submerged lands determination, bathymetric survey, shoreline and submerged vegetation survey, all environmental resource permitting, chemical and physical sampling of sediment, bidding, and inspection required to dredge approximately 550 cubic yards of sediment. DMC fulfilled all CDBG funding requirements as well as mitigation replanting and monitoring requirements.

Other

Our comprehensive team consists of firms with offices in the east central and northeast Florida area as illustrated in the map below. Additional information on our sub-consultant team members is presented in this tab, DMC has a very successful working relationship with these firms and we interact directly with the Principals/Branch Managers to provide the needed responsiveness and resources for our projects. In addition, these firms are extremely knowledgeable in working in marine and coastal systems. Our comprehensive team consists of the following firms or individuals, including DMC:

Dredging & Marine Consultants, LLC (Port Orange) - marine and coastal engineering, dredging planning & engineering, shoreline stabilization, waterfront parks planning, environmental resource permitting, site civil design, environmental assessments, cost or value engineering, construction management, and grant assistance.
Gerard J. Pendergast Architect, PLC (New Smyrna Beach) **–** building & structures architecture
Marquis Halback, Inc. (St. Augustine) - landscape architecture
Universal Engineering Sciences (Daytona Beach) – geotechnical testing
Arc Surveying & Mapping, Inc. (Jacksonville) – hydrographic surveying
Sliger & Associates, Inc. (Port Orange) - boundary and topographic surveying
Pace Analytical Services, Inc. (Ormond Beach) - sediment and water chemical testing

DMC Ongoing Projects

DMC has the following ongoing projects in the design or construction phase:

- City of Edgewater: Kennedy Park Seawall Restoration
- City of Port Orange: Riverwalk Park Phase 1A & 1B, Causeway Park Dock Replacement and City Center Shoreline Stabilization
- Volusia County: Blue Lake Boatramp, Shell Harbor Boat Launching Facility, Ponce Inlet Side Channel Dredging and Lemon Bluff Boat Launching Facility
- City of Daytona Beach: Ballough Rd. Bridge Expansion & Marina Village and Day Docks
- City of Holly Hill: Sunrise Park Boat Launch Facility Improvements
- City of Ormond Beach: Cassen Park Docking Facility and Breakwater
- St. Lucie County: Platts Creek Stormwater Repair, Old Fort Baffle Box and North Causeway Channel Markers
- Lake County Water Authority: Palatlakaha River M-5 & M-6 Structures Modification
- City of Tavares: Woodlea Sports Complex Lighting and Wooton Pavilion Storage Expansion

GERARD J. PENDERGAST
ARCHITECT, PLC

FIRM OVERVIEW

Founded in New Smyrna Beach and Established in 2002, Gerard J Pendergast Architect, PLC has made a difference in the community. Mr. Pendergast "J" has worked closely with the City of New Smyrna Beach to develop a prototype restroom for public parks, including waterfront. He serves on many community boards and committees and works tirelessly for the architectural improvement of the area.

Gerard J. Pendergast Architect, PLC is a full service architectural firm with broad experience in multiple project types, commercial, residential, and public agency. Our team is capable of managing projects from the early stages of planning to certification of completion. By combining sound design and diligent management projects are completed on time and within budget. Personal service is reflective of the attention to detail every project receives. Successful projects are the main reason why the majority of our business is generated from repeat clients.

The firms standard of planning and design services produce innovative and sustainable solutions that meet our clients objectives and create works that tell the story of Florida's cultural, historical, environmental and artistic heritage.

The majority of my project team lives and work in Volusia County. In the event additional Architectural Staff is needed recruitment will be from Florida Architectural Universities and will provide additional professional employment in New Smyrna.

221 Canal Street • New Smyrna Beach • FL 32168 • Phone (386)427-5012 • gjp3@bellsouth.net • www.gjparchitect.com

City of New Smyrna Beach	Kyle Fegley	(386) 424-2168

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

The project consists of building a new restroom facility and picnic pavilions at an existing City site on the oceanfront.

J. Pendergast, Architect, designed the off-grid restroom building and open air picnic pavilions. The facility was designed for ease of maintenance and long term durability. It was built successfully at other municipal locations.

The construction cost for this restroom project is $64,000.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

The project consists of constructing a new boat ramp, parking and restroom facility at an existing City site that currently is shared by Volusia County and UCNSB. The items to be constructed include a 40 ft wide boat ramp with floating docks, a two stall restroom building with solar power, drainage system – eleven (11) structures and 950 LF of storm pipe with retention area, grinder lift station with 2,300 LF of 1½ inch force main, 9,000 SY of asphalt pavement and 5,500 SY of shell parking area, and numerous site improvements such as sidewalk, benches, railings, etc.

QLH obtained the services of J. Pendergast, Architect, to provide the restroom building design and construction documents. The restroom building is completely off the grid using photovoltaic panels and a standby battery system. The facility was designed for ease of maintenance and long term durability. It was built successfully at other municipal locations.

The construction cost for this entire project is $1,286,000.

Bridge of Lions Rehabilitation

Understanding the Past, Planning for the Future

Built in 1927, this historic bridge has undergone a complete rehabilitation.

As a member of the Bridge Design Team and responsible for the Public Participation Program and conceptual design, **Marquis Halback, Inc.** provided historic research and analysis, as well as landscape architectural design services for the improvement of the bridge's historic approaches and parks located on the east and west ends.

The final design focused on solving modern urban challenges, where issues like traffic and pedestrian circulation were addressed within the most appropriate historic context.

Matanzas River Historic Seawall

Preserving Yesterday, Protecting for Tomorrow

The Seawall Reconstruction Project is a result of tropical storm and hurricane damage to the historic seawall built in 1833 by West Point cadet engineers.

Marquis Halback, Inc. was hired to determine the feasibility of this flood control project. Duties included researching pertinent issues, synthesizing the information into easily understandable graphics and reports, and presenting it to citizens in a series of carefully planned public meetings and design workshops.

By integrating the City's goals, citizens' priorities, and solid urban design and engineering principles, the project has been funded by FEMA.

Florida State Parks

Little Manatee River State Park & Deleon Springs State Park

The landscape architect was commissioned as prime consultant to develop plans for Little Manatee River Sate Park. Following the development of a master plan, **Frederick Halback**'s team developed 2.5 miles of roadway, parking areas, picnic facilities, canoe launches, camping areas, and trailheads for hiking and horseback riding.

At Deleon Springs State Park, the landscape architect worked with the State of Florida Department of Natural Resources to develop plans for an improved entry road, parking, swimming area and bulkhead that blended into the natural surroundings. Today, the spring is visited by thousands of park guests who swim, fish, and paddle canoes in the beauty of 'Real Florida.'

Lake Eola Park

Downtown's Living Room

Lake Eola Park returned to the public an important downtown open space. **Frederick Halback** developed a timeless plan and as the prime consultant addressed a multitude of issues, such as downtown economic development, image, event production, urban linkages, and safety.

Working with the City, Civic Groups, Police, adjacent businesses and residential participants, a comprehensive plan was developed. The urban park provides over one (1) mile of lake front for major downtown events, from art festivals to concerts, holiday events, and fireworks.

It is the downtown living room used by locals and visitors and has become the most photographed element of downtown.

About Universal Engineering Sciences

WHO WE ARE

Universal Engineering Sciences, Inc., is one of the oldest and most recognized professional engineering consulting firms in the State of Florida serving the southeastern United States. Our broad client base includes many prominent corporations, developers, designers, planners, contractors, public sector agencies, municipalities, architectural, engineering firms and amusement companies. Universal has earned a reputation for providing responsive, reliable service, sound technical engineering support, and stability in the industry. The company has been ranked each year consecutively by Engineering News-Record as one of the Top 500 Engineering Design Firms in America since 1985. Universal's long-term presence in the design and construction industry provides several additional advantages; most important are: local experience, quality service, and reliability.

WHAT WE DO

Our wide range of in-house services includes: geotechnical engineering, subsurface exploration and environmental drilling, construction materials testing and threshold inspection, building code compliance inspection and plan review, geophysical services, and a wide range of environmental sciences. We have been providing our dynamic line of services to clients across the United States in the design and construction industry since 1964.

HOW WE'RE DIFFERENT

Universal's uniqueness is due, in part, to our being completely family-owned and operated. The company was founded in Merritt Island, Florida, in 1964 by Mr. Sy Israel, who remains actively involved in the firm as our chairman and chief executive officer. His son, Mark C. Israel, PE, is president of the company, running the day-to-day operations. Unlike many large corporations and conglomerates, both Sy Israel and Mark Israel are accessible to clients and staff—they are involved and they care! This factor, combined with the stability of ownership and management staff, as well as our committed to service philosophy, has contributed to our continued success, growth and longevity in the business. Universal's family-oriented work environment and excellence-in-service incentive programs help maintain the long-term employment of many highly qualified and dedicated professional and technical personnel committed to providing our clients with superior customer service, rapid response times, technical accuracy and on-time reporting.

WHERE WE ARE

Universal's corporate office, located in Orlando, Florida, is supported by 17 additional branch offices strategically located throughout Florida and Georgia. This coverage ensures that our clients receive responsive, quality service, and that we will always be there when you need us. The Universal family is currently comprised of nearly 600 experienced professionals and support specialists who are dedicated to solving problems, developing innovative ideas and time and cost-saving techniques (value engineering) for our clients. The continued growth of our "family" can be attributed to our wide range of satisfied clients, continued referrals, repeat business and market-expanding efforts.

WHY YOU NEED US

Universal's history, experience, organization and approach to doing business all combine to make us a unique engineering firm. Our priority is to see that our clients' objectives are met within budget; projects are implemented on schedule; and all quality and service requirements are fully satisfied. Our philosphy is to meeting the needs of our clients by doing whatever it takes.

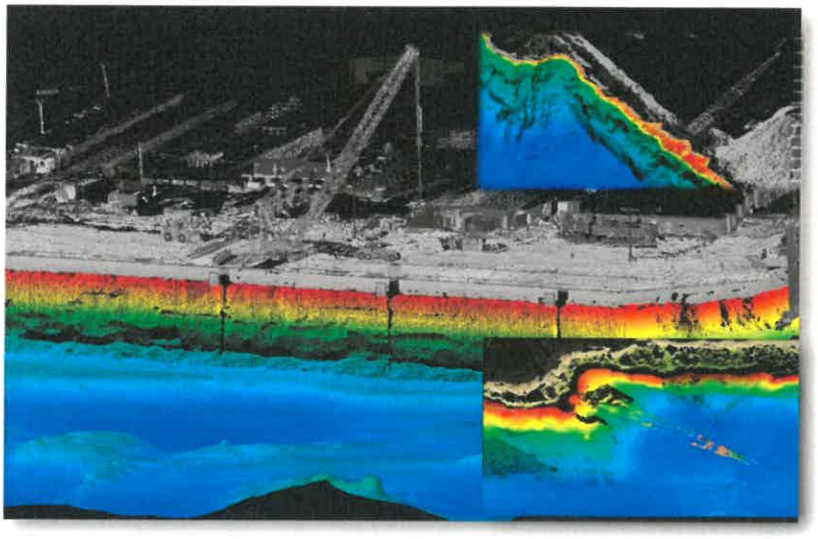
Arc Surveying & Mapping, Inc.

Arc Surveying & Mapping, Inc. is a multi disciplined company with offices in Jacksonville and Melbourne, Florida and Memphis, Tennessee. Since 1986 Arc has helped public and private sector clients to achieve their goals by collecting and providing accurate, reliable, cost effective topographic and hydrographic data.

Arc is staffed by an innovative team of professionals, each committed to excellence. Our surveyors and mappers are equipped with modern topographic and hydrographic equipment and can transmit digital survey data directly from any jobsite to Arc offices or those of our clients.

Arc is especially proficient with surveys that require quick turn around, such as large earthwork construction, dredging and navigation projects. Clients include the ACOE, DOT, NOAA, USCG, many construction companies and most major engineering companies.

Arc's maps are available in all computer formats, including MicroStation and AutoCAD. The company is continually raising the competitive bar by providing clients with interactive 3D models and holograms which are among the most compelling visualization products in the world.



For more information regarding Arc Surveying & Mapping, Inc., please visit our website www.arcsurveyors.com.

SLIGER & ASSOCIATES
incorporated

Founded in 1974 by Gus A. Sliger, former Chairman of the Florida State Board of Land Surveyors, Sliger & Associates, Inc. is the largest full-service professional land surveying firm in East Central Florida. When performance, reliability, and professionalism count, our reputation speaks for itself.

For more than thirty years, Sliger & Associates' team of professionals has provided complete customer service, consistent timeliness and accuracy, pioneering use of industry technology, great employees, and commitment to community service. When performance, reliability, and professionalism count, our reputation speaks for itself. We have successfully served the governments, businesses, and citizens of Central Florida since 1974.

Sliger & Associates brings more than 300 years of combined surveying experience to every project. Along the way, we pioneered much of the surveying technology in our area. Sliger & Associates was one of the first surveying companies to utilize GPS, robotics, laser and digital data collection in surveying. Sliger & Associates brings more than 300 years of combined surveying experience to every project. Sliger & Associates is licensed and qualified to provide most any type of survey, including: As-Built, Boundary, Condominium, Construction Layout, Control, Hydrographic, Mean High Water Line, Quantity, Right of Way, Topographic and Special Purpose surveys.

We currently have 25 employees who comprise our team of four Professional Land Surveyors, five Field Crews, a complete CADD department, an independent Research Department, and Administrative support.

CONTRACT RENEWAL
FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS
TAYLOR ENGINEERING, INC.

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS, via RFQ 04-16-ENG; and

WHEREAS, the City accepted the qualifications of Taylor Engineering, Inc., (Firm); and

WHEREAS, the parties desire to enter into the final fifth (5) optional one-year (1) renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND TAYLOR ENGINEERING, INC., AGREE AS FOLLOWS:

1. The City and Taylor Engineering, Inc., agree to all the terms and conditions as stated and contained in RFQ 04-16-ENG, including any/all Attachments, Addenda, and firm's Request for Proposals Response submitted, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the fifth (5) and final optional one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from June 29, 2025 and will continue for a year from that date.

CONTRACT RENEWAL
FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS
TAYLOR ENGINEERING, INC.

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS, via RFQ 04-16-ENG; and

WHEREAS, the City accepted the qualifications of Taylor Engineering, Inc., (Firm); and

WHEREAS, the parties desire to enter into the fourth (4) of five (5) optional one year renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND TAYLOR ENGINEERING, INC., AGREE AS FOLLOWS:

1. The City and Taylor Engineering, Inc., agree to all the terms and conditions as stated and contained in RFQ 04-16-ENG, including any/all Attachments, Addenda, and firm's Request for Proposals Response submitted, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the fourth of five (5) optional one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from June 29, 2024, and will continue for a year from that date.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES FOR MARINE APPLICATIONS;
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 29th day of June, 2016, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and TAYLOR ENGINEERING, INC, a Florida corporation, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 04-16-ENG, Continuing Professional Engineering Services for Marine Applications Only. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services for Marine Applications including improvements to the City's Coastal and Marine infrastructure and facilities as follows: City marina, waterfront parks and waterways facilities structures such as seawalls, ramps, docks, boardwalks, piers, sidewalks, trails, parking, restrooms, shade structures, dredging, coastal systems planning, design, permitting, environmental floral and faunal assessment, construction engineering and inspection services, grant writing and management; and other City shoreline armoring, stabilization and protection and;

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for marine, coastal, shoreline protection, site civil, environmental and drainage engineering and/or other such services which may be directly related to the services authorized by the CITY, and as may be further

described herein, and/or in amendments hereto or supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Marine/Dredging/ Civil/Environmental/Waterways Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information

contained in the design report, and with additional input from the CITY, the CONSULTANT shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

(d) The services of the CONSULTANT to be furnished herein expressly do not include the preparation of property, boundary, topographic, right of way, or other forms of survey. Such survey services may be provided as supplementary and special services pursuant to supplementary provisions of this AGREEMENT for which the CONSULTANT shall be compensated in accordance with the provisions hereof relating to "additional services."

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of

applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this

agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Brevard and Volusia counties, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the

CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit

bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of

proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT,

among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT.

25. LIMITATION OF LIABILITY

25.1 PURSUANT TO SECTION 558.0035, *FLORIDA STATUTES*, AN INDIVIDUAL EMPLOYEE OR AGENT OF CONSULTANT MAY NOT BE HELD INDIVIDUALLY LIABLE FOR NEGLIGENCE

26. TIME IS OF THE ESSENCE

26.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

27. THIRD PARTY RIGHTS

27.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this

AGREEMENT.

28. PUBLIC RECORDS AND OPEN MEETING LAWS

28.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

28.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public

records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public agency in a format that is compatible with the information technology systems of the public agency.

29. SOVEREIGN IMMUNITY

29.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

END OF PROFESSIONAL ENGINEERING SERVICES CONTRACT

FEE SCHEDULE
For

City of New Smyrna Beach

Continuing Professional Engineering Services for Marine Applications

TAYLOR shall invoice its services based on the following rate schedule.

Taylor Engineering, Inc. 2016 Hourly Rates

Labor Category Title	Hourly Rate
President	$300
Principal	197
Senior Advisor	199
Director	175
Senior Professional	159
Project Professional	114
Staff Professional	85
Editor	112
Sr. Technical Support	137
Technical Support	100
Administrative	53

Note 1: Taylor Engineering's other direct costs (travel, per diem, supplies, etc.) are billed at cost.

Note 2: Subconsultant fees will be billed at cost plus 10%.

Note 3: The rates are subject to escalation annually in September.

Proposal in Response to RFQ 04-16-ENG Continuing Professional Engineering Services for Marine Applications Only

Due by: March 29, 2016 at 3:00 pm

TAYLOR ENGINEERING, INC.

867

March 29, 2016

Carole Wimmer, CPPB
Purchasing Coordinator
City of New Smyrna Beach
Finance Department
2nd Floor
210 Sams Avenue
New Smyrna Beach, FL 32168

Re: RFQ 04-16-ENG – Continuing Professional Engineering Services for Marine Applications

Dear Ms. Wimmer:

Taylor Engineering, Inc. welcomes this opportunity to submit our qualifications to provide all marine services identified on page 10 of the above-referenced RFQ. With this submittal, we intend to demonstrate our experience in delivering leading-edge engineering and environmental solutions in the water environment. We also intend to communicate our commitment to address the City of New Smyrna Beach's long-term marine and environmental needs – those that extend beyond that of a single contract. We proudly offer multiple representative projects at Tab 2 that reflect long-term client relationships for similar services.

We intend for this submittal to underscore a salient point — namely, that *no other company headquartered in Florida can match Taylor Engineering's depth and breadth of corporate experience in this field of practice.*

Granted, other companies will make claims similar to ours. They will emphasize their extensive experience, personnel with specialized expertise, and familiarity with permitting requirements. However, we contend that few companies, if any, can match Taylor Engineering's combination of assets: our superb working relationship with local, regional, state, and federal agency personnel; our proven ability to design constructible and cost-effective marine and waterfront projects; and our strength in construction engineering and administration of those projects. Our marine and coastal engineers, dredging engineers, and environmental scientists work only on projects in the water or near the water's edge. This true specialization demands we succeed on every project to survive as a company, and that success leads to our client's success.

Taylor Engineering's six core values — integrity, service, excellence, responsibility, commitment, and teamwork — guide our everyday activities and relationships and support our vision of "delivering leading-edge solutions to challenges in the water environment." Our commitment to these values results in clients' high regard for Taylor Engineering. When asked what sets Taylor Engineering apart from other firms, clients' top four responses in an independent survey were integrity, technical expertise, personal relationships, and responsiveness. Ninety percent of Taylor Engineering's annual revenues derive from repeat business. No higher compliment exists in our field.

Taylor Engineering is an employee-owned company. Therefore, every employee has a stake in maintaining our reputation and ensuring that the quality of our work meets and exceeds the standards of practice. Employee ownership also means that accountability rests in our Jacksonville, Destin, Sarasota, and West Palm Beach offices. In addition, I am proud to say that for every dollar of revenue earned, Taylor

Engineering pays all of its corporate taxes to the United States and to Florida. Those same tax dollars go back into local government-sponsored projects. We have sought no convenient shelter elsewhere in the world. No decision made in London, Toronto, Pasadena, Dublin, New York, or Baton Rouge determines our level of commitment to our client. Our ability to remain both flexible and responsive is without equal. We are proud to serve Florida and the nation and to remain accountable right here at home.

Jonathan Armbruster, P.E. will serve as the project manager for this contract. If you have any questions about this submittal, please contact me or Mr. Armbruster at (904) 731-7040 or at *jmarino@taylorengineering.com* or *jarmbruster@taylorengineering.com*. I appreciate this opportunity to present our qualifications and look forward to providing quality services to New Smyrna Beach.

Sincerely,

James N. Marino, P.E., D.CE
President

Tab 1. Qualifications

Corporate Overview

Since 1983, Taylor Engineering has provided leading-edge solutions for water-related engineering, environmental, and planning challenges. With over 50 employees, Taylor Engineering is the largest Florida-based marine, coastal, and water resources engineering firm. Team members include 24 licensed professional engineers (11 coastal, 6 marine, 5 water resources, and 2 civil engineers). Twenty-seven members of our professional staff hold advanced degrees in engineering or sciences. These team members' skills and experience include marine engineering; coastal engineering; coastal restoration design; environmental sciences; hydraulic, morphological, and hydrodynamic modeling; coastal, riverine, and estuarine processes; hydrology and hydraulics; structural engineering; civil engineering; and construction administration, observation, and certification.

Office Locations

Taylor Engineering's headquarters are in Jacksonville, Florida; the firm maintains full-service branch offices in Destin, Sarasota, and West Palm Beach, Florida and field offices in Austin, Texas; Savannah, Georgia; and the U.S. Capital region. *We will perform the majority of work for this contract out of the Jacksonville, Florida office.*

Expertise

Our company focuses its attention on water-related engineering, planning, and environmental challenges with particular emphasis on coastal regions. The company takes on projects—from marine structures, coastal and environmental restoration, coastal processes analysis, and beach nourishment, to wave and storm-surge modeling, flood control, and flood insurance studies— that cover the spectrum of water-related issues. Each service shares a common characteristic: it supports projects occurring in the water or near the water's edge.

Key Services

Key services within our core areas of expertise include:

- Marine Structures
- Waterfront Recreation Facilities
- Dredging and Dredged Material Management
- Shore Protection and Erosion Control
- Coastal Processes Analysis
- Coastal Hydraulics, Wave, and Beach Modeling
- Beach Nourishment
- Hydrology and Hydraulics Analysis and Modeling
- Flood Control and Floodplain Management
- Water Resources Management
- Environmental Assessment, Planning, Permitting, and Restoration
- Mitigation Design
- Policy, Planning and Programming
- Construction Phase Services
- Geographic Information Systems

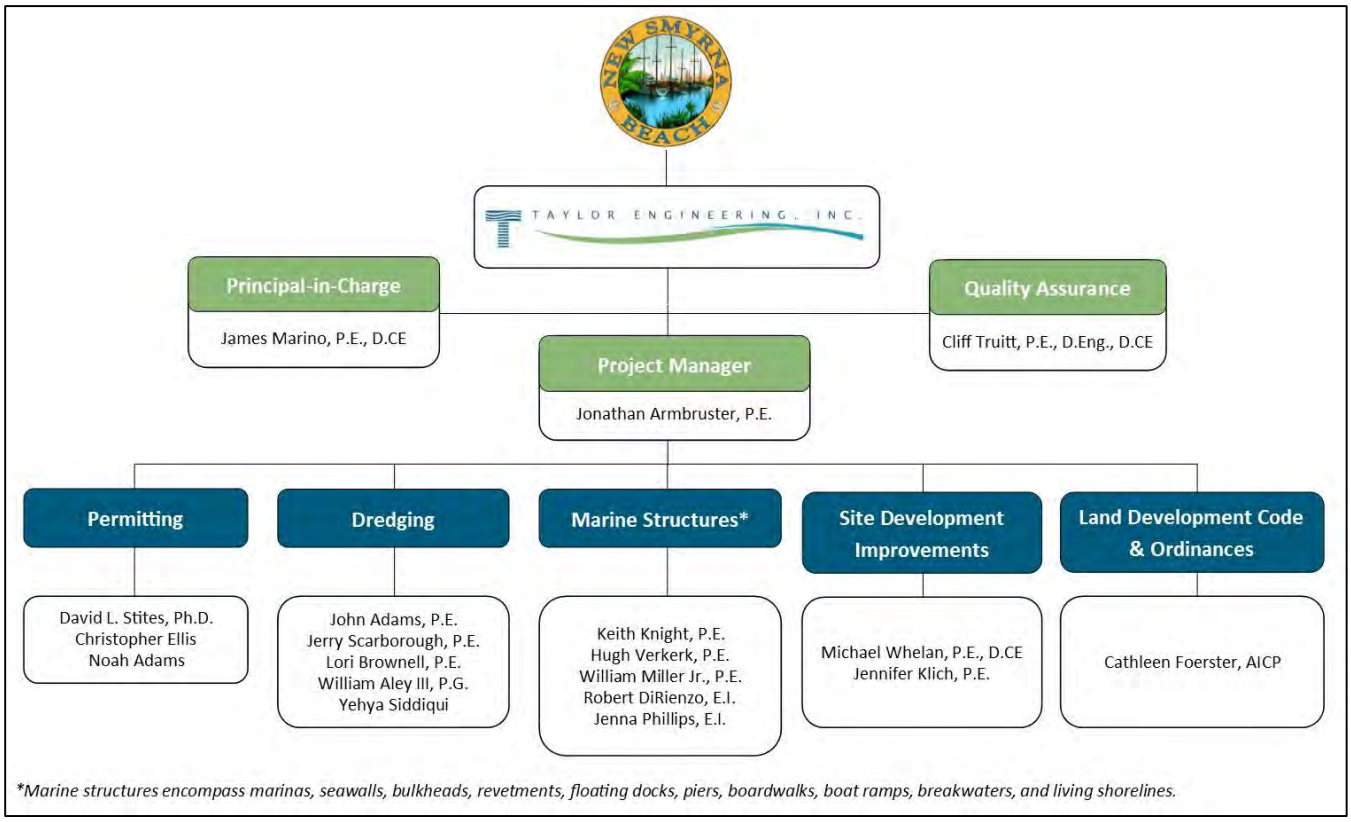
Throughout Taylor Engineering's 30+ years' history, we have developed a well-established portfolio of successful marine projects. Taylor applies a "long-haul" approach to projects—one that focuses on application of the problem-solution cycle of engineering and program development. Taylor Engineering bases this effort on its commitment to providing a life-cycle approach to the art and science of delivering leading-edge solutions in the water environment. This philosophical approach has served Taylor Engineering well for over 30 years.

Taylor Engineering's Life-Cycle Approach to Providing Leading-Edge Solutions

Taylor Engineering's principal client base has always been municipalities and other government clients. This history of service to governments at all levels throughout Florida has fostered our understanding of the demands placed on government officials — limited budgets, multiple stakeholders, and a mandate to serve the community effectively and efficiently. We always work to provide the highest level of client service, to exceed the client's expectation, and to deliver high quality projects to meet community needs.

We contend that few companies, if any, can match Taylor Engineering's combination of assets: our superb working relationship with local, federal, and state agency personnel; our proven success with marine planning, management, and engineering projects; and our dedicated, local Florida-based staff. We intend for this package to underscore a salient point — namely, that *no other company headquartered in Florida can match Taylor Engineering's depth and breadth of corporate experience in this field of practice.*

Project Manager



No other engineering firm can show the same level of experience on marine projects or match the understanding of local areas possessed by Taylor Engineering's project manager, **Jonathan Armbruster, P.E.** Mr. Armbruster has 17 years' experience and leads Taylor Engineering's waterfront engineering group. In this role, he oversees efforts across a spectrum of activities from feasibility analysis through final design and construction phase services for a range of projects including marine and waterfront facilities, marine structures, dredging, dredged material management facilities, hydraulic control structures, pile foundation structures, erosion control measures, and shore protection installations. Mr. Armbruster is the U.S. principal representative on the PIANC Recreational Navigation Commission and serves on the ASCE Coasts, Oceans, Ports, & Rivers Institute (COPRI) Ports and Harbor Committee.

Since 1999, Mr. Armbruster has provided services on more than 400 projects. His project management experience on projects of direct relevance to New Smyrna Beach's requested work categories (dredging and marine design and permitting; site development; seawall design and construction administration; and boat ramp, floating dock, and similar projects) includes:

- Bahia Urbana Waterfront Redevelopment – Marine Design, Permitting, and Construction Administration (San Juan, Puerto Rico)
- Dubois Park Waterfront Redevelopment - Design, Permitting, and Construction Administration (Palm Beach County, FL)
- Lighthouse Park Dock and Boat Ramp - Design, Permitting, and Construction Administration (St. Augustine, FL)
- Fort Caroline National Park Floating Dock Evaluation (Jacksonville, FL)
- Wooten Park Boat Ramp (Tavares, FL)
- Charles E. Cessna Landing Boat Ramp Replacement (Walton County, FL)
- Coastal Vilano Marina – Preliminary Design (St. Augustine, FL)
- Miramar Beach Parking Structure and Beach Access – Design, Permitting, and Construction Administration (Walton County, FL)
- Dee Dot Causeway Bulkhead and Revetment (St. Johns County, FL)
- FPL St. Lucie Plant Seawall – Design, Permitting, and Construction Administration (St. Lucie County, FL)
- Florida School for the Deaf and Blind Bulkhead and Seawall – Design, Permitting, and Construction Administration (St. Augustine, FL)
- Manalapan Seawall Code Review (Town of Manalapan, FL)
- Eagle LNG Marine Terminal – Design and Permitting (Jacksonville, FL)
- Peeples Industries Bulk Terminal – Preliminary Design (Jacksonville, FL)
- Eau Gallie River and Elbow Creek Restoration Dredging (Melbourne, FL)
- Sykes Creek Dredged Material Management Area (Brevard County, FL)
- Salt Run and San Sebastian Rivers Dredging (St. Augustine, FL)
- BV-4B Dredged Material Management Area – Design and Permitting (Brevard County, FL)
- SJ-20 Dredged Material Management Area – Design and Permitting (St. Johns County, FL)

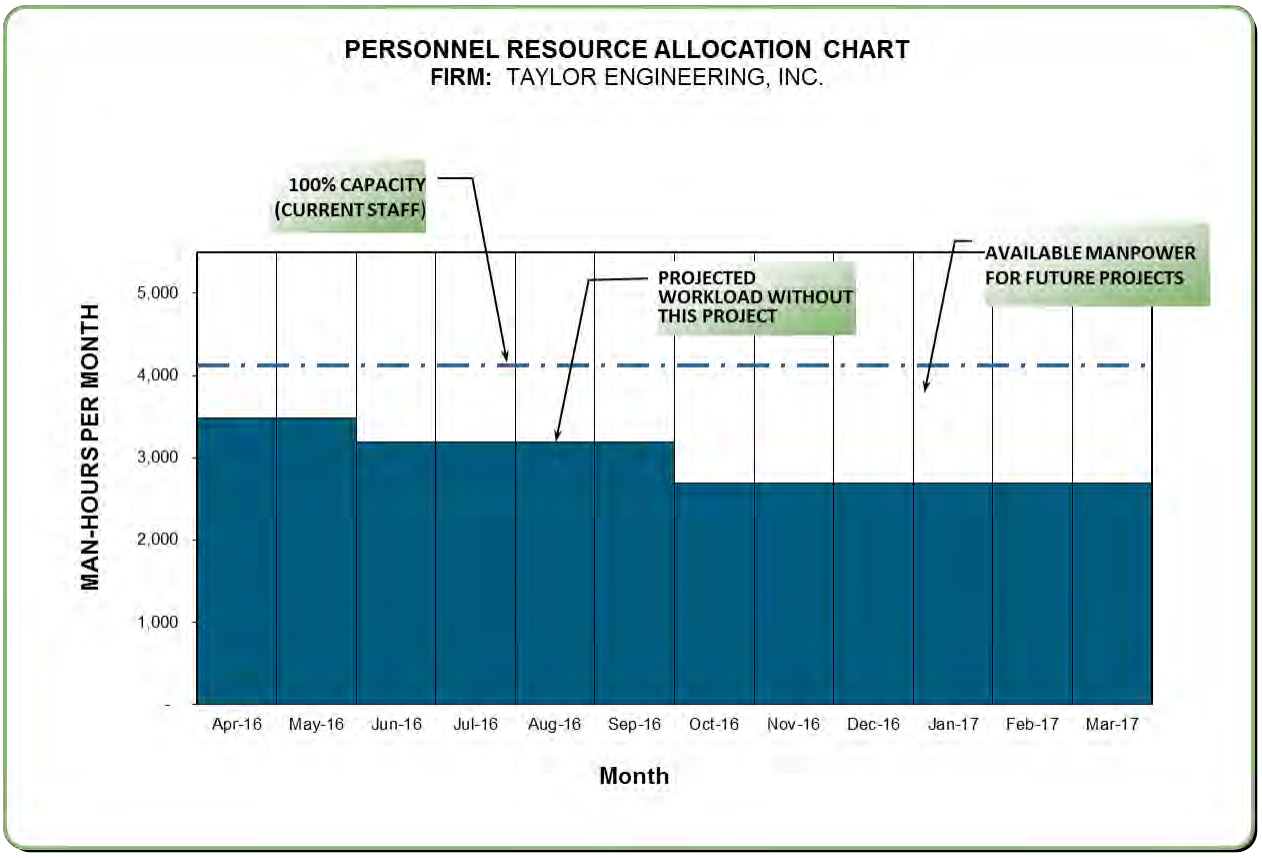
Project Team

Please see below an organizational chart of the project team. Resumes and licenses for assigned team members appear at the end of this tab.

Commitment/Ability to Consistently use the Same Personnel throughout the Contract

Taylor Engineering will endeavor to use the personnel identified above consistently throughout the contract with New Smyrna Beach.

Florida Small and Minority Business Assistance Act



Taylor Engineering is not a certified minority business enterprise as defined by the Florida Small and Minority Business Assistance Act.

Workload/Performance Capability to Meet Budget and Time Requirements and Ability to Perform Work as and when Requested by the City

We are keenly aware of the practical, logistical, and financial considerations that affect the City's operations and initiatives. Taylor Engineering's philosophy towards engineering analysis, design, and construction phase services is to identify cost-effective engineering solutions in response to specific design, operational, and management questions. With the largest number of qualified marine, dredging, coastal, water resources, and environmental engineers and scientists on staff in Florida, Taylor Engineering commits to providing marine engineering and design services to New Smyrna Beach efficiently, promptly, and without interference. With this submittal, Taylor Engineering commits to meet the City's time and budget requirements on any project resulting from this submittal, and to produce high-quality products.

Projected Personnel Availability

As shown in the figure below, Taylor Engineering's available work capacity substantially exceeds its present and anticipated workload. The gap between current capacity and projected workload illustrates Taylor Engineering's available manpower to devote to New Smyrna Beach. Taylor Engineering commits to providing the City with the human resources necessary for this contract.

Evidence of Insurance

Taylor Engineering's certificates of insurance are below.

ACORD® **CERTIFICATE OF LIABILITY INSURANCE**

James N. Marino, P.E., D.CE

Principal-in-Charge

Education

M.E. / Coastal and Oceanographic Engineering
University of Florida

B.S. / General Engineering
U.S. Military Academy at West Point

Graduate Certificate /
U.S. Army Command & General Staff College

Registration

Professional Engineer — FL, VA, LA, TN, and NC

Diplomate of Coastal Engineering — U.S.

Total Years Experience/ Years with Firm

38 / 5

Background / Responsibilities

Mr. Marino has more than 38 years of experience, including 20 years as an officer in the U.S. Army Corps of Engineers (USACE). He has served in an executive management role for a broad range of engineering projects, providing comprehensive staff and project management, development, and oversight for public works, coastal, port and harbor, transportation, and environmental projects.

Mr. Marino managed a multi-million dollar research and development program while stationed at the U.S. Army Engineer Research and Development Center Coastal Engineering Research Center. He served as Director of Public Works, U.S. Army, Japan and as Director of Public Works and Deputy County Manager for Seminole County, Florida. He also served as vice president of an 8,000-member multidisciplinary international consulting firm specializing in maritime planning, engineering, and management; vice president of a 500-member international consulting firm specializing in coastal engineering, transportation design, port and harbor planning and engineering, and urban waterfront design; chief operating officer of a multi-disciplined consulting firm specializing in planning, engineering, management, and environmental compliance in the coastal zone; and associate vice president responsible for the strategic planning, development and integration of federal services projects within the southeast division of a 3,000-member architectural, engineering, and planning firm.

Mr. Marino is a USACE de Fleury Medal recipient. He currently serves as a U.S. Commissioner to the World Association for Waterborne Transport Infrastructure (PIANC), a member of the Board of Directors for ASCE Coasts, Oceans, Ports, & Rivers Institute (COPRI), is a Director of the American Shores & Beach Preservation Association (ASBPA), and is a Director of the Atlantic Intracoastal Waterway Association (AIWA). He serves on the Board of Directors of the University of North Florida's (UNF) Taylor Engineering Research Institute and the UNF Dean's Leadership Council.

Project Experience

- Dauphin Island East End Beach and Barrier Island Restoration, Alabama (Ongoing) – Principal-in-charge for construction phase services for repurposing existing rock groins and placement of approximately 270,000 cubic yards of fill from an offshore borrow area on 0.93 miles of eroded beach.

- Eagle LNG Design, Jacksonville, Florida (2014 – Ongoing) – Principal-in-charge on the design of a new liquefied natural gas (LNG) marine terminal located on the north bank of the St. Johns River. Tasks include analyses of ship berthing loads, environmental (wind and current) loads, ship mooring loads, and structural loads. The conceptual design will include marine structures, fender design/layout, bollard sizing/layout, and dredging engineering.

- Dredging of Waterways, Brevard County Natural Resources Department, Brevard County, Florida (2014 – Ongoing) — Serves as principal-in-charge in the development and implementation of a multi-phase project to dredge roughly 400,000 cubic yards of muck sediments from Brevard County waterways. Taylor Engineering is providing dredged material management area design,

environmental permitting, and technical team coordination for dredging, dewatering, and disposing of sediments from tributaries located within Brevard County.

- Dredged Material Management Plans for the Intracoastal (ICWW) and Okeechobee Waterways (OWW), Florida (2011 – Ongoing) — Principal-in-charge in the development and implementation of 50-year management plans for maintenance of the 406 miles of federal navigation channels that comprise the ICWW in Florida, as well as the 98 miles of the OWW within Martin and Palm Beach counties. Under contract to the Florida Inland Navigation District (FIND), Taylor Engineering staff members have completed the plans' development and implementation phases (Phases I and II) for the ICWW in all 12 coastal counties that comprise FIND as well as 15 miles of the OWW east of the St. Lucie Lock.

- Professional Services for the St. Augustine Port, Waterway, and Beach District (District) (2011 – Ongoing) — Principal-in-charge for engineering and environmental support to the District for dredging, navigation, and waterways access projects. The contract with this client has been active for 23 years.

- Jupiter Inlet District (JID) General Engineering Services, Palm Beach County, Florida (2011 – Ongoing) — As principal-in-charge, oversees a wide variety of activities including monthly inspection of the north and south jetties (including all associated infrastructure), maintenance of the jetties and all aids-to-navigation under JID control, coordination of annual sand trap dredging activities, and performance of annual Loxahatchee River seagrass surveys.

- Florida Department of Transportation District 2 Unknown Foundations Evaluation, Florida (2010 – Ongoing) — Principal-in-charge for evaluation of tidal bridges with unknown foundation embedment depths. Overseeing development of hydraulic models and bridge scour calculations for over 40 Phase 1 and 2 scour studies.

- FPL St. Lucie Nuclear Power Plant (Plant), Discharge Canal Headwall Stabilization Project, St. Lucie County, Florida (2015) — Principal-in-charge for marine structures engineering design and environmental permitting to protect the Plant's discharge canal and headwall from severe coastal erosion. The project includes all phases of work from feasibility through final design of an ocean seawall and an offshore breakwater. Together, the two structures will protect the plant’s vital ocean-side infrastructure.

- Avenida Menendez Seawall, St. Augustine, Florida (2014) — Served as principal-in-charge, overseeing construction of a new seawall, designed to protect the existing 1860s historical landmark seawall. Project included historic preservation of a historically significant seawall and scour protection, installation of a new 1,800-foot seawall and waterfront promenade, utility system upgrades, and other flood protection measures within the historical preservation district of St. Augustine, Florida.

- Peeples Industries Bulk Terminal, Jacksonville, Duval County, Florida (2013) — Principal-in-charge on a project to provide Peeples Industries with engineering support for preliminary design of new bulk shipping marine terminal structures. The proposed terminal will occupy the site known as “Nichols Creek,” located on the west bank of the St. Johns River (Federal Channel Cut G) immediately west of Blount Island. Project work included site data collection, design concept and team coordination meetings, preliminary engineering design for marine structures, preliminary engineering for dredging, opinion of probable construction costs, and coordination with the client’s environmental permitting consultant.

- San Juan Waterfront Redevelopment, Puerto Rico (2013) — Principal-in-charge for marine and waterfront engineering consulting and design services that revitalized, retrofitted, and replaced aging and failing deep-water port infrastructure to support new mixed-use development including waterfront park facilities; cruise passenger tourist attractions; and commercial, residential, and civic developments. Marine structure services included evaluation of bulkheads, docks, and piers and design for new bulkheads, piers, mooring facilities, water taxi/seaplane berth, and other waterfront facilities.

- JAXPORT Jacksonville Harbor Deepening Draft Environmental Impact Statement (DEIS) and Air Quality Evaluation, Duval County, Florida (2013) — Principal-in-charge on preparation of technical components of the Jacksonville Harbor DEIS and the accompanying air quality evaluation. The DEIS evaluated the effects of deepening the first 14 miles of the St. Johns River channel from 40 feet to alternative depths up to 50 feet. Coordinated with U.S. Army Corps of Engineers Jacksonville District to ensure the DEIS addressed and met federal NEPA requirements. Taylor Engineering prepared the DEIS under an accelerated schedule dictated by the project's inclusion in the President Obama's "We Can't Wait" initiative.

Clifford Truitt, P.E., D.Eng., D.CE

Quality Assurance

Education

Doctor of Eng. / Engineering
Texas A&M University

M.E. / Ocean Engineering
Texas A&M University

B.S. / Physical Oceanography
Florida Institute of Technology

Registration

Professional Engineer — FL, AL, and LA

Diplomate of Coastal Engineering — U.S.

Total Years Experience/ Years with Firm

41 / 1

Background / Responsibilities

Dr. Truitt focuses on all aspects of coastal engineering and dredging projects including planning, design, environmental, permitting, and construction.

Dr. Truitt's background includes over 40 years of experience in coastal processes, coastal structure design, and dredging. During his tenure as a bureau chief in the Division of Beaches and Shores at the Florida Department of Environmental Protection, he was responsible for the review, evaluation, and impact assessment of every coastal structure proposed for construction in Florida at that time.

Dr. Truitt also served as the principal investigator and research hydraulic engineer at the U.S. Army Corps of Engineers' (USACE's) Engineer Research and Development Center, Coastal Engineering Research Center. He coordinated the work of 12 engineers and scientists in the Coastal Structures and Evaluation Branch and was personally involved in the design and monitoring of coastal erosion projects including conventional breakwaters, revetments and jetties, and a number of innovative technologies. He also assisted USACE district offices by designing and tailoring dredging operation specifications to meet specific regulatory and environmental needs.

Project Experience

- Ted Sperling Park Boardwalk Replacements, Sarasota County, Florida (2015 – Ongoing) – Providing QA/QC on the replacement of three aging timber boardwalks within Ted Sperling Park located on the south end of Lido Key.

- U.S. Army Corps of Engineers (USACE) Louisville District, Value Engineering of the Olmsted Dam River Dikes Project, Louisville, Kentucky (2015) – Technical expert on dredging/underwater construction, participated in a value engineering study of USACE's plan to install 14 dikes on the Ohio River to control river velocities and minimize long-term channel dredging.

- Dauphin Island East End Beach and Barrier Island Restoration, Alabama (Ongoing) – As senior engineer, providing construction phase services for repurposing existing rock groins and placement of approximately 270,000 cubic yards of fill from an offshore borrow area on 0.93 miles of eroded beach.

- USACE Engineer Research and Development Center, Disposal Operations Technical Support (DOTS), Improvement of Operations and Maintenance Techniques (IOMT), and Environmental Effects of Dredging (EED) – Dr. Truitt was a team member on several dredging-related projects in freshwater environments including:
    - USACE Chicago District – Assisted in the examination of potential resuspension during maintenance work in the Calumet and Chicago rivers. This included field monitoring of dredging operations.
    - USACE Chicago District – Study team member who evaluated potential use of contaminated sediment disposal from Indiana Harbor.
    - USACE Rock Island District – Evaluated confined disposal facility/dredged material management area (DMMA) options including site dewatering and dike raising.

- USACE New England District – PCB remediation in the Acushnet River in Massachusetts
- USACE Seattle District – Disposal options for Everett Harbor and Duwamish Waterway in Washington
- USACE Baltimore District – DMMA operations at Hart-Miller and Poplar Island

- Lido Key Technical Review, City of Sarasota, Florida (2014) – Completed a comprehensive independent technical review of a USACE design and modeling program proposing the use of Big Sarasota Pass shoals as a sand source for the Lido Key Federal Shore Protection Project; review assessed sediment budgets, morphology, and potential impacts to the shoal and adjacent shorelines.

- Venice Beach Outfalls, City of Venice, Florida (2014) – Engineer-of-record for innovative design modifications to two existing beach stormwater discharge pipes. Project installed pumps and treatment swales to divert low-flow volumes from older piping system that was suspected of contributing to water quality issues; also assisted with permits and grant follow-up.

- Bird Key Park Shoreline Stabilization, City of Sarasota (City), Florida (2012) – Engineer-of-record for the City's Bird Key shoreline restoration project involving the design and construction of an articulated concrete mat revetment, seawall, non-motorized boat launch ramps and an "ADA-friendly" floating kayak pier. All elements were part of a broader multi-use recreation trail system.

- Riverine Sand Mining, Scofield Island, Louisiana (2013) – Served as QA officer and conducted internal peer review of consulting team's borrow area design, proposed transport routes/methods, and island/marsh design; developed settlement monitoring procedure adopted by client for several projects.

- Sarasota County Comprehensive Inlet Management Plan, Sarasota County, Florida (2011) – Project manager/team leader for development of a comprehensive integrated inlet management plan (IMP) for Big Sarasota Pass and New Pass. Goals were to: 1) determine the extent to which inlets cause erosion on adjacent beaches and provide for mitigation of the erosive impact, 2) develop a sand management strategy, and 3) provide for a safe and efficient navigation strategy. The work was conducted in two phases and included peer review of technical approach and products by three outside firms.

- Bonita Beach/Lovers Key Beach Restoration Maintenance, Lee County, Florida (2015) – Engineer-of-record for design and permitting beach fill maintenance project on two distinct, previously restored shoreline segments. Managed borrow area investigation, cultural resources work, modeling assessment, and preparation of final design documents. Subsequently as subconsultant to different firm, assisted with construction phase services and final certifications.

- Third Party Technical Review, Stump Pass Experimental Stabilization, Charlotte County, Florida (2007) – Under separate contract to FDEP, performed independent technical review of performance of experimental shoreline stabilization project. Assisted in developing project monitoring protocols, reviewed final 'test plan' and subsequent survey and wave data, developed sediment budget, and prepared recommended action plan for FDEP.

- Venice Mitigation Reef, City of Venice, Florida (2006) – Engineer-of-record for design and construction of 7+ acres of rock placed in modules as mitigation for potential long-term impacts to nearshore hardbottom.

- Navarre Beach Restoration Project, Santa Rosa County, Florida (2006) – Engineer-of-record and project manager for maintenance nourishment of four-mile long beach fill project. Managed borrow area investigation, assessment of multiple years of monitoring data, modeling design alternatives, USACE and FDEP permitting, and preparation of final design documents.

- Town of Longboat Key (Town) Professional Services (1992 – 2006) – For almost 15 years, Dr. Truitt served as an independent technical advisor to the Town. He assisted the commission, town staff, and design consultants on a wide range of projects and issues including development, implementation, and monitoring of the Town's beach erosion control project, the first Town-wide canal dredging project, and updates to elements of the comprehensive plan and land use code.

Jonathan T. Armbruster, P.E.

Project Manager

Education

M.S. / Environmental Hydrologic & Hydraulic Engineering
University of Illinois

B.E. / Civil Engineering
The Cooper Union

Registration

Professional Engineer — AL, FL, NY

Total Years Experience/ Years with Firm

17 / 14

Background / Responsibilities

As vice president of Taylor Engineering's waterfront engineering group, Mr. Armbruster oversees efforts across a spectrum of activities from feasibility analysis through final design and construction phase services for a range of projects including marine and waterfront facilities, marine structures, dredging projects, dredged material management facilities, hydraulic control structures, pile foundation structures, erosion control measures, and shore protection installations. Mr. Armbruster is the U.S. principal representative on the PIANC Recreational Navigation Commission and serves on the ASCE Coasts, Oceans, Ports, & Rivers Institute (COPRI) Ports and Harbor Committee.

Project Experience

- Bahia Urbana Waterfront Redevelopment, San Juan, Puerto Rico (2013) — Served as project manager for marine and waterfront engineering consulting and design services that revitalized, retrofitted, and replaced aging and failing deep-water port infrastructure to support new mixed-use development including waterfront park facilities; cruise passenger tourist attractions; and commercial, residential, and civic developments. Marine structure services included evaluation of bulkheads, docks, and piers and design for new bulkheads, piers, mooring facilities, water taxi/seaplane berth, and other waterfront facilities.

- Leesburg Seaplane Ramp and Waterfront Structures, Leesburg, Florida (2015 - Ongoing) – Principal-in-charge of the final design, construction drawings, and construction phase services for a seaplane ramp and ancillary waterfront structures to service the Leesburg International Airport. Ancillary waterfront structures include a floating dock, gangway structures, and mooring buoys.

- Wooten Park Seaplane/Boat Ramp Design, Tavares, Florida (2014) – Project manager for technical and engineering assistance on the design and permitting of an 18-foot wide seaplane/boat ramp and dockage on Lake Dora.

- Charles E. Cessna Landing Boat Ramp Engineering Design and Permitting, Walton County, Florida (2010) — Project manager for engineering design and permitting of concrete boat ramp structure to replace a dilapidated yet popular boat launch facility in south Walton County. Project included survey, geotechnical investigation, ramp structural design, cofferdam design, and environmental permitting.

- Dubois Park Redevelopment, Final Design and Environmental Permitting, Palm Beach County, Florida (2010) — Project manager for engineering design and permitting in the redevelopment of Dubois Park. Project included creation of approximately 24 visitor boat slips, development of a recreational snorkeling area, construction of improved and expanded shoreline stabilization bulkhead and riprap revetment, fixed docks to moor a life-rescue boat and a law enforcement vessel, as well as a floating dock to serve as a water taxi terminal. In 2012, the project was the recipient of the National Association of County Park and Recreation Officials (NACPRO) Park and Recreation Facility Class II Award.

- Waterfront Commons, City of West Palm Beach, Florida (2009) — Provided management oversight and technical QA/QC for design, permitting, and construction administration for floating dock installation in the Lake Worth Lagoon east of the city's downtown. The floating docks serve as key elements of the city's downtown waterfront redevelopment program.

- Ted Sperling Park Boardwalk Replacements, Sarasota County, Florida (2015 – Ongoing) – Principal-in-charge for the replacement of three aging timber boardwalks within Ted Sperling Park located on the south end of Lido Key. Evaluating the existing structures, developing a design for replacement of each structure, coordinating permitting, and conducting construction phase services.

- Lighthouse Park Floating Dock and Dredging Engineering, St. Johns County, Florida (2008) — Project manager for engineering design and permitting of a concrete floating dock system and dredging to renovate and improve boat ramp facilities and Lighthouse Park in St. Augustine.

- Preliminary Design for Expansion of the Fort Pierce City Marina, St. Lucie County, Florida (2004) — Project manager for the development of a preliminary design to significantly expand the Fort Pierce Municipal Marina. The expansion included the addition of approximately 75 floating dock slips, increased long-side dockage, and a fixed pier for hosting fishing tournaments. Design tasks included optimizing the proposed facility's geometric, structural, environmental, economic, and ergonomic features.

- Design and Permitting for D&E Piers at Fort Pierce City Marina, St. Lucie County, Florida (2004) — Project manager for the engineering, design, and permitting of marina renovations to maximize berthing space and restore structural integrity to D & E Piers. Services included structural design of timber and concrete replacement piers as well as environmental permitting, and development of plans, specifications, and contract documents. In addition, the design provided updated marina utilities including water, fire protection, electricity, cable TV, and phone.

- FPL St. Lucie Nuclear Power Plant, Discharge Canal Headwall Stabilization Project, St. Lucie County, Florida (2015) — Project manager for marine structures and coastal engineering design and environmental permitting to protect the St. Lucie Nuclear Power Plant's discharge canal and headwall from severe coastal erosion. The project includes all phases of work from feasibility through final design of an ocean seawall and a series of offshore breakwaters. Completed feasibility assessment, engineering design, permitting, and construction phase engineering for the seawall. Completed coastal engineering modeling and design for offshore breakwaters. Providing ongoing environmental and engineering support for offshore breakwaters permitting with plans to complete final engineering upon receipt of state and federal permits.

- Florida School for the Deaf and the Blind: Seawall and Shoreline Infrastructure Improvements, St. Augustine, Florida (2015) — Project manager, directed team to mitigate shoreline erosion, design and construct protective shoreline seawalls, and improve campus shoreline infrastructure including perimeter roadway, stormwater systems, and student waterfront access features. Project included planning and landscape architecture, marine structures engineering, stormwater design, roadway design, and construction phase services.

- Miramar Beach Parking Structure, Walton County, Florida (2009) — Project manager and engineer-of-record for design and permitting of a beachfront parking structure. The structure replaced traditional at-grade asphalt parking historically subject to severe damage by coastal storms. Project included construction of a single-level concrete parking structure supported by 175 prestressed concrete piles, installation of a sheet pile upland retaining bulkhead, and roadside utility relocations to develop storm resistant public access parking.

- St. Johns River Water Management District, Eau Gallie River and Elbow Creek Dredging Project, Brevard County, Florida (2013 – Ongoing) – Project manager for the final design, bid package preparation, and bid assistance for muck removal restoration dredging all upland-related features (dredged management material area, road and rail crossings, and other pipeline corridor features).

- Sykes Creek Dredging Engineering and Permitting Services, Brevard County, Florida (2014 – Ongoing) – Project manager providing design, permitting, construction drawings and specifications for the dredging of Sykes Creek to remove muck and provide environmental restoration. The project will deposit the dredged muck material within a refurbished dredged material management area

Keith A. Knight, P.E.

Senior Structural Engineer: Marine and Waterfront

Education
B.S. / Civil Engineering
University of Florida

Registration
Professional Engineer — FL, GA, SC, TX, and Puerto Rico

Total Years Experience/ Years with Firm
19 / 15

Background / Responsibilities

Mr. Knight has over 19 years of experience in the design and construction of marine facilities and waterfront structures. His design experience includes ship terminals and port structures, waterfront parks, marinas, jetties, shoreline protection systems, dredging and dredged material management facilities, pedestrian bridges, vehicular bridges, and drainage control structures. His construction inspection experience includes port structures, dry docks, marinas, bridges, bulk material handling systems, dredged material management sites, shoreline protection systems, and seawall inspections, among others. Mr. Knight's structural experience includes designs with carbon steel, stainless steel, timber, wood composites, concrete, vinyl, fiberglass (FRP), and aluminum.

Project Experience

- Bahia Urbana Waterfront Redevelopment, San Juan, Puerto Rico (2013) — Design of approximately 1,000 linear feet of steel sheet pile bulkhead, a 300-foot long pedestrian bridge, mooring dolphins, seaplane docking, and other shoreline improvements. Design included seismic loading on the bulkhead due to liquefaction of poor soils and wave loading on the pedestrian bridge. Project items included a steel sheet pile bulkhead with concrete cap, sacrificial anodes, bollards, fenders, soil anchors, concrete filled pipe piles, prestressed double-tee members, and tropical hardwood decking. Work includes load rating and repair of existing structures, seismic load determination for new structures, corrosion analysis, and coordination with a multi-disciplinary team including architects and civil engineers.

- Charles E. Cessna Landing Boat Ramp Engineering Design and Permitting, Walton County, Florida (2009) — Structural design and engineering of concrete boat ramp and temporary cofferdam. Work included structural modeling of concrete slab with pile supported end-section, development of marine concrete specifications, design of vinyl sheet pile cutoff wall to prevent foundation undermining, and engineer's cost estimate.

- Leesburg Seaplane Ramp and Waterfront Structures, Leesburg, Florida (2015 - Ongoing) – Structural engineer on the final design and construction drawings for a seaplane ramp and ancillary waterfront structures to service the Leesburg International Airport. Ancillary waterfront structures include a floating dock, gangway structures, and mooring buoys.

- Wooton Park Combination Seaplane/Boat Ramp Design, Lake County, Florida (2014) – Design of 80-foot wide seaplane/boat ramp and dockage on Lake Dora.

- Dubois Park Improvements, Palm Beach County, Florida (2010) — Design of vinyl sheet pile bulkhead and dockage for Zeke's marina located within the boundaries of Dubois Park at Jupiter Inlet. Project included design and specifications for various park improvements including a seawall, fixed dockage, floating docks, dredging, and a breakwater.

- Florida School for The Deaf and The Blind Seawall, St. Augustine, St. Johns County, Florida (2012) — Design of approximately 200 linear feet of concrete sheet pile bulkhead with tie-back system. Work included determination of storm loads, traffic loads, and coordination of design to accommodate nearby

roadway and existing utilities.

- Emergency Steel Sheet Pile Seawall, Lantana, Florida (2009) — Structural design of approximately 600 linear feet of steel sheet pile to protect existing structures against erosion. The project included design of steel sheet pile in Support IT for earth pressure and wave induced forces. Other work included determination of wale forces, design of concrete cap, and preparation of specifications including performance specification for helical anchor tie-backs.

- Waterfront Commons, Palm Beach County, Florida (2009) — Structural design of the fixed concrete piers for the addition of approximately 1,200 linear feet of dock in the City of West Palm Beach. Specific work included design of pre-stressed concrete piles, concrete caps, connection to the existing bulkhead, and review of contractor's structural submittals during construction.

- Miramar Beachfront Parking Facility, Walton County, Florida (2009) — Structural design and engineering for a pile-supported concrete parking deck adjacent to the Gulf of Mexico. The structure replaced traditional at-grade asphalt parking historically subject to severe damage by wind and wave forces encountered during a typical hurricane.

- Florida Department of Environmental Protection, Norriego Point, Okaloosa County, Florida (2015 – Ongoing) – Design of steel sheet pile barrier wall to stabilize channel banks and to prevent the filling of the channel by drifting sand.

- Harborview Marina and Bulkhead Preliminary Design, Charlotte County, Florida (2007) — Preliminary structural design of over 3,000 linear feet of concrete bulkhead and preparation of engineer's cost estimate. The planned residential community project included a 200-slip marina, boat ramp, dockage, dredging, and shoreline protection.

- Fort Pierce Marina, Dock D & E Renovation, St. Lucie County, Florida (2004) — Design and preparation of construction plans/specifications for replacement of docks D and E at the Fort Pierce Marina. Project included new boat slip layout and structural design for fixed timber/concrete docks, pile moorings, access ramps, and pre-stressed pilings under wind/wave loading conditions. Additional work included replacement and upgrade of all utilities and lighting including potable water, fire protection, electric, cable, and telephone.

- City of Jacksonville Palms Fish Camp Boat Ramp Design, Jacksonville, Florida (2004) — Design of concrete replacement ramp for newly acquired city park. Design included pile-supported ramp with vinyl sheet pile and riprap erosion control.

- Dee Dot Timberlands Slope Stabilization, Jacksonville, Florida (2016) – Design of steel sheet pile and rock revetment to stabilize a causeway over Pablo Creek.

- Dee Dot Timberlands Steel Sheet Pile Bridge Abutment Replacement Jacksonville, Florida (2014) – Design of steel sheet pile abutment wall for a private bridge over Pablo Creek.

- Florida School for The Deaf and The Blind Segmental Retaining Wall, St. Augustine, St. Johns County, Florida (2013) — Design of approximately 300 linear feet of segmental wall along the shoreline that included helical piles to support wall foundation due to poor soils.

- Florida Power & Light (FPL) Seawall, St. Lucie County, Florida (2014) — Structural design of steel sheet pile seawall to protect oceanfront facilities at FPL's nuclear power plant. Project included seawall design accommodating hurricane induced scour with wall penetration of a 12-foot diameter buried discharge pipe and analysis of different seawall material types.

- Peeples Industries Jacksonville Terminal Preliminary Pier Design, Duval County, Florida (2013) — Preliminary design of a 400-foot loading/offloading pier for 800-foot bulk carrier cargo ships. Work included calculation of berthing energy, mooring loads, and fender design. Preliminary structural design included computer modeling of mooring and breasting dolphins and design of pier deck and foundation elements for the ship loading crane, mobile cranes, and other on-pier equipment loads. Structural design challenges included a 10–20-foot layer of limestone rock located just below the dredge line and the owner's desire to utilize a fixed-ship loading crane and move vessels during the bulk material loading process.

- Florida Inland Navigation District, Dredged Material Management Area BV-4B, Brevard County, Florida (2016 – Ongoing) – Design of dredged material containment site which includes access roads, weirs, earthen dike, settlement monitoring instrumentation, pipeline, and drainage.

Hubert C. Verkerk, P.E.

Senior Marine Structures Engineer

Education
B.S. / Civil and Structural Engineering
Vaal Triangle College, University of Potchefstroom, South Africa

Registration
Professional Engineer — FL and South Africa

Total Years Experience/ Years with Firm
37 / 7

Background / Responsibilities

Mr. Verkerk has over 37 years of experience in project management, engineering design, contract administration, and construction supervision on numerous civil engineering land development projects and industrial and commercial marine projects such as industrial site developments, commercial site developments, residential and commercial subdivisions, ports, harbors, shipping terminals, and bulk receipt terminals. He is also experienced in the design of highways, rural and city roadways and bridges, stormwater collection systems, water and sewer distribution systems, and all related permitting and environmental activities.

Project Experience

- Bahia Urbana Waterfront Redevelopment, San Juan, Puerto Rico (2013) — Served as project engineer for marine and waterfront engineering consulting and design services that revitalized, retrofitted, and replaced aging and failing deep-water port infrastructure to support new mixed-use development including waterfront park facilities; cruise passenger tourist attractions; and commercial, residential, and civic developments. Marine structure services included evaluation of bulkheads, docks, and piers and design for new bulkheads, piers, mooring facilities, water taxi/seaplane berth, and other waterfront facilities.

- Florida School for the Deaf and the Blind: Seawall and Shoreline Infrastructure Improvements, St. Augustine, Florida (2015) — Engineer-of-record for the design and construction of a protective seawall to improve campus shoreline infrastructure including perimeter roadway, stormwater systems, and student waterfront access features. Project included planning and landscape architecture, marine structures engineering, stormwater design, roadway design, and construction phase services.

- FPL St. Lucie Nuclear Power Plant (Plant), Discharge Canal Headwall Stabilization Project/Seawall, St. Lucie County, Florida (2012) — Engineer-of-record for marine structures engineering design and environmental permitting to construct a seawall to protect the Plant's discharge canal and headwall from severe coastal erosion. The project included all phases of work from feasibility through final engineering and construction. Seawall design included evaluation of numerous anchoring schemes (helical anchors, grouted anchors, deadmen wall, and diaphragm structures) to support a 24-foot high seawall in the post-storm scoured condition.

- Lantana Park Emergency Seawall Project, Town of Lantana, Florida (2009) — Provided project design and management, construction administration, and supervision for this $1.5 million construction project, which comprised an emergency steel sheet pile seawall for the Lantana Beach Park, which had undergone severe beach and dune erosion endangering two existing buildings built on the dune profile. Project design, management, and administration services included every aspect of this project, including an emergency environmental permitting application.

- Eagle LNG Concept Design, Jacksonville, Florida (2014 – Ongoing) – Senior engineer providing conceptual design of a new liquefied natural gas (LNG)

marine terminal located on the north bank of the St. Johns River. Tasks include analyses of ship berthing loads, environmental (wind and current) loads, ship mooring loads, and structural loads. The conceptual design will include marine structures, fender design/layout, bollard sizing/layout, and a dredging template.

- FPL St. Lucie Nuclear Power Plant, Sea Turtle Excluder Panel Test Tank and Apparatus Engineering, St. Lucie County, Florida (2015) — Engineer-of-record for the design of compliance test tank and apparatus to support plan development for installation of an excluder device on the velocity caps at the plant ocean intake structures. The excluder device would prevent large marine organisms, such as adult sea turtles, from entering the intake system.

- City of Fort Pierce Engineering Services, North 2nd Street Improvements, Fort Pierce, Florida (2010) — Design engineer for modifications to the Fort Pierce port improvements to provide upgraded and widened roadways for several roads within the port area, improved and revitalized stormwater structures, and upgraded water and sewer utilities. This project included a variety of right-of-way acquisitions and three new stormwater management areas, and provided new and expanded utilities for future growth and development. Project challenges included dealing with severe contaminated groundwater pollution, high tidal influences, dilapidated utility infrastructure, seasonal local industry demands, high volume truck traffic, and local residential and commercial activities.

- River Bend Development, Putnam County, Florida (2008) — Provided conceptual design, planning, and permitting services for a 200-slip marina directly across from the city of Palatka.

- Hernando County Channel Improvements and Dredging, Hernando County, Florida (2008) — Project manager and design engineer for Hernando County's three and a half mile long federal channel improvements and dredging project. Project challenges included providing a suitable dredge material management area and numerous environmental issues. Also provided administration services for federal grant funding.

- Jaxport Dames Point MOL (Mitsui O.S.K. Lines) Project, Jacksonville, Florida (2008) — Provided project management, construction administration, and supervision for this $250 million dollar construction project, which comprised a two-berth extension to the current Jaxport/Blount Island Marine terminal. Project design, management, and administration services included every aspect of this project including a 1.5 million cubic yard dredging operation, new deepwater bulkhead, crane rails, container terminal, utility installation, stormwater management, environmental permitting, and construction oversight.

- Crowley Maritime Services, Jacksonville, Florida (2008) — Provided on-call engineering and construction administration services for all landward and seaward improvements for the Crowley Terminal. These services included a continuous maintenance-dredging project; ramp facilities for the ro-ro operation, barge, and tug berth; and continuous container terminal upgrades.

- USA Naval Berth, Port Everglades, Ft. Lauderdale, Florida (2004) — As design engineer and project manager, provided construction administration and supervision for a new ship berth designed to provide support for U.S. Navy weather laboratory vessels. This project included a new deep-water bulkhead and berthing arrangement on the south end of the Port Everglades entrance, crane apron, new buildings and offices, new utilities, and stormwater management.

- Chevron USA, Panama City, Florida (2004) — As design engineer and project manager, provided construction administration and supervision for a new deep-water bulkhead restoration project for fuel barges and tug berthing at Chevron's Bulk Fuel Terminal in Panama City.

William Miller Jr., Ph.D., P.E.

Senior Coastal and Hydraulics Engineer

Education

Ph.D. / Coastal and Oceanographic Engineering
University of Florida

M.S. / Coastal and Oceanographic Engineering
University of Florida

B.S. / Naval Architecture and Marine Engineering
University of Michigan

Registration

Professional Engineer — FL and GA

Total Years Experience/ Years with Firm

20 / 11

Background / Responsibilities

Dr. Miller has taken a leading role in near shore and inlet hydrodynamics, hurricane surge, wave mechanics and loading, littoral processes, shoreline stability/protection, water quality in streams, estuaries, and marinas, sediment transport, and structure induced sediment scour, as well as engineering design of shore protection and navigation projects. His work includes the application of two-dimensional finite element models such as the U.S. Army Corps of Engineers' RMA2, RMA4, CGWAVE, and ADCIRC, the MIKE21 model suite, and the REFDIF, CGWAVE, and MIKE21 wave models. He has successfully applied these models to many locations throughout Florida (including applications to inlets, bridge hydraulic studies and flushing/circulation studies). Prior to joining Taylor Engineering, Dr. Miller served 21 years (active and reserve) as a Submarine Qualified, Nuclear Trained U.S. Naval Officer.

Project Experience

- Leesburg Seaplane Ramp and Waterfront Structures, Leesburg, Florida (2015 - Ongoing) – Completing a coastal conditions analysis for the final design of a seaplane ramp and ancillary waterfront structures to service the Leesburg International Airport. Evaluating the wind, water level, and historical storm data to determine wave heights and wave periods at the site to estimate the required design loads, toe scour, and protection stone sizes.

- Elba Island LNG Facility Seawall Analysis, Savannah, Georgia (2014) – Project manager for the preparation of a letter report on the coastal conditions (design water levels, wave heights, and wave periods), recommended seawall crest elevation, estimated wave loads on the seawall, and maximum expected wave scour at the seawall.

- City of Jacksonville Fire Station Dock, Duval County, Florida (2013) — Lead engineer and project manager to update coastal engineering design parameters for a pile-supported dock structure and determined dock design loads due to waves and currents. Developed special calculation methods for grated deck loads.

- Bahia Urbana Waterfront Redevelopment, San Juan, Puerto Rico (2010) — Task manager and lead engineer for the coastal conditions estimates (surge, waves, winds) for the waterfront redevelopment. Estimated the coastal conditions and current and wave forces on boat piers, shoreline revetments, and a pedestrian bridge within the harbor.

- Florida School for the Deaf and Blind Seawall, St. Johns County, Florida (2010) — Developed coastal conditions estimates (water level, current speed, wave heights, scour, wave loads) for seawall design. Supervised application of 2-D hydrodynamic model to develop water levels and currents speeds at the site. Supervised 1-D wave model application to develop wave heights and periods for various wind speeds. Estimated wave loads and scour based on conditions.

- TRAPAC Port Shoaling, Duval County, Florida (2010) — Task manager for modeling and analysis of excessive shoaling at the TRAPAC terminal at JAXPORT. Supervised evaluation of multi-year bathymetric data and hydrodynamic modeling of the site to develop an understanding of the causes and processes

that have led to excessive shoaling at the site. Developed several alternatives to alleviate the problem.

- S.R. A1A Seawall Erosion and Scour Study, Vilano Beach, St. Johns County, Florida (2009) — As project manager, directed cross-shore modeling and evaluated local seawall scour for a proposed seawall along 1,600 feet of S.R. A1A at Vilano Beach. The project included evaluation of the effects of long-term historical shoreline recession on the scour seaward of the seawall.

- French Leave Marina Breakwater and Shoreline Design, Eluthera, Bahamas (2009) — Developed the design storm surge and design wave conditions for a marina located near Governor's Harbour, Eleuthera, Bahamas. Used the design conditions to develop a CGWAVE model to examine alternative marina layouts and their effect on wave heights along the adjacent shoreline and within the marina. Also designed a wave barrier to protect the marina and minimize waves within the marina.

- Guana Tolomato Matanzas National Estuarine Research Reserve, Shell Bluff Revetment, St. Johns County, Florida (2009) — Determined the design storm surge and wave conditions for the Shell Bluff Revetment at Guana Tolomato Matanzas National Estuarine Research Reserve. Determined the required rubble mound revetment armor stone sizes and revetment configuration (including toe protection) for the design conditions and developed cost estimates for the revetment. Also evaluated the feasibility of constructing the revetment with articulated concrete block rather than standard armor stone.

- Florida Inland Navigation District (FIND) Site MSA M-5 Gabion Rehabilitation, Martin County, Florida (2009) — Project manager for construction supervision of gabion repair and rehabilitation. Coordinated and supervised the marine contractor in installation of 430 new gabions and rock fill and repair of existing gabions along the shoreline of site.

- Seawall Scour Study at Eglin Air Force Base, Okaloosa County, Florida (2009) — Conducted cross-shore modeling and local seawall scour evaluation at three proposed seawalls at Eglin Air Force Base. The project included evaluation of the effects of a proposed beach fill and long-term historical shoreline recession on the scour seaward of the seawalls.

- Waterfront Commons, West Palm Beach, Florida (2008) — Conducted floating dock wave load estimates and evaluated contractor design alternatives for a city waterfront park development.

- Dubois Park Development, Palm Beach County, Florida (2008) — Developed the final shore protection revetment and snorkeling/recreation basin breakwater designs. The effort included all aspects of the designs, including revetment and breakwater armor and toe protection design and supervision of design drawing development. The project also required modeling (RMA2 & RMA4) the final marina and breakwater designs to ensure contaminant flushing and snorkel area velocities fell within limits, including RMA2 model calibration with velocity measurements.

- NASA Causeway, Brevard County, Florida (2008) — Project manager for a study that developed design conditions (wind speed, storm surge, and wave heights) at the NASA causeway in the Indian River Lagoon near Titusville, Florida. The project also evaluated the feasibility of using debris concrete as revetment armor stone along the causeway.

- Indian River Drive Revetment Feasibility Study, St. Lucie County, Florida (2008) — Project manager for a study to evaluate the feasibility of constructing a revetment along the Indian River Lagoon to protect Indian River Drive from being undermined during storms. The project included survey evaluation, natural resources and permitting requirements review, determination of design condition (wind speed, storm surge, and wave heights), shoreline erosion evaluation, and revetment armor design and cost evaluations.

- Manatee River Disposal Area Scour Study, Manatee County, Florida (2007) — Modeled (RMA2) the velocities at borrow pits in the Manatee River during extreme conditions and estimated the scour potential of dredge material placed in the borrow pits. Developed a RMA2 2-D hydrodynamic model and calibrated the model for tidal stage and velocity. Modeled 25-, 50-, and 100-year storm velocities and evaluated the susceptibility of the dredge material to scour. Recommended a cap layer of larger material to withstand 50- and 100-year scour.

- Florida Inland Navigation District (FIND) FL-8 Shoreline Improvement, Flagler County, Florida (2007) — Evaluated the revetment armor design for the FL-8 site along the Intracoastal Waterway. Determined the design wave heights, including wave heights from boat wake, and developed typical revetment cross-sections based on the most recent survey information. The design included special consideration for existing seagrass beds at the foot of the revetment.

John F. Adams, P.E.

Senior Advisor - Dredging

Education
B.S / Civil Engineering
The Citadel

Registration
Professional Engineer — FL

Total Years Experience/ Years with Firm
47 / 11

Background / Responsibilities

Mr. Adams currently serves as senior advisor to Taylor Engineering's waterfront group. His prior 36 years of U.S. Army Corps of Engineers experience includes 14 years as Chief of the Operations and Maintenance Program and 14 years as Chief of the Regulatory (Dredge & Fill Permit) Program in the Jacksonville District. Mr. Adams was personally involved in developing and guiding many large projects involving channel dredging, dredged material disposal, port development, beach nourishment and land development. He was responsible for 240 employees working on these projects throughout Florida, Puerto Rico, and the U.S. Virgin Islands.

Project Experience

- Florida Inland Navigation District, BV-24A Dredged Management Material Area (DMMA), Brevard County, Florida (2015 – Ongoing) – Senior advisor on the planning, design, and permitting of the BV-24A DMMA, a 112.52-acre area. Initial planning involved significant regulatory coordination concerning scrub jays.

- Florida Inland Navigation District, St. Lucie County Reach I Permitting and Dredging, St. Lucie County, Florida (2014 – Ongoing) — Serves as senior advisor on the permitting, planning, and dredging of 12 miles of Intracoastal Waterway within St. Lucie County.

- Florida Inland Navigation District, Dredged Material Management Area NA-1, Nassau County, Florida (2014) — Served as senior advisor for the construction administration of $3.7 million dredged material containment site NA-1 on the Intracoastal Waterway near the Fernandina Beach Airport. Project included construction of an earthen berm with blanket and toe drains. Foundation preparation included installation of wick drains to speed settlement of dike over clay soils.

- Florida Inland Navigation District, Feasibility Study of Sediment Basins near Cut 1 of Okeechobee Waterway, Martin County, Florida (2014) — Reviewed the dredging alternatives and the economic analysis to determine cost savings from alternative maintenance dredging schemes.

- Florida Inland Navigation District, Permitting and Final Design of the BV-4B Dredged Material Management Area, Brevard County, Florida (2014 – Ongoing) — Serves as senior advisor for the permitting, design, and construction administration of a ±101-acre site that will have an approximate storage capacity in excess of one-million cubic yards of material.

- Florida Inland Navigation District, Dredged Material Management Area (DMMA) Development, Nassau and Duval Counties, Florida (2013 – Ongoing) — Serves as the senior advisor in the planning, environmental review, preliminary design, permitting, final design, and construction administration of two DMMAs in Florida.

- Florida Inland Navigation District, Intracoastal Waterway Deepening in Vicinity of the Port of Palm Beach, Palm Beach County, Florida (2014 - 2016) — Served

as senior advisor for the permitting, final design, and construction administration of the deepening project in vicinity of the Port of Palm Beach. Project included removal of approximately 131,000 cubic yards of material, transfer of material to the Peanut Island dredged material management area, and submerged natural resources mitigation.

- Florida Inland Navigation District, Crossroads Maintenance Dredging, Martin County, Florida (2013) — Senior advisor for the construction administration to hydraulically remove approximately 50,000 cubic yards of material and transfer to the existing M-5 dredged material management area.

- Florida Inland Navigation District, MSA 434 Intracoastal Waterway (ICWW) Maintenance Dredging in Vicinity of the Ponce de Leon Inlet, Volusia County, Florida (2013) — Senior advisor for the final design and construction administration of the hydraulic dredging project that involved removal of approximately 200,000 cubic yards of material from the ICWW and transfer to the existing MSA 434 dredged material management area.

- Florida Inland Navigation District, Deepening the Intracoastal Waterway in Broward County, Florida (2013) — Senior advisor for the permitting, USACE Section 408 review, and final design for the deepening of the waterway from -10 feet to -17 feet.

- Florida Inland Navigation District, Dania Cutoff Canal Deepening, Broward County, Florida (2013) — Served as senior advisor for permitting, design phases, and construction administration of the project, which involved the deepening of 4,000 feet between U.S. Highway 1 and Port Everglades. Critical issues included concerns about impacts to seagrass and hardbottom habitat.

- Florida Inland Navigation District, Okeechobee Waterway Maintenance Dredging, Martin County, Florida (2012) — Senior advisor for the permitting, final design, and construction administration of the Okeechobee Waterway maintenance dredging project that involved the removal of approximately 8,500 cubic yards of material from Route 1 and Route 2 of Lake Okeechobee.

- Jupiter Inlet District Sand Trap Dredging, Palm Beach County, Florida (2011) — Assisted the senior engineer in preparation of engineering plans and specifications, bid administration, and construction observation for this maintenance dredging project at Jupiter Inlet.

- Jacksonville Port Authority Dredged Material Management Plan, Duval County, Florida (2011) — Served as senior advisor in the development of a conceptual dredged material management plan timeline. Analyzed anticipated dredging requirements and available disposal capacities to develop recommended options for disposal of dredged material.

- Twelve Mile Creek Dredging Verification, Pickens County, South Carolina (2011) — As the technical lead, verified the contractor successfully removed material to the extent practical during restoration dredging of the creek. The project removed and placed approximately 450,000 cubic yards of material in an upland containment area.

- Florida Inland Navigation District SJ-14 Dredged Material Management Area Return Water Buried Pipeline, St. Johns County, Florida (2011) — Served as senior advisor for the installation of 2.5 miles of buried 36-inch and 42-inch pipe. The buried pipes will discharge decanted material from future dredging operations to the Intracoastal Waterway and accommodate stormwater runoff from an adjacent perimeter ditch.

- Dredged Material Management Plan for the Atlantic Intracoastal Waterway, Norfolk, Virginia to the St. Johns River, Florida (2011) — Served as program manager for a project that included reviewing data, defining dredging reaches, and developing dredging, and disposal management strategies for the U.S. Army Corps of Engineers.

- Florida Inland Navigation District, SJ-14 Assessment and Remediation, St. Johns County, Florida (2011) — Senior advisor for the assessment and remediation of ± 43 acres of wetland impacts resulting from a contractor spill of dredged material slurry outside the SJ-14 dredged material management area containment basin.

- Florida Inland Navigation District, M-5 Design and Permitting, Martin County, Florida (2011) — Senior advisor for a project to offload approximately 365,000 cubic yards of material from an island dredged material management area for ultimate beach disposal.

Jerry W. Scarborough, P.E.

Senior Advisor - Dredging

Education
B.S. / Civil Engineering
University of South Florida

Registration
Professional Engineer — FL

Total Years Experience/ Years with Firm
34 / ≤1

Background / Responsibilities

Mr. Scarborough joined Taylor Engineering in February 2016 as a senior advisor to the waterfront group upon retirement from the U.S. Army Corps of Engineers (USACE) Jacksonville District. Highlights of his 34-year USACE career include:

- Chief, Water Resources Branch, Programs and Project Management Division (2002 – January 2016) – Responsible for all navigation, coastal, and flood control projects in the Jacksonville District, including all operations and maintenance of the District's navigation projects and dredging for the U.S. Navy and U.S. Marine Corps. At the time of his retirement in January 2016, he was providing oversight on 85 active planning, engineering, design, and construction projects for harbor improvements, dams, bridges, levees, and shoreline protection. The average value of projects totaled approximately $200 million annually and accounts for 30% of the District's work program.

- Chief, Al Asad Branch, Programs and Project Management Division, Baghdad, Iraq (2009) - Mr. Scarborough spent six months on assignment in Baghdad where he led a team of U.S. government civilians and contractors on the planning, engineering, and construction support of 100 projects valued at over $500 million for the U.S. military construction and reconstruction of Iraq.

- Project Manager, Programs and Project Management Division (1991 – 2002) – Responsible for the successful execution of navigation and shore protection projects.

- Design Engineer, Engineering Division (1984 – 1991) – Responsible for producing and coordinating design work on various civil works projects.

Honors

USACE, Superior Civilian Service Award, 2015
Florida Shore and Beach Preservation Association, Richard Bonner Award, 2015
USACE, de Fleury Bronze Metal, 2012
USACE, Superior Civilian Service Award, 2009
USACE, EEO Supervisor of the Year, 2008
USACE Jacksonville District, Engineer of the Year, 1994

Lori S. Brownell, P.E.

Senior Dredging Engineer

Education

M.S. / Civil / Environmental Engineering, University of Wisconsin-Madison

B.S. / Civil Engineering
University of Wisconsin-Madison

Dredging Engineering Short Course
Texas A&M University

Florida Engineering Leadership Institute

Registrations / Certifications

Professional Engineer — FL

OSHA HAZWOPER — U.S.

Transportation Worker Identification Credential — U.S.

Total Years Experience/ Years with Firm

16 / 16

Background / Responsibilities

As director of the waterfront engineering group, Ms. Brownell leads a team dedicated to marine structures engineering, coastal structures, civil and dredging engineering, and waterfront facilities design. Ms. Brownell has hands-on planning, permitting, design, and construction administration experience for numerous waterfront, marine, and dredging-focused projects within the southeastern United States. Ms. Brownell maintains both OSHA HAZWOPER and TWIC certifications. Ms. Brownell currently serves as Governing Board Treasurer for ASCE's Coasts, Oceans, Ports, & Rivers Institute (COPRI) and on NSPE's Honor Awards Task Force.

Project Experience

- Florida Inland Navigation District, Intracoastal Waterway Deepening between Lake Worth Inlet and Palm Beach County Docks, Palm Beach County, Florida (2016 – Ongoing) — Project manager and engineer-of-record for the permitting and final design of a 4.3-mile deepening project immediately south of Lake Worth Inlet.

- Florida Inland Navigation District, BV-24A Dredged Management Material Area (DMMA), Brevard County, Florida (2015 – Ongoing) – Project manager on the design and permitting of the BV-24A DMMA, a 112.52-acre area approximately 1,400 feet west of the Indian River shoreline and east of the southeast leg of the Valkaria Missile Tracking Annex.

- Florida Inland Navigation District, Permitting and Final Design of the DU-9 Dredged Material Management Area, St. Johns County, Florida (2014 – Ongoing) — Project manager for the permitting, design, and construction administration of a ±100-acre site that will have an approximate storage capacity in excess of 1 million cubic yards of material.

- Florida Inland Navigation District, Permitting and Final Design of the BV-4B Dredged Material Management Area, Brevard County, Florida (2015) — Assisted with the permitting, design, and construction administration of a ±101-acre site that will have an approximate storage capacity in excess of 1 million cubic yards of material.

- Florida Inland Navigation District, St. Lucie County Reach I Permitting and Dredging, St. Lucie County, Florida (2015) — Assisted with the development and implementation of a multi-phase project to permit, plan, and dredge 12 miles of Intracoastal Waterway (ICWW) within St. Lucie County.

- Florida Inland Navigation District, Dredged Material Management Plan (DMMP) Update, St. Johns and Flagler Counties, Florida (2015) — Assisted with the update of the original St. Johns and Flagler counties' DMMPs, including review of historical documentation, dredging history and projections, and dredged material management strategies for maintenance of the 50-year storage requirement.

- Florida Inland Navigation District, Northeast Florida Dredged Material Management Plan (DMMP) Update, Nassau and Duval Counties, Florida (2013 – Ongoing) — Project manager for the update of the 1986 Nassau and Duval counties' DMMPs, including review of historical documentation, dredging

history and projections, and dredged material management strategies for maintenance of the 50-year storage requirement. As of August 2015, the Nassau DMMP will be further updated to add the federal channel from the south end of the Fernandina Harbor project north to the Florida-Georgia state line to the AIWW management plan area and resets, for FIND planning purposes, mile 0 of the AIWW at the state line.

- Florida Inland Navigation District, Deepening the Intracoastal Waterway in Broward County, Florida (2014 – Ongoing) — Project manager and construction administrator for the deepening of the waterway from -10 feet to -17 feet mean low water. Previously the senior engineer for the permitting, USACE Section 408 review, and final design. Total construction value of approximately $17 million.

- Florida Inland Navigation District, Intracoastal Waterway Deepening in Vicinity of the Port of Palm Beach, Palm Beach County, Florida (2014) — Project manager and construction administrator for the permitting, final design, and construction administration of the deepening project in vicinity of the Port of Palm Beach. Project entailed the removal of approximately 131,000 cubic yards of material, transfer of material to the Peanut Island dredged material management area, and submerged natural resources mitigation. Total construction value of approximately $2 million.

- Florida Inland Navigation District, Dania Cutoff Canal Deepening, Broward County, Florida (2013) — Project manager, engineer-of-record, and construction administrator for the removal of approximately 105,000 cubic yards of material from the Dania Cutoff Canal. Project required detailed coordination with the U.S. Army Corps of Engineers, Florida Department of Environmental Protection, Broward County, and Port Everglades. Total construction value of approximately $7.1 million.

- Florida Inland Navigation District, Crossroads Maintenance Dredging, Martin County, Florida (2013) — Project manager, engineer-of-record, and construction administrator to hydraulically remove approximately 50,000 cubic yards of material and transfer to the existing M-5 dredged material management area. Total construction value of approximately $1.1 million.

- Florida Inland Navigation District, Intracoastal Waterway (ICWW) Maintenance Dredging in vicinity of Ponce de Leon Inlet, Volusia County, Florida (2013) — Project manager, engineer-of-record, and construction administrator for the final design and construction administration of the hydraulic dredging project that involved the removal of approximately 200,000 cubic yards of material from the ICWW and transfer to the existing MSA 434 dredged material management area. Total construction value of approximately $1.5 million.

- Florida Inland Navigation District, NA-1 Permitting, Design, and Construction Administration, Nassau County, Florida (2013) — Project manager for the permitting and design of an island 16-acre dredged material disposal area located immediately west of the Fernandina Beach Municipal Airport.

- Florida Inland Navigation District, Okeechobee Waterway Maintenance Dredging, Martin County, Florida (2012) — Project manager, engineer-of-record, and construction administrator for the permitting, final design, and construction administration of the Okeechobee Waterway maintenance dredging project that involved the removal of approximately 8,500 cubic yards of material from Route 1 and Route 2 of Lake Okeechobee. Total construction value of approximately $500,000.

- Florida Inland Navigation District, O-7 Permitting and Design, Martin County, Florida (2011) — Project manager for the permitting and design of an upland dredged material disposal area located on the north bank of the Okeechobee Waterway in Martin County.

- Florida Inland Navigation District, M-5 Permitting and Design, Martin County, Florida (2011) — Project manager, engineer-of-record, and construction administrator for the permitting, design, and construction administration to offload approximately 365,000 cubic yards of material from an island dredged material management area for ultimate beach disposal.

- Florida Inland Navigation District, Borrow Pit Regulatory Coordination, Broward County, Florida (2011) — Project manager for regulatory coordination and identification of issues for deposition of dredged material into upland/freshwater Broward County borrow pits.

William (Bill) Aley IV, P.G.

Professional Geologist

Education

M.S. / Geology
Florida Atlantic University

Minor, Invertebrate Zoology
Minor, Geographic Information Systems

Masters Certificate / Federal Acquisition Management

B.A. / Geology
Florida Atlantic University

Registration

Professional Geologist — FL and CA

Total Years Experience/ Years with Firm

10/ ≤1

Background / Responsibilities

Mr. Aley specializes in field geology and geotechnical evaluations, sediment/water/air sampling and testing; hydrogeologic investigations, civil works/water resources planning, design, and construction; and dredging.

Project Experience

- Florida Inland Navigation District, Okeechobee Waterway (OWW) Cut 1 Sediment Basin, Martin County, Florida (2015 – Ongoing) – Project manager on the dredging design and permitting of a sediment basin at the eastern end of OWW Cut 1. Also evaluating three channel realignment alternatives to realign the OWW Cut-1 and Cut-2 channel to utilize naturally deeper water to reduce future maintenance intervals and costs.

- Florida Inland Navigation District, Intracoastal Waterway Deepening in Broward County, Florida (Ongoing) — Professional geologist assisting in construction administration of the deepening of the waterway from -10 feet to -17 feet.

- St. Lucie County Reach I Permitting and Dredging, St. Lucie County, Florida (Ongoing) — Professional geologist in the development and implementation of a multi-phase project to permit, plan, and dredge 12 miles of Intracoastal Waterway (ICWW) within St. Lucie County. Coordinating the completion of a limited utility and magnetometer survey that summarizes utility crossings and verification of utility locations.

- Maintenance Dredging Design of the Fernandina Harbor and Reach I of the Intracoastal Waterway, Nassau County, Florida (2015 – Ongoing) – Project manager for the preparation of a dredging template, final design and construction documents, opinion of probable cost, permitting, and bidding assistance.

- U.S. Army Corps of Engineers Sacramento District, Folsom Dam Auxiliary Spillway Modifications, Sacramento, California (2014–2015) – Project manager responsible for leading several multidisciplinary teams through various projects in design, engineering during construction, construction, commissioning, and operation and maintenance. Specifically, projects consisted of rock bolting and slope stabilization activities, local drainage evaluation and repair, heavy civil design and mass earthwork, several environmental restoration and mitigation components, overall site restoration, and completion of an operation and maintenance manual, filling plan, and commissioning plan for the new auxiliary spillway.

- U.S. Army Corps of Engineers Sacramento District, Folsom Dam Water Control Manual Update, Sacramento, California (2014–2015) – Project manager for the revision of operation rules and criteria for the Folsom Dam and Reservoir (11,930 acres with a catchment area of 1,875 square miles). Key considerations in the development of the water control plan included dam safety requirements, Endangered Species Act requirements, water quality requirements, water supply, water rights permit terms and conditions, power generation, and recreational needs. Worked with modelers for reservoir

routing applications and development of the reservoir operation sets.

- U.S. Department of Interior, Bureau of Reclamation, Biological Assessment on the Continued Long-term Operations of the Central Valley Project (CVP) and the State Water Project (SWP), California (2013) – Project manager on various aspects of the biological assessment that was intended to provide a thorough analysis of the continued long-term operations of the CVP and SWP and the effects of those operations on listed species and designated critical habitat. A significant portion of the assessment was intended to articulate the assumptions made in the modeling used in the effects analysis. The CVP and SWP are two major inter-basin water storage and delivery systems that divert and re-divert water from the southern portion of the Sacramento-San Joaquin Delta (Delta). Both CVP and SWP include major reservoirs upstream of the Delta, and transport water via natural watercourses and canal systems to areas south and west of the Delta.

- U.S. Department of Interior, Bureau of Reclamation, San Luis Reservoir Expansion Appraisal Study, Merced County, California (2013) – Project manager responsible for oversight and completion of an appraisal level evaluation for raising B.F. Sisk Dam, a 326-foot high, 3.5-mile long zoned earthen embankment dam which creates San Luis Reservoir, the largest offstream reservoir in the United States. This study included static and dynamic stability assessments of the embankment dam and all appurtenant structures as well as appraisal level costs for a 30-foot raise of the full embankment.

- U.S. Department of Interior, Bureau of Reclamation, Cost Allocation Report for Delta-Mendota Canal/California Aqueduct Intertie, Alameda County, California (2013) – Project manager responsible for development of the cost allocation and subsequently, the repayment requirements for both construction and OM&R costs for the Delta-Mendota Canal/California Aqueduct Intertie, a pumped connection between the Central Valley Project's Delta-Mendota Canal and the State Water Project's California Aqueduct.

- U.S. Department of Interior, Bureau of Reclamation, Central California Area Office Invasive Mussel Monitoring Program, Various Counties, California (2012) – Project manager responsible for oversight and implementation of the mid-Pacific Regional monitoring program for invasive Quagga and Zebra mussels. Monthly water samples were collected from regional reservoirs and subjected to multiple tests to determine whether microscopic mussel larvae were present. This testing included, Cross-polarized light microscopy, Scanning Electron Microscopy, and Polymerase Chain Reaction (PCR) and gene sequencing tests, to confirm the presence of mussel DNA.

- U.S. Army Corps of Engineers Jacksonville District, Jacksonville Harbor Navigation Projects, Duval County, Florida (2011) – Planning technical leader responsible for oversight and completion of feasibility level assessments and dredged material management planning for the Jacksonville Harbor Navigation Project. This included work on upland and offshore disposal sites as well as studies to determine the most economical means of disposal for upcoming maintenance and deepening dredging work.

- U.S. Army Corps of Engineers Jacksonville District, Regional Sediment Management (RSM) Projects, Various Counties, Florida (2011) – As planning technical leader, participated in multiple studies with the objective of optimizing the utilization of sediments and management of projects through a systems-based approach. The main focus of these studies was to better understand the regional sediment transport processes through integration of regional data and application of tools which improve our knowledge of the regional processes.

- U.S. Army Corps of Engineers Jacksonville District, Dredged Material Management Plans (DMMPs), Various Counties, Florida (2011) – As planning technical leader, participated in development and updating of regional DMMPs to identify a wide array of both primary and contingency management options needed to meet the dredging requirements of various Florida ports and harbors over a 50-year planning horizon. A key element for success was giving special emphasis to regional and beneficial uses of the material needing to be dredged to maintain efficient waterborne transportation into and out of the ports and waterways.

- Florida Department of Health, Multi-County Nitrogen Loading Assessment of Impacts on On-site Waste Treatment and Disposal Systems in the Wekiva River Basin, Various Counties, Florida (2007) – Geologist responsible for oversight, planning, design, management, field work, data interpretation and reporting for a multi-county nitrogen loading assessment to determine the impacts of on-site waste treatment and disposal systems on the Wekiva River Basin in central Florida.

Michael P. Whelan, P.E., D.CE

Senior Civil Engineer

Education

M.S. / Environmental Engineering
Florida International University

B.S. / Civil Engineering
Florida International University

Registration

Professional Engineer — FL

FDEP Stormwater Inspector — FL

Diplomate of Coastal Engineering — U.S.

Total Years Experience/ Years with Firm

21 / 11

Background / Responsibilities

Mr. Whelan specializes in civil site engineering and construction administration. He is responsible for the development of plans and specifications, construction administration, and construction inspection of projects, which include marina development, beach renourishment, utilities relocations, and shoreline stabilization. In 2010, Mr. Whelan earned the title of Diplomate in Coastal Engineering (D.CE), from ASCE's Academy of Coastal, Ocean, Navigation, and Port Engineers. He was recognized as a Fellow by the Florida Engineeing Society in 2013.

Project Experience

- Design and Permitting Services, 3rd Street Beach Access Ramp, New Smyrna Beach, Florida (2007) — Project design engineer for development of a 170-linear foot concrete ramp that provides vehicular access from a city street to the existing beach dune in New Smyrna Beach. Developed project design and specifications; assisted in the permitting process.

- Tigertail Park South End Restroom Facility and Beach Access, Collier County, Florida (2005) — Project design engineer for development of a restroom and beach dune walkover from an existing park to an existing beach dune in Marco Island, Florida. Developed project design and specifications; assisted in the permitting process.

- Avenida Menendez Seawall Design, Permitting, and Construction-Phase Services, St. Augustine, Florida (2014–2015) — Engineer-of-record for construction of new seawall, designed to protect existing 1890s historical landmark seawall. As utility design engineer, coordinated the design and construction of the water, sewer, and stormwater utilities that pass through the historical seawall. Developed project design, specifications, and bidding. Project included historic preservation of a historically significant seawall and scour protection, installation of a new 1,800-foot seawall and waterfront promenade, utility system upgrades, and other flood protection measures within the historical preservation district of St. Augustine.

- Waterfront Commons, West Palm Beach, Florida (2009) — Senior design engineer/project manager. Performed preliminary design of floating docks and fixed ramps for permit application submittal. Provided daily interaction and coordination of design issues between city's design team and contract risk manager. Developed schematic and conceptual plans for floating dock designs for the development of funding estimates, and coordination of project with other project amenities including landscaping, utility services, annual boat show, and Flagler Drive relocation.

- Port of Fort Pierce North 2nd Street Roadway Improvements, St. Lucie County, Florida (2006–2015) — Engineer-of-record, developed master plans to expand and realign some of the existing North 2nd Street right-of-ways within the Port of Fort Pierce for better traffic flow and drainage improvements. Developed master plans for stormwater; water, sewer, force main, and gas utilities; right of way acquisition; and paving and grading. Provided assistance to county for construction and field adjustments during construction of the project.

- Lantana Park Emergency Seawall Project, Town of Lantana, Florida (2009) — As senior design engineer, provided construction and design engineering design support for emergency steel sheet pile seawall along Lantana Beach Park, which experienced severe beach erosion that endangered buildings near the dune. Supervised cross-shore erosion modeling, wave height estimates, scour potential, and wave force calculations.

- Flagler Drive Downtown Waterfront Seawall Replacement, West Palm Beach, Florida (2005) — Engineering and construction project manager for city's efforts to replace the existing seawall due to hurricane-related damage and to meet criteria for future waterfront park development. Responsibilities included development of project manual and specifications, monitoring contractor progress, and performing construction inspections. Also performed construction administration, assisted contractor with field design, and coordinated the regulatory permit certification process for the city.

- Commander's Village Engineering Services, Jacksonville, Florida (2005) — Senior engineer for this marina and water access facility siting project. Project components included marina sizing, dock design, flushing analysis, and shoreline stabilization.

- Aqua Vista Marina Engineering and Permitting Services, Palm Beach County, Florida (2004) — Marina engineering, upland civil site work, dredged material management and permitting for a 42-slip marina and a 5.4-acre luxury condominium development in the City of West Palm Beach.

- Fort Gates and Drayton Island Ferry Terminals, Putnam County, Florida (2015) – Project manager in the completion of feasibility analyses and preliminary design plans for the removal and replacement of two separate ferry terminals on the St. Johns River in southern Putnam County. These terminals date back to the 1860s and have been in continuous service.

- South Florida Water Management District (District), S-65E Emergency Structure Stability Project, Okeechobee County, Florida (2009) — Construction project manager, assisted in the development of structural alternatives and subsequent design of a structure to mitigate the potential failure of S-65E, the District's largest water control structure on the Kissimmee River. Assisted in QA/QC of the developed viable alternatives, alternative selection, development of the design specifications, and permitting support in only 2.5 months. Provided engineering during construction oversight during the construction phase for this $16M project. This project won a 2009 Florida Institute of Consulting Engineers (FICE) Grand Award for Engineering Excellence.

- Florida Inland Navigation District, MSA 434 Final Design, Construction Plans, and Technical Specifications, New Smyrna Beach, Florida (2007) — Provided QA/QC of final plans and specifications and services during bidding for the $2.3-million-dollar island dredged material management facility. Provided technical support for the construction administration and observation services.

- Florida Inland Navigation District, DU-9 Construction Observation Services, St. Johns County, Florida (2006) — Provided engineering support and construction observation services for construction of a U.S. Army Corps of Engineers dredged material management site.

- Florida Inland Navigation District, BV-NASA Containment Facility Final Construction Drawings, Technical Specifications, and Bid Administration, Brevard County, Florida (2007) — Revised and updated dredge material management area design, developed project manual including contract plans, technical specifications, and bid administration for project in the Kennedy Space Center. Developed project design to meet regulatory permit requirements.

- Florida Inland Navigation District, FL-8 Shoreline Stabilization, Flagler County, Florida (2007) — Revised and updated shoreline revetment design, developed project manual including contract plans, technical specifications, and bid administration for project. Managed project construction observation and administration.

- South Volusia County Emergency Beach Permit and Design, New Smyrna Beach Construction Oversight Services, Volusia County, Florida (2005) — As senior utilities engineer, designed a temporary dredge pipeline crossing an island in New Smyrna Beach along Sapphire Road. Assisted in construction administration services on behalf of county.

Jennifer C. Klich, P.E.

Civil Engineer

Education

B.S. / Civil Engineering
University of North Florida

B.S. / Physics
Jacksonville University

Registration

Professional Engineer — FL

Total Years Experience/ Years with Firm

7 / 7

Background / Responsibilities

Ms. Klich serves as a project manager responsible for the development of plans and specifications for port infrastructure and waterfront design projects. She has a range of skills that include civil site engineering design, environmental permitting, construction administration and inspection, and detailed hydrologic and hydraulic modeling using programs such as HEC-HMS, HEC-RAS, HEC-GeoRAS, ICPR, ArcGIS, and AutoCAD.

Project Experience

- Avenida Menendez Seawall, Construction Phase Services, St. Augustine, Florida (2014) — Served as field representative for construction of a new seawall designed to protect existing 1890s historical landmark seawall in St. Augustine, Florida. Assisted in the construction oversight for all marine construction with the City's contractor. Provided daily interaction and coordination of design issues between the engineer-of-record and City staff for development of funding estimates, and coordination of project elements with other project amenities.

- Avenida Menendez Seawall, St. Augustine, Florida (2013) — Staff engineer, edited construction drawings and specifications based on comments made by the City of St. Augustine. Assisted in the development of final project design, specifications, and bidding. Project included historic preservation of a historically significant seawall and scour protection, installation of a new 1,800-foot seawall and waterfront promenade, utility system upgrades, and other flood protection measures within the historical preservation district of St. Augustine.

- Port of Fort Pierce, North 2nd Street Roadway Improvements, St. Lucie County, Florida (2015) — Task manager for the final design and development of master plans to expand and re-align existing North 2nd Street rights-of-way within the Port of Fort Pierce for better traffic flow and drainage improvements. Developed master plans for stormwater; water, sewer, force main, and gas utilities; right-of-way acquisition; and paving and grading.

- Miramar Beach Parking Structure, Construction Administration, Walton County, Florida (2009) — Staff engineer for construction and bidding phase of the project. Reviewed contractor's submittals and shop drawings, managed submittal registry, and ensured that the overall project progressed in accordance with the construction plans, specifications, and permit documents.

- Fort Gates and Drayton Island Ferry Terminals, Putnam County, Florida (2015) – Project engineer in the completion of feasibility analyses and preliminary design plans and cost estimation for the removal and replacement of two separate ferry terminals on the St. Johns River in southern Putnam County. These terminals date back to the 1860s and have been in continuous service.

- Florida Inland Navigation District, BV-4B Permanent Pipeline, Brevard County, Florida (2015 – Ongoing) – Project engineer completing stormwater modeling, design, and final construction drawings and specifications for the installation of a permanent effluent discharge pipeline from the BV-4B dredged material

management area to the Intracoastal Waterway.

- Florida Inland Navigation District, BV-4B Design and Permitting, Brevard County, Florida (2014 – Ongoing) – Project engineer preparing design and construction plans for a dredged management material area on a 101-acre abandoned citrus grove adjacent to the Intracoastal Waterway.

- U.S. Army Corps of Engineers Jacksonville District, Woerner South Wetland Reserve Program, Highlands County, Florida (2015) — Project engineer prepared a Wetland Reserve Plan of Operation (WRPO) for the 3,200-acre property in south Florida. Developed the plan for restoration of the former sod farm to pre-development wetland conditions. Services included providing site observation and characterization, establishing restoration targets, applying hydrologic and hydraulic models, identifying restoration alternatives, preparing construction documents, and acquiring environmental permits.

- City of Jacksonville, Crystal Springs Drainage Project Study and Conceptual Design, Duval County, Florida (2012) — Staff engineer for final design solutions to remedy localized flooding concerns within the Crystal Springs area. The solutions reduced flooding problems by improving stormwater flows in the upstream portion of the project area for a 25-year return period storm and minimizing the increase in surface water elevation downstream of the project area.

- Duke Energy, Wetland Mitigation for Goethe State Forest in Levy County and Boarshead Ranch in Pasco County, Florida (2011) — Staff engineer and modeler for hydrologic and hydraulic evaluations of proposed wetland improvement/mitigation projects. Modeling results quantified the hydrologic benefit (improved flows and water levels) created by numerous proposed mitigation elements including low water crossings, flow diversions, culvert replacements, etc.

- Florida Inland Navigation District, Broward Deepening Project, New River, Broward County, Florida (2009) — Staff engineer, coordinated with surveying subconsultant to obtain bathymetric and subbottom data and to develop a dredging template. Coordinated with geotechnical subconsultant to conduct soil borings and complete a geotechnical report.

- Florida Inland Navigation District, Broward Deepening Project, Dania Cutoff Canal, Broward County, Florida (2009) — Staff engineer for permitting phase of the project. Responded to comments based on concerns expressed by governmental permitting agencies.

- City of Port Richey Dredging, Pasco County, Florida (2008) — Staff Engineer, designed dredging template for four channels. Calculated dredging volumes and size of potential areas of environmental impact. Coordinated with subconsultant to produce an environmental impact analysis.

Background / Responsibilities

With his educational background in civil and construction engineering technology, Mr. DiRienzo joined Taylor Engineering with a focus on construction administration projects. While Mr. DiRienzo has continued to work on construction administration projects, he has developed additional skills working on an array of projects in the waterfront engineering group. These projects include structural analysis and design for various marine structures, pile design and earthen retaining design for various marine and waterway structures, seepage and slope stability analysis for earthen dikes, and dredging engineering projects.

Mr. DiRienzo is experienced with STAAD Pro, GeoStudio, Support IT, AllPile, AutoCAD Civil 3D, and Microsoft Office software applications. Mr. DiRienzo is also familiar with applying prevailing engineering codes and specifications such as the Florida Building Code, ASCE-7, ACI 318, AISC Steel Manual, and the National Design Specification for Wood Construction to engineering designs.

Project Experience

- Leesburg Seaplane Ramp and Waterfront Structures, Leesburg, Florida (2015 - Ongoing) – Project manager on the final design, construction drawings, and construction phase support for a seaplane ramp and ancillary waterfront structures to service the Leesburg International Airport. Ancillary waterfront structures include a floating dock, gangway structures, and mooring buoys.

- Commodore's Point Bulkhead Replacements, Duval County, Florida (2012) – Staff engineer for a preliminary design survey of available alternatives for stabilization or replacement of 5,000 linear feet of existing bulkhead in downtown Jacksonville, Florida. Responsibilities included preliminary bulkhead analysis using SupportIT software and development of alternatives and cost estimates for different loading/end-use scenarios.

- Bahia Urbana Waterfront Redevelopment, San Juan, Puerto Rico (2013) — Staff engineer with design-phase responsibilities that included developing a detailed project schedule, developing a detailed cost opinion, designing temporary pier stabilization program, performing field verification of existing pier conditions, and reviewing geotechnical engineering analysis for new bulkhead design. Construction-phase responsibilities included reviewing contractor submittals and detailed review and analysis of grouted soil anchor testing results.

- Florida School for The Deaf and The Blind (FSDB) Bulkhead Schematic Phase II, St. Johns County, Florida (2015) — Staff engineer for design and permitting services for construction of a segmental stone retaining wall to protect the shoreline at the FSDB in St. Augustine. Responsibilities include reviewing project geotechnical and survey information and developing retaining wall layouts in AutoCAD, performing retaining wall analysis and design, performing helical pile design, and performing reinforced concrete design. Additional responsibilities include drawing coordination with civil engineering site engineer.

- Florida School for The Deaf and The Blind (FSDB) Bulkhead Schematic, St. Johns County, Florida (2011) — Staff engineer for design and permitting services for construction of a concrete sheet pile bulkhead to protect the shoreline at the

FSDB in St. Augustine. Responsibilities included reviewing project geotechnical and survey information and developing bulkhead layouts in AutoCAD, and performing bulkhead and helical anchor tie-back system analysis and design. Construction phase responsibilities included contractor submittal review, and on-site observations, and documentation.

- Peeples Industries Jacksonville Terminal Preliminary Pier Design, Duval County, Florida (2014) — Staff engineer for preliminary design of a 400-foot loading/offloading pier for 800-foot bulk carrier cargo ship. Design responsibilities included facility layout and calculation of ship mooring loads. Preliminary structural design included STAAD modeling of mooring dolphins and a portion of the offloading pier T-dock.

- FPL Shoreline Engineering and Permitting, St. Lucie County, Florida (2012) — Staff engineer for coastal and structural engineering design and environmental permitting for a seawall and breakwater to protect the nuclear power plant's discharge canal and headwall structure. Responsibilities included preparing a Florida Department of Environmental Protection coastal construction control line (CCCL) permit application and providing quality assurance and quality control for project permit drawings.

- Miramar Beach Parking Structure Replacement, Walton County, Florida (2009) — Staff engineer for construction administration project. Reviewed contractor's pile testing program submittal.

- South Florida Water Management District, G-58 Structure Rehabilitation, Dade County, Florida (2015) – Project engineer on the structural design of a headwall upstream of the existing G-58 structure headwall at Arch Creek in north Miami. The existing concrete headwall had four large culvert pipes with automated gates that control salinity and stormwater flow through Arch Creek. Structural deterioration required refurbishment of the culverts and replacement of the headwall structure.

- Florida Inland Navigation District, FL-3 Dredged Material Management Area (DMMA) Permitting and Final Design, Flagler County, Florida (2013) — Staff engineer for final design of a DMMA site. Responsibilities included reviewing geotechnical data and the geotechnical engineering report, performing seepage and slope stability analyses for dike cross sections using GeoStudio software, performing stormwater calculations, site layout, and preparing draft project permit documents, and contracting documents and technical specifications.

- Florida Inland Navigation District, NA-1 Dredged Material Management Area (DMMA) Construction Administration, Nassau County, Florida (2014) — Staff engineer for construction administration of an approximately 19-acre DMMA site. Responsibilities included providing daily construction observation, reviewing and tracking quality control test data, coordinating and tracking verification testing, reviewing contractor's submittals and shop drawings, reviewing contractor's payment applications, attending biweekly on-site progress meetings, and ensuring that the overall project progressed in accordance with the construction plans, specifications, and permit documents.

- FPL St. Lucie Nuclear Power Plant, Sea Turtle Barrier Structure, St. Lucie County, Florida (2015) — Staff engineer for structural engineering design of a protective turtle barrier. Responsibilities included developing cost opinions for several competing alternative turtle barrier designs, designing an underwater anchoring system for the turtle barrier's net, performing structural analysis using STAAD software, performing pile analysis using AllPile software, and preparing and checking reinforced concrete design and steel design calculations.

- FPL St. Lucie Nuclear Power Plant (Plant), Dune Restoration, St. Lucie County, Florida (2013) — Staff engineer on the engineering design for restoration of a protective dune along the shoreline of the Plant property. Completed construction administration tasks during the construction phase.

- Florida Inland Navigation District, NA-1 DMMA Permitting and Final Design, Nassau County, Florida (2012) — Staff engineer for final design of a DMMA site. Responsibilities included analyzing and designing a steel weir, designing a reinforced concrete weir pad with piled foundations, preparing detailed project specifications, and preparing a detailed cost opinion.

- Florida Inland Navigation District, O-7 DMMA Permitting and Final Design, Martin County, Florida (2012) — Staff engineer for final design of a DMMA site. Responsibilities included analyzing and designing a steel weir and timber walkway design, preparing detailed project specifications, and designing a prestressed concrete short-span bridge.

Jenna Phillips, E.I.

Marine Engineer

Education

M.S. / Ocean Engineering

B.S. / Ocean Engineering
Florida Institute of Technology

Registration / Certification

Engineer Intern — FL

Open Water Certified Diver - National Association of Underwater Instructors (NAUI)

Total Years Experience/ Years with Firm

10 / 1

Background / Responsibilities

Ms. Phillips has more than ten years experience on projects involving coastal and waterfront structure design, structural assessment and rehabilitation, beach design and renourishment, dredging, and hydrodynamic modeling in the United States, Puerto Rico, and Caribbean.

Ms. Phillips is experienced with Microsoft Office and Project, ArcGIS, AutoCAD, and MATLAB software applications; CEDAS-GENSIS, Beach-*fx*, STWAVE, RMAP, SBEACH, ACES, and SMS models. She is also familiar with applying prevailing engineering codes and specifications such as the Florida Building Code, ASCE-7, ACI 318, AISC Steel Manual, and the National Design Specification for Wood Construction to engineering design and has extensive experience applying applications outlined in the U.S. Army Corps of Engineers Coastal Engineering Manual (CEM).

Project Experience

- Ted Sperling Park Boardwalk Replacements, Sarasota County, Florida (2015 – Ongoing) – Project manager for the replacement of three aging timber boardwalks within Ted Sperling Park located on the south end of Lido Key. Evaluating the existing structures, developing a design for replacement of each structure within the existing footprints, coordinating permitting exemptions, and conducting construction phase services.

- Caspersen Beach Boardwalk Design, Permitting, and Construction, Sarasota County, Florida (2011) – Project manager responsible for the planning, permitting, design, and construction of a nearly 2,000 linear foot beachfront boardwalk rehabilitation project within a Sarasota County park. The replacement structure included ADA accessible access points to the beach as well as parking improvements adjacent to the boardwalk.

- Bellagio Seawall Replacement, Daytona Beach, Florida (2008) – As staff engineer, worked closely with the project manager to design a precast concrete sheet pile wall with tiebacks and deadmen. Responsibilities included initial site assessment; development of wave loads; calculation of loads and overall stability of seawall; sizing of the cap, tierods, and deadmen; and designing for adequate embedment depth and toe protection. Completed the design drawings and technical specifications used in the bidding phase. Assisted in construction site observations and provided oversight during the construction phase.

- Loggerhead Marina Floating Dock Assessment, Miami, Florida (2009) – As staff engineer, conducted an independent structural and wave load analysis of aluminum framed manufactured floating docks. Under the supervision of a professional engineer, calculated the lateral and axial loads on the floating dock units and calculated shear stress of connections as well as the transverse loading capacity of the aluminum floats. Responsible for reviewing manufacturer shop drawings and providing recommendations for design modification based on findings.

- Harbor Branch Bulkhead Investigation, Fort Pierce, Florida (2011) – Lead field engineer responsible for conducting a site investigation to observe the

structural condition of the existing deteriorated bulkhead within the harbor. Performed sub-surface ultrasonic thickness testing of corroding aluminum retaining wall via scuba diving. Conducted full analysis of data collected to determine the overall remaining structural integrity using the thickness readings and calculating corrosion rates of the epoxy coated steel to identify the remaining service life of the wall. Prepared an opinion of probable cost for a phased replacement and/or repair of the bulkhead sections in order to make the project more cost effective.

- Fort Pierce Island Breakwater Project, Fort Pierce, Florida (2012) – Assisted in the structural design of a geosynthetic tube groin field and island breakwater structure. Responsibilities included performing volumetric calculations and evaluating the internal and external stability of the geosynthetic structures during and after the dredged material filling process. Also prepared technical specifications and performed field checks during construction to ensure quality of geotextile tube installations.

- Scotland Cay Dune Core Revetment, Scotland Cay, Bahamas (2013) - As project manager, responsible for preparation and evaluation of design alternatives for each fill and toe protection design along 3,000 feet of shoreline fronting residential homes. The catalyst for this project involved working with the homeowners association along the private island of Scotland Cay to ensure each property owner's needs/concerns were addressed. Prepared calculations for slope stability and volumetric quantities of sand required for restoration of beach. Calculated wave loading on toe protection structure for stability and design scour protection of toe structure. Prepared numerical model analysis for sizing of structure based on slurry density calculations. Prepared a cost estimate and technical specifications for construction.

- Indian Beach Shoreline Stabilization Design & Permitting, Sarasota, Florida (2012) – Responsible for project management and maintained the project budget and schedule. Conducted initial field investigation to collect data, document existing conditions, and extent of bluff erosion. Prepared project scope of work, conducted an alternatives analysis, and worked directly with the client to identify a cost-effective living shoreline stabilization approach. Due to the residential proximity of the park, several meetings were held with local residents and homeowners to ensure project buy-in. Facilitated the bidding and construction phase for the City of Sarasota to include preparation of the design drawings and technical specifications.

- U.S. Army Corps of Engineers (USACE) Montauk Point Dune Restoration, Montauk, New York (2014) – As project manager, worked closely with the USACE New York District to develop a dune restoration project to withstand a 25-year return interval storm. Responsibilities included site characterization of the shoreline, analysis of uplift and lateral wave load forces on individual armoring units, and toe protection design. Assisted USACE with technical specification and design details for bidding purposes.

- Town of Palm Beach Groin Field Design, Palm Beach, Florida (2011) – As staff engineer, worked closely with the engineer-of-record to prepare three groin design alternatives and associated opinions of probable cost for each alternative. Conducted structural calculations to determine the sizing of sheet piles, wale beams, and pull out capacity of bolt connections. Prepared storm damage reduction evaluation and identified critical wave heights and storm surge elevations for various storm return intervals to evaluation overall structural stability.

- Bird Key Park Shoreline Stabilization, Sarasota, Florida (2011) – Project manager for this project which involved planning, stakeholder outreach, design and construction of an articulated concrete mat, seawall, breakwater, and kayak launch portions of a park, which was part of a larger citywide "Blue Trail." The goal of this project was to stabilize the shoreline while providing a 'green' living shoreline-type project. Small reef balls created a breakwater structure to allow for natural accumulation of sand while providing habitat to small fish, oysters, and other native species.

- Mitigation Reef Design and Construction, Venice, Florida (2010) – Conducted stability, bearing capacity, and settlement calculations of the limestone artificial reef units along sandy substrate. Responsibilities included preparation of overturning moment calculations of boulder units subjected to wave and surge loading, as well as scour protection. Provided cost estimates for materials and installation of reef units to include mobilization/demobilization. During construction, led the effort for underwater construction observations via scuba diving, conducted physical measurements and photo documentation of the reef units during construction and as part of post construction monitoring to evaluate the performance.

Yehya Siddiqui

Marine Engineer

Education

M.E. / Coastal Engineering
University of Florida

B.E. / Civil Engineering
University of Nottingham, Malaysia

Registrations / Certifications

Divemaster – Professional Association of Diving Instructors (PADI)

Certified Quality Manager

OSHA 30

Total Years Experience/ Years with Firm

3 / ≤1

Background / Responsibilities

Mr. Siddiqui joined Taylor Engineering in November 2015. Prior to that time, he served as a field engineer, equipment engineer, and estimating engineer for an international marine construction firm. His experience includes performing hydrographic surveys for construction management, cost estimating, designing dredge equipment, quality control reporting, and coordinating subconsultants.

Mr. Siddiqui is experienced with Microsoft Office and Project, AutoCAD, MATLAB, STAADpro, SLOSH, Hypack, SolidWorks, and PLAXIS software applications.

Project Experience

- Audubon Apalachicola Causeway Restoration, Destin, Florida (2016 – Ongoing) – Completing cost estimating tasks.

- Florida Inland Navigation District, Intracoastal Waterway (ICWW) Palm Beach Deepening, Palm Beach County, Florida (2015 – Ongoing) – Project engineer performing construction observation and administration services on the dredging of the ICWW in the vicinity of the Port of Palm Beach. The project will result in the deepening of approximately 3,500 linear feet to -17 ft mean low water immediately west of Peanut Island. Approximately 100,000 cubic yards of dredged material will be placed on the Peanut Island dredged material management area.

- Florida Inland Navigation District, Reach I Permitting and Dredging, St. Lucie County, Florida (2015 – Ongoing) – Completing cost estimating tasks.

- Florida Inland Navigation District, Broward Intracoastal Waterway (ICWW) Deepening, Broward County, Florida (2015 – Ongoing) – Project engineer performing construction observation and administration services on the dredging of the ICWW in the vicinity of the Port Everglades. The project will result in the deepening of approximately 14,400 linear feet to -17 ft mean low. Contractor will dredge approximately 180,000 cubic yard directly into a fully-lined barge, temporarily stockpile and segregate the material on-site or directly transport to the permanent disposal site location.

- Maintenance Dredging of Dana Point Harbor, Orange County, California (2015) – Lead estimator on the bid to dredge and dispose of material that had accumulated within Dana Point Harbor. A total of 92,000 cubic yards of material would be dredged with hydraulic, clamshell, backhoe, and/or barge-based excavator dredges.

- U.S. Navy, Remedial Design and Remedial Action for the Boat Channel Sediments, San Diego, California (2015) – Lead estimator on the bid to remove chemically impacted sediments from the Boat Channel at Installation Restoration (IR) Program Site 12 at the former Naval Training Center. The conceptual design was to dredge the entire areal extent to a depth of 1 to 2 feet, stage the dredged sediments in barges, dewater the barges, and transfer the sediment to an upland disposal site.

- U.S. Army Corps of Engineers Galveston District, Freeport Harbor Entrance Channel Hopper Dredging, Texas (2015) – Lead estimator on a bid to remove 2,440,000 cubic yards with 2 feet of allowable overdepth, from the Freeport Harbor entrance channel and jetty channel. All materials were deposited in offshore placement area.

- U.S. Army Corps of Engineers Galveston District, Galveston Harbor and Channel and Houston Ship Channel, Texas (2015) – Lead estimator on a project that included a total of 2,407,000 cubic yards of maintenance dredging, including 1,527,000 cubic yards of required depth and 880,000 cubic yards of allowable overdepth for the Galveston entrance channel, inner and outer bar channel, and the Houston ship channel. Included in this project was an option for beach placement of 725,000 cubic yards of material from the Galveston Harbor inner bar channel.

- U.S. Army Corps of Engineers New Orleans District, Calcasieu River and Pass, Sulphur, Louisiana (2014) – Lead engineer for the hopper dredge on the Calcasieu River. Duties included project management, hydrographic surveying, computing production volumes, and quality control reports.

- U.S. Army Corps of Engineers Charleston District, Charleston Harbor Entrance Channel Dredging, Charleston, South Carolina (2014) – Field Engineer for a project that involved the dredging of 2.7 million cubic yards of material from the Charleston Harbor entrance channel via a trailing suction hopper dredge.

- U.S. Army Corps of Engineers Galveston District, Galveston Harbor Entrance Channel, Galveston, Texas (2013) - Field engineer on a maintenance dredging project. Three hopper dredges and a drag barge were utilized to remove over 6 million cubic yards of shoaling in the inner and outer bar, Galveston Harbor entrance and Houston ship channel. Responsible for the hydrographic surveying and data processing of the channel and disposal locations. Assisted with daily reports, project management, and safety meetings.

- U.S. Army Corps of Engineers New Orleans District, Southwest Pass Maintenance Dredging, Venice, Louisiana (2013) - Field engineer on a maintenance dredging project of the southwest pass portion of the Mississippi River. At times, there were three separate hopper dredges working on two to three separate projects. Responsible for the completion of daily reports including project updates, completion estimates, QCS reports, and jobsite safety meetings.

Senior Environmental Scientist

Education

Ph.D. / Aquatic Ecology
Emory University

M.S. / Applied Biology and Aquatic Ecology
Georgia Institute of Technology

B.S. / Biology
Eckerd College

Total Years Experience/ Years with Firm

31 / 11

Background / Responsibilities

During his career, Dr. Stites has successfully implemented and managed a wide range of environmentally-focused water resource projects including environmental feasibility evaluations, diagnostic and pilot project studies, wetland and lake restoration design and implementation, wetland impact evaluation, mitigation, design and monitoring, state and federal environmental permitting, and document support for National Environmental Policy Act (NEPA) coordination activities. He has extensive experience presenting such issues to technical and public audiences, as well as negotiating environmental regulatory issues. His expertise is in freshwater, estuarine, and marine environmental matters including wetland restoration, water quality, endangered species, and associated permitting processes in Florida and around the U.S. His experience includes design and permitting of artificial reefs along Florida's Gulf and Atlantic coasts.

Project Experience

- FPL St. Lucie Nuclear Power Plant (Plant), Discharge Canal Headwall Stabilization Project, St. Lucie County, Florida (seawall construction completed in 2012; breakwater is ongoing) — Permitting and environmental support task leader for projects to protect the Plant's discharge canal and headwall from severe coastal erosion. Secured a coastal construction control line (CCCL) permit for the project's ocean seawall. Prepared permit application and provided ongoing coordination for a joint coastal permit (JCP) requesting authorization to construct a series of offshore breakwaters.

- Town of Lantana Emergency Seawall Project, Palm Beach County, Florida (2009) — Task manager for an after-the-fact coastal construction control line permit for a seawall to protect essential infrastructure along a 700-foot municipal park shoreline owned by the Town of Lantana. Key permit issues included construction beyond "emergency level" construction recommended by the Florida Department of Environmental Protection and turtle nesting habitat.

- Dubois Park Wingwall Design, Palm Beach County, Florida (2005) — Task manager for environmental resource permitting of a public park seawall.

- Sand Dollar Island Boardwalk Feasibility Study, Collier County, Florida (2005) — Project manager for development of a boardwalk conceptual design, including natural resources impact assessment and evaluation of regulatory and public issues, responses, and desires concerning management of access to a public beach/federally designated critical wildlife breeding habitat (marine turtles and shorebirds). Project resulted in a follow-up project designing and permitting a dune walkover and public amenities for Tigertail Park in Collier County.

- Fort George Roadway Revetment Design and Permitting, Duval County, Florida (2008) — Project manager for a joint coastal permit application on a project that provided a revetment armoring for a critical FDOT coastal highway running along the Atlantic Ocean, marine turtle nesting habitat, partially within a state park.

- Bathtub Beach Nourishment Project, Martin County, Florida (2010) — Project Manager to protect essential infrastructure of Bathtub Beach County Park and adjacent public roads and utilities from severe beach erosion. Project included

design, permitting, and construction bid support for dredging and beach fill project that involved very sensitive habitats in the St. Lucie Inlet (part of an aquatic preserve) and Bathtub Beach (worm rock reef). Project activities included development of a joint coastal permit application, responses to multiple agency requests for additional information, management of a team of independent consultants to Martin County, development of natural resource documentation for state and federal permit applications, and design of monitoring programs.

- Florida Waterway Properties, Permitting Support for Marina and Canal, Palm Coast, Florida (2007) — Project manager for environmental resource permit application and dredge and fill permit application for a major residential development project. Provided support services such as bird rookery protection, water quality, groundwater modeling, flushing studies, marina design, and seawall design.

- BP Oil Terminal Dredging and Permitting, Duval County, Florida (2011) — Senior scientist, provided permit application support for expansion of terminal basin and dredging area. Project included natural resource surveys, permit application for dredging and submerged land lease revisions, dredging and sediment transport analyses, coordination with state and federal agencies, and QA/QC.

- St. Johns River Water Management District, Eau Gallie River and Elbow Creek Restoration Dredging Project, Brevard County, Florida (2014—Ongoing) – Lead scientist on the final design of the dredging template and dredged material management area, permitting, and construction documents.

- Sykes Creek Dredging Engineering and Permitting Services, Brevard County, Florida (2014 – Ongoing) – Lead scientist on the final design of the dredging template, permitting, and construction documents.

- Manatee Pocket Dredging, Martin County, Florida (2011) — Task manager, oversaw state and federal environmental permits and permit compliance issues for this dredging project that included major permit modifications for management of contaminated sediments, wetland impact assessment, uniform mitigation assessment,, mitigation design, and negotiations with state and federal wetland and wildlife experts. The Florida Engineering Society selected the Manatee Pocket project for an Outstanding Technical Achievement award in 2012.

- Sebastian Inlet District, Sebastian Inlet Channel Completion Design and Permitting Services, Brevard and Indian River Counties, Florida (2007) — Project manager, completed a channel from the flood shoal of the Sebastian Inlet to the Atlantic Intracoastal Waterway which crosses the Indian River Lagoon in an aquatic preserve, with manatee habitat, shellfish waters, and seagrass beds. Mitigation plans included seagrass restoration, seagrass protection, and funding for a proposed stormwater treatment facility in the local area.

- Jupiter Inlet District, Jones Creek Restoration Design and Permitting, Palm Beach County, Florida (2006) — Senior environmental reviewer and task manager for environmental resource permit applications to allow restoration dredging of a tidal creek in Palm Beach County. Issues included protection of hardbottom resources, mangrove wetlands, metal-contaminated sediments, and maintaining aquatic preserve water quality standards.

- Loxahatchee River Oyster Habitat Restoration, Environmental Permit Application Support, Loxahatchee River District, Palm Beach County, Florida (2008) — Developed state and federal permit applications for restoration of oyster habitat in the Loxahatchee River.

- South Palm Beach/Lantana Shoreline Protection Project Environmental Impact Statement (EIS), Palm Beach County, Florida (2013) — Project manager for EIS that evaluated environmental impacts of proposed breakwater and beach fill project to protect 3,400 feet of Palm Beach County, Florida shoreline. Key issues included turtle nesting habitat, hardbottom habitat, listed shorebird species, public access, and structure protection.

- St. Lucie County South Beach and Dune Restoration Project Environmental Impact Statement (EIS), St. Lucie County, Florida (2012) — Project manager for EIS that evaluated environmental impacts of offshore sand dredging and beach fill to protect 3.4 miles of barrier island beach. Key issues included turtle nesting habitat, hardbottom habitat, listed shorebird species, effects of offshore dredging on managed marine fish species and offshore habitats, public access, and structure protection.

Christopher B. Ellis

Senior Environmental Scientist

Education
B.S. / Environmental Science, Aquatic Resources
Virginia Polytechnic Institute and State University

Registration
Authorized Gopher Tortoise Agent

Total Years Experience/ Years with Firm
16 / 16

Background / Responsibilities

Mr. Ellis provides environmental expertise on a wide variety of projects including wetland delineation and habitat characterization, wetland mitigation design and monitoring, ecosystem restoration, state and federal permitting, threatened and endangered species consultation, National Environmental Policy Act (NEPA) documentation, submerged resource surveys, water and sediment sampling and data evaluation, and Phase I and II environmental site assessments.

Project Experience

- Okaloosa County, Okaloosa Island Project Greenshores (Living Shorelines), Florida (2013 – Ongoing) — As senior scientist, developing conceptual design alternatives to create a living shorelines project to protect and enhance a 2,500 linear foot eroding shoreline along Choctawhatchee Bay. Project features include oyster, saltwater marsh, and coastal strand habitat restoration and enhancement. Performed wetlands delineation and submerged resources (e.g., seagrass, oysters) survey. Providing state and federal environmental permitting services.

- Jupiter Inlet District (District), Living Shorelines Program Development, Palm Beach County, Florida (2015) — As project manager and senior scientist, aided the District with development of a program to promote the living shorelines concept within the Loxahatchee River estuary. Developed District-sponsored demonstration project to showcase the effectiveness of living shorelines to stabilize shorelines and enhance aquatic habitat for fish and wildlife.

- Florida School for the Deaf and the Blind, Shoreline Stabilization Project, St. Johns County, Florida (2015) — As permitting task leader, provided state and federal environmental permitting services for the construction of a concrete sheetpile bulkhead to stabilize the adjacent shoreline. Delineated on-site wetlands and designed saltwater marsh mitigation plan to offset unavoidable wetland impacts. Assisted with construction administration and observation. Currently providing mitigation success monitoring services.

- Walton County, Charles E. Cessna Landing Boat Ramp Replacement, Walton County, Florida (2009) — Secured state and federal environmental permits for the replacement of the concrete boat ramp at Charles E. Cessna Landing. Specific duties included natural resources investigation, application development, and agency coordination.

- Republic Financial Corporation, Coastal Vilano Marina, St. Johns County, Florida (2013) — As environmental and permitting lead, provided biological support and permitting services for a proposed 36-slip marina in Vilano Beach. Conducted submerged resources survey to establish baseline habitat conditions. Permitting duties included coordination with Florida Department of Agriculture and Consumer Services (DACS) Division of Aquaculture, application development, impact analysis, and agency coordination.

- City of Fort Pierce, Fort Pierce City Marina Services, St. Lucie County, Florida (2004) — Collected sediment samples and analyzed chemistry testing results. Performed survey within marina basin to identify sensitive natural resources

including sea grasses and hardbottom. Aided in development of mitigation plan to offset anticipated dredging impacts to protected natural resources.

- LandMar Group, LLC, Marina Grand Haven Design and Permitting Services, Flagler County, Florida (2004) — Aided in preparation of an environmental resource permit application for the proposed marina. Mapped existing wetlands and quantified anticipated impact areas resulting from construction. Applied the Uniform Mitigation Assessment Method (UMAM) developed by the Florida Department of Environmental Protection to aid mitigation planning. Developed saltwater marsh mitigation plan to offset impacts.

- St. Joe Company, Pier Park Beachfront Improvements, Bay County, Florida (2007) — As task manager, provided state and federal permitting services for the construction of a large pile-supported beachfront structure. Specific duties included application development, dune restoration design, and agency coordination.

- Palm Beach County, Dubois Park Restoration Project, Palm Beach County, Florida (2009) — Conducted submerged natural resources survey to assess sensitive resources that the proposed project may affect. Provided state and federal environmental permitting support for the construction of various project components including shoreline stabilization, snorkeling lagoon, and docking facility. Permitting duties included application development, impact analysis, and agency coordination.

- Collier County, Tigertail Beach Access and Amenities, Collier County, Florida (2007) — Mapped and characterized natural communities within the project area and quantified potential impacts related to construction of a beach access walkover and restroom facility. As permitting task leader, provided state and federal environmental permitting services including environmental impact analysis, mitigation design, application development, and agency coordination. The project required both coastal construction control line and environmental resource permits from the state and a dredge and fill permit from the U.S. Army Corps of Engineers.

- Florida Department of Environmental Protection, Norriego Point Shoreline Stabilization and Recreational Improvements, Destin, Florida (2015 – Ongoing) – Environmental task leader for the completion of submerged aquatic vegetation surveys needed for the design of shoreline stabilization and recreational improvements on Norriego Point within East Pass.

- St. Augustine Port, Waterway, & Beach District, Mooring Field Expansion, St. Augustine, Florida (2009) – Prepared an environmental resources permit application for the development of three mooring fields – one in Salt Run and two in the Matanzas River north and south of the Bridge of Lions. Coordinated with the University of Florida Law Center in the review of legal and planning issues associated with development of the mooring fields.

- Florida Inland Navigation District, BV-24A Dredged Management Material Area (DMMA), Brevard County, Florida (2015 – Ongoing) – Environmental task leader for the permitting of the BV-24A DMMA, a 112.52-acre area approximately 1,400 feet west of the Indian River shoreline and east of the southeast leg of the Valkaria Missile Tracking Annex.

- Florida Inland Navigation District, BV-4B Design and Permitting, Brevard County, Florida (2014 - Ongoing) – Environmental task leader assisting with field investigations and permitting of a dredged management material area on a 101-acre abandoned citrus grove adjacent to the Intracoastal Waterway.

- Jupiter Inlet District, Mangrove Island Restoration, Palm Beach County, Florida (2013 – Ongoing) —Project manager for the preliminary design and permitting effort to restore a red mangrove island just off the south shore of the Loxahatchee River Central Embayment. Project tasks include submerged resources survey, erosion assessment, restoration design, and environmental permitting.

- Bird Island Trust, Bird Island Restoration Project, Palm Beach County, Florida (2009) — As project manager, provided state and federal environmental permitting and design support for the restoration and enhancement of an 8.9-acre spoil island near South Lake Worth Inlet. Project features comprised mangrove restoration, tidal creek dredging, and shoreline protection. Specific duties included permit application development, restoration design support, wetland and seagrass analysis including Florida's Uniform Mitigation Assessment Method (UMAM), endangered species consultation, agency coordination, bid document preparation, and construction phase support.

M. Noah Adams

Environmental Scientist

Education
B.S. / Marine/Freshwater Biology
Ohio University

Registration
Authorized Gopher Tortoise Agent
(PN GTA-15-00009)

Total Years Experience/ Years with Firm
12 / 1

Background / Responsibilities

Mr. Adams possesses over 12 years experience providing a range of environmental services including: wetland delineations, endangered species surveys, submerged aquatic vegetation studies, mitigation bank permitting, planting, and monitoring; gopher tortoise surveys and relocations, mitigation monitoring activities, regulatory permitting, and Phase I environmental site assessments.

Project Experience

- Florida Department of Environmental Protection, Norriego Point Shoreline Stabilization and Recreational Improvements, Destin, Florida (2015 – Ongoing) – Completing submerged aquatic vegetation surveys needed for the design of shoreline stabilization and recreational improvements on Norriego Point within East Pass.
- WindMark Beach Submerged Aquatic Vegetation (SAV) Survey, Panama City Beach, Florida (2015) – Completed a SAV survey along the WindMark Beach shoreline to assess presence of seagrass for future planning and design of shoreline stabilization.
- Jupiter Inlet District, Moonshine Creek Oxbow Permitting, Palm Beach County, Florida (2015 – Ongoing) – Securing the necessary regulatory permits to restore natural oxbow through placement of rock and dredging in the upper reaches of the northwest fork in the Loxahatchee River.
- Florida Inland Navigation District, BV-4B Permanent Pipeline, Brevard County, Florida (2015 – Ongoing) – Environmental scientist completing a submerged resources survey in the vicinity of the proposed permanent effluent discharge pipeline from the BV-4B dredged material management area to the Intracoastal Waterway.
- DeeDot Timberlands Causeway Rock Revetment, St. Johns County, Florida (2015) – Environmental scientist involved in the development of an engineering design (rock revetment) to stabilize the causeway waterside slope adjacent to San Pablo Creek.
- Eagle LNG Marine Terminal, Jacksonville, Florida (2015) – Environmental scientist, performed sediment sampling for a dredging template and geotechnical investigations to support ongoing conceptual engineering of a new marine terminal.
- San Sebastian River Natural Resources Survey, St. Augustine, Florida (2015) – Environmental scientist for the completion of a natural resources survey of estuarine biological communities, including saltwater marsh, tidal flats, and oyster reefs within a portion of the San Sebastian River.
- North Florida Land Trust (NFLT), Spoil Island Management Plan, Duval County, Florida (2015) – Environmental scientist on the preparation of a management plan for 18 spoil islands owned by NFLT on Big Talbot Island. The plan identified management practices and projects to support the designated use of each

island.

- St. Johns River Water Management District (SJRWMD), Eau Gallie River Muck Dredging Final Design, Brevard County, Florida (2015) – Environmental scientist, conducted field work and sampling for the final dredging design of the Eau Gallie River and Elbow Creek within the Indian River Lagoon.

- Florida Inland Navigation District, BV-4B Design and Permitting, Brevard County, Florida (Ongoing) – Environmental scientist assisting with field investigations and permitting of a dredged management material area on a 101-acre abandoned citrus grove adjacent to the Intracoastal Waterway.

- Jupiter Inlet District, Mangrove Island Restoration, Palm Beach County, Florida (Ongoing) —Environmental scientist for the preliminary design and permitting effort to restore a red mangrove island just off the south shore of the Loxahatchee River Central Embayment. Project tasks include submerged resources survey, erosion assessment, restoration design, and environmental permitting.

- Florida Inland Navigation District, SJ-14 Continued Salinity and Water Level Monitoring and Additional Soil Investigations, St. Johns County, Florida (Ongoing) — Environmental scientist on the continued monitoring and additional soil investigations associated with this 43-acre dredged management material area that was impacted by a dredged material slurry spill in 2006. The additional soil investigations will be the basis for a soil sampling plan.

- Constraint Analysis, Rayonier and Camp Blanding Properties, Clay County, Florida (2012) – Performed a constraint analysis on 2,500 acres associated with due diligence prior to heavy mineral mining. As part of the analysis, the following tasks were completed: wetland delineation, endangered species survey, habitat mapping, setting seasonal high water lines, and groundwater flow mapping.

- Vegetative Quantitative Monitoring and Mitigation Monitoring Report, Nahunta, Georgia (2012–2013) – Conducted field data collection and document production for the release of 213.32 acres of wetland reclamation associated with an inactive heavy mineral mine.

- Vegetative and Hydrologic Monitoring, Northeast Florida (2012–2015) – Performed and oversaw the quantitative/qualitative monitoring of approximately 200 acres of wetland mitigation creation for a heavy mineral mine located in northeast Florida. Duties included completing monitoring design, installation of monitoring wells, data collection, and completing monitoring reports for submittal to federal and state agencies.

- Nuisance Species Maintenance, Florida (2012–2015) – Provided the treatment schedule and oversaw the maintenance activities of subcontractors within approximately 400 acres of wetland creation.

- Updated Conceptual Reclamation Plan (CRP) for 18,000 acres of Chemours' Florida Mine, Baker County, Florida (2014–2015) – Development of this plan included reviewing historical reclamation release documents dating back to the 1940s, matching historical land uses to the updated FLUCFCS classification system, field verification of land uses, GPS mapping of habitat types, and digitizing historical permit documentation into GIS.

- Modification of Chemours' Maxville Mine Environmental Resource Permit (ERP), Baker County, Florida (2015) – Modification of an ERP to expand the mining limits of disturbance to 1,182.97 acres. Performed FLUCFCS mapping, endangered species surveys, and a wetland delineation including an informal review with the Florida Department of Environmental Protection to support the production of the ERP application. Produced the UMAM analysis of impact and mitigation scoring, completed the impact and mitigation cross-sectional figures, completed stream reviews and USACE data sheets, performed slug testing, completed application tables, and coordinated figure production in support of completing the application document.

- 3-D Model of Surface Water/Groundwater, Florida (2014) – Lead the field activities associated with and investigation of 350 acres as to the source of water turbidity. Identified and mapped areas of surficial hydrologic connections using a Trimble Nomad GPS, installed monitoring wells, and performed bi-monthly data collection in support of producing a 3-D model of the landscape and associated hydrologic connections using Leapfrog Hydrologic Software.

Cathleen E. Foerster, AICP

Senior Land Planner

Education
B.A. / Legal Studies
University of Central Florida

Registration
Certified Land Planner – U.S.

Licensed Real Estate Broker - FL

Total Years Experience/ Years with Firm
22 / 2

Background / Responsibilities

Ms. Foerster is a certified land planner and licensed real estate broker with more than 20 years professional experience in land development, land use planning, community planning, and water resource protection and planning. Ms. Foerster focuses her planning efforts on best management practices and low impact designs to limit the impact of the built environment on natural resources. Through her planning experience, she has honed her skills in consensus-building and executed numerous public involvement programs.

Project Experience

- Comprehensive Land Use Planning (2000 – Ongoing) — Review, analyze, and revise, local government comprehensive planning elements (focused primarily on floodplain management, public facilities, environmental protection, and land use elements), land development regulations, zoning codes, and ordinances.

- Water Resources Planning (2007 – Ongoing) — Provide technical assistance to local governments regarding water management district and Florida Department of Environmental Protection regulatory purview, particularly water supply planning and water resource protection policies that are required in local government comprehensive plans.

    - Silver Springs Conservation Area Resource Management Plan, Marion County, Florida – Preparation of a resource management plan that received approval from Marion County and the state Acquisition Restoration Council.

    - Everglades Environmental Impact Study, U.S. Army Corps of Engineers, Okeechobee, Florida – Planning team member on the analysis of water quality impacts in specific areas within the Everglades Agricultural Area.

    - Northwest Hillsborough County Monitoring Well Report for Tampa Bay Water, Hillsborough County, Florida – Planning team member in the preparation of an annual monitoring report that identified issues and solutions regarding groundwater monitoring wells.

- Community Engagement (1994 – Ongoing) — Responsible for public involvement components on community planning initiatives. Specific examples include:

    - Downtown Fort Myers Revitalization Plan, Fort Myers, Florida – Organized and participated in a seven-day charrette attended by over 1,000 persons.

    - Florida Department of Transportation PD&E Study in Leon, Wakulla, and Franklin Counties, Florida – Coordinated and attended over 100 meetings involving state agencies, citizens, and special interest groups. Tracked and responded to comments and served as central information source for over 500 interested persons.

Tab 2. Experience

Summary Tables

The areas of expertise sought by the City of New Smyrna Beach comprise Taylor Engineering's daily work. Marine engineering has been a core service line for the company since its inception in 1983; since then, we have executed nearly 1,000 task orders for marine-related services. Therefore, to provide a concise summary, this tab includes tables that succinctly convey a sampling of our marine engineering project experience involving:

- Grants (Table 1)
- Regulatory and permitting agencies (Table 2)
- Site development (Table 3)
- Original budget versus actual budget – construction costs (Table 4)
- Original budget versus actual budget – consulting fees (Table 5)
- Estimated timelines versus actual timelines (Table 6)

Further, we provide a summary of projects and clients (Table 7) for which we have recently (within the last three years) performed similar work. Notably, Table 7 is not an all-inclusive list of our marine projects. Our waterfront engineering group — a team of professionals dedicated to marine engineering services— has provided services on more than 100 task orders during the last three years. Therefore, to provide a more manageable summary, Table 7 identifies those projects for which our proposed project manager, Jonathan Armbruster, P.E., has served as either principal-in-charge or project manager.

Summary of Litigation, Citations, and Violations

Immediately following the summary tables, we provide a summary statement of all citations, violations, and litigation existing or continuing within the last three (3) years.

Project Descriptions

To provide a more thorough and narrative summary of representative projects, this tab concludes with 14 project descriptions that exemplify the depth and breadth of our experience in the marine environment.

Table 1. Grant-related Projects

Taylor Engineering's clients routinely seek and obtain grant funding to support engineering design services or project construction. We often provide our clients with grant-related support. Our grant services range from leading the application process to providing technical input during application development. Additionally, once grant funding is secured, Taylor Engineering is accustomed to providing technical support for grant management and compliance. The table below highlights Taylor Engineering projects which have benefited from grant funding.

Project Name	Recipient	Funding Entity	Funding Amount
Eau Gallie River and Elbow Creek Restoration Dredging	St. Johns River Water Management District	FDEP	$20,000,000
		FIND	$2,500,000
		City of Melbourne	$50,000
Dubois Park Waterfront Redevelopment	Palm Beach County	FDEP	$1,800,000
		FIND	$61,854
Waterfront Commons	City of West Palm Beach	FIND	$5,150,000
Miramar Beach Parking Structure	Walton County	FEMA	$4,000,000
Lighthouse Park Boat Ramp and Floating Dock	St. Augustine Port, Waterway & Beach District	FIND	$168,100
Salt Run Dredging			$1,842,054
San Sebastian River Dredging			$350,694
Norriego Point Shoreline Stabilization	City of Destin	NRDA Gulf Spill Restoration	$10,200,000
		FDEP	$3,700,000
Okaloosa Island Beach Restoration/Access	Okaloosa County	FDEP	$7,000,000
Artificial Reef Program	Okaloosa County	FWC	$340,000
East Pass Maintenance Dredging	Okaloosa County and City of Destin	USACE	$1,000,000
Section 204 Study (Beneficial Uses of Dredged Material)	Okaloosa County	USACE	$200,000
Summer Haven Restoration	St. Johns County	FDEP	$3,300,000

List of Acronyms

FDEP	Florida Department of Environmental Protection
FEMA	Federal Emergency Management Agency
FIND	Florida Inland Navigation District
FWC	Florida Fish and Wildlife Conservation Commission
NMFS	National Marine Fisheries Service
NRDA	Natural Resource Damage Assessment
SFWMD	South Florida Water Management District
USACE	U.S. Army Corps of Engineers
USFWS	U.S. Fish and Wildlife Service

Table 2. Marine Projects that Involved Regulatory Permitting and Coordination

Our technical experience with environmental regulation includes federal, state, and local environmental permits acquisition; habitat characterization and mapping; mitigation design; permit compliance monitoring; endangered/threatened species, wetland, watershed, natural resource studies and other natural resource management plans; long-term monitoring; and field data collection and analysis. With our clear understanding of regulatory issues, we have developed valuable professional relationships with regulatory agencies over the years. The list below represents a cross-section of our marine project and permitting experience.

Project Name	Project Type	Client	Permitting Entity
Eau Gallie River and Elbow Creek Restoration Dredging	Dredging and Dredged Material Management; Environmental Restoration	St. Johns River Water Management District	City of Melbourne, FDEP, USACE, USFWS, NMFS
Dubois Park Waterfront Redevelopment	Floating and Fixed Docks; Bulkheads; Breakwaters; Dredging	Palm Beach County	SFWMD, USACE
Waterfront Commons	Floating Docks; Waterfront Park Development	City of West Palm Beach	FDEP, USACE City of West Palm Beach
Lighthouse Park	Dredging, Boat Ramp, and Floating Dock	St. Augustine Port, Waterway & Beach District	FDEP, USACE, FWC, USFWS
Salt Run	Dredging		FDEP, USACE
San Sebastian River	Dredging		FDEP, USACE
Avenida Menendez	Seawall; Stormwater/ Flood Reduction; Utilities	City of St. Augustine	FEMA, FDEP, USACE Department of State, Division of Historical Resources
Miramar Beach Park	Beach Access Parking Structure	Walton County	FDEP South Walton Utility Company
Tigertail Park	Boardwalk; Beach Access; Public Restroom Facilities	Collier County	FDEP, USACE Collier County City of Marco Island
San Juan Waterfront Redevelopment	Bulkhead; Floating Docks; Pedestrian Access; Water Taxi Piers; Seaplanes	FC San Juan Waterfront LLC	USACE Commonwealth of Puerto Rico
Ted Sperling Park	Boardwalks	Sarasota County	FDEP, USACE
FL-8 Dredged Material Management Area	Boardwalk and Shoreline Protection	Florida Inland Navigation District	FDEP, USACE
Causeway Bulkhead	Bulkhead and Seawall	Florida School for the Deaf and Blind	FDEP, USACE
Norriego Point	Shoreline Stabilization and Park Development	FDEP and City of Destin	FDEP, USACE

Table 3. Marine Site Development Projects

Marine projects often extend beyond the water's edge. Many marine and waterfront projects include traditional upland development and civil engineering components. The table below provides a summary of Taylor Engineering's recent projects which included significant upland components that required civil engineering design in addition to marine engineering services.

Project Name	Project Type	Client	Upland Site Development Components
Avenida Menendez	Seawall	City of St. Augustine	Pedestrian Promenade Stormwater Utilities Lighting Landscaping ADA Accessibility
North 2nd Street	Port Roadway Widening	St. Lucie County	Roadway Stormwater Utilities
Tigertail Park	Boardwalk	Collier County	Restroom Facility Parking Water and Sewer ADA Accessibility
Miramar Beach Park	Parking Structure	Walton County	Restroom Facility Stormwater Water and Sewer Roadway ADA Accessibility
Waterfront Commons	Floating Docks	City of West Palm Beach	Pedestrian Promenade Roadway Utilities
Dubois Park Waterfront Redevelopment	Floating and Fixed Docks	Palm Beach County	Work around Existing Structures/Buildings
San Juan Waterfront Redevelopment	Floating Docks and Piers	FC San Juan Waterfront LLC	Marine Utilities Lighting Pedestrian Access
Ted Sperling Park	Boardwalks	Sarasota County	ADA Accessibility Boardwalks
Leesburg Seaplane Ramp and Floating Dock	Seaplane Ramp and Floating Dock	City of Leesburg (via AVCON)	Taxiway and Runway Coordination
FL-8 Dredged Material Management Area	Boardwalk and Shoreline Protection	Florida Inland Navigation District	Pedestrian Bridges Park/Greenway Connectivity

Table 4. Construction Costs – Original Budget versus Actual Budget

Taylor Engineering has a robust record of cost estimation for ocean, coastal, marine, and waterfront engineering projects. From our knowledge of construction techniques and construction feasibility, we prepare project construction cost estimates or value-engineer project details to meet our clients' budget and schedule constraints. Our strength in developing cost-effective projects and preparing construction cost estimates allows our clients to manage their budgets and schedules and achieve project goals to the highest attainable technical standard. Taylor Engineering has an excellent record of preparing accurate construction cost estimates; actual construction costs generally come within 10% of our estimates. The table below highlights a few specific projects.

Project Name	Client	Estimated Construction Cost	Actual Construction Cost
Eau Gallie and Elbow Creek Restoration Dredging	St. Johns River Water Management District	$20,700,000	$18, 550,000 (bid value; construction pending)
Intracoastal Waterway Deepening near Port of Palm Beach	FIND	$1,986,885	$2,689,780 (not final; will decrease with final quantities)
MSA-434 Dredged Material Management Area	FIND	$2,500,000	$2,600,000
MSA-726 Dredged Material Management Area	FIND	$578,700	$607,300
NA-1 Dredged Material Management Area	FIND	$3,500,0000	$3,800,00
Salt Run Dredging	St. Augustine Port, Waterway & Beach District	$665,000	$611,000
Lighthouse Park Boat Ramp and Floating Dock	St. Augustine Port, Waterway & Beach District	$206,000	$201,000
Causeway Bulkhead	Florida School for the Deaf and Blind	$738,000	$727,000
Miramar Beach Parking Structure	Walton County	$4,100,000	$4,300,000
Avenida Menendez Seawall	City of St. Augustine	$6,400,000	$6,400,000
Lantana Seawall	Town of Lantana	$1,500,000	$1,500,000
San Juan Piers 7 & 8	FC San Juan Waterfront LLC	$16,400,000	$16,200,000
Waterfront Commons Floating Docks	City of West Palm Beach	$3,300,000	$3,100,000

Table 5. Consulting Fees – Original Budget versus Actual Budget

To manage schedules and control costs, Taylor Engineering uses Deltek's VISION software and an in-house developed *Taylor Project Manager*© to track all aspects of its projects. Taylor Engineering's professional staff use *Taylor Project Manager*© to review weekly project financial updates showing staff hours expended, labor, and other costs associated with each project. This weekly project accounting, coupled with knowledge of percent of work completed, ensures that a project stays on track and within budget.

Taylor Engineering's in-place quality control, staff, and management tools will promote effective, efficient, high quality, and successful execution of New Smyrna Beach projects. Taylor Engineering commits to providing services efficiently, promptly, and within time and budget requirements while producing high-quality products.

Project Name	Client	Services	Negotiated Fees for Services	Actual Cost to Provide Services	Explanation for Variance
Miramar Beach Parking Structure	Walton County	Design, Permitting, and Construction Administration	$541,633.71	$551,811.90	Additional utility design and permitting due to unforeseen site conditions
Dubois Park Waterfront Redevelopment	Palm Beach County	Design, Permitting, and Construction Administration	$365,476.00	$365,476.00	N/A
Lantana Seawall	Town of Lantana	Design, Permitting, and Construction Administration	$144,138.00	$143,842.30	Completed project slightly under budget
Seaplane Ramp and Floating Dock	City of Leesburg (via AVCON)	Design, Permitting, and Construction Administration	$56,102.60	Services not yet complete, but will exceed contract fee by approx. 3%.	Geotechnical conditions required design of pile foundation for ramp
Eau Gallie and Elbow Creek Restoration Dredging	St. Johns River Water Management District	Design, Permitting, Waiver Management, and Construction Documents for Dredging and Dredged Material Management Area	7 task orders to date totaling: $1,506,404.07	$1,439,693.73	Work ongoing

Table 6. Estimated Timelines versus Actual Timelines

To maintain a project schedule, Taylor Engineering tracks milestones, resources, and project progress. We routinely use Microsoft Project or Microsoft Excel to generate the project schedule, depending on the complexity of the project and the client's preference. We consider our ability to develop, maintain, and manage the schedule as our key responsibility on any project. We integrate schedule development into our project planning, estimating, and programming support in specific coordination with our client's requirements and systems.

Project Name	Task	Deadline per Schedule	Actual Submittal Date	Explanation for Variance
Leesburg Seaplane Ramp and Floating Dock – Design Phase	15% Design Plans	11/6/15	11/2/15	N/A
	30% Design Plans	12/18/15	1/22/16	Owner schedule modification
	100% Design Plans and Final Construction Drawings	7/29/16	Pending	N/A
	Technical Specifications	7/29/16	Pending	N/A
	Opinion of Probable Cost	7/15/16	Pending	N/A
San Juan Waterfront Redevelopment – Design Phase	Site Visit /Kick-Off Meeting	4/15/2010	4/15/2010	N/A
	Permit Drawings	8/3/2010	8/1/2010	N/A
	Completed Construction Documents	11/9/2010	11/24/2010	Owner-accepted schedule change for data collection
	Bid Review and Contractor Selection	2/1/2011	2/24/2011	Owner-accepted schedule change due to above item
	Construction Commencement	2/22/2011	6/29/2011	Owner delays in issuing construction contract
Eau Gallie and Elbow Creek Restoration Dredging – Design Phase	FDEP Permit Receipt	9/20/2015	9/10/2015	N/A
	Final Bid Documents	12/24/2015	12/23/2015	N/A
	Bidding/Contractor Selection	1/28/2016	2/28/2016	Provided additional bidding time at contractors' requests
	Construction Commencement	4/15/2016	Pending	N/A
Lighthouse Park Floating Dock	Conceptual Design and Permitting	9/1/2008	9/4/2008	Minor extension of permit agency review period
	Final Design and Bidding	7/15/2015	7/2/2008	N/A
	Site Investigations	1/29/2010	1/29/2010	N/A
FPL Seawall – Design and Construction	Feasibility Report	2/26/2010	2/26/2010	N/A
	Preliminary Design Package	4/30/2010	5/3/2010	Owner-accepted schedule adjustment
	FDEP CCCL Permit Received	12/1/2010	12/6/2011	Minor extension of permit agency review period
	Final Seawall Design Package	1/27/2011	2/10/2011	Owner-accepted schedule adjustment

Table 7. Summary of Recent Marine Projects

Taylor Engineering has executed 118 marine-related task orders during the last three years. Therefore, to provide a manageable list for the City's review, the projects below relate specifically to our proposed project manager, Jonathan Armbruster, P.E.'s, recent roles as either the principal-in-charge or project manager during the last three years. As principal-in-charge (PIC), Mr. Armbruster provides oversight and QA/QC. As project manager (PM), he is responsible for daily project management and deliverables.

Project Name	Project Type	Client	Armbruster's Role	Date Started/ Completed	Project Cost
Fort Gates Ferry Terminal	Terminal Rehabilitation	Putnam County	PIC	9-23-15/ Ongoing	$204,082.00
Drayton Island Ferry Terminal	Terminal Rehabilitation	Putnam County	PIC	2-25-16/ Ongoing	$89,077.50
Intracoastal Waterway Deepening Palm Beach South	Dredging Design and Permitting	FIND	PIC	1-12-16/ Ongoing	$264,122.30

Five Mile Creek	Wetland Mitigation Design	Scheda Ecological Associates	PM	1-17-13/ 11-8-13	$39,830.00

Litigation, Citations, and Violations within the last Three Years

The summaries below describe all litigation in which Taylor Engineering has been a party within the last three years. Each litigation summary includes a brief description of the dispute, description of circumstances giving rise to the dispute, actions attempting to settle the matter, and current status.

Case Name: ***Alan Mincer vs. Santa Maria Restaurant, Inc.; Carlito Corporation; City of St. Augustine; C&D Construction, Inc.; and Taylor Engineering, Inc.***

Claim: This litigation involved a fall that occurred on the evening of October 8, 2012. Dr. Alan Mincer alleged as he departed the Santa Maria restaurant in St. Augustine, Florida, he fell approximately three feet from the sidewalk/walkway to the street. Dr. Mincer brought suit against the restaurant and the City of St. Augustine (city). Subsequently, C&D Construction and Taylor Engineering were added as parties to the lawsuit because of their contract with the city for work on the seawall adjacent to the restaurant. Taylor Engineering designed and provided construction observation services for renovation of the seawall. At the time of the incident, the contractor (C&D Construction) had not commenced construction in the immediate vicinity of the restaurant. The conditions alleged to have caused the fall remained unaltered from historic conditions. The control of the access point and the site of the alleged accident were not under Taylor Engineering's purview. Therefore, Hartford Insurance (Taylor Engineering's comprehensive liability insurer) secured Taylor Engineering's immediate dismissal from this suit.

Final Outcome: Dismissed

Case Name: ***Dickerson Florida, Inc. vs. Taylor Engineering, Inc.; Michael D. Whelan, P.E.; Robert J. Wagner, P.E.; and Steven Schropp, Ph.D.***

Claim: Dickerson Florida (Dickerson), a dredging contractor, claimed that Taylor Engineering's dredged material management area (DMMA) design for the Manatee Pocket dredging project was inadequate and that Dickerson could not offload dredged material from the DMMA in a timely manner. Dickerson asserted that it suffered cost overruns due to the allegedly negligent design. Taylor Engineering responded that the DMMA met professional engineering standards of care, adequately contained the dredged sediments, and met all permit conditions for the award-winning project.

Final Outcome: The parties presented their case in a jury trial conducted October 27–November 7, 2014. On November 7, 2014, the jury found Dickerson's claim completely without merit. Taylor Engineering did not breach its contract with Dickerson and did not commit any negligent acts. Further, the jury found Dickerson guilty of breach of contract with Taylor Engineering and assessed Dickerson with responsibility for financial damage suffered by Taylor Engineering due to Dickerson's breach.

San Juan, Puerto Rico

Bahia Urbana replaced aging and failing port infrastructure to stimulate economically, socially, and environmentally sustainable growth

Taylor Engineering served as a member of a design and land development professionals team assembled to tackle a comprehensive redevelopment program for the San Juan waterfront in Puerto Rico. The project site - an aging port facility in the heart of San Juan - presented a unique set of challenges and opportunities. Past uses included Navy and Army facilities, commercial and industrial port terminals, government facilities, as well as small craft marinas and recreation amenities. Nearby, the waterfront hosts a number of popular cruise ship terminals. The project team revitalized, retrofitted, and replaced aging and failing port infrastructure to support new mixed-use development including cruise passenger tourist attractions and commercial, residential, and civic developments. Taylor Engineering's marine structures services included evaluation of bulkheads, docks, and piers and design for new bulkheads, piers, mooring facilities, dredging, and other waterfront facilities.

Playing a lead role as the team's waterfront and marine structures engineer, Taylor Engineering provided services ranging from feasibility assessment through final engineering and construction phase services. Work included evaluation of existing marine infrastructure, value engineering for retrofit and replacement alternatives, and design and construction phase engineering for new marine structures. Design challenges included poor geotechnical conditions and seismic design requirements for bulkhead structures. Constructed project features include floating dock water taxi terminal and seaplane berth, pedestrian bridge, pier bulkheads, and mooring dolphins.

Eau Gallie River and Elbow Creek Restoration

Brevard County, Florida

Confluence of the Eau Gallie River with the Indian River Lagoon

As a remedy to the Eau Gallie River and Elbow Creek sedimentation problems, which affect water quality in both waterbodies and contribute to shoaling in the Indian River Lagoon and Intracoastal Waterway, the St. Johns River Water Management District (SJRWMD) proposes to dredge nearly 700,000 cubic yards of muck sediment as an environmental restoration project. Taylor Engineering prepared a feasibility study and supporting detailed cost estimates in early 2014 for this project. Taylor Engineering is now preparing the final design of the dredging template and dredged material management area, preparing construction documents, and completing permitting.

In addition to dredging and dredged material management design, work includes seeking temporary pipeline easements and license agreements from seven upland owners including the City of Melbourne, Brevard County, the City of Melbourne Airport Authority, as well as multiple private owners. Engineering tasks include design for directional drill pipeline installation beneath two major road crossings as well as design for a railroad crossing. Permitting efforts seek authorizations from the Florida Department of Environmental Protection, U.S. Army Corps of Engineers, City of Melbourne, and Brevard County. Taylor Engineering is providing bid assistance and will assist with project construction administration for the $20 million, 30-month project.

Dubois Park Redevelopment

Palm Beach County, Florida

Taylor Engineering designed Dubois Park's artificial reef snorkeling area for shoreline protection, public enjoyment, and manatee safety.

Taylor Engineering completed Phase I (feasibility and planning) and Phase II (permitting and engineering design) for the redevelopment of Dubois Park in northern Palm Beach County. Dubois Park, a county-owned and operated park, lies along the southern shoreline of the Jupiter Inlet.

Phase I involved an evaluation of existing park facilities, a natural resource survey, conceptual layouts for a day dock, shoreline protection, and several snorkeling area configurations. In addition, Taylor Engineering developed a numerical model of the area to assess flushing conditions and hydrodynamic changes resulting from the proposed improvements. Staff members met with the Florida Department of Environmental Protection and the U.S. Army Corps of Engineers on site to discuss the proposed project.

Dubois Park's Visitor Day Docks

During Phase II, Taylor Engineering prepared the application and secured an environmental resource permit. Environmental issues included water quality concerns, seagrass impacts, and manatee safety. With the permit in hand, Taylor Engineering prepared engineering design drawings and specifications for all project components. Project features included 700 linear feet of vinyl sheet pile bulkhead, concrete pile-supported day-use timber docks, dredging, shoreline riprap, and an offshore natural stone reef breakwater to enclose and protect a recreational snorkel area. In addition to providing visitor dock facilities, the project included fixed docks to moor a life-rescue boat and a law enforcement vessel, as well as a floating dock to serve as a water taxi terminal.

In 2012, the Dubois Park Redevelopment Project received the National Association of County Park and Recreation Officials (NACPRO) *Park and Recreation Facility Class II Award*.

Waterfront Commons Floating Docks

West Palm Beach, Florida

Opened in 2009, Waterfront Commons received the Beacon of Light Award, which recognizes the Marine Industries Association's Project of the Year

Taylor Engineering helped the City of West Palm Beach design, permit, and construct a series of floating docks for Waterfront Commons, the centerpiece of the City's downtown redevelopment program for the Lake Worth Lagoon waterfront. This work required coordination with the Florida Department of Environmental Protection, U.S. Army Corps of Engineers, and local building officials. These floating docks, with additional design elements that include seating areas, planting areas, and public art, bring the waterfront park's theme into the surrounding marine environment.

Taylor Engineering provided marine engineering design and construction expertise to the City's project design team, which included planners/architects, landscape architects, lighting consultants, utility designers, and city planners. Taylor Engineering also provided construction administration and observation services.

Walton County, Florida

Cast-in-place concrete beams support the parking area fronting the Gulf of Mexico.

Walton County owns a public beach access parking area on Scenic Gulf Drive fronting the Gulf of Mexico. Hurricanes (Ivan in 2004 and Dennis in July 2005) and tropical storms came ashore nearby and severely damaged the parking lot. The county, seeking a more permanent public beach access, retained Taylor Engineering to design and permit a beachfront parking structure. The project included construction of a single-level concrete parking structure supported by 181 prestressed concrete piles, installation of a sheetpile upland retaining bulkhead, and relocation of roadside utilities. In coordination with these design services, Taylor Engineering applied for and obtained FDEP Coastal Construction Control Line (CCCL) permits for both the concrete structure and replacement of the frontal dune system. In addition, Taylor Engineering provided the county with bid and construction administration services. Construction phase services included on-site observation, contractor submittal review, pay application review, and project closeout and final certification.

Hurricane erosion destroyed the original asphalt parking lot.

The new pile-support parking structure opened in time for Spring Break 2009.

ADA-compliant beach access walkover

Taylor Engineering evaluated the engineering and environmental permit feasibility of constructing a boardwalk from Tigertail Beach Park to Sand Dollar Island, a barrier island ecosystem adjacent to the park in Collier County. Due to the development of Sand Dollar Island, the park no longer borders the Gulf of Mexico. The county wished to evaluate the feasibility of constructing a direct access to the Gulf beach. The engineering design considered structural requirements in a fully exposed location, environmental impacts, and visual aesthetics. The environmental impact analysis considered the primary, secondary, and cumulative effects of the proposed structure. In addition, Taylor Engineering conducted extensive discussions and meetings concerning the proposed project with regulatory agencies and environmental interest groups. The final feasibility report found that while a structure could survive and function in the high-energy marine environment, the permitting of such a structure would prove very difficult. Given the numerous state and federal environmental protections afforded the island, such a project would generate considerable public concern.

Based on the results of the feasibility study, the county decided to design and permit a 350-foot, ADA-compliant beach access walkover near the south end of the Tigertail Beach Park property as a partial solution to the beach access problem. Collier County retained Taylor Engineering to design and permit the walkover and utilities (water, sewer, and electric) to support an amenities building near the walkover entrance. Taylor Engineering's design consisted of a pile-supported walkway with a resting platform, observation deck, and ADA-compliant ramp. The design minimizes impact to mangroves and dune vegetation and incorporates eco-friendly materials such as recycled plastic lumber and piles.

The project required three separate environmental permits including state environmental resource (ERP) and coastal construction control line (CCCL) permits from the Florida Department of Environmental Protection and a federal dredge and fill permit from the U.S. Department of the Army.

Erosion caused significant damage to a town park.

Emergency seawall construction completed in April 2009.

Aerial view of Lantana seawall construction, January 2009

During a violent nor'easter storm in October 2008, the Town of Lantana waterfront park suffered extreme beach and dune erosion. The erosion destroyed beachfront sidewalks and access ramps and threatened to cause two beachside buildings to collapse into the ocean.

The town council issued an emergency order and retained Taylor Engineering to evaluate and provide a design for an emergency seawall. Taylor Engineering immediately ordered geotechnical and survey work and prepared an initial structural design based on immediately available material. Concurrently, Taylor Engineering began a dialogue and permit application process with the Florida Department of Environmental Protection.

The extremely dense layer of compacted sand just below the beach surface, the close proximity of the Ritz-Carlton hotel and the Imperial Condominiums, and the two buildings balanced on the edge of the eroded dune scarp compounded the design challenges. These circumstances precluded the use of conventional pile-driving equipment - any vibration would prove detrimental to the safety of the buildings. Given the precarious conditions, Taylor Engineering designed the structure with readily available steel sheetpile and helical anchor tiebacks under the existing buildings. The selected contractor applied the Giken "press-in" method to install the sheet pile and prevent vibration. Taylor Engineering also worked closely with Palm Beach County to provide dune restoration as part of the overall shoreline stabilization. The resulting system provides protection against a 50-year design storm, which approximately equates to a Category 3 hurricane.

Construction of the $1.5 million project began in January 2009. Taylor Engineering's construction administration services included providing on-site construction observation and coordination, reviewing contractor submittals, and ensuring compliance with permit conditions and design specifications. The project reached successful completion in April 2009.

Lighthouse Park concrete floating docks under construction

The St. Augustine Port, Waterway, & Beach District contracted Taylor Engineering to evaluate and design improvements to the Lighthouse Park boat ramp on Salt Run in St. Johns County, Florida. Taylor Engineering began the project with a feasibility study for dredging sediments deposited around the boat ramp and replacing a deteriorated floating dock with a larger facility.

After the feasibility study, Taylor Engineering designed a new concrete floating dock, completed engineering design for dredging around the boat ramp, and successfully acquired both state and federal permits for all aspects of the project. Project tasks included preparing the final construction drawings and specifications, developing concrete floating dock performance specifications, and providing bid assistance, construction administration, and final project certification and closeout.

Conch House Marina Site Planning, Renovation, Design, and Permitting

St. Augustine, St. Johns County, Florida

Conch House Marina

To meet the demands of the growing tourist industry in St. Augustine, the owners of the Conch House Marina Resort initiated a renovation and expansion project to upgrade their existing marina facilities. Taylor Engineering provided assistance with planning and project layout, obtained the required state and federal environmental permits, and designed renovations and new facilities. Taylor Engineering designed a vinyl sheet pile bulkhead along the resort shoreline, a new fixed elevated concrete walkway, pile foundations for several new structures located within the dock complex, and the expanded marina basin. The dewatering plan for dredged material from the basin took into account the limited upland space available for the work. The dredged material provided backfill for the bulkhead and a base to build marsh and intertidal mudflats for environmental mitigation. Work for the environmental permit applications included natural resource mapping using GPS and GIS. Taylor Engineering coordinated with state and federal regulatory agencies to resolve critical permitting issues related to wetland mitigation and manatee protection.

Preliminary expansion plan

Beginning in 2001, the City of Fort Pierce contracted Taylor Engineering to provide a variety of engineering services associated with the City's municipal marina. Each subsequent project aimed to expand or improve existing marina facilities, including the access channel. Work began with the preliminary design for marina expansion that added 75 floating dock slips for berthing vessels ranging from 35 to 50 feet in length. Other features of the expansion included doubling of the marina capacity for along-side dockage of larger vessels and the addition of a fixed pier for use during marina-sponsored fishing tournaments. Marine utility services included water, fire protection, electricity, cable TV, phone, and lighting. Work continued with the design of renovations to the D and E docks and the submission of an environmental resource permit application to the Florida Department of Environmental Protection and U.S. Army Corps of Engineers. Finally, Taylor Engineering drew on its 2001 report that recommended abandoning the existing access channel in favor of a new channel located to minimize channel maintenance. Taylor Engineering completed the new channel design, prepared permit applications, and provided final drawings, contract documents, and specifications.

Various Counties, Florida

Dredged Material Management Area SJ-14 in St. Johns County

Since 1986, Taylor Engineering has provided services to the Florida Inland Navigation District (FIND), the local sponsor of Florida's Intracoastal Waterway and Okeechobee Waterway, to prepare and implement long-term dredged material management plans for 502 miles of federal navigation channels. This work has required close coordination with the U.S. Army Corps of Engineers (USACE) Jacksonville District, federal and state permitting agencies, local governments, and, through numerous public workshops, local citizen groups.

The primary program objective is to locate, obtain, design, permit, and build dredged material management sites - inclusive of upland dredged material management and beach placement areas - capable of handling projected 50-year maintenance dredging requirements in 12 Florida counties.

Each upland dredged material management area (DMMA) is custom designed and built with on-site material. Planning and design for each facility include field investigation and site visit, geotechnical investigation, wetland and wildlife impact assessment, cultural resources assessment, dredged material quantity/quality analysis, embankment design, site drainage design, sediment and erosion control measures, access road design, evaluation and control of groundwater impacts, design of water control structures for operations and site drainage, and on-site mitigation. Final design documents include construction plans, specifications, bid quantities, engineering cost estimates, and complete contract documents.

In total, this program has identified 53 upland containment sites and eight permanent beach placement sites to handle a projected 23 million cubic yards of dredged material over the next 50 years.

Salt Run Dredging Feasibility Study, Permitting, and Final Design

St. Augustine, St. Johns County, Florida

Salt Run channel

Taylor Engineering evaluated the feasibility of constructing and maintaining a navigation channel in Salt Run, a shallow embayment that extends southward from the St. Augustine Harbor Inlet entrance channel. Under contract to the St. Augustine Port, Waterway, & Beach District (SAPWBD), Taylor Engineering prepared the Engineering Appendix in support of the Jacksonville District, U.S. Army Corps of Engineers (USACE) Section 107 Feasibility Study. Specific responsibilities for this 2003 study included analyzing existing bathymetry, patterns of sedimentation, shoaling rates, sediment characteristics, and tidal circulation within Salt Run; designing alternative channel alignments; calculating dredge volume alternatives at three proposed depths; and conceiving a dredged material management plan.

In 2006, after the federal government failed to fund the new channel, the SAPWBD decided to continue the project with state and local funding. Taylor Engineering coordinated hydrographic data collection and reevaluated the selected 2003 alternatives. In 2007, SAPWBD selected an alternative and directed Taylor Engineering to prepare a permit application to dredge a channel in Salt Run. Tasks undertaken in support of the permit application included a natural resources survey of the northern section of Salt Run and the acquisition of archeological, geotechnical, and sediment chemistry data. The information collected led to a new channel design, recalculated dredging volumes, and a revised dredged material management plan for the project. Taylor Engineering coordinated and received state and federal permits for this project and completed final design and engineering.

Construction - 2014

Fee

$968,211

Taylor Engineering led a multidisciplinary team in the design and construction of a replacement for the deteriorating Avenida Menendez seawall, a historic (+160-year-old) coquina block structure protecting the downtown St. Augustine waterfront. The seawall's likely failure threatened Avenida Menendez and adjacent properties. These properties had experienced frequent flooding due to the street's low elevation and the presence of the seawall, which would trap stormwater runoff during periods of heavy rain and extreme tides.

Historic Avenida Menendez seawall (above); new seawall under construction (middle); completed new seawall (below)

Design specifications for the replacement seawall had to address practical considerations such as storm protection, enhanced public access to the waterfront, and improved traffic flow; as well as the preservation of the historic seawall, including Federal Emergency Management Agency, State Historic Preservation Office, and Florida Division of Emergency Management compliance requirements; and aesthetic compatibility with the historic downtown character. The design solution: construct a new seawall waterside of the deteriorating seawall. The new seawall provides better protection to inland areas, enhances public access to the St. Augustine waterfront via a pedestrian promenade and carriage pathway, provides improved parking and traffic flow, and preserves in place the historic structure.

Project tasks included development of design concepts, natural resources survey, environmental assessment and permitting, and final design. Environmental permitting issues included archaeological preservation, natural resource and essential fish habitat impacts and mitigation for environmental impacts. Taylor Engineering provided bidding assistance and construction observation and administration.

Volusia County, Florida

1000-foot straight and dogleg extension alternatives for Ponce de Leon Inlet jetty

Over the past 20 years, Taylor Engineering has provided Volusia County, Florida, with a wide variety of coastal engineering services focusing on the management of the Ponce de Leon Inlet and Volusia County's beaches to the south.

***Beaches*:** In 1999, Taylor Engineering prepared the County's first long-range management plan for the 41 miles of sandy beach in Volusia County. Taylor Engineering next authored a regional beach management feasibility study for the 11-mile beach between Ponce de Leon Inlet and Canaveral National Seashore. We also prepared Volusia County's annual long-range budget request for FDEP grant funding in support of the County's beach and inlet management initiatives. Following the 2004 hurricane season, Taylor Engineering designed, permitted, prepared bid documents, and provided construction observation services for an emergency dune restoration project placing 800,000 cubic yards of sand along six miles of eroded beach south of the inlet. Recent projects include siting, design, and permitting of a number of artificial reef sites within state waters; improvements to vehicular access points for beach driving; and support for periodic maintenance dredging of the federal channels at the inlet and the Intracoastal Waterway.

Inlet: In 1994, Taylor Engineering prepared the Ponce de Leon Inlet Management Plan, one of the first inlet management plans adopted by the Florida Department of Environmental Protection (FDEP). Taylor Engineering numerically modeled inlet hydrodynamics, sediment transport, and shoreline changes to evaluate the effects of various alternatives on inlet hydraulics and shoaling, ocean, and inlet interior shorelines. Final recommendations included a 1,000-foot south jetty seaward extension and a 2,350-foot north jetty landward extension. Taylor Engineering also conducted a study to quantify the benefits of jetty improvements on inlet maintenance dredging and north jetty maintenance requirements. The U.S. Army Corps of Engineers (USACE) constructed the north jetty extension between 2000 and 2002.

Tab 3. References

Joe Nolin, Project Manager
Ponce de Leon Inlet & Port District
Volusia County
700 Catalina Drive
Suite 300
Daytona Beach, FL 32114
(904) 248-8072
jnolin@co.volusia.fl.us
As Volusia County's project manager for Taylor Engineering's continuing services contract, Mr. Nolin can attest to Taylor Engineering's ongoing services on 34 task orders since 1994. Please see project #14 at Tab 2 of this proposal for detailed information.

Ralph Brown, P.E., Project Manager
St. Johns River Water Management District (SJRWMD)
525 Community College Parkway, S.E.
Palm Bay, Florida 32909
(321) 676-6610
As the project manager for SJRWMD, Mr. Brown can attest to Taylor Engineering's expertise and responsiveness with ongoing work and on seven task orders since 2013 on the Eau Gallie River and Elbow Creek Restoration dredging project. Please see project #2 at Tab 2 of this proposal for more detailed information.

Ken Rearden
(formerly with the City of West Palm Beach)
Director of Public Works and Engineering
Hall County, Georgia
PO Drawer 1435
Gainesville, GA 30503
(770) 531-6800
As West Palm Beach's project manager on the Waterfront Commons redevelopment project, Mr. Reardon can attest to Taylor Engineering's services from April 2005 to June 2009. Please see project #4 at Tab 2 of this proposal for more detailed information.

Mark Crosley, Executive Director
Florida Inland Navigation District (FIND)
1314 Marcinski Road
Jupiter, FL 33477
(561) 627-3386
mcrosley@aicw.org
As the current executive director of FIND, Mr. Crosley can attest to Taylor Engineering's breadth and depth of services on a continuing services contract maintained since 1986. Please see project #11 at Tab 2 of this proposal for more detailed information.

Carl Blow, Former Chairman
St. Augustine Port, Waterway, & Beach District (SAPWBD)
P.O. Box 4512
St. Augustine, FL 32085
(904) 710-2655
jcblow@bellsouth.net
Taylor Engineering has maintained a continuing services contract with SAPWBD since 1991. Mr. Blow can attest to Taylor Engineering's services during his tenure, including project #8 at Tab 2 of this proposal.

Dan Bates, Deputy Director
Environmental Resource Management
Palm Beach County
2300 North Jog Road, 4th Floor
West Palm Beach, FL 33411
(561) 233-2445
dbates@co.palm-beach.fl.us
As Palm Beach County's project manager on the Dubois Park waterfront redevelopment project, Mr. Bates can attest to Taylor Engineering's services from April 2005 to January 2010. Please see project #3 at Tab 2 of this proposal for more detailed information.

Tab 4. Other Information

List of Ongoing Projects either in the Design or Construction Phase

The below table reflects ongoing design or construction phase projects within Taylor Engineering's waterfront service group (marine engineering) only. It does not include ongoing projects within the environmental, coastal, or water resources service groups.

Project Name	Client	Project Manager	Start Date	Contract Fee
Drayton Island Ferry Terminal	Putnam County	Michael Whelan, P.E., D.CE	2/25/16	$89,077.50
Intracoastal Waterway Palm Beach Deepening South	Florida Inland Navigation District	Lori Brownell, P.E.	1/12/16	$264,122.30
BV24-A Permitting and Design	Florida Inland Navigation District	Lori Brownell, P.E.	12/2/15	$556,108.90
Okeechobee Waterway Crossroads Sediment Basin	Florida Inland Navigation District	Bill Aley, P.G.	12/2/15	$164,600.06
Fort Gates Ferry Terminal	Putnam County	Michael Whelan, P.E., D.CE	9/23/15	$204,082.00
BV-4B DMMA Permanent Pipeline	Florida Inland Navigation District	Jonathan Armbruster, P.E.	9/21/15	$106,353.00
Broward Deepening Construction Admin.	Florida Inland Navigation District	Lori Brownell, P.E.	9/10/15	$603,245.00
Nassau Reach I	Florida Inland Navigation District	Bill Aley, P.G.	8/17/15	$171,189.12
Ted Sperling Park Boardwalks	Sarasota County	Jenna Phillips, E.I.	8/13/15	$93,749.00
Sykes Creek DMMA	Brevard County	Jonathan Armbruster, P.E.	8/10/15	$123,093.00
Naples Bay Oyster Bed Restoration	Scheda Ecological Associates	Jenna Phillips, E.I.	7/7/15	$92,719.00
North 2nd Street Limited Construction Admin.	Port of Fort Pierce	Michael Whelan, P.E., D.CE	2/5/15	$149,740.00
Manatee Barrier Lifting Mechanism	A.D.A.	Keith Knight, P.E.	6/18/15	$66,819.53
Eagle LNG Terminal	Ferus/Eagle LNG	Jonathan Armbruster, P.E.	12/19/14	$419,055.00
Leesburg Seaplane Ramp and Floating Dock	AVCON	Robert DiRienzo, E.I.	11/5/14	$56,102.60
Eau Gallie and Elbow Creek Restoration Dredging	St. Johns River Water Management District	Jonathan Armbruster, P.E.	3/29/13	$1,506,404.07

Addendums

Executed addendum acknowledgements are located at the end of this tab.

Financial Responsibility

We believe that financial responsibility refers to a comprehensive, accountable, sustainable, and transparent approach to managing finances and risk while supporting the best interests of employees and clients and giving back to the community. Led by our Vice President of Finance, a certified public accountant, and examined by both an external accounting firm as advisor to our Board of Directors and a business valuation firm, our accounting practices adhere to generally accepted accounting principles. Taylor Engineering practices sound financial judgment (for more than 30 years) and consistently realizes a modest profit each year.

Taylor Engineering (Dun & Bradstreet [D&B] number 18-156-1168) possesses a D&B rating of 3A2, which indicates a net worth of between $1 million and $10 million and a “good” credit appraisal.

With this submittal, Taylor Engineering certifies that it is financially stable and commits to provide the necessary resources — human and financial— to provide the services required by the City of New Smyrna Beach. Further, we provide data below (balance sheet, income statement, and statement of cash flows) for 2013–2015 that documents our financial stability.

Taylor Engineering, Inc.

THE CITY OF NEW SMYRNA BEACH - DEVELOPMENTAL SERVICES

CONSIDER THE APPROVAL OF CONTRACT RENEWALS FOR PROFESSIONAL ENGINEERING SERVICES.

May 27, 2025

Background:

The City entered into agreements for Professional Engineering Services with seven Consulting firms in mid-July 2017 and early August 2017: CPH, DRMP, Mead & Hunt, Parker Mynchenberg & Associates, Pegasus Engineering, S&ME and Tetra Tech. These seven firms were selected in response to Request for Proposals #12-17-ENG.

The agreements with each firm were for a term of five years, with the option for up to five possible one-year renewals based on satisfactory performance. The one-year renewal contracts are set to expire at the beginning of July 2025. Six firms have successfully performed professional Engineering Services for the City over the past five years, and three of the six firms have current assignments that are expected to continue into 2026. S&ME Agreement has not been renewed because it did not meet satisfactory performance. If approved, this renewal would be the fourth of five optional one-year renewals.

Findings:

Staff recommends the City Commission approve one-year contract renewals with CPH, DRMP, Mead & Hunt, Parker Mynchenberg & Associates, Pegasus Engineering and Tetra Tech.

Fiscal Analysis:

Each work order is dependent upon the requested services and will be charged based on the fee structure provided by each firm in their proposal. The funding for the consultants is budgeted under other professional services line # 001.51.515.51501.551001.

Strategic Plan Item:
No

Staff Report Created By: Stephanie Ferrara - Development Services Coordinator

REQUEST FOR QUALIFICATIONS

The City of New Smyrna Beach is accepting sealed qualifications for **RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES.** All Requests for Qualifications must be received at City Hall, 210 Sams Avenue, New Smyrna Beach, Florida, 32168 no later than 3:00 pm Tuesday, May 9, 2017, at which time all RFQs will be publicly opened and the name of each proposer or Professional Consultant shall be read aloud, per Florida Statute 119.071(1)(b)(3).

Sealed qualifications received after the designated time will be returned unopened.

There will be no pre-qualification meeting for this RFQ.

Qualification documents are available electronically. For further information, please contact Purchasing Coordinator via email at purchasing.coordinator@cityofnsb.com.

All questions must be sent by e-mail to purchasing.coordinator@cityofnsb.com. Only written responses to written questions will be considered official, and will be included as part of the RFQ as an addendum.

RFQ documents shall be sealed in an envelope and plainly marked, **"RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES."**

The City reserves the right to accept or reject any or all RFQ proposals (in whole or in part) with or without cause, to waive technicalities, irregularities or informalities, or to accept an RFQ which in its judgment best serves the City. Criteria utilized by the City for determining the most responsible qualifier(s) includes, but is not limited to, whether the qualifier meets the City's published specifications; the qualifier's experience, skill, ability, financial capacity; and any other factors which could reasonably be asserted as being relevant to successful performance.

REQUEST FOR QUALIFICATIONS
RFQ 12-17-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES

1. INTRODUCTION/OVERVIEW

1.1 Purpose/Objective

Pursuant to the Consultants Competitive Negotiation Act (CCNA) 287.055, the City of New Smyrna Beach (herein after, "City") has issued this Request for Qualifications (hereinafter, "RFQ") with the sole purpose and intent of obtaining qualifications from interested and qualified firms, licensed to do business in the State of Florida, offering to provide Continuing Professional Engineering Services, in accordance with the specifications stated and/or attached herein/hereto. The successful proposer(s) will hereinafter be referred to as "Professional Consultant".

If awarded, a contract to provide these services shall be effective on the date it is approved by the City of New Smyrna Beach, City Commission (herein after, the "Commission"), signed by all required parties and filed with the City Clerk. The term of the contract shall be for five (5) years, unless terminated earlier, as provided herein. At the option of the parties, this Agreement may be renewed for five (5) additional one (1) year terms.

As is more fully explained in Section "5" of this RFQ (Instructions for Statement of Qualifications), an award, if made, will be made to the best overall Professional Consultant(s) whose qualifications proposal is most advantageous to the City, taking into consideration the evaluation factors set forth in this RFQ. The City will not use any other factors or criteria in the evaluation of the qualifications received.

1.2 Background

New Smyrna Beach is approximately 38 square miles in size and serves a population of approximately 23,000. The City's fiscal year begins on October 1st and ends on September 30th. The Finance Department maintains the funds and accounts of the City. The Finance Department is responsible for the custody and accounting of funds of each department. The Comprehensive Annual Financial Report for City of New Smyrna Beach for the Fiscal Year ended September 30, 2016 can be found on the City's website, http://www.cityofnsb.com.

The City was created in 1887 by adoption of its first charter, which was eventually replaced by the present charter through Chapter 224.08, Special Acts of Florida, 1943. The legislative branch of the City is composed of an elected five-member City Commission consisting of the Mayor and four commissioners. The City Commission is governed by the City Charter and by state and local laws and regulations. In addition, the City includes as a part of the annual financial report the fiscal information of the City of New Smyrna Beach Utilities Commission, a component unit of the City, which has been discretely reported in accordance with the financial statement presentation

Standards No. 39 “Determining Whether Certain Organizations Are Component Units – an amendment of GASB Statement No. 14”.

The City of New Smyrna Beach operates under a Commission-Manager form of government and provides a full range of municipal services including: general government administration, law enforcement and fire protection, community redevelopment, stormwater management, sanitation and solid waste, as well as construction and maintenance of infrastructure, recreational, and other cultural facilities. The City also operates a municipal airport, golf course, and marina.

1.3 Inquiries

Direct questions related to this RFQ to the Purchasing Coordinator, in writing to purchasing.coordinator@cityofnsb.com. Please include the heading and paragraph letter or number for each question in order to ensure that questions asked are responded to correctly.

Professional Consultants must clearly understand that the only official answer or position of the City will be the one stated in writing by purchasing.coordinator@cityofnsb.com. All questions must be submitted in writing, and will be posted, along with the answers, as an addendum to this solicitation, and electronically distributed to firms registered for this solicitation and posted on Onvia DemandStar.

1.4 Method of Source Selection

The City of New Smyrna Beach is using the Competitive Sealed Qualifications methodology of source selection for this procurement, as authorized by the City Purchasing Policy.

The City may, as it deems necessary, conduct discussions with responsible Professional Consultants determined to be in contention for being selected for award for the purpose of clarification to assure full understanding of, and responsiveness to solicitation requirements.

1.5 Pre-Proposal Conference

☒ A pre-proposal conference is not applicable for this solicitation.

1.6 Schedule of Events

The following projected schedule of events should be used as a working guide for planning purposes only. The City reserves the right to adjust this timetable as required during the course of the RFQ process.

Event	Date
Issue RFQ Notice	Friday, April 7, 2017
Deadline for Written Questions	Tuesday, April 18, 2017 @ 5:00 pm
Addendum Issued (If Applicable)	Thursday, April 20, 2017
Qualifications Opening Date	Tuesday, May 9, 2017 @ 3:00 pm
Evaluation of Qualification Submittals	Thursday, May 18, 2017
Notification of Recommendation	Tuesday, May 22, 2017
Commission Action	Tuesday, June 13, 2017

2) GENERAL REQUIREMENTS

The objective of this solicitation is to obtain the services of consultants with the capability to provide professional engineering services. The selected firm(s) will be responsible for developing a complete set of site plans including paving, grading, utilities, landscaping and stormwater elements necessary to be compliant with the City's Land Development Regulations as well as complying with other agency guidelines. This may require drainage calculations, utility hydraulic calculations, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses. The Consultant will be familiar with other permitting agencies and have professional staff to attain permits in a timely manner from organizations such as Florida Department of Environmental Protection, Volusia County Health Department, St. Johns River Water Management District, Volusia County, Army Corps of Engineers, US Fish & Wildlife and the Florida Department of Transportation. This includes supporting documentation from Geotechnical Engineers, Traffic/Transportation Engineers, Biologists, Surveyors and other specialty subconsultants as needed to provide architectural renderings and structure design compliant with the latest edition of the Florida Building Code. The City reserves the right to utilize the firm to provide any facet of the improvement process including design, construction administration, or inspection services only, etc.

2.1 MINIMUM QUALIFICATIONS

- The selected firms shall be registered Engineering firms licensed with the State of Florida. All professional services shall be performed under the direction of a professional registered with the State of Florida with specific experience in the field of Engineering.

- The firm or team shall be licensed with the Florida Department of Business & Professional Regulation to conduct Engineering Services and recognized by the Florida Engineers Management Corporation.

- The selected firms must be able to provide proof of stable financial stability for the past three (3) years;

- Team Project Manager must be licensed in the State of Florida as an

Professional Engineer and have a minimum of ten (10) years of experience in site design, familiarity with EJCDC/AIA documents, and have served as project manager on commercial and municipal projects with varied complexity.

- Team Members and sub-consultants must be licensed in the State of Florida and have a minimum of five (5) years of experience in providing supporting services such as surveying, geotechnical evaluation, archaeological study, environmental assessment, construction management and inspection services.

- Firms shall provide examples of no less than three (3) previous projects showing competence with a variety of designs. This includes such projects as recreational facilities, City complexes (i.e. Public Works, Police Station, Fire Station sites), community centers, gymnasium, streetscapes, roadway/drainage improvement projects and general site improvement projects with the associated design, permitting, and construction management and the ability to meet specific deadlines within the defined budget.

- Firms shall provide no less than three (3) examples of budgets and timelines showing the original budget and timelines and the associated actual budgets and timelines.

All work will normally be performed by the Professional Consultant at an off-site location (not in the City's offices). The Professional Consultant will be required to provide their own equipment.

The City and the firm(s) shall negotiate project terms per Florida Statute 287.055. A purchase order or similar document will be issued for each project. Any professional services not listed below will be for projects that do not exceed $2,000,000 in basic construction costs or $200,000 for professional services pursuant to Florida Statute 287.055.

2.2 Purpose/Intent

The City of New Smyrna Beach (City), pursuant to the "Consultants' Competitive Negotiation Act" (CCNA), Section 287.055, Florida Statutes, which governs the acquisition of professional engineering, landscaping, architectural, and surveying and mapping services, and as may be amended, hereby requests Qualification and Performance Data from Professional Consultants practicing in the following types of work categories: (Firms do not have to have each discipline on staff and may utilize a team approach for general and specific projects. The licensed Professional Consultant shall be an employee of the prime firm.)

1. Able to provide conceptual layout with innovative designs and cost saving measures.

2. Development of scopes of work, including but not limited to demolition, new construction, retrofit projects & site development (i.e. landscaping, sidewalks, stormwater treatment).

3. Familiar with a variety of agency permitting requirements including FDOT, ACOE, Volusia County, County Department of Health, FDEP, US Fish & Wildlife, and SJRWMD.

4. Other as required

2.3 Instructions

Firms and individuals (hereinafter "Professional Consultant") shall be duly licensed and registered to practice in the State of Florida, and desire to render such services to the City. This work may include design, permitting, bidding services, construction administration, and all related miscellaneous services.

Florida law requires the City to make a determination of a consultant's qualification to perform professional Engineering services. The information in the RFQ (qualification package) will be used by the City to make this determination. Additionally, evaluation points will be assigned to information contained in the package to aid in reducing the total number of submittals to no less than three firms (short list).

2.4 Interpretations

Any questions concerning this RFQ should be submitted in writing to: Purchasing Coordinator, City of New Smyrna Beach, 210 Sams Avenue, New Smyrna Beach, FL 32168 or purchasing.coordinator@cityofnsb.com. Responses to inquiries will answered via an Addendum, e-mailed to vendors who have submitted questions, or have contacted the City regarding the solicitation, and posted on Onvia DemandStar. It is the responsibility of the proposer to review responses.

2.5 Clarification and Addenda to RFQ Specifications

If any Professional Consultant contemplating submitting a response under this Request for Qualifications RFQ 12-17-ENG is in doubt as to the true meaning of the specifications or other documents or any part thereof, the Professional Consultant shall submit to the City, prior to the deadline for questions, Tuesday, April 18, 2017 at 5:00 PM EST, a request for clarification. All such requests for clarification must be made in writing, and the person submitting the request will be responsible for its timely delivery. All responses will be issued as an Addendum, e-mailed to vendors who have submitted requests for clarification, or questions, and posted on Onvia DemandStar, per the timeline listed on this RFQ.

Any interpretation of the RFQ, if made, will be made only by an addendum duly issued by the City. The City shall issue an informational addendum if clarification or minimal changes are required. The City shall issue a formal addendum if there are substantial changes which impact the technical submission of the RFQ. A copy of such addendum will be posted on DemandStar. In the event of conflict with the original RFQ documents, the addendum shall govern all other RFQ and contract documents to the extent specified. Subsequent addenda shall govern over prior addenda only to the extent specified.

2.6 Awards

The City reserves the right to reject any or all responses, or any portion thereof, deemed necessary for the best interest of the City. All awards made as a result of this RFQ shall conform to applicable Florida Statutes. The City is not responsible for any expenses incurred by a Professional Consultant in preparing and submitting an RFQ or related documents.

2.7 RFQ Opening

Responses to this RFQ shall be opened and publically read Tuesday, May 9, 2017 at 3:00 pm at City Hall, 210 Sams Avenue, New Smyrna Beach, FL 32168. All responses received after 3:00 shall be returned, unopened.

3) CITY'S RIGHT TO INSPECT - N/A

4) TERMS AND CONDITIONS OF CONTRACT

The City has developed standard contracts/agreements. The selected Professional Consultant(s) shall be required to sign a standard City contract within twenty-one (21) days of Notice of Selection for Award.

A contract resulting from this RFQ shall be subject to the terms and conditions set forth in a standard City contract. The City reserves the right to include in any contract document such terms and conditions as it deems necessary for the proper protection of the rights of the City. The City shall not be obligated to sign any contracts, maintenance and/or service agreements or other documents supplied by the Professional Consultant.

5) INSTRUCTIONS FOR STATEMENT OF QUALIFICATIONS

5.1 Delivery of Request for Qualifications (RFQ)

To be considered,

- one (1) original, unbound paper version, marked "Original,"
- three (3) copies, marked "Copy 1 of 3, 2 of 3, etc.,"
- one (1) electronic copy of the RFQ proposal on a USB flash drive

must be received by the Purchasing Coordinator in the Finance Department, City of New Smyrna Beach, 210 Sams Ave, New Smyrna Beach, Florida, 32168, on or before **Tuesday, May 9, 2017 at 3:00 pm.**

RFQ responses shall be submitted in sealed envelopes and clearly identified as **" RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINERING SERVICES"** referenced on the outside of the envelope. All RFQ proposals received after the specified time and date will not be accepted. The City shall not be responsible for late deliveries or mail delays. The City of New Smyrna Beach reserves the right to reject any or all RFQ proposals submitted. During the evaluation process, additional

information or clarifications from Professional Consultants may be required. List the RFQ Number on the outside of the box or envelope and note "Request for Qualifications enclosed." See Request for Qualifications Label, in Attachment A.

The City of New Smyrna Beach reserves the right to retain all RFQ proposals submitted regardless of whether that proposal is selected. Submission of a proposal indicates acceptance by the firm of the conditions contained in this request for qualifications, unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of New Smyrna Beach and the firm selected.

There is no expressed or implied obligation for the City of New Smyrna Beach to reimburse responding firms for any expenses incurred in preparing proposals in response to this request.

All Requests for Qualifications are to be delivered before 3:00 p.m., local time, on or before Tuesday, May 9, 2017 to:

City of New Smyrna Beach
Purchasing Coordinator
Finance Department
2nd Floor
210 Sams Avenue
New Smyrna Beach, Florida 32168

The City shall not bear the responsibility for Requests for Qualifications delivered to the Finance Department past the stated date and/or time indicated, or to an incorrect address by Professional Consultant's personnel or by the Professional Consultant's outside carrier. However, the Purchasing Coordinator, or designee, shall reserve the right to accept qualifications received after the posted close time only under the following condition:

The tardy submission of the qualification is due to the following circumstances, which shall include but not be limited to: late delivery by commercial carrier such as Fed Ex, UPS, DHL, or courier where delivery was scheduled before the deadline.

RFQ Opening: RFQ statements shall be opened and the name of the submitters shall be read publically. No discussion of the qualification submittals will occur at this time.

5.2 Response Format

The qualification shall be deemed an offer to provide services to the City. In submitting a qualification, the Professional Consultant declares that he/she understands and agrees to abide by all specifications, provisions, terms and conditions of same, and all ordinances and policies of the City. The Professional Consultant agrees that if the contract is awarded to him/her, he/she will perform the work in accordance with the provisions, terms and conditions of the contract.

To facilitate the fair evaluation and comparison of qualifications, all qualifications must conform to the guidelines set forth in this RFQ.

Any portions of the qualification that do not comply with these guidelines must be so noted and explained in the Acceptance of Conditions section of the qualification. However, any qualification which contains such variances may be considered non-responsive.

Qualifications should be prepared simply and economically, providing a straightforward concise description of the Professional Consultant's approach and ability to meet the City's needs, as stated in the RFQ. All copies of the qualification should be bound and tabbed for uniformity and ease of handling. The utilization of recycled paper for qualification submission is strongly encouraged.

The one (1) hard copy original, three (3) hard copy copies, and one (1) electronic thumb drive copy of RFQ submittal(s) for each professional consultant work-type category shall be secured in a tabbed booklet with a table of contents. Booklets shall be no larger than a 1-1/2" three-ring binder or equivalent and be presented in the following order:

Tab 1: Qualifications of Firm

- Provide evidence of current license and registration to perform the specified services in the State of Florida.
- Provide insurance certifications. Also required is Errors and Omissions or Professional Malpractice Coverage.
- Location of office where majority of work will be performed.
- Provide an overview of the firm, including number of years in business, number of personnel, and other pertinent information, expertise, credentials (resumes or curriculum vitae) and introduction of the proposed team member(s). Please identity the intended Project Manager who would be assigned to perform the specified services for the City, and provide examples of his/her management capabilities.
- Statement of Professional Consultant's commitment/ability to consistently use the same personnel throughout the project.
- Is firm a certified minority business enterprise, as defined by the Florida Small and Minority Business Assistance Act?
- Provide demonstration/summary of Professional Consultant's workload/performance capability to meet budget and time requirements, and ability to perform the work as and when requested by the City.

Tab 2: Experience

- Provide documentation/summary of experience of no less than three (3) previous projects for <u>each</u> of the items below.
    - Site development projects
    - Original budget vs. actual budget
    - Estimated timelines vs. actual timelines

- List of projects and clients where similar work has recently been performed, including a description of each project, with a brief statement of the project approach.
- Summary statement of all citations, violations, and litigation existing or continuing within the last three (3) years, including the disposition or current status of them.

Tab 3: Client References

- Provide a listing of a minimum of five (5) of the company's projects/customers similar in size and scope to the services described in the RFQ, both present and past customers. If applicable, please list examples of services rendered in the State of Florida, particularly within municipalities. This list must include complete and current addresses, contact person(s), e-mail addresses, telephone and fax numbers, and length of contract.

Tab 4: Other

- Firm may provide other qualifications/performance data for consideration.
- List of ongoing projects either in the design or construction phase.

Each RFQ package submitted shall be signed by the individual Professional Consultant or his/her authorized principals of the Professional Consultant's firm if other than an individual. The RFQ submittal shall be signed by a representative who is authorized to contractually bind the qualifier.

All attachments to the Request for Qualifications and Performance Data requiring execution by the Consultant must be executed and returned with the submittal.

All RFQ submittals must be delivered as specified. Any attachments must be clearly identified as per "Tab Format" requirements. To be considered, the Professional Consultant must respond to all parts of the RFQ. Any other information thought to be relevant, but not applicable to the enumerated categories, should be provided as an appendix to the RFQ submittal. If publications are supplied by the Professional Consultant to respond to a requirement, the response should include reference to the document number and page number. This will provide quick reference for the evaluation committee. RFQ submittals not providing this reference will be considered to have no reference material included in the additional documents.

Sub consultants (if applicable) licenses and detailed information are not required at the time of this RFQ, however, will be required prior to them working on any specific project for the City.

5.3 Evaluation of Requests for Qualifications

After qualifications opening has been completed, the Evaluation Committee shall review and score each Qualification individually, based on the evaluation criterion set forth in this proposal.

The committee may schedule presentations or demonstrations from top-ranked firm(s) and obtain guidance from third party subject matter experts. The final recommendation will be decided based on review of scores and consensus of the committee.

The City reserves the right to withdraw this RFQ at any time and for any reason, and to issue such clarifications, modifications, and/or amendments as it may deem appropriate.

Receipt of a qualification by the City or a submission of a proposal to the City offers no rights upon the Professional Consultant nor obligates the City in any manner. Acceptance of the qualification does not guarantee issuance of any other governmental approvals.

Technical Evaluation Criteria:

The Evaluation Committee will first evaluate and rank responsive proposals on the criteria listed below. The criteria are itemized with their respective weights for a maximum total of 100 points. A list of a minimum of three (3) firms will be developed and advanced to the City Commission. A proposer may receive the maximum points or a portion of this score, depending upon the merit of its proposal, as evaluated by the committee, in accordance with the following.

Qualifications of the: • Firm • Principal Engineer • Design/Project Engineer • CAD staff • Administrative Support Staff	**40**
Experience: Provide examples of no less than three (3) previous projects working with: • Site development projects • Original budget vs. actual budget • Estimated timelines vs. actual timelines • Engineer/Firms management capabilities • Parks, Stormwater Retrofit projects, Roadway Paving, Utility enhancements, Streetscapes	**40**
References: • Recent experience in similar work Verification and reference responses	**20**
Grand Total	**100**

5.4 Compliance with the RFQ

Qualifications must be in strict compliance with this RFQ. Failure to comply with all provisions of the RFQ may result in disqualification.

5.5 Ambiguity, Conflict, or Other Errors in the RFQ

If a Professional Consultant discovers any ambiguity, conflict, discrepancy, omission, or other error in the RFQ, Professional Consultant shall immediately notify the Purchasing Coordinator, noted herein, of such error in writing and request modification or clarification of the document. The Purchasing Coordinator will make modifications by issuing a written revision, posting the revision on Onvia/DemandStar, and providing written notice to all parties who have received this RFQ from the Finance Department. No interpretation shall be considered binding unless provided in writing by the City of New Smyrna Beach.

The Professional Consultant is responsible for clarifying any ambiguity, conflict, discrepancy, omission, or other error in the RFQ prior to submitting the qualification or it shall be waived.

5.6 Acceptance or Rejection of Requests for Qualification

The right is reserved by the City to waive any irregularities in any qualification, to reject any or all qualifications, to re-solicit for qualifications, if desired, and upon recommendation and justification by the City to accept the qualification which in the judgment of the City is deemed the most advantageous for the public and the City.

Any qualification which is incomplete, conditional, obscure, or which contains irregularities of any kind, may be cause for rejection. In the event of default of the successful Professional Consultant, or their refusal to enter into the City contract, the City reserves the right to accept the qualification of any other Professional Consultant or to re-advertise using the same or revised documentation, at its sole discretion.

5.7 Validity of Qualifications

No qualification can be withdrawn after it is filed, unless the Professional Consultant makes their request in writing to the City prior to the time set for the closing of Qualifications.

All qualifications shall be valid for a period of one hundred eighty (180) days from the submission date to accommodate evaluation and selection process.

5.8 Requests for Clarification of Qualifications

Requests by the Purchasing Coordinator to a Professional Consultant(s) for clarification of qualification(s) shall be in writing. Professional Consultant’s failure to respond to request for clarification may deem Professional Consultant to be non-responsive, and may be just cause to reject its qualification.

5.9 Acknowledgment of Insurance Requirements

By signing the Insurance Requirements included in this RFQ, Professional Consultant acknowledges these conditions include Insurance Requirements.

It should be noted by the Professional Consultant that, in order to meet the City's requirements, there may be additional insurance costs to the Professional Consultant's firm. It is, therefore, imperative that the Professional Consultant discuss these requirements with the Professional Consultant's insurance agent, as noted on the Insurance Check List, so that allowances for any additional costs can be made by the Professional Consultant.

The Professional Consultant's obligation under this provision shall not be limited in any way by the agreed upon contract price, or the Professional Consultant's limit of, or lack of, sufficient insurance protection.

Professional Consultant also understands that the evidence of required insurance may be required within five (5) business days following notification of its offer being accepted; otherwise, the City may rescind its acceptance of the Professional Consultant's qualification.

The specific insurance requirements for this solicitation are included as part of this solicitation.

5.10 Acknowledgment of Bonding Requirements

By signing its Proposal, and if applicable, Professional Consultant acknowledges that it has read and understands the bonding requirements for this qualification. Requirements for this solicitation are checked.

☒ Not Applicable

5.11 Qualification, Presentation, and Protest Costs

The City will not be liable in any way for any costs incurred by any Professional Consultant in the preparation of its qualification in response to this RFQ, nor for the presentation of its qualification and/or participation in any discussions, negotiations, or, if applicable, any protest procedures.

6) GENERAL TERMS AND CONDITIONS

6.1 Licenses

The Professional Consultant is required to possess the correct occupational license, professional license, and any other authorizations necessary to carry out and perform the work required by the project pursuant to all applicable Federal, State and Local Law, Statute, Ordinances, and rules and regulations of any kind. If required and/or requested, copies of the required licenses must be submitted with the qualification response indicating that the entity proposing, as well as the team assigned to the City account, are properly licensed to perform the activities or work included in the contract documents. A Professional Consultant, with an office within the City is also required to have a business tax receipt and certificate of use.

6.2 Principals/Collusion

By submission of this Qualification, the undersigned, as Proposer, does declare that the only person or persons interested in this Qualification as principal or principals is/are named therein and that no person other than therein mentioned has any interest in this Qualification or in the contract to be entered into; that this Qualification is made without connection with any person, company or parties making a Qualification, and that it is in all respects fair and in good faith without collusion or fraud.

6.3Taxes

The City is exempt from Federal Excise and State of Florida Sales Tax.

6.4 Relation of City

It is the intent of the parties hereto that the Professional Consultant shall be legally considered an independent Professional Consultant, and that neither the Professional Consultant nor their employees shall, under any circumstances, be considered employees or agents of the City, and that the City shall be at no time legally responsible for any negligence on the part of said Professional Consultant, their employees or agents, resulting in either bodily or personal injury or property damage to any individual, firm, or corporation.

6.5 Term Contracts

If funds are not appropriated for continuance of a term contract to completion, cancellation will be accepted by this Professional Consultant on thirty (30) days prior written notice.

6.6 Termination

Should the Professional Consultant be found to have failed to perform his services in a manner satisfactory to the City, the City may terminate this Agreement immediately for cause; further the City may terminate this Agreement for convenience with a thirty (30) day written notice. The City shall be sole judge of non-performance.

6.7 Liability

Neither party will be held responsible for failure to complete contract due to causes beyond its control, including, but not limited to, work stoppage, fires, civil disobedience, riots, rebellions, Acts of Nature and similar occurrences making performance impossible or illegal.

The Professional Consultant shall hold and save the City of New Smyrna Beach, its officers, agents, and employees harmless against claims by third parties resulting from the Professional Consultant’s or suppliers breach of contract or negligence, including all attorney’s fees and costs, and shall pay any and all damages, fees, and

costs assessed on behalf of the City. The City expressly reserves all rights, privileges, and benefits of sovereign immunity.

6.8 Assignment

The Professional Consultant(s) shall not assign, transfer, convey, sublet or otherwise dispose of this contract, or of any or all of its rights, or interest therein, or his or its power to execute such contract to any person, company or corporation without prior written consent of the City.

6.9 Lobbying

All firms are hereby placed on **NOTICE** that the City does not wish to be lobbied, either individually or collectively about a matter for which a firm has submitted a Qualification.

During the qualification process, **from Qualification announcement to final Commission approval**, no firm or its agent shall contact any other employee of the City in reference to this Qualification, with the exception of the Purchasing Coordinator. Failure to abide by this provision may serve as grounds for disqualification for award of this contract to the firm.

6.10 Single Qualification

Each Professional Consultant must submit, with their qualification, the required forms included in this RFQ. Only **one** qualification from a legal entity as a primary will be considered. A legal entity that submits a qualification as a primary or as part of a partnership or joint venture submitting as primary may not then act as a sub-consultant to any other firm submitting under the same RFQ.

All submittals in violation of this requirement will be deemed non-responsive and rejected from further consideration.

6.11 Public Entity Crime

A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit qualifications, or contract to provide any goods or services to a public entity; may not submit a bid, bid, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, bids, or replies on leases of real property to a public entity; may not be awarded or perform work as a Professional Consultant, supplier, sub Professional Consultant, or consultant under a contract with any public entity; and may not transact business with any public entity for a period of 36 months following the date of being placed on the convicted vendor list.

6.12 Conflict of Interest

Professional Consultant shall complete the Conflict of Interest Affidavit included as an attachment to this RFQ document. Disclosure of any potential or actual conflict of

interest is subject to City staff review and does not in and of itself disqualify a firm from consideration.

These disclosures are intended to identify and or preclude conflict of interest situations during contract selection and execution.

6.13 Prohibition of Gifts to City Employees

No organization or individual shall offer or give, either directly or indirectly, any favor, gift, loan, fee, service or other item of value to any City employee, as set forth in Chapter 112, Part III, Florida Statutes, the current City Ethics Ordinance, and City Administrative Policy. Violation of this provision may result in one or more of the following consequences: a. Prohibition by the individual, firm, and/or any employee of the firm from contact with City staff for a specified period of time; b. Prohibition by the individual and/or firm from doing business with the City for a specified period of time, including but not limited to: submitting bids, RFQ, and/or quotes; and, c. immediate termination of any contract held by the individual and/or firm for cause.

6.14 Immigration Reform and Control Act

Professional Consultant acknowledges, and without exception or stipulation, any firm(s) receiving an award shall be fully responsible for complying with the provisions of the Immigration Reform and Control Act of 1986 as located at 8 U.S.C. 1324, et seq. and regulations relating thereto, as either may be amended. Failure by the awarded firm(s) to comply with the laws referenced herein shall constitute a breach of the award agreement and the City shall have the discretion to unilaterally terminate said agreement immediately.

6.15 Florida Public Records Act

All material submitted regarding this RFQ becomes the property of the City. RFQ documents may be reviewed by any person ten (10) days after the public opening. The Professional Consultant should take special note of this as it relates to any proprietary information that might be included in its offer.

Any resulting contract may be reviewed by any person after the contract has been executed by the City. The City has the right to use any or all information/material submitted in response to this RFQ and/or any resulting contract from same. Disqualification of a Professional Consultant does not eliminate this right. This section is further subject to F.S. 119.01 et. seq.

SWORN STATEMENT UNDER SECTION 287.133(3) (1) FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for_____.

This sworn statement is submitted by_____

[Name of entity submitting sworn statement]

whose business address is: _____and (if applicable) its Federal Employer Identification Number (FEIN) is _____. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: _____. My name is _____and my relationship to the entity named above is_____.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

____ Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 10th day of July, 2017, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and **CPH, Inc.**, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 12-17-ENG, Continuing Professional Engineering Services, and is for one (1) of the seven (7) awarded firms. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services including design services associated with general Civil Engineering practices to include but not limited to developing a complete set of site plans involving paving, grading, utilities, landscaping and stormwater elements, in compliance with the City's Land Development Regulations, as well as state and federal agency guidelines. Such services may require drainage calculations, utility hydraulic calculations, fire flow calculations, stormwater modeling, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses.

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for professional Civil Engineering services and/or other such services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or

supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT

shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed

by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making

all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents. (f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times,

the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access

to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Volusia County, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in

accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal

certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or

responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by

the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

Re: RFQ 12-17-ENG, Continuing Professional Engineering Services

Dear Selection Committee Members:

CPH, Inc. (CPH) is pleased to provide our qualifications and team for the contract identified above. CPH has been established as a Florida corporation since 1981, and has been providing engineering services in Florida dating back to the 1960's through a predecessor firm. The firm's primary services include engineering, surveying, environmental science, landscape architecture, architecture, and construction management. CPH has successfully provided these services to numerous municipal clients in and around the area. CPH has maintained a local office in Sanford since 1981, and has provided engineering services on numerous projects within the City of New Smyrna Beach area, and over 500 projects in the surrounding area. Our Sanford office is located less than 35 miles from the County's offices, enabling CPH to meet onsite or at the City in 45 minutes or less.

CPH has the unique qualifications to include in-house contractors, surveyors, and environmental scientists. CPH has the experience and the qualified personnel available to work on these projects for the City. We are in the best position to accomplish the design, permitting, and construction in the shortest time and most cost-effective manner possible so that projects are brought online as soon as possible.

The City of New Smyrna Beach is a very important client to us and we are committed to accomplishing the City's work in a timely, efficient, and professional manner. CPH has provided services to many municipalities within Florida for over 36 years. Projects for these clients have included new facilities, renovations, repairs, and expansions. CPH has assembled a diverse and highly trained group of professionals with experience in all discipline areas requested by the City. Our team is capable of providing services in every aspect that may emerge under this contract. Further, CPH has extensive experience in obtaining financial assistance for projects from traditional sources, such as loans, grants, or federal/state appropriations, but also has the know-how for using the P3 (Public Private Partnership) platform to bring projects to fruition. We also have the relationships necessary to facilitate getting exciting projects in front of decision makers that control the purse strings at state and federal levels. Recently, CPH has won competitive EECBG grants, assisted in the award of SRF loans, and prepared/administered ARRA, FDEP Section 319, CDBG, and Water Management District/DEP grants.

For more than three decades, we have been creating sustainable places to live, work, learn and play. Our portfolio of completed projects, has given us the insight and expertise that will allow us to successfully complete projects for The City of New Smyrna Beach. CPH's team has a high percentage of implementation as it relates to the master plans and concepts that have been imagined by our creative team. We understand how important it is to create a space that functions not only now, but for the long term. As a qualified full-service architectural and engineering firm, CPH has the staff, capacity, and experience to provide successful projects to the City. Our team is dedicated to providing quality design solutions, and has provided services for over 60 different fire, police, health, historic renovation, parks, and public safety projects. CPH is a registered member of the Florida Green Building Coalition, US Green Building Council (USGBC), and Green Globes Professionals. The team is dedicated to providing economical designs that are safe, reliable, and sustainable.

CPH is an excellent partner for the City of New Smyrna Beach because CPH has:

- **A strong list of experienced local resources.** CPH maintains a qualified full time staff in the Sanford office and we have the ability to supplement our services from our 240+ staff members in Florida.

- **Employee Owned Florida Based Corporation** – Our employees have a stake in the successful execution of all projects. Members of our proposed team are owners of the company; and therefore will ensure all projects are completed on or ahead of schedule, exceeding the County's expectations.

- **Knowledge of local issues.** The team is comprised of staff members that live and work in the area and have worked on projects in and around the City of New Smyrna Beach.

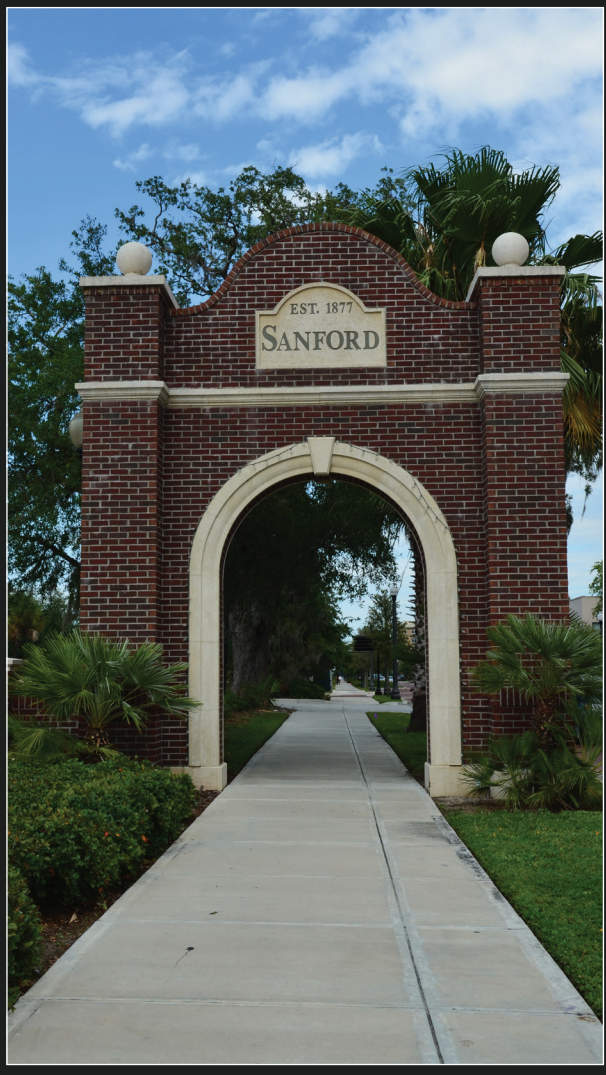
- **Qualified construction staff.** CPH has specialized teams that have worked on numerous architecture and roadway projects together, and have a long list of satisfied clients.

- **Commitment.** CPH is the eleventh largest engineering firm in Central Florida and in the top 500 in the nation. We have achieved this by completing quality projects and providing clients with a commitment of satisfaction as a direct result of the participation of the owners of the firm.

- **Strong Project Leadership and Execution Team Provides Cost Effective Solutions** – We are cost conscious and time sensitive with a proven track record of delivering projects on time and within budget.

We appreciate the opportunity to submit our qualifications and look forward to continuing our successful working relationship with the City of New Smyrna Beach.

Sincerely,
CPH, Inc.



David A. Gierach, P.E., CGC / President

OVERVIEW OF THE FIRM

CPH HAS BEEN PROVIDING SERVICES IN THE AREA SINCE THE 1960'S AND HAS BEEN ESTABLISHED SINCE 1981 AS A PRIVATELY-OWNED FLORIDA CORPORATION.

CPH is extremely well qualified to provide services to the City of New Smyrna Beach. We have been working with the City of New Smyrna Beach on the development of projects since 2014. CPH has eleven (11) offices throughout the State of Florida and the team has provided services for numerous similar size Clients under Continuing Contracts. As a result the team understands the need to provide quality responsive services and is staffed to provide services for planned tasks as well as un-planned emergencies. The CPH team is a clear choice for the City and will bring the same level of quality and professionalism as we have provided to other clients to the Professional Engineering Services Contract.

CPH has been serving the needs of numerous Florida communities since the 1960's, and has been established since 1981 as a privately-owned Florida Corporation. CPH has nearly a half a century of experience in providing these services to municipal and other public sector clients, all within the State of Florida. CPH has cooperatively worked with user groups and other parties to deliver successful projects that serve the clients' and community needs. The CPH Team has completed numerous relevant projects in Florida and can provide literally any discipline required for the "Professional Engineering Services."

The CPH Team provides the following services for our clients' benefit:

- Architecture and Interior Design
- Traffic Planning and Engineering
- Transportation Planning and Design
- Streetscape/Hardscape Design
- Urban Design and Planning
- Landscape Architecture
- Stormwater Planning and Design
- Permitting
- Cost Estimation
- Value Engineering
- Graphic Design
- Surveying and Mapping/G.I.S.
- Public Relations
- Sustainability Design/Planning
- Grant/Alternative Funding
- Utility Planning and Design
- Construction Management/ Administration

WHY CHOOSE US?

- 240+ STAFF AVAILABLE
- SERVING THE CITY SINCE 2014
- 21 YEARS IN VOLUSIA COUNTY
- 50 PROJECTS COMPLETED THROUGHOUT THE CITY

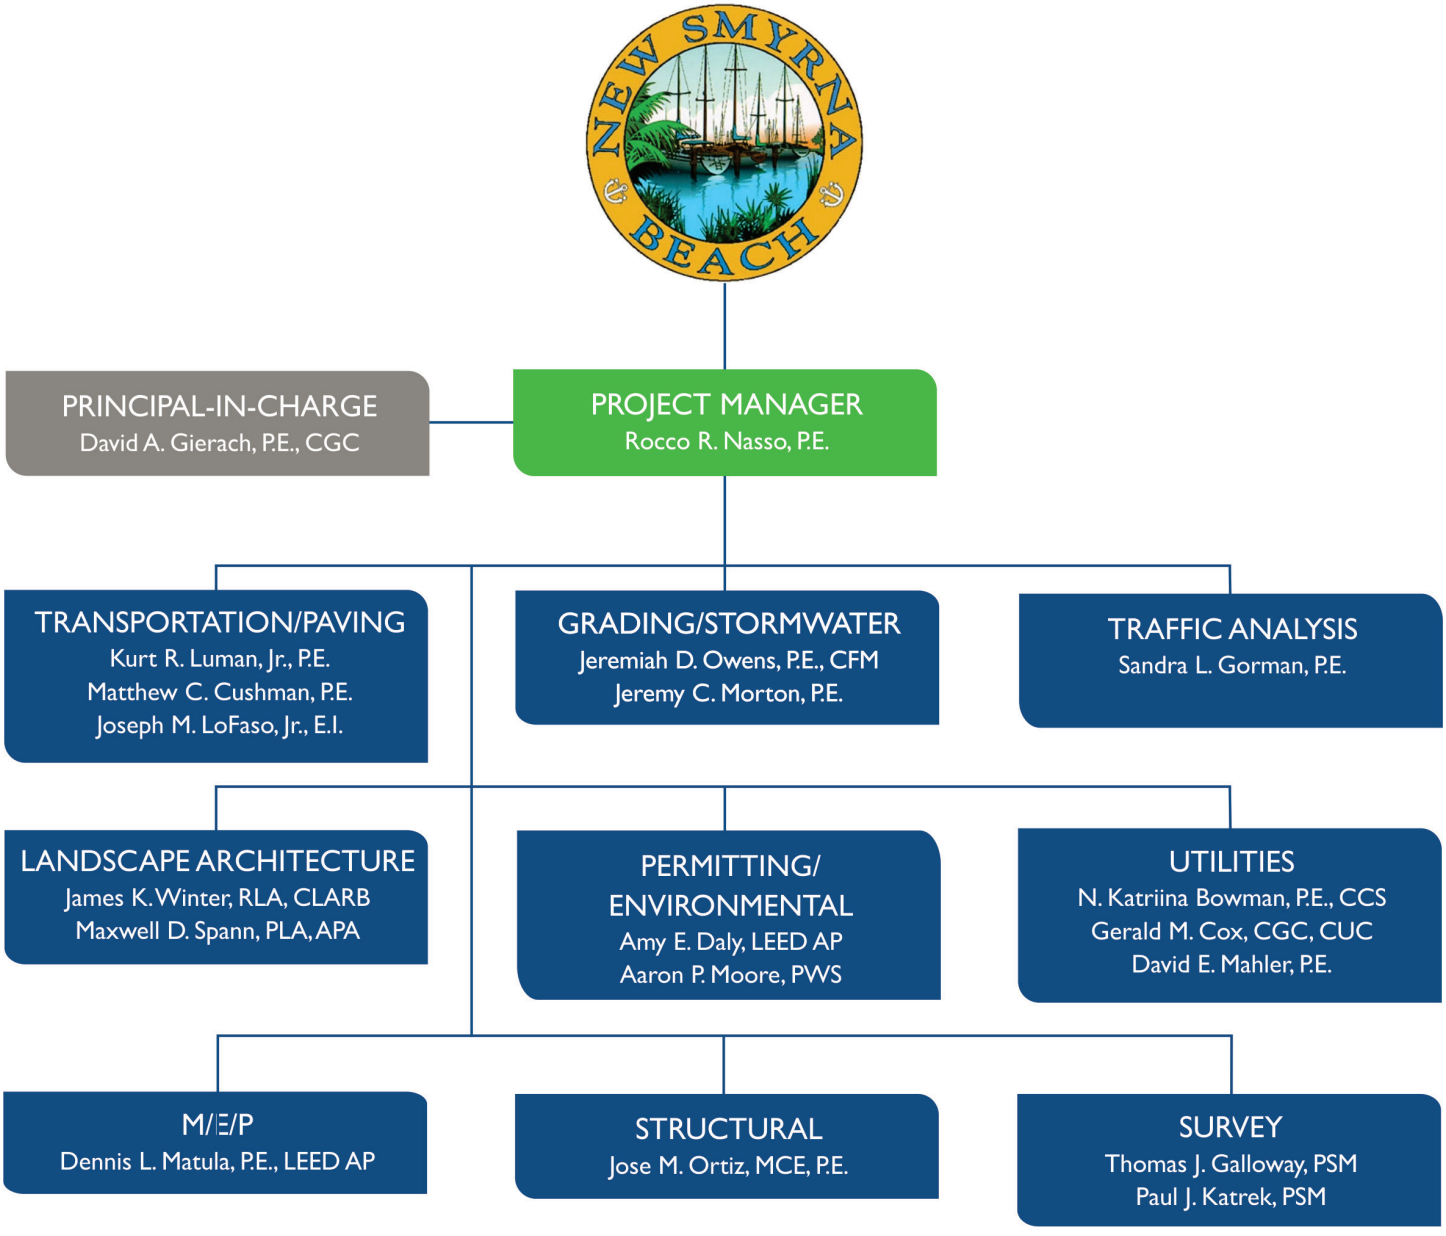
CPH OFFICE LOCATIONS



OFFICE LOCATION	APPROXIMATE DISTANCE FROM CITY OFFICES
CPH Sanford	**32.1 Miles**
CPH DeLand	24.5 Miles

CPH has eleven (11) offices in the State of Florida with support of approximately 240 personnel throughout the company to assist in the projects for the City of New Smyrna Beach. **The City will have the direct commitment of the CPH Sanford office located at 500 W. Fulton Street, Sanford, FL 32771 and the CPH DeLand office located at 101 N. Woodland Blvd., Suite 305, DeLand, FL 32720**. The Sanford and DeLand offices are staffed with employees that include registered personnel, administrative staff, and owners of the firm to accomplish the projects on time and within budget.

ORGANIZATIONAL CHART

CPH has assembled a vastly diverse and highly qualified team with experience in all discipline areas of engineering requested by the City of New Smyrna Beach. Our team is capable of providing services for every project that will emerge under this contract. The CPH Team Organizational Chart (provided below) depicts the overall reporting and communication hierarchy as well as project roles and responsibilities in relation to the City's scope of services for the "Professional Engineering Services" contract.

The CPH team is made up of many long term staff members, with many of the proposed staff members working together at CPH for over 15 years. This longevity and our 35+ year history gives us the capability to maintain staff consistently throughout the life of any project assigned by the City of New Smyrna Beach. In additions, many of our staff are long-term residents of the City and Volusia County. Our team members have a vested interest in providing cost effective services that meet and exceed the City's needs.

David A. Gierach, P.E., CGC

Principal-in-Charge

32 Total Years of Experience • 28 Years with CPH

Experience

Mr. Gierach serves CPH as President and has over 32 years of experience in engineering and construction for projects that include trails, parks, roadways, treatment facilities, pump/lift stations, drainage, pipelines, and vertical construction projects. He has managed the planning, design, permitting, and construction of projects that range from $1 Million to projects over $200 Million in value. Mr. Gierach has provided services to clients including the Cities of Palm Coast, Sanford, Lake Mary, Casselberry, Winter Springs, Orlando, the U.S. Navy and Volusia County among numerous others.

Westside Community Center

Representative Projects

- Spec Martin Stadium and Earl Brown Park Improvements
- Springhill Boys and Girls Club
- DeBary Splash Park
- Alabama Avenue Greenway (FDOT LAP)
- Sanford 1st Street Streetscape Improvements (FDOT LAP)
- US 17/92 Riverwalk, Phase II (FDOT LAP)
- Westside Community and Recreation Center
- Spring Hill Park and Trail
- Bunnell Trail (FDOT LAP)
- Sanford Water Treatment Plant No. 2 – Disinfection By-Product Reduction Improvements
- Islamorada Village Wide Wastewater System, Design, Build, Operate (DBO)
- Cloud Branch and Mill Creek Drainage Improvements

Detailed Project Descriptions

US 17/92 Riverwalk, Phase II & III (FDOT LAP)

- Project consisted of 1.5 miles of 10-14 foot wide trail
- Included replacement of 5,500 feet of seawall along Lake Monroe, trail head parking, a prefabricated pedestrian bridge over Mill Creek, hardscaping, landscaping, and lighting
- LAP Funded and extensive coordination with FDOT

Springhill Boys and Girls Club

- Provided architectural and engineering services for the new Boys and Girls Club building constructed in Spring Hill
- Included a 2,700 sq. ft. free-standing masonry building with a pre-engineered wood truss roof with architectural fiberglass shingle roofing
- The other functions of the building are various sizes of Activity Rooms, a Media Center, a Break Room and an Administration Office
- The ancillary rooms include ADA Restrooms and a Mechanical/ Electrical Room

Spec Martin Stadium Design Criteria Package and Earl Brown Park Improvements

- Development of design/build criteria package to assist the City of DeLand during the selection process.
- Design involved a new press box, training room and locker room additions, landscaping and civil improvements for the stadium including stormwater, site design, minor roadway improvements, and parking lot design
- Responsible for site and stormwater design for the Wayne Sanborn Senior Center replacement project (and related parking), parking lot serving Spec Martin Stadium, parallel parking and traffic calming along Alabama Ave.
- Includes an amphitheater, basketball courts, restroom/concession building, playground area, and a hardscaped entryway feature

Alabama Avenue Greenway (FDOT LAP)

- Provided civil, planning, survey, landscape architecture, permitting
- Project consisted of 2.1 Mile Multi-Use Path/ 12' Wide
- Responsible for planning and Study of 5 Mile Extension Phase II
- LAP Funded and extensive coordination with FDOT
- Extensive public involvement and limited ROW and easements
- Project was located in historic residential and business districts
- "Florida Friendly" Landscape Design

Westside Community and Recreation Center

- Expanded an existing 7,900 sq. ft. structure with the addition of a 10,400 sq. ft. gymnasium, game room addition and storage mezzanine
- Remodeled the existing gym into a multipurpose room, work out area and conference room
- Both the men's and the women's restrooms were upgraded for handicapped accessibility and the existing kitchen was completely gutted and redesigned
- Included a new welcoming reception area, refurbished staff offices, computer room and locker room with a playful color scheme

City of Sanford's Water Treatment Plant No. 2 – Disinfection By-Product Reduction Improvements

- Design and CEI of improvements at the existing WTP No. 2 to remove organics from the raw water. The improvements include the addition of ozone treatment to reduce hydrogen sulfide levels and six (6) new 40,000 lb. GAC cylinders to removal total organic carbon. The project also included a new chemical storage and pump building, on site piping, new operations building, SCADA/Controls, and demolition of existing cascading aerators.

Islamorada Village Wide Wastewater System, Design, Build, Operate (DBO)/Islamorada

- CPH's areas of responsibility included the design and permitting of the vacuum collection system for the Island of Upper Matecumbe Key; vacuum pumping stations for the Islands of South Plantation Key, Upper Matecumbe Key and Lower Matecumbe Key; and low pressure force main collection systems for the Island of Windley Key and portions of Upper Matecumbe Key.
- CPH provided input data and documentation associated with areas of responsibility incorporated into the Preliminary Design Report for the overall project.
  This work included an analysis of flow data that incorporated FKEC water consumption information, review of existing package wastewater plants, and survey/analysis provided within the project solicitation documents in order to properly project anticipated wastewater flows for system design

Cloud Branch and Mill Creek Drainage Improvements

- Performed services throughout this multi-phase project which has involved preparing and implementing a stormwater management plan for the Mill Creek and Cloud Branch Drainage Basins
- The project included surveying and inventory of the existing system, extensive basin modeling using ICPR software, development of construction plans, and permitting through the SJRWMD

Rocco R. Nasso, P.E.

Project Manager

17 Total Years of Experience • 17 Years with CPH

Experience

Mr. Nasso serves CPH as a Project Manager and Engineer. His design experience includes stormwater calculations and modeling (ICPR and Hydraflow), transmission main design and modeling (WaterCAD), pump sizing, and lift station design. His other duties include the preparation, construction coordination with contractors in the build out phase and processing of permits through various regulatory and municipal agencies.

Representative Projects

- New Smyrna Beach Utilities Commission – Biosolids Improvements
- Sand Pond Road and Skyline Drive
- Area IV Well Outfitting and Raw Water Transmission Main- Phase I and II
- Midway Utilities Replacement - Phase 1
- Lake Harriet Water Transmission Main
- Seminole County Regional Water Treatment Facility at Yankee Lake
- Pump Station Upgrades – FY 2012
- Volusia-Sanford Reclaimed Interconnect
- Seminole County Interconnects
- State Road 16 Water System Interconnect
- Pipe Bursting of Potable Water Mains Using Pre-Chlorinated Pipe
- Palm Coast Well Field
- Apple Valley Interconnect - Phase 3
- St. Johns Parkway (Phases I, II, & III)
- Water Main Looping Construction

Detailed Project Descriptions

Sand Pond Road and Skyline Drive

- 1.25 mile project consists of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides
- Implemented recommendations identified in a previous study to eliminate roadway flooding, improve traffic flow, and improve safety along the corridor

Area IV Well Outfitting and Raw Water Transmission Main- Phase I and II

- Phase I- Drilling of 5 water supply production wells, 3 saline water monitoring wells, outfitting of 6 production wells, and construction of approximately 72,000 l.f. of new raw water transmission main (16-20-inch diameter pipeline) from the City's Mourning Dove Water Treatment Plant to the Area IV well field
- Phase II- Well drilling of 8 production wells and 1 saline water monitoring well, conversion of 1 test well to a production well, and well outfitting of 9 production wells
- Additionally, the project included the construction of approximately 18,975 linear feet of raw water transmission main from the north end of the existing Area IV Phase 1 Wellfield (near well 408) to each of the Area IV Phase 2 production wells (Wells WR-1 through WR-9)

Midway Utilities Replacement, Phase I

- Performed limited inspection services, shop drawing review, post design services, attendance at progress meetings, as-built drawings, clearance letter, certification of completion of construction, substantial completion and final inspections, review of change orders, and negotiation assistance for changes in the work.
- Construction of approximately 9,600 l.f. of 4-inch to 10-inch water lines to replace the existing substandard and undersized water mains, water services, and fire hydrants

Seminole County Regional Water Treatment Facility at Yankee Lake

- 10 MGD (expandable to 25 MGD) water treatment facility is being constructed, as part of this overall effort, Reiss Engineering, partnered with the team to serve as the Construction Management (CM) team
- Offsite piping included the opencut installation of approximately 40,000 LF of dual 42" HDPE raw water pipline with 36" ductile iron pig stations.
- Onsite yard piping consisted of approximately 12,000 LF of process piping ranging from 4" to 36" diameter.
- Installation of offsite large diameter piping, conduits for electric power and fiber optic cable from the raw water pump station to the treatment facility site
- Construction of a raw water pump station and intake structure to be located on the St. Johns River

Palm Coast Well Field

- Design included drilling test wells to determine potential yields within the well field, modeling the well field potential, and developing a raw water well location plan
- Phase I – included: 6 Wells, gravel packed, 100 ft. deep +/-, Capacity of 1.5 MGD, 3 stand-by generators (2 wells for each generator), and 12,000 l.f. of PVC raw water piping ranging in size from 8-inch to 16-inch
- Phase II – included: 12 Wells, gravel packed, 100 ft. deep +/-, Projected capacity of 3.0 MGD, 6 stand-by generators, (2 wells for each generator), and 35,000 l.f. of PVC raw water piping ranging in size from 8-inch to 24-inch

Volusia-Sanford Reclaimed Interconnect

- This project will connect to the existing 20-inch DIP line with a new 20-inch DIP line and head north through Seminole County's Lake Monroe Park (Wayside Park)
- The line will be drilled beneath the St. Johns River into Volusia County on the north side of the river, then moved north along the FDOT right of way for US Highways 17/92 and enter Volusia County's Lake Monroe Park
- Performing the design permitting and construction services for the Volusia County portion of this project
- The projected flows to be sent to Volusia County are between 150,000 to 1,500,000 GPD

Kurt R. Luman, Jr., P.E.

Project Engineer

19 Total Years of Experience • 18 Years with CPH

Experience

Mr. Luman serves the firm of CPH in the capacity of Vice President of our Transportation Services. He is responsible for managing, engineering, and designing roadway, traffic, and trail projects, including geometric design, stormwater management systems, traffic intersections, and traffic control plans. Mr. Luman is also responsible for the preparation and processing of permits through various regulatory agencies including FDOT Local Agency Program (LAP) projects. In addition to highway and traffic design he has experience in preparing stormwater pollution prevention plans, construction estimates and site inspections.

Education

- Sanford Street Streetscape and Gateway Improvements
- Lithia Pinecrest Road PD&E Study and Four-Laning
- John Anderson Highway Widening
- St. Johns Parkway
- Rhode Island Avenue and Westside Parkway
- Bahia Avenue – Marion County
- Tenth Street - Volusia County
- SR 884 (Colonial Blvd.)/Fowler St. Intersection Improvements
- Fishhawk Boulevard Four-Laning Design
- Powell Adams Road and US Hwy 98
- Hillsborough County PD&E – Sheldon Road and Waters Avenue Intersection Improvements
- Daytona Beach Mason Avenue

Detailed Project Descriptions

W. Central Blvd. Sanitary Sewer Replacement and Streetscape Design/Build

- Garney Construction along with CPH was selected by the City of Orlando for the $6.5 million dollar Design/Build project in downtown Orlando
- The primary purpose of the project is to upsize the existing gravity sewer line on Central Blvd. between Glenn Ln. and Garland Ave. to serve the future MLS Stadium and Sports Entertainment District
- Additional improvements include rebuilding the roadway including removal of the underlying brick, placing all overhead utility lines underground, two mast arm traffic signals, and landscape/hardscape features including street lighting, brick paver walkways, and street furniture

Central Winds Recreational Facility Roadway Improvements

- CPH has provided numerous services at Central Winds Park, most recent upgrade consisted of the paving, grading and installation of a drainage system on an existing access road
- Project included the paving of approximately 1,300 LF of roadway
- Responsible for the round-a-bout design

Sand Pond Road and Skyline Drive

- 1.25 mile project consisted of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides
- Services included geometric design to correct the horizontal and vertical alignments to comply with current standards, pavement analyses to determine the strength and integrity of the existing base material, hydraulic modeling for the proposed stormwater management system, utility coordination and permitting through SJRWMD and Seminole County

Belle Terre Parkway Four-Laning

- Approximately 4.1 miles of a four-lane divided roadway
- Four 12-foot travel lanes and two four-foot bicycle lanes
- Provided general traffic engineering services including access management studies, traffic volume projections and traffic signal warrant analysis
- Four (4) separate drainage basins with one basin extending two miles
- Two major drainage canals utilized by the City to control the flooding throughout the City were within the project limits and required upgrading

Rhode Island Avenue and Westside Parkway

- 1.4 mile, 4-lane divided roadway with 22’ median
- Signal design included a new strain pole signal at US 17-92, which required FDOT driveway connection permitting and significant coordination with traffic ops to allow for lane shifting through the intersection to provide for the phased construction

Tenth Street, Volusia County

- This task consisted of reconstructing 1.2 miles of an existing 2-lane rural road to a 4-lane divided urban road
- The proposed cross-section included four 12-ft lanes with 4-ft bike lanes in both directions
- Also assisted Volusia County by preparing right-of-way maps, and legal sketches and descriptions for the additional right of way and pond sites
- The maintenance of traffic was also a critical element to maintain to ensure full access to both schools, by both vehicles and pedestrians, during construction

St. Johns Parkway

- St. Johns Parkway, Phase 1 - Sanford, Florida – Phase 1 of this project consisted of widening existing Jewett Lane (renamed St. Johns Parkway) from the Smith Canal to approximately 400-ft west of Meisch Road, resulting in 1,650 LF of a new three lane road.
- Major construction items included construction of a 28-ft span x 7-ft rise x 72-ft long concrete arch culvert and wingwalls at the canal, curb and gutter, sidewalk, guardrail, aluminum handrail, and storm sewer (ranging in size from 15" to 48"x72").
- Utilities construction will consist of approximately 1,750 l.f of new 12" water main and 1,900 l.f. of new 8" reclaimed water main.

SR 884 (Colonial Blvd.)/Fowler St. Intersection Improvements

- Consists of modifying the southbound to westbound channelized right turn lane or “slip-right” due to a high volume of side-swipe vehicle collisions
- Provided various alternative solutions to determine the optimal solution
- Performed an American with Disabilities Act (ADA) analysis of the pedestrian features for the entire intersection
- The analysis identified all ADA and FDOT deficiencies and recommended improvements

Matthew C. Cushman, P.E.

Project Engineer

12 Total Years of Experience • 11 Years with CPH

Experience

Mr. Cushman serves the firm of CPH as a Project Engineer. He is responsible for the design and engineering of transportation infrastructure, grading, signalization, drainage, as well as the preparation and processing of permits through statewide regulatory agencies. Prior to working with CPH, he worked as a Traffic Signal Designer and Inspector for the F.D.O.T. District 5 Traffic Operations in Deland, FL. The FDOT position included the design of District 5 transportation systems and the signalization of major state road intersections. Mr. Cushman has designed transportation improvements and throughout the State of Florida.

- Rhode Island Avenue
- Belle Terre/Whiteview Intersection Improvements
- Tenth Street - Volusia County
- John Anderson Highway Widening
- City of Sanford- Magnolia Avenue

Detailed Project Descriptions

Sand Pond Road and Skyline Drive

- 1.25 mile project consisted of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides
- Services included geometric design to correct the horizontal and vertical alignments to comply with current standards, pavement analyses to determine the strength and integrity of the existing base material, hydraulic modeling for the proposed stormwater management system, utility coordination and permitting through SJRWMD and Seminole County

W. Central Blvd. Sanitary Sewer Replacement and Streetscape Design/Build

- Garney Construction along with CPH was selected by the City of Orlando for the $6.5 million dollar Design/Build project in downtown Orlando
- The primary purpose of the project is to upsize the existing gravity sewer line on Central Blvd. between Glenn Ln. and Garland Ave. to serve the future MLS Stadium and Sports Entertainment District
- Additional improvements include rebuilding the roadway including removal of the underlying brick, placing all overhead utility lines underground, two mast arm traffic signals, and landscape/hardscape features including street lighting, brick paver walkways, and street furniture

Belle Terre Parkway Four-Laning

- Approximately 4.1 miles of a four-lane divided roadway
- Four 12-foot travel lanes and two four-foot bicycle lanes
- Provided general traffic engineering services including access management studies, traffic volume projections and traffic signal warrant analysis
- Four (4) separate drainage basins with one basin extending two miles
- Two major drainage canals utilized by the City to control the flooding throughout the City were within the project limits and required upgrading

US 17/92 Riverwalk, Phase II (FDOT LAP)

- Project consisted of 1.5 miles of 10-14 foot wide trail
- Included replacement of 5,500 feet of seawall along Lake Monroe, trail head parking, a prefabricated pedestrian bridge over Mill Creek, hardscaping, landscaping, and lighting
- LAP Funded and extensive coordination with FDOT
- Advanced coordination with SJRWMD and FDEP because of work within sovereign submerged lands, replacement seawall, and pedestrian bridge

Rhode Island Avenue and Westside Parkway

- 1.4 mile, 4-lane divided roadway with 22' median
- Signal design included a new strain pole signal at US 17-92, which required FDOT driveway connection permitting and significant coordination with traffic ops to allow for lane shifting through the intersection to provide for the phased construction

Tenth Street, Volusia County

- This task consisted of reconstructing 1.2 miles of an existing 2-lane rural road to a 4-lane divided urban road
- The proposed cross-section included four 12-ft lanes with 4-ft bike lanes in both directions
- Also assisted Volusia County by preparing right-of-way maps, and legal sketches and descriptions for the additional right of way and pond sites
- The maintenance of traffic was also a critical element to maintain to ensure full access to both schools, by both vehicles and pedestrians, during construction

Oleander Avenue

- Approximately 1000-ft of new 2 lane road between two existing streets in order to improve access to residential areas
- The project also includes surveying, environmental investigations, geotechnical investigations, the design of a stormwater collection system, incorporating stormwater improvements on existing streets, landscape and irrigation, and the design of a new traffic circle

Belle Terre/Whiteview Intersection Improvements

- Widened Whiteview Parkway to provide for left turn lanes on both the eastbound and westbound approach to Belle Terre Pkwy
- Added a northbound right turn lane and southbound right turn lane on Belle Terre Pkwy
- Extended the southbound left turn lane on Belle Terre Pkwy
- Performed the required drainage analysis and modifications to ensure capacity and conveyance was maintained
- Designed Mast Arm Traffic Signals, with pedestrian features

Joseph M. LoFaso, Jr., E.I.
Project Engineer

3 Total Year of Experience • 2 Year with CPH

Experience

Mr. LoFaso serves CPH as a Project Designer in the Transportation Department. He is responsible for data collection, processing and analysis on our roadway and traffic projects. He excels at design, cost estimation and scheduling. Previous to joining CPH, Mr. LoFaso worked with the City of Orlando in their Transportation Engineering Division as a Signalized Systems Technician. He was responsible for analyzing and interpreting automobile crash data, performing field reviews of existing siganlized intersections for compliance with current FDOT and MUTCD criterion, designed and fabricated street signs, and collecting and analyzing traffic data.

- LAP Funded and extensive coordination with FDOT
- Advanced coordination with SJRWMD and FDEP because of work within sovereign submerged lands, replacement seawall, and pedestrian bridge

Mitchell Hammock/Lake Jessup Intersection Improvements

- The Mitchell Hamock /Lake Jessup Intersection improvement project includes the design and permitting of a new mast arm signal, extending the existing eastbound and westbound left turns lanes and adding a northbound left turn lane
- This project was awarded through our continuing engineering contract and was needed due to the growth of the area and demand at the intersection

DeLand Greenway Multi-Use Trail, North Extension Part A (FDOT LAP)

- This FDOT LAP project will extend the recently constructed Alabama Ave Greenway Multi-Use Trail approximately 7,000 feet
- Includes landscaping, hardscaping, signage, traffic calming elements and other aesthetic features
- Includes survey, ROW analysis, design, permitting, and obtaining approval of proposed bid documents and design from FDOT and Volusia County

Seminole Wekiva Trail, Phase IV (FDOT LAP)

- Provided civil, survey, landscape architecture, permitting
- Project consisted of 2.5 Mile Multi-Use Path/14' Wide
- LAP Funded and extensive coordination with FDOT
- Coordination with multiple municipalities

Largo West Bay Trailhead (FDOT LAP)

- CPH was selected by the City of Largo to perform Preliminary and Final Design Services for the W. Bay Drive Trail Head along the regional Pinellas Trail.

SE 47TH Terrace Streetscape Improvements

- CPH was selected by the City of Cape Coral to perform design, permitting, and construction administration for the SE 47th Terrace Streetscape Improvements.
- Additional services include a force main extension along 15th Place east to Del Prado.

Jeremiah D. Owens, P.E., CFM

Project Engineer

14 Total Years of Experience • 12 Years with CPH

Experience

Mr. Owens works as a Project Manager and has 14 years of experience in design and construction management/ administration of many aspects of municipal and private projects including utility routing, floodplain management, conveyance systems, stormwater management systems, roadway design, permitting, and coordination with government agencies. His areas of expertise include stormwater modeling, utility relocation for roadway widening projects, construction coordination and administration, and permitting.

Red Cleveland Blvd. WM Looping

Spec Martin Stadium/Earl Brown Park

Seminole County Sports Complex

TMDL Monitoring and BMAP

Representative Projects

- Sand Pond Road and Skyline Drive Stormwater and Roadway Improvements
- Spec Martin Stadium Design Criteria Package and Earl Brown Park Improvements
- US 17/92 CRA Stormwater Master Plan
- Mill Creek Drainage Improvements
- Fort Florida Dirt Road Paving Sanford TMDL Monitoring and BMAP Assistance
- Sanford NPDES Assistance
- Fernandina Beach Stormwater Master Plan Update and Stormwater Utility
- Oak Avenue Stormwater Pond
- Runway 9L-27R Extension
- Pump Branch Ditch Enclosure
- Queens Mirror Erosion Control Project
- Drainage Analysis for SR-44 and Florida Avenue

Detailed Project Descriptions

Seminole County US 17-92 CRA – Stormwater Master Plan

- CPH was selected to create a stormwater master plan for the US 17/92 CRA's 13 mile corridor. The plan will include a GIS database of plans, permits, maps and models within the linear corridor. A review of existing infrastructure and development trends will lead to the creation of proposed projects to encourage further redevelopment of parcels along the corridor.

Sanford Airport – Terminal B Expansion

- As part of our Master Services Agreement with the Sanford Airport Authority, CPH was tasked with the Terminal Expansion project to support the current growth of passenger traffic. The $42 million expansion includes the terminal departure consolidation from a dual terminal check-in.

Sand Pond Road / Skyline Drive Stormwater and Roadway Improvements

- The 1.25 mile project consisted of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides.
- The project also included extending Skyline Drive from its current terminus approximately 1,100-feet to Emma Oaks Trail.

Runway 9L-27R Extension

- 1,400 LF extension from 9,600 LF to 11,000 LF of the airport's main commercial runway for the Sanford Airport Authority
- Project management, surveying, utility relocates, perimeter security roadway, stormwater management system design/permitting, public roadway closure/access remedy, and fencing plan
- Responsible for airfield and taxiway design, airfield lighting, NAVAIDS relocation, MALSR relocation, and Localizer/Glideslope relocation
- Coordinated with the FAA during all phases of the design as well as during the construction process

Sanford TMDL Monitoring and BMAP Assistance

- Working with the City of Sanford in monitoring of stormwater discharges from major discharge points within the City
- Testing seven of the major outfalls within the City's stormwater system; testing will be performed monthly, quarterly, and immediately after major rainfall events
- Will work with FDEP on updating the FDEP nutrient model and reducing nutrient removal requirements of the City

Spec Martin Stadium Design Criteria Package and Earl Brown Park Improvements

- Development of design/build criteria package to assist the City of DeLand during the selection process.
- Design involved a new press box, training room and locker room additions, landscaping and civil improvements for the stadium including stormwater, site design, minor roadway improvements, and parking lot design
- Responsible for site and stormwater design for the Wayne Sanborn Senior Center replacement project (and related parking), parking lot serving Spec Martin Stadium, parallel parking and traffic calming along Alabama Ave.
- Includes an amphitheater, basketball courts, restroom/concession building, playground area, and a hardscaped entryway feature

Seminole County Regional Sports Complex Planning and Design

- The CPH Team was awarded the planning and design of a new Sports Complex situated on over 120 acres in Seminole County.
- The complex consisted of 15 tournament quality baseball fields, 25 batting cages, 3 concession/restroom buildings, an administration and conference building, playground, walking trail, 3 storage buildings and a maintenance facility.
- CPH was also responsible for coordinating input from stakeholders to begin Final Concept Design.

Drainage Analysis for SR 44 and Florida Avenue

- Tasked with analyzing the historical flooding issue in the heart of downtown DeLand
- The flooding often resulted in damage to adjacent commercial businesses and City Hall, as well as, presenting a hazard to vehicles along SR 44 which is a designated Coastal Hurricane Evacuation Route
- The analysis identified specific problems, potential solutions, estimated benefits of proposed improvements, estimated construction costs, and provided a recommendation for which improvements should be considered for design and implementation
- Assisted the City of DeLand in obtaining FDOT approval and funding from FDOT through a Joint Project Agreement (JPA)

Red Cleveland Blvd. Water Main Looping at the Orlando Sanford International Airport

- The purpose of the project was to loop potable water main in order to improve pressures and flows and reduce water age in the existing potable water distribution system
- Approximately 3980-ft of new 8"-10" potable water transmission main
- The project included coordination with the airport and FAA due to existing infrastructure in the construction

Jeremy C. Morton, P.E.

Project Engineer

8 Total Years of Experience • 8 Years with CPH

Experience

Mr. Morton serves the firm of CPH as a Project Engineer. He has worked for CPH since 2007. Since joining CPH, he has worked in every area of land development, with an emphasis on stormwater, utilities, and general site development. Mr. Morton has been working with a variety of land development clients, gaining valuable experience in project development and permitting at the municipal level, while developing those skills in utility, storm, and site design that are needed in his capacity as Project Engineer.

- Sanford NPDES Assistance
- Drainage Analysis for SR-44 and Florida Avenue
- DeBary Public Safety Complex
- Red Cleveland Blvd. Water Main Looping at the Orlando Sanford International Airport
- Perimeter Security Roadway
- Pump Branch Ditch Enclosure

Detailed Project Descriptions

Sand Pond Road and Skyline Drive Stormwater and Roadway Improvements

- Due to extensive flooding along Skyline Drive, the team provided design and permitting services to the City of Lake Mary that included construction that converted the existing 2-lane rural roadway to a 2-lane urban roadway with a closed drainage system and new stormwater ponds
- 1.25 mile project also included minor roadway widening, turn lane improvements, horizontal and vertical curve reconstruction, milling and resurfacing, new sidewalk on both sides of the road, retaining wall, and the extension of existing Skyline Drive approximately 1100-feet

Seminole County Regional Sports Complex Planning and Design

- The CPH Team was awarded the planning and design of a new Sports Complex situated on over 120 acres in Seminole County.
- The complex consisted of 15 tournament quality baseball fields, 25 batting cages, 3 concession/restroom buildings, an administration and conference building, playground, walking trail, 3 storage buildings and a maintenance facility.
- CPH was also responsible for coordinating input from stakeholders to begin Final Concept Design.

West Leesburg Neighborhood Resource Center

- Architectural and M/E/P design for a new 9,000 SF Neighborhood Resource Center to include meeting spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a kitchen/café facility.

Sanford Civic Center

- CPH was commissioned by Sanford's Community Development Agency to provide conceptual plans for a new "Civic Center". This proposed 18,000 square foot facility will replace the existing civic center located on Seminole Boulevard which borders Fort Mellon Park and Lake Monroe. The new facility will expand present inventory of meeting rooms and flexible banquet areas for public use in the range of 500-700 people.

Red Cleveland Blvd. Water Main Looping at the Orlando Sanford International Airport

- The purpose of the project was to loop potable water main in order to improve pressures and flows and reduce water age in the existing potable water distribution system
- Approximately 3980-ft of new 8"-10" potable water transmission main
- The project included coordination with the airport and FAA due to existing infrastructure in the construction

DeBary Public Safety Complex

- Architectural design and construction documents for a 5,600 square foot Public Safety Complex including offices and operational facilities for local law enforcement. The style of the building uses colonial detailing with a "temple front" façade, divided light windows, pitched roof, stone wainscot and white trims.
- CPH also provided site civil and master planning for future development.

Drainage Analysis for SR 44 and Florida Avenue

- Tasked with analyzing the historical flooding issue in the heart of downtown DeLand
- The flooding often resulted in damage to adjacent commercial businesses and City Hall, as well as, presenting a hazard to vehicles along SR 44 which is a designated Coastal Hurricane Evacuation Route
- The analysis identified specific problems, potential solutions, estimated benefits of proposed improvements, estimated construction costs, and provided a recommendation for which improvements should be considered for design and implementation
- Assisted the City of DeLand in obtaining FDOT approval and funding from FDOT through a Joint Project Agreement (JPA)

Sanford Airport – Terminal B Expansion

- As part of our Master Services Agreement with the Sanford Airport Authority, CPH was tasked with the Terminal Expansion project to support the current growth of passenger traffic. The $42 million expansion includes the terminal departure consolidation from a dual terminal check-in.

Sandra L. Gorman, P.E.

Traffic Engineer

24 Total Years of Experience • 3 Years with CPH

Experience

Ms. Gorman serves CPH as Traffic Engineer. Her experience encompasses a wide range of traffic and transportation projects. Ms. Gorman's wealth of project experience includes traffic signal warrant analyses, transportation and traffic studies, mitigation recommendations, access management, and traffic modeling. Additionally, she was the recipient of "Young Transportation Professional of the Year" in 2009 and 2004 by the Institute of Transportation Engineers.

- Mitchell Hammock/Lake Jessup Intersection Improvements- City of Oviedo
- Riverwood CDD- Intersection Signalization Construction
- Wal-Mart Supercenter- Throughout Florida
- CEI Services Roadway Improvements- City Lake Mary
- Cortez Plaza Demolition and Façade Alteration- DDR
- SR 581 Williamsburg Signal
- SR 56 Extension Traffic Study
- McDonald's USA Corp – Multiple Florida Locations
- Traffic Impact Studies, Manatee, Hillsborough, Pasco and Polk Counties
- North Coquina Boat Ramp- Manatee County

Detailed Project Descriptions

Mitchell Hammock/Lake Jessup Intersection Improvements- City of Oviedo

- Design and permitting of a new mast arm signal, extending the existing eastbound and westbound left turns lanes and adding a northbound left turn lane

SR 56 Extension Traffic Study, Pasco County

- Traffic Engineer providing traffic studies for this 3.4 mile roadway extension project.

SR 56 Mansfield Signal Warrant, Pasco County

- Prepared a detailed traffic signal warrant analysis for the intersection of SR 56 and Mansfield Boulevard in Pasco County
- SR 56 is a new 6-lane state highway currently under construction in southeast Pasco County
- The warrant analysis was performed to determine if a traffic signal would be warranted at the T-intersection upon opening of the new highway
- Traffic volumes were projected using the FSUTMS model and other local data and the study was performed to meet the criteria outlined in the Manual of Uniform Traffic Control Devices.

Downtown Palm Harbor Parking and Circulation Study, Pinellas County, FL

- Project Manager for a parking study to evaluate current parking needs and future demands for Old Downtown Palm Harbor
- Involved an analysis of current parking demand and patterns as well as an evaluation for future land use and parking needs for both on street and off street parking.
- The study formulated new parking regulations for the area adopted by Pinellas County.
- Included an evaluation of the interaction between pedestrian, transit and vehicular traffic to identify potential safety improvements including pedestrian crossings, street lighting and potential traffic signals on Alternate US 19

South Coquina Boat Ramp- Manatee County

- Site improvements and amenities at South Coquina Boat Ramp
- Site planning, engineering, permitting, landscape design, parking lot lighting design, environmental, and bidding/construction administration services
- Nearly the entire site is seaward of the Coastal Construction Control Line
- Provided a pedestrian warrant study to determine the appropriateness of a mid-block pedestrian crossing to support the improved amenities
- New stabilized shell parking lot and the sites associated stormwater improvements

Cortez Plaza Demolition and Façade Alteration- DDR

- Project consisted of the demolition of lease space #3 and façade upgrades and improvements at the Cortez Plaza
- Responsible for the trip generation analysis
- The project included sealing the existing roof with new Sarnafil rubber roofing; “standing seam metal look”
- CPH also provided new entrance features and EIFS cornice treatments for more sophisticated classical style and appearance

Wal-Mart Supercenter- Throughout Florida

- Provides traffic, planning, site design, environmental, and surveying services on a continuing basis for Wal-Mart

McDonald’s USA Corp – Multiple Florida Locations

- CPH has been working with McDonald's for 15+ years
- Through this time, CPH has provided traffic, civil, landscape, irrigation, surveying, architectural, and construction administration services on a continuing basis for various new, re-builds, re-models, and re-image restaurant projects
- Working with the local region, CPH is involved in every aspect of the McDonald's process from working with the real estate group early in site selection, through final walk-thru and store openings

James K. Winter, RLA, CLARB

Landscape Architect

34 Total Years of Experience • 10 Years with CPH

Experience

Mr. Winter serves CPH as the Director of the Landscape Architecture Department and Vice President. He has over 34 years of experience in Landscape Architecture, including 12 years as Capital Projects Construction Manager for parks and recreations projects within local governments. Mr. Winter has extensive project management, design and construction administration experience for active and passive parks as well as multi-use trail projects. He also has experience with streetscapes, aquatic facilities and other public works projects.

Education

B.A. in Landscape Architecture, Mississippi State University

Professional Registrations, Certifications, Memberships

Registered Landscape Architect – FL (No. LA 0000911)
CLARB Certified – (No. 5203)
American Society of Landscape Architects (ASLA)

- Springhill Boys and Girls Club
- DeLand New Public Works Complex
- Manatee Civic Center Improvements
- DeBary Public Safety Complex
- DeBary Community Park Splash Pad
- Westside Community Center
- North Port Medical Clinic
- Career Services and Experiential Learning Center (UCF)
- Clermont City Hall
- DeBary Town Center – 70 acre mixed Use
- Sanford North WRF: Primary Treatment System Improvements
- Public Safety Complex (UCF)
- Morgridge Reading Center (UCF)

Detailed Project Descriptions

Springhill Boys and Girls Club

- Provided architectural and engineering services for the new Boys and Girls Club building constructed in Spring Hill
- Included a 2,700 sq. ft. free-standing masonry building with a pre-engineered wood truss roof with architectural fiberglass shingle roofing
- The other functions of the building are various sizes of Activity Rooms, a Media Center, a Break Room and an Administration Office
- The ancillary rooms include ADA Restrooms and a Mechanical/ Electrical Room

DeBary Community Park

- Planning, site design, architectural, mechanical, electrical and plumbing (MEP) engineering, permitting, surveying and construction services for a splash pad water feature and all associated appurtenances for the City of DeBary

Sanford 1st Street Streetscape Improvements (FDOT LAP)

- Streetscape design package for a 6 block section of historic First Street (approximately 0.40 miles)
- Designed the roadway, landscape, architecture, and utility plans and prepared specifications for the complete reconstruction of the roadway, including several utility upgrades
- LAP Funded and extensive coordination with FDOT
- Responsible for detailed maintenance of traffic plans and utility relocations
- The team used its in-house 3D survey team to provide right-of-way surveys, while minimizing impacts to traffic and to provide a “virtual tour” of existing conditions and the proposed improvements during the public relations effort

Earl Brown Park Improvements

- Stormwater, site design, minor roadway improvements, and parking lot design
- Responsible for site and stormwater design for the Wayne Sanborn Senior Center replacement project (and related parking), parking lot serving Spec Martin Stadium, parallel parking and traffic calming along Alabama Ave.
- Includes an amphitheater, basketball courts, restroom/concession building, playground area, and a hardscaped entryway feature

DeLand New Public Works Complex

- Provided landscape architecture, architectural, engineering services
- 12,800 sq. ft. building pre-engineering single story metal building

Manatee Civic Center Improvements

- Provided site planning, engineering, survey, permitting, landscape design, irrigation design, and bidding/construction administration services
- Included the complete overhaul of all landscaping areas surrounding the Civic Center, as well as the hardscape design of an outdoor seating and classroom area
- Low Impact Design (LID) elements throughout the site included rainwater cisterns used for irrigation, rainwater gardens, and bio-retention swales
- New pedestrian scale lighting was provided, along with numerous upgrades to the site stormwater management system.

North Port Medical Clinic

- 7,084 sq. ft. building increased an additional 5,062 sq. ft.
- Expansion included new exam rooms, offices, record storage, auxiliary storage, and new reception area
- Designed to achieve LEED Silver Accreditation
- Energy efficient technologies including water chiller, cooling system, LED lighting, high efficiency filtration system and use of sustainable materials

Clermont City Hall

- Consisted of a 3-story building with a total of 32,000 sq. ft. on a 2.14 acre parcel in the middle of the historical downtown area
- Existing ground conditions (good draining soils and deep water table level) allowed the use of an underground retention basin beneath the main parking lot

Westside Community and Recreation Center

- Expanded an existing 7,900 sq. ft. structure with the addition of a 10,400 sq. ft. gymnasium, game room addition and storage mezzanine
- Remodeled the existing gym into a multipurpose room, work out area and conference room
- Both the men’s and the women’s restrooms were upgraded for handicapped accessibility and the existing kitchen was completely gutted and redesigned
- Included a new welcoming reception area, refurbished staff offices, computer room and locker room with a playful color scheme

Maxwell D. Spann, PLA, APA

Landscape Architect

17 Total Years of Experience • 2 Years with CPH

Experience

Mr. Spann serves CPH as a Landscape Architect. He is responsible for planning, design, and construction inspection of landscape design for CPH projects. Mr. Spann has over 17 years of experience in Landscape Architecture, including master planned and mixed-use developments, municipal ordinance review and development, community amenity design including public and private design charette facilitation and grant discovery and document development. He has extensive project management, design and construction administration experience for active and passive parks as well as multi-use trail projects. He also has experience with streetscapes, aquatic facilities and other public works projects.

- DeBary Central Fire Station
- Winter Springs Fire Station Master Plan
- Oak Avenue Streetscape
- Central Avenue Streetscape
- Heritage Park
- Rob Sullivan Park
- Monroe County Fire Station
- Trotwood Park Phase 1 Improvements

Detailed Project Descriptions

US 17-92 Riverwalk, Phase III

- CPH is currently planning, survey, and design services for a 1.7 mile extension to an existing trail. The new extension connects to the previous phase designed by CPH and will be the final connection between the I-4 Corridor with the adjacent Seminole County Rinehart Trail and the downtown Sanford RiverWalk Trail system.
- Additionally, these improvements will fill the largest remaining gap within the Lake Monroe Trail Loop system which spans both Seminole and Volusia Counties. This project is intended to follow the complete streets design elements with the provision of a Multi-Use Trail, Roadway safety improvements, Traffic Calming design, Roadway & Trail Lighting, Utility Design, Structural Seawall Design, Drainage Improvements/Design , Irrigation Design, Beautification, Hardscape and Landscape Design, Scenic Overlooks of Lake Monroe, Way-finding Design, Pedestrian Mid-Block Crossings (Rectangular Rapid Flashing Beacons), Traffic Studies, Survey, and Wetland Mitigation.

W. Central Blvd. Sanitary Sewer Replacement and Streetscape Design/Build

- Garney Construction along with CPH was selected by the City of Orlando for the $6.5 million dollar Design/Build project in downtown Orlando. The 0.55 mile project included upsizing the existing gravity sewer line on Central Blvd. between Glenn Ln. and Garland Ave. from an 8" sanitary sewer to a 18" & 21" sewer system.

Monroe County Fire Station

- CPH is providing pre-design phase/programming, Schematic Design, Design Development, Construction Documents, Bidding and Permitting Assistance, and Construction Administration for a new 7,500 SF Fire Station on Cudjoe Key.

DeBary Central Fire Station

- Providing M/E/P Engineering for this 8,000 +/- SF masonry, stucco, and brick accented building with an apparatus bay built for 3 fire vehicles and dormitories for a shift of 6 fire fighters

DeBary Community Park

- Planning, site design, architectural, mechanical, electrical and plumbing (MEP) engineering, permitting, surveying and construction services for a splash pad water feature and all associated appurtenances for the City of DeBary
- Electrical design included power distribution to the pump room and restroom facility. Building lighting and occupancy sensors provide a safe, well-lit environmental
- Mechanical design included general building ventilation and exhaust system along with plumbing the restroom fixtures and an outdoor shower

Winter Springs Fire Station Master Plan

- CPH prepared a conceptual plan for a new three-story fire station facility of approximately 17,000 square feet. The first floor consisted of a three-truck apparatus bay, workout room, framing area, and a day room facility for full-time staff. The second floor provided dormitory space for 15 private bunk areas. Administration office areas occupied the third floor area.

Amy E. Daly, LEED AP

Environmental Scientist

22 Total Years of Experience • 11 Years with CPH

Experience

Mrs. Daly serves CPH as principle environmental scientist. She has 22 years of environmental consulting experience with project management, environmental resource assessments, wetland delineation, permitting, mitigation design and implementation, land management, habitat mapping, jurisdictional determinations, wetland functional analyses, protected wildlife surveys and management programs, field survey design and habitat restoration, tortoise surveys, permitting and relocation including commensal species. She has served as an expert witness on various environmental matters for condemnation proceedings.

- Punta Gorda Linear Park / Multi-Use Trail
- Bayside Lakes Shopping Center
- Palm Coast Water Treatment Plant No. 3
- Shoppes at the Fountains

Detailed Project Descriptions

Sand Pond Road and Skyline Drive

- 1.25 mile project consists of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides
- Implemented recommendations identified in a previous study to eliminate roadway flooding, improve traffic flow, and improve safety along the corridor

Area IV Well Outfitting and Raw Water Transmission Main- Phase I and II

- Phase I- Drilling of 5 water supply production wells, 3 saline water monitoring wells, outfitting of 6 production wells, and construction of approximately 72,000 l.f. of new raw water transmission main (16-20-inch diameter pipeline) from the City's Mourning Dove Water Treatment Plant to the Area IV well field
- Phase II- Well drilling of 8 production wells and 1 saline water monitoring well, conversion of 1 test well to a production well, and well outfitting of 9 production wells
- Additionally, the project included the construction of approximately 18,975 linear feet of raw water transmission main from the north end of the existing Area IV Phase 1 Wellfield (near well 408) to each of the Area IV Phase 2 production wells (Wells WR-1 through WR-9)

Belle Terre Parkway Four-Laning

- Approximately 4.1 miles of a four-lane divided roadway
- Four 12-foot travel lanes and two four-foot bicycle lanes
- Provided general traffic engineering services including access management studies, traffic volume projections and traffic signal warrant analysis
- Four (4) separate drainage basins with one basin extending two miles
- Two major drainage canals utilized by the City to control the flooding throughout the City were within the project limits and required upgrading

Midway Utilities Replacement, Phase I

- Performed limited inspection services, shop drawing review, post design services, attendance at progress meetings, as-built drawings, clearance letter, certification of completion of construction, substantial completion and final inspections, review of change orders, and negotiation assistance for changes in the work.
- Construction of approximately 9,600 l.f. of 4-inch to 10-inch water lines to replace the existing substandard and undersized water mains, water services, and fire hydrants

Springhill Boys and Girls Club

- Provided architectural and engineering services for the new Boys and Girls Club building constructed in Spring Hill
- Included a 2,700 sq. ft. free-standing masonry building with a pre-engineered wood truss roof with architectural fiberglass shingle roofing
- The other functions of the building are various sizes of Activity Rooms, a Media Center, a Break Room and an Administration Office
- The ancillary rooms include ADA Restrooms and a Mechanical/ Electrical Room

DeLand New Public Works Complex

- Provided architectural and engineering services
- 12,800 sq. ft. building pre-engineering single story metal building

Westside Community and Recreation Center

- Expanded an existing 7,900 sq. ft. structure with the addition of a 10,400 sq. ft. gymnasium, game room addition and storage mezzanine
- Remodeled the existing gym into a multipurpose room, work out area and conference room
- Both the men's and the women's restrooms were upgraded for handicapped accessibility and the existing kitchen was completely gutted and redesigned
- Included a new welcoming reception area, refurbished staff offices, computer room and locker room with a playful color scheme

Ivy Lane Recreation Park

- The Park includes two entrance arbors, paved walkways, picnic shelters and a group pavilion.
- Site furnishings consisted of wood park benches with powder coated steel frames, complementary litter receptacles, extra heavy picnic table and multi-level park grills
- The column base was finished with cultured stone veneer
- The roof construction was standing seam metal roofing with Kynar 500 finish on Plywood sheathing over pre-engineered roof trusses, bearing on steel beams

Aaron P. Moore, PWS

US 17/92 Riverwalk, Phase II & III (FDOT LAP)

- Project consisted of 1.5 miles of 10-14 foot wide trail
- Included replacement of 5,500 feet of seawall along Lake Monroe, trail head parking, a prefabricated pedestrian bridge over Mill Creek, hardscaping, landscaping, and lighting
- Advanced coordination with SJRWMD and FDEP because of work within sovereign submerged lands, replacement seawall, and pedestrian bridge
- CPH provided planning, survey, and design services for a 1.7 mile extension to an existing trail
- This project followed the complete streets design elements with the provision of a Multi-Use Trail, Roadway safety improvements, Traffic Calming design, Roadway & Trail Lighting, Utility Design, Structural Seawall Design, Drainage Improvements/Design , Irrigation Design, Beautification, Hardscape and Landscape Design, Scenic Overlooks of Lake Monroe, Way-finding Design, Pedestrian Mid-Block Crossings (Rectangular Rapid Flashing Beacons), Traffic Studies, Survey, and Wetland Mitigation.

Midway Utilities Replacement, Phase I

- Performed limited inspection services, shop drawing review, post design services, attendance at progress meetings, as-built drawings, clearance letter, certification of completion of construction, substantial completion and final inspections, review of change orders, and negotiation assistance for changes in the work.
- Construction of approximately 9,600 l.f. of 4-inch to 10-inch water lines to replace the existing substandard and undersized water mains, water services, and fire hydrants

Seminole County Regional Water Treatment Facility at Yankee Lake

- 10 MGD (expandable to 25 MGD) water treatment facility is being constructed, as part of this overall effort, Reiss Engineering, partnered with the team to serve as the Construction Management (CM) team
- Offsite piping included the opencut installation of approximately 40,000 LF of dual 42" HDPE raw water pipline with 36" ductile iron pig stations.
- Onsite yard piping consisted of approximately 12,000 LF of process piping ranging from 4" to 36" diameter.
- Installation of offsite large diameter piping, conduits for electric power and fiber optic cable from the raw water pump station to the treatment facility site
- Construction of a raw water pump station and intake structure to be located on the St. Johns River

Old Kings Road North Reclaimed Water Main

- 30" reclaimed water main that extended westerly and then connected to a 16" and 20" reclaimed water main
- The 16-inch reclaimed water main extended Northerly from the 30-inch reclaimed water main at Oak Trails and Old Kings Road along the FPL easement to the storage ponds at the Hammock Dunes Community Development District (DCDD) Creek Golf Course and the Conservatory Development
- In addition a future 16-inch reclaimed water main was designed by the team that will connect the WWTP No. 1 reclaimed water main to a future WWTP No. 2 reclaimed water main system and to future reclaimed water storage ponds for separate future developments

Volusia-Sanford Reclaimed Interconnect

- This project will connect to the existing 20-inch DIP line with a new 20-inch DIP line and head north through Seminole County's Lake Monroe Park (Wayside Park)
- The line will be drilled beneath the St. Johns River into Volusia County on the north side of the river, then moved north along the FDOT right of way for US Highways 17/92 and enter Volusia County's Lake Monroe Park
- Also performing the design permitting and construction services for the Volusia County portion of this project
- The projected flows to be sent to Volusia County are between 150,000 to 1,500,000 GPD

Gerald M. Cox, CGC, CUC

Project Designer

Detailed Project Descriptions

Area IV Well Outfitting and Raw Water Transmission Main – Phase 1 & 2

- The City of Titusville Area IV Well Outfitting and Raw Water Transmission Main project Phase 1 included the drilling of 5 water supply production wells, 3 saline water monitoring wells, outfitting of 6 production wells, and construction of approximately 72,000 l.f. of new raw water transmission main (16-20-inch diameter pipeline) from the City's Mourning Dove Water Treatment Plant to the Area IV well field.
- CPH performed design, surveying, permitting, bidding and construction phase services for Phase 2 of the Titusville Wellfield for TIFA LLC. The design and permitting phase services included civil engineering, survey, and environmental services and included hydraulic modeling of the wellfield, stormwater pre-development and post-development analysis of stormwater quality and attenuation, 100 year flood zone compensating storage.

Seminole County US 17-92 CRA – Stormwater Master Plan

- CPH was selected to create a stormwater master plan for the US 17/92 CRA's 13 mile corridor. The plan will include a GIS database of plans, permits, maps and models within the linear corridor. A review of existing infrastructure and development trends will lead to the creation of proposed projects to encourage further redevelopment of parcels along the corridor.

Sanford Civic Center

- CPH was commissioned by Sanford's Community Development Agency to provide conceptual plans for a new "Civic Center". This proposed 18,000 square foot facility will replace the existing civic center located on Seminole Boulevard which borders Fort Mellon Park and Lake Monroe. The new facility will expand present inventory of meeting rooms and flexible banquet areas for public use in the range of 500-700 people.

Southwest Regional Wastewater Reclamation Facility Nutrient Reduction and Expansion Project

- CPH was selected to provide planning, design, permitting, and construction administration and inspection for upgrades to the Southwest Regional Water Reclamation Facility (SWRWRF) to meet Advanced Wastewater Treatment (AWT) standards (5 mg/l CBOD, 5 mg/l TSS, 3 mg/l TN, 1 MG/l TP) and expansion of the treatment capacity by up to 1.0 million gallons per day (MGD).
- A Total Maximum Daily Load (TMDL) was established for nitrate (NO3-) that would allow for the restoration and protection of Blue Spring and Blue Spring Run.
- The TMDL established for nitrogen will require Volusia County to upgrade the SRWRF to AWT standards.
- Nitrogen and phosphorus reductions, required to meet the TMDL, will require significant treatment facility modifications, including the addition of various unit operations and processes, as well as both biological and chemical treatment systems.

Islamorada Village Wide Wastewater System, Design, Build, Operate (DBO)/Islamorada

- CPH's areas of responsibility included the design and permitting of the vacuum collection system for the Island of Upper Matecumbe Key; vacuum pumping stations for the Islands of South Plantation Key, Upper Matecumbe Key and Lower Matecumbe Key; and low pressure force main collection systems for the Island of Windley Key and portions of Upper Matecumbe Key.
- CPH provided input data and documentation associated with areas of responsibility incorporated into the Preliminary Design Report for the overall project.
- This work included an analysis of flow data that incorporated FKEC water consumption information, review of existing package wastewater plants, and survey/analysis provided within the project solicitation documents in order to properly project anticipated wastewater flows for system design.

Miami Shores Village Central Business District Low Pressure Sewer System (LPSS) and Water Main Improvements

- CPH will be responsible for the engineering, design, permitting and inspection to support the construction, installation, testing and commissioning activities associated with the construction of a new Low Pressure Sewer System in the Central Business District of Miami Shores Village with discharge to a new regional Pump Station, as well as the associated grinder stations, water main upgrade, and new force mains.

Immokalee's Farmer's Market – Florida Agricultural Department

- CPH was retained to provide architectural and construction inspection services for the storm damage repairs to the State Farmers Market in Immokalee as a result of the hurricanes experienced during the 2004 season. The anticipated total amount to be funded through FEMA is approximately $5 Million. The project was phased in accordance to the grant and funding process to allow reviews by FEMA and allow for funding to be provided for the next design phase.

Repair of Earthquake Damaged Sewers-Guam (Design-Build)

- CPH designed sewer replacement and retrofit improvements for ten miles of gravity sewer serving more than 1,000 single, duplex, and quadplex units, as well as, commercial/industrial areas for a $6,400,000 Design/Build project for a U.S. Navy Base in Guam to repair earthquake-damaged sewers.

David E. Mahler, P.E.

Project Engineer

27 Total Years of Experience • 18 Years with CPH

Experience

Mr. Mahler serves the firm of CPH as Senior Vice President and Branch Manager of the Orlando Office. He is a Project Manager/Project Engineer for municipal and private clients. Mr. Mahler has been involved with multiple collection and distribution pump station designs, hydraulic modeling as well as utility line extension and relocation projects for both municipal and private clients. In addition, he specializes in relocation of existing utilities associated with roadway projects. He has also been involved with land development and roadway design and permitting for private clients.

Education

B.S. in Environmental Engineering, University of Central Florida

Professional Registrations, Certifications, Memberships

Professional Engineer- FL (No. 50041)

Key Strengths

- Water Supply, Treatment, Pumping, Storage and Distribution
- Wastewater Collection, Pumping and Treatment
- Reclaimed Water Storage, Pumping and Distribution
- Utility Systems Hydraulic Modeling
- Large Diameter Pressurized Pipeline Design in Urbanized Areas
- Utility System Relocations, including several projects due to FDOT roadway widening

Representative Projects

- W. Central Blvd. Sanitary Sewer Replacement & Streetscape Design/Build
- Water Treatment Plant #1 System Upgrades for Control of Disinfection By-Products
- Islamorada Village Wide Wastewater System Design, Build, Operate (DBO)
- Bonneville Lift Station - PS 3321
- Hunter's Creek Pump Station
- S.R. 426 Utility Relocation Project
- Lake Alfred WWTF Upgrade and Expansion
- Crane Strand Master Pump Station
- SR 50 Station 240+75 to Station 445+37 Utilities Relocation Project (Hoosier Place Pump Station)
- Casselberry - Hunterfield Booster Station
- Umatilla Reclaimed Water Pump Station, Storage, Filtration and Disinfection System
- Hidden Springs Reclaimed Water Storage & Pumping Facility
- Sunflower Master Pump Station
- Northern Forcemain and Southern Forcemain Project/Key Largo Wastewater Treatment District
- Sandalhaven Master Lift Station
- SR 50 Station 500.00 to Station 759.00 Utilities Relocation Project
- SR 50 Station 445.00 to Station 500.00 Utilities Relocation Project
- Moselle Avenue and Corrine Terrace Pump Stations and Forcemain Replacements
- Pump Station 3028, 3202, & 3014 Replacement and Rehabilitation
- LS 249 Rehabilitation Project
- Iron Bridge RWRF Master Pump Station Rehabilitation

Detailed Project Descriptions

W. Central Blvd. Sanitary Sewer Replacement and Streetscape Design/Build

- Garney Construction along with CPH was selected by the City of Orlando for the $6.5 million dollar Design/Build project in downtown Orlando. The 0.55 mile project included upsizing the existing gravity sewer line on Central Blvd. between Glenn Ln. and Garland Ave. from an 8" sanitary sewer to a 18" & 21" sewer system.

Winter Springs WTP 1 – System Upgrades for Control of DBPs

- CPH provided complete design and construction management services for treatment system upgrades at WTP No. 1 to control DBPs for compliance with Stage 2 DBP requirements. The goal of the Project is to control DBPs to below a target goal of 60 µg/L for trihalomethanes (THMs) and 40 µg/L for haloacetic acids (HAAs).

Islamorada Village Wide Wastewater System, Design, Build, Operate

- Areas of responsibility included the design and permitting of the vacuum collection system for the Island of Upper Matecumbe Key; vacuum pumping stations for the Islands of South Plantation Key, Upper Matecumbe Key and Lower Matecumbe Key; and low pressure force main collection systems for the Island of Windley Key and portions of Upper Matecumbe Key.
- Combined the project consists of 37,410 LF of HDPE pipe ranging in size from 1 1/4-6". The team provided a complete system design including plan and profile drawings of each pipe run. The team conducted system hydraulics calculations using Sewercad. The team is providing limited CEI services for this portion of the project.

Eatonville West and East Side Wastewater Improvements

- The project includes replacement of gravity sanitary sewer lines, service laterals and manholes, replacement of existing lift station, abandonment of an existing force main and the elimination of an existing lift station, and all road replacement and/or restoration necessary to complete the project within the Town of Eatonville service area.
- The West Side Project includes the replacement of the Campus View Lift Station and its tributary gravity sewer system. The total project length is approximately 4,500 linear feet.
- It also includes replacement of the gravity sewer on Katherine Avenue and re-routing of the flows to the new Campus View Lift Station.

Northern Way Wall Stormwater Retrofit / Replacement

- CPH was tasked with the repair solution and design of the storm water outfall pipe on Northern Way and Howell Creek.
- The project included: improvements to the curb inlet; construction of a 30 foot long wall by 13.5 feet tall segmented retaining wall; and, a new HDPE drain pipe set at a lower elevation with greater flow capacity. The wall utilized a product called Redi Rock, a self-supporting retaining wall system. The inlet modification was cast-in-place concrete.

JEA Ponce de Leon WTP Pump Building & Reservoir Replacement

- Provided the preliminary and final design services as well as the permitting services and administrative services.
- The existing facility has a permitted capacity of 0.865 mgd.
- The Ponce De Leon WTP is located 600 ft off of the Atlantic Ocean, and the above grade metallic equipment and piping has subsequently corroded due to the marine environment.
- The goal of our project is to replace the corroded items with materials suitable for the marine environment.

ARRA-Funded Water System Improvements Projects

- The City of Casselberry requested that CPH assist with preparation of the necessary documentation to receive ARRA funds from the Florida Department of Environmental Protection, administered through the FDEP State Revolving Fund (SRF) Loan Program.
- The projected construction was for pipe bursting of existing 2-inch diameter galvanized through 12-inch asbestos cement (AC) pipe using high density polyethylene pipe (HDPE).
- The 6-inch and above AC pipe was to be replaced due to frequent fracturing resulting in lost water and time.
- Pipes less than 6-inches in diameter were replaced in order to provide fire protection

Chickasaw Woods & Shenandoah Park Utility System Evaluations

- CPH provided water and sewer evaluation services for the Chickasaw Woods Residential Development area. The existing water lines ranged in size from 2-inches to 8-inches in diameter. The pipe materials included AC and PVC pipe.

Dennis L. Matula, P.E., LEED AP

M/E/P Engineer

40 Total Years of Experience • 4 Years with CPH

Experience

Dennis serves CPH as the Director of the M/E/P Engineering, and has over 40 years of engineering management and design experience. Dennis has been the Engineer of Record on over 23 million square feet of commercial space. Dennis' expertise includes development and coordination of mechanical systems design, performing energy analysis, conducting site investigation activities, to validate system operations and design scope. He provides thoughtful and thorough designs defining the proper environmental conditions while stressing safety, energy efficiency, and functionality for each unique facility or campus.

Education

B.S. in Mechanical Engineering, University of Minnesota

Cortez Plaza Demolition and Façade Alteration

Lake Alfred Office/Training Center

Representative Projects

- Palm Coast WTP No. 3
- Sanford North Water Reclamation Facility
- Analysis and Redesign / Phase I Collection System
- Orange County North and South Water Reclamation Facilities
- Library Building Converted into Additional Office Space/Training Center
- Dollar General Throughout Florida
- McDonald's Restaurants Throughout the United States and Caribbean
- Shoppes at the Fountains
- Sanford Water Treatment Plant Operations Building
- Shell Creek Raw Water Pump Station Rehabilitation
- Haines City WWTF Administration/Operations Building Improvements and Headworks
- Cortez Plaza - Shoe Carnival
- Florida Agricultural and Mechanical Developmental Research School HVAC and Plumbin
- Fort Myers Facility Condition Assessments (FCA)

Detailed Project Descriptions

Sanford Civic Center

- CPH was commissioned by Sanford's Community Development Agency to provide conceptual plans for a new "Civic Center". This proposed 18,000 square foot facility will replace the existing civic center located on Seminole Boulevard which borders Fort Mellon Park and Lake Monroe. The new facility will expand present inventory of meeting rooms and flexible banquet areas for public use in the range of 500-700 people.

Sanford Airport – Terminal B Expansion

- As part of our Master Services Agreement with the Sanford Airport Authority, CPH was tasked with the Terminal Expansion project to support the current growth of passenger traffic. The $42 million expansion includes the terminal departure consolidation from a dual terminal check-in.

DeBary Public Safety Complex

- Architectural design and construction documents for a 5,600 square foot Public Safety Complex including offices and operational facilities for local law enforcement. The style of the building uses colonial detailing with a "temple front" façade, divided light windows, pitched roof, stone wainscot and white trims.
- CPH also provided site civil and master planning for future development.

West Leesburg Neighborhood Resource Center

- Architectural and M/E/P design for a new 9,000 SF Neighborhood Resource Center to include meeting spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a kitchen/café facility.

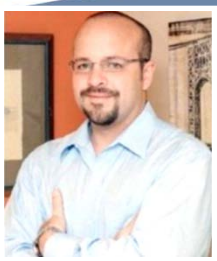
DeBary Community Park

- Planning, site design, architectural, mechanical, electrical and plumbing (MEP) engineering, permitting, surveying and construction services for a splash pad water feature and all associated appurtenances for the City of DeBary
- Electrical design included power distribution to the pump room and restroom facility. Building lighting and occupancy sensors provide a safe, well-lit environmental
- Mechanical design included general building ventilation and exhaust system along with plumbing the restroom fixtures and an outdoor shower

Fort Myers Facility Condition Assessments (FCA)

- The City of Fort Myers selected the team to perform architectural and MEP engineering design services for multiple facilities, including: South AWWTP (15 buildings), Central AWWTP (15 buildings), Water Plant (1 building), City skate park (1 building), and maintenance facility for the County Golf Course (1 building)

Palm Coast WTP No. 3



- Provided complete design and construction management services for a new water treatment facility and administration offices on a twenty-four acre campus.
- Prepared the initial project scope, budgets, surveys, preliminary and final design, permitted the project with FDEP, FDOT, Army Corp Engineers, Flagler County, City of Palm Coast, and the St. Johns River Water Management District and provided full construction engineering and inspection services for the project.

Haines City WWTF Administration/Operations Building Improvements and Headworks

- Completed the MEP design for electrical revisions and HVAC upgrades for a new split system heat pump AHU and mini-split. All equipment was circuited to existing panels and the team demoed the existing lab hood and fans. Design included upgrading the cooling requirements for the electrical room and providing condensate plumbing to a new dry well. New restroom exhaust fans were added as well.

Library Building Converted into Additional Office Space/Training Center

- Architectural and MEP engineering design services to convert their old library building into additional office space and a training center for split use by the police and fire departments
- Modification of the existing space into 3 private offices, a training room (10-20 persons), conference room, dormitories for four (4) firemen, a connecting door to both the police and fire departments and an IT server room
- The MEP design for the police and fire department involved a re-use of most HVAC and plumbing systems
- New air distribution diffusers were added for the several new spaces with a new mini-split air conditioner added to the IT server room

Jose Miguel Ortiz, MCE, P.E.

Structural Engineer

16 Total Years of Experience • 1 Year with CPH

Experience

José has over 15 years of experience in structural engineering design and project management. His experience encompasses projects of all types and complexities including commercial/retail, hospitals, educational facilities, recreational facilities, hotels/resorts, parking structures, residential, and multi-story office buildings. The depth of his technical understanding of systems and codes allows him to work with architectural / engineering teams to deliver cost-effective structural solutions to meet project goals.

Education

B.S. in Civil Engineering, Recinto Universitario de Mayaguez, UPR
M.E. in Structural Engineering, Cornell University

Professional Registrations, Certifications, Memberships

Professional Engineer – FL (No. 67920)

Key Strengths

- CPH also provided site civil and master planning for future development.

West Leesburg Neighborhood Resource Center

- Architectural and M/E/P design for a new 9,000 SF Neighborhood Resource Center to include meeting spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a kitchen/café facility.

Seminole Science Charter School Improvements

- Converted a religious facility into a complex of spaces at the Seminole Science Charter School
- Included a gymnasium, cafeteria, media center, administrative offices, and classrooms for elementary and middle school
- The total enrollment for the charter school is 550 students with a building footprint of 32,065 sq. ft.
- The renovated building will be enhanced by two (2) thirty ft. towers with concrete tile roofing at the front façade, one of the towers will have a clock at the top and the other tower will accommodate the name of the school

Westfield Mall and Theater

- Commissioned to assist with the site plan submission for the proposed theater addition for Westfield Mall
- Involved a 55,000 square foot expansion to the existing mall along with modification to existing entrances
- Our services also included modification to existing parking lot and traffic patterns, landscape improvement and civil storm water design.

Saint John's Primary School, St. Kitts & Nevis Islands, BVI

- 2-Story Educational Building, 4,000 S.F. Building
- Assembled drawings/calculations for permitting, managed overall engineering design efforts, coordination with architects and M/E/P, and performed seismic/wind design

Charleston Secondary, St. Kitts & Nevis Islands, BVI

- 2-Story Educational Building
- 6,000 S.F. Building
- Assembled drawings/calculations for permitting, managed overall engineering design efforts, coordination with architects and M/E/P, and performed seismic/wind design

Thomas J. Galloway, PSM

Project Surveyor

25 Total Years of Experience • 14 Years with CPH

Experience

Mr. Galloway has over 25 years of experience in the surveying and mapping profession, and has a Bachelor of Science of Surveying and Mapping from the University of Florida. His experience ranges from working in the field and office on small to large development projects, to serving as Party Chief/Survey CADD Technician, Project Manager and Survey Manager. Mr. Galloway has served as Principal and Director of the Surveying Division of the firm since its establishment in 2001. He has overseen the department's growth from two survey crews to managing the current seven survey crews. Additionally he has been personally involved in over 2,500 surveys while at CPH.

- Midway Utilities Replacement - Phase 1
- Palm Coast WTP No. 3
- Alabama Avenue Greenway Ph I & II (FDOT LAP)
- Water Main Looping Construction
- Magnolia Avenue Streetscape – Winter Springs, FL
- Volusia County School Board - Multiple School Sites
- Immokalee Farmer's Market – Florida Agricultural Department
- Easthampton Multi-Use Trail (FDOT LAP)
- State Road 434 Widening Project
- Volusia-Sanford Reclaimed Interconnect
- Seminole Wekiva Trail, Phase IV (FDOT LAP)

Detailed Project Descriptions

US 17/92 Riverwalk, Phase II & III (FDOT LAP)

- Project consisted of 1.5 miles of 10-14 foot wide trail
- Included replacement of 5,500 feet of seawall along Lake Monroe, trail head parking, a prefabricated pedestrian bridge over Mill Creek, hardscaping, landscaping, and lighting
- LAP Funded and extensive coordination with FDOT
- Advanced coordination with SJRWMD and FDEP because of work within sovereign submerged lands, replacement seawall, and pedestrian bridge

Sanford 1st Street Streetscape Improvements (FDOT LAP)

- Streetscape design package for a 6 block section of historic First Street (approximately 0.40 miles)
- Designed the roadway, landscape, architecture, and utility plans and prepared specifications for the complete reconstruction of the roadway, including several utility upgrades
- LAP Funded and extensive coordination with FDOT
- Responsible for detailed maintenance of traffic plans and utility relocations
- The team used its in-house 3D survey team to provide right-of-way surveys, while minimizing impacts to traffic and to provide a "virtual tour" of existing conditions and the proposed improvements during the public relations effort

Alabama Avenue Greenway Ph I & II (FDOT LAP)

- Provided civil, planning, survey, landscape architecture, permitting
- Project consisted of 2.1 Mile Multi-Use Path/ 12' Wide
- Responsible for planning and Study of 5 Mile Extension Phase II
- LAP Funded and extensive coordination with FDOT
- Extensive public involvement and limited ROW and easements

Immokalee Farmer's Market – Florida Agricultural Department

- Provided architectural and construction inspection services for the storm damage repair
- Evaluation of existing facilities
- Designed three new facilities totaling over 81,000 sq. ft.

Palm Coast WTP No. 3

- New 3 MGD water treatment plant utilizing the LPRO treatment technology to treat the confined surficial aquifer water
- Plant was designed to facilitate expansion from 3 MGD to 9 MG
- Chemical storage building (4,500 sq. ft.)
- Operation building designed included the laboratory, training rooms, administration offices & locker rooms (6,500 sq. ft.)
- The building was designed to accommodate both the water treatment staff as well as future wastewater personnel

TGK Booking Center – Miami-Dade Corrections and Rehabilitations Department

- Provided architectural, civil, and surveying services for the addition of centralized booking to the Turner Guilford Knight Correctional Center for the Miami-Dade Corrections and Rehabilitations Department requested
- The final design chosen by the Corrections Department was derived from the initial study the team previously performed
- In order to establish a centralized booking area, separate entrances for law enforcement officers (LEOs) and inmates were designed
- Converted an existing covered parking garage into a secured bus drop-off area for the inmates
- The construction documents included plans for demolition, grading, site dimensioning, structural and electrical work

Seminole Wekiva Trail, Phase IV (FDOT LAP)

- Provided civil, survey, landscape architecture, permitting
- Project consisted of 2.5 Mile Multi-Use Path/14' Wide
- LAP Funded and extensive coordination with FDOT
- Coordination with multiple municipalities

Volusia-Sanford Reclaimed Interconnect

- This project will connect to the existing 20-inch DIP line with a new 20-inch DIP line and head north through Seminole County's Lake Monroe Park (Wayside Park)
- The line will be drilled beneath the St. Johns River into Volusia County on the north side of the river, then moved north along the FDOT right of way for US Highways 17/92 and enter Volusia County's Lake Monroe Park
- Also performing the design permitting and construction services for the Volusia County portion of this project
- The projected flows to be sent to Volusia County are between 150,000 to 1,500,000 GPD

Randall "Randy" L. Roberts, PSM

Project Surveyor

43 Total Years of Experience • 13 Years with CPH

Experience

Mr. Roberts has over 43 years of experience and serves the firm of CPH as a Quality Control Survey Manager. Prior to joining CPH, he worked in the Central Florida area and performed boundary, topographic, route, mortgage and as-built surveys, along with preparing subdivision plats, wetland location and FEMA elevation certificates. Mr. Roberts also has experience with utility route surveys including the following: Lake Bryan 69kv line for Florida Power Corporation transmission line through 7 miles in Orange County; and Altamonte 115kv line for Florida Power Corporation transmission line through 11 miles in Seminole County.

- Sanford North WRF Reclaimed Water Augmentation System
- S.R. 528 Utility Relocations
- S.R. 426 Utility Relocation Project
- Lake Harriet Water Transmission Main
- S.R. 50 Utility Relocation Project

Detailed Project Descriptions

Sanford 1st Street Streetscape Improvements (FDOT LAP)

- Streetscape design package for a 6 block section of historic First Street (approximately 0.40 miles)
- Designed the roadway, landscape, architecture, and utility plans and prepared specifications for the complete reconstruction of the roadway, including several utility upgrades
- LAP Funded and extensive coordination with FDOT
- Responsible for detailed maintenance of traffic plans and utility relocations
- The team used its in-house 3D survey team to provide right-of-way surveys, while minimizing impacts to traffic and to provide a "virtual tour" of existing conditions and the proposed improvements during the public relations effort

Area IV Well Outfitting and Raw Water Transmission Main- Phase I and II

- Phase I- Drilling of 5 water supply production wells, 3 saline water monitoring wells, outfitting of 6 production wells, and construction of approximately 72,000 l.f. of new raw water transmission main (16-20-inch diameter pipeline) from the City's Mourning Dove Water Treatment Plant to the Area IV well field
- Phase II- Well drilling of 8 production wells and 1 saline water monitoring well, conversion of 1 test well to a production well, and well outfitting of 9 production wells
- Additionally, the project included the construction of approximately 18,975 linear feet of raw water transmission main from the north end of the existing Area IV Phase 1 Wellfield (near well 408) to each of the Area IV Phase 2 production wells (Wells WR-1 through WR-9)

Sanford North WRF Reclaimed Water Augmentation System

- The reclaimed water augmentation facility has a design capacity of 7.3 MGD.
- Assisted the City in obtaining low interest construction loans through the SRF program as well as a matching grant from the US EPA.
- The final augmentation system improvements include the following improvements: Lake Water Pumping Station and screening facilities, Fifteen (15) deep-bed, continuous backwashing, upflow tertiary filters, 2.0 MG reclaimed water ground storage tank, SCADA system improvements, Ancillary filtration and chemical feed equipment involving the installation of two (2) 4.0 MGD ACTIFLO Treatment Units

Seminole Wekiva Trail, Phase IV (FDOT LAP)

- Provided civil, survey, landscape architecture, permitting
- Project consisted of 2.5 Mile Multi-Use Path/14' Wide
- LAP Funded and extensive coordination with FDOT
- Coordination with multiple municipalities

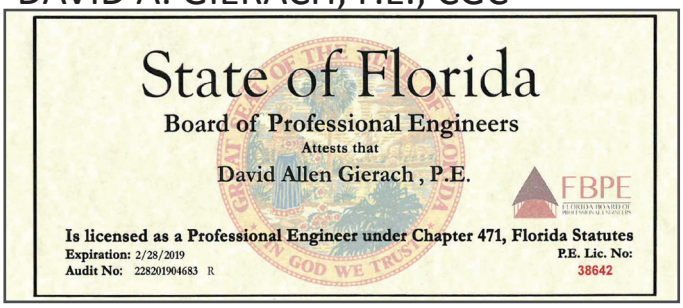
SR-50 Utility Relocation Project

- Provided improvements to over 13 miles of the water distribution system and wastewater collection and transmission system within the SR-50 Corridor, one of the busiest roads in Central Florida – which is being expanded from 4-lanes to 6-lanes
- The utility improvements include building new facilities as well as the removal of facilities in conflict with the FDOT roadway design

Easthampton Boulevard Parkway Multi-Purpose Trail (FDOT LAP)

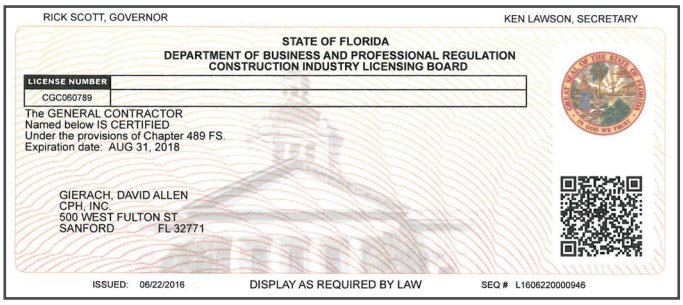
- 1.25 mile, 10-ft wide concrete trail
- Included a prefabricated pedestrian bridge and required a drainage analysis to maximize the remaining swale, minimize earthwork, and to maintain the City's conveyance system

SR-426 Utility Relocation Project



- Constructed in conjunction with the FDOT widening project of 1.2 miles of SR-426 and was constructed as a Joint Project Agreement (JPA).
- Relocation of 10-inch water main along SR-426 that was in conflict with FDOT's improvements. The existing 10-inch water main was replaced with a 16-inch.
- Installation of a new wastewater system in the area consisting of over 4,000 ft. of a gravity sewer lines ranging from 8-inch to 15-inch and a new master lift station and 1,300 ft. of a 10-inch force main including a 270 ft. directional drill under Red Bug Lake Road.

Sanford South Water Resource Center



- Design, permitting and construction services associated with a new 6.0 MGD BNR facility
- Influent Structure (1 mm screening system, master lift station, odor control system and grit removal)
- Oxidation Ditch biological treatment system (BIODENITRO/BIODENIPHO)
- Secondary clarification system (high efficiency) and RAS/WAS pumping systems
