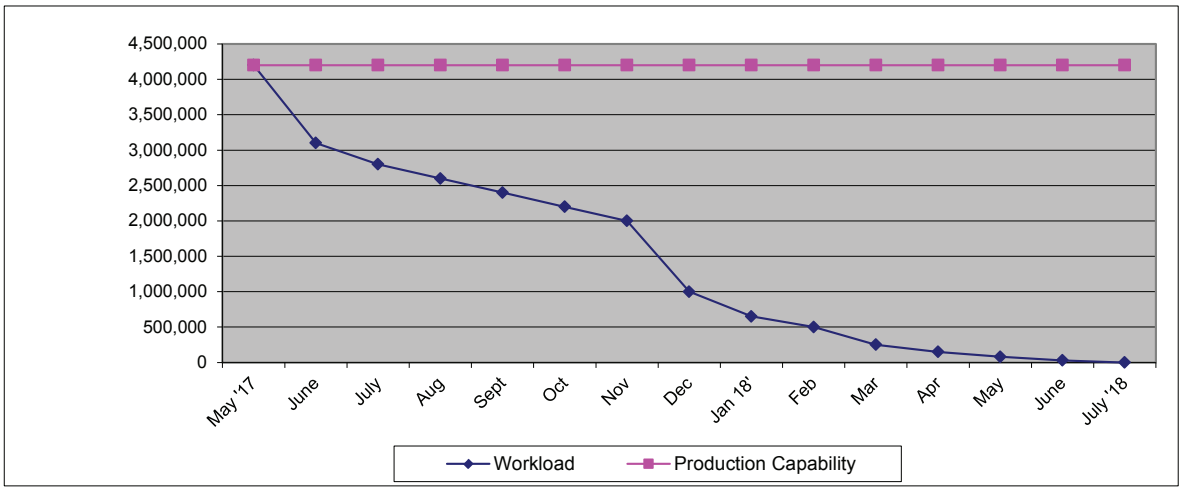
CERTIFIED MINORITY BUSINESS ENTERPRISE

Minority Business Enterprise

CPH is not a Florida Certified Minority Business Enterprise, however, we have established working relationships with many minority firms in the area.

Commitment To Diversity Among The Firm



CPH has a culturally and ethnically diverse workplace from it owners to employees. CPH employs a workforce that is reflective of many nationalities and cultures. We have established programs and policies for recruiting and retaining minority and women engineers and staff, and strongly encourage all of our employees to become involved in our communities. It is the policy of CPH to provide equal employment opportunity at all times in all actions related to employment without regard to race, color, religion, gender, citizenship status, age, national origin, disability, veteran status, sexual orientation, or any other status protected by state or federal law. This policy applies to recruiting, hiring, training, promotion, evaluation, termination, compensation, benefits eligibility, working conditions and all other aspects of employment. The Firm supports a policy of actively recruiting and retaining a diverse workforce to support both our Equal Employment Opportunity Policy and our business objective to provide the highest quality service possible. CPH is committed to fostering an inclusive atmosphere that seeks actively to employ people of diverse backgrounds at all levels of the Company including top management and ownership.

CONSULTANT'S WORKLOAD/PERFORMANCE CAPABILITY

The CPH team is extremely well qualified to provide services to the City of New Smyrna Beach. The team has provided services for numerous similar size municipalities under Continuing Contracts for over 30 years. As a result the team understands the need to provide quality responsive services and is staffed to provide services for planned tasks as well as un-planned emergencies. The CPH team is a clear choice for the City and will bring the same level of quality and professionalism as we have provided to other clients to the City's projects.

Our team has the staffing and availability to start working on the City's projects immediately. CPH will work diligently to provide the services for the City of New Smyrna Beach in the time frames requested. CPH is uniquely qualified to provide these services as a result of the staffing capacity of the firm. The CPH team monitors schedules and budgets through various project management and scheduling software including time management software that gives our project managers access to real-time project charges and budget comparisons. As a result of the wealth of knowledge and staffing at the firm, the team is able to pull additional help to ensure the services are provided in a timely manner in the event additional help is needed to stay on schedule. This level of staffing also includes general contractors and estimators. In addition to architects, landscape architects, engineers, and construction personnel, the team has the added value of having on-staff licensed general and utility contractors that can review projects from various perspectives. With experienced personnel that have provided construction services for over 35 years, this enables us to review the project from a constructability and/or means and methods view point. In addition, the licensed on staff contractors review projects and provide "real-time" cost estimates throughout the duration of the project. This construction experience allows the team to view these projects through the eyes of a contractor with the ability to identify intangible cost factors/elements such as restricted site conditions, specialized equipment requirements, excessive material and labor costs, impacts on schedules, etc. that may not be apparent.

The current and projected workload of our team is such that we can provide responsive service to the City of New Smyrna Beach. We are well-staffed, equipped with our nearby locations, and believe that we and our team members can provide a high quality, professional service to the City that is completely responsive and cost effective. The graph adjacent depicts our current contracted backlog with no consideration for any additional work. The current workload will spread over 18 months. Our current production capability is $4,500,000 per month. With that capacity, there are more than adequate personnel hours to cover the workload.

ABILITY TO MEET BUDGET AND TIME REQUIREMENTS

CPH is uniquely qualified to provide design services for Client. The team located in our Office office includes engineers, designers, surveyors, environmental scientists and administrative personnel. CPH is currently finishing design services for other clients, but is actively seeking work for our Office staff. As a result, our staff is available and has the capacity to perform projects as they are assigned. CPH is committed to meeting budget and schedule requirements. CPH has developed a reputation for cost effective, quality-engineering services through a philosophy of strong project management. Operating under aggressive deadlines and close coordination with City Staff, we commit to manage each work assignment under this contract based upon the following philosophies:

- By proposing a project manager with experience working in Client
- Frequently involve City staff in meetings to expedite decision-making.
- Utilize e-mail and short memoranda to document progress of construction. Report status of the budget on a monthly basis in report form to City Staff.
- Prepare and distribute a Project Specific Workplan which details the following:
    - What is to be done – Define a scope of services by bringing in the stakeholders up front to discuss the project goals and objectives.
    - Who is going to do it – Monitor staffing usage, needs and expenditures bi-weekly through our accounting software.
    - When it will be done – Maintain the Project Schedule using Microsoft Project software for scheduling and tracking.
    - How much it will cost – Monitor the estimated construction cost using trend reports prepared monthly and based on the most up-to-date data available from published prices and any known quantity revisions for the past month.
    - How it will be controlled – CPH will strive to provide quality service within the project schedule and require Quality Assurance/Quality Control (QA/QC) procedures to be identified in the initial internal project kick-off meeting. Time for QA/QC is incorporated into the project schedule, therefore, will not delay project milestones. CPH has developed an extensive QA/QC procedure and incorporates it into each of its projects to ensure client satisfaction.

CPH has been serving the needs of numerous Florida communities since 1959. The firm has grown to over 240 employees and 16 offices nationwide. Our team has consistently ranked among Engineering News-Record's Top 500 Design Firms. Our capacities in Florida include over 240 staff members with nearby offices in Sanford and DeLand allowing us the accessibility to easily perform services for the City of New Smyrna Beach. Our extensive history of providing solutions for Florida communities has prepared our team to successfully deliver services for projects both large and small. CPH has been delivering civil engineering planning, design, and construction services to local governmental agencies for more than 55 years. We are proud of our long-term relationships with our clients. In fact, 90% of our business is providing services for existing clients. We strive to provide excellent client service and maintain our distinguishing qualifications, including:

- Comprehensive local resource and experience supported by a highly-skilled, multi-disciplinary staff able to provide the City of New Smyrna Beach with a single-source solution for a broad range of projects.
- Local, Regional and National civil engineering experience and understanding that is essential to successfully complete projects on time and within budget.
- A commitment to client satisfaction and, as an employee-owned firm, our personnel have a vested interest in ensuring the City of New Smyrna Beach is invariably satisfied with our services.

We have assembled a diverse and highly qualified team with extensive experience in all discipline areas requested by the City. Our team has the capabilities and expertise to complete the City's projects successfully.

EXPERIENCE

We have worked with many of our clients for 40 years. These long term relationships have afforded us many opportunities to meet our client's needs and perform municipal engineering services. Over the years, as their population increased, regulations changed, or needs changed, CPH acted as their continuing design firm providing planning for improvements, design, funding assistance, and construction administration. In addition, CPH has been able to assist when the workload at the City departments exceeded their capability to complete engineering development reviews in a timely fashion. The team has extensive experience in working under continuing contracts and is available for planned projects as well as un-planned emergencies.

City of Sanford

Continuing Services Contract

CPH has been providing services to the City of Sanford since the 1960's. During that time, we have completed project that include streetscapes, roadways, parks, trails, stormwater, pipelines, treatment plants, pump stations, office, and redevelopment/historic renovations.

Services for these projects have included:

- Architecture
- Engineering
- Planning
- Landscape Architecture
- Transportation/Traffic
- Construction Administration
- Public Relations
- Environmental

We encourage you to contact the City of Sanford about our ability to provide the required services, and our team's history of success implementing projects.

Sanford 1st Street Streetscape, Gateway, Drainage, and Utility Project
CPH provided the City of Sanford a streetscape design package for a 6 block section of historic First Street. CPH designed the Roadway, Landscape, Architecture, and Utility Plans and prepared Specifications for the complete reconstruction of the roadway, including several utility upgrades. Located within the historic district, all accessible routes were upgraded to meet current ADA criteria, including the intersection with US 17-92. The two-lane urban section includes parallel parking and speed tables for traffic calming.

CPH's services included the conceptual and final design of a Gateway Entrance Feature introducing the historic district. A detailed Public Involvement Plan was implemented to ensure input and direction from City officials and all other key stakeholders. CPH used its in-house 3D survey team to provide right-of-way surveys, while minimizing impacts to traffic. CPH was also responsible for utility relocations which consisted of relocating existing potable water main and installing new fire hydrants, services, and meters.

Featured Projects

1. US 17/92 Beautification
This FDOT LAP project included a one mile beautification with median, lighting, and pedestrian upgrades.

2. St. Johns Parkway
The projects included widening an existing roadway and construction of 1/2 miles of new four-lane, and a new stormwater system.

3. Memorial Stadium
The project included repairs to the steel deck, concession and ADA upgrades. Two new locker rooms and a multi-purpose room were added.

City of Palm Coast

Continuing Services Contract

CPH has been providing services to the City of Sanford since 1999. During that time, we have completed project that include roadways, trails, stormwater, pipelines, treatment plants, pump stations, and office.

Services for these projects have included:

- Architecture
- Engineering
- Planning
- Landscape Architecture
- Transportation/Traffic
- Construction Administration
- Public Relations
- Environmental

We encourage you to contact the City of Palm Coast about our ability to provide the required services, and our team's history of success implementing projects.

Belle Terre Parkway

CPH provided complete design for the Belle Terre Parkway four-laning. The project consisted of reconstructing approximately 4.1 miles of an existing 2-lane rural road to a 4-lane divided urban roadway with four 12-foot travel lanes and two 4-foot bicycle lanes.

- Complete hydraulics analysis for the primary and secondary systems
- 0.6 mile realignment of the northern end of Belle Terre Parkway
- 0.12 mile two-lane curb and gutter extension
- 5 Signalized Intersections (Mast Arm) (interconnected)
- Four-Phased Maintenance of Traffic Plans
- Right-of-Way Acquisition services
- Traffic Volume Projections & Signal Warrant Analyses
- Access Management Analysis
- Utility Relocation
- Undergrounding 2 miles of Power/Fiberoptic
- Wetland and Floodplain Impacts

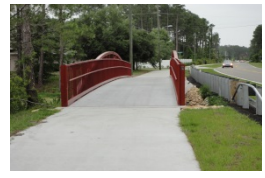
Featured Projects

1. City-Wide Swale Rehab

This project consisted of the rehabilitation of 50 miles of roadside swales throughout the City to address resident and flooding concerns.

2. Belle Terre Trail

This project included 3.5 mile, 10' wide asphalt path, and a 1.2 mile, 10' wide concrete multi-use path, and 2 pedestrian bridges.



3. R.O. WTP

The project included a 3.0 MGD expandable to 9.0 MGD Reverse Osmosis plant with administration offices, storage tanks, and a SCADA system.

Volusia County

Continuing Services Contract

CPH has been providing services to Volusia County since 1974. During that time, we have completed project that include roadways, parks, trails, stormwater, pipelines, treatment plants, pump stations, and office.

Services for these projects have included:

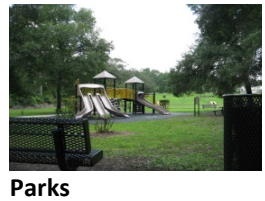
- Architecture
- Engineering
- Planning
- Landscape Architecture
- Transportation/Traffic
- Construction Administration
- Public Relations
- Environmental

We encourage you to contact Volusia County about our ability to provide the required services, and our team's history of success implementing projects.

Tenth Street

CPH provided design services for the reconstruction of 1.2 miles of an existing 2-lane rural road to a 4-lane divided urban road. The cross-section included four 12-ft lanes with 4-ft bike lanes in both directions. CPH also assisted Volusia County by preparing right-of-way maps, and legal sketches and descriptions for the additional right of way and pond sites. The project was associated with two Volusia County Schools which included detailed coordination and scheduling between Publics Works Department and the School Board.

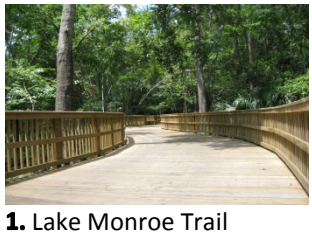
The maintenance of traffic was also a critical element to maintain to ensure full access to both schools, by both vehicles and pedestrians, during construction. The proposed stormwater management facilities included joint use between the roadway project and one of the school's properties.



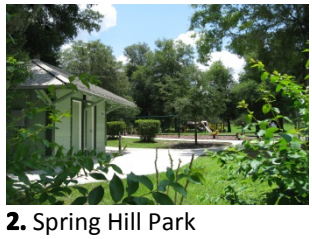
PROJECTS List

Streetscape/Trails
>Lake Monroe Trail
>Spring Hill Trail

Roadways
>Rhode Island Avenue
>Tenth Street
>Westside Parkway



Parks
>Spring Hill Park
>Lighthouse Point Park



Utilities
>Sanford Interconnect
>Halifax R.O. WTP
>SW Regional WWTP
>SE Regional WWTP
>Deltona North WWTP
>NE Regional WWTP
>Reclaimed System

Featured Projects

1. Lake Monroe Trail
This project included a 3 mile, 12' wide multi-use trail, with 340 feet of boardwalk over wetland areas.

2. Spring Hill Park
The projects included a expansion of a park to include basketball court, restroom facility, tot lot, trails and a pavilion.

3. Rhode Island Avenue
The project included 1.4 miles of new 2-lane divided rural road with raised curbed median, and re-design of a signalized intersection.

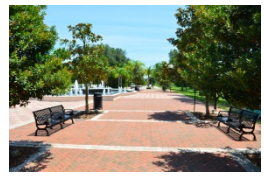
City of Winter Springs

Continuing Services Contract

CPH has been providing services to the City of Winter Springs since 1974. During that time, we have completed project that include streetscapes, roadways, parks, trails, stormwater, pipelines, treatment plants, pump stations, and office.

Services for these projects have included:

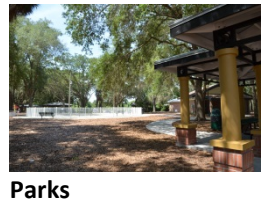
- Architecture
- Engineering
- Planning
- Landscape Architecture
- Transportation/Traffic
- Construction Administration
- Public Relations
- Environmental



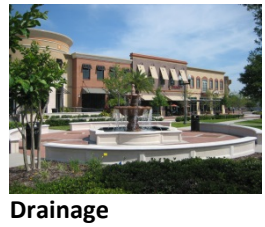
We encourage you to contact the City of Winter Springs about our ability to provide the required services, and our team's history of success implementing projects.

Blumberg Trail
CPH provided roadway, trail, and utility design for Blumberg Avenue. In addition to the roadway, CPH provided a 12 Ft. wide trail in the median with one way roads on each side. The Trail connects the Cross Seminole Trail with the Winter Springs Town Center.

The trail was designed to resemble a walk-through French Provincial Garden. A series of garden rooms were created, highlighted by garden pavilions, classical pergolas and a welcoming fountain at the north entrance to the corridor. Landscaping is designed to be colorful and lush, with stately Sylvester Palms guiding your way along the Trail. Concrete pavers were used for surfacing. Patterns change as you enter into the street or into a new garden space.



PROJECTS List



Streetscape/Trails
>Blumberg Trail
>Magnolia Trail
>Towne Center Streetscape

Roadways
>Blumberg Road
>Residential Traffic Calming Program

Parks
>Towne Center Park
>Central Winds Sports Complex
>Torcaso Splash Park
>Trotwood Splash Park

Drainage
>Towne Center Stormwater Master Plan
>City Wide Stormwater Master Plan

Utilities
>Reclaimed Water System
>Central WTP
>West WRF
>East WRF
>Lift Station 7
>Oak Forest RW Storage and Pumping

Featured Projects

1. Trotwood Splash Park
2800 sq.ft. splash pad water feature, restroom building, pump room, in-ground water tank, water/ sewer lines and additional sidewalks.

2. Sports Complex
The projects included drainage, utility, and entry feature upgrades. Addition of 2 soccer fields, restrooms and picnic pavilions was included.

3. Torcaso Park (CDBG)
The project included a pond with a surrounding active park. Paved trails, basketball court, activity stations, splash pad, and a gazebo were included.

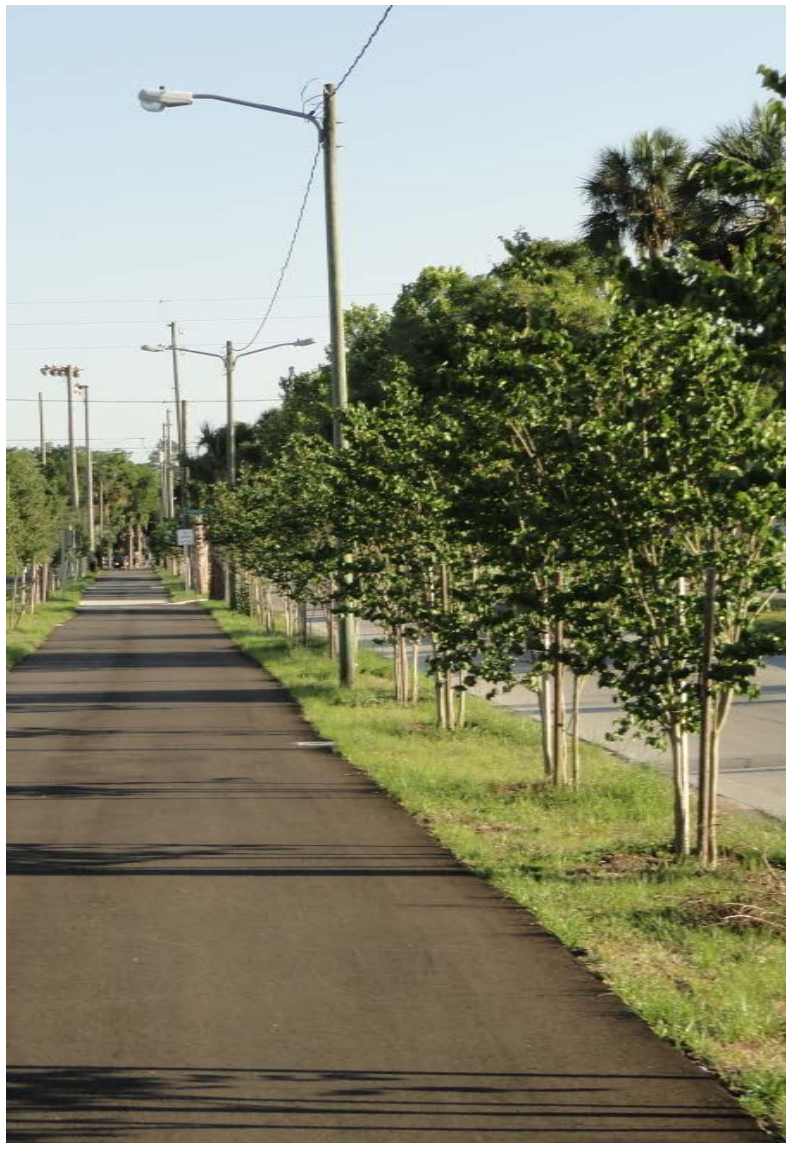
City of DeLand



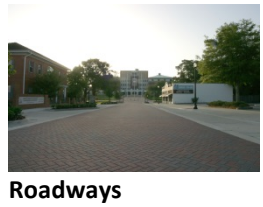
Continuing Services Contract

CPH has been providing services to the City of DeLand since 1997. During that time, we have completed project that include streetscapes, roadways, parks, trails, stormwater, office, and redevelopment/historic renovations.

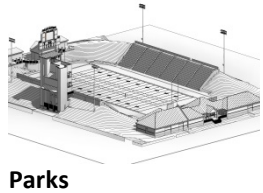
Services for these projects have included:

- Architecture
- Engineering
- Planning
- Landscape Architecture
- Transportation/Traffic
- Construction Administration
- Public Relations
- Environmental

We encourage you to contact the City of DeLand about our ability to provide the required services, and our team's history of success implementing projects.



Alabama Ave Greenway (Phase I and Phase II)
The project included the design and CEI of a 1.4 mile shared use path Portions of the project were located on the City's existing property, while other areas travel through some of the historic neighborhoods with limited right-of-way. The areas with narrow right-of-way required narrowing the existing roadway, and overlaying portions of the existing road to provide adequate drainage without adding additional structures. This not only saved money by avoiding additional structures and pipe, but also saved a lot of time by eliminating the need to open cut the existing road. The project included a second study phase from the northern terminus for 5 miles. Phase 2 of the project consists of a 0.70 mile extension of the original 1.20 mile trail. This phase includes the design and permitting of a 10' - 12' wide asphalt and concrete trail through Stetson University, requiring extensive coordination and a combination of permanent and temporary construction easements from Stetson.



PROJECTS List

Streetscape/Trails
>Alabama Ave. Greenway Phase I
>Alabama Ave. Greenway Phase 2
>Alabama Ave Trail Northern Extension
>Woodland Blvd Streetscape
>Indiana Ave. Streetscape

Roadways
>5 Year Dirt Road Paving Program
>Alabama Ave Regrading

Parks
>Spec Martin Stadium
>Earl Brown Park

Drainage
>SR 44 Drainage

Featured Projects

1. Woodland Blvd
Reconstruction of 12-blocks of roadway, sidewalks, planters, and re-design of the signalization for five intersections.

2. Spec Martin Stadium
The development of the design/build criteria package. The project involves a new press box, training room and locker room additions.

3. SR 44 Drainage
Analysis and design of flood improvements. CPH helped the City obtain $540,000 of funding from FDOT through a Joint Project Agreement (JPA).

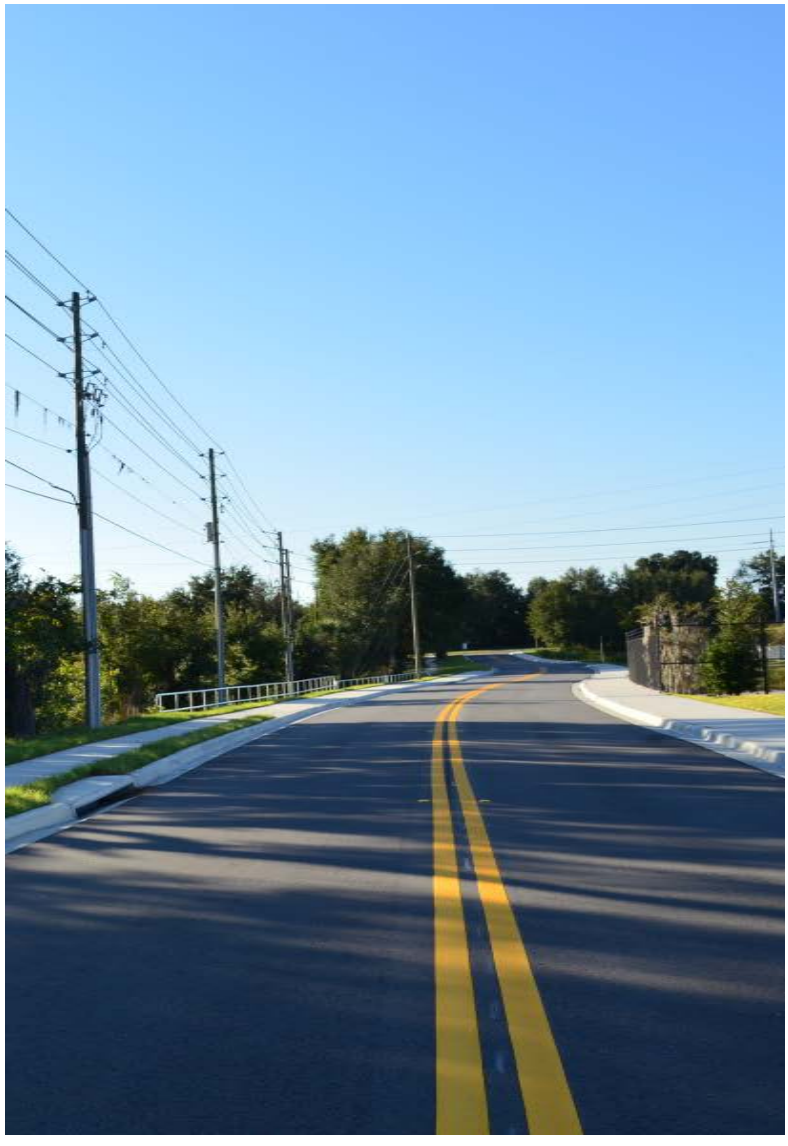
City of Lake Mary



Continuing Services Contract

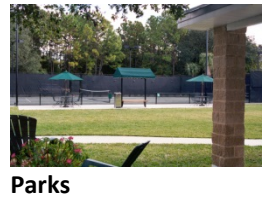
CPH has been providing services to the City of Sanford since 1975. During that time, we have completed project that include streetscapes, roadways, parks, trails, stormwater, pipelines, treatment plants, pump stations, and office.

Services for these projects have included:

- Engineering
- Planning
- Landscape Architecture
- Transportation/Traffic
- Construction Administration
- Public Relations
- Environmental

We encourage you to contact the City of Lake Mary about our ability to provide the required services, and our team's history of success implementing projects.

Sand Pond Road and Skyline Drive
CPH completed the Sand Pond/Skyline roadway project for the City of Lake Mary. The 1.25 mile project consists of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides. The project also included extending Skyline Drive from its current terminus approximately 1,100-feet to Emma Oaks Trail. The design implemented recommendations identified in a previous study to eliminate roadway flooding, improve traffic flow, and improve safety along the corridor. Services included geometric design to correct the horizontal and vertical alignments to comply with current standards, pavement analyses to determine the strength and integrity of the existing base material, hydraulic modeling for the proposed stormwater management system, utility coordination and permitting through SJRWMD and Seminole County.



PROJECTS List

Streetscape/Trails
>Rinehart Road Trail
>Gateway & Fountains

Roadways
>Skyline/Sand Pond Road
>Rinehart Road
>International Parkway

Parks
>Tennis Center
>Sports Complex
>Trailhead Park

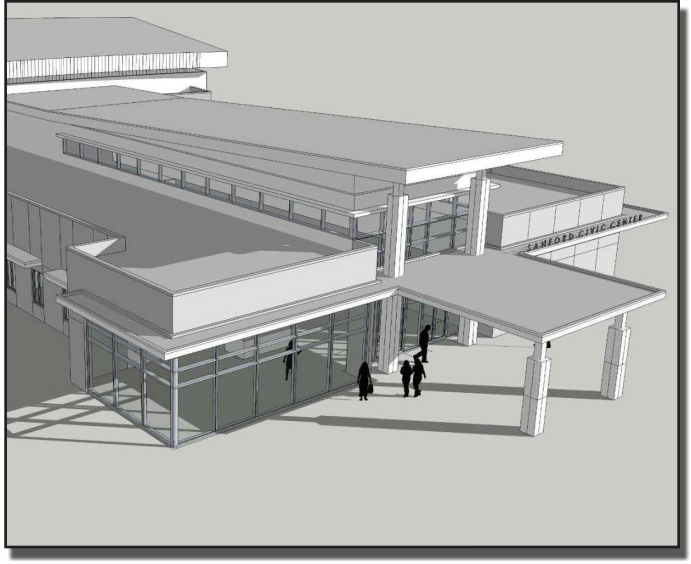
Drainage
>Soldier's Creek
>Master Drainage Plan
>Sand Pond Drainage

Utilities
>Downtown Sewer System
>Main WTP
>Reclaimed Water System
>Utility Master Plan
>Elevated Ground Storage Tank

Featured Projects

1. Gateway Park
The gateway feature included fountains, seating, lighting, and pavers. The pavers were used as a "dedication" feature, and help offset funding.

2. Rinehart Road / Trail
The project included a 12'- 2.1 mile asphalt trail and the widening from a 2 lane to a 4 lane divided urban roadway.



3. Sports Complex
The project included a multi-purpose playing field, two softball fields, two little league/t-ball fields, and one picnic area with a fishing pier.

SANFORD CIVIC CENTER

SANFORD, FL

PROJECT DESCRIPTION

CPH was commissioned by Sanford to provide conceptual plans for a new 18,000 square foot “Civic Center” which will replace the existing Civic Center. The new facility will expand present inventory of meeting rooms and flexible banquet areas for public use in the range of 500-700 people. Specific meeting rooms and offices will be provided for senior citizens. Prefunction social gathering areas will be complimented by massive exterior covered patio’s and spacious interior circulation spaces. Provisions will also include landscape alcoves, delivery ports for catered service and abundant parking within the borders of the site.

ORLANDO/SANFORD INTERNATIONAL AIRPORT TERMINAL B EXPANSION

SANFORD, FL

PROJECT DESCRIPTION

As part of our Master Services Agreement with the Sanford Airport Authority, CPH was tasked with the Terminal Expansion project to support the current growth of passenger traffic. The $42 million expansion includes the terminal departure consolidation from a dual terminal check-in. The improvements also include new consolidated loading and unloading facility, curbside transportation improvements, a covered baggage drop off, apron addition, four new gates, parking lot improvements, terminal building improvements and renovation, as well as transportation improvements that include a new traffic signal and alternate entrances to the parking lots. CPH is providing engineering, surveying, architectural, and MEP services for this project.

PROJECT COST
$TBD

SPRINGHILL BOYS & GIRLS CLUB

DELAND, FL

PROJECT DESCRIPTION

CPH provided architectural and engineering services for the new Boys and Girls Club building constructed in Spring Hill. U.S. Rep. John Mica rallied for approximately 5 years to raise funds and approval for the new building. CPH designed a 2,700 sq. ft. free-standing masonry building with a pre-engineered wood truss roof with architectural fiberglass shingle roofing. The Building is twice the size of the previous plan.

The Facility includes a large Foyer where the children will gather when they first enter the building. The other functions of the building are various sizes of Activity Rooms, a Media Center, a Break Room and an Administration Office. The ancillary rooms include ADA Restrooms and a Mechanical/ Electrical Room.

The original estimated construction cost of this project was $259,000. The actual construction cost was $250,000.

ORIGINAL ESTIMATED COST
$259,000

PROJECT COST
$250,000

BELLE TERRE PARKWAY FOUR-LANING

PALM COAST, FL

PROJECT DESCRIPTION

CPH provided complete transportation planning and design services including preliminary engineering analysis, pond siting, roadway realignment alternatives, roadway design, drainage design, traffic analysis and design, landscape architecture, utility design and coordination, right-of-way impact analysis and acquisition, design surveying, and environmental services for the Belle Terre Parkway four-laning. The project consisted of reconstructing approximately 4.1 miles of an existing 2-lane rural road to a 4-lane divided urban roadway with four 12-foot travel lanes and two 4-foot bicycle lanes.

Transportation Design Services consisted of:

- Roadway analysis and design to convert the existing 2-lane rural roadway to a 4-lane urban roadway
- Complete hydraulics analysis for the primary and secondary systems
- 0.6 mile realignment of the northern end of Belle Terre Parkway
- 0.12 mile two-lane curb and gutter extension of Buffalo Bill Drive from the existing Belle Terre Parkway to the realigned Belle Terre Parkway
- 5 Signalized Intersections (Mast Arm) (interconnected)
- Four-Phased Maintenance of Traffic Plans
- Pond Siting Analysis
- Right-of-Way Impact Analysis and Acquisition services
- Traffic Volume Projections
- Signal Warrant Analyses
- Access Management Analysis
- Utility Relocation Coordination, including undergrounding 2 miles of FPL, Bright House, and ATT facilities and 2.1 miles aboveground relocations
- Wetland and Floodplain Impacts - Permitting and Mitigation
-

Original estimated construction cost was $38 Million. Actual cost was $32 Million.

ORIGINAL ESTIMATED COST
$38,000,000

ACTUAL PROJECT COST
$32,000,000

US 17-92 RIVERWALK, PHASE II & PHASE III (FDOT LAP)

SANFORD, FL

PROJECT DESCRIPTION

PHASE II

The FDOT LAP project included 1.5 miles of 10-14 foot wide trail, replacement of 5,500 feet of seawall along Lake Monroe, trail head parking, a prefabricated pedestrian bridge over Mill Creek, hardscaping, landscaping, and lighting. The concept design of the trail necessitated significant coordination with FDOT to gain their support for the necessary variations from Department standards, and their approval of the necessary reduction in shoulder widths and use of Rectangular Rapid Flashing Beacon (RRFB) at two mid-block crossings. The design included advanced coordination with SJRWMD and FDEP because of work within sovereign submerged lands, replacement seawall, and pedestrian bridge.

PHASE III

CPH provided planning, survey, and design services for a 1.7 mile extension to an existing trail. The new extension connects to the previous phase designed by CPH and is the final connection between the I-4 Corridor with the adjacent Seminole County Rinehart Trail and the downtown Sanford RiverWalk Trail system. Additionally, these improvements filled the largest remaining gap within the Lake Monroe Trail Loop system which spans both Seminole and Volusia Counties. This project followed the complete streets design elements with the provision of a Multi-Use Trail, Roadway safety improvements, Traffic Calming design, Roadway & Trail Lighting, Utility Design, Structural Seawall Design, Drainage Improvements/Design , Irrigation Design, Beautification, Hardscape and Landscape Design, Scenic Overlooks of Lake Monroe, Way-finding Design, Pedestrian Mid-Block Crossings (Rectangular Rapid Flashing Beacons), Traffic Studies, Survey, and Wetland Mitigation.

PROJECT COST

$626,289 (Phase II)
$TBD (Phase III)

US 17/92 CRA STORMWATER MASTER PLAN

SEMINOLE COUNTY, FL

PROJECT DESCRIPTION

The CPH team was selected to create a stormwater master plan for the US 17/92 CRA's 13 mile corridor. The plan includes a GIS database of construction plans, permits, maps and models within the linear corridor. The collected information was used in conjunction with review of existing infrastructure and development trends to support creation of proposed projects that could encourage future redevelopment of parcels along the corridor. Services for this project included: Data collection, review and cataloguing; FEMA floodplain mapping reviews; LiDAR acquisition; Field reconnaissance and surveys; GIS preparation; Drainage model updates in support of existing conditions analyses and BMP design development; Cost estimate preparation including property acquisition estimates; Pollutant loading calculations; and permitting considerations.

CLOUD BRANCH DRAINAGE IMPROVEMENTS

SANFORD, FL

PROJECT DESCRIPTION

The Cloud Branch drainage basin is approximately 660 acres located in Sanford. For all phases, CPH provided surveying, environmental, design, permitting, bidding, and construction phase services for the various upgrades along the Cloud Branch drainage channel. CPH services also included preparation of a Stormwater Facilities Plan, Request for Inclusion package, and other planning and loan documents that the City submitted to FDEP in order to receive a State Revolving Fund (SRF) loan for the overall project. The project modeling, design, and permitting allowed for alternate construction of culverts (round pipe or box culvert) to provide flexibility with construction based on submitted bid prices and the alternate selected by the City after bidding. Phase 1 construction consisted of excavating a new 2.8 acre stormwater detention pond, upgrading of seven road crossing culverts along the channel, regrading 2,500-ft of existing channel, and enclosure of 1,130-ft of existing channel. CDBG funding was also secured for the Phase 1 project by the City with assistance provided by CPH.

Phase 2 construction consisted of a new 4 acre stormwater pond at Coastline Park, the installation of approximately 1,000-ft of new concrete box culvert, and upgrading storm sewer crossings of CSX tracks at 7th St. and at 10th St., and regrading the existing Cloud Branch drainage channel. The Phase 2 project was a federal economic stimulus project funded under the State Revolving Fund Loan program administered through the Florida Department of Environmental Protection (FDEP) using American Recovery and Reinvestment Act (ARRA) funds. During construction, CPH conducted interviews for documentation of compliance with Davis Bacon prevailing wage requirements and prepared interview notes and photos and compiled monthly Davis Bacon compliance certifications using interview notes and weekly certified payrolls provided by the Contractors and subcontractors. Phase 3 consisted of the upgrading of the 6th St. crossing at Cloud Branch, funded separately through FDEP as a non-ARRA project. The 6th St. culvert crossing was upgraded to a double 5' x 12' concrete box culvert.

MILL CREEK DRAINAGE IMPROVEMENTS

SANFORD, FL

PROJECT DESCRIPTION

The Mill Creek drainage basin is approximately 1320 acres located within the northwestern portion of the City and drain through existing developed residential and industrial areas to Lake Monroe, which is a part of the St. Johns River. CPH's services included reviewing earlier reports, conducting field visits, gathering updated information, interviewing City and County staff, reviewing jurisdictional considerations, and establishing an existing condition and proposed improvements stormwater modeling report that was used to obtain an Individual MSSW Permit from the SJRWMD. The overall permit for the project allows for flood control improvements without the need for stormwater treatment to be provided in the new stormwater ponds. CPH also assisted the City in negotiating construction of a joint-use pond, securing State Revolving Fund (SRF) loans from FDEP for a number of the projects. The Mill Creek improvement projects completed to date include construction of five stormwater attenuation ponds, enclosure of over 3,000-ft of open channels, and replacement of undersized road crossing culverts.

This program can be summarized as follows:

Phase 1	Mill Creek improvements in the vicinity of 8th Street to 9th Street
Phase 2	Mill Creek improvements from 9th Street to approximately 14th Street
Phase 3-A	Mill Creek improvements from 18th Street to Country Club Boulevard
Phase 3-B	Mill Creek improvements from 14th Street to 18th Street

SAND POND ROAD AND SKYLINE DRIVE

LAKE MARY, FL

PROJECT DESCRIPTION

CPH completed the Sand Pond/Skyline roadway project for the City of Lake Mary. The 1.25 mile project consisted of minor widening, turn lane improvements, safety upgrades and converting the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides. The project also included extending Skyline Drive from its current terminus approximately 1,100-feet to Emma Oaks Trail. The design implemented recommendations identified in a previous study to eliminate roadway flooding, improve traffic flow, and improve safety along the corridor. Services included geometric design to correct the horizontal and vertical alignments to comply with current standards, pavement analyses to determine the strength and integrity of the existing base material, hydraulic modeling for the proposed stormwater management system, utility coordination and permitting through SJRWMD and Seminole County.

SR 50 UTILITY RELOCATIONS PHASES I-III (FDOT JPA)

ORANGE COUNTY, FL

PROJECT DESCRIPTION

The first phase of this project consisted of the design and construction administration services to relocate water and force mains as well as incorporate a new gravity collection system and pump station design into the FDOT widening plans of SR-50 from Santa Rosa Drive (just west of SR 436) east to SR-417, approximately 4 miles in total length. Services included the design of 15,000 LF of gravity collection lines ranging in size from 8" to 24". in diameter; installation of approximately 83 manholes with depths to 20-ft. deep; installation a triplex pump master pump station; removal of certain sections of force main, connection of other force main systems to the gravity collection system and a new lateral connections to the gravity sewer service on SR-50. The project also included design for the installation or relocation of 8,000 LF of 16", 4,000 LF of 12" water mains and 4,000 LF of 20" and 1,800 LF of 8" force mains.

The second phase of the SR-50 project involving relocation of utilities along approximately 1.1 miles of FDOT Roadway from SR-417 to SR-425 (Dean Road). Utility relocation and improvements included the Orange County Utilities Division (OCUD) wastewater collection, wastewater transmission and water distribution systems. Services included the design of approximately 5,500 LF of 20" water main and approximately 2,700 LF of other water mains ranging in size from 6" to 12". The project also included design for the installation or relocation of 5,000 LF of 24" force main and 3,700 LF of 4"- 12" force main.

The third phase of the SR-50 FDOT widening project is currently under design and involves the relocation of utilities along approximately 4.9 miles of existing roadway from SR-425 (Dean Road) to Old Cheney Highway, near Avalon Park Boulevard. This segment includes the replacement of approximately 5,500 LF of 24" water main, 11,300 LF of 20" water main, 2,600 LF of 12" water main and 4,500 LF of 10-inch and under water mains. It also includes the replacement of 1,200 LF of 30", 5,897 LF of 24", 8,000 LF of 16", 1,100 LF of 12" and 8,700 LF of 8" and under force mains.

PROJECT COST

SANFORD NORTH WRF - BIOLOGICAL NUTRIENT REMOVAL EXPANSION

SANFORD, FL

PROJECT DESCRIPTION

The Sanford North WRF currently produces a high quality reclaimed water and utilizes a seasonal discharge to Lake Monroe/St. Johns River, limited to 1.0 MGD AADF, during periods of wet weather. To meet the State of Florida TMDL's for the Sanford segment of the St. Johns River, EPA's Numeric Nutrient Limits and the Wekiva Rule, a "new" Biological Nutrient Removal (BNR) system was required at the Sanford North WRF. The City selected CPH to evaluate the nutrient removal technologies available to meet the low TN (< 3 mg/L) and TP (< 0.6 mg/L) concentrations and recommend a cost-effective, energy-efficient and reliable BNR treatment system to meet these mandated effluent requirements. The Sanford North WRF was originally built in 1960 on an old landfill site on the shores of Lake Monroe and the cost for trash removal and importation of clean fill or the use of piles was determined to be cost prohibitive. Based on a preliminary screening process (first-level), criteria weighting (pair-wise) analysis and a final screening process (second-level), the Integrated Fixed-Film Activated Sludge (IFAS) Process, a highly energy-efficient and automated nutrient removal technology was selected as the "preferred" alternative. The technology is highly reliable in its ability to meet the stringent TN and TP requirements; is energy-efficient and has the potential to reduce electrical costs (20-30%) compared to the current biological treatment system (complete-mix) and can be constructed in the "existing" four aeration basin trains. The 7.3 MGD IFAS BNR system is currently in final design with an anticipated bid opening date in January 2015. CPH has provided all professional engineering services during the design process and will provide bidding services and construction engineering, inspection (full-time) and management services.

The Sanford North WRF IFAS BNR improvements consist of the following infrastructure: (1) new RAS/WAS pumping systems; (2) primary anoxic basins (2-stage); (3) wastewater step-feed process; (4) aerobic basins; (5) deoxygenation basins; (6) secondary anoxic basins; (7) reaeration basins; (8) turbo blowers (5 units); (9) chemical and supplemental carbon storage/ handling facilities; (10) aerobic digestion system improvements; (11) internal recycle systems; and (12) various buildings. The facilities will meet all TN and TP mandated effluent limitations.

PROJECT COST
$730,000 (Design Only)

MIDWAY UTILITIES REPLACEMENT PHASE I

SANFORD, FL

PROJECT DESCRIPTION

The project included construction of approximately 10,665-ft of new 4-inch -10-inch water main, water services, and fire hydrants within Midway, and the abandonment in place (via grouting) of existing 6 -inch water main. Work also included directional drill construction and the installation of a new Master Meter Assembly.

CPH collected data from the Midway-Canaan Community Water Association, City of Sanford, Seminole County, and FDOT and performed site visits to evaluate the existing site conditions and locations of existing water mains and meters due to the limited information on the existing system. CPH also provided surveying services since the right-of-way was unknown / undocumented throughout Midway.

The design included preliminary layout of the new lines and coordination with the County on the proposed construction, permitting requirements, known future plans of other utilities and agencies for the project area. Since the County has secured funding for the project under the County Community Development Block Grant (CDBG) program, CPH worked closely with the County to monitor construction costs and assist with Davis Bacon wage rate requirements during construction.

ISLAMORADA VILLAGE WIDE WASTEWATER SYSTEM, DESIGN, BUILD, OPERATE (DBO)

ISLAMORADA, FL

PROJECT DESCRIPTION

CPH's areas of responsibility included the design and permitting of the gravity sewer collection system with vacuum assist for the Island of Upper Matecumbe Key; sewer pumping stations for the Islands of South Plantation Key, Upper Matecumbe Key and Lower Matecumbe Key; and a low pressure force main collection systems for the Island of Windley Key and portions of Upper Matecumbe Key. CPH provided input data and documentation associated with areas of responsibility incorporated into the Preliminary Design Report for the overall project. This work included an analysis of flow data that incorporated FKEC water consumption information, review of existing package wastewater plants, and survey/analysis provided within the project solicitation documents in order to properly project anticipated wastewater flows for system design. CPH designed the following components for the project:

- Vacuum/Low Pressure Collection System Consisting of Approximately 400,000 LF of 3 -inch to 10 -inch PVC Gravity Sewers with vacuum assist, and 1-1/4 -inch to 6 -inch HDPE Low Pressure Force Mains.
- Transmission System Consisting of Approximately 100,000 LF of 8-inch to 18-inch PVC and 6 -inch to 20-inch HDPE Force Mains.
- Four (4) Pump Stations.
- One (1) Master Pump Station.
- Seven (7) Ocean Channel Crossings using Horizontal Directional Drilling (HDD) in sizes ranging from 8-inch to 18 -inch.
- Service Connection for Approximately 5,000 Customers.
- Installation of 400 Residential and Commercial Grinder Pump Stations. E-1 Grinder Pump Manufacturer.

AREA IV WELL OUTFITTING & RAW WATER TRANSMISSION MAIN PHASES I & II

TITUSVILLE, FL

PROJECT DESCRIPTION

Phase 1- The City of Titusville Area IV Well Outfitting and Raw Water Transmission Main project Phase 1 included the drilling of 5 water supply production wells, 3 saline water monitoring wells, outfitting of 6 production wells, and construction of approximately 72,000 LF of new raw water transmission main (16-20-inch diameter pipeline) from the City's Mourning Dove Water Treatment Plant to the Area IV well field. The estimated cost for this project was $11,200,000. the actual cost for this project was $7,952,370.

Phase 2- CPH performed design, surveying, permitting, bidding and construction phase services for Phase 2 of the Titusville Wellfield for TIFA LLC. The design and permitting phase services included civil engineering, survey, and environmental services and included hydraulic modeling of the wellfield, stormwater pre-development and post-development analysis of stormwater quality and attenuation, 100 year flood zone compensating storage. This phase included well drilling of 8 production wells and 1 saline water monitoring well, conversion of 1 test well to a production well, and well outfitting of 9 production wells. Additionally, the project included the construction of approximately 18,975 LF of raw water transmission main from the north end of the existing Area IV Phase 1 Wellfield (near well 408) to each of the Area IV Phase 2 production wells (Wells WR-1 through WR-9).

PROJECT COST

SPEC MARTIN STADIUM DESIGN CRITERIA PACKAGE AND EARL BROWN PARK IMPROVEMENTS

DELAND, FL

PROJECT DESCRIPTION

CPH was selected by the City of DeLand for the Spec Martin Stadium Improvements. The project required the development of the design/build criteria package and professional services to assist the City during the selection process. The project involved a new press box, training room and locker room additions. The stadium was used by the local high school and is now also used by Stetson University; therefore, the stadium improvements were designed to meet collegiate level demands.CPH prepared the design criteria package for a 75' tall Press Box and locker room expansion within the historic Spec Martin Stadium (60% Design Package). CPH was also responsible for the design of the landscaping and civil improvements for the stadium which included over 50 new paved parking spots and over 100 grass parking stalls.

CPH was responsible for 100% design and permitting of civil/site improvements in and around the stadium. The primary improvement was the addition of paved parking on the home and visitor sides of the stadium as well as grass parking across the street in Earl Brown Park. Retaining walls were added to the western parking area to allow for the creation of the new parking area and pedestrian access within the earthen berm. Access to the stadium was limited from the parking areas so new pedestrian accesses were added to aid access control. ADA upgrades were made to the south side of the stadium to allow visitors the ability to access this part of the locker rooms and concession building. Previously the only ADA access to the stadium was from the northern parking lot or through separate manned access gates. A challenge to the site was a significant grade change from one end of the stadium exterior to the other in excess of fourteen feet. Safety improvements were also included to allow better movement of rescue personnel in and out of the stadium and to allow for larger vehicles movement.

CENTRAL WINDS RECREATIONAL FACILITY

WINTER SPRINGS, FL

PROJECT DESCRIPTION

CPH has provided numerous services at Central Winds Park including a soccer field addition of an 8 acre tract with design of stormwater facilities and irrigation system that utilizes reused water. CPH services included:

- Analysis of existing drainage problems of the original park design and provide upgrades
- Add two soccer fields
- Add restrooms and picnic pavilions
- Provide a forcemain design to replace the septic system at the main complex

The most recent upgrade at the park performed by CPH consisted of the paving, grading and installation of a drainage system on an existing access road to the Central Winds Park. The Central Winds Park Way Roadway Improvements project was a City project and this work was coordinated with the City of Winter Springs. Work included, but was not limited to, paving of approximately 1,300 LF of roadway; removing existing paved roadway and curbing; removal of stormwater piping and structures; relocation of power poles, telephone risers, valves, water lines, water meters, fences, and hydrants as necessary to accommodate the construction of this project; removal and replacement of existing recreational trail that crossed the length of the project; installation of storm pipe and structures and all appurtenances associated with this project.

CPH recently provided various schematic design options for the canopy structures over the existing bleachers and scorekeeper areas at the existing ball fields. Design options with respective cost estimates included steel, aluminum and fabric canopies for consideration. Design options including site plan, floor plan and color perspective renderings were submitted to the Parks and Recreation Department for review. Upon approval of the schematic design selected for implementing by the City of Winter Springs, CPH will proceed with the preparation of construction drawings.

SANFORD 1ST STREET STREETSCAPE

SANFORD, FL

PROJECT DESCRIPTION

CPH provided the City of Sanford a streetscape design package for a 6 block section of historic First Street (approximately 0.40 miles). CPH's services included the conceptual and final design of a Gateway Entrance Feature introducing the historic district. CPH worked with the City of Sanford to develop a theme for this gateway to showcase the style and character unique to this historic area and at the same time incorporating the City's logo. A detailed Public Involvement Plan was implemented to ensure input and direction from City officials and all other key stakeholders. CPH used its in-house 3D survey team to provide right-of-way surveys, while minimizing impacts to traffic. CPH also used the 3D survey to provide a "virtual tour" of existing conditions and the proposed improvements during the public relations effort. CPH was also responsible for utility relocations which consisted of relocating existing potable water main and installing new fire hydrants, services, and meters. CPH provided the following services:

- 3-D Laser Scan survey
- Landscape and Irrigation plans
- Roadway Geometric Analysis and Design
- Lighting and Electrical plans
- Utility Design and Coordination
- Site furniture selection and layout
- Stormwater Analysis, Design, and Permitting
- Streetscape Design
- Pavement Section Analysis and Design
- Public Involvement Plan
- Maintenance of Traffic
- FDOT Driveway Connection Permit (at US 17-92)
- Architectural Services for the Gateway Entrance Feature

The original cost for this project was $2,600,000. The actual cost was $2,591,170.

HARRISON AVENUE STREETSCAPE

PANAMA CITY, FL

PROJECT DESCRIPTION

The City of Panama City and the Panama City CRA selected CPH to perform the Streetscape Design of Harrison Avenue. Harrison Avenue is Panama City's main street leading to City Hall and the Panama City Marina. Preliminary Design Services include assisting the CRA with Public Outreach to obtain initial stakeholder input to determine project wants/needs, preparing three streetscape alternatives, and Public Involvement meetings to determine the preferred option. Once a preferred option is selected, the Final Design elements may include a roundabout at Harrison Ave. and 4th Street, revised on-street parking to provide wider pedestrian areas in front of the businesses, upgraded street lighting including electrical outlets for various community events, modified stormwater and minor utility relocations.

W. CENTRAL BLVD. SANITARY SEWER & STREETSCAPE DESIGN/BUILD

ORLANDO, FL

PROJECT DESCRIPTION

Garney Construction along with CPH was selected by the City of Orlando for the $6.5 million dollar Design/Build project in downtown Orlando. The 0.55 mile project included upsizing the existing gravity sewer line on Central Blvd. between Glenn Ln. and Garland Ave. from an 8" sanitary sewer to a 18" & 21" sewer system. The upsized sewer will serve the future MLS Stadium and City of Orlando Sports Entertainment District as well as future redevelopment along W. Central Blvd.

Additional improvements include complete roadway reconstruction including removal of the underlying brick, addition of left turn lanes at the existing intersections, a new traffic signal with a BRT (Bus Rapid Transit) phase, additional right-of-way and easement coordination, placing all overhead utility lines underground (including the duct bank design), complete Maintenance of Traffic Plans, and incorporating landscape/hardscape features including street lighting, trees, decorative crosswalks, and street furniture.

Significant coordination with various City divisions was required throughout the design and permitting. These divisions include the Capital Improvements & Infrastructure Division, Streets & Stormwater Division, Community Venues Division, Traffic Division, Wastewater Division, the Downtown Development Board, and the Community Redevelopment Agency. Permitting through FDOT for a Right-of-Way Utilization and Utility Permit was required for work under Interstate 4 while the Beyond I-4 Construction was underway. Other permitting included acquiring the FDEP Permit for the sanitary sewer installation and a SJRWMD stormwater exemption.

PROJECT COST
$351,658.52

FORT FLORIDA ROAD - DIRT ROAD PAVING

DEBARY, FL

PROJECT DESCRIPTION

As part of our continuing services contract with the City, CPH was asked for recommendations on the paving of the City of Debary's longest unpaved roadway. Fort Florida Road had over two miles of two-lane unpaved rural roadway that the City was spending over $45,000 a year to maintain the surface alone. CPH met with the City and Volusia County on the paving of the roadway to gather recommendations. It was determined from the meeting that the full upgrade of the roadway was not within the budget of the City and that a Cold-Mix roadway should be utilized for the paving project even though the expected lifespan would be less. Recommendations for the paving were taken from Volusia County specifications and were reviewed by a geotechnical engineer subcontracted by CPH. CPH was also responsible for the production of the bid documents, bidding and award services, and CEI services.

DEBARY COMMUNITY PARK SPLASH PAD

DEBARY, FL

PROJECT DESCRIPTION

CPH provided planning, design, permitting, surveying and construction services for a splash pad water feature and all associated appurtenances for the City of DeBary. The design included a 2,000 sq. ft. splash pad, bathroom building, pump room to house the pump and chlorination equipment, in-ground return water tank, extension of electrical service, water service and gravity sewer lines to support the splash pad, and additional sidewalks adjacent to the new splash pad. CPH met with City staff to select the theme and features for the park during the design phase. CPH provided plan and profile drawings for the splash pad at the 60%, 90% and 100% design levels. This project also included coordination with the electrical engineer and the water feature manufacturer for both layout and power supply to the pump equipment.

Estimated Completion Date was September 2013 and Actual Completion Date was September 2013.

PALM COAST RECLAIMED WATER DISTRIBUTION SYSTEM

PALM COAST, FL

PROJECT DESCRIPTION

CPH also served as the lead for the overall design and permitting of the reclaimed distribution system. The design was separated into three phases; Phase A, Phase B, and Phase C were separate projects that were designed and constructed after the initial WWTP No. 1 improvements were completed.

Construction of Phase A of the reclaimed distribution system was completed in 2009. Phase A improvements consisted of a 30-inch reclaimed water main which extended westerly from WWTP No. 1 to the FPL easement at the intersection of Oak Trails and Old Kings Road. The 30-inch reclaimed water main then connected to a Phase A 16-inch reclaimed water main to the North and to a Phase B 20-inch reclaimed water main to the South. These developments distribute the reclaimed water via individual systems to the developments. In addition, a future 16-inch reclaimed water main was designed by CPH along Matanzas Boulevard from Old Kings Road to US Highway No. 1 that will connect the WWTP No. 1 reclaimed water main to a future WWTP No. 2 reclaimed water main system and to future reclaimed water storage ponds for separate future developments. As of this date the 16-inch reclaimed water main has not been constructed.

Construction of Phase B of the reclaimed distribution system was completed in 2007. Phase B improvements consisted of a 20-inch reclaimed water main which extended from the 30-inch reclaimed water main at Oak Trails and Old Kings Road Southerly along the FPL easement to Cigar Lake.

Construction of Phase C of the reclaimed distribution system was completed in 2008. Phase C improvements consisted of construction of the Cigar Lake Reclaimed Water Re-Pumping Station and connection to the Town Center Reclaimed Water Distribution System.

Project Management, Paving, Grading, Utilities Coordination & Design, Hydraulic Calculations, Regulatory Compliance & Permitting, and Construction Management

WESTSIDE COMMUNITY CENTER

SANFORD, FL

PROJECT DESCRIPTION

CPH expanded an existing 7,900 sq. ft. structure with the addition of a 10,400 sq. ft. gymnasium, game room addition and storage mezzanine. The scope included the remodeling of the existing gym into a multi-purpose room, workout area and conference room. Both the men's and the women's restrooms were upgraded for handicapped accessibility and the existing kitchen was completely gutted and redesigned. Additionally, the project included a new welcoming reception area, refurbished staff offices, and a computer room and locker room with a playful color scheme. The space is currently used by The Boys and Girls Club of America for afterschool and summer programs and can be rented out for revenue for the City of Sanford.

CPH worked closely with both the City of Sanford and the builder to keep the project on schedule and address any design concerns and request for information during construction. Initial site visits were made to observe and document existing conditions that were not clearly documented in the 1968 as-built drawings. Working with Higgenbotham Engineering, it was determined that roof members on the existing building needed to be structurally reinforced for the new air conditioning equipment. CPH's architects and civil engineers also worked closely to address stormwater removal with underground drains and a large retention area.

ORIGINAL ESTIMATED PROJECT COST
$6,033,527

ACTUAL PROJECT COST
$5,550,000

DURATION OF CONTRACT
July 2008 - January 2010

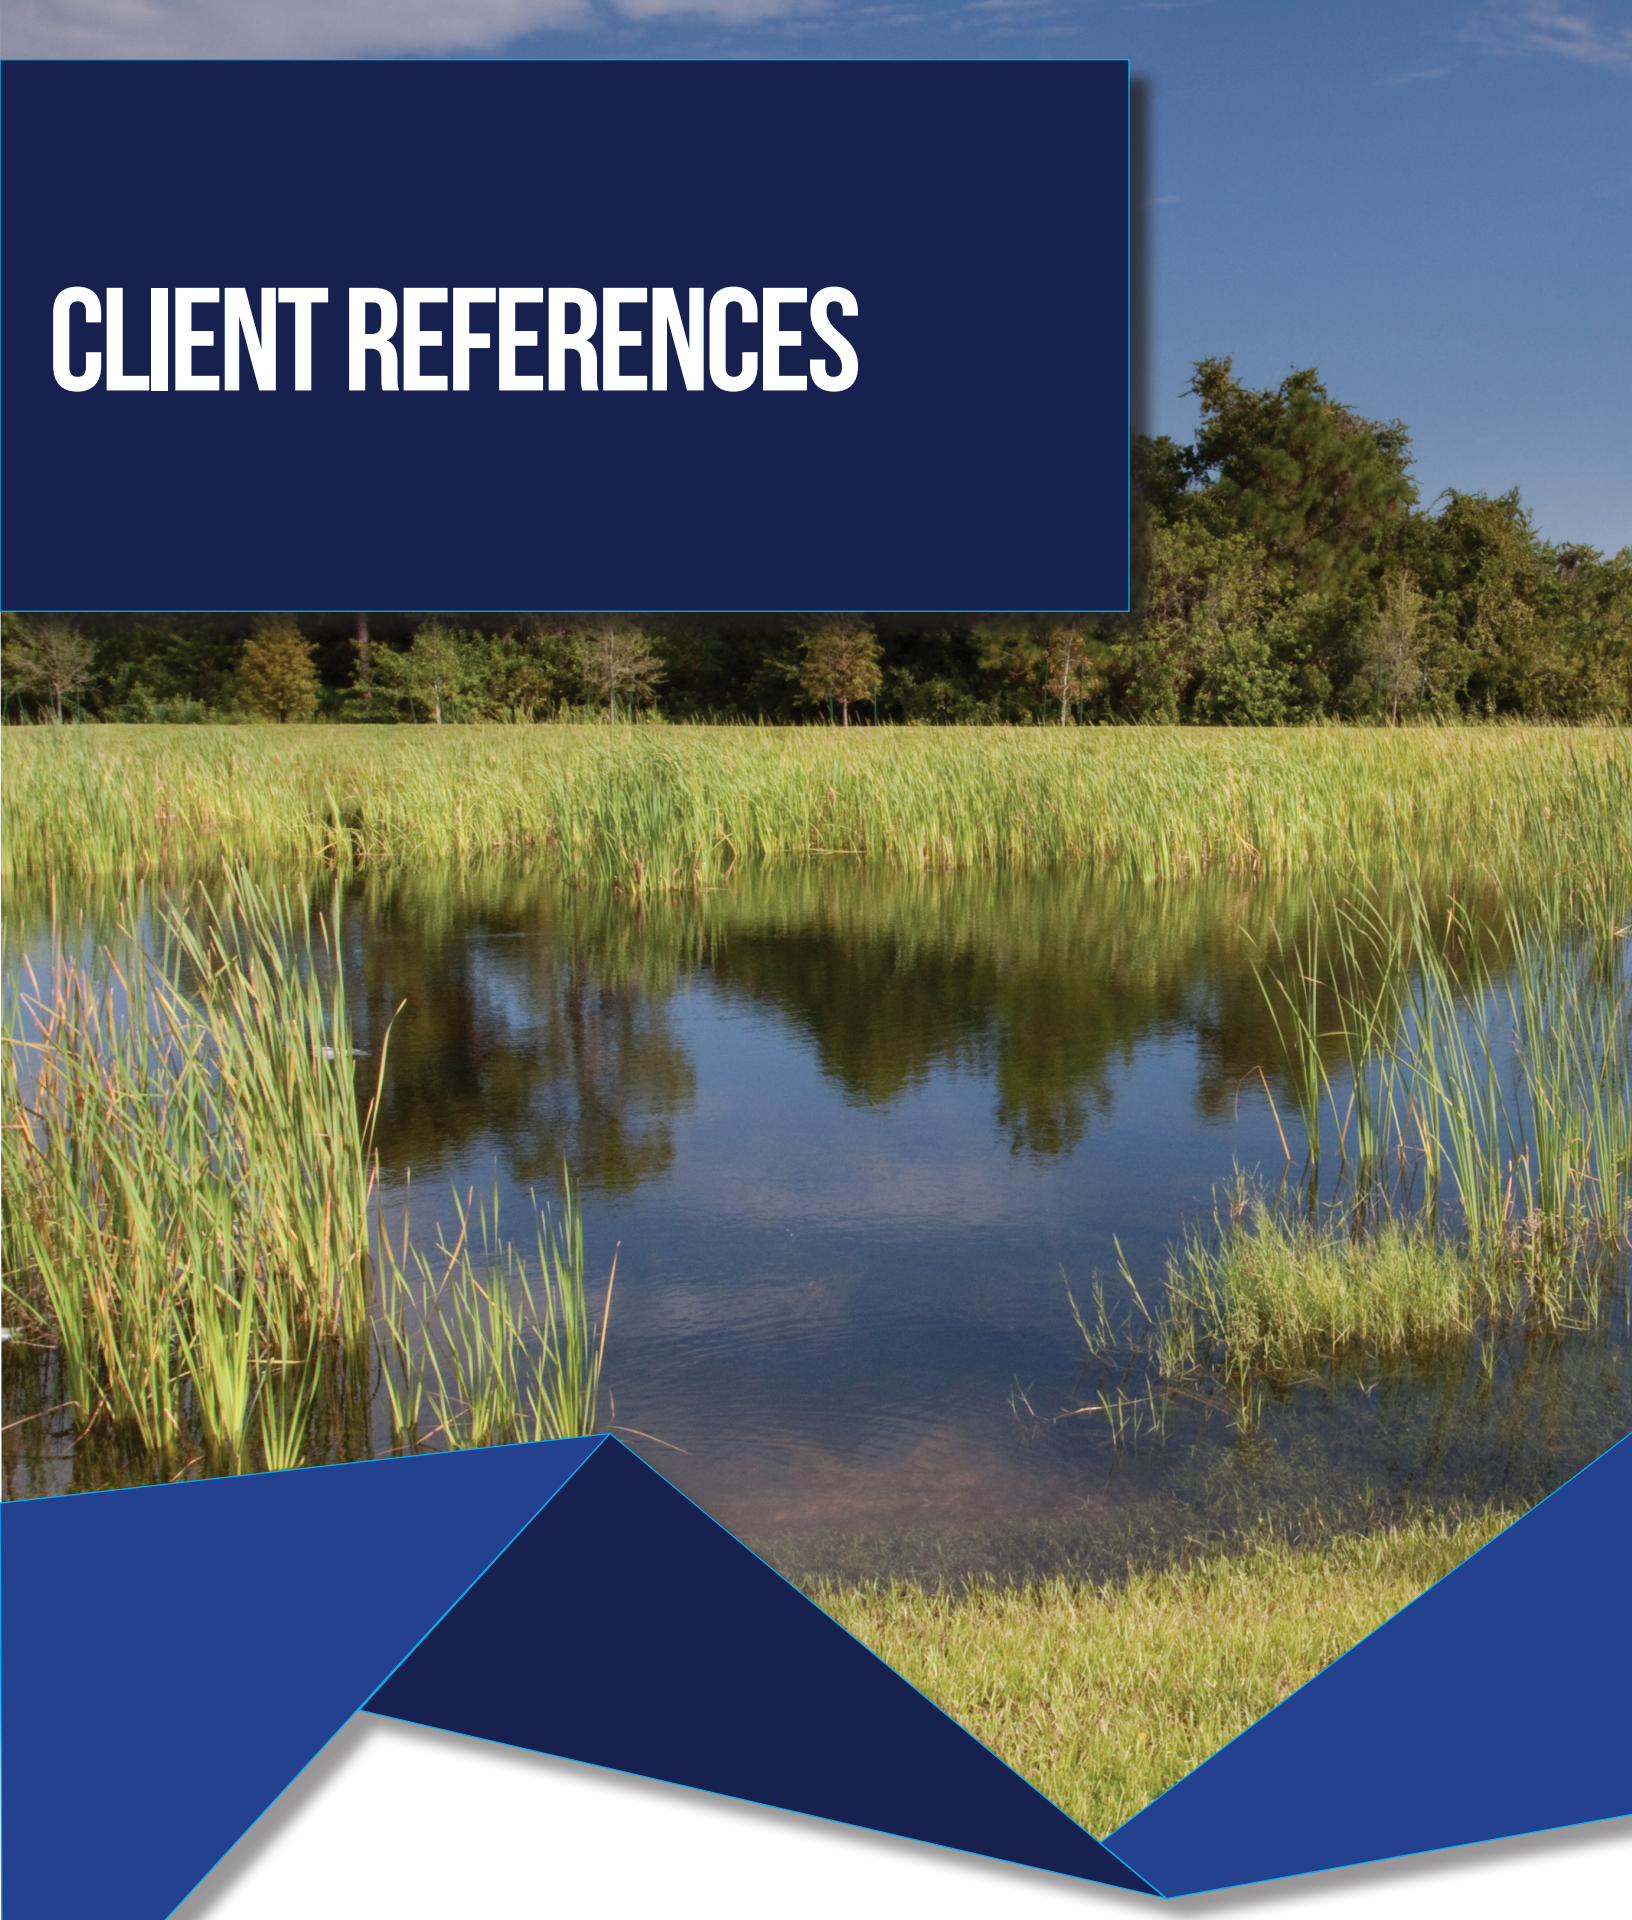
RELEVANT SCOPE OF SERVICES TO RFQ
Project Management, Paving, Grading, Site Planning, Utilities Coordination & Design, Landscape Architecture, Stormwater, Hydraulic Calculations, and Regulatory Compliance & Permitting

SUMMARY STATMENT OF CITATIONS, VIOLATIONS, & LITIGATION



Below is a listing of all citations, violations, and litigation existing or continuing within the last three (3) years:

The following case is still in process:

City of Fernandina Beach vs. CPH Engineers, Inc. et al Case No. 2014-CA-343 Division: CA; Policy No. RDP0018939 Origination Date – December 2014

The City of Fernandina Beach filed suit in relation to a subdivision which had two streets having groundwater flowing over the curb and draining into the street for a distance of about fifty yards on each street. The subdivision was designed by another engineer and CPH assisted the developer during construction. The project was built eight years ago and only recently has the problem occurred. CPH is investigating the matter and it appears a new pond was built in the area and the outfall of the storm system is not functioning correctly. We are working with the City to resolve the issue; however, CPH was not the original Design Engineer nor did this issue occur until many years after project completion; therefore, CPH does not feel that we are liable on either of these counts and the City has agreed and a release is being prepared.

CLIENT REFERENCES

CLIENT REFERENCES

CPH has performed numerous similar services for other clients for over 30 years through continuing services contracts. Below is only a sample of our team's continuing client base that can attest to the professionalism and the quality of the work product. Please see the list of our client references below with projects similar in size/scope to those of the City of New Smyrna Beach. Additionally, on the following pages we have provided reference letters from some of our other municipal clients. We encourage you to contact our references.

City of DeLand

Mr. Keith Riger, P.E., City Engineer
1102 S. Garfield Ave., DeLand, FL 32724
Phone: 386.626.7196
Fax: 386.

RE: Linear Park Phases II and III, Punta Gorda, Florida

To Whom It May Concern:

The City of Punta Gorda retained the services of CPH Engineers, Inc. (CPH) in March 2009 for the design, permitting and construction assistance for Phases II and III of our Linear Park Project. Our Master Plan included the continuation of the first phase of the multi-use trail from West Olympia Avenue to Cross Street.

The project involves 0.8 miles of ten foot wide trail located in an abandoned Rail Road Right of Way. In addition to the trail, the project includes two trail head parking lots, two dual Bocce Ball courts, and five exercise stations. Key points along the trail include inlaid brick compass roses and street crossings. With Punta Gorda being the Hibiscus City, CPH prepared an intricate design of the City Seal for the intersection of Virginia Avenue and Shreve Street. This project runs through the historic district of the City, and therefore has a very high profile.

CPH completed the design and secured the required permitting, including a delicate wetlands mitigation permit with the Southwest Florida Water Management District in a very timely manner. Unfortunately, due to funding constraints with the Florida Department of Transportation, the City was unable to proceed with the full design. CPH is now working with Punta Gorda to develop a minimal Base Plan for each Phase, along with Bid Alternates that will be added based on the actual bids and available funding.

Punta Gorda has been pleased with the efforts of the CPH Team, including their timeliness, attention to detail, and their pride and ownership of their work. They have worked well as an extension of the City's Staff. We would highly recommend CPH for similar projects.

Should you like to discuss CPH's efforts in more detail, please do not hesitate to contact me directly at (941) 575-3370.

Sincerely,
The City of Punta Gorda

Dennis B. Murphy, Sr., PG, PSM
Director of Growth Management

RE: CPH, Inc. Reference

To Whom It May Concern:

It is my pleasure to provide CPH, Inc. (CPH) with this letter of recommendation. CPH has worked with the City of Sanford since 1958 and has retained the distinction of being the City's continuing contract engineer for countless projects. The staff is innovative, professional, reliable, resourceful, and responsive. CPH has worked alongside the City in anticipating future growth and helping plan the City's expansion including the beautification of the entrances and the City's buildings. CPH has provided us with extensive consulting and engineering services for projects that include landscape architecture, roadway, streetscape design, drainage, recreational facility projects and many other projects involving our municipal buildings and facilities.

CPH designed the City's entrance, Sanford First Street Streetscape project. This project included architecture for the gateway, landscape architecture, streetscape design and civil engineering. The project included providing 3-Dimensional surveys and models/animations of the proposed improvements for use during the design and public involvement process.

CPH was responsible for the expansion of the Westside Community and Recreation Center with the addition of a 10,400 sq. ft. gymnasium, game room addition and storage mezzanine. CPH remodeled the existing gym into a multi-purpose room, workout area and conference room. Both the men's and the women's restrooms were upgraded for handicapped accessibility and the existing kitchen was completely gutted and redesigned. CPH's architects and civil engineers also worked closely to address stormwater removal with underground drains and a large retention area.

In 2016, CPH was commissioned by Sanford's Community Development Agency to provide conceptual plans for a new "Civic Center". This proposed 18,000 square foot facility will replace the existing civic center located on Seminole Boulevard which borders Fort Mellon Park and Lake Monroe. The new facility will expand present inventory of meeting rooms and flexible banquet areas for public use in the range of 500-700 people. Specific meeting rooms and offices will be provided for senior citizens. Prefunction social gathering areas will be complimented by massive exterior covered patio's and spacious interior circulation spaces. Provisions will also include landscape alcoves, delivery ports for catered service and abundant parking within the borders of the site.

City officials and staff members have been pleased with the cost, quality, timeliness and responsiveness from the principals and staff members of CPH. The City of Sanford has a strong commitment to CPH and will continue to rely on the firm as the City continues to grow. We highly recommend CPH for any services you might require.

Should you have any specific questions about the information above please do not hesitate to contact me.

Sincerely,

Jeff Triplett, Mayor

Utility / Public Works Department

June 15, 2012

RE: CPH Engineers, Inc.
Consulting Engineering Services for the City of Winter Springs

To Whom It May Concern:

As Utility/Public Works Director with the City of Winter Springs, I would like to take this opportunity to compliment the firm of CPH Engineers, Inc. for the quality of service and product provided to us.

CPH has been providing engineering services to the City since 1968. During my last 20 years as the Utility/Public Works Director, it has become apparent why the relationship has endured. I have found that CPH provides top quality engineering services at a very competitive cost which translates into excellent value.

CPH has provided planning, design and construction services for the new Town Center, Parks facilities, transportation projects and a multitude of Utility projects. Many of these required coordination with multiple entities, tight time restraints and limited budgets. CPH provided excellent services in helping us get these projects to fruition.

Whether it is a $1,500,000 project or a $15,000 project, CPH provided the same insightful advice and attention to detail that has helped this City meet present demands and anticipate future needs. I look forward to the successful continuation of the working relationship between the City of Winter Springs and the firm of CPH Engineers, Inc.

Sincerely,

Kipton Lockcuff, P.E.
Utility/Public Works Director

Re: CPH Engineers, Inc. Letter of Reference

To Whom It May Concern:

The City of Lake Alfred has maintained a professional relationship with the firm of CPH Engineers, Inc. since 1999. During this time, CPH has provided us with extensive consulting engineering services for the City's utility systems. CPH has also assisted us with miscellaneous CDBG paving and drainage improvements, and larger FDEP SRF low interest loan funding for our water line project and our wastewater treatment facility (WWTF), as described below.

CPH was responsible for upgrading the City of Lake Alfred's WWTF. The project consisted of upgrading the existing 0.600 MGD trickling filter facility with a new 1.0 MGD modified activated sludge process WWTF. The design included adding a new pretreatment headworks, new 1.0 MGD rated WWTF (anoxic zones, aeration basins, and clarifiers), and new microscreen filtration (two units). The existing trickling filter tank was converted to a 260,000 gallon equalization basin and the two existing clarifiers were converted to aerated digesters/holding tanks. The FDEP SRF Loan amount was approximately $4.5 million.

On another notable project, the CR 557 Water Main Extension, CPH was responsible for the installation of the City of Lake Alfred CR 557 water main extension. The project consisted of 10,105 LF of 12" PVC water main within the public right-of-way of CR 557 in Polk County. CPH worked directly on the SRF facility planning documents and provided the capital financing plan. CPH worked together with the City to plan and establish the most practical route for the utilities. The route layout involved coordination with land owners and Polk County.

Officials and staff members of the City of Lake Alfred have been extremely pleased with the cost, quality, timeliness and responsiveness of the professional consulting services we have received from CPH. I am confident that our favorable experience with CPH Engineers is reflective of the level of service and satisfaction that others can expect, and I do not hesitate to recommend them to fulfill your project needs.

If you have any questions please do not hesitate to contact me.

Sincerely,

John Deaton
Public Works Director

Jacqueline B. Sova
City Manager
jsova@lakemaryfl.com

City of Lake Mary

Incorporated in 1973

April 4, 2012

To Whom It May Concern:

CPH Engineers, Inc. has been providing consulting engineering services to the City of Lake Mary since 1975. They have assisted the City in a broad range of engineering areas including water, wastewater, stormwater, recreational facilities, landscape architecture, traffic studies, and road design and construction.

CPH was instrumental in the planning, design, agreements, and construction of the Tri-Party Regional Reclaimed System and Surface Water Augmentation. CPH was pivotal in forming the business model for the regional reclaimed system, and drafting the agreements and reaching consensus among the parties. CPH provided design services for a new wastewater collection system in the City's historic downtown. This design included a submersible duplex pump station, 650 LF of 4" PVC force main, approximately 4,850 LF of gravity lines, 19 manholes, and 70 service laterals. The project involved designing a collection system in a well-established residential neighborhood within tree lined rights-of-way and still maintaining access to residents. CPH has also provided design and construction services for the City's water system, including high service pump improvements, backup generator, ground storage tanks, an elevated storage tank, water distribution mains and hydraulic modeling.

On another notable project, Rinehart Road, CPH provided design and construction engineering and inspection services on a major 2-mile long four-lane roadway expansion and trail project through the City. CPH was instrumental in obtaining easements and agreements to allow the trail to cross public and private lands, including the Postal Service property. Recently, CPH completed the Sand Pond/Skyline roadway project for the City of Lake Mary. The 1.25 mile project consisted of minor widening, turn lane improvements, safety upgrades and conversion of the existing two-lane rural roadway to a two-lane urban roadway with sidewalks on both sides. Included in this project was the relocation of both the City of Lake Mary's and Seminole County's utilities to avoid conflicts with the required stormwater improvements.

CPH has been actively assisting the City in the design of recreational facilities, including the Lake Mary Sports Complex, Lake Mary Gateway Park, and Lake Mary Trail. CPH also provided design and construction services for the Lake Mary Tennis Facility, which won an award for tennis court of the year.

CPH has an excellent, high quality staff and has performed well above our expectations. Their project management and capabilities are second-to-none. We highly recommend the firm to meet your engineering needs.

If you have further questions, please feel free to contact me directly.

Sincerely,

Jackie Sova

Jackie Sova
City Manager

CITY HALL, 100 N. Country Club Road, P.O. Box 958445, Lake Mary, FL 32795-8445

Public Works Department

April 9, 2012

City of Palm Coast – Public Works Department
160 Cypress Point Pkwy, Suite B-106
Palm Coast, FL 32164

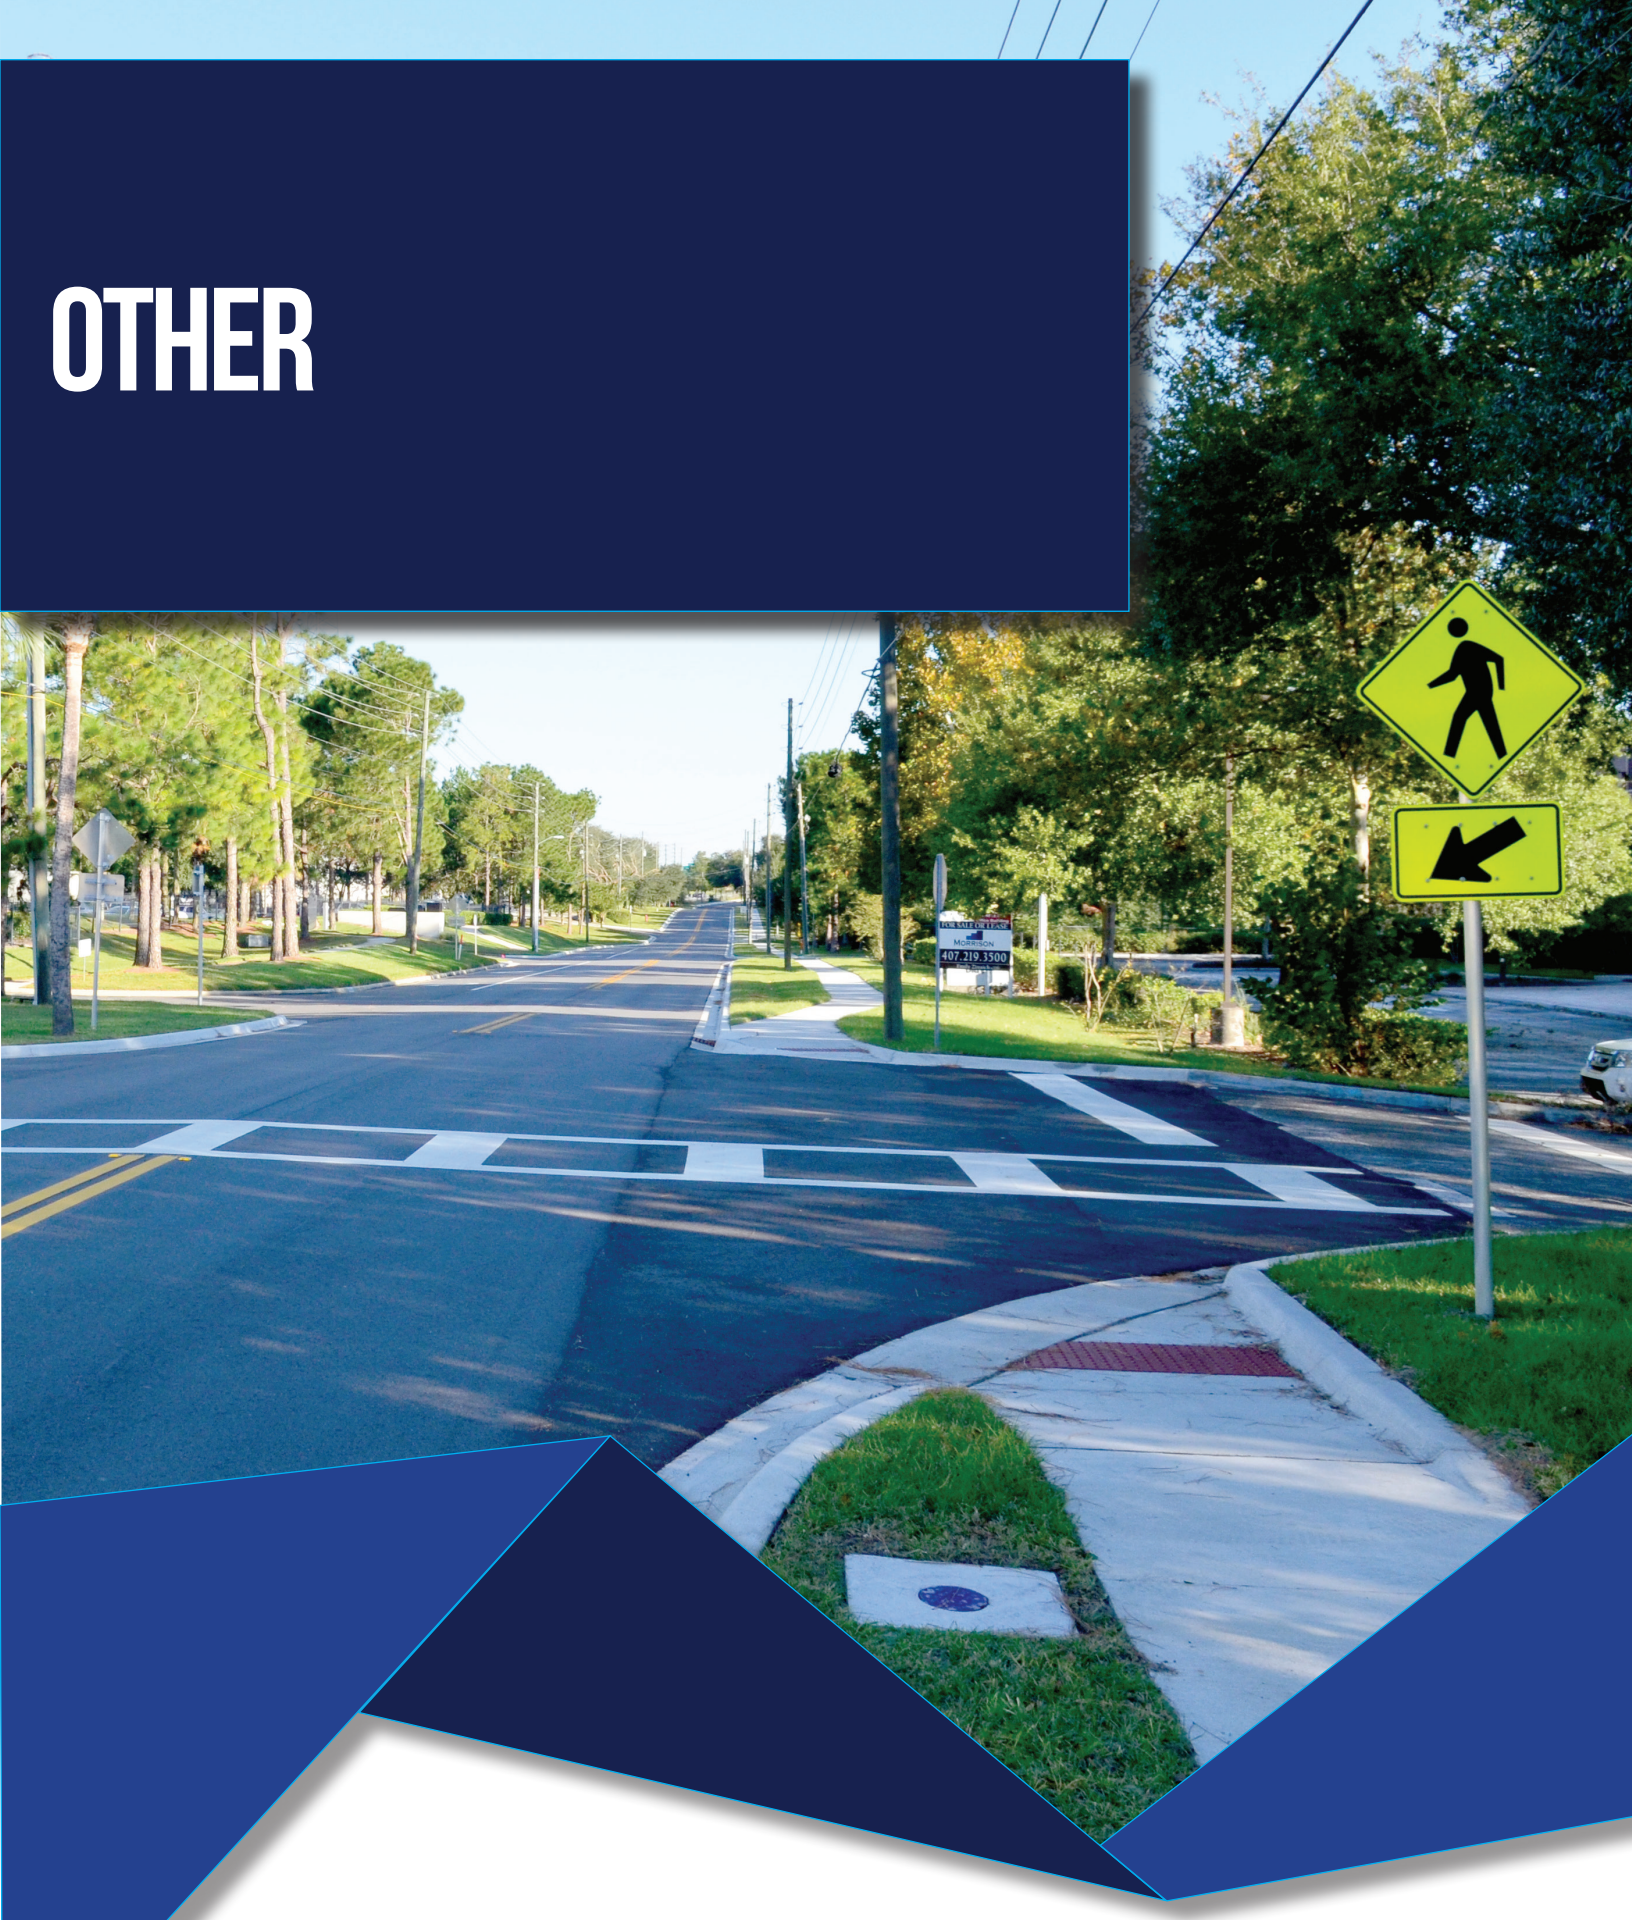
To Whom It May Concern:

CPH has provided engineering consulting services for roadway projects since the City was incorporated in 1999. Since then CPH has conducted roadway evaluation surveys, coordinated traffic counts, developed bridge inspection programs, performed roadway and intersection improvement projects, and provided construction administration and inspection to accommodate the needs of the City. CPH has also conducted a roadway and stormwater evaluation program for over 500 miles of collector and local roadways to be overlaid or repaired where required. The City has implemented a 50 mile per year program. CPH evaluated roadway conditions and assisted the City in providing the design criteria for the overlay specs and repair methods. Design projects consist of roadway planning, complete roadway design, stormwater surface management systems, pedestrian systems, signing and pavement marking design, signalization design, maintenance of traffic (MOT) design, and construction administration and inspection.

CPH recently provided services for the Belle Terre Parkway Four-Lane project including roadway and drainage design, traffic services, landscape architecture, utility design, right-of-way acquisition, surveying and environmental services. The project consisted of approximately 4.1 miles of a four-lane divided roadway, four 12-foot travel lanes and two four-foot bicycle lanes. CPH also provided general traffic engineering services for the project, including access management studies, traffic volume projections and traffic signal warrant analyses for five intersections.

An exemplary project was the analysis and design of Palm Coast Parkway & Brushwood Lane - Traffic Analysis and Intersection Improvements. CPH worked with the City Engineer and staff who originally pursued a traffic signal as a solution, but deferred to CPH's expertise to find a cost-effective solution which addressed multiple issues including cut-through traffic, business and legal damages, and a significant safety problem. After analysis, CPH found a design solution consisting of median and turn lane modifications in lieu of a signal, which not only eliminated the need for a traffic signal (savings of $270,000), but presented a win-win for all stakeholders given that the cut-through problem and safety issues were fully addressed and the concerned businesses were satisfied with the proposed access.

The City of Palm Coast can attest to the firm's high standards for innovative and functional designs, responsive services and quality projects. CPH has provided us with extensive consulting and engineering services for projects that include roadway, streetscape design, multi-use trails, landscape architecture, drainage, recreational upgrades and refurbishments and many other projects involving our municipal buildings and facilities. The City has been pleased with the efforts of CPH in all the projects they have undertaken.



Through our extensive working relationship with CPH, we have found that they have given us excellent, prompt and timely services with sensitivity to construction budgets and schedules. I have complete confidence that our experience with CPH is reflective of the level of service and satisfaction others can expect.

Should you like to discuss any of the information above please contact me at 386-986-2351.

Sincerely,

Richard H. Adams
Public Works Director

OTHER

PROPOSER'S FINANCIAL CAPACITY

Financial Stability

CPH has been in successful operation in Florida since 1981 as a corporation, and was part of a predecessor firm in the area dating back to the 1960's. Throughout this entire period our firm has been involved in design and development of public and private projects in Florida. In that time period, we are very proud of our client relationships and have never been terminated from a contract. Further, CPH has been in successful operation for over 36 years and has never had any license sanctions or bankruptcies or major litigation. CPH has the resources to commit to this contract for the City of New Smyrna Beach, and has personnel, equipment, and facilities to successfully provide services under the project name.

CPH has the knowledge, expertise, and financial strength to perform this contract for the City.

GRANT/LOAN EXPERIENCE

CPH has worked extensively and successfully with the FDEP and the State Revolving Fund (SRF) Loan Program and have assisted many small-to-medium sized municipalities in obtaining over $100,000,000 in SRF Loans for utility projects. CPH is currently working on over $50,000,000 worth of wastewater related SRF Projects throughout Florida. The CPH team recently helped Volusia County with alternative funding. We were able to assist the County in receiving 62% funding for the Southwest Regional Wastewater Reclamation Facility Nutrient Reduction and Expansion Project which was a $12.1 Million project. CPH was able to assist Volusia County in securing grants from the FDEP as well as SJRWMD.

CPH has prepared for a number of its clients Florida Department of Environmental Protection (FDEP) State Revolving Fund (SRF) loan program planning, design and permitting assistance, and has also assisted with funding for projects under the Community Development Block Grant (CDBG) program. Documents prepared by CPH in support of these programs include Stormwater Facilities Plans, Request for Inclusion, Loan Applications and supporting documents, requests for disbursements (invoicing and certifications prepared) for submittal to the various agencies.

CPH has considerable experience in planning, engineering and construction administration to provide both cost effective engineering services and construction projects. We have worked on numerous Grant programs for numerous governmental clients and understand the importance of establishing cost controls early on in the project and monitoring them throughout the project to maintain within budgets. Our experience in design, bidding, construction administration, and general contracting in the State of Florida keeps us up to date on current construction activities, methods and costs.

Reasons to Select CPH

We have carefully selected our team based upon the depth of their qualifications, reputation for response, recognition for quality work, experience, and past performance. The advantages our team offers the City of New Smyrna Beach on this project include the following:

1. CPH is a **well-established**, financially strong, and multi-disciplined firm with approximately 240 personnel (with a fully-staffed local office in Sanford) able to provide the City of New Smyrna Beach with highly-qualified engineers, surveyors, environmental scientists, and contractors (estimators and schedulers) necessary to complete this project.

2. CPH and, more specifically, the proposed project team, have experience that demonstrates the ability to plan, design, permit and oversee construction on many similar projects - projects that were done **on schedule, on budget, and with high standards.**

3. CPH has demonstrated its willingness and capability to meet project schedules and budgets. We have proven such time and time again throughout our **36+ years providing services to the State of Florida**.

4. CPH has a well-established and successful project approach as described herein to ensure timely, low-cost, and high quality delivery of the project. **Our approach has a proven track record** based on the many projects successfully completed.

5. CPH adds valuable experience and knowledge as it relates to engineering projects. The team has provided design, permitting, and construction services for roadway, trail, and traffic projects for over 100 miles of roadway.

Our team members are local and routinely work together as a team on numerous projects throughout Florida. CPH offices and team members are fully integrated and connected to allow seamless interaction of all staff and team members, regardless of physical location. All of our offices have a unified communication system, where all employees are connected via instant messaging, phones, smart phones, virtual private networks, video conferencing, and more. This allows our firm to function as a completely integrated team and draw upon the best resources for all projects without constraints of geographical locations.

LIST OF ONGOING PROJECTS IN DESIGN/CONSTRUCTION PHASE

We have provided a list below of our ongoing projects in design/construction phase:

- Bluford Avenue Utility/Streetscape
- Collier County NCRWTP OC Blowdown SA Bulk Tank
- Dade City Design and Construction for Hardy Trail Expansion
- Deerfield Beach H&R Landscape Services for Rehabilitation
- Design & Build Services for W. Central Blvd., Gravity Sewer, Roadway
- Dunes CDD Wastewater Treatment Plant Improvements
- Englewood Maintenance Office & Warehouse
- Eatonville Phase II Wastewater Facilities Improvements
- Eatonville Wastewater Facilities Improvements CDBG
- Engineering Services for Caliber Collision
- FGUA Water Storage Golden Gate/Lehigh Acres
- Fort Myers Treatment Plant Restroom and Locker Room Upgrades
- Gopher Tortoise Permit & Relocation, Goodwill DeLand
- Haines City WTP #1 Anionic Ion Exchange for TTHM & Haloacetic Acid
- Hanover Square Shopping Center Proposed Outparcel
- Harrison Avenue Streetscape Improvement Project
- Hurok Warehouse Showroom & Office Space
- Innovation Montessori Charter School
- JEA Otter Run WTP Renewal & Replacement
- John Knox Village Remodel of Existing Ground Floor Facility
- Kissimmee Shopping Center 192 & Old Vineland Road
- Largo West Bay Trail Head Improvements
- MBHE Structural Engineering Flea Market Pensacola
- Monroe County Fire Station on Cudjoe Key
- Most Precious Blood Church Maintenance/Storage Building
- Oakland Water Supply Facility Work/Model Update
- Orange County Pump Stations R/R Package 2
- Orange County Pump Stations 3025A, 3044, 3027
- Orange County Southwest Marriott Wastewater PS #3597
- Orchard Supply Winter Park
- Palm Coast Engineering Services for Wastewater Treatment Plant #2 and Associated Facilities
- Panda Express Riverview
- Phase II Rear Parking Modifications, Big Pine Key, FL
- Port Orange Recipient Site Coordination and Monitoring
- Punta Gorda Shell Creek Water Treatment Plant, Raw Water Pump Station Improvements
- Reedy Creek Improvement District Design Retrofit of Various Reclaimed Water Facilities
- Reedy Creek Improvement District Reclaimed Water Retrofit Design Lake Buena Vista
- Sanford Main Water Treatment Plant Design, Permitting, SRF Assistance, Bidding & Pre-Construction Services
- Seminole County Pump Station Upgrades FY 2013
- Seminole County Pump Station Upgrades FY 2014

- Sanford Airport Authority FIS/Customs Non-RPR Services
- Sanford Airport Authority Terminal B Expansion
- Sanford Airport Authority Outbound Baggage Non-RPR Services
- Seminole Shoppes Outparcel
- Shoppes at Tyson Place Outparcel Layout
- Titusville Del Mar Court Pipe Replacement
- Titusville Hopkins Avenue Traffic Signalization Project
- West Melbourne City Hall Renovation
- Winter Springs Water Treatment Plant #1 Water Quality Improvement

SWORN STATEMENT UNDER SECTION 287.133(3) (1) FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for RFQ 12-17-ENG.

This sworn statement is submitted by CPH, Inc.

[Name of entity submitting sworn statement]

whose business address is: 500 W. Fulton Street, Sanford, FL 32771 and (if applicable) its Federal Employer Identification Number (FEIN) is 59-2068806. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: _____. My name is Nikhel Jindal, GCC and my relationship to the entity named above is Vice President/Associate.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

X Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

Date: 05/08/2017

Litigation Statement

The following case is still in process:

City of Fernandina Beach vs. CPH Engineers, Inc. et al Case No. 2014-CA-343 Division: CA; Policy No. RDP0018939

Origination Date – December 2014

The City of Fernandina Beach filed suit in relation to a subdivision which had two streets having groundwater flowing over the curb and draining into the street for a distance of about fifty yards on each street. The subdivision was designed by another engineer and CPH assisted the developer during construction. The project was built eight years ago and only recently has the problem occurred. CPH is investigating the matter and it appears a new pond was built in the area and the outfall of the storm system is not functioning correctly. We are working with the City to resolve the issue; however, CPH was not the original Design Engineer nor did this issue occur until many years after project completion; therefore, CPH does not feel that we are liable on either of these counts and the City has agreed and a release is being prepared.

ADDENDUM 1

RFQ 12-17-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to Request for Qualifications **RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES,** issued April 1, 2017.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted RFQ documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation, RFQ 12-17-ENG, as though it had been issued at the same time and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The bid opening remains May 9, 2017 at 3:00 PM.

Vendor questions:

1. Are you wanting a statement from our financial institution to satisfy this requirement or are you seeking something else?
   Would you please clarify what you would like to see?

   Answer: Financial Statement, credit score, any unsatisfied liens or judgements.

2. Your RFQ states that proof of insurance certification is to be submitted with the response. However, there are no guidelines as to dollar amounts and coverages you seek in order to get the COI from our provider.

Will you be releasing insurance parameters on coverages so I can give that to my provider and generate the proper Certificate of Insurance?

Answer:

Listed below are various insurance requirements that must be met by the company that the City contracts with for services. Your company **is not required** to submit proof of insurance with this RFQ however, failure to provide proof of insurance as proscribed by this document no later than three (3) working days after your company is notified that it has been selected will automatically disqualify your firm from further consideration.

Workmen's compensation insurance in accordance with the laws of the State of Florida sufficient to secure the benefits of the Florida Workmen's Compensation Law for all employees of the Contractor and employer's liability coverage providing limits as specified in the following paragraph:

Comprehensive General Liability $1,000,000 per person
Bodily Injury, including Death $1,000,000 each occurrence
Property Damage $1,000,000 each occurrence
$1,000,000 aggregate

Comprehensive Auto
Auto Liability
$ 500,000 each person
Bodily Injury, including Death $ 500,000 each occurrence
Property Damage $ 200,000 each accident

Professional Liability: (errors and omissions) $1,000,000 (Minimum)

Furthermore, the Consultant will be required to indemnify, hold harmless, and defend the City of New Smyrna Beach, and their officer and directors, representatives, and employees from any and all suits or claims for damages or injuries, including death, to any and all persons or property, arising out of the Consultant's work, product, services or operations under this procurement including any negligent act or omission on the part of the selected firm or its subcontractors, if any.

3. Please clarify –

Under Tab 2 Experience – Please provide documentation/summary of experience of no less than three (3) previous projects for each of the items below –

Is it acceptable to provide three projects that provide experience with all the bullets?

OR

Do we need to provide 3 projects for each bullet, if so, can they be the same projects if applicable?

Answer: It is acceptable to provide three projects which provide all the experience required, if applicable. We are looking for three examples of your experience for each bullet, regardless of whether it was in combination with other bullet items.

4. Which tab should we use for the required forms? Should we create Tab 5 for the forms?

Answer: Yes, Tab 5 will be fine for the forms.

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 11 day of July, 2017, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and **DRMP, Inc.**, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 12-17-ENG, Continuing Professional Engineering Services, and is for one (1) of the seven (7) awarded firms. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services including design services associated with general Civil Engineering practices to include but not limited to developing a complete set of site plans involving paving, grading, utilities, landscaping and stormwater elements, in compliance with the City's Land Development Regulations, as well as state and federal agency guidelines. Such services may require drainage calculations, utility hydraulic calculations, fire flow calculations, stormwater modeling, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses.

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for professional Civil Engineering services and/or other such services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or

supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to

proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders;

at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require

with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Volusia County, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means

and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-

consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the

CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public

agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

Subject: RFQ 12-17-ENG – Continuing Professional Engineering Services

Dear Selection Committee:

DRMP, Inc. appreciates the opportunity to submit our qualifications for **RFQ 12-17-ENG – Continuing Professional Engineering Services.** DRMP is a full-service, multi-discipline engineering firm that has developed a specialty niche by providing continuing municipal consulting and extension of staff services for 39 years. ***We clearly understand that at times these projects will require a quick response and a quick turnaround which DRMP is committed to provide.***

David S. Wilkison, PE, will serve as Project Manager/Principal Engineer for the DRMP team. He will also serve as a ***main point of contact*** for the New Smyrna Beach staff. His 32 years of consulting experience, coupled with his recent government service gives him unique insight into the needs of local government. Mr. Wilkison's government service taught him that facilities and infrastructure designs must be ***operable, maintainable and sustainable.*** Anything less is a disservice to the citizens and staff of the City of New Smyrna Beach. Our Team will provide the City with the best possible Civil Engineering services to better serve the community and their infrastructure needs.

WHY SHOULD NEW SMYRNA BEACH SELECT DRMP?

DRMP offers a variety of specific benefits to the City of New Smyrna Beach. Among these benefits are:

- A Team experienced in working under continuing services contracts
- Availability of personnel for immediate response to all requests including assistance on grant applications such as **ECHO**
- All services provided under one roof
- Subconsultants who are experienced working with the DRMP Team
- Innovative conceptual layout experience
- Committed to minimizing cost and meeting all schedule and performance goals
- Quality construction plans
- Extensive federal, state and local permitting experience
- Local staff committed to successful completion of all projects

We appreciate your favorable consideration of our firm and look forward to the opportunity to serve the City of New Smyrna Beach.

DRMP acknowledges receipt of Addendum 1 and has provided a signed copy in Tab 5 of this submittal.

Sincerely,
DRMP, Inc.

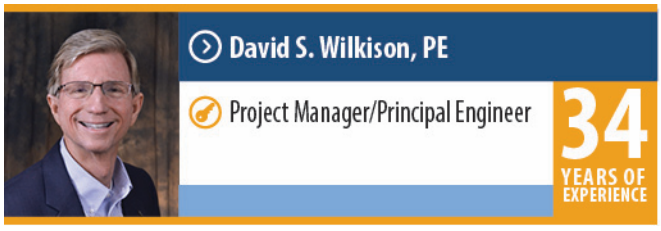
Firm Overview



DRMP, Inc. was founded in 1977 and has been providing professional engineering services for over 39 years. Our firm has 14 offices strategically placed throughout the Southeast. The majority of the work will be completed by our Melbourne office at the following address:

DRMP, Inc.
955 Croton Road
Melbourne, Florida 32935

Project Team

The following provides an introduction to DRMP's Project Manager. For further information on our Team, please review the resumes at the end of this section.

David S. Wilkison, PE is a Project Manager in DRMP's Melbourne Office. His responsibilities include contract administration, project coordination, budgeting, scheduling and business development/marketing. He also focuses on managing the needs of public and private clients and growing DRMP's presence along Florida's east coast. Mr. Wilkison specializes in civil engineering design for municipal, utility, water resources/stormwater management, transportation and land development projects. He is the former Director of Collier County's Growth Management Department where he oversaw 10 operating divisions and administered an annual $200 million capital and operating budget. This diverse experience has given David the knowledge and experience to manage a multi-discipline team that works to provide innovative engineering project solutions that meet the client's budget and schedule.

Subconsultants

Robert E. Taylor AIA Architect PA

Robert E. Taylor AIA Architect PA was founded in 1978 in Palatka, Florida. For almost 40 years, they have been providing architectural services in Florida and Georgia. Having previously teamed with DRMP, Mr. Taylor and his staff are well-integrated into our project approach and has a proven track record of successful communication with our team.

SEARCH

Southeastern Archaeological Research, Inc. (SEARCH) is the nation's highest-capacity full-service cultural resource management firm and a certified woman-owned small business (WOSB). They offer multidisciplinary and multiregional integration of our five in-house divisions: Archaeology, Maritime Archaeology, Architectural History, Archives and History, and Heritage Design. SEARCH has worked in all 67 Counties and have performed a full suite of cultural resources management services, consulting and monitoring, NEPA and NRHP compliance services, and much more. Since 1993 SEARCH has completed over 3,000 projects worldwide; more than one-third of these have been in Florida. SEARCH has worked with DRMP on several previous projects and will integrate seamlessly into the team.

Terracon

Terracon Consultants, Inc. provides a wide range of services to support all phases of a project, from preliminary design through completion of the building process. Each local Terracon office, with access to the extensive geotechnical experience and expertise of engineers, geologists, and soils technicians throughout our company, can help to assess the risks associated with subsurface conditions. DRMP has completed many projects with Terracon and they are a vital member of the project team.

Statement of Professional Consultant's Commitment/Ability and Availability

DRMP affirms to the City of New Smyrna Beach that we will keep the same personnel and be consistent throughout the entire project. Any staff substitutions will only take place under extreme circumstances and following the express permission of the City. Our team has full availability of DRMP's staff and resources. We are committed to meeting the needs of the City.

Minority Business

DRMP has added Search, Inc. to our team to provide archaeological services. Their firm is a certified Women Business Enterprise (WBE).

WBENC | Women's Business Enterprise National Council

hereby grants

National Women's Business Enterprise Certification

to

Southeastern Archeological Research, Inc. DBA SEARCH

who has successfully met WBENC's standards as a Women's Business Enterprise (WBE).
This certification affirms the business is woman-owned, operated and controlled; and is valid through the date herein.

Certification Granted: September 28, 2015
Expiration Date: September 28, 2017
WBENC National Certification Number: 2005127518

WBENC National WBE Certification was processed and validated by Women's Business Development Center - Council of Florida, a WBENC Regional Partner Organization.

Leadership Collier, Naples Area Chamber of Commerce, 1995

RELEVANT PROJECT EXPERIENCE

Brookhill Roadway, Stormwater, and Utility Improvements Design, City of Fort Myers, Lee County, Florida: Principal-In-Charge responsible for overall client interface and project and team management. Originally platted in 1959, the existing infrastructure for this 150-lot subdivision was rapidly approaching its useful life. Designed and permitted new potable water, sanitary sewer, and storm sewer and roadways in the subdivision. Provide bidding services and services during construction.

Poinciana Elementary School Stormwater Management System Improvements, Collier County, Florida: Served as PIC of a redesign and permitting of the stormwater conveyance and outfall system. Many additions to the original campus had resulted in the stormwater management system not functioning in the latest addition areas and in the recreational fields. The redesigned system was constructed during the summer break and was functioning at the beginning of the 2015-2016 school year.

North Naples Fire Control and Rescue District Station 48, Collier County, Florida: Served as PIC of a multi-disciplinary design team that designed and permitted the infrastructure to serve this new fire station. The tenth fire station of the NNFCRD opened in 2015 to serve a fast-growing area of Collier County. The project was done in two phases with initial site clearing and filling done first to take advantage of cost savings for mitigation credits for jurisdictional wetland impacts. The next phase involved the building construction with associated parking, roadway, stormwater and utility improvements. A connection to Livingston Road, a major Collier County Arterial Road, was designed and permitted along with turn lanes and major utility crossings to coincide with the completion of the fire station building.

Arborwood Community Development District, Lee County, Florida: Principal-in-Charge/District Engineer responsibile for exhibit preparation, cost analysis, and expert witness testimony. Selected as District Engineer for this CDD for eleven years. Prepared engineering reports for six bond issuances for infrastructure development. Reviewed contractor submitted requisitions for infrastructure development and reimbursement. Assisted District Manager in the establishment of O&M budget costs annually. Conducted two selection processes for contractors to provide construction services. Reviewed contractor work and pay requests, and prepared final close-out documents. The Arborwood Community Development District (CDD) was established in Lee County in 2004 to acquire, construct, operate and maintain certain public infrastructure improvements to serve the Arborwood Development, a 2,479-acre master planned residential community located in the City of Fort Myers.

Arborwood, Lee County, Florida: Principal-in-Charge responsible for overall client interface and project and team management. Led a multidisciplinary team for the overall master plan; annexation of the development to the City of Fort Myers; Comprehensive Plan Amendment; DRI application and approval; and related land development code changes for a 2,479-acre tract in Lee County.

Heritage Bay Master Planned Community and Community Development District, Collier County, Florida: Principal-in-Charge responsible for the establishment of a new Community Development District. Responsibilities include exhibit preparation, cost analysis, and expert witness testimony. Heritage Bay is a master planned community developed on 2,562 acres of land that had been actively mined for limerock for more than 28 years. The multi-disciplinary team allowed the re-use of the previously mined quarry to become a beautiful neighborhood with no environmental impacts. Our team guided US Homes, Inc., through all phases of the DRI process, including detailed land planning services and preparation of Comprehensive Plan amendments, zoning application and PUD document, and provided CDD establishment, engineering, surveying, and utilities design/coordination for the site.

Ave Maria Town and University, Collier County, Florida: Project Engineer responsible for the upfront planning of infrastructure and master scheduling. Ave Maria, a 5,027-acre master planned university and companion town, is the first application of the Rural Lands Stewardship Area Overlay (RLSA) in eastern Collier County, Florida. The design of the RLSA is an award-winning plan that establishes innovative stewardship principles and practices to protect natural resources, ensure agricultural viability, and promote economic diversity while directing growth from environmentally-sensitive areas. Provided comprehensive site development services from inception for the town, University, and supporting infrastructure.

Immokalee Airport, Collier County, Florida: Principal-in-Charge/Project Manager responsible for the preparation of a master surface water management plan for Collier County's largest airport. The master plan was conceptually permitted through the South Florida Water Management District (SFWMD).

City of Naples Municipal Airport, Collier County, Florida: Principal-in-Charge/Project Manager responsible for the coordination of various projects within the airport property requiring site development plan design and surface water management permit modifications. Major projects included a conceptual SWM plan for the entire airport and the design of infrastructure for a subdivision in the south quadrant.

Immokalee Regional Airport Industrial Park, Collier County, Florida: Principal-in-Charge/Project Manager responsible for the preparation of a master site development plan for a 50-acre industrial development. Project included design and permitting of infrastructure to serve both airside and landside development and surface water management design and permitting.

Immokalee Regional Airport Phase I Entrance Road and Utilities, Collier County, Florida: Principal-in-Charge/Project Manager designed and permitted the roadway and associated utilities to serve Phase I of the Immokalee Regional Airport including the design and permitting of backbone surface water management system that would serve the Phase I build-out.

Marco Executive Airport, Collier County, Florida: Principal-in-Charge/Project Manager responsible for overall client interface and project and team management. This project entailed design and permitting services for a parallel taxiway, aircraft apron expansion, parking expansion, directional beacon, wastewater pump station, and force main.

Goodlette-Frank Road Widening Utilities Relocation, Collier County, Florida: Principal-in-Charge responsible for overall client interface and project and team management. Prepared design and construction drawings and provided permitting for a new City of Naples/Collier County water main interconnect and approximately 3.5 miles of relocated utilities including water, sewer, and reclaimed water lines for the widening of Goodlette Frank Road (two to four and six lanes) from Pine Ridge Road to Vanderbilt Beach Road.

Colonial Boulevard Utility Relocation (I-75 to SR 82), Lee County, Florida: Principal-in-Charge responsible for overall client interface and project and team management. Provided professional engineering services and coordination for the relocation of the City's potable water, wastewater, and reclaimed water utilities along a segment of Colonial Boulevard. Professional engineering services were also provided for the connection to the reclaimed water transmission system along Colonial Boulevard and Treeline Avenue.

DRMP

Chris D. Towne, PE

Vice President-in-Charge/Public Involvement

Chris D. Towne, PE is a Vice President and General Civil Division Manager. He is responsible for client relations, oversight of staff, project management and business development. As a Project Manager, he provides civil engineering design for municipal and land development projects.

Throughout his career, Mr. Towne has worked on a variety of civil engineering projects including roadway, bridge, airport, structural, drainage, water, sanitary sewer and site civil design. All of this experience has afforded him the knowledge and experience to apply a multi-discipline approach to complete projects within their budget and schedule.

RELEVANT PROJECT EXPERIENCE

Continuing Civil Engineering Services, Flagler County, Florida: Project Manager responsible for providing planning, design, permitting and construction inspection for stormwater management systems, site and property developments, roadway improvements, park and recreational facilities, utility improvements, and traffic engineering on a continuing as needed basis.

- **CR 305 Widening and Resurfacing, Flagler County, Florida**: Serving as Project Manager responsible for providing design for roadway, drainage, signing and pavement markings and maintenance of traffic plans for the widening and reconstruction of approximately 2.711-miles of CR 305 from north of CR 304 to south of Middle Haw Creek to accommodate 12-foot travel lanes and 6-foot unpaved shoulders in each travel direction. In addition, the front slope is being reconstructed to accommodate lane widening and shoulders. As a result, portions of roadside ditches and wetlands are being impacted. Compensatory excavation will maintain the stormwater flow capacity of the ditches. Wetland impacts were identified and mitigated per agency requirements. This project will be permitted through St. Johns River Water Management District and U.S. Army Corp of Engineers.

Engineering Services for Miscellaneous Transportation Projects, Alachua County, Florida: Project Manager responsible for providing transportation engineering services such as roadway design, studies, 3R projects, minor traffic engineering, construction engineering inspection, signalization, intersection improvements, drainage design, utility design, MOT and permitting to the Public Works Department on an as needed basis.

- **SW 8th Avenue Extension Preliminary Design, Alachua County, Florida**: Project Manager for the design of the preliminary alignment, drainage and right-of-way for a new 0.5-mile 2-lane rural arterial connecting SW 8th Avenue from SW 137th Way to SW 143rd Street. Two separate options were studied. The project was used to purchase right-of-way and will be moved forward to final design and construction.

- **SW 8th Avenue Multi-Use Trail, Alachua County, Florida**: Project Manager for designing approximately two miles of multi-use pathway (6-feet to 8-feet wide) along the southside of SW 8th Avenue from SW 122nd Street to SW 91st Street. SW 8th Avenue is a 2-lane rural section facility in this area. Project also included signing and marking, drainage design and permitting, community involvement, utility coordination and flooding improvement. Project was funded by FDOT Local Agency Program (LAP).

- **Archer Braid Trail Connector, Phase 2, Alachua County, Florida**: Project Manager for designing approximately four miles of multi-use pathway (8-feet to 10-feet wide) adjacent to both rural and urban section County roadways

Project included signing and marking, traffic signal modification, roadway intersection modification, drainage design and permitting, community involvement, utility coordination and flood zone compensation. Project was funded by FDOT Local Agency Program (LAP).

Continuing Services for Minor Projects, University of Florida, Alachua County, Florida: Project Manager responsible for providing continuing engineering services for Campus Service Renovation and Construction of Minor Projects located on the University of Florida main campus or at UF and IFAS facilities throughout Florida.

- **Stadium Road and Gale Lemerand Drive ADA Ramps, University of Florida, Alachua County, Florida**: Project Manager responsible for roadway design to replace three curb ramps at the intersection of Stadium Road and Gale Lemerand Drive. Ramps are located on the northwest, southwest and southeast corners of the intersection. Project included: roadway design, paving and grading, pavement markings, surveying.
- **Greenway Bike Path/Sidewalk West Utility Relocation, University of Florida, Alachua County, Florida**: Project Manager responsible for design services and coordinating the utility relocation for 1.5 miles of bike path/ sidewalk for the University of Florida. Services included survey, utility pole and waterline relocation design.
- **4H Camp Welaka Master Plan, University of Florida, Alachua County, Florida**: As Project Manager, served as the civil infrastructure advisor and local liaison for the development of a large scale master plan for the camp located along the St Johns River near Palatka.
- **Village Drive Bicycle-Pedestrian Bridge Drainage Repairs, University of Florida, Alachua County, Florida**: As Project Manager he provided on-demand design and inspection services for the drainage repairs being performed by the UF Physical Plant Division.

General Engineering Consulting Services, Gainesville Regional Utilities, Alachua County, Florida: Project Manager responsible for providing professional engineering services in support of Capital Improvement Plan on an as needed basis.

- **SE 4th Street Utilities, Alachua County, Florida**: Project Manager responsible for preliminary plans for water distribution system adjustment to place sanitary sewer manholes and piping on SE 4th Street roadway in support of reconstruction project.

Miscellaneous Projects, City of Crystal River, Citrus County, Florida: Served as Project Manager for the preliminary design, final design and permitting of multiple roadway culvert replacement projects with the City of Crystal River.

- **NE 11th Street Culvert Replacement, Citrus County, Florida**: This culvert project was to provide increased drainage capacity and replace failing culverts. The project consisted of providing permitting coordination, engineering plans and specification documentation for the replacement of mid sized culverts under Northeast 11th Street. Project cost is approximately $50,000.
- **NE 7th Avenue Culvert Replacement, Citrus County, Florida**: This culvert project was to provide increased drainage capacity and replace failing culverts. The project consisted of providing permitting coordination, engineering plans and specification documentation for the replacement of mid sized culverts under Northeast 7th Avenue. Project cost is approximately $30,000.

Gainesville Nissan, TT of Alachua, Alachua County, Florida: Project Manager of the design and permitting for the addition of a 466-space parking lot and 36,000-SF office building and garage. Permitting included Gainesville Regional Utilities, FDOT District Two, St. Johns River Water Management District and the City of Gainesville. Mr. Towne also performed wetland mitigation.

Devonshire Community, Cathcart Properties, Putnam County, West Virginia: Civil Engineer for a 4-phase, 850-unit residential development on 110-acres. Mr. Towne performed drainage, erosion control, roadway and utilities services for Putnam County Development and Putnam PSD review.

Jose A. Chaves, PE
Civil Engineering

Jose A. Chaves, PE is DRMP's General Civil Department Manager in the Orlando office. In this capacity he is responsible for leading the Central Florida staff in providing a high level of service in all Civil Engineering Projects. With emphasis in innovative approach, technical ability, and customer service he is responsible for the overall success for all private development and public projects managed by the department staff.

He serves as a Project Manager for projects ranging from single family residential development, multifamily complexes, commercial sites, master planning and entitlements, and major public capital improvement projects. He has experience with roadway design and construction, utility main design for new proposed and replacement projects, master lift station design and construction, and utility master planning. He is also experienced in plan production, project coordination, scheduling, entitlement, permitting, and construction management.

RELEVANT PROJECT EXPERIENCE

Crescent Gateway Master Plan, Crescent Communities, LLC, Seminole County, Florida: Project Manager for the Crescent Gateway Preliminary Development Plan. The project consisted of master planning over 55 acre for development, which included 1,050,000 sf of office space, 48,572 sf of retail space, 190-room hotel, a 249-unit multifamily development and six parking garages. The master planning established internal roadway network for the mixed use development, creating an urban cross section with pedestrian connectivity, shared parking areas, and open spaces to promote the "live work play" theme of the development. The project required careful planning of open space allocation, entitlement distribution, and coordination with other design consultants and the developer's legal counsel. The planning included typical sections, master utility system modeling, traffic circulation plan, and master stormwater management.

Crescent Gateway Multifamily Project, Crescent Communities, LLC, Seminole County, Florida: Project Manager for the development of a 249-unit apartment building complex that consisted of five (5) 4-story buildings, three (3) 3-story townhome style buildings, and onsite surface parking. Project included: site design, paving and grading, water and sewer, and stormwater design. The project required detailed coordination and compliance with the Master Plan to ensure internal roads represented the urban feel of the master development, and encouraged pedestrian connectivity to the other sections of the master development. This project included detailed coordination and permitting with the City of Altamonte Springs, SJRWMD and FDEP.

Crescent Gateway New Century Park, Crescent Communities, LLC, Seminole County, Florida: Project Engineer for the Crescent Gateway New Century Park. This project included assisting in the master planning for a mixed used development, to address circulation, master utility connections, and stormwater management. Unique site conditions included a closed basin, with major environmental constraints requiring unique approach to connectivity and stormwater management.

SR 15/SR 600 (US 17/92) Interchange at SR 436 Design-Build, The Lane Construction Corporation for FDOT District Five, Seminole County, Florida: Project Engineer for the utility design for this $22 million project for the design and construction of a single-point urban interchange to improve traffic capacity and safety at SR 15/600 (US 17/92) and SR 436 in the City of Casselberry. The interchange elevated four lanes of SR 15/600 (US 17-92) over SR 436 at what was previously one of the most congested at-grade intersections in Florida. Prior to construction all underground utilities were located. DRMP then designed all utility relocations to accommodate the proposed improvements. DRMP coordinated with the utility owner (City of Casselberry) and the FDOT for all aspects of the new design.

East Lake Drive, Park Square Homes, Seminole County, Florida: Project Manager for a single family residnetial community in Seminole County. Project included utility service, stormwater manageemnt, paving and grading, and permitting. Stormwater design included compensating storage for impacts to an existing floodplain and FEMA permitting.

Greeneway Park DRI-Multifamily #1A, WeldenField Development, Orange County, Florida: Project Manager for the final design and permitting of a 348-unit apartment complex. Project included working will the project team to achieve the owner's financing requirements, government agency final approvals, and final construction plan development. The process included a lot split, wetland coordination, and coordination with master planned community for utility services.

Gateway Extension, City of Altamonte Springs, Florida: Served as the primary liaison for constructability in the team leading an accelerated design schedule for a roadway extension of 1.5 miles. The $9.5 million project includes utilities, drainage, irrigation and landscaping, and ROW determination and acquisitions. Served as the lead in the creation of the contract documents and specifications. Project designed following FDOT standards and specifications. Project design was completed in nine months. Was part of the six members acknowledged via recognition award for the efforts associated with this project. Project design was completed in 2012.

Spring Lake Road Force Main, City of Altamonte Springs: Project Manager for the replacement of a 24-inch sanitary sewer force main. This project had various challenges including misrepresentation of underground utilities on contract plans. Led a team to create a multi-phased solution that allowed for project completion while saving the City over $100K. Project design was completed in 2012.

Rollingwood Trail Water Main Replacement, City of Altamonte Springs, Florida: Project manager for the replacement of a failing water main in a residential area. This project was in a residential area where zero road disturbances were permissible and proper communication with home owners was essential. This project was backlogged for over three years by previous staff but was quickly addressed under my management.

West Town Parkway, City of Altamonte Springs, Florida: Project Manager for the construction of West Town Parkway Extension. Project includes utilities (20-inch R water main, 12-inch water main and gravity sewer), drainage (storm sewer and retention ponds), new roadway, expansion of existing roadway, irrigation and landscaping. Project designed and built following FDOT standards and specifications including QCP. The project required permitting from various authorities requiring coordination with the County, the FDOT, FDEP, and SJRWMD. Project design was completed in 2012.

Oakland Estates Neighborhood Improvement Project, City of Altamonte Springs, Florida: Project Manager for the (4-inch and 6-inch) water main replacements, sidewalk and curbing improvements, and roadway restoration. The $1,441,197.65 project served as a starting point for an overall Neighborhood Improvement Program for the City increasing public attention and Commission involvement. The project required careful coordination to minimize outages and ensure the public safety. Project design was completed in 2011.

North Winter Park Drive Phase II, City of Casselberry, Florida: Assisted the project management team in completing the design review and constructability analysis of the North Winter Park Drive Phase II project. The Project consists of the resurfacing of 2.50 miles (13,000-LF) of Winter Park Drive between Red Bug Lake Road and Seminola Boulevard and 0.65 miles (3,426-LF) of reconstruction of Winter Park Drive between Seminola Boulevard and 7th Street. Project includes installation of a water main, sanitary sewer main, reclaimed water main, stormwater sewer and the relocation of an existing force main. The utilities included in the project consist of 25% of the total project scope. ARRA funded project requiring proper coordination of Engineer of Record, CEI and FDOT representatives.

Casselberry Streetscape - US 17-92, City of Casselberry, Florida: Assisted the project management team in the final design and constructability review of the US 17-92 Streetscape Project. The project consists of the installation of landscaping, irrigation and hardscape improvements along the east and west right-of-ways of US 17-92, from SR 436 north to Seminola Boulevard. LAP Project requiring FDOT specifications to be met in all aspects of the project.

DRMP

Fernando Cano, PE
Civil Engineering

Fernando Cano, PE is a Project Manager in DRMP's General Civil Division. He is responsible for the design and permitting of land development projects including overseeing projects from concept to completion, client coordination, planning, design and permitting. Mr. Cano's project experience includes civil engineering design of roadways, drainage improvements, water and wastewater utilities and permitting for residential, commercial, municipal and transportation projects.

RELEVANT PROJECT EXPERIENCE

North Hancock Road from Florida's Turnpike to CR 561A, Family Dynamics, Inc., Lake County Florida: Roadway Project Engineer responsible for design of a new 1.2-mile, 4-lane divided urban roadway extension with a 12-foot shared use path through a site with over 100-feet of vertical relief. Coordination with the Florida's Turnpike Enterprise was required as the project connects to the new Minneola Interchange that was designed and constructed simultaneously. The project also included turn lane improvements and super elevation reduction to CR 561A where the project connects to the existing local roadway network. Project included roadway design, drainage design, MSE walls, maintenance of traffic plan for CR 561A using temporary pavement, utility coordination, signing and pavement markings, design survey, right-of-way mapping, environmental permitting, wetlands and sand skink listed species survey.

I-595 Final Design, FDOT District Four, Broward County, Florida: Assisted with the drainage master plan update, and drainage design for several sections of the corridor. Design tasks include exfiltration trench design, storm sewer design and analysis, and both wet and dry retention stormwater management pond designs.

Ravenswood Road Subaqueous Crossing, Broward County, Florida: As Engineer of Record, this project included the subaqueous relocation of an existing 12-inch water and 16-inch force main aerial crossing under the Dania Cut-Off Canal to accommodate a bridge widening project. The subaqueous crossing extends 700-lf and is 40-ft deep.

Monterra Community Development District, Engle Homes, Broward County, Florida: Served as Project Engineer on a 500-acre residential subdivision and mixed-use development in the City of Cooper City. Worked closely with the Project Manager from the inception of the project and in particular on the conceptual water management analysis, utilities design, and permitting with South Florida Water Management District, Central Broward Water Control District, Broward County Highway Construction and Engineering Division, Florida Department of Transportation, Broward County Environmental Protection Department and Broward County Health Department.

Twin Lakes South Neighborhood, Malcolm Pirnie, Inc., Broward County, Florida: Project Engineer responsible for preparation of a Basis of Design Report for the Twin Lakes South Neighborhood to analyze the existing drainage infrastructure of the 63-acre residential community. Permitting requirements and a conceptual drainage plan were provided for the purpose of planning the implementation of the improvements and developing construction costs. The scope of this project consisted of master planning, stormwater modeling and preparation of the Basis of Design Report.

Kings Garden I and II Livable Neighborhood Improvements (CMGLNIP), City of Miami Gardens, Florida: Project Engineer for drainage improvements to an existing neighborhood of approximately 17-acres, as outlined in the Basis of Design Report. The project required permitting with Miami-Dade Department of Environmental Resources Management.

Kings Garden III Basis of Design Report, City of Miami Gardens, Florida: Project Engineer responsible for analyzing the existing stormwater management system serving the City of Miami Gardens Livable Neighborhood Improvements

Project (CMGLNIP) - Kings Garden III study area. The analysis assessed the capacity of the existing drainage system, identified problem areas and evaluated alternatives for flood control.

UAZ 303 Water and Sewer Improvements, Broward County, Florida: Project Engineer and Resident Engineer for the design, preparation of construction documents, permitting, bidding assistance, and construction management for water and sewer infrastructure improvement project. The sewer improvements included lift station and force main design. Permitting agencies include: Broward County Water and Wastewater Services, Broward County Health Department, Broward County Environmental and Growth Management Department, Broward County Highway Construction and Engineering Services Division, City of Hollywood, City of Dania Beach and the Florida Department of Transportation.

Virginia Key Wetland Restoration, Miami-Dade Department of Environmental Resources Management, Florida: Project Engineer for this wetland restoration project of approximately 52-acres of existing lakes, ditches and proposed interconnect channels which have been designed to hydrate and restore the existing wetlands within the project boundary close to the historical condition.

John Easterlin Park, Broward County Parks and Recreation Division, Florida: Project Engineer for the improvement of recreational vehicle facilities at the existing county park. The design included two lift stations, drainage facilities and parking lot improvements.

Stoneman Douglas High School, City of Oakland Park, Broward County, Florida: Project Engineer for the design and permitting of a parent drop off/bus loop and parking lot. The project required permitting with the North Spring Drainage Improvement District and Broward County Traffic Engineering Division.

George P. McLatchey, PWS, CEP

Environmental

George P. McLatchey, PWS, CEP has served as Department Manager for DRMP's Ecological and Environmental Sciences Department since 1998 and has been a principal field investigator, staff supervisor, and project manager on several hundred projects. He has extensive experience in all aspects of federal and state permitting, National Environmental Policy Act (NEPA) compliance, including Wetland Evaluation Reports (WER), Endangered Species Biological Assessments (ESBA), and Essential Fish Habitat Assessments (EFHA). He is a certified Professional Wetland Scientist (PWS) and Certified Environmental Professional (CEP) and has a Bachelor's and Master's degree from the University of Florida with an emphasis in the discipline of wetland and ecological studies.

His areas of specialization include federal, state, and local environmental permitting, mitigation design, wetland jurisdictional delineations and evaluations, listed species studies/relocation, ecological monitoring, lake water quality studies, and alternative corridors/alignment analysis. He has worked extensively on various public and private projects and has been involved with the environmental aspects of the planning, design and permitting of these projects. This project experience has given him strong qualifications in the PD&E and EIS process, corridor and alternative analysis, wetland and wildlife evaluations, mitigation design, public involvement, and permitting.

RELEVANT PROJECT EXPERIENCE

SR 472 and I-4 Mainline Interchange Design and Permitting, Volusia County, Florida: Environmental Project Manager for permitting and mitigation of new interchange and roadway improvements. Tasks included wildlife habitat and listed species studies, extensive scrub-jay surveys, gopher tortoise surveys and associated permitting for proposed new interchange.

Rhode Island Avenue Extension, Volusia County, Florida: Environmental Project Director responsible for managing field staff on wetland assessment and delineation, listed species surveys. Conducted listed species surveys for the extension of Rhode Island Avenue from Veteran's Memorial Parkway to Normandy Boulevard. Species-specific surveys for gopher tortoise, red-cockaded woodpecker, and Florida scrub-jay were conducted. Section 7 Consultation with the USFWS to develop an appropriate mitigation plan for scrub-jays impacts.

I-95 Interchange Feasibility Study, City of Ormond Beach, Volusia County, Florida: Environmental Project Director responsible for directing staff during a feasibility study of a proposed new interchange along Interstate 95 between SR 40 and US 1. Performed QC review of Wetland Evaluation Report, and Wildlife and Habitat Assessment Report, conducted agency coordination, wetland/wildlife/habitat/listed species evaluations, and public involvement.

Hudson and Rima Ridge Wellfield Consumption Use Permit, City of Ormond Beach, Volusia County, Florida: Environmental Project Manager responsible for Environmental Monitoring and Program Establishment, preparing the Annual Vegetative monitoring report required under the SJRWMD permit conditions.

Holly Hill Wellfield Consumption Use Permit, City of Holly Hill, Volusia County, Florida: Environmental Project Manager responsible for Environmental Monitoring and Program Establishment, prepared the Annual Vegetative and Hydrologic monitoring report required under the SJRWMD permit conditions.

Twelve Oaks and Royal Oaks, Lennar Homes, Volusia County, Florida: Environmental Project Manager for tree survey on a 900-acre proposed residential development site. Project required tree surveys for specimen and historic tress, development of acceptable tree survey methodology, and permitting with Volusia County, Florida.

Worthington Creek, Fort Macaulay Development Consultants, Volusia County, Florida: Environmental Project Manager for tree survey on a 100-acre proposed residential development site. Project required tree surveys for specimen and historic tress, development of acceptable survey methodology, and permitting with Volusia County and City of Edgewater.

Julington Oaks, Fort Macaulay Development Consultants, Volusia County, Florida: Environmental Project Manager for tree survey on a 30-acre proposed residential development site. Project required tree surveys for specimen and historic tress, development of acceptable survey methodology, and permitting with Volusia County and City of Edgewater.

Lake McGarity and Lake Theresa Basin Interconnect and Water Quality Sampling, Volusia County, Florida: Environmental Project Manager of water quality sampling and drainage analysis that conducted water quality sampling for numerous lakes in Volusia County and prepared environmental support documents.

B-23 Canal Feasibility Study, Volusia County, Florida: Environmental Project Manager for water quality assessment, land use, and statistical analysis. This study involved evaluation of pollutant loading and recommendation for retrofit treatment for runoff to the lakes within Volusia County.

East Coast Beltline Wetland Monitoring and Operation Program, Volusia County, Florida: Environmental Monitoring Plan, Land Use Management and Program Establishment for Volusia County; Project Manager.

School Board Bus Transit Facility Due Diligence, Volusia County, Florida: Environmental Manager. Performed initial environmental due diligence, including wetland assessment, listed species survey, agency coordination and conceptual permitting and mitigation plan for the development of a bus transit facility in Volusia County.

Palm Coast Parkway Widening, City of Palm Coast, Flagler County, Florida: Environmental Project Manager for roadway widening from a 4-lane suburban section to a 6-lane urban facility. Managed field staff on wetland assessment and delineation, listed species surveys. Conducted general wildlife surveys for listed species surveys and species-specific surveys for gopher tortoise. Prepared reports, environmental documentation, and coordinated with state and federal agencies (SJRWMD, USACE) and obtained permits.

Districtwide Environmental Permitting Services Contract No. C-9065, FDOT District Five, Various Counties, FL: Project Manager for a 5-year contract providing environmental services for the Department's Environmental Permitting Office. Provided project oversight for a multi-discipline team that reviews environmental permit applications and construction plans associated with FDOT District Five roadway design projects. He also assists staff with the Comment Review prior to uploading onto the Department's Electronic Review Comments (ERC) program and coordinates with design consultants to ensure production schedules are met. Other environmental as-needed services provided include wetland flagging, listed species surveys, mitigation planning, coordination with various regulatory agencies, and preparation of Environmental Resource Permit (ERP) applications for in-house FDOT projects.

- **SR 200 Widening, FDOT District Five, Marion County, Florida**: Environmental Project Manager responsible for performing protected species surveys, managing staff, coordinating the Biological Opinion from the USFWS for the Florida scrub-jay and eastern indigo snake, and approval from the Wildlife Task Force (FWC, USFWS, FDEP, FFS, and SWFWMD). He was responsible for the preparation of a SWFWMD permit application utilizing the proposed wildlife crossings as mitigation for project impacts.

- **Belleview Bypass, FDOT District Five, Marion County, Florida**: Environmental Project Manager for this Local Agency Program (LAP) project with Marion County that consisted of a new roadway alignment. His responsibilities included managing staff conducting field surveys for the sand skink, eastern indigo snake, and gopher tortoise. Responsibilities also included development of a sand skink mitigation plan, coordinated with Marion County and the FDOT LAP Coordinator, and obtaining Biological Opinion from the USFWS.

DRMP

Carolyn A. Malphurs, AWB

Environmental

Carolyn A. Malphurs is a Senior Ecologist at DRMP. She has conducted ecological site assessments, multiple types of wildlife surveys, gopher tortoise and burrowing owl relocations, jurisdictional wetland delineations, Geographic Information System (GIS) mapping and analysis, wetland and upland vegetative monitoring, and environmental documentation for PD&E and permitting projects. Ms. Malphurs is an Authorized Gopher Tortoise Agent with the Florida Fish & Wildlife Conservation Commission and an Associate Wildlife Biologist (AWB) certified through The Wildlife Society. She is also a Qualified Airport Wildlife Biologist, in accordance with a Federal Aviation Administration Advisory Circular 150/5200-36A.

Ms. Malphurs offers a wide array of environmental consulting experience, using her skills on both private and public projects. However, her specialty focuses on providing environmental services for transportation-based projects, such as roadway and airport projects. She has experience preparing documentation in accordance with the National Environmental Policy Act (NEPA) and obtaining Environmental Resource Permits from regulatory agencies at the local, state, and federal level.

RELEVANT PROJECT EXPERIENCE

Lost Creek DMMA Gopher Tortoise Relocation, Volusia County, Florida: Served as Biologist as part of the Rose Bay Aquatic Ecosystem Restoration project, all gopher tortoises within the work area of the Lost Creek Dredge Material Management Area were captured and relocated to the Port Orange Mitigation Bank. Ms. Malphurs was responsible for surveying more than 28 acres of gopher tortoise habitat, excavating 104 gopher tortoise burrows, and transporting 44 tortoises from the island donor site to the mitigation bank. She was also part of the team that installed a temporary barrier between the northern and southern lobes of the island to reduce the chance of tortoises moving before and during construction activities.

Victoria Park Development of Regional Impact (DRI) Environmental Services, Volusia County, Florida: Served as Biologist for continuing environmental services provided for a 1,900-acre planned community. This project included wildlife surveys for Florida sandhill cranes, scrub jays, and gopher tortoises; wetland monitoring; habitat monitoring and maintenance of the Victoria Park Preserve Area; and permitting with the St. Johns River Water Management District and the US Army Corps of Engineers. Ms. Malphurs was responsible for conducting annual wildlife surveys, bi-annual wetland monitoring for four years, report preparation, and assisting in the preparation of the permitting documentation.

St. Joseph Peninsular State Park, FDEP, Gulf County, Florida: Served as the Environmental Project Manager to obtain permits for the construction of Americans with Disabilities Act (ADA) compliant beach access boardwalk within the St. Joseph Peninsular State Park. The primary environmental tasks for this project included obtaining a Construction Control Line (CCL) Permit from FDEP and obtaining approval from the USFWS for construction within critical habitat of the beach mouse. Ms. Malphurs was responsible for coordinating with the agencies, GIS mapping, conducting a field investigation and field meeting, and coordinating with the agencies.

The Ecological Society of America
The Wildlife Society

Wilson's Landing Park, Seminole County, Florida: Served as Biologist for the landscape architecture design and environmental services for improvements to Wilson's Landing Park. The improvements included a new pavilion, ADA accessible walkways, and a floating dock for kayaks/canoes. Ms. Malphurs participated in the wetland jurisdictional determination and environmental resource permitting with the St. John's River Water Management District and the US Army Corps of Engineers.

FPL Pipeline, Palm Beach County Water Utilities Department, Palm Beach County, Florida: Served as Biologist for a 19-mile FPL reclaimed water line that ran from Jog Road just north of Okeechobee Boulevard west to the Rinker rock mining operation. Ms. Malphurs conducted wetland jurisdictional determination; gopher tortoise surveys, permitting, and relocation; snail kite surveys; and wood stork foraging analysis services.

Blackwater Creek Mitigation Bank, Lake County, Florida: Served as Biologist for the development of a 434-acre mitigation site located on the 1,300-acre Lake Norris Conservation Area. The reclaimed mining area was permitted through the St. Johns River Water Management District and the US Army Corps of Engineers to provide wetland mitigation for development and transportation projects within the Wekiva River Basin. Ms. Malphurs participated in the preparation of the wetland and gopher tortoise permitting documentation, surveying of more than 109 acres of gopher tortoise habitat, excavating 62 gopher tortoise burrows, and relocating 37 tortoises to a mitigation bank.

Wildlife Hazard Assessment, St. Lucie County International Airport, St. Lucie County, Florida: Served as Environmental Scientist for a wildlife hazard assessment conducted to assist the airport in alleviating safety hazards caused by wildlife and to provide appropriate documentation for the airport to become Part 139 certified. Ms. Malphurs was responsible for conducting the wildlife surveys, coordinating with the client, gathering relevant Geographic Information System (GIS) data, conducting the data analysis, and creating maps.

Districtwide Environmental Permitting Services Contract No. C-9065, FDOT District Five, Florida: Serves as a Senior Ecologist and team leader for a five-year contract to provide in-house environmental services for FDOT District Five Environmental Permitting Office. Services provided include: review of environmental permit applications and constructions plans for District 5 roadway design projects and uploading comments onto the Electronic Review Comments (ERC) program; obtaining Environmental Resource Permits (ERP) for in-house design projects; and coordinating with FDOT staff to assist in project permit determinations. Other environmental as-needed services include wetland delineation, listed species surveys, and coordination/ consultation with various regulatory agencies.

- **SR 25 (US 27) Widening, Lake County, Florida**: The SR 25/US 27 widening project from Boggy Marsh Road to north of Lake Louisa Road was designed and permitted in 2005, but was not funded. When funding became available in 2013, the USFWS guidance for the sand skink and eastern indigo snake had changed and the project required further investigation for protected species impacts. DRMP conducted surveys for the sand skink and gopher tortoise and obtained updated clearances from the USFWS and FFWCC for the project. Ms. Malphurs was responsible for conducting field visits, coordinating with FFWCC and USFWS, and obtaining the gopher tortoise relocation permit.

- **Belleview Bypass, Marion County, Florida**: This Local Agency Program (LAP) project with Marion County consisted of constructing Belleview Bypass, a new alignment proposed to relieve traffic within the City of Belleview. During the FDOT-LAP plans review period, DRMP identified potential protected species impacts that needed to be addressed in accordance with the changed species protocols. Ms. Malphurs was responsible for conducting the field surveys for the sand skink, eastern indigo snake, and gopher tortoise. She was instrumental in conducting the sand skink impact and mitigation assessment, coordinating with Marion County and the FDOT LAP Coordinator, and coordinating the Biological Opinion from the USFWS.

- **SR 200 Widening, Marion County, Florida**: This in-house design project consists of widening SR 200 from the Citrus County line to CR 484. Over the years that this project evolved, DRMP was tasked to assist the FDOT in obtaining the Environmental Resource Permit and agency approval for the project that has several requirements for wildlife crossings. Ms. Malphurs was responsible for protected species surveys, coordinating the Biological Opinion from the USFWS for the Florida scrub-jay and eastern indigo snake, and confirming project approval from the Wildlife Task Force (FFWCC, USFWS, FDEP, FFS, and SWFWMD).

DRMP

John L. Minton, Jr., PE, CFM

Drainage

John L. Minton, Jr., PE, CFM is a Department Manager within the Stormwater Department at DRMP. In this role, he is responsible for leading a qualified team of engineers to complete engineering tasks for water resources projects such as watershed and drainage basin studies, stormwater retrofit projects and support for roadway drainage designs.

Mr. Minton has been serving clients and managing projects under continuing contract arrangements for his entire professional career. He is skilled at managing all aspects of capital improvement projects including preliminary study, final design, permitting, bid selection, and construction administration. Mr. Minton has a depth of experience in surface water modeling and analysis; watershed and drainage basin studies using the latest ArcGIS, LiDAR, floodplain mapping and modeling technologies; roadway and subdivision drainage designs; design, permitting, bidding and construction-related services; and pond siting (PD&E) feasibility analyses. Additionally, he has developed special expertise in the areas of landlocked basin transfers, Total Maximum Daily Load (TMDL) initiatives, FEMA map changes, erosion control for stream beds, floodplain storage, bridge analysis and scour, water quality in lakes, retrofits of stormwater ponds and storm sewers, innovative stormwater treatment systems, wetlands restoration and design, outfall structures, and water amenities design in parks. Mr. Minton has been successful in securing funding and administration of grants for stormwater projects through programs including the SJRWMD Cooperative Funding, FDEP TMDL Water Quality Restoration program and the Lake County Water Authority (LCWA) stormwater treatment grant program.

RELEVANT PROJECT EXPERIENCE

Stormwater and Environmental Services Continuing Contract, Volusia County, Florida: Project Manager for this continuing services contract. Projects under this contract include:

- **Alexandra Woods Drive Flooding Investigation, Volusia County, Florida**: Project Manager for a flood investigation for residential area along Alexandra Woods Drive. Study area is approximately 650-acres. Services included surface water modeling to compare pre-development and post-development conditions to show aspects of the surface water drainage patterns and hydrologic cycle most influence flood conditions at Alexandra Woods Drive.
- **Airport Road Stormwater Improvements Project**: Provided engineering design, permitting, bidding, and construction inspection services for this stormwater retrofit project. The project involves incorporation of a wet detention stormwater pond into an existing open drainage system which drains through residential neighborhoods to the Tomoka River. The stormwater pond is designed strictly to treat stormwater in a water quality sensitive basin. Adjacent drainage improvements to a roadway culvert crossing are also necessary to allow for design head loss introduced by the addition of the pond to the existing drainage system. Wetland species plantings along a pond berm are necessary as a mitigation requirement for encroachment into an adjacent wetland, as required by the St. Johns River Water Management District (SJRWMD) for permit acquisition.
- **North Peninsula Stormwater Improvements Project**: Provided engineering design, permitting, bidding, and construction inspection services for this stormwater retrofit project. The project actually includes three mini-projects on three residential streets in close proximity; namely River Street, Pinta Street, and Aqua Vista Drive. The residents along these streets have endured chronic street, yard, and some structural flooding, due to

lack of adequate drainage systems. These projects involve construction of storm sewer systems connecting depressional areas prone to flooding to existing reliable storm sewer systems, which drain westward to the Halifax River. In order to mitigate the effects of increasing flow rates through the existing storm outfalls, on-line exfiltration systems were integrated into the proposed storm sewers. Weir structures were designed within some of the inlets to hold water back in the exfiltration trench sections to maximize the benefits of stormwater infiltration. Special concrete aprons were designed for the inlets to facilitate periodic cleaning of the grates with street sweeping equipment. A permit exemption was acquired from the St. Johns River Water Management District (SJRWMD) for this project by demonstrating a benefit to drainage conditions without significantly altering drainage patterns

Continuing Stormwater Contract, City of Orlando, Orange County, Florida: Served as Project Manager for the preliminary design, final design and permitting of various miscellaneous drainage improvements within the City of Orlando. Typically these projects consisted of stormwater retrofits that provide additional water quality benefits as well as providing flooding relief and protection. There were multiple assignments that required review, negotiations and ensuring that adequate staff and resources be available to undertake the work effort.

- **Lake of the Woods Drainage Improvements Project, Orange County, Florida**: Served as Project Manager with project task assignments including final design, development of construction plans, permitting, bid assistance, and construction inspection. The project involved diversion of stormwater from approximately 40 acres of highly urbanized land out of the Lake of the Woods basin to alleviate flooding problems at the lake. This project was the implementation of Phases II and III of a conceptual diversion plan that was previously developed and permitted by DRMP through the SJRWMD. This project included construction of new storm sewer, reversing flows in existing storm sewer, and retrofitting two existing drainage wells with stormwater treatment units.

- **Lake Lorna Doone – Tampa Avenue Drainage Improvements, Orange County, Florida**: Served as Project Manager on this project involving construction of a lake outfall structure on Lake Lorna Doone to provide flood protection to surrounding residential, commercial areas, and the emergency shelter at the Citrus Bowl. The piped lake outfall was installed along Tampa Avenue to outfall into Clear Lake with the added benefit of alleviating localized flooding along Tampa Avenue. The project task assignments included final design, development of construction plans, permitting with SFWMD, bid assistance, and construction inspection.

- **Lake Angel/Conroy Basin Drainage Improvements Project, Division Avenue System Extension Phase I, Orange County, Florida**: Served as Project Manager for alternatives analysis, final design, permitting and construction of storm sewer improvements to provide flood relief to a land-locked basin. Improvements were divided into two phases with Phase 1 involving extension of an existing storm sewer along Division Avenue to divert flood waters to a more reliable outfall at Lake Holden. Phase II involved upgrading collection systems, converting ditch to storm sewer, and installation of two suntree stormwater treatment units prior to discharge into a drainage well.

- **Maguire Boulevard/Colonial Drive Improvements, Orange County, Florida**: Served as Project Manager for permitting and design of the overall project. This included close coordination with the FDOT District Five in coordinating designs and construction documents. The stormwater design required permitting a basin diversion in order to reduce flooding concerns.

- **Narcoossee Road Stormwater Management Study, Orange County, Florida**: Project Manager responsible for conducing a stormwater management study of Narcoossee Road from the northern end of the interchange with the Beeline Expressway to the intersection with Goldenrod Extension. The purpose of the study is to develop a stormwater management plan for areas along the Narcoossee corridor in order to assist the City in its determination for annexation purposes and future roadway widening.

Stormwater Design & Studies, City of Leesburg, Lake County, Florida: Serving as Project Manager on this continuing services contract that issues various stormwater engineering tasks as needed by the City. Tasks may include: stormwater design and studies, NPDES program implementation support, Total Maximum Daily Load (TMDL) support services and floodplain management services.

DRMP

Chad A. Croft, PE
Drainage

Chad A. Croft, PE is a Project Engineer in the Water Resources Department. Mr. Croft maintains extensive knowledge in both roadway and drainage design and is adept at preparing plans for FDOT projects. Mr. Croft is proficient in MicroStation Version 8, GEOPAK, stormwater management system design software, ICPR, FDOT SS4 software, and ESRI ArcGIS software. Mr. Croft is also competent in performing design calculations and preparing design reports. He is also capable of preparing environmental resource permit applications through various permitting agencies.

RELEVANT PROJECT EXPERIENCE

SR 483 (Clyde Morris Boulevard) PD&E Study, Reynolds, Smith & Hill, Inc. for FDOT District Five, Volusia County, Florida: Drainage Engineer for this Preliminary Engineering Report of SR 483 from SR 400 to SR 600, a distance of approximately 2.5 miles. The recommended improvements included capacity, operational, safety-related and multi-modal elements. The existing 4-lane roadway will be widened to a 6-lane urban roadway with a raised median, bicycle lanes, pedestrian walkways and stormwater treatment facilities. Mr. Croft assisted with the pond siting analysis on the project and prepared a pond sitting report.

Stormwater and Environmental Services Continuing Contract, Volusia County, Florida: Drainage Design Engineer for this continuing services contract. Projects under this contract include:

- **Tomoka View Estates Stormwater Improvements**: Drainage Design Engineer responsible for providing drainage design and permitting to upgrade the existing storm sewer systems and underdrains within the Tomoka View Estates. Improvements included replacement of 40-linear feet of collapsed CMP trunkline with 30-inch pipe, curb inlets at intersection of Apache Trail and Seminole Drive, and 2 ditch bottom inlets. These improvements will enable the existing trunk line to better convey stormwater westward to the adjacent wetland, prevent any future settling of yard areas in the vicinity of the improvements, and improve collection of stormwater along Apache Trail and Seminole Drive. The proposed improvements are designed for the 3-year design event and incorporate offsite flows from the Seminole Center stormwater pond. Services included: drainage study and design, topographic survey, geotechnical, environmental assessment.

- **Alexandra Woods Drive Flooding Investigation, Volusia County, Florida**: Drainage Design Engineer for this flood investigation in a residential area along Alexandra Woods Drive. The residential street crosses a large depressional area and is located between two ponds. The drainage study area is approximately 650 acres. Mr. Croft assisted in evaluating general field conditions, drainage facility conditions and evidence of past flooding. DRMP was responsible for generating basins and sub-basins using LiDAR terrain data. ArcHydro was used to assist in the sub-basin delineations. Other tasks included calculating hydrology parameters and building surface water models to analyze and recreate flooding conditions for different storm events including Tropical Story Fay.

Continuing Engineering Contract, St. Johns County, Florida: Drainage Design Engineer responsible for providing drainage design services in support of engineering projects on an as needed basis for the County. Representative projects include:

- **Bishop Estates Road Stormwater Improvements, Phases I and II, St. Johns County, Florida**: Drainage Design Engineer for this project that involved retrofitting a series of four storm outfalls in two phases for the Bishop Estates Road with the following components: replace deep ditches with shallow swales and piped systems,

replace cross-drains and size to alleviate flooding, remedy scour and erosion problems, and install stormwater treatment units. The treatment units are equipped with upflow filters holding special media for targeting removal of nutrients. A grant was secured with FDEP through the TMDL program for over 50% funding of the project. Water quality monitoring was conducted to measure nutrient removal performance of the project.

Continuing Stormwater Contract, City of Orlando, Orange County, Florida: Served as Drainage Engineer for the preliminary design, final design and permitting of various miscellaneous drainage improvements within the City of Orlando. Typically these projects consisted of stormwater retrofits that provide additional water quality benefits as well as providing flooding relief and protection. There were multiple assignments that required review, negotiations and ensuring that adequate staff and resources be available to undertake the work effort.

- **Lake Angel/Conroy Basin Drainage Improvements Project, Division Avenue System Extension Phase I, Orange County, Florida**: Served as Drainage Design Engineer for alternatives analysis, final design, permitting and construction of storm sewer improvements to provide flood relief to a land-locked basin. Improvements were divided into 2 phases with Phase 1 involving extension of an existing storm sewer along Division Avenue to divert flood waters to a more reliable outfall at Lake Holden. Phase II involved upgrading collection systems, converting ditch to storm sewer, and installation of two suntree stormwater treatment units prior to discharge into a drainage well.

Continuing Stormwater Engineering Contract, City of Mount Dora, Florida: Served as Drainage Engineer for various stormwater improvement projects.

- **Lake John Stormwater Improvements, Lake County, Florida**: Drainage Design Engineer for this retrofit project that specifically involved the expansion and re-shaping of the existing Lake John, a series of three lobes that at times function as one lake. The project increased the size and depth of these lobes to increase flood protection as well as improve water quality for a 364 acre basin that ultimately discharges into Lake Gertrude. In addition to the improvements to Lake John and outfall system constructed along Mt. Dora Road, improvements to the existing outfall system from Dogwood Mountain pond were incorporated to the overall project. Dogwood Mountain pond had chronic flooding problems associated the outfall from Lake John as well as existing outfalls constraints. The addition of a CDS stormwater treatment unit within the outfall will provide pollutant removal for the inflows to Lake Gertrude. Professional services completed in 2008 and construction completed in 2009.

- **Lake Gertrude Outfall Replacement, City of Mount Dora, Lake County, Florida**: Served as drainage design engineer for the outfall retrofit improvements project. Mr. Croft assisted with the design of the drainage outfall and performed all plans production duties for the project. Design was complete in 2009 and construction was completed in 2011.

Florida Hospital Health Village DRI Master Stormwater System, Florida Hospital, Orange County, Florida: Served as drainage design engineer for the master stormwater system project to serve Florida Hospital Health Village. Mr. Croft assisted with the design of the proposed storm sewer system and three master stormwater ponds to serve the 40-acre site. Mr. Croft also assisted with plans production duties for the project. Professional services were completed in 2008.

Bayberry Cove PUD, Fort Maculay Development Holding, Volusia County, Florida: Served as drainage design engineer for the 300-acre planned unit development (PUD) in the City of Daytona Beach. Mr. Croft assisted with the design of the master stormwater system and 20 stormwater ponds. He also assisted with the 100-year flood modeling, FEMA Permitting and stormwater system permitting.

John M. Gilreath, GISP, GIST, RST

GIS

John M. Gilreath, GISP, GIST, RST, is a Senior Project Manager with DRMP and is currently responsible for overseeing geospatial projects and program development. He manages DRMP's GIS/remote sensing program including project planning, data development, data management, and quality control. Mr. Gilreath brings extensive knowledge in GIS, database design, GPS data collection, asset management, and remote sensing.

Mr. Gilreath's past experience in the public and private sector allows him to apply his innovative knowledge across a variety of fields. He has completed a number of projects for transportation/utility infrastructure data collection, facilities management, transportation planning, economic development analysis, stormwater modeling, pavement management, wildlife/forestry, and emergency management response efforts across the country. Mr. Gilreath is well-versed in the needs and requirements of municipalities in each of these areas and will work to ensure final deliverables exceed the client's expectations.

RELEVANT PROJECT EXPERIENCE

GIS Asset Inventory of Pre/Post Construction for SR 836 Operational, Capacity, and Interchange Improvements, McKim & Creed, Inc. for Miami-Dade Expressway Authority (MDX), Miami-Dade County, Florida: Serving as GIS Project Manager to provide a comprehensive inventory of all existing MDX assets for a 4-mile stretch of the Dolphin Expressway (SR 836) in Miami. Responsible for performing a pre-construction inventory for monitoring new/removed/modified assets as construction on SR 836 progresses. Additionally, will perform a mobile LiDAR scan and survey to create a spatially accurate inventory for MDX maintenance and asset depreciation tracking upon construction completion. This is a comprehensive inventory effort for the major east-west travel corridor in the City of Miami. He will also manage the creation of a geodatabase to meet MDX operational standards and will include over 18 GIS layers for the, Open Road Tolling (ORT) system, Intelligent Transportation System (ITS), lighting, utility conduit, drainage/ stormwater, signage, and road design (attenuators, guardrails, etc).

GIS Support Services, BRPH Companies, Inc. for the Greater Orlando Aviation Authority (GOAA), Orange County, Florida: Serving as GIS Project Manager for this project to provide GIS for the implementation of the Strategic Commercial Land Development Program for the GOAA. Responsible for the creation of a GIS model to rank, weight, and prioritize GIS layers to model infrastructure coordination and development suitability. The project also involves coordinating with GOAA GIS staff to implement an ArcGIS Online interactive web map for GOAA leadership to view and query GOAA properties for development potential. He is also advising the staff of both BRPH and GOAA on a secure IT system architecture to serve GIS data. The final web map will be administered by GOAA GIS staff and accessible for GOAA leadership to view site information in a dynamic viewer that allows for user queries, measurements, and reports to be generated.

Alachua County Public School GIS Services, Alachua County School Board, Alachua County, Florida: Served as Project Manager assisting the Alachua County School Board in mapping student address data, updating planning data sets for concurrency areas and examining zoning/attendance issues. Project also included the designs and maintenance of an ArcGIS 10.3 file geodatabase and

ArcGIS Online maps containing information on U.S. Census Data, transportation infrastructure and school facilities. Project also included converted Certificate of Occupancy permits form the County and multiple municipalities matched to the County housing inventory as a method to analyze development rates in the region.

Public Works Department, City of Gainesville, Alachua County, Florida: Served as a GIS Supervisor responsible for developing datasets for stormwater systems, transportation planning, environmental studies, and workforce operational data to FGDC standards. In this position, Mr. Gilreath also managed the import of surveyed site plans, capital projects, building permitting status, land rights/acquisition, flood zone amendments, city properties, and easements. He also planned and executed large-scale GPS collection efforts for city infrastructure (fiber networks, traffic signs, ADA compliance, park assets, pavement management, pavement markings, urban forestry, and multimodal infrastructure).

Mr. Gilreath oversaw pavement management modeling in MicroPAVER, maintained a comprehensive pavement condition index database for the City of Gainesville and updated the City's stormwater GIS database for NPDES from a variety of data sources including GPS field collection and digitization from field surveys and plats. He served on city-wide project teams to improve facilities management by tracking utility billing and LED streetlight infrastructure in the public right-of-way, recording city properties, and mapping the fiber optic network for traffic signal management. Mr. Gilreath managed the project planning and collection of datasets for transportation infrastructure– signage, pavement marking, traffic counts, multi-modal infrastructure (bike lanes, sidewalks), and ADA curb ramps. He also compiled urban services reports in GIS for possible annexations, maintained emergency management data sets and coordinated damage assessments for roadways for FEMA reporting. He also served in other capacities during his tenure at the City.

- Project Manager for current department-wide implementation of Cityworks.
- City Website Design/Steering and Mobile Website development committee member
- Participant in Parks, Recreation, and Cultural Affairs Comprehensive Master Plan
- National Flood Insurance Program Community Rating Coordinator
- City of Gainesville Emergency Management ICS Planning Section Chief

Northrop Grumman, Inc., Gainesville, Alachua County, Florida: Served as Analyst II/Project Manager where he was responsible for managing building floor plan inventories, GPS utility collection (electric, gas, water infrastructure) and tree inventories for multiple US Naval Air Stations throughout the Southeastern United States. These bases were located in: Pensacola, Florida and Fort Worth, Kingsville and Corpus Christi, Texas. He also produced accurate digital orthoimagery from high-resolution ADS40 sensors.

2005 Puerto Rico: Served as Analyst II to compile and map entire aerial collection of the island.

2005 Southwest Florida Water Management District, Florida: Served as Analyst II to compile and map entire aerial collection of the District.

2005 Alachua County, Florida: Served as Analyst II/Project Manager to compile and map entire aerial collection of the entire County.

2006 Thermal Imagery Collection, Camp Lejeune, North Carolina: Served as Analyst II/Project Manager to compile and map entire aerial collection of the entire US Marine Base.

Yellowstone Ecological Research Center, Yellowstone National Park, Cooke City, Montana: Served as Assistant Crew Leader responsible for directing survey crew to validate LiDAR data throughout Yellowstone National Park and conducting forest habitat classifications, stand measurements, and grassland surveys.

Public Works Department, City of Gainesville, Alachua County, Florida: Served as a Technical Support Specialist II responsible for coordinating the development review process for the department, attended all departmental site plan review meetings, reviewed site plans from the Gainesville CRA and Gainesville Regional Utilities, processed, analyzed and published traffic count data, coordinated stormwater management utility to determine billing rates, created renderings of public works engineering projects and provided graphics for promotional materials.

- **City-Wide Inventory of Curb Ramps for ADA Compliance, City of Gainesville, Florida**: Responsible for a City-wide inventory of more than 5,000 curb ramps in order to bring ramps up to ADA federal compliance standards. Project included: designing a geodatabase to manage the data, initial assessment using Google street view to place a feature for each ramp to create a basemap for field work, field data collection to measure relevant attributes, (slope, cross slope, detectible warning strip, landing, obstructions, and drainage issues), each ramp was designated an overall level of compliance to prioritize amount of work needed to meet ADA standards. Ultimately, the data collected is being used by the City to determine priority areas for upgrading the infrastructure to ADA standards and to estimate costs for roadway projects.

DRMP

Sharon Fowler, RLA, ASLA

Site Design/Landscape Architecture, Public Involvement

Sharon Fowler, RLA, ASLA is Department Manager for DRMP's Landscape Architecture/Land Planning Department. In this capacity, she is responsible for the design and management of master planning, site planning, development design, and landscape architecture projects ranging from residential communities, commercial sites, institutional complexes and major public capital improvement projects. For both public and private clients, her duties include overseeing projects from concept to completion, including client and subconsultant coordination, planning, design and permitting.

Her experience includes leading development teams, managing the development process, and creating the concept and vision for the development. Ms. Fowler is a member of the American Society of Landscape Architects.

RELEVANT PROJECT EXPERIENCE

Heathrow Master Planned Community, Heathrow Land & Development Corporation/Heathrow Land Company, Seminole County, Florida: Team Member for master planning of this 1,800 acre, 1900 home community. Services included: master planning, site planning, architectural review guidelines, landscape architecture, project theming and construction administration.

- **The Heathrow Racquet and Swim Club, Seminole County, Florida**: Created the master plan and site design for one of the most popular tennis facilities in Florida. The Racquet Club site design included a terraced tournament court, a lakeside junior olympic swimming pool, 24 tennis court locations (13 built), and detailing site design including hardscape and landscape.
- **The Heathrow Country Club, Seminole County, Florida**: Designed a new Tennis Facility to relocate the original Racquet Club next to the Golf Clubhouse. The development plan included a Master Plan for housing on the original Racquet Club site as well as the Master Plan and Improvement Study to combine the popular Heathrow Golf Course and a new Swim & Tennis Center into one facility. The work included detailed grading and site engineering concepts to make the relocation feasible.
- **Chestnut Hill/Bristol Park, Seminole County, Florida**: Landscape architect responsible for the creation of the first residential subdivisions within Heathrow. Work included neighborhood entry designs, a man-made stream, a gazebo and footbridge, and landscape and lighting design within the development.
- **Heathrow Land Company General Consulting, Seminole County, Florida**: Land planning consultant for over seven years providing land planning services throughout Florida. The work included a Master Planned Community in Bradenton, an Oceanside Community in Volusia County, a Master Planned Senior Living Community in Sebring, and other miscellaneous planning projects.

The Tradewinds, Volusia County, Florida: Produced the site plan, landscape plan, and all hardscape layout plans for this twin-towered condominium project near New Smyrna Beach, Florida.

Town of Celebration Master Planning, Disney Development Company/The Celebration Company, Osceola County, Florida: Provided on-going design consulting to Disney Development and the Celebration Company for approximately 12 years. The work included many projects including, but not limited to, the following:

Served as Development Team Member for early master planning studies for the community analyzing neo-traditional planning compared to suburban planning. Work included the preparation of detailed planning studies of residential neighborhoods, infrastructure budget allocation studies, routing layout and planning assistance for the Golf Course and Golf Club site, events planning for the Town Center, and recreational studies for the club site in Celebration Village, along with many other land development studies for Celebration.

- **Celebration Parking and Transportation Studies, Osceola County, Florida**: Analyzed the design of the roadways and alleys working side by side with the civil engineers to measure roadways throughout Central Florida for design guidance for pavement widths and alleys in Celebration. Worked with the Infrastructure Department at Disney Development company preparing peer reviews of engineering and landscape architecture during the first phases of Celebration.

- **Celebration Architectural Guidelines, Osceola County, Florida**: Participated in design meetings to discuss the appearance and format for what would be the known as the Celebration Pattern Book.

- **Celebration Commercial Team Member, Osceola County, Florida**: Prepared the landscape architecture section of the Commercial Pattern Book and participated in design charrettes and the planning of the Commercial area of Celebration.

- **Celebration Place, Osceola County, Florida**: Created master planning studies and detailed sections illustrating Phases of the Aldo Rossi Celebration Place office area in north Celebration.

- **Celebration Architectural Review Board Member, Osceola County, Florida**: Served for over four years on the architectural review board and collaborated with the Town Architect to create a format for reviewing the residential, retail, and commercial developments in Celebration. The review determined consistency with the Celebration Residential and Commercial Pattern Books. In her role on the board, Ms. Fowler also led design workshops for design professionals, developers, and contractors.

- **Common Area, Parks and Trails Business Plan, Osceola County, Florida**: Prepared a 10′ x 10′ master plan used to create the Celebration Business Plan for the common areas. Ms. Fowler led the team using the preliminary designs to prepare proposed budgets and maintenance costs for all of the common areas in the first phases of Celebration. The work was used to gain approvals to move forward with the Common Areas of Celebration.

- **Celebration Master Planning Studies, The Celebration Company, Osceola County, Florida**: Served as a consultant responsible for preparing numerous master planning studies to determine the best use of the parcels of land surrounding the Town Center, US-192, and residential areas throughout Celebration.

- **Landscape Architecture, The Celebration Company, Osceola County, Florida**: Served as a landscape architect consultant for the design of a variety of public areas within Celebration including Trumpet Park, the Teaching Academy, the Town Center Lake front, the Lake Village Model Center, the Victorian Southern Showcase House and adjacent Park, the original Pre-Sales Center, and Celebration Parkway.

- **Celebration Lakeside Park, Walt Disney Imagineering, Osceola County, Florida**: Ms. Fowler assisted Disney Development Company as Development Manager for the design and construction of Lakeside Park in Celebration Village. In this role, Ms. Fowler managed and gave guidance to the Design and Production Development Teams. Prior to this responsibility, Ms. Fowler prepared numerous studies of the Park site to determine the most appropriate use for this strategically located waterfront Town Center site.

- **Celebration Teaching Academy, Osceola County, Florida**: Principal-in-Charge of providing Landscape Architecture and Site Planning for the Teaching Academy at Celebration. The project included developing an outdoor learning center.

- **Celebration Pre-Sales Center, Osceola County, Florida**: Landscape Architect for the Pre-Sales Center for Celebration. This included the unique design of three "yards" for the two dimensional, full scale, billboard sized architectural elevations that provide interest to this temporary facility. This work included assisting The Celebration Company with a search for site accessories that helped to carry out the character of the Town of Celebration.

- **Celebration Town Center, Osceola County, Florida**: Provided an illustrative presentation plan for the Town Center of Celebration. This included the interpretation of the planned uses for the Town and the Phasing of the Development. The plan was used in a variety of public and team meetings.

Allen L. Quickel, PSM

Surveying & Mapping

Allen L. Quickel, PSM is Orlando Survey Manager for DRMP's Surveying and Mapping/Geomatics Division. He serves as a Project Manager for both public and private sector clients specializing in transportation, geodetic control, land acquisition surveys, and terrestrial LiDAR. He is currently responsible for client coordination, field crew assignments, office production, and quality control on a variety of projects ranging from as-built surveys, platting, continuing services, roadway design survey and right-of-way mapping for local municipalities and FDOT Districts.

Mr. Quickel is responsible for managing all projects that require terrestrial LiDAR, using FARO Focus 3D and Riegl VZ400 scanners, and Certainty 3D TopoDOT software to produce point clouds, engineering design survey drawings, and 3D models of existing structures. He draws on his field survey and office production experience to lead field crews and office technicians on a wide range of projects utilizing Trimble Access and EFB data collection and processing software.

RELEVANT PROJECT EXPERIENCE

SR 5A/Nova Road, Landmark Engineering, Inc. for FDOT District Five, Volusia County, Florida: Survey Project Manager responsible for survey services for a milling and resurfacing project of a 6-lane divided urban and 2-lane undivided urban typical section. Project Limits are from Brentwood Drive to Flomich Street and Frontage Road from 3rd Street to SR 5/A/Nova Road. Survey services include horizontal and vertical control, establishing project alignment, topographic survey with DTM, drainage survey and utility location with SUE.

SR 600 from east of I-4 Ramps to Tomoka Farms Road, TranSystems Corporation, Inc. for FDOT District Five, Volusia County, Florida: Served as Survey Project Manager responsible for survey services in support of roadway design to widen SR 600 (US 92) from 4-lanes to 6-lanes from east of the I-4 Flyover Ramp to Tomoka Farms Road for approximately 2.55 miles. Survey services include design survey, SUE, right of way survey and mapping.

Continuing On Call Engineering and Surveying Services, City of Deltona, Volusia County, Florida: Project Surveyor responsible for providing quality control of surveying and mapping services in support of City engineering projects related to site development, public park design/permitting requirements and minor road/intersection design.

- **Thornby Park Stakeout, Volusia County, Florida**: Project Surveyor responsible for providing quality control of survey services to correctly establish the east line of the park along Providence Boulevard and the wetland buffer line in order to meet required setbacks to stake out the proposed Gazebo for construction.
- **Dewey Boster Sports Complex, Volusia County, Florida**: Project Surveyor responsible for providing quality control of survey services for construction of a new maintenance building on the western edge of the sports complex. Surveys included: topographic of the construction site and SUE using electromagnetic (EM) and ground penetrating radar (GPR) to designate and locate the waterline running east and west across the property in support of engineering for the project.

Continuing Surveying Services, Florida Hospital, Orange, Osceola, Seminole, and Volusia Counties, Florida: Project Surveyor responsible for providing an array of surveying and mapping services on numerous Florida Hospital, a major healthcare provider, sites. Survey services include: boundary, topographic and sectional work, along with record plats, sketches of description and legal descriptions, right-of-way taking and abandonment exhibits and sketches, design support services, and condominium documents for medical offices.

SR 483 (Clyde Morris Boulevard), Ghyabi & Associates, Inc. for FDOT District Five, Volusia County, Florida: SUE Project Manager for this ongoing 3.4 mile roadway project from south of SR 400 to North of Mayberry Avenue. Duties included coordination of utility designation for over 100,000 lineal feet of subsurface utilities and verify vertical and horizontal locations (VVH) as directed by the Engineer of Record. Mast Arm locations will be certified clear at 12 locations.

Wendy Lee Road Sidewalk, Brevard County Public Works, Titusville, Florida: Survey Project Manager responsible for topographic and right-of-way surveys supporting the design and construction of a new sidewalk along Wendy Lee Drive between Sisson Road and Imperial Estates Elementary School.

North Banana River Drive Pedestrian Improvements, Brevard County Public Works, Merritt Island, Florida: Survey Project Manager responsible for topographic and right-of-way surveys supporting the design and construction of new sidewalks and improvements to the existing bridge over a canal providing access to the Banana River for Merritt Island residents.

Secondary Canal Inventory, Orange County, Florida: Project Surveyor for a canal inventory project utilizing sub-meter mapping grade GPS to locate existing drainage canals and inflow and outflow structures for this project. GPS data was linked to digital photos of structures and canal conditions, using intermediate software. The GPS data and linked images were then converted to ESRI Shapefiles to be incorporated into the Orange County GIS.

Downtown Redevelopment-Phase 1, City of Maitland, Orange County, Florida: Project Technician and Project Surveyor involved with multiple projects involving field data collection and map preparation of topographic and boundary surveys for future development by the City.

Continuing Survey Services, City of Leesburg, Lake County, Florida: Project Manager and primary client contact for continuing services contract awarded in 2008. Services provided included boundary, topographic, or other specific purpose surveys, right-of-way map and or sketch and description preparation. Services performed under this contract also included easement sketch and description revision, right-of-way research, and topographic survey relating to proposed utility easements. Project completed in 2010.

Taxiway A Extension and Seaplane Ramp, AVCON, Inc. for City of Leesburg, Lake County, Florida: Survey Project Manager responsible for topographic and hydrographic surveys to provide information for Focused Environmental Assessment Form including the affected environment, soils, land uses, coastal, construction impacts, protected species, Section 4(f) and 6(f) resources, historical/archaeological/cultural resources, hazardous materials/pollution preventions/solid waste, natural resources, socioeconomic impacts, water quality and wetlands), permitting and mitigation.

North Hancock Road from Florida's Turnpike to CR 561A, Family Dynamics, Inc., Lake County Florida: Survey Project Manager responsible for topographic survey and sketches and descriptions. The project consists of the design of a new 1.2-mile, 4-lane divided urban roadway extension with a 12-foot shared use path through a site with over 100-feet of vertical relief. Coordination with the Florida's Turnpike Enterprise was required as the project connects to the new Minneola Interchange that was designed and constructed simultaneously. The project also included turn lane improvements and super elevation reduction to CR 561A where the project connects to the existing local roadway network. Project included roadway design, drainage design, MSE walls, maintenance of traffic plan for CR 561A using temporary pavement, utility coordination, signing and pavement markings, design survey, right-of-way mapping, environmental permitting, wetlands and sand skink listed species survey.

Mitchell Jarrells, PSM

Survey

Mitchell Jarrells, PSM is a Project Surveyor in DRMP's Surveying and Mapping/ Geomatics Division. In this capacity, his responsibilities include supervision of crew members, project planning, utility coordination, static scanning, obtaining survey data for topographical and boundary surveys, horizontal and vertical control, right of way control, staking alignment, cross-sections, bridge locations, drainage surveys, side street and section work all of which include field calculations.

Mr. Jarrells is experienced in Mobile and Airborne LiDAR data collection and processing. He has performed these services on many FDOT roadway projects in accordance with the latest FDOT Terrestrial Mobile LiDAR guidelines. He has developed and implemented the operational procedures and QA/QC required for successful Mobile LiDAR missions. He is experienced in developing survey deliverables including calibrated LiDAR point cloud tiled in LAS format, DTM and planimetric topographic survey files in Civil 3D format, digital geo-referenced color imagery and field survey/trajectory accuracy reports.

RELEVANT PROJECT EXPERIENCE

SR 471 Resurfacing, FDOT District Five, Sumter County, Florida: While employed with a previous firm, responsible for data collection using Mobile LiDAR for this pavement resurfacing project on SR 471 for 5.2 miles north from the Polk County Line using Riegl VMX-450 Laser Scanning System. The project consisted of collection and processing of mobile LiDAR in accordance with the latest FDOT Terrestrial Mobile LiDAR Guidelines. Deliverables included calibrated LiDAR point cloud tiled in LAS format, DTM and planimetric topographic survey files in Civil 3D format, digital geo-referenced color imagery and field survey/trajectory accuracy report.

SR 15 Resurfacing and Pavement Evaluation, FDOT District Five, Orange County, Florida: At previous firm, served as Project Manager for the collection of Mobile LiDAR for this pavement resurfacing and evaluation project on SR 15 from Lee Road to south of East Lake Avenue using our Riegl VMX-450 Laser Scanning System. This 1.1 mile project consisted of collection and processing of mobile LiDAR in accordance with the latest FDOT Terrestrial Mobile LiDAR Guidelines. Deliverables included calibrated LiDAR point cloud tiled in LAS format, planimetric topographic survey files in Civil 3D format, digital georeferenced color imagery and field survey /trajectory accuracy report.

SR 432 (John Young Parkway) from SR 50 to Shader Road, FDOT District Five, Orange County, Florida: At previous firm, provided photogrammetric design survey on this 2.3 mile widening project for mapping limits extending along SR 423 (John Young Parkway) from SR 50 to Shader Road. Additional areas were surveyed by field survey methods and added to the final files. Digital Terrain Mapping (DTM) and planimetric features were collected using the standard photogrammetric methodology by viewing imagery in 3D. Features, points and break lines are collected similar to that of a survey crew except the LAMP data is a tighter grid of 3D data points. Accuracy of the DTM on the road surface is .05. The photography was secured utilizing helicopter flown at an altitude of 350 feet.

SR 417, Florida's Turnpike Enterprise, Orange County, Florida: In previous role, served as Project Manager for the collection of Mobile LiDAR for a pavement resurfacing project on the SR 417 from Interstate 4 to approximately one mile south of John Young Parkway. The project consisted of collection and processing of mobile LiDAR data and collecting and processing Global Positioning System (GPS) surveying data along the project area for quality control.

Ryan Grab, CST II

Subsurface Utility Engineering (SUE)

Ryan Grab, CST II serves as SUE Field Crew Supervisor and Survey Crew Chief/ Survey Technician. In this capacity, his responsibilities include the coordination and supervision of SUE and Survey crews, project planning, utility coordination, and preparation of deliverables.

Mr. Grab's technical experience includes subsurface utility designation (CI/ASCE 38-02 QL-B) and location (CI/ASCE 38-02 QL-A) for large right-of-way projects and smaller sites, and obtaining survey data for the various types of surveys. He has years of experience working with utility designating equipment such as Mala GPR (HDR Pro, RAMAC), RD1000 GPR, EM Locators; Vivax vLoc, 3M Dynatel, Subsite, Metrotech, as well as various survey hardware/software packages such as TSC, TDS Ranger, TDS Survey Pro on HP 48GX, SURVCE on Carlson 600, Robotics, and Allegro with EFB. He has experience with radio and network RTK GPS, and Static GPS, using Trimble, TDS and Carlson software packages.

Computer Studies, Community College of the Air Force
Computer Operations/Satellite Data Acquisition Specialist (AFSC 3C051), US Air Force

RELEVANT PROJECT EXPERIENCE

Continuing Surveying Services Contract, Nassau County, Florida: SUE Field Crew Supervisor responsible for providing subsurface utility engineering services in support of this continuing contract. Services under this contract include: Boundary Surveys, Bridge Data Surveys, Center Line Control for County Projects, Control Survey Drawings, Construction & As-Built Surveys, Construction Layout Surveys, Court Exhibit Preparation, Drainage Design Surveys, Eminent Domain Surveys, Environmental Surveys, FDEP and WMD Acquisition Surveys, GPS, GIS, & CaiCE, Hydrographic Surveys, Legal Description (Preparation and/or Verification), Plat Preparation, Plat Review for Compliance with State Statutes, Property Sketches, Retracement Surveys, Right-of-Way Mapping, Roadway Maintenance Maps (Specific Purpose Maps), Special Purpose Surveys, Subsurface Utility Engineering, Topographic Surveys, Tree Surveys, and 3-D Scanning. A sampling of tasks assigned under this contract are provided below:

- **Bryceville Landfill Boundary Survey, Nassau County, Florida**: SUE Field Crew Supervisor on 24.8 acre Parcel. Mr. Grab provided subsurface utility engineering and directed the field crews daily activities.
- **Lofton Creek Landfill Boundary Surveys, Nassau County, Florida**: SUE Field Crew Supervisor on 62.1 acre parcel. Mr. Grab provided subsurface utility engineering and directed the field crews daily activities.

Continuing Survey and Mapping Services, Florida Department of Military Affairs, Statewide in Florida: Survey Crew Chief/SUE Field Crew Supervisor for the Florida National Guard sites statewide providing Boundary and Topographic Surveys. The project tasks for this effort included establishing the project sites on UTM 17N projection, WGS84 Datum utilizing Global Positioning System GPS and compiled the boundary, easements/lease agreements, and topographic data including subsurface utilities into a geo-referenced GIS database inventory utilizing Spatial Data Standards for Facilities Infrastructure, and Environment (SDSFIE) standards.

- **Camp Blanding Special Forces Complex, Florida Army National Guard, Clay County, Florida**: Served as the Survey and SUE Crew Chief, responsible for horizontal and vertical control survey, topographic survey and utility designation (CI/ASCE 38-02 QL-B) and mapping for GIS Database.
- **Camp Blanding USPFO, Florida Army National Guard, Clay County, Florida**: Served as the Survey and SUE Crew Chief, responsible for horizontal and vertical control survey, topographic survey and utility designation (CI/ASCE 38-02 QL-B) and mapping for GIS Database.

Camp Blanding TUAS and Air Field, Florida Army National Guard, Clay County, Florida: Served as the Survey and SUE Crew Chief, responsible for horizontal and vertical control survey, topographic survey and utility designation (CI/ASCE 38-02 QL-B) and mapping for GIS Database. US Highway 1 (Phillips Highway) from Bowden Road to Wishart Street, FDOT District Two, Duval County, FL: Served as a SUE Crew Leader and SUE Field Crew Supervisor for this roadway widening and resurfacing project with FDOT including utility designation (CI/ASCE QL-B) for specific areas through the corridor and utility location (CI/ASCE 38-02 QL-A) test holes for VVH.

SR 26 (W. Newberry Road) from Tower Rd to NW 8th Ave, FDOT District Two, Alachua County, FL: Served as SUE Field Crew Supervisor for this roadway widening and signalization project for FDOT in the form of mast arm or cantilever sign foundation exploratory/clearance holes and 48 utility location (CI/ASCE 38-02 QL-A) test holes for VVH.

Interstate 10 (SR 8) Interchange at US Highway 301, FDOT District Two, Duval County, FL: Served as a SUE Crew Leader and SUE Field Crew Supervisor for this interchange design project with FDOT including utility designation (CI/ASCE 38-02 QL-B) for the entire scope, supported by over 80 exploratory/clearance holes for bridge pile design and 60 utility location (CI/ASCE 38-02 QL-A) test holes for VVH.

SR 10 (Atlantic Blvd) form Arlington Expressway to Monument Road, FDOT District Two, Duval County, FL: Served as a SUE Crew Leader and SUE Field Crew Supervisor for this intersection reconfiguration project with FDOT and JTA including utility designation (CI/ASCE 38-02 QL-B) for the entire scope, supported by 25 exploratory/clearance holes for signal mast arm and sign foundation design and 140 utility location (CI/ASCE 38-02 QL-A) test holes for VVH.

King Street, FDOT District Two, City of St. Augustine, St. Johns County, Florida: Served as the SUE Crew Leader and Utility Coordinator responsible for utility designation (CI/ASCE 38-02 QL-B) and location (CI/ASCE 38-02 QL-A) for the drainage improvement project that included extensive structure foundation exploratory holes for proposed mast arm foundations.

Palm Coast Parkway Widening, City of Palm Coast, Flagler County, Florida: Served as SUE Crew Leader and Utility Coordinator for this 2 mile widening project that required design survey, right-of-way mapping, subsurface utility engineering (CI/ASCE 38-02 QL-A+B), and design survey for off-site retention areas. Over 40,000 linear feet of utilities were mapped for the city on this project.

SR 9B Extension from I-95 to CR 2209, Prosser Hallock, Inc. for FDOT District Two, Florida: Served as Survey Crew Chief in support of the preliminary design. Survey services included topographic and DTM survey to 25-feet outside of proposed right-of-way of project corridor and 15-feet outside Race Track Road right-of-way 500-feet east/west of the two intersections of SR 9B extension, subsurface utility engineering, jurisdictional line survey, sectional/grant survey, control and right-of-way mapping.

SR 9/I-95 Resurfacing Project from Duval County Line to Florida/Georgia State Line, Stantec for FDOT District Two, Nassau County, Florida: Served as Survey Crew Chief for this 12-mile resurfacing project that involved horizontal and vertical control surveys, centerline alignment and right-of-way calculations. Design survey activities were performed to support the engineering design included topographic/DTM surveys, bridge and drainage details, roadway cross sections. To determine cross slope data in tangents by use of conventional survey techniques and aerial surveys in super elevated curves along the project corridor.

SR 9/I-95 Widening (8-10 Laning) from International Golf Pkwy to St John's/Duval County Line, URS Corporation for FDOT District Two, St John's County, Florida: Served as SUE Field Crew Supervisor for this 9-mile limited access widening project. Survey tasks of this project included the establishment the project control, centerline alignment calculations and aerial target control. Design survey activities were performed to support the engineering design included topographic and supplemental DTM survey. Aerial photogrammetry was used due to high traffic volumes along the corridor and supplemented with conventional surveys. DRMP also provided Subsurface Utility Engineering (SUE) services as well. The next phase of this project will include a Control Survey to support the Right of way mapping effort for proposed pond sites.

Joseph A. Roberts, Jr., PE

Structures

Joseph A. Roberts, Jr., PE is a Project Engineer in DRMP's Structures Department. He has been involved in all facets of design ranging from preliminary engineering to final design for both conventional and design-build projects. Mr. Roberts has been responsible for preparation of design calculations, plans production and post-design submittals on a wide range of projects including bridge widenings, bridge replacements, and new bridges.

Mr. Roberts' responsibilities have included design and analysis of superstructure and substructure on a wide range of bridge types. Superstructure design experience includes, Post-Tensioned Concrete U-Beams, Variable haunch prestressed concrete beams, Steel Plate Girders, Florida-I Beams, AASHTO Beams, and cast-in-place flat slabs. Substructure design experience includes, Post-Tensioned Inverted-T Straddle Bent Piers, conventional reinforced concrete piers, pile bents, and piers subject to ship impact. Other duties include, mast arm, cantilever sign, span sign, drilled shaft, box culvert, sheet pile and MSE wall design, bridge load rating and shop drawing review.

RELEVANT PROJECT EXPERIENCE

Miscellaneous Design Consultant Services, WBQ Design and Engineering, Inc. for Central Florida Expressway Authority, Orange County, Florida: Structures Project Designer responsible for miscellaneous structures in support of a contining services contract to provide improvement projects on an as needed basis. Representative projects include:

- **SR 429/Schofield Road Interchange Improvements, Orange County, Florida**: Structures Project Designer responsible for design of a bridge mounted sign for new full interchange between SR 429 and Schofield Road.

Lake County Mainline Resurfacing Project (CR 561 to Sumter County Line Southbound), Protean Design Group, Inc. for Florida's Turnpike Enterprise, Lake County, Florida: Responsible for Load Rating of two existing AASHTO beam bridges spanning Florida's Turnpike. his was a milling and resurfacing and design criteria upgrade project for the southbound lanes of Mainline Turnpike from MP 281.6 to MP 297.8).

US 41 (SR 45) from North of Lamar Avenue (Old Hospital) to Twingate Avenue, FDOT District Seven, Hernando County, Florida: Project Engineer responsible for design of sheet pile walls with concrete facing for the 3R improvements of approximately 2 miles of SR 45 (US 41). This project includes operational/safety improvements at various urban intersections, addition of new sidewalk, replacement of substandard sidewalk/ADA upgrades for sidewalk and bus stops. This project also includes communicating with the City of Brooksville and Hernando County to coordinate the addition of bike lanes and sidewalks on both sides of the road, throughout the project limits. The project involves CSX coordination to add crash walls underneath the existing CSX bridges on US 41.

SR 10 (US 90) over Yellow River, FDOT District Three, Okaloosa Florida: Responsible for load rating of the replacement bridge constructed using Florida I-Beams and consisting of 19 spans over the Yellow River. This project includes medium spans to accommodate difficult construction access. Project challenges include scour, constructability issues with shallow water depths, environmental constraints and existing remnant pile removal. Unique geotechnical conditions dictated that bridge be founded on drilled foundations.

Pineda Causeway Grade Separation Overpass, Brevard County, Florida: Structures Project Engineer for this project which involved the design of a grade separated overpass to carry Pineda Causeway over the Florida East Coast Railway which will replace the existing at grade crossing. The project limits begin just east of N. Wickham Road and end just west of US 1. Responsible for design and plans preparation for the bridge which will span the entire FEC right-of-way with a single 116-foot span composed of Florida-I 45 Beams founded on driven concrete piles. Over 3,000-feet of temporary wall will be used to maintain traffic during construction. This project also includes 2,100-feet of permanent retaining wall and traffic signal mast arms.

I-275 (SR 93) Widening, Kisinger, Campo & Associates, Corp. for FDOT District Seven, Hillsborough County, Florida: Project Engineer who assisted in superstructure and substructure design for this project that involved widening three overpass bridges along I-275. All three bridges were super-elevated with a curved alignment. The existing structures consisted of AASHTO Beams and were widened using Florida-I Beams. The foundations included drilled shafts and driven concrete piling in a confined median area. This project is currently in the construction phase.

SR 589 (Veterans Expressway), Florida's Turnpike Enterprise, Hillsborough County, Florida: Structures Project Engineer for this project that involved widening a 2.5-mile stretch of limited access AET toll facility with express lanes from a 4-lane to an 8-lane section from Memorial Highway to north of Barry Road. Structural engineering components included: Bridge Development Report to determine if the existing structures were able to be widened, and structural design and plans production for the widening of two bridge sites (a 2-span continuous steel plate girder bridge and a 3-span AASHTO Beam bridge using Florida-I Beams). The substructure components of the bridge are founded on 18-inch square PPC piles at the end bents and the piers. The project also included complex MOT plans, FAA coordination, the analysis of existing overhead sign span trusses, an existing monotube analysis, proposed cantilever signs, proposed span signs, bridge mounted signs, box culvert extensions and numerous MSE and sheet pile wall designs.

St. Johns Heritage Parkway, Brevard County, Florida: Structures Project Engineer for this project which involved the design of a new segment of the St. Johns Heritage Parkway. St. Johns Heritage Parkway is a five-mile, four-lane facility designed to be expandable to six lanes. The new alignment completes the connection between Phase I and I-95. Responsible for the design and plans preparation for the bridge over Platt's Ranch Access Road. The single span bridge on a curved alignment is 117-feet long and consist of Florida-I 45 Beams on driven concrete piles. The project also includes a signalized intersection at US-192 and retaining walls at the bridge approaches.

CR 229 Widening and Improvements, Bradford County, Florida: Structures Project Engineer responsible for the design of superstructure and substructure components for the cast-in-place flat slab replacement bridge over Gum Creek. Mr. Roberts was also responsible for slope protection details and final computation books.

SR 408 Widening from SR 417 to Alafaya Trail (Contract 408-128), Central Florida Expressway Authority, Orange County, Florida: Structures Project Engineer responsible for the design and plans production of the widening of SR 408 from SR 417 to east of Alafaya Trail. This project was developed as a segment of the SR 408 Widening from four general use lanes to six general use lanes. Located within Orange County, there are four existing SR 408 bridge crossing sites including the Little Econlockhatchee River, Rouse Road, Kehoe Boulevard, and Alafaya Trail. The first three sites are minor bridge widenings while the last is a bridge replacement. SR 408 over the Little Econlockhatchee River includes widening both to the inside as well as closing a ramp gore for safety improvements along with updated drainage along the bridge copings. This widening utilizes Florida-I 36 Beams. The Kehoe bridge widening site include widening to both the inside and outside of the existing SR 408 with AASHTO Type II Beams, foundations include Steel H-piles. The SR 408 over Alafaya Trail bridge replacement uses Florida-U 72 Beams and eliminates an existing median pier thereby allowing an additional turn lane below the crossing.

Jocelyn M. Haisch-Linn, PE

Structures

Jocelyn M. Haisch-Linn, PE is a Project Manager in the Structures Department. Design assignments have included AASHTO girder bridges, minor bridge widenings, pedestrian bridge and bridge barrier retrofits. Other assignments have included pier protection analysis, substandard bridge barrier retrofit, box culvert rehabilitation, overhead sign structure design, cantilever sign structure design, monotube design, aluminum design, bridge-mounted sign design, barrier mounted sign design, mast arm pole design, strain pole design, ITS pole design, high mast and standard light pole special foundation design, shop drawing review, wall design, box culvert design and railroad coordination.

RELEVANT PROJECT EXPERIENCE

Districtwide Miscellaneous Design No. 117 Contract No. C-9789, WBQ Design & Engineering, Inc. for FDOT District Five, Florida:

- **SR 600 (International Speedway Boulevard and CR 4009 (Williamson Boulevard) Intersection Improvements, Volusia County, Florida**: Structures Project Engineer responsible for design of four, 78-foot mast arms located on all four quardrants from Williamson Boulevard to US 1. The nature of the project is to simplify the intersection and improve safety.
- **SR 471 from the North End of the Withlacoochee Bridge to 1.83 miles South of Unnamed Canal, FDOT District Five, Sumter County, Florida**: Structures Project Manager responsible for field investigation of an existing bridge and box culvert. Determined retrofit scheme for thrie-beam guardrail connection to bridge barrier.

SR 415 over St. Johns River, Horizon Engineering Group, Inc. for FDOT District Five, Volusia County, Florida: Structures Project Engineer for the miscellaneous structures including MSE walls and sign structures.

City of Orlando Professional Engineering Services, Orange County, Florida:

- **City of Orlando DMS for City Venues, Orange County Florida**: Structures Project Engineer responsible for designing foundations for two mast arms, one of which included a 29-foot column, and analyzing three existing mast arms under new loading.

Shingle Creek Multi-Use Trail, WBQ Design & Engineering, Inc. for Orange County, Florida: Structures Project Manager and Engineer of Record responsible for design of 3,300-LF of boardwalks and a pedestrian bridge crossing a canal south of Whisper Lake Boulevard. Structures were designed in support of the design of a multi-use trail from the Orange/Osceola County Line to just south of Central Florida Parkway to Sand Lake Road, an approximate length of 10-miles.

SR 415 over St. Johns River, Horizon Engineering Group, Inc. for FDOT District Five, Volusia County, Florida: Structures Project Engineer for the miscellaneous structures including MSE walls and sign structures.

Church Street Streetscape, WBQ Design & Engineering, Inc. for City of Orlando, Orange County, Florida: Structures Engineer of Record for 17 mast arm designs (Phase 1 - 9 locations and Phase 2- 8 locations) located at seven separate intersections for this roadway improvements project- a distance of approximately 1.8-miles.

SR 15 (Hoffner Road), Horizon Engineering Group, Inc. for FDOT District Five, Orange County, Florida: Structures Engineer of Record responsible for the design of a 5,000-foot long box culvert, two standard mast arms, and three single-span strain pole systems utilizing two point attachments to the strain poles.

SR 500 (US 441) Widening, FDOT District Five, Lake County, Florida: Structures Engineer of Record responsible for the design of a two box strain pole systems and one three-sided strain pole system utilizing two point attachments to the strain poles. Design was in support of widening 4-miles of SR 500 from Martin Luther King Blvd. to Lake Ella Road in Leesburg, Florida. The design widened the existing 4-lane rural section to a 6-lane high speed urban section. Plans include roadway, drainage, signing/marking, signals, environmental permitting and right-of-way mapping.

Cross Seminole Trail SR 434 Overpass, Seminole County, Florida: Structures Design Engineer responsible for design and plans preparation of an 880-foot long multi-use trail bridge including approach ramps. The main portion of the bridge was comprised of three spans of simply supported Florida U-Beams having lengths of 88, 138, and 88-feet to support a cast-in-place composite deck. The main span substructures were comprised of decorative arch shaped cast-in-place concrete piers supported on spread footings. Façade panels were used to produce architectural cladding on the sides of piers and at ramp landing locations. The project was a design-build contract done in conjunction with Jones Brothers Construction Company and included construction quality control services.

SR 434 Lake Mary Boulevard Pedestrian Bridges at Rinehart Road and at Country Club Road Design-Build, Southland Construction, Inc. for City of Lake Mary, Seminole County. Florida: Structures Project Engineer responsible for the design and plans production of two pedestrian bridges spanning Lake Mary Boulevard. Each of the bridges had a single main span over Lake Mary Boulevard supported by two 153-foot, non-symmetric custom L-shaped prestressed beams. The custom L-shaped beams included complex design and analysis to evaluate out-of-plane bending due to the prestressing of the non-symmetrical beam shape. Special bracing considerations for transporting the members to the site had to be considered due to the length and weight of the beams. These considerations had to be carefully coordinated with the precast producer, Dura-Stress, during the design phase and during the production of the beams. The ramps were composed prestressed slabs and precast pier caps supported by cast-in-place columns and footing caps. The foundations were made up of a combination of pile supported footings in pond locations and shallow spread footings at the remaining locations.

Seminole Wekiva Trail SR-434 Pedestrian Underpass, Horizon Engineering Group, Inc. for Seminole County, Florida: Structures Project Engineer responsible for design and plans preparation of a 255-foot cut-and-cover tunnel used to provide a multi-use trail crossing under SR 434. The trail passes under the SR 434 roadway at a 55-degree skew to the highway alignment. Based on the skewed trail alignment, custom skewed precast tunnel components were designed such that they were consistent with multiple phases of construction. Tunnel components were designed using finite element modeling to evaluate complex bending effects imposed on the box components as a result of applicable load combinations and the skewed geometry.

I-4 Pedestrian Overpass, Seminole County, Florida: Structures Project Engineer for a 1,000-foot long multi-use trail bridge including approach ramps and a cable supported main span of 373-feet over I-4. The main span consisted of a steel frame superstructure supported by stay cables anchored into 950-foot cast-in-place pylons on each side of I-4. The forces of the main span stay cables were resisted by stay cables attached at the top of each pylon in the back spans and anchored into a 3 million pound reaction box on each side of the main span of the bridge. Each reaction box was comprised of a soil filled cast-in-place concrete structure having a length of 65-feet, a width of 18-feet, and a depth of 22-feet serving as the trail deck surface at each location. Specifically responsible for the design and plans production of the main span stay pylons and reaction boxes, including the steel components. Also responsible for the design and plans production of soil filled cast-in-place concrete structures which served as the landing deck surface at corners in the ramp. The project was a design-build contract done in conjunction with Martin K. Eby Construction Company and included construction quality control services.

Juan P. Camacho, PE is a Senior Project Manager in DRMP's Transportation Division. He is responsible for project management and design of transportation and traffic engineering projects. His experience includes minor roadway widening such as turn-lane additions, extensions and other capacity improvements. His traffic engineering projects include design for signalization, lighting (street lighting, conventional lighting and decorative streetscape lighting) signing and pavement markings and intelligent transportation systems for both major/minor highway and limited access facilities. He also has experience in preparing and analyzing traffic engineering studies for intersection and corridor operations assessments, signal warrant studies, and qualitative assessments.

Mr. Camacho has extensive experience in managing task-based continuing services contracts. He has been involved in over 200 task work orders for a traffic operations push button contract as well as studies produced under a traffic operations safety studies contract. He understands that projects assigned under these types of contracts requires a quick turn-around schedule and can require multiple tasks to be completed simultaneously. He has project experience in both the private and public sector as he was previously employed at Orange County, Florida as a street lighting engineer who oversaw the design and implementation of the County's street lighting program for over 400 miles of County arterial roadways. His project experience includes projects in Florida as well as North and South Carolina.

RELEVANT PROJECT EXPERIENCE

US 1 Intersections Bundle and SR 600 from Emmett Street to North Charles Street, FDOT District Five, Brevard and Volusia Counties, Florida: Project Manager responsible for roadway/traffic improvements at several intersections along SR 5/US 1 and SR 600/US 92 from Emmett Street to North Charles Street. Specifically, he is responsible for design of traffic signal improvements to install mast arms at five intersections along SR 5/US 1 including at Hibiscus Boulevard, SR 500 (US 192), Ballard Drive/Babcock Street, Prospect Avenue and New Haven Avenue. He is also responsible for drainage improvements to mitigate flooding issues on SR 600/US 92 from Emmett Street to North Charles Street by constructing additional curb inlets and replacing the existing storm drain trunkline with a larger pipe system.

SR 483, DOT District Five, Volusia County, Florida: Engineering of Record for Signalization and Signing and Marking component of project which included a pavement design, typical section package, roadway design, signalization design, signing and pavement marking design and electronic submittal for adding a turn lane at the intersection of N. Clyde Morris Boulevard and Mason Avenue.

SR 111 (Edgewood Avenue) Intersection Reconstruction, FDOT District Two, Duval County, Florida: Signalization Engineer of Record to upgrade seven intersections to mast arms with fiber optic interconnect along a two mile segment of roadway. Designs included developing specifications for fiber optic communications equipment, extensive utility coordination and permitting for a CSX crossing.

SR 152 (Baymeadows Road) Intersection Reconstruction, FDOT District Two, Duval County, Florida: Signalization Engineer of Record to upgrade three intersections to mast arms with fiber optic interconnect. Designs included developing specifications for fiber optic communications equipment and extensive utility coordination.

PGA Boulevard, FDOT District Four, Palm Beach County, Florida: Signalization Engineer of Record for three signalized intersections in a heavily urban area. Plans included utility location plans, utility coordination, replacement of mast arms and strain pole signals at the three locations.

Rollins Avenue Realignment, Florida Hospital, Orange County, Florida: Signalization Engineer of Record for relocated intersection of Rollins and Alden Road. Plans included interconnect and railroad pre-emption.

Sybelia Parkway, City of Maitland, Orange County, Florida: Signalization Engineer of Record for new signalized intersection at US 17/92. Plans included new mast arm design and interconnect plans.

CR 707, Martin County, Florida: Traffic Engineer for a 0.6 mile roadway reconstruction project from just west of Key Drive to just east of Seahorse Boulevard. Responsibilities included designing signing and pavement marking and decorative lighting. Project includes new roundabout and streetscape elements.

Palm Beach County Retiming, Palm Beach County, Florida: Served as Signal System Retiming Project Manager to retime six arterial roadways in Palm Beach County. Project included developing base networks in SYNCHRO, developing retiming plans for five time-of-day plans and implementation on each corridor. Project included project documentation.

Signal System Retiming, Brevard County, Florida: Served as design engineer for a Signal System Retiming project involving signals within Brevard County. Mr. Camacho developed and implemented weekday and weekend timing plans. He was also involved in developing project documentation.

Districtwide Traffic Operations Safety Studies Consultant Contract No. C-7917, Metric Engineering, Inc. for FDOT District Five, Florida: DRMP Project Manager for districtwide studies contract which included qualitative assessments, left-turn phase warrants, signal warrant analysis, intersection analysis, spot-speed studies, lighting justification reports and crash analysis. He was the engineer of record in over a dozen task work order studies during this contract.

- **I-95 at SR 514, Brevard County, Florida**: Engineer of record for qualitative assessment at the southbound I-95 off ramp and SR 514. Recommendations for improvement were developed based on field observations, traffic counts, and crash data.
- **US 27 at Hubbard Street, Lake County, Florida**: Engineer of record for qualitative assessment of intersection operations. Recommendations for improvement were developed based on field observations, traffic counts, and crash data.
- **US 1 at Suntree Boulevard, Brevard County, Florida**: Engineer of record for left turn phase warrant for the southbound left turning movement on US 1 at Suntree Boulevard. Recommendations for improvement were developed based on field observations, traffic counts, and crash data.
- **SR 526 at Summerlin, Orange County, Florida**: Engineer of record for left turn phase warrant for the northbound left on SR 526 at Summerlin. Recommendations for improvement were developed based on field observations, traffic counts, and crash data.
- **US 17/92 at E. French Avenue, Volusia County, Florida**: Engineer of record for left turn phase warrant for northbound left turn from US 17/92 to E. French Avenue. Recommendations for improvement were developed based on field observations, traffic counts, and crash data.
- **SR 40 and SE 176th Street, Marion County, Florida**: Engineer of record for qualitative assessment of intersection operations. Recommendations for improvement were developed based on field observations, traffic counts, and crash data.
- **SR 434 at Artesia, Seminole County, Florida**: Engineer of record for qualitative assessment and signal warrant analysis at SR 434 and Artesia. Recommendations for improvement were developed based on field observations, traffic counts, delay study and crash data.

Mark E. Puckett, PE

Construction Engineering Inspection

Mark E. Puckett, PE has been employed with DRMP since 1999 and has 30 years of experience in construction engineering inspection of major road and bridge projects.

Mr. Puckett is Vice President and CEI Division Manager and currently supervises 70+ CEI employees assigned to various projects throughout Florida, North Carolina and Virginia. He also serves as the Senior Project Engineer on FDOT construction projects. Responsibilities include administration of major road and bridge projects; overseeing daily inspection assignments, documentation, preparation of monthly and final estimate packages; preparation of analysis of recommendation of contractor request for extra time and/or cost; negotiation of extra cost with the contractor; coordination and compliance assurance with all environmental permits; monitoring of project schedules; and holding weekly job progress, utility coordination and construction coordination meetings.

RELEVANT PROJECT EXPERIENCE

South Williamson Boulevard (Pioneer CDD), Ormond Beach, Florida (August 2015 to July 2016): Mr. Puckett served as the Senior Project Engineer on the four lane widening and extension project from Pioneer Trail to Airport Road. Contract amount is $557,753.

Leesburg Wildwood Trail, FDOT District Five, City of Leesburg, Sumter County, Florida: Mr. Puckett served as the Senior Project Engineer on this LAP project that consisted of the construction of a 15-foot wide, 3.5-mile long asphalt paved pedestrian trail. Additional scope of work includes the removal of existing railroad ties, the construction of a historical railroad interpretive display, the construction of a shade structure and kiosk, the installation of pedestrian amenities (including benches, trash cans, bike racks, and picnic table), landscaping, signing and pavement marking, erosion control, and maintenance of traffic. Design was completed in 2013.

City of Winter Springs LAP Project Intersection of SR 434 and Tuskawilla Road, City of Winter Springs, Seminole County, Florida: Mr. Puckett served as the Senior Project Engineer for this City of Winter Springs LAP project. This $1.5 million project included work to reconstruct a new drainage system along a frontage road and complete reconstruction of that 1,400 LF road. The drainage construction included installation or modification of 24 drainage structures along with the associated pipe installation. Extensive installation of brick pavers, curb and gutter, fountain modifications and courtyard construction was included. The intersection of Tuskawilla Road and SR 434 was milled and resurfaced with both structural and friction course asphalt. ADA compliance was maintained and constructed, as well as erosion control and maintenance of traffic measures. DRMP provided all administration responsibilities, including field inspection, material sampling, and contract compliance. The office of Vince Vacchiano, District Five Special Projects, was the Department's oversight.

DRMP

Jim W. Highland, PE
Lighting

Jim W. Highland, PE is a Project Manager and DRMP's Traffic Engineering Department Manager. He has managed various contracts for municipalities and the FDOT. In that capacity, his duties involve assigning resources to various projects and managing project schedules. His experience in traffic engineering design has included technical engineering analysis, design of minor intersection reconstruction, signalization plans, lighting plans and Intelligent Transportation Systems (ITS). Mr. Highland has experience in performing traffic engineering studies including analyzing traffic operations for both intersections and corridors.

His project experience in traffic engineering includes working for municipalities, FDOT Districts One, Two, Three, Four, Five and the Florida's Turnpike Enterprise. Through these projects, he has gained a thorough knowledge of work zone safety regulations, procedures for permitting, utility coordination, specification development, public information process, and overall plans preparation.

RELEVANT PROJECT EXPERIENCE

I-4 and I-95 Interchange Lighting Projects, FDOT District Five, Volusia and Flagler Counties: Project Manager and Engineer of Record responsible for the design and development of construction plans and a Lighting Design Analysis Report for complete interchange lighting systems at 10 interchanges along I-4 and I-95 in Volusia and Flagler Counties. The project is composed of LED high mast lighting and LED conventional lighting at various interchanges designed to the latest FDOT design standards. The design includes side street, sidewalk, underdeck and intersection and pedestrian lighting as well as wall mount pilaster light pole retrofit details and spread footer details. The project includes coordination with several stakeholders such as utility companies, railroad, FAA and environmental agencies as well as coordination with ongoing projects.

I-10 Interchange Lighting Projects, FDOT District Two, Madison, Columbia and Baker Counties, Florida: Project Manager and Engineer of Record responsible for the design and development of construction plans and a Lighting Design Analysis Report for complete interchange lighting systems at 6 interchanges along I-10 in Madison, Baker and Columbia Counties. The project is composed of LED high mast lighting and LED conventional lighting at various interchanges designed to the latest FDOT design standards. The design includes side street, sidewalk, underdeck and intersection lighting as well as special foundation design. The project includes coordination with several stakeholders such as utility companies, railroad, FAA and environmental agencies as well as coordination with ongoing projects.

SR 91 (Florida's Turnpike Mainline) Widening from SR 50 Interchange to Minneola Interchange, Florida's Turnpike Enterprise, Orange and Lake Counties, Florida: Serving as Lighting Engineer of Record for the widening of 6-miles of SR 91 from a 4-lane to 8-lane limited access toll facility with two inside express toll lanes separated by a 4-foot buffer with delineators in each direction. The project will also replace bridge structures at five locations along SR 91. Plans include AET toll gantries, roadway, drainage, utilities, signing and pavement markings, MOT, structures, lighting, ITS, environmental permitting and surveying. The project also includes the purchase of right-of-way. This project is currently in design.

SR 528 (Beachline) Widening from I-4 to Florida's Turnpike, Florida's Turnpike Enterprise, Orange County, Florida: Traffic Engineer of Record for Lighting and ITS design for the widening of 4.3-miles of SR 528 from a 4-lane to 8-lane limited access toll facility with two inside express toll lanes separated by a 4-foot buffer with delineators in each direction. Plans included design toll gantry, roadway, drainage, signing and pavement markings, MOT, structures, lighting, signals, ITS, environmental permitting, and surveying.

SR 528 (Beachline) Widening from Florida's Turnpike to McCoy Road, Florida's Turnpike Enterprise, Orange County, Florida: Served as Traffic Engineer of Record for the Lighting design for the widening into the median of 4-miles from 6-lanes to 8-lanes by adding one express lane in each direction separated by a 2-foot buffer with delineators. Plans include roadway, drainage, bridge widenings (Florida's Turnpike, US 441 and Landstreet Rd.) as well as modifications to the existing toll gantry/cash toll plaza, signing and pavement markings, MOT, lighting, ITS, environmental permitting and surveying.

SR 202 (John Turner Butler Boulevard)/SR 115 (Southside Boulevard), FDOT District Two, Duval County, Florida: Lighting Engineer of Record responsible for preparation of the lighting design analysis report (LDAR) and lighting design for the SR 202/SR 115 interchange loop ramp safety improvements project. The interchange safety improvements project for the lighting consisted of designing a high mast/conventional hybrid lighting system to increase light levels and remove existing light pole locations that were in high crash areas. The purpose of the LDAR was to provide an analysis and recommendation of the type of lighting fixtures, mounting heights and spacing for the ramp lighting within in the project limits.

SR 528 (Beachline) Orlando South Interchange Improvements (MP 4), Florida's Turnpike Enterprise, Orange County, Florida: Engineer of Record for lighting design for the new Ramp X bridge over US 441. Project improves the capacity of the existing Orlando South Interchange including roadway resurfacing, ramp reconstruction and new bridge construction for the SR 528 Beachline and US 441 ramps serving the SR 91 (Florida's Turnpike) Mainline Toll Plaza. The plans include design for roadway, drainage, environmental and permitting, utilities, structures, signing and pavement markings, lighting and survey.

Continuing General Engineering Consultant, City of Lakeland, Polk County, Florida: Served as an Engineer for this General Municipal Engineering Services contract with the Lakeland Electric and Water Department. Under these contracts, DRMP has served the City of Lakeland's Departments of Public Works and Community Development and has provided a broad range of services including transportation planning, traffic analyses and parking studies, preliminary engineering studies, roadway planning and design, trail planning and design, general civil engineering, stormwater management, environmental permitting and construction engineering inspection.

- **SR 33 Widening Project, Polk County, Florida**: Engineer or Record for lighting design for the widening of SR 33 from a 2-lane rural section to 4-lane suburban section. The widening was centered along its current alignment from south of the I-4/SR 33 Ramps to north of Deeson Point Boulevard/Old Combee Road, a distance of approximately 1.4 miles. SR 33 was designed as a 4-lane divided suburban roadway within the existing right-of-way, including the required stormwater management facilities. Signal modifications and the addition/modification of turn lanes were designed at the intersections with the I-4 ramps, Old Combee Road, and Deeson Point Boulevard.

SR 45 (US 41/Tamiami Trail) at Piney Point Road Intersection Improvements, FDOT District One, Manatee County, Florida: Traffic Project Designer responsible for the lighting and plans preparation in support of this reconstruction of the existing US 41 4-lane rural roadway at the intersections of Piney Point and Dock Street to rigid concrete pavement. Project Length - .42 Miles Dates - February 2013 - April 2016 Reference - Joe Lauk (863-519-2750)

SR 589 (Suncoast Parkway 2), Florida's Turnpike Enterprise, Hernando and Citrus Counties, Florida: Engineer of Record for lighting plans at the SR 589 and US 98 Interchange in support of the design of approximately 9-miles of roadway. The overall project was a new limited access highway to extend the Suncoast Parkway. The complete design included plans for: roadway, drainage, bridge, signing and pavement markings, signals, lighting, right-of-way mapping and environmental permitting.

A. Max Brewer Bridge Replacement Design-Build, FDOT District Five, Brevard County, Florida: Provided roadway lighting design for a new 3,207-foot high level bridge over the Indian River and the Intracoastal Waterway to replace an existing swing span bridge, a 300-foot long cast-in-place concrete fishing pier and a 200-foot long, 4-span double-tee beam pedestrian bridge over the Indian River Relief Channel. Mr. Highland was also responsible for aesthetic pier lighting, navigational lighting and fishing pier lighting. Project consists of bridge design, roadway reconstruction, traffic, lighting, environmental, drainage, Maintenance of Traffic and signing/pavement marking.

Nicholas D. DeVito, PE
Lighting

Nicholas D. DeVito, PE is a Project Manager in DRMP's Traffic Engineering Department. His experience in traffic engineering design includes signing and pavement marking, signalization, lighting, Intelligent Transportation Systems (ITS), traffic studies, and signal re-timing. He is currently responsible for engineering analysis, design, and project management.

He has provided traffic design services for projects ranging from continuing contracts as well as minor intersection improvements to major roadway construction and limited access facilities. His experience spans a variety of clients from FDOT Districts One, Two, Three, Five, Seven, Florida's Turnpike Enterprise, Central Florida Expressway Authority and various counties and cities.

RELEVANT PROJECT EXPERIENCE

I-4 and I-95 Interchange Lighting Projects, FDOT District Five, Volusia and Flagler Counties, Florida: Lighting Designer for the design and development of construction plans and a Lighting Design Analysis Report for complete interchange lighting systems at 10 interchanges along I-4 and I-95 in Volusia and Flagler Counties. The project is composed of LED High mast lighting and LED conventional lighting at various interchanges designed to the latest FDOT design standards. The design includes side street, sidewalk, underdeck and intersection and pedestrian lighting as well as wall mount pilaster light pole retrofit details and spread footer details. The project includes coordination with several stakeholders such as utility companies, railroad, FAA and environmental agencies as well as coordination with ongoing projects.

I-10 Interchange Lighting Projects, Madison, Baker and Columbia Counties, District Two, Florida: Lighting Designer for the design and development of construction plans and a Lighting Design Analysis Report for complete interchange lighting systems at 6 interchanges along I-10 in Madison, Baker and Columbia Counties. The project is composed of LED High mast lighting and LED conventional lighting at various interchanges designed to the latest FDOT design standards. The design includes side street, sidewalk, underdeck and intersection lighting as well as special foundation design. The project includes coordination with several stakeholders such as utility companies, railroad, FAA and environmental agencies as well as coordination with ongoing projects.

SR 15/SR 600 (US 17/92) Interchange at SR 436 Design-Build, Lane Construction Corporation for FDOT District Five, Seminole County, Florida: Traffic Project Designer for signalization, ITS and signing and pavement markings in support of roadway widening and SPUI project along an urban area. Project consisted of upgrading three signalized intersections to comply with the latest FDOT design criteria, fiber interconnect, replacement of TMS, and development of coordinated timings for the corridor. The ITS consisted of upgrading and maintaining the fiber network and the replacement of the AVI and CCTV devices. Project limits on SR 15 extend from Prairie Lake Drive to Sunnytown Road. Limits along SR 436 extend from Oxford Road to west of SR 15.

Wekiva Parkway Section 206 (Contract 429-206), Central Florida Expressway Authority, Lake County, Florida: Traffic Project Designer for the traffic engineering design of a new 1.7-mile, 6-lane limited access roadway from east of Round Lake Road to the Lake County/Orange County Line. The project includes the design of the proposed intersection of SR 453 terminus at SR 46 and connection to the SR 46 existing 2-lane roadway just east of Round Lake Road. ITS design and plans consisted of a new gigabit fiber network with supporting ITS devices (DMS, CCTV, DCS, VDS and ADMS.) The signal design and plans consisted of a new mast arm layout and fiber interconnect at one intersection.

Mainline Turnpike Widening, Florida's Turnpike Enterprise, Orange County, Florida: Traffic Project Designer for roadway mainline widening (6-lanes to 8-lanes) and ramp reconstruction project. Project consisted of designing the replacement of the existing Gigabit Ethernet Fiber Optic Communications network and supporting devices (CCTV, VDS, DMS and TS/AVI Readers), which included both a temporary and permanent network configuration. Project also included the replacement of the existing county fiber network cable and drops for signalization interconnect within the project limits. Technical Specifications were developed for all equipment as required as well as wiring diagrams for each local hub. Mr. DeVito provided traffic engineering design and plan production for the ITS, lighting and signing and pavement markings of SR 91 and exit/entrance ramps from Beulah to SR 50.

SR 434 Design-Build, Southland Construction, Inc. for FDOT District Five, Seminole County, Florida: Traffic Project Designer for roadway widening (4-lanes to 6-lanes) project along an urban area. Mr. DeVito provided traffic engineering design plan production for signalization and signing and pavement markings. Project consisted of upgrading three signalized intersections to comply with the latest FDOT design criteria, fiber interconnect, replacement of TMS, and development of coordinated timings for the corridor. Project limits extend from SR 414 (Maitland Boulevard) to north of Trailwood Drive.

St. Johns Heritage Parkway Southern Project, Brevard County Public Works, Brevard County, Florida: Lead Project Engineer for the signalization and signing and pavement marking design for this 2-lane divided suburban roadway that can be expanded to a future 4/6-lane section. The original project was split into 2 sections, with the southern section from the Melbourne City limits to US 192, being schedule first for construction. This project included 3.1-miles of new 2-lane roadway improvements and 0.3-miles of side street widening improvement along US 192. This project involved stormwater design, environmental permitting, intersection design, roadway design, bridge design, utility coordination, right-of-way mapping and pedestrian features. The drainage design provided for the future 6-lane widening of the Parkway in the design of the stormwater conveyance systems and the five retention/detention treatment facilities. A single span, 2-lane, 102-foot long bridge was designed for farm access and a concrete box culvert at Canal C-84 was also structurally designed. A new traffic signal was designed at the intersection of the St. Johns Heritage Parkway and US 192. The project involved intensive coordination with outside agencies including; FHWA, FDOT District Five, The City of Palm Bay, SJRWMD, USACOE, FFWCC, USFWS, FDEP and the Melbourne-Tillman Water Control District.

St. Johns Heritage Parkway Northern Project, Brevard County Public Works, Brevard County, Florida: Lead Project Engineer for the signalization and signing and pavement marking design for this 4-lane divided suburban roadway that can be expanded to a future 6-lane section. The original project was split into 2 sections, with the Northern section, from US 192 to where it ties into FDOT's SJHP project, being scheduled later for construction. This project includes 1.0-miles of new 4-lane roadway improvements and 0.3-miles of side-street turn lane widening improvements along US 192. This project involved stormwater design, environmental permitting, intersection design, roadway design, utility coordination, right-of-way mapping, and pedestrian features. The drainage design provides for the future 6-lane widening of the Parkway in the design of the stormwater conveyance systems and the three retention/detention treatment facilities. The project also includes the design of a 59.4-acre joint use floodplain compensation pond. Future traffic signal modifications were also designed for the turn lane additions at the intersection of St. Johns Heritage Parkway and US 192. The project involved intensive coordination with outside agencies including; FHWA, FDOT District Five, SJRWMD, USACOE, FFWCC, USFWS, FDEP and the Melbourne-Tillman Water Control District.

DRMP

Theresa Y. Shaw

Utility Coordination

Theresa Y. Shaw serves as a Project Designer and Utility Coordinator in DRMP's Transportation Division. In her present capacity, she has served as Lead Designer/ Engineer for numerous major projects for the Central Florida Expressway Authority, FDOT, counties, cities, and private land development. Mrs. Shaw is proficient and experienced in the setting of highway geometrics for line grade and cross-sections. She supervises other technical staff in the preparation of plans, typical section, cross sections, and plan profile sheets.

RELEVANT PROJECT EXPERIENCE

SR 528 (Beachline) Orlando South Interchange Improvements (MP 4.5), Florida's Turnpike Enterprise, Orange County, Florida: Provided utility coordination for this $11.7 million construction project which included improvements to the Orlando South Interchange including roadway resurfacing, ramp reconstruction and new bridge construction for the SR 528 Beachline and US 441 ramps serving the SR 91 (Florida's Turnpike) Mainline Toll Plaza.

SR 528 (Beachline) Widening from I-4 to Florida's Turnpike, Florida's Turnpike Enterprise, Orange County, Florida: Provided utility coordination and roadway design for widening 4.3 miles of SR 528 from a 4-lane to 8-lane limited access toll facility with two inside express toll lanes separated by a 4-foot buffer with delineators in each direction. Plans include roadway, drainage, bridge widenings with FIBs (three sites), replacement bridges (one site), new ramp bridges (two sites), toll gantry, signing and pavement markings, MOT, lighting, signals, ITS, environmental permitting, and surveying.

SR 528 (Beachline) Widening from Florida's Turnpike to McCoy Road, Florida's Turnpike Enterprise, Orange County, Florida: Provided utility coordination and roadway design for the widening into the median of 4-miles from 6-lanes to 8-lanes by adding one express lane in each direction separated by a 2-foot buffer with delineators. Plans include roadway, drainage, bridge widenings (Florida's Turnpike, US 441 and Landstreet Road) as well as modifications to the existing toll gantry/cash toll plaza, signing and pavement markings, MOT, lighting, ITS, environmental permitting and surveying.

Palm Coast Parkway Widening, City of Palm Coast, Flagler County, Florida: Provided utility coordination for this roadway widening improvement of a 4-lane suburban section to a 6-lane urban facility. The project began 500-feet west of Cypress Point Parkway/Boulder Drive and extends to Old Kings Road. The project is approximately 1.5 miles in length. The project required design services for roadway, drainage, signing and pavement marking, signalization, lighting, landscape and structural. The project also included public involvement and one public meeting. This was a LAP project between the City of Palm Coast and FDOT District Five.

SR 417 Widening (Contract 417-107), Orlando-Orange County Expressway Authority, Orange County, Florida: Provided utility coordination for this 4-mile project which added two lanes in each direction to the existing 4-lane expressway from SR 528 to Curry Ford Road. Ramps serving two interchanges and the existing mainline toll plaza were re-aligned, and major drainage, signing and lighting upgrades were included. The bridge over Lee Vista Boulevard was widened to the median. Soundwalls were constructed along 0.8 miles of the east right of way line.

SR 100 Sidewalk Design, Flagler County, Florida: Provided utility coordination for the construction of a 5-foot sidewalk along the northside of SR 100 from Bulldog Drive to Roberts Road. SR 100 is a rural roadway and the sidewalk was designed close to the right-of-way. The project also included updating the drainage ditches based on the proposed sidewalk impacts and adding pedestrian features at the signalized intersections within the project limits. This project was designed per FDOT standards and was a LAP funded project.

DRMP

Allen W. Schrumpf, PE

Quality Assurance/Quality Control

Allen W. Schrumpf, PE is the Quality Control Manager (QC) for the Transportation Division of DRMP. In that role, he is responsible for developing all project QC plans, supervising all QC reviews, and preparing QC documentation. He also provides these review services to other consulting firms and public agencies on an independent contract basis.

He has also delivered seminars on the methods to administrate an effective Quality Control Manager Program at FDOT Project Management Training and APWA conferences. To date, his review efforts number in excess of 600 different transportation projects in study and final design phase of all project sizes and types.

RELEVANT PROJECT EXPERIENCE

Continuing General Engineering Consultant, City Of Lakeland, Florida: Serves as Quality Control Manager for this General Municipal Engineering Services contract with the Lakeland Electric and Water Department. Under these contracts, DRMP has served the City of Lakeland's Departments of Public Works and Community Development and has provided a broad range of services including transportation planning, traffic analyses and parking studies, preliminary engineering studies, roadway planning and design, trail planning and design, general civil engineering, stormwater management, environmental permitting and construction engineering inspection.

- **SR 33 Widening, City of Lakeland, Florida**: Quality Control Manager for the widening of SR 33 from a 2-lane rural section to 4-lane suburban section. The widening was centered along its current alignment from south of the I-4/SR 33 Ramps to north of Deeson Point Boulevard/Old Combee Road, a distance of approximately 1.4 miles. SR 33 was designed as a 4-lane divided suburban roadway within the existing right-of-way, including the required stormwater management facilities. Signal modifications and the addition/modification of turn lanes were designed at the intersections with the I-4 ramps, Old Combee Road, and Deeson Point Boulevard.

- **Waring Road, City of Lakeland, Polk County, Florida**: Quality Control Manager for this new north/south alignment between Medulla Road and West Pipkin Road for approximately one mile in length. Plans were prepared for the first two lanes of a future 4-lane roadway. Stub outs for drainage, and grading for widening were shown on the plans and pond was sized for the future conditions. Project also included widening West Pipkin Road for a new intersection and improvements and realignment of Medulla Road at Airside Center Drive for a total project length of 1.4-miles. Design included: earthwork, storm drainage retention ponds, pipe and drainage structures, box culvert extensions, a gravity wall, sidewalk, base, asphalt paving, (including new construction, widening, and milling and resurfacing), signalization, signing and pavement marking, and right of way maps.

Palm Coast Parkway Widening, City of Palm Coast, Flagler County, Florida: Quality Control Manager for this roadway widening improvement project for the Palm Coast Parkway. The Palm Coast Parkway design included widening a 4-lane suburban section to a 6-lane urban facility. The project began 500 feet west of Cypress Point Parkway/ Boulder Drive and extends to Old Kings Road. The project required design services for roadway, drainage, signing and pavement marking, signalization, lighting, landscape and structural. The project included design and right-of-way survey, subsurface utility location services and the development of parcel sketches and descriptions. The

project also included public involvement and one public meeting. This was a LAP project between the City of Palm Coast and FDOT District Five.

Old Kings Road Widening, City of Palm Coast, Flagler County, Florida: Quality Control Manager for this roadway widening from a 2-lane rural section to a 4-lane urban divided facility approximately 4 miles from south of Palm Coast Parkway to Forest Grove Drive. The 4-lane facility will be a divided urban arterial roadway with two, 11-foot lanes in each direction, curb and gutter with a closed drainage system, a 15.5-foot median, a 4-foot utility strip behind the back of curb and a concrete sidewalk on both sides of the road. The project includes: highway design, pavement design, drainage improvements and permitting, utility coordination, miscellaneous structures, signing and pavement markings, signalization, lighting, design and right-of-way surveying and subsurface utility engineering.continuing

Districtwide Constructability, Bidability, Scheduling Consultant Contract No. C-211, FDOT District Five, Florida: Project Manager responsible for providing multiple, simultaneous constructability/bidability and scheduling reviews for the Department on a task work order basis for Department projects. Also, provided independent professional analysis and recommendations on design, environmental issues, permitting, right of way, utility coordination, joint project agreements, maintenance of traffic, and construction methods and procedures. The nature of the Constructability/Biddability Reviews included roadway and bridge design projects, highway and bridge rehabilitation projects, resurfacing projects, public transportation facilities, lighting, signalization, landscaping and irrigation enhancement projects and others as deemed appropriate by the Department. Constructability/Biddability Reviews included a field visit, notation of special environmental or job-site conditions, and a thorough review of plans, specifications, contract documents and bid items. 56 task work orders were completed under this contract (totaling $750 million in construction) in a one-year period.

Stormwater Design & Studies, City of Leesburg, Lake County, Florida: Quality Control Manager on this continuing services contract that issues various stormwater engineering tasks as needed by the City. Tasks may include: stormwater design and studies, NPDES program implementation support, Total Maximum Daily Load (TMDL) support services and floodplain management services. Representative projects to date include:

- **Heritage Estates and Lake Griffin Stormwater Park Grant Funding Assistance, City of Leesburg, Florida**: Quality Control Manager for these projects to remove phosphorus from stormwater into Lakes Harris and Griffin alongside a future recreational trail. Heritage Estates project will have linear stormwater swales providing treatment for 46.4 acres of urban land contributing to Lake Harris, approximately .033 miles long. Lake Griffin project will have a wet detention pond in-line with an existing wetland providing treatment for 42.1 acres of urban land contributing to Lake Griffin. Mr. Schrumpf also served as the Roadway Engineer of Record for the TTCP.

SR 15/SR 600 (US 17/92) Interchange at SR 436 Design-Build, The Lane Construction Corporation for FDOT District Five, Seminole County, Florida: Quality Control Manager for this $22 million project for the design and construction of a single-point urban interchange to improve traffic capacity and safety at SR 15/600 (US 17/92) and SR 436 in the City of Casselberry. The interchange will elevate four lanes of SR 15/600 (US 17-92) over SR 436 at what was previously one of the most congested at-grade intersections in Florida. The bridge over SR 436 will be constructed using concrete FIB 96 beams. Detailed geometry was designed for the intersection to accommodate triple and double left movements. The complete design included plans for: roadway, drainage, bridge, MSE walls, miscellaneous structures, signing and pavement marking, signalization, ITS, lighting, MOT, surveying, permitting and public involvement.

US 1 Intersections Bundle and SR 600 from Emmett Street to North Charles Street, FDOT District Five, Brevard and Volusia Counties, Florida: Quality Control Manager for roadway/traffic improvements at several intersections along SR 5/US 1 and SR 600/US 92 from Emmett Street to North Charles Street. This project included the design of traffic signal improvements to install mast arms at five intersections along SR 5/US 1 including at Hibiscus Boulevard, SR 500 (US 192), Ballard Drive/Babcock Street, Prospect Avenue and New Haven Avenue. It also included drainage improvements to mitigate flooding issues on SR 600/US 92 from Emmett Street to North Charles Street by constructing additional curb inlets and replacing the existing storm drain trunkline with a larger pipe system.

David C. Lowe

Quality Assurance/Quality Control

David C. Lowe is a Senior Project Manager in the General Civil Department where his responsibilities include managing civil site design for hospitals, medical office buildings, commercial site development, subdivisions and theme parks. He is also responsible for QA/QC review of plans prior to construction.

Mr. Lowe's experience has given him a broad range of expertise. His work has included projects from small commercial site plans to large shopping centers. He has worked on large phased subdivision communities that have spanned eighteen years. His duties have ranged from drafting to the senior project management level. His best qualities are his ability to work with people and perform whatever task is required of him to get the project completed and submitted on time.

Years of Experience

Education
Valencia Community College, 1973

RELEVANT PROJECT EXPERIENCE

Country Club of Mount Dora, Lake County, Florida: Senior Designer for the Country Club of Mount Dora's (CCMD) site drainage assessment and design repairs. CCMD was trying to annex into the City of Mount Dora but needed to repair existing drainage structures that had failed. Mr. Lowe assisted in the remedial design and cost accounting for a law suit that the CCMD was bringing against the contractors who had initially performed the drainage construction work. Mr. Lowe was in attendance at CCMD's Community Development District meetings and assisted in advising them of the remedial construction progress and cost of repairs. His responsibilities were to assist in the preparation of the remedial plans and cost summary.

Hunter's Creek Apartments – Urbana Phase II, BB Hunters Developments Inc. Orange County, Florida: Project Manager overseeing permitting, infrastructure design and construction for Phase II, a 130-unit luxury apartment building. The project site currently has two existing apartment buildings with infrastructure designed for an additional two buildings. The developer revised the site plan to construct a single building instead of the two buildings originally planned. This involved a redesign of the infrastructure to accommodate the new layout. Infrastructure included an exfiltration trench design to treat the stormwater prior to discharge into the Hunter's Creek Master Stormwater System. The site was permitted through SFWMD, Orange County DRC, Orange County Commercial Permitting and FDEP. The infrastructure cost is $544,000.

Lake Forest, Seminole County, Florida: Project Manager in charge of the civil site infrastructure design for a 733-lot subdivision. His responsibilities were to oversee the infrastructure design, permitting and construction observation for 33 of the 37 sections. The permitting included the infrastructure plans and plats through Seminole County, FDEP water and sewer and SJRWMD for the ERP and MSSW permits.

Heathrow Woods – Phase 1, Seminole County, Florida: Project Manager in charge of the civil site infrastructure design for a 104-lot subdivision. His responsibilities were to oversee the infrastructure design, and permitting. The permitting included the infrastructure plans and plats through Seminole County, FDEP water and sewer and SJRWMD permits.

JubiLee Park – Master Development Plan, Orange County, Florida: Project Manager in charge of the preliminary Master Plan civil site infrastructure design for a three phase 1,064 unit apartment complex. His responsibilities were to oversee the preliminary site grading and stormwater system design for the site and the 1,700-foot extension of Hazeltine National Drive from its existing terminus to Goldenrod Road. Mr. Lowe's duties consisted of weekly conference calls with all the disciplines, attendance at the City's preliminary meetings and Technical Review Meetings.

LeeVista Center, FamLee Investment Company, Orange County, Florida: Mr. Lowe is DRMP's primary contact for the 1,956-acre LeeVista Center Project. He sits on the Design Review Board and reviews all projects that are permitted at LeeVista. His duties also include assisting the owner in preparation of cost estimates and coordination with prospective buyers. His role also includes monitoring and overseeing the design and permitting of the master drainage system.

Palisades, CanAm Palisades, Lake County, Florida: Project Manager in charge of the civil site infrastructure design for a 499-lot subdivision. His responsibilities include overseeing the site design, permitting and construction observation. The project has environmental constraints because it abuts the Palatlakaha Marsh, which is considered Outstand Florida Waters (OFW). Special consideration was required in permitting this project with the St. Johns River Water Management District (SJRWMD).

Twelve Oaks, Lennar Homes, Volusia County, Florida: Senior Designer for the paving, grading, and drainage infrastructure design for a 458-lot subdivision. His responsibilities were to oversee the site design and assist in plans review and permitting.

Adventist Health System Regional Headquarters, Adventist Health System, Seminole County, Florida: Senior Designer for the Due Diligence and Conceptual design of a 25-acre site and Construction Plan development of the Phase 1 of this plan on 14 acres in the City of Altamonte Springs. This site is the location of the Adventist Headquarters 150,000-SF building with parking and access roads as well as the stormwater management system and potential future development (up to 540,000-SF development). The site issues include the location of a floodplain on site as well as significant muck areas. The site has been assessed from an infrastructure perspective and recommendations have been made for site layout for pond, building, roadway and parking locations to provide for the most cost effective layout. The wet stormwater pond includes a reuse volume to meet recharge requirements, pollution abatement volume, flood attenuation, and floodplain compensation. Permitting obtained through SJRWMD, City of Altamonte Springs, FDOT, FEMA, and FDEP. Individual responsibilities included: design the site grading and secondary drainage systems and coordinate with other disciplines to achieve continuity of design. He is also involved in the permitting with Altamonte Springs, Florida. He prepared the submittal packages, attended the Development Review Committee (DRC) meetings and prepared the response to DRC comments.

Florida Hospital Altamonte Springs Campus, Florida Hospital, Seminole County, Florida: Project Manager in charge of the civil site infrastructure design for the six-story, $60 million hospital expansion project. His responsibilities are to oversee the site design, permitting, construction observation and project certification. The project included the addition of 155 new beds, relocation of the existing emergency department, design of a new ambulance access roadway for the emergency department, relocation of the entrance roadway, signalization for the entrance road and SR 436, design of a central energy plant and relocation of the oxygen farm.

Florida Hospital Altamonte Springs Campus Laundry Delivery Area, Florida Hospital, Seminole County, Florida: Project Manager responsible for campus area revisions to the site grading to accommodate a new laundry delivery/service area. The work included modification to the existing Patient Services Expansion approved plans and permitting the revisions through Altamonte Springs.

Florida Hospital Altamonte Springs Campus Uptown Café, Florida Hospital, Seminole County, Florida: Adjacent to the new laundry delivery/service area an existing outdoor dining area was renovated. As Project Manager his responsibilities included the site grading and drainage. The work included modification to the existing Patient Services Expansion approved plans and permitting the revisions through Altamonte Springs.

Florida Radiology Imaging (FRI), Florida Hospital, Orange County, Florida: Project Manager in charge of the civil site infrastructure design for the two-story, 30,000-SF medical office building. His responsibilities were to oversee the site design, permitting, construction observation and project certification. The project included the demolition of existing structures, construction of the medical office building, and site infrastructure, including 117 automobile parking spaces. The site drainage design included options for an underground exfiltration system and conventional stormwater pond.

Hazeltine National Drive, Orange County, Florida: Project Manager in charge of the design and permitting for a 1,600-foot extension to an existing road in LeeVista Center. The four-lane divided roadway included drainage, potable water, sanitary sewer collection system and a reclaimed water main extension. The roadway pond was designed to collect future stormwater. His responsibilities were to oversee the site design, permitting, construction observation and project certification.

Christopher F. Altes, MA

Project Archaeologist/Field Director & Geophysical Studies
Gainesville, Florida Office

Christopher F. Altes, MA, serves as an archaeologist and director of research and development. He is responsible for archaeological fieldwork and supervision and specializes in finding new methods for archaeological survey, analysis, and presentation. These include the application of satellite remote sensing, LiDAR, and three dimensional scanning and visualization. He also contributes to all phases of archaeological research projects and ensures the safety of archaeological fieldwork, accurate recordation of all encountered cultural materials, and completion of projects within timetables. Following fieldwork, he contributes to artifact analysis, spatial analysis, and report preparation. Mr. Altes has worked in the Southeast and Caribbean, including projects in Maryland, Virginia, North Carolina, Georgia, Florida, the Turks and Caicos, Dominican Republic, Puerto Rico, Vieques, and Cuba. Mr. Altes' experience includes zooarchaeology, spatial analysis, ceramic analysis, remote sensing, and osteology, with an emphasis on the social structure of ancient societies. His work has been published by Oxford University Press. Mr. Altes' qualifications exceed those set forth by the Secretary of the Interior's *Standards and Guidelines for Archeology and Historic Preservation* (48 FR 44716-42).

Mr. Altes also has over 10 years of experience in geographic information systems (GIS), ground-penetrating radar (GPR), and remote sensing technology. Mr. Altes served as GPR Specialist for the Investigative Fieldwork at Hürtgen Forest in North Rhine-Westphalia, Germany for DPAA in 2016 and Field Director for the archeological survey in Guantanamo Bay, Cuba.

Ground Penetrating Radar (GPR) Specialist. Investigative Fieldwork, Hürtgen Forest, North Rhine-Westphalia, Germany. Conducted for DPAA.

Co-Principal Investigator and GPR Specialist. Reburial of Human Remains Encountered in the Southeastern Portion of the Perry Substation, Taylor County, Florida. Conducted for Duke Energy.

GPR Specialist. Ground-Penetrating Radar Survey, Clarence Town, Long Island, Bahamas. Conducted for Antiquities, Monuments, and Museum Corporation (AMMC).

Principal Investigator and GPR Specialist. Ground-Penetrating Radar Remote Sensing Survey in West Palm Beach, Palm Beach County, Florida. Conducted for Cardno.

Principal Investigator and GPR Specialist. Ground-Penetrating Radar Survey of the Strickland Cemetery for the US 90/SR 10 Project, Santa Rosa County, Florida. Conducted for Florida Department of Transportation, District 3.

Principal Investigator and GPR Specialist. Ground-Penetrating Radar Remote Sensing Survey of Areas Associated with Three Historic Cemeteries in Bartow, Carroll, and Douglas Counties, Georgia. Conducted for Cardno.

Principal Investigator and GPR Specialist. Ground-Penetrating Radar Survey of Portions of the Ard Field Church of Christ Cemetery, Santa Rosa County, Florida. Conducted for Ard Field Church of Christ.

Co-Principal Investigator and GPR Specialist. Ground-Penetrating Radar Remote Sensing Survey of the Kinny Harmony Road Cemetery (Site 8PO1519), Polk County, Florida. Conducted for Modica & Associates.

Co-Principal Investigator and GIS Specialist. Boundary and Assessment Survey of the Moody Burial Mound Site (8LL758), Lee County, Florida. Conducted for Florida Tax Lien Assets, LLC.

Field Director and GIS Specialist. Phase I Cultural Resource Survey for the Sunset Hotel, Marina, and Residential Development on the east side of North Creek, Grand Turk, Turks & Caicos Islands. Conducted for Applied Technology & Management, Inc.

Field Director and GIS Specialist. Phase Ia Archaeological Survey of the Ramey Unit School Code 0-3, US Coast Guard Air Station Borinquen, Puerto Rico. Conducted for SchenkelShultz for US Coast Guard.

GPR Specialist. Desktop Study, Remote Sensing Survey, and Diver Investigation for Submerged Cultural Resources at the Dalton Pipeline Etowah River Crossing, Bartow County, Georgia. Conducted for Cardno.

DOUG BAKER, P.E.
PROJECT GEOTECHNICAL ENGINEER

Education
B.S. in Civil Engineering
University of South Florida, 1988

Registrations
Registered Professional Engineer, Florida #48943, 1995

PROFESSIONAL EXPERIENCE
Mr. Baker has 27 years of experience as Project Engineer and Project Manager on numerous geotechnical and environmental projects throughout the State of Florida. His responsibilities include scope development and cost negotiations, project management and report preparation. Mr. Baker has provided geotechnical engineering services for numerous high-rise and low-rise buildings, airports, utilities, water control structures, wetlands, schools and subdivisions. In addition, he has performed engineering services on over 200 projects for the Florida Department of Transportation (FDOT) in Districts 1, 2, 3, 4, 5 and 7 and is thoroughly familiar with FDOT practices and procedures.

PROJECT EXPERIENCE
City of New Smyrna Beach Continuing Contract, Florida
Principal Geotechnical Engineer to provide Continuing Geotechnical Engineering and Testing Services. The scope of work includes In-Place Density Testing of Road Base and Underground Utility Trenches; Asphalt Surface Testing; Laboratory Analysis of Roadway Core Borings; Subsurface Soil Gradation and Analysis; Sieve Analyses; Site Investigation and Recommendation Reporting; Phase I and Phase II Environmental Assessments; Sampling and Analytical Analysis of Ground and Surface Water; Concrete Cylinders and Swiss Hammer Testing; Threshold Inspections; Soil Bearing Capacity; Lead Based Paint and Asbestos Testing.

Volusia County Continuing Contract, Florida
Principal Geotechnical Engineer for this contract to provide Geotechnical Services which includes subsurface investigation, drilling and analysis, soil property testing, construction and materials testing, foundation design analysis, pavement evaluation, permeability evaluations, threshold inspections, site feasibility studies and values engineering analysis.

Volusia County Public Schools Continuing Contract, Volusia County, Florida
Principal Geotechnical Engineer for continuing services contract providing geotechical engineering services.

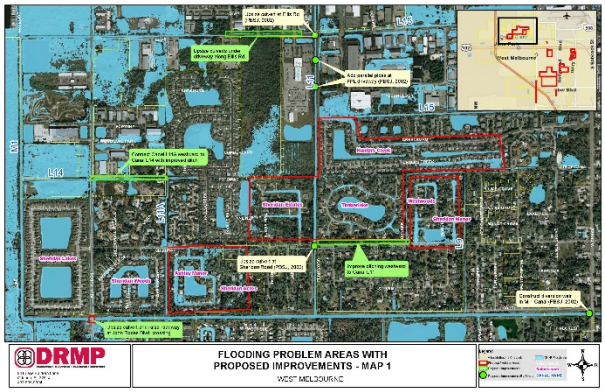
City of Ormond Beach Continuing Contracts for Professional, Architectural, and Engineering Services, Ormond Beach, FL
Principal Geotechnical Engineer providing consulting services to include, but not be limited to, engineering services pertaining to subsurface investigation, drilling, and analysis, soil property testing, construction and materials testing, foundation design analysis, pavement evaluation, permeability evaluations, threshold inspections, site feasibility studies, and values engineering analysis.

City of Daytona Beach Continuing Engineering Services Contract, Daytona Beach, FL
Principal Geotechnical Engineer to provide engineering related services and design of systems necessary for complete function of various building types, structures, site infrastructure, mechanisms and systems in the City.

Seminole County Continuing Contract
Sanford, Florida
Principal Geotechnical Engineer to provide professional engineering services in support of Geotechnical Engineering designs, Construction Materials Testing and supporting Testing and/or Inspection services. These services also include Environmental Drilling services and geotechnical engineering design and evaluation not limited to pavement design, foundation design, pile design, sinkhole analysis, soil analysis and recommendations. Alternative design analysis and recommendation of peer projects may also be utilized.

City of Orlando Continuing Contract, Orlando, Florida
Principal Geotechnical Engineer for continuing services contract providing Geotechnical Engineering for a variety of civil engineering projects which include subsurface exploration, foundation design construction support, settlement estimating, structures, roadways and drainage systems; Construction Materials Testing and Inspection – earthwork, foundations, building construction, concrete, pavement, roofing, steel; Hydrogeological Engineering – stormwater, groundwater, water supply, wastewater, drain wells, environmental aspects; Threshold Inspections; and Survey, Geotechnical, Environmental and Reproduction services.

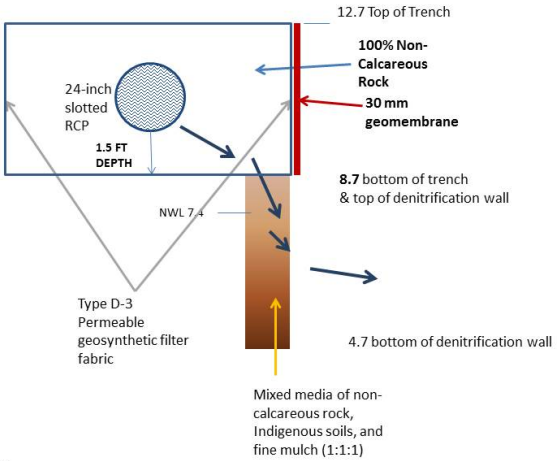
Osceola County Continuing Contract, Osceola County, Florida
Senior Engineer to provide Geotechnical Services for various projects that include roadway, transportation planning, water distribution and sewage collection systems, small water and wastewater treatment facilities, institutional site development plans, parks and recreational design, and stormwater management throughout Osceola County.



Orange County Utilities (OCU), Orange County, Florida
Senior Geotechnical Engineer for projects under this contract, including geotechnical, hydrogeological, construction materials testing and environmental consulting services in support of Orange County Utilities' three divisions (water, wastewater and solid waste).

Experience

The following are representative projects for the DRMP team. All projects were completed on time and within budget. The projects were not involved in litigation (for a full litigation statement of the firm, please review Tab 5).



Roadway/Drainage Improvement Projects

West Melbourne Stormwater Needs Analysis, Phase II
Owner: Brevard County
Contact: Carolina Alvarez, NPDES Coordinator
A: 2725 Judge Fran Jamieson Way, Melbourne, FL 32940
E: carolinaalvarez@brevardcounty.us
P: 321.633.2014 ext. 56472
Proposed Schedule: 2009-2011
Actual Schedule: 2009-2011
Proposed Fee: $198,110
Actual Fee: $198,110

The scope of this 37 square mile project included updates to stormwater infrastructure inventory, development of watershed surface water model using a GIS platform and ICPR, and development of 100-year floodplains and master stormwater plan. Updates to GIS stormwater infrastructure inventory were conducted by review of ERP files, Water Control District databases, County and City project files. Sub-basin development occurred using ArcHydro. A surface water model was developed in ICRP vs. 3.10 for entire canal and creek network throughout City limits and parts of County. Verification of model was performed with biggest recent flood from Tropical Storm Fay. Floodplain delineation was conducted for 100-year storm event. Flooding problem areas were analyzed and flood protection projects with water quality improvements were recommended. Methodology and findings were presented to the City Council and documented in a GIS database and technical memorandum.

Micco"I"/Little Hollywood Stormwater BMP
Owner: Brevard County
Contact: Robbyn Spratt, PE
A: 2725 Judge Fran Jamieson Way, Melbourne, Florida 32940
E: robbyn.spratt@brevardcounty.us
P: 321.633.2016
Proposed Schedule: 2013-2015
Actual Schedule: 2013-2015
Proposed Fee: $56,922
Actual Fee: $56,922

DRMP conducted final design, permitting, and construction plans production for retrofitting two existing storm outfalls into the St. Sebastian River, a tributary of the Indian River Lagoon, with BMP improvements. At the northern outfall (15-acre sub-basin) approximately 800-lf of exfiltration trench was constructed with an adjacent underground denitrification wall for enhanced nitrogen removal. DRMP worked closely with County and Desert Research Institute staff to design this unique denitrification wall, a technique with a history of agricultural applications. At the southern outfall (37-acre sub-basin) a series of BMP units was installed in-line with the existing storm sewer outfall including a second-generation baffle box for initial sediment capture, and a denitrification box with proprietary canisters for enhanced nitrogen removal.

These BMP's were monitored for success at nutrients removal, with particular emphasis on nitrogen removal. DRMP provided assistance throughout the bid, construction and monitoring phases of the project. This project is partially funded with a FDEP Section 319 grant. The County intends to apply lessons learned at enhanced nitrogen removal to additional projects throughout the Indian River Lagoon.

General Site Improvement Projects

ADA Curb Ramps at Stadium Road and Gale Lemerand Drive
Owner: University of Florida
Contact: Daniel Walker
A: PO Box 118, Career Resource Center, Gainesville, FL 32611
E: dgwalker@ufl.edu
P: 352.392.1601
Proposed Schedule: 20105-2015
Actual Schedule: 2015-2015
Proposed Fee: $30,240
Actual Fee: $30,240

DRMP was selected by the University of Florida to provide civil engineering services for minor design projects. ADA compliance is a challenge for every higher education provider in the country. A glaringly deficient location for UF was the prominent intersection of Gale Lemerand Drive and Stadium Road situated at the southwest corner of Ben Hill Griffin Stadium. The ramps and crosswalks at the intersection did not comply with current ADA standards and buses were having problems safely alighting disabled passengers. DRMP provided precise surveying and engineering services that resulted in a completely ADA compliant intersection and bus alighting facility. In addition to solving the ADA problems, DRMP provided a unique structural solution to a nearby curb inlet that was frequently damaged by bus traffic. This solution was so successful that UF has adopted this as their standard for curb inlet protection.

SW 8th Avenue Improvements
Owner: City of Gainesville, Florida
Contact: Sarah Vidal-Finn
A: 802 NW 5th Avenue, #200, Gainesville, FL 32601
E: Vidalsc@cityofgainesville.org
P: 352.393.8200
Proposed Schedule: 2008-2010
Actual Schedule: 2008-2010
Proposed Fee: $51,750
Actual Fee: $51,750

DRMP has been providing a broad range of engineering services to the City of Gainesville since 2006. These services include general civil, roadway, stormwater, water and wastewater utilities, environmental, survey, and recreational trail projects.

Major design items included on-street parking, reconstruction and widening brick sidewalks to the existing right-of-way where practical while still providing room for street lighting and street trees, roadway reconstruction, and an underground stormwater management facility. Stormwater permitting through SJRWMD was required for the roadway reconstruction portion of the project, as required of all roadway reconstruction projects. DRMP participated in public meetings to describe the project, obtain information from residents, and to address the public's concerns.

DRMP provided design, survey (including SUE locates) and construction plans for demolition, utility relocation, paving, grading, drainage and lighting for this four block roadway streetscape project in a congested downtown sorority neighborhood. This project consisted of undergrounding all utilities, brick sidewalks and crosswalks, new curb and gutter and drainage modifications. Three blocks required milling and resurfacing and one block was a total roadway reconstruction with underground stormwater storage. Existing underground utilities consisting of water, sewer, gas and telecommunications (including a major duct bank feeding the University of Florida), made this a very unique and challenging project.

Streetscape Projects

Downtown Utility & Streetscape Improvements
Owner: City of Fort Myers, Florida
Contact: Saeed Kazemi
A: 2200 Second Street, Fort Myers, FL 33902
E: skazemi@cityftmyers.com
P: 239.321.7022
Proposed Schedule: 2003-2010
Actual Schedule: 2003-2010
Proposed Fee: $3,190,000
Actual Fee: $3,190,000

DRMP provided the City of Fort Myers with a completely redesigned downtown area including roadway and intersection design, traffic and signalization, traffic control plans, parking analyses, lighting, solid waste management, stormwater management, landscape and irrigation design services. During construction, DRMP also provided **permitting and bidding assistance, construction administration, and construction engineering inspection services** for this $1.27 Million project. Upon completion this project was awarded both the 2010 Project of the Year by APWA and 2010 Roy F. Kenzie Award for Best Capital Projects/Beautification Project by the Fort Myers Redevelopment Agency (FMRA).

City Complex Projects

City of Fort Myers Fire Station
Owner: City of Fort Myers, Florida
Contact: Kevin Ratigan (Architects Design Group, Inc.)
A: 333 N. Knowles Avenue
E: kevinr@adgusa.org
P: 407.647.1706 | F: 407.645.5525
Proposed Schedule: 2013-2014
Actual Schedule: 2013-2014
Proposed Fee: $87,200
Actual Fee: $87,200

The new facility is a 3-story, 34,000 SF facility located on the 4.1 acre site where the previous library sat. This project required coordination with the prime consultant, ADG Architects, as well as local municipalities and various permitting agencies.

Continuing Contract Projects

Continuing Civil Engineering Consultant
Owner: St. Johns County
Contact: Nick Perpich, PE
A: 2740 Industry Center Road, St. Augustine, FL 32084
E: nperpich@sjcfl.us
P: 904.209.0136
Proposed Schedule: 2008-Ongoing
Actual Schedule: 2008-Ongoing
Proposed Fee: To be determined (contract is ongoing)
Actual Fee: To be determined (contract is ongoing)

DRMP has been providing engineering services to St. Johns County since 2003 under a continuing engineering contract. These services include roadway design, drainage design, environmental permitting, wetlands mitigation, surveying and public involvement. Three highlighted projects are listed below:

Bishop Estates Road Stormwater Improvements, Phases I and II

This project involves retrofitting a series of four storm outfalls in two phases for the Bishop Estates Road with the following main objectives: replace deep ditches with shallow swales and piped systems, replace cross drains and size to alleviate flooding, remedy scour and erosion problems, and install stormwater treatment units. The treatment units are nutrient separating baffle boxes that are equipped with upflow filters holding special media for targeting removal of nutrients. A grant was secured with FDEP through the TMDL program for over 50% funding for Phase I (outfall Nos land 2) construction. DRMP has provided engineering services for the following project task assignments:

- Preliminary study to develop a conceptual plan
- TMDL grant writing and administration
- Final design with development of construction plans for Phases I and II
- Public Meetings
- Permitting for Phases I and II
- Bid assistance for Phase I
- Construction inspection for Phase I

Rolling Hills Drive Extension

Johns County consists of the roadway design and permitting for extending Rolling Hills Drive. The project limits extend from the current end of Rolling Hills Drive near Chelsea Woods subdivision to Dobbs Road, a total of 0.5 miles. The alignment of the new roadway was designed to fit in an existing right-of-way such that additional right-of-way was not required. The typical section consisted of 12-foot travel lanes and 4-foot bike lanes in each direction with curb and gutter on both sides. Concrete sidewalks are also included on one side of the road.

The profile grade design was optimized to accommodate not only the riding surface and sight distance, but also to maintain drainage patterns that allow the existing stormwater treatment facility adjacent to the project to be expanded. This avoided the necessity of obtaining pond site right-of-way. DRMP coordinated with the FDOT to facilitate obtaining permission to use the existing stormwater facility. The roadway alignment crosses a broad shallow drainage slough that required a large cross drain. The design performed by DRMP balanced the sizing of the cross drain pipe and the profile grade of the roadway. An additional cross drain was included to provide a relief structure, rather than increasing the size of the main cross drain. The project required maintaining an environmental resource permit from St. Johns River Water Management District. The main issues included wetland impacts, mitigation and stormwater treatment.

The utility portion of the project included the relocation of a water main. The route of existing water main is generally toward the center of the right-of-way and there were many potential conflicts with the storm drainage system. The relocation of the water main to be closer to the right-of-way eliminated these conflicts. DRMP also

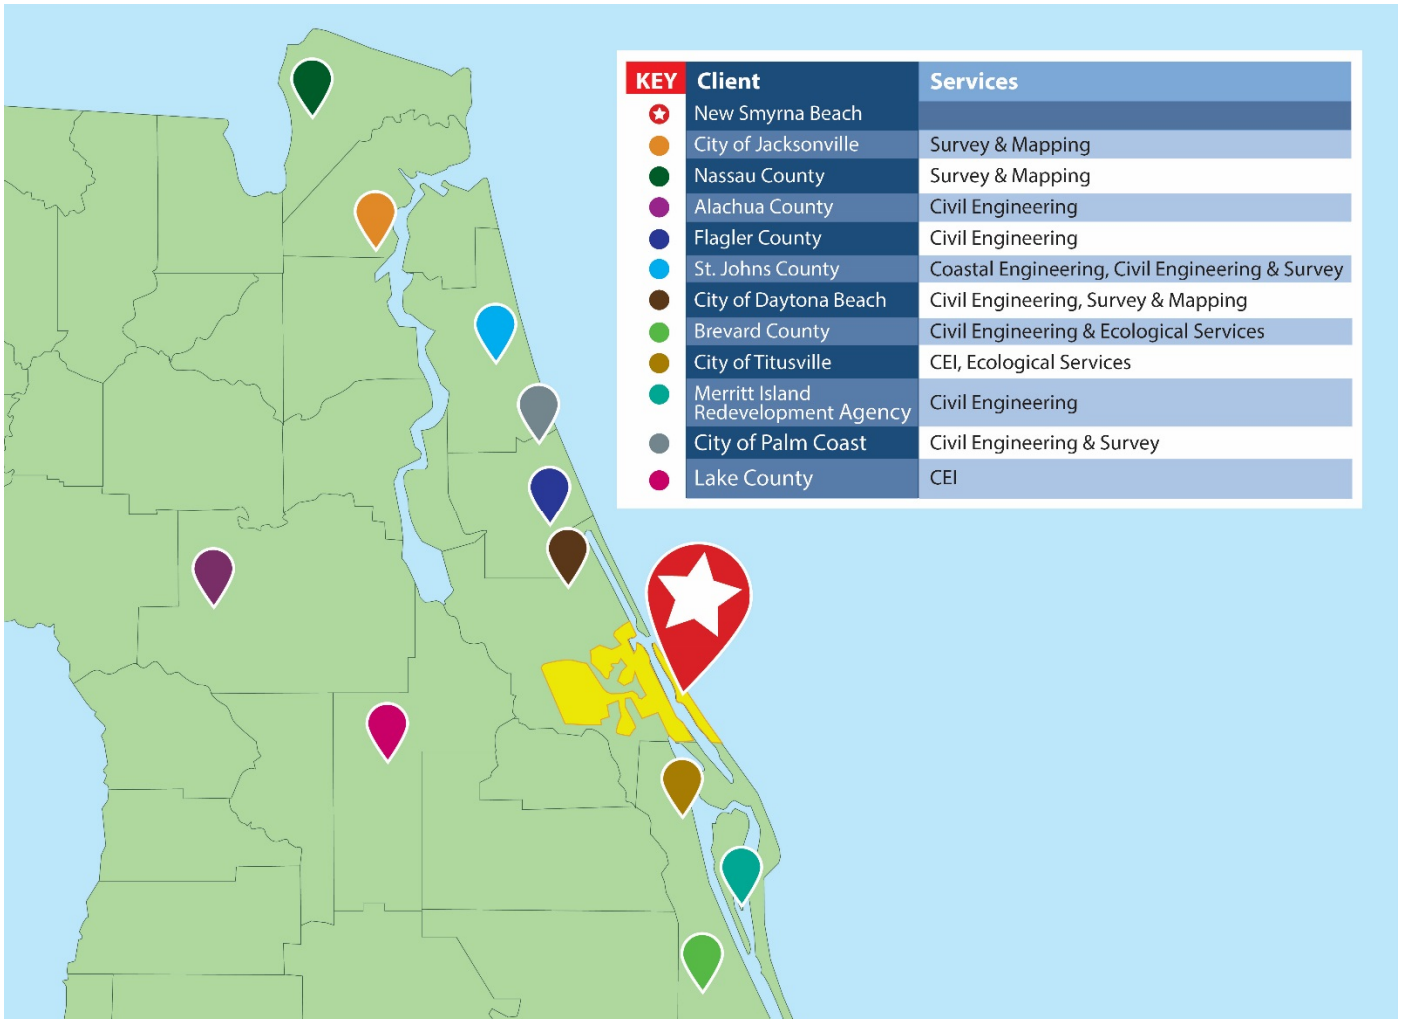
designed and prepared plans for a sanitary force main. The existing force main from Dobbs Road to the lift station was increased in size. A new force main was then designed from the lift station to connect the force main near Chelsea Woods. The crossing under Rolling Hills Drive will be constructed as a part of the roadway project and the remaining part of the sanitary force main will be constructed in the future.

Holmes Boulevard Widening

This project for St. Johns County consists of the roadway design for widening Holmes Boulevard to provide 12-foot travel lanes and for the construction of 4-foot paved shoulders. DRMP investigated several horizontal and vertical alignments and several typical sections during the 15% line and grade phase of the project. The option of widening approximately 2-foot on the western side of the roadway was selected to eliminate the need for additional right-of-way and to avoid potential wetland impacts. The option also eliminated the need to fill in any of the existing borrow pits adjacent to the roadway. DRMP was successful in identifying wetland limits and determining that the wetlands would not be impacted. DRMP obtained agreement and documentation from St. Johns County Water Management District that this is a "no permit required" project.

DRMP performed a pavement design for the project taking into account the relatively high volume of trucks using the roadway. The profile for the roadway as carefully analyzed and slightly raised in two areas to alleviate some localized drainage issues. The pavement design calls for reclaiming the existing pavement structure by mixing up to 12-inch of the existing base and asphalt. Additional material will be added to achieve the profile grade adjustments. This process was very economical compared to reconstruction of the roadway and will allow the maintenance of traffic to be less complicated.

Continuing Engineering Services
Owner: Flagler County
Contact: Amy Kennedy
A: 1769 Moody Boulevard, Building 2, Suite 304, Bunnell, FL 32110
E: akennedy@flaglercounty.org
P: 386.313.4047
Proposed Schedule: 2015-Ongoing
Actual Schedule: 2015-Ongoing
Proposed Fee: To be determined (contract is ongoing)
Actual Fee: To be determined (contract is ongoing)



DRMP is responsible for providing planning, design, permitting and construction inspection for stormwater management systems, site and property developments, roadway improvements, park and recreational facilities, utility improvements, and traffic engineering on a continuing as needed basis.

CR 305

CR 305 is a 2-lane, 2-way undivided rural roadway in Flagler County. Currently, the existing roadway lane widths are sub-standard and shoulders are not provided. DRMP was tasked to provide roadway, drainage, signing and pavement markings and maintenance of traffic plans for the widening and reconstruction of approximately 2.711-miles of CR 305 from north of CR 304 to south of Middle Haw Creek to accommodate 12-foot travel lanes and 6-foot unpaved shoulders in each travel direction. In addition, the front slope is being reconstructed to accommodate lane widening and shoulders. As a result, portions of roadside ditches and wetlands are being impacted. Compensatory excavation will maintain the stormwater flow capacity of the ditches. Wetland impacts were identified and mitigated per agency requirements. This Project will be permitted through St. John River Water Management District.

Additional Project Experience

DRMP has an extensive background in providing on-call engineering services. The following are recent or ongoing continuing contracts in the local area.

Client References

The following clients are representative of DRMP's strong working relationship with local clients in providing similar services to the New Smyrna Beach Scope of Service.

Other

Current Projects

The following are ongoing projects being led by DRMP's Melbourne office and are all in the design phase:

- Patrick Air Force Base Engineering (90% complete)
- Patrick Air Force Base Shoreline Environmental (15% complete)
- Ascension Island Runway/Support Facilities Replacement (56% complete)

DRMP Services

DRMP offers the City of New Smyrna Beach a wide array of services provided in house. Below is a description of the primary services we provide.

OUR EXPERTISE INCLUDES THE AREAS OF:

- Construction Services
- Design-Build
- Ecological Services
- General Civil Engineering
- Geographic Information Systems (GIS)
- Land Planning
- Landscape Architecture/Sit Design
- Structural Engineering
- Subsurface Utility Engineering (SUE)
- Surveying and Mapping/Geomatics
- Transportation
- Utilities Engineering
- Water Resources/Stormwater Management

Stormwater Engineering

Our stormwater management designs represent the best leading management practices for water quality, flood control, stormwater drainage and water conservation. Full consideration is given to both mechanics and aesthetics with every project. In this manner, solutions respond not only to functional needs, but to environmental and human considerations as well.

DRMP's total scope of water resource services includes the following:

- Stormwater Management
- Master Planning
- Existing System Studies and Analysis
- Natural Drainage System Analysis
- Water Control Structure Design
- Cost Estimates
- Government and Regulatory Agency Permitting
- Water Supply Studies
- Water Conservation Studies and Design
- Ecological Impact Evaluation
- TMDL Expertise
- CDS Units

Communication is the key issue for a successful drainage evaluation. DRMP recognizes that City staff, regulatory agency staff, residents, and other stakeholders provide crucial information about historic problems and provide critical feedback on the proposed solutions.

The first step in the conceptual drainage evaluation process is to identify and interview project stakeholders and establish the overall goals of the project. This step enables the development of solutions that best meet the intended goals with consensus from the stakeholders. DRMP will work with the City staff to adapt the following design approach to fit the needs of each assignment:

- Compile stakeholder issues
- Identify regulatory requirements
- Pre-application meetings with SJRWMD
- Coordinate with FEMA and other agencies as required
- Calculate potential floodplain impact
- Compute stormwater using the appropriate method for difference in total runoff volume
- Estimate pond size required including maintenance berms, grading, and offsite conveyance
- Assess cross drains using a field evaluation form
- Select potential pond sites and determine potential impacts
  - Use locations within existing right-of-way but minimize wetland impacts – i.e. ditch treatment, joint use pond, etc.
  - Select vacant, undeveloped parcels (by field observations and property appraiser queries using vacant parcel codes)

- Avoid wetland impacts except when the alternative would mean a residential or business impact or only wetlands available
- Conduct preliminary soils analysis
- Use our standard field evaluation form to assess each pond site
- Determine joint-use (third-party) pond opportunities
- Determine compensating treatment to avoid right-of-way acquisitions

- Refine stormwater alternatives with stakeholder and technical input
- Determine a recommended stormwater alternative

Roadway Design

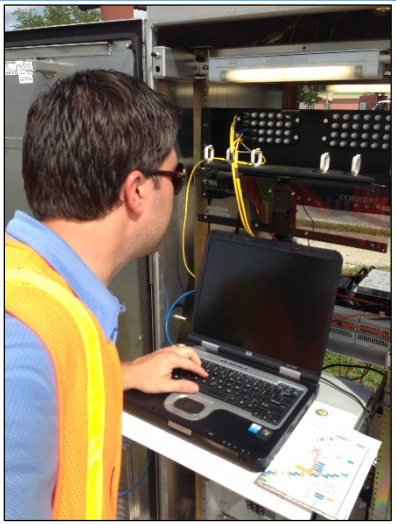
DRMP has provided comprehensive transportation services for major and minor roadways throughout the state. From rural, two-lane roads to urban, six-lane arterials, we offer the specialized knowledge and equipment required for safe and efficient design and construction of transportation systems. Our team offers expertise in the following areas:

- Widening, Resurfacing and Reconstruction of Roads and Highways
- Project Development and Environmental Studies (PD&E)
- Environmental Permitting and Mitigation Design
- Major Design Activities, Complex and Multi-Lane Roadways
- Minor Design Activities, Pathways, Bikeways and Sidewalks
- Maintenance of Traffic
- LAP, SCRAP, and SCOP Projects
- Construction Engineering and Inspection (CEI)

To develop any new or improved roadway facility, DRMP relies on what is in the best interest of the City and the overall public and its citizens. To do so, DRMP takes the following factors into consideration:

- **Engineering:** The contemporary design and alignment of the proposed roadway
- **Environmental:** Social, cultural, natural, and physical factors
- **Public Involvement:** Needs and concerns of the local community
- **Economic Factors:** Project costs and opportunities to minimize costs such as construction staging and traffic control

Engineering factors relate primarily to the motorists using the facility. These factors involve the application of criteria that are based on project controls. For any project, the primary controls will be the projected traffic volumes and level-of-service, roadway and access management classification, and design speed. Engineering will ensure that the design of the improved facility safely and efficiently accommodates the projected design year vehicular traffic and incorporates median openings at the appropriate locations. DRMP will closely consider engineering, environmental and public involvement factors and will be diligent to keep project costs within the planned budget.



Our approach to projects relies on the development of a preliminary study and the analysis of these factors with regard to the transportation and utility needs of the corridor. In determining roadway alignments and typical sections within the project corridor, DRMP will maximize the use of existing right-of-way for any given roadway. Analysis and recommendations will be applied to developing preliminary alignments and typical roadway sections.

DRMP will review existing features along the project corridor, the Scope of Work for the project and the current criteria found in the Florida Greenbook. DRMP will then make significant progress in performing the project analysis so that we will be up-to-date and ready to proceed at full speed upon selection and authorization from the City.

Additional considerations; such as traffic planning and design, drainage, permitting, maintenance of traffic,

safety, utilities and geotechnical; will also be taken into account when developing roadway plans.

Traffic and Intersection Engineering

Growth and development dictate the need to plan for improving current infrastructure for future mobility. DRMP's Transportation Planning group brings a comprehensive, problem-solving approach to every project. By analyzing historical trends, modeling and forecasting existing and projected traffic conditions, as well as generating and evaluating alternatives, we develop the best possible plan to accommodate increased travel demand. With our team's strong knowledge of current regulatory requirements, we can handle any client's transportation needs.

The study and design of vehicular operations for the improvement of mobility can seem as much as an art form as it is an engineering challenge. DRMP's primary goal is to utilize ingenuity and make sound recommendations to provide a safe and efficient environment for both vehicles and pedestrians to travel through complex transportation networks. Our experience demonstrates how our idea of safety goes hand-in-hand with quality designs for smooth traffic operation.

DRMP's traffic engineering expertise ranges from minor intersection improvements and major roadway design to signal design and arterial reconstruction. As traffic infrastructure continues to grow in complexity, we aim to work smarter to solve the challenges of moving traffic both today and tomorrow. Our services include:

- Lighting Design
- Minor Roadway Improvements
- Safety Upgrades/ADA Improvements
- Signal and Interconnect Design
- Signal Retiming and Corridor Progression
- Signing and Pavement Marking
- Intelligent Transportation Systems
- Utility Coordination

Traffic Studies: The development of project traffic is typically an important step in developing viable engineering alternatives for a project, whether on an existing or new alignment. Key tasks in developing a thorough traffic analysis include:

- Detailed evaluation of existing travel demand conditions (capacity and level of service)
- Development of design year travel demand forecasts
- Development of design year level of service analyses
- Interim year forecasts and level of service analyses
- Determination of functional geometric requirements
- Development of a staged implementation plan, if necessary

Existing conditions analyses include an evaluation of travel demand and traffic characteristics, which are typically the basis of future-year assessments, such as development of design-year K, D, and T factors. To document the need for improvement, the traffic study identifies existing capacity and operational deficiencies in conjunction with potential design deficiencies and safety problems that may be present. This documentation highlights areas that would then be the focus of developing improvement alternatives.

The development of future-year traffic projections is accomplished through the application of the appropriate traffic simulation model. These results will be compared to forecasts based on historic growth trends and the future year projections will be derived from a combination of these two methods. Following approval of the future year projections, future year peak hour volumes are then derived from the appropriate design year K, D, and T factors. A level of service analysis is then conducted to determine the basic number of lanes, intersection configurations, and/or the need for interchange modifications (or new interchanges), if applicable.

Conceptual Design Analysis: Following the identification of the purpose and need for an improvement, the next step in the process is to develop conceptual design alternatives. This step is

accomplished by first identifying the potential typical sections which could accommodate the requirements outlined in the Traffic Technical Memorandum. Examples include urban, suburban and rural sections with open or closed drainage systems, varying median widths, travel lane widths, border widths, and bicycle and pedestrian accommodations. These typical sections will be developed and documented in a Typical Section Report. We will establish the typical section, which will continue into design. Then alternatives based on the approved typical will be assessed in terms of potential impacts and benefits to the project area, as well as ability to satisfy project need. The alternatives will be developed based on the key design factors, such as:

- Traffic operations and level of service
- Consistency with local comprehensive plans
- Horizontal and vertical geometry
- Drainage requirements
- Safety
- Access Management
- Right-of-Way requirements
- Potential relocations and business damages
- Environmental impacts
- Utilities
- Maintenance of Traffic
- Constructability
- Improvement costs
- Cost effectiveness

As these factors are analyzed, and the impacts of each alternative are quantified, a comparative evaluation of the various alternatives will be conducted. This evaluation usually takes on the form of a matrix in which each of the determining factors is displayed for a side-by-side comparison. Based on this evaluation, the alternatives can be modified (i.e., for example, shifting the alignment through sensitive or populated areas) and the comparative procedure repeated. This iterative process will continue until the optimal alternative is developed for a project.

Structural Engineering

DRMP has designed over 150 bridges and box culverts. The projects have included bridge repairs/rehabilitation for bridges with heavy deterioration to their concrete and steel elements, bridge load ratings, bridge condition assessment, and bridge and culvert replacements. Our bridge experience includes everything from box culverts and short span bridges to major bridges consisting of multiple span continuous steel bridges. We use sophisticated structural analysis software that enables us to evaluate repair versus replacement issues. Often, an existing structure can be rehabilitated in lieu of replacement, while extending the useful life of the structure for many years. Our team offers experience in the following areas:

- New Bridge Design
- Stormwater Structures
- Retaining Wall Design
- Bulkhead Design
- Parking Decks and Sea Walls
- Sign Structures
- Docks/Piers
- Foundation Design
- Utility Structures
- Storage Tank Design
- Pedestrian Bridges
- Specialty Structures
- Tunnels/ Major Culverts
- Design/Build
- Bridge Condition Evaluation
- Bridge Load Rating
- Bridge Repair/Rehabilitation
- Bridge Construction Engineering Inspection

Utility Design

DRMP offers Utility Design services, focusing on both preliminary design and utility coordination.

Preliminary Design: Initially, our Project Manager will meet with the City's staff to obtain all existing As-Builts or Record drawings and preliminary information they have gathered. We will discuss any potential design specific issues that the City may be aware of for the proposed utility system improvements. DRMP shall inspect the project site or corridor, taking photo documentation and field notes to review and to become familiar with the utility project specifics. Design tickets would then be acquired such that DRMP would be prepared to make contact with the Utility Agency Owner's (UAO's) within the project limits as shown on the Sunshine State One Call ticket. Simultaneously, Right-of-Way surveying and location of existing utilities and appurtenances, signage or structures, etc. within the project area will be underway as needed. At this time, SUE investigations may also take place. The required geotechnical exploration will be performed once a plan is developed and coordinated with the City for locations and offsets of proposed borings along the alignment. A video record of the existing conditions can also be prepared at this time or prior to construction by the selected contractor.

Utility Coordination: Utility system improvements require utility coordination to avoid potential conflicts encountered during the construction phase of the projects.

DRMP has the capability to perform subsurface utility excavations (SUE) for utility projects, as needed. Our team will research existing City As-Builts and Record drawings for the project limits, verify and compile a list of other utility vendors as stated above per the design ticket information from Sunshine (power, gas, telephone, etc.), order surface markings for each utility and communicate with City staff and the appropriate utility providers as needed to facilitate design efforts.

Once the utilities have been located vertically and horizontally by our field SUE team, using either Ground Penetrating Radar (GPR) and/or vacuum excavation equipment, the data will be translated into a format suitable to aid in the design of the project and to minimize any potential conflicts with existing utilities, storm piping infrastructure or other adjacent facilities. All above ground utilities shall also be located and incorporated into the database for any utility profiles within the project corridor. The SUE's shall be picked up and incorporated into the survey file used for preliminary design development (30% plans and design brief).

Environmental Support Services

As the permitting process begins, it is important for us, DRMP, to clearly communicate with the City, so that there is a mutual understanding of each project's details, and so the permitting process can be steered to accomplish your goals. DRMP will hold a kickoff meeting for each project that allows for communication between the City and the various consultant disciplines that will be cooperating to achieve the project goals. Once a clear understanding of the project has been established, each discipline can develop a unique methodology to be implemented.

From an environmental perspective, initial data gathering and field assessments are conducted at the

next stage. DRMP will conduct a review of appropriate data available in the literature, such as National Wetlands Inventory (NWI), City soil maps, site-specific aerial photography, Florida Natural Areas Inventory (FNAI) reports on listed wildlife occurrence, and other relevant sources. Field reviews will focus on wetland locations and presence of state and federal listed wildlife species. Wetland jurisdictional limits are delineated using the criteria stated in the United States Corps of Engineers Wetlands Delineation Manual (1987) and in accordance with Chapter 62-340.300, Florida Administrative Code.

DRMP has accomplished past permitting success, due in part, to early coordination with the regulatory agencies. Early communication through letters, phone conversations, and pre-application meetings informs the agencies of the proposed project, and introduces them to potential environmental issues. This early coordination allows for the regulatory agencies to express their concerns, provide relevant information which could be useful on the current project, and to negotiate solutions to potential permitting challenges. It also allows for project engineers to modify design plans to avoid environmental impacts during early design phases. This prevents costly redesign towards the end of a project, and eliminates associated scheduling delays.

When necessary, mitigation to offset potential environmental impacts is an integral part of the permitting process. DRMP will assess all possible mitigation options; preservation, creation, enhancement/restoration, mitigation banking, incidental take fees, etc., and determine which option is in the best interest of the City. The recommended mitigation option will be the most cost effective, the most schedule-friendly, the most environmentally appropriate, and the one that is approved by the regulatory agencies.

DRMP is particularly proud of its permitting team, having permitted hundreds of projects over the past few years. Wetland resource permitting is a major component of DRMP's professional services. Permits are obtained as required from the Florida Department of Environmental Protection (FDEP), U.S. Army Corps of Engineers (ACOE), NWFWMD, and county agencies. In support to the City for permitting applications, DRMP can determine agencies with jurisdictional over specific wetlands, assist in project planning including design assistance for avoidance and minimization of impacts, conduct jurisdictional delineations and obtain agency approval for those delineations and negotiate with the agencies for appropriate wetland mitigation through restoration, creation, or banking. DRMP also provides survey and permitting services for protected species issues. DRMP maintains state of the art GIS technology that is fully integrated to support a variety of environmental applications. DRMP can provide spatial analysis services ranging from simple mapping to the highly sophisticated 3-dimensional analyses. DRMP maintains and runs the most recent versions of ArcGIS, Arc/INFO, ArcView and AutoCAD that can be utilized for wetland delineation, basin studies, soils maps and numerous other applications.

Ecological scientists and biologists work closely with the firm's interdisciplinary teams on a broad range of land planning and development projects. This teamwork ensures the creation of projects that are sensitive to the character and natural attributes of each project site. Our ecological capabilities include the following:

- Environmental and Biological Assessments
- Environmental Impact Statements
- Wetland Delineation
- Wetland Systems Monitoring
- Wetland Restoration and Mitigation Plans

DRMP is a full-service environmental and engineering consulting firm that provides a broad spectrum of services. Our multi-disciplinary staff of professionals has a proven track record of service to the public and private sector, as well as combined experience and expertise in all facets of ecological, water, wildlife and resource management. Our primary resource is our highly qualified staff that can provide a product in a timely and cost-effective manner.

Environmental and Ecological studies include pre-purchase assessments, wildlife surveys, endangered and threatened species analysis, roadway corridor studies, public involvement, and government planning/site impact studies. Studies also include Development of Regional Impacts studies, Wetland Evaluation Reports, Endangered Species Biological Assessments, Pond Siting Reports and Water Quality Studies. Other capabilities include: assessment of water

withdrawal and impoundment impacts, habitat evaluation, environmental permitting, ecological modeling, aerial photographic interpretation, mitigation design and construction, and GIS, Microstation and CAD services.

Construction Engineering and Inspection Services

DRMP offers construction services during the initial planning stages of a project through the construction inspection and dedication of infrastructure. Collaborating with project planners and designers, construction specialists assist in building solutions that will anticipate construction hurdles, thereby avoiding potential budget and schedule delays to the project. DRMP's Construction Services Division will assist our Design staff by providing constructability reviews, estimating, bid review and coordination during construction. In addition, DRMP CEI staff can provide hands-on site inspection, if desired. Our staff will be made available and dedicated to providing inspection services as needed to verify construction operations are completed in reasonable conformity to the plans and specifications.

The DRMP Team has experienced construction engineering inspection personnel to assist during construction. These services can range from nominal services such as one visit per week to full construction observation on a daily basis. The construction services typically consist of the following:

- Attendance at preconstruction conference
- Review shop drawings, payment requests and claims and provide a tracking system
- Process and track requests for additional information (RFI's) and obtain timely resolutions
- Resolve field conflicts
- Anticipate the work of contractors, require submittals of contractor look-aheads, and provide opportunities for resolving issues without construction delays
- Attend meetings
- Monitor maintenance of traffic utilized by the contractor
- Prepare change orders and record drawings.
- Conduct inspections at substantial and final completion
- Certify completion to regulatory agencies.
- Provide start-up assistance
- Visiting the site(s) periodically
- Reviewing payment requests
- Reviewing claims

Surveying Topographic Survey/Design Surveys

Topographic surveys are the mainstay of most continuing service contracts. No engineering work can be prepared without the benefits of a quality topographic/design survey. Tasks of this type of survey involve the establishment of local horizontal and vertical controls referenced to even higher quality survey controls. The horizontal locations of features will be established through either conventional traverse or one of several GPS methods, depending on site accessibility, satellite visibility, accuracy, and cost-effectiveness. In fact, the use of GPS for deriving elevations is a sound practice and has many useful and effective applications. Regardless of our data collection system, all data is recorded electronically and in traditional field books for project documentation. All surveys are performed with automation in mind, reducing the amount of processing by office staff. Our field methodology results in an approximate 70% completed office product. Drafting issues are minimal which saves our clients dollars. Delivery of a survey product is most important and we take great pride in the quality of our work.

Terrestrial Static LiDAR (Laser Scanning) Services

DRMP's, Surveying and Mapping Division utilizes a **RIEGL VZ-400 and VZ400i Terrestrial Static LiDAR scanners** with **TopoLift** for our LiDAR scanning applications to rapidly collect 3D survey data for sites or objects, **to provide a prompt and efficient delivery of any type of project.** Scanning can be used to collect data that is otherwise inaccessible due to safety concerns, such as pavement information in travel lanes or objects in hazardous areas. Data can also be collected for areas that do not lend themselves to data collection by conventional means, such as undersides of bridges, or highly congested intersections where above ground features would be difficult to collect. We use the scanner manufacturer proprietary software to register scans and export to a project point cloud, then we utilize TopoDOT software, running in Microstation, to extract linework and point elevations, model surfaces, and measure vertical clearances to objects such as bridge girders and overhead power lines. The resulting deliverable files range from standard Microstation or AutoCAD drawings, to the full registered point clouds for the client's use.

Our staff's knowledge and experience in 3D laser scanning results in a large amount of data, collected in a short span of time, which allows for lower estimated project costs and accelerated project schedules. The benefit of 3D laser scanning provides an opportunity to save time and money on your next project.

Unmanned Aircraft Systems (UAS)

DRMP's Surveying and Mapping Division utilizes a **Trimble UX5 HP Unmanned Aircraft System (UAS)** to efficiently and safely collect high accuracy aerial data. This system allows DRMP to collect data in hard to access or inaccessible areas or sensitive areas where conventional surveying methods may be destructive to the soil or vegetation. This data can then be used to produce 3D topographic surveys, monitor erosion, calculate stock pile volumes just to name a few. We use Trimble Aerial Imaging to plan our mapping flights and Trimble Business Center to process the data. This system not only helps DRMP increase productivity and accelerate schedules it also reduces project costs.

Unique Concepts and Cost Saving Suggestions

DRMP's equipment and technology allows our staff the ability to collect more data during the course of the day and we have found them to be very productive tools to quickly and accurately complete projects saving the City time and money. Our office support is substantial giving us the ability to respond to all projects large or small quickly and effectively no matter where they are located. We pride ourselves on being the best. We accomplish this by providing unsurpassed services to our clients. All of DRMP's crews are cross trained in Survey using GPS/RTK and Subsurface Utility Engineering enabling us to simultaneously complete projects by surveying the SUE work in the field as soon as it completed or during the project.

Underground Utility- DRMP will contact and coordinate with all utility companies' prior to commencing any work on a project to coordinate with utility representatives to schedule a meeting at the project site at an appropriate place and time and to acquire as-built drawings if available. During the field meeting with the utility companies, survey personnel will keep detailed notes on the types of utilities, size, ownership, the locator's name, and title.

Permits and Coordination- Prior to any work commencing, our staff will coordinate with all municipalities, counties and state agencies to secure required permits allowing our crews to work within each respective jurisdiction's right of ways, roadways and properties.

Designating- DRMP will closely coordinate with all utility owners and agencies to acquire as-built drawings, plans, atlases, prints, and any record drawings available depicting the buried utilities within a project area. Our trained and experienced designating crews equipped with state-of-the-art locating equipment will designate, certify, record, and mark the approximate horizontal location of all impacted buried facilities. The training and experience of our crews and quality of our equipment will allow for these markings to be within two feet of either side of the underground line.

Locating- After the buried utilities have been designated, our vac-crews will accurately locate each line vertically, at the City's request, by performing a test hole using air-vacuum excavation equipment. The center of each line and pipe, and the edges of ducts will be monumented using PK nails, hubs, laths, and appropriately color-coded permanent markers for future surveying of each test hole. Also, the size, elevation, material, and general make up of each facility will be recorded on the lath/hub and field form. We will ensure that the test hole area is not disturbed to more than the specified 225 square inches, and that the hole is back-filled with clean fill. The work area will be repaired, refaced, and left in a condition equal to or better than before excavation.

GPR/VVH Investigations – DRMP's well trained and experienced group of technicians with our state-of-the-art radar equipment ensures DRMP's prompt and efficient response to any project(s) within the City. DRMP is professionally trained and equipped to handle the entire gamut of GPR projects.

The typical approach for this type of work is outlined below:

DRMP, based on FHWA standards, provides services relative to quality levels in order to quantify the level of accuracy or effort involved with the service:

- **Quality Level D - RESEARCH**: Before any project begins, our staff acquires and reviews existing as-built information and utility records that may impact the project limits. This information is very useful for planning, but is frequently inaccurate and would not be relied upon.
- **Quality Level C - FIELD INVESTIGATION**: Once the initial research is complete, our survey staff will finalize this effort by verifying the as- built and utility records obtained previously with existing field conditions. This also provides us the opportunity to discover any utilities that may have been overlooked in the research phase. At this point the utilities are still not horizontally or vertically verified.
- **Quality Level B - UTILITY DESIGNATION AND MAPPING:** With the research and field investigation being complete at this stage, our surveyors begin the subsurface utility designation and two dimensional mapping of the utilities. This provides the engineering design team or contractors the opportunity to identify areas that may be in conflict with the subsurface utilities. At this point the subsurface utilities are still not verified.

- **Quality Level A - UTILITY LOCATION:** Once the two dimensional mapping and conflict areas of the subsurface utilities are identified, the utilities can be verified vertically and horizontally (VVH) by the use of non-destructive vacuum excavation equipment. this technique allows our survey crews to properly identify and precisely locate (VVH) the utilities.

Our survey and mapping division currently operates two subsurface utility crews outfitted with the vacuum excavator, GPR, cutting saws, jackhammers, compactors, designation and surveying equipment, and various tools to provide full service utility location and mapping.

Safety

Safety is the most important aspect of any project especially when working along any roadway. We ensure that our personnel have all the training and equipment necessary to conduct their survey operations. The following is a list of safety measures we have established:

- FDOT Survey Safety Handbook
- FDOT Survey Safety Video
- Trained Personnel (MOT Certified)
- CSX Railway Safety Training
- High Visibility Safety Vest's
- Reflectorless Total Stations (All Survey Crews)
- Maintenance of Traffic Plan (MOT Plan)
- Acme Barricades (Additional MOT Equipment)
- Law Enforcement (If Needed)
- Frequent Field Checks by the project manager to ensure

Boundary Surveys/Right of Way Surveys

Most boundary surveys begin with research including the compilation of deed descriptions, section information, adjacent plats, existing local surveys, tax roll data, certified corner records, Aerial Photos and property appraiser information. Some projects/sites require more extensive research if litigation is involved, or if the property abuts a DOT right-of-way or railroad corridor. The survey crew will traverse the boundary, performing redundant measurements to all found monumentation. If a conventional field traverse method is used, all control measurements will result in a closed geometric figure. During the course of the survey, crews will locate any evidence of boundary lines or easements such as fences, utilities, hedges, walls, dirt roads traversing the property, pedestrian trails, or indications of prescribed uses.

Once the boundary has been traversed, technicians will reduce errors through a least squares adjustment, calculate the position and set any missing boundary corners with suitable subsurface marker and identifiable cap. Under the direction of the Registered Surveyor, project technicians will draft a map of the survey, clearly labeling all pertinent information relating to the property's use and boundary and noting any additional required pertinent information. If needed, a surveyor's report will be furnished to communicate any substantive information which could not be otherwise mapped. The final boundary survey map will be provided to the client in the specific number of executed hardcopies and in digital format.

Funding Assistance

The DRMP Team is experienced in providing innovative ideas and approaches to minimize costs. Many of our clients are small communities that must seek funding assistance through loan and grant programs from federal and state agencies. DRMP is always on the look out to identify potential grant opportunities for our clients and will continue to do so for the City.

Public Involvement

One element that DRMP recognizes is critical in terms of project acceptance is public involvement. A responsive and effective citizen participation program is essential in project development. Although the public as a whole understands that complex problems are often impossible to solve without adverse or unequal effects imposed on certain interests, it is vital that the public perceives the decision-making process of a project to be fair and open. Most people will not accept decisions that

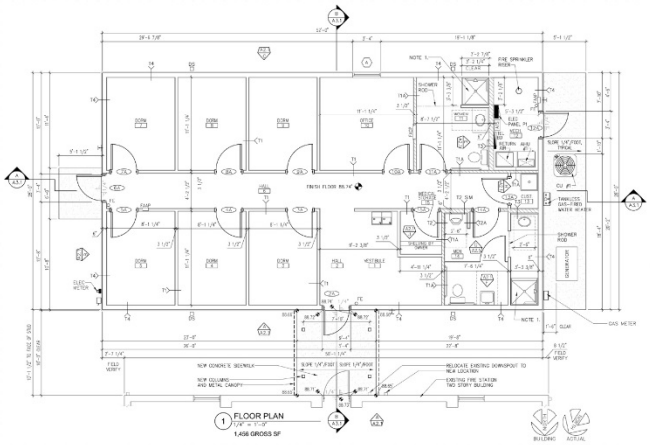
are enacted or imposed on them without their input during the planning process and will do whatever possible to stop such a project. Generally, the public is able to discern which needs and wants are legitimate and reasonable; however, some public opposition is inevitable.

A basic philosophy of transparency will be applied in the development of our citizen participation program. We consider the task of locating, identifying and communicating with the various government officials and staffs, civic organizations and special interest groups, and the general public to be of primary importance in the overall success of the assignment. Information regarding community attitudes and opinions will be gathered during the public participation program.

We will conduct this task in an objective yet personal manner, involving direct communication with community residents. A successful public involvement program will produce proactive participation of concerned citizens throughout the project's design and construction

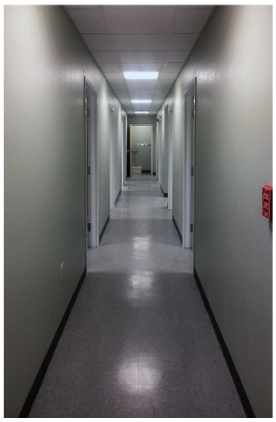
Subconsultant Project Experience

The following projects were completed by our subconsultant Robert E. Taylor, A.I.A., Architect, P.A. and demonstrates further experience with City Complexes.



Design Aspects:

- Concise floor plan designed to accommodate sleeping quarters and essential facilities to augment existing fire stations.
- Standardized footprint to enable re-use on multiple sites.
- The structure is designed and constructed to resist high wind loads as required for essential services facilities.



Civic Administration

Satsuma Fire Department dormitory
Satsuma, Florida

Contractor: J.A. Standridge Construction, Inc.
Started: December 2016
Completed: Estimated completion May 2017
Construction cost: $302,250.00

ROBERT E. TAYLOR
A.I.A. ARCHITECT P.A.
710 ST JOHNS AVENUE,
PALATKA, FLORIDA

SWORN STATEMENT UNDER SECTION 287.133(3) (1)
FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for New Smyrna Beach.

This sworn statement is submitted by DRMP, Inc.

[Name of entity submitting sworn statement]

whose business address is: 955 Croton Road, Melbourne, FL, 32935 and (if applicable) its Federal Employer Identification Number (FEIN) is 59-1791174. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: n/a. My name is Chris D. Towne, PE and my relationship to the entity named above is Vice President.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means
a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

_x_ Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

Date: 5/9/17

Signature

STATE OF: Florida

COUNTY OF: Orange

PERSONALLY APPEARED BEFORE ME, the undersigned authority, Chris D. Towne, PE
[name of individual signing] who after first sworn by me affixed his/her signature in the space provided above on this 9 day of May, 20 17.

Type of I.D.

CONFLICT OF INTEREST AFFIDAVIT

1. Before me, the undersigned authority, personally appeared Chris D. Towne, PE
2. Vice President who was duly sworn, deposes, and states:
3. I am the Vice President of DRMP, Inc. with a local office in Melbourne and principal office in Orlando.
4. The above named entity is submitting an Expression of Interest for the City of New Smyrna Beach **RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES.**
5. The Affiant has made diligent inquiry and provides the information contained in this Affidavit based upon his/her own knowledge.
6. The Affiant states that only one submittal for the above project is being submitted and that the above named entity has no financial interest in other entities submitting proposals for the same project.
7. Neither the Affiant nor the above named entity has directly or indirectly entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive pricing in connection with the entity's submittal for the above project. This statement restricts the discussion of pricing data until the completion of negotiations and execution of the Agreement for this project.
8. Neither the entity nor its affiliates, nor anyone associated with them, is presently suspended or otherwise ineligible from participating in contract lettings by any local, state, or federal agency.
9. Neither the entity, nor its affiliates, nor anyone associated with them have any potential conflict of interest due to any other clients, contracts, or property interests for this project.
10. I certify that no member of the entity's ownership, management, or staff has a vested interest in any aspect of or Department of City of New Smyrna Beach.
11. I certify that no member of the entity's ownership or management is presently applying for an employee position or actively seeking an elected position with City of New Smyrna Beach.
12. In the event that a conflict of interest is identified in the provision of services, I, on behalf of the above named entity, will immediately notify City of New Smyrna Beach in writing.

DATED this 9 day May 20 17.

n/a

Have you, at any time, failed to complete a project? ☐ Yes ☒ No

STATEMENT OF LITIGATION:

Are there any judgments, claims or suits pending or outstanding by or against you?
☒ Yes ☐ No

If the answer to either question is yes, submit details on separate sheet. List all lawsuits that have been filed by or against your firm in the last five (5) years:

Please see the following page for a listing of our firm's litigation from the past five (5) years.

Litigation

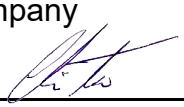
DRMP, Inc. has never been the subject of an investigation conducted by a regulatory or professional licensing board.

DRMP has been subject to legitimate, frivolous, and harassment lawsuits as a result of our actions or inactions in the 39-year course of the practice of our business. However, no litigation has occurred involving contractual issues. The following provides a detailed explanation of suits that occurred within the last five years.

SR 78/SR 29, Glades County, FL, Florida Department of Transportation: DRMP was named as a co-defendant in a lawsuit brought against a general contractor and an engineering company. The suit involved wrongful death caused by a drunken driver in a construction zone. The suit alleged that temporary rumble strips should have been placed on the roadway during construction. DRMP disputed this claim. The lawsuit was settled out of court in January 2012.

Del Prado Boulevard, City of Cape Coral, Florida: DRMP has been named as a co-defendant in a lawsuit brought against a general contractor and subcontractors in a case involving a traffic accident in a construction work zone. DRMP prepared a Traffic Control Plan for the phased roadway widening project. The lawsuit alleges negligence on the part of all defendants. DRMP is disputed this claim. The lawsuit was settled out of court June 2014.

Western Beltway, Part C, Section 24, Florida's Turnpike Enterprise (FTE): FTE notified DRMP as to a conflict in the required clearance elevation of the Indian Creek Boulevard Bridge on SR 429. The conflict was corrected by lowering the roadway beneath the bridge. The FDOT has filed a claim against DRMP to cover the cost of lowering the roadway. The lawsuit was settled out of court in July 2015.



Florida's Turnpike Project (Jetvig Case): In 2016, DRMP was named as co-defendant in a wrongful death lawsuit. DRMP was hired by Florida's Turnpike Enterprise to design resurfacing plans for a stretch of Florida's Turnpike. The death was a result of a drunk driver that rear-ended another passenger vehicle, propelling that vehicle into an ITS Pole. DRMP was not responsible for the placement of the ITS Pole. It was a pre-existing condition when we were hired for this project; and was not located within the clear zone. DRMP is working to get dismissed from this case.

We are aware of no other current or pending litigation to which DRMP is a party.

TYPE OF FIRM:

☒ Corporation/Years in Business: 39. If firm is a corporation, please list state in which it is incorporated: Florida. If firm is a corporation, by signing this form, Proposer certifies that the firm is authorized to do business in the State of Florida.

CONTRACT RENEWAL
FOR PROFESSIONAL ENGINEERING SERVICES
MEAD AND HUNT, INC.

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES, via RFQ 12-17-ENG; and

WHEREAS, the City accepted the qualifications of MEAD AND HUNT, INC. (Firm); and

WHEREAS, the parties desire to enter into the fourth of five (5) possible one (1) year renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND MEAD AND HUNT, INC., AGREE AS FOLLOWS:

1. The City and MEAD & HUNT, INC., agree to all the terms and conditions as stated and contained in RFQ 12-17-ENG, including any/all Attachments, Addenda, and the firm's submitted Request for Qualifications, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the fourth of the five (5) possible one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from _____, 2025 and will continue for a year from that date.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

This endorsement modifies insurance provided under the:

Business Auto Coverage Form
Motor Carrier Coverage Form

A. Amended Who Is An Insured

1. The following is added to the **Who Is An Insured** Provision in **Section II – Covered Autos Liability Coverage**:

The following are also "insureds":

a. Any "employee" of yours is an "insured" while using a covered "auto" you don't own, hire or borrow for acts performed within the scope of employment by you. Any "employee" of yours is also an "insured" while operating an "auto" hired or rented under a contract or agreement in an "employee's" name, with your permission, while performing duties related to the conduct of your business.

b. Anyone volunteering services to you is an "insured" while using a covered "auto" you don't own, hire or borrow to transport your clients or other persons in activities necessary to your business.

c. Anyone else who furnishes an "auto" referenced in Paragraphs **A.1.a.** and **A.1.b.** in this endorsement.

d. Where and to the extent permitted by law, any person(s) or organization(s) where required by written contract or written agreement with you executed prior to any "accident", including those person(s) or organization(s) directing your work pursuant to such written contract or written agreement with you, provided the "accident" arises out of operations governed by such contract or agreement and only up to the limits required in the written contract or written agreement, or the Limits of Insurance shown in the Declarations, whichever is less.

2. The following is added to the **Other Insurance** Condition in the Business Auto Coverage Form and the **Other Insurance – Primary and Excess Insurance Provisions Condition** in the Motor Carrier Coverage Form**:**

Coverage for any person(s) or organization(s), where required by written contract or written agreement with you executed prior to any "accident", will apply on a primary and non-contributory basis and any insurance maintained by the additional "insured" will apply on an excess basis. However, in no event will this coverage extend beyond the terms and conditions of the Coverage Form.

B. Amendment – Supplementary Payments

Paragraphs **a.(2)** and **a.(4)** of the **Coverage Extensions** Provision in **Section II – Covered Autos Liability Coverage** are replaced by the following:

(2) Up to $5,000 for the cost of bail bonds (including bonds for related traffic law violations) required because of an "accident" we cover. We do not have to furnish these bonds.

(4) All reasonable expenses incurred by the "insured" at our request, including actual loss of earnings up to $500 a day because of time off from work.

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

C. Fellow Employee Coverage

The **Fellow Employee** Exclusion contained in **Section II – Covered Autos Liability Coverage** does not apply.

D. Driver Safety Program Liability and Physical Damage Coverage

1. The following is added to the **Racing** Exclusion in **Section II – Covered Autos Liability Coverage**:

This exclusion does not apply to covered "autos" participating in a driver safety program event, such as, but not limited to, auto or truck rodeos and other auto or truck agility demonstrations.

2. The following is added to Paragraph **2.** in the **Exclusions** of **Section III – Physical Damage Coverage** of the Business Auto Coverage Form and Paragraph **2.b.** in the **Exclusions** of **Section IV – Physical Damage Coverage** of the Motor Carrier Coverage Form:

This exclusion does not apply to covered "autos" participating in a driver safety program event, such as, but not limited to, auto or truck rodeos and other auto or truck agility demonstrations.

E. Lease or Loan Gap Coverage

The following is added to the **Coverage** Provision of the **Physical Damage Coverage** Section:

Lease Or Loan Gap Coverage

In the event of a total "loss" to a covered "auto", we will pay any unpaid amount due on the lease or loan for a covered "auto", less:

a. Any amount paid under the **Physical Damage Coverage** Section of the Coverage Form; and

b. Any:

(1) Overdue lease or loan payments at the time of the "loss";

(2) Financial penalties imposed under a lease for excessive use, abnormal wear and tear or high mileage;

(3) Security deposits not returned by the lessor;

(4) Costs for extended warranties, credit life insurance, health, accident or disability insurance purchased with the loan or lease; and

(5) Carry-over balances from previous leases or loans.

F. Towing and Labor

Paragraph **A.2.** of the **Physical Damage Coverage** Section is replaced by the following:

We will pay up to $75 for towing and labor costs incurred each time a covered "auto" of the private passenger type is disabled. However, the labor must be performed at the place of disablement.

G. Extended Glass Coverage

The following is added to Paragraph **A.3.a.** of the **Physical Damage Coverage** Section:

If glass must be replaced, the deductible shown in the Declarations will apply. However, if glass can be repaired and is actually repaired rather than replaced, the deductible will be waived. You have the option of having the glass repaired rather than replaced.

H. Hired Auto Physical Damage – Increased Loss of Use Expenses

The **Coverage Extension** for **Loss Of Use Expenses** in the **Physical Damage Coverage** Section is replaced by the following:

Loss Of Use Expenses

For Hired Auto Physical Damage, we will pay expenses for which an "insured" becomes legally responsible to pay for loss of use of a vehicle rented or hired without a driver under a written rental contract or written rental agreement. We will pay for loss of use expenses if caused by:

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

(1) Other than collision only if the Declarations indicate that Comprehensive Coverage is provided for any covered "auto";

(2) Specified Causes Of Loss only if the Declarations indicate that Specified Causes Of Loss Coverage is provided for any covered "auto"; or

(3) Collision only if the Declarations indicate that Collision Coverage is provided for any covered "auto".

However, the most we will pay for any expenses for loss of use is $100 per day, to a maximum of $3000.

I. Personal Effects Coverage

The following is added to the **Coverage** Provision of the **Physical Damage Coverage** Section:

Personal Effects Coverage

a. We will pay up to $750 for "loss" to personal effects which are:

(1) Personal property owned by an "insured"; and

(2) In or on a covered "auto".

b. Subject to Paragraph **a.** above, the amount to be paid for "loss" to personal effects will be based on the lesser of:

(1) The reasonable cost to replace; or

(2) The actual cash value.

c. The coverage provided in Paragraphs **a.** and **b.** above, only applies in the event of a total theft of a covered "auto". No deductible applies to this coverage. However, we will not pay for "loss" to personal effects of any of the following:

(1) Accounts, bills, currency, deeds, evidence of debt, money, notes, securities, or commercial paper or other documents of value.

(2) Bullion, gold, silver, platinum, or other precious alloys or metals; furs or fur garments; jewelry, watches, precious or semi-precious stones.

(3) Paintings, statuary and other works of art.

(4) Contraband or property in the course of illegal transportation or trade.

(5) Tapes, records, discs or other similar devices used with audio, visual or data electronic equipment.

Any coverage provided by this Provision is excess over any other insurance coverage available for the same "loss".

J. Tapes, Records and Discs Coverage

1. The Exclusion in Paragraph **B.4.a.** of **Section III – Physical Damage Coverage** in the Business Auto Coverage Form and the Exclusion in Paragraph **B.2.c.** of **Section IV – Physical Damage Coverage** in the Motor Carrier Coverage Form does not apply.

2. The following is added to Paragraph **1.a. Comprehensive Coverage** under the **Coverage** Provision of the **Physical Damage Coverage** Section:

We will pay for "loss" to tapes, records, discs or other similar devices used with audio, visual or data electronic equipment. We will pay only if the tapes, records, discs or other similar audio, visual or data electronic devices:

(a) Are the property of an "insured"; and

(b) Are in a covered "auto" at the time of "loss".

The most we will pay for such "loss" to tapes, records, discs or other similar devices is $500. The **Physical Damage Coverage Deductible** Provision does not apply to such "loss".

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

K. Airbag Coverage

The Exclusion in Paragraph **B.3.a.** of **Section III – Physical Damage Coverage** in the Business Auto Coverage Form and the Exclusion in Paragraph **B.4.a.** of **Section IV – Physical Damage Coverage** in the Motor Carrier Coverage Form does not apply to the accidental discharge of an airbag.

L. Two or More Deductibles

The following is added to the **Deductible** Provision of the **Physical Damage Coverage** Section:

If an accident is covered both by this policy or Coverage Form and by another policy or Coverage Form issued to you by us, the following applies for each covered "auto" on a per vehicle basis:

1. If the deductible on this policy or Coverage Form is the smaller (or smallest) deductible, it will be waived; or

2. If the deductible on this policy or Coverage Form is not the smaller (or smallest) deductible, it will be reduced by the amount of the smaller (or smallest) deductible.

M. Physical Damage – Comprehensive Coverage – Deductible

The following is added to the **Deductible** Provision of the **Physical Damage Coverage** Section:

Regardless of the number of covered "autos" damaged or stolen, the maximum deductible that will be applied to Comprehensive Coverage for all "loss" from any one cause is $5,000 or the deductible shown in the Declarations, whichever is greater.

N. Temporary Substitute Autos – Physical Damage

1. The following is added to **Section I – Covered Autos**:

Temporary Substitute Autos – Physical Damage

If Physical Damage Coverage is provided by this Coverage Form on your owned covered "autos", the following types of vehicles are also covered "autos" for Physical Damage Coverage:

Any "auto" you do not own when used with the permission of its owner as a temporary substitute for a covered "auto" you do own but is out of service because of its:

1. Breakdown;

2. Repair;

3. Servicing;

4. "Loss"; or

5. Destruction.

2. The following is added to the Paragraph **A. Coverage** Provision of the **Physical Damage Coverage** Section:

Temporary Substitute Autos – Physical Damage

We will pay the owner for "loss" to the temporary substitute "auto" unless the "loss" results from fraudulent acts or omissions on your part. If we make any payment to the owner, we will obtain the owner's rights against any other party.

The deductible for the temporary substitute "auto" will be the same as the deductible for the covered "auto" it replaces.

O. Amended Duties In The Event Of Accident, Claim, Suit Or Loss

Paragraph **a.** of the **Duties In The Event Of Accident, Claim, Suit Or Loss** Condition is replaced by the following:

a. In the event of "accident", claim, "suit" or "loss", you must give us or our authorized representative prompt notice of the "accident", claim, "suit" or "loss". However, these duties only apply when the "accident", claim, "suit" or "loss" is known to you (if you are an individual), a partner (if you are a partnership), a member (if you are a limited liability company) or an executive officer or insurance manager (if you are a corporation). The failure of any

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

agent, servant or employee of the "insured" to notify us of any "accident", claim, "suit" or "loss" shall not invalidate the insurance afforded by this policy.

Include, as soon as practicable:

(1) How, when and where the "accident" or "loss" occurred and if a claim is made or "suit" is brought, written notice of the claim or "suit" including, but not limited to, the date and details of such claim or "suit";

(2) The "insured's" name and address; and

(3) To the extent possible, the names and addresses of any injured persons and witnesses.

If you report an "accident", claim, "suit" or "loss" to another insurer when you should have reported to us, your failure to report to us will not be seen as a violation of these amended duties provided you give us notice as soon as practicable after the fact of the delay becomes known to you.

P. Waiver of Transfer Of Rights Of Recovery Against Others To Us

The following is added to the **Transfer Of Rights Of Recovery Against Others To Us** Condition:

This Condition does not apply to the extent required of you by a written contract, executed prior to any "accident" or "loss", provided that the "accident" or "loss" arises out of operations contemplated by such contract. This waiver only applies to the person or organization designated in the contract.

Q. Employee Hired Autos – Physical Damage

Paragraph **b.** of the **Other Insurance** Condition in the Business Auto Coverage Form and Paragraph **f.** of the **Other Insurance – Primary and Excess Insurance Provisions** Condition in the Motor Carrier Coverage Form are replaced by the following:

For Hired Auto Physical Damage Coverage, the following are deemed to be covered "autos" you own:

(1) Any covered "auto" you lease, hire, rent or borrow; and

(2) Any covered "auto" hired or rented under a written contract or written agreement entered into by an "employee" or elected or appointed official with your permission while being operated within the course and scope of that "employee's" employment by you or that elected or appointed official's duties as respect their obligations to you.

However, any "auto" that is leased, hired, rented or borrowed with a driver is not a covered "auto".

R. Unintentional Failure to Disclose Hazards

The following is added to the **Concealment, Misrepresentation Or Fraud** Condition:

However, we will not deny coverage under this Coverage Form if you unintentionally:

(1) Fail to disclose any hazards existing at the inception date of this Coverage Form; or

(2) Make an error, omission, improper description of "autos" or other misstatement of information.

You must notify us as soon as possible after the discovery of any hazards or any other information that was not provided to us prior to the acceptance of this policy.

S. Hired Auto – World Wide Coverage

Paragraph **7a.(5)** of the **Policy Period, Coverage Territory** Condition is replaced by the following:

(5) Anywhere in the world if a covered "auto" is leased, hired, rented or borrowed for a period of 60 days or less,

T. Bodily Injury Redefined

The definition of "bodily injury" in the **Definitions** Section is replaced by the following:

"Bodily injury" means bodily injury, sickness or disease, sustained by a person including death or mental anguish, resulting from any of these at any time. Mental anguish means any type of mental or emotional illness or disease.

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

U. Expected Or Intended Injury

The **Expected Or Intended Injury** Exclusion in Paragraph **B. Exclusions** under **Section II – Covered Auto Liability Coverage** is replaced by the following:

Expected Or Intended Injury

"Bodily injury" or "property damage" expected or intended from the standpoint of the "insured". This exclusion does not apply to "bodily injury" or "property damage" resulting from the use of reasonable force to protect persons or property.

V. Physical Damage – Additional Temporary Transportation Expense Coverage

Paragraph **A.4.a.** of **Section III – Physical Damage Coverage** is replaced by the following:

4. Coverage Extensions

a. Transportation Expenses

We will pay up to $50 per day to a maximum of $1,000 for temporary transportation expense incurred by you because of the total theft of a covered "auto" of the private passenger type. We will pay only for those covered "autos" for which you carry either Comprehensive or Specified Causes of Loss Coverage. We will pay for temporary transportation expenses incurred during the period beginning 48 hours after the theft and ending, regardless of the policy's expiration, when the covered "auto" is returned to use or we pay for its "loss".

W. Replacement of a Private Passenger Auto with a Hybrid or Alternative Fuel Source Auto

The following is added to Paragraph **A. Coverage** of the **Physical Damage Coverage** Section:

In the event of a total "loss" to a covered "auto" of the private passenger type that is replaced with a hybrid "auto" or "auto" powered by an alternative fuel source of the private passenger type, we will pay an additional 10% of the cost of the replacement "auto", excluding tax, title, license, other fees and any aftermarket vehicle upgrades, up to a maximum of $2500. The covered "auto" must be replaced by a hybrid "auto" or an "auto" powered by an alternative fuel source within 60 calendar days of the payment of the "loss" and evidenced by a bill of sale or new vehicle lease agreement.

To qualify as a hybrid "auto", the "auto" must be powered by a conventional gasoline engine and another source of propulsion power. The other source of propulsion power must be electric, hydrogen, propane, solar or natural gas, either compressed or liquefied. To qualify as an "auto" powered by an alternative fuel source, the "auto" must be powered by a source of propulsion power other than a conventional gasoline engine. An "auto" solely propelled by biofuel, gasoline or diesel fuel or any blend thereof is not an "auto" powered by an alternative fuel source.

X. Return of Stolen Automobile

The following is added to the **Coverage Extension** Provision of the **Physical Damage Coverage** Section:

If a covered “auto” is stolen and recovered, we will pay the cost of transport to return the “auto” to you. We will pay only for those covered “autos" for which you carry either Comprehensive or Specified Causes of Loss Coverage.

All other terms, conditions, provisions and exclusions of this policy remain the same.

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

Additional Insured – Automatic – Owners, Lessees Or Contractors

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.	
Policy No. GLO138723202	Effective Date: 07/01/2024

This endorsement modifies insurance provided under the:

Commercial General Liability Coverage Part

A. Section **II – Who Is An Insured** is amended to include as an additional insured any person or organization whom you are required to add as an additional insured under a written contract or written agreement executed by you, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" and subject to the following:

1. If such written contract or written agreement specifically requires that you provide that the person or organization be named as an additional insured under one or both of the following endorsements:

a. The Insurance Services Office (ISO) ISO CG 20 10 (10/01 edition); or

b. The ISO CG 20 37 (10/01 edition),

such person or organization is then an additional insured with respect to such endorsement(s), but only to the extent that "bodily injury", "property damage" or "personal and advertising injury" arises out of:

(1) Your ongoing operations, with respect to Paragraph **1.a.** above; or

(2) "Your work", with respect to Paragraph **1.b.** above,

which is the subject of the written contract or written agreement.

However, solely with respect to this Paragraph **1.**, insurance afforded to such additional insured:

(a) Only applies if the "bodily injury", "property damage" or "personal and advertising injury" offense occurs during the policy period and subsequent to your execution of the written contract or written agreement; and

(b) Does not apply to "bodily injury" or "property damage" caused by "your work" and included within the "products-completed operations hazard" unless the written contract or written agreement specifically requires that you provide such coverage to such additional insured.

2. If such written contract or written agreement specifically requires that you provide that the person or organization be named as an additional insured under one or both of the following endorsements:

a. The Insurance Services Office (ISO) ISO CG 20 10 (07/04 edition); or

b. The ISO CG 20 37 (07/04 edition),

such person or organization is then an additional insured with respect to such endorsement(s), but only to the extent that "bodily injury", "property damage" or "personal and advertising injury" is caused, in whole or in part, by:

(1) Your acts or omissions; or

(2) The acts or omissions of those acting on your behalf,

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

in the performance of:

(a) Your ongoing operations, with respect to Paragraph **2.a.** above; or

(b) "Your work" and included in the "products-completed operations hazard", with respect to Paragraph **2.b.** above,

which is the subject of the written contract or written agreement.

However, solely with respect to this Paragraph **2.**, insurance afforded to such additional insured:

(i) Only applies if the "bodily injury", "property damage" or "personal and advertising injury" offense occurs during the policy period and subsequent to your execution of the written contract or written agreement; and

(ii) Does not apply to "bodily injury" or "property damage" caused by "your work" and included within the "products-completed operations hazard" unless the written contract or written agreement specifically requires that you provide such coverage to such additional insured.

3. If neither Paragraph **1.** nor Paragraph **2.** above apply and such written contract or written agreement requires that you provide that the person or organization be named as an additional insured:

a. Under the ISO CG 20 10 (04/13 edition, any subsequent edition or if no edition date is specified); or

b. With respect to ongoing operations (if no form is specified),

such person or organization is then an additional insured only to the extent that "bodily injury", "property damage" or "personal and advertising injury" is caused, in whole or in part by:

(1) Your acts or omissions; or

(2) The acts or omissions of those acting on your behalf,

in the performance of your ongoing operations, which is the subject of the written contract or written agreement.

However, solely with respect to this Paragraph **3.**, insurance afforded to such additional insured:

(a) Only applies to the extent permitted by law;

(b) Will not be broader than that which you are required by the written contract or written agreement to provide for such additional insured; and

(c) Only applies if the "bodily injury", "property damage" or "personal and advertising injury" offense occurs during the policy period and subsequent to your execution of the written contract or written agreement.

4. If neither Paragraph **1.** nor Paragraph **2.** above apply and such written contract or written agreement requires that you provide that the person or organization be named as an additional insured:

a. Under the ISO CG 20 37 (04/13 edition, any subsequent edition or if no edition date is specified); or

b. With respect to the "products-completed operations hazard" (if no form is specified),

such person or organization is then an additional insured only to the extent that "bodily injury" or "property damage" is caused, in whole or in part by "your work" and included in the "products-completed operations hazard", which is the subject of the written contract or written agreement.

However, solely with respect to this Paragraph **4.**, insurance afforded to such additional insured:

(1) Only applies to the extent permitted by law;

(2) Will not be broader than that which you are required by the written contract or written agreement to provide for such additional insured;

(3) Only applies if the "bodily injury" or "property damage" occurs during the policy period and subsequent to your execution of the written contract or written agreement; and

(4) Does not apply to "bodily injury" or "property damage" caused by "your work" and included within the "products-completed operations hazard" unless the written contract or written agreement specifically requires that you provide such coverage to such additional insured.

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

B. Solely with respect to the insurance afforded to any additional insured referenced in Section **A.** of this endorsement, the following additional exclusion applies:

This insurance does not apply to "bodily injury", "property damage" or "personal and advertising injury" arising out of the rendering of, or failure to render, any professional architectural, engineering or surveying services including:

1. The preparing, approving or failing to prepare or approve maps, shop drawings, opinions, reports, surveys, field orders, change orders or drawings and specifications; or

2. Supervisory, inspection, architectural or engineering activities.

This exclusion applies even if the claims against any insured allege negligence or other wrongdoing in the supervision, hiring, employment, training or monitoring of others by that insured, if the "occurrence" which caused the "bodily injury" or "property damage", or the offense which caused the "personal and advertising injury", involved the rendering of or the failure to render any professional architectural, engineering or surveying services.

C. Solely with respect to the coverage provided by this endorsement, the following is added to Paragraph **2. Duties In The Event Of Occurrence, Offense, Claim Or Suit** of Section **IV – Commercial General Liability Conditions**:

The additional insured must see to it that:

(1) We are notified as soon as practicable of an "occurrence" or offense that may result in a claim;

(2) We receive written notice of a claim or "suit" as soon as practicable; and

(3) A request for defense and indemnity of the claim or "suit" will promptly be brought against any policy issued by another insurer under which the additional insured may be an insured in any capacity. This provision does not apply to insurance on which the additional insured is a Named Insured if the written contract or written agreement requires that this coverage be primary and non-contributory.

D. Solely with respect to the coverage provided by this endorsement:

1. The following is added to the **Other Insurance** Condition of Section **IV – Commercial General Liability Conditions**:

Primary and Noncontributory insurance

This insurance is primary to and will not seek contribution from any other insurance available to an additional insured provided that:

a. The additional insured is a Named Insured under such other insurance; and

b. You are required by written contract or written agreement that this insurance be primary and not seek contribution from any other insurance available to the additional insured.

2. The following paragraph is added to Paragraph **4.b.** of the **Other Insurance** Condition under Section **IV – Commercial General Liability Conditions**:

This insurance is excess over:

Any of the other insurance, whether primary, excess, contingent or on any other basis, available to an additional insured, in which the additional insured on our policy is also covered as an additional insured on another policy providing coverage for the same "occurrence", offense, claim or "suit". This provision does not apply to any policy in which the additional insured is a Named Insured on such other policy and where our policy is required by a written contract or written agreement to provide coverage to the additional insured on a primary and non-contributory basis.

E. This endorsement does not apply to an additional insured which has been added to this Coverage Part by an endorsement showing the additional insured in a Schedule of additional insureds, and which endorsement applies specifically to that identified additional insured.

F. Solely with respect to the insurance afforded to an additional insured under Paragraph **A.3.** or Paragraph **A.4.** of this endorsement, the following is added to Section **III – Limits Of Insurance**:

Additional Insured – Automatic – Owners, Lessees Or Contractors Limit

The most we will pay on behalf of the additional insured is the amount of insurance:

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

1. Required by the written contract or written agreement referenced in Section **A.** of this endorsement; or

2. Available under the applicable Limits of Insurance shown in the Declarations,

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

All other terms, conditions, provisions and exclusions of this policy remain the same.

Includes copyrighted material of Insurance Services Office, Inc., with its permission.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

This endorsement modifies insurance provided under the:

Commercial General Liability Coverage Part

The following is added to the **Transfer Of Rights Of Recovery Against Others To Us Condition**:

If you are required by a written contract or agreement, which is executed before a loss, to waive your rights of recovery from others, we agree to waive our rights of recovery. This waiver of rights shall not be construed to be a waiver with respect to any other operations in which the insured has no contractual interest.

WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule. (This agreement applies only to the extent that you perform work under a written contract that requires you to obtain this agreement from us.)

This agreement shall not operate directly or indirectly to benefit anyone not named in the Schedule.

Schedule

ALL PERSONS AND/OR ORGANIZATIONS THAT ARE REQUIRED BY WRITTEN CONTRACT OR AGREEMENT WITH THE INSURED, EXECUTED PRIOR TO THE ACCIDENT OR LOSS, THAT WAIVER OF SUBROGATION BE PROVIDED UNDER THIS POLICY FOR WORK PERFORMED BY YOU AND FOR THAT PERSON AND/OR ORGANIZATION

This endorsement changes the policy to which it is attached and is effective on the date issued unless otherwise stated.

2. **Electronic data** means information, facts or programs stored as or on, created or used on, or transmitted to or from computer software, including systems and applications software, hard or floppy disks, CD-ROMS, tapes, drives, cells, data processing devices or any other media which are used with electronically controlled equipment.

3. **Loss** means those sums actually paid that the **insured** is legally obligated to pay as damages for the settlement or satisfaction of a claim because of injury or offense, after making proper deductions for all recoveries and salvage. However:

   a. Under **Coverage A**:

      (1) **Loss** also includes defense expenses and supplementary payments if **underlying insurance** includes defense expenses and supplementary payments in the Limits of Insurance; and

      (2) **Loss** does not include defense expenses and supplementary payments if **underlying insurance** does not include defense expenses and supplementary payments in the Limits of Insurance.

   b. Under **Coverage B.**, **loss** does not include defense expenses and supplementary payments.

4. **Other insurance** means a policy of insurance providing coverage that this policy also provides. **Other insurance** includes any type of self-insurance or other mechanisms by which an **insured** arranges for funding of legal liabilities.

   Other insurance does not include **underlying insurance** or a policy of insurance specifically purchased to be excess of this policy providing coverage that this policy also provides.

5. **Pollutants** mean any man-made or naturally occurring solid, liquid, gaseous or thermal irritant or contaminant, including but not limited to: smoke; vapor; soot; fumes; acids; alkalis; chemicals and waste. Waste includes materials to be recycled, reconditioned or reclaimed.

6. **Suit** means a civil proceeding in which injuries or damages to which this insurance applies are alleged. **Suit** includes:

   a. An arbitration proceeding in which such damages are claimed and to which the **insured** must submit pursuant to law or contract or does submit with our consent; or

   b. Any other alternative dispute resolution proceeding in which such damages are claimed and to which the **insured** submits with our consent.

7. **Underlying insurance** means the policy or policies of insurance listed in the Schedule of Underlying Insurance forming a part of this policy. We will only be liable for amounts in excess of the Limits of Insurance shown in the Schedule of Underlying Insurance for any **underlying insurance**.

B. The following definitions are applicable to **Coverage A** only:

1. **Hostile fire** means one which becomes uncontrollable or breaks out from where it was intended to be.

2. **Insured** means:

   a. You;

   b. Any person or organization included as an **insured** in **underlying insurance**; and

   c. Any person or organization qualifying as an additional **insured** in **underlying insurance** but only to the same extent that such person or organization is an additional **insured** under such **underlying insurance**.

3. **Non-Admitted Jurisdiction** means:

   a. Any country or political subdivision in which we are not licensed or permitted to insure risks and where doing so would violate the insurance laws and regulations of such jurisdiction; or

   b. Any country or political subdivision where we are prevented by law from investigating, defending or settling an **occurrence** or **suit**.

4. **Occurrence** means a covered event as defined in **underlying insurance**.

5. **Qualified Entity** means any entity, person or organization that is not an **insured** under this policy and would qualify as an **insured** under this policy, but for the fact that the entity is registered, domiciled or has ongoing operations in a **non-admitted jurisdiction**.

Nothing herein will be construed to make this policy subject to the terms, conditions and limitations of such **other insurance**.

14. Premium

The premium for this policy as stated in Item **6.** of the Declarations is a flat premium. It is not subject to adjustment unless an endorsement is attached to this policy.

15. Separation of Insureds

Except with respect to the Limits of Insurance, and any rights or duties specifically assigned to the first **Named Insured**, this insurance applies:

a. As if each **named insured** were the only **named insured**; and

b. Separately to each **insured** against whom claim is made or **suit** is brought.

16. Terms Conformed to Statute

The terms of this policy which are in conflict with the statutes, laws, ordinances or regulations in any country, jurisdiction, state or province where this policy is issued are amended to conform to such statutes, laws, ordinances or regulations. If we are prevented by law or statute from paying on behalf of the **insured**, then we will, where permitted by law or statute, indemnify the **insured**.

17. Transfer of Rights of Recovery Against Others to Us

a. If the **insured** has rights to recover all or part of any payment we have made under this insurance, those rights are transferred to us. The **insured** must do nothing after the **loss** to impair them. At our request, the **insured** will bring **suit** or transfer those rights to us and help us enforce them.

However, if any **insured** is required by a written contract or agreement which is executed before a **loss** to waive their rights of recovery from others, we agree to waive our rights of recovery. This waiver of rights shall not be construed to be a waiver with respect to any other operations for which the **insured** has not waived their rights of recovery by contract.

b. Any amount recovered will be apportioned in the inverse order of payment of **loss** to the extent of actual payment. The expenses of all such recovery proceedings will be apportioned in the ratio of respective recoveries.

18. Transfer of Your Rights and Duties

Your rights and duties under this insurance may not be transferred without our written consent. If you die, then your rights and duties will be transferred to your legal representative, but only while acting within the scope of duties as your legal representative. Until your legal representative is appointed, anyone having temporary custody of your property will have your rights and duties but only with respect to that property.

19. When Loss is Payable

Coverage under this policy will not apply until the **insured**, or the **insured's** underlying insurer has paid or is legally obligated to pay the full amount of the Underlying Limits of Insurance or **Retained Limit**.

When the amount of **loss** is determined by an agreed settlement or on a final judgment against an **insured** obtained after an actual trial, we will promptly pay on behalf of the **insured** the amount of **loss** covered under the terms of this policy. The first **Named Insured** will promptly reimburse us for any amount within the **Retained Limit** paid by us.

20. Violation of Economic or Trade Sanctions

If coverage for a claim or **suit** under this policy is in violation of any economic or trade sanctions of the United States of America then coverage for that claim or **suit** will be null and void.

B. The following Condition is applicable to **Coverage A** and **Coverage B**:

1. Notice of Occurrence, Claim or Suit

a. You must see to it that we are notified as soon as practicable of an **occurrence** which may result in damages covered by this policy.

To the extent possible, notice will include:

(1) How, when and where the **occurrence** took place;

Expenses

Geographic Information or GPS Systems	$110.00 / day
Total Station Survey Equipment	$220.00 / day
Charges for other equipment may appear in a proposal	
Out-Of-Pocket Direct Job Expenses	cost plus 15%
Such as reproductions, sub-consultants / contractors, etc.	

Travel Expense

Company or Personal Car Mileage	IRS rate / mile
Air and Surface Transportation	cost plus 15%
Lodging and Sustenance	cost plus 15%

Billing & Payment

Travel time is charged for work required to be performed out-of-office.

Invoicing is on a monthly basis for work performed. Payment for services is due within 30 days from the date of the invoice. An interest charge of 1.5% per month is made on the unpaid balance starting 30 days after the date of invoice.

This schedule of billing rates is effective January 1, 2025, and will remain in effect until December 31, 2025, unless unforeseen increases in operational costs are encountered. We reserve the right to change rates to reflect such increases.

CONTRACT RENEWAL
FOR PROFESSIONAL ENGINEERING SERVICES
MEAD AND HUNT, INC.

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES, via RFQ 12-17-ENG; and

WHEREAS, the City accepted the qualifications of MEAD AND HUNT, INC. (Firm); and

WHEREAS, the parties desire to enter into the third of five (5) possible one (1) year renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND MEAD AND HUNT, INC., AGREE AS FOLLOWS:

1. The City and DRMP, INC., agree to all the terms and conditions as stated and contained in RFQ 12-17-ENG, including any/all Attachments, Addenda, and the firm's submitted Request for Qualifications, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the third of five (5) possible one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from July 10, 2024, and will continue for a year from that date.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 31st day of July, 2017, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and **Mead & Hunt, RFQ submitted as Quentin L. Hampton Associates, Inc.**, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 12-17-ENG, Continuing Professional Engineering Services, and is for one (1) of the seven (7) awarded firms. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services including design services associated with general Civil Engineering practices to include but not limited to developing a complete set of site plans involving paving, grading, utilities, landscaping and stormwater elements, in compliance with the City's Land Development Regulations, as well as state and federal agency guidelines. Such services may require drainage calculations, utility hydraulic calculations, fire flow calculations, stormwater modeling, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses.

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for professional Civil Engineering services and/or other such services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or

supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to

proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders;

at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require

with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Volusia County, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means

and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-

consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the

CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public

agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

Nothing but the Facts...

Headquarters: 4401 Eastport Parkway, Port Orange, FL 32127

Years In Business: 53 years

Roots:

QLH's roots began in municipal wastewater engineering sector during the transition from primary to secondary/tertiary treatment. The firm pioneered advanced nutrient removal processes and public access reclaimed water. QLH has evolved into an engineering consultant specializing in all facets of water resources and municipal engineering including potable water, wastewater, reclaimed water, stormwater, civil/site design, parks and recreation, planning design services, airport facilities, and construction engineering inspection services.

Specializing In:

Planning, Design, and Construction Services for: raw water supply, water treatment, water distribution, wastewater collection, wastewater treatment, reclaimed water, stormwater management, parks and recreation, planning design services, and general civil projects. We also specialize in funding assistance and building inspections/plan review.

What We Most Covet:

Our long term continuing professional relationships with clients in East Central Florida ranging up to 48 years.

3 Quick Things You Don't Know About Us:

1. Privately owned by the professional engineers that actively work on all day-to-day operations.
2. Only serve public clients.
3. The project manager who starts a project will serve as the lead design professional from inception to completion.

REQUEST FOR QUALIFICATIONS
CONTINUING PROFESSIONAL ENGINEERING SERVICES
RFQ # 12-17-ENG

Dear Purchasing Coordinator,

We are pleased to offer the enclosed response to the Request For Qualifications (RFQ) for Continuing Professional Engineering Services for the City of New Smyrna Beach. In accordance with the instructions, we have included one (1) original (unbound), three (3) identical copies and one (1) identical digital version in PDF format on USB flash/thumb drive. With this submittal, we believe that we have fulfilled the requirements of this RFQ and have provided a comprehensive overview of our firm and our firm's capabilities. In areas of specialization, we have enlisted the support of highly qualified specialty sub-consultants, and assembled a superior design team that satisfies every element of the City's RFQ. As you will see, our design team has a proven track record of excellence and is fully qualified to fulfill every aspect of this RFQ. In addition, our firm offers many other services that can fulfill varying needs that may suddenly arise at the City.

Quentin L. Hampton Associates, Inc. (QLH) is a full service civil engineering consulting firm which specializes in municipal engineering, construction services, inspection and grant assistance. QLH has provided professional engineering services to municipalities and utilities in East Central Florida since 1964 and served the City of New Smyrna Beach in various capacities since 2002. The firm has 26 employees in its growing Port Orange office and our staff welcomes this opportunity to continue serving the City.

The firm's capabilities include all aspects of civil and environmental engineering, and construction services. The abilities of our professional staff are fully supported by experienced designers, CADD and GIS technicians, inspectors and administrative personnel. In addition, our staff includes two in-house grant specialists that are able to assist with procurement and administer grants for qualified projects. We have an extensive background in working with the Florida Department of Transportation (FDOT) and the Local Agency Program (LAP) administered by the FDOT. For other sub-consulting disciplines, we have maintained long standing relationships for transportation, survey, geotechnical, biological, and landscape design with the region's top firms.

Over the years, QLH has assisted the City in the development of several municipal projects including marine, park, recreational facilities, city complexes, and sidewalk projects. We have served in various capacities including: design, construction inspection, planning, design-build, and other tasks as deemed necessary. We stand ready to continue serving the City with experienced, qualified personnel who are immediately available. I, Brad T. Blais, P.E., will be the Principal-In-Charge and primary contact for this proposal; Andrew M. Giannini, P.E., Project Manager, will be the alternate. I can be reached by phone at: (386) 761-6810, e-mail: bblais@qlha.com, or cell phone: (386) 547-7360.

Very truly yours,
QUENTIN L. HAMPTON ASSOCIATES, INC.

Brad T. Blais, P.E.
President

QUALIFICATIONS OF FIRM

The Top Ten

Ten Things That Set Us Apart From the Competition

1. QLH specializes in water, wastewater and reclaimed water engineering.
2. QLH has a proven record of efficiently serving small to medium municipalities throughout central Florida.
3. QLH's approach is to develop excellent working relationships with our clients in order to operate as an extension to city staff to be "goal driven" vs. "fee driven".
4. QLH has an established local presence in Flagler County since 1964 and excellent working relationships with local agencies.
5. QLH has large firm capabilities, but with small firm service.
6. QLH maintains very low overhead which provides for competitive rates and financial stability.
7. QLH only serves governmental clients, no private clients; thus avoiding conflicts of interest/priorities.
8. QLH project managers are all principal owners of the firm.
9. QLH offers unrivaled funding/financing expertise including SJRWMD Cost Share, FDEP 319h, and FDEP SRF.
10. QLH has the largest construction services staff in East Central Florida including a licensed building code administrator and certified general contractor.

QLH
Quentin L. Hampton Associates

Quentin L. Hampton Associates, Inc.
4401 Eastport Parkway, Port Orange, Florida 32127
386-761-6810 | Fax: 386-761-3977 | www.qlha.com

Quentin L. Hampton Associates, Inc.

QLH was formed by Quentin L. Hampton in 1964 and was incorporated in 1967. Quentin L. Hampton was a pioneer in wastewater treatment and acquired numerous patents for various treatment processes. Quentin served until his retirement in 1985. Rick Fernandez followed Quentin as president and took the company into the next millennium. Under Rick's direction and guidance, the company grew to over 35 employees. Rick retired in 2005, but stayed with the company until 2010 as a Director. Quentin's son, took over the helm in 2005 and was the firm's president until retirement in 2009. Currently, Brad Blais serves as President, David King serves as Vice President/ Treasurer and Andrew Giannini serves as Secretary of the corporation and are the company's future. With their guidance Quentin L. Hampton Associates will continue to grow and to serve our clients into the far future.

Quentin L. Hampton

QLH is privately owned by the corporate officers/ professional engineers. Therefore all company decisions are made amongst these owners to the benefit of our clients versus from afar and to the benefit of stockholders as can happen with large regional/national firms.

The tenure or employees at QLH range up to 32 years with an average tenure of 13 years. This tenure is evidence of the company's dedication to our employees. This results in an unrivaled continuity of employee knowledge, abilities and experience that benefits our clients.

Brad T. Blais

QLH has maintained headquarters in Volusia County since 1964. Our main office is located at 4401 Eastport Parkway, Port Orange, Florida, 32127.

QLH has also operated branch offices in Largo, Cocoa and Cocoa Beach as needs arose. We currently operate a satellite office in Cocoa Beach, for which we partner with our client, the City of Cocoa Beach, for such office. QLH maintains a continual presence throughout Central and North Florida due to our service to continuing contract services to clients throughout these areas.

QLH was a leader in upgrades to tertiary and advanced wastewater improvements to treatment facilities in the 1980s and development of public access reclaimed water systems in the 1990s and 2000s. During the growth of the company, expertise was also developed in potable water, stormwater, civil, environmental and other areas. QLH continues to be an industry leader in these areas.

Throughout the company's existence, primary focus was placed on serving municipalities throughout Central Florida and most recently North Florida as well. Continuing contracts with current municipal clients date as far back as 1968. For over the last 18 years, QLH has only served governmental clients thus avoiding potential conflicts of interest that may arise when serving private clients and the development community. QLH is an expert in the governmental processes and procedures required for public engineering, bidding and construction.

QLH's strategic plan includes continuing to provide our existing and new clients unsurpassed professional engineering services that improve the world around us while improving the quality of life of our clients' residents/customers, our clients and our employees.

Company History and Composition

QLH was founded by Quentin L. Hampton during 1964 and Articles of Incorporation were prepared during 1967. The owners are professional engineers, active in all phases of the firm's design and production. Corporate officers/owners are Brad T. Blais, P.E., President, David A. King, P.E., Vice President/Treasurer, and Andrew M. Giannini, P.E., Secretary, and Kevin A. Lee, P.E..

QLH has 26 full time employees including:

- Four (4) registered professional engineers
- Seven (7) inspectors
- One (1) production manager
- One (1) administrative services supervisor
- Five (5) CADD/GIS technicians
- Two (2) grant specialist/administrative assistants
- One (1) engineering intern
- One (1) grant compliance specialist/inspector
- One (1) construction supervisor
- Three (3) administrative assistants

All of the firm's project resources are based out of the Port Orange office.

The engineers and designers assigned to the City's projects are experienced professionals. Once a project manager is assigned, that individual will manage the City's project from conception to completion of construction. Continuity of personnel is a QLH trademark.

QLH has developed a reputation for excellence and innovation within our areas of expertise. Our design and construction services staff is familiar with local contractors, City staff, local private utility company personnel, and regulatory staff from all regional and local agencies.

The client list and duration of tenure, shown below, indicate the firm's range of service. QLH has served neighboring municipalities and surrounding communities for over 53 years.

Client	Continuing Service Since
Cocoa Beach	1968
Port Orange	1980
DeLand	1987
Ormond Beach	1992
Edgewater	1994
Holly Hill	1995
South Daytona	1995
Cocoa	1997
Volusia County	1998
Orange City	2001
Ponce Inlet	2001
New Smyrna Beach	**2002**
Flagler Beach	2003
Utilities Commission New Smyrna Beach	2006
Satellite Beach	2006
Deltona	2009
Brevard County	2009
DeBary	2010
Cape Canaveral	2011
Mount Dora	2014

QLH is integrally involved in the design and planning process for its clients. A foundation of the firm is the philosophy of its staff to function as an extension of the client's staff for which they serve. Communication is vital to the success of projects. Having established lines of communication is a direct benefit to the City of New Smyrna Beach.

QLH has assembled the best team of engineering professionals to effectively complete the City of New Smyrna Beach's projects. Brad Blais will provide client services management and project management, along with David King and Andrew Giannini. On every project, we will establish a team of in-house personnel to provide the majority of all work effort and select technical sub-consultants to provide specialized services on an as-needed basis. Upon request for task assignment scope and fee proposals, QLH and City staff shall jointly determine what design team members are best suited for each project. This includes QLH engineers and specialty sub-consultants. QLH is flexible and can make any necessary design team adjustments to suit the City's needs.

Company Focus and Advantages

QLH designs and projects have been at the forefront of technology and the firm continues to assist its clients in the implementation of cost-effective projects which benefit the customers they serve as well as the environment we all share. The QLH motto, 'Large Firm Ability, Small Firm Service' represents our approach to project design and client service. We have the depth of staff and experience to undertake multi-million dollar construction programs, but we regularly complete small projects, letter reports, and permitting activities quickly and efficiently. The engineers, technicians, and inspectors all have greater than ten years experience and unlike many firms, the project managers and technicians who start your projects will see it through completion.

The engineers, technicians, and inspectors assigned to work on this project will serve as an 'extension of staff'. Larger firms are primarily interested in profitability on every project and assignment. Usually there is little involvement by the firm's principals and large firms with branch offices are typically not flexible or willing to embrace creative solutions, alternative project delivery techniques or new ideas. Smaller firms, such as QLH, are better equipped to provide personalized service. QLH is the only medium sized firm in East Central Florida which specializes solely in public sector engineering/design, and construction services, thus combining the best of both worlds.

QLH specializes in providing comprehensive, personalized governmental consulting services to communities in East Central Florida. The firm is unique in its ability to provide personalized service. QLH personnel and project managers provide consistent service and advice during the financing, design, and construction stage of each project. It is not the firm's policy to bill for minor expenses or charge for miscellaneous services such as phone calls, copies, and mileage.

The most demonstrative feature of our firm's performance is our ability to listen to the needs of individual clients and provide cost effective designs to satisfy those needs. We are focused on learning everything about your project and offering independent solutions to each problem as opposed to offering canned designs, which may be modified to fit a particular site. We offer the firm's technical abilities as a means of achieving the project goals established by the City of New Smyrna Beach's Staff and the City Commission.

Commitment to Personnel Consistency

QLH strives to provide constant and consistent project management and staff to our clients. For the City of New Smyrna Beach, Brad Blais will be the main point of contact; however, Andrew Giannini, who has served as the project manager for the past several years, will continue with New Smyrna Beach. We believe Mr. Giannini has performed well in his tasks as project manager and will be happy to perform these tasks on all future projects with assistance from others, as needed.

Mr. Giannini will utilize QLH's staff to provide the highest quality and most timely delivery of projects our staff is capable of providing.

Certified Minority Business Enterprise

Quentin L. Hampton Associates, Inc. is not a certified minority business enterprise as defined by the Florida Small and Minority Business Assistance Act.

Subsurface Utility Engineering

Quentin L. Hampton Associates, Inc. (QLH) was proud to announce the addition of Subsurface Utility Engineering (SUE) to our available offerings in 2013. These SUE services complement our over 53 years of water and wastewater utility engineering experience. The underground environment has become extremely complicated with ever increasing crowded right-of-ways and the utilization of trenchless technologies. Potential liability of inaccurate or incomplete existing utility information has also increased. Utility companies are being forced to provide very finite information on existing facilities and engineers/surveyors are being relied upon to provide this more accurate information and utilize such in utility design.

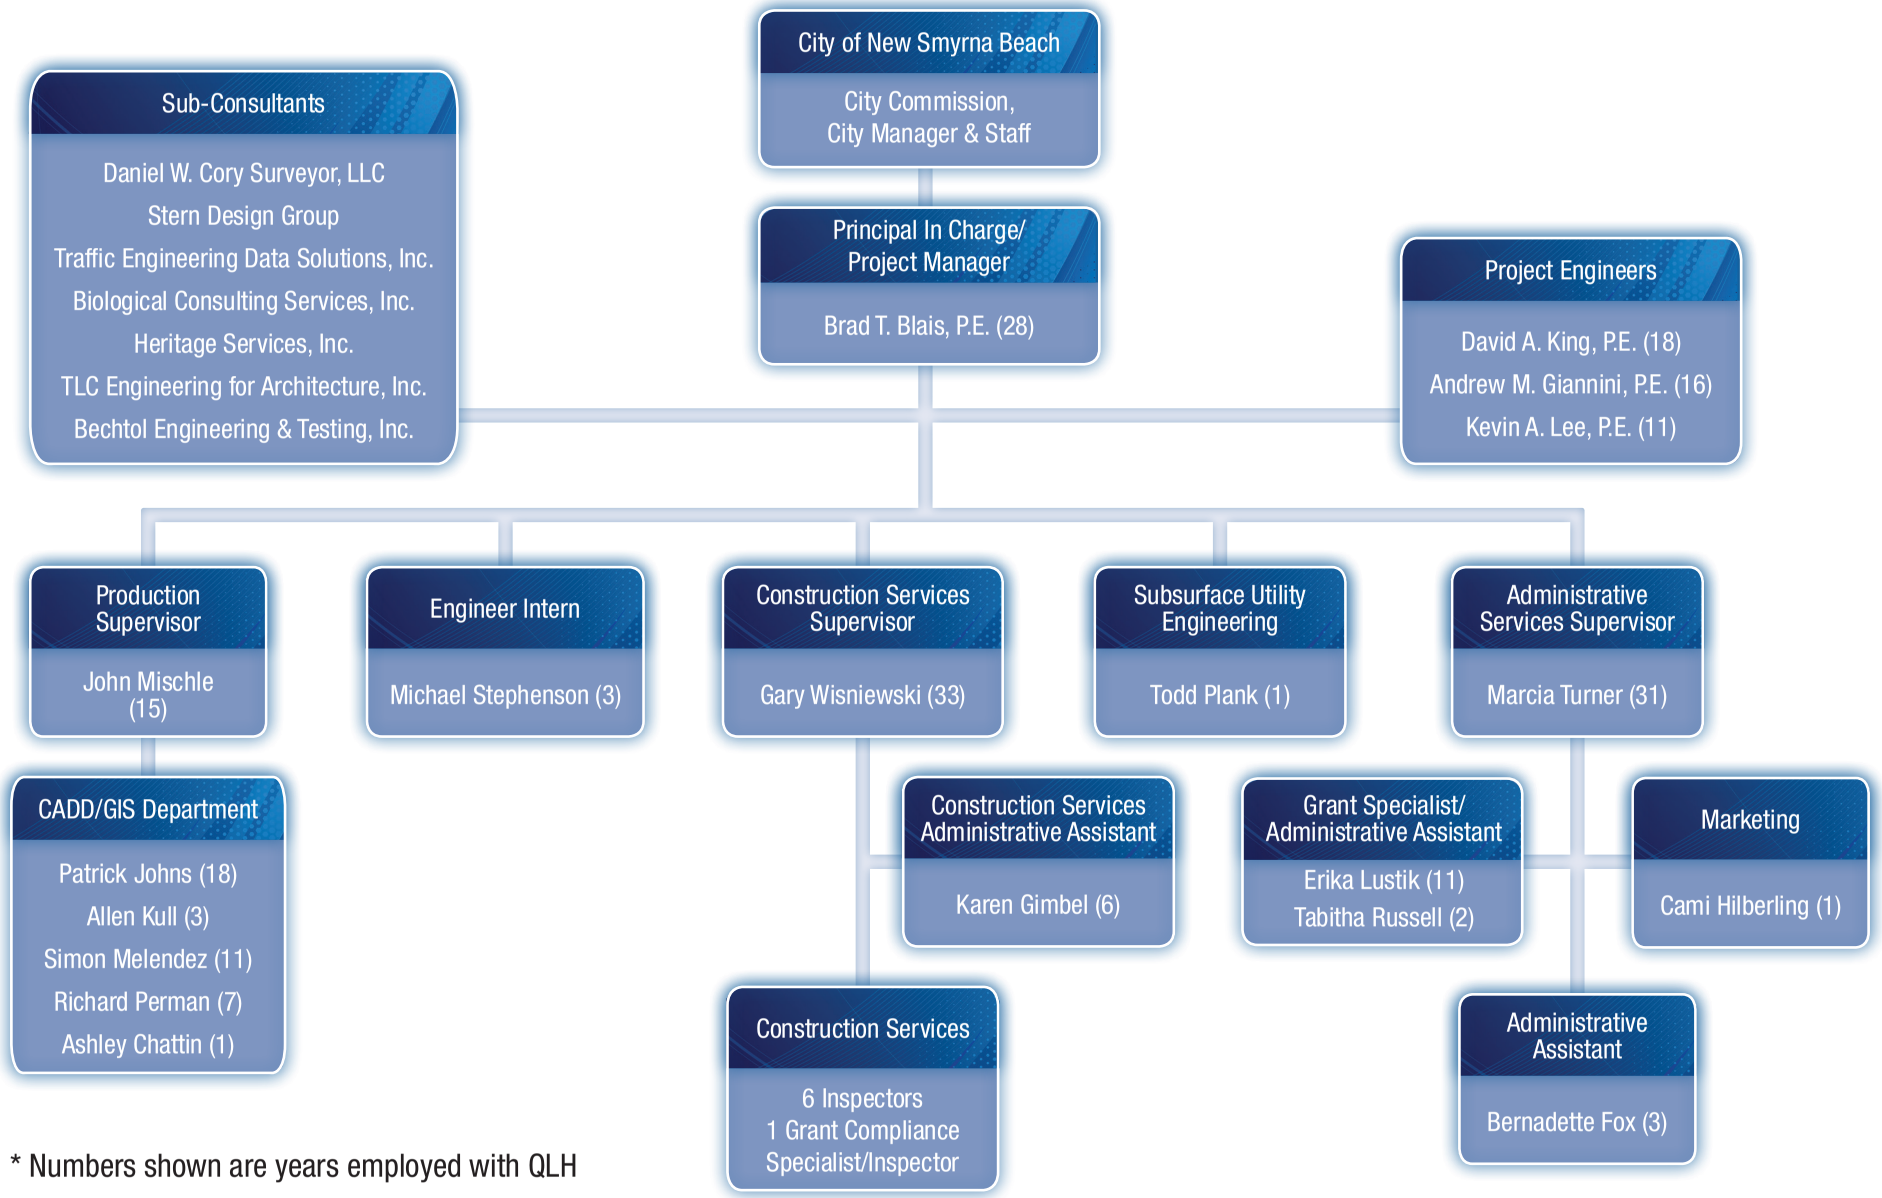
QLH utilizes electronic line tracing equipment, ground penetrating radar, and vacuum locate

equipment to ascertain on-site utility information to ASCE/FDOT Quality Level A standards. QLH also provides ASCE/FDOT Level B - D information in order to provide the appropriate level of effort and cost as needed for the specific project.

In addition to the above mentioned services, QLH also provides value-added services related to these SUE services. QLH also provides the following related services:

- Utility conflict identification
- Utility relocation design
- Utility condition assessment
- Utility asset evaluation
- Utility mapping and GIS development

QLH can provide any of these services concurrent with our engineering design services or as separate stand-alone services on a task order or continuing services on-call basis.



Project Team

Quentin L. Hampton Associates, Inc. (QLH) proposes to use the following team for Professional Engineering Services:

Principal-In-Charge/ Project Manager	Brad T. Blais, P.E., President P.O. Drawer 290247, Port Orange, FL 32129 (386) 761-6810 bblais@qlha.com

"VWA Water Supply Plan: A Regional Water Supply/ Planning Case Study," Co-Author, Florida Water Resources Journal, February 2003

"Nutrient Removal Enhancement Using Process Automation at Holly Hill", Co-Author, Florida Water Resources Journal, January 2012

"Sustainability and TMDL Compliance Using Moving Bed Biofilm Treatment in Cocoa Beach", Florida Water Resources Conference, 2014

"Achieving Extremely Low Effluent TN and TP Using IFAS Technology", Co-Author, WEFTEC 2014

Mr. Blais currently serves as President of Quentin L. Hampton Associates, Inc. (QLH). In addition to his management, client service and business development responsibilities, Mr. Blais serves as project manager for many of the firm's on-going projects. Recent projects include water and wastewater treatment facilities, sewage collection systems, water and reclaimed water distribution systems and municipal building projects.

Mr. Blais specializes in water treatment, advanced wastewater treatment process design, and reclaimed water system planning and implementation. He is also responsible for preparation of utility master plans and regional water supply planning. In addition to serving as Engineer of Record (EOR) for project design, he also manages construction and provides contract administration services for these projects. He specializes in grant and loan acquisition. He has assisted clients in securing over $10 million in grants and $60 million in low interest loans since 2008.

Throughout his career, Mr. Blais has planned, designed and supervised construction of hundreds of water resource related and general civil projects. The projects cover a broad range of categories from small water distribution projects to multi-million dollar advanced wastewater treatment facilities. He has authored utility master plans, rate studies, bond reports and regional water supply planning documents. He is actively involved with AWWA, WEF and FWRC and has authored technical publications and presented papers at the State and National conferences.

Mr. Blais has prepared planning and design documents for a wide variety of raw water supply, water treatment, water storage, pumping and distribution projects. Public water supply is regulated in Florida by Water Management Districts under the Consumptive Use Permitting (CUP) process. Mr. Blais has negotiated CUP's for the majority of utilities in Volusia County.

Mr. Blais' stormwater experience includes new and retrofit stormwater management systems for site specific projects and regional drainage basin upgrades. His experience also includes stormwater master planning and surface water modeling. Mr. Blais has assisted clients acquire grant funding and 'clean' water SRF loans for various flood abatement and water quality enhancement projects. He has authored and co-authored city-wide and basin specific stormwater master plans for various counties and municipalities. Capital projects include

conveyance systems, retention/detention ponds and pump stations.

Mr. Blais' utility planning experience is extensive. He has prepared utility master plans, regional water supply plans and feasibility studies for multiple cities, counties and private utilities. The planning documents have served as a foundation for most clients' Capital Improvement Program (CIP).

Mr. Blais has over 25 years experience supervising construction of utility and civil projects. He has provided project management and CEI services for small projects and multi-million dollar facilities.

He holds a certification as a residential building inspector and multiple FDOT certifications for all aspects of quality control and project management. He is an effective communicator and negotiator who has a demonstrated track record of successfully managing project schedules and budgets.

Mr. Blais has extensive experience planning, designing, permitting and supervising construction of a wide array of general civil projects. These projects include roads, public buildings, parks, parking lots, sidewalks and communication networks. He has multiple FDOT certifications for all phases of project management.

David A. King, P.E.

Position: Project Manager/Vice President, Quentin L. Hampton Associates, Inc.

Years of Experience: 25

Years with QLH: 18

Education: B.S. Civil Engineering University of Central Florida, 1991

Professional Registration: Professional Engineer, Florida

Professional Affiliations:

- Florida Engineering Society (Past Chapter President)
- American Society of Civil Engineers (Past Branch President)
- Florida Institute of Consulting Engineers
- Florida Stormwater Association
- Water Environment Federation
- American Water Works Association (AWWA)

Mr. King currently serves as Vice President of QLH. His duties include project management and engineering on various civil, water resources, stormwater and other projects. He serves as City Engineer for the cities of Flagler Beach, Edgewater, and Satellite Beach. Mr. King also oversees the Subsurface Utility Engineering (SUE) department at QLH. For many of our clients, Mr. King provides program management services for their capital improvements programs.

Mr. King specializes in water and wastewater conveyance systems including pump stations, storage, transmission, distribution and collection. Mr. King also specializes in general civil and stormwater design including retrofit stormwater, streetscape and other similar type projects.

Mr. King has been employed at QLH since 1999. Prior to joining QLH, Mr. King held the Engineering Division Manager/City Engineer position at the City of Cocoa where he was employed for 7 years. At the City, Mr. King was responsible for a multi-million dollar per year capital project improvement program. Many of the projects were designed in-house in which Mr. King was in responsible charge of. Other projects were contracted out to consultants who provided Mr. King the experience of being the "client". Mr. King worked very closely with the operations and maintenance staff to incorporate many cost/time saving and performance features into the various projects. Mr. King also was a key member of a design team which designed improvements to a 48 MGD preliminary treatment, storage and pumping potable water facility in which a patent was received.

Mr. King's stormwater experience has included new and retrofit stormwater management systems for site specific and regional basins. Mr. King has assisted clients in acquiring grant funding from SJRWMD, FDEP, EPA and FEMA for such projects. Mr. King's stormwater planning experience has included stormwater master plans, water quality master plans and regulation compliance studies. Mr. King's conveyance project experience has included up to 12' x 24' box culverts, 72 inch diameter pipelines, and pump stations up to 60,000 gallons per minute. Mr. King has assisted clients in multi-jurisdictional regional stormwater projects and stormwater treatment "banks". Mr. King's stormwater experience has also included nutrient removal BMP's.

Mr. King's water experience has included wellfield development and raw water pipelines up to 48 inches in diameter along with various treatment plant improvements such as filter improvements, disinfection system improvements, ASR storage and other improvements. Mr. King's storage and transmission experience includes ground storage tanks to 5 million gallons, pump stations to 250 horse power and pipelines up to 54 inches in diameter. Mr. King is also experienced in water distribution having designed many water distribution projects, many of which were water main replacements of aged, deteriorated existing water mains.

Mr. King's utility planning experience has included asset evaluation and management studies, distribution and collection system modeling, facility plans for funding acquisition and bond system evaluation reports. Mr. King has also

assisted the majority of current and past clients with their utility capital improvements programs (CIP) and in some cases, program management of such CIPs. Mr. King is also experienced in hazard planning and mitigation.

Mr. King's construction services experience has included projects up to $10 million including multidiscipline projects involving civil, structural, electrical, mechanical, plumbing, and other trades. Mr. King is experienced with FDOT construction standards and Federal compliance procedures. Mr. King's construction project management experience is extensive and includes design-build and other non-conventional delivery methods.

Mr. King's civil experience has included a wide array of civil projects such as roadway improvements, streetscapes, parks, boardwalks and piers, site development, dog parks, sidewalks, bike paths, sports facilities and various transportation projects. Mr. King's other civil experience has included shoreline stabilization and hardening, public works fueling and vehicle wash facilities, police stations, and beach structures.

Andrew M. Giannini, P.E.

Position: Project manager, Quentin L. Hampton Associates, Inc.

Years of Experience: 26

Years with QLH: 16

Education: B.S. Engineering Technology, University of Central Florida, 1982

B.S. Mathematics and Computer Science, Troy State University 1980

Professional Registration: Professional Engineer, Florida

Professional Affiliations:

- Florida Engineering Society
- National Society of Professional Engineers
- Florida Institute of Consulting Engineers
- American Water Works Association

Mr. Giannini currently serves as Corporate Secretary of Quentin L. Hampton Associates, Inc. (QLH). His duties include project management and engineer on various stormwater, civil and utilities projects. He currently serves as City Engineer for the Town of Ponce Inlet. Mr. Giannini has authored numerous stormwater master plans for several cities in Volusia County and has participated in preparation of many utility master plans.

Mr. Giannini specializes in stormwater retrofit and civil design in existing urban or rural development. He is adept at hydrodynamic modeling of complex drainage systems. Mr. Giannini also specializes in water and wastewater distribution system design and construction of these systems.

Mr. Giannini joined QLH in 2001. In the years prior, Mr. Giannini performed similar duties with civil engineering firms in Volusia County and prior to that, Palm Beach County. He has a total of over 25 years of engineering experience that includes numerous civil site plan design and permitting, stormwater retrofit design, water and wastewater conveyance systems, and several park projects for municipal clients.

Mr. Giannini's water project experience includes rehabilitation of wells, pumps, and storage tanks. Mr. Giannini has designed and permitted numerous water transmission and distribution mains ranging from 6-inch to 24-inch in size. Many of the projects were constructed in existing developed areas where construction was a challenge.

Mr. Giannini has specialized in assisting numerous municipalities with their drainage problems by analyzing regional to local systems and providing projects to resolve those problems. Mr. Giannini's experience includes stormwater master plans that have been implemented in several cities in Volusia County. Project components that Mr. Giannini had responsibility for include a 300 cfs stormwater pump station, large acreage detention ponds, box culvert and wood bridge improvements where conveyance was limited by small culverts. Mr. Giannini's master plans include water quality enhancements as mitigation toward increasing discharge rates for flood abatement.

Mr. Giannini has contributed to several utility master plan studies for the purposes of evaluating existing systems and providing recommendations for long term planning efforts. The master plans include utility capital improvement programs that assist our clients with funding sources for the improvements. Mr. Giannini is adept at water and sewer system modeling and analysis, cost estimating and planning.

Mr. Giannini has served as construction administration engineer on projects that exceed $10 million in construction cost. Projects that he has administered include stormwater, roadway, civil site, structural and utility. Mr. Giannini is experienced with FDOT construction processes and standards, including Federal compliance procedures.

Mr. Giannini has several years experience in design and permitting of private civil site projects including retail, commercial office, multi-family residential and single family residential. Recent civil project experience include urban parking, park improvements, boardwalks and fishing piers, sidewalks, and sports fields. Mr. Giannini's other civil experience has included storm damage rehabilitation such as shoreline stabilization and hardening.

Kevin A. Lee, P.E.

Position: Project Engineer, Quentin L. Hampton Associates, Inc.

Years of Experience: 10

Years with QLH: 10

Education: M.E. Environmental Engineering, University of Florida, 2006

B.S. Environmental Engineering, University of Florida, 2005

Professional Registration: Professional Engineer, Florida

Professional Affiliations:

- Water Environment Federation
- American Water Works Association
- Florida Engineering Society (Past Chapter President)
- National Society of Professional Engineers

Publications:

"Nutrient Removal Enhancement Using Process Automation at Holly Hill", Co-Author, Florida Water Resources Journal, January 2012.

Mr. Lee currently serves as a Project Engineer for QLH. His duties include project management and engineering on various water resources projects. His experience ranges from planning, evaluation studies, conceptual design, permitting, design, construction administration, and inspection of the projects. Mr. Lee has been the engineer of record or aided in the design of several upgrades at water and wastewater treatment plants.

Mr. Lee specializes in water and wastewater treatment systems. His advanced wastewater treatment and nutrient removal experience includes computer modeling of biological systems to optimize the rated capacity of treatment facilities and/or upgrade the treatment level. Many of these treatment processes include process monitoring and controls to optimize biological nutrient removal.

Mr. Lee joined QLH in 2006 upon completion of graduate school. He gained field experience as a resident project representative for one year during the expansion and upgrade of a 3.0 MGD Water Reclamation Facility. This field experience included most aspects of treatment plant design and construction: piping, mechanical equipment installation and replacement, construction of new and rehabilitation of existing structures and tankage, electrical and instrumentation.

Mr. Lee's stormwater experience includes applying for and compliance of FDEP 319h grant funding, which includes preparation of multiple Quality Assurance Project Plans. He has also designed stormwater and surface water recovery projects which included advanced treatment to remove TSS for use as reclaimed water augmentation.

Mr. Lee's water supply design and permitting experience includes a wellfield expansion installing four (4) wells with emergency power and contract administration for various Upper Floridan Aquifer wells and a Lower Floridan Aquifer well. He has designed several upgrades to existing water treatment plants and pump stations including: cartridge filters, lime slakers, thickener drives, and high service pumps. He has completed four-log virus inactivation certification and associated process upgrades for the Cities of Flagler Beach, Holly Hill, Port Orange, two (2) facilities operated by Volusia County, and the Utilities Commission of New Smyrna Beach. Mr. Lee has also authored Consumptive Use permit Renewals and Compliance Reports for more than five (5) municipalities.

Mr. Lee's utility planning experience includes authoring utility master plans, CUP permit renewals, compliance reports, and CIP planning assistance. The utility master plans have included population projections, raw water supply, reclaimed irrigation and aquifer recharge, water and wastewater treatment plant evaluations, treatment plant upgrade evaluations, collection system and distribution system layout and modeling. Planning documents included proposed capital projects with implementation schedule and estimated construction costs.

Mr. Lee gained field experience as a resident project representative for one (1) year during the expansion and upgrade of the City of Holly Hill's WWTP. This

field experience included most aspects of treatment plant design and construction: mechanical piping, equipment installation and replacement, construction of new and rehabilitation of existing structures, electrical and instrumentation. He has also provided contract administration services for projects ranging from replacement of 24,000 LF of water distribution pipe in an existing residential neighborhood, several lift station rehabilitations, potable well installations, and treatment plant upgrades. Contract administration includes presiding over coordination meetings, verifying pay applications, representative between owner and contractor, quality reviews, and contract close out.

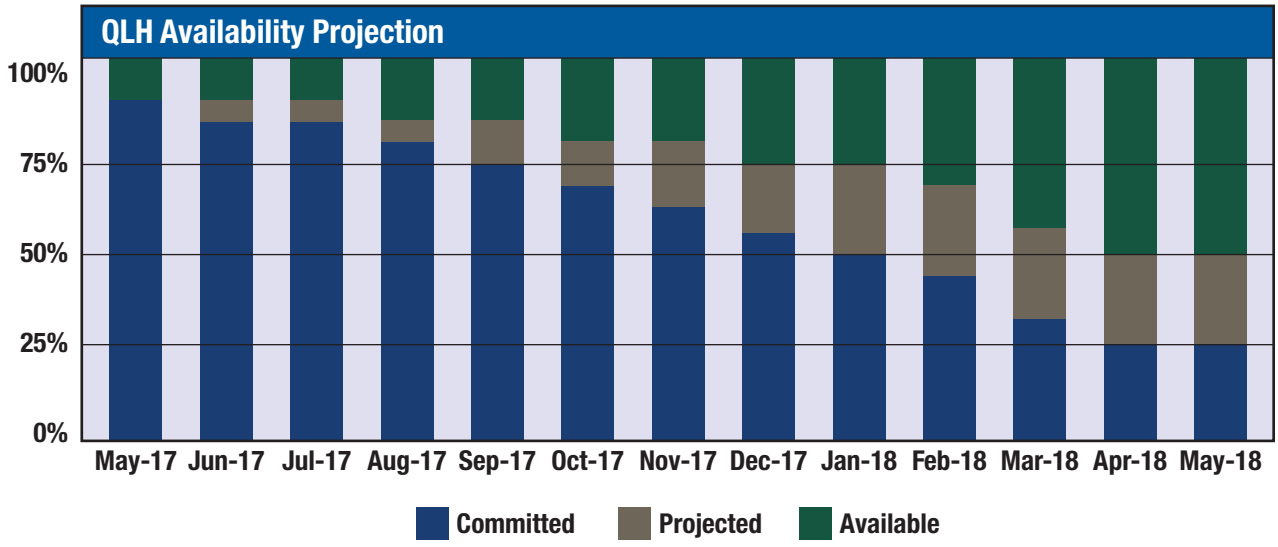
Background:

From 1976 to 1983 Mr. Wisniewski worked as a municipal inspector for the City of Pittsburgh Public Works Department. His responsibilities included inspection and construction management for roadway, bridge, water and sewer contracts for large scale municipal projects.

In 1984, Mr. Wisniewski joined Quentin L. Hampton Associates, Inc. as a field inspector. Since that time he has served as supervisor of our construction management section with a staff of 12 field inspectors. Responsibilities include supervision of projects, resolution of field conflicts, review of pay requests, testing results and “as-built” drawings. His staff is responsible for inspection of public works projects for the cities of Cocoa, Cocoa Beach, DeLand, DeBary, Edgewater, Holly Hill, Flagler Beach, South Daytona, Ormond Beach, Port Orange, New Smyrna Beach, and Volusia County as well as subdivision and site inspections for work performed by private developers within the cities of Port Orange, Edgewater, and Ponce Inlet. Gary and his staff have also performed building inspections and plan review for the Town of Ponce Inlet, cities of Edgewater, Port Orange, South Daytona, Lake Helen, and Holly Hill.

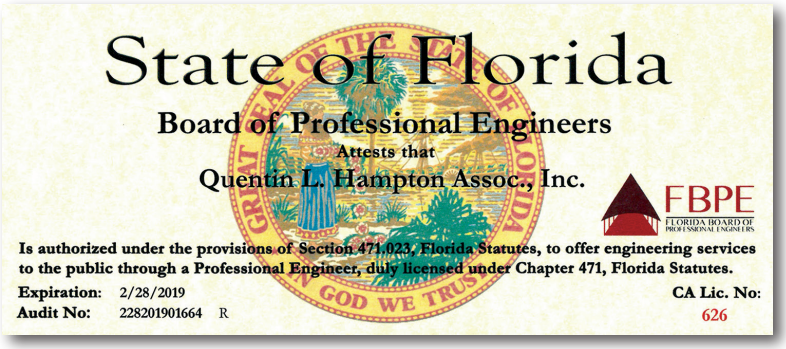
Workload (Current and Forecast)

QLH can respond immediately and deliver projects quickly. We have proven on throughout the years that final design, permitting and project delivery can be fast tracked based upon the client's needs, grant funding or other reasons.

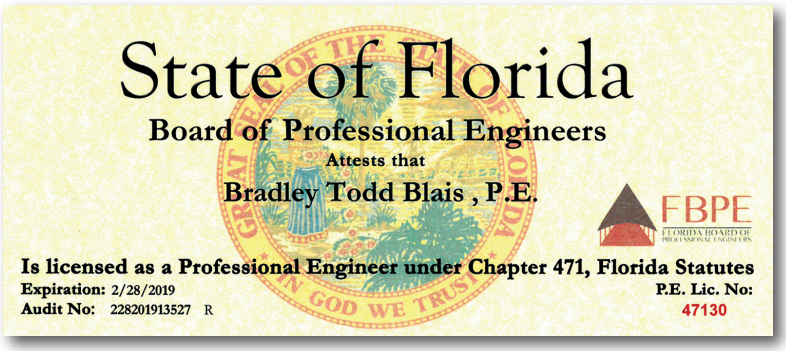


Our size allows us the flexibility to respond to changes in project manpower requirements immediately when needed. We can provide the needed additional manpower when multiple projects require attention at the same time.

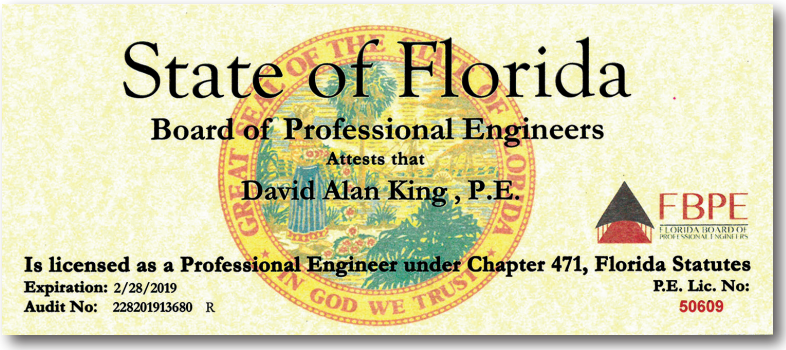
We have a long history of servicing few clients, but servicing them completely in our fields of expertise. We work for you and your needs are our primary concern. We are an efficient group of highly motivated individuals. QLH pledges to maintain the requisite staffing required at all times to meet the City of New Smyrna Beach's needs.



Our current workload is such that we can immediately begin work on this project. Our estimated current company availability is 30%. Availability of specific proposed team members is as follows:



Our forecasted workload will allow QLH to more than adequately assign the resources required for this project. The graph below shows our estimated workload availability projection.



Key Personnel	Role	Current Availability Workload Capacity
Brad T. Blais, P.E., QLH	Principal In Charge/ Project Manager	35%
David A. King, P.E., QLH	Project Engineer	30%
Andrew M. Giannini, P.E., QLH	Project Engineer/ Project Manager	35%
Kevin A. Lee, P.E., QLH	Project Engineer	25%
Gary Wisniewski, QLH	Construction Services Supervisor	60%

City of Mount Dora

Wastewater Treatment Plant #2, Driveway Restoration

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: John A. Peters, III, P.E., Director of Public Works & Utilities, (352) 735-7155
Completion Date: April 2017
Cost: Bid = $1,569,374; Final = $2,224,109 (additional work added)
Duration: Original = 270 days; Final = 420 days

The Florida Department of Transportation (FDOT) had released the Wekiva Parkway Project Development and Environment (PD&E) Study in the 2nd quarter of 2013 and with it has notified the City of Mount Dora that modifications would be required to the City's Wastewater Treatment Plant #2 entrance road and utility mains. With the entrance road relocation, modifications to the existing stormwater management system was required. The plant has substantial truck traffic to the septage receiving station which required safe routing with the modification. A closed landfill, adjacent to the plant, would require roadway and utility access as well due to the FDOT project. Utility adjustments, at the new plant entrance, would be required due to the grade change at the proposed entrance.

The City of Mount Dora obtained the services of QLH to provide design, permitting, bidding and construction phase services needed for this project. QLH's scope included surveying, geotechnical and biological investigations, traffic study, conceptual plan, final design and permitting, and construction administration and inspection services. Permits obtained for the project included:

- FDOT Driveway Connection and Drainage Permits
- FDEP/ACOE Environmental Resource Permit (Modification)
- City of Mount Dora Site Plan
- FDEP NPDES Construction Permit/NOI
- FDEP Water Main Construction permit for the adjustment at the entrance road.

QLH along with their sub-consultants coordinated with FDOT and the City to provide a fully approved set of bid documents which was bid successfully in January 2016 for a total bid of $ 1.78 million. Construction is currently in progress at the time of this writing and should be completed by the end of October 2016.

City of New Smyrna Beach

Swoope Site Boat Ramp, Parking & Restroom Facilities

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: Khalid Resheidat, P.E.,
Assistant City Manager, (386) 410-2612
Completed: April 2014
Cost: Bid = $1,286,165; Final = $1,286,000
Duration: Original = 270 days; Final = 270 days

QLH provided planning, design, permitting, and bidding services. The project consists of constructing a new boat ramp, parking and restroom facility at an existing City site that currently is shared by Volusia County and UCNSB. The items to be constructed include a 40 ft wide boat ramp with floating docks, a two stall restroom building with solar power, drainage system – eleven (11) structures and 950 LF of storm pipe with retention area, grinder lift station with 2,300 LF of 1½ inch force main, 9,000 SY of asphalt pavement and 5,500 SY of shell parking area, and numerous site improvements such as sidewalk, benches, railings, etc.

QLH assisted the City in applying for grant funding through Florida Inland Navigation District (FIND), which they were successful in being awarded $500,000 toward the construction.

QLH obtained the services of J. Pendergast, Architect, to provide the restroom building design and construction documents. The restroom building is completely solar powered using photovoltaic panels and a standby battery system. DMC provided waterward design and permitting efforts for the boat ramp and docks.

The construction cost for this project is $1,286,000.

City of New Smyrna Beach

North Causeway Boat Ramp Park Improvements

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: Khalid Resheidat, P.E.,
Assistant City Manager, (386) 410-2612
Completed: May 2015
Cost: Bid = $824,800; Final = $824,763
Duration: Original = 210 days; Final = 170 days

The city of New Smyrna Beach obtained a F.I.N.D. Grant to fund improvements to an existing heavily used boat ramp park on North Causeway. The City selected QLH to provide engineering, design, bidding and construction phase services for the project.

The project consisted of seawall and sidewalk replacement, wood dock rehabilitation, sidewalk improvements, replacement of the restroom building and parking lot pavement with stormwater improvements.

The project was bid in October 2014 and awarded in December 2014. Construction was completed under budget for a cost of $824,800 in May 2015.

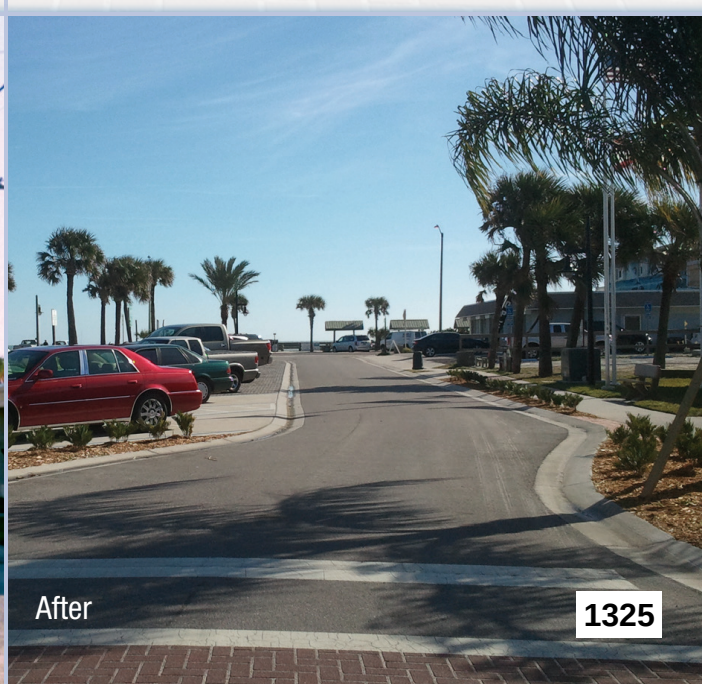
City of Flagler Beach

Downtown CRA Utility Undergrounding, Streetscape, & Stormwater Improvements

QLH Project Manager(s): David King, P.E.
Contact: Kay McNeely, Environmental Programs Manager, (386) 517-2000 ext 248
Completed: January 2013
Cost: $4,434,935 (estimated for all phases)
Duration: 990 days (estimated for all phases)

The City of Flagler Beach desired to construct utility undergrounding and streetscape improvements in their CRA. They also desired to pursue stormwater improvements in the CRA. The basis of design for subject improvements was the City's adopted Downtown Master Plan and Stormwater Master Plan.

QLH provided survey, design, permitting, bidding, and construction phase services for this project. Design drawings and specifications were prepared for the following: utility (FP&L, Brighthouse, & AT&T) conduits and structures, electrical service conversions for commercial properties, on-street parking improvements, stormwater improvements, road resurfacing, sidewalk improvements, right-of-way landscaping, irrigation, and conduit for future street lighting.



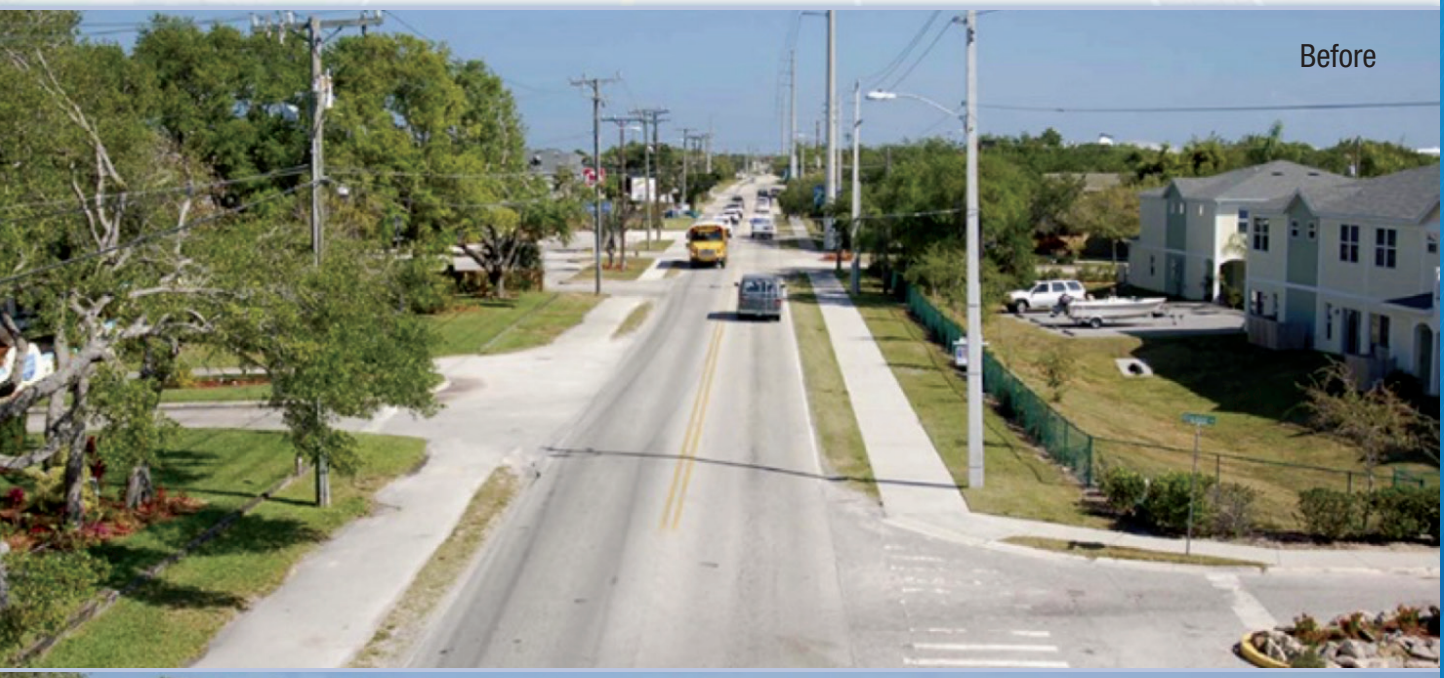
The project consisted of reconstruction of asphalt roadways with the addition of concrete curb/gutter, open paver pervious parking spaces, concrete sidewalk, and related work. It also included the installation of 15" – 36" diameter storm pipe and exfiltration trench, storm structures, and related work. The undergrounding and streetscape included the installation of FPL provided electrical conduit, structures, equipment pads, and other miscellaneous streetscape features. One phase of this project entailed converting 78 existing electrical services from overhead FPL facilities to new underground FPL facilities.

The stormwater improvements included the construction of approximately 4,200 LF of primarily 36" exfiltration pipe and trench to treat runoff from an approximate 32 acre urban watershed. LID techniques were incorporated including approximately 9,900 SF of open/pervious paver parking areas. The stormwater improvements were retrofit in nature serving a developed urban watershed that previously had little to no stormwater collection, conveyance or treatment facilities.

Funding assistance was provided for grants from FDOT and SJRWMD. QLH and selected sub-consultants were responsible for grant applications, disbursement requests, and compliance documentation. The construction cost for all phases of this project is approximately $4,434,935.

Before

After



City of Cape Canaveral

North Atlantic Avenue Streetscape

QLH Project Manager(s): David A. King, P.E.
Contact: Jeff Ratliff, Deputy Director Public Works Services, (321) 868-1240
Completed: September 2016
Cost: $2,756,815
Duration: 240 days

The North Atlantic Avenue Streetscape Improvements project consisted of complete streets improvements to 1.1 miles of existing roadway including asphalt pedway, concrete sidewalks, curbs and driveways, mast arm signalization, decorative streetlights, signage, patterned pavement, landscaping and irrigation funded with FDOT LAP funds. The City planned for the North Atlantic Avenue Improvements Project in the City's adopted Capital Improvement Program (CIP). QLH provided survey, design, and permitting assistance, along with EOR Services during construction.

The project was bid in March 2015, then rebid in August 2015 due to higher than expected bid costs. The rebidding resulted in a bid of $2,756,815.50. Construction started in February 2016 and is expected to be finished by September 2016.

Before

After

City of Port Orange

White Acres Utility Improvements

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: Kenny Ho, P.E., Utilities Engineer & Construction Manager, (386) 506-5754
Completed: March 2017
Cost: Bid = $1,338,882; Final = $1,320,341
Duration: Original = 270 days; Final = 270 days

The White Acres subdivision is a mix of residential properties from 0.2 acres to over 2 acres with on-site sewage treatment. The City of Port Orange targeted the subdivision for a septic tank elimination project. QLH prepared a concept plan and conceptual costs along with an estimate of pollution abatement levels due to installing a central gravity sewer system.

In addition, the existing stormwater system was substandard and in need of rehabilitation. The City requested QLH design an improved drainage system to eliminate unsightly ditches and culverted driveway crossings. Over the years, the ditches had become over excavated, which results in standing water that may be health hazard due to the septic system leaching into the ditches. The drainage system included replacing the ditches with a piped drainage system.

QLH provided design and permitting for the improvements which was bid in July 2016 at a cost of $1.29 million. The City obtained grant funds from three different sources to construct the project including FDEP, SJRWMD, and CDBG. The funds obtained allowed the City to construct the project at minimal cost to the residents.

City of New Smyrna Beach

Flagler Avenue Seawall, Boardwalk, Pavilion and Parking Area

QLH Project Manager(s): Brad T. Blais, P.E.
Contact: Khalid Resheidat, P.E., Assistant City Manager, (386) 424-2205
Completed: September 2012
Cost: Bid = $899,495; Final = $884,922
Duration: 270 days

QLH provided survey, planning, bidding and design services for this project which was funded by the City of New Beach and their CRA.

The project consisted of the demolition of selected utilities, old restrooms and storage buildings. A new parking lot was designed with native landscaping, sidewalks and new utilities.

An entirely new restroom and shower facility was included in the project along with a total rehabilitation of the boardwalk and pavilion. The seawall was upgraded with new tie-backs and a cast-in-place concrete seawall cap.

Flagler Avenue is the social center of New Smyrna Beach and the beachfront pavilion and parking area is a focal point for the entire area.

Architectural Consultant Williamson, Dacar & Associates (WDA) assisted with developing an architectural theme for the pavilion, restrooms and parking area. Blue tile roofs and matching tile mosaics created a fresh look to the time worn facility. Decorative pavers, stainless steel cable railing and native vegetation combined to provide a usable, low maintenance facility that can accommodate hundreds of visitors each day.

City of Satellite Beach

Cassia Basin Stormwater Improvements

QLH Project Manager(s): David A. King, P.E.
Contact: Allen Potter, P.E., Public Works Director, (321) 777-2309
Completed: April 2010
Cost: $2,658,679 (estimated for all phases)
Duration: 540 days (estimated for all phases)

This project involved the construction of various retrofit improvements to the City's Cassia Basin which drains to the Banana River Lagoon (BRL). The project was completed in advance to the BRL Basin Management Action Plan (BMAP) adopted in 2012 and the improvements provided enough credits to the City to achieve their reduction goals for the first 5 to 10 years of the BMAP. The project was funded by a FDEP 319h grant and consisted of the construction of various stormwater treatment and conveyance improvements throughout the Cassia basin including two nutrient separators, retrofit swales, exfiltration piping and related work. The City acquired the grant for the first two (2) phases with assistance from the City's previous consulting engineer. QLH reevaluated the proposed improvements and proposed modifications of the scope to FDEP due to actual field conditions and the ability to better the design. Upon FDEP approval, QLH designed and permitted the project then assisted the City in bidding the project. QLH provided construction contract services with the City providing inspection services. Early during construction, the contractor went out of business and QLH assisted the City in seeking resolution through the bonding company. The City re-awarded the project to the original second low bidder and QLH worked with the contractor to expedite the construction so to avoid losing the grant funding from FDEP. The original low bid was $1,053K and the project was able to be constructed for $980K due to savings that were realized during construction. The third (3) phase of the project was also funded by a FDEP 319h in the amount of $1,255,230.80. The project was designed to incorporate the construction of a 8 foot wide pedway which replaced a previous on street bike/ped lane which was a safety concern. The Cassia corridor is within the City's CRA and funding from the CRA was utilized for decorative paver brick crosswalks, landscaping and hardscaping.

QLH provided redesign services (for Phases I and II), design services, permitting assistance, bidding assistance, construction phase services and grant assistance. QLH also provided the pre-construction and post construction water monitoring and analysis. QLH successfully negotiated with FDEP the ability to address all three (3) phases of the project with one Quality Assurance Project Plan (QAPP) and final report. This saved the City considerable money on unnecessary monitoring and reporting.

City of South Daytona

Ridgewood Avenue (US1) Streetscape Improvements

QLH Project Manager(s): David A. King, P.E.
Contact: Les Gillis, Public Works Director, (386) 322-3080
Completed: February 2013
Cost: $4,500,000 (estimated for all phases)
Duration: 630 days (estimated for all phases)

The project involved the installation of approximately 94,000 LF of 6", 4", 3", 2", and 1 ½" conduit for the undergrounding of existing aerial utilities along Ridgewood Avenue (US1) between Beville Road (SR400) and Big Tree Road. The installation of approximately 4,300 linear feet of 10", 6", and 4" reclaimed water mains along with the installation of various appurtenances for the conduit and reclaimed water main were also included.

The service conversion and median lighting portion of this project consisted of the installation of approximately 40 underground utility services for conversion from existing overhead utilities to new underground facilities. Installation of a roadway median lighting system for accent/up-lighting of existing landscaping is also included.

The streetscape improvements to the existing roadway includes replacement of existing 5' wide sidewalks with 6' wide decorative sidewalks, removal of on-street parking, addition of bicycle lane, replacement of curbing, ADA improvements, resurfacing, restriping, creation of utility/green strip behind sidewalk for landscaping, signalization improvements, and other related improvements. The construction cost of this phase is estimated at $4.5 million.

City of New Smyrna Beach

Sports Complex West Side Bleachers Design-Build Criteria Package

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: Khalid Resheidat, P.E.,
Assistant City Manager, (386) 410-2612
Completed: August 2015
Cost: $1,041,792
Duration: 180 days

The City of New Smyrna's Sports Complex west side bleachers were in a state of decay due to low grade material installed with the previous reconstruction project. City public works requested QLH provide a proposal to reconstruct the entire bleachers and remodel the press box. The City wanted costs on three different seating capacity configurations with costs. QLH along with Carl Taylor, structural engineer, provided the cost and the preferred configuration was selected.

Due to the short duration of time for construction of the improvements, the City decided to proceed with design-build method of delivery. The City wanted the stadium open by the start of the 2015 high school football season. QLH provided the City a Design-Build (D/B) criteria package which included 60% design plans for bidding the project which took place in February 2015. QLH provided bidding and contractor selection assistance to the City who awarded the contract to Canaveral Construction, Inc. on March 16, 2015.

QLH also provided construction oversight for the demolition and replacement of the bleachers. The selected contractor's design, review and approval by QLH/Taylor took approximately 3 months. Construction began in June 2015 and was completed by August 2015 ready for football. The city was pleased with the outcome of the project and the timely delivery.

City of Edgewater

Fire Station #55

QLH Project Manager(s): Brad T. Blais, P.E.
Contact: Brenda Dewees, Public Works Director, (386) 424-2476
Completed: June 2012
Cost: Bid = $1,879,000; Final = $1,844,956
Duration: Original = 300 days; Final = 330 days

QLH provided planning, design, permitting and construction phase services for the City of Edgewater Fire Station #55 project. QLH sub-contracted Schweizer Waldroff Architects, Inc. for architectural services. The project was constructed using a combination of City and FEMA grant funds. The total bid amount was $1,829,000 and $1,141,357 was provided by FEMA. This grant was authorized under the American Reinvestment and Recovery Act (ARRA) and compliance with 'Buy American' and 'Davis-Bacon Wage Rates' was a requirement of the grant. QLH provided all grant administration and compliance services.

The project consisted of a 11,000+/- square foot fire station with living areas, administration, dormitories, dining facilities and apparatus bay/ utility areas. Site improvements included parking/ driveway areas, landscaping and signage. The project is located on US Highway #1 (Ridgewood Avenue) in S.E. Edgewater.

City of Cocoa Beach

Minutemen Causeway Stormwater & Streetscape Improvements

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: Joanie Regan, City of Cocoa Beach, (321) 868-3292
Completed: Anticipated June 2017
Cost: Bid = $5,100,458; Final = on-going
Duration: Original = 290 days; Final = on-going

Minutemen Causeway is the main street corridor for the City of Cocoa Beach, located in Brevard County on Florida's east central coast. The corridor runs east to west across the five-block stretch of the Atlantic coastal barrier island. The City of Cocoa Beach has designed and permitted a project with state-of-the-art stormwater treatment trains. The existing runoff discharges into the Banana River Lagoon, a waterbody that is part of the Indian River Lagoon (IRL) system, a designated "Estuary of National Significance." The work located from the Atlantic dune line west two blocks along Minutemen Causeway to Cedar Avenue will have three major Low-Impact Design (LID) best management practices (BMPs) in its treatments trains – these include native landscape bioswales/tree filters, underground exfiltration and pervious pavers. The project will provide treatment for all stormwater flowing from the B-1 through B-4 sub-basins for the entire 20.28-acres drainage basin of urban downtown, densely developed land.

Sorption media will be used to further reduce the nitrogen and phosphorus pollution mass before entering the groundwater. This particular sorption media has proven effective i.e. Marion County (FDEP, 2011) for removing phosphorus and nitrogen before the stormwater infiltrated into the groundwater table. Biosorption Activated Media (BAM) is media that removes pollution using chemical sorption as well as biological removal. The bid amount was $5,100,458.

QLH is providing construction phase services including construction, administration, and inspection for the project. The City has obtained grants from FDEP, SJRWMD, and FDOT through Local Agency Program funds. QLH is assisting the City with all grant requirement compliance.

City of Port Orange

Cambridge Canal Basin Drainage Improvements

QLH Project Manager(s): Andrew M. Giannini, P.E.
Contact: Kenny Ho, P.E., Utilities Engineer & Construction Manager, (386) 506-5754
Completed: August 2009
Cost: Bid = $5,112,935; Final = $5,436,667
Duration: Original = 390 days; Final = 390 days

After significant flooding occurred during the tropical storms in 2004, the City of Port Orange retained QLH to study the 700-acre Cambridge Canal basin and recommend improvements. The study recommended a basin-wide approach to solving the problem by creating two additional outfalls, one in the north and one in the south part of the basin. Two large wet detention ponds and a stormwater pump station were constructed to help offset/mitigate for increase discharge rates during extreme events.

The City obtained grant funds through FEMA, SJRWMD and FDEP to partly fund the construction. The remainder of the project was funded with State Revolving Fund Loans.

The project is also part of a larger Regional Aquifer Management Program (RAMP). The canal and pond system retains normal rainfall runoff for diversion into the City's reclaimed water system. The reclaimed water system includes 175 acres of storage/recharge capacity for excess reclaimed water and stormwater. Annually, the stormwater augmentation system contributes over 1 MGD to the water budget.

Litigation

Quentin L. Hampton Associates, Inc. (QLH) has had no litigation in the past five (5) years, including no class actions, Attorney General investigations and individual court and administrative agency cases.

Continuing Contracts Since 1968

City of Cocoa Beach

Golf Course Upland Seawall Project

QLH Project Manager(s): Andrew M. Giannini, P.E.
Completed: July 2016
Cost: Original Bid = $1,648,500;
Final = $1,758,470 (due to unforeseen material found)
Duration: Original = 225 days; Final = 209 days

The City of Cocoa Beach had experienced extensive erosion to the City Golf Course shoreline due to tropical storms. The City Public Works staff pursued funding from the State of Florida to fund an "upland seawall" that had been recommended to protect the remaining shoreline and golf course from further erosion. The golf course property would eventually erode to a point that it would most likely create unplayable conditions.

QLH provided design, permitting bidding and construction phase assistance to the City to construct the seawall within a critically short time frame. The City had to spend the funds by end of July 2016. The City obtained our services starting in August 2015. The project was design and permitted and bids were received on October 16, 2015. The contractor was given the notice to proceed for November 30, 2015. The Project included construction of 6700 lineal feet of vinyl sheet pile wall with a concrete cap and tie backs, construction of miscellaneous pipe extensions through the wall and restoration of the golf course property including cart paths.

The seawall was installed approximately 10 to 15 feet landward from the top of slope and or wetland vegetation, or any reasonable distance that construction will not disturb the shoreline wetlands vegetation.

Oaklea Bridge Replacement

QLH Project Manager(s): David A. King, P.E.
Completed: August 2012
Cost: Original Bid = $797,529; Final = $900,736
Duration: Original = 210 days; Final = 218 days

The project includes the replacement of existing Oak Lea Drive Bridge crossing Reed Canal for the Coventry Forrest Subdivision. The bridge is to be constructed with a pre-engineered arch type structure. The pre-engineered arch-culvert's interiors and exteriors are to be covered with decorative manufactured brick veneer finish, which is to be determined by the City of South Daytona. Bridge typical section includes the construction of two travel lanes, Type-F curb and gutter adjoining both sides, 6-ft concrete sidewalks along both sides, and barrier wall with a decorative powder coated, welded steel rail. Project includes the construction of full depth pavement for the limits of the bridge as well as the apron of the intersection of Oak Lea Drive and Reed Canal Road. Alternate additive work includes the milling and resurfacing administered for the project limits along Reed Canal and for the entrance of Coventry Forrest along Oak Lea Drive. For maintenance of traffic, temporary road construction is required and will include reconstruction of swales and wood stockade fence. Detours and detour signing during time of construction will be required. Additional construction services include the construction of concrete flumes, replacement of a concrete driveway, Type-F curb and gutter, guardrail with connections to wingwall of bridge, pedestrian curb-cut ramps, and a concrete pad (4" thick) and pre-fabricated covered bus shelter (with matching aesthetics to the bridge), and the removal of the existing and construction of a new subdivision sign. Miscellaneous construction services include the removal of portion of the existing and construction of the new subdivision wall, curb and gutter transitions, decorative lighting, bronze dedication plaque, and painting. Project includes signing, pavement marking for crosswalks, 6-ft wide patterned pavement (Brick Red Herringbone Pattern) for crosswalks, and roadway striping. Drainage improvements include the construction of a rip-rap transition to the west and east sides of the bridge, pre-engineered arch culvert, temporary cofferdams, concrete flumes, and turbidity barrier. Extensive utility and electrical work is required and coordination with utility stakeholders is required. Landscaping, removal of trees and corresponding irrigation work will be required.

US1 Utility Undergrounding Secondary/Service Conversions

QLH Project Manager(s): David A. King, P.E.
Completed: Anticipated October 2017
Cost: Original Bid = $3,092,697; Final = on-going
Duration: Original = 441 days; Final = on-going

QLH is providing design, permitting, bidding assistance, along with construction contract administration and inspection on this utility undergrounding project along approximately 1.7 miles of US1 The first phase includes the design, permitting and construction of individual electrical and communication services to all of the properties fronting US1. The construction cost of the first phase was approximately $300,000. Construction completion is expected in September 2016. This secondaries phase required individual building permits for all properties. The second, primaries phase design includes coordination with FPL, Brighthouse Networks, AT&T, and other existing communication providers such as Level 3 Communications, Volusia County and FDOT ITS for their design of their undergrounded facilities, followed by the QLH design of the necessary conduits for all of the facilities into one set of construction documents. Permitting includes FDOT Utility permits, SJRWMD/ACOE Environmental Resource Permitting for LPGA Canal crossing and building permits for the electrical service conversions. Also included in the design was the addition of FPL street lighting to current FDOT requirements and additional underground conduit for the City's future communication uses. The construction cost of the second phase is yet to be determined. Construction completion is expected in October 2017.

Florida Avenue Streetscape Improvements

QLH Project Manager(s): David A. King, P.E.
Completed: Anticipated June 2017
Cost: Original Bid = $3,344,222; Final = on-going
Duration: Original = 240 days; Final = on-going

The project scope includes complete streets improvements along Florida Avenue from King St. (S.R. 520), south of Rosa L Jones Drive. The project length is approximately 0.49 miles. The project includes roadway reconstruction, new sidewalks, new curb and gutter, on-street parallel parking (permeable interlocking concrete unit pavement), minor storm water improvements, pedestrian scaled decorative streetlights, thermoplastic striping, stamped asphalt crosswalks, signage, landscaping, and irrigation. The new sidewalk will be a combination of concrete and brick pavers. Existing driveways are to be reconstructed to meet ADA requirements along with the new sidewalks. The project is being bid and constructed as a joint project with water main replacement improvements (designed by others).

The project is being funded with FDOT LAP funding. QLH provided design services for all of the complete streets improvements. QLH is also providing bidding services and CEI services for the entire project including the water main replacements.

The estimated construction cost is $2,929,200. Bidding is to be completed in April 2016 with construction expected between July 2016 and March 2017.

County of Volusia

Rio Way Drainage Improvements

QLH Project Manager(s): Andrew M. Giannini, P.E.
Completed: On-Going (Design & Permitting complete as of December 2016)
Cost: On-Going (Estimate $1,660,000)
Duration: On-Going

In October 1995, Volusia County completed the Nova Canal System Watershed Management Plan Report (MPA) which evaluated 22.4 square miles of the Nova Canal watershed which outfalls into the Halifax River. The Nova Canal system encompasses three major outfalls; LPGA Canal in Holly Hill, the Reed Canal in South Daytona, and the Halifax Canal in Port Orange. After many studies to lessen the flooding of the Riviera Oaks Subdivision (Rio Way), the first phase of improvements for this area included Riviera Oaks Stormwater Management Park (circa 1998). In 2002, Phase 2 of the Riviera Oaks Stormwater Park was completed. However, further flooding of the Rio Way homes prompted the County to purchase the majority of the homes to create an expanded Stormwater pond.

QLH's services were obtained to provide design, permitting and grant application assistance to the County. The Rio Way Drainage Improvement and Utility Relocation project is located within the Rio Way and the Riviera Oaks Dog Park. The popular dog park, has a small dog area, shade trees, benches, and drinking water. It was originally permitted to assist with solving the flooding problem with the Rio Way homes. As part of this project, the County of Volusia has purchased and demolished twenty-one (21) residential properties within the Riviera Oaks Subdivision with a grant obtained from the Division of Emergency Management (DEM) in 2008. The Rio Way project includes construction of the pond and merge it with the Riviera Oaks pond to become a single large pond that will provide flood attenuation and water quality improvement protection to the area. QLH continues to assist the County with grant application and will be assisting with bidding and construction once the funding is obtained.

SWORN STATEMENT UNDER SECTION 287.133(3) (1) FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for RFQ# 12-17-ENG Continuing Professional Engineering Services

This sworn statement is submitted by Quentin L. Hampton Associates, Inc.

[Name of entity submitting sworn statement]

whose business address is: 4401 Eastport Parkway, Port Orange, FL 32127 and (if applicable) its Federal Employer Identification Number (FEIN) is 59-1221261. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: _____. My name is Brad T. Blais, P.E. and my relationship to the entity named above is President.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

X Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

ADDENDUM 1

RFQ 12-17-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to Request for Qualifications **RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES,** issued April 1, 2017.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted RFQ documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation, RFQ 12-17-ENG, as though it had been issued at the same time and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The bid opening remains May 9, 2017 at 3:00 PM.

Vendor questions:

1. Are you wanting a statement from our financial institution to satisfy this requirement or are you seeking something else?
   Would you please clarify what you would like to see?

   Answer: Financial Statement, credit score, any unsatisfied liens or judgements.

2. Your RFQ states that proof of insurance certification is to be submitted with the response. However, there are no guidelines as to dollar amounts and coverages you seek in order to get the COI from our provider.

Will you be releasing insurance parameters on coverages so I can give that to my provider and generate the proper Certificate of Insurance?

Answer:

Listed below are various insurance requirements that must be met by the company that the City contracts with for services. Your company **is not required** to submit proof of insurance with this RFQ however, failure to provide proof of insurance as proscribed by this document no later than three (3) working days after your company is notified that it has been selected will automatically disqualify your firm from further consideration.

Workmen's compensation insurance in accordance with the laws of the State of Florida sufficient to secure the benefits of the Florida Workmen's Compensation Law for all employees of the Contractor and employer's liability coverage providing limits as specified in the following paragraph:

Comprehensive General Liability $1,000,000 per person
Bodily Injury, including Death $1,000,000 each occurrence
Property Damage $1,000,000 each occurrence
$1,000,000 aggregate

Comprehensive Auto
Auto Liability
$ 500,000 each person
Bodily Injury, including Death $ 500,000 each occurrence
Property Damage $ 200,000 each accident

Professional Liability: (errors and omissions) $1,000,000 (Minimum)

Furthermore, the Consultant will be required to indemnify, hold harmless, and defend the City of New Smyrna Beach, and their officer and directors, representatives, and employees from any and all suits or claims for damages or injuries, including death, to any and all persons or property, arising out of the Consultant's work, product, services or operations under this procurement including any negligent act or omission on the part of the selected firm or its subcontractors, if any.

3. Please clarify –

Under Tab 2 Experience – Please provide documentation/summary of experience of no less than three (3) previous projects for each of the items below –

Is it acceptable to provide three projects that provide experience with all the bullets?

OR

Do we need to provide 3 projects for each bullet, if so, can they be the same projects if applicable?

Answer: It is acceptable to provide three projects which provide all the experience required, if applicable. We are looking for three examples of your experience for each bullet, regardless of whether it was in combination with other bullet items.

4. Which tab should we use for the required forms? Should we create Tab 5 for the forms?

   Answer: Yes, Tab 5 will be fine for the forms.

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 1st day of August, 2017, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and **Parker Mynchenberg & Associates, Inc.**, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 12-17-ENG, Continuing Professional Engineering Services, and is for one (1) of the seven (7) awarded firms. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services including design services associated with general Civil Engineering practices to include but not limited to developing a complete set of site plans involving paving, grading, utilities, landscaping and stormwater elements, in compliance with the City's Land Development Regulations, as well as state and federal agency guidelines. Such services may require drainage calculations, utility hydraulic calculations, fire flow calculations, stormwater modeling, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses.

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for professional Civil Engineering services and/or other such services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or

supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to

proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders;

at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require

with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Volusia County, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means

and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-

consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the

CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public

agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

Re: REQUEST FOR QUALIFICATIONS – RFQ 12-17-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES
LETTER OF INTEREST – PROFESSIONAL ENGINEERING SERVICES

I am pleased to offer the following qualifications for your review associated with the City of New Smyrna Request for Qualifications-RFQ-12-17-ENG, *Continuing Contracts for Professional Engineering Services.* As requested in the RFQ, please find enclosed the following:

1. One (1) original, unbound paper version, marked "Original".
2. Three (3) copies, marked Copy 1 of 3, 2 of 3 and 3 of 3.
3. One (1) electronic copy on a flash drive.

The firm is locally owned and operated in Holly Hill by Parker Mynchenberg, P.E., R.L.A. Parker Mynchenberg & Associates, Inc. (PMA) has utilized its Design Team approach in the past on over one hundred successfully completed projects for various municipalities, including the City of Daytona Beach, the City of Daytona Beach Shores, the City of New Smyrna Beach, the City of Ormond Beach the City of Port Orange, Flagler County and Volusia County.

PMA has an extensive working knowledge of the City of New Smyrna Beach Codes and Ordinances as a result of past and present design services performed within the City. PMA is staffed with licensed Engineers and Registered Landscape Architects in addition to a team of CADD Technicians & Support Staff combining years of experience in the New Smyrna Beach area. Our office includes the most up-to-date computer programs and equipment necessary to complete projects in a professional and timely manner. PMA understands the importance of staying within budget requirements whether the project is being performed for private developers or municipalities such as the City of New Smyrna Beach and uses the expertise acquired over the years to meet these requirements.

PMA has had the pleasure of designing numerous engineering projects over the years with the City of New Smyrna Beach. PMA designed the following projects:

1. Central Fire Station, New Smyrna Beach
2. Pedestrian Trail, New Smyrna Beach
3. Esther Street Beach Front Park and Stormwater Improvements, New Smyrna Beach
4. Flagler Avenue Streetscape, New Smyrna Beach
5. Municipal Sports Complex - Bleachers
6. Julia Street Stormwater Improvements
7. Holland Park
8. S.R. 44 Sanitary Sewer Improvements
9. Flagler Avenue Beach Access

PMA is capable of designing any civil or public facility engineering project and has been in the Civil Engineering design business for 33 years. Additionally, PMA brings two staff Landscape Architects to provide a "turn-key" design, which includes Civil Engineering and Landscape Architecture for public facilities.

I look forward to again working with the City of New Smyrna Beach as an Engineering Continuing Consultant and would like to thank you in advance for the opportunity to provide PMA's qualifications for your consideration in the review process.

Yours truly,

Parker Mynchenberg, P.E., R.L.A.
President

QUALIFICATIONS OF FIRM

PARKER MYNCHENBERG & ASSOCIATES, INC.
COMPANY PROFILE

PMA Profile

Parker Mynchenberg & Associates, Inc. (PMA) is a locally owned and operated small business that was incorporated in Volusia County, State of Florida, in 1984. PMA is owned by Parker Mynchenberg, P.E., R.L.A. PMA provides Professional Civil Engineering and Landscape Architectural services to both public and private sector clients in Volusia and Flagler Counties.

PMA, employs fifteen employees, all of which live in Volusia and Flagler County. Parker will be the **Project Engineer** and take personal charge of the project along with Steven R. Buswell, P.E., R.L.A., who has over sixteen years of experience with PMA and oversees permitting, scheduling and project management. In addition to the full time employees, Dominic D'Agresta, P.E. is a eight year part time employee who assists PMA with peer review and quality control.

ERAU – Welcome Center

History

Parker Mynchenberg & Associates, Inc. (PMA) is located at 1729 Ridgewood Avenue, Holly Hill, Florida 32117. The firm was established over 33 years ago and has a reputation for combining experience and work ethics to achieve quality design work, while promoting customer satisfaction. PMA has designed and permitted over one hundred municipal projects.

Trader Joe's – Distribution Center

Parker Mynchenberg, P.E., R.L.A. is a graduate of Mainland High School and obtained his Bachelor of Science Degree in Engineering from the University of Central Florida. Since graduating, he has practiced Civil Engineering and Landscape Architecture Design in Volusia and Flagler Counties and is licensed in the State of Florida as a Professional Civil Engineer, Registered Landscape Architect, General Contractor, Commercial Pool Contractor, and Real Estate Broker.

Steven R. Buswell, P.E., R.L.A. is a Professional Engineer and Registered Landscape Architect with a Master of Engineering and a Bachelor of Science Degree in Environmental Engineering from the University of Florida. He has worked as an Associate Engineer with Parker Mynchenberg & Associates, Inc. since 2001. He brings to the company a thorough background in Stormwater Design and Civil Engineering Design.

PMA Staff

PMA employs eight CADD Technicians:

- Cherie Harnden, Daytona Beach — 34 years with PMA
- Bruce Harnden, Daytona Beach — 28 years with PMA
- Don French, New Smyrna Beach — 17 years with PMA
- Joe DeCilla, South Daytona — 32 years with PMA
- Shane Brumenschenkel, DeLand — 16 years with PMA
- Bruce Bergstrom, Port Orange — 14 years with PMA
- Steve Waters, Port Orange — 2 years with PMA
- Matt Burnazos, New Smyrna Beach — 2 years with PMA

PMA employs five Support Staff

- Kyle Mynchenberg, Ormond Beach — 5 years with PMA
- Angela Felderman, Volusia County — 3 years with PMA
- Odette Pomerleau, Daytona Beach Shores — 31 years with PMA
- Amanda Holden, Palm Coast — 2 years with PMA
- Kim Flaherty, Edgewater — 1 month with PMA

PMA is FDOT Certified for Minor Projects in the areas of Highway Design-Roadway, Minor Highway Design and Landscape Architecture.

Current Continuing Contracts/Current Workload

Parker Mynchenberg & Associates, Inc. (PMA) is currently under Continuing Consultant Services Contracts with the following Entities:

- Flagler County
- The City of Daytona Beach
- The City of Bunnell
- The City of New Smyrna Beach
- The City of Ormond Beach
- The City of South Daytona
- Volusia County School Board
- FPL

In the role as Civil Engineer, PMA provides FDOT Roadway/Transportation, Utility, Stormwater Management and Landscape Architecture Design Services to these municipalities and the School Board as projects are developed. Typical projects include elements of design and permitting, such as Roadway and Traffic Signal Design, Site Planning, Environmental Permitting, Roadway Design, Water Distribution, Wastewater

Collection Reuse/Irrigation Design, Parks and Recreation Facilities, Landscaping Improvements, Waterfront Marina Permitting, Stormwater Management and Drainage Improvements.

PMA's current workload allows Staff to expedite projects from design through permitting to construction quickly. PMA has a local reputation that includes providing the highest quality, accurate work product with the least amount of design time within budget.

Eagle Landing Apartments

Firm Qualifications and Capabilities – Civil Engineering

The majority of Civil Engineering projects involve the design of stormwater treatment facilities in order to meet the State's minimum requirements. PMA utilizes industry standard computer software in order to perform the dynamic routing calculations required to obtain St. Johns River Water Management District and Florida Department of Environmental Protection State Wide Environmental Resource (SWERP's) permits.

In addition to stormwater management, PMA has designed all elements of water distribution systems and wastewater collection systems. PMA uses WaterCAD software to calculate pressure losses in potable water, sanitary force mains and reuse systems for existing and proposed systems to determine the most efficient and effective way to make improvements. PMA has designed numerous sanitary pump stations – both submersible and wet-well mounted and is familiar with the design criteria necessary to obtain permits from FDEP and other agencies with required permitting.

BCU – Handfield Athletics Center

Surveying Capabilities

PMA sub-contracts with Daniel W. Cory Surveyor, LLC and Sliger and Associates, Inc. to ensure the most complete and accurate Property, Boundary, Topographic, Tree, Wetland and Utility Surveys are used in the preparation of project plans and permits.

Geotechnical Capabilities

PMA sub-contracts with Universal Engineering Sciences to address geotechnical permitting issues. PMA and Universal Engineering Sciences are currently working on multiple projects, and have worked together for over thirty years on over 300 projects.

Public Hearings and Public Meetings

Parker Mynchenberg & Steve Buswell are both experienced in public presentations at both Public Hearings and Neighborhood/Shareholder meetings. PMA has participated and made presentations in hundreds of Public Hearings associated with project design and permitting.

Landscape and Irrigation Design

The City of New Smyrna Beach – Central Fire Station

PMA has two licensed Landscape Architects on staff. With 95% of our projects designed and permitted in the Flagler/Volusia County areas, PMA has the local knowledge for specifying the appropriate plant species which thrive in this area. In addition, PMA has developed strong relationships with local landscape contractors to ensure quality material and installation. In concert with landscape design, PMA is well versed in the requirements of The City of New Smyrna Beach landscape and irrigation standards and their applicability to new construction.

Parks

PMA has designed numerous parks throughout the area. Depending on the needs of the community, the parks have incorporated elements such as parking lots, educational kiosks, restroom facilities, ADA accessibility, volleyball courts, shuffle board courts, ball fields, commercial swimming pools, and other water features.

Commercial Pool and Spa Design

In addition to Engineering and Landscape Design, Parker Mynchenberg is a licensed Pool Contractor. Over the past several years, PMA has designed a majority of commercial pools within this area, including The City of Daytona Beach's Cypress Street Aquatics Center (includes geo-thermal heating and cooling), City of Holly Hill City Pool, and the Ocean Center's Lazy River and kiddy pool. PMA has also designed hundreds of commercial pools and spas throughout the State.

Contract Administration

PMA has the experience to review shop drawings, perform site inspections, prepare change orders, review As-Built drawings, attend pre-construction meetings, attend neighborhood meetings, and perform other Contract Administration duties as required by The City of New Smyrna Beach.

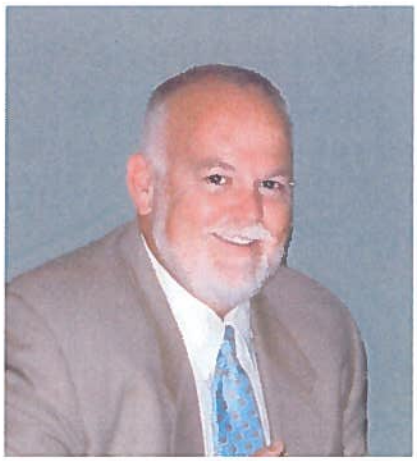
AutoCAD Capabilities with AutoCAD Version 2016

PMA has eight computer stations especially designed to utilize AutoCAD 2016 and the CADD technicians are thoroughly familiar with the AutoCAD 2016 software. All drawings produced at Parker Mynchenberg & Associates, Inc. utilize the most up to date computer software available. Additionally PMA can furnish The City of New Smyrna Beach with computer disks in AutoCAD or PDF format and hard copy prints of all drawings which are compatible with The City's Standard Specifications.

Internet Capabilities

PMA is fully computerized with high speed internet and has the capability of creating and emailing drawings and other documentation in JPG or PDF format as required, while doing so in a timely fashion.

Loss of Key Personnel



Both Parker Mynchenberg PE, RLA and Steven R. Buswell PE, RLA stay in constant communication with each other regarding the status of all projects in the office. This allows each one to specifically address issues that may arise on any given project in a seamless transition should for some reason there is a loss of key personnel.

STEVEN R. BUSWELL, P.E., R.L.A.

15 Highwood Ridge Trail
Ormond Beach, Florida 32174

PROJECT ENGINEER

EXPERIENCE

Steve is a Professional Engineer and Registered Landscape Architect specializing in Land Development. He has worked as an Associate Professional Engineer with Parker Mynchenberg & Associates (PMA) since 2001. He brings to the company a thorough background in Stormwater Design and Civil Engineering Design. Prior to joining PMA he was the Stormwater Design Engineer for The City of Daytona Beach. He is a graduate of the University of Florida with both and Master's and Bachelor's in Environmental Engineering.

His responsibilities at PMA include Project Management as well as performing all of the technical calculations and reports in order to obtain approval from the respective governing agencies. Following is a list of his Employers and Responsibilities at each position.

EMPLOYMENT

2001 – Present **Parker Mynchenberg & Associates, Inc.**
Holly Hill, FL
Project Manager

Project Manager of commercial developments and subdivisions from design through construction. Responsibilities include all related features associated with site development including design of stormwater management systems, roadways, paving and drainage plans, utility extensions, landscape architecture and irrigation system design.

2000 – 2001 **The City of Daytona Beach**
Daytona Beach, FL
Stormwater Design Engineer

Responsibilities include design and contract administration of municipal drainage projects associated with the City's Capital Improvement Program. Other duties include roadway design and utility extensions. Contact person for all of stormwater related projects, Community Rating System Coordinator, and Administrator of the NPDES Phase II Program.

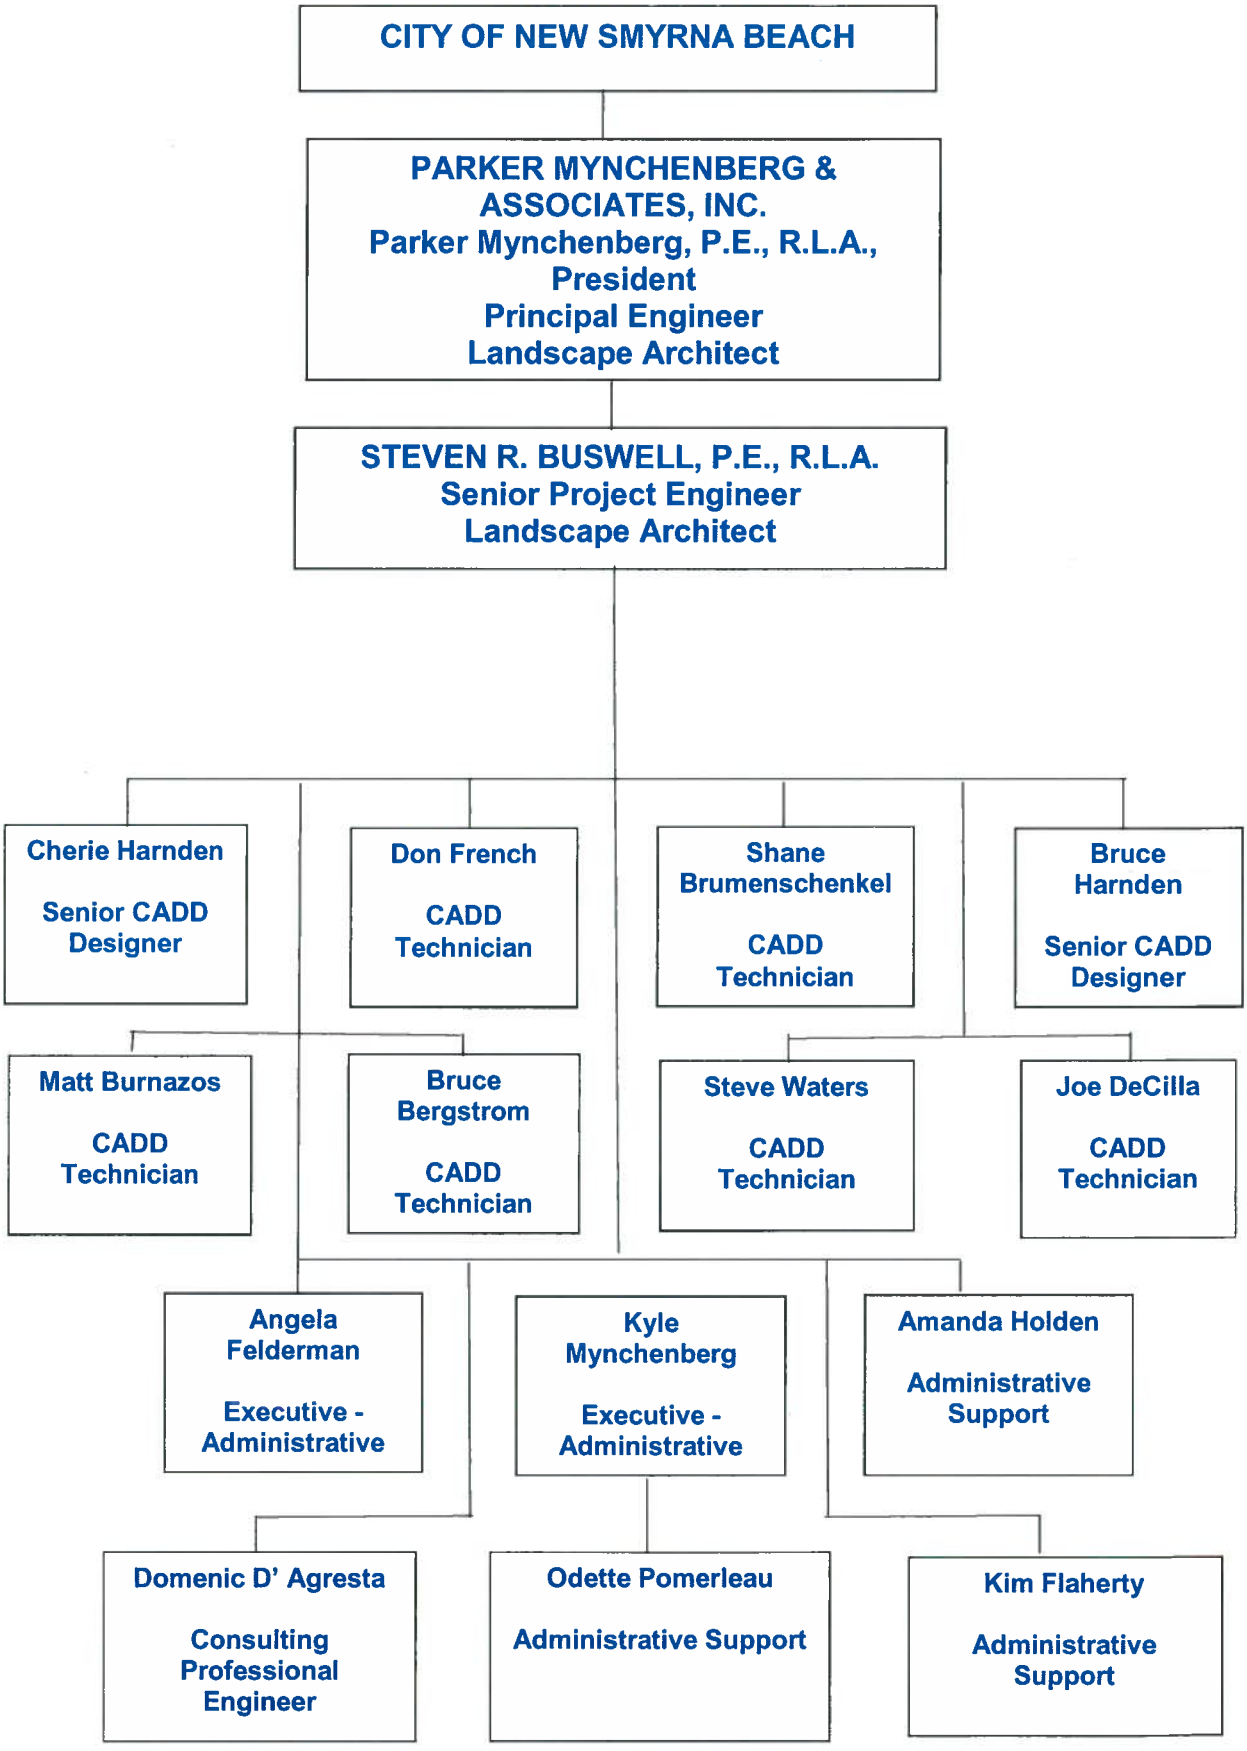
1998 – 2000 **The City of Ormond Beach**
Ormond Beach, FL
Civil Engineer

Manager of all private commercial developments and subdivisions for the City from design through construction. Responsibilities included review of all of the engineering related aspects of the development, including stormwater management system, roadway design, paving and drainage, and utility extensions. Contact person for all of water, wastewater, utility, and wetland permit applications.

EDUCATION

University of Florida
Master of Engineering, 1995
Environmental Engineering

University of Florida
Bachelor of Science, 1994
Environmental Engineering



REGISTRATIONS

Similar Experience

Parker Mynchenberg & Associates, Inc. (PMA) was incorporated in 1984 and during the past 33+ years has performed the Engineering and Landscape Architectural Design for numerous projects relating to park and recreation facility design. Experience and background includes, but is not limited to, the following areas:

1. Park and Beachfront Park Design, including Restroom Facilities and Handicapped Access.
2. Streetscape Design.
3. Water, Sewer and Drainage Improvement Design.
4. Recreational Facilities Design (including Tennis Courts, Bocce Ball Courts, Passive Stormwater Parks, and Active Water Features / Fountains).
5. Roadway Parking Lot Design.
6. Swimming Pool Design and Permitting.
7. Stormwater Permitting and Dredge and Fill Permitting.
8. U.S. Army Corps of Engineers Dock and Marina Permitting.
9. Florida Department of Environmental Protection Permitting.
10. St. Johns River Water Management District Permitting.
11. Florida Department of Transportation Permitting.
12. Volusia County Health Department Permitting.
13. Coastal Construction Permitting.
14. Synthetic and Natural Turf Soccer Fields and Softball Fields.
15. Seawall and Pavilion Design.
16. Landscape, Hardscape, and Streetscape.
17. Waterwise Irrigation Design.
18. Dune Restoration.

The firm's experience in the above areas includes the preparation and approval of plans and specifications for various park projects specifically associated with the Scope of Services being requested by the City of New Smyrna Beach. The following projects are recent examples of projects which have been designed and permitted by PMA:

Similar Projects

1. Daytona Beach Grounds Maintenance
2. Volusia County Off Beach Parking
3. Flagler Avenue Lifeguard Station
4. International Speedway Boulevard Streetscape
5. Halifax Humane Society Dog Park
6. Marine Science
7. S.R. 44 Sewer Improvements
8. Champion Elementary School City of New Smyrna Beach Facility
9. Westside Elementary School

Project Name: **Daytona Beach Grounds Maintenance**
Owner: **The City of Daytona Beach**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project included the design and permitting of a public parking lot totaling 40 spaces and a master stormwater management system which will be sized to provide treatment and attenuation of the adjacent residential apartment project proposed to be built together along with the associated landscaping and irrigation

Statement of Project Approach: The City of Daytona Beach requested a Concept Plan for a new Grounds Maintenance Facility. PMA met with stakeholders and reached a consensus to prepare a concept plan which included the required number of public spaces as well as Master planned the remaining property for future commercial .development. PMA worked closely with City staff in collaboration with the engineer of the MLK Lofts project to design and permit the necessary features in order to meet the deadline and within budget.

Project Name: **Volusia County Off Beach Parking**
Owner: **The County of Volusia**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project included the design and permitting of a new beachfront parking lot, totaling 100 parking stalls, a public beach access with ADA beach access ramp, lighting, signage, landscape, irrigation and drainage improvements.

Statement of Project Approach: The County of Volusia requested a design to maximize the number of public parking stalls. PMA designed a new parking facility meeting the target number of spaces of 100. PMA coordinated with both the County and FDOT regarding the access to the property. Furthermore, the project was designed and permitted by the State as improvements including an ADA ramp, shower facilities, and lighting occurred seaward of the Coastal Construction Control Line (CCCL).

Project Name: **Flagler Avenue Lifeguard Station**
Owner: **The County of Volusia**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project included the construction of a 1,900 square foot lifeguard station and associated parking. A portion of the project was located waterward of the Coastal Construction Control Line and required FDEP Division of Beaches and Shores permitting.

Statement of Project Approach: Working with Volusia County and Site Architect in coordination with the City of New Smyrna Beach and State of Florida Department of Environmental Protection, a site design was determined and permitted. Several stakeholder meetings were coordinated with County staff as well as the County's

Engineer of Record of the new seawall. The designs were cross checked to assure all elements of design were coordinated for a seamless project.

Project Name: **International Speedway Boulevard Streetscape**
Owner: **The City of Daytona Beach**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project included the improvements in the International Speedway Boulevard right-of-way from the easterly limits of Nova Road right-of-way eastward along International Speedway Boulevard to the westerly limit of U.S. 1 (Ridgewood Avenue) right-of-way, then continuing from the easterly right-of-way U.S. 1 to the westerly right-of-way of Beach Street. The project consisted of new lighting, sidewalk and paving features.

Statement of Project Approach: The City desired to place overhead electric underground and improve the intersection at Bethune Cookman University (BCU). The project included Florida Department of Transportation and City of Daytona Beach permitting. Several meetings were held with the State Officials to guarantee all financial requirements had been incorporated into the design. A design that met the City's and FDOT's requirements was met.

Project Name: **Halifax Humane Society Dog Park**
Owner: **Halifax Humane Society**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project included preparation of a Conceptual Site Plan, shop drawing review, attendance at the preconstruction meeting and Final Site plan and submittal to the City.

Statement of Project Approach: Evaluate the Scope of the project and determine the budget available for phasing of the project. Prepare overall landscape / scenic setback plan and meet with Halifax Humane Society Staff and Project Architect. Complete design and permitting of the entire project including dog park, parking facility, and grooming facility.

Project Name: **Marine Science Center**
Owner: **The County of Volusia**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project included the expansion and site improvements for the Marine Science Center located at Ponce Inlet including Final Site Plan approval and Landscape Architectural plans.

Statement of Project Approach: Work with stakeholders to facilitate a design for future expansion, including phasing. Several consultants including a specialty water quality engineer were required to be coordinated. Several utility concepts were prepared and evaluated from both an economic feasibility and environmentally sensitive standpoint.

Project Name: **S.R. 44 Sewer Improvements**
Owner: **The City of New Smyrna Beach**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project includes the coordination and payment of subconsultants, meetings, etc. for the design of sanitary sewer system improvements, including a duplex submersible pump station, along the south side of S.R. 44 from Glencoe Road to east of Wild Orange Drive.

Statement of Project Approach: Coordination with the Utilities Commission and City of New Smyrna Beach to provide gravity sanitary sewer in the area. The permitting challenges associated with this project included coordination between FDOT and Volusia County.

Project Name: **Champion Elementary School**
Owner: **Volusia County School Board**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project includes the design and permitting of the new Champions Elementary School located at the end of Tournament Drive. Facilities included a basketball court, playground, and recreational ballfields. The project included extensive Contract Administration through construction. The site plan included design of new parking facilities for Staff and the public. A new wet detention system was permitted to address the stormwater requirements associated with the Outstanding Florida Water (OFW) design criteria.

Statement of Project Approach: The project approach included meeting with the School Board and Site Architect to determine the required site features and make sure they were safely coordinated into the Site design. Best available information was used to evaluate site constraints and assure the design accounted for the physical parameters identified in those studies. The design was then value engineered to determine compatibility with the budget. Then a substantial QA/QC program was implemented to determine constructability.

Project Name: **Westside Elementary School**
Owner: **Volusia County Schools**
Engineer of Record: **Parker Mynchenberg, P.E.**

Project Description: The project includes the engineering and landscape architectural services associated with the school's addition/renovations.

Statement of Project Approach: The project approach included meeting with the School Board and Site Architect to determine the required site features and make sure they were safely coordinated into the Site design. Best available information was used to evaluate site constraints and assure the design accounted for the physical parameters identified in those studies. The design was then value engineered to determine compatibility with the budget. Then a substantial QA/QC program was implemented to determine constructability.

ADDENDUM 1

RFQ 12-17-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to Request for Qualifications **RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES,** issued April 1, 2017.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted RFQ documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation, RFQ 12-17-ENG, as though it had been issued at the same time and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The bid opening remains May 9, 2017 at 3:00 PM.

Vendor questions:

1. Are you wanting a statement from our financial institution to satisfy this requirement or are you seeking something else?
   Would you please clarify what you would like to see?

   Answer: Financial Statement, credit score, any unsatisfied liens or judgements.

2. Your RFQ states that proof of insurance certification is to be submitted with the response. However, there are no guidelines as to dollar amounts and coverages you seek in order to get the COI from our provider.

Will you be releasing insurance parameters on coverages so I can give that to my provider and generate the proper Certificate of Insurance?

Answer:

Listed below are various insurance requirements that must be met by the company that the City contracts with for services. Your company **is not required** to submit proof of insurance with this RFQ however, failure to provide proof of insurance as proscribed by this document no later than three (3) working days after your company is notified that it has been selected will automatically disqualify your firm from further consideration.

Workmen's compensation insurance in accordance with the laws of the State of Florida sufficient to secure the benefits of the Florida Workmen's Compensation Law for all employees of the Contractor and employer's liability coverage providing limits as specified in the following paragraph:

Comprehensive General Liability $1,000,000 per person
Bodily Injury, including Death $1,000,000 each occurrence
Property Damage $1,000,000 each occurrence
$1,000,000 aggregate

Comprehensive Auto
Auto Liability
$ 500,000 each person
Bodily Injury, including Death $ 500,000 each occurrence
Property Damage $ 200,000 each accident

Professional Liability: (errors and omissions) $1,000,000 (Minimum)

Furthermore, the Consultant will be required to indemnify, hold harmless, and defend the City of New Smyrna Beach, and their officer and directors, representatives, and employees from any and all suits or claims for damages or injuries, including death, to any and all persons or property, arising out of the Consultant's work, product, services or operations under this procurement including any negligent act or omission on the part of the selected firm or its subcontractors, if any.

3. Please clarify –

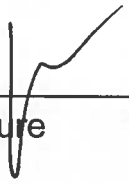
Under Tab 2 Experience – Please provide documentation/summary of experience of no less than three (3) previous projects for each of the items below –

Is it acceptable to provide three projects that provide experience with all the bullets?

OR

Do we need to provide 3 projects for each bullet, if so, can they be the same projects if applicable?

Answer: It is acceptable to provide three projects which provide all the experience required, if applicable. We are looking for three examples of your experience for each bullet, regardless of whether it was in combination with other bullet items.



4. Which tab should we use for the required forms? Should we create Tab 5 for the forms?

   Answer: Yes, Tab 5 will be fine for the forms.

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

SWORN STATEMENT UNDER SECTION 287.133(3) (1) FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for RFQ 12-17-ENG.

This sworn statement is submitted by Parker Mynchenberg & Associates, Inc.

[Name of entity submitting sworn statement]

whose business address is: 1729 Ridgewood Avenue, Holly Hill, FL 32117 and (if applicable) its Federal Employer Identification Number (FEIN) is 59-2400464. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: _____. My name is Parker Mynchenberg and my relationship to the entity named above is President.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

_X_ Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

CONTRACT RENEWAL
FOR PROFESSIONAL ENGINEERING SERVICES
PEGASUS ENGINEERING, LLC.

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES, via RFQ 12-17-ENG; and

WHEREAS, the City accepted the qualifications of PEGASUS ENGINEERING, LLC, (Firm); and

WHEREAS, the parties desire to enter into the third of five (5) possible one (1) year renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND PEGASUS ENGINEERING, LLC., AGREE AS FOLLOWS:

1. THE CITY and PEGASUS ENGINEERING, LLC., agree to all the terms and conditions as stated and contained in RFQ 12-17-ENG, including any/all Attachments, Addenda, and the firm's submitted Request for Qualifications, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the third of five (5) possible one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from July 10, 2024, and will continue for a year from that date.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 26th day of July, 2017, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and Pegasus Engineering LLC, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 12-17-ENG, Continuing Professional Engineering Services, and is for one (1) of the seven (7) awarded firms. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services including design services associated with general Civil Engineering practices to include but not limited to developing a complete set of site plans involving paving, grading, utilities, landscaping and stormwater elements, in compliance with the City's Land Development Regulations, as well as state and federal agency guidelines. Such services may require drainage calculations, utility hydraulic calculations, fire flow calculations, stormwater modeling, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses.

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for professional Civil Engineering services and/or other such services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or

supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT

shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to

replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Volusia County, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for

work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor

selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other

writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

REF: **Statement of Qualifications for the**
Continuing Professional Engineering Services
RFQ 12-17-ENG

Dear Sir or Madam:

Pegasus Engineering, LLC appreciates this opportunity to submit our qualifications to provide the City of New Smyrna Beach with professional engineering services, as we have successfully done in the past.

Pegasus is a Seminole County (Winter Springs) based public infrastructure engineering firm primarily providing planning, engineering, design, permitting, construction phase services, and grants / loan assistance to Florida cities, counties and state agencies. The extensive experience and accomplishments of our firm's senior personnel on highly successful infrastructure projects for local governments is unsurpassed in terms of responsiveness, quality of services, and in meeting schedules and budget objectives.

- **David Hamstra, P.E., CFM** with over 32 years of experience, will serve as our Team's Program Manager.
- **Greg Teague, P.E., CFM** with over 30 years of experience, will serve as our Team's Project Manager.

Supporting Mr. Hamstra and Mr. Teague on this contract, Pegasus Engineering counts with a very talented staff, which has performed an entire realm of civil engineering assignments with professional integrity, competence and respect. The following provides a breakdown of our employees by discipline.

Pegasus Engineering Staff Summary By Department			
Stormwater	**Transportation**	**Civil / Utilities**	**Support Staff**
David Hamstra, P.E., CFM	Fursan Munjed, P.E.	Tom Kelley, P.E.	Priscilla Villanueva
Greg Teague, P.E., CFM	Juan Fong, P.E.	Mike Galura, P.E.	
Leylah Saavedra, P.E., CFM	Firas Munjed, P.E.	Steve Medeiros, Ph.D., P.E.	
Mike Bruegger, P.E.	Keith Johnson, P.E.	Beth Whikehart, P.E.	Linnie Hunt
Johan Rodriguez, P.E., CFM	Tom Andrezzi		
Donny Greenough	Sean Beck		(Administrative Assistants)
Jason Birkhead			
5 Professional Engineers	4 Professional Engineers	4 Professional Engineers	

Our Pegasus Team also includes specialized sub-consultants, namely: **Daniel W. Cory Surveyor, LLC,** to perform all surveying services; **Universal Engineering Sciences, Inc.** to perform subsurface and geotechnical services; and **Southeastern Surveying and Mapping Corporation (SSMC)** to perform sub-surface utility engineering services to accurately identify and locate all existing utilities, including underground telephone, gas, water, and sanitary sewer systems. If additional specialty type sub-consultants such as architectural, electrical, landscape design, environmental assessment, etc., are required for a specific assignment, highly qualified sub-consultants will be selected by Pegasus to provide the necessary services, with the prior approval of the City.

Our Pegasus Team understands the nature of the work to be accomplished, as well as the expectations and services that the City of New Smyrna Beach requires from their consultants. We trust that the qualifications and capabilities of our Team, combined with our extensive experience with similar projects, will convince the City's Evaluation Committee that our Pegasus Team is uniquely qualified and has a strong professional desire to serve the City, as we have had the privilege of doing in the past.

We urge the City's Evaluation Committee to contact our references regarding our performance on similar contracts. **We guarantee that the City of New Smyrna Beach will be most pleased with our Team's provision of responsive, cost-effective, and timely professional engineering services.**

Very truly yours,

PEGASUS ENGINEERING, LLC

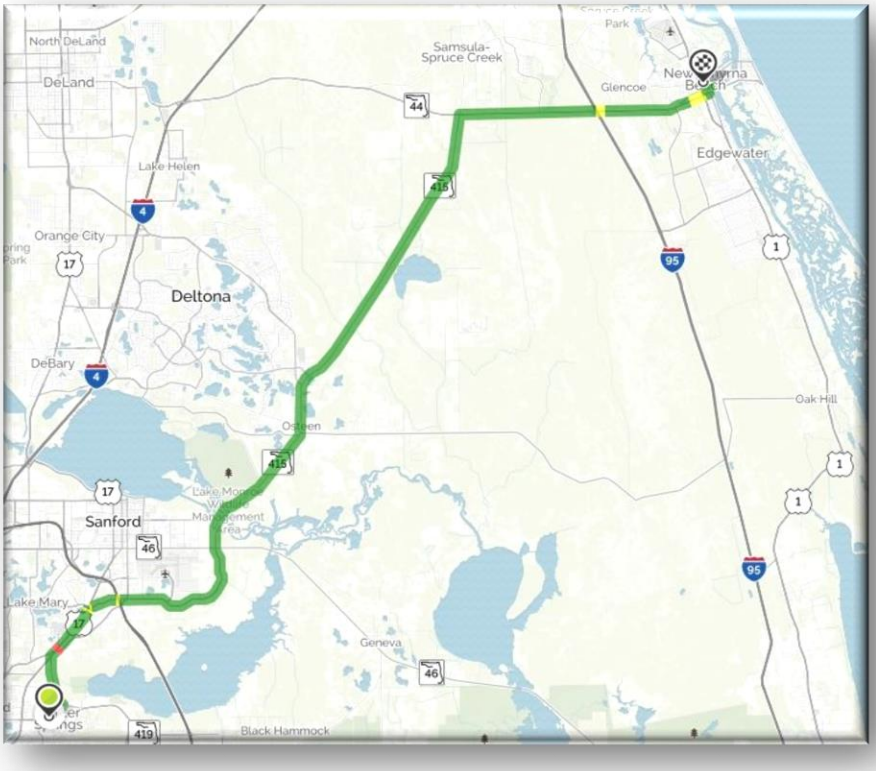
Pegasus Engineering, LLC will provide any additional proof of insurance coverage required by the City, including Professional Malpractice coverage (Errors & Omissions), within three (3) days of the notification of our selection for this contract.

Moreover, Pegasus Engineering will indemnify, hold harmless, defend the City of New Smyrna Beach, and their officer and directors, representatives, and employees from any and all suits or claims for damages or injuries, including death, to any and all persons or property, arising out of the Consultant's work, product, services or operations under this procurement including negligent act or omission on the part of the selected firm or its subcontractors, if any.



3.0 OFFICE LOCATION

The majority of the work for this contract will be performed at Pegasus Engineering headquarters located in Winter Springs, Seminole County, at the following address:

Pegasus Engineering, LLC
301 West State Road 434
Suite 309
Winter Springs, Florida 32708

Our main office is located approximately forty (40) miles from City Hall.

We also have a satellite office located in Pasco County, Florida.

4.0 FIRM OVERVIEW

Pegasus Engineering, LLC was founded and commenced business operations in 2007 by the former Professional Engineering Consultants (PEC) Highway Department Manager, Mr. Fursan Munjed, P.E. and the Assistant Highway Department Manager, Mr. Juan Fong, P.E. In 2009, PEC Stormwater Department Manager, Mr. David Hamstra, P.E., CFM, joined Pegasus along with key PEC stormwater staff. Ten (10) of Pegasus' Florida-Registered Professional Engineers worked together for many years at PEC, which phased out its business operations in late 2009 and early 2010. Pegasus continued to serve the stormwater engineering and transportation contracts that were transferred from PEC at the request of a number of the various cities and counties for whom our selected team of professionals had had the privilege of serving along with numerous additional stormwater and transportation contracts that have been subsequently won by Pegasus.

Number of Years in Business and Financial Stability

Pegasus Engineering, LLC is currently approaching its 10th year of successful business endeavor as it continues to provide Central Florida with professional engineering services for public infrastructure, with primary emphasis on stormwater management, transportation, related construction phase services and grants management.

Pegasus Engineering, LLC has the financial stability and the necessary resources, human and financial, to provide the services at the level required by the City for this contract. Pegasus has had an excellent banking relationship with Bank of America, with whom our company has conducted all of its banking with since its inception in 2007. As requested, an official letter from Bank of America for our account has been provided within Tab 6. If requested, we will be pleased to provide more detailed financial information regarding our firm's financial stability.

Number of Personnel

Pegasus Engineering comprises several departments that specialize in Stormwater Engineering, Transportation and Civil/Utilities. Each of these departments is headed by a Principal / Department Manager, namely Mr. David Hamstra, P.E., CFM, Mr. Juan Fong, P.E., and Mr. Tom Kelly, P.E., respectively.

The Stormwater Engineering Department is composed of five (5) Professional Engineers and two (2) designers / GIS technicians while the Transportation Department is composed of four (4) Professional Engineers and two (2) designers. The Civil/Utilities Department is composed of four (4) Professional Engineers assisted by Stormwater and Transportation engineers and designers. An administrative assistant serves the needs of the office and the engineering staff. The following provides a specific breakdown of our Pegasus Engineering team of professionals by field of expertise:

Pegasus Engineering Key Staff

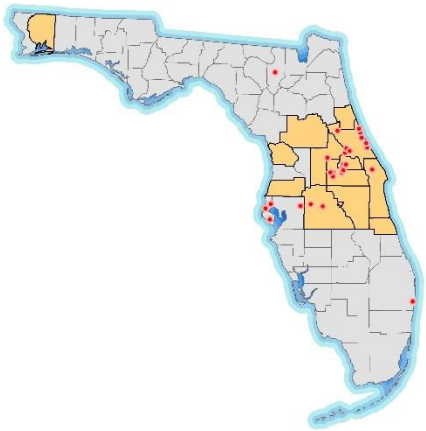
Expertise

The senior personnel of Pegasus Engineering, LLC have extensive successful experience in all phases of planning, design, permitting, bidding, and construction administration projects for Florida cities, counties, and FDOT. While a number of our engineers, designers, and technicians have design experience on development projects (subdivisions, shopping centers, commercial sites, schools, medical, recreation, etc.), Pegasus has essentially restricted its practice to providing services to governmental entities. Thus, Pegasus never has any potential conflicts of interest. Pegasus currently has extensive experience in providing site development plans review services for the cities of DeBary, Orange City, and Longwood.



Pegasus' services are directed by our staff of Florida-registered Professional Engineers who are assisted by Sr. Designers, CADD Drafters and GIS Specialists. Our services primarily focus on the following:

- Stormwater / Drainage Engineering
- Transportation Engineering
- Utility Engineering
- Geographic Information Systems
- Grant Applications and Management (1)
- Eminent Domain / Expert Witness
- Construction Administration

(1) Pegasus Engineering's senior staff have successfully secured over $40 million in Federal, State and local grants. For detailed grant management experience, please refer to Tab 4.

Furthermore, our stormwater/drainage engineering experience and services germane to this proposal include:

- Drainage Basin Studies and Hydraulic / Hydrologic Modeling
- Drainage Retrofit Projects
- Pollutant and Sediment Removal Structures
- Water Quality Monitoring, Nutrient Budgets and TMDL Reduction Projects
- Basin Management Action Plans (BMAPs)
- National Pollutant Discharge Elimination (NPDES) Stormwater Pollution Prevention Plans (SWPPP) Permits
- Environmental Resource Permitting (ERP)
- Stormwater Management Master Plans and Capital Improvement Programs (CIP's)
- Construction Documents (Construction Plans and Technical Specifications)
- Mitigation Plans and Permit Applications
- Construction Bidding and Construction Administration Services
- National Pollution Discharge Elimination (NPDES) MS4 Permit Applications
- Stormwater Management Utility Assessments and Rate Studies
- Presentations for Public Involvement and Information Meetings
- Grant Applications and Management
- Expert Witness

Pegasus senior staff members have a proven record of providing successful engineering services under both continuing and specific project contracts for numerous Florida governmental entities including the Cities of Altamonte Springs, Clearwater, Daytona Beach, DeBary, Deltona, Delray Beach, Longwood, Mount Dora, Orlando, Orange City, Ormond Beach, Plant City, Pierson, Port Orange, St. Petersburg, Titusville, Winter Garden, Winter Haven, Winter Springs, Windermere, Winter Park, and the Counties of Volusia, Brevard, Seminole, Citrus, Polk, Pasco, Flagler, Indian River, Lake, Marion, Orange, Osceola, and Santa Rosa. We also have recently provided design services to FDOT Districts 1, 3, 5 and 7, including multiple projects for District 7 in Hillsborough County.

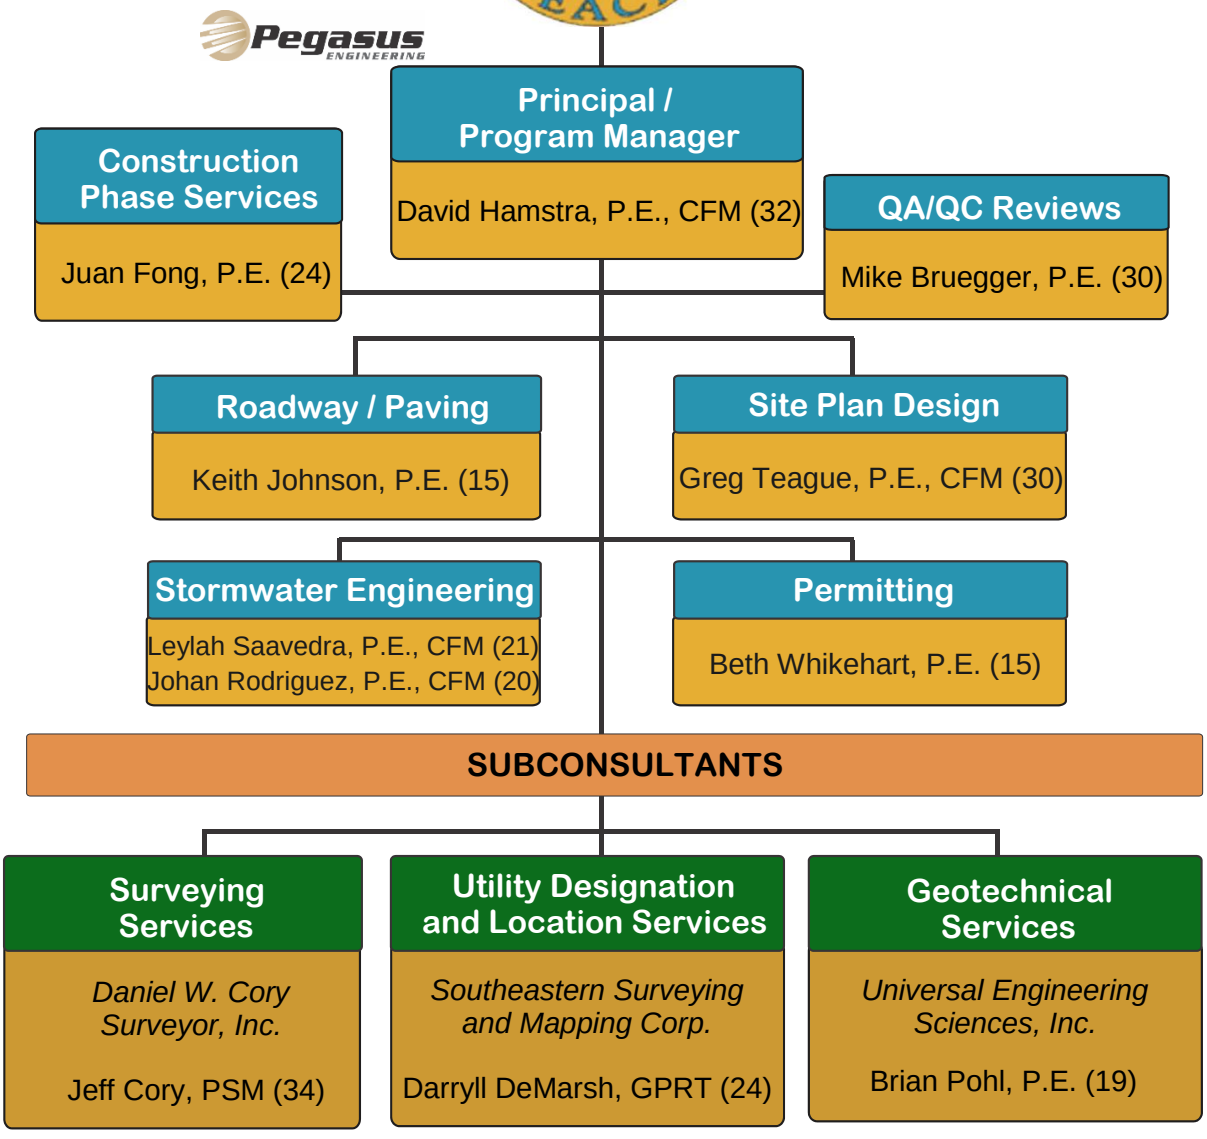
We also completed the design for the Central Florida Expressway Authority (formally OOCEA) on the $5 Million East S.R. 408 Realignment and East S.R. 50 Exit Ramp improvement Project.

Additionally, Pegasus is pre-qualified by FDOT in the following Work Groups:

Group 3 Highway Design – Roadway
- 3.1 Minor Highway Design
- 3.2 Major Highway Design
- 3.3 Controlled Access Highway Design

Group 6 Traffic Engineering and Operations Studies
- 6.1 Traffic Engineering Studies
- 6.2 Traffic Signal Timing
- 6.3.1 Intelligent Transportation Systems Analysis and Design
- 6.3.2 Intelligent Transportation Systems Implementation
- 6.3.3 Intelligent Transportation Traffic Engineering Systems Communications

Group 7 Traffic Operations Design
- 7.1 Signing, Pavement Marking and Channelization
- 7.2 Lighting
- 7.3 Signalization



Group 10 Construction Engineering Inspection
- 10.1 Roadway Construction Engineering Inspection

Introduction of the Proposed Team Members

An organizational chart that graphically depicts the roles and responsibilities for the key members of the project team is provided on the following page, while additional information is also provided to emphasize important duties to be fulfilled by our project team key members.

Pegasus Team

Organizational Chart
RFQ 12-17-ENG

Notes: 1. Years of experience shown in ( ) above.
2. If additional specialized sub-consultants, such as environmental assessment, landscape design, etc., are required for a specific assignment, a qualified subconsultant will be selected with the prior approval of the City.

PRIME CONSULTANT

Pegasus Engineering, LLC
301 West State Road 434, Suite 309
Winter Springs, Florida 32708
407-992-9160 (phone)

Mr. David Hamstra, P.E., CFM ..... Program Manager
Email: david@pegasusengineering.net

Mr. Hamstra's primary responsibility will be to ensure that the contractual obligations of Pegasus Engineering to the City are fulfilled on each assignment, especially schedule compliance, and that the necessary resources of Pegasus Engineering are available to our Project Manager. As the stormwater department manager, Mr. Hamstra has the authority to reassign staff and other resources to meet City deadlines. **Mr. Hamstra will be the primary point-of-contact during the duration of the City's contract**, and he will be responsible for overseeing all work performed, including the preparation and negotiation of contracts as well as any required public presentations.

Mr. Hamstra has 32 years of experience specializing in stormwater management master planning, engineering, and design. Since 1987, he has completed and/or managed over 935 stormwater related projects, which includes over 325 constructed stormwater retrofit projects that address flood protection and/or water quality. He also assists our Pegasus Transportation Department with the planning and design of stormwater management facilities and conveyance systems associated with our roadway design projects for FDOT and local governments. Throughout his career, Mr. Hamstra has developed an extensive knowledge of the Federal Emergency Management Agency (FEMA), the Florida Department of Transportation (FDOT), United States Environmental Protection Agency (US EPA), US Army Corps of Engineers (USACE), Florida Department of Environmental Protection (FDEP), and the various Water Management District's stormwater permitting requirements. His expertise includes the use of state-of-the-art hydrologic / hydraulic computer software to complete stormwater quantity and quality analysis for major watersheds and retrofit projects. Additionally, he is responsible for directing staff activities in master planning, design, permitting, and preparation of contract documents for stormwater ponds, storm sewer systems, control structures and culverts, as well as assisting in securing over $38,685,000 in grants.

Mr. Greg Teague, P.E., CFM .....Project Manager
Email: greg@pegasusengineering.net

Mr. Teague has 30 years of experience in stormwater management. His responsibilities have encompassed the study and analysis of major watersheds, as well as identifying and implementing solutions to prevent flooding while improving water quality. As part of these projects, Mr. Teague has prepared detailed stormwater management master plans outlining all findings, listing recommended solutions and providing prioritized Capital Improvement Programs (CIPs). He has also completed preliminary and final calculations and designs for positive and landlocked drainage basins, retention / detention areas and drainage control structures to provide attenuation and treatment of stormwater runoff. Mr. Teague is proficient with hydrologic / hydraulic stormwater modeling software used to simulate basin conditions and analyze stormwater management systems.

Ms. Leylah Saavedra, M.S., P.E, CFM. ..... Senior Project Engineer
Email: leylah@pegasusengineering.net

Ms. Saavedra is a graduate of the University of Central Florida with a Bachelor of Science degree in Environmental Engineering (1996) and a Master of Science degree in Civil and Environmental Engineering (2003). Throughout her 21-year career, Ms. Saavedra has been involved in the planning, design and permitting of numerous drainage retrofit studies, and infrastructure inspection programs associated with older neighborhoods and subdivisions for various Orange County and Seminole County Maintenance Districts.

Her formal education is enhanced by hands-on experience performing grant related services, field investigations, collecting and interpreting data, completing drainage / stormwater system calculations, developing hydrologic / hydraulic modeling, environmental permitting and the preparation of engineering reports for master plans and drainage / stormwater system designs. Her relevant experience with stormwater / drainage management planning and design projects has ranged in size from a few acres to several square miles. She has been involved with projects for urban and rural drainage basins, positive and landlocked drainage systems, flood control structures and retention / detention ponds.

Ms. Saavedra is also very familiar with federal regulations and FEMA grant programs, having successfully secured several million dollars from FEMA's Hazard Mitigation Grant Program (HMGP) and the Flood Mitigation Assistance (FMA) Program. These grant monies greatly assist communities in implementing long-term hazard mitigation measures after major disaster declarations.

Mr. Mike Bruegger, P.E. ..... Senior Project Engineer
Email: mike@pegasusengineering.net

Mr. Bruegger is a resident of Pasco County, and has 30 years of experience in the design of roadway drainage and stormwater management systems and related permitting. Mr. Bruegger's 30 year engineering experience has been primarily focused on drainage engineering and stormwater management permitting for roadway, airport, municipal and community-wide basin improvement projects. His extensive experience includes basin analysis, computer modeling, system planning, design, permitting, and construction phase oversight. His experience has included completing basin-wide delineations, basin inventory, computer modeling, watershed analysis, preliminary and final design, and permitting. Watershed studies included urban and rural basins, positive and landlocked drainage systems, flood control structures and retention/detention ponds.

In addition to stormwater/drainage basin related studies, his experience includes roadway drainage, and grading/paving plans for site improvements. As part of his extensive project design experience, he has coordinated project permitting with FDOT, ACOE, FDEP and the various Water Management Districts throughout Florida.

Mr. Johan Rodriguez, P.E., CFM ..... Project Engineer
Email: johan@pegasusengineering.net

Prior to working with Pegasus Engineering, Mr. Rodriguez had seven (7) years of experience in the field of water purification, filtration, demineralization, reverse osmosis, deoxygenation, condensate polishing, electro-deionization, activated carbon adsorption, and gas transfer membrane process.

Mr. Rodriguez has dual degrees, graduating from the University of Central Florida with a Bachelor of Science degree in Civil Engineering in 2006 and the University of South Florida with a Bachelor of Science degree in Chemical Engineering in 1996. During his professional career as a civil engineer, Mr. Rodriguez has worked on numerous projects which include Environmental Resource Permit (ERP) applications, drainage studies, and storm sewer sizing for private and public projects. In the past, Mr. Rodriguez has been responsible for design and implementation of water treatment plants, including construction drawings, piping, equipment sizing, and electrical details. He is experienced with hydraulic modeling and pump sizing calculations, preparation of construction documents, bid packages, and final inspection and certification of construction projects. During the past eleven (11) years, Mr. Rodriguez has prepared drainage basin studies, performed detailed computer modeling, and designed / permitted various primary and secondary stormwater management facilities for the City of Orlando, Orange County, the City of Winter Garden, and Volusia County.

SUB-CONSULTANTS

We selected our sub-consultants based on reputation, experience and location. All of our sub-consultants are considered experts in their respective fields and add value to the Pegasus Team. For the City of New Smyrna Beach contract we are very pleased to present the following well-qualified sub-consultants, with whom we have worked on numerous projects that varied in scope, size and requirements. Also, note that they all played key roles as part of our Pegasus Team on our recently completed Central Beach Flood Mitigation Project – Phase III for the City.

They all have the experience, expertise and resources to provide all of the services required for this contract. Pertinent resumes for their key professionals for this contract follow our Pegasus resumes included at the end of this section. As the prime consultant, Pegasus Engineering will be responsible for the interactions of all sub-consultants and will ensure that all of the sub-consultant deliverables are complete and accurate before they are submitted to the City.

- **Surveying Sub-consultant ..... Daniel W. Cory, Surveyor, LLC**
  Project Manager - Jeffrey Cory, PSM

  Major Responsibilities - Surveying services to support the prime consultant and other sub-consultants, including: boundary and location surveys; design level surveys; drainage structure surveys in support of drainage studies and stormwater modeling.

- **Geotechnical Sub-consultant ..... Universal Engineering Sciences, Inc.**
  Project Manager - Brian Pohl, P.E.

  Major Responsibilities - Soil and water table assessments and continuous simulation modeling for closed (land-locked) basins.

- **SUE Sub-consultant ..... Southeastern Surveying & Mapping Corporation (SSMC)**
  Project Manager - Darryll DeMarsh, GPRT

  Major Responsibilities - Subsurface Utility Engineering (SUE) services including Ground penetrating radar (GPR), vacuum excavation, utility coordination, closed circuit television video (CCTV) inspection with laser profiling, concrete imaging, and materials thickness testing (ultrasonic Testing).

If additional specialty type sub-consultants such as architectural, electrical, landscape design, environmental assessment, etc., are required for a specific assignment, highly qualified sub-consultants will be selected by Pegasus to provide the necessary services, with the prior approval of the City.

Credentials

Resumes for the key members of the project team are provided at the end of this section. These resumes provide a detailed listing of professional qualifications, work experience, education background, certifications, awards and much more.

5.0 COMMITMENT OF THE FIRM/ABILITY TO USE SAME PERSONNEL

Pegasus Engineering, LLC hereby commits to consistently utilize the same personnel throughout the duration of this contract. Pegasus' Department Managers carefully evaluate on a weekly basis our work completion status on all active project assignments. Our Project Managers on each assignment have the authority to re-assign priorities to insure schedule compliance.

In terms of project assignments, our management philosophy typically considers the needs of each project, in terms of both the type of services to be performed and the level of effort. Taking these factors into consideration early on typically results in maintaining continuity throughout the duration of the project, without the need to assign, or re-assign, personnel "mid stream".

However, even the best managed projects can experience unforeseen issues that require special consideration. When these situations arise, and in order to ensure that obligations are fulfilled on the overall contract, our Program Manager (David Hamstra) has the authority to re-assign staff resources to meet the City's deadlines. Pegasus staff takes into account schedule and budget considerations in order to prioritize projects and to efficiently and successfully exceed the project requirements and client expectations.

6.0 FIRM MINORITY STATUS

Pegasus Engineering, LLC is a Minority Business Enterprise (MBE) with the State of Florida and a certified disadvantaged business enterprise (DBE) with the State of Florida and the Florida Department of Transportation (FDOT). Pegasus Engineering is also a certified minority owned business with the City of Orlando and Orange County.

State of Florida

Minority, Women & Florida Veteran Business Certification

Pegasus Engineering, LLC

7.0 FIRM WORKLOAD/PERFORMANCE CAPABILITY

Pegasus Engineering, LLC has an excellent record of consistently completing projects within budget and on schedule. Our consistent performance record is reflected in the extremely high percentage of repeat work awarded Pegasus by our governmental clients under both continuing services and single project contracts. At the present time, the Pegasus Engineering Stormwater Department workload is estimated at approximately 75% of maximum capacity. As illustrated by the following graphic, the allocated capacity (in percent) of available man-hours indicates that the Pegasus Engineering team will have sufficient capacity to begin work on future City of New Smyrna Beach assignments in the very near future.

8.0 OTHER PERTINENT INFORMATION

Pegasus' Service Philosophy

Success in the design/construction industry is typically defined as achieving the client's objectives on time, within budget, and with a completed project of high quality. Pegasus endeavors to have each of our clients so thoroughly pleased with our professional services that clients will not only utilize us for repeat work, but will recommend us through positive recommendations. The fact that Pegasus has also been very successful in avoiding lawsuits between our clients and contractors has enhanced our record of positive references.

Pegasus' record in the industry in achieving long-term "collegial" relationships with governmental staff, sub-consultants, and permitting agencies attests to our success in achieving the objectives of our governmental clients. Our emphasis on the ability to efficiently design projects, coordinate sub-consultants, estimate costs,

provide effective QA/QC reviews, and obtain required permits from multiple regulatory agencies, has ensured that our projects have consistently met budgets and schedules. This can be attributed to our highly experienced engineering staff, our emphasis on partnering with qualified sub-consultants, effective construction administration, our well-established QA/QC procedures, and our emphasis on an on-going responsive relationship with client staff members.

We feel that one of the most important elements of Pegasus' provision of services is our "responsiveness". Our experiences have taught that even the best management plan, including all of its components related to effective communication, ongoing coordination, project schedules, etc., can never completely anticipate what may occur during the entire course of a project. Therefore, we place special emphasis on "responsiveness", and follow-through whereby the needs and requests of the City at any given time will always be accommodated and given first priority.

Our commitment to "responsiveness" will provide the City with attention to items that are often overlooked when things get busy, including: phone calls that we return on a timely basis; regular project status reports; completion of City requests without hesitation, regardless of in-scope and out-of-scope requests; timely preliminary meetings with permitting agencies and permit submittals, and well-organized record keeping and descriptive invoicing. Pegasus hereby emphasizes our commitment to maintain the highest level of "responsiveness" and follow-through, which is reflected in Pegasus' success in being awarded multiple continuing engineering contracts with various counties and cities across Florida.

The relationships that our senior personnel have developed with the staff of the various Florida cities, counties, FDOT and CFX/OOCEA, and other state agencies have resulted in our being rewarded with the substantial number of continuing services contracts listed herein, and the resulting authorization of numerous public infrastructure assignments.

Project Management

Pegasus Engineering has developed and utilizes a strong Project Management approach centered on four key elements: Principal Involvement - Commitment to quality project management begins at the top of our management structure. Pegasus' senior management has set specific goals to ensure that our clients continually receive quality engineering services. Their personal commitment has been manifested through formal written policies and procedures that must be adhered to by all Pegasus

personnel. Pegasus has successfully implemented a firm-wide policy of emphasizing day-to-day participation by experienced Principals and Project Managers, and of holding weekly in-house project review sessions, and of emphasizing open communications between project personnel at all levels. We conduct an intensive Monday morning review of all active projects, which has resulted in high work product quality and a high degree of client satisfaction. Staff Training - All Pegasus personnel are encouraged to continually improve their technical skills and professional knowledge.

On-Going Quality Assurance – Pegasus has a well-established Quality Assurance / Quality Control (QA/QC) program to provide our engineering and production support staff with written guidelines, to ensure that quality is maintained throughout each project.

Our Project Manager is ultimately responsible for overall Quality Assurance on this project, while QC reviews will be conducted by an assigned professional. Cost Controls – Pegasus has well-established, proven procedures to estimate and control both engineering costs and construction costs. We utilize highly structured customized project cost accounting software package on each project that provides on a weekly basis all labor, overhead, and other direct project costs, as well as work task and sub-task status information for use in our weekly project management meetings. We have also developed a very reliable system for accurately estimating construction costs at preliminary, intermediate, and final design stages. This system utilizes a continuous on-going monitoring of bid prices in the industry.

Public Information Experience

Experience has clearly demonstrated that public infrastructure projects have the highest degree of success when public acceptance is achieved with the citizens of the community through public involvement and information programs. Pegasus' experience has clearly demonstrated that public involvement programs are important to the success of improvement projects that directly affect the community.

It is imperative that the possible effects of the proposed infrastructure improvements on the community are examined for social, environmental and physical impacts.

Our senior personnel are well versed in assisting governmental clients in the development and execution of successful Public Involvement Programs, such as the City's Central Beach Flood Mitigation Project Phase III.

Dissemination of information to the community is an important step in a successful Public Involvement plan. Pegasus senior personnel have served the communication needs of our clients through Public Involvement workshops / meetings, newspapers, radio, mail, and the Internet.

Furthermore, Pegasus senior personnel have made numerous presentations on proposed projects at various stakeholder workshops and elected board meetings for multiple cities and counties across Florida during their careers.

PROFESSIONAL PROFILE

Mr. Hamstra, as Stormwater Department Manager, specializes in the development of stormwater management master plans for public, private, and environmental projects. Since 1987, he has completed and/or managed over 935 projects ranging in scale from designing stormwater management facilities for large-scale residential developments to developing Capital Improvement Programs associated with stormwater master plans to retrofitting urbanized areas with advanced treatment technologies. He has performed numerous drainage basin studies that specifically address flood control, water quality, and localized flooding issues.

Throughout his career, Mr. Hamstra has developed an extensive knowledge of the Federal Emergency Management Agency (FEMA), the Florida Department of Transportation (FDOT), United States Environmental Protection Agency (US EPA), Florida Department of Environmental Protection (FDEP), and various Water Management District's stormwater permitting requirements. His expertise includes the use of state-of-the-art hydrologic / hydraulic computer software to complete stormwater quantity and quality analysis for major watersheds and development projects. Additionally, he is responsible for directing staff activities in master planning, design, permitting, and preparation of contract documents for stormwater ponds, storm sewer systems, control structures and culverts, as well as the determination of water surface profiles for Bridge Hydraulics Reports (BHR) and floodway studies.

REPRESENTATIVE PROJECT EXPERIENCE

ORANGE COUNTY, FLORIDA

- 150+ Basin Studies, Drainage Investigations, Small Area Studies, and Drainage Retrofit Projects
- Lakes McCoy, Coroni, and Prevatt Stormwater Management Master Plan
- Lakes McCoy, Coroni, and Prevatt Drainage Basin Improvements
- Beggs Road / Overland Road Stormwater Management Master Plan
- Lake Sherwood Drainage Basin Study

PROFESSIONAL AFFILIATIONS

Association of State Floodplain Managers

PROFESSIONAL PROFILE

Mr. Teague has extensive experience completing civil engineering and stormwater / drainage projects in Florida. During the past 30 years, his responsibilities have encompassed the study and analysis of major watersheds, as well as identifying and implementing solutions to prevent flooding while improving water quality. As part of these projects, Mr. Teague has prepared detailed stormwater management master plans outlining all findings, listing recommended solutions and providing prioritized Capital Improvement Programs (CIPs).

He has also completed preliminary and final calculations and designs for positive and landlocked drainage basins, retention / detention areas and drainage control structures to provide attenuation and treatment of stormwater runoff.

Mr. Teague is proficient with computers and hydrologic / hydraulic stormwater modeling software used to simulate basin conditions and analyze stormwater management systems. Mr. Teague also has experience with landlocked drainage basins and / or lakes through the use of continuous simulation analysis. A good example includes his continuous simulation modeling of impacts related to additional pumpage from Lake Orienta into the Cranes Roost water body associated with Altamonte's Flood Hazard Avoidance Plan.

REPRESENTATIVE PROJECT EXPERIENCE

ORANGE COUNTY, FLORIDA

- Lake Azalea Drainwell Replacement
- Primary Drainage Structure Inventory Program
- Pipeline Inspection Programs
- Primary Drainage Structure Improvements

PROFESSIONAL PROFILE

Mr. Fong has over 24 years of engineering experience, with primary emphasis on the design of roadway and traffic systems. His responsibilities have included the project management, planning and design of minor, major and complex roadways across Florida, including multiple projects for FDOT. His largest roadway project as Engineer-of-Record has a construction cost of over $40 Million for Citrus County. His assignments have included the preparation of preliminary and final construction plans, technical reports, permit applications, bidding documents, construction administration services, right-of-way negotiations, and testifying at order-of-take hearings. Mr. Fong has served as the Engineer-of-Record on numerous projects and has extensive experience in the preparation of roadway plans, signing and pavement marking plans, signalization plans, lighting plans, traffic control plans, traffic operation reports, safety analysis, and pavement design. Mr. Fong is proficient with Microstation, Geopak, Highway Capacity Software, and FDOT Level-of-Service Software.

REPRESENTATIVE PROJECT EXPERIENCE

SEMINOLE COUNTY, FLORIDA

Multiple Sidewalk Projects as a Continuing Consultant. Designed and permitted over 10 miles of proposed sidewalks throughout the County. The projects included the addition of sidewalks to existing facilities and the upgrade of existing sidewalks to meet ADA requirements.

Continuing Consultant. Designed and permitted over 60 intersection improvements including turn lanes, signing and pavement markings, and signalization.

FDOT DISTRICT 1

US 41 Multi-Use Path Final Design from Palm Dr. to Colonial Blvd (1.7 miles). Prepared final construction documents to construct an 8-foot wide multi use path on both sides of an existing divided rural section in Lee County. The project included roadway, drainage, signing and pavement marking, signal, and structural plans.

SR 70 RRR – Super elevation corrections and Safety Improvements at Kissimmee River Bridge. Prepared final construction documents to correct the roadway super elevation and improve the safety on an existing 2-lane undivided rural section in Highlands County. The project included roadway, drainage, signing and pavement marking plans.

US 17 Shoulder Addition. Prepared final construction documents for the addition of paved shoulders for 1 mile of a 2-lane rural roadway in Polk County. The project included roadway, signing and pavement markings plans

SR 540 (Cypress Gardens Boulevard) Final Design from 9TH Street S.E. to Overlook Drive. Prepared final construction documents to widen an existing 1.5 mile 2-lane road to a 4-lane divided urban section in Polk County with a bridge over Lake Ina. The project included roadway, drainage, signing and pavement marking, lighting, signal, and structural plans.

FDOT DISTRICT 3

SR 83 / Bruce Avenue and SR 83 / Institution Road. Intersection Improvements in Walton County. Prepared final construction documents to add right turn lanes at intersections. Project included preparation of R/W maps for R/W acquisition, roadway widening, drainage improvements, signing and pavement markings, and traffic signalization.

SR 59 RRR Final Design. Prepared final construction documents for milling and resurfacing, shoulder overbuild, and guardrail upgrades to 4 miles of a 2-lane rural roadway in Jefferson County. The project included roadway, drainage, signing and pavement markings, and a design exception for vertical alignment and stopping sight distance.

SR 30 RRR Final Design. Prepared final construction documents to mill and resurface the existing pavement, upgrade a major culvert crossing, and improve safety in Downtown Panama City, Bay County. The project included roadway, drainage, signing and pavement markings, structural plans, and CAP Level III.

SR 2 RRR Final Design. Prepared final construction documents for milling and resurfacing, cross drain extensions, and addition of paved shoulders to 9 miles of a 2-lane rural roadway in Holmes County. The project included roadway, drainage, signing and pavement markings, structural plans, and a design exception for shoulder width.

FDOT DISTRICT 5

SR 520 Final Design. Design engineer, prepared typical section concepts and developed traffic reports to reconstruct bridges over the Banana River in Brevard County.

SR 5 (US 1) RRR Final Design. Prepared final construction documents to mill and resurface the existing pavement, repair a culvert crossing, add bicycle lanes at turn lanes, and improve safety in Brevard County. The project included roadway, drainage, signing and pavement markings, and structural plans

FDOT DISTRICT 7

SR 60 RRR Final Design. Assisted with final design and construction documents to rehabilitate 4.0 miles of multi-lane urban roads in Hillsborough and Pinellas Counties. The project included roadway, drainage, signing and pavement markings, signal, lighting, and structural plans.

POLK COUNTY, FLORIDA

Berkley Road Segment 1 Final Design. Prepared final construction documents to widen an existing 1.0 mile road from a 2-lane rural section to a 5-lane urban section. The project included roadway, drainage, traffic, and permitting.

Berkley Road Segment 2, Preliminary Engineering and Final Design. Prepared a preliminary engineering report and final construction plans for the future widening of 4 miles of a 2-lane rural section to a 4-lane urban section. The project included roadway, drainage, signing and pavement markings, signal plans, and mitigation plans.

Pace Road, Preliminary Engineering and Final Design. Prepared a preliminary engineering report and final construction plans for the future widening of 1 mile of a 2-lane rural section to a 4-lane urban section. The project included roadway, drainage, signing and pavement markings plans.

Pace Road Enhancement Project. Prepare a preliminary engineering report and final construction plans for a 1 mile 12-foot wide multi-purpose sidewalk. This will serve the future USF Campus in Polk County and will connect to the City of Auburndale Trail. The project included sidewalk, lighting, landscaping, and signing and pavement markings plans. This project is federally funded through FDOT through a Local Agency Program Agreement.

CR 655 (Berkley Road) Segment 4 and CR 559A (Auburndale Cutoff Rd), Preliminary Engineering and Final Design. Prepared a preliminary engineering report and final construction plans for the future widening of 2.5 miles of a 2-lane rural section to a 4-lane urban section. The project included roadway, drainage, signing and pavement markings, and signal plans.

PROFESSIONAL PROFILE

Ms. Saavedra serves as a Sr. Project Engineer with Pegasus. Since 1997, Ms. Saavedra has been involved in the planning, design and permitting of numerous drainage retrofit studies and infrastructure inspection programs associated with older neighborhoods and subdivisions as well as Maintenance Districts. Her formal education is enhanced by hands-on experience performing grant-related services, field investigations, collecting and interpreting data, completing system calculations, developing hydrologic / hydraulic modeling, permitting and preparing engineering reports, master plans and system designs. Ms. Saavedra is involved in preparing construction drawings, technical specifications and regulatory agency permit applications for her projects. Her relevant stormwater / drainage management planning and design projects have ranged in size from a few acres to several square miles. She has been involved with projects for urban and rural basins, positive and landlocked drainage systems, flood control structures and retention / detention ponds.

Ms. Saavedra is also very familiar with federal regulations and FEMA grant programs, having secured several millions of dollars from FEMA's Hazard Mitigation Grant Program (HMGP) and the Flood Mitigation Assistance Program (FMAP). These grant monies have greatly assisted communities in implementing long-term hazard mitigation measures after major disaster declarations.

REPRESENTATIVE PROJECT EXPERIENCE

BREVARD COUNTY, FLORIDA

- Kingsmill Subdivision, Palomino Road and Aurora Road FEMA Hazard Mitigation Grant Program.
- North Merritt Island FEMA Pre-Disaster Mitigation Grant Project

Mike Bruegger, P.E.

Sr. Project Engineer

YEARS OF EXPERIENCE 30

PROFESSIONAL REGISTRATION
Professional Engineer 1990
Florida, No. 44949

EDUCATION
B.S. Civil Engineering 1986

PROFESSIONAL AFFILIATIONS
American Society of Civil Engineers (ASCE)
National Society of Professional Engineers (NSPE)
Florida Engineering Society (FES)
American Water Resources Association (AWRA)

PROFESSIONAL PROFILE

Mr. Bruegger's 30-year engineering experience has been primarily focused on drainage engineering and stormwater management permitting for roadway, airport, municipal, and community-wide basin improvement projects. His extensive experience includes basin analysis, computer modeling, system planning, design, permitting, and construction phase oversight.

His experience has included completing basin-wide delineations, basin inventory, computer modeling, watershed analysis, preliminary and final design, and permitting. Watershed studies included urban and rural basins, positive and landlocked drainage systems, flood control structures and retention/detention ponds. In addition to stormwater/drainage basin related studies, his experience includes roadway drainage, and grading/paving plans for site improvements.

As part of his extensive project design experience, he has coordinated project permitting with FDOT, ACOE, FDEP and the various Water Management Districts throughout Florida.

REPRESENTATIVE PROJECT EXPERIENCE

SADDLEBROOK RESORT, TAMPA

- Saddlebrook Master Drainage Improvements
- Golf Academy
- Lakeside Pavilion
- Grand Pavilion
- West Service Area
- Service Road Realignment
- Accounting/Human Resources Buildings Site Design

CITRUS COUNTY, FLORIDA (ROADWAY DRAINAGE)

- Croft Avenue (from Hayes Road to CR 486)
- County Road 491 (from SR 44 to CR 486)
- County Road 491 (from CR 486 to N. Forest Ridge Blvd.)
- County Road 486 (from SR 44 to N. Forest Ridge Blvd.)

POLK COUNTY, FLORIDA (ROADWAY DRAINAGE)

- Berkley Road Drainage Design (from U.S. 92 to Granada Rd)
- Berkley Road Pond Siting Report (Old Dixie Hwy to Pace Rd)
- Berkley Road Final Design (Old Dixie Highway to Pace Rd)

- Orlando Executive Airport Stormwater/Drainage Management System Master Plan

Donny Greenough

Sr. Designer / GIS Technician

YEARS OF EXPERIENCE 27

Pegasus Engineering, LLC
August 2013 – Present 5 years
Full Sail University 2 years
Professional Engineering
Consultants, Inc. (PEC) 20 years

EDUCATION
Lake County VoTech

Valencia Community College

University of Phoenix

PROFESSIONAL PROFILE

Mr. Greenough has over 24 years of experience using AutoCAD, and ArcINFO to complete GIS assignments in the Survey Division. He is responsible for digitizing maps, attribute entry and editing, geographic development, and many other routine data development tasks.

REPRESENTATIVE PROJECT EXPERIENCE

GIS Project Manager / Technician for:

CITY OF NEW SMYRNA BEACH, FLORIDA
- Central Beach Flood Mitigastion Improvements – Phase III
  Water Main, Sanitary Force Main and Sanitary Gravity Design

CITY OF OCOEE, FLORIDA
- Southwest Development Utility Improvements
  Water Main, Sanitary Force Main Design

ORANGE COUNTY, FLORIDA
- Powers Drive and North Lane Drainage

FLORIDA DEPARTMENT OF TRANSPORTATION
- Wekiva 3A Drainage Improvements

ST. JOHNS RIVER WATER MANAGEMENT DISTRICT
- Lake Apopka Restoration Project GIS Data Conversion. Responsible for incorporating existing parcel documentation for display, demarking the Zellwood Drainage District property and easements.
- Lake Apopka Restoration Project GIS Data Conversion for Federal Easements. Responsible for creating parcels based on existing documentation for graphic display and representation.
- Lake Apopka Restoration Project GIS Data Conversion for Fifty-Year Chain of Title. Responsible for the incorporation of historical documentation for graphic display and representation.
- Lake Apopka Phase I I - High Water Evaluation
- Little Wekiva River Erosion & Sedimentation Control -Topographic Profile
- Emeralda Marsh Restoration - Topographic Survey
- Fellesmere Farms Joint Venture - Topographic Survey
- Joshua Creek Land Acquisition - Boundary

FLORIDA POWER & LIGHT COMPANY
- High Ridge Substation - Boundary, Topographic & Tree Survey
- Pringle Sub-Station (West Palm Coast)

CITY OF ORLANDO, FLORIDA
- Dubsdread, Lake Fairview Shores & Lake Albert Shores
- Baldwin Park Reclaim Water District System
- Metro West Design Survey
- Miscellaneous Neighborhood Utility Improvements
- Garland Avenue & South Street Parking lot
- Joseph Street Compton Avenue, Illiana Street & Taylor Street Improvements
- Judge Property Annexation
- Robinson Street Right-of-Way Acquisition
- Trails of Turkey Lake
- Boundary Survey - Parcel 7 North & South Orlando
- International Center
- Spring Lake Neighborhood
- SR 500 Eminent Domain
- Parramore Boundary Survey
- Langford Park and Greenwood Lake Baffle Boxes

SOUTH FLORIDA WATER MANAGEMENT DISTRICT
- GIS Data Conversion. Assisted in management and conversion of 2,040 map sheets and 20,000 deed documents into Arc/Info 6.0 format. The GIS will provide SFWMD with a method to manage district-owned land in South Florida. Used Arc Macro Language (AML) to develop automated command routines to populate attribute tables with existing information. This increased production and errors analysis.

CITY OF KISSIMMEE, FLORIDA

- GIS Design and Implementation. Assisted with the development of a City-Wide Cadastre using GPS technology to establish control and integrate it into the state plane coordinate system. The cadastre is being used for the base map which will be the foundation for the City's GIS. Developing 17 Arc/Info coverages for 70 square mile area.

CITY OF SANIBEL, FLORIDA

- Map Conversion to GIS. Completing data conversion and digital base map development for various layers such as road ROW, water features, development intensity, zoning, etc. The GIS will cover the entire city, and it will meet the Federal Emergency Management Agency (FEMA) mapping criteria.

FLORIDA INLAND NAVIGATION DISTRICT

- GIS Data Development. Responsible for the creation of a complete GIS for the District's 12 county area, encompassing Florida's Atlantic Intracoastal Waterway. Seventeen coverages and five raster imagery phases were captured and adjusted to the Florida State Plane Coordinate System.
- GIS Data Development for Spoil Islands. Responsible for the incorporation of the Districts Spoil Islands into the existing GIS development. Project included both graphic and database entries.
- Revised Aerial Flight GIS Data Development. Responsible for the incorporation of current aerial photographs into the Districts existing GIS. Development includes the adjustment and / or re-creation of all existing coverages.

FLAGLER COUNTY, FLORIDA

- GIS Data Development. Responsible for the creation of a parcel base map together with specified coverages to be utilized for the implementation of a comprehensive master stormwater plan.

CITY OF SANFORD, FLORIDA

- GIS Data Conversion. Responsible for the conversion of existing utility maps to ArcINFO coverages for use with a previously established parcel base map.

LAKE COUNTY WATER AUTHORITY

- GIS Conversion Services. Data Development

LAKE HIGHLAND PREPARATORY SCHOOL

- GIS Data Development. Responsible for creation of the student population in each zip code.

CITY OF DEBARY, FLORIDA

- Drainage Study Survey
- Grants
- Site Reviews
- Adelaide Street Drainage Improvements

CITY OF ORANGE CITY, FLORIDA

- Grants
- Site Reviews
- Stormwater Master Plan

CITY OF WINTER GARDEN, FLORIDA

- Stoneybrook Parkway Drainage

CITRUS COUNTY, FLORIDA

- County Road 491

OSCEOLA COUNTY, FLORIDA

- North Hoagland Boulevard – Design Survey

SEMINOLE COUNTY, FLORIDA

- County Road 419 – Right-of-Way Maps and Design Survey
- Sandlake Road – Right-of-Way Maps and Design Survey
- Snow Hill Road
- Dean Road Drainage

BREVARD COUNTY, FLORIDA

- Kingsmill Subdivision / Aurora Road Drainage Improvements
- Proposed Wickham Road Detour Concept

EMINENT DOMAIN

- Interstate 4 – 30 Parcels OSDS
- I-95 Brevard County

Jason Birkhead

Engineer Assistant / GIS Technician

YEARS OF EXPERIENCE 17

Pegasus Engineering, LLC
January 2010 – Present 7 years

Professional Engineering
Consultants, Inc. (PEC) 4.5 years

Johnson Peoples Architects
6 years

EDUCATION
B.S. Civil Engineering Ongoing
University of Central Florida

Associates of Arts 2004
Central Florida Community College

PROFESSIONAL PROFILE

Mr. Birkhead has over seventeen (17) years of experience using AutoCAD and ArcGIS that has allowed him to successfully complete a realm of GIS assignments ranging from a few acres to several square mile projects. While at PEC, Mr. Birkhead worked in the survey department and later transferred to the stormwater department in an effort to broaden his engineering exposure. Mr. Birkhead is responsible for digitizing maps, attribute entry and editing, geographics development, and many other routine data development and data collection tasks. Mr. Birkhead also has extensive working knowledge of Autodesk Land Desktop - Civil Design, raster image design technology, and database/spreadsheet applications. His formal education is enhanced by more than 6 years of hands-on experience performing field investigations, collecting and interpreting data and producing exhibits.

Priscilla Villanueva

Administrative Assistant

PROFESSIONAL PROFILE

YEARS OF EXPERIENCE	19
Pegasus Engineering, LLC	7+ years
With Others	12+ years

EDUCATION

A.S. Office Technologies	1997
Onondaga Community College	
Drafting Certificate	2009
Valencia Community College	

ADDITIONAL SKILLS

Microsoft Office Products
Adobe Products

Ms. Villanueva serves as Administrative Assistant for the public infrastructure section which primarily focuses on transportation, stormwater, and utilities. Her responsibilities include assisting the technical staff with comprehensive administrative functions including proposal preparation, invoicing, bid document preparation, utility coordination, grant writing assistance, marketing research, scheduling, travel coordination, and coordinating the servicing of office equipment and ordering supplies. Ms. Villanueva assists Principals and Senior Engineers by monitoring all public advertisements by governmental entities within Florida as they issue Requests for Qualifications (RFQ's), and then prepares a weekly summary for staff review and decision making. She works with the technical staff in preparing proposals for various clients including the preparation of organizational charts, supporting graphics and figures, form preparation, word processing, and final proposal assembly. Her responsibilities also include assisting staff on project assignments with research and document acquisition. She performs the final word processing for technical reports, permits, and grant applications. Ms. Villanueva also assists the technical staff with preparation of bid documents including project manuals, bid forms, front end documents, bid tabulation sheets, and recommendations for award.

In addition to her marketing and project production responsibilities, her duties as Administrative Assistant include maintaining the office facilities in an orderly manner, including organizing and updating the office filing systems on a sustained basis. She also serves as the primary interface with the general public, with vendors, job applicants, and inquiries of varying types. She also is responsible for organizing special events and technical seminars.

Education

Dutchess Community College 2 years Liberal Arts; Numerous FDOT and Equipment Training Seminars; Ground Penetrating Radar (GPR) Certified; Confined Space Safety Awareness Training; MOT Trained and Certified.

Professional Organization Membership

Associate Member of: Sunshine State One Call; and Florida Utilities Coordinating Committee; Catholic Cemetery Conference; American Public Works Association; and American Society of Civil Engineers, East Central Branch

BRIAN POHL, PE
Contract Manager/Testing Engineer

Mr. Pohl coordinates and directs geotechnical explorations and testing and inspection services for buildings, bridges, residential and industrial facilities and small to large roadways. He has **18 years of experience** that includes shallow and deep foundation and testing services analysis (including spread footing and pile foundations); geotechnical studies for roadway and bridge projects and land development; design and monitoring of ground modification procedures for problematic soil conditions and in pond design recommendations. Mr. Pohl also has experience with various pavements, rigid and flexible design, and has provided earthwork recommendations for underground utilities within problematic soil conditions. Mr. Pohl has also performed Weap Analyses and Pile Driving Analyses for FDOT and commercial projects.

Mr. Pohl has managed the geotechnical and/or materials testing for the following projects:

- I-95 & I-4 Interchange Design Build (Geotechnical and CQ Services) Volusia County, Florida
- Beach Street Force Main Improvements (Geotechnical and Testing) Daytona Beach, Florida
- World Class Distribution Center (Trader Joe's) (Geotechnical and Testing Inspection Services) Volusia County, Florida
- Clyde Morris Boulevard Widening Project (Geotechnical Services), Daytona Beach, Florida
- Tanger Retail Outlet Mall, I-95 & LPGA; (This project is in initial phase of construction (Geotechnical and Testing Services), Volusia County, Florida
- Williamson Boulevard Widening Project, (Geotechnical & QC Services) Volusia County, Florida
- SR 415 Pedestrian Bridge, (Geotechnical & QC Services) Volusia County, Florida
- SR 442 Pedestrian Bridge, (Geotechnical Services), Volusia County, Florida
- Daytona Beach International Airport Drainage Improvements
- SR 9A & 9B Geotechnical Evaluation, Jacksonville, Florida

1.0 SUMMARY OF EXPERIENCE ON PREVIOUS PROJECTS

Please refer to the end of this section for six (6) representative "project profiles" for various governmental projects successfully completed by Pegasus within budget and on schedule or ahead of schedule that fall within the categories requested by the City.

Project Name	Client
Central Beach Flood Mitigation Improvements – Phase III	City of New Smyrna Beach, Florida
Devonshire and Harbour Isle Drainage Improvements	City of Longwood, Florida
West Side Emergency Flood Management System (WSEFMS)	City of DeBary, Florida
Traffic Roundabout "LAP" Project at Maguire Road/Park Avenue and Windermere Elementary School	Town of Windermere, Florida
New Sessions School Road	City of Winter Garden, Florida
City of Winter Springs Continuing Traffic Engineering Consultants	City of Winter Springs, Florida

2.0 LIST OF SIMILAR PROJECTS

As described throughout this submittal, Pegasus senior professionals have successfully completed a wide variety of services for governmental clients across Florida. Following is a representative list of such projects / services for governmental entities. Also, included is a typical project approach utilized by our Sr. Project Manager on each assignment, with modifications made as necessary to adapt to the specifics of each assigned project, site history, constraints, and opportunities, etc.

- **Maguire Road / Park Avenue Roundabout**

  For: Town of Windermere, Florida
  Services included fast-track planning, design, MOT / detour plan, R/W acquisition (from Orange County, School Board, and Orlando Utilities Commission), and construction phase services with full-time on-site inspection of this highly acclaimed traffic roundabout and pedestrian improvements project. Construction was required to be completed within an absolute 6 week deadline immediately prior to start of the fall 2010 school year at adjacent Windermere Elementary School. Pegasus developed an innovative Maintenance of Traffic Plan and Detour Plan to shut down the intersection to allow 14-hour daily construction periods, including some necessary night-time paving operations, thereby reduced the construction period by an estimated 2 months.

- **Pace Road Enhancements & Multi-Use Trail**

  For: Polk County Government
  The project scope included a 0.9-mile design of urban roadway, 12 foot wide trail along with continuous landscape, hardscape (benches, receptacles), and decorative lighting.

- **East Altamonte Springs Sidewalk Improvements for Sunrail Accessibility**

  For: Altamonte Spring for Seminole County Government
  The project included design of approximately 12,000 feet of sidewalks in the vicinity of the new Sunrail Station in Altamonte Springs.

- **New Sessions School Road (Renamed Sunridge Blvd)**

  For: A joint effort between City of Winter Garden, Orange County, and School Board
  Project included design of new 0.5 mile roadway with 2-lane urban typical section with provisions for future 4-laning, intersection improvements at Avalon Road with signalization, 8-foot sidewalk, and 38-foot median for future inside widening.

- **Seminole County Intersection Improvements**

  For: Seminole County Government
  Services included design of improvements at over 50 intersections, including signalization and other pedestrian safety features at over 50 intersections.

3.0 CITATIONS, VIOLATIONS AND LITIGATION

Pegasus Engineering has not been involved in any lawsuits relative to company contracts or other company business nor has it failed to complete in accordance with any contract regarding non-performance, nor any officer or partner has failed to complete a contract handled in his/her name over the last five (5) years. To the best of our knowledge, Pegasus Engineering, LLC has not failed to complete any assignment or is not presently involved in any conflicts, disputes or litigation. To date, Pegasus Engineering, LLC has never been involved in any such legal actions.

4.0 ADDITIONAL INFORMATION: PROJECT APPROACH

Pegasus' senior professional staff members and our Team of highly qualified sub-consultants have successfully provided services on a wide variety of projects for various cities and counties in Florida. The following narrative provides a listing of typical design project activities and tasks that Pegasus utilizes in developing a detailed scope of services, prior to an initial review during project scope and schedule development with governmental staff members. While the work project delivery format below is based on a 30%, 60%, 90%, and final plans submittal sequence, project schedules can be significantly accelerated to meet required completion dates.

Scope Preparation & Existing Conditions Review

- Pegasus Initiates each Scope Preparation with a Comprehensive Review of all Available Documentation, including Planning Reports, As-Built Plans, Permit Data, Completed and/or Proposed Adjacent Projects, etc.

- Based on the nature of the assignment and the various services that may be required (i.e. surveying, geotechnical, site contamination, SUE, architectural, landscape, environmental assessment electrical, etc.), commitments are obtained from necessary qualified sub-consultants to participate on our Project Team and assist in the development of the detailed scope of services, project schedule, and fees.
- Meeting with Staff & Other Departments to Develop Complete Understanding of Objectives, Project Background, Brainstorming, & any other Pertinent Information
- Identify all Critical Project Issues
- Utilize Sunshine State One-Call for all Existing Utilities in Project Area
- Determine Survey, Geotechnical & Environmental Analysis Investigation Limits
- Obtain all Available GIS Information
- Conduct Pre-Application Meeting with the SJRWMD & other Regulatory Agencies
- Develop Project Schedule for Review with Staff
- Complete Scope & Fee Negotiations
- Receive County's Notice-to-Proceed

Preliminary Engineering & 30% Plans Phase

- Design / Topographic Survey
- Confirm Existing Right-of-Way Limits
- Complete Geotechnical Investigation
- Complete Wetland & Floodplain Delineation
- Develop Typical Section & Horizontal/Vertical Geometry
- Develop Preliminary Drainage & Stormwater Management Design
- Subsurface Utility Locates (SUE)
- Preliminary Utilities Plan
- County Review of 30% Plans
- If Requested and Authorized, Prepare Exhibits for Public Meetings & Provide Meeting Assistance

60% Construction Plans

- Final Project Geometry
- Drainage Design & Stormwater Management Plan
- Signing & Marking Plans
- Maintenance of Traffic Plans

60% Construction Plans (Cont'd)

- Stormwater Pollution Prevention Plan (SWPPP)
- Utilities Design
- Preliminary Quantities Estimate
- Preliminary Cost Estimate
- Preliminary Right-of-Way Requirements
- County Review of 60% Plans Submittal
- Prepare & Submit Permit Applications

100% Plans

- Final Plans & Quantities
- Finalize Right-of-way Requirements
- QA/QC Process & Constructability Review
- Value Engineering Review for Potential Cost Savings

Permitting

- Schedule Early Meetings with SJRWMD & Other Regulatory Agencies
- Prepare & Submit Permit Applications at 60% Plans Submittal

Utility Coordination

- Identify & Coordinate with All Utilities
- Utilize SUE Information with Horizontal / Vertical Locates
- Submit Construction Plans to affected utility companies
- Address Potential Conflicts
- Finalize Utility Coordination Plans

Cost Estimate

- Develop Final Cost Estimate for Submittal with 100% Plans based on Latest Unit Price Data

Bidding Phase Assistance

- Prepare Project Manuel, Bid Forms and Technical Specifications
- Technical Specifications
- Attend Pre-bid Meeting if Authorized
- Assist with Analysis of Bids if Authorized

Post-Design Services

- Attendance at Pre-Construction Meetings and Progress Meetings as Authorized
- Review Shop Drawings
- Respond to RFI's
- Provide Project Closeout Assistance, Including As-Built Review, Certifications, etc.

Project Manager Responsibilities

After our receipt of the Notice-to-Proceed from the City for any specific assignment, Mr. David Hamstra, our designated Program Manager, will be responsible for insuring that the following activities and items are properly completed. Our Team's "Kick-off Meeting" will be held with our designated Team members to clearly define the scope of services, set task responsibilities, establish schedules, and milestones, and review reporting assignments. All project decisions will be documented. All documents will be supported by appropriate data that will clearly show the choices evaluated and the basis for our recommendations. All supporting calculations, text, or data used to develop a document will be signed and dated by the individual involved when the work is performed. All telephone conversations and meetings that include or affect a project decision will be documented. Minutes of meetings will be prepared and distributed to attendees promptly for confirmation of decisions made, with the meeting minutes then filed after appropriate correction.

All pertinent calculations will be made on standard computation forms. In strict accordance with our long-established QA/QC Program, all documents will be reviewed and/or checked by a designated qualified QC reviewer who is not directly performing the initial work activity. The reviewing individual will sign and date the documents and prepare a record of review. Review

comments will be resolved by the originator of the document and checked again until corrected. Our Program Manager will maintain a detailed inventory of all comments received during the course of the project. This data will be fed into our checklist system, which will identify the person responsible for dealing with the comment, the schedule for addressing the comment, and the current status. Our Team sub-consultants will be required to provide documentation that their firms work products have similarly been QA/QC reviewed prior to submittal.

CENTRAL BEACH FLOOD MITIGATION IMPROVEMENTS PHASE III

CITY OF NEW SMYRNA BEACH, FLORIDA

Services Provided:
- Design
- Permitting
- Construction Plans
- Bid Documents
- Public Meetings
- Grant Assistance
- CEI Services

Engineering Fees:
$643,542 (Design and Permitting)
$85,510 (CEI Services)

Design & Permitting Services Completion Date:
September 2014

Low Construction Bid:
$8,790,553

Final Construction Cost:
$9,126,519 (Cost Increase Resulted from City Requested Additional Work Items)

Construction Completion Date:
October 2017 (Original Schedule)
December 2016 (Actual)

Client Reference:
Kyle W. Fegley, P.E.
City Engineer
City of New Smyrna Beach
210 Sams Avenue
New Smyrna Beach, Florida 32168
386-410-2811 / 386-410-2804 (fax)
kfegley@cityofnsb.com

Project Manager:
David Hamstra, P.E., CFM

Senior Project Engineer:
Mike Bruegger, P.E.

Project Engineer:
Johan Rodriguez, P.E., CFM

During November of 2001, the Central Beach area experienced significant structural and roadway flooding due to several factors, ranging from approximately 9.5-inches of rainfall and high tides to reduction in flood storage, and increased impervious area due to in-fill development over the years. Immediately after the 2001 flooding event, the City of retained a local engineering firm to prepare a drainage study for the Central Beach area. Subsequently, construction plans were prepared by for Phases I and II, and construction of the improvements was completed. Since the completion of Phases I and II, the City retained Pegasus Engineering to provide design and permitting services, and prepare bid documents (construction plans and specifications) in order to implement the Phase III Improvements within the 206-acre watershed. In addition, Pegasus assisted the City in preparing conceptual construction plans in support of the application for a Flood Mitigation Assistance (FMA) grant from the Federal Emergency Management Agency (FEMA) / Department of Emergency Management (DEM). More importantly, Pegasus was able to assist the City in securing a $5,040,000 FMA grant in order to construct the Phase III Improvements. The proposed Phase III improvements consist of stormwater conveyance improvements which include upgrades to the existing systems and construction of new storm sewer systems to provide adequate flood protection for the residences within the Central Beach watershed. Specifically, the Phase III improvements are located within the rights-of-way of the following twelve (12) roads: Columbus Ave., Cedar Ave., Oakwood Ave., Carol Ave., Ocean Ave, Hope Ave., Maralyn Ave., Canova Dr., Goodwin Ave., South Pine St., Cooper St., and 2nd Ave. In addition to the conveyance system upgrades (storm sewer pipes, drainage inlets, and pumps), exfiltration systems are proposed within segments of the Cooper St., Oakwood Ave., and Ocean Ave. rights-of-way in order to provide water quality treatment. The total length of the proposed improvements area are located within approximately 18,000 linear feet of right-of-way. As part of the engineering services, senior Pegasus staff coordinated with subconsultant Daniel W. Cory Surveyor, LLC for the boundary, location, and topographic survey of the proposed project area, Southeastern Surveying and Mapping Corporation for sub-surface utility mapping using ground penetrating radar (GPR) technology, and Universal Engineering Sciences for geotechnical investigation. Close coordination with various utility entities (AT&T, Florida Public Utilities, and NSB Utilities Commission) was conducted in addition to performing field reviews to confirm the accuracy of the survey drawings and to establish the contributing drainage basin areas. A detailed hydrologic and hydraulic (H&H) model using the ICPR computer program was created for the existing and proposed conditions in order to accurately determine the extent of the flooding and the benefits obtained from the proposed improvements. Various pre-application meetings with SJRWMD were conducted in order to establish the design criteria and permit requirements and subsequently obtain an Environmental Resource Permit (ERP). Pegasus assisted the City with the bid process and continued to provide post-design services (i.e. shop drawing review, limited inspections, provide responses to requests for information, FEMA reimbursement requests, etc.) **until the completion of the improvements originally scheduled for June 2017, but actually completed ahead of schedule in December, 2016. The low construction bid was $8,790,553, and the final construction costs for drainage, utilities, and paving improvements was $9,126,519. The 3.8 percent increase was a result of City requested additional work.**

DEVONSHIRE AND HARBOUR ISLE DRAINAGE IMPROVEMENTS
CITY OF LONGWOOD, FLORIDA

Services Provided:
- Preliminary Engineering
- Final Design and Permitting
- Post-Design and CEI Services

Engineering Fees:
$ 74,012

Project Cost:
$160,797
(for all three construction projects)

Professional Services Completion Date:
2012 - 2014

Construction Completion Date:
June 2014

Senior Project Engineer:
Greg Teague, P.E., CFM

Devonshire Subdivision is located to the north of SR 434 and North Island Lake (aka Mud Lake), just south of Sutter Loop (within Tiberon Subdivision), extending west from Rangeline Road to the Woodlands Subdivision. Drainage improvements were required at the east end of Chelsea Road (within the cul-de-sac), which is located in the northeast corner of Devonshire Subdivision, within Section 36, Township 21 South and Range 29 East. Although the Chelsea Road cul-de-sac is "topographically situated" within the North Island Lake watershed, stormwater runoff was not historically conveyed to North Island Lake through drainage inlets and storm pipes. Because the elevation of the residential lots prevent overfland flow to nearby conveyance systems, stormwater runoff drains east along Chelsea Road where it is eventually trapped within the east end of the cul-de-sac. As a result, the Chelsea Road cul-de-sac has experienced repetitive localized flooding as documented within photographs provided by the affected residents. Pursuant to pre-application meetings conducted with representatives of the St. Johns River Water Management District (SJRWMD) on November 17, 2011 and August 9, 2012, implementing drainage improvements (inlets and pipes) to prevent localized flooding within the Chelsea Road cul-de-sac required additional provisions for water quality. Because water quality improvements could not be implemented within the Chelsea Road cul-de-sac, "compensating treatment" was provided at other locations within the contributing watershed for North Island Lake. More specifically, water quality improvements were implemented at the following locations to prevent an increase in pollutant loads (in the form of Total Phosphorus and Total Nitrogen) discharged to North Island Lake by the flood mitigation improvements for the Chelsea Road cul-de-sac.

- A 2nd generation (nutrient separating) baffle box, with a permitted nutrient removal efficiency of 15.5% for approximately 9.5 acres of residential land use within the contributing drainage area, was installed on Devonshire Boulevard just east of Preston Road (Devonshire Subdivision).

- A 2nd generation (nutrient separating) baffle box, with a permitted nutrient removal efficiency of 15.5% for approximately 8.9 acres of residential land use within the contributing drainage area, was installed on Autumn Brook Circle just east of Harbour Isle Way (Harbour Isle Subdivision).

Because the proposed flood mitigation improvements are retrofit in nature, the residents were informed that a flooding potential will still exist at the Chelsea Road cul-de-sac. For all practical purposes, improved flood protection for the Chelsea Road cul-de-sac is limited by the conveyance capacity that is provided by the downstream drainage system (point of connection) on Rangeline Road. Although flooding may still occur whenever the peak runoff rate exceeds the peak discharge rate that can be conveyed by the downstream drainage system on Rangeline Road, the duration of flooding is substantially reduced.

This project was completed within budget and ahead of schedule.

WEST SIDE EMERGENCY FLOOD MANAGEMENT SYSTEM (WSEFMS)
CITY OF DEBARY, FLORIDA

Services Provided:
- Permitting
- Construction Plans
- Bid Documents
- Public Meetings
- Grant Assistance
- Post-Design Services

Engineering Fees:
$836,000 (Design and Permitting)
$420,670 (CEI Services)

Project Cost:
$6,575,915 (Construction)

Completion Date (Construction):
December 2011 (WSEFMS)
May 2013 (WSEFMS Expansion)

Client Reference:
Kevin Hare
Construction Services Manager
City of DeBary
16 Colomba Road
DeBary, Florida 32713
386-668-2040 / 386-668-4122 (fax)
khare@debary.org

Project Manager:
David Hamstra, P.E., CFM

Senior Project Engineers:
Greg Teague, P.E., CFM
Leylah Saavedra, P.E., CFM

Project Engineer:
Johan Rodriguez, P.E., CFM

This project was completed within budget and per the anticipated schedule

During the 2004 hurricane season, and its 2005 after-math, the City of DeBary endured extended periods of abnormally high lake levels. In turn, this caused chronic flooding throughout the City forcing road closures and home evacuations, disabling septic systems (leaving citizens no alternative but to share portable toilets with their neighbors), and causing the City government to expend a large portion of its General Fund to manage the devastation. Recognizing that 33 out of the 34 City lakes are land-locked, the City of DeBary in conjunction with their consulting engineers devised the West Side Emergency Flood Management System (WSEFMS).

The project consisted of a network of three (3) permanent stormwater pump stations and six (6) miles of stormwater force mains designed to maintain the water level of historically problematic lakes so that they are able to withstand and/or respond to major rainfall events or series of events. Due to the cooperation of numerous stakeholders including Progress Energy, Florida Power & Light, the State of Florida (FDOT), FEMA, Volusia County, and the SJRWMD, this project gained traction at every level and become a reality. For DeBary residents, their City's infrastructure is now capable of protecting them from catastrophic loss.

Excess stormwater runoff from extreme rainfall events that will accumulate at the existing stormwater pond at the intersection of U.S. Highway 17/92 and DeBary Plantation Boulevard, will be pumped through large stormwater pipes/force mains (ranging in size from 16-inches to 36-inches) heading west along DeBary Plantation Boulevard and south along Donald E. Smith Boulevard, ultimately discharging into a large City-owned 40 acre borrow-pit (approx. 25 feet deep).

Several grants secured for the funding of this project were sponsored by FDOT ($1 million dollars), FDEP ($500,000 dollars) and FEMA (HMGP Grant of $7,290,000 at 75% Federal match), which covered expenses incurred from the design phase to final project construction. In January 2012, FEMA expanded the scope of services covered under the original WSEFMS grant to include three additional projects: the Pine Valley Court Drainage Improvements, the No Name Lake Outfall Improvements and the Lakeside Gravity Outfall System – Phase I projects. The original WSEFMS project was completed in July 2010 while the construction of the WSEFMS expansion was finalized in December 2012.

The FEMA grant program required extensive documentation related to the receipts and estimates of property damage and replacement costs. Detailed Benefit-Cost Analyses were prepared in order to confirm that the project would qualify for the maximum amount of assistance from FEMA. The City's consulting engineers communicated often with FEMA staff to keep them up to date with the project design and progress, and to prevent miscommunications through the application documentation. Pegasus staff prepared quarterly progress reports and reimbursement requests to the Division of Emergency Management (DEM). Pegasus staff also coordinated with the FDOT and the FDEP in order to secure $1,500,000 in additional reimbursements.

All six (6) phases of the original WSEFMS project are constructed, including the additional three projects previously mentioned.

Traffic Roundabout "LAP" Project at Maguire Road/Park Avenue & Windermere Elementary School
Windermere, Florida

Services Provided:	**Planning, Design, Right-of-Way Acquisition, L.A.P. Project Administration, Bid & Construction Phase Services**
Engineering & Inspection Fees:	**$65,000**
Project Construction Cost:	**$255,000**
Start Date:	**2008**
Completion Date:	**2010**
Client Reference:	**Craig McNeal Former Public Works Supervisor Town of Windermere 352-241-8940**

Town of Windermere
Among the Lakes

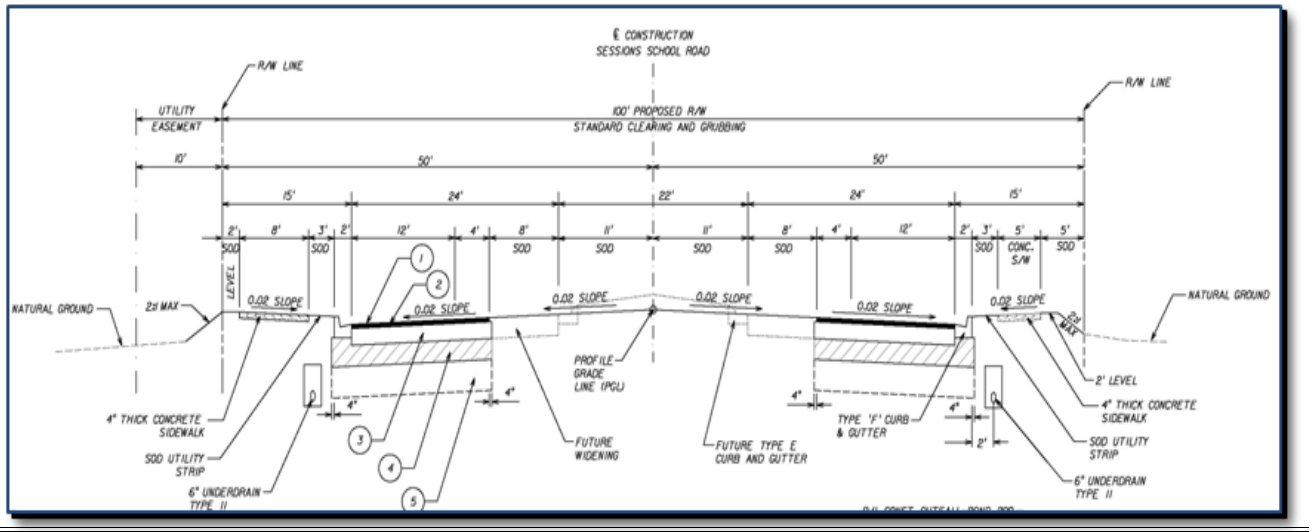
Project Design Staff:
Fursan Munjed, P.E., Project Engineer
Keith Johnson, P.E., Engineer
Sean Beck, Sr. Designer

This highly acclaimed FDOT Local Area Program (L.A.P.) project was completed ahead of schedule and under budget. It was conceived and planned to alleviate a serious traffic congestion and school pedestrian safety concern at the 3-way intersection of Maguire Road and Park Avenue, adjacent to the Windermere Elementary School. Our Project Manager initially developed a preliminary plan to establish overall project feasibility and to identify additional right-of-way required for this project. He also coordinated with Orlando Utilities Commission (O.U.C.) to obtain a donation of right-of-way on the east side of Maguire Road, adjacent to the Orlando Area Rowing Society ("O.A.R.S.") facility. He also worked closely with the Orange County Public School District to obtain a donation of right-of-way along the west side of Maguire Road at the northwest quadrant of the project. Our Project Manager was also successful through his long term coordination with the private owner of the previous railroad right-of-way to obtain a donation of right-of-way at the southwest quadrant of the project. Pegasus also coordinated with the affected public utilities including: Progress Energy; Lake Apopka Natural Gas District; Orange County Public Utilities; and CenturyLink. This coordination resulted in relocation of two (2) Progress Energy overhead power lines, relocation via directional drill of a section of natural gas pipeline, and relocation of a Fire-hydrant. Our Project Manager was also able to modify certain plan elements to save specimen trees.

Pegasus prepared a full set of bidding documents, followed by preparation of a bid tabulation and recommendation of award. Pegasus developed a detailed Traffic Control Plan (TCP) with detours that allowed the intersection to be shut down for a 3-week period in July, 2010 so the project could be fast-tracked. The project was completed within 4 weeks and opened for service in time for the start of the 2010-2011 school year, which was the reason for fast tracking the construction. Traffic flow has greatly improved during peak periods, and school officials laud the project.

New Sessions School Road
City of Winter Garden, Florida

Services Provided:	**Final Construction Drawings, Permitting, Survey and Right-of-Way Mapping**
Engineering Fees:	**$454,236**
Construction Cost:	**$2,150,000**
Start Date:	**2008**
Completion Date:	**2011**
Client Reference:	**Don Cochran Assistant City Manager City of Winter Garden 300 W. Plant Street Winter Garden, Florida 34787 407-656-4111 407-656-4952 (fax) dcochran@cwgdn.com**



Key Project Staff:
Fursan Munjed, P.E., Project Manager
Juan Fong, P.E., Senior Engineer
Sean Beck, Senior Designer

This project was completed within budget and ahead of schedule.

This new road project was a joint effort between the City of Winter Garden, Orange County School Board, and adjacent property owners to construct a new roadway to provide an east-west connection from Avalon Road to Siplin Road and access to the new elementary school and future development.

This project included the permitting, final construction plans, specifications, and bidding of Session School Road (since named SunRidge Boulevard) from Avalon Road to Siplin Road. The construction improvements consist of 0.5 mile of a new roadway with a 2-lane urban typical section with provisions for future 4-laning. Intersection improvements such as turn lanes and traffic signalization at Avalon Road are also included.

The typical section for Session School Road includes an 8-foot sidewalk, curb and gutter, 12-foot lanes, 4-foot shoulders and a 38-foot wide median for future inside widening.

Services Provided:	**Preliminary Engineering Study, Final Construction Plans, Permitting**
Start Date:	**2008**
Completion Date:	**On-going**
Client Reference:	**Brian Fields, P.E. Comm. Development Director 1126 East State Road 434 Winter Springs, Florida 32708 407-327-1800 407-327-6695 (fax) bfields@winterspringsfl.org**

Key Project Staff:
Fursan Munjed, P.E., Project Manager
Juan Fong, P.E., Project Manager
Keith Johnson, P.E., Project Engineer

All of the intersection improvements projects listed below have been completed on schedule and within budget.

- **Design Services:** This continuing contract had included the design and construction of intersection improvements, including signalization improvements and turn lane improvements at the following intersections:

  - State Road 434 at Vistawilla Drive
  - State Road 434 at Tuskawilla Road
  - State Road 434 at Wagner's Curve
  - State Road 419 at Edgemon Avenue
  - State Road 419 at Moss Park Road
  - Tuskawilla Road at Trotwood Boulevard
  - Tuskawilla Road at Winter Springs Boulevard

  The signalization improvements included the design of fluted mast arm signal poles with decorative bases and acorn type light fixtures consistent with the City of Winter Springs Town Center Criteria. The turn lane improvement projects, required for safety and capacity reasons, included drainage modifications, pavement design, signing and pavement markings and utility coordination.

- **Permitting Services:** Pegasus Engineering prepared and submitted to Florida Department of Transportation (FDOT - District 5) Permit Applications to construct the proposed improvements along the State roadways. Also, the plans were submitted to Seminole County for review and approval.

- **Joint Funding Negotiations:** Pegasus Engineering, on behalf of the City of Winter Springs, made requests from the State for joint funding of improvements along the State roadway system and was able to secure this funding for two projects. Also, Pegasus Engineering assisted the City in negotiating with developers for fair share contribution at proposed development locations.

- **Bidding Phase and Construction Administration Phase Services:** Pegasus Engineering was responsible for preparing the bid documents for these projects, distributing the contract documents to bidders, evaluating the bids including bonds and references, and providing the City with a letter of recommendation to award the contract. Pegasus Engineering also was responsible for the construction administration of these projects. This included shop drawing reviews, schedule reviews, field meetings to resolve construction related issues, payment review and approval, and final acceptance

1.0 OTHER QUALIFICATIONS/PERFORMANCE DATA FOR CONSIDERATION

Pegasus Engineering's Extensive Grant Expertise

One of the major strengths of the senior personnel of Pegasus' Stormwater Department is the ability to secure grant money from various local, state and federal programs. Proposed capital improvement projects are costly and require a substantial financial commitment from the municipality. However, there are numerous programs that provide funding to alleviate some of the financial burden and allow projects to move forward. Grant funding has been secured by or with the direct assistance of our senior personnel on behalf of various municipalities from the following sources:

FDEP Florida Forever Program (TMDL Water Quality Non-Point Source Reduction Program)

- $400,000 for Seminole County (Club II Borrow Pit Stormwater Management Facility)

Department of Community Affairs (DCA) CDBG 2008 Disaster Recovery Program

- $2,462,000 for Volusia County (Miller Lake)
- $3,470,000 for Brevard County (West Cocoa)

  $5,932,000 Total

As shown, our senior stormwater staff has secured or directly assisted to secure over **$46 million** in grant funds in recent years. In addition to obtaining grant funding, they have also assisted municipalities in implementing Stormwater Utilities and Stormwater Assessment programs in order to help fund flood control and water quality improvements. Pegasus Engineering has recently completed a stormwater assessment study for the City of DeBary, which currently generates $500,000 to $600,000 annually for the City, and has assisted in the establishment and approval of a $10 Million bond for stormwater improvement projects.

2.0 LIST OF ONGOING PROJECTS IN DESIGN OR CONSTRUCTION PHASE

As requested by the City, please find below a listing of Pegasus Engineering's active projects under design or in the construction phase.

PROJECTS UNDER DESIGN

- Thrill Hill Reservoir (Mount Dora)
- Five Points Connector Road (Seminole County)
- Public Works Facility (Mount Dora)
- Plant Street and East Crown Point Road Intersection Improvements (Winter Garden)
- Summerlin Avenue Baffle Box (Orange County)
- State Road 429 Northbound On-Ramp Improvements (Central Florida Expressway Authority)
- East Graves Avenue Drainage Improvements (Orange City)
- Pine Hills Road and Indialantic Drive Traffic Signal (Orange County)
- South Holly Avenue CRA Streetscape, Drainage and Utilities Improvements (Orange City)
- State Road 434 at City Hall Right Turn Deceleration Lane (Winter Springs)
- New Oxford Road Roadway and Drainage Improvements (Seminole County)
- Pine Hills Road and Rouse Road Landscape Plans (Orange County)

PROJECTS UNDER CONSTRUCTION

- County Road 535 (Orange County)
- Reiter Park Master Plan (Longwood)
- State Road 35 - Baseline Road (Marion County)
- Palm Island Park - Phase 2 Boardwalk Improvements (Mount Dora)
- State Road 674 (Hillsborough County)
- Rob Sullivan Park - Phase 2 Emergency Access Road Improvements (DeBary)
- Plant Street and Hennis Road Traffic Signal (Winter Garden)
- Mill Lake - Phase 3 Water Quality Improvements (Orange City)
- Lake Mary Boulevard VMS (Seminole County)
- Soldiers Creek Alum Treatment Facility (Seminole County)
- State Road 408 Milling and Resurfacing (Central Florida Expressway Authority)
- Alafaya Trail Landscape Plans (Orange County)
- County Road 491 (Citrus County)
- County Road 535 and Windermere High School (Orange County)

RFQ 12-17-ENG

Forms and Addendum

Pegasus ENGINEERING

SWORN STATEMENT UNDER SECTION 287.133(3) (1)
FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for RFQ 12-17-ENG Continuing Professional Engineering Services

This sworn statement is submitted by Pegasus Engineering, LLC

[Name of entity submitting sworn statement]

whose business address is: 301 W. State Road 434, Suite 309, Winter Springs, FL 32708 and (if applicable) its Federal Employer Identification Number (FEIN) is 26-0806410. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: _____. My name is Juan Fong and my relationship to the entity named above is Principal.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

_X_ Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

ADDENDUM 1

RFQ 12-17-ENG
CONTINUING PROFESSIONAL ENGINEERING SERVICES

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to Request for Qualifications **RFQ 12-17-ENG CONTINUING PROFESSIONAL ENGINEERING SERVICES,** issued April 1, 2017.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted RFQ documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation, RFQ 12-17-ENG, as though it had been issued at the same time and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The bid opening remains May 9, 2017 at 3:00 PM.

Vendor questions:

1. Are you wanting a statement from our financial institution to satisfy this requirement or are you seeking something else?
   Would you please clarify what you would like to see?

   Answer: Financial Statement, credit score, any unsatisfied liens or judgements.

2. Your RFQ states that proof of insurance certification is to be submitted with the response. However, there are no guidelines as to dollar amounts and coverages you seek in order to get the COI from our provider.

Will you be releasing insurance parameters on coverages so I can give that to my provider and generate the proper Certificate of Insurance?

Answer:

Listed below are various insurance requirements that must be met by the company that the City contracts with for services. Your company **is not required** to submit proof of insurance with this RFQ however, failure to provide proof of insurance as proscribed by this document no later than three (3) working days after your company is notified that it has been selected will automatically disqualify your firm from further consideration.

Workmen's compensation insurance in accordance with the laws of the State of Florida sufficient to secure the benefits of the Florida Workmen's Compensation Law for all employees of the Contractor and employer's liability coverage providing limits as specified in the following paragraph:

Comprehensive General Liability $1,000,000 per person
Bodily Injury, including Death $1,000,000 each occurrence
Property Damage $1,000,000 each occurrence
$1,000,000 aggregate

Comprehensive Auto
Auto Liability
$ 500,000 each person
Bodily Injury, including Death $ 500,000 each occurrence
Property Damage $ 200,000 each accident

Professional Liability: (errors and omissions) $1,000,000 (Minimum)

Furthermore, the Consultant will be required to indemnify, hold harmless, and defend the City of New Smyrna Beach, and their officer and directors, representatives, and employees from any and all suits or claims for damages or injuries, including death, to any and all persons or property, arising out of the Consultant’s work, product, services or operations under this procurement including any negligent act or omission on the part of the selected firm or its subcontractors, if any.

3. Please clarify –

Under Tab 2 Experience – Please provide documentation/summary of experience of no less than three (3) previous projects for each of the items below –

Is it acceptable to provide three projects that provide experience with all the bullets?

OR

Do we need to provide 3 projects for each bullet, if so, can they be the same projects if applicable?

Answer: It is acceptable to provide three projects which provide all the experience required, if applicable. We are looking for three examples of your experience for each bullet, regardless of whether it was in combination with other bullet items.

4. Which tab should we use for the required forms? Should we create Tab 5 for the forms?

   Answer: Yes, Tab 5 will be fine for the forms.

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

CONTRACT RENEWAL
FOR PROFESSIONAL ENGINEERING SERVICES
TETRA TECH, INC.

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for PROFESSIONAL ENGINEERING SERVICES, via RFQ 12-17-ENG; and

WHEREAS, the City accepted the qualifications of TETRA TECH, INC., (Firm); and

WHEREAS, the parties desire to enter into the fourth of five (5) possible one (1) year renewals of the contract pursuant to the RFQ.

NOW, THEREFORE, THE CITY AND TETRA TECH, INC., AGREE AS FOLLOWS:

1. THE CITY and TETRA TECH, INC., agree to all the terms and conditions as stated and contained in RFQ 12-17-ENG, including any/all Attachments, Addenda, and the firm's submitted Request for Qualifications, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the fourth of the five (5) possible one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from _____, 2025 and will continue for a year from that date.

SPECIAL NOTICE OF CANCELLATION SERVICE PROVIDED TO IDENTIFIED THIRD PARTIES ENDORSEMENT

As a special service to you, if we cancel this policy for any reason other than non-payment of premium, within thirty (30) days prior to the effective date of cancellation, we will mail a copy of such written notice of cancellation to all third persons whose name and address have, during the applicable policy period, been placed on file with us through your broker of record due to third party contractual requirements relating to such notice.

As a special service to you, if we cancel this policy for non-payment of premium, within ten (10) days prior to the effective date of cancellation, we will mail a copy of such written notice of cancellation to all third persons whose name and address have, during the applicable policy period, been placed on file with us through your broker of record due to third party contractual requirements relating to such notice.

If we have been provided with an electronic address of such third parties, at our election we may send notice of cancellation to such third parties by electronic mail.

Notice of cancellation of coverage provided to a certificate holder is a courtesy only. Failure to provide such notice will not extend the policy cancellation date, negate the cancellation of the policy, nor confer any rights nor expectations upon the certificate holder nor subject us, our agents nor representatives to liability for failure to provide notice.

THIS FORM APPLIES ONLY TO THE FOLLOWING STATE(S) IF COVERED BY YOUR POLICY. IF A STATE IS NOT LISTED BELOW, THIS FORM DOES NOT APPLY IN THAT STATE.
AL, AK, AR, CA, CO, CT, DE, DC, GA, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NM, NY, OK, PA, RI, SC, SD, UT, VT, VA, WV

This endorsement changes the policy to which it is attached and is effective on the date issued unless otherwise stated.
(The information below is required only when this endorsement is issued subsequent to preparation of the policy.)

NOW, THEREFORE, THE CITY AND TETRA TECH, INC., AGREE AS FOLLOWS:

1. THE CITY and TETRA TECH, INC., agree to all the terms and conditions as stated and contained in RFQ 12-17-ENG, including any/all Attachments, Addenda, and the firm's submitted Request for Qualifications, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's RFQ, the RFQ Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the third of five (5) possible one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from July 10, 2024, and will continue for a year from that date.

END OF CONTRACT FOR SERVICES

AGREEMENT FOR CONTINUING PROFESSIONAL ENGINEERING SERVICES
CITY OF NEW SMYRNA BEACH, FLORIDA

THIS AGREEMENT made and entered into this 26th day of July, 2017, by and between the CITY OF NEW SMYRNA BEACH, a political subdivision in the State of Florida (hereinafter referred to as "the CITY") and **Tetra Tech, Inc.**, (hereinafter referred to as "the CONSULTANT"), hereafter "this AGREEMENT," and "the PARTIES TO THE AGREEMENT," as the case may be.

This contract is a result of RFQ 12-17-ENG, Continuing Professional Engineering Services, and is for one (1) of the seven (7) awarded firms. The term of this contract is for five (5) years, with five (5) optional one (1) year renewals, with both parties agreement.

WHEREAS, the CITY desires to engage the professional services of the Consultant for continuing Professional Engineering Services including design services associated with general Civil Engineering practices to include but not limited to developing a complete set of site plans involving paving, grading, utilities, landscaping and stormwater elements, in compliance with the City's Land Development Regulations, as well as state and federal agency guidelines. Such services may require drainage calculations, utility hydraulic calculations, fire flow calculations, stormwater modeling, special reports for environmentally sensitive areas, ability to attain cultural resource studies and traffic impact analyses.

WHEREAS, the CITY and the CONSULTANT have fully complied with the terms and provisions of Chapter 287.055, et seq., Florida Statutes, generally known as the Florida Consultants' Competitive Negotiations Act ("the CCNA," or "the Act"), as well as Chapters 287.057, et seq. Florida Statutes, "Procurement of Contractual Services;" and

WHEREAS, the CITY wishes to contract with the CONSULTANT for professional Civil Engineering services and/or other such services which may be directly related to the services authorized by the CITY, and as may be further described herein, and/or in amendments hereto or

supplemental forms of contract, which may incorporate, by reference, the terms and provisions herein;

NOW, THEREFORE, the CITY and the CONSULTANT, in consideration of the mutual covenants herein agree in respect of the performance of engineering services and related services by the CONSULTANT and the payment for those services by the CITY as set forth below.

1. TERM OF AGREEMENT:

1.1 The term of this AGREEMENT shall be for a period of five (5) years from the date of execution of this AGREEMENT, which date shall, for all purposes, be determined as either "the effective date," if such is expressed herein, or, in the absence of such express statement of effective date, the date last signed by any party or party representative to this AGREEMENT.

1.2 The initial term of this AGREEMENT may be extended for five (5) subsequent years in one-year incremental extensions, so long as, and conditioned upon, any/all such extension(s) hereof being executed with the identical formalities and substantive signatory approvals as are indicated in this AGREEMENT.

2. SCOPE OF SERVICES:

2.1 As requested in written form only initiated by authorized CITY personnel, and as deemed by the CONSULTANT to be within the professional expertise of the CONSULTANT, the CITY, may, from time to time make request(s) of the CONSULTANT to provide the CITY professional engineering services related continuing Professional Engineering consultant services for the following: Planning, public engagement, design; stormwater and drainage system, site design, environmental floral and faunal assessments, permitting, construction supervision and observation; best management practices (BMP) design (non-traditional/innovative); structures inspections, surveying and mapping, geotechnical investigations, materials testing and grant writing and management and other customary services incidental thereto.

2.2 The CITY reserves the right to retain other engineering firms to provide the same or substantially similar professional engineering services.

2.3 The CONSULTANT shall have the sole and exclusive right to accept or decline acceptance of the CITY's written request for such services as may be requested by the CITY in writing. Any refusal by the CONSULTANT as referenced herein shall in no manner otherwise prejudice the rights and liabilities of the PARTIES to the AGREEMENT hereto.

3. STUDY AND REPORT SERVICES

3.1 As may be specifically authorized in writing by the CITY, and upon agreement as to specific schedule of professional engineering fees, and

3.2 As may be specifically authorized and requested in writing by the CITY directed to the CONSULTANT'S designated representative, the CONSULTANT agrees to perform engineering services which may include investigations; feasibility studies; financial and fiscal studies; evaluation of existing facilities; preparation of schematic layouts and sketches where reasonably required; provide opinions of construction cost; attend meetings with CITY personnel and/or their designated authorized representative or other personnel as may be reasonably appropriate to the specific assignment, all as further described in this AGREEMENT or any supplement or amendment thereto.

4. PROJECT DESIGN SERVICES

4.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to prepare a form of "preliminary design report" for the project authorized. The preliminary design report shall set forth the design basis, criteria, assumptions, schematics, preliminary drawings, materials and equipment evaluation and preliminary selection with capacities, outline specifications, descriptions and such other material as may be appropriate to thoroughly describe the intended design. Based on the information contained in the design report, and with additional input from the CITY, the CONSULTANT shall prepare and submit an opinion of probable construction costs. The CONSULTANT agrees not to

proceed with detailed project design until such time as the CONSULTANT receives formal notification in writing from the CITY as to the CITY's approval of the preliminary design report.

(b) On the basis of the CITY's acceptance in writing of the preliminary design report referenced herein, the CONSULTANT shall prepare detailed project design for the project authorized, which detail may be comprised of drawings, plans, specifications and such other technical documentation reasonably appropriate to enable the CITY to initiate invitations for the bidding of construction of the improvements referenced in the said technical documentation. Upon express written request, and in consideration of additional compensation therefore, the CONSULTANT shall prepare forms of construction contract, general conditions, and supplementary conditions, bid forms, request for proposals, invitations to bid and instructions to bidders, and otherwise assist the CITY in the preparation of other related documents. The CONSULTANT'S work as referenced in this sub-section may include the preparation of a revised estimate of probable construction costs based upon completed construction plans.

(c) Upon written authorization from the CITY and as may be deemed appropriate to the project at issue, the CONSULTANT may confer with officials of State, Federal and local agencies having jurisdiction of the subject project(s) during the preparation of the drawings and specifications and shall assist the CITY in obtaining approval of the same and in obtaining required permits from and agreements with such agencies as delineated in individual project work orders. It is expressly agreed by the CITY and the CONSULTANT that the CITY shall, at all times, remain exclusively responsible for obtaining all authorizations and permitting and approvals for the construction of the improvements which may be the subject matter of the services performed by the CONSULTANT.

5. GENERAL SERVICES DURING BIDDING AND CONSTRUCTION

5.1 As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish professional services during the bid process and during the construction of projects for which the CONSULTANT has prepared drawings, specifications and contract documents, or, as may have been prepared by others and acknowledged and accepted in writing by the CONSULTANT as being suitable for use. The professional services referenced in this sub-section may include, by way of example, but not by way of limitation or inclusion, the CONSULTANT'S providing input to the CITY in connection with the CITY'S receipt and analysis of construction bids and the CONSULTANT'S recommendations for award of construction contracts. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request of the CITY, provide input to the CITY'S authorized personnel regarding the preparation of such drawings or specifications, responses to requests for additional information from bidders or the CITY'S selected contractor(s), as may be reasonably required to resolve conflicts in the plans or specifications or as may conflict with the CITY'S general intent for the project at issue. Further, by way of example, but not by way of limitation or inclusion, the CONSULTANT may, upon written request from the CITY, provide written observations of field conditions; review of shop drawings and working drawings as may be submitted by the CITY'S contractors; periodic site observation of work in progress; review of applications for payments to the CITY, and observation of any final testing or other determination of completion of the work by the CITY'S contractor(s).

6. CONSTRUCTION OBSERVATION:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT agrees to furnish a resident project representative for observation of construction and such other assisting personnel or field staffing as may be deemed by the CONSULTANT to be reasonably appropriate to the process of ensuring the contractor's general compliance and construction conformance with the design intent reflected in the CONSULTANT'S construction contract documents.

(b) The CONSULTANT agrees to assist the CITY in securing applicable Federal, State and local inspections of the project as may be reasonably appropriate to the project.

7. OPERATIONAL PHASE SERVICES

As may be specifically authorized in writing by the CITY and upon agreement as to a specific schedule of professional engineering fees; the CONSULTANT may:

(a) Provide assistance to the CITY in the closing of any financial or related transaction for a project.

(b) Provide assistance to the CITY in conjunction with the refining and adjusting of any equipment or system.

(c) Assist the CITY in training the CITY's staff in the operation and maintenance of the elements of the project within the confines of the expertise and knowledge of the CONSULTANT.

(d) Assist the CITY in developing systems and procedures for control of the operation and maintenance of, record keeping and monitoring required for a project, as may be within the confines of the expertise and knowledge of the CONSULTANT.

(e) Assist the CITY'S contractor's in the preparation of reproducible record drawings showing those changes made during construction process which may constitute substantive changes from the original construction drawings.(f) Provide periodic site visits to the Project for the purpose of reasonably observing readily apparent defects or deficiencies in the completed construction and otherwise assist the CITY in consultations and discussions with Contractor (s) concerning the correction of such deficiencies or defects, and make recommendations as to replacement or corrections of defective work. CITY personnel shall be responsible for making all final determinations as to the contractor's compliance with the construction contract documents.

8. SUPPLEMENTARY AND ADDITIONAL SERVICES:

As may be specifically authorized in writing by the CITY, and upon agreement as to a specific schedule of professional engineering fees:

(a) The CONSULTANT, upon written request of the CITY, shall secure field surveys (including easements plans and descriptions) and any geotechnical investigations not otherwise provided by the CITY which may be reasonably necessary for the preparation by the CONSULTANT of the construction contract documents for which the CONSULTANT has been retained for the project;

(b) The CONSULTANT, upon written request from the CITY, shall assist the CITY in the preparation of State and Federal grant application forms as the CITY may deem appropriate.

(c) The CONSULTANT shall provide such additional professional services, as may be reasonably required to assist the CITY in obtaining permits and approvals for the construction and operation of the project at issue.

(d) The CONSULTANT shall assist in coordinating or attend public meetings and hearings as may be authorized by the CITY.

(e) The CONSULTANT shall furnish copies of drawings, specifications, contract documents, special drawings, reports, and other construction contract or project related documents.

(f) The CONSULTANT shall review materials and equipment submittals tendered by bidders and contractors when such submittals are alternatives to those specified or previously approved; at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the use of any alternative means or methods of construction associated with the construction of the project at issue.

(g) The CONSULTANT shall review the contractor(s)' claims for additional compensation or time extensions submitted by the CITY'S contractor(s); at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of the contractor(s)' request(s) for additional compensation or for additional time for the completion of the construction of the project at issue.

(h) The CONSULTANT shall assist the CITY or others as the CITY may direct the CONSULTANT in writing in the preparation and submittal of proposed contract change orders;

at all material times, the CITY shall be responsible for making the final determinations of the reasonableness or appropriateness of any/all submitted request(s) for change order(s) relating to the construction associated with the construction of the project at issue.

(i) The CONSULTANT shall revise previously approved reports, design documents, drawings and specifications prepared by the CONSULTANT.

(j) The CONSULTANT shall prepare detailed renderings, exhibits or scale models of projects.

(k) The CONSULTANT shall assist the CITY, or otherwise as directed in writing by the CITY, in the preparation of operation and maintenance manuals for the use by the CITY; at all material times, the CITY shall be responsible for the content of any/all such operation and maintenance manuals.

(l) The CONSULTANT shall assist the CITY in connection with the rejection and rebidding of construction projects.

(m) The CONSULTANT agrees to provide appropriate CONSULTANT personnel familiar with the scope of services provided by the CONSULTANT to serve as an expert witness on behalf of the CITY in any litigation or arbitration involving a given project and to assist the CITY in preparing for such litigation or arbitration.

9. CITY'S RESPONSIBILITIES

In addition to the contractual obligations expressly set forth in the foregoing provisions of this AGREEMENT, and as may reasonably be implied therefrom, including the implied obligation of dealing in good faith, the CITY shall, at all times:

(a) Promptly and timely perform any/all obligations hereunder so as to reasonably avoid any form of delay in the work of the CONSULTANT or the performance by others associated with the design and construction of the Project.

(b) The CITY shall promptly pay fees as are due and payable to the CONSULTANT according to the schedule set forth in this AGREEMENT or amendments hereto.

(c) The CITY shall, within five (5) business days following the CITY'S execution of this AGREEMENT, appoint a representative in writing with respect to particular work to be performed under this AGREEMENT, which representative shall have complete authority to communicate with the CONSULTANT, the CONSULTANT'S sub-consultants, and all construction or contractor, or sub-contractor personnel, including the transmittal of instructions to said personnel, receiving information from such personnel, and transmittal of written interpretations and definitions of the CITY's policy and decisions pertinent to the work covered by the Agreement. The CITY may designate a different representative from time to time during the term of this AGREEMENT.

(d) The CITY shall provide all criteria and full information as to the CITY's project or program requirements, including design objectives and constraints, space, capacity and performance requirements, flexibility and expandability, and any budgetary limitations.

(e) The CITY, upon written request by the CONSULTANT, shall furnish to the CONSULTANT copies of all design and construction documents (a/k/a "record drawings"), which may reasonably pertain to the subject project, as well as existing records, reports, permits, correspondence, maps, plans, aerial photographs, CITY standards and codes or other data which may reasonably be required for the CONSULTANT'S work pursuant to this AGREEMENT.

(f) The CITY shall, at no cost to the CONSULTANT, make its facilities and properties available and accessible for inspection by the CONSULTANT and, if authorized by the CITY, to provide labor and safety equipment as required by the CONSULTANT and to guarantee access to and make all provisions for the CONSULTANT to perform the work referenced in this AGREEMENT.

(g) The CITY shall advertise for bids for construction projects as budgeted from qualified bidders, open the bids at the appointed time and plan and pay for all costs incidental thereto.

(h) The CITY shall provide such accounting, independent cost estimate and insurance counseling services as may be required for Projects, such legal services as the CITY may require

with regard to legal issues pertaining to projects including any that may be raised by contractor(s), such auditing service as the CITY may require to ascertain how or for what purpose contractor has used the monies paid under the construction contract, and such inspection services as the CITY may require to ascertain that contractor(s) are complying with any law, rule, regulation, ordinance, code or order applicable to their furnishing and performing the work.

(i) The CITY shall immediately transmit to the CONSULTANT in writing any concern, observation, development, or other such information known or believed by the CITY which has or may, in any manner or form, impact the CONSULTANT'S work pursuant to this AGREEMENT, relative to which written notification to the CONSULTANT, the CITY shall immediately engage in good faith, in-person discussion(s) with CONSULTANT personnel in an effort to fully investigate, analyze and resolve any/all such observation, development, or concern.

(j) The CITY shall respond timely to inquiries or other such requests for information submitted by the CONSULTANT which pertain to the CONSULTANT'S work, in a manner which does not delay the CONSULTANT'S work.

10. AUTHORIZATION OF WORK:

10.1 All work to be performed by the CONSULTANT pursuant to this AGREEMENT shall, as set forth herein, be authorized by the CITY, in express compliance with the following procedures.

(a) The CITY, in requesting professional services of the CONSULTANT, shall issue a form "Task Order," which Task Order shall, prior to its transmittal to the CONSULTANT, be approved by the CITY.

(b) The Task Order shall contain a detailed description of the work to be undertaken by the CONSULTANT, as well as including an express reference to the appropriate paragraphs of this AGREEMENT.

(c) Unless otherwise expressly agreed in writing by the CITY and the CONSULTANT, the Task Order shall be subject to the terms and conditions of payment of professional fees as set forth herein.

(d) The Task Order shall also contain a budget amount of the fees anticipated by the CITY to be paid to the CONSULTANT for the Task Order.

11. PAYMENT FOR SERVICES:

11.1 The CITY agrees to pay the CONSULTANT for all services referenced in this AGREEMENT, including any/all such supplements, amendments, and Task Order(s), in accordance with the 'Fee Estimate' to be included as part of each Task Order. Fees shall be calculated as follows:

(a) Engineering and professional fees shall be based upon lump sum and/or allowances listed in the Fee Estimate. As an alternative, the attached 'Fee Schedule' included with this agreement as Exhibit 'A', may also be utilized for specific projects or tasks. The fee schedule is subject to annual adjustments in September of each year.

(1) Reimbursable Expenses shall be paid to the CONSULTANT at actual cost and include but are not limited to, the following:

(A) Reproduction costs of reports, drawings, specifications, bidding documents, and similar project related items.

(B) Reasonable travel and per diem expenses for any travel outside of Volusia County, particularly for permitting meetings.

(2) In the alternative, such other method or methods for calculating the fee as may be mutually agreed upon in advance by the parties hereto and specified in writing.

(3) All fees shall be invoiced monthly and are due and payable in accordance with the Florida Prompt Payment Act. The amount due shall be determined as the costs are incurred in proportion to the quantity of the CONSULTANT'S work completed as a percentage of the total work for services performed.

(4) For services of the principals and employees of the CONSULTANT who may be called upon to serve in a capacity of witness in any dispute, litigation, deposition, hearing, or other such similar proceeding, the CONSULTANT'S billing for such time shall be based on the Fee Schedule included as Exhibit "A" as adjusted annually as described above.

(5) If, during or after the completion of the drawings, specifications and contract documents, and in accordance with the written direction of the CITY, it becomes necessary to review or revise the drawings, specifications or contract documents for reasons beyond the control of the CONSULTANT, by way of example, but not by way of limitation, changes in Federal or State or local law, applicable code(s), rules, regulations or other requirements, or lapses in time between completion of design and bidding, the CITY shall be obligated for payment to the CONSULTANT for such review, revision or revisions made by the CONSULTANT according to the schedule set forth herein for "additional services."

(6) If Florida Sales Tax becomes due on professional services, the CITY shall reimburse the CONSULTANT for the amount of the sales tax.

12. SUBCONSULTANTS

12.1 The CITY reserves the right to accept or reject the use of sub-consultant(s) by the CONSULTANT, so long as and conditioned up the CITY'S acceptance of same not being unreasonably withheld.

13. PROHIBITION AGAINST CONTINGENT FEES

13.1 The CONSULTANT warrants that it has not employed or retained any company or person, other than a bonafide employee working solely for the CONSULTANT, to solicit or secure this AGREEMENT and that it has not paid or agreed to pay any person, company, corporation, individual or firm, other than a bonafide employee working solely for the firm, any fee, commission, percentage, gift or any other consideration contingent upon or resulting from the award or making of this AGREEMENT.

14. LIFE AND LIMITATIONS OF AGREEMENT:

(a) This AGREEMENT shall remain in full force until its expiration, unless terminated by either party pursuant to the express terms and provisions of Section 15 hereof.

(b) It is expressly agreed the CONSULTANT shall not be required to enter upon any facility or property which the CONSULTANT reasonably believes to be hazardous, dangerous or unsafe.

(c) It is agreed that reproducible and electronic copies of all reports, tests, specifications and record drawings shall be the property of the CITY and shall be delivered to it at the completion of each authorized project or upon written request to the CONSULTANT.

15. TERMINATION

15.1 This AGREEMENT may be terminated by either party without cause upon 30 days' written notice to the other Party.

15.2 If this AGREEMENT, or any supplement, amendment, or Task Order is terminated by the CITY, the CONSULTANT shall submit a form of invoice to the CITY for work performed to date, and the CITY shall pay the CONSULTANT in a timely manner for such completed work as set forth herein.

15.3 In the event of any form of claim, dispute, or controversy by or between the parties to this AGREEMENT, the parties expressly and unequivocally agree to engage in good faith efforts to meet in person to resolve any and all such differences. Absent such informal resolution of any/all such dispute(s), the parties expressly agree to engage in pre-suit mediation in accordance with the applicable rules of procedure for such mediation as may be in force in the Judicial Circuit Courts in which the project at issue is located.

16. INSURANCE PROVISIONS

(a) The CONSULTANT shall be responsible for providing the types of insurance and limits of liability as set forth below.

(1) The CONSULTANT shall maintain, during the term of this AGREEMENT Professional Liability insurance in the amount of $1,000,000.

(2) The CONSULTANT shall maintain, during the term of this AGREEMENT, comprehensive general liability insurance naming the CITY as an additional insured in the amount of $1,000,000 to protect the CONSULTANT from claims of property damages and bodily injury, including wrongful death, which may arise from any operations under this AGREEMENT whether such operations be by the CONSULTANT or by anyone directly employed by or contracting with the CONSULTANT.

(3) The CONSULTANT shall maintain, during the term of this AGREEMENT comprehensive automobile liability insurance in the amounts of $1,000,000 combined single limit bodily injury and $50,000 property damage to protect the CONSULTANT from claims for damages for bodily injury, including wrongful death, as well as from claims from property damage, which may arise from the ownership, use, or maintenance of owned and non-owned automobiles, including rented automobiles whether such operations be by the CONSULTANT or by anyone directly or indirectly employed by the CONSULTANT.

(4) The CONSULTANT shall maintain, during the term of this AGREEMENT, adequate Workers' Compensation Insurance and Employer's Liability Insurance in at least such amounts as are required by law for all of its employees performing work for the CITY pursuant to this AGREEMENT.

(b) Special Requirements: Current, valid insurance policies meeting the requirements herein identified shall be maintained during the duration of the named project. Renewal certificates shall be sent to the CITY 30 days prior to any expiration date. In the event the CONSULTANT is notified by any of their respective insurance carriers of an "intent to cancel" or formal "cancellation notice," the CONSULTANT shall immediately provide written notification to the CITY of such notice.

17. OPINIONS OF COST

17.1 The parties expressly acknowledge the CONSULTANT has no control over the cost of labor, material, equipment or services furnished by others, or over the contractor(s)' means

and methods of determining prices, or over competitive bidding or market conditions; as such, the parties hereto expressly agree the CONSULTANT'S opinion(s) of probable construction costs provided in any form of writing or document for the use and benefit of the CITY are made upon the basis of the CONSULTANT'S experience and qualifications and represent the CONSULTANT'S judgment as an experienced and qualified professional engineer, familiar with the construction industry in the geographic area in which projects may be located. The CONSULTANT does not warrant or guarantee the reliability, accuracy, or completeness of proposals or estimates submitted to the CITY by others, or that actual costs will not vary from opinions of probable cost prepared by the CONSULTANT.

18. ENGINEERING OPINIONS/RECOMMENDATIONS

18.1 Since the CONSULTANT'S work may be subject to review by any one (1) or more permitting or plan review agency(ies), and, as such, the CONSULTANT may have no control over the final design, permitting, specifications, materials, equipment contractor selection, contractor means and methods of construction, and other items following the CONSULTANT'S providing their work for the use and benefit of the CITY, the CONSULTANT does not warrant or guarantee the recommendations and opinions provided by the CONSULTANT.

19. DISCLOSURE AND OWNERSHIP OF DOCUMENTS

19.1 The CONSULTANT shall deliver to the CITY for approval and acceptance, and before being eligible for final payment of any amounts due, all required deliverables prepared for the CITY under this AGREEMENT. The CITY shall not unreasonably withhold payment, as provided by Florida law.

19.2 All specifications, estimates, plans, drawings, construction documents, legal instruments, and materials prepared or accumulated by the CONSULTANT (or by authorized sub-consultants) in rendering services hereunder shall be the sole property of the CITY, which may re-use them at no additional cost and the CITY shall be vested with all rights therein of whatever kind and however created; provided, that neither or none of the CONSULTANT, their authorized sub-

consultants, shall in any manner be liable or legally responsible to anyone for the CITY'S use or re-use of any such materials for any project for which the CONSULTANT is not a party in writing to an amendment, supplement, or Task Order hereto.

19.3 The CONSULTANT shall have the right to include visual or demonstrative representations of the design of the project(s) which may be the subject of this AGREEMENT, among the consultant's promotional and professional material, so long as the CONSULTANT'S use thereof does not include the CITY'S confidential or proprietary information.

20. SUCCESSORS AND ASSIGNS

20.1 The CITY and the CONSULTANT are each hereby bound, one (1) to the other, as well as each of their successors, executors, administrators and legal representatives to the extent permitted by law.

20.2 Neither the CITY nor the CONSULTANT shall assign, sublet or transfer any rights under or interest in (including, but without limitation, monies that may become due or monies that are due) this AGREEMENT without the prior written consent of the other, except to the extent that any assignment, subletting or transfer is mandated by law or the effect of this limitation may be restricted by law. Unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under this AGREEMENT. Nothing contained in this Section shall prevent the CONSULTANT from employing such independent professional associates and consultants, as the CONSULTANT may deem appropriate to assist in the performance of services hereunder.

20.3 Nothing contained in this AGREEMENT shall be construed to give any rights or benefits in this AGREEMENT to any person, party, or entity other than the CITY and the CONSULTANT, and all duties and responsibilities undertaken pursuant to this AGREEMENT will be for the sole and exclusive benefit of the CITY and the CONSULTANT and not for the benefit of any other party.

21. MISCELLANEOUS

21.1 In the event of a dispute or claim between the parties to this AGREEMENT, jurisdiction shall be exclusively in the judicial circuit court(s), and venue for any such litigation shall be exclusively established in CITY OF NEW SMYRNA BEACH, Florida.

22. INDEPENDENT CONTRACTOR

22. The CONSULTANT is deemed to be an independent contractor and not an employee of the CITY for any purpose.

23. LICENSING OF CONSULTANT

23.1 The CONSULTANT shall at all times during the term of this AGREEMENT and at its own cost and expense, maintain such licenses and permits as are required for the performance of work referenced herein by the CONSULTANT.

24. INDEMNIFICATION

24.1 The CONSULTANT agrees to the fullest extent permitted by law to indemnify the CITY from and against claims, losses, damages, personal injuries (including but not limited to death), or liability (including reasonable attorney's fees) which are judicially determined to be the direct and legal cause of the negligent acts or negligent omission of the CONSULTANT. 25. TIME IS OF THE ESSENCE

25.1 Time is of the essence of this AGREEMENT, and the parties agree to cooperate with each other in performing their respective obligations under this AGREEMENT.

26. THIRD PARTY RIGHTS

26.1 This AGREEMENT is not a third party beneficiary contract and shall not in any respect whatsoever create any rights on behalf of any party not expressly a party to this AGREEMENT.

27. PUBLIC RECORDS AND OPEN MEETING LAWS

27.1 The CONSULTANT hereby acknowledges that CITY, as a political subdivision in the State of Florida, is subject to the Florida Public Records Act and Sunshine Law. The CONSULTANT further acknowledges that under the Public Records Act and Sunshine Law, the

CITY must permit the public to inspect and/or copy all public records which the CITY makes or receives in the course of conducting CITY'S business and must hold meetings of the CITY Commission and various CITY Boards and committees in the public, unless particular information is exempt by Florida law from public records disclosure or a particular meeting is not subject to the Sunshine Law. The CONSULTANT acknowledges any record, document, computerized information and program, audio or video tape, photograph or other writing of CONSULTANT related, directly or indirectly, to this AGREEMENT, not otherwise subject to a legal privilege afforded to the CONSULTANT by Florida law, may be deemed to be a Public Record whether in the possession or control of CITY or CONSULTANT. Said record, document, computerized information and program, audio or video tape, photograph, or other writing of CONSULTANT deemed a Public Record is subject to the provisions of Florida Statutes Chapter 119 and may not be destroyed without the specific written approval of the CITY. Upon request by the CITY, CONSULTANT shall promptly supply copies of said records to CITY.

27.2 The CONSULTANT is required to comply with public records laws, specifically to:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public

agency in a format that is compatible with the information technology systems of the public agency.

28. SOVEREIGN IMMUNITY

28.1 Nothing contained in this Agreement shall be construed as a waiver of the CITY'S sovereign immunity pursuant to Florida Statutes Section 768.28 or other limitations imposed on the CITY'S potential liability under state or federal law.

IN WITNESS WHEREFORE, the parties have caused this AGREEMENT to be executed as of this day and date first written, in five (5) counterparts, each of which shall for all purposes are deemed an original.

CERTIFICATE OF LIABILITY INSURANCE

DATE(MM/DD/YYYY) 07/08/2017

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ENDORSEMENT

This endorsement, effective 12:01 A.M. 10/01/2016 forms a part of

Policy No. GL 605-16-04

LIMITED ADVICE OF CANCELLATION PROVIDED VIA E-MAIL TO ENTITIES OTHER THAN THE FIRST NAMED INSURED

This policy is amended as follows:

In the event that the **Insurer** cancels this policy for any reason other than non-payment of premium, and

1. the cancellation effective date is prior to this policy's expiration date;

2. the **First Named Insured** is under an existing contractual obligation to notify a certificate holder when this policy is canceled (hereinafter, the "Certificate Holder(s)") and has provided to the **Insurer**, either directly or through its broker of record, the email address of a contact at each such entity; and

3. the **Insurer** received this information after the **First Named Insured** receives notice of cancellation of this policy and prior to this policy's cancellation effective date, via an electronic spreadsheet that is acceptable to the **Insurer**,

the **Insurer** will provide advice of cancellation (the "Advice") via e-mail to each such Certificate Holders within [30] days after the **First Named Insured** provides such information to the **Insurer**; provided, however, that if a specific number of days is not stated above, then the Advice will be provided to such Certificate Holder(s) as soon as reasonably practicable after the **First Named Insured** provides such information to the **Insurer**.

Proof of the **Insurer** emailing the Advice, using the information provided by the **First Named Insured**, will serve as proof that the **Insurer** has fully satisfied its obligations under this endorsement.

This endorsement does not affect, in any way, coverage provided under this policy or the cancellation of this policy or the effective date thereof, nor shall this endorsement invest any rights in any entity not insured under this policy.

The following Definitions apply to this endorsement:

1. **First Named Insured** means the Named Insured shown on the Declarations Page of this policy.
2. **Insurer** means the insurance company shown in the header on the Declarations page of this policy.

All other terms, conditions and exclusions shall remain the same.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ENDORSEMENT

This endorsement, effective 12:01 A.M. 10/01/2016 forms a part of

Policy No. CA 319-45-11

LIMITED ADVICE OF CANCELLATION PROVIDED VIA E-MAIL TO ENTITIES OTHER THAN THE FIRST NAMED INSURED

This policy is amended as follows:

In the event that the **Insurer** cancels this policy for any reason other than non-payment of premium, and

1. the cancellation effective date is prior to this policy's expiration date;

2. the **First Named Insured** is under an existing contractual obligation to notify a certificate holder when this policy is canceled (hereinafter, the "Certificate Holder(s)") and has provided to the **Insurer**, either directly or through its broker of record, the email address of a contact at each such entity; and

2. The **First Named Insured** is under an existing contractual obligation to notify a certificate holder when this policy is canceled (hereinafter, the "Certificate Holder(s)"); and has provided to the **Insurer**, either directly or through its broker of record, the email address of the contact at such entity,

and the **Insurer** received this information after the **First Named Insured** receives notice of cancellation of this policy and prior to this policy's cancellation effective date, via an electronic spreadsheet that is acceptable to the **Insurer**,

the **Insurer** will provide advice of cancellation (the "Advice") via e-mail to such Certificate Holders.

Proof of the **Insurer** emailing the Advice, using the information provided by the **First Named Insured**, will serve as proof that the **Insurer** has fully satisfied its obligations under this endorsement.

This endorsement does not affect, in any way, coverage provided under this policy or the cancellation of this policy or the effective date thereof, nor shall this endorsement invest any rights in any entity not insured under this policy.

The following Definitions apply to this endorsement:

1. **First Named Insured** means the Named Insured shown on the Declarations Page of this policy.
2. **Insurer** means the insurance company shown in the header on the Declarations Page of this policy.

All other terms, conditions and exclusions shall remain the same.

CERTIFICATE OF LIABILITY INSURANCE

DATE(MM/DD/YYYY) 09/22/2017

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ENDORSEMENT

This endorsement, effective 12:01 A.M. 10/01/2017 forms a part of

Policy No. CA 428-80-55

LIMITED ADVICE OF CANCELLATION PROVIDED VIA E-MAIL TO ENTITIES OTHER THAN THE FIRST NAMED INSURED

This policy is amended as follows:

In the event that the **Insurer** cancels this policy for any reason other than non-payment of premium, and

1. the cancellation effective date is prior to this policy's expiration date;

2. the **First Named Insured** is under an existing contractual obligation to notify a certificate holder when this policy is canceled (hereinafter, the "Certificate Holder(s)") and has provided to the **Insurer**, either directly or through its broker of record, the email address of a contact at each such entity; and

3. the **Insurer** received this information after the **First Named Insured** receives notice of cancellation of this policy and prior to this policy's cancellation effective date, via an electronic spreadsheet that is acceptable to the **Insurer**,

the **Insurer** will provide advice of cancellation (the "Advice") via e-mail to each such Certificate Holders within [30] days after the **First Named Insured** provides such information to the **Insurer**; provided, however, that if a specific number of days is not stated above, then the Advice will be provided to such Certificate Holder(s) as soon as reasonably practicable after the **First Named Insured** provides such information to the **Insurer**.

Proof of the **Insurer** emailing the Advice, using the information provided by the **First Named Insured**, will serve as proof that the **Insurer** has fully satisfied its obligations under this endorsement.

This endorsement does not affect, in any way, coverage provided under this policy or the cancellation of this policy or the effective date thereof, nor shall this endorsement invest any rights in any entity not insured under this policy.

The following Definitions apply to this endorsement:

1. **First Named Insured** means the Named Insured shown on the Declarations Page of this policy.
2. **Insurer** means the insurance company shown in the header on the Declarations page of this policy.

All other terms, conditions and exclusions shall remain the same.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

This endorsement changes the policy to which it is attached effective on the inception date of the policy unless a different date is indicated below.

(The following "attaching clause" need be completed only when this endorsement is issued subsequent to preparation of the policy).

This endorsement, effective 12:01 AM 10/01/2017 forms a part of Policy No. WC 014-62-9497

LIMITED ADVICE OF CANCELLATION PROVIDED VIA E-MAIL TO ENTITIES OTHER THAN THE NAMED INSURED (WORKERS' COMPENSATION ONLY)

This policy is amended as follows:

In the event that the **Insurer** cancels this policy for any reason other than non-payment of premium, and

1. the cancellation effective date is prior to this policy's expiration date;

2. the **Named Insured** or, if applicable, any other employers named in Item 1 of the Information Page is under an existing contractual obligation to notify a certificate holder when this policy is canceled (hereinafter, the "Certificate Holder(s)") and the **Named Insured** has provided to the **Insurer**, either directly or through its broker of record, the email address of a contact at each such entity; and

3. the **Insurer** received this information after the **Named Insured** receives notice of cancellation of this policy and prior to this policy's cancellation effective date, via an electronic spreadsheet that is acceptable to the **Insurer**,

the **Insurer** will provide advice of cancellation (the "Advice") via e-mail to each such Certificate Holders within 30 days after the **Named Insured** provides such information to the **Insurer**; provided, however, that if a specific number of days is not stated above, then the Advice will be provided to such Certificate Holder(s) as soon as reasonably practicable after the **Named Insured** provides such information to the **Insurer**.

Proof of the **Insurer** emailing the Advice, using the information provided by the **First Named Insured**, will serve as proof that the **Insurer** has fully satisfied its obligations under this endorsement.

This endorsement does not affect, in any way, coverage provided under this policy or the cancellation of this policy or the effective date thereof, nor shall this endorsement invest any rights in any entity not insured under this policy.

The following definitions apply to this endorsement:

1. **Named Insured** means the insured first named employer in Item 1 of the Information Page of this policy.

2. **Insurer** means the insurance company shown in the header on the Information Page of this policy.

All other terms, conditions and exclusions shall remain the same.

Firm Overview

A Brief History

Tetra Tech was founded as a civil engineering firm by four graduates of the California Institute of Technology and has based itself in Pasadena, California, since 1966. The founders' goal was to lead with science. In December 1991, Tetra Tech became a publicly-traded enterprise. Since its initial public offering, the company has grown substantially, expanding its markets, services, and clientele through internal growth and international acquisitions. Today, Tetra Tech is a global leader in providing engineering and technical services. The company is acknowledged for its cutting-edge expertise in sophisticated environmental analysis, modeling, and design and for delivering this expertise effectively across an entire project life cycle.

Our CEO's motto is to serve clients with the speed and affordability of a 20-person firm and the resources of a 16,000-person firm.

Industry Leader

Tetra Tech has built a reputation in the industry as a leader in developing effective solutions to constantly changing, tough engineering challenges. Our reputation for providing effective engineering solutions is backed by reliable systems, engineering, scientific, economic, and business analyses. This is proven by our firm's constant rankings with the *Engineering-News Record* (ENR). For the past 14 consecutive years, Tetra Tech has been ranked No. 1 in water. We are ranked by ENR as the No. 5 design firm in the country, which is the result of the professional relationships we enjoy with our clients. We continue to build on the expertise we've developed over the past five decades.

Firm Summary

Location

Tetra Tech will perform the majority of work under this contract from its downtown **Orlando** office, located at:

201 East Pine Street
Suite 1000
Orlando, FL 32801

Years in Business

In business for **51 years**, Tetra Tech was established in 1966 and has had a Florida presence since 1977.

Number of Personnel

Tetra Tech is made up of **16,000 associates** worldwide, of which 1,773 reside in Florida and over 200 employees in the Central Florida area within an hour to hour and half drive of the City.

Tetra Tech Services

Municipalities across Florida have trusted Tetra Tech for decades to provide them with high-quality engineering services through continuing contracts. Our services include familiarity with New Smyrna Beach since 2008. Tetra Tech has proven its ability to produce a variety of engineering services on time and within budget for the City. This includes the recently bid Islesboro Subdivision Stormwater Paving, Water and Wastewater Improvements project, which Tetra Tech assisted the City in successfully obtaining $2.5M in grant funding.

Tetra Tech is qualified in all the disciplines required to provide services to the City of New Smyrna Beach. This section provides a brief description of our capabilities and qualifications in each service.

Civil Engineering

Tetra Tech provides a broad range of civil engineering services in support of public works agencies, transportation departments, and private clients around the world. Tetra Tech has experience in all phases of planning, design, construction, and operation for stormwater, water, wastewater, and transportation infrastructure projects. Tetra Tech is knowledgeable in public outreach and stakeholder coordination for large, complex, and multi-phase infrastructure repair and new construction projects. We also design retrofits and additions in heavy industrial and manufacturing settings.

Our civil engineering services include:

- Water and wastewater systems
- Roadway and highway design
- Bridges
- Airports and aviation
- Transit and multimodal facilities
- Landfill design
- Traffic control, safety, and signal design
- Utilities design and coordination
- Stormwater management and spill containment
- Structural assessments
- Surveying and mapping, including advanced aerial photogrammetry and LiDAR

Surveying

Tetra Tech can help turn your data into knowledge to better manage the earth's resources, improve strategic planning, and facilitate decision making that maximizes efficiency and profitability. For nearly two decades, Tetra Tech has been an industry leader in the innovative use of Geographic Information Systems (GIS) technology.

Our analysts produce site maps and illustrations, and manage large, multi-disciplinary environmental datasets. They are highly experienced in GIS and database automation, applications programming, spatial modeling, 3D modeling, advanced image analysis, and interactive web mapping. Tetra Tech is also an expert in data collection, including various methods of aerial survey such as Light Detection and Ranging (LiDAR), land survey, and hydrographic survey.

Our survey and mapping services include:

- Photogrammetric mapping
- Aerial digital orthoimagery
- Airborne LiDAR
- Multispectral and hyperspectral technology
- Satellite imagery collection and analysis
- Data management and visualization
- Historical aerial photography
- Hydrographic Surveys
- Terrestrial LiDAR
- Land survey
- GIS and database automation
- Application development and programming
- 3D and spatial modeling
- Thematic mapping
- Cadastral mapping
- Mobile mapping solutions
- Field surveys and GPS data collection and processing
- Asset management
- Geodatabase design
- Cartography and map template design
- Web-based GIS and mapping
- Unmanned aerial systems for data collection

Environmental Engineering and Planning

Tetra Tech realizes the importance of conserving and restoring our natural resources for a life that can be enjoyed for generations to come. Our scientists and engineers assess the impacts of human activities on the natural environment, providing solutions that are both feasible for our clients and sustainable for our future.

Our environmental management services include:

- Biological, cultural, and natural resources management
- Environmental Impact Statements (EISs)
- Environmental Assessments (EAs)
- National Environmental Policy Act (NEPA) compliance
- Wetlands assessments
- Conservation and planning
- GIS and remote sensing
- Threatened and endangered species surveys
- Pollution prevention and recycling
- Solid waste recovery
- Air quality monitoring and compliance
- Underground and above-ground storage tank services
- Environmental and ecological risk assessments

Geotechnical Engineering

With hundreds of geotechnical engineers, soils technicians, and drillers on staff, Tetra Tech is one of the largest firms based in North America, providing geotechnical solutions worldwide. We use state-of-practice techniques and test procedures to investigate, analyze, and develop geotechnical engineering recommendations and designs for simple to complex problems relating to groundwater, soil, or rock. Our geotechnical services include:

- Onshore and offshore site investigations
- Foundation investigations and design
- Geohydrology
- Permafrost engineering and geothermal analysis
- Geologic hazard identification
- Rock cut and tunnel design
- Avalanche and rockfall evaluations
- Seismic hazard evaluations and earthquake engineering
- Assessment and design of earth and rock fill dams
- Sedimentation control studies
- Engineering risk assessment
- Slope stability analysis
- Slope remediation and reclamation
- Granular resource evaluations
- Dewatering and seepage analysis
- Geotechnical laboratory testing
- Contaminated land investigation, risk assessments, remedial works design, and validation
- Corridor route evaluations for roads, railways, and pipelines
- Design of road, railway, and airstrip embankments
- Soil-pipe interaction design guidance for pipelines and hydrocarbon well casings
- Waste facilities design
- Construction material evaluations
- Value engineering to optimize design
- Expert witness services

Transportation/Traffic Engineering Planning

Tetra Tech provides the complete range of services to the transportation sector. Whether the project is a residential street improvement, a major interchange, an environmental assessment, a corridor study, or a

major structural design, our professional, experienced staff will provide support from conception through study, design, and construction. Tetra Tech combines large-company resources with regional expertise in planning, permitting, design, construction administration, and program management consulting for highways, structures, transit systems, and aviation facilities.

Our regional approach and consistent delivery has resulted in the majority of our projects being repeat work with long-standing clients. We have provided traffic planning and design engineering services to state and federal government agencies, metropolitan planning organizations and regional planning commissions, local municipalities, and various private sector organizations. Through the use of skilled traffic engineers and planners, we prepare traffic simulation models using the latest software, conduct traffic impact studies for new developments, perform capacity and level of service analyses, develop traffic control plans for complex traffic signal systems, and generate conceptual improvement plans for intersections, streets, and freeway interchanges.

Tetra Tech has completed numerous projects focusing on access management issues, safety concerns along urban streets and rural highways, regional thoroughfare and master plans, major investment studies, statewide intelligent transportation system plans, parking studies, operational analysis of arterial corridors, and preparation of detailed highway lighting plans. We have extensive experience in traffic impact analysis, site access issues, traffic signal design, parking planning and code requirements, and off-site roadway design. We are familiar with all applicable codes, standards, and traffic safety requirements where traffic must be maintained during construction. It is our goal to complete a design that is compatible with our clients' transportation needs, sensitive to the environment, and cost-effective for every public and private dollar spent.

Our transportation services include:

- Transportation planning
- Traffic studies
- Highway and roadway design
- Bridges and retaining structures
- Noise barriers
- Traffic signals and intersection design
- Intelligent transportation systems
- Transit studies
- Transit facility design
- Survey, GIS, and remote sensing
- Right-of-way engineering
- Program management
- Construction management

Cultural Resource Assessment

Tetra Tech provides Cultural Resource Assessments (CRA) to determine whether a project may affect buildings, structures, objects, sites, and districts that are eligible for or listed in the National Register of Historic Places under the State Historic Preservation Office.

Our CRA services include:

- Phase I, II and III archaeological and historical surveys and evaluations
- CRM mitigation actions, including excavations,
- Photographic or other architectural documentation measures (HABS/HAR, etc.) required for the proper recordation of historic structures, including bridges
- Underwater CRM assessments using magnetometer, side scan sonar or similar evaluation processes

Past Record of Performance

It is important to note that throughout the firm's history, we have consistently demonstrated our ability to meet clients' schedules and budgets. As professionals serving many repeat clients, the ability to complete quality work in a timely fashion and within budgets has long been an ingredient in building our strong reputation in our industry since 1966. Our goal: Deliver successful, completed projects fulfilling the needs of our client.

One of the lessons learned in our firm's history is that good planning and good quality Contract Documents are the best foundation for successful completion of a project. Our construction document technologists provide additional assurance that projects will be completed in accordance with the proposed schedule because we pay close attention to each detail and make sure that all aspects of the design are covered in design. To implement these assurances, Tetra Tech has developed an outstanding package of specifications for construction that includes the documents published by the EJCDC of our projects a maintains a local professional staff of resident engineers.

Introduction to Team Members

Tetra Tech has assembled a proven and trusted team of professionals with experience and expertise in all services requested under this contract. We chose these project team members for their ability to provide the specialized services and their availability to commit to this project. Our technical leads and staff have years of experience providing similar services throughout Florida. We are dedicated to working closely with the City of New Smyrna Beach staff by maintaining a strong team with open communication so that we have a clear understanding of this each project.

Our project manager, Mr. **Rod Cashe, PE**, has been managing continuing engineering services contracts for his entire career. He has been the senior project manager for hundreds of contracts for multiplicities in Volusia County (Orange City, Deltona, Daytona Beach Shores, Ponce Inlet) and has been the project manager for the Isleboro Subdivision in New Smyrna Beach for the past year. Thus, he is very familiar with the city and surrounding area. Mr. Cashe has a highly diverse background and experience as a civil engineer having consulted in traffic operations, Transportation, H&H modeling, floodplains, stormwater improvements, and structural engineering.

Mr. Cashe will be directly supported by Mr. **Michael Saxton, PE**, who will act as task manager as well as the stormwater management engineering and planning lead. He was the lead design engineer for the Iselboro Stormwater Improvement for New Smyrna Beach this past year and is an accomplished civil engineer in the areas of utilities, pump stations, floodplains, and stormwater management.

To ensure that every project is delivered to the highest standards, Mr. **William Musser, PE** will lead the quality assurance and quality control initiatives. Having been a project engineer, project manager, or City engineer for the cities of New Smyrna Beach, Deltona, Daytona Beach, Daytona

Beach Shores, Ponce Inlet, Orange City, and Edgewater; Mr. Musser has much experience and first hand knowledge of the Volusia County area communities, coastal issues, and the City of New Smyrna Beach. He was the Project Manager of the structural wall and environmental permitting of Ester Street Park for the City, the CEI services fro the FDOT landscaping at I-75, and QA/QC Reviewer for the work at Isleboro. He also is also an interested member of the New Smyrna Beach community owning a house a house at 404 Peninsula Drive.

Experience and Abilities of Professional Personnel

The Tetra Tech team has selected an exceptional cadre of employees to support the objectives of New Smyrna Beach. This section summarizes the relevant experience, availability, and current workload of the key staff proposed. The Tetra Tech team will be led by distinguished professionals who bring extensive years of combined experience in municipal programs. As-needed support will be provided by our sub-consultants Environmental Sciences, Inc., Exum Environmental, and Universal Engineering Sciences, detailed later on in this section. Full resumes of our proposed team can be found in Tab 4: Other.

Roderick Cashe, PE, CDT, LEED AP
Project Manager/Principal Engineer

Mr. Cashe has served as a civil engineer since 1987. With Tetra Tech, he is a Senior Project Manager with extensive experience serving the public sector of civil and environmental engineering. He is Tetra Tech's Civil Engineering Discipline Leader for southeastern region and is responsible for staff in six offices in three states including Florida, Tennessee, and Kentucky.

In Florida, Mr. Cashe has worked in over 45 counties, in the areas of civil site engineering for public and private facilities; stormwater management planning and engineering design; hydrologic and hydraulic modeling for city-wide infrastructure and regional stormwater management facilities and BMPs; stormwater pump stations for flood control; Design, permitting and construction administration of stormwater CIP projects for water quality and flood control; infrastructure engineering for utilities including force mains, water mains, gravity sewer and sanitary lift stations; and commercial, institutional, residential and multi-family site development.

Michael Saxton, PE, CFM
Task Manager, Stormwater Management Engineering & Planning Lead

Mr. Saxton is a water resources engineer with more than twelve years of public and federal sector consulting experience. His experience in civil environmental engineering includes master planning, new and retrofit design, construction administration, alternative materials evaluation, roadway layout and design, retention/detention water quality improvements, storm sewer networks, hydrologic and hydraulic modeling, floodplain analysis, water control structure evaluation/design, storm water and waste water pump stations, odor evaluations, gravity sewer collection systems and transmission mains utilizing open trench and trenchless designs for force mains, water mains and reclaimed water mains.

William Musser, PE, PH, CFM, PWS, LEED AP
QA/QC Lead

Mr. Musser will serve as QA/QC Manager on your projects. He will be responsible for providing technical expertise during design, identifying key resources for performing the work, and reviewing the technical documents for sound engineering. He has more than 30 years of experience in serving cities and counties across the state of Florida. As a Vice President with the firm, Mr. Musser has served numerous Northwest Florida clients including Santa Rosa County, Walton County, Destin, Panama City Beach, and Panama City.

Burl Reardon, PE, LEED GA
Utilities Lead

Mr. Reardon has more than 17 years of experience as a civil engineer. One primary focus on our stormwater service teams has been in the implementation and

annual maintenance of municipal and industrial NPDES programs. His design experience includes all aspects of civil engineering projects, as well as performing construction plan reviews for municipalities. Typical project design experience includes drainage design, permit acquisition, site layout, paving and grading design, water and sewer utility design as well as sanitary and storm sewer lift station design.

Nick Benedico, PE, AICP
Transportation/Roadway Lead

Mr. Benedico will lead the transportation and traffic efforts. He has 26 years of experience and is responsible for managing Tetra Tech's Florida transportation resources. He has overseen management oversight, coordination, marketing, client contact, project scheduling, quality assurance and control, billing, profitability, and progress reporting. Mr. Benedico's extensive experience ranges from minor roadway improvements to complex highway design.

Tim Vanderwalker, PE, CDT
Parks/Streetscapes Lead

Mr. Vanderwalker will serve as your parks and streetscapes lead, ensuring the City's goals and objectives on each task order are successfully met. He has over 10 years of experience in the preparation of contract documents including plans, specifications, and opinion of cost development for numerous infrastructure projects including transportation and roadway improvement, water system improvement, and water reuse. He has extensive experience at the local and national transportation design levels with experience on state highways in Florida, Tennessee, Arizona, and California. His relevant experience includes turn lane improvements and CR 395 and US 98 intersection improvements in Walton County, Kelly Street Phase II in Destin, Cherry Avenue Grade Separation in San Bernardino, California, and the Sandestin Gate Alternatives Study in Destin, Florida.

Lawrence Jenkins, PSM
Survey/CAD Lead

Mr. Jenkins is a Vice President with Tetra Tech with over 30 years of professional experience. He is responsible for overseeing all surveying services throughout the Southeast. His experience in northwest Florida includes projects in numerous Central and North Florida municipalities.

James Warner, PE, LEED AP
Civil/Site Design Lead

Mr. Warner will provide civil engineering services. He has 26 years of experience in a broad range of design, permitting, and management projects. His Florida includes roadways, stormwater master drainage systems, commercial, industrial, military ,and residential developments, utility systems, and numerous small site development plans. His has over 20 years of municipal consulting engineering experience in stormwater retrofit designs for New Smyrna Beach and in the Cities of Destin, Deltona, Minneola, and Miami Beach.

Susan Hayse, CDT
Construction Administration

Ms. Hayse has over 20 years of experience providing construction administration support services. She has extensive experience in construction administration (shop drawings, RFIs, pay applications, project closeout), bidding processes (advertisement, addenda, award, conformance), and project administration (specifications, reports, scheduling) from design through the bidding/construction of various facilities. Ms. Hayse is experienced in the use of *SpecsIntact*, *CSI MasterFormat*, *Microsoft Project*, *Primavera Construction Manager*, *Prolog*, and various web-based construction management programs.

Alex Montalvo
GIS/Mapping Lead

Mr. Montalvo has over 20 years of experience related to geographic information systems. A key component of his job function is to coordinate and integrate GIS with engineering practices. GIS is a tremendous benefit to all disciplines in its ability to analyze and exhibit complex data, and its ability to place this information in the hands of key decision makers.

Additional Resources and Team Members

CAD Staff

Our CAD team has assisted clients with a range of projects using a suite of up-to-date programs. Our experienced CAD staff is lead by Mr. Lawrence Jenkins. Additional information on our CAD capabilities is detailed in Tab 4: Other.

Administrative Support Staff

As a major Tetra Tech design center, our Orlando office is home to most of our Florida administrative staff. Although we pride ourselves on operating as an agile, independent team of engineers, our firm's size allows us to draw upon the support of our experienced administrative staff. Our administrative staff is well integrated with our construction administration staff.

Our Subconsultants

Our Tetra Tech team will be strengthened with the addition of carefully chosen subconsultants:

- **Environmental Sciences, Inc.** (ESI) will handle the City's archaeological survey requirements and environmental assessments.
- **Exum Environmental** will lead the ecological component of our projects.
- **Universal Engineering Sciences** will provide geotechnical services.

Workload and Performance Capability

To fully serve New Smyrna Beach, you need a team of professionals who are not only highly experienced, but also available to you at a moment's notice. The importance of this cannot be overstated. The key personnel on our project team have been successfully providing engineering consulting services to municipal, governmental, and private clients throughout Florida for more than 20 years. Key team members are located in our Tallahassee office and throughout Florida and are dedicated to serving the City of New Smyrna Beach.

Commitment and Availability

The Tetra Tech team commits all of the proposed staff assigned to the project in the organization chart. They have immediate availability to implement projects upon receipt of a Notice to Proceed. If additional staff beyond those team members identified within this Statement of Qualifications is necessary, Tetra Tech has the resources available to commit additional team members. Tetra Tech has several offices throughout the State of Florida. Our offices are linked through our company network, as well as through our intranet system. We can expeditiously transfer files and data of virtually any size through use of our file transfer system.

As part of the Project Management Plan, Tetra Tech projects man-hour requirements to ensure its ability to have adequate staff available to complete project milestones on time. Regardless of the various scheduling tools, commitment of resources is the most critical factor in completing a project in a timely

manner. Tetra Tech's workload projections indicate that there will be an abundance of resources available to execute the City's projects.

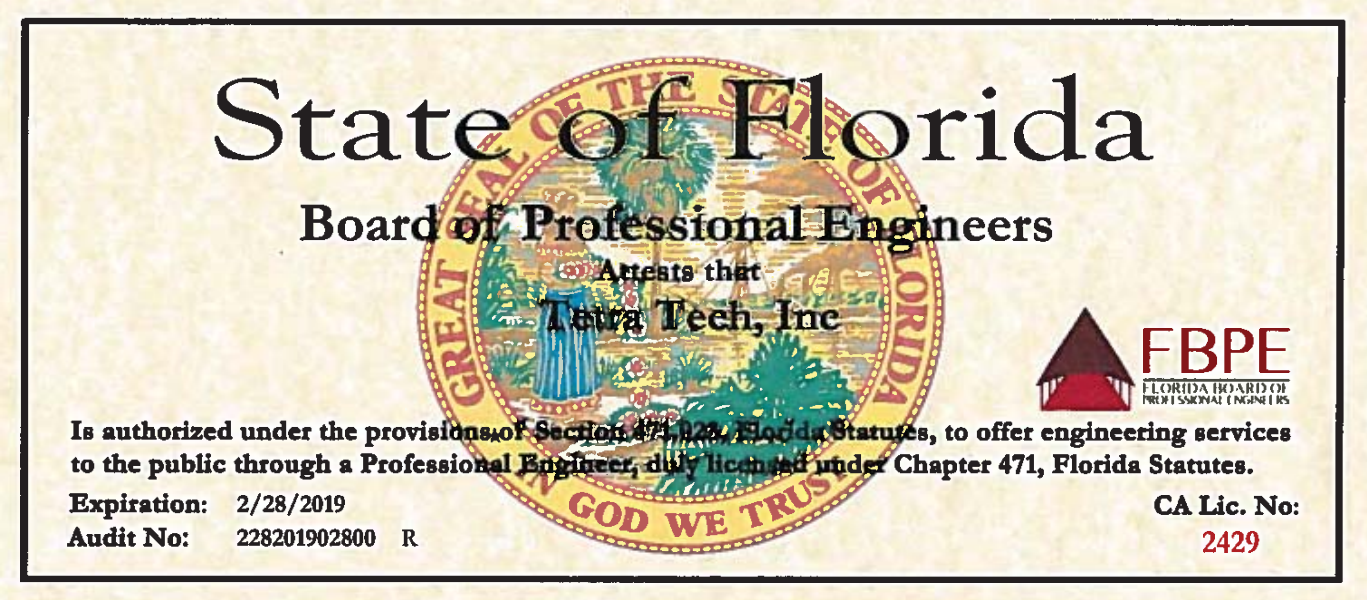
Our Project Manager, Mr. Cashe, lives locally in Orlando. The QA/QC Lead, Mr. Musser, is Vice-President of our Tetra Tech unit responsible for balancing all workload of all of our staff in Florida. We have all the resources and staff necessary to quickly execute the work assignments and complete the project correctly. This is one of the advantages of a large firm that has specialized in serving municipalities of the size and resources of a community like New Smyrna Beach. We bring large firm capabilities and people with an understanding of local municipal needs.

Mr. Vanderwalker and Mr. Musser have the authority to balance workloads of various Project Managers and Project Design leads to ensure product delivery is met on time and on budget. Our unit's workload projections show we have the capacity and staff to meet the projected hours for continuing professional services assignments.

Ability to Meet Time and Budget Requirements

Many of the projects we perform are dependent on meeting rigid submission dates in order to maintain permit compliance or to acquire funding. Projects presented in this Statement of Qualifications were completed on time and within budget as described in the detailed project descriptions.

Our clients vary in size and scope from small local public agencies and private companies to national governments and large multi-national corporations. These clients come to Tetra Tech for high-caliber technical expertise, practical experience, multi-disciplinary capabilities, and the global reach needed to analyze their problems in order to develop and implement the most appropriate, cost-effective solutions.



Our local office philosophy allows the City to benefit from the best of both worlds—local, personalized service with nationally recognized resources.

Our core principles form the underpinning of how we work together to serve our clients:

- **Service**: Tetra Tech puts its clients first. We listen better to understand our clients' needs and deliver smart, cost-effective solutions that meet those needs.
- **Value**: Tetra Tech takes on our clients' problems as if they were our own. We develop and implement real- world solutions that are cost-effective, efficient and practical.
- **Excellence**: Tetra Tech brings superior technical capability, disciplined project management, and excellence in safety and quality to all of our work.
- **Opportunity**: Our people are our number one asset. Our workforce is diverse and includes leading experts in our fields. Our entrepreneurial nature and commitment to success provide challenges and opportunities for all of our associates.

Introduction

As demonstrated by our long-term continuing contracts and diverse history of work throughout Florida, the Tetra Tech team is closely familiar with the skills and procedures required to successfully complete any project for the City of New Smyrna Beach as described under the scope of services. The projects below show not only our ability to stay on schedule and on budget, but also our strengths in site development from utility enhancements to roadways and paving.

Project Engineers

Project Highlights

- Utility Enhancements
- City Complex
- Roadway/Paving
- Site Development Project

Background

Tetra Tech oversaw the site development for an 18-acre site off of Howland Boulevard to be used as the City's newest Fire and Rescue Complex. The site is to have a fire station as well as an emergency 911 dispatch and rescue center.

Services

The site contained potential site development issues that were investigated including:

- Floodplain encumbrance
- Listed species (gopher tortoises and scrub jays)
- Utility provision and fire flow requirements
- Site access issues and response time
- Geotechnical (soils suitability) verification
- Wetlands and tree preservation review
- Stormwater management
- Zoning and site planning
- Environmental Site Assessment Phase I
- The investigation determined that the site was useable but had two significant time sensitive issues for the City to consider:
- Potential Scrub Jay habitat and mitigation
- Utility service limitations for adequate on-site fire flow requirements.

Project 2 **Lake Hiawatha Preserve**

Client

City of Clermont, Florida

Site Development?

Yes

Timeline

Project Highlights

- Site Development
- Reduced Timeline
- Recreational Facility
- City Complex
- Streetscape
- Roadway/Paving

Background

The Lake Hiawatha Preserve is a monumental endeavor for the City of Clermont as it is the first passive recreational park within the City. This new 219 acre preserve includes restrooms, picnic pavilions, bike trails, fishing pier, floating dock, playground, and a volleyball court for the local community.

Services

Tetra Tech providing preliminary planning, survey, geotechnical, ecological, design, permitting (FDEP, SJRWMD), bidding, and construction administration services for the completion of Phase 1B, which is the development on the Lake Minneola shore. This phase includes a new restroom facility, picnic pavilion, floating dock, fishing pier, three sand volleyball courts, nature trails, walkways, and associated parking amenities.

The project was completed before schedule, reducing the overall timeline from 12 months to 10 months.

Project Highlights

- Site Development
- Under Budget
- On Schedule
- Recreational Facility
- City Complex

Background

After continual issues with water intrusion during rain events, the City of Destin contracted Tetra Tech to provide an assessment of the City's Community Center and provide a recommendation for mitigating the cause of the water intrusion.

Services

Tetra Tech performed a condition survey of the Community Center roof and building envelope to determine points of potential water intrusion and the remaining life of the roof.

The results of the conditions assessment confirmed that the roof was in need of replacement. Previous work performed piece-meal and other coatings applied to the roof were determined to be deficient and exacerbated the issues.

Following the conditions assessment, Tetra Tech was tasked by the City to assist in procuring design/build services for the replacement of the existing roof and repair of other problematic areas found on the building envelope. Upon selection of the contractor, Tetra Tech performed construction administration service to observe construction to verify it was performed according to the Contract Documents, as well as review requests for information (RFIs), change order requests, and pay applications. The project was completed below the City's budget amount and within the contractor's Contract Time.

Project 4 Islesboro Subdivision Stormwater Improvements

Client

Project Highlights

- Site Development
- Under Budget
- Utility Enhancement
- Stormwater Retrofit
- Streetscape
- Roadway/Paving

Background

In late September 2014, the City of New Smyrna Beach (City) experienced significant flooding from a major rainfall event. The Islesboro Subdivision, located on the north side of the New Smyrna Beach Municipal Airport near Turnbull Bay, was one of the hardest hit areas with several homes which had flood water rise above their finish floor elevation. Some of the factors that appear to be contributing to the flooding are the lack of adequate storage areas for stormwater runoff and conveyance infrastructure to convey flows into the Turnbull Bay.

Services

Tetra Tech was retained by the City to investigate and execute the design for improvements to the existing stormwater system. Tetra Tech is providing surveying and engineering services necessary to develop alternative solutions, prepare construction documents, conduct permitting services, provide bid support and assist the City with the administration of construction. In addition, the City is planning to pave several shell-rock roads as a part of the construction for the flood management improvements in order to take advantage of the economy of scale that may be gained by constructing the improvements under one contract.

As part of the Preliminary Design Report Study, the Interconnected Channel and Pond Routing Model version 4.0 (ICPRv4) was used to simulate the water quantity hydrograph and routing. The ICPRv4 computer model was selected based on its ability to simulate the unique hydrologic and hydraulic characteristics of the study area with fully integrated 1D links and nodes and 2D overland flow modules. Tetra Tech also performed the design storm calibration as part of this project.

Project 5 Mountain Drive Stormwater and Streetscape

Project Engineers

Project Highlights

- Site Development
- Under Budget
- Utility Enhancement
- Stormwater Retrofit
- Streetscape
- Roadway/Paving

Background

Tetra Tech's services include drawings and specification preparation sufficient for competitive bidding of private construction companies to layout, grade, and construct approximately 4500 linear feet (LF) of roadway and streetscape improvements. The proposed improvements will be based on the conceptual design prepared by Tetra Tech and EDSA for the Mountain Drive Improvements adopted by the City of Destin Community Redevelopment Agency (CRA) on October 30, 2007 and included in the December 21, 2007 Harbor District Implementation Plan.

Services

In general, the proposed improvements to Mountain Drive include:

- Two 12-foot wide east/west vehicular travel lanes
- Two 4-foot wide east/west bicycle lanes adjacent to vehicular travel lanes
- Pedestrian crosswalks at north/south neighborhood streets
- Sidewalk on south side only
- Streetlights on south side only
- Convert north/south overhead utility lines underground (east/west lines shall remain) within right-of-way of Mountain
- DriveNew stormwater management and conveyance system
- Roadway profile adjustment recommendations

Tasks for this scope of work include:

- Surveying, Geotechnical Investigations and Reporting
- Schematic Design
- 30% Complete Design, 60% Complete Design, 90% Complete Design, Stormwater Permitting
- Construction Administration Services

Project 6 Audubon Park and Regional Surface Water Treatment Facility

Client

City of Deltona, Florida

Site Development?

Yes

Budget

Original: $1.6m (Phase I&II)
Final: Phase I = $1.155m
Phase II = $300,000

Timeline

Original: 18 months
Final: 18 months

Michael Saxton, PE
William Musser, PE
James Warner, PE
Project Engineer

Project Highlights

- Site Development
- On Budget
- On Schedule
- Stormwater Retrofit
- Recreational Facility
- Roadway/Paving

Background

The City of Deltona purchased a large tract of land, known as the Ledford property, to create a park centered on a regional surface water treatment facility. The upland area on the site was originally used as a chicken farm. An environmental cleanup was conducted on a portion of the site to remove an onsite retention area that was used as a receiving area for the chicken waste. The nutrient laden water and three (3) feet of soils inside the pond had to be removed and disposed of at a landfill. Their plan was to connect it to a bike trail proposed to be constructed as part of a rails-to-trails project by the county. The park consists of a parking area with a paved access drive and grass parking; a handicap ramp, a nature trail around a conservation area, a 400-foot long boardwalk over the conservation area, walking paths around the regional surface water treatment facility, and educational kiosks explaining the functionality of the treatment facility.

Services

The regional surface water treatment facility was constructed to offset discharge from the Theresa Basin, previously landlocked, which is now connected to Lake Monroe which is an impaired water body for total nitrogen (TN) and total phosphorous (TP). Discharge into Lake Monroe is only allowed on an emergency basis based on the operation schedule to prevent flooding of residential homes. The most critical element of the permitting process was establishing a water quality mitigation plan with SJRWMD to offset nutrient loading into Lake Monroe. The regional surface water treatment facility consists of a three-chambered, ten-acre detention pond designed to receive surface water from a 528-acre residential area. The chambers in the detention pond consist of a deep pool sedimentation area, a planted littoral shelf and an open water wet detention area. The flow from this residential area is pumped through two miles of 12-inch forcemain into the regional surface water treatment facility.

Tim Vanderwalker, PE
Project Engineer

Project Highlights

- Site Development
- Recreational Facilities
- City Complexes

Background

Tetra Tech began serving the City of Panama City Beach in 1993 as part of a utility rate evaluation study. The City subsequently tasked Tetra Tech with reviewing rapid infiltration basins (RIBs) for wastewater disposal in 1994 and further in 1996. In 2000, the City retained Tetra Tech under a Continuing Services Agreement to provide engineering services related to the City's wastewater and reclaimed water program. The first task order included the preparation of a Reuse Feasibility Study and Reclaimed Water Master Plan followed by the design, permitting, and construction services for the largest Reuse To Wetlands project in the US to make the City the first city in Bay County to not directly dispose any wastewater effluent in the St. Andrews Bay System and the first utility in Bay County to be 100% Reuse.

Services

Full Engineering and Architectural Services were provided for the public access building

Extensive Environmental Services were required to delineate wetlands, different vegetative habitats, mitigate wetland impacts resulting from the proposed improvements, and obtain FDEP certification the site had been hydrologically altered and would be classified as a receiving wetland for wastewater reuse.

In addition to expanding public access reuse across the City, the primary reuse project included a pump station, 4.5 miles of 36-inch reclaimed water main, public facility building, and over 9 miles of reclaimed water distribution main.

Project 8 Southwest 6 & 7 Utility Extension Program

Client

City of Cape Coral, Florida

Site Development?

Yes

Budget

Original (Design): $7.6m
Final (Design): $7.6m

Construction Administrator

Project Highlights

- Site Development
- Under Budget
- Utility Enhancement
- Stormwater Retrofit
- Streetscape
- Roadway/Paving

Background

The initial development for Cape Coral planned for over 350,000 residential lots and a projected population of over 400,000. Today, the City has nearly 170,000 residents and is the 3rd largest city geographically in the state of Florida. As development continued, centralized water and wastewater services were added. However, as development began to outpace the rate at which centralized services could be provided, water and wastewater service had to begin to be provided through on-site wells and septic tank/drain field systems. Although the City did expand service as funds were available, the pace of growth far exceeded the utility extension pace. As such, the City developed and adopted a Utilities Master Plan which outlined the Utility Extension Program (UEP) in a phased approach that would ultimately extend water, wastewater and irrigation water service to virtually all areas south of Pine Island Road (SR 78) and some areas north of Pine Island Road. The UEP proceeded with the completion of Southwest 1, 4 and 5, with the design and permitting completed for Southwest 6 & 7 in August 2008.

Services

In 2012, City Council voted to continue with the UEP and selected Tetra Tech to perform value engineering and plan adoption of the prior design; hydraulic modeling; financial assistance; bidding assistance (including assistance with pre-qualifying contractors); and construction management/construction engineering inspection (CEI) services. In order to maintain a consistent contract size, the Southwest 6 & 7 area was broken into (12) sub areas, and those were further reduced to (7) contracts and released for bid. The project area consists of over 4 square miles and 200 miles collectively of infrastructure.

Project 9 11th Avenue & Eastern Wastewater Treatment Plant Site Dev.

- Utility Enhancement
- Stormwater Retrofit
- City Complex
- Roadway/Paving

Background

Land area was at a premium at the selected WWTP site and the City wanted to maximize the usable acreage by utilizing an MBR process on a site that would not support that capacity utilizing conventional treatment processes. Tetra Tech served as the Design Engineer for the new 1.5 mgd (expandable to 3.0 mgd) Eastern Wastewater Treatment Plant (WWTP) site for the City of Deltona. The plant was designed by others.

Services

As the Design Engineer, Tetra Tech is completed all design and permitting efforts for the site development including civil, site, and environmental design, SJRWMD and FDEP permitting. Tetra Tech was also responsible for developing a computer model to establish the 100-year flood elevation to support an application for a FEMA Flood Map Revision. The project consists of:

- 3,040 feet of 18 inch through 36 inch stormwater piping.
- Dual 5 foot BEBO Arch Bridge at stream floodplain crossing.
- 2,850 feet of 20 inch force main.
- 2,850 feet of 20 inch reuse main.
- 1,650 feet of 12 inch water main.
- 1,200 feet of 14 inch HDPE water main via directional drill.
- 2,800 feet of access road and roadway.
- Four (4) stormwater ponds; two for the access road and two for the WWTP site.
- Demolition, clearing and grubbing, and preliminary site grading.

Project 10 **Stormwater Evaluation of Lake Bonnet Outfall**

Client

City of Lakeland, Florida

Site Development?

Yes

Budget

Original: $39,000
Final: $39,000

Timeline

Original: 6 months
Final: 6 months

Reference

Laurie Smith
City of Lakeland
407 Fairway Avenue

Select Team Members

Roderick Cashe, PE
Senior Project Manager

Project Highlights

- Site Development
- On Budget
- On Schedule
- Utility Enhancement
- Stormwater Retrofit

Background

Lake Bonnet outfalls through an earthen canal west through several residential areas and the Lone Palm Golf Club. During high rainfall events, the flow control weir on Lake Bonnet will typically open to route flows through the outfall canal. The owners of the Lone Palm Golf Club expressed concern regarding the significant accumulation of sediment and trash debris in the southeast pond which is bisected by the Lake Bonnet outfall canal. The City, determined to assess the sources of the debris and alternative solutions to remedy any portion of the problem that may be from offsite, authorized Tetra Tech to conduct a stormwater evaluation of the Lake Bonnet outfall canal and the contributing conveyance infrastructure in this watershed.

Services

Tetra conducted an extensive field investigation to assess the condition of all ditches and canals connected to the main outfall canal to visually observe erosion and sources of trash and other debris that may be contributing to downstream conditions. Our Field staff also conducted ground truthing upland of the ditches and canals to visually observe areas of interest identified during our desktop analysis. During reconnaissance in the field, our team established locations for Tetra Tech's surveyors and geotechnical engineers to obtain canal cross sections; probes to determine depths of sediment formation in the bottom of the main canal and the stormwater pond on the golf course; a grain size distribution analysis for flows through the golf course pond; and water quality samples to examine potential pollutant load reduction alternatives that may also be useful in helping the City achieve its nutrient reduction goals.

Litigation Statement

Tetra Tech, Inc. is subject to certain claims and lawsuits typically filed against the engineering and consulting professions, primarily alleging professional errors or omissions. Tetra Tech carries professional liability insurance, subject to certain deductibles and policy limits against such claims. Tetra Tech believes that the resolution of these claims will not have a material effect on our financial position or results of operations.

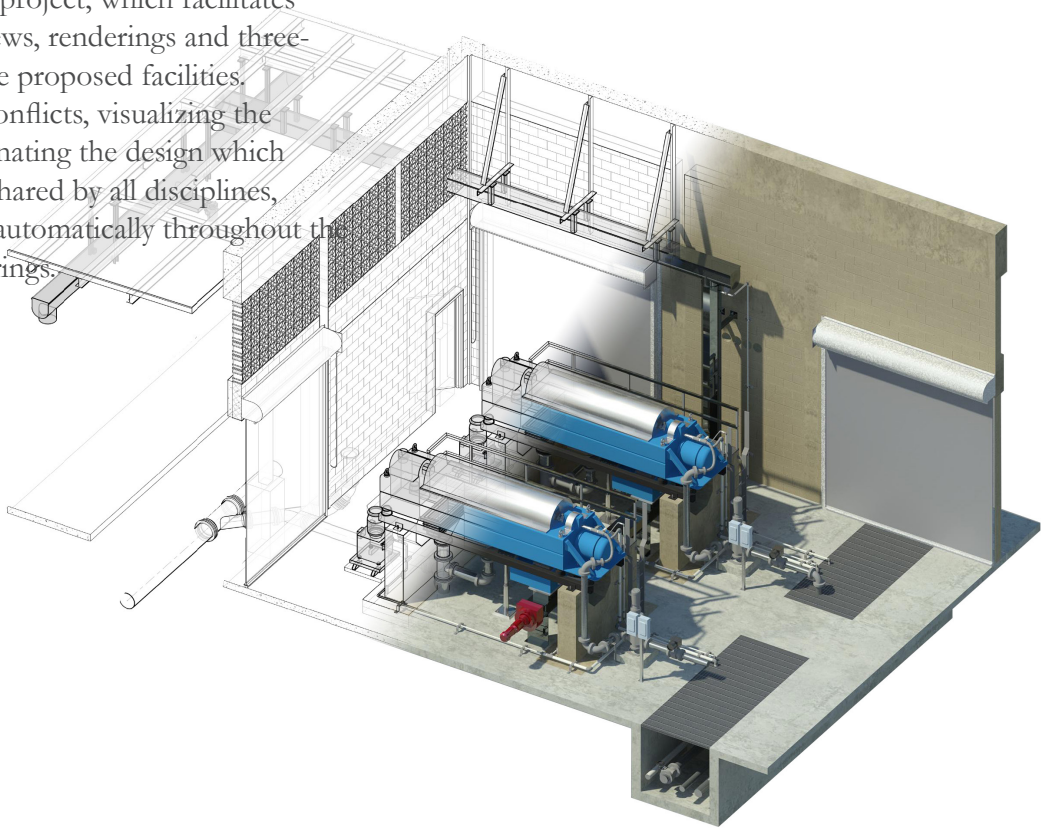
Leading-Edge Technology

Tetra Tech is committed to maintaining and updating its computers, equipment, software, and library to provide the most up-to-date resources. This approach not only supports our staff in completing high-quality work on time, but also adds value to every project we undertake.

Tetra Tech maintains updated computer equipment and software as needed by various departments within the organization. Our suite of programs includes resources for utility rate structure analysis, financial analysis, asset evaluation, and capital planning. Our GIS department has the necessary hardware and software to generate billing determinants and evaluate customer characteristics.

Modeling, CAD, and BIM



Tetra Tech uses Revit® building design software for the design of the structural, architectural, process and mechanical elements of a project, which facilitates the creation of section views, renderings and three-dimensional models of the proposed facilities. This can aid in avoiding conflicts, visualizing the proposed,facilities, coordinating the design which is built in a single model shared by all disciplines, reflecting design changes automatically throughout the model and creating renderings.

Tetra Tech often prepares drawings using AutoCAD or AutoCAD Civil 3D. The use of Civil 3D allows us to more easily cut sections that are accurate to the topographical survey information. This software also enables the elevations of existing and proposed subgrade piping and structures to be entered so that piping profiles can be generated and checked for conflicts and required separation.

GIS

Tetra Tech has a wide range of experience in providing quality Geographic Information System (GIS) assistance to our clients. This experience includes database development and inventory for Capital Improvement Projects, migration from a CAD system to a GIS and/or hydraulic modeling system. Inventory and mapping of transportation systems, stormwater systems, water systems, and reuse and wastewater systems.

Tetra Tech's GIS team has assisted our clients with water, wastewater, and reuse master plans through the mapping of existing systems in a GIS and hydraulic

modeling software such as Bentley (formerly Haested) and MWH Soft, Inc. and working with our Engineers in developing recommended system improvements for future growth.

We have assisted numerous clients throughout Florida with their GIS needs, including the Cities of Bonita Springs, Punta Gorda, Deltona, Orange City, Orlando, Minneola, Winter Garden, Mount Dora, Lakeland and the Counties of Orange, Osceola, and Lake, among others. A summary of the GIS capabilities and services is provided below:

- GIS database development for municipalities' zoning, future land use and comprehensive planning
- Hydrogeological assistance for groundwater modeling and well field expansions
- FEMA stormwater base flood elevation model development
- GASB 34 assistance
- Hydraulic modeling assistance
- As-built conversion to GIS for system documentation
- Asset management

Floodplain Mapping

Tetra Tech has experience in providing flood hazard assessments within the floodplain. These include extensive hydrologic and hydraulic modeling, CHAMP and wave run up modeling, mapping, and letter of map revision for physical map revisions as well as review of models that may be adopted by FEMA. We have completed this for inland and coastal models.

Our Utility Expertise

Tetra Tech has significant expertise in the areas of water supply, distribution, treatment, storage and other miscellaneous hydrogeological, water, wastewater utility related services. Our extensive background has been focused throughout the State of Florida in a variety of projects.

Mr. Daniel Allen is an experienced environmental engineer with 35 years' experience in utility management, master planning, water resources engineering and the design and construction of water and wastewater treatment, effluent reuse and disposal, water distribution, wastewater collection/transmission and well pumping systems. Mr. Allen's specific pipeline experience includes the design, permitting and construction management of over 256 miles of pipelines ranging from 2-inch diameter low pressure sewer pipelines to 42-inch potable water transmission mains. He has also designed larger mains to 54-inch diameter at water and wastewater treatment facilities.

Ms. Janine Alexander has over 20 years of utility experience including project management for the design of new facilities, relocations of existing facilities, utility coordination, permitting, construction administration, construction management, inspections, and certifications for numerous public and private sector projects.

Additional Firm Resources

Equipment Resources

Tetra Tech is committed to maintaining and updating its computing hardware, equipment, software, and library to provide the most up-to-date resources to support our staff and provide the most efficient and cost-effective services to our clients. Tetra Tech maintains updated computer equipment and software as needed by various departments within the organization. The primary productivity software used by the firm is Microsoft Office Professional. We are committed to utilizing the most up-to-date equipment and software to meet the needs of the City of Lakeland for this contract.

Roderick Cashe, PE , CDT, LEED AP

Bio

Mr. Cashe has served as a civil engineer since 1987. With Tetra Tech, He is a Senior Project Manager with extensive experience serving both in the public and private sectors of civil and environmental engineering. Mr. Cashe has statewide experience, in over 45 counties, in the areas of civil site engineering for public and private facilities; stormwater management planning and engineering design; hydrologic and hydraulic modeling for city-wide infrastructure and regional stormwater management facilities and BMPs; stormwater pump stations for flood control; Design, permitting and construction administration of stormwater CIP projects for water quality and flood control; infrastructure engineering for utilities including force mains, water mains, gravity sewer and sanitary lift stations; and commercial, institutional, residential and multi-family site development. In addition, he has extensive experience with the FEMA map revision process for the management of floodplains.

Select Relevant Experience

Continuing Services (On-Call Consultant), City of Deltona, FL. Project Manager for the completion of engineering design, permitting, and construction administration for several stormwater retrofit projects in the City. Served as Project Manager for over five emergency pumping authorizations from the St. Johns River Water Management District to alleviate flooding as a result of 92-inches of rain in the year of 2002.

City of Deltona Ledford Regional Surface Water Treatment Facility, Deltona, FL. Project Manager for the design, permitting, and construction administration of a 10-acre regional treatment facility on a 60 acre City site to treat stormwater runoff that was flowing into Lake Monroe. To get the source water into the treatment facility, this project included the design of a pump station and over 2 miles of 12-inch forcemain, most of which was constructed in a county-owned constrained right of way. The treatment system is composed of a 4 chambers, 2 which are created wetlands for the uptake of nutrients.

City of Destin Mountain Drive Flood Control Project, Destin, FL. Mountain Drive is a mile stretch of roadway in a built-out industrial area of the City. Although only a couple of blocks from the Gulf Coast, it experienced frequent severe flooding each year due to the lack of stormwater conveyance infrastructure and an outfall. Mr. Cashe was project manager for the design and permitting of a subsurface stormwater treatment system constructed below the roadway. This system provided water quality treatment of the first flush of runoff and sufficient volume to attenuate the peak flows into the public right of way. This system also provided an outfall that connected into the State Road 98 right of way which required negotiations to demonstrate that no adverse effects would result from this discharge into their right of way.

Bio

Mr. Saxton is a water resources engineer with more than twelve years of public, private and federal sector consulting experience. His experience in civil environmental engineering includes master planning, new and retrofit design, construction administration, alternative materials evaluation, roadway layout and design, retention/detention water quality improvements, storm sewer networks, hydrologic and hydraulic modeling, floodplain analysis, water control structure evaluation/design, storm water and waste water pump stations, odor evaluations, gravity sewer collection systems and transmission mains utilizing open trench and trenchless designs for force mains, water mains and reclaimed water mains.

Select Relevant Experience

Isleboro Stormwater Management Improvements, City of New Smyrna Beach, FL. Project Manager for the preliminary design and alternatives analysis, preparation of construction documents, permitting, public information meetings, bidding and construction administration services. Isleboro subdivision is a 720 acre area located near the Municipal Airport and Turnbull Bay that experienced significant flooding due to the lack of adequate storage and conveyance infrastructure for runoff.

Sky Keeling Stormwater Improvements and Pump Station, City of Deltona, FL. Project Manager for the preliminary design and alternatives analysis, preparation of construction documents, and permitting for providing flood recovery for a series of interconnected landlocked ponds.

South End Drainage Collection Hydrologic and Hydraulic Analysis, Rio Tinto Kennecott, UT. Project Engineer for the preliminary design and alternatives analysis for an 800 acre watershed for the largest copper mine in the United States located adjacent to Butterfield Creek. Water quality is a major concern and the project involved analyzing the existing stormwater collection system for deficiencies and identifying and ranking BMP's to increase the level of service of the existing system beyond the 100-year design storm event.

Southwest 6&7 Utility Expansion Program, City of Cape Coral, FL. Project Engineer for the expansion of the City's water, wastewater and irrigation systems to a 4 square mile area south of Pine Island Road. The project includes value engineering, hydraulic modeling for water, wastewater and irrigation systems, design, permitting, bidding, construction management and CEI with 9 full time construction oversight field personnel. The project includes over 200 miles of potable water, wastewater collection, wastewater transmission and irrigation utility piping; 18 lift stations and a stormwater canal pumping station to supplement reclaimed water during high demand periods.

Bio

Mr. Musser has been employed as a consulting engineer since 1984 in a broad range of design, permitting, and management capacities. His technical and management experience spans public and private sectors as well as local, state, and federal programs. Mr. Musser has a diverse background in hydrology, hydraulics, and biology. This, along with being a professional engineer, professional hydrologist, professional wetland scientist, and certified floodplain manager has steered his career development towards a broad range of design and management experiences in the practice areas of water resources, floodplain management, ecological restoration, and stormwater management. His project experience is located throughout Florida (in more than 40 counties) and several eastern states.

Select Relevant Experience

Bartow Continuing Stormwater and Civil Consultant, Polk County, FL. Project Manager. Project Engineer. Designed, permitted, and constructed several retrofit drainage projects to improve drainage level of service to the public and/or improve water quality, recharge, and conveyance. Projects included: those involving analysis of hydraulic capacity of existing inlets and piping; flooding periodicity and potential remediation of a residential structure; resolving legal complaints; and dredging of conveyance canals and lakes. Specific projects include: Floral and Myrtle Street expert testimony; Floral and Myrtle flooding remediation project; Bear Creek Canal Dredging; and Hack Lake.

City of New Smyrna Beach - Islesboro Subdivision Retrofit Stormwater and Paving Improvements, Volusia County, FL. Technical Review Engineer for paving and drainage improvements for an existing subdivision subjected to tidal and estuarine floodplain flooding. Project included: hydrologic and hydraulic modeling, Level of Service (LOS) analysis; paving improvements; utility relocations; design of stormwater drainage inlets and pipes; drainage pond modifications; swale modifications; and culverting a large regional outfall ditch. Project area was approximately 400 acres, involving 200 residential lots and over 7 miles of public roadway.

Walton County April 30th Storm Event Stormwater Evaluation PDR, Walton County, FL. Technical Review Engineer. Assisted in the project scope definition to determine Preliminary Design Report (PFR) boundaries and then performed Technical Review of a PDR to establish the Level of Service (LOS) provided during a large storm event and recommendations for CIP projects to increase the LOS for various areas experiencing flooding in Walton County, FL. The project analyzed the flooding using ICPR for 20 separate basins, calibrated the results against actual data and LiDAR, and evaluated the effectiveness of various alternatives.

Mr. Reardon has more than 15 years of experience as a civil engineer and project manager. One primary focus on our stormwater service teams has been in the implementation and annual maintenance of municipal and industrial NPDES programs. Mr. Reardon has developed a strong background in civil engineering serving both public and private clients. His design experience includes all aspects of civil engineering projects, as well as performing construction plan reviews for municipalities. Mr. Reardon's representative project experience includes both municipal service and private development projects. Typical project design experience includes drainage design, permit acquisition, site layout, paving and grading design, water and sewer utility design as well as sanitary and storm sewer lift station design.

Select Relevant Experience

Stormwater Management and Retrofit Drainage Improvements. Design and permitting of various municipal stormwater management systems including retention/detention ponds, pipe and inlet, swale, storm pump stations, and curbing conveyance systems to alleviate localized flooding within existing developments.

National Pollutant Discharge Elimination System (NPDES) for Cities and Counties. Planning, permitting (NPDES Municipal Separate Storm Sewer System (MS4) permits), compliance review, and/or public education, preparing for and attending the NPDES audit from the Florida Department of Environmental Protection (FDEP), annual reporting, and outreach programs to assist or manage the NPDES programs for several public communities such as:

- Indian River Shores (Indian River County);
- Deltona (Volusia County);
- Daytona Beach Shores (Volusia County);
- Minneola (Lake County)

Master Drainage Inventory and Master Stormwater Plans, Cities of Minneola and Bonita Springs, FL. Performed field assessment and ownership research to create stormwater master plan including cost analysis and top CIP project recommendations.

Mr. Benedico is responsible for managing the Florida transportation resources. Serving as senior project manager, he is responsible for management oversight, coordination, marketing, client contact, project scheduling, quality assurance and control, billing, profitability, and progress reporting. Mr. Benedico's extensive experience ranges from minor roadway improvements to complex highway design.

Select Relevant Experience

Homestead Extension of Florida's Turnpike (HEFT) from SW 72nd Street to Bird Road Design-Build, Miami-Dade County, FL. Quality Control Director. Final design of approximately 3 miles of roadway widening on the HEFT to add two managed toll lanes in the northbound and southbound directions, reconstruction of adjacent arterial roadways, and reconstruction of a hospital entrance road. The project included roadway realignment and reconstruction, drainage system rehabilitation, stormwater management, highway lighting, utility relocations, retaining walls, rehabilitation and widening of eight bridges, one new ramp bridge, noise walls, sign structures, and replacement of the mainline toll facilities.

CR 46A Realignment from SR 46 to North of Arundel Way, Lake County, FL. Project Manager. The project consisted of 1.6 miles of a new, two-lane, divided, rural arterial and widening of 1.3 miles of SR 46 from a two-lane, undivided, rural roadway to a four-lane, divided, rural roadway. The project included an alternatives analysis to evaluate alignment options and various typical sections. Extensive public involvement was conducted with key stakeholders. Mr. Benedico was responsible for overseeing the design including drainage design, permitting, maintenance of traffic, utility coordination, landscape architecture, geotechnical investigations, and field survey.

SR 500 Widening from SR 46 to SR 44, Lake County, FL. Project Manager. The project involved the widening of 2.5 miles of a four-lane, rural arterial roadway to a six-lane, high-speed, urban road. It included modifications to the Wolf Branch Road intersection to improve operations and turning movements. Mr. Benedico was responsible for managing all elements of the project, including design, permitting, right of way mapping, and public involvement.

I-4 for Florida High Speed Rail, Florida Rail Enterprise, Orlando to Tampa, FL. Project Manager. As part of the general engineering consultant team for the Florida Rail Enterprise, Mr. Benedico oversaw the improvements to a 35-mile section of I-4 in Hillsborough and Polk counties. An alternatives analysis was done for the realignment of I-4 to flatten horizontal curves, modifications to the CR 557 interchange, replacement of bridges at Williams Road and CR 557, and the realignment of side streets.

Bio

Mr. Vanderwalker's experience includes the preparation of contract documents including plans, specifications, and opinion of cost development for numerous infrastructure projects including transportation and roadway improvement projects, water system improvement projects, and water reuse projects. He has experience in transportation geometric design, stormwater design, and railroad coordination and design. He also has experience in developing reports relevant to reclaimed water use and emergency response policy. He is experienced in the use of AutoCAD Civil 3D, MicroStation, InRoads, and Geopak software.

Select Relevant Experience

Skyview Utilities Water and Wastewater Systems Improvements, Lakeland, Florida. Full-time Inspector for water and wastewater improvements to an existing private utility to assumed by the City Utility System. Project included the replacement of nine duplex pump stations, increasing the pumping capacity of a City-owned lift station, and removal and replacement of water and sanitary sewer mains. Work inspected included the installation of duplex lift stations, 6" water main, 10" force main, 8" gravity sewer, manholes and vaults, erosion control measures, and restoration activities. Deliverables included daily construction reports and construction photos.

Old Bethel Road Well, Elevated Tank, and Pipeline, Crestview, Florida. Project Engineer involved in the design and construction management services for the improvement of the City of Crestview's existing potable water system. This project included a 800' deep 18" production well, a masonry block well house, a 500,000 gallon steel elevated storage tank, and approximately 8,000' of 10" water main. Role included site design, grading and drainage, pipeline design, plans preparation, utility coordination, construction administration, construction

RESTORE Act Consulting Services, Pasco County, Florida. Lead Civil Engineer assisting County staff in developing an initial list of projects and touring prospective project sites. Assisted County staff in drafting Project Information Forms for staff to utilize to reach out to each Department Head, soliciting collaboration amongst that department in preparing project opportunities. Reviewed with County staff project criteria, discussed projects, and assisted in developing their list of projects for RESTORE Act funds based on the different pots identified. Identified other potential funding opportunities to best leverage the RESTORE Act funds with other existing funding mechanisms.

Lawrence Jenkins, PSM

Survey/CAD Lead

Education

Valencia Community College, Orlando

Mid-Florida Technical Institute, Orlando

Bio

Mr. Jenkins has been a resident of Florida for the past 34 years and has practiced land surveying since 1984 in both office and field. His experience includes route/right-of-ways surveys, mortgage surveys, topographic surveys, glo/sectional surveys, construction layout, metes and bounds surveys, as-built surveys, easement vacations; and electrical field book collection. As field supervisor and senior office Survey Manager, Mr. Jenkins is involved in all aspects of surveying.

Select Relevant Experience

Westside Water Main Loop, City of Clermont, FL. Survey Project Manager. Tetra Tech provided surveying services for the installation of approximately 23,000 linear feet of 12-inch water main to loop and increase the hydraulic capacity of the City's existing transmission system and to abandon/take out of service existing 6 to 12-inch diameter AC water mains. The survey included the location of all underground utilities, right-of-way determination, spot elevations (at 50-feet intervals), and plan and profiles. Obtained title information pertaining to existing easements and deeded right-of-way and related pertinent right-of-way maps, maintenance maps, plats and similar documents. The project included an initial cost and constructability analyses for varying methods of construction based on the project corridor and utility coordination for which pipe bursting, horizontal directional drilling (HDD) and open cut methods of installation were proposed. Permitting includes FDOT utility permitting for two SR50 crossings, Lake County ROW Use permitting for CR561 and FDEP WM permitting.

Town Center Boulevard Orange County Utilities, FL. Survey Project Manager. Tetra Tech provided surveying services for, the installation of approximately 10,000-feet of 42-inch Ductile Iron Pipe (DIP) and 6,000-feet of 36-inch DIP water main along Town Center Boulevard between Town Loop Boulevard and Orange Avenue. Tt prepared a Topographic survey along the proposed corridor for the preparation of the OCU construction drawings within the limits of the project. Obtain title information pertaining to existing easements and deeded right-of-way and related pertinent right-of-way maps, maintenance maps, plats and similar documents. Coordinated with subcontractors for the underground utilities, soft digs and wetlands flagged be located by the survey.

Eastern Regional Water Supply Facility Improvements, Orange County, FL. Project Surveyor for the existing Eastern Service Area Water Supply Facilities including the Eastern Regional Water Supply Facility (WSF) and the Bonneville Storage and Re-pump Facility (SRF). The survey included traditional survey methods, GPS and subsurface Ground Penetrating Radar (GPR) and Electromagnetic induction (EM) to verify underground locations of unknown private/public utilities.

Since 1994, Ms. Hayse has been providing construction administration support services on a variety of projects. She possesses extensive experience in construction administration (shop drawings, RFIs, pay applications, project closeout), bidding processes (advertisement, addenda, award, conformance), and project administration (specifications, reports, scheduling) from design through the bidding/construction of wastewater treatment and collection systems, water distribution systems, and effluent disposal facilities. She is experienced in the use of SpecsIntact, CSI MasterFormat, Microsoft Project, Primavera Construction Manager, Prolog, and various web-based construction management programs.

Select Relevant Experience

Southwest 6 & 7 Utility Extension Program, City of Cape Coral, Florida. Construction administration and Microsoft Project based scheduling services for 7 contracts constructing the expansion of the City's water, wastewater and irrigation systems to a 4 square mile area south of Pine Island Road. The project includes value engineering, hydraulic modeling for water, wastewater and irrigation systems, design, permitting, bidding, construction management and CEI with 9 full time construction oversight field personnel. The project includes over 200 miles of potable water, wastewater collection, wastewater transmission and irrigation utility piping; 18 lift stations and a stormwater canal pumping station to supplement reclaimed water during high demand periods.

Southwest Service Area Reclaimed Water System Expansion, City of Winter Garden, Florida. Construction administration and Primavera based design/construction scheduling for the route planning, preliminary design, surveying, final design, permitting and construction administration services for approximately 13,500 LF of 8-, 12-, 16- and 20-inch reclaimed water main and six direct interconnections to the City of Orlando's reclaimed water system. Over 8,500 LF of the reuse main was installed, by directional drilling, in the City road right-of-way.

Reclaimed Water System Expansion, Naples, Florida. Primavera based design scheduling. Tetra Tech prepared the reclaimed water master plan that included an evaluation of various options to achieve the City's objectives and presented recommendations for the phased implementation of a reclaimed water distribution system expansion. Once it was completed, the reclaimed water expansion project provided service to the entire west side of US 41, over 2,000 customers.

Alex Montalvo

GIS/Mapping Lead

Education

AA., University of Florida

Affiliations

- URBAN and Regional Information Society of America
- The Geographic and Land Information Society –GLIS
- Geological Society of America
- American Water Resources Association

Years of Experience

20

Bio

Mr. Montalvo has over 20 years of experience related to geographic information systems (GIS). A key component of his job function is to coordinate and integrate GIS with engineering practices. GIS is a tremendous benefit to all disciplines in its ability to analyze and exhibit complex data, and its' ability to place this information in the hands of key decision makers.

His expertise includes an intense focus on spatial analysis and statistical validation. He has strong professional experience with modeling and problem solving in GIS. This includes GIS database development from the design to implementation phases

Select Relevant Experience

Water, Wastewater, & Reclaimed Water Master Planning, Miami-Dade County, FL. GIS Analyst. GIS Analysis for this effort serves to identify and quantify water, wastewater, and reclaimed demands throughout Miami-Dade County's existing and potential service areas. This effort also includes identifying unserved areas, projecting demands, and developing alternatives for future utility service connections. Existing utility assets from other owners in the county are analyzed to identify any potential conflicts. In addition to utility data, detailed analysis of planning datasets such as zoning, special districts, and existing and future land uses are performed as well. This effort relies heavily on large volumes of GIS based data; therefore it is important to make these infrastructure and planning data available to project engineers through an enterprise GIS environment.

Water, Wastewater, and Reclaimed Water Master Plan, Clermont, FL. GIS Analyst. In this effort, GIS analysis was performed to prepare the City's existing utility infrastructure assets for modelling efforts. Actual utility billing data was geocoded and correlated to service locations in order to calculate existing demands of the water, potable irrigation, wastewater, and reclaimed systems. Analysis of the water use data, existing land use, future development plans, and modelling outputs were used to develop strategies for conversion to reclaimed water, where feasible, and to develop CIP recommendations.

Wastewater Collection System Master Plan, Tulsa, OK. GIS Analyst. This effort involves maintaining the consultant's version of the City's large wastewater collection system and facilitating communication with the modelling application. Tetra Tech's GIS team performed a detailed analysis on critical asset data parameters such as: pipe age, material, television inspection data, and work order information in order to produce the most accurate model possible. This effort also serves to support the City as it progresses in the existing sanitary asset management program.

- Monitoring of The City of New Smyrna Beach Faulkner Street Project.
- Cultural Resource Assessment Survey of The Isola Bella Tract, New Smyrna Beach.
- Phase I CRAS of the New Smyrna Beach US-1 Drainage Improvement Project, for FDOT.
- Phase I CRAS of the New Smyrna Beach Home Depot Project.

SWORN STATEMENT UNDER SECTION 287.133(3) (1) FLORIDA STATUES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICER AUTHORIZED TO ADMINISTER OATHS.

This sworn statement is submitted Qualification, Bid or Contract for RFQ 12-17-ENG.

This sworn statement is submitted by Tetra Tech, Inc.

[Name of entity submitting sworn statement]

whose business address is: 201 East Pine Street, Suite 1000, Orlando, FL 32801 and (if applicable) its Federal Employer Identification Number (FEIN) is 95-4148514. (If entity has no FEIN, include the Social Security Number of the individual signing this sworn statement: _____. My name is Jon Fox, PE and my relationship to the entity named above is Vice President.

I understand that a "public entity crime" as defined in Paragraph 287.133 (1) (g), Florida Statues, means a violation of any state of federal law be a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state, or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

I understand that "convicted" or "conviction" as defined in Paragraph 287.133 (91) (b), Florida Statues, means a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charges brought by federal or state trial court or recording, relating to charged brought by indictment or information after July 1, 1989, as a result of just verdict, non-jury trial, or entity of a plea of guilty or nolo contendere.

I understand the "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statues, means: (1) A Predecessor or Successor of a person convicted of public crime: or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime. The term "affiliate" includes those officers, directors, executives, partners, shareholder, employees, members, and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of public crime in Florida during the preceding 36 months shall be considered an affiliate.

I understand that a "person" as defined in Paragraph 287.133(1) (e), Florida Statues, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in management of an entity.

Based on information and belief, that statement which I have marked below is true in relation to the entity submitting this sworn statement. [Please indicate which statement applies]

X Neither the entity submitting this sworn statement, or one more of the officers, directors, executives, partners, shareholders, employees, members or agents who are active in the management of the entity, nor any affiliate or the entity, has been charged with and convicted of public entity subsequent to July 1, 1989, AND [Please indicate which additional statement applies.]

____ There has been a proceeding concerning the conviction before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer did not place the person or affiliate on the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate was placed on the convicted vendor list. There has been a subsequent proceeding before a hearing officer of the State of Florida, Division of Administrative Hearings. The final order entered by the hearing officer determined that it was in the public interest to remove the person or affiliate from the convicted vendor list. [Please attach a copy of the final order.]

____ The person or affiliate has not been placed on the convicted vendor list. [Please describe any action taken by or pending with the Department of General Services.]

END OF ADDENDUM #1

THE CITY OF NEW SMYRNA BEACH - DEVELOPMENTAL SERVICES

CONSIDER THE APPROVAL OF CONTRACT RENEWALS FOR PROFESSIONAL ARCHITECTURAL SERVICES.

May 27, 2025

Background:

The City entered into agreements for Professional Architectural Consultant Services with four Consulting firms on June 28, 2022, with Bentley Architects Engineers, Inc., CPH, Inc., Hall & Ogle Architects, Inc. and PQH Group Design, Inc. These four firms were selected in response to Request for Qualifications #10-22-ENG.

The agreements with each firm were for a term of three-years, with the option for up to two possible one-year renewals based on satisfactory performance. The one-year renewal contracts are set to expire on June 28, 2025. All four of the firms have successfully performed professional Architectural Services for the City over the past three years, and two of the four firms have current assignments that are expected to continue into 2026. If approved, this renewal would be the first of two optional one-year renewals.

Findings:

Staff recommends the City Commission approve one-year contract renewals with Bentley Architects Engineers, Inc., CPH, Inc., Hall & Ogle Architects, Inc. and PQH Group Design

Fiscal Analysis:

Each work order is dependent upon the requested services and will be charged based on the fee structure provided by each firm in their proposal. The funding for the consultants is budgeted under other professional services line # 001.51.515.51501.551001.

Strategic Plan Item:

No

II. INTRODUCTION

Thank you for your interest in doing business with the City of New Smyrna Beach, Florida.

If you are interested in preparing a response to this solicitation, please read the bid package in its entirety prior to submitting a bid response.

Under Chapter 119, Florida Statutes, all responses to this solicitation shall be considered public record, subject to distribution pursuant to the request for records by any interested party.

For purposes of this RFQ, the terms "Proposer," "Vendor," and "Respondent" are used interchangeably, and are in reference to the person or entity submitting the response to this solicitation.

II.A Summary

The City of New Smyrna Beach, Florida, is seeking the services of firms interested in providing Continuing Professional Architectural Services for the City of New Smyrna, pursuant to the Consultants Competitive Negotiation Act, Florida Statutes 287.055. The services to be provided under this agreement will be provided on an as-needed basis using purchase orders issued by the City.

It is anticipated that a minimum of three (3) individuals or firms may be selected for a contract period of three (3) years, with the possibility of two (2) optional one (1) year periodsautomatic one-year renewals, for a total of five (5) years. The successful proposer(s) will hereinafter be referred to as "Professional Consultant". During the contract period, the City of New Smyrna Beach shall reserve the right to seek qualifications and/or proposals from other individuals or

firms for specialized projects, as deemed to be in the best interest of the City of New Smyrna Beach.

The selected firms will be expected to execute the City's Standard Professional Agreement, provided in the Attachment Section of this document, and provide the required insurance certificates and endorsements under the agreement. If awarded, a contract to provide these services shall be effective on the date it is approved by the City of New Smyrna Beach, City Commission (herein after, the "Commission"), signed by all required parties and filed with the City Clerk.

Each individual or firm should become familiar with all the terms contained in the agreement and be willing to execute the agreement before submitting a proposal. There shall be no exceptions to either the scope of services or the terms of the agreement.

If made, the recommendation of award will be made to the best overall Professional Consultant(s) whose qualifications proposal is most advantageous to the City, taking into consideration the evaluation factors set forth in this RFQ. The City will not use any other factors or criteria in the evaluation of the qualifications received.

II.B Background

The City serves an area of 41.6 square miles in size and serves a population of approximately 27,173. It is located of Florida's East Coast, in the County of Volusia, just north of Cape Canaveral with easy access to both Interstate 95 and Interstate 4. The City's fiscal year begins on October 1st and ends on September 30th.

The City was created in 1887 by the adoption of its first charter, which was replaced by the present charter through Chapter 224.08, Special Acts of Florida, 1943.

The legislative branch of the City is composed of an elected five-member City Commission consisting of the Mayor and four commissioners. The City Commission is governed by the City Charter and by state and local laws and regulations. The City Commission is responsible for the establishment and adoption of policy. The execution of such policy is the responsibility of the Commission-appointed City Manager.

More detailed information on the government and can be found in City of New Smyrna's Comprehensive Annual Financial Report (CAFR). This report may be viewed on https://www.cityofnsb.com/105/Financial-Reports.

City Response to Questions	January 31, 2022, 5:00pm
Proposal Submission Deadline	February 14, 2022, 3:00pm
Recommendation of award to City Commission	March 22, 2022

III. GENERAL OVERVIEW

III.A Method of Source Selection

The City of New Smyrna Beach is using the Competitive Sealed Qualifications methodology of source selection for this procurement, as authorized by the City Purchasing Policy.

The City may, as it deems necessary, conduct discussions with responsible Professional Consultants determined to be in contention for being selected for award for the purpose of clarification to assure full understanding of, and responsiveness to solicitation requirements.

III.B Inquiries

All questions related to this RFQ shall be submitted in writing via the ProcureNow Question/Answer Tab via the City's e-Procurement portal, on or before, Friday, January 28, 2022 by 5:00 pm. Please include the section title for each question, if applicable, in order to ensure that questions asked are responded to correctly.

When asking questions, please be sure to enter each question separately.

Proposers must clearly understand that the only official answer or position of the City shall be the one stated in writing by purchasing.coordinator@cityofnsb.com posted in the City's e-Procurement portal. All questions submitted and answers provided shall be electronically distributed to proposers following this solicitation on the City's e-Procurement Portal.

III.C Ambiguity, Conflict, or Other Errors in the RFQ

If a Proposer discovers any ambiguity, conflict, discrepancy, omission, or other error in the RFQ, Proposer shall immediately notify the Purchasing Coordinator, noted herein, of such error in

writing and request modification or clarification of the document. The Purchasing Coordinator shall make modifications by issuing an addendum and shall post to ProcureNow and give written notice to all parties who have received this RFQ from the Finance Department. No interpretation shall be considered binding unless provided in writing by the City of New Smyrna Beach.

The Proposer is responsible for clarifying any ambiguity, conflict, discrepancy, omission, or other error in the RFQ prior to submitting the proposal or it shall be waived.

III.D Request for Qualifications Due Date

Submittals shall be received until Monday, February 14, 2022 at 3:00 pm. Submittals shall be submitted through the City's e-Procurement Portal on standard forms which are furnished with the Request for Qualifications documents.

Submittals received after the designated time will not be allowed on the City's eProcurement Portal. RFQ Documents are available on ProcureNow and the City's website. For further information, please e-mail the Purchasing Coordinator at purchasing.coordinator@cityofnsb.com.

There is no expressed or implied obligation for the City of New Smyrna Beach to reimburse responding firms for any expenses incurred in preparing proposals in response to this request.

III.E Pre-Proposal Meeting

There will be no pre-proposal conference for this solicitation.

III.F RFQ Opening

Sealed Bid Proposals will remain sealed until the time of opening. Proposals will be publicly opened and Proposers names read aloud at that time, via a live video conference which will also be recorded (using Microsoft Teams). Proposers may contact the City's Purchasing Coordinator to obtain information to view the live bid opening. No discussion of the Proposals will occur at this time. Proposals received after the designated time shall not be accepted.

Phone Conference ID: 808 945 623#

III.G City's Rights

The City of New Smyrna Beach reserves the right to retain all proposals submitted regardless of whether that proposal is selected. Submission of a proposal indicates acceptance by the firm of the conditions contained in this request for proposals, unless clearly and specifically noted in the

proposal submitted and confirmed in the contract between the City of New Smyrna Beach and the firm selected.

The City has the sole discretion and reserves the right to cancel this RFQ, to reject any/all proposals, to waive any/all informalities and/or irregularities, or to re-advertise with either the identical or revised specifications, if it is deemed to be in the best interest of the City to do so.

The City also reserves the right to make multiple awards based on experience and qualifications or to award only a portion of the items and/or services specified, if deemed to be in the City's best interest or award only a portion of the solicitation.

The City may, as it deems necessary, conduct discussions with responsible proposers determined to be in contention for being selected for award for the purpose of clarification to assure full understanding of, and responsiveness to solicitation requirements.

III.H Proposal, Presentation, and Protest Costs

The City shall not be liable in any way for any costs incurred by any proposer in the preparation of its bid in response to this RFQ, nor for the presentation of its bid and/or participation in any discussions, negotiations, or, if applicable, any protest procedures.

III.I Requests for Clarification

The City may, as it deems necessary, conduct discussions with responsible proposers determined to be in contention for being selected for award for the purpose of clarification to assure full understanding of, and responsiveness to solicitation requirements.

Requests by the Purchasing Coordinator to a proposer(s) for clarification of a submittal(s) shall be in writing. Proposer's failure to respond to request for clarification may deem proposer to be non-responsive, and may be just cause to reject its bid.

III.J Validity of Submittal

Submittals cannot be withdrawn after they are filed unless the Proposer makes their request in writing to the City prior to the time set for the closing of RFQ.

All submittals shall be valid for a period of one hundred eighty (180) days from the submission date to accommodate evaluation and selection process.

III.K Evaluation of Submittals

After qualifications opening has been completed, the Evaluation Committee shall review and score each Qualification individually, based on the evaluation criterion set forth in the section of this document titled Evaluation Criteria.

The committee may schedule presentations or demonstrations from top-ranked firm(s) and obtain guidance from third party subject matter experts. The final recommendation will be decided based on review of scores and consensus of the committee.

The City reserves the right to withdraw this RFQ at any time and for any reason, and to issue such clarifications, modifications, and/or amendments as it may deem appropriate.

Receipt of a qualification by the City or a submission of a proposal to the City offers no rights upon the Professional Consultant nor obligates the City in any manner. Acceptance of the qualification does not guarantee issuance of any other governmental approvals.

III.L Award of Contract and Professional Services Agreement

The selected firm will be asked to execute two (2) signed original copies of an agreement upon award of contract.

A contract resulting from this RFQ shall be subject to the terms and conditions set forth in a standard City agreement. The City reserves the right to include in any contract document such terms and conditions as it deems necessary for the proper protection of the rights of the City.

The City shall not be obligated to sign any contracts, maintenance and/or service agreements or other documents supplied by the Professional Consultant.

Contract Negotiations: After the ranking is completed, the City will attempt to negotiate an agreement with at least the top three (3) ranked firms or individuals which is determined to be in the best interests of the City. The agreement will cover all aspects of the scope of services as described herein. If no agreement is reached with the top three (3) ranked firms or individuals, negotiations will be terminated and initiated with the next-ranked firm or individual, and so on, until agreement(s) are reached.

Contract Term: Contract period of three (3) years, with the possibility of two automatic one-year renewals, for a total of five (5) years.

III.M Legal Requirements

All Federal, State, County and Local Laws, Ordinances, Rules and Regulations that in any manner affect this RFQ herein apply. Lack of knowledge by the submitting firms will in no way be cause for relief from responsibility.

IV. SCOPE OF SERVICES

The objective of this solicitation is to obtain the services of consultants with the capability to provide professional Continuing Professional Architectural Services services. The Scope of services under this Contract will be unique for each project, and will be identified by the City in writing prior to requesting a proposal from the Consultant.

IV.A Scope of Services

Architectural Services under this contract shall include all items related to, but not limited to:

- Facility and Space Planning
- Schematic Design
- Needs Assessments
- Design Development
- Building Renovation
- Preparation of Contract Documents
- Cost Estimating and Schedule Development
- Bid Review
- Permit Coordination
- On-site inspections
- Feasibility Master Planning
- Land Planning
- Recreational Planning
- LEED Consulting/Adaptive Reuse

- Site Selection and Analysis

Reviewing existing City of New Smyrna Beach Codes, Resolutions/ Ordinances and all applicable State of Florida Codes, as well as incorporating the information into complete documents including final plans (working drawings), technical specifications, construction estimates and related bid documents necessary for the bidding and construction of of buildings, structural components such as pavilions, patios, additions, renovations all designed to be compliant with the latest edition of the Florida Building Code.

The Architect must be able to provide all elements for a comprehensive design including mechanical, electrical, lighting, plumbing, structural, HVAC, & fire sprinkler specifications necessary for a complete set of construction plans. The City reserves the right to utilize the firm to provide any facet of the improvement process including design, construction administration, or inspection services only, etc.

In addition to standard architectural services, the services performed under these agreements may include site planning, landscaping, and general consulting for related services.

V. MINIMUM QUALIFICATIONS

V.A Minimum Qualifications

The selected firms shall be registered architectural firms licensed with the State of Florida. All professional services shall be performed under the direction of a professional registered with the State of Florida with specific experience in the field of architecture.

• The firm or team shall be licensed in accordance with Florida Statutes, Chapter 287.

• The selected firms must be able to provide proof of financial stability for the past three (3) years;

• Team Project Manager must be licensed in the State of Florida as an Architect and have a minimum of seven (7) years of experience in architectural design, familiarity with AIA documents, and have served as project manager on commercial and municipal projects with varied complexity.

• Team Members and sub-consultants must be licensed in the State of Florida and have a minimum of five (5) years of experience in providing architectural, fire safety design, plan & specification preparation, construction management and inspection services.

All work will normally be performed by the Professional Consultant at an off-site location (not in the City's offices). The Professional Consultant will be required to provide their own equipment.

The City and the firm(s) shall negotiate project terms per Florida Statute 287.055. A purchase order or similar document will be issued for each project.

VI. SUBMITTAL REQUIREMENTS

Firms submitting statement of qualifications shall be in strict compliance with this RFQ. Failure to comply with all provisions of the RFQ may result in disqualification.

VI.A Response Format

Submittals shall be deemed an offer to provide services to the City. In submitting, the Proposer declares that he/she understands and agrees to abide by all specifications, provisions, terms and conditions of same, and all ordinances and policies of the City. The Proposer agrees that if the contract is awarded to him/her, he/she shall perform the work in accordance with the provisions, terms and conditions of the contract.

To facilitate the fair evaluation and comparison of vendor proposals, all proposals must conform to the guidelines set forth in this RFQ.

Any portions of the proposal that do not comply with these guidelines must be so noted and explained the Acceptance of Conditions section of the bid. However, proposals which contain such variances may be considered non-responsive.

VI.B Introduction and Required Documentation

Shall be considered and scored by the City's Evaluation Team for a maximum of 20 Points. At a minimum shall include:

Letter of interest (limit to two pages).

Professional Licenses and Certifications: Include copies of all professional licenses and/or certifications and proof of Active State of Florida Registration with the Division of Corporations.

Minimum Eligibility: To be considered for award and to be further evaluated, proposer must meet or exceed the following criteria:

A. Must be registered professional within the State of Florida

B. Firm must have a minimum of five (5) years of experience in the requested area of practice

VI.C Experience and Qualifications

Shall be considered and scored by the City's Evaluation Team for a maximum of 40 points. At a minimum shall include:

A. Organizational staff charts depicting the team for this project to include roles and responsibilities in relation to the scope of work. The chart should specifically relate to staff that would work on City projects.

B. Provide a minimum of five (5) recent projects which are similar to this scope and completed successfully within the past five years. Include the following for each project:

   1. Project name, owner name, and contact information.
   2. Brief description of work.
   3. Name of Role of Key Personnel involved in project.
   4. Project status.

C. Organizational Profile: Submit detailed responses to the following:

   1. Size of organization.
   2. Number of years in business, including operation under other firm names, providing services similar to those described herein.
   3. Number of years in business in the State of Florida.
   4. Resumes of individuals that will have direct role in the performance and supervision of contract.

5. Provide a list of all sub-consultants, if any, which may be used in the performance of this contract. List what services will be provided, the subconsultant's qualifications in providing such services, firm location, and anticipated frequency of use.

D. Grant experience: Provide a list of grant applications previously applied for other clients and three that were successfully awarded.

VI.D Project Approach / Management

Ten (10) page maximum submittal. Shall be considered and scored by the City's Evaluation Team for a maximum of 30 points. At a minimum shall include:

A. State your typical project management procedure from project inception through design and through construction in situations where post-design services are included in the scope.

B. List any innovative approaches or techniques your firm has implemented to ensure project schedule adherence.

C. Discuss your firm's cost estimating procedure and how you integrate new ideas or methodologies to assist your client in achieving a cost-effective project.

D. Discuss why your firm is a fit for the City and why your firm should be selected.

VI.E References- Past and Present

Five (5) page maximum submittal. Shall be considered and scored by the City's Evaluation Team for a maximum of 10 points.

Past: Submit at least two references, preferably municipal clients (**not to include the City of New Smyrna Beach, Florida**), for which proposer **performed** work similar in nature as described herein. For each reference, include the following:

A. Client Name

B. Contact Information, including telephone number and email addresses

C. Dates of work

D. Abstract of project(s) completed or currently under contract.

Present: Submit at least three references, preferably municipal clients (not to include the City of New Smyrna Beach, Florida), for which proposer is currently performing work similar in nature as described herein. For each reference, include the following:

A. Client Name

B. Contact Information, including telephone number and email addresses

C. Dates or work

D. Abstract of project(s) completed or currently under contract.

VI.F Evaluation Committee and Evaluation Factors

A committee of City employees shall evaluate and rank each submittal based on information provided.

Evaluation factors are based on the abilities of the proposer to efficiently perform the Scope of Services as generally outlined in this Request for Qualifications. The City shall be seeking to identify the submittal(s) which shall best meet the needs of the City of New Smyrna Beach as determined from the responses to this Request for Qualifications.

A selected group of proposers may be required to make an oral presentation to the Evaluation Committee. Such presentation shall provide an opportunity for the proposers to clarify the information provided in their RFQ. Oral presentations, if any, shall be considered in conjunction with submitted data by the Evaluation Committee. The Evaluation Committee shall present its recommendation to the City Commission, which has the authority to make the final determination and award contracts.

The evaluation criteria may be modified for the oral presentation portion of the evaluation.

Submissions shall be evaluated on a total score basis, with a maximum score of one hundred (100) points per Evaluation Committee member. The following criteria shall be used in the evaluation process to determine the successful respondent(s):

EVALUATION CRITERIA MAXIMUM POSSIBLE POINTS

Required Documentation 20

Qualifications & Experience 40

Project Approach & Management 30

References 10

TOTAL POSSIBLE POINTS 100

VII. EVALUATION CRITERIA

A committee of City employees shall independently evaluate and rank each submittal based on information provided.

Evaluation factors are based on the abilities of the proposer to efficiently perform the Scope of Services as generally outlined in this Request for Qualifications. The City shall be seeking to identify the submittal(s) which shall best meet the needs of the City of New Smyrna Beach as determined from the responses to this Request for Qualifications.

A selected group of proposers may be required to make an oral presentation to the Evaluation Committee. Such presentation shall provide an opportunity for the proposers to clarify the information provided in their RFQ. Oral presentations, if any, shall be considered in conjunction with submitted data by the Evaluation Committee. The Evaluation Committee shall present its

recommendation to the City Commission, which has the authority to make the final determination and award contracts.

The evaluation criteria may be modified for the oral presentation portion of the evaluation.

Submissions shall be evaluated on a total score basis, with a maximum score of one hundred (100) points per Evaluation Committee member. The following criteria shall be used in the evaluation process to determine the successful respondent(s):

No.	Evaluation Criteria	Scoring Method	Weight (Points)
1.	**Introduction and Required Documentation** Please see required information in Submittal of Qualifications	Points Based	20 *(20% of Total)*
2.	**Experience and Qualifications** Please see required information in Submittal of Qualifications	Points Based	40 *(40% of Total)*
3.	**Project Approach and Management** Please see required information in Submittal of Qualifications	Points Based	30 *(30% of Total)*
4.	**References** Please see required information in Submittal of Qualifications	Points Based	10 *(10% of Total)*

VIII. INSURANCE REQUIREMENTS

VIII.A Insurance Requirements

The selected Firm or Individual will be required to name the City as an additional named insured with the following minimum coverages.

A. **Workers' Compensation** shall be maintained by the selected firm or individual for all employees engaged in the work under this solicitation in accordance with the laws of the

   1. State of Florida. Employers' Liability Insurance shall be maintained by the selected firm or individual at limits not less than the following:
   2. $500,000 Each Accident
   3. $500,000 Disease Each Employee
   4. $500,000 Policy Limit for Disease

B. **Commercial General Liability Insurance** shall be maintained by the selected firm or individual with limits not less than the following:

   1. $1,000,000 Bodily Injury & Property Damage-each occurrence

2. $2,000,000 Personal & Advertising Injury-each occurrence
3. $2,000,000 General Aggregate
4. $2,000,000 Products/Completed Operations Aggregates limit
5. $ 5,000 Medical Payments
6. $ 100,000 Fire Damage Legal Liability
7. Coverage shall include Contractual Liability and Independent Contractors Liability.

C. Automobile Liability Insurance shall be maintained by the selected firm or individual with a combined single limit of not less than $1,000,000 Bodily Injury and Property Damage in accordance with the laws of the State of Florida, as to the Ownership, maintenance, and use of all owned, non-owned, leased or hired vehicles.

D. Professional Liability Insurance shall be maintained by the selected firm or individual with a combined single limit of not less than $1,000,000, protecting the selected firm against claims of the City for negligence, errors, mistakes, or omissions in the performance of services to be performed and furnished by the selected firm or individual.

1. If the contractor maintains broader coverage and/or higher limits than the minimums shown above, The City of New Smyrna Beach requires and shall be entitled to the broader coverage and/or the higher limits maintained by the Contractor.
2. Cancellation: Thirty (30) days written notice of cancellation is required to Certificate Holder

Certificate Holder:

City of New Smyrna Beach
210 Sams Avenue
New Smyrna Beach, FL 32168

VIII.B Acknowledgment of Insurance Requirements

It should be noted by the Proposer that, in order to meet the City's requirements, there may be additional insurance costs to the Proposer's firm. It is, therefore, imperative that the proposer discuss these requirements with the Proposer's insurance agent, as noted on the Insurance Check List, so that allowances for any additional costs can be made by the Proposer.

The Proposer's obligation under this provision shall not be limited in any way by the agreed upon contract price, or the Proposer's limit of, or lack of, sufficient insurance protection.

Proposer also understands that the evidence of required insurance may be required within five (5) business days following notification of its offer being accepted; otherwise, the City may rescind its acceptance of the Proposer's bid.

Statement of Insurance Compliance Form provided in the Attachment Section shall be completed and submitted with proposal.

IX. TERMS AND CONDITIONS

IX.A Licenses

The Vendor is required to possess the correct Business Tax Receipt, professional license, and any other authorizations necessary to carry out and perform the work in accordance with the specifications required by the project pursuant to all applicable Federal, State and Local Law, Statute, Ordinances, and rules and regulations of any kind.
If required and/or requested, copies of the required licenses must be submitted with the solicitation response indicating that the entity proposing, as well as the team assigned to the City account, are properly licensed to perform the activities or work included in the contract documents. A Vendor is also required to have a business tax receipt.
If you have questions regarding required professional licenses and Business Tax Receipt, contact the Building Department, (386) 410-2800.

IX.B Principals/Collusion

By submission of this Proposal, the undersigned, as Proposer, does declare that the only person or persons interested in this RFQ as principal or principals is/are named therein and that no person other than therein mentioned has any interest in this RFQ or in the contract to be entered into; that this Proposal is made without connection with any person, company or parties submitting a Proposal, and that it is in all respects fair and in good faith without collusion or fraud.

IX.C Taxes

The City is exempt from Federal Excise and State of Florida Sales Tax.

IX.D Relation of City

It is the intent of the parties hereto that the Vendor shall be legally considered an independent Vendor, and that neither the Vendor nor their employees shall, under any circumstances, be considered employees or agents of the City, and that the City shall be at no time legally responsible for any negligence on the part of said Vendor, their employees or agents, resulting in either bodily or personal injury or property damage to any individual, firm, or corporation.

IX.E Term Contracts

If funds are not appropriated for continuance of a term contract to completion, cancellation shall be accepted by this Vendor on thirty (30) days prior written notice.

IX.F Termination for Cause or Convenience

Should the Vendor be found to have failed to perform his services in a manner satisfactory to the City, the City may terminate this Agreement immediately for cause; further the City may terminate this Agreement for convenience with a thirty (30) day written notice. The City shall be sole judge of non performance.

Termination or cancellation of the contract shall not relieve the Proposer of any obligations for any delivers or liabilities entered prior to termination of the contract.

IX.G Liability

Neither party shall be held responsible for failure to complete contract due to causes beyond its control, including, but not limited to, work stoppage, fires, civil disobedience, riots, rebellions, Acts of Nature and similar occurrences making performance impossible or illegal.

The Vendor shall hold and save the City of New Smyrna Beach, its officers, agents, and employees harmless against claims by third parties resulting from the Vendor's or suppliers breach of contract or negligence, including all attorney's fees and costs, and shall pay any and all damages, fees, and costs assessed on behalf of the City. The City expressly reserves all rights, privileges, and benefits of sovereign immunity.

IX.H Assignment

The Vendor(s) shall not assign, transfer, convey, sublet or otherwise dispose of this contract, or of any or all of its rights, or interest therein, or his or its power to execute such contract to any person, company or corporation without prior written consent of the City.

IX.I Lobbying

All firms are hereby placed on NOTICE that the City does not wish to be lobbied, either individually or collectively about a matter for which a firm has submitted a Proposal.

During the solicitation process, from solicitation announcement to final Commission approval, no firm or its agent shall contact any other employee of the City in reference to this solicitation, with the exception of the Purchasing Coordinator. Failure to abide by this provision may serve as grounds for disqualification for award of this contract to the firm.

IX.J Single Proposal

Each Proposer must submit, with their bid, the required forms included in this RFQ. Only one proposal from a legal entity as a primary shall be considered. A legal entity that submits a proposal as a primary or as part of a partnership or joint venture submitting as primary may not then act as a sub-consultant to any other firm submitting under the same RFQ.

All submittals in violation of this requirement shall be deemed non-responsive and rejected from further consideration.

IX.K Protest Procedures

A. Bidders or respondents who do not agree with the City's recommendation for award shall be afforded the opportunity to protest the recommendation by submitting written notice to the Purchasing Division. Bids or proposals not meeting the minimum published requirements, including specifications, scope of service, or required documents, are not subject to protest.

B. Such notice should be given within three (3) business days after the City posts its notice of intent to award.

C. A formal written protest shall be made to the Purchasing Division within five (5) working days after filing the notice of protest, which shall state the grounds for the protest and the action requested.

D. The formal written protest shall include with it a bid protest bond in the amount of one percent (1%) of the estimated contract amount, as provided in Florida Statutes § 287.042(2)(c) and Rule 28-110.005 of the Florida Administrative Code. The notice of protest must be either hand-delivered and date and time stamped by the Finance Department, or sent via Certified U.S. mail, return receipt requested. Failure to file a protest within the time-frame specified herein shall constitute a full waiver of all rights to protest the City's decision regarding award of the bid. For full bid protest guidance, consult Section 9.1, Notice of Protest, of the City of New Smyrna Beach's purchasing policy.

IX.L Public Entity Crime

A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a proposal, bid, or reply on a contract to provide any goods or services to a public entity; may not submit a proposal, bid, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit proposals, bids, or replies on leases of real property to a public entity; may not be awarded or perform work as a Vendor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity for a period of 36 months following the date of being placed on the convicted vendor list.

IX.M Conflict of Interest

Proposer shall complete the Conflict of Interest Affidavit included as an attachment to this RFQ document. Disclosure of any potential or actual conflict of interest is subject to City staff review and does not in and of itself disqualify a firm from consideration.

These disclosures are intended to identify and or preclude conflict of interest situations during contract selection and execution.

IX.N Prohibition of Gifts to City Employees

No organization or individual shall offer or give, either directly or indirectly, any favor, gift, loan, fee, service or other item of value to any City employee, as set forth in Chapter 112, Part III, Florida Statutes, the current City Ethics Ordinance, and City Administrative Policy. Violation of this provision may result in one or more of the following consequences: a. Prohibition by the individual, firm, and/or any employee of the firm from contact with City staff for a specified period of time; b. Prohibition by the individual and/or firm from doing business with the City for a specified period of time, including but not limited to: submitting bids, RFQ, and/or quotes; and, c. immediate termination of any contract held by the individual and/or firm for cause.

IX.O Immigration Reform and Control Act

Proposer acknowledges, and without exception or stipulation, any firm(s) receiving an award shall be fully responsible for complying with the provisions of the Immigration Reform and Control Act of 1986 as located at 8 U.S.C. 1324, et seq. and regulations relating thereto, as either may be amended. Failure by the awarded firm(s) to comply with the laws referenced herein shall constitute a breach of the award agreement and the City shall have the discretion to unilaterally terminate said agreement immediately.

IX.P Florida Public Records Act

All material submitted regarding this RFQ becomes the property of the City. RFQ documents may be reviewed by any person ten (10) days after the public opening. The Professional Consultant should take special note of this as it relates to any proprietary information that might be included in its offer.

Any resulting contract may be reviewed by any person after the contract has been executed by the City. The City has the right to use any or all information/material submitted in response to this RFQ and/or any resulting contract from same. Disqualification of a Professional Consultant does not eliminate this right. This section is further subject to F.S. 119.01 et. seq.

IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CITY'S CUSTODIAN OF PUBLIC RECORDS, CITY CLERK, AT 386-410-2637, CLERK@CITYOFNSB.COM, CITY OF NEW SMYRNA BEACH, 210 SAMS AVENUE, NEW SMYRNA BEACH, FL 32168.

The contractor is required to comply with public records laws, specifically to:

A. Keep and maintain public records required by the public agency to perform the service.

B. Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.

C. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.

D. Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the public agency's custodian of public records, in a format that is compatible with the information technology systems of the public agency.

X. FEDERAL CONDITIONS

Required for Federally Funded Projects. Will apply if services are requested and rendered for a disaster related project. If attached, the CONTRACTOR is bound by the terms and conditions of the Federally-Funded Subaward and Grant Agreement between CITY and the Florida Division of Emergency Management (Division).

X.A Access to Records

The following access to records requirements apply to this contract:

A. The contractor agrees to provide the City of New Smyrna Beach, Florida, representative(s) access to any books, documents, papers, and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.

B. The Contractor agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.

C. The contractor agrees to provide the FEMA Administrator or his authorized representative(s) access to construction or other work sites pertaining to the work being completed under the contract.

X.B Americans with Disabilities Act of 1990

Americans with Disabilities Act of 1990, as amended (ADA) – The CONTRACTOR will comply with all the requirements as imposed by the ADA, the regulations of the Federal government issued thereunder, and the assurance by the CONTRACTOR pursuant thereto.

X.C Byrd Anti-Lobbying Amendment

Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)—Contractors that apply or bid for an award exceeding $100,000 must file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the non-Federal award.

X.D Clean Air Act

Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387). Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. §§7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. §§1251-1387) and will report violations to FEMA and the Regional Office of the Environmental Protection Agency (EPA). The Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended—applies to Contracts and subgrants of amounts in excess of $150,000.

X.E Compliance with Procurement of Recovered Materials

Compliance with Procurement of recovered materials as set forth in 2 CFR § 200.322. CONTRACTOR must comply with section 6002 of the Solid Waste disposal Act, as amended, by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

X.F Contract Work Hours and Safety Standards Act

Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708) where applicable, which includes all FEMA grant and cooperative agreement programs, all contracts awarded by the CITY in excess of $100,000 that involve the employment of mechanics or laborers must comply with 40 U.S.C.§§ 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. §3702 of the Act, each contractor must compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the

work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

X.G Davis Bacon Act

Davis Bacon Act as amended (40 U.S.C. §§3141-3148) when required by Federal program legislation, which includes emergency Management Preparedness Grant Program, Homeland Security Grant Program, Nonprofit Security Grant Program, Tribal Homeland Security Grant Program, Port Security Grant Program and Transit Security Grant Program, all prime construction contracts in excess of $2,000 awarded by non-Federal entities must comply with the Davis-Bacon Act (40 U.S.C. §§3141-3144, and §§3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. If applicable, the CITY must place a current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The CITY must report all suspected or reported violations to the Federal awarding agency. When required by Federal program legislation, which includes emergency Management Preparedness Grant Program, Homeland Security Grant Program, Nonprofit Security Grant Program, Tribal Homeland Security Grant Program, Port Security Grant Program and Transit Security Grant Program (it does not apply to other FEMA grant and cooperative agreement programs, including the Public Assistance Program), the contractors must also comply with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). As required by the Act, each contractor or subrecipient is prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The CITY must report all suspected or reported violations to the Federal awarding agency.

A. Contractor. The contractor shall comply with 18 U.S.C. § 874, 40 U.S.C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into this contract.

B. Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as the FEMA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses.

C. Breach. A breach of the contract clauses above may be grounds for termination of the contract, and for debarment as a contractor and subcontractor as provided in 29 C.F.R. § 5.12.

X.H Debarment and Suspension

Debarment and Suspension (Executive Orders 12549 and 12689)—A contract award (see 2 CFR 180.220) must not be made to parties listed on the government-wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR part 1986 Comp., p. 189) and 12689 (3 CFR part 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

X.I Disadvantaged Business Enterprise (DBE) Policy and Obligation

Disadvantaged Business Enterprise (DBE) Policy and Obligation - It is the policy of the CITY that DBE's, as defined in 49 C.F.R. Part 26, as amended, shall have the opportunity to participate in the performance of contracts financed in whole or in part with CITY funds under this Agreement. The DBE requirements of applicable federal and state laws and regulations apply to this Agreement. The CITY and its CONTRACTOR agree to ensure that DBE's have the opportunity to participate in the performance of this Agreement. In this regard, all recipients and contractors shall take all necessary and reasonable steps in accordance with 2 C.F.R. § 200.321(as set forth in detail below), applicable federal and state laws and regulations to ensure that the DBE's have the opportunity to compete for and perform contracts. The CITY and the CONTRACTOR and subcontractors shall not discriminate on the basis of race, color, national origin or sex in the award and performance of contracts, entered pursuant to this Agreement. 2 C.F.R. § 200.321 CONTRACTING WITH SMALL AND MINORITY BUSINESSES, WOMEN'S BUSINESS ENTERPRISES, AND LABOR SURPLUS AREA FIRMS

A. If the CONTRACTOR, with the funds authorized by this Agreement, seeks to subcontract goods or services, then, in accordance with 2 C.F.R. §200.321, the CONTRACTOR shall take the following affirmative steps to assure that minority businesses, women's business enterprises, and labor surplus area firms are used whenever possible.

B. Affirmative steps must include:

   1. Placing qualified small and minority businesses and women's business enterprises on solicitation lists;

   2. Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;

   3. Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;

4. Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;
5. Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce.
6. Requiring the Prime contractor, if subcontractor are to be let, to take the affirmative steps listed in paragraph (1) through (5) of this section.

X.J E-Verify

The Contractor shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Contractor during the term of the Contract and shall expressly require any subcontractors performing work or providing services pursuant to the Contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the Contract term.

X.K Equal Employment Opportunity

During the performance of this contract, the contractor agrees as follows:

A. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

B. The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.

C. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

D. The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor. A copy of Executive Order 11246 is provided in Attachments.

E. The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

F. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions as may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

G. The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the contractor may request the United States to enter into such litigation to protect the interests of the United States.

X.L Hold Harmless

The CONTRACTOR shall hold the CITY harmless against all claims of whatever nature arising out of the CONTRACTOR’s performance of work under this Agreement, to the extent allowed and required by law.

X.M No Obligation by Federal Government

The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

X.N Program Fraud and False or Fraudulent Statements or Related Acts

The contractor acknowledges that 31 U.S.C. Chapter 38 (Administrative Remedies for False Claims and Statements) applies to the contractor’s actions pertaining to this contract.

X.O Rights to Inventions Made Under a Contract or Agreement

If any Federal award implicated in this solicitation meets the definition of "funding agreement" under 37 CFR §401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

XI. VENDOR REQUIREMENTS

XI.A Business Name and Address*

By submitting this response, you hereby designate the business name and address listed here as the office to which notices may be delivered or mailed.

*Response required

XI.B Title of Position and Company Name*

Please provide the title of the Prime Proposer and company name of the organization here.

*Response required

XI.C Proposer's Certification*

I have carefully examined the Request for Qualifications, Overview, Background of the City, Scope of Services, General Terms and Conditions, Format for Proposal Submission, and any other documents accompanying or made a part of this Request for Qualifications.

I hereby propose to furnish the services specified in the Request for Qualifications at the prices, rates or discounts quoted in my proposal. I agree that my proposal will remain firm for a period of up to one hundred-eight days (180) days in order to allow the City adequate time to evaluate the proposals.

I agree to abide by all conditions of this proposal and understand that a background investigation may be conducted by the City of New Smyrna Beach Police Department prior to award.

I certify that all information contained in this proposal is truthful to the best of my knowledge and belief. I further certify that I am duly authorized to submit this proposal on behalf of the vendor/contractor as its act and deed and that the vendor/contractor is ready, willing and able to perform if awarded the contract.

I further certify, under oath, that this proposal is made without prior understanding, agreement, connection, discussion, or collusion with any other person, firm or corporation submitting a

proposal for the same product or service; no officer, employee or agent of the City of New Smyrna Beach or of any other Proposer interested in said proposal; and that the undersigned executed this Proposer's Certification with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

☐ Please confirm
*Response required

XI.D Professional Services Agreement*

Proposer acknowledges, that the selected Professional Consultant(s) shall be required to sign a standard City contract within four-teen (14) days of Notice of Selection for Award.

☐ Please confirm
*Response required

XI.E Acknowledgment of Insurance Requirements*

By submitting a response to this solicitation, the undersigned firm acknowledges the required conditions included in the Acknowledgment of Insurance Requirements section of this Request for Proposal.

The undersigned firm agrees to obtain prior to award, if selected, the insurance and levels in accordance to the requirements as set forth in the Invitation for Proposal, Invitation to Bid, or Invitation for Qualifications, or draft agreement, attached hereto.

Policies other than State Issued Worker's Compensation shall be issued only by companies authorized by maintaining certificates of authority issued to the companies by the Department of Insurance of the State of Florida to conduct business in the State of Florida and which maintain a Rating of "A" or better and a Financial Size category of "VII" or better according to the A.M. Best Company. Policies for Worker's Compensation may be issued by companies authorized as a group self-insurer by F.S. 440.57, Florida Statutes.

☐ Please confirm
*Response required

XI.F Public Records*

I have received a copy of the Public Records acknowledgement, provided as an Attachment.

☐ Please confirm
*Response required

XI.G Drug Free Workplace Certificate *

In accordance with Section 287.087 of the State of Florida Statutes, preference shall be given to businesses with drug-free workplace programs. Whenever two or more proposals, which are equal with respect to price, quality, and service, are received by the State or by any political subdivision for the procurement of commodities or contractual services, a proposal received

from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process.

Established procedures for processing tie proposals shall be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free program, a business shall:

A. Publish a written statement notifying that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.

B. Inform employees about the dangers of drug abuse in the work place, the firm's policy of maintaining a drug free working environment, and available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug use violations.

C. Give each employee engaged in providing commodities or contractual services that are under proposal, a copy of the statement specified above.

D. Notify the employees that as a condition of working on the commodities or contractual services that are under proposal or proposals, the employee shall abide by the terms of the statement and shall notify the employer of any conviction of, plea of guilty or nolo contendere to, any violation of Chapter 1893, or of any controlled substance law of the State of Florida or the United States, for a violation occurring in the work place, no later than five (5) days after such conviction, and requires employees to sign copies of such written statements to acknowledge their receipt.

E. Impose a sanction on, or requires the satisfactory participation in, a drug abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.

F. Make a good faith effort to continue to maintain a drug free work place through the implementation of the drug free workplace program.

XI.I Conflict of Interest Disclosure*

PROJECT NUMBER: 10-22-ENG - Continuing Professional Architectural Services

The award of this contract is subject to the provisions of Chapter 112, Florida Statutes. All respondents must disclose within their submittal: the name of any officer, director, or agent who is also an employee of the City of New Smyrna Beach, Florida. Furthermore, all respondents must disclose the name of any City employee who owns, directly, or indirectly, an interest of more than five percent (5%) in the respondent's firm or any of its branches.

The purpose of this disclosure statement is to give the City the information needed to identify potential conflicts of interest for screening evaluation team members and other key personnel involved in the award of this contract.

The term "conflict of interest" refers to situations in which financial or other personal considerations may adversely affect, or have the appearance of adversely affecting, an employee's professional judgment in exercising any City duty or responsibility in administration, management, or other professional activities. The bias such conflicts could conceivable impart may inappropriately affect the goals of the City. The City must be free of the undue influence of outside interests.

The mere appearance of a conflict may be as serious and potentially damaging as an actual conflict of interest. Reports of conflicts based on appearances can undermine public trust in ways that may not be adequately restored even when the mitigating facts of a situation are brought to light. Apparent conflicts, therefore, should be disclosed and evaluated with the same vigor as actual conflicts.

PUBLIC RECORDS

All material submitted regarding this solicitation becomes the property of the City. Solicitation documents may be reviewed by any person ten (10) days after the public opening. The Respondent should take special note of this as it relates to any proprietary information that might be included in its offer. Any resulting contract may be reviewed by any person after the contract has been executed by the City.

The City has the right to use any or all information/material submitted in response to this solicitation and/or any resulting contract from same. Disqualification of a Professional Consultant does not eliminate this right. This section is further subject to F.S. 119.01 et. seq.

IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CITY'S CUSTODIAN OF PUBLIC RECORDS, CITY CLERK, AT 386/410-2630, CLERK@CITYOFNSB.COM, CITY OF NEW SMYRNA BEACH, 210 SAMS AVENUE, NEW SMYRNA BEACH, FL 32168.

The contractor is required to comply with public records laws, specifically to:

1. Keep and maintain public records required by the public agency to perform the service.
2. Upon request from the public agency's custodian of public records, provide the public agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in this chapter or as otherwise provided by law.
3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the public agency.
4. Upon completion of the contract, transfer, at no cost, to the public agency all public records in possession of the contractor or keep and maintain public records required by the public agency to perform the service. If the contractor transfers all public records to the public agency upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the public agency, upon request from the public agency's custodian of public records, in a format that is compatible with the information technology systems of the public agency.

PROFESSIONAL CONSULTING SERVICES AGREEMENT FOR:
CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES, (RFQ) 10-22-ENG

THIS AGREEMENT is made and entered into this _____ day of _____, 2022, by and between **_____**, duly authorized to conduct business in the State of Florida and whose address is _____, FL _____, hereinafter, called "CONSULTANT," and the **CITY OF NEW SMYRNA BEACH**, a political subdivision of the State of Florida, whose address is 210 Sams Ave., New Smyrna Beach, FL, hereinafter called "CITY."

SECTION 1. AGREEMENT. The terms of this Agreement, together with the incorporation of the terms and conditions of the **RFQ 10-22-ENG, Continuing Professional Architectural Services**, for the **City of New Smyrna Beach** and any exhibits, schedules, and attachments hereto, and any and all amendments relating to same, and any and all submittals from CONSULTANT, constitute the entire Agreement between the individual City and CONSULTANT. This Agreement is the final, complete and exclusive expression of the terms and conditions of the parties' Agreement. Any and all prior agreements, representations, negotiations, and understandings made by the parties, oral or written, expressed or implied, are hereby superseded and merged herein.

SECTION 2. TERM OF AGREEMENT. The initial term of this Agreement shall be for three (3) years from the date of the award. After the initial term, this Agreement shall automatically renew for two (2) optional, automatic, (1) year periods. The maximum term for this Agreement and all renewals is a cumulative term of five (5) years.

SECTION 3. DESCRIPTION OF SERVICES. The Consultant agrees to perform the services outlined in the advertised solicitation document titled **RFQ 10-22-ENG, Continuing Professional Architectural Services**, and in the Consultant's submitted Proposal.

The Consultant shall diligently and in a professional and timely manner perform and provide these services. Unless modified in writing by the parties hereto, the duties of the Consultant shall not be construed to exceed the provision of the services pertaining to this Agreement.

The City and Consultant agree that there may be certain additional services required to be performed by the Consultant during the performance of the contract that cannot be defined sufficiently at the time of execution of this Agreement. These services shall be authorized in writing as an amendment to the contract and may contain additional instructions or provide specifications upon certain aspects of this Agreement pertaining to the work to be undertaken.

SECTION 4. COMPENSATION. For Services rendered, the CITY shall pay the CONSULTANT based on their fee schedule provided. Unless otherwise agreed in a Scope of Services, the CONSULTANT shall invoice the City monthly based upon the CONSULTANT's fees for services completed during the billing period.

SECTION 5. COMPONENT PARTS OF THE CONTRACT. This Contract consists of the following contract documents, all of which are hereby made a part hereof as if herein set

out in full and all of which are familiar to the Contractor:

A. City Advertised Bid
B. Addendums
C. Award Bid Proposal
D. Certificate of Insurance
E. Presentation of Services
F. Fee Proposal

SECTION 6. CONTROLLING LAW, VENUE, AND ATTORNEY'S FEES. This Agreement is to be governed, construed, and interpreted by, through and under the laws of Florida. Venue for any litigation between the parties to this Agreement shall be in the County of Volusia, Florida and any trial shall be non-jury. The prevailing party in any litigation arising from or related to this Agreement shall be reimbursed reasonable attorney fees and costs, including all fees and costs of an appeal.

SECTION 7. RIGHTS AT LAW RETAINED. The rights and remedies of the City, provided for under this Agreement, are in addition and supplemental to any other rights and remedies provided by law.

SECTION 8. NOTICES. Whenever either party desires to give notice unto the other, it must be given by written notice, sent by registered or certified United States mail, return receipts requested, addressed to the party for whom it is intended at the place last specified. The place for giving of notice shall remain such until it shall have been changed by written notice in compliance with the provisions of this Section. For the present, the parties designate the following as the respective places for giving of notice, to-wit:

For City:

Kelly McQuillen, City Clerk
City of New Smyrna Beach
210 Sams Ave.
New Smyrna Beach, FL 32138
(386)410-2637

For Consultant:

SECTION 9. MODFICATIONS TO AGREEMENT. This Agreement and any exhibits, amendments and schedules may only be amended, supplemented, modified or canceled by a written instrument duly executed by both parties hereto of equal dignity herewith.

SECTION 10. SEVERABILITY. If during the term of this Agreement, it is found that a specific clause or condition of this Agreement is illegal under federal or state law, the remainder of the Agreement not affected by such a ruling shall remain in force and effect.

SECTION 11. WAIVER OF JURY TRIAL. The City and Consultant have specifically waived the right to a jury trial concerning any disputes which may arise concerning this agreement.

SECTION 12. EFFECT OF FAILURE TO INSIST ON STRICT COMPLAINCE WITH CONDITIONS. The failure of either party to insist on strict performance of any covenant or condition of this contract, or to exercise any option herein contained, shall not be construed as a waiver of such covenant, condition, or option in any other instance. This contract cannot be changed or terminated orally.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the date written above for execution by the City of New Smyrna Beach.

Form **W-9**
(Rev. October 2007)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give form to the requester. Do not send to the IRS.

Print or type See Specific Instructions on page 2.

Name (as shown on your income tax return)

Business name, if different from above

Check appropriate box: ☐ Individual/Sole proprietor ☐ Corporation ☐ Partnership
☐ Limited liability company. Enter the tax classification (D=disregarded entity, C=corporation, P=partnership) ▶ .....
☐ Other (see instructions) ▶

☐ Exempt payee

Address (number, street, and apt. or suite no.)

Requester's name and address (optional)

City, state, and ZIP code

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number

or

Employer identification number

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here | **Signature of U.S. person** ▶ | **Date** ▶

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),

2. Certify that you are not subject to backup withholding, or

3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity,

Executive Order 11246

SOURCE: The following is the text of Executive Order 11246 of September 28, 1965, as it appears at 30 FR 12319, 12935, 3 CFR, 1964-1965 Comp., p.339, unless otherwise noted.

Under and by virtue of the authority vested in me as President of the United States by the Constitution and statutes of the United States, it is ordered as follows:

Part I — Nondiscrimination in Government Employment

[Part I superseded by EO 11478 of Aug. 8, 1969, 34 FR 12985, 3 CFR, 1966-1970 Comp., p. 803]

Part II - Nondiscrimination in Employment by Government Contractors and Subcontractors

Subpart A - Duties of the Secretary of Labor

SEC. 201. The Secretary of Labor shall be responsible for the administration and enforcement of Parts II and III of this Order. The Secretary shall adopt such rules and regulations and issue such orders as are deemed necessary and appropriate to achieve the purposes of Parts II and III of this Order.

[Sec. 201 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

Subpart B - Contractors' Agreements

SEC. 202. Except in contracts exempted in accordance with Section 204 of this Order, all Government contracting agencies shall include in every Government contract hereafter entered into the following provisions:

During the performance of this contract, the contractor agrees as follows:

1. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

2. The contractor will, in all solicitations or advancements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

3. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under Section 202 of Executive Order No. 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

4. The contractor will comply with afl provisions of Executive Order No. 11246 of Sept. 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

5. The contractor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

6. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be cancelled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of Sept. 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

7. The contractor will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order No. 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the contractor may request the United States to enter into such litigation to protect the interests of the United States." [Sec. 202 amended by EO 11375 of Oct. 13, 1967, 32 FR 14303, 3 CFR, 1966-1970 Comp., p. 684, EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 203.

a. Each contractor having a contract containing the provisions prescribed in Section 202 shall file, and shall cause each of his subcontractors to file, Compliance Reports with the contracting agency or the Secretary of Labor as may be directed. Compliance Reports shall be filed within such times and shall contain such information as to the practices, policies, programs, and employment policies, programs, and employment statistics of the contractor and each subcontractor, and shall be in such form, as the Secretary of Labor may prescribe.

b. Bidders or prospective contractors or subcontractors may be required to state whether they have participated in any previous contract subject to the provisions of this Order, or any preceding similar Executive order, and in that event to submit, on behalf of themselves and their proposed subcontractors, Compliance Reports prior to or as an initial part of their bid or negotiation of a contract.

c. Whenever the contractor or subcontractor has a collective bargaining agreement or other contract or understanding with a labor union or an agency referring workers or providing or supervising apprenticeship or training for such workers, the Compliance Report shall include such information as to such labor union's or agency's practices and policies affecting compliance as the Secretary of Labor may prescribe: Provided, That to the extent such information is within the exclusive possession of a labor union or an agency referring workers or providing or supervising apprenticeship or training and such labor union or agency shall refuse to furnish such information to the contractor, the contractor shall so certify to the Secretary of Labor as part of its Compliance Report and shall set forth what efforts he has made to obtain such information.

d. The Secretary of Labor may direct that any bidder or prospective contractor or subcontractor shall submit, as part of his Compliance Report, a statement in writing, signed by an authorized officer or agent on behalf of any labor union or any agency referring workers or providing or supervising apprenticeship or other training, with which the bidder or prospective contractor deals, with supporting information, to the effect that the signer's practices and policies do not discriminate on the grounds of race, color, religion, sex or national origin, and that the signer either will affirmatively cooperate in the implementation of the policy and provisions of this Order or that it consents and agrees that recruitment, employment, and the terms and conditions of employment under the proposed contract shall be in accordance with the purposes and provisions of the order. In the event that the union, or the agency shall refuse to execute such a statement, the Compliance Report shall so certify and set forth what efforts have been made to secure such a statement and such additional factual material as the Secretary of Labor may require.

[Sec. 203 amended by EO 11375 of Oct. 13, 1967, 32 FR 14303, 3 CFR, 1966-1970 Comp., p. 684; EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 204

a. The Secretary of Labor may, when the Secretary deems that special circumstances in the national interest so require, exempt a contracting agency from the requirement of including any or all of the provisions of Section 202 of this **Order** in any specific contract, subcontract, or purchase **order**.

b. The Secretary of Labor may, by rule or regulation, exempt certain classes of contracts, subcontracts, or purchase orders (1) whenever work is to be or has been performed outside the United States and no recruitment of workers within the limits of the United States is involved; (2) for standard commercial supplies or raw materials; (3) involving less than specified amounts of money or specified numbers of workers; or (4) to the extent that they involve

subcontracts below a specified tier.

c. Section 202 of this **Order** shall not apply to a Government contractor or subcontractor that is a religious corporation, association, educational institution, or society, with respect to the employment of individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities. Such contractors and subcontractors are not exempted or excused from complying with the other requirements contained in this **Order**.

d. The Secretary of Labor may also provide, by rule, regulation, or order, for the exemption of facilities of a contractor that are in all respects separate and distinct from activities of the contractor related to the performance of the contract: provided, that such an exemption will not interfere with or impede the effectuation of the purposes of this **Order**: and provided further, that in the absence of such an exemption all facilities shall be covered by the provisions of this **Order**."

[Sec. 204 amended by EO 13279 of Dec. 16, 2002, 67 FR 77141, 3 CFR, 2002 Comp., p. 77141 - 77144]

Subpart C - Powers and Duties of the Secretary of Labor and the Contracting Agencies

SEC. 205. The Secretary of Labor shall be responsible for securing compliance by all Government contractors and subcontractors with this Order and any implementing rules or regulations. All contracting agencies shall comply with the terms of this Order and any implementing rules, regulations, or orders of the Secretary of Labor. Contracting agencies shall cooperate with the Secretary of Labor and shall furnish such information and assistance as the Secretary may require.

[Sec. 205 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 206.

a. The Secretary of Labor may investigate the employment practices of any Government contractor or subcontractor to determine whether or not the contractual provisions specified in Section 202 of this Order have been violated. Such investigation shall be conducted in accordance with the procedures established by the Secretary of Labor.

b. The Secretary of Labor may receive and investigate complaints by employees or prospective employees of a Government contractor or subcontractor which allege discrimination contrary to the contractual provisions specified in Section 202 of this Order.

[Sec. 206 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 207. The Secretary of Labor shall use his/her best efforts, directly and through interested Federal, State, and local agencies, contractors, and all other available instrumentalities to cause any labor union engaged in work under Government contracts or any agency referring workers or providing or supervising apprenticeship or training for or in the course of such work to cooperate in

the implementation of the purposes of this Order. The Secretary of Labor shall, in appropriate cases, notify the Equal Employment Opportunity Commission, the Department of Justice, or other appropriate Federal agencies whenever it has reason to believe that the practices of any such labor organization or agency violate Title VI or Title VII of the Civil Rights Act of 1964 or other provision of Federal law.

[Sec. 207 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 208.

a. The Secretary of Labor, or any agency, officer, or employee in the executive branch of the Government designated by rule, regulation, or order of the Secretary, may hold such hearings, public or private, as the Secretary may deem advisable for compliance, enforcement, or educational purposes.

b. The Secretary of Labor may hold, or cause to be held, hearings in accordance with Subsection of this Section prior to imposing, ordering, or recommending the imposition of penalties and sanctions under this Order. No order for debarment of any contractor from further Government contracts under Section 209(6) shall be made without affording the contractor an opportunity for a hearing.

Subpart D - Sanctions and Penalties

SEC. 209. In accordance with such rules, regulations, or orders as the Secretary of Labor may issue or adopt, the Secretary may:

1. Publish, or cause to be published, the names of contractors or unions which it has concluded have complied or have failed to comply with the provisions of this Order or of the rules, regulations, and orders of the Secretary of Labor.
2. Recommend to the Department of Justice that, in cases in which there is substantial or material violation or the threat of substantial or material violation of the contractual provisions set forth in Section 202 of this Order, appropriate proceedings be brought to enforce those provisions, including the enjoining, within the limitations of applicable law, of organizations, individuals, or groups who prevent directly or indirectly, or seek to prevent directly or indirectly, compliance with the provisions of this Order.

3. Recommend to the Equal Employment Opportunity Commission or the Department of Justice that appropriate proceedings be instituted under Title VII of the Civil Rights Act of 1964.

4. Recommend to the Department of Justice that criminal proceedings be brought for the furnishing of false information to any contracting agency or to the Secretary of Labor as the case may be.

5. After consulting with the contracting agency, direct the contracting agency to cancel, terminate, suspend, or cause to be cancelled, terminated, or suspended, any contract, or any portion or portions thereof, for failure of the contractor or subcontractor to comply with equal

employment opportunity provisions of the contract. Contracts may be cancelled, terminated, or suspended absolutely or continuance of contracts may be conditioned upon a program for future compliance approved by the Secretary of Labor.

6. Provide that any contracting agency shall refrain from entering into further contracts, or extensions or other modifications of existing contracts, with any noncomplying contractor, until such contractor has satisfied the Secretary of Labor that such contractor has established and will carry out personnel and employment policies in compliance with the provisions of this Order.

(b) Pursuant to rules and regulations prescribed by the Secretary of Labor, the Secretary shall make reasonable efforts, within a reasonable time limitation, to secure compliance with the contract provisions of this Order by methods of conference, conciliation, mediation, and persuasion before proceedings shall be instituted under subsection (a)(2) of this Section, or before a contract shall be cancelled or terminated in whole or in part under subsection (a)(5) of this Section.

[Sec. 209 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 210. Whenever the Secretary of Labor makes a determination under Section 209, the Secretary shall promptly notify the appropriate agency. The agency shall take the action directed by the Secretary and shall report the results of the action it has taken to the Secretary of Labor within such time as the Secretary shall specify. If the contracting agency fails to take the action directed within thirty days, the Secretary may take the action directly.

[Sec. 210 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p 230]

SEC. 211. If the Secretary shall so direct, contracting agencies shall not enter into contracts with any bidder or prospective contractor unless the bidder or prospective contractor has satisfactorily complied with the provisions of this Order or submits a program for compliance acceptable to the Secretary of Labor.

[Sec. 211 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 212. When a contract has been cancelled or terminated under Section 209(a)(5) or a contractor has been debarred from further Government contracts under Section 209(a)(6) of this Order, because of noncompliance with the contract provisions specified in Section 202 of this Order, the Secretary of Labor shall promptly notify the Comptroller General of the United States.

[Sec. 212 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

Subpart E - Certificates of Merit

SEC. 213. The Secretary of Labor may provide for issuance of a United States Government Certificate of Merit to employers or labor unions, or other agencies which are or may hereafter be engaged in work under Government contracts, if the Secretary is satisfied that the personnel and employment practices of the employer, or that the personnel, training, apprenticeship, membership,

grievance and representation, upgrading, and other practices and policies of the labor union or other agency conform to the purposes and provisions of this Order.

SEC. 214. Any Certificate of Merit may at any time be suspended or revoked by the Secretary of Labor if the holder thereof, in the judgment of the Secretary, has failed to comply with the provisions of this Order.

SEC. 215. The Secretary of Labor may provide for the exemption of any employer, labor union, or other agency from any reporting requirements imposed under or pursuant to this Order if such employer, labor union, or other agency has been awarded a Certificate of Merit which has not been suspended or revoked.

Part III - Nondiscrimination Provisions in Federally Assisted Construction Contracts

SEC. 301. Each executive department and agency, which administers a program involving Federal financial assistance shall require as a condition for the approval of any grant, contract, loan, insurance, or guarantee thereunder, which may involve a construction contract, that the applicant for Federal assistance undertake and agree to incorporate, or cause to be incorporated, into all construction contracts paid for in whole or in part with funds obtained from the Federal Government or borrowed on the credit of the Federal Government pursuant to such grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, the provisions prescribed for Government contracts by Section 202 of this Order or such modification thereof, preserving in substance the contractor's obligations thereunder, as may be approved by the Secretary of Labor, together with such additional provisions as the Secretary deems appropriate to establish and protect the interest of the United States in the enforcement of those obligations. Each such applicant shall also undertake and agree (1) to assist and cooperate actively with the Secretary of Labor in obtaining the compliance of contractors and subcontractors with those contract provisions and with the rules, regulations and relevant orders of the Secretary, (2) to obtain and to furnish to the Secretary of Labor such information as the Secretary may require for the supervision of such compliance, (3) to carry out sanctions and penalties for violation of such obligations imposed upon contractors and subcontractors by the Secretary of Labor pursuant to Part II, Subpart D, of this Order, and (4) to refrain from entering into any contract subject to this Order, or extension or other modification of such a contract with a contractor debarred from Government contracts under Part II, Subpart D, of this Order.

[Sec. 301 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 302.

a. "Construction contract" as used in this Order means any contract for the construction, rehabilitation, alteration, conversion, extension, or repair of buildings, highways, or other improvements to real property.

b. The provisions of Part II of this Order shall apply to such construction contracts, and for purposes of such application the administering department or agency shall be considered the

contracting agency referred to therein.

c. The term "applicant" as used in this Order means an applicant for Federal assistance or, as determined by agency regulation, other program participant, with respect to whom an application for any grant, contract, loan, insurance, or guarantee is not finally acted upon prior to the effective date of this Part, and it includes such an applicant after he/she becomes a recipient of such Federal assistance.

SEC. 303.

a. The Secretary of Labor shall be responsible for obtaining the compliance of such applicants with their undertakings under this Order. Each administering department and agency is directed to cooperate with the Secretary of Labor and to furnish the Secretary such information and assistance as the Secretary may require in the performance of the Secretary's functions under this Order.

b. In the event an applicant fails and refuses to comply with the applicant's undertakings pursuant to this Order, the Secretary of Labor may, after consulting with the administering department or agency, take any or all of the following actions: (1) direct any administering department or agency to cancel, terminate, or suspend in whole or in part the agreement, contract or other arrangement with such applicant with respect to which the failure or refusal occurred; (2) direct any administering department or agency to refrain from extending any further assistance to the applicant under the program with respect to which the failure or refusal occurred until satisfactory assurance of future compliance has been received by the Secretary of Labor from such applicant; and (3) refer the case to the Department of Justice or the Equal Employment Opportunity Commission for appropriate law enforcement or other proceedings.

c. In no case shall action be taken with respect to an applicant pursuant to clause (1) or (2) of subsection (b) without notice and opportunity for hearing.

[Sec. 303 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 304. Any executive department or agency which imposes by rule, regulation, or order requirements of nondiscrimination in employment, other than requirements imposed pursuant to this Order, may delegate to the Secretary of Labor by agreement such responsibilities with respect to compliance standards, reports, and procedures as would tend to bring the administration of such requirements into conformity with the administration of requirements imposed under this Order: Provided, That actions to effect compliance by recipients of Federal financial assistance with requirements imposed pursuant to Title VI of the Civil Rights Act of 1964 shall be taken in conformity with the procedures and limitations prescribed in Section 602 thereof and the regulations of the administering department or agency issued thereunder.

Part IV - Miscellaneous

SEC. 401. The Secretary of Labor may delegate to any officer, agency, or employee in the Executive branch of the Government, any function or duty of the Secretary under Parts II and III of this Order.

[Sec. 401 amended by EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230]

SEC. 402. The Secretary of Labor shall provide administrative support for the execution of the program known as the "Plans for Progress."

SEC. 403.

a. Executive Orders Nos. 10590 (January 19, 1955), 10722 (August 5, 1957), 10925 (March 6, 1961), 11114 (June 22, 1963), and 11162 (July 28, 1964), are hereby superseded and the President's Committee on Equal Employment Opportunity established by Executive Order No. 10925 is hereby abolished. All records and property in the custody of the Committee shall be transferred to the Office of Personnel Management and the Secretary of Labor, as appropriate.

b. Nothing in this Order shall be deemed to relieve any person of any obligation assumed or imposed under or pursuant to any Executive Order superseded by this Order. All rules, regulations, orders, instructions, designations, and other directives issued by the President's Committee on Equal Employment Opportunity and those issued by the heads of various departments or agencies under or pursuant to any of the Executive orders superseded by this Order, shall, to the extent that they are not inconsistent with this Order, remain in full force and effect unless and until revoked or superseded by appropriate authority. References in such directives to provisions of the superseded orders shall be deemed to be references to the comparable provisions of this Order.

[Sec. 403 amended by EO 12107 of Dec. 28, 1978, 44 FR 1055, 3 CFR, 1978 Comp., p, 264]

SEC. 404. The General Services Administration shall take appropriate action to revise the standard Government contract forms to accord with the provisions of this Order and of the rules and regulations of the Secretary of Labor.

SEC. 405. This Order shall become effective thirty days after the date of this Order.

RFQ 10-22-ENG: CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

Addendum 1: February 2, 2022

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to RFQ 10-22-ENG, Continuing Professional Architectural Services, released on January 15, 2021.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum. Please note, questions are recorded as they are received, including grammar and spelling errors.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation as though it had been issued at the same time, and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The Bid opening remains February 14, 2022 at 3:00 PM.

VENDOR QUESTIONS:

1. Can the City provide a list of Capital Improvement Projects that they anticipate being performed under this professional services agreement?

   Answer: At this time a list of capital improvement projects is not readily available

ALL OTHER AREAS OF THE BID DOCUMENT REMAINS THE SAME

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

AGREEMENT FOR BENTLEY GROUP, INC. (DBA; BENTLEY ARCHITECTS AND ENGINEERS, INC.) CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

THIS AGREEMENT is made and entered into this 28th day of JUNE, 2022, by and between **Bentley Group, Inc. (dba; Bentley Architects and Engineers, Inc.),** duly authorized to conduct business in the State of Florida and whose address is 651 W. Warren Avenue, Suite 200, Longwood, Florida 32750, hereinafter, called "CONSULTANT," and the **CITY OF NEW SMYRNA BEACH**, a political subdivision of the State of Florida, whose address is 210 Sams Ave., New Smyrna Beach, FL, hereinafter called "CITY."

SECTION 1. AGREEMENT. The terms of this Agreement, together with the incorporation of the terms and conditions of the **RFQ 10-22-ENG**, Continuing Professional Architectural Services, **FOR THE CITY OF NEW SMYRNA BEACH** and any exhibits, schedules, and attachments hereto, and any and all amendments relating to same, and any and all submittals from CONSULTANT, constitute the entire Agreement between the individual City and CONSULTANT. This Agreement is the final, complete and exclusive expression of the terms and conditions of the parties' Agreement. Any and all prior agreements, representations, negotiations, and understandings made by the parties, oral or written, expressed or implied, are hereby superseded and merged herein.

SECTION 2. TERM OF AGREEMENT. The initial term of this Agreement shall be for three (3) years from the date of the award. After the initial term, this Agreement shall automatically renew for two (2) optional, automatic, (1) year periods. The maximum term for this Agreement and all renewals is a cumulative term of five (5) years.

SECTION 3. DESCRIPTION OF SERVICES. The Consultant agrees to perform the services outlined in the advertised solicitation document titled **RFQ 10-22-ENG**, Continuing Professional Architectural Services, and in the Consultant's submitted Proposal.

The Consultant shall diligently and in a professional and timely manner perform and provide these services. Unless modified in writing by the parties hereto, the duties of the Consultant shall not be construed to exceed the provision of the services pertaining to this Agreement.

The City and Consultant agree that there may be certain additional services required to be performed by the Consultant during the performance of the contract that cannot be defined sufficiently at the time of execution of this Agreement. These services shall be authorized in writing as an amendment to the contract and may contain additional instructions or provide specifications upon certain aspects of this Agreement pertaining to the work to be undertaken.

SECTION 4. COMPENSATION. For Services rendered, the CITY shall pay the CONSULTANT based on their fee schedule provided. Unless otherwise agreed in a Scope of Services, the CONSULTANT shall invoice the City monthly based upon the CONSULTANT's fees for services completed during the billing period.

Contractor's Initials:

SECTION 5. COMPONENT PARTS OF THE CONTRACT. This Contract consists of the following contract documents, all of which are hereby made a part hereof as if herein set out in full and all of which are familiar to the Contractor:

A. City Advertised Bid
B. Addendums
C. Award Bid Proposal w Fee Proposal
D. Certificate of Insurance

SECTION 6. CONTROLLING LAW, VENUE, AND ATTORNEY'S FEES. This Agreement is to be governed, construed, and interpreted by, through and under the laws of Florida. Venue for any litigation between the parties to this Agreement shall be in the County of Volusia, Florida and any trial shall be non-jury. The prevailing party in any litigation arising from or related to this Agreement shall be reimbursed reasonable attorney fees and costs, including all fees and costs of an appeal.

SECTION 7. RIGHTS AT LAW RETAINED. The rights and remedies of the City, provided for under this Agreement, are in addition and supplemental to any other rights and remedies provided by law.

SECTION 8. NOTICES. Whenever either party desires to give notice unto the other, it must be given by written notice, sent by registered or certified United States mail, return receipts requested, addressed to the party for whom it is intended at the place last specified. The place for giving of notice shall remain such until it shall have been changed by written notice in compliance with the provisions of this Section. For the present, the parties designate the following as the respective places for giving of notice, to-wit:

For City:

Kelly McQuillen, City Clerk
City of New Smyrna Beach
210 Sams Ave.
New Smyrna Beach, FL 32138
(386)410-2637

Bentley Architects and Engineers, Inc

Gary Kranston, RA, VP
(Name, Title)

(Address)

Longwood, Florida, 32750
(City, State, Zip)

(407) 331-6116
(Phone)

Contractor's Initials:

SECTION 9. MODIFICATIONS TO AGREEMENT. This Agreement and any exhibits, amendments and schedules may only be amended, supplemented, modified or canceled by a written instrument duly executed by both parties hereto of equal dignity herewith.

SECTION 10. SEVERABILITY. If during the term of this Agreement, it is found that a specific clause or condition of this Agreement is illegal under federal or state law, the remainder of the Agreement not affected by such a ruling shall remain in force and effect.

SECTION 11. WAIVER OF JURY TRIAL. The City and Consultant have specifically waived the right to a jury trial concerning any disputes which may arise concerning this agreement.

SECTION 12. EFFECT OF FAILURE TO INSIST ON STRICT COMPLAINCE WITH CONDITIONS. The failure of either party to insist on strict performance of any covenant or condition of this contract, or to exercise any option herein contained, shall not be construed as a waiver of such covenant, condition, or option in any other instance. This contract cannot be changed or terminated orally.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the date written above for execution by the City of New Smyrna Beach.

1 INTRODUCTION AND REQUIRED DOCUMENTATION

February 14, 2022

Janet Vivian
Purchasing Coordinator
City of New Smyrna Beach
Submitted via OPENGOV Procurement

SUBJECT: FRQ 10-22-ENG Continuing Professional Architectural Services

Dear Members of the Selection Committee:

Bentley Architects + Engineers, Inc. (Bentley) and our design team proudly submit this proposal to the City of New Smyrna Beach. Our goal is to continue our work with the City in providing the most comprehensive design and cost-effective solutions for the Continuing Professional Architectural Services contract.

Bentley is a Central Florida firm with over 37 years of architectural and engineering design experience. Our in-house services include full architectural design, civil engineering, structural engineering and roadway engineering. The benefit of this multi-disciplinary approach for our clients is that we are more responsive, and our simplified team structure provides a more holistic project design solution with better coordination.

COLLABORATIVE PROCESS Bentley employs an organized and collaborative process that we call Plan/Concept/Develop/Build on all projects. Throughout this project process, our primary objective is to listen and collaborate with you to devise a project solution that satisfies your functional needs and provides you with the best value for your construction dollars. More importantly, we look forward to continuing our relationship with the City of New Smyrna Beach.

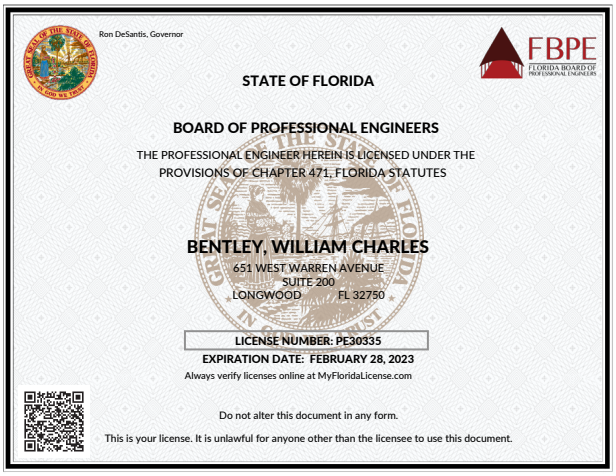
WE HAVE THE EXPERIENCE YOU NEED We look forward to being a valued member of your team by providing you the expertise, commitment and attention to detail that have formed strong foundations with our clients on continuing service contracts. Our team is experienced with municipal design requirements for architecture and civil, structural, mechanical and electrical engineering in addition to working within budgetary constraints and coordination requirements. In 1999, Bentley was awarded its first continuing contract with Seminole County and has since established a history of working with local governments on a continual basis. Over the past 10 years, we have worked with a variety of municipalities and the FDOT on over 60 continuing contracts from our convenient location in Longwood, FL

In 2016, Bentley had the pleasure of being awarded the City of New Smyrna Beach's Continuing Professional Architectural Services contract, and we hope to continue our relationship with the City by providing these services for the next five years. Through our previous contract, we collaborated on the New Smyrna Beach Skate Park project, and we are currently working on the structural foundation remediation for the Women's Club from our convenient office location in Longwood, FL. I personally look forward to bringing over 40 years of experience to this continuing service contract and working with the City on future projects.

Furthermore, our multidisciplinary team approach is a practical way to explore and find the best ideas and solutions in coordination with the City of New Smyrna Beach. Not only are we familiar with continuing service contracts, but as a supplement to our in-house services, we have assembled a team of knowledgeable subconsultants that we have worked with previously.

QUALITY AND BUDGET MATTER Nearly 100% of our work is for public sector local and state agencies whose missions are to build and support strong communities, so we are very accustomed to working within the structure of government contracts. Our detailed Quality and Budget reviews are included in our Plan/Concept/Develop/Build process to ensure that we produce a high-quality, functional, and efficient product that maintains your project budget and schedule targets. We have included **Blue Cord Professional Services (VBE)** to perform budget reviews and cost estimating that will help our team work within budget goals.

OUR TEAM IS EXCITED ABOUT THIS PROJECT In providing creative and flexible design solutions that solve problems and meet current and future needs, we strive to balance function, aesthetics, technology, maintenance and operational costs. To complement our design experience with the City of New Smyrna Beach and numerous government-owned facilities, we have added key subconsultants who possess similar public sector experience. In addition to **Blue Cord Professional Services**, our team will include **Salas O'Brien Engineering** (SOBE) for MEP; **Ramski & Company (WBE)** for Interior Design; **FCM Engineering (VBE)** for LEED Consulting; **NADIC Engineering Services, Inc. (WMBE)** for Geotechnical services; **Zev Cohen & Associates, Inc.** for Landscape Architecture; **Manuel G. Vera and Associates, Inc.. (MBE)** and **Daniel W. Cory Surveyor, LLC** for survey; **RMPK Funding** for Grant Application Preparation; and **Southeastern Archaeological Research, Inc.** for Historical Preservation. The Bentley Team is excited about your project and eager to continue sharing our extensive experience with the City.



WE'RE READY TO START ON THIS PROJECT IMMEDIATELY We are confident that after reviewing our proposal, you will find our team to be highly qualified for your project and professional in delivering the City of New Smyrna Beach high quality work. Our staff is available to begin work immediately. We appreciate the opportunity to present our team's credentials, commitment and similar experience and look forward to working with the City of New Smyrna Beach to deliver projects that exceed your expectations!

Sincerely,
BENTLEY ARCHITECTS + ENGINEERS, INC.

Gary Kranston, RA, LEED AP

Mrs. Jennifer Ramski
Ramski & Company, Inc. DBA Ramski & Company
500 Delaney Avenue
Suite 301
Orlando, FL 32801

Small Business Enterprise (SBE) Certification
Expiration Date: June 30, 2022

Dear Mrs. Ramski:

The Small Business Development Department of the Greater Orlando Aviation Authority (Authority) is pleased to announce that your firm, **Ramski & Company, Inc. DBA Ramski & Company** has been certified as **Small Business Enterprise (SBE)** under the Authority's Small Business Enterprise Policy.

SBE certification is not equivalent and should not be construed as certification under the Authority's Disadvantaged Business Enterprise (DBE) or Airport Concessions Disadvantaged Business Enterprise (ACDBE) Policies promulgated pursuant to the Department of Transportation's regulations, or the Authority's Local Developing Business (LDB), Minority/Women Business Enterprise (M/WBE) or Veteran Business Enterprise (VBE) Policies.

SBE certification is NOT a guarantee of work, but enables the firm to compete for, and perform, contract work on all Authority projects as an **SBE** contractor, sub-contractor, consultant, sub- consultant or material supplier.

Your company's **SBE** certification with the Authority will be effective through **June 30, 2022.** For re-certification at the end of this period you must reapply for SBE certification. Your **renewal application** should be submitted ninety (90) days prior to expiration of your current certification. You may complete your renewal application online at https://goaa.diversitycompliance.com. **Failure to submit your renewal application ninety (90) days in advance of your expiration may result in a lapse in your certification.**

If there is a material change in the firm, including, but not limited to: ownership, officers, directors, scope of work being performed, daily operations, affiliations with other businesses or individuals or physical location of the firm prior to your renewal date you must promptly notify this office in writing. Notification should include supporting documentation.

Congratulations on your **SBE** certification. Please contact our office at 407-825-7133 or certifications@goaa.org if you have any questions or if we can be of any assistance.

Sincerely,

George I. Morning
Director, Small Business Development Department

ANANTH PRASAD, P.E.
SECRETARY

May 1, 2013

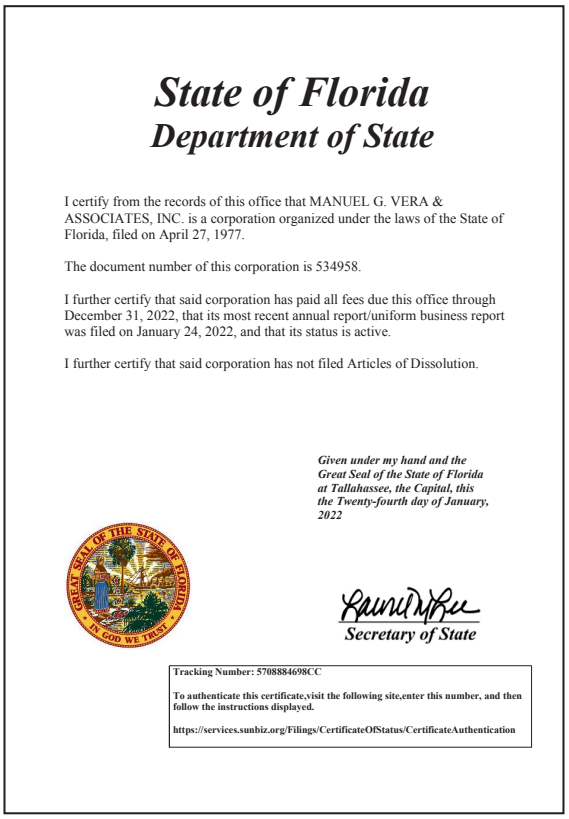
MARIA T VERA
MANUEL G VERA & ASSOCIATES INC
13960 SW 47TH STREET
MIAMI FL 33175-4404

ANNIVERSARY DATE - Annually on December 10

Dear Ms. Vera:

The Florida Department of Transportation (FDOT) is pleased to announce that your firm has been certified under Florida's Unified Certification Program (UCP) as a Disadvantaged Business Enterprise (DBE) **in accordance with 49 Code of Federal Regulation Part 26.**

DBE Certification is continuing, but it is contingent upon the firm maintaining its eligibility annually through this office. You will be notified of your annual responsibilities in advance of the Anniversary Date. You must submit the annual AFFIDAVIT FOR CONTINUING ELIGIBILITY **no later than the** Anniversary Date.



Only firms listed in the UCP DBE Directory are certified by Florida UCP Members. Prime contractors and consultants should verify your firm's DBE certification status, **and identify the work area(s) for which the firm is DBE eligible, through this Directory.**

Your firm will be listed in Florida's UCP DBE Directory which can be accessed through the Department's website: www.dot.state.fl.us/equalopportunityoffice and then selecting "DBE Directory".

DBE certification is not a guarantee of work. It allows your firm to compete for and perform contract work on ALL USDOT Federal Aid (FAA, FTA, and FHWA) projects in Florida as a DBE contractor, sub-contractor, consultant, sub-consultant or material supplier.

If, at any time there is a material change you must advise this office, by sworn affidavit and supporting documents, within thirty (30) days. Changes include, but are not limited to, ownership, officers, directors, management, key personnel,

www.dot.state.fl.us

State of Florida
Department of State

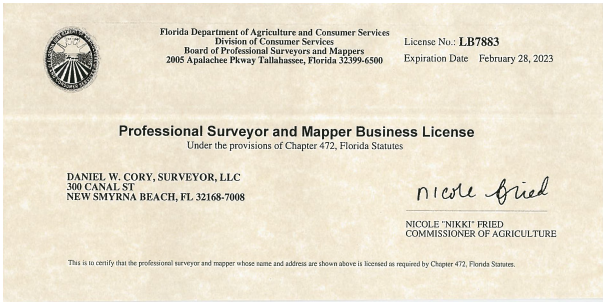
I certify from the records of this office that MANUEL G. VERA & ASSOCIATES, INC. is a corporation organized under the laws of the State of Florida, filed on April 27, 1977.

The document number of this corporation is 534958.

I further certify that said corporation has paid all fees due this office through December 31, 2022, that its most recent annual report/uniform business report was filed on January 24, 2022, and that its status is active.

I further certify that said corporation has not filed Articles of Dissolution.

Given under my hand and the Great Seal of the State of Florida at Tallahassee, the Capital, this the Twenty-fourth day of January, 2022



Secretary of State

SOUTHEASTERN ARCHAEOLOGICAL RESEARCH, INC. CERTIFICATION

State of Florida
Department of State

I certify from the records of this office that SOUTHEASTERN ARCHAEOLOGICAL RESEARCH, INC. is a corporation organized under the laws of the State of Florida, filed on October 11, 1993, effective October 4, 1993.

The document number of this corporation is P93000072718.

I further certify that said corporation has paid all fees due this office through December 31, 2022, that its most recent annual report/uniform business report was filed on January 4, 2022, and that its status is active.

I further certify that said corporation has not filed Articles of Dissolution.

Given under my hand and the Great Seal of the State of Florida at Tallahassee, the Capital, this the Fourth day of January, 2022

Secretary of State

Tracking Number: 4621651363CC

To authenticate this certificate,visit the following site,enter this number, and then follow the instructions displayed.

PROFESSIONAL A&E SERVICES - VARIOUS CITY BUILDINGS

ALTAMONTE SPRINGS, FL

Owner Name:
City of Altamonte Springs

Contact Information:
Steve Falk
Director of Leisure Services
P: 407.571.8733 E: SFalk@altamonte.org

Dates:
2013 - Present; 7 total (2) two year, (1) one year and (4) six month renewals

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Danielle van de Loo, PE, Civil Engineer
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer
Austin Granger, EI, Architect Intern

Other Team Members: Salas O'Brien
Project Status: Ongoing

Project Narrative:
As part of **continuing contract with the City of Altamonte Springs,** Bentley provided architecture and engineering services for various city buildings, including the following projects among many others.

- **Westmonte Park Redevelopment:** The redevelopment included a new multipurpose pool, new community center, new pavilion structures and new outdoor bathrooms building. Site improvements include an expanded parking area, new driveways, park sidewalks, tennis courts, pickle-ball courts, basketball courts and bocce courts. An underground stormwater management system was constructed under the parking and under the multipurpose field.
- **Cranes Roost Park Renovation:** Design included new roadway pavers, reconstruction and widening of park sidewalks, and installation of pavers throughout the Eddie Rose Amphitheater as well as the complete replacement of one of the two boardwalks spanning the Cranes Roost lake and the partial replacement of the other. A floating stage was rehabilitated as part of the project to include a new green room and bathroom facilities within the floating stage.

A&E SERVICES FOR VERTICAL CONSTRUCTION PROJECTS

VOLUSIA COUNTY, FL

Client Name:
County of Volusia

Contact Information:
Laura Laser, AIA
Senior Architect, Volusia County
P: 386.736.5967 x 12323
E: llasser@volusia.org

Dates:
2015 - 2020; (2) two renewals for (1) one year each

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Danielle van de Loo, PE, Civil Engineer
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer
Austin Granger, EI, Architect Intern

Project Status: Completed

Project Narrative:
The following projects are samples of our work under our **continuing contract:**

» **City Island Library:** Bentley provided an assessment of flood control measures for the City Island Library. The project included an assessment of the existing building envelope for anticipated future flood damage threat and potential mitigation methods to reduce the flood threat. Bentley coordinated the work with a marine engineering consultant and various manufacturers for passive flood control assemblies that could remain in place. Following the assessment, Bentley prepared construction documents for replacing the Library's existing doors with permanent glass flood barriers and pedestrian flood doors to minimize water intrusion into the building during flood events.

» **Spruce Creek Water Treatment Plant Reroof:** Bentley worked closely with Volusia County Engineering and Construction to replace an asphalt shingle roof at the end of its useful life on the water treatment plant. The design included new asphalt shingles, fascia, gutters, downspouts and splash blocks. The project faced material challenges and was completed during Covid-19 material shortages in 2021.

SUNTRAX VEHICLE TEST FACILITY - PHASES 1 & 2

POLK COUNTY, FL

Client Name:
Florida's Turnpike Enterprise (FTE)

Contact Information:
Florida's Turnpike Enterprise (FTE)
Josh Pedersen, Design Project Manager
Todd Kelly, Construction Project Manager
P: 407.264.3438; 407.264.3370
E: todd.kelly@dot.state.fl.us

Dates:
2019 - Present

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer
Austin Granger, EI, Architect Intern

Other Team Members: Salas O'Brien, Ramski & Company

Project Status: Under Construction

Project Narrative:

As part of a **continuing contract with Florida's Turnpike Enterprise**, Bentley served as the Architect and Engineer of Record for several new buildings that are part of the SunTrax Test Facility, a large-scale, cutting edge facility dedicated to the research, development and testing of emerging transportation technologies in safe and controlled environments. SunTrax includes a 2.25-mile oval track on a 400-acre site in Polk County designed to support high-speed testing of toll technologies, with multiple lanes and parallel tolled express lanes similar to those being constructed on many current highway widening projects throughout the state.

Phase 1 included Administrative and Warehouse facilities, sitework and toll equipment buildings.

For Phase 2, we served as part of Jacobs' design team to develop the 200-acre infield of the track which is expected to become a hub for automated and connected vehicle testing. Bentley's scope for Phase 2 includes continued partnership with FTE and Florida Polytechnic University as the the Architect and Engineer of record for the maintenance building, central utilities plant, workshops A & B, 8 vehicle support structures and guardhouse.

Slated to be complete by Spring 2022, SunTrax's 200-acre infield will feature various segmented testing environments to aid in the study of tolling technology, intelligent transportation systems and autonomous vehicles.

GAINESVILLE FIRE STATION NO. 1

GAINESVILLE, FL

Client Name:
City of Gainesville

Contact Information:
JoAnne E. Rice, Retired Deputy Fire Chief
P: 352.514.9718; 850.755.7320
E: jerice@cox.net;
joanne.rice@myfloridacfo.com

Dates:
Completed 2018

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer

Other Team Members: Salas O'Brien, Ramski & Company, FCM Engineering

Project Status: Completed

Project Narrative:
The scope of this project included the design, permitting and construction administration for a **new fire station** for the City of Gainesville. The station includes typical fire station living quarters and operational offices, training room, 5 drive-thru apparatus bays and associated support spaces for laundry, equipment repair and storage functions, and various features to facilitate training. In addition to the fire station operational functions, this facility also serves as administrative **headquarters**, and includes offices for the Fire Chief, Deputy and Assistant Chiefs, fire inspectors and investigator and administrative support personnel, as well as conference and other support spaces. The fire station is a category IV emergency facility designed to resist a 135 MPH ultimate wind speed. Bentley master planned the 1.5 acre urban site that includes on-site stormwater retainage. Salas O'Brien designed the back-up generator with on-board fuel storage and automatic start. Ramski & Company designed the interior spaces. **Firehouse awarded the project the Career 1 Notable Award.**

FIREHOUSE SDA Station Design Awards

CASSELBERRY PUBLIC WORKS FACILITY

CASSELBERRY, FL

Client Name:
City of Casselberry

Contact Information:
Mark D. Gisclar
Public Works Director
P: 407.262.7725 x 1234
E: mgisclar@casselberry.org

Dates:
2019 - Present

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer

Other Team Members: Salas O'Brien

Project Status: Under Construction

Project Narrative:
The Project consists of the phased demolition and renovation of the City's existing Public Works Facility to include a new Administration/Workshop Building, a Fleet Maintenance Building, a Chemical Storage Building and Covered Equipment Parking. In addition, the site will be developed to include new paved parking areas and driveways, emergency generator, dumpster enclosure, perimeter fence with sliding gate, and all necessary site and building utilities and infrastructure. Work also includes replacing the existing radio antenna and re-locating the existing 11,000 gallon above ground fuel tank and pumps.

This CMAR project included the conceptualization, planning, design and construction administration. The new facilities were constructed on the City's existing public works facility site and constant coordination between the City and the contractor was critical to ensure all construction activities did not impact the operations of the existing site. The project included a 33,000 SF Administration Building and a 16,000 SF Fleet Maintenance Building, both of which were designed as concrete tilt wall structures. Additionally, there was a covered parking area, retaining wall and relocation of the existing refueling facility.

37 YEARS AND COUNTING

Bentley's knowledge and experience with municipalities and continuing contracts are extensive and relevant. Bentley is currently celebrating 37 years of business in Florida and has been known as Bentley Architects + Engineers, Inc. since 1991. We were rooted in quality from the very beginning when founded by William C. Bentley, PE in 1984 with the first office located in Orlando, Florida. The firm, known then as Bentley Engineering, Inc., focused on structural engineering but quickly found that by adding civil engineering services, Bentley could better facilitate the engineering process for clients, something that earned his company high praise. After nearly a year of providing exclusively engineering services, Bill responded to clients' requests to add architectural services.

Looking to branch out into the public sector, in 1988, Bentley was awarded its first public project by the Florida Department of Transportation and completed the design of four rest area renovations. This started a new project niche for the Company, and Bentley began specializing in transportation and other public type facilities, including community centers, education facilities, fire stations, law enforcement facilities, maintenance/operations facilities and administrative buildings.

In 1999, Bentley further expanded its involvement in the public sector with the award of a continuing contract for Seminole County. Since then, Bentley has worked with a variety of municipalities on continuing contracts, completing various design projects, such as the Westmonte Park Redevelopment and Cranes Roost Improvements with the City of Altamonte Springs and the City Island Library and Spruce Creek Water Treatment Plant Reroof with Volusia County.

Bentley In-House Services

ARCHITECTURE Our architectural department is dedicated to providing individualized solutions and high quality design services. As exemplified by our varied project portfolio, our team enjoys the opportunity to develop fresh designs that fit the needs and goals of our clients.

BENTLEY SERVICES INCLUDE

Architectural Design
Structural Engineering
Civil Engineering
Transportation Engineering
Permitting
Master Planning
Prototype Design
Space Planning
Construction Administration

City of Altamonte Springs - Westmonte Park Redevelopment and Cranes Roost Improvements
Volusia County - Spruce Creek WTP Reroof

2 EXPERIENCE AND QUALIFICATIONS

STRUCTURAL ENGINEERING The structural staff at Bentley strives to stay on the cutting edge of building materials and methods to offer a full range of design options for our clients. We work with virtually every building material available, from masonry to concrete, steel to aluminum, wood to composites.

CIVIL ENGINEERING Bentley's combination of design skills and extensive construction experience allows us to provide solutions to the most complex Civil Engineering projects. Our team is abreast of the latest design and industry standards and produces accurate, reliable, innovative and cost-effective engineering services for a wide variety of projects.

TRANSPORTATION Bentley's Transportation team provides new roadway engineering and design services as well as widening, resurfacing, restoration, rehabilitation and safety improvement engineering.

Over the course of 37 years, Bentley's in-house services have expanded to provide a robust professional team for specialty projects, offering streamlined design and ingenuity.

FIRM CAPABILITIES

Founded in 1984, Bentley sought to meet clients' needs by offering a variety of services in-house, resulting in streamlined communication and a cohesive design process from start to finish. These services have led to the successful design of many municipal projects on a continuing basis.

SIZE AND STAFFING

The successful completion of any project depends upon the experience and capabilities of the personnel assigned to the project. We have developed a team with unequaled experience in municipal buildings and parks and recreation. Together, we bring specific architectural and engineering knowledge in the latest park and community center design, including innovative trends, programming, permitting, bidding and construction administration - critical elements to any project for the City of New Smyrna Beach.

Gary is a Vice President with the firm and manages the Architecture Department of Bentley. Gary has 40 years of professional experience in architectural programming, planning, design and construction administration and strives to provide clients with appealing design solutions that are durable and cost-effective. He is the lead Architect in the project design and construction documents development process. Gary's portfolio includes rest areas, fire stations, park facilities, warehouses and fleet facilities. He has also served as LEED administrator for numerous projects.

RELEVANT PROJECT EXPERIENCE

Altamonte Springs Continuing Architectural/Engineering Services (2013-Present). *Project Manager.* Architectural Project Manager for a continuing AE contract with the City of Altamonte Springs. Bentley provides architectural design, civil engineering and structural engineering for the City's facilities, including parks and recreational facilities. Projects issued under this contract include:

Westmonte Park Redevelopment-Architectural. *Project Architect.* Project Architect responsible for the design and preparation of construction documents for the redevelopment of Westmonte Park. Redevelopment of the community park includes a new multipurpose pool, new community center, new pavilion structures and new outdoor bathrooms building. Site improvements include an expanded parking area, new driveways, park sidewalks, tennis courts, pickle-ball courts, basketball courts and bocce courts. An underground stormwater management system will be constructed under the parking and under the multipurpose field.

Cranes Roost Park Renovation-Architectural. *Project Manager.* Project Manager responsible for the design and preparation of construction documents for the reconstruction of Cranes Roost Park. Bentley's scope included the reconstruction of Cranes Roost Blvd. with new roadway pavers, reconstruction and widening of park sidewalks, and installation of pavers throughout the Eddie Rose Amphitheater. Reconstruction design also included the complete replacement of one of the two boardwalks spanning the Cranes Roost lake and the partial replacement of the other. A floating stage was rehabilitated as part of the project to include a new green room and bathroom facilities within the floating stage.

GARY KRANSTON, RA, LEED AP

VICE PRESIDENT OF ARCHITECTURE

Eastmonte Park Concessions Building- Architectural. *Project Manager*. A new building was designed and constructed on the same pad and includes the following functions: offices, concession area and concession storage; supply storage, men and women's restrooms, family restroom and mechanical/janitor rooms. Civil Engineering included new utility services, flood plain compensating storage and master planning for future redevelopment of the park.

Volusia County Professional Architectural and Engineering Services for Vertical Construction Projects (2015-2020). *Project Manager*. Project Manager for a continuing AE contract with Volusia County. Bentley provides architectural design, civil engineering and structural engineering for the County's facilities. A sampling of projects issued under this contract include the following:

City Island Library. *Project Manager*. Bentley provided an assessment of flood control measures for the City Island Library. The project included an assessment of the existing building envelope for anticipated future flood damage threat and potential mitigation methods to reduce the flood threat. Bentley coordinated the work with a marine engineering consultant and various manufacturers for passive flood control assemblies that could remain in place. Following the assessment, Bentley prepared construction documents for replacing the Library's existing doors with permanent glass flood barriers and pedestrian flood doors to minimize water intrusion into the building during flood events.

Spruce Creek Water Treatment Plant Reroof. *Project Manager*. Bentley worked closely with Volusia County Engineering and Construction to replace an asphalt shingle roof at the end of its useful life on the water treatment plant. The design included new asphalt shingles, fascia, gutters, downspouts and splash blocks. The project faced material challenges and was completed during Covid-19 material shortages in 2021.

SunTrax Test Facility Phases 1 & 2. *Architect of Record*. Bentley is the Architect and Engineer of record for several new buildings that will be part of the SunTrax Infield. SunTrax is a large-scale, cutting-edge facility dedicated to the research, development and testing of emerging transportation technologies in safe and controlled environments. These buildings include a shipping/receiving/warehouse/shop; shared services building; guardhouse and several remote services buildings.

Gainesville Fire Station No. 1, Gainesville, Florida. *Project Manager and Architect of Record.* The scope of this project included the design, permitting and construction administration for a new fire station for the City of Gainesville. the station includes typical fire station living quarters and operational offices, training room, 5 drive-thru apparatus bays, and associated support spaces for laundry, equipment repair and storage functions and various features to facilitate training. In addition to the fire station operational functions, this facility also serves as administrative headquarters and includes offices for the fire chief, deputy and assistant chiefs, fire inspectors and investigator and administrative support personnel as well as conference and other support spaces.

Public Works Facility, Casselberry, Florida. *Project Manager and Architect of Record. CM at Risk Delivery.* Project Manager and Architect of Record for the City's new Public Works Complex which is being reconstructed on the existing Public Works Site.

Westmonte Park Redevelopment. *Project Manager* Project Manager responsible for the design, preparation of construction documents, quality assurance, post design construction administration and project closeout for the complete redevelopment of Westmonte Park. Redevelopment of the community park included a new multipurpose pool, new community center, new pavilion structures and new outdoor bathrooms building. Site improvements include an expanded and zoned parking facility, park sidewalks, tennis courts, pickle-ball courts, basketball courts, bocce courts and playground. An underground stormwater management system was constructed under the parking and under the multipurpose field to maximize the land use.

Eastmonte Park Concessions Building. *Engineer of Record.* Responsible for the civil engineering design, plans preparation, permit administration, post design site construction administration and project closeout for a new park office, restroom and concession building. The civil engineering design included new utility services, utility main extensions, grading and drainage, erosion control, flood plain compensating storage and master planning for future redevelopment of the park.

MOLLY DEVIVERO, PE

SR. VICE PRESIDENT

Eastmonte Park Training Center Improvements *Project Manager/Engineer of Record.* Project Manager and engineer of record responsible for the design, preparation of construction documents, quality assurance, post design construction administration and project closeout for improvements to Ball Fields #1, #2 and #5. The improvement included synthetic turf installation for ball fields #1 and #2, new press box and new field netting.

Cranes Roost Park Roadway and Pedestrian Improvements, City of Altamonte Springs, Florida. *Project Manager.* Engineer of record for design and preparation of construction documents. Bentley's scope included the reconstruction of Cranes Roost Blvd. with new roadway pavers, reconstruction and widening of park sidewalks, and installation of pavers throughout the Eddie Rose Amphitheater. Reconstruction design also included the complete replacement of one of the two boardwalks spanning the Cranes Roost Lake and the partial replacement of the other. A floating stage was rehabilitated as part of the project to include a new green room and bathroom facilities within the floating stage. New water fountains and benches were installed throughout the park.

Volusia County Professional Architectural and Engineering Services for Vertical Construction Projects. *Task Work Order Project Manager.* Engineer of Record for a continuing AE contract with Volusia County. Bentley provides architectural design, civil engineering and structural engineering for the County's facilities. A sampling of projects issued under this contract include the following:

Volusia County Courthouse Annex, Ramp Renovation, Daytona Beach, FL. *Task Work Order Project Manager.* Bentley worked closely with Volusia County to renovate the Courthouse Annex access ramp. This was done to ease the access into the courthouse by replacing the existing stairs with a ramp. The project included design, structural calculations, plans production and quality control for all elements on the project.

Winter Springs Continuing Professional Engineering Services. *Contract Administrator and Task Work Oder Project Manager.* Responsibilities include providing task work order project management, conceptual design, design development, Quality Assurance, engineering cost estimating, permit administration and post design construction administration on a variety of professional services, including general civil engineering design for the City's projects.

Edgewater Continuing Professional Engineering Services. *Contract Administrator and Task Work Order Project Manager.* Responsibilities include providing task work order project management, conceptual design, design development, Quality Assurance, engineering cost estimating, permit administration and post design construction administration on a variety of professional services, including general civil engineering design for the City's projects.

Natural Lands Enhancements, Seminole County, FL. *Civil Engineer.* Bentley provided civil, structural and architectural design services for enhancements to Black Bear, Lake Harney, and Geneva Wilderness Areas for Seminole County. The improvements included ADA boardwalks, a fishing pier, overlook and a 1,700SF educational pavilion with restrooms and seating for 50 students.

SunTrax Test Facility Phases 1 and 2, Florida's Turnpike Enterprise, Polk County, Florida. *Project Manager and Civil Engineer of Record.* Civil engineering scope of services included utility main design, plans preparation and permitting; drainage conveyance system design; passenger and test vehicle parking, storage, refueling and maintenance facilities; and toll test facilities. As one of Bentley's Project Managers and one of the Civil Engineers of Record, Molly provided design, design supervision and quality assurance review for the plans preparation. Phase 2 encompasses the design of several sites and buildings that include a shipping/receiving/warehouse/shop; shared services building; guardhouse and several remote services Buildings.

Casselberry Public Works Facility, Casselberry, Florida. *Civil Engineer of Record. Quality Assurance Reviewer. Quality assurance reviewer* for the City's new Public Works Complex which is being reconstructed on the existing Public Works Site.

Danielle complements the Bentley Engineering Department with more than 15 years of experience in the field of Civil Engineering. Her work experience includes project management, infrastructure design, technical notebook preparation, construction plan preparation and agency permitting for commercial, industrial, and residential projects ranging from ½ acre to 2,000+ acres in size. This includes client, planning, legal, agency, subconsultant and contractor coordination from land selection to project construction closeout. Danielle has effectively managed, designed and closed out more than 20 projects in the last 5 years across Central Florida.

Danielle is proficient in producing both master and site-specific stormwater management designs that include water quality calculations, pollutant loading calculations, water quantity (attenuation) calculations, recovery calculations, dewatering calculations, floodplain establishment, floodplain encroachment and compensating storage calculations, cut/fill calculations, environmental coordination (wetlands & protected species), mass grading plans, construction plans, and stormwater pollution prevention plans.

Danielle is proficient in producing both master and site-specific utility designs that include demand calculations, fire flow calculations, irrigation calculations, lift station calculations, pump selection, project specific utility sizing and layout, agency master sizing coordination for transmission mains greater than 20-inches, dry utility design layout coordination, and construction plans.

RELEVANT PROJECT EXPERIENCE
Altamonte Springs Continuing Architectural/Engineering Services (2013-Present). *Civil Engineer.* Civil Engineer for a continuing AE contract with the City of Altamonte Springs. Bentley provides architectural design, civil engineering and structural engineering for the City's facilities, including parks and recreation facilities. Danielle is working on the Eastmonte Park Field 7 and Restroom Revisions project.

Volusia County Professional Architectural and Engineering Services for Vertical Construction Projects (2015-2020). *Civil Engineer.* Civil Engineer for a continuing AE contract with Volusia County. Bentley provides architectural design, civil engineering and structural engineering for the County's facilities. Danielle has been involved with the Annex Building Site Modifications in New Smyrna Beach, Facilities Parking Canopy, Fire Station 13 and Animal Services projects.

Carlos is a registered Florida Professional Engineer with 15 years of design and permitting experience in Florida and Puerto Rico. His work experience includes land development design, toll facility design, roadway design, stormwater management design, drainage design, utility design, technical report preparation, construction documents preparation, erosion control design and agency permitting for public, commercial, industrial and residential projects.

Carlos has prepared numerous utility system design calculations for water demands, wastewater discharges, fire flows, lift stations. Carlos has also designed and prepared master planning and construction documents for private and public water and sewer systems.

Carlos is proficient in stormwater management designs that include water attenuation, recovery, and pollutant loading calculations. He has prepared floodplain establishment, floodplain encroachments, and compensation storage calculations. Carlos has also prepared mass grading plans, cut/fill calculations, construction plans and stormwater pollution prevention plans.

RELEVANT PROJECT EXPERIENCE

Altamonte Springs Continuing Architectural/Engineering Services (2013-Present). *Civil Engineer.* Civil Engineer for a continuing AE contract with the City of Altamonte Springs. QUALIFICATIONS
Brenton complements the Bentley Structural Department with 14 years of experience in the field of Structural Engineering and Project Management. Brenton's responsibilities as Structural Engineer include progressions of projects from preliminary design final design, construction administration and quality control. Brenton's work experience includes designs for commercial buildings, industrial facilities, municipalities and various transportation agencies, including Florida's Turnpike Enterprise, Florida Department of Transportation and Pennsylvania Department of Transportation. Brenton also has bridge design experience, ranging from small simple box culvert structures to long span complex steel and concrete structures, along with several years of commercial and industrial projects. His experience has given him the opportunity to work with several different foundation types ranging from spread footings to drilled shafts to driven H-piles.

RELEVANT PROJECT EXPERIENCE
Altamonte Springs Continuing Architectural/Engineering Services (2013-Present). *Structural Engineer.* Structural Engineer for a continuing AE contract with the City of Altamonte Springs. Bentley provides architectural design, civil engineering and structural engineering for the City's facilities, including parks and recreational facilities. A sampling of projects issued under this contract include the following:

Westmonte Park Redevelopment, Altamonte Springs, FL. *Structural Engineer.* The intent of this project was for Bentley to provide the design and preparation of construction documents for the redevelopment of Westmonte Park. Redevelopment of the community park included a new multipurpose pool, new community center, new pavilion structures and new outdoor bathrooms building. Site improvements include an expanded parking area, new driveways, park sidewalks, tennis courts, pickle-ball courts, basketball courts and bocce courts. The project included an underground stormwater management system to be constructed under the parking and under the multipurpose field. Brenton served as Structural Engineer of Record for all vertical structures, retaining walls, miscellaneous structures and special foundation designs where needed to avoid conflicts.

Cranes Roost Park Improvements, City of Altamonte Springs, FL. *Structural Quality Reviewer. CM at Risk Delivery.* Structural Engineer quality review of the design and detailing of improvements to the boardwalks overlooks and floating stage at Cranes Roost Park. Bentley's scope of services includes Boardwalk Deck Replacement; Joist Repair/Replacement; Beam Repair/Replacement; Pile Rehabilitation for West Boardwalk and East Overlook and Handrail Replacement.

BRENTON DAILY, PE

VICE PRESIDENT OF STRUCTURAL ENGINEERING / PROJECT MANAGER

Volusia County Professional Architectural and Engineering Services for Vertical Construction Projects (2015-2020). *Structural Engineer.* Structural Engineer for a continuing AE contract with Volusia County. Bentley provides architectural design, civil engineering and structural engineering for the County's facilities. A sampling of projects issued under this contract include the following:

Volusia County Sherriff's Office, Hangar Door Replacement, Debary, FL. *Structural Engineer and Project Manager.* Bentley worked closely with Volusia County and the Sherriff's Office to replace the existing doors at the Sherriff's Hangar as the existing doors were difficult to work with and not inducive to an emergency facility. Bentley coordinated with different vendors to determine the best door for the county and prepared construction documents for the work.

Volusia County Courthouse Annex, Ramp Renovation, Daytona Beach, FL. *Structural Engineer of Record.* Bentley worked closely with Volusia County to renovate the Courthouse Annex access ramp. This was done to ease the access into the courthouse by replacing the existing stairs with a ramp. The project included design, structural calculations, plans production and quality control for all elements on the project.

Volusia County Sheriff's Office, Stair Replacement, Daytona Beach, FL. *Structural Engineer of Record.* Bentley worked closely with Volusia County to design and replace the existing metal stairs at the rear of the multilevel building. Existing stairs were in poor condition and needed to be replaced for the safety of all the employees working in the building. The design includes new stairs and guardrails, handrails, new canopy roof and concrete repairs. The project included design, structural calculations, plans production and quality control for all elements on the project.

SunTrax Test Facility Phases 1 & 2 (Continuing Contract). *Structural Engineer.* Bentley is the Architect and Engineer of record for several new buildings that will be part of the SunTrax Infield. SunTrax is a large-scale, cutting-edge facility dedicated to the research, development, and testing of emerging transportation technologies in safe and controlled environments. These buildings include a shipping/receiving/warehouse/shop; shared services building; guardhouse and several remote services buildings.

Gainesville Fire Station No. 1, Gainesville, FL. *Structural Engineer.* The scope of this project included the design, permitting and construction administration of a new fire station for the City of Gainesville. The station includes typical fire station living quarters and operational offices, training room, five drive-thru apparatus bays and associated support spaces for laundry, equipment repair, storage functions and various features to facilitate training. In addition to the fire station operational functions, this facility also serves as administrative headquarters and includes offices for the fire chief, deputy and assistant chiefs, fire inspectors and investigators and administrative support personnel as well as conference and other support spaces. The fire station is a category IV emergency facility designed to resist a 135mph ultimate wind speed. Bentley master planned the 1.5-acre urban site that includes on-site stormwater retainage. Brenton served as the structural EOR for the vertical structures and site retaining walls and miscellaneous structures.

Casselberry Public Works Facility, Casselberry, FL. *Structural Engineer.* This project was to conceptualize, design and provide construction administration for this CMAR project. The new facilities were constructed on the City's existing public works facility, and it was critical to coordinate with the City and the contractor to ensure all existing activities could continue safely during construction. The vertical structures included a 30,000 SF Administrative Building, a 16,000 SF Fleet Maintenance Building, a Pre-Engineered Metal Building covered parking area and a retaining wall. Brenton served as the Structural Engineer of Record for all elements on the project.

MEET THE REST OF YOUR TEAM

Anticipated frequency of use will be dependent on quantity and scope of task work orders.

SALAS O'BRIEN ENGINEERING, INC.

- **Services:** MEP
- **Firm Location:** Orlando, FL
- **About:** Salas O'Brien has vast experience with mechanical/ electrical design for public safety facilities. Bentley and Salas O'Brien have successfully completed **more than 200 projects** as a team, including Florida's Turnpike Enterprise SunTrax Test Facility and the Casselberry Public Works Complex.

RAMSKI & COMPANY

- **Services:** Interior Design
- **Firm Location:** Orlando, FL
- **About:** Ramski & Company is an **WBE firm** with demonstrated experience providing space planning, interior design and furniture specification for public safety facilities. Ramski completed interior design for Gainesville Fire Station No. 1 and Kissimmee Fire Station No. 11, designed by Bentley. Other notable projects that Bentley and Ramski have worked on as a team include Florida's Turnpike Enterprise SunTrax Test Facility and the Casselberry Public Works Complex.

BLUE CORD PROFESSIONAL SERVICES

- **Services:** Cost Estimating
- **Firm Location:** Orlando, FL
- **About:** A **VBE firm**, Blue Cord is a professional Construction Consulting and Project Management firm that provides superior construction consultancy solutions essential to the success of their clients' projects. Their understanding of technical issues inherent in construction projects allows them to help clients navigate critical and complex issues by providing real-world, cost-effective solutions.

FCM ENGINEERING

- **Services:** LEED Consulting
- **Firm Location:** Maitland, FL
- **About:** A **VBE firm**, FCM Engineering provides consulting services dedicated to sustainable buildings and construction, whether the buildings are new or existing. They have experience with the USGBC's LEED rating system, GBI's Green Globes systems, EPA's Energy Star certification for buildings and the Florida Green Building Coalition's rating system.

NADIC ENGINEERING SERVICES, INC.

- **Services:** Geotechnical Engineering
- **Firm Location:** Orlando, FL
- **About:** Established in 2001, NADIC is **an MBE** and **WBE firm** that has provided client-focused professional services in Geotechnical, Geo-Environmental, Construction Materials Testing and Inspection, Quality Control and Assurance services. They frequently work with municipalities in identifying the most pragmatic solutions at all stages of projects.

ZEV COHEN & ASSOCIATES, INC.

- **Services:** Landscape Architecture
- **Firm Location:** Ormond Beach, FL
- **About:** Zev Cohen has worked in the public sector on a diverse range of assignments. Their Landscape Architecture services include urban design, landscape design, hardscape design, 3D graphics and rendering, concept design and recreation facility design.

M.G. VERA & ASSOCIATES

- **Services:** Survey
- **Firm Location:** Jupiter, FL
- **About:** M.G. Vera & Associates provides a full range of survey sevices. The company has provided design survey and right of way mapping services to the Central and South Florida areas for over 40 years, working with a variety of municipalities, public and private entities. M.G. Vera & Associates is certified as DBE by the FDOT and has worked with us on a District 5 Roadway Continuing Services Contract and various FODT Turnpike service plaza projects.

DANIEL W. CORY SURVEYOR, LLC

- **Services:** Survey
- **Firm Location:** New Smyrna Beach, FL
- **About:** Local to New Smyrna Beach, Daniel W. Cory Surveyor, LLC teamed with Bentley on our past continuing contract with the City. The firm has been in business for over 50 years and has an array of experience in surveying, including As-Built, Boundary, Construction Layout, Control, Hydrographic, Mean High Water Line, Quantity, Record, Specific Purpose and Topographic. They are also adept in preparing Sketch of Descriptions for the purposes of easement description, Sovereign Submerged Land Lease, Public Easements, etc.

RMPK FUNDING

- **Services:** Grant Applications
- **Firm Location:** Jupiter, FL
- **About:** RMPK Funding assists local governments with obtaining funding for a wide range of capital improvement projects.

SOUTHEASTERN ARCHAEOLOGICAL RESEARCH, INC.

- **Services:** Historic Preservation
- **Firm Location:** Orlando, FL
- **About:** SEARCH is an archaeology firm that deploys the full spectrum of cultural heritage services worldwide.

Utilities Commission New Smyrna Beach (UCNSB) Facility Assessments, New Smyrna Beach, Florida

- This *continuing engineering services* task work order included the facility assessment of twelve (12) facilities owned and operated by UCNSB. Facility types assessed included administrative, pumping, electrical substation, and SCADA monitoring and control type buildings. Assessments included summary and photo documentation of existing equipment, analysis of equipment condition, recommendation of remaining useful life, and opinions of probable construction costs for replacement.

Seminole County Library North Branch ADA Restroom Renovation, Sanford, Florida

- This *continuing services task work* order included the complete renovation of the library's existing Men's and Women's restrooms to bring them into ADA compliance. In addition to all new interior finishes, new lighting, new fire alarm devices, new plumbing fixtures in a new layout configuration to meet ADA clearances, and new ceiling supply and exhaust air devices were specified.

Utilities Commission New Smyrna Beach (UCNSB) Facility Fencing Assessments, New Smyrna Beach, Florida

- This *continuing engineering services* task work order included the assessment of existing protective fencing surrounding UCNSB owned and operated Water pumping stations and well heads, Wastewater lift stations, electric substations, and the Water Reclamation Facility. Approximately ninety (90) locations were surveyed. Assessment included photo documentation of fencing, analysis of condition, recommendation of remaining useful life, and opinions of probable construction costs for replacement.

City of Oviedo Regional Stormwater Park, Oviedo, Florida

- This *continuing services* task work order included a new restroom pavilion with Men's, Women's and janitor storage areas as well as lighted walkways and lighted boardwalks around a new stormwater park in downtown Oviedo. The restroom pavilion connected to an open-air pavilion for public gatherings. Site power was specified from the pavilion building for food truck vendor use for this downtown destination.

SALASO'BRIEN

ADAM S. LEVINE, P.E.

PRINCIPAL, SENIOR ELECTRICAL ENGINEER – SALAS O'BRIEN FLORIDA

Mr. Levine is a Senior Electrical Engineer and Project Manager who provides design and safety engineering for facilities. He has over 16 years of experience in assessments, commissioning of electrical systems, construction management and safety analysis. He has extensive experience in public safety projects including fire stations and public safety projects including fire stations and police facilities.

Get To Know Doug

Mr. Brown joined Ramski & Company in 1995. He is majorly responsible for the firm's attention to detail, excellent documentation, superior construction administration and optimized, timeless design solutions. Doug has completed and participated in design for all our major transportation, utilities, and civic projects including Gainesville Regional Utilities, Palm Beach International Airport renovation, City of Orlando Citrus Bowl rebuild, the Orlando International Airport North Terminal Airside 4 renovation, the South Terminal ITF complex and the new South Terminal Phase I project.

Ramski & Company

Project Experience

- **Orange County Utilities Operations Center East,** Orlando, FL - New construction, interior design and furniture concepts, 60,000 SF, $14.5M construction cost
- **Orange County Multi-Cultural Community Center,** Orlando, FL - 12,000 SF. Interior design for new community center. Building is comprised of conference rooms, computer lab, community gallery, and a large multi-purpose space for hosting social events.
- **Rosemont Community Center,** Orlando, FL - 2,500 SF, $3.4M construction cost. New construction, interior design and furniture selection.
- **Bentley Architects + Engineers,** Longwood, FL - 9,197 SF. Offices of Bentley Architects in their new building. Voted one of OBJ's coolest offices in 2016 Performed in association with Bentley Architects + Engineers.
- **Kissimmee Fire Station #11,** Kissimmee, FL - 16,291 SF, $4.3M construction cost. New construction, full service interior design and furniture services. Performed in association with Bentley Architects + Engineers.
- **Gainesville Regional Utilities Eastside Operations Center,** Gainesville, FL - 222,172 SF, $54M construction cost. New construction, full service interior design and furniture services. Performed in association with Bentley Architects + Engineers.
- **Camping World Stadium,** Orlando, FL, 40,000 SF, $207M construction cost. Renovations and additions, full service interior design and construction administration with HNTB for the City of Orlando and Orlando Sports.
- **UCF Roth Athletic Center,** Orlando, FL - 50,000 SF, $7M construction cost. New construction, design concept with development of materials palette, furniture selection and specification of furniture.
- **Orlando International Airport, New South Terminal,** Orlando, FL - 2,700,000 SF, $2.2B construction cost. Doug is managing our partnership with HNTB, AOR to document the design Phase 1.

Marketa Hollingsworth, NCIDQ

Role: Interior Designer

- Masters of Architecture, Florida A&M University
- Bachelor of Science in Architecture, Florida A&M University
- Years of Experience: 9 years
- NCIDQ, 2019
- LEED AP
- Organizations: IIDA

Get To Know Marketa

Mrs. Hollingsworth joined our studio with a desire to apply her architectural education to an interiors specialty. She immediately became an important asset on two of the studio's aviation projects, the Greater Orlando Aviation Authority's North Terminal Airside 4 renovation and the new South Terminal Intermodal Terminal Facility (ITF) and Automated People Mover (APM). Marketa has also completed numerous renovations for Lockheed Martin, Orange County Convention Center, and multiple municipalities.

Marketa is a native of Winter Park and has served on the Hannibal Square Community Land Trust Board of Directors and taught as an adjunct teacher for Revit instruction at Seminole State College.

Project Experience

- **Orlando Utilities Commission,** Orlando Utilities Commission,St. Cloud, FL – The campus plan for OUC includes a new 50,070 SF low rise office building (with an additional 40,000 SF future building) on a 27 acre wooded site. An elevated walkway connects OUC to a fleet (22,379 SF) and warehouse (55,734 SF) building (currently Phase 1). Campus standards are being developed and applied as appropriate in Phase 1.
- **Orlando International Airport, New South Terminal,** Orlando, FL - 2,700,000 SF/$2.2B construction cost, landside, airside, ground transportation facility and garage portals
- **Clermont Public Works,** Clermont, FL - 23,833 SF flee warehouse, 8,653 SF Administration Building. Select and specify furnishings, furniture planning, budgeting selections and specifications for purchase by the County.
- **Orlando International Airport South Terminal Intermodal Transit Facility,** Orlando, FL - 1,300,000 SF/$470M construction cost, performed full service interior design, furniture specification and constructio administration, LEED V4
- **DOT SunTrax Test Facility Phase I,** Auburndale, FL - 11,700 SF, $2.7M construction cost, performed interio design and furniture specification services for this SunTrax Test Facility Administration Center.
- **Orlando International Airport Airside 4 Renovation,** Orlando, FL - 115,788 SF, $64M construction cost. A phased (16) occupied renovation of a secured environment, coordinating full service interior design and construction administration - duration 4 years.

John Hoibraten, Jr., LEED AP

Blue Cord Professional Services

President

Estimating - QA/QC Services – Construction Services

John has more than 24 years' relevant knowledge of the construction industry spanning from construction management of hard bid projects to design-build projects as a project manager. He has been with Blue Cord since 2018 as the Vice President of Construction and the President of our Professional Services Division. Mr. Hoibraten is certified as a LEED-Accredited Professional, is licensed as a General Contractor, and has served as a Superintendent, Project Manager, Estimator and Vice President throughout his career. His additional expertise encompasses clean room equipment installation and construction, preconstruction management, and quality control. John has also been involved with several developmental teams throughout his career to develop facilities for mixed commercial, medical, and general assembly.

John's role in Professional Services includes attending design meetings and providing cost and construction input, providing cost estimates, providing construction narratives, QA/QC of construction documents, providing construction schedule and schedule reviews, submittal reviews and on-site inspections.

RELEVANT PROJECT EXPERIENCE

Orange County Public Schools – Continuing Contract
(OCPS Project Management, Orlando, FL)
Jan 2017 – April 2021
Provide qualified assistance in pricing and complete of projects within OCPS. Annual contract that was renewed for multiple years. Blue Cord canceled in April 2021 to pursue other opportunities through Capital Planning.

Meeting Room Renovations
(Orange County Convention Center, Orlando, FL)
2-20-2019 – May 2022
As consultant to ADC International, Blue Cord is providing project schedules and cost estimates, as well as construction narrative, plan reviews, and onsite construction reviews.

Orange County Utilities Operations Center East
Orange County Utilities (Orlando, FL)
10-1-2019 – Estimated completion April 2023
As consultant to Rhodes + Brito Architects, performed cost estimating services, constructability reviews at each design phase, and quality control efforts for this $20 million, 82,000 SF project. Complete site inspections during construction.

Camping World Stadium Renovation
Orange County, FL (Orlando, FL)
10-1-2020 – 1-25-2022
As a consultant to HNTB, Blue Cord provided QA/QC of construction documents and site inspection of the construction progress and pay application review.

Cultural Community Center
Orange County Government (Orlando, FL)
8-10-2020 – 8-30-2021
As consultant to Rhodes + Brito Architects, Blue Cord performed cost estimating services for the renovation of an existing 60,000-SF (approximately) building shell. Upon completion the space will function as a 10,000 to 12,000 SF Cultural Community Center within the existing 60,000 SF building footprint.

Nnadi, G.N., I. Kinnear, J.D. Hussin & S. Flood, 2001. ***A Case Study of Ground Improvement for a Major Power Plant*** in Jacksonville, Florida. Proc. of a Specialty Conference: Foundations and Ground Improv. Blacksburg, Virginia, June 9-13.

PROFESSIONAL PROFILE

Dr. Nnadi directs and manages NADIC's operations throughout Florida. He has more than 41 years of experience from geotechnical and geo-environmental engineering applications to various areas such as civil, transportation, industrial and environmental systems. He has authored and co-authored over 14 publications and was an adjunct professor at University of Central Florida, Civil & Environmental Department.

PROJECT EXPERIENCE

Orange County Fire Station No. 87, Orange County, FL
This project consisted of the construction of a 9,352 square feet one-story building with a kitchen, gym, dining room, day room, dormitory rooms, and apparatus bay support spaces. NADIC performed geotechnical exploration.

Amazing Explorers, Orlando, FL
This project included a one-story structure approximately 12,500 square feet consisting of load-bearing walls and interior columns with slab-on-grade floors. NADIC performed geotechnical explorations to examine the subsurface soil and groundwater conditions at the academy foundation footing and provide recommendations to resolve the rising of water level in to the footing areas.

Ability Housing, Orlando, FL
This project involved the construction of a three-story apartment complex on a 12.83 acre parcel. NADIC performed geotechnical engineering assessments as relating to site suitability for the development. NADIC performed geotechnical recommendations regarding earthwork and design and construction of foundations, floor slabs and pavements, and stormwater management.

Jake E. Stehr, P.L.A.

Sr. Landscape Architect

Project Role: Professional Landscape Architect

Trained as a Landscape Architect with a professional background in history and planning, Jake brings unique perspective and pragmatic solutions to complex projects. He is a cross-disciplinary designer who creates strong collaborations by translating between project constituencies. His expertise is in organically-integrated urban landscapes. To create constructed habitats and social spaces in these contexts, Jake employs an opportunistic and resourceful design approach. Throughout his career, he has strived to leverage a connection between the broad idea of site, history, geography and the interaction between people and place.

Project Experience

Dunlawton Avenue Median Landscaping, Port Orange, Florida
- Role: Landscape Architect
- Scope: In an effort to beautify Dunlawton Avenue, the City of Port Orange contracted ZCA to provide professional landscape design and permitting for Dunlawton Avenue median from Spruce Creek Road to Nova Road. ZCA prepared a Landscape Plan identifying the location of proposed plantings and their associated specifications. ZCA also reviewed the existing irrigation and drainage plans to ensure proper working order. Funding for this project was provided by a Florida Department of Transportation (FDOT) Beautification Grant. ZCA coordinated with the City, FDOT, and multiple utility companies throughout the design and permitting process.

City of South Daytona Gateway Signage, South Daytona, Florida
- Role: Project Manager
- Scope: ZCA created a graphical experience by reimagining design elements as you enter the City of South Daytona. Care was taken to utilize historical architectural features to leverage South Daytona's unique history in an effort to further advance a unique sense of place.

DeLand Fire Station, DeLand, Florida
- Role: Landscape Architect
- Scope: ZCA provided civil engineering, environmental and **landscape architectural services** for the development of Fire Station #81 and police evidence facility on the 5 acre land located in DeLand, Florida. ZCA coordinated with City staff and assisted with permitting through St. Johns River Water Management District (SJRWMD), Florida Department of Environmental Protection (FDEP), and the Department of Health (DOH).

The Center at Deltona, Deltona, Florida
- Role: Landscape Architect
- Scope: ZCA provided civil engineering and **landscape architectural design services** for the new ±25,000 SF Community Center building and parking expansion. ZCA's tasks included stormwater, water, sewer, pacing, grading, landscape architectural design, and all site permitting. ZCA also worked with the Architect and the City to Master Plan the site for future expansion.

Daytona Rising and Grandstand Redevelopment, Daytona Beach, Florida
- Role: Landscape Designer
- Scope: This exciting project consisted of the entire reconstruction of the Frontstretch Grandstands which included all facility components from the seating bowl and gates to the civil and **landscape elements** in front of the facility. ZCA was responsible for the design and permitting of all the civil, **landscape, and hardscape improvements** as well as the master stormwater design and permitting. Permits obtained for the project include approvals from the following agencies: Volusia County, City of Daytona Beach, St. John's River Water Management (SJRWMD), Army Corps of Engineers (ACOE), Florida Department of Transportation (FDOT), and the Florida Department of Environmental Protection (FDEP).

State Road 600 Daytona Median Landscape Improvement Project, Daytona Beach, Florida
- Role: Landscape Designer
- Scope: Landscape and irrigation design, construction administration and coordination with the Florida Department of Transportation (FDOT) and the City of Daytona Beach.

Personal Service, Professional Design

Manuel G. Vera Jr., PSM

Principal-in-Charge/ Chief Surveyor & Mapper

Mr. Vera Jr., a registered Land Surveyor has over 37 years of experience with the company and throughout the state of Florida. He has managed a variety of survey contracts and projects for the Florida Department of Transportation, Miami-Dade County, Miami-Dade Expressway Authority, City of Miami, and numerous Engineering and Design firms. Mr. Vera has performed and managed all types of surveying services including: Design Surveys, Right-of-Way Control Surveys, Right-of-Way Mapping, Platting, Construction Layout, Asbuilt Surveys, Drainage Surveys, etc. Mr. Vera is a Chief Surveyor and Mapper, as well as our Chief Executive Officer. He has extensive experience in the management and coordination of survey projects involving a variety of surveying techniques such as Aerial Surveys, Conventional Ground Surveying, Utilities designation, etc.

Project Experience

Department of the Army, Amelia Earhart Park Monitoring Well Survey
MGV was responsible for the following survey services: 1.) Locate ten (10) monitoring wells, using Real Time Kinematics (RTK) methodology; 2.) Perform an elevation run to establish top of PVC pipe and adjacent grade elevation on ten (10) monitoring wells. *Parsons Government Services, Inc. | John Hicks, PG (303) 764-1941, john.hicks@parsons.com | 09/2016 thru 10/2016 | Contract Amount: $3,600*

MD-DTPW, City of Miami Beach Seawalls
MGV was responsible for designating (horizontally mark on the surface) known existing toneable and non-toneable subsurface utilities found within 6 "Scan" areas depicted on the plans provided by the client utilizing electromagnetic geophysical prospecting equipment, including ground penetrating radar (GPR). MGV also performed up to 215 utility locates (test holes) on potential utility conflicts as identified on the plans provided by the client. Each locate (test hole) includes horizontal coordinates, depth of cover, elevation, size, type, material and general direction of each found utility. *BCC Engineering, LLC | Christian Aquino, PE (305) 670-2350, caquino@bcceng.com | 12/2019 thru On-Going | Subcontract Amount: $17,740.80*

FDOT District 6, SR A1A / Indian Creek Drive Subsurface Utility Engineering Services from 25th Street to 41st Street
MGV was responsible for designating (horizontally mark on the surface) known existing toneable and non-toneable subsurface utilities found within 6 "Scan" areas depicted on the plans provided by the client utilizing electromagnetic geophysical prospecting equipment, including ground penetrating radar (GPR). MGV also performed up to 215 utility locates (test holes) on potential utility conflicts as identified on the plans provided by the client. Each locate (test hole) includes horizontal coordinates, depth of cover, elevation, size, type, material and general direction of each found utility. *Ribbeck Engineering, Inc. | Carlos Ribbeck, PE (305) 383-5909, cribbeck@gmail.com | 02/2019 thru 09/2019 | Subcontract Amount: $82,980.00*

FDOT District 6, Districtwide Right of Way Monumentation Consultant Contract (C-A146) Task driven contract performing Right o Way Monumentation and Right of Way Monumentation Mapping services in Miami-Dade and Monroe Counties, and all municipalitie within the district. These services include, but are not limited to the preparation of Right of Way Control Surveys, Right of Way Maps Boundary Surveys, Title Search Reviews, and Right of Way Monumentation to include annotation and recordation of Right of Way Map once the Monumentation is complete. *FDOT District 6 | Victor Marrero (305) 470-5249, victor.marrero@dot.state.fl.us |10/2018 thru On Going | Contract Amount: $1.5 Million*

FDOT District 4, Districtwide Continuing Services for Survey, Mapping, and SUE (C-9T24)
Surveying and mapping services for this contract include, but are not limited to: Mobile Lidar, Field Surveys, Maintenance of Traffi (MOT), Historical Baseline and Existing Right of Way Determination, Global Positioning System (GPS) Surveys, Monumentation Surveys Bathymetric surveys (which includes single beam, multi beam and side scanner sonar capabilities), Utility Designation and Excavatio

Mark R. Sowers, PSM

SUE Director / SUR Chief Surveyor

Mr. Sowers is a Professional Surveyor & Mapper with 33 years of experience throughout the state of Florida. His responsibilities include managing field operations and establishing standards for consultants as well as final quality assurance / quality control of all deliverables before client submission. He is proficient in the latest industry technology, as well as developing and implementing successful management strategies. Mr. Sowers worked for the Florida Department of Transportation (FDOT), District IV for eight years, four of them as District Surveyor. During his FDOT tenure, Mr. Sowers actively participated in statewide process improvements. He was a chairperson for FDOT's Survey Technical Advisory Committee and a member of the committees responsible for the development and implementation of the staff-hour estimating form and project network control sheet.

RMPK FUNDING

Mr. Ruskay has more than 16 years of extensive experience in the evaluation and management of various state and federal funding programs, obtaining $247 million dollars in the past 18 years. He has worked with a wide range of local governments to find and obtain the funding necessary to make their capital projects a success. His projects consistently place in the top percentages of funding programs on the local, state and federal level. Mr. Ruskay's experience includes obtaining funding for land acquisition, transportation projects, cultural facilities and public safety projects. In addition to assisting local communities throughout the state in obtaining funding for capital projects, Mr. Ruskay and the staff at RMPK Funding have developed Capital Improvement and Strategic Funding Plans for many of their clients.

Mikel Travisano, MS

Architectural Historian, Principal Investigator

Mikel Travisano, MS, joined SEARCH in 2015 and has more than 16 years of professional experience. Mr. Travisano is responsible for directing all phases of architectural history projects. His specialties include HABS photography, modernist architecture, archival research, historic preservation, and architectural conservation. His restoration and conservation experience includes landmarked buildings and sites throughout New York City, such as the Morris-Jumel Mansion, the oldest extant house in Manhattan, and the Astoria Pool, the largest pool in New York City and the location of the 1936 Olympic Trials for the US Swimming and Diving Teams. Mr. Travisano worked for five years at the Historic House Trust of New York City and supervised the development and implementation of master plans at the Bartow Pell Mansion and Bowne House and visitor's center. His experience with architectural styles and historic districts ranges from some of the oldest buildings and districts in the United States to working with local government landmark agencies to address style, material, size and height issues of new buildings in historic districts. He is experienced with implementing Sections 106 and 110 of the National Historic Preservation Act (NHPA). His qualifications exceed those set forth by the Secretary of Interior's Standards and Guidelines for Historic Preservation (48 FR 44716-42). Mr. Travisano has authored or co-authored more than 200 technical reports.

EDUCATION

MS, 2005	Historic Preservation. Columbia University.	BFA, 1998	Photography. Temple University.

RESEARCH SPECIALIZATIONS

Historic Preservation	Cultural Resource Management	Architectural Conservation
Architectural History	HABS/HAER Documentation	Archival Research

PROFESSIONAL EXPERIENCE

2015-present	Architectural Historian, SEARCH
2004-2015	Various, including The Historic House Trust of New York City and Sciame; upon request

VOLUNTEER POSITIONS

Vice-President Emeritus, Columbia University Preservation Alumni (2010-2011)

PROFESSIONAL CERTIFICATIONS AND AWARDS

The Florida Trust for Historic Preservation: Honorable Mention in the Field of Restoration and Rehabilitation for the Main Street Bridge Project

The Florida Trust for Historic Preservation: Outstanding Performance in the Field of Preservation Education & Media for the St. Petersburg's Design Guidelines for Historic Preservation

SELECT PROJECT EXPERIENCE

2021/2022: Architectural Historian. *HABS Level II Documentation of the Junior Senior High School, Ramey Air Force Base, Aguadilla, Puerto Rico.* HABS documentation of Ramey Unit School Buildings, which consisted of large format photography and detailed architectural descriptions of the school complex that is comprised of 17 individual buildings and additional architectural features. The HABS documentation also includes copies of the original as-built drawings. The school was designed in 1968 by Toro y Ferrer Architects and was determined eligible for inclusion in the NRHP. Conducted for ShenkelShultz Architects and US Army Corps of Engineers (USACE), Jacksonville District.

2016: Architectural Historian. SEARCH performed an emergency assessment of a ca. 1840 gunpowder magazine in Montgomery, Alabama. The immediate plan recommended stabilizing the exterior walls by repointing the most damaged areas of brick masonry. Because of the severity of deterioration, SEARCH recommended a complete structural assessment. Long-term recommendations included site work to drain water away from the building; additional repointing of the exterior brick masonry and the introduction of a slate water table; interior brick masonry repointing and repairs; replacing broken roof slates, ceramic tiles, and deteriorated roof framing. Conducted for US Army Corps of Engineers (USACE), Mobile District.

GRANT EXPERIENCE

RMPK FUNDING is consistently obtaining grant funding for its clients through both new funding opportunities and annual grant programs at every level of government. Below is a sampling of recent funding awards that have helped their clients further capital improvement priorities.

RESILIENT FLORIDA

- City of West Palm Beach ($1,875,000) – low impact development (LID) improvements to Currie Park.
- City of North Lauderdale ($3,550,00) – construction of new stormwater pump station.
- City of North Lauderdale ($2,600,000) – rehabilitation of drainage canals.
- City of Oakland Park ($5,000,000) – construction of new outfall and pump station.
- City of Oakland Park ($2,500,000) – hardening of Fire Station #9.
- City of Oakland Park ($1,893,476) – stormwater improvements to NE 13th Ave.
- City of Lauderdale Lakes ($3,000,000) - Fire Station 37 Hardening.

REBUILD FLORIDA CRITICAL FACILITY PROGRAM

- City of Homestead ($2,700,000) – emergency generator for the City's wastewater treatment plant.
- City of Homestead ($1,674,000) - replace a chlorine disinfection system at a water treatment facility.
- Okeechobee County ($650,000) – harden two of the County's fire stations.
- City of Oakland Park ($383,000) – harden a City fire station.

LAND AND WATER CONSERVATION PROGRAM

- City of West Palm Beach ($1,000,000) – recreation improvements to Currie Park.
- City of Kissimmee ($1,000,000) – development of Lancaster Park.
- Village of Virginia Gardens ($400,000) – construction of Ludlam Canal Greenway.
- Indian Trail Improvement District ($840,000) – trail development along M-O canal.
- City of South Pasadena ($250,000) – improvements to Bay View Park.

REBUILD FLORIDA INFRASTRUCTURE REPAIR PROGRAM

- City of Kissimmee ($3,400,000) – to improve neighborhood stormwater facilities.
- City of Homestead ($4,519,000) – to improve potable water facilities in the Avocado Village Neighborhood.
- City of St. Cloud ($2,097,088) – to repair a damaged drainage pipe along Illinois Avenue.
- City of Tamarac ($353,000) – to provide critical emergency power sources to lift station.

WASTEWATER TREATMENT PLANT ENERGY PROGRAM

- City of Cooper City ($500,000) – to retrofit existing blowers at the plant.
- Coral Springs Improvement District ($308,378) – to retrofit equipment within the plant.

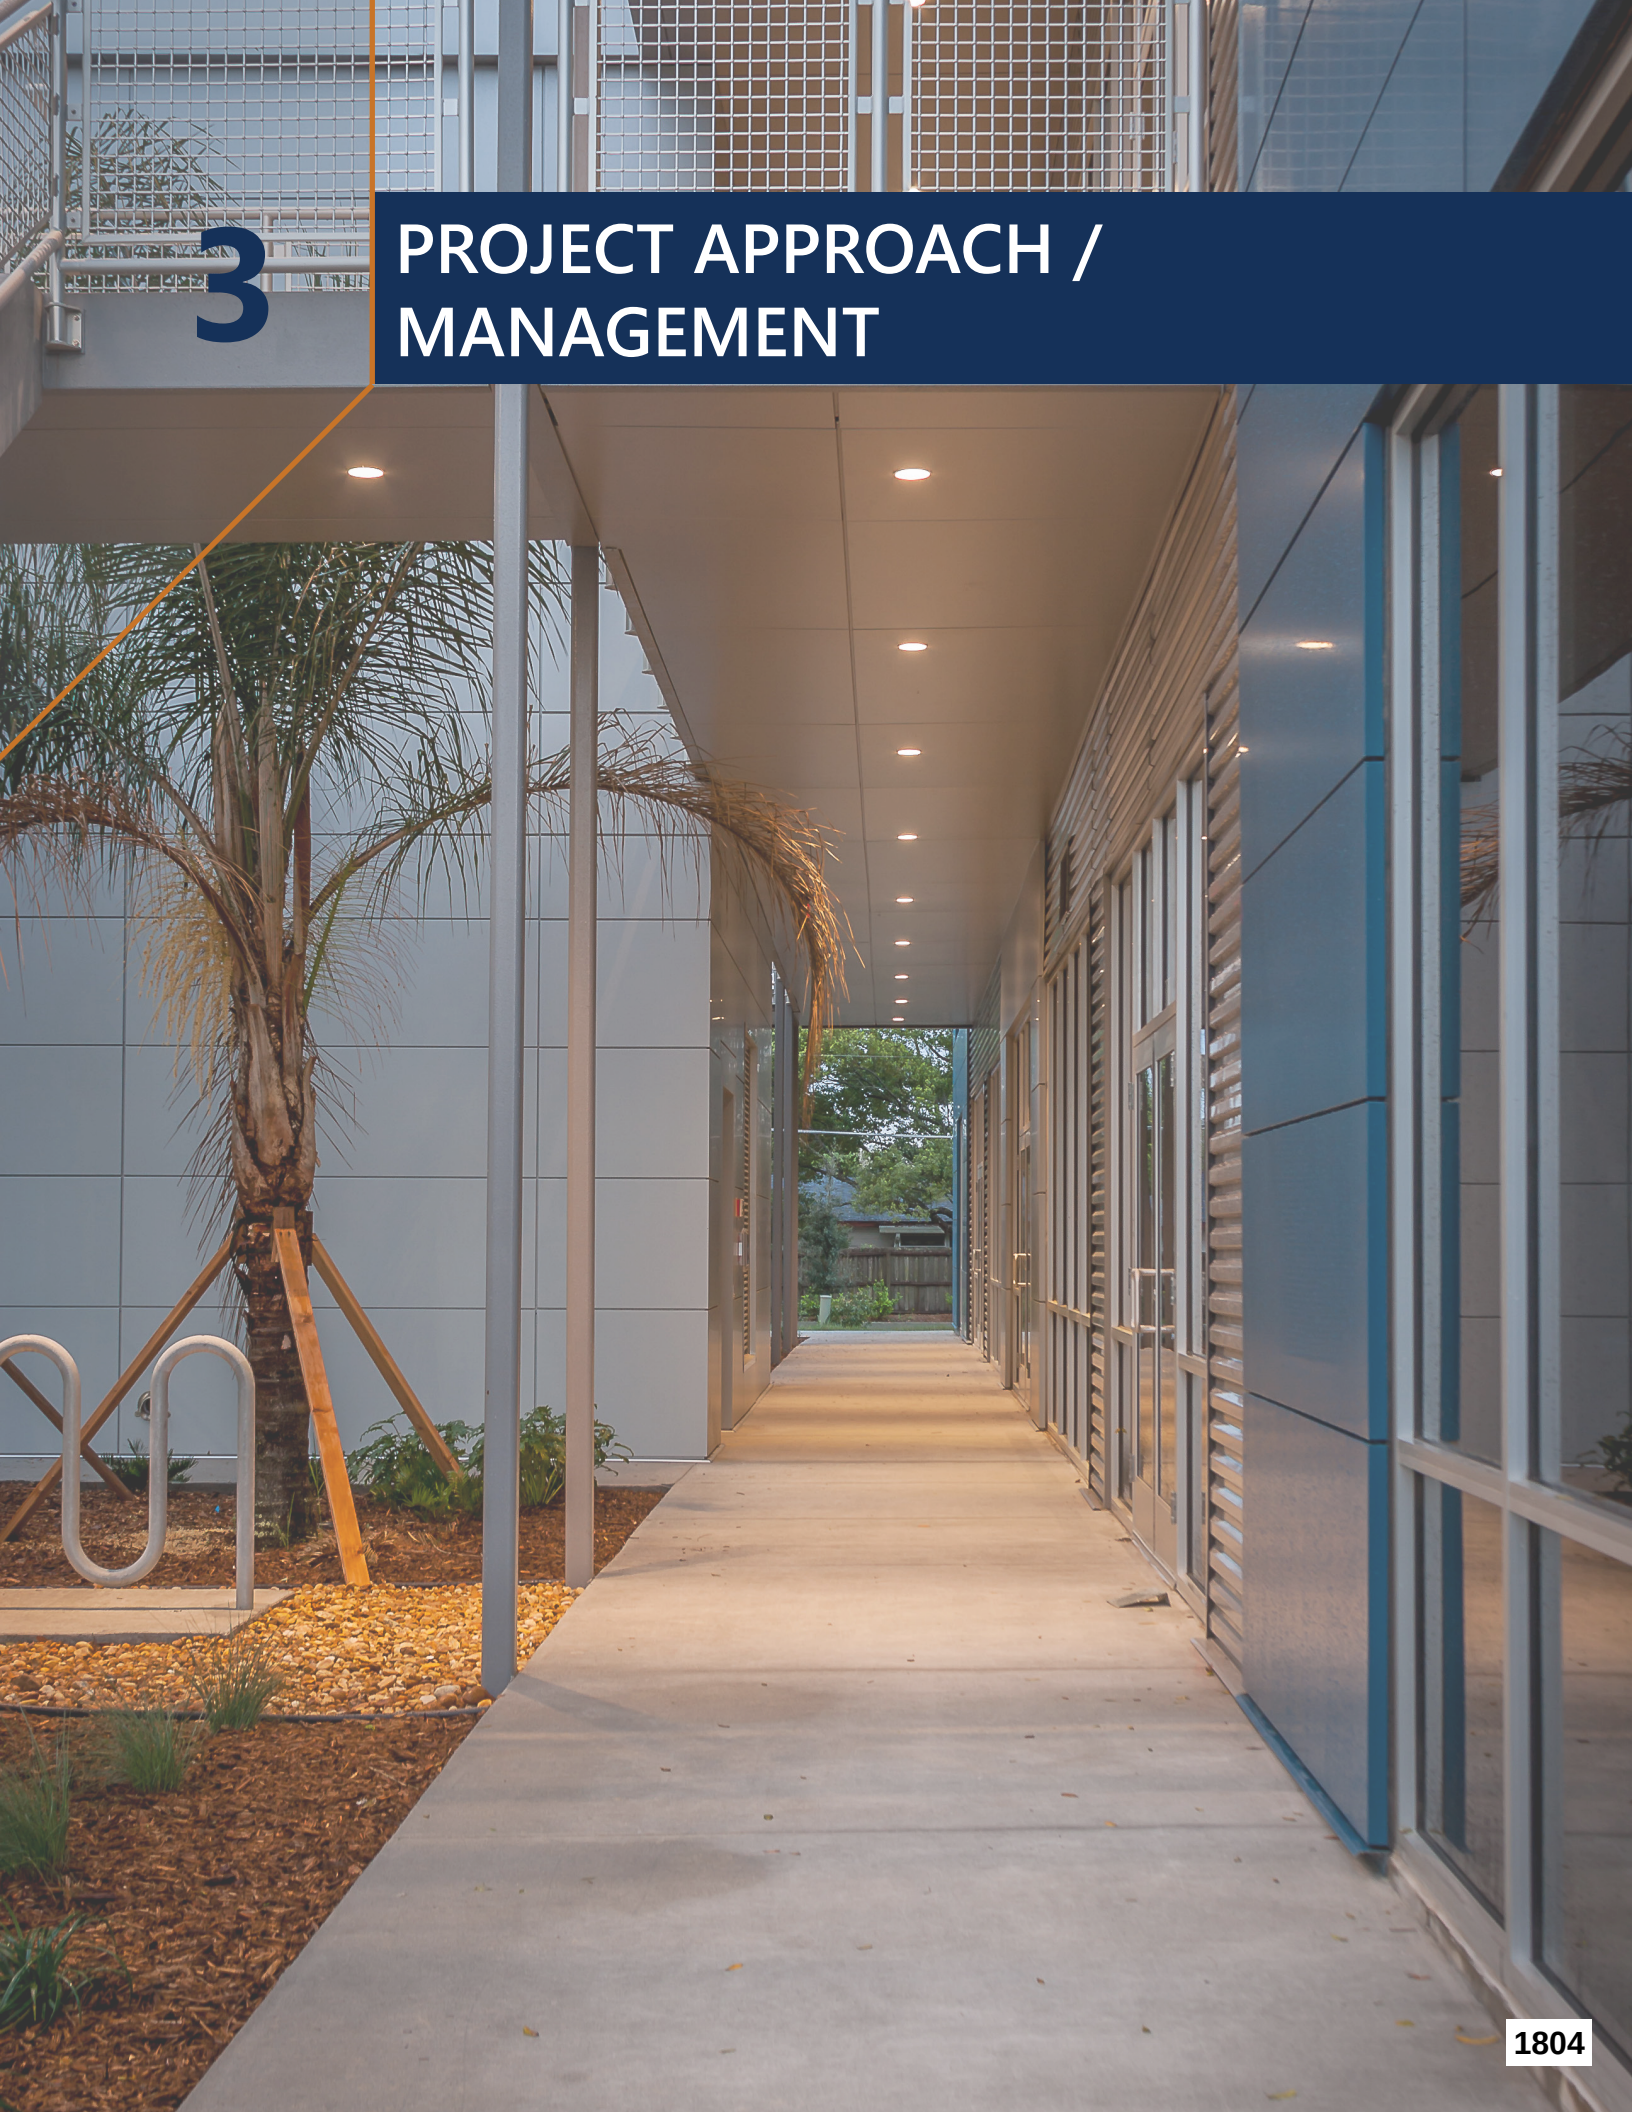
FLORIDA COMMUNITIES TRUST GRANT PROGRAM

- Village of Wellington ($3,386,250) – acquire additional land at Wellington Environmental Preserve.
- City of Kissimmee ($2,832,241)– acquire land for the Shingle Creek Trail and open space.
- City of Fellsmere ($2,415,763) – acquire land for new passive park and conservation area.

HAZARD MITIGATION GRANT PROGRAM
» Village of Wellington ($250,000) - to purchase generators for lift stations.
» Indian Trail Improvement District ($3,026,573.70) - to rehabilitate drainage canals.
» City of Oakland Park ($1,000,000) – to construct new Public Works Facility.
» City of Oakland Park ($546,751) – to harden building department facility.
» City of Oakland Park ($450,000) - to harden Fire Station facility.

LIBRARY (DLIS) FLORIDA AMERICAN RESCUE PLAN ACT (ARPA)
» City of Oakland Park ($30,146) new computer terminals at City Library.
» City of Mount Dora ($20,359) purchase of AWE Early Learning Terminals.

NON-POINT POLLUTION GRANTS
» City of Fellsmere ($649,644) – to develop regional stormwater retention facility.
» Town of Hypoluxo ($333.360) – to complete septic to sewer conversion project.
» Indian Trails Improvement District ($492,000) – development of bio-swales along roadways.



FDOT SERVICE DEVELOPMENT GRANT
» City of Sanford ($609,634.00) - to expand free community trolley service.

COASTAL RESILIENCY GRANT PROGRAM
» City of Oakland Park ($75,000) – to complete a sea-level rise vulnerability assessment.
» Town of Bay Harbor Island ($75,000) - to complete a sea-level rise vulnerability assessment.

RECREATIONAL TRAILS PROGRAM
» City of Mount Dora ($240,000) – to construct new kayak/canoe launch facility.
» City of Oviedo ($400,000) – to construct a new fitness/exercise trail.
» City of Seminole ($200,000) – to construct new fitness trail at a neighborhood park.
» City of Riviera Beach ($80,000) – to construct a new fitness trail at a neighborhood park.

URBAN AND COMMUNITY FORESTRY GRANT PROGRAM
» City of Oakland Park – ($20,000) – to install native trees at new park site.
» City of Hollywood ($30,000) – to prepare a City wide tree inventory.

RMPK FUNDING

3 PROJECT APPROACH / MANAGEMENT

APPROACH TO CONTINUING SERVICE CONTRACTS

There are several key components necessary to be successful in a continuing service contracts, including thorough task understanding and planning, devising the appropriate design or solution concept, organized production and construction guidance and follow-through. This 4-part approach produces a project that provides Best Value to the County. **A Best Value project – as we define it – is a project that meets your stated program goals or task requirements, is designed and constructed to the highest quality level within your budget, is energy efficient to operate, provides many years of durable service and is completed on time within your construction budget.** This approach is discussed further under the Bentley Design Process that follows.

PROJECT SCOPE Continuing contracts cover a wide variety of project types and situations. For this reason, it is important that your consultant be adaptable and responsive – Bentley has a long history of meeting the demands of continuing contracts. For example, during a previous continuing architectural services contract with Orange County, Bentley was in the midst of design for the Orange County EOC when tragic events of 9/11 occurred. Very quickly, rapid completion of the project by the end of 2001 became a high priority for Orange County. We accelerated our drawing production, and the project was successfully constructed and operational by 12/31/2001. Fast forward to our current contracts with the City of Altamonte Springs or Volusia County, we employ the same commitment to responsive and adaptable service to assist with emergency structural investigations as well as task work orders for conventional project work. Bentley provides an adaptable, responsive approach through thorough preparation and an organized process. All design work for the City of New Smyrna Beach will be coordinated through Bentley Architects + Engineers, Inc. with an approach that eliminates any gaps in the scope of the design or the efficiency of the project.

The methodology detailed below is based on our extensive experience with both continuing contracts and conventional design projects and has proven to yield cost and efficient designs that go beyond simply satisfying RFQ requirements. The designs we produce by employing this methodology thoroughly address our client's actual objectives that may sometimes differ and improve upon what was "thought to be needed."

Bentley has successfully completed over 200 design projects with Salas O'Brien over the course of 25+ years, and we have likewise worked with Ramski for over 20 years. Our multiple disciplines and long-standing design relationships on both continuing service contract work and conventional projects with proven subconsultants have allowed us to bring a holistic design approach to our projects, saving our clients both time and money through meticulous and careful coordination and careful implementation of our maintenance facility design approach.

City of Casselberry - Public Works Department / City of Altamonte Springs - Eastmonte Park Improvements

3 PROJECT APPROACH / MANAGEMENT

GENERAL INFORMATION METHODOLOGY A critical key to the success of any project Bentley undertakes is accurate recording, monitoring and reporting of project-related information. Gary Kranston, RA will be the City's primary point of contact throughout the project, ensuring organized and consistent monitoring and distribution of information. All communications to the City will be directed to the City manager and any other county officials identified by the City unless specifically indicated otherwise. **Since Bentley is an A & E firm, we require fewer sub-consultants on our team, which facilitates streamlined communication.**

MEETINGS We employ a combination of in-person and online meetings in our workflow. During the initial Plan and Concept phases (described in the Bentley Design Process that follows), all meetings will be in-person to facilitate the necessary detailed facility design discussions. During the Develop phase, we propose to hold in-person meetings to discuss review comments following milestone submittals and critical technical meetings to include MEP-specific systems, interior finishes and furniture and technical site review. These meetings will be supplemented with online discussions using Microsoft Teams. Online meetings offer the ability to discuss project issues as a group while also saving time for all involved and can be focused on minor topics that do not require a full, in-person meeting. Furthermore, Bentley is prepared to adapt as needed to the ongoing Covid-19 pandemic. We are fully capable of conducting all meetings online should the need arise.

COORDINATION Bentley will be responsible for coordinating all activities during the design process to maintain the scheduled completion of the design and construction documents for permitting, bidding and construction. Bentley will plan and coordinate meetings with the stakeholders and permitting authorities as needed; track project decisions and action items; and coordinate all design team tasks and activities to keep the project on schedule.

RECORDING Bentley will take responsibility for recording project details in writing to ensure that information is distributed to the City and the design team in an orderly manner. Any design decisions or changes to scope, schedule or budget will be recorded in the form of a Decision Log. This approach ensures that all parties are working from accurate information.

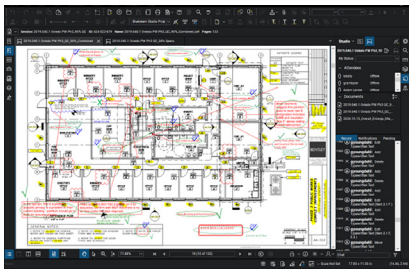
MONITORING Throughout the project, we will review the Production Schedule monthly and the Decision Log weekly to ensure the schedule is maintained and all design decisions are tracked to completion.

REPORTING Bentley will provide a monthly Progress Report to document project activities, updates to the decision log, status of risk items and schedule compliance.

BENTLEY'S DESIGN PROCESS: PLAN, CONCEPT, DEVELOP & BUILD.

PLAN Planning how the project will be executed is of critical importance to coordinate all the necessary activities and keep the project moving forward on schedule and within budget. This phase will include an introductory kickoff meeting during which topics, such as project goals, schedule, quality control reviews, budget, risk assessment and process protocols will be discussed and established. Bentley will follow up shortly thereafter with a proposed detailed production schedule. The production schedule will include dates for all key activities, including design programming, review meetings, milestone submittals, quality control reviews, budget reviews and meetings with permitting authorities. Once the production schedule is finalized, **Bentley sends Outlook calendars to each of our design team members to ensure that they are aware of the key dates to maintain timely completion.** Throughout the project, Bentley reviews the schedule weekly to assess progress and make sure all activities remain on track for meet completion milestones.

CONCEPT Following the initial planning phase, if the work order is for a conventional building design project, we will collaborate with the City to create a detailed program for the building and site design tailored to the work order scope. During this programming phase, we will closely examine the functional requirements of the facility as required by the task work order scope. During programming, each element is discussed to verify your needs. These functional requirements will include staff quantity and organization, preferred adjacencies, equipment requirements, discussion of preferred structural and MEP systems, site circulation, utility and feature requirements. From the program, we will develop conceptual building and site plans to review with the City and modify as needed until an acceptable design solution has evolved. Concepts will be developed using Revit and visualized with Sketchup and Twin Motion rendering software to facilitate City review.



DEVELOP Once the City approves the proposed Concept design solution, Bentley will proceed with developing Construction Documents through 30%, 60%, 90% and Final phases. The 30% (Schematic Design) documents will further develop the conceptual site and building plans to include additional detail and finalize the design approach. During this phase, pre-application meetings and early meetings with permitting authorities will also occur to uncover and resolve any permitting concerns. Moving forward to 60% (Design Development) documents, all building and site disciplines will further the design and plans preparation to include construction details. We will also investigate the proposed design products to coordinate constructability and begin technical specification development. The 90% (Construction Documents) will complete all the technical drawings and specification documentation. If deemed preferable by the City, we can submit the 90% building and site documents to all permitting authorities for Permit Review to reduce the production duration. Final documents will include incorporation of City and permitting authority review comments. Each milestone submittal will be proceeded by detailed Quality Control and Budget reviews. Similarly, each milestone submittal will include cost estimates and Design Documentation for City review and approval to proceed.

BUILD The Build activities include both bidding and construction activities. Bentley will participate in the pre-bid meeting to answer technical questions, review and respond to bidders' Requests for Information (RFI's), issue bid addenda and assist the City with evaluating bids. Upon project award to the Contractor, Bentley will work with the City throughout the construction phase to ensure the facility is constructed to meet the City's Design and Quality requirements.

Bentley team members will participate in progress meetings and site inspections to ensure compliance with the construction documents, review RFI's and shop drawings and provide final completion inspections. Bentley also recommends conducting an 11-month post-occupancy review to confirm the facility is operating satisfactorily and identify any adjustments to subsequent facilities.

BENTLEY'S COMMITMENT TO QUALITY

QUALITY CONTROL The Bentley team recognizes that a quality assurance program is a necessity to ensure biddability. Bentley quality control reviews are implemented using Bluebeam software. The advantages to this approach are simultaneous project review by all disciplines, active alerting features that reviewers can use to notify multiple disciplines of key coordination items and a trackable record of quality assurance activities.

Our typical production schedule specifically includes a two-week quality control/quality assurance (QC/QA) review period, **using our comprehensive QC/QA plan** prior to each submittal milestone. Each of our subconsultants must follow Bentley's QC/QA policy and sign certification forms confirming the QC/QA review has been properly completed for each phase of the project. Bentley also employs a coordination checklist of key items for the plans and technical specifications to ensure key items have been included and properly coordinated between disciplines. Bluebeam QC/QA cloud session invitation can be extended to the City Project Manager if so requested.

BUDGET REVIEWS Bentley has engaged **Blue Cord Professional Services (BCPS)** to perform budget reviews and cost estimating for this project. BCPS's approach to providing budgeting level estimates is to estimate a realistic baseline cost for the potential project based on the best available information, considering existing conditions and development challenges. The approach to planning level estimates is to provide a realistic programming budget that is valid as the project's life cycle moves forward toward identifying funding sources, design and implementation. Close monitoring of the project cost will be a key point of emphasis for the Bentley team. As project development continues, any previously unprogrammed items proposed for addition to the design will be assigned a cost. These items will be prioritized in conjunction with the City for consideration as to whether they fall within budget, require additional funding or take precedence over other items that must be removed to maintain budget.

SUB-CONSULTANT COORDINATION Our sub-consultants provide specialized expertise in their respective disciplines and are an important part of the overall project success. At the beginning of each project task, we will identify the necessary sub-consultants and define their role in the project to ensure that their services are appropriately directed. Gary will monitor the progress of sub-consultants' work through the interim project meetings and submittals. If it appears that a sub-consultant is falling behind schedule or not meeting the project objectives, Gary will bring on the necessary support so as not to delay the project. Gary will maintain communication with the City's project manager to ensure the sub-consultant coordination. Sub-consultants are required to provide meeting minutes to Bentley for incorporation into the overall meeting minutes. Having the sub-consultants provide their understanding of the issues, rather than the project manager summarizing the discussion in writing, helps ensure our sub-consultants' accurate understanding of the issues.

EVALUATION/STUDIES Our team has worked on numerous evaluations and studies over the course of the many continuing contracts we have held. We believe in meeting with project owners as well as the stakeholders end users when evaluating existing facilities or project needs. Services for the investigation and assessment of building envelopes, building systems, master planning and other specialized types of analysis and reporting involve the 4-part process previously described, that includes defining the task and planning it, data collection, evaluation/assessment and conclusions.

After the task is defined, a data collection approach is selected; this approach will vary based on the type of evaluation. Generally, the data collection phase will include desired use information from stakeholder interviews, user surveys and meeting with department officials. If the task involves building envelope or other physical facility issues, observation of existing physical conditions and existing design documents will be critical. Once data collection is complete, we will proceed with review and evaluation to devise planning goals or suggested repairs, as appropriate to the task. If the evaluation pertains to a potential repair issue, Bentley will provide an estimated cost for each repair as well as suggest long-term alternatives that may improve the life span of the building. In either case, the entire process will be documented in the form of a written report in the form most appropriate for the City's use. We will also meet with all parties at the conclusion of the study to explain the process and results and address any review comments or adjustments that might be necessary.

ENGINEERING CONTINUING SERVICES

UNDERSTANDING OF TASK WORK NEEDS Once we complete the Project Plan and a Task Work Order is issued, we will begin work on the project. Upon receipt of a task work order, Molly deVivero, PE will hold a project kick-off meeting with all involved team members to discuss the project schedule and critical path elements. From that point on, Molly will monitor the project's progress and keep the City updated as to its status.

Bentley understands that task authorizations may include pavement rehabilitation projects, stormwater management design, stormwater conveyance, environmental services, design of drainage structures, sidewalk construction and/or replacement, new guardrail installation or replacement, safety improvements, intersection improvements and bridge and/or culvert replacement or rehabilitation. In general, Bentley will provide the following engineering design services to complete a task authorization: data collection, design analysis, design documentation preparation, computation book preparation, typical section package preparation, pavement design package preparation, hydraulic report, geotechnical report, design and right of way surveys, structural design and analysis, plans preparation, cost estimating, specification preparation, permitting and bid assistance.

DATA COLLECTION Following the project kick off meeting, the EOR and design staff will begin the project coordination and data collection process. Engineering staff members will contact City Departments as necessary to obtain existing documents, data and feedback on existing conditions. Engineering staff members will also begin obtaining data from agencies and technical publications. Scheduling pre-application meetings with local agencies will occur early in the design data collection process to control and manage field investigation man-hours. Coordination with team subconsultants is critical at this stage to ensure effective data collection and review of data collected to move forward with preliminary design.

Bentley will coordinate geotechnical investigations by providing boring location sketches to facilitate the work needed. Bentley will coordinate with the survey staff in the office and in the field, if necessary, to ensure that critical elements are collected. Bentley will coordinate with environmental consultants and ensure effective communication and coordination between environmental team members and survey team members.

PRELIMINARY ENGINEERING If appropriate for the level of project complexity, a preliminary design (15% design stage) set of documents will be submitted to the City's Project Manager for review. The 15% design stage components will not necessarily consist of a set of plans but plan sheets within a bound narrative explaining the field conditions, impacts to the project scope, impacts to project goals, the direction Bentley will be pursuing to complete the project, an updated opinion of cost and an updated schedule. If this phase is warranted it is typically a critical milestone to the project and requires the input of all project stakeholders. Projects that typically warrant a 15% preliminary design phase will then proceed with 30%, 60%, 90%,100%, Final and Bid Document phases. The number of phased submittals will be determined during the task scoping and solidified

prior to the start of any design.

CONSTRUCTION DOCUMENTS Component plan sets of the construction documents will be based upon the scope and goals of the project. The quantity of plans to be produced will be determined based on providing those that are necessary to cost effectively scope, quantify and construct the project. The construction plans will be prepared at an appropriate plan scale to clearly define the work. The construction documents will include Specifications and/or Technical Special Provisions. All specifications shall be provided in Microsoft Word format and will be in accordance with the standards of the City's Purchasing and Contracts Division.

DRAINAGE AND STORMWATER MANAGEMENT DESIGN AND CALCULATIONS All drainage and stormwater management design will be consistent with City's standards and criteria and the criteria of the St. Johns River Water Management District (SJRWMD) and Florida Department of Transportation (FDOT) as applicable. Bentley will approach all drainage design with the intent of avoidance and minimization of right of way impacts. All drainage and stormwater management design will be summarized in a drainage design documentation report. The drainage report will be prepared for each phased submittal and for permitting.

MAINTENANCE OF TRAFFIC (MOT) A safe and effective traffic control plan with minimal impacts to all forms of traffic is important to every project. For off system projects, the point of ingress and egress to the project site is no less important and Bentley will address the traffic control plan for these conditions within the construction documents.

PREPARATION OF PERMIT PACKAGES AND PERMIT ADMINISTRATION For projects requiring permitting packages, draft permitting packages will be included in the Phase II plans submittal for review. The permit package may be submitted to the local agency as soon as Bentley addresses any 60% City comments. Early submittal of permitting packages to local agencies will help expedite the permitting process. Bentley will prepare comment responses for any comments issued within any requests for additional information (RAI). Bentley staff will coordinate with the City's project manager upon receipt of any RAI's and will submit all RAI packages to the City's project manager prior to re-submittal to the local agency. Preparation of permit packages may be included for the SJRWMD, the Florida Department of Environmental Protection (FDEP), the Florida Department of Transportation, the United States Army Corps of Engineers (USACE), Seminole County or the Federal Emergency Management Agency (FEMA).

Florida Turnpike Enterprise - SunTrax Phase I
Seminole County -Natural Lands Enhancements

PREPARATION OF BID PACKAGES AND BID ASSISTANCE Bentley will prepare bid packages comprised of the approved Final Plans and Specifications. Bentley will be available to attend and assist the City's project manager at pre-bid meetings and in the review bid proposals.

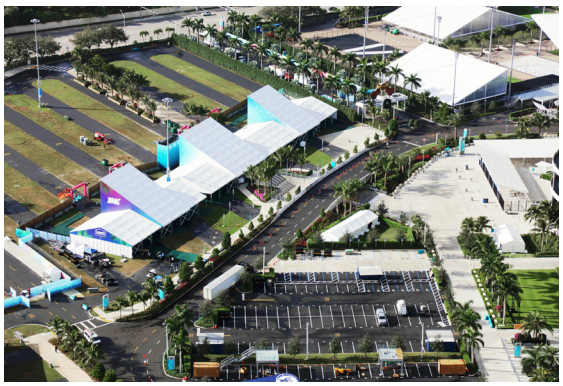
GEOTECHNICAL We understand that the City's contracted firms will provide geotechnical engineering services as required for this contract. Depending on the task, we anticipate initial geotechnical tasks for these projects to include review of all available project information including any pertinent Public Works Department records such as construction and maintenance records.

A site investigation will be conducted to gain advance knowledge of the site conditions. The site investigation will assess existing site conditions with respect to the anticipated geotechnical scope, including MOT and property access concerns for the field exploration program, type of field and laboratory investigation required, foundation design and project construction considerations. A geotechnical report will be prepared containing a synopsis of available project information, results of field and laboratory tests, assessments of the existing subsurface conditions and their influence on the project (beneficial or detrimental) and detailed recommendation for civil and structural design.

SURVEY We understand that the City's contracted survey firms will provide surveying, mapping and subsurface utility engineering services as required for this contract. Depending on the task, we anticipate initial survey tasks for these projects would include research of existing City records to obtain right-of-way maps, subdivision plats, easements and other GIS data. The research data will be used in conjunction with the field surveys to establish the limits of right-of-way along the project corridor.

SIGNALIZATION We will prepare traffic signal design plans in accordance with the Manual on Uniform Traffic Control Devices (MUTCD), the Florida Department of Transportation and City standards. The signalization plans include tabulation of quantities, general notes, plan sheets, mast arm or concrete pole details and interconnect plan sheets. The plan sheets establish the layout of the proposed signal poles, signal heads, loops, pedestrian detectors and signals, conduits and pull boxes, fiber optic cable interconnect and service points.
Early coordination and identification of potential overhead and underground utility conflicts is crucial in meeting the project schedule and the delivery of the proper mast arm pole structures. The use of Subsurface Utility Exploration (SUE) and ground penetrating radar has become effective techniques to confirm the presence of underground utilities that may potentially affect the placement of signal poles.

Maintaining effective traffic signal control during various phases of construction is an important element in the design process. We recognize this design criteria and will develop the maintenance of signalization as part of the project's traffic control plans. Where feasible, our approach will be based on using the existing signal assembly for as long as feasible in the early phase of construction. During the latter phase, the use of temporary signals or partial elements of the future signals wil be considered. Vehicular detection will be maintained using overhead-mounted video detection. Similarly, pedestrian detection will be maintained during construction.



DESIGNING AND PAVEMENT MARKING PLANS We will prepare roadway signs and pavement marking plans in accordance with the MUTCD, FDOT and City standards. The signing and marking plans include tabulation of quantities, general notes, plan sheets, and guide signs work sheets. The plans include the design of pavement markings (i.e., placement of longitudinal and transverse markings, color, width), gore areas, RPMs, ground mounted and overhead signs, sign layout, pedestrian and bicycle markings and special details.

UTILITY COORDINATION SERVICES We will provide proactive utility coordination services. Upon notification of a potential task work order scope, Bentley will generate a Sunshine One Call Design Ticket to document registered utility owners or agencies with the project limits. We will also conduct a field review to determine if there is visual evidence of unregistered utility owners or agencies. Our utility coordination begins with our initial plans. We will send out a copy of the initial plans with cover letter to the utility owners, requesting markups of their facilities within the project limits and GIS information. Throughout the design development and construction document preparation process, we will continue to notify the utility owners of the design. The goal is to avoid utility conflicts, but if they are unavoidable, these conflicts will be coordinated with the utility owners beginning at the 60% plans stage to obtain utility work schedules or utility work by contractor agreements if appropriate. The construction documents will document the disposition of utilities within the project limits.

ENVIRONMENTAL SCIENCES We understand that the City's contracted environmental firms will provide consulting services as required for this contract. The goal of all projects will be to avoid or minimize impacts to wetlands and habitat. When impacts cannot be avoided the Bentley team will coordinate with the City and jurisdictional agencies as early as the pre-application meeting stage.

Early coordination with the governmental agencies is important in the approach to environmental permitting for miscellaneous projects both large and small. This coordination typically includes pre-application meetings with, or letter notification to, the appropriate regulatory agencies. This will introduce the project to the agencies and help gain an early understanding of specific concerns that each agency may have and how their permitting thresholds might by triggered be the particulars of any specific project. This will also assist in the focus of preliminary investigations that are needed by each of the team's disciplines. Agencies to contact would likely include the U.S. Army Corps of Engineers (Corps), the St. Johns River Water Management District (SJRWMD)/Florida Department of Environmental Protection (FDEP), the U.S. Fish and Wildlife Service (Service) and the Florida Fish and Wildlife Conservation Commission (FWC). Coordination between all the team members (engineers, planners, geotechnical, biologist/wetland ecologist) is equally important to provide information for use and incorporation into design alternatives. Field surveys will be conducted to identify the limits of all Federal and State jurisdictional wetland areas within or adjacent to the project corridor and to qualitatively identify the potential for presence of Federal or State listed plant or animal species. Understanding how the confirmed presence of one or more of these natural resource features influences a project's ultimate design is an important part of the design process. Pursuing the notion of lowest level of permitting possible is also important in ensuring the timely delivery of project plans, while also considering the short-term and long-term implications of project alternatives and the associated permitting efforts. Qualifying for exemptions, noticed General permits and Nationwide permits are the primary objective before moving forward with a plan that would require the more intensive effort required for an Individual ERP from SJRWMD and Section 404 permit from the Corps.

BRIDGE/MISCELLANEOUS STRUCTURES DESIGN Bentley's structures group will provide bridge design for this contract. Bentley will attend the initial field reviews as necessary for the individual projects to properly estimate the type of structure work that will be required. Once the work is underway, we will provide input at each stage of plans development to make sure the structures are constructible and coordinated with the roadway, traffic control plans, and other disciplines. Bentley is experienced in reviewing and inspecting existing structures. Often an existing signal or sign structure was designed under an older code with lower wind speeds. Bentley will perform a detailed analysis (if necessary) to determine if the structure needs to be strengthened to bring it up to current codes or if it is adequate in the current condition. Bentley will review the existing bridges within task assignments and coordinate with the City regarding load ratings and the need for any repairs such as expansion joint replacement and patching of spalls.

Hard Rock Stadium Pedestrian Bridges and Tunnels

POST-DESIGN SERVICES Post-design services will be negotiated with the City based on the nature and complexity of the construction of the task assignment. Bentley has extensive experience providing post-design construction administration services for continuing contracts. Bentley will perform site inspections and attend all post-design pre-bid, pre-construction and progress meetings as defined during the task authorization negotiations. Bentley will respond to any requests for additional information/clarification (RFI) in a proactive and timely manner. The same policy will be followed for the review of shop drawings or review of unforeseen conditions. A proactive approach to post-design services is critical to maintain construction schedule and avoid costly time delays and back charges to the City. Bentley will review all pay request and any claims or change orders to determine the validity of the claim. At project close out, Bentley will be available to assist and attend project substantial completion review, preparation of punch list items and will prepare of Certifications of Completion of Construction.

CONSTRUCTION PLAN REVIEW Bentley will provide construction plan review services for the City. This effort will be initiated by meeting with the City's project manager to review the original design scope of services and the intent of the project. Bentley will review all construction documents/ plans with respect to use and implementation of the appropriate design criteria, the document's ability to address the project goals, the cost effectiveness of the design approach, constructability, permitting potential, construction cost and construction schedule.

COST-EFFECTIVE ENGINEERING SERVICES Bentley understands that cost effective engineering requires efficiency in design, efficient and value engineered designs and the monitoring of construction budgets during design. Cost control begins at the design phase with proper staffing, proactive project management, and quality control. Bentley has the experienced technical and management staff required for successful project delivery and completion. Designing to established and documented criteria is a design cost savings. Whether project specific criteria are City, County or the Florida Department of Transportation, the saving is the same because documented and vetted design details are utilized thereby saving time and money in design fees associated with detailing and specification writing. However, Bentley understands that conditions do arise for project specific designs requiring the development of details and specifications. For these types of projects, Bentley specifies and utilizes readily available and governing agency approved materials to control construction costs.

Bentley understands that project quality control and assurance is another key to cost control by minimizing the opportunity for change orders. Bentley implements a stringent quality assurance program for each project we undertake. For unforeseen field conditions, we proactively work with the Owner and Contractor to resolve resulting issues to avoid or minimize additional construction costs.

Bentley uses a customized version of Deltek Vision to track project costs, provide project performance reports as well as billing information. We utilize the Resources Planning feature within Deltek to continuously track our financial performance and productivity. The resource planning system is accessible by all project managers throughout the company and serves as the primary means of tracking and evaluating our staffing needs. Updated monthly by the project managers, the resource planning system forecasts our workload for the upcoming six-month period.

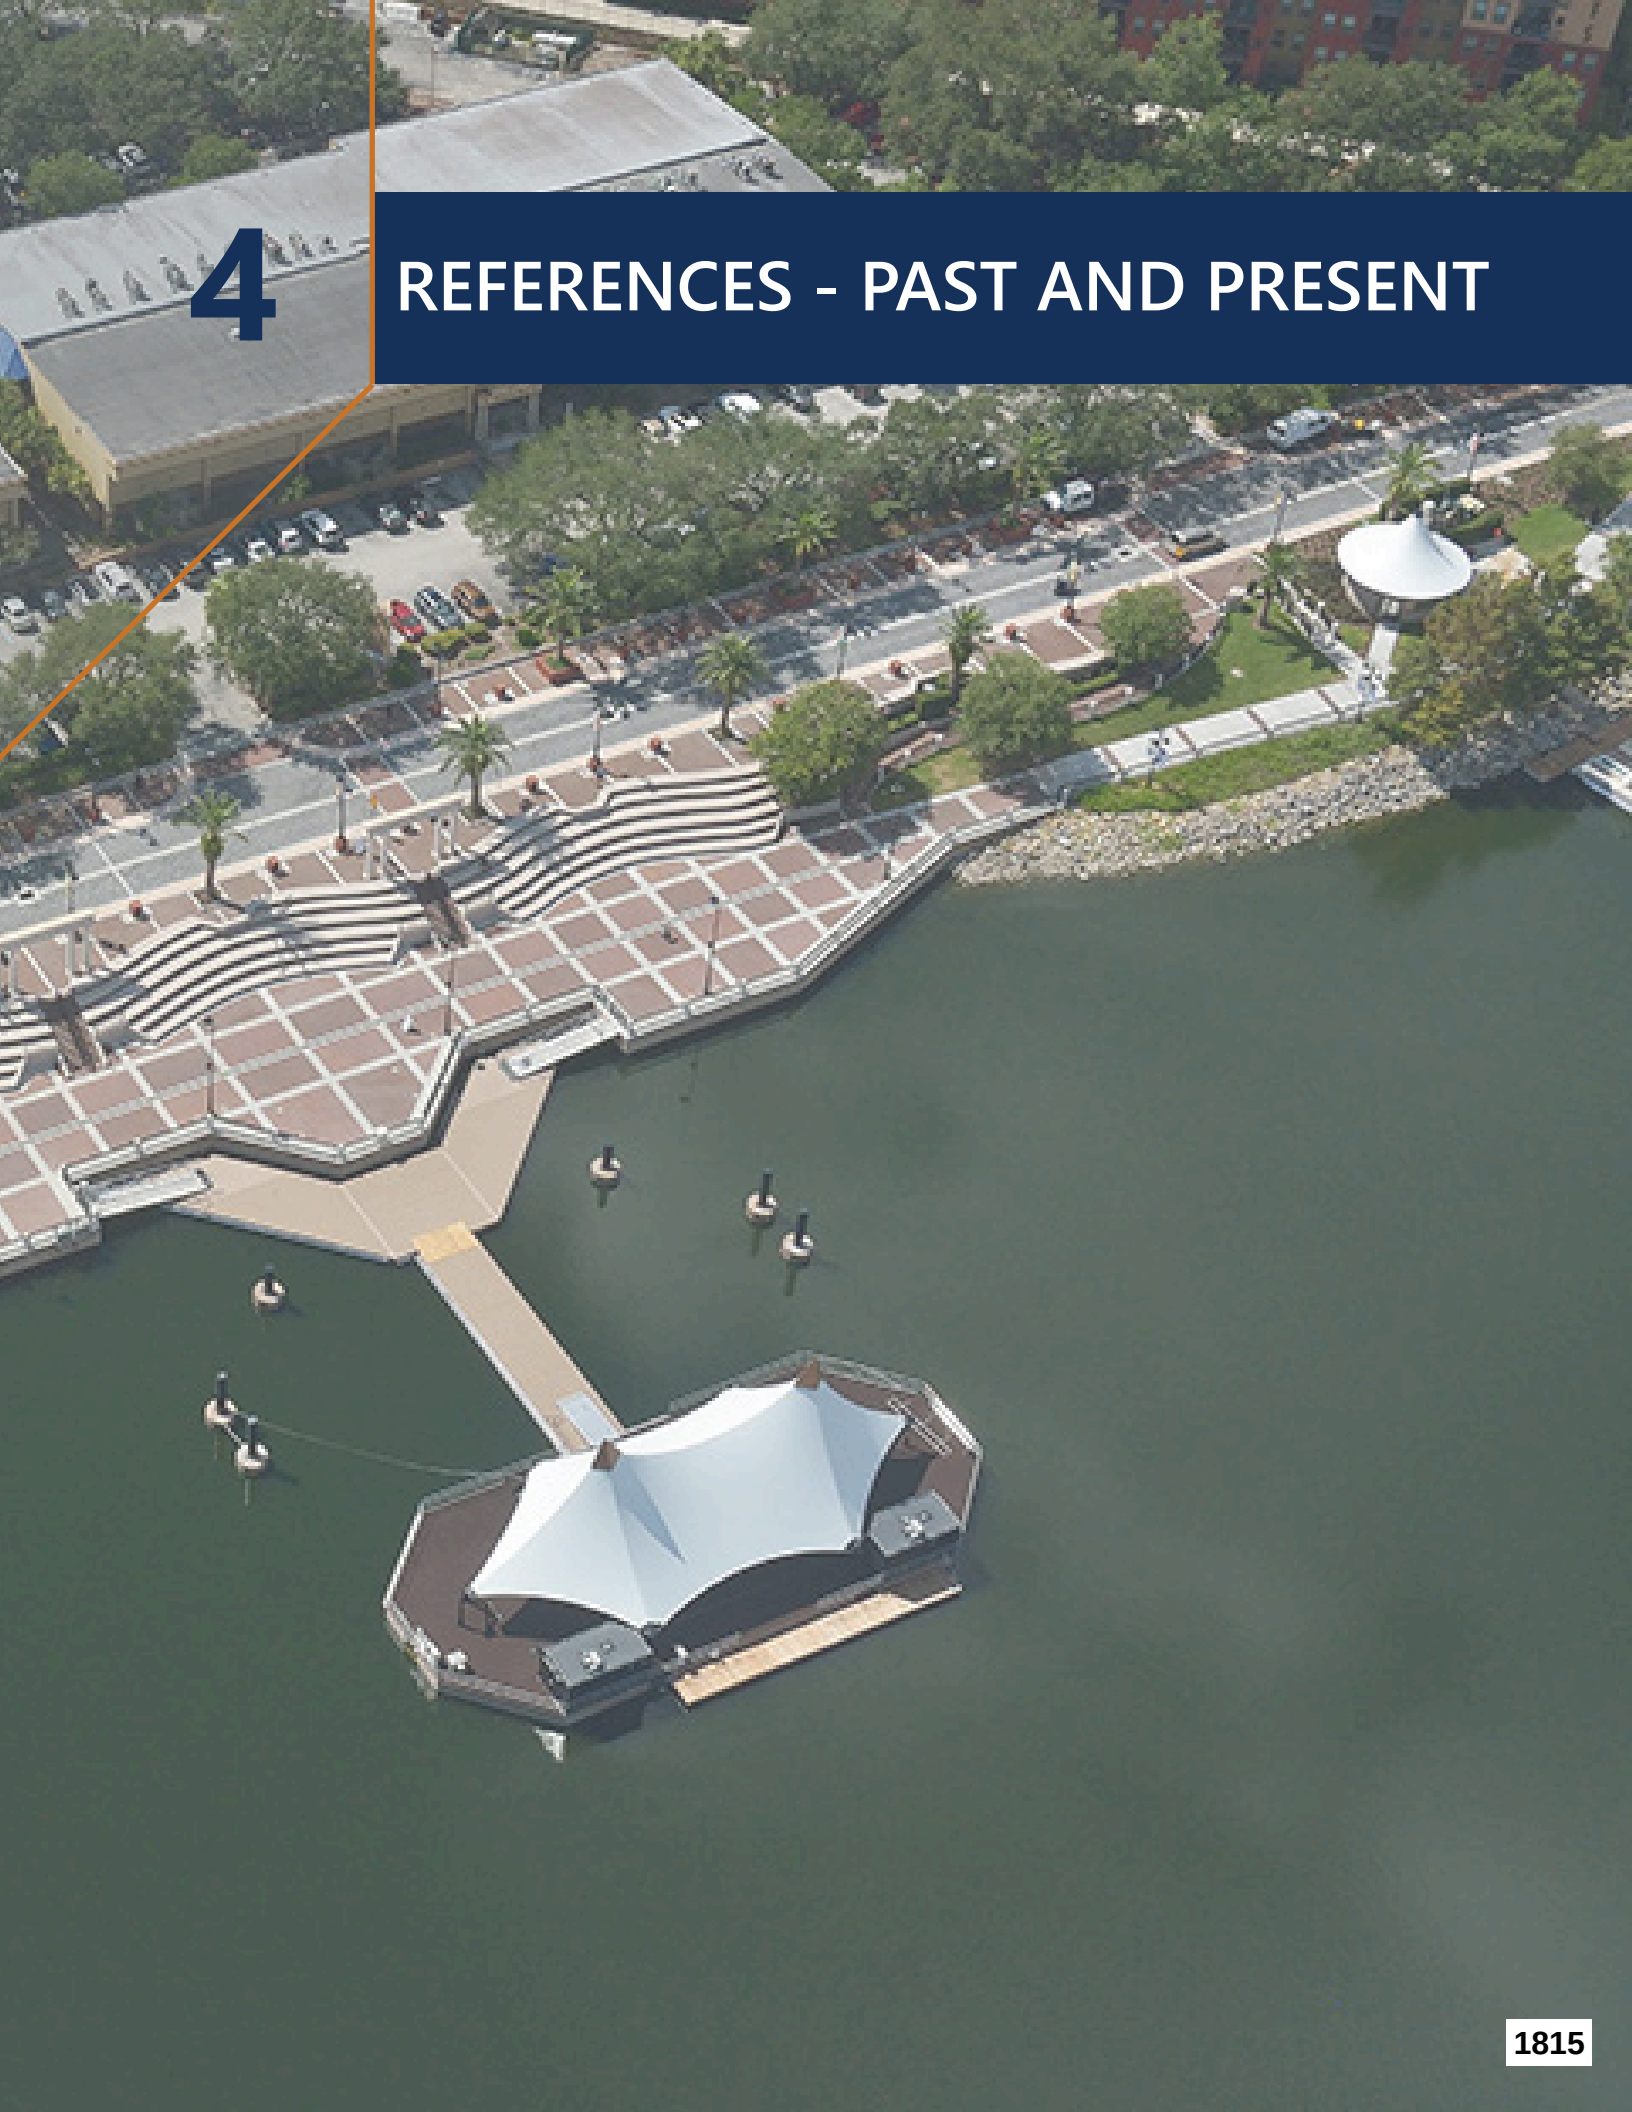
PRACTICAL SOLUTIONS Cost-effective design solutions are critical for the success of any project and are a key element in the control of construction costs. Bentley is experienced with the great variety of projects that may be assigned under continuing contracts. We know how to identify project tasks, predict long-lead items and coordinate with facility users to circumvent potential project difficulties. Generally, renovations and rehabilitations are a substantial part of continuing contracts. If not properly planned, the project may negatively affect the work of the facility's users. Bentley is well-versed in phased construction and keeping operations open throughout the construction period through means of detailed phasing plans and maintenance of traffic for both pedestrians and motor vehicle traffic.

3 PROJECT APPROACH / MANAGEMENT

A sample of specific examples of cost-effective engineering practices and designs Bentley has implemented on past projects include the following. The first group of practices are those that have been implemented on numerous projects. A sample of project-specific solutions follow.

- Bentley's utilization of recycled concrete base material for projects with shallow ground water tables is a cost-effective solution. Bentley has successfully used recycled base material on numerous parking lot and roadway facilities.
- All Bentley pavement sections, flexible and concrete, are designed for the specific use, the design vehicle, traffic volumes and the required design life of the facility. Bentley has extensive flexible and concrete pavement design experience, including the remediation of facilities that have failed due to poor construction controls or poor design by others.
- All Bentley designed storm sewer systems utilize the optional pipe material appropriate for the soil and environmental conditions. Proper location of storm structures is critical. Proper location and sizing saves construction costs and reduces long term maintenance and repair costs. The appropriate location of storm structures is in part dictated by the use. Locating structures outside of heavy wheel paths saves costs in structure fabrication, installation, and long-term maintenance costs. Locating structures in previous areas can mitigate construction costs, while decreasing the projects directly connected impervious area thereby improving the stormwater management design.

STAFF AND PROJECT EXPERIENCE Bentley has the experienced staff required for to meet project schedules and work within project budget constraints. Our engineering staff members total fourteen (14) professionals. Our civil staff includes six (6) professional engineers and three (3) engineering interns. Our civil staff has extensive experience in roadway, pedestrian facility, government facility, land development, park, and utility design as well as utility coordination. Our structural staff includes three (3) professional engineers and two (2) engineering interns. Our structural staff has extensive experience in park, building, miscellaneous structure (sign structures, lighting, signal, etc.), retaining wall, gantry, bridge and pedestrian facility design.



Hard Rock Stadium
Pedestrian Bridges and Tunnels

These Bentley professionals were key staff members for our Florida's Turnpike Enterprise SunTrax Phase 1 Operations and Storage Facility, Florida's Turnpike Enterprise SunTrax Phase 2 Infield, City of Miami Gardens Hard Rock Stadium Pedestrian Tunnels and Bridges, City of Casselberry Public Works Facility, City of Altamonte Springs Westmonte Park Reconstruction, Florida Department of Transportation I-75 Sumter County Rest Areas, Florida Department of Transportation A1A Sidewalk, City of Gainesville East Side Operations Facility, Florida Department of Transportation SR 30 Reconstruction, and Florida Turnpike Enterprise Polk Parkway Toll Facility projects.

These projects all had two things in common: they were all completed on time and within budget. Both SunTrax projects and the Hard Rock project had challenging accelerated schedules that the above group of professionals had no issue meeting. The scope of our Polk Parkway project was drastically changed after our Phase III plan submittal, due to significant pending criteria changes. However, the original plans production and letting date could not shift due to the late redesign. Bentley met the challenge and delivered the site plan on time and within budget. Our recent Consultant Quality Evaluation documents a score of 4 out of 5 for the "Ability to effectively administer construction contracts and keep the construction project on schedule." In addition, the Department made special note to mention "Bentley went above and beyond to coordinate with Central Office, Turnpike Specifications, and Tolls Design to coordinate, develop and submit new tolling pay items with quantities and still deliver on schedule."

4 REFERENCES - PAST AND PRESENT

A&E SERVICES FOR VERTICAL CONSTRUCTION PROJECTS

VOLUSIA COUNTY, FL

Client Name:
County of Volusia

Contact Information:
Laura Laser, AIA
Senior Architect, Volusia County
P: 386.736.5967 x 12323
E: llasser@volusia.org

Dates:
2015 - 2020; (2) two renewals for
(1) one year each

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Danielle van de Loo, PE, Civil Engineer
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer
Austin Granger, EI, Architect Intern

Project Status: Completed - Past Reference

Project Narrative:
The following projects are samples of our work under our **continuing contract:**

» **City Island Library:** Bentley provided an assessment of flood control measures for the City Island Library. The project included an assessment of the existing building envelope for anticipated future flood damage threat and potential mitigation methods to reduce the flood threat. Bentley coordinated the work with a marine engineering consultant and various manufacturers for passive flood control assemblies that could remain in place. Following the assessment, Bentley prepared construction documents for replacing the Library's existing doors with permanent glass flood barriers and pedestrian flood doors to minimize water intrusion into the building during flood events.

» **Spruce Creek Water Treatment Plant Reroof:** Bentley worked closely with Volusia County Engineering and Construction to replace an asphalt shingle roof at the end of its useful life on the water treatment plant. The design included new asphalt shingles, fascia, gutters, downspouts and splash blocks. The project faced material challenges and was completed during Covid-19 material shortages in 2021.

GAINESVILLE FIRE STATION NO. 1

GAINESVILLE, FL

Client Name:
City of Gainesville

Contact Information:
JoAnne E. Rice, Retired Deputy Fire Chief
P: 352.514.9718; 850.755.7320
E: jerice@cox.net;

Dates:
Completed 2018

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer

Other Team Members: Salas O'Brien, Ramski & Company, FCM Engineering

Project Status: Completed - Past Reference

Project Narrative:
The scope of this project included the design, permitting and construction administration for a **new fire station** for the City of Gainesville. The station includes typical fire station living quarters and operational offices, training room, 5 drive-thru apparatus bays and associated support spaces for laundry, equipment repair and storage functions, and various features to facilitate training. In addition to the fire station operational functions, this facility also serves as administrative **headquarters**, and includes offices for the Fire Chief, Deputy and Assistant Chiefs, fire inspectors and investigator and administrative support personnel, as well as conference and other support spaces. The fire station is a category IV emergency facility designed to resist a 135 MPH ultimate wind speed. Bentley master planned the 1.5 acre urban site that includes on-site stormwater retainage. Salas O'Brien designed the back-up generator with on-board fuel storage and automatic start. Ramski & Company designed the interior spaces. **Firehouse awarded the project the Career 1 Notable Award.**

FIREHOUSE SDA Station Design Awards

PROFESSIONAL A&E SERVICES - VARIOUS CITY BUILDINGS

ALTAMONTE SPRINGS, FL

Owner Name:
City of Altamonte Springs

Contact Information:
Steve Falk
Director of Leisure Services
P: 407.571.8733 E: SFalk@altamonte.org

Dates:
2013 - Present; 7 total (2) two year, (1) one year and (4) six month renewals

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Danielle van de Loo, PE, Civil Engineer
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer
Austin Granger, EI, Architect Intern

Other Team Members: Salas O'Brien
Project Status: Ongoing - Present Reference

Project Narrative:
As part of **continuing contract with the City of Altamonte Springs,** Bentley provided architecture and engineering services for various city buildings, including the following projects among many others.

- **Westmonte Park Redevelopment:** The redevelopment included a new multipurpose pool, new community center, new pavilion structures and new outdoor bathrooms building. Site improvements include an expanded parking area, new driveways, park sidewalks, tennis courts, pickle-ball courts, basketball courts and bocce courts. An underground stormwater management system was constructed under the parking and under the multipurpose field.
- **Cranes Roost Park Renovation:** Design included new roadway pavers, reconstruction and widening of park sidewalks, and installation of pavers throughout the Eddie Rose Amphitheater as well as the complete replacement of one of the two boardwalks spanning the Cranes Roost lake and the partial replacement of the other. A floating stage was rehabilitated as part of the project to include a new green room and bathroom facilities within the floating stage.

SUNTRAX VEHICLE TEST FACILITY - PHASES 1 & 2

POLK COUNTY, FL

Client Name:
Florida's Turnpike Enterprise (FTE)

Contact Information:
Florida's Turnpike Enterprise (FTE)
Josh Pedersen, Design Project Manager
Todd Kelly, Construction Project Manager
P: 407.264.3438; 407.264.3370
E: todd.kelly@dot.state.fl.us

Dates:
2019 - Present

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer
Austin Granger, EI, Architect Intern

Other Team Members: Salas O'Brien, Ramski & Company

Project Status: Under Construction - Present Reference

Project Narrative:
As part of a **continuing contract with Florida's Turnpike Enterprise**, Bentley served as the Architect and Engineer of Record for several new buildings that are part of the SunTrax Test Facility, a large-scale, cutting edge facility dedicated to the research, development and testing of emerging transportation technologies in safe and controlled environments. SunTrax includes a 2.25-mile oval track on a 400-acre site in Polk County designed to support high-speed testing of toll technologies, with multiple lanes and parallel tolled express lanes similar to those being constructed on many current highway widening projects throughout the state.

Phase 1 included Administrative and Warehouse facilities, sitework and toll equipment buildings.

For Phase 2, we served as part of Jacobs' design team to develop the 200-acre infield of the track which is expected to become a hub for automated and connected vehicle testing. Bentley's scope for Phase 2 includes continued partnership with FTE and Florida Polytechnic University as the the Architect and Engineer of record for the maintenance building, central utilities plant, workshops A & B, 8 vehicle support structures and guardhouse.

Slated to be complete by Spring 2022, SunTrax's 200-acre infield will feature various segmented testing environments to aid in the study of tolling technology, intelligent transportation systems and autonomous vehicles.

CASSELBERRY PUBLIC WORKS FACILITY

CASSELBERRY, FL

Client Name:
City of Casselberry

Contact Information:
Mark D. Gisclar
Public Works Director
P: 407.262.7725 x 1234
E: mgisclar@casselberry.org

Dates:
2019 - Present

Key Staff:
Gary Kranston, RA, Project Manager (PM)
Molly deVivero, PE, Task Work Order
Carlos Rexach, PE, Civil Engineer
Brenton Daily, PE, Structural Engineer
Joey Paleveda, PE, Structural Engineer
Gene Youngdahl, Senior Architectural Designer

Other Team Members: Salas O'Brien

Project Status: Under Construction - Present Reference

Project Narrative:
The Project consists of the phased demolition and renovation of the City's existing Public Works Facility to include a new Administration/Workshop Building, a Fleet Maintenance Building, a Chemical Storage Building and Covered Equipment Parking. In addition, the site will be developed to include new paved parking areas and driveways, emergency generator, dumpster enclosure, perimeter fence with sliding gate, and all necessary site and building utilities and infrastructure. Work also includes replacing the existing radio antenna and re-locating the existing 11,000 gallon above ground fuel tank and pumps.

This CMAR project included the conceptualization, planning, design and construction administration. The new facilities were constructed on the City's existing public works facility site and constant coordination between the City and the contractor was critical to ensure all construction activities did not impact the operations of the existing site. The project included a 33,000 SF Administration Building and a 16,000 SF Fleet Maintenance Building, both of which were designed as concrete tilt wall structures. Additionally, there was a covered parking area, retaining wall and relocation of the existing refueling facility.

DRUG-FREE WORKPLACE CERTIFICATION

A. The below Firm certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violation of such prohibition.

(b) Establishing an on-going drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace.
(2) The employer's policy of maintaining a drug-free workplace.
(3) Any available drug counseling, rehabilitation, and employee assistance programs, and
(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace.

(c) Making it a requirement that each employee to be engaged in the performance of this contract be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under this contract, the employee will:

(1) Abide by the terms of the statement; and

(2) Notify the Employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the City of New Smyrna Beach, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Consultants of convicted employees must provide notice, including position and title to: City Clerk/Administrator, City of New Smyrna Beach, 210 Sams Avenue, New Smyrna Beach, FL 32168.

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is convicted.

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended, or

(2) Requiring such employee to participate satisfactorily in drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State or local health, law enforcement, or other appropriate agency.

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

B. The Firm may insert in the space provided below the site(s) for the performance of work done in connection with the specific contract:

RFQ 10-22-ENG: CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

Addendum 1: February 2, 2022

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to RFQ 10-22-ENG, Continuing Professional Architectural Services, released on January 15, 2021.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum. Please note, questions are recorded as they are received, including grammar and spelling errors.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation as though it had been issued at the same time, and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The Bid opening remains February 14, 2022 at 3:00 PM.

VENDOR QUESTIONS:

1. Can the City provide a list of Capital Improvement Projects that they anticipate being performed under this professional services agreement?

   Answer: At this time a list of capital improvement projects is not readily available

ALL OTHER AREAS OF THE BID DOCUMENT REMAINS THE SAME

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ **Go to *www.irs.gov/FormW9* for instructions and the latest information.**

Give Form to the requester. Do not send to the IRS.

Print or type. See **Specific Instructions** on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.

Bentley Architects + Engineers, Inc.

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☑ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from FATCA reporting code (if any) _____

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.

651 W Warren Ave, Ste 200

Requester's name and address (optional)

6 City, state, and ZIP code

Longwood, FL 32750

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN,* later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–		–				

or

Employer identification number

5	9	–	3	0	4	5	3	2	1

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person ▶** William Bentley **Date ▶** 12/20/2021

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

CONFLICT OF INTEREST STATEMENT

State of Florida: City of Longwood

Before me, the undersigned authority, personally appeared Gary Kranston who was duly sworn, deposes, and states:

1. I am the Vice President of Architecture of Bentley Architects + Engineers with a local office in Longwood, FL (City & State) and principal office in Longwood, FL (City & State).
2. The above named entity is submitting an Expression of Interest for the City of New Smyrna Beach project described as **RFQ 10-22-ENG, Continuing Professional Architectural Services.**
3. The Affiant has made diligent inquiry and provides the information contained in this Affidavit based upon his/her own knowledge.
4. The Affiant states that only one submittal for the above project is being submitted and that the above named entity has no financial interest in other entities submitting proposals for the same project.
5. Neither the Affiant nor the above named entity has directly or indirectly entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive pricing in connection with the entity's submittal for the above project. This statement restricts the discussion of pricing data until the completion of negotiations and execution of the Agreement for this project.
6. Neither the entity nor its affiliates, nor anyone associated with them, is presently suspended or otherwise ineligible from participating in contract lettings by any local, state, or federal agency.
7. Neither the entity, nor its affiliates, nor anyone associated with them have any potential conflict of interest due to any other clients, contracts, or property interests for this project.
8. I certify that no member of the entity's ownership, management, or staff has a vested interest in any aspect of or Department of City of New Smyrna Beach.
9. I certify that no member of the entity's ownership or management is presently applying for an employee position or actively seeking an elected position with City of New Smyrna Beach.
10. In the event that a conflict of interest is identified in the provision of services, I, on behalf of the above named entity, will immediately notify City of New Smyrna Beach in writing.

NON-COLLUSION AFFIDAVIT OF PROPOSER

State of FLORIDA

County of SEMINOLE

Gary Kranston, RA, being first duly sworn, deposes and says that:

He/she is Vice President of Bentley Architects + Engineers, Proposer that has submitted the attached bid or Request for Qualifications;

He/she is fully informed respecting the preparation and contents of the attached bid and of all pertinent circumstances respecting such bid;

Such bid is genuine and is not a collusive or sham bid;

Neither the said Proposer nor any of its officers, partners, owners, agent representatives, employees, or parties in interest, including this affiant, has in any way colluded, conspired, connived or agreed, directly or indirectly, sought by agreement or collusion or communication or conference with any other Proposer, firm or person, to fix the price or prices in the attached Proposal or of any other Proposer, or to fix any overhead, profit or cost element of the Proposal price or the Proposal price of any other Proposer, or to secure through any collusion, conspiracy, connivance or unlawful agreement any advantage against the CITY OF NEW SMYRNA BEACH, FLORIDA, or any person interested in the proposed Contract; and

The price or prices quoted in the attached Proposal are fair and proper and are not tainted by any collusion, conspiracy, connivance or unlawful agreement on the part of the Proposer or any of its agents, representatives, owners, employees, or parties in interest, including this affiant.

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(A), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. THIS SWORN STATEMENT IS SUBMITTED TO City of New Smyrna Beach

by Gary Kranston, RA, VP of Architecture
(Print Individual's Name and Title)
for Bentley Architects + Engineers, Inc.
(Print Name of Entity Submitting Sworn Statement)
whose business is 651 W. Warren Avenue, Suite 200, Longwood, FL 32750

and (if applicable) its Federal Employer Identification Number (FEIN) is 59-3045321

2. I understand that a "public entity crime" as defined in Paragraph 287.133 (1)(g), Florida Statutes, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in Paragraph 287.133(1)(b), Florida Statutes, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statutes, means:

    a. A predecessor or successor of a person convicted of a public entity crime; or

    b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months shall be considered an affiliate.

5. I understand that a "person" as defined in Paragraph 287.133(1)(e), Florida Statutes, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders,

employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. (Indicate which statement applies).

__X__ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, nor any affiliates of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list. (Attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 (ONE) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR A CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

CONTRACT RENEWAL
FOR PROFESSIONAL ARCHITECTURAL SERVICES
CPH CONSULTING, LLC. (DBA; CPH, LLC.)

WHEREAS, the City of New Smyrna Beach (City) requested qualifications for **PROFESSIONAL ARCHITECTURAL SERVICES**, via **RFQ 10-22-ENG**; and

WHEREAS, the City accepted the qualifications of **CPH CONSULTING, LLC.**, (Firm); and

WHEREAS, the parties desire to enter into the first of two (2) possible one (1) year renewals of the contract pursuant to the **RFQ.**

NOW, THEREFORE, THE CITY AND **CPH CONSULTING, LLC.,** AGREE AS FOLLOWS:

1. The City and **CPH CONSULTING, LLC.** agree to all the terms and conditions as stated and contained in the Professional Services Agreement, **RFQ 10-22-ENG**, including, any/all Attachments, Addenda, and the firm's Request for Proposals response submitted, each being by reference incorporated herein. The respective rights and obligations of the parties shall be determined in accordance with the City's **RFQ**, the **RFQ** Response of the firm, and Florida law.

2. The term of this contract renewal agreement is for one year and is the first of two (2) possible one (1) year renewals.

3. The parties agree to the terms of this contract. This renewal agreement for this contract is from _____, 2025 and will continue for a year from that date.

AGREEMENT FOR CPH CONSULTING, LLC. (DBA; CPH, LLC.) CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

THIS AGREEMENT is made and entered into this 28th day of June, 2022, by and between **CPH Consulting, LLC. (dba; CPH, LLC.),** duly authorized to conduct business in the State of Florida and whose address is 500 West Fulton Street, Sanford, Florida 32771, hereinafter, called "CONSULTANT," and the **CITY OF NEW SMYRNA BEACH**, a political subdivision of the State of Florida, whose address is 210 Sams Ave., New Smyrna Beach, FL, hereinafter called "CITY."

SECTION 1. AGREEMENT. The terms of this Agreement, together with the incorporation of the terms and conditions of the **RFQ 10-22-ENG**, Continuing Professional Architectural Services, **FOR THE CITY OF NEW SMYRNA BEACH** and any exhibits, schedules, and attachments hereto, and any and all amendments relating to same, and any and all submittals from CONSULTANT, constitute the entire Agreement between the individual City and CONSULTANT. This Agreement is the final, complete and exclusive expression of the terms and conditions of the parties' Agreement. Any and all prior agreements, representations, negotiations, and understandings made by the parties, oral or written, expressed or implied, are hereby superseded and merged herein.

SECTION 2. TERM OF AGREEMENT. The initial term of this Agreement shall be for three (3) years from the date of the award. After the initial term, this Agreement shall automatically renew for two (2) optional, automatic, (1) year periods. The maximum term for this Agreement and all renewals is a cumulative term of five (5) years.

SECTION 3. DESCRIPTION OF SERVICES. The Consultant agrees to perform the services outlined in the advertised solicitation document titled **RFQ 10-22-ENG**, Continuing Professional Architectural Services, and in the Consultant's submitted Proposal.

The Consultant shall diligently and in a professional and timely manner perform and provide these services. Unless modified in writing by the parties hereto, the duties of the Consultant shall not be construed to exceed the provision of the services pertaining to this Agreement.

The City and Consultant agree that there may be certain additional services required to be performed by the Consultant during the performance of the contract that cannot be defined sufficiently at the time of execution of this Agreement. These services shall be authorized in writing as an amendment to the contract and may contain additional instructions or provide specifications upon certain aspects of this Agreement pertaining to the work to be undertaken.

SECTION 4. COMPENSATION. For Services rendered, the CITY shall pay the CONSULTANT based on their fee schedule provided. Unless otherwise agreed in a Scope of Services, the CONSULTANT shall invoice the City monthly based upon the CONSULTANT's fees for services completed during the billing period.

SECTION 5. COMPONENT PARTS OF THE CONTRACT. This Contract consists

of the following contract documents, all of which are hereby made a part hereof as if herein set out in full and all of which are familiar to the Contractor:

A. City Advertised Bid
B. Addendums
C. Award Bid Proposal w Fee Proposal
D. Certificate of Insurance

SECTION 6. CONTROLLING LAW, VENUE, AND ATTORNEY'S FEES. This Agreement is to be governed, construed, and interpreted by, through and under the laws of Florida. Venue for any litigation between the parties to this Agreement shall be in the County of Volusia, Florida and any trial shall be non-jury. The prevailing party in any litigation arising from or related to this Agreement shall be reimbursed reasonable attorney fees and costs, including all fees and costs of an appeal.

SECTION 7. RIGHTS AT LAW RETAINED. The rights and remedies of the City, provided for under this Agreement, are in addition and supplemental to any other rights and remedies provided by law.

SECTION 8. NOTICES. Whenever either party desires to give notice unto the other, it must be given by written notice, sent by registered or certified United States mail, return receipts requested, addressed to the party for whom it is intended at the place last specified. The place for giving of notice shall remain such until it shall have been changed by written notice in compliance with the provisions of this Section. For the present, the parties designate the following as the respective places for giving of notice, to-wit:

For City:
Kelly McQuillen, City Clerk
City of New Smyrna Beach
210 Sams Ave.
New Smyrna Beach, FL 32138
(386)410-2637

CPH, LLC.
David A. Gierach, President
(Name, Title)

CPH, LLC.
(Company)

500 West Fulton Street
(Address)

Sanford, FL 32771
(City, State, Zip)

407-322-6841
(Phone)

SECTION 9. MODIFICATIONS TO AGREEMENT. This Agreement and any exhibits, amendments and schedules may only be amended, supplemented, modified or canceled by a written instrument duly executed by both parties hereto of equal dignity herewith.

SECTION 10. SEVERABILITY. If during the term of this Agreement, it is found that a specific clause or condition of this Agreement is illegal under federal or state law, the remainder of the Agreement not affected by such a ruling shall remain in force and effect.

SECTION 11. WAIVER OF JURY TRIAL. The City and Consultant have specifically waived the right to a jury trial concerning any disputes which may arise concerning this agreement.

SECTION 12. EFFECT OF FAILURE TO INSIST ON STRICT COMPLAINCE WITH CONDITIONS. The failure of either party to insist on strict performance of any covenant or condition of this contract, or to exercise any option herein contained, shall not be construed as a waiver of such covenant, condition, or option in any other instance. This contract cannot be changed or terminated orally.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the date written above for execution by the City of New Smyrna Beach.

RE: CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES | RFQ 10-22-ENG

Dear Selection Committee Members:

Thank you for the opportunity to express our interest in providing services for the Continuing Professional Architectural Services Contract. As a capable professional services firm with fourteen (14) offices, including two nearby in DeLand and Sanford, we have the project management skills and qualified personnel who will coordinate and carry projects forward to successful completion for the City.

MULTI-DISCIPLINARY FIRM WITH EXTENSIVE IN-HOUSE RESOURCES

CPH's architectural practice began in 2004 with the addition of one architect, and has grown to over 25 team members (including five (5) licensed architects). The firm also added in-house mechanical/electrical/plumbing engineers in 2012, and structural engineers in 2014. Combined with our already established design practice that included civil/utility/transportation engineers, planners, landscape architects, surveyors, and construction managers, CPH provides a comprehensive architecture and engineering team. Our team has been creating sustainable places to live, work, learn and play. Our portfolio of completed projects, has given us the insight and expertise that will allow us to successfully complete any project under this contract for the City of New Smyrna Beach. CPH's team has a high percentage of implementation as it relates to the master plans and concepts that have been imagined by our creative team. We understand how important it is to create a space that functions not only now, but for the long term.

LOCAL OFFICE WITH 250+ STAFF MEMBERS

During this time period, CPH has quickly become a leader in architecture, urban design, and interior space design. The team is fully staffed to provide Architecture, Urban Planning and Design, LEED® Analysis and Design, Master Planning, Interior Design, Urban Design, Programming, Space Needs Assessment and Planning, Cost Estimating, and Program Management services. Our architects have provided space planning and complete design services for over 300 buildings including numerous fire stations, EOC's, police stations, parks, public works facilities, fire aid centers, training facilities, and medical complexes. Our projects have included new projects as well as expansions and remodel programs. Our team has completed projects that range from gateway enhancements, fire/police stations, to historic renovation projects.

We appreciate the opportunity to submit our qualifications and look forward to working with the City of New Smyrna Beach.

CONTINUALLY RANKED IN TOP 500 DESIGN FIRMS IN THE UNITED STATES

Sincerely,
CPH, Inc.

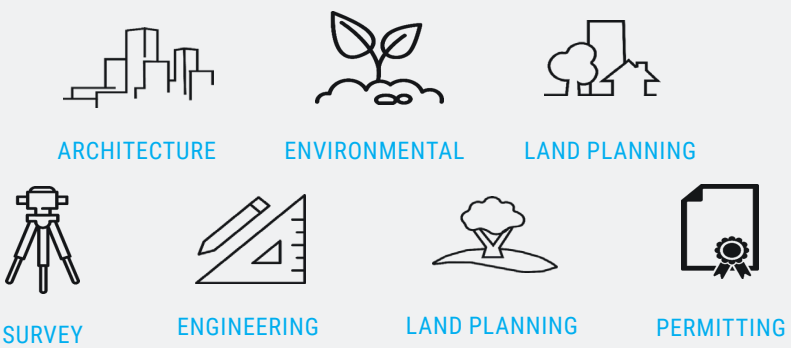
FIRM OVERVIEW

CPH prides itself in its capability to "provide quality and innovation for design and construction." In every aspect of the business, CPH takes pride in providing timely, cost effective and appropriate engineering services to support its clients and help them achieve their objectives. Known as a leading multi-disciplinary consulting engineering firm, CPH provides services in the following areas:



- Architectural Services/ Landscape Architecture
- Engineering Services (Civil, Structural, and Utilities)
- Transportation Engineering, including Traffic Planning and Design
- Construction Engineering and Inspection/Construction Management
- Master Planning
- Water/Wastewater/ Reclaimed/Stormwater Systems
- Hydraulics and Hydrology
- Environmental Sciences
- Land Planning/Zoning
- Surveying & Mapping
- Other related fields

The Firm has been providing services in the area since the 1960's and the Firm has been established since 1981 with 40+ years of experience as a privately-owned Florida Corporation. In keeping with the company's philosophy to assure responsive and cost effective service, CPH has grown with branch offices housing approximately 250+ employees in Florida, Georgia, Maryland, Massachusetts and Puerto Rico with the firm's Corporate Headquarters located in Sanford, Florida. CPH's commitment to providing the highest level of service in an affordable manner has been achieved through emphasis on personalized services and direct involvement of top level CPH personnel, especially the owners of the corporation.

CPH's architectural practice began in 2004 with the addition of one architect and has grown to over 25 team members (including five (5) licensed architects). The firm also added in-house MEP engineers in 2012, and structural engineers in 2014. Combined with our already established design practice that included civil/utility/transportation engineers, planners, landscape architects, surveyors, and construction managers, CPH provides a comprehensive architecture and engineering team. Our team has been creating sustainable places to live, work, learn, and play.

AREAS OF SERVICE

FIRM'S HEADQUARTERS:
500 W Fulton St. Sanford, FL 32771

LOCAL BRANCH OFFICE:
101 N. Woodward Blvd, Suite 305, DeLand, FL 32720

FIRM SIZE:
CPH has ten (10) offices in the State of Florida with support of approximately 250 personnel throughout the company to assist in this project for the City.

II - EXPERIENCE AND QUALIFICATIONS

CPH has assembled a vastly diverse and highly qualified team with experience in all discipline areas requested by the City of New Smyrna Beach Our team is capable of providing services for any project that may emerge under this contract. The CPH Team Organizational Chart (provided below) depicts the overall reporting and communication hierarchy as well as project roles and responsibilities in relation to the City's scope of services.

NIKHEL JINDAL, GCC, ASSOC. DBIA, ENV SP

23 YEARS | 20 YEARS AT CPH

PRINCIPAL-IN-CHARGE

Mr. Jindal serves the firm of CPH as Vice President/Associate and assists the team with the development of projects ranging from complete streets to building development projects. He has over 23 years of experience in public and private projects, with project values ranging from $75,000 to over $100 million in construction value. Mr. Jindal has been part of the team that has completed projects that include streetscapes, trails/pedestrian improvements, parks, stormwater improvements, pipeline and pump stations, and water/wastewater treatment plant projects. He has assisted the CPH team with project coordination and management, conceptual design, and public outreach and communication. In addition, Mr. Jindal has assisted the team in alternative delivery projects that include Design-Build, Progressive Design-Build and Construction Manager At Risk. Mr. Jindal holds his Associate DBIA certification from the Design-Build Institute of America and is an Envision Sustainability Professional recognized by the Institute for Sustainable Infrastructure.

SIMILAR PROJECTS

Melching Field Stadium Renovations - Design Criteria Package

- CPH was selected to provide professional services for the creation of the Design Build Criteria Package for the Melching Field Stadium Renovations.
- CPH's scope for the Design Build Criteria Package will include a report detailing ADA deficiencies, structural analysis of the existing of the bleacher deck, design/build contract requirements, design development drawings and performance specifications.
- CPH's services for this project include Architectural, Civil, Surveying, Structural, Mechanical, Electrical, Plumbing, Fire Protection and Landscape Architecture.
- Upon completion of the D/B Package, CPH will also assist the owners with delivering this information to the final Design/Build team.

Leesburg Aquatic Facility

- CPH is providing planning, design, and permitting for the development of a regional aquatic facility. The facility will include an eight (8) lane competition facility designed to USA Swimming standards for high school competitions.
- The facility will also include a recreational pool with interactive play features, zero entry and a "free" swim area that can be utilized for swim education. Along with the recreational pool will be a water slide, shaded areas for party rentals, and shower facilities.
- The complex will include an entry/ticket building, concession building, changing/locker facilities, and mechanical/equipment areas.

West Leesburg Neighborhood Resource Center Project (CMAR)

- CPH was commissioned to design a new 9,000 SF Neighborhood Resource Center for the City of Leesburg.
- CPH is responsible for full design services including survey, civil, landscape, architectural and MEP.
- The Center will include meeting room spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a Kitchen / Café facility.

Joe Moody Park

- CPH is providing design for reconstruction of a park facility that was damaged due to hurricanes. The new facility will include: 8,000 SF community center building, a restroom building utilizing a Client provided proto-type, walk/jog track, lighting, playgrounds for ages 2-5 and ages 5-12, landscape and irrigation, tree replacement, hardscape to include benches, trash receptacles, signage, parking improvements, stormwater retention, outdoor fitness areas, redevelopment of the wetland edge including scenic overlook, disk golf course re-establishment, and demolition of the existing boardwalk. The new 8,000 SF community building will be designed with spaces that are multi-use and multi-functional to support meeting/gathering/reunions/recreational activities. The space will include offices and meeting space for support staff, a catering kitchen, restrooms, lobby, and storage.

Bartow Public Works Administration and Solid Waste Administration Buildings

- Architecture and Engineering for two new buildings for Public Works and Solid Waste Departments Equaling 8,000 SF
- Project Included Prototype Development and Site Adaptation
- As part of the project, provided master planning for each site to provide phasing and future build out of each site
- Included site analysis and development review services as well as programming and stakeholder meetings

EDUCATION / LICENSES

- A.S. in Multimedia Design, Valencia Community College
- Organizational Communications, Rollins College, Design-Build Certification - AS-2897
- Envision Sustainability Professional - 42882
- Government Contractor Certificate - 0047

BROOK K. SHERRARD, AIA, NCARB

23 YEARS | 2 YEARS AT CPH

PROGRAM MANAGER

Mr. Sherrard services CPH as a Senior Architect, with more than 23 years of experience. Mr. Sherrard has completed more than 6.4 million SF of projects and is leading the firm's Building Information Modeling (BIM) and sustainability initiatives. Brook's leadership has ensured that our clients are provided with a coordinated set of documents and 3D models to communicate the design intent at all phases of the project. He has also provided training to in-house architects and has set up standards and procedures to create consistency in document production throughout the firm. In addition, Brook has experience designing projects according to LEED® Certification guidelines, including the first new complete high school to achieve a Silver rating under the LEED® for Schools 2.0 rating system in the State of Florida at Weeki Wachee High School in Hernando County.

SIMILAR PROJECTS

West Leesburg Neighborhood Resource Center Project (CMAR)

- CPH was commissioned to design a new 9,000 SF Neighborhood Resource Center for the City of Leesburg.
- CPH is responsible for full design services including survey, civil, landscape, architectural and MEP.
- The Center will include meeting room spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a Kitchen / Café facility.

Leesburg Teen Center (CMAR)

- 10,000 SF addition to an existing recreation center.
- The Leesburg Teen Center is multi-use facility that houses after school programs for youths ages 5-18.
- The addition also serves as a re-imaging of the main entry into the existing recreation center.

J.D. & N.J. LEWIS HOUSE

- CPH proposed constructing a gazebo that preserves the distinctive roof line of the building supported by a skeletal structural framework that mimics the original buildings detailing and fenestration. To complete the effect, the floor within the gazebo will be a stamped concrete to match the original houses hardwood floor. Visitors the Gazebo at the Longwood Memorial Gardens cemetery will be able to get out the sun and rain and experience the space within the historic home as well as learn a little about its history.

Bartow Public Works Administration and Solid Waste Administration Buildings

- Architecture and Engineering for two new buildings for Public Works and Solid Waste Departments Equaling 8,000 SF
- Project Included Prototype Development and Site Adaptation
- As part of the project, provided master planning for each site to provide phasing and future build out of each site
- Included site analysis and development review services as well as programming and stakeholder meetings.

Pasco County Facilities & Maintenance Central Office and Warehouse

- Shared use warehouse and office facility supporting three separate departments
- Two-bay loading dock for semi-trailer and box trailer deliveries
- Concrete Tilt-Wall construction
- Optimized Program developed by workshop with three separate departments to maximize shared use opportunities.
- Comprehensive CPH design team with full implementation of Building Information Modeling (BIM) to ensure discipline coordination.
- Utilization of the building information model to develop opinion of probable cost estimates.

EDUCATION / LICENSES

- M.S. in Architecture, University of South Florida, School of Architecture and Community Design
- B.S. in Applied Technology/Business, Florida Institute of Technology
- A.S. in Life Sciences, Harrisburg Area Community College
- Registered Architect – FL (No. AR92948) , American Institute of Architects (AIA), National Council of Architectural Registration Boards (NCARB)

JOHN A. BAER, AIA, NCARB, LEED AP BD+C, GGP

43 YEARS | 15 YEARS AT CPH

QA/QC

Mr. Baer serves as CPH's Director of Architecture for the firm's work in the United States and Puerto Rico. He has more than 43 years of experience in the master planning, design, and permitting of public projects including parks, sports fields, and civic centers. John has extensive experience working with design-build projects from working exclusively with a design-build firm, prior to his employment at CPH to the extensive alternative delivery projects completed while at CPH. In fact, John has managed over $100 Million in Alternative Delivery projects while at CPH over the fifteen years, including the development of the Design Criteria Package for the City of DeLand for Spec Martin Stadium. John leads and manages a very talented team of architects, engineers, designers and coordinators. He constantly works to streamline process and reduce cost to help clients maximize return on their investments.

SIMILAR PROJECTS

Spec Martin Stadium Design Criteria Package Design Criteria Package and Earl Brown Park Improvements

- Selected by the City of DeLand for the Spec Martin Stadium Improvements Design/Build Criteria Package
- The project required the development of the design/build criteria package and professional services to assist the City during the selection process
- Included a new press box, training room and locker room additions
- The stadium will be used by the local high school as well as Stetson University; therefore, the stadium improvements were designed to meet collegiate level demands

Dr. Joyce M. Cusak Community Resource Center

- CPH is providing Architectural Design, Civil Engineering, Surveying, Landscape Design and Post Design Services.
- 2,500 SF building including a parking area.

West Leesburg Neighborhood Resource Center Project (CMAR)

- CPH was commissioned to design a new 9,000 SF Neighborhood Resource Center for the City of Leesburg.
- CPH is responsible for full design services including survey, civil, landscape, architectural and MEP.
- The Center will include meeting room spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a Kitchen / Café facility.

Melching Field Stadium Renovations - Design Criteria Package

- CPH was selected to provide professional services for the creation of the Design Build Criteria Package for the Melching Field Stadium Renovations.
- CPH's scope for the Design Build Criteria Package will include a report detailing ADA deficiencies, structural analysis of the existing of the bleacher deck, design/build contract requirements, design development drawings and performance specifications.
- CPH's services for this project include Architectural, Civil, Surveying, Structural, Mechanical, Electrical, Plumbing, Fire Protection and Landscape Architecture.
- Upon completion of the D/B Package, CPH will also assist the owners with delivering this information to the final Design/Build team.

Florida Department of Health – Ocala Medical Center Remodel

- CPH provided architecture, structural engineering, mechanical/electrical/plumbing design, schematic design, design development, and permitting services to the Florida Department of Health for the renovation of the Ocala Medical Facility.
- The project consisted of a remodel involving upgrade of casework in approximately 25 spaces involving exam rooms, teller stations, medical administration activities.

EDUCATION / LICENSES

- B.S. in Architectural Studies, University of Milwaukee
- A.S. in Civil Structural Technology, Northwest Technical Institute
- Registered Architect - FL (No. AR93193)
- LEED Accredited Professional
- American Institute of Architects (AIA)
- Green Globes Professional (GGP)
- National Council of Architectural Registration Boards (NCARB)
- Florida Green Building Coalition (FGBC)

GALEN PUGH, RLA, ALCP

32 YEARS | 9 YEARS AT CPH

LANDSCAPE ARCHITECT

Mr. Pugh serves the firm and its clientele in the capacity of Registered Landscape Architect. Mr. Pugh has over 32 years of governmental and private Landscape Architecture experience. This experience includes working as a Sr. Landscape Architect and a Sr. Planner. He additionally provided professional services such as procurement of consultants, directing and reviewing the preparation of site plans, construction documents and landscape plans. Galen coordinated the public participation process and conducted public and steering committee meetings.

SIMILAR PROJECTS

Sanford 1st Street Streetscape Improvements

- Provided the City of Sanford a streetscape design package for a 6 block section of historic First Street (approximately 0.40 miles). The intent of this project is to closely match the streetscape of improvements previously completed on First Street. Designed the Roadway, Landscape, Architecture, and Utility Plans and prepared Specifications for the complete reconstruction of the roadway, including several utility upgrades.

Casselberry Wirz Park Planning & Preliminary Design

- The CPH team was tasked with holding multiple stakeholder meetings in order to develop a reinvestment program and update the facility's master plan. As part of the overall park the new design included:
- A New entrance, Relocation of maintenance building, Expansion of the existing community building, A New outdoor terrace, An Event patio with 20' x 20' pavilion, Splash pad, Zero entry pool with interactive features, 5 lane/25-meter pool, Shade structures, Volleyball courts, Basketball courts, A Playground and Trail upgrades

Pinellas Park

- The project will include Survey, Master Drainage plan, Master plan feasibility study/evaluation and update, including existing and proposed land uses and phase 1 design for new downtown City Center. The project study area includes approximately 60 acres of downtown property.

Joe Moody Park

- CPH is providing design for reconstruction of a park facility that was damaged due to hurricanes. The new facility will include: 8,000 SF community center building, a restroom building utilizing a Client provided proto-type, walk/jog track, lighting, playgrounds for ages 2-5 and ages 5-12, landscape and irrigation, tree replacement, hardscape to include benches, trash receptacles, signage, parking improvements, stormwater retention, outdoor fitness areas, redevelopment of the wetland edge including scenic overlook, disk golf course re-establishment, and demolition of the existing boardwalk. The new 8,000 SF community building will be designed with spaces that are multi-use and multi-functional to support meeting/gathering/reunions/recreational activities. The space will include offices and meeting space for support staff, a catering kitchen, restrooms, lobby, and storage.

Sanford's US 17-92 Beautification, Phase I & II

- Provided planning and design services for two phases of beautification on US 17-92. Specifically the proposed improvements included decorative lighting, traffic signals, crosswalks, median and intersection improvements and paver utility strips.

EDUCATION / LICENSES

- Bachelor of Landscape Architecture, Louisiana State University, 1989
- Professional Landscape Architect Licensed in Florida, Louisiana and Texas; American Institute of Certified Professionals (AICP)

ISMAIL ILKER UZUN, AIA, LEED AP BD+C

31 YEARS | 7 YEARS AT CPH

ARCHITECTURE

Ilker serves CPH as a Project Architect and has more than 31 years of experience in project management and architecture. Ilker has successfully managed and designed various development programs including commercial/retail, mixed-use, office, financial, industrial, and residential projects. Ilker has been instrumental in the development and maintenance of the development program for one of CPH's large national retail clients. Ilker manages all phases of development from Schematic Design through to Construction Administration for new facilities, redevelopment, and ADA compliance. Located in our Miami office, Ilker is specially skilled in South Florida design challenges and permit expediting.

SIMILAR PROJECTS

Monroe County Fire Station – Cudjoe Key

- CPH is providing pre-design phase/programming, Schematic Design, Design Development, Construction documents, Bidding and Permitting assistance, and Construction Administration for a new Fire Station on Cudjoe Key.
- Additional services provided will be site plan review, civil engineering, landscape architecture, and FDOT Review and Florida Green Build criteria. The building will be designed to meet or exceed Florida Green Building Coalition (FGBC) standards.

City of Lake Worth - Office Addition

- CPH provided design and construction related services for this interior renovation design which consisted of the removal of a janitor's room and combination of that area with the existing storage room to create a new office in the City of Lake Worth Water Plant.

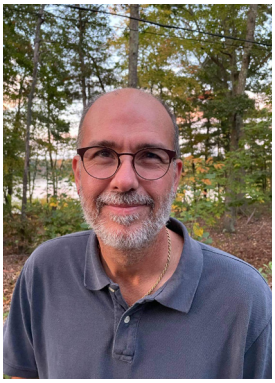
PWWM - Public Works and Waste Management 58th Street Master Plan

- Master plan conceptual design for a 42+ acres portion of the existing Public Works and Waste Management site
- Provided space programming, concept design, and master planning of public works/waste services complex.
- The project included reconfiguration of site, moving existing buildings, and has components such as administration offices, fuel and hazard waste storage, materials storage, vehicle storage, and vehicle maintenance facilities.

Miami-Dade Transit - Government Center Station Entrance Doors

- CPH provided services to Miami Dade Transit in Miami-Dade County for modification to existing platform entry and emergency exit doors on Levels I, II and III of Government Center Station.
- Services provided included studies and schematic design, design development, construction documents and permitting, bidding phase services, and administration of the construction contract and warranty phase.

Orlando Sanford International Airport Terminal Expansion



- The $60.4 million expansion includes the terminal departure consolidation from a dual terminal check-in.
- The improvements also include new consolidated loading and unloading facility, curbside transportation improvements, a covered baggage drop off, apron addition, four new gates, parking lot improvements, terminal building improvements and renovation, as well as transportation improvements that include a new traffic signal and alternate entrances to the parking lots.
- CPH is providing engineering, surveying, architectural, and MEP services for this project.

BN Headquarters Building, Transient Training Design Snake Creek

- Architecture and Engineering design services for a new building that will be approximately 7,669 square feet and will include administrative spaces, classroom, latrine/shower, vending/breakroom, and vault

EDUCATION / LICENSES

- M.A., Yıldız Technical University
- B.A., Yıldız Technical University
- Registered Architect - FL (No. AR95507)
- LEED Accredited Professional

DANIEL "DAN" G. LEWIS, RA, AIA

16 YEARS | 16 YEARS AT CPH

ARCHITECTURE

Mr. Lewis has over 16 years of experience managing small to large design programs for private development projects. He has acted as program and project manager as well as Architect of Record on large retail and large distribution center projects. These projects have included new facilities, expansion, remodels, rebuilds, as well as takeovers. His expertise includes space programming, schematic design development, and permitting. Recently Mr. Lewis served as Project Manager and Architect for over 1 million SF of Large Delivery Station projects for CPH's clients.

SIMILAR PROJECTS

Pueblo Supermarket Guaynabo, PR

- New store consisted of a 37,000 SF building on a ±5 acres parcel.
- CPH was fully involved in the A/E design and permitting process, which included coordination between local and federal utilities, infrastructure and Environmental agencies (Department of Transportation, Puerto Rico Aqueduct and Sewer Authority, Puerto Rico Energy and Power Authority, Puerto Rico Communications Authority, Puerto Rico Environmental Quality Board, Puerto Rico Highway and Transportation Authority, etc.).
- CPH also assisted Pueblo with the Bidding process in which Constructora Santiago II (CSCII), a Puerto Rico based contractor, was awarded the project. Pueblo was able to start construction on schedule, and CPH is currently providing construction supervision services.

BN Headquarters Building, Transient Training Design Snake Creek

- Architecture and Engineering design services for a new building that will be approximately 7,669 square feet and will include administrative spaces, classroom, latrine/ shower, vending/breakroom, and vault

Light Industrial Warehouse | Hanover, MD

- 194,815 SF existing warehouse take over and remodel to distribution facility for national client.

Light Industrial Warehouse | Pompano Beach, FL

- 275,002 SF existing warehouse take over and remodel to distribution facility for national client.

Light Industrial Warehouse | Orlando, FL

- 561,750 SF existing warehouse take over and remodel to distribution facility for national client.

Light Industrial Warehouse | Pompano Beach, FL

- 131,125 SF existing warehouse take over and remodel to distribution facility for national client.

Green Turtle Hammock

- CPH is currently in design of renovations to the 9 acre Green Turtle Hammock Nature Preserve in Islamorada, Village of Islands.
- The park is approximately 9 acres with natural hammock and water access. The project includes a two story hurricane rated Pavilion overlooking the bay, shoreline stabilization, kayak launch, parking improvements, and planting of native landscaping.

Miramar's Regional Park - 9/11 Memorial

- CPH was recently awarded a contract with the City of Miramar to perform professional design consulting services for the 9/11 Memorial at Regional Park.
- CPH also anticipates providing Architectural, Landscape Architecture, MEP, Civil, and Wayfinding/Signage services

EDUCATION / LICENSES

- B.S. in Architecture, Florida Atlantic
- University, 2003
- Registered Architect – FL (AR96398)
- American Institute of Architects (AIA)

CHRISTOPHER DEWAAL, P.E., LEED AP

28 YEARS | 1 YEARS AT CPH

MEP

Mr. DeWaal has strong experience in the design and development of electrical power distribution systems. Most recently his experience has been managing multi-disciplinary engineering / architecture personnel, managing electrical and multi-disciplinary projects from $50k remodels to $100M+ greenfield construction. His strengths include strong communication skills with technical staff, construction contractors and owner's representatives. He has a vast knowledge of electrical and safety compliance policies and studies, personnel management and project management.

SITE CIVIL

Mr. Fitzgerald serves CPH as a Project Engineer and is responsible for the design and permitting of various projects throughout Florida. Mr. Fitzgerald has experience in land development and stormwater management projects ranging from design of apartment complexes, residential subdivisions, church campus sites, parking lots, and stormwater infrastructure networks. Mr. Fitzgerald is proficient in numerous design programs including ADICPR, Ponds, WaterCAD, and BMP Trains.

SIMILAR PROJECTS

Leesburg Aquatic Facility

- CPH is providing planning, design, and permitting for the development of a regional aquatic facility. The facility will include an eight (8) lane competition facility designed to USA Swimming standards for high school competitions.
- The facility will also include a recreational pool with interactive play features, zero entry and a "free" swim area that can be utilized for swim education. Along with the recreational pool will be a water slide, shaded areas for party rentals, and shower facilities.
- The complex will include an entry/ticket building, concession building, changing/locker facilities, and mechanical/equipment areas.

City of Sanford – Pump Branch & Georgetown Stormwater Modeling

- CPH was tasked with analyzing the existing City of Sanford storm sewer system serving a ±615 acre drainage basin adjacent to Lake Monroe. The analysis included field inspection of the physical and operational condition of storm structures.
- Information collected from the new research was added to a GIS database.
- CPH developed a comprehensive stormwater model in ICPR which assisted in the evaluation of the storm system and identified areas of critical flood potential.
- CPH studied the results of the stormwater modeling and offered several recommendations for efficient improvements to the system with respective cost estimates.

St. Anthony Hall Parking Lot

- CPH provided planning and design for a 185 space parking lot to serve an existing Parish Hall in Winter Park.
- The parking lot will be served by a dry retention pond with a weir discharge. The pond will also incorporate the use of an elevated youth soccer field centered in the dry retention area to satisfy the recreational needs of the spiritual center.

The Ellis at Oviedo Mixed-Use Apartment Complex

- CPH is providing planning, design, and permitting for mixed-use development in Oviedo with five multi-story apartment buildings. Two of these buildings contain commercial spaces on the first floor.
- The project will feature one dry retention pond for stormwater management with a dual control structure design to allow for discharge to both an FDOT stormwater system and an adjacent downstream pond.
- CPH performed calculations to demonstrate nutrient loading criteria were met for discharge to an impaired waterbody.

EDUCATION / LICENSES

- B.S. in Civil Engineering, University of Central Florida, 2017
- Engineering Intern No. 1100022736 (E.I.)

JOSE M. ORTIZ, MCE, P.E.

24 YEARS | 7 YEARS AT CPH

STRUCTURAL

José has over 24 years of experience in structural engineering design and project management. His experience encompasses projects of all types and complexities including sports facilities and retrofit/ expansion of existing buildings. The depth of his technical understanding of systems and codes allows him to work with architectural / engineering teams to deliver cost-effective structural solutions to meet project goals.

SIMILAR PROJECTS

Spec Martin Stadium Design Criteria Package Design Criteria Package and Earl Brown Park Improvements

- Selected by the City of DeLand for the Spec Martin Stadium Improvements Design/Build Criteria Package
- The project required the development of the design/build criteria package and professional services to assist the City during the selection process
- Included a new press box, training room and locker room additions
- The stadium will be used by the local high school as well as Stetson University; therefore, the stadium improvements were designed to meet collegiate level demands

Orlando Sanford International Airport Terminal Expansion

- The $60.4 million expansion includes the terminal departure consolidation from a dual terminal check-in.
- The improvements also include new consolidated loading and unloading facility, curbside transportation improvements, a covered baggage drop off, apron addition, four new gates, parking lot improvements, terminal building improvements and renovation, as well as transportation improvements that include a new traffic signal and alternate entrances to the parking lots.
- CPH is providing engineering, surveying, architectural, and MEP services for this project.

Leesburg Teen Center (CMAR)

- 10,000 SF addition to an existing recreation center.
- The Leesburg Teen Center is multi-use facility that houses after school programs for youths ages 5-18.
- The addition also serves as a re-imaging of the main entry into the existing recreation center.

City of Sarasota – Martin Luther King, Jr. Restroom Modification

- Provided Professional Architectural Services for the modification of an existing 378 +/- SF Park restroom facility with interior restrooms and kitchen areas into new restrooms.
- The project includes the renovation of the existing facility to make the restrooms more accessible and eliminate the need to have the doors closed and locked when in use.

DeBary Public Safety Complex

- CPH provided architectural design and construction documents for a 5,600 square foot Public Safety Complex including offices and operational facilities for local law enforcement.
- CPH also provided site civil and master planning for future development.
- The project included meeting/training rooms, bill payment/secured entry, server and backup systems, offices and holding cells.

Leesburg Aquatic Facility

- CPH is providing planning, design, and permitting for the development of a regional aquatic facility. The facility will include an eight (8) lane competition facility designed to USA Swimming standards for high school competitions.
- The facility will also include a recreational pool with interactive play features, zero entry and a “free” swim area that can be utilized for swim education. Along with the recreational pool will be a water slide, shaded areas for party rentals, and shower facilities.
- The complex will include an entry/ticket building, concession building, changing/locker facilities, and mechanical/equipment areas.

EDUCATION / LICENSES

- M.E. in Structural Engineering, Cornell University
- B.S. in Civil Engineering, Recinto Universitario de Mayaguez, UPR
- Professional Engineer - FL (No. 67920), PR (No. 17212)

EDUARDO AVILES, P.E.

7 YEARS | 5 YEARS AT CPH

STRUCTURAL

Mr. Aviles serves as CPH's Structural Designer for the firm's work in the United States and Puerto Rico. He has experience in Structural Engineering, Civil Engineering, and Land Surveying.

SIMILAR PROJECTS

Orlando Sanford International Airport Terminal Expansion

- The $60.4 million expansion includes the terminal departure consolidation from a dual terminal check-in.
- The improvements also include new consolidated loading and unloading facility, curbside transportation improvements, a covered baggage drop off, apron addition, four new gates, parking lot improvements, terminal building improvements and renovation, as well as transportation improvements that include a new traffic signal and alternate entrances to the parking lots.
- CPH is providing engineering, surveying, architectural, and MEP services for this project.

OUC Warehouse Expansion and Improvements

- This is a design-build project for the Orlando Utilities Commission.
- It consists of a new 9,506 SF pre-engineered metal building warehouse addition that ties into the existing warehouse building for the Orlando Utilities Commission.
- This project will also have a new pre-manufactured modular structure located within the existing warehouse. This will serve as the new breakroom and restrooms for the facility.
- All associated structural, mechanical, electrical and civil engineering is included within the design.

Englewood Warehouse & Maintenance Office

- This is a new facility for Englewood Water District that consists of a new 22,200 SF maintenance warehouse and office building.
- This project is primarily a pre-engineered metal building with a masonry wainscot along the main entrance.
- This facility will store non-combustible material. The office component is approx. 10,000 SF and the remaining area is in the warehouse.
- The walls are metal panel and the roof will be standing seam. All associated structural, civil, mechanical, plumbing and electrical engineering is included.

Monroe County Fire Station at Cudjoe Key

- CPH is providing pre-design phase/programming, Schematic Design, Design Development, Construction documents, Bidding and Permitting assistance, and Construction Administration for a new Fire Station on Cudjoe Key.
- Additional services provided will be site plan review, civil engineering, landscape architecture, and FDOT Review and Florida Green Build criteria. The building will be designed to meet or exceed Florida Green Building Coalition (FGBC) standards.

EDUCATION / LICENSES

- M.S. in Structural Engineering, University of Puerto Rico
- B.S. in Civil Engineering, University of Puerto Rico
- B.S. in Land Surveying, University of Puerto Rico
- Professional Engineer - FL (No. 85877

AMY E. DALY, LEED AP

28 YEARS | 17 YEARS AT CPH

ENVIRONMENTAL

Mrs. Daly serves CPH as principal environmental scientist. She has 28 years of environmental consulting experience with project management, environmental resource assessments, wetland delineation, permitting, mitigation design and implementation, land management, habitat mapping, jurisdictional determinations, wetland functional analyses, protected wildlife surveys and management programs, field survey design and habitat restoration, tortoise surveys, permitting and relocation including commensal species. Mrs. Daly has served as an expert witness on various environmental matters for condemnation proceedings.

SIMILAR PROJECTS

DeLand New Public Works Complex
- CPH provided architectural and engineering services
- 12,800 sq. ft. building pre-engineering single story metal building

Palm Coast WTP No. 3
- New 3 MGD water treatment plant utilizing the LPRO treatment technology to treat the confined surficial aquifer water
- Plant was designed to facilitate expansion from 3 MGD to 9 MG
- Chemical storage building (4,500 sq. ft.)
- Operation building designed included the laboratory, training rooms, administration offices & locker rooms (6,500 sq. ft.)
- The building was designed to accommodate both the water treatment staff as well as future wastewater personnel

Springhill Boys and Girls Club
- CPH provided architectural and engineering services for the new Boys and Girls Club building constructed in Spring Hill
- Included a 2,700 sq. ft. free-standing masonry building with a pre-engineered wood truss roof with architectural fiberglass shingle roofing
- The other functions of the building are various sizes of Activity Rooms, a Media Center, a Break Room and an Administration Office.

Westside Community and Recreation Center
- Expanded an existing 7,900 sq. ft. structure with the addition of a 10,400 sq. ft. gymnasium, game room addition and storage mezzanine
- Remodeled the existing gym into a multipurpose room, work out area and conference room
- Both the men's and the women's restrooms were upgraded for handicapped accessibility and the existing kitchen was completely gutted and redesigned
- Included a new welcoming reception area, refurbished staff offices, computer room and locker room with a playful color scheme

Ivy Lane Recreation Park
- The Park includes two entrance arbors, paved walkways, picnic shelters and a group pavilion.
- Site furnishings consisted of wood park benches with powder coated steel frames, complementary litter receptacles, extra heavy picnic table and multi-level park grills
- The column base was finished with cultured stone veneer
- The roof construction was standing seam metal roofing with Kynar 500 finish on Plywood sheathing over pre-engineered roof trusses, bearing on steel beams

EDUCATION / LICENSES

- M.B.A., FMU, Summa Cum Laude
- B.S. in Biological Sciences, Florida State University
- U.S. Army Corps of Engineers Wetland Delineator
- Florida Unified Mitigation Methodology Course
- Qualified Stormwater Management Inspector
- Prescribed Burner
- Authorized Gopher Tortoise Agent (No. GTA-09-00145)
- LEED Accredited Professional

THOMAS J. GALLOWAY, PSM

31 YEARS | 20 YEARS AT CPH

PROJECT SURVEYOR

Mr. Galloway has more than 30 years of experience in the surveying and mapping profession, and has a Bachelor of Science of Surveying and Mapping from the University of Florida. His experience ranges from working in the field and office on small to large development projects, to serving as Party Chief/ Survey CADD Technician, Project Manager and Survey Manager. Mr. Galloway has served as Principal and Director of the Surveying Division of the firm since its establishment in 2001. He has overseen the department's growth from two survey crews to managing the current seven survey crews. Additionally he has been personally involved in over 2,500 surveys while at CPH.

SIMILAR PROJECTS

Orlando Sanford International Airport Terminal Expansion

- The $60.4 million expansion includes the terminal departure consolidation from a dual terminal check-in.
- The improvements also include new consolidated loading and unloading facility, curbside transportation improvements, a covered baggage drop off, apron addition, four new gates, parking lot improvements, terminal building improvements and renovation, as well as transportation improvements that include a new traffic signal and alternate entrances to the parking lots.
- CPH is providing engineering, surveying, architectural, and MEP services for this project.

Leesburg Aquatic Facility

- CPH is providing planning, design, and permitting for the development of a regional aquatic facility. The facility will include an eight (8) lane competition facility designed to USA Swimming standards for high school competitions.
- The facility will also include a recreational pool with interactive play features, zero entry and a "free" swim area that can be utilized for swim education. Along with the recreational pool will be a water slide, shaded areas for party rentals, and shower facilities.
- The complex will include an entry/ticket building, concession building, changing/locker facilities, and mechanical/equipment areas.

Casselberry Wirz Park Planning & Preliminary Design

- The CPH team was tasked with holding multiple stakeholder meetings in order to develop a reinvestment program and update the facility's master plan. As part of the overall park the new design included:
- A New entrance, Relocation of maintenance building, Expansion of the existing community building, A New outdoor terrace, An Event patio with 20' x 20' pavilion, Splash pad, Zero entry pool with interactive features, 5 lane/25-meter pool, Shade structures, Volleyball courts, Basketball courts, A Playground and Trail upgrades

Melching Field Stadium Renovations - Design Criteria Package

- CPH was selected to provide professional services for the creation of the Design Build Criteria Package for the Melching Field Stadium Renovations.
- CPH's scope for the Design Build Criteria Package will include a report detailing ADA deficiencies, structural analysis of the existing of the bleacher deck, design/build contract requirements, design development drawings and performance specifications.
- CPH's services for this project include Architectural, Civil, Surveying, Structural, Mechanical, Electrical, Plumbing, Fire Protection and Landscape Architecture.
- Upon completion of the D/B Package, CPH will also assist the owners with delivering this information to the final Design/Build team.

EDUCATION / LICENSES

- B.S. in Surveying and Mapping, University of Florida
- Professional Surveyor & Mapper - FL (No. 6549)
- NCEES Council No. 1291

ROCCO R. NASSO, P.E.

21 YEARS | 21 YEARS AT CPH

UTILITY COORDINATOR

Mr. Nasso serves CPH as a Project Manager and Engineer. His design experience includes extensive utility design and permitting, wastewater collection/transmission systems, stormwater calculations and modeling (ICPR and Hydraflow), water transmission main design and modeling (WaterCAD), pump sizing, and lift station design. His other duties include the Construction Engineering and Inspection (CEI) over numerous utility projects, water and wastewater treatment facilities and roadway projects.

SIMILAR PROJECTS

Southwest Regional Wastewater Reclamation Facility Nutrient Reduction and Expansion Project – Volusia County

- CPH was selected to provide planning, design, permitting, and construction engineering, inspection and management (CEIM) services for upgrades to the Southwest Regional Water Reclamation Facility (SWRWRF).
- The project required the facility to meet Advanced Wastewater Treatment (AWT) standards and expansion of the treatment capacity by 1 million gallons per day (MGD) based on the State of Florida's established TMDL for nitrate that would allow for the restoration and protection of Blue Spring and Blue Spring Run.

SR 46 Utility Relocations

- The project consisted of the construction of approximately 10,100-ft of new 12" water main, 675-ft of new 6"-10" water main, 4,200-ft directional drill 12" water main, 8,100-ft of new 6"-8" force main, 900-ft directional drill 6"-8" force main, 1,590-ft of new 10" sanitary sewer and manholes, 2,350-ft of new 20" reclaimed water main, relocation and modification of an existing Master Meter Assembly, and the removal of approximately 26,900-ft of existing water main, force main, sanitary sewer, and reclaimed water main.

Volusia-Sanford Reclaimed Interconnect

- Provided services for the extension of the City of Sanford's existing reclaimed water system across the St. Johns River into Volusia County.
- The project connected the existing 20-inch DIP line with a new 20-inch DIP line; projected flows to be sent to Volusia County are between 150,000 to 1,500,000 GPD
- Provided the design, permitting, and construction services for both Sanford and Volusia Counties

SR 429 (Wekiva Pkwy Section 7A) Utility Relocations

- CPH provided design, permitting, and limited CEI services for the relocation of existing Seminole Co. Utilities along a 2.6 mile stretch of SR 46 between Longwood-Markham Rd. to Orange Blvd., and along a 1200-ft long section of Orange Ave. and Wayside Dr. from Capri Cove Pl. to Orange Blvd. from Wayside Dr. to SR 46.
- Construction included open cut construction consisting of 11,300-ft of new 12" water main, 1400-ft of new 16" reclaimed water main, 6440-ft of new 20" reclaimed water main, 13,900-ft of new 24" force main, 1680-ft of new 24" reclaimed water main, 3800-ft of new 30" reclaimed water main, and 16,800-ft of new conduit, pull boxes and splice boxes for the new fiber optic system.
- Directional drill construction included 1690-ft of new HDPE pipeline ranging in size from 12" to 36".

EDUCATION / LICENSES

- B.S. in Civil Engineering, University of Central Florida
- Professional Engineer - FL (No. 64727)
- Qualified Stormwater Management Inspector
- Advanced Maintenance of Traffic Certification
- OSHA Construction Safety and Health Certification
- CTQP Asphalt Paving Technician Level I & II

JOE MOODY PARK - **PANAMA CITY, FL**

CPH is providing design for reconstruction of a park facility that was damaged due to hurricanes. The new facility will include: 8,000 SF community center building, a restroom building utilizing a Client provided proto-type, walk/jog track, lighting, playgrounds for ages 2-5 and ages 5-12, landscape and irrigation, tree replacement, hardscape to include benches, trash receptacles, signage, parking improvements, stormwater retention, outdoor fitness areas, redevelopment of the wetland edge including scenic overlook, disk golf course re-establishment, and demolition of the existing boardwalk. The new 8,000 SF community building will be designed with spaces that are multi-use and multi-functional to support meeting/ gathering/reunions/recreational activities. The space will include offices and meeting space for support staff, a catering kitchen, restrooms, lobby, and storage.

PASCO COUNTY FACILITIES & MAINTENACE CENTRAL OFFICE AND WAREHOUSE - **PASCO COUNTY, FL**

PASCO COUNTY FLORIDA
OPEN SPACES. VIBRANT PLACES.

The new central office and warehouse located on the Pasco County Land O' Lakes Public Safety Campus is a shared use facility to serve the needs of the Counties Operations and Maintenance (O&M), Construction & Renovation (C&R) and Real Property Planning (RPP) departments. The 20,000 SF facility is organized with a central high-bay warehouse space wrapped on two sides with office and support spaces. Arranged departmentally, the office areas utilize strategies such as open plan "hot desks" and "touch-down" offices to efficiently accommodate the needs of a staff population that are coming and going throughout the day. Concrete tilt-wall construction provides a cost-effective and durable envelope that meets the diverse needs of the facility and provides a solid separation between field and office activities. A two bay dual level loading dock provides safe and effective access for equipment and materials handling and is configured to accommodate a future 10,000 SF EOC warehouse addition.

WEST LEESBURG NEIGHBORHOOD RESOURCE CENTER PROJECT - **LEESBURG, FL**

CPH was commissioned to design a new 9,000 SF Neighborhood Resource Center for the City of Leesburg. CPH is responsible for full design services including survey, civil, landscape, architectural and MEP. The Center will include meeting room spaces for large and small groups, a computer lab, office space for local community service providers, conference rooms for miscellaneous social groups, and a Kitchen / Café facility.

Since the City owned additional acreage adjacent to the project, CPH developed a site plan to facilitate the proposed use while maintaining the possibility for future parking and buildings. CPH organized public involvement meetings, in which two key architectural components were identified. The first was to have a community kitchen and café within the building and the second was the need for multifunctional meeting space.

Since budget was also a factor, CPH was able to design a café with both indoor and outdoor seating elements while incorporating key infrastructure elements for the commercial kitchen until the equipment could be purchased at a later date. The flexible meeting space was accomplished by designing large meeting rooms with folding partitions to support smaller or larger groups. The end result was a flexible, cost effective, user-friendly neighborhood resource center with the potential for future development when the City needs it.

BARTOW PUBLIC WORKS ADMINISTRATION AND SOLID WASTE ADMINISTRATION BUILDINGS - **BARTOW, FL**

CPH is providing services to the City of Bartow for the development of new office buildings for the City's Public Works and Solid Waste Departments. The project includes the development of one main prototype and the site adaptation of that prototype for the second facility. CPH's services include due diligence / site investigation, conceptual planning, design, permitting, and bidding support of the proposed buildings. The total improvements include 8,000 SF of new buildings (4,000 SF prototype/public works building and 4,000 SF site adaptation / solid waste administration building).

As a part of the project, CPH's team developed a master-plan for each site, including assessment of the existing structures on each project site to develop a master phasing and future expansion plan for each facility. CPH provided an assessment of the adequacy of parking, utilities, and development guidelines for each site. CPH services included site survey, environmental and ecological surveys, programming, conceptual design, design development / construction documents and permitting.

CASSELBERRY WIRZ PARK PLANNING & PRELIMINARY DESIGN - **CASSELBERRY, FL**

CPH provided planning and preliminary design to the City of Casselberry for the reinvestment and updating the master plan for Wirz Park, a regional facility with multiple uses. The CPH team was tasked with holding multiple stakeholder meetings in order to develop a reinvestment program and update the facility's master plan. As part of the overall park the new design included:

- New entrance
- Relocation of maintenance building
- Expansion of the existing community building
- New outdoor terrace
- Event patio with 20' x 20' pavilion
- Splash pad
- Zero entry pool with interactive features
- 5 lane/25-meter pool
- Shade structures
- Volleyball courts
- Basketball courts
- Playground
- Trail upgrades

BN HEADQUARTERS BUILDING, TRANSIENT TRAINING DESIGN SNAKE CREEK - **MIRAMAR, FL**

CPH is contracted by the Department of Military Affairs to provide full Architecture and Engineering design services for a new building that will be approximately 7,669 square feet and will include administrative spaces, classroom, latrine/shower, vending/breakroom, and vault. Other items integral to the facility are: sidewalks, detached sign, utilities: electric, potable water, waste water/sewer, and storm water drainage, information systems, exterior fire protection, site improvements, and anti-terrorism/ force protection. These facilities will require utilization of construction materials and equipment offering the greatest degree of maintenance-free longevity and operational energy efficiency.

The project is being designed to current Florida Building Codes (FBC), current local building codes, current Florida Energy codes, American Disability Act criteria.

Project Duration: 2020-Ongoing

Amy E. Daly, LEED AP - **Enivornmental**
Thomas J. Galloway, PSM - **Survey**

J.D. & N.J. LEWIS HOUSE - **LONGWOOD, FL**

Constructed in 1886 by two brothers J.D and N.J. Lewis, the Lewis house is a historical building that has been moved around quite a bit in the community of Longwood. After several failed attempts to raise funds for a total restoration of the building, the city reached out to CPH for some creative ideas on what they could do with the structure. CPH proposed constructing a gazebo that preserves the distinctive roof line of the building supported by a skeletal structural framework that mimics the original buildings detailing and fenestration. To complete the effect, the floor within the gazebo will be a stamped concrete to match the original houses hardwood floor. Visitors the Gazebo at the Longwood Memorial Gardens cemetery will be able to get out the sun and rain and experience the space within the historic home as well as learn a little about its history.

Project Duration: 2021-TBD

We have worked with many of our clients for 40 years. These long term relationships have afforded us many opportunities to meet our client's needs and perform municipal engineering services. Over the years, as their population increased, regulations changed, or needs changed, CPH acted as their continuing design firm providing planning for improvements, design, funding assistance, and construction administration. In addition, CPH has been able to assist when the workload at the City departments exceeded their capability to complete engineering development reviews in a timely fashion. The team has extensive experience in working under continuing contracts and is available for planned projects as well as un-planned emergencies.

KEY PERSONNEL STATEMENT

We have put together a team that not only has specialized experience but has extensive experience working together. We have carefully crafted this team based on this work history, our understanding of the City's needs, and ability to deliver a quality project.

CPH has an office forty (40) minutes away from the City's headquarters at 101 N. Woodward Blvd, Suite 305, DeLand, FL 32720, with the ability to provide almost any service the City will desire in house through our 250+ professionals.

All the personnel provided in this proposal are long term staff members and will be available throughout the contract term for the City. We have provided an overview of each team member on the following pages with the team's current and projected workload.

#20 ENR TOP 25 DESIGN FIRMS IN FLORIDA

#366 ENR TOP 500 DESIGN FIRMS

#40 ENR SOUTHEAST TOP DESIGN FIRMS

#53 OBJ GOLDEN 100 TOP PRIVATELY HELD COMPANIES

BENEFITS OUR TEAM BRINGS TO THE CITY

- ☑ Local Resources and Experience
- ☑ All Team Members Have Worked Together
- ☑ Multi-disciplined Team Capable of Providing All Services
- ☑ Innovative 3D Survey and BIM Modeling Expertise
- ☑ Extensive Portfolio of Municipal Facility Projects
- ☑ Full Time Staff Members Located Nearby in both DeLand and Sanford
- ☑ Experts in New, Remodels, and Expansion Type Projects

MEET YOUR PROGRAM MANAGER

BROOK K. SHERRARD, AIA, NCARB
23 Years of Experience

- ☑ Completed more than 6.4 million SF of projects
- ☑ CBuilding Information Modeling (BIM) and sustainability initiatives
- ☑ Experience designing projects according to LEED® Certification guidelines

WHY BROOK AS YOUR PROGRAM MANAGER?

Mr. Sherrard services CPH as a Senior Architect, with more than 23 years of experience. Mr. Sherrard has completed more than 6.4 million SF of projects and is leading the firm's Building Information Modeling (BIM) and sustainability initiatives. Brook's leadership has ensured that our clients are provided with a coordinated set of documents and 3D models to communicate the design intent at all phases of the project. He has also provided training to in-house architects and has set up standards and procedures to create consistency in document production throughout the firm. In addition, Brook has experience designing projects according to LEED® Certification guidelines, including the first new complete high school to achieve a Silver rating under the LEED® for Schools 2.0 rating system in the State of Florida at Weeki Wachee High School in Hernando County.

BROOK'S RELATED EXPERIENCE

West Leesburg Neighborhood Resource Center Project (CMAR)
- New 9,000 SF Neighborhood Resource Center for the City of Leesburg

Leesburg Teen Center (CMAR)
- 10,000 SF addition to an existing recreation center

City of Winter Springs New Public Works Facility
- 4,700 SF Public Works Administration Building

Pasco County Facilities & Maintenance Central Office and Warehouse
- Shared use warehouse and office facility supporting three separate departments

Hainerberg Elementary School
- Code 3 – conceptual design for a new 147,000 SF Elementary School including 18,000 SF of renovation

WHAT BROOK WOULD LIKE YOU TO KNOW

"I am excited about the possibility of working with New Smyrna Beach staff to deliver projects successfully under the continuing contract and to help the City continue its track record of excellence. This role fits well with my background and expertise. I have had the opportunity to manage and/or design numerous municipal projects from planning, to design, and through construction. I have provided services for many facilities that have incorporated several diverse departments and user groups. Municipal projects require a consultant that can create a collaborative atmosphere in which decisions can be made and keep the project moving forward. With multiple team members and stakeholders, it takes diligence from the project manager to obtain input from all parties, evaluate the options to solving a particular issue, make a decision, and then document the decision. The key is regular communication, adequate but efficient analysis and evaluation, and empowered decision making. Through my past experience working with municipal clients, I have become intimately familiar with how to deliver high quality and cost effective projects."

GRANT EXPERIENCE

CPH has considerable experience in supporting research, acquisition and processing of grants and supplemental funding techniques for parks and recreation projects. We have worked with a variety of grant programs from numerous government and private agencies on behalf of multiple municipalities. CPH understands the importance of establishing cost control techniques and mechanisms early and monitoring them throughout the project process to maintain budget adherence. Our experience in design, bidding, construction administration, and general contracting in the State of Florida helps us maintain a library of current construction pricing for activities, materials and methods. Project funding through grant programs can create funding timing issues during project design and construction. CPH possesses an understanding of how both the municipal fiscal year and funding agency timelines for reimbursement need to be coordinated.

Grant funding in many cases are important innovative funding strategies municipalities need to use in order to leverage budget dollars and achieve maximum impact to recreation projects. In 2015 the CPH team engaged Kaboom! for funding of the West Side Park improvements in the Town of Oakland to provide amenities and construction. The project included a community playground, picnic pavilion, basketball court resurfacing, landscaping, site furnishings and lighting. These project amenities, as listed above, were all funded through the Kaboom! program. Kaboom! is focused on encouraging play in our communities, and also has access to national and international sponsorships to help provide materials and equipment. Kaboom! has the capability to assist in community awareness and pledge/donation support, as well as a number of grant opportunities through their national program. CPH has also used the Community Development Block Grant Program (CDBG) funding mechanism for projects in the City of Winter Springs at Torcaso Park. This project involved the construction of a 1,500s.f. splash pad water feature, additional sidewalks adjacent to the new splash pad, a community playground, an active walking trail, and a stormwater retention facility. These project amenities, as listed above, were all funded through the GDBG Program. These are just two of the many funding mechanisms our team has worked with in order to provide the highest value to our clients. We have outlined some grant opportunities and funding mechanisms below for consideration by the City depending on project type.

NAME AND DESCRIPTION	VALUE
Lowes Charitable and Education Foundation Educational Improvement Projects Vegetable Gardens, Reading Gardens, Trails	$2,000 to $5,000
Walmart Community Grant Community improvement projects	Up to $2,500
Home Depot Community Impact Grant	Up to $5,000 (gift cards to Home Depot for supplies)
American Academy of Dermatology Shade Structures Grant Installation of shade structures	Up to $8,000
Kaboom! Play Equipment	$15,000
Youth Engagement Grant - USFWS Park Features Focused On Educational Enhancements For Environmental Conservation	$5K to $50K (25% Match Required)
Carol M. White Physical Fitness Education Program - US Dept of Education Focused on Physical Education Activities and Staffing	$200K to $800 K (Match and Minimum Costs Required)
Baseball Tomorrow Fund Youth Baseball Equipment and Field Development/Construction (Ages 10 -16)	50% Match
Kids Run National Grant - Road Runners Club of America Youth Running Program Development	$500 to $1K
Finish Line Youth Foundation Grants - Finish Line Must be 501c(3) Non Profit	Up to $75K
Lowes Small Grants & Partner Grants - Lowes Home Improvement	Up to $100K
US Soccer Grants & Safe Places To Play Grants - US Soccer Soccer Education and Development of Fields	$30K to $90K
FRDAP Bureau of Design and Recreational Services	Up to $200,000 (Match and Minimum Costs Required)

III - PROJECT APPROACH / MANAGEMENT

PROJECT UNDERSTANDING

Our team has reviewed the solicitation, and understands that the City of New Smyrna Beach is seeking the services of a consulting firm on an ongoing basis for a master services contract. Our team has provided these types of services for numerous similar sized Cities throughout the State, and are well staffed to provide the City with the required architecture services. CPH has been providing services to our municipal clients dating back to the 1980's and has served the City of New Smyrna Beach directly under our engineering services contract since 2014.

Through not only our experience with the City, but our extensive 40+ year history in Volusia County and Central Florida we have developed a thorough understanding of the local conditions, character, and the City's codes / design guidelines. We have worked to also develop an understanding of your design preferences and project delivery process. Combined our expertise and this knowledge will allow us to hit the ground running on any project assigned under this contract.

APPROACH TO PROJECT MANAGEMENT

The key to managing and controlling the project schedule and budget will be continual coordination between all CPH team members and the City program manager. This team effort will be directed by Mr. Brook K. Sherrard, AIA, NCARB, who has more than 23 years of experience related to this type of project. To maintain proper control of the schedule and budget, the CPH project manager and team members will continually monitor the project on a weekly and monthly basis from inception to completion. Typical management tools to monitor schedule and budget include field coordination meetings, weekly/monthly look-ahead schedules that are updated routinely, and detailed 90-day schedules updated monthly.

APPROACH TO STAKEHOLDER CONSENSUS AND PROGRAMMING (PHASE I)

CPH believes in providing a balanced and thoughtful approach to stakeholder engagement for assigned projects. Our team understands that each project is unique and stakeholders can include not only the City's project management staff, but key stakeholders such as end users or community participants. These types of projects require a team that understands balancing needs, wants, and budgets (construction and operation). Our approach to the programming and consensus building for projects is focused around creating meaningful workshops and stakeholder group outreach. Our approach includes:

- **WORKSHOP #1 – PARTNERING**
  Typically at this workshop, CPH will gather all stakeholders to have a group discussion on project goals, objectives, list of wants, must haves, and needs. At this meeting, our team will present minimum design requirements, funding/budget requirements, and any other preliminary data available (site constraints, etc.), and use this as a starting basis for the discussion.

- **STAKEHOLDER INTERVIEWS**
  After workshop number one, CPH will hold individual meetings with key stakeholders to understand how they will potentially use the facility, challenges / opportunities, and any other general feedback they may wish to share.

- **DELIVERABLE: TECHNICAL MEMO**
  After the stakeholder interviews and the workshop, CPH will deliver a summary that outlines the collective desired improvements, meeting summaries, and rough order of magnitude costs associated with different preliminary options.

- **WORKSHOP # 2 – PROGRAMMING**
  After the delivery of the technical memo, our team will hold another stakeholder workshop. At this workshop CPH will provide a high-level review of the findings from the stakeholder outreach and present 3 different program layouts/options for the project. Having everyone in the same room, our team will go over each program individually to get feedback on each concept. This will allow the users, other key stakeholders, and the City to help "author" the final program for the project.

- **MASTER PLANNING**
  Once a program is defined, the spaces will be overlayed on a site plan and 3 concepts will be developed to show potential layouts and phasing. This is similar to the approach CPH recently implemented with the City of Wildwood, where we created an updated master plan for their regional park and recreational center. This will be a vital step in creating the long term vision and avoiding costly changes in the future by creating an plan that accommodates for future expansions or improvements based on budget.

- **DELIVERABLE: THREE CONCEPT MASTER PLANS**

- **WORKSHOP # 3 – MASTER PLAN**
  Once the City and stakeholders have had a chance to review the master plans, our team will hold a workshop. This workshop will provide a review of the ultimate build out of the improvements, elevations, and a priority list of wants vs. needs. This information will ultimately be used to create an implementation plan.

- **DELIVERABLE: FINAL MASTER PLAN, CAPITAL PLAN, AND PHASING PLAN**

4. DESIGNING TO A BUDGET

Designing to a budget is based on a two-fold approach. One is the actual construction cost associated with the development of the project. The second is related to the operations and maintenance costs. For the first topic, the construction cost, our team will provide the City with updated costs throughout the programming and master planning phases. These will be Class I and Class II estimates that focus on preliminary costs and rough order of magnitude. As we get further in the design process of phase I, our team will deliver Class III, IV, and IV opinions of probable cost with each design submittal. This will allow the City to make the best decisions on how to move the project forward.

For the second topic, operational costs, our team will provide life cycle analysis for each major finish/product. This will include maintenance requirements, replacement costs, and typical life of products/equipment. This allows the City staff to make the best decision not only for the construction cost but align their vision on costs to operate the facility with the budget for the improvements. This will also provide the City with an understanding of potential paybacks for a higher end finish or equipment. For instance, maybe the City can save the extra amount added during construction through energy savings within 5 years. This payback period may be an attractive alternative to a higher operational cost.

5. TYPICAL DESIGN PROCEDURE

We have outlined our typical design procedure below. This process follows a proven systematic approach to the development of construction documents following a successful planning and programming phase.

PHASE II SCHEMATIC DESIGN (30% DESIGN DEVELOPMENT)

After the City's review and approval of the program requirements, we will move into the Schematic Design. This will create the solutions to the needs and challenges identified during Programming. We will arrange all the spaces and establish the flow of the public and staff into the optimum arrangement for the operations and safety of all occupants, while satisfying the building codes and standards. The challenge of these solutions will be the balance to incorporate all program requirements, maintain organization of daily operations and verify construction budgets.

- Some of the key items to concentrate on during the Schematic Phase include but are not limited to the following:
  - » Allocate provision for communication devices and technology to be accessible between all buildings
  - » Provide emergency backup for all functions
  - » Design buildings to be well equipped to serve all functions outlined in the program.
  - » Maximize potential of office spaces and parking areas
  - » Evaluate potential of site drainage pattern and location of hazard material
  - » Review building materials in relation to cost, maintenance and life span

At the end of schematic design, the following elements should be established:

Preliminary Site Plan

- Campus layout for all site elements (buildings, parking lots, infrastructure, landscape and roadways)

Building Elements

- Building plans
- Building sections
- Building elevations
- Preliminary mechanical, electrical and plumbing system reviews
- Relocation plan for existing operational facilities

PHASE III DESIGN DEVELOPMENT (60% DESIGN DEVELOPMENT)

This is the phase when the A&E team develops many of the technical aspects of the building. The team will decide on the type and size of the structural system, mechanical, electrical and plumbing systems, and building materials construction type. At the same time, the site takes shape with entry / delivery points, parking and landscape. Modifications are made at this time, if necessary, to keep the project within the budget. It is the purpose of design development to finalize the full nature and scope of the project, including finishes, markings, equipment, features and systems. Conceptual structural engineering work begins during this phase.

ENGLEWOOD WAREHOUSE & MAINTENANCE OFFICE

All environmental loads are established based on building code, geotechnical soils data is assessed for consideration of foundation type, and additional coordination takes place for structural building main frame material selection. At the completion of design development, the facility's design decisions should be complete and will include the following:

OUC WAREHOUSE

Final Site Plan

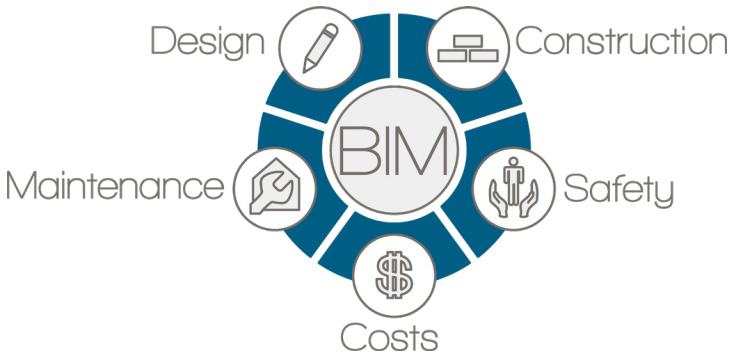
Building Elements

- Building plans, development and finalization
- Building sections
- Building elevations
- Building details
- Building finishes
- Building Demolition Sequencing Plan
- Value Engineering

PHASE IV CONSTRUCTION DOCUMENTS (90% DESIGN & 100% CONSTRUCTION DOCUMENTS)

Upon approval of the Design Development, the Construction Documents phase will begin. During this phase, all decisions on how to construct the facility will be finalized and documented for bidding and construction. The following materials will be prepared:

- Construction drawings
- Technical specifications



As the Detail Design work proceeds, we will continue to review the plans and specifications with the City on a regular basis. While major components of engineering systems and building materials have been identified during Design Development, it is important for the City to be kept aware of their detail applications. Regular reviews, in addition to periodic special design review meetings, will be held in your offices for your convenience.

PHASE V CONSTRUCTION ADMINISTRATION

The Construction Administration will be organized according to the needs of the project. Our basic Construction Administration services will include professionals from each of the design team disciplines. These representatives will: Review contractors' submittals for material and equipment to be included in the project. The submittals will be reviewed for compliance with the Contract Documents. These professionals will conduct scheduled project site visits and will also be on call during the Construction phase. When the project or a phase of the project has reached substantial completion, we will arrange a formal review of the project that will include the Client representatives, our representatives and the contractor. From this review, we will prepare a list of work to be completed or corrected and make a recommendation on acceptance of the work as the final work is completed along with collection of warranties and close out manuals.

UTILIZING BUILDING INFORMATION MODELING TO COLLABORATE

Building Information Modeling (BIM) refers to a digital collection of software applications designed to facilitate coordination and project collaboration. It can also be considered as a process for developing design and construction documents by virtually constructing the project on the computer before construction begins. Using BIM tools, designs can be developed directly in 3D as a collection of model elements. As the project is developed, increasing amounts of intelligence are added to each model element, and this intelligence is captured in a database. BIM is a multidimensional model (3D, 4D [time] and 5D [cost]) in which a virtually unlimited range of visual and non-visual project and building related information is tagged or attached to each model element as a collection of attributes.

The BIM models will be used at each workshop, as needed, to help review the design and progress decisions. By viewing the project and how decisions effect the quantities and model in real-time, the stakeholders will be able to make more effective decisions. The BIM model will not only assist with clash detection, but provide a strong base to collaborate on size, location, features, etc. In addition, the BIM model can be converted for use with virtual and/or augmented reality through Oculus headsets. This will allow the City and stakeholders to view the proposed improvements and space. This is a powerful tool we can implement for collaboration so the City can visualize improvements prior to any construction.

The CPH team has created a preliminary BIM Execution Plan (BEP) for the project that will provide a framework that will facilitate the utilizing BIM technology in an efficient and realistic way on this project as well provide an interactive way too collaborate. This BEP is used to define the protocols, expected level of development and authorized uses of the Building Information Model on this Project and assigns specific responsibility for the development of each Model Element to a defined Level of Development at each Project phase. The CPH team will develop the design at each stage using the following BIM software:

DISCIPLINE	AUTHORING SOFTWARE	VERSION
Architectural	Revit Architecture	2021
Structural	Revit Structure	2021
Mechanical, Electrical, Plumbing, Fire Protection, Telecomm, Security	Revit MEP	2021
Civil	AutoCAD	2021
Landscape	AutoCAD	2021
Clash Detection	Revit, Navisworks Manage	2021

SUSTAINABILITY

Fundamentally, we will incorporate the goals of higher performance by implementing sustainable choices throughout the planning, design, construction and operational phases of the project while maintaining a flexible framework to allow for changes as needed to support the overall goals of the program. CPH's goal will be to work with the City throughout our collaborative workshops to identify areas where we may capture points from the program in order to achieve a sustainability goals and assist the City in making decisions and understanding how those impact project budget. The team has established the following goals for projects:

QUALITY OF LIFE

- Exceed Regulatory Requirements
- Implement Local Community Benefits
- Enhance Community Views

RESOURCE ALLOCATION

- Balanced Site Improvements
- Reduction in Energy Demand
- Use of Recycled Materials

LEADERSHIP

- Sustainable Project Management
- Local Job Creation
- Interdisciplinary Team Work

NATURAL WORLD

- Stormwater Infiltration
- Flood Reduction
- Preservation of Ecologically Sensitive Areas

CLIMATE & RESILIENCE

- Carbon Reduction
- Increased Resilience to Climate Change
- Reduced Air Pollution

QUALITY CONTROL/QUALITY ASSURANCE

CPH has an established corporate culture that places emphasis on quality control and assurance for our clients. The firm and team members are dedicated to this process and incorporation of good design and construction practices from the inception of projects. CPH's corporate quality initiatives includes developing a quality control/assurance standardization committee, benchmark reviews by experienced, qualified technical personnel, and means and methods quality reviews by licensed general and utility contractors. The team routinely meets with clients to conduct completed project reviews to evaluate team performance and identify opportunities to enhance service.

CPH's established corporate culture is instilled in every team member and requires that the staff act as an extension of our clients staffing, providing them with services that are on time, within budget, cost effective, and of the highest level of quality. CPH has Standard Operating Procedures (SOP) for all of our major programs (transportation, infrastructure, utilities, stormwater, commercial, residential, and municipal) that include project management techniques, cost estimating, design alternative reviews, subconsultant design reviews, and client communication requirements.

FOUR LEVEL QUALITY CONTROL REVIEW SYSTEM

CPH's quality control system is separated into four (4) distinct levels described as follows:

1. Project Manager QA/QC Review: CPH project managers are trained to review all documentation, including information received from the client, other agencies, subconsultants, and internal drawings and specifications. This is the first step in assuring accurate information and proper project design. The project manager is responsible for reviewing the project for accuracy and required changes.

2. Technical Review Committee Member QA/QC Review: Throughout the design phase, starting from inception, CPH provides one to two team members that will work with the project manager and designer to review areas of concern and offer additional technical expertise. This person is not involved in the daily design facets, but is kept up-to-date through the use of monthly design updates. The technical review committee provides a quality check various design options, plans, and other construction documents at the 30%, 60%, 90%, and 100% completion intervals.

3. "Full Field" Of QA/QC Review: At the 30%, 60%, and 90% stages of the design, the project documentation and specifications are turned over to engineers from other fields to review alternative options and quality of plans. For example, an infrastructure project will be turned over to an independent engineer in our roadway or utility department. This provides a complete internal audit from personnel that have not been involved in the project and are "seeing the project for the first time".

4. Contractor/Inspector QA/QC Review: In addition to engineers and construction personnel, the team has the added value of having on-staff licensed general and utility contractors that can review projects from various perspectives. With experienced personnel that have provided construction services for over 30 years, we are able to review the project from a constructability and/or mean and methods view point. In addition, the licensed on staff contractors review projects and provide "real-time" cost estimates throughout the duration of the project. This construction experience allows the team to view projects through the eyes of a contractor with the ability to identify intangible cost factors, elements such as restricted site conditions, specialized equipment requirements, excessive material and labor costs, impacts on schedules, etc. that may not be apparent to a design engineer.

CONFLICT OF INTEREST STATEMENT

State of Florida: City of Sanford

Before me, the undersigned authority, personally appeared Nikhel Jindal, GCC, Assoc. DBIA, ENV SP who was duly sworn, deposes, and states:

1. I am the Vice President / Associate of CPH, Inc. with a local office in DeLand, FL (City & State) and principal office in Sanford, FL (City & State).
2. The above named entity is submitting an Expression of Interest for the City of New Smyrna Beach project described as **RFQ 10-22-ENG, Continuing Professional Architectural Services.**
3. The Affiant has made diligent inquiry and provides the information contained in this Affidavit based upon his/her own knowledge.
4. The Affiant states that only one submittal for the above project is being submitted and that the above named entity has no financial interest in other entities submitting proposals for the same project.
5. Neither the Affiant nor the above named entity has directly or indirectly entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive pricing in connection with the entity's submittal for the above project. This statement restricts the discussion of pricing data until the completion of negotiations and execution of the Agreement for this project.
6. Neither the entity nor its affiliates, nor anyone associated with them, is presently suspended or otherwise ineligible from participating in contract lettings by any local, state, or federal agency.
7. Neither the entity, nor its affiliates, nor anyone associated with them have any potential conflict of interest due to any other clients, contracts, or property interests for this project.
8. I certify that no member of the entity's ownership, management, or staff has a vested interest in any aspect of or Department of City of New Smyrna Beach.
9. I certify that no member of the entity's ownership or management is presently applying for an employee position or actively seeking an elected position with City of New Smyrna Beach.
10. In the event that a conflict of interest is identified in the provision of services, I, on behalf of the above named entity, will immediately notify City of New Smyrna Beach in writing.

Nikhel Jindal, GCC, Assoc. DBIA, ENV SP

DRUG-FREE WORKPLACE CERTIFICATION

A. The below Firm certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violation of such prohibition.

(b) Establishing an on-going drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace.
(2) The employer's policy of maintaining a drug-free workplace.
(3) Any available drug counseling, rehabilitation, and employee assistance programs, and
(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace.

(c) Making it a requirement that each employee to be engaged in the performance of this contract be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under this contract, the employee will:

(1) Abide by the terms of the statement; and

(2) Notify the Employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the City of New Smyrna Beach, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Consultants of convicted employees must provide notice, including position and title to: City Clerk/Administrator, City of New Smyrna Beach, 210 Sams Avenue, New Smyrna Beach, FL 32168.

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is convicted.

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended, or

(2) Requiring such employee to participate satisfactorily in drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State or local health, law enforcement, or other appropriate agency.

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

B. The Firm may insert in the space provided below the site(s) for the performance of work done in connection with the specific contract:

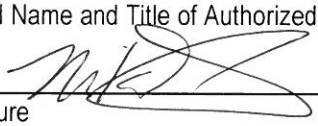
THIS FORM MUST BE COMPLETED AND RETURNED WITH YOUR SUBMITTAL

Place of performance (street address, city, county, state, zip code)

101 N. Woodland Blvd., Suite 305

DeLand, FL 32720

Check [X] if there are workplaces on file that are not identified here.



As a duly authorized representative of the Firm, I hereby certify that the Firm will comply with the above certifications.

NON-COLLUSION AFFIDAVIT OF PROPOSER

State of Florida

County of Seminole

Nikhel Jindal, GCC, Assoc. DBIA, ENV SP, being first duly sworn, deposes and says that:

He/she is Vice President / Associate of CPH, Inc., Proposer that has submitted the attached bid or Request for Qualifications;

He/she is fully informed respecting the preparation and contents of the attached bid and of all pertinent circumstances respecting such bid;

Such bid is genuine and is not a collusive or sham bid;

Neither the said Proposer nor any of its officers, partners, owners, agent representatives, employees, or parties in interest, including this affiant, has in any way colluded, conspired, connived or agreed, directly or indirectly, sought by agreement or collusion or communication or conference with any other Proposer, firm or person, to fix the price or prices in the attached Proposal or of any other Proposer, or to fix any overhead, profit or cost element of the Proposal price or the Proposal price of any other Proposer, or to secure through any collusion, conspiracy, connivance or unlawful agreement any advantage against the CITY OF NEW SMYRNA BEACH, FLORIDA, or any person interested in the proposed Contract; and

The price or prices quoted in the attached Proposal are fair and proper and are not tainted by any collusion, conspiracy, connivance or unlawful agreement on the part of the Proposer or any of its agents, representatives, owners, employees, or parties in interest, including this affiant.

RFQ 10-22-ENG: CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

Addendum 1: February 2, 2022

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to RFQ 10-22-ENG, Continuing Professional Architectural Services, released on January 15, 2021.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum. Please note, questions are recorded as they are received, including grammar and spelling errors.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation as though it had been issued at the same time, and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The Bid opening remains February 14, 2022 at 3:00 PM.

VENDOR QUESTIONS:

1. Can the City provide a list of Capital Improvement Projects that they anticipate being performed under this professional services agreement?

   Answer: At this time a list of capital improvement projects is not readily available

ALL OTHER AREAS OF THE BID DOCUMENT REMAINS THE SAME

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ **Go to *www.irs.gov/FormW9* for instructions and the latest information.**

Give Form to the requester. Do not send to the IRS.

Print or type. See Specific Instructions on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
CPH, Inc.

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☑ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from FATCA reporting code (if any) _____

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
500 West Fulton Street

Requester's name and address (optional)

6 City, state, and ZIP code
Sanford, FL 32771

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN,* later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

5	9	–	2	0	6	8	8	0	6

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here Signature of U.S. person ▶ David A. Duval Date ▶ 10/01/2021

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

DUNS Number: 58232349

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(A), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. THIS SWORN STATEMENT IS SUBMITTED TO City of New Smyrna Beach

by Nikhel Jindal, GCC, Assoc. DBIA, ENV SP ; Vice President / Associate
(Print Individual's Name and Title)
for CPH, Inc.
(Print Name of Entity Submitting Sworn Statement)
whose business is 101 N. Woodland Blvd., Suite 305 DeLand, FL 32720

and (if applicable) its Federal Employer Identification Number (FEIN) is 59-2068806

2. I understand that a "public entity crime" as defined in Paragraph 287.133 (1)(g), Florida Statutes, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in Paragraph 287.133(1)(b), Florida Statutes, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statutes, means:

    a. A predecessor or successor of a person convicted of a public entity crime; or

    b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months shall be considered an affiliate.

5. I understand that a "person" as defined in Paragraph 287.133(1)(e), Florida Statutes, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders,

employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. (Indicate which statement applies).

__X__ Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, nor any affiliates of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list. (Attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 (ONE) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR A CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

AGREEMENT FOR HALL & OGLE ARCHITECTS, INC. CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

THIS AGREEMENT is made and entered into this 28th day of June, 2022, by and between **Hall & Ogle Architects, Inc,** duly authorized to conduct business in the State of Florida and whose address is 208 Magnolia Ave., Daytona Beach, Florida 32114, hereinafter, called "CONSULTANT," and the **CITY OF NEW SMYRNA BEACH**, a political subdivision of the State of Florida, whose address is 210 Sams Ave., New Smyrna Beach, FL, hereinafter called "CITY."

SECTION 1. AGREEMENT. The terms of this Agreement, together with the incorporation of the terms and conditions of the **RFQ 10-22-ENG**, Continuing Professional Architectural Services, **FOR THE CITY OF NEW SMYRNA BEACH** and any exhibits, schedules, and attachments hereto, and any and all amendments relating to same, and any and all submittals from CONSULTANT, constitute the entire Agreement between the individual City and CONSULTANT. This Agreement is the final, complete and exclusive expression of the terms and conditions of the parties' Agreement. Any and all prior agreements, representations, negotiations, and understandings made by the parties, oral or written, expressed or implied, are hereby superseded and merged herein.

SECTION 2. TERM OF AGREEMENT. The initial term of this Agreement shall be for three (3) years from the date of the award. After the initial term, this Agreement shall automatically renew for two (2) optional, automatic, (1) year periods. The maximum term for this Agreement and all renewals is a cumulative term of five (5) years.

SECTION 3. DESCRIPTION OF SERVICES. The Consultant agrees to perform the services outlined in the advertised solicitation document titled **RFQ 10-22-ENG**, Continuing Professional Architectural Services, and in the Consultant's submitted Proposal.

The Consultant shall diligently and in a professional and timely manner perform and provide these services. Unless modified in writing by the parties hereto, the duties of the Consultant shall not be construed to exceed the provision of the services pertaining to this Agreement.

The City and Consultant agree that there may be certain additional services required to be performed by the Consultant during the performance of the contract that cannot be defined sufficiently at the time of execution of this Agreement. These services shall be authorized in writing as an amendment to the contract and may contain additional instructions or provide specifications upon certain aspects of this Agreement pertaining to the work to be undertaken.

SECTION 4. COMPENSATION. For Services rendered, the CITY shall pay the CONSULTANT based on their fee schedule provided. Unless otherwise agreed in a Scope of Services, the CONSULTANT shall invoice the City monthly based upon the CONSULTANT's fees for services completed during the billing period.

SECTION 5. COMPONENT PARTS OF THE CONTRACT. This Contract consists of the following contract documents, all of which are hereby made a part hereof as if herein set out in full and all of which are familiar to the Contractor:

A. City Advertised Bid
B. Addendums
C. Award Bid Proposal w Fee Proposal
D. Certificate of Insurance

SECTION 6. CONTROLLING LAW, VENUE, AND ATTORNEY'S FEES. This Agreement is to be governed, construed, and interpreted by, through and under the laws of Florida. Venue for any litigation between the parties to this Agreement shall be in the County of Volusia, Florida and any trial shall be non-jury. The prevailing party in any litigation arising from or related to this Agreement shall be reimbursed reasonable attorney fees and costs, including all fees and costs of an appeal.

SECTION 7. RIGHTS AT LAW RETAINED. The rights and remedies of the City, provided for under this Agreement, are in addition and supplemental to any other rights and remedies provided by law.

SECTION 8. NOTICES. Whenever either party desires to give notice unto the other, it must be given by written notice, sent by registered or certified United States mail, return receipts requested, addressed to the party for whom it is intended at the place last specified. The place for giving of notice shall remain such until it shall have been changed by written notice in compliance with the provisions of this Section. For the present, the parties designate the following as the respective places for giving of notice, to-wit:

For City:

Kelly McQuillen, City Clerk
City of New Smyrna Beach
210 Sams Ave.
New Smyrna Beach, FL 32138
(386)410-2637

Hall & Ogle Architects, Inc

David Ogle, Vice Pres.
(Name, Title)

Hall & Ogle Architects, Inc.
(Company)

208 Magnolia Ave
(Address)

Daytona Beach, FL 32117
(City, State, Zip)

386.255.6163
(Phone)

SECTION 9. MODIFICATIONS TO AGREEMENT. This Agreement and any exhibits, amendments and schedules may only be amended, supplemented, modified or canceled by a written instrument duly executed by both parties hereto of equal dignity herewith.

Contractor's Initials: DO

SECTION 10. SEVERABILITY. If during the term of this Agreement, it is found that a specific clause or condition of this Agreement is illegal under federal or state law, the remainder of the Agreement not affected by such a ruling shall remain in force and effect.

SECTION 11. WAIVER OF JURY TRIAL. The City and Consultant have specifically waived the right to a jury trial concerning any disputes which may arise concerning this agreement.

SECTION 12. EFFECT OF FAILURE TO INSIST ON STRICT COMPLAINCE WITH CONDITIONS. The failure of either party to insist on strict performance of any covenant or condition of this contract, or to exercise any option herein contained, shall not be construed as a waiver of such covenant, condition, or option in any other instance. This contract cannot be changed or terminated orally.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the date written above for execution by the City of New Smyrna Beach.

Re: Request for Qualifications Statement
RFQ No. 10-22-ENG, Continuing Professional Architectural Services

Dear Ms. Vivian and Selection Committee Members:

We would like to thank you very much for the opportunity to present our firm, Hall and Ogle Architects, Inc., for consideration as your Design Professional for the upcoming Continuing Professional Architectural Services contract.

Hall & Ogle Architects, Inc. is a local Volusia County architectural firm located in the downtown area of Daytona Beach. Founded in 1981, Hall & Ogle Architects has chosen to focus our architectural services in and for the communities of Volusia County, and we have dedicated our practice to providing sound, professional architectural support for their continued growth and prosperity for over 40 years. It is therefore our pleasure to submit our qualifications, abiding by Florida Statues Chapter 287.055 (CCNA), for Continuing Professional Architectural Services for the City of New Smyrna Beach.

Hall & Ogle Architects, Inc. is an 'S' Corporation, and will head the team for this project to include Civil Engineers Parker Mynchenberg and Associates (Holly Hill, Fl.), FCI Structural Engineers (Apopka, Fl.), Mechanical Engineers Sabiston Engineering Group (Apopka, Fl.), Plumbing and Electrical Engineers Matern Professional Engineering (Maitland, Fl.) and Nadic Engineering Services (Orlando).

We believe that our firm is uniquely qualified to provide architectural services to the city of New Smyrna Beach for the following reasons:

- A 40 year history of providing successful services to numerous municipalities, public institutions and private organizations.
- Hands-on involvement by a firm principal from the beginning until the end of your project.
- Extensive experience in coordination, administration, and design production of continuing service contracts.

Over the past 40 years our public clients include the Cities of New Smyrna Beach, Daytona Beach, South Daytona, Port Orange, Ormond Beach and Holly Hill, the Volusia County Council, the Volusia County School District and Daytona State College. We have maintained a continuing service contract for architectural services with the County of Volusia, the Volusia County School Board, and the cities of Daytona Beach, Ormond Beach and South Daytona. In doing so, we have established a positive working relationship with these municipalities and agencies.

Our primary goal is to give our clients unparalleled service from the initial programming process though to the one-year warranty walk through inspection. One of the firm's two principals are assigned to every project we do, meaning your project will have a principal intimately involved with your personnel and your project for a

seamless flow through the entire study. You will work with the same principal of the firm through each step of the project and renovation.

Most importantly Hall and Ogle has extensive experience in the successful design of municipal facilities. Since the firms inception in 1982 we have designed numerous difference municipal facilities including community centers, city halls, schools, fire stations, police stations and parks.

Additionally, our firm is committed to serving our clients through the integration of sustainable design practices. We offer an insight into what's possible within these practices and how they relate to the overall success of the project. Whether it's a project's pursuit of LEED Certification or a more cost-effective design strategy, our LEED Accredited Professionals are well positioned to meet and exceed the needs of the City.

We are committed to developing long term relationships with our clients as their advocate in all their architectural needs. We look forward to the opportunity to build our relationship with the City of New Smyrna and provide you with exceptional architectural and engineering services.

Respectfully,

David D. Ogle, RA,NCARB, LEED AP - Principal / Vice President (Primary Contact)

1. Description

This 16,600 sf facility was designed to be a signature building for the City of Daytona Beach Shores. It had to serve many purposes from Council Chambers, to multi-purpose rooms, a Senior Center and tennis facilities. The distinctive shape and color of the roof were designed to reflect the proximity to the Atlantic Ocean just across the street and has become an iconic feature for the City.
This project incorporated our standard 3-phase Project Design Approach, which benefited the owner by identifying several design options to accommodate challenging site conditions early in the design process. This approach would also benefit the City of New Smyrna Beach for the same reasons.

2. Construction Cost

$5,629,816

3. Delivery Method

Construction Manager

4. Start / Finish Date

Architectural Design Services NTP: Dec. 2015
Construction Began: Feb. 2017
Construction Completed: April, 2018

5. Project Completed on Schedule?

Yes

6. Project Completed w/in Budget?

Yes

7. Challenges

The biggest challenges with this project were the construction of the project around and accommodating the existing tennis courts that were to remain in use until after the building was complete.

8. Innovative Ideas/Processes/Design Solutions

This project was designed to replace the existing community center with a state of the art multi use facility that would reflect the city's image and motto of "Life is Better Here". The client requested an *avantgarde* and iconic design, identifying the city with its' beachside community lifestyle.
This was accomplished through the use of unique shapes and colors that brought a seaside atmosphere to and throughout the entire complex.

Nicholas Kugler / Project Engineer

1. Description

The First Step Homeless Shelter was designed to provide our area's homeless population a safe and dignified alternative to life on the streets, with emphasis on giving them their "First Step" towards improving themselves and their quality of life. The facility is a 120 bed, one story assistance facility providing food, shelter, clothing, and personal counseling. It also provides spaces for teaching and mental health assistance. It has dormitory style sleeping quarters with a 33/66 split between men and women. The facility also offers a full commercial kitchen and dining area, a 16 hour day Health Services Ward, and full administrative services.
This project incorporated amodified 3-phase Project Design Approach, which benefited the owner by allowing phased construction and unconventional scheduling options. This approach would benefit the City of New Smyrna Beach if similar project conditions arise.

2. Construction Cost

$3,518,089

3. Delivery Method

Competitive Bid

4. Start / Finish Date

Architectural Design Services NTP: Nov. 2017
Construction Began: Nov. 2018
Construction Completed: Dec., 2019

5. Project Completed on Schedule?

Yes

6. Project Completed w/in Budget?

Yes

7. Challenges

This project posed numerous challenges including designing within challenging budget constraints, navigation of political and public avenues, and providing and accomplishing an extremely fast-tracked schedule.

8. Innovative Ideas/Processes/Design Solutions

In order to meet a greatly accelerated construction time frame, this project incorporated a tilt-wall construction system. The client and managing staff desired a facility that was welcoming and secure, and creative solutions were needed to accomplish that within an extremely restrictive budget. Solutions included innovative use of colors and finish textures, as well as a large atrium space with high glass to give a very open and warm feel.

Adrian Baus / Project Engineer

1. Description

Hall & Ogle was selected to provide the Master Planning, Design and Construction Administration of security upgrades, relocated Administration Offices and relocated Computer Labs to an existing occupied campus. Renovations include relocating the existing Administration offices to another building at the front of the campus, and renovating the vacated building to provide new Computer Lab Classrooms. This project was completed on a challenging, occupied campus.
The renovation portion of this project is of a similar size and scope, and will need to coordinate construction during the school year at a very busy campus.

2. Construction Cost

$2,256,363

3. Delivery Method

Construction Manager

3. Start / Finish Date

Architectural Design Services: 2019
Construction Began: April, 2021
Construction Completed: August, 2021

4. Project Completed on Schedule?

Yes

5. Project Completed w/in Budget?

Yes

6. Challenges

The biggest challenges with this project were in addressing circulation and safety during construction on a busy occupied campus. This was accomplished with creative project planning, and close collaboration with the Construction Manager Team and Volusia County Schools.

7. Innovative Ideas/Processes/Design Solutions

Creative project planning was necessary to achieve project completion safely before the new school session. The design also needed to provide for integrating new electrical and mechanical solutions into a complicated and aging campus.

Paul Estes / Project Engineer

1. Description

This project provided a new 12,000 square foot athletic complex for Embry-Riddle Aeronautical University's baseball and softball programs. The project includes a 450 seat stadium, press box, concessions area, shower/locker rooms, sports medicine, coaches offices, meeting space and other ancillary spaces. This project incorporated our standard 3-phase Project Design Approach, which benefited the owner by identifying and addressing potential issues early in the design process. This approach would also benefit the City of New Smyrna Beach for the same reasons.

2. Construction Cost

$3,500,000

3. Delivery Method

Construction Manager

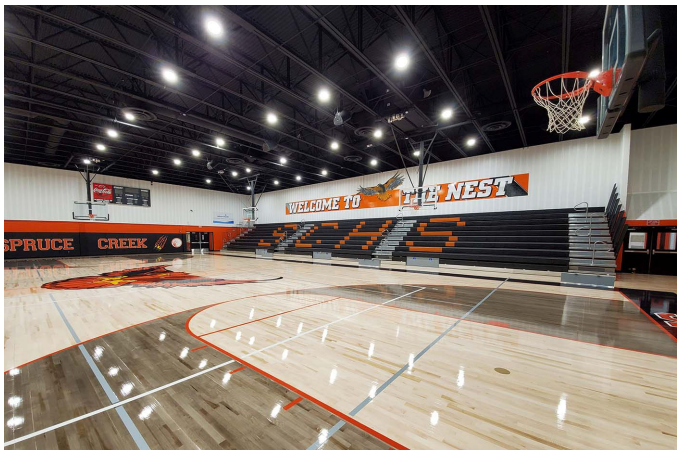
4. Start / Finish Date

Architectural Design Services NTP: Apr. 2013
Construction Began: July 2014
Construction Completed: April, 2015

5. Project Completed on Schedule?

Yes

6. Project Completed w/in Budget?



Yes

7. Challenges

The biggest challenges with this project were the integration of the new stadium and administration/ team facility within tight site constraints, and addressing circulation and safety during construction on a busy occupied campus. The design also needed to incorporate the re-use and renovation of existing dugout facilities, as well as providing ADA accessibility to all areas of the new building and stadium.

8. Innovative Ideas/Processes/Design Solutions

ADA accessibility was an important factor in the design of this facility, and was accomplished with the use of an exterior elevator that was aesthetically integrated with the facility to achieve a cohesive appearance with the surrounding existing sports complex and buildings.
Also, the interior locker room areas utilized materials that were to visually accentuate the status of both the home and visiting teams utilizing the facility, while still allowing for minimal maintenance and durability.

Spruce Creek High School
Renovate Gymnasium

Owner:
Volusia County Schools
300 Olson Drive
Daytona Beach, Florida 32124

339 Kentucky Blue Circle, Apopka Fl. 32712
Don Sabiston / Project Engineer

Plumbing /Electrical Engineer:
Matern Professional Engineering
130 Candace Drive, Maitland Fl. 32751
Adrian Baus / Project Engineer

1. Description

Hall & Ogle was selected to provide Design and Construction Administration for an extensive remodel to the existing Gymnasium at Spruce Creek High School. The scope of work included removal and replacement of the existing wood flooring, removal and replacement of the existing wood bleachers with new state of the art retractable bleacher seating with high performance plastic seating. The entrance doors in the gym were replaced and the entire gym was repainted. The scope also included all new HVAC equipment (rooftop mounted), all new LED lighting, and new electrical panels for control of the bleachers. The entire gymnasium was repainted from top to bottom, including custompainted logos on the gymnasium flooring.

2. Construction Cost

$1,090,053

3. Delivery Method

Construction Manager

3. Start / Finish Date

Architectural Design Services NTP: Nov. 2019
Construction Began: May 2020
Construction Completed: Oct. 2020

4. Project Completed on Schedule?

Yes

5. Project Completed w/in Budget?

Yes

6. Challenges

The biggest challenge with this project was working on a very busy campus. The gym has limited access directly to the exterior, so the majority of the construction access was through an occupied atrium area. The gym had to be closed for the duration of the project and safe student separation had to be provided. Larger material deliveries had to be carefully planned so as not to coincide with heavy student traffic between class periods.

7. Innovative Ideas/Processes/Design Solutions

The existing bleachers did not meet current code requirements, so the new layout had to be revised to meet exiting requirements and ADA standards for bleacher seating.

1. Description

Hall & Ogle was selected to provide the Master Planning, Design and Construction Administration of extensive renovations and additions to an existing occupied campus. Renovations include complete reconfiguration of parent drop off parking and bus loop areas, and remodeling of the existing food service/ multi-purpose and administration areas. Additions include a new 5,400 sf Administration Building, a new 10,400 sf Classroom Building, a new 14,000 sf Food Service/ Multi-purpose Building, plus interior renovations to provide new Classrooms and Skills/Music/Art Lab rooms. This was a phased project on a challenging, occupied campus.

2. Construction Cost

$16,368,000

3. Delivery Method

Construction Manager

3. Start / Finish Date

Architectural Design Services NTP: Apr. 2013
Construction Began: May 2018
Construction Completed: Dec. 2019 (Phase 1)
Jan. 2021 (Phase 2)

4. Project Completed on Schedule?

Yes

5. Project Completed w/in Budget?

Yes

6. Challenges

The biggest challenges with this project were in addressing circulation and safety during construction on a busy occupied campus. The design also needed to provide for new Bus Loop and Parent Drop Off areas within challenging campus space restraints.

7. Innovative Ideas/Processes/Design Solutions

Creative project phasing was necessary to achieve project completion safely within the projected timeframe.The design also needed to provide for new Bus Loop and Parent Drop Off areas within challenging campus space restraints.

Woodward Avenue Elementary
Renovations and Addition

Don Sabiston / Project Engineer

Plumbing / Electrical Engineer:
Matern Professional Engineering
130 Candace Drive, Maitland Fl. 32751
Adrian Baus / Project Engineer

1. Description

Hall & Ogle was selected to provide a “re-use” of the Westside Elementary Project since Woodward Avenue Elementary is a “sister” school to Westside. Similar to Westside, the renovations include improvements to the parent drop off/ parking and bus loop areas, and remodeling of the existing food service/ multi-purpose and administration areas. Additions include a new 5,400 sf Administration Building, a new 10,400 sf Classroom Building, a new 14,000 sf Food Service/ Multi-purpose Building, plus interior renovations to provide new Classrooms and Media Center.

2. Construction Cost Estimate

$17,000,000

3. Delivery Method

Construction Manager

3. Start / Finish Date

Architectural Design Services NTP: Apr. 2021
Construction NTP (estimated): Feb. 2022
Construction Completion (estimated): Aug. 2023

4. Project Completed on Schedule?

N/A

5. Project Completed w/in Budget?

N/A

6. Challenges

The biggest challenges with this project were fitting the same buildings from Westside into a campus that is much smaller. Additionally, the access to the new food service building required some innovative site planning because of the existing grades, the caretaker’s residence which had to remain and the desire to retain some of the existing portables.

7. Innovative Ideas/Processes/Design Solutions

Because of the site constraints, a portion of the existing food service area will be demolished to allow for expansion of the bus loop and at the same time, help solve the problem with the access to the new food service building which is basically in the center of the campus. Also, because of the age of the existing building and the fact that it was built in multiples phases, our structural engineer had to provide some creative solutions to allow the placement of a new media center into the center of the building and provide natural lighting into that space.

EXECUTIVE SUMMARY

Company Legal Name and History

Hall, & Ogle Architects, Inc. is an established Daytona Beach architectural firm with a track record of over 40 years of successful professional architectural services to many of the major local public institutions and private organizations in Volusia County. Hall & Ogle Architects, Inc. is an 'S' corporation, and has been in continuous operation in Florida since it was founded in August of 1981 by Joseph Blais and Lee Sayers. Former firm names are as follows:

- Blais& Sayers Architects, Inc. (1981)
- Blais, Sayers & Hawkins, Inc. (1989)
- Sayers & Hawkins, Inc. (1993)
- Hawkins & Hall, Inc. (1999)
- Hawkins, Hall & Ogle Architects, Inc. (2007)
- Hall & Ogle Architects, Inc. (2016)

Current firm principals, with equal ownership interests, John Hall, President, and David Ogle, Vice President, share in the critical project duties with Mr. Hall focusing on the Design and Bidding Phase and Mr. Ogle heading up Construction Administration. Our staff of highly skilled CAD/BIM technicians provide project documentation including construction documents as well as building modeling and photorealistic project renderings.

EDDIE L. COX, P.E.
fci Structural Engineers, Inc.
Principal/Project Manager

EDUCATION:

Bachelor of Science in Civil Engineering, 1975
Structures Major
Tennessee Technological University

PROFESSIONAL REGISTRATION:

Registered Professional Structural Engineer in the following state:
Florida

PROFESSIONAL SOCIETY AFFILIATIONS AND LOCAL MEMBERSHIPS:

American Society of Civil Engineers
National Society of Professional Engineers
Florida Engineering Society
Florida Structural Engineers Association
American Concrete Institute
International Building Code

SUMMARY OF EXPERIENCE:

As Principal-in-Charge Mr. Cox will be responsible for project management, development of structural systems, structural design, production and coordination of working drawings and specifications, construction phase services including shop drawing reviews and site observation visits, and will provide quality control for our projects. He has over 40 years of design experience in the structural design of many types of buildings, including offices and municipal buildings, police stations, fire stations, administrative buildings, elementary schools, middle schools, high schools and colleges, medical facilities, restaurants, churches, retail, entertainment, theme parks, residential, and many other types of projects throughout Florida and including many other states through-out the United States. His broad range of experience includes many types of structural building systems including concrete, precast concrete, post-tensioned concrete, masonry, structural steel, light gage metal framing, and wood frame construction, as well as evaluation and analysis of existing facilities. He has extensive experience in remodeling and renovations of existing facilities including the solutions of existing structural problem conditions.

Donald J. Sabiston, PE, MBA

Principal / Mechanical Engineer

Master of Business Administration, 1993
Auburn University, Auburn, Alabama

Bachelor of Science in Mechanical Engineering, 1991
Auburn University, Auburn, Alabama

Florida License #54889, Professional Engineer

Qualifications and Experience:

Mr. Sabiston has over 22 years of experience engineering Mechanical and Plumbing systems for educational facilities. During that time, his responsibilities have encompassed design engineer, project manager and Engineer of Record on hundreds of projects. His forte is the design of Mechanical systems for Educational Facilities. His broad experience with these systems gives him invaluable insight during the planning and development phases to coordinate specific project needs with the design team and facility Owner.

He has extensive experience designing HVAC systems that meet current ASHRAE indoor air quality standards, maintain accurate humidity control without extensive system complexity, and are energy efficient. His designs also provide well-planned maintenance accessibility and excellent service life.

His experience includes both new and renovation projects that range from small DX systems to large, campus-wide chilled and hot water plants. He also has extensive experience with building automation systems and develops sophisticated project specific control sequences to improve the energy efficiency of HVAC systems and can assist with programming these systems if needed.

Mr. Sabiston has substantial Project Management experience and is dedicated to working as a team member to achieve the project goals. He often provides project scheduling and tracking services to ensure the facilities may be occupied when needed.

The construction services phase of projects is critical for successful project outcome. Mr. Sabiston provides thorough reviews of submittal data to identify issues early in construction. He works well with contractors, but can be firm when needed. Mr. Sabiston believes heavy involvement in the construction phase helps engineers become better designers.

The following is a brief summary of some unique projects designed by Mr. Sabiston:

Westside Elementary School – Media Center HVAC Renovation

Mechanical Engineer for HVAC renovation to existing Media Center and two classrooms that converted building from DX systems and connected to campus chilled water loop. New system incorporated central station chilled water AHU with VAV air distribution, CO2 ventilation control and energy efficient control sequences. Replacement of pumps for variable primary chilled water system were also included in project.

Westside Elementary School – Replace Campus Chillers

Mechanical Engineer for replacement and upgrade of air cooled chiller plant to 300 tons of capacity. New chillers eliminated noise complaints and provide capacity for future expansions on campus. Chiller plant EMS control sequences were upgraded to improve energy efficiency.

Westside Elementary School – HVAC Upgrade

Engineer for project to upgrade classroom HVAC systems throughout campus, upgrade ventilation air system and improve indoor humidity and temperature control. Replaced ductwork and provided independent temperature control using VAV air distribution with electric heat. Added a central AHU for ventilation air and an air distribution system to each pod AHU. Replaced EMS and incorporated energy efficient control sequences. Converted chilled water pumping system from constant volume to variable primary for improved energy efficiency.

DeBary Elementary School – 12 Classroom Addition

Mechanical/Plumbing Engineer for 12 classroom, 2-story building addition to elementary school. Scope included an independent chiller and distribution system, chilled water AHU with VAV air distribution system for independent temperature control and new EMS system with energy efficient sequences.

Pride Elementary School (Elementary "Y")

Mechanical/Plumbing Engineer for HVAC systems for a prototype elementary school for Volusia County School District including a 350 ton air cooled chiller plant with primary/secondary pumping system, central station AHU's with VAV air distribution, and custom control sequences for energy efficiency.

Pine Ridge and Atlantic High Schools – Building 7 HVAC Renovations

66 day summer renovation projects to replace the HVAC systems in two 30,000 sf Science Classroom buildings.

Discovery Elementary School – Campus HVAC Renovation

Upgraded the campus HVAC, lighting, Fire Alarm, and energy management systems. Revised the pumping system to variable primary and designed a free reheat system for the air handling units.

Volusia County Schools – Design Guidelines and EMCS Specifications

Authored the District's Design Guidelines and created their Master EMCS Specifications for all consulting engineers to use.

Reedy Creek Elem. School – Modular Addition and Site M&E Connections

Design mechanical systems for a 14 classroom addition. Also, increased chiller plant capacity to 200 tons and modified the CHW pumping and distribution system to provide chilled water to the new building.

Deerwood Elem. School – Modular Addition and Site M&E Connections

Design mechanical systems for a 12 classroom addition. Also, increased chiller plant capacity 100 tons and modified CHW pumping and distribution systems to correct pumping problems. Provided chilled water to the new modular classroom building.

Qualified Commissioning Professional

Mr. Baus has over 26 years of experience in construction and engineering, encompassing practical field experience as well as design expertise. His extensive knowledge and on the job experience has led him to head Matern's Quality Control Program.

Adrian is a registered Electrical, Mechanical and Fire Protection Engineer and an expert in renovation and new construction. Adrian is experienced in electrical, power, lighting, communication systems, security systems, lightning & surge protection, HVAC systems, central energy plants, fire protection systems, energy management, technology, life cycle cost analysis, cost estimating, and construction administration.

As the technical expert for the office, Adrian has been solving mechanical, electrical, plumbing, fire protection and systems issues in the field for years. Adrian is the "go-to" engineer for specialty projects such as photovoltaic systems, co-generation power sources and complex problem solving projects. His knowledge and understanding of all aspects of engineering is remarkable, as is his attention to detail. Adrian is also a Senior Member of the Institute of Electrical and Electronics Engineers (IEEE), and teaches electrical apprentice class for FEAT at Seminole State College.

His extensive project experience includes community facilities, federal, state & local government administrative and correctional facilities; higher education facilities; K-12 educational & support facilities; as well as a wide variety of private commercial and industrial facilities.

GRANT EXPERIENCE

HALL & OGLE ARCHITECTS, INC.

Grant Experience:
Hall & Ogle Architects has extensive experience working on projects that were grant funded. Although it isn't in our scope of work to actually apply for the grants, we have assisted many clients during the process. We have worked on several ECHO projects for the County of Volusia as well as State and Federal DOT grants, and Community Development Block Grants (CDBG).

We are completing a new Terminal for Greyhound Lines, Inc. that was federally funded, and have done many projects for Daytona Beach International Airport that were DOT funded.

We are currently working on Emergency Renovations at the First Step Shelter in Daytona Beach which is grant funded and we worked hand in hand with the Shelter staff, County personnel and the City of Daytona Beach to provide all of the correct documentation for bidding of the project.

PROJECT APPROACH

HALL & OGLE ARCHITECTS, INC.

Hall & Ogle uses a holistic team approach in developing our projects with our engineering team providing their expertise from Pre-Design through Post Construction. The consultant team we have assembled for the Orange City Elementary Renovations and Additions project are aware of and agree with our approach to project coordination, documentation production, and construction administration.

The flow outline listed below addresses items of VCS concern pertaining to Design Reviews and Coordination, Permitting, Scheduling and Phasing, Budgeting, and Contract Administration. These items are interconnected throughout all phases of the project, and it has been our experience that by phasing the project in the following manner a more streamlined development and control of these items is achieved.

1. Pre-Design Phase: (Design Reviews/ Scheduling and Phasing/ Budgeting)

   Meet with the Owner's key personnel for this facility focusing on the following:

   a. Review basic programming needs/functions that staff has determined to be the core needs for the project.
   b. Help staff develop spatial requirements for each key function.
   c. Help staff to review adjacencies/work/people flow requirements for all functions.
   d. Review with VCS services staff what works/doesn't work for them, ensuring an efficient well functioning design.
   e. Review programmatic growth needs for the next 10/25 years.
   f. Review project size/function with requirements of project budget. Develop project alternates for methods of ensuring facility stays in budget.
   g. Review site constraints/opportunities with staff, developing concepts that best maximize opportunities and minimizing the constraints, also turning constraints into opportunities to best leverage owner's needs/budget.
   h. Develop proposed methods for accommodating facility occupation and continued use during demolition and construction phases of the project.
   i. Prepare initial Pre-Design Report and Proposal/ Recommendations for Owner's review and approval.

2. Document Production: (Design Reviews/ Scheduling and Phasing/ Budgeting/ Permitting)

   Develop design and construction documents for the project in the following traditional sequence of phases:

   a. Schematic / preliminary design phase: Development of schematic/preliminary design concepts for the project to include alternate concepts for the Owner's review and approval. Review approved concept for adherence to Owner's Construction budget and schedule.
   b. Design Development Phase: Development of the approved concept to include evaluation of proposed site development/ improvements, energy efficient exterior envelopes/ fenestration options and energy efficient mechanical HVAC/ electrical systems that your facilities department can easily maintain through the life of the facility. Complete review of proposed construction, materials and HVAC/ plumbing/ electrical systems and site development costs for adherence to Owner's construction budget and schedule. Provide Construction Manager design development document for preparation of the initial Guaranteed Maximum Price. Begin review coordination with VCS Facilities Director and Building Officials to insure project conformity to VCS standards and code compliance.

c. Construction Document Phase: Completion of complete/ accurate and well coordinated construction/ bidding documents and specifications. Work hand in hand with Construction Manager to provide an updated GMP. Work with VCS staff to provide products/ systems that are durable/ low maintenance and with-in the capabilities of staff to maintain and operate. Review final documentation/ design with VCS Facilities Director and Building Officials to insure project conformity to VCS standards and code compliance.

d. Bidding Phase: Assist the Construction Manager during the bidding of the project, for adherence to the requirements of the bid documents and specifications. Review and evaluate bid alternates provided in construction documents to maintain project budget. If required, provide revised documents for cost reduction and/or budget adherence. Confirm receipt of all permits required for construction of the project.

3. Construction Administration Phase: (Contract Administration)*

**Hall & Ogle has extensive experience with the Construction Management delivery process as the majority of our large school projects for VCS were completed in this manner. We are totally comfortable with the process, and it is actually our preference for projects such as Orange City Elementary, should VCS choose to go in this direction.*

a. Conduct weekly construction progress/ review meetings with the Owner's representative and the Construction Manager at the job site during the construction phase of the project.
b. Provide interpretations of the contract documents as required by the Owner or Construction Manager, and provide resolution of any construction issues that may arise during construction.
c. Provide weekly inspections of Work in Place for adherence to the contract documents and specifications.
d. Provide weekly construction inspection reports to the Owner and Construction Manager. Provide timely and thorough shop drawing review of all required items.
e. Attend all pre-construction meetings on major building elements and systems.
f. Provide a team player approach to all RFI's and resolution (with required documents) of any construction issues with the owner's interest in full focus, not to hinder or delay the construction schedule and minimize any additional cost to the owner.
g. Provide inspection and punchlists for all work in place at the completion of the projects' construction.
h. Review all of the required close-out documents submitted by the Construction Manager, for the project to include: 'as-built' drawings (digital format), Owner's operation/ maintenance manuals, and project warranties.
i. Confirm completion and provide final acceptance of Work in place for Owner's use of the project.

4. Warranty Period Services: Provide inspection of project at end of Construction Manager's warranty period (typically 1 year) to identify any construction, materials, or systems difficulties. Provide one year warranty inspection report to Owner and Construction Manager. Confirm all required corrective work.

PROJECT MANAGEMENT

HALL & OGLE ARCHITECTS, INC.

Project Scheduling

Hall and Ogle utilizes A "Hands On" approach to project management, from client interaction, cost estimating, document production, bidding, construction administration, all the way to project completion and the one year warranty walk through inspection. A firm principal is intimately involved in all aspects of your project, and the client communicates directly with him. With this direct line of communication, we are able to work side by side with the client to identify project milestones and establish a realistic and achievable project timeframe.

We have found that over the past 40 years the importance placed on Client/ Architect communication and combined effort in establishing a project schedule insures the project is completed within the project timeframe, and we are very proud of our 40 year track record of bringing projects in on time and in budget.

Cost Estimating

Hall and Ogles utilizes industry standard cost estimating methods to generalize the initial budget guidelines, but that guideline is constantly being refined throughout the design phase by consulting with area contractors and consultants who we've established close relationships with. At each phase in the design process, the design is reviewed against the construction climate at that time, and if necessary, adjustments are made with full communication and input with the owner. By keeping the status of the current construction and material climates in focus, the projected bid offers can be better forecasted to minimize cost overruns.

Through close communication with the owner, design team, and construction contacts, Hall and Ogle has maintained a positive track record of bringing projects in on time and in budget for over 40 years. Our Municipal clients have been able to take advantage of that ability to enhance and maintain their municipal and community facilities. We feel Hall and Ogle Architects and the City of New Smyrna Beach would be a great fit to continue the city's positive growth, while ensuring proper stewardship of the city's tax and grant dollars, and the utilization of those dollars to their maximum benefit.

City of New Smyrna Beach does not discriminate based on age, race, color, sex, religion, national origin, disability or marital status.

Form **W-9**
(Rev. August 2013)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give Form to the requester. Do not send to the IRS.

Print or type
See **Specific Instructions** on page 2.

Name (as shown on your income tax return)
Hall & Ogle Architects, Inc.

Business name/disregarded entity name, if different from above

Check appropriate box for federal tax classification:
☐ Individual/sole proprietor ☐ C Corporation ☑ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶

☐ Other (see instructions) ▶

Exemptions (see instructions):
Exempt payee code (if any)
Exemption from FATCA reporting code (if any)

Address (number, street, and apt. or suite no.)
208 Magnolia Avenue

City, state, and ZIP code
Daytona Beach, FL 32114

Requester's name and address (optional)

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number
			–		–				

Employer identification number
5	9	–	2	2	0	9	9	0	9

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below), and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 3.

Sign Here **Signature of U.S. person ▶** David D. Ogle **Date ▶** 02.14.2022

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. The IRS has created a page on IRS.gov for information about Form W-9, at *www.irs.gov/w9*. Information about any future developments affecting Form W-9 (such as legislation enacted after we release it) will be posted on that page.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, payments made to you in settlement of payment card and third party network transactions, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income, and
4. Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting, is correct.

Note. If you are a U.S. person and a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax under section 1446 on any foreign partners' share of effectively connected taxable income from such business. Further, in certain cases where a Form W-9 has not been received, the rules under section 1446 require a partnership to presume that a partner is a foreign person, and pay the section 1446 withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid section 1446 withholding on your share of partnership income.

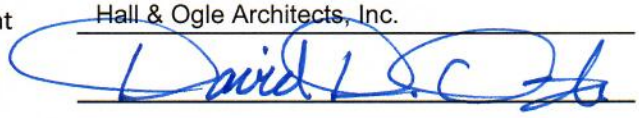
Conflict of Interest Disclosure Form

PROJECT (RFQ, RFP, ITN) NUMBER: RFQ 10-22-ENG

The award of this contract is subject to the provisions of Chapter 112, Florida Statutes. All respondents must disclose within their submittal: the name of any officer, director, or agent who is also an employee of the City of New Smyrna Beach, Florida. Furthermore, all respondents must disclose the name of any City employee who owns, directs, or indirectly, an interest of more than five percent (5%) in the respondent's firm or any of its branches.

The purpose of this disclosure statement is to give the City the information needed to identify potential conflicts of interest for screening evaluation team members and other key personnel involved in the award of this contract.

The term "conflict of interest" refers to situations in which financial or other personal considerations may adversely affect, or have the appearance of adversely affecting, an employee's professional judgment in exercising any City duty or responsibility in administration, management, or other professional activities. The bias such conflicts could conceivable impart may inappropriately affect the goals of the City. The City must be free of the undue influence of outside interests.



The mere appearance of a conflict may be as serious and potentially damaging as an actual conflict of interest. Reports of conflicts based on appearances can undermine public trust in ways that may not be adequately restored even when the mitigating facts of a situation are brought to light. Apparent conflicts, therefore, should be disclosed and evaluated with the same vigor as actual conflicts.

Please check one of the following statements and attach necessary documents if necessary:

X To the best of our knowledge, the undersigned firm has no potential conflict of interest due to any other clients, contracts, or property interest for this project.

_____ The undersigned firm, by attachment to this form, submits information which may be a potential conflict of interest due to other clients, contracts, or property interest for this project.

Hall & Ogle has maintained a close working relationship with Volusia County Schools for over 40 years. During that time, we have successfully completed projects from small maintenance upgrades to new schools with budgets exceeding 30 million dollars. We have maintained a continuing services contract for our entire working relationship, and continue to provide sound architectural services and successful projects, delivered on time and in budget. We are currently nearing the construction phase of the Woodward Elementary School Renovations and Additions project.

DRUG-FREE WORKPLACE CERTIFICATION

A. The below Firm certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violation of such prohibition.

(b) Establishing an on-going drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace.
(2) The employer's policy of maintaining a drug-free workplace.
(3) Any available drug counseling, rehabilitation, and employee assistance programs, and
(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace.

(c) Making it a requirement that each employee to be engaged in the performance of this contract be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under this contract, the employee will:

(1) Abide by the terms of the statement; and

(2) Notify the Employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the City of New Smyrna Beach, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Consultants of convicted employees must provide notice, including position and title to: City Clerk/Administrator, City of New Smyrna Beach, 210 Sams Avenue, New Smyrna Beach, FL 32168.

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is convicted.

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended, or

(2) Requiring such employee to participate satisfactorily in drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State or local health, law enforcement, or other appropriate agency.

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

B. The Firm may insert in the space provided below the site(s) for the performance of work done in connection with the specific contract:

SWORN STATEMENT PURSUANT TO SECTION 287.133(3)(A), FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

THIS FORM MUST BE SIGNED AND SWORN TO IN THE PRESENCE OF A NOTARY PUBLIC OR OTHER OFFICIAL AUTHORIZED TO ADMINISTER OATHS.

1. THIS SWORN STATEMENT IS SUBMITTED TO City of New Smyrna Beach

by David D. Ogle, Jr., Vice President
(Print Individual's Name and Title)
for Hall & Ogle Architects, Inc.
(Print Name of Entity Submitting Sworn Statement)
whose business is Professional Architectural Services

and (if applicable) its Federal Employer Identification Number (FEIN) is 59-2209909

2. I understand that a "public entity crime" as defined in Paragraph 287.133 (1)(g), Florida Statutes, means a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity or with an agency or political subdivision of any other state or of the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or an agency or political subdivision of any other state or of the United States and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

3. I understand that "convicted" or "conviction" as defined in Paragraph 287.133(1)(b), Florida Statutes, means a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

4. I understand that an "affiliate" as defined in Paragraph 287.133(1)(a), Florida Statutes, means:

    a. A predecessor or successor of a person convicted of a public entity crime; or

    b. An entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public crime. The term "affiliate" includes those officers, directors, executives, partners, shareholders, employees, members and agents who are active in the management of an affiliate. The ownership by one person of shares constituting a controlling interest in another person, or a pooling of equipment or income among persons when not for fair market value under an arm's length agreement, shall be a prima facie case that one person controls another person. A person who knowingly enters into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months shall be considered an affiliate.

5. I understand that a "person" as defined in Paragraph 287.133(1)(e), Florida Statutes, means any natural person or entity organized under the laws of any state or of the United States with the legal power to enter into a binding contract and which bids or applies to bid on contracts for the provisions of goods or services let by a public entity, or which otherwise transacts or applies to transact business with a public entity. The term "person" includes those officers, directors, executives, partners, shareholders,

employees, members, and agents who are active in management of an entity.

6. Based on information and belief, the statement which I have marked below is true in relation to the entity submitting this sworn statement. (Indicate which statement applies).

X Neither the entity submitting this sworn statement, nor any of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, nor any affiliates of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989.

_____ The entity submitting this sworn statement, or one or more of its officers, directors, executives, partners, shareholders, employees, members, and agents who are active in management of an entity, or an affiliate of the entity has been charged with and convicted of a public entity crime subsequent to July 1, 1989. However, there has been a subsequent proceeding before a Hearing Officer of the State of Florida, Division of Administrative Hearings and the Final Order entered by the Hearing Officer determined that it was not in the public interest to place the entity submitting this sworn statement on the convicted vendor list. (Attach a copy of the final order).

I UNDERSTAND THAT THE SUBMISSION OF THIS FORM TO THE CONTRACTING OFFICER FOR THE PUBLIC ENTITY IDENTIFIED IN PARAGRAPH 1 (ONE) ABOVE IS FOR THAT PUBLIC ENTITY ONLY AND, THAT THIS FORM IS VALID THROUGH DECEMBER 31 OF THE CALENDAR YEAR IN WHICH IT IS FILED. I ALSO UNDERSTAND THAT I AM REQUIRED TO INFORM THE PUBLIC ENTITY PRIOR TO ENTERING INTO A CONTRACT IN EXCESS OF THE THRESHOLD AMOUNT PROVIDED IN SECTION 287.017, FLORIDA STATUTES, FOR A CATEGORY TWO OF ANY CHANGE IN THE INFORMATION CONTAINED IN THIS FORM.

CONFLICT OF INTEREST STATEMENT

State of Florida: City of Daytona Beach

Before me, the undersigned authority, personally appeared David D. Ogle, Jr. who was duly sworn, deposes, and states:

1. I am the Vice President of Hall & Ogle Architects, Inc. with a local office in N/A (City & State) and principal office in Daytona Beach, FL (City & State).
2. The above named entity is submitting an Expression of Interest for the City of New Smyrna Beach project described as **RFQ 10-22-ENG, Continuing Professional Architectural Services.**
3. The Affiant has made diligent inquiry and provides the information contained in this Affidavit based upon his/her own knowledge.
4. The Affiant states that only one submittal for the above project is being submitted and that the above named entity has no financial interest in other entities submitting proposals for the same project.
5. Neither the Affiant nor the above named entity has directly or indirectly entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive pricing in connection with the entity's submittal for the above project. This statement restricts the discussion of pricing data until the completion of negotiations and execution of the Agreement for this project.
6. Neither the entity nor its affiliates, nor anyone associated with them, is presently suspended or otherwise ineligible from participating in contract lettings by any local, state, or federal agency.
7. Neither the entity, nor its affiliates, nor anyone associated with them have any potential conflict of interest due to any other clients, contracts, or property interests for this project.
8. I certify that no member of the entity's ownership, management, or staff has a vested interest in any aspect of or Department of City of New Smyrna Beach.
9. I certify that no member of the entity's ownership or management is presently applying for an employee position or actively seeking an elected position with City of New Smyrna Beach.
10. In the event that a conflict of interest is identified in the provision of services, I, on behalf of the above named entity, will immediately notify City of New Smyrna Beach in writing.

NON-COLLUSION AFFIDAVIT OF PROPOSER

State of Florida

County of Volusia

David D. Ogle, Jr., being first duly sworn, deposes and says that:

He/she is Vice President of Hall & Ogle Architects, Inc., Proposer that has submitted the attached bid or Request for Qualifications;

He/she is fully informed respecting the preparation and contents of the attached bid and of all pertinent circumstances respecting such bid;

Such bid is genuine and is not a collusive or sham bid;

Neither the said Proposer nor any of its officers, partners, owners, agent representatives, employees, or parties in interest, including this affiant, has in any way colluded, conspired, connived or agreed, directly or indirectly, sought by agreement or collusion or communication or conference with any other Proposer, firm or person, to fix the price or prices in the attached Proposal or of any other Proposer, or to fix any overhead, profit or cost element of the Proposal price or the Proposal price of any other Proposer, or to secure through any collusion, conspiracy, connivance or unlawful agreement any advantage against the CITY OF NEW SMYRNA BEACH, FLORIDA, or any person interested in the proposed Contract; and

The price or prices quoted in the attached Proposal are fair and proper and are not tainted by any collusion, conspiracy, connivance or unlawful agreement on the part of the Proposer or any of its agents, representatives, owners, employees, or parties in interest, including this affiant.

RFQ 10-22-ENG: CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

Addendum 1: February 2, 2022

TO ALL PROPOSERS:

Notice is hereby given to all Proposers that this is **Addendum 1** to RFQ 10-22-ENG, Continuing Professional Architectural Services, released on January 15, 2021.

This addendum is issued to answer vendor questions, clarify, add, delete, correct and/or change the proposal documents to the extent indicated and is hereby made a part of the above noted ITB documents. Any modifications/changes made by this addendum affect only the portions or paragraphs specifically identified herein; all remaining portions of the proposal are to remain in force. It is the responsibility of all Applicants to conform to this addendum. Please note, questions are recorded as they are received, including grammar and spelling errors.

This addendum shall be considered part of the Contract Documents for the above mentioned solicitation as though it had been issued at the same time, and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original document, this addendum shall govern and take precedence. All other terms, conditions, and regulations will apply.

This addendum **impacts all vendors interested in submitting proposals for this solicitation.**

The Bid opening remains February 14, 2022 at 3:00 PM.

VENDOR QUESTIONS:

1. Can the City provide a list of Capital Improvement Projects that they anticipate being performed under this professional services agreement?

   Answer: At this time a list of capital improvement projects is not readily available

ALL OTHER AREAS OF THE BID DOCUMENT REMAINS THE SAME

Instructions:

This page of Addendum #1, shall be signed and returned with the proposal. Please provide a signed copy of this addendum with your proposal.

AGREEMENT FOR PQH GROUP DESIGN, INC. CONTINUING PROFESSIONAL ARCHITECTURAL SERVICES

THIS AGREEMENT is made and entered into this 28th day of June, 2022, by and between **PQH Group Design, Inc,** duly authorized to conduct business in the State of Florida and whose address is 4141 Southpoint Drive East, Suite 200 Jacksonville, FL 32216, hereinafter, called "CONSULTANT," and the **CITY OF NEW SMYRNA BEACH**, a political subdivision of the State of Florida, whose address is 210 Sams Ave., New Smyrna Beach, FL, hereinafter called "CITY."

SECTION 1. AGREEMENT. The terms of this Agreement, together with the incorporation of the terms and conditions of the **RFQ 10-22-ENG**, Continuing Professional Architectural Services, **FOR THE CITY OF NEW SMYRNA BEACH** and any exhibits, schedules, and attachments hereto, and any and all amendments relating to same, and any and all submittals from CONSULTANT, constitute the entire Agreement between the individual City and CONSULTANT. This Agreement is the final, complete and exclusive expression of the terms and conditions of the parties' Agreement. Any and all prior agreements, representations, negotiations, and understandings made by the parties, oral or written, expressed or implied, are hereby superseded and merged herein.

SECTION 2. TERM OF AGREEMENT. The initial term of this Agreement shall be for three (3) years from the date of the award. After the initial term, this Agreement shall automatically renew for two (2) optional, automatic, (1) year periods. The maximum term for this Agreement and all renewals is a cumulative term of five (5) years.

SECTION 3. DESCRIPTION OF SERVICES. The Consultant agrees to perform the services outlined in the advertised solicitation document titled **RFQ 10-22-ENG**, Continuing Professional Architectural Services, and in the Consultant's submitted Proposal.

The Consultant shall diligently and in a professional and timely manner perform and provide these services. Unless modified in writing by the parties hereto, the duties of the Consultant shall not be construed to exceed the provision of the services pertaining to this Agreement.

The City and Consultant agree that there may be certain additional services required to be performed by the Consultant during the performance of the contract that cannot be defined sufficiently at the time of execution of this Agreement. These services shall be authorized in writing as an amendment to the contract and may contain additional instructions or provide specifications upon certain aspects of this Agreement pertaining to the work to be undertaken.

SECTION 4. COMPENSATION. For Services rendered, the CITY shall pay the CONSULTANT based on their fee schedule provided. Unless otherwise agreed in a Scope of Services, the CONSULTANT shall invoice the City monthly based upon the CONSULTANT's fees for services completed during the billing period.

SECTION 5. COMPONENT PARTS OF THE CONTRACT. This Contract consists of the following contract documents, all of which are hereby made a part hereof as if herein set out in full and all of which are familiar to the Contractor:

A. City Advertised Bid
B. Addendums
C. Award Bid Proposal w Fee Proposal
D. Certificate of Insurance

SECTION 6. CONTROLLING LAW, VENUE, AND ATTORNEY'S FEES. This Agreement is to be governed, construed, and interpreted by, through and under the laws of Florida. Venue for any litigation between the parties to this Agreement shall be in the County of Volusia, Florida and any trial shall be non-jury. The prevailing party in any litigation arising from or related to this Agreement shall be reimbursed reasonable attorney fees and costs, including all fees and costs of an appeal.

SECTION 7. RIGHTS AT LAW RETAINED. The rights and remedies of the City, provided for under this Agreement, are in addition and supplemental to any other rights and remedies provided by law.

SECTION 8. NOTICES. Whenever either party desires to give notice unto the other, it must be given by written notice, sent by registered or certified United States mail, return receipts requested, addressed to the party for whom it is intended at the place last specified. The place for giving of notice shall remain such until it shall have been changed by written notice in compliance with the provisions of this Section. For the present, the parties designate the following as the respective places for giving of notice, to-wit:

For City:

Kelly McQuillen, City Clerk
City of New Smyrna Beach
210 Sams Ave.
New Smyrna Beach, FL 32138
(386)410-2637

PQH Group Design, Inc

Ricardo E. Quinones,AIA, LEED AP BD+C, President
(Name, Title)

PQH GROUP DESIGN, INC.
(Company)

4141 Southpoint Drive East, Suite 200
(Address)

Jacksonville, Florida 32216
(City, State, Zip)

904-224-0001
(Phone)

SECTION 9. MODIFICATIONS TO AGREEMENT. This Agreement and any exhibits, amendments and schedules may only be amended, supplemented, modified or canceled by a written instrument duly executed by both parties hereto of equal dignity herewith.

SECTION 10. SEVERABILITY. If during the term of this Agreement, it is found that a specific clause or condition of this Agreement is illegal under federal or state law, the remainder of the Agreement not affected by such a ruling shall remain in force and effect.

SECTION 11. WAIVER OF JURY TRIAL. The City and Consultant have specifically waived the right to a jury trial concerning any disputes which may arise concerning this agreement.

SECTION 12. EFFECT OF FAILURE TO INSIST ON STRICT COMPLAINCE WITH CONDITIONS. The failure of either party to insist on strict performance of any covenant or condition of this contract, or to exercise any option herein contained, shall not be construed as a waiver of such covenant, condition, or option in any other instance. This contract cannot be changed or terminated orally.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the date written above for execution by the City of New Smyrna Beach.

INTRODUCTION & REQUIRED DOCUMENTATION

February 14, 2022

City of new Smyrna Beach
Janet Vivian, Purchasing Coordinator,
Purchasing Department
210 Sams Avenue
New Smyrna Beach, Florida 32168

RE: Continuing Professional Architectural Services
RFQ No. 10-22-ENG
Letter of Introduction

Janet Vivian, Purchasing Coordinator,

On behalf of the entire PQH team, we appreciate your consideration of our qualifications to provide professional architectural design services for the Continuing Professional Architectural Services for City of New Smyrna Beach. PQH values the opportunity to submit a proposal for this work and hopefully begin a successful working relationship with the City of New Smyrna Beach. We've carefully reviewed the requirements of this RFQ and understand the requirements for providing Continuing Services for this project. If given the chance to perform, we are committed to respond with the highest level of expertise, coordination, and resources required to successfully achieve your vision.

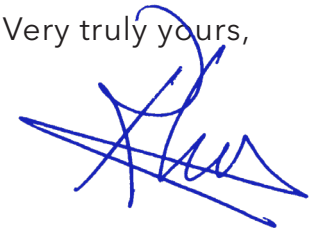
CONTINUING SERVICE EXPERIENCE
PQH has over 20 years of experience working on continuing service contracts with multiple agencies including:

- St. Johns County
- JEA
- UF Health
- University of North Florida
- St. Johns County School District
- Florida State College of Jacksonville
- Florida Department of Transportation

As demonstrated throughout the proposal, we have an abundance of experience in Continuing Services in our resume. Our firm has over 30 years of experience in Continuing Service Contracts including USPS, DOT, FSCJ, and JEA. In addition, PQH continues to be under contract with St. Johns County. The extent of completed work ranges between small renovations up to substantial new work.

Evaluating and developing appropriate solutions for continuing service projects have been one of our areas of strength. We have successfully executed over 100 projects under our multiple continuing service contracts. We have renovated diverse spaces and have experience with every program type listed as part of your scope. With our team, your projects will have active, hands-on management and design by seasoned professionals with proven experience on continuing architectural services of a similar nature. In support of our effort to achieve the full potential of your proposed projects and meet its challenges head on, we have selected a team of consultants that is innovative, forward-thinking, and has experience with continuing service contracts.

CERTIFIED MBE WITH VOLUSIA COUNTY EXPERIENCE

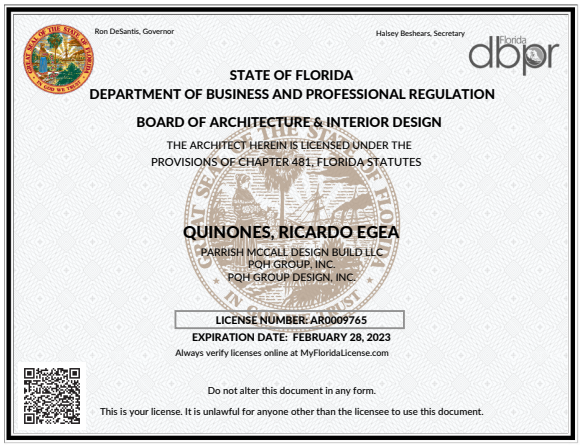


PQH is a Certified Minority Business Enterprises (MBE) and has experience working with local permitting and regulatory agencies in Volusia County. Over the past four (4) decades the firm has demonstrated time and again its ability to recognize needs, understand budget parameters recommend solutions, communicate effectively, and deliver projects on time and within budget.

List of Volusia County Clients

- Embry-Riddle Aeronautical University
- Daytona State College
- Good Samaritan Society ALF

Thank you again for your consideration. Our team eagerly anticipates the opportunity to further present our qualifications. Please do not hesitate to call if you have any questions or require further information from PQH.



Very truly yours,

Ricardo E. Quinones, AIA, LEED AP BD+C
President

Aldo Minozzi, AIA, NCARB

Project Architect

Years of Experience: 26 (6 years with PQH)

Education

Masters of Architecture, University of Puerto Rico School of Architecture
Bachelors of Environmental Design, University of Puerto Rico School of Architecture

Registration

Registered Architect, Florida AR00098244, Puerto Rico 16724

Aldo Minozzi, AIA, has proven ability to impart a high level of professionalism and expertise to ensure objectives are met in the fastest, most efficient manner. His qualifications include a unique knowledge of all development phases within a project from initial client relationships to its final construction. He has demonstrated his capabilities and attention to cultural and environmental factors in order to create aesthetically functional designs. Aldo's experience reflects a firm commitment to the environment, focusing on the social and urban context of each project. He has developed master plans that safeguard the final impact of each structure within the surrounding community and its people. His goal is to create productive and functional designs that invite and capture the imagination, in both public and private sectors.

Years of Experience: 10
(5 years with PQH)

Education
Master of Architecture, Southern Illinois University

Registration
Registered Architect, Florida AR100770

Christopher Boggess, AIA, is involved in all stages of architectural design from design concept to completion of construction documentation. Allowing him to understand how BIM/ Revit will affect project workflows and project management throughout design to maximize its implementation for increased effectiveness. The primary responsibility is implementation, and enforcement on all related BIM projects, files and models. Chris' specialty is CADD/ Revit. He is responsible for providing code analysis, calculations, design documents, system studies and construction drawings.

Project Experience

JEA Continued Services Contract
Jacksonville, FL
PQH has held a contract with JEA since 1999 and has completed over +30 projects varying from renovations, new construction and design criteria packages.

- Waterworks Building
- Sun beam Crew Station
- Randall Substation
- Visitors Center
- JUTC Training Center Design Criteria Package

City of Jacksonville Fire Station #65
Jacksonville, FL

Borland Groover Ambulatory Surgical Center & Outpatient Clinic
St. Augustine, FL

Flagler College Commons, Garage & Dormitory
Daytona Beach, FL

Volunteers for America Apartments
Jacksonville, FL

United States Navy (NavFac SE) USTWR & STARS at Naval Air Station
Jacksonville, FL

United States Navy (NavFac SE) Naval Ordnance Test Unit (NOTU) at Air Force Station
Jacksonville, FL

Quarry Storage Facility
Big Coppitt Key - Key West, FL
The Project consists of +/-24,000 of Storage. Construction is to be masonry and concrete hollow core slabs. The building is to be {3) three story with two {2) levels of storage above a ground level parking/vehicle storage.

Jacksonville University Lazzara Renovation
Jacksonville, FL

McVEIGH & MANGUM
ENGINEERING · INC

Together PQH and McVeigh & Mangum have worked on:

+100 Projects
+50 Municipal Projects

McVeigh & Mangum Engineering was founded in 1991 by Carrington McVeigh, P.E. and Wayne Mangum, P.E., both structural engineers. From the firm's inception, they both recognized the importance of cross-discipline coordination and envisioned their company providing full- service engineering to the architectural community. As a result, McVeigh & Mangum quickly evolved from a structural consulting engineering firm to a provider of Structural, Mechanical, Electrical, Plumbing and Fire Protection design services. Over the last 30 years, the firm has expanded to provide not only the highest quality multi-discipline engineering consulting services, but several other services to support the architecture and construction communities, as well as building ownership and management, across the nation.

STRUCTURAL ENGINEERING

With both founders being structural engineers by trade, it was only natural for the firm to quickly establish itself as a prominent player in the structural engineering market. The team continues to be recognized for the depth and breadth of the experience they bring to the table, working with a myriad of different structural systems and working on projects of all sizes in all geographic regions of the country. This perspective allows the structural team to assess the needs, constraints, and unique design considerations of each project and select the best structural system for each. McVeigh & Mangum's expertise includes the design of structural systems including structural steel, steel joists, composite steel, light gage metal framing, post tensioned and conventionally reinforced cast-in-place concrete, pre-cast concrete, pre-stressed concrete, masonry, tilt-up, and wood construction, along with various foundation designs as needed for different substrates. In addition to structural design services, the McVeigh & Mangum structural team also provides condition assessments, threshold inspections in the state of Florida, and forensic analysis. With vast experience in the design of projects throughout the country, the firm is intimately familiar with the unique structural loading requirements that may be applicable such as high wind and debris loads, seismic loads, snow and snow drift loading, and loads generated by flooding.

MECHANICAL ENGINEERING

Mechanical and HVAC design is an aspect which can often be forgotten in a building—until it performs poorly, sacrificing occupant comfort and perhaps even causing moisture issues or rendering the building incapable of functioning as intended. The McVeigh & Mangum mechanical team has experience ranging from small commercial and residential projects, all the way up through multi-million-dollar healthcare, industrial, and high-density multifamily jobs. With an impressive portfolio, the mechanical team has broad design experience under many different unique scenarios, having worked in various climates across the nation and with mechanical systems from simple inexpensive packaged units up through complex chilled water systems. The McVeigh & Mangum mechanical team has extensive experience with water source heat pumps, variable air volume systems, variable refrigerant flow systems, split system heat pumps, furnaces, packaged rooftop units, dedicated outdoor air systems, complex chilled water systems, and complex exhaust and fresh air make up systems. Our firm consistently provides solutions to challenges and constraints presented, balancing energy efficiency and cost effectiveness.

ELECTRICAL ENGINEERING

Electrical design can encompass a wide array of requirements, and these projects only become more and more complicated as new technologies continue to develop. McVeigh & Mangum's electrical team has the expertise to prepare new buildings and retrofit old ones to handle the increased complexity associated with these new and evolving technologies, as well as the ever- changing code requirements. Electrical services provided include lighting design and control systems, stand-by generator systems, emergency and uninterrupted power systems, fire alarm design, and lightning protection.

PLUMBING

Plumbing design performed by McVeigh & Mangum includes both water distribution as well as the design of sanitary waste and vent piping for new and existing buildings. In addition, our firm provides design associated with roof drainage, gray water management, rainwater harvesting, and solar hot water systems. The plumbing team also has experience in the design of medical gas systems for medical facilities, as well as fuel gas piping for various building applications.

PROJECTS PQH & MCVEIGH & MANGUM HAVE COMPLETED TOGETHER:

- St. Johns County Administration Building
- St. Johns County Health Center
- St. Johns County Emergency Operations Center
- St. Johns County Fire Station #5, 9, 11, 15, 16, 18
- St. Johns County Fire Station NW
- City of Jacksonville Fire Station #21, 24, 31, 35, 47, 50, 57, 58
- City of Jacksonville Emergency Operations Center
- Borland Groover Medical Office Building
- Pottsburg Post Office

H. Carrington McVeigh, P.E., LEED AP

Senior Structural Engineer
Years of Experience: 44 (30 years with McVeigh & Mangum)

Education

BS in Civil Engineering, Virginia Military Institute
ME in Civil Engineering, University of Virginia
MBA in Business Administration, University of North Florida

Registration

Registered in the States of AL, FL, GA, IN, LA, MD, MS, NC, OH, OK, SC, and TX.
LEED Accredited Professional

H. Carrington McVeigh, P.E., LEED AP BD+C, over 40 years' experience in the design of governmental, commercial, educational, industrial, medical, retail, and residential buildings, in structural steel, wood, reinforced concrete, in masonry and pre-stressed concrete, in the inspection and renovation of existing structures, in bridge design and in the design of unique structures. Responsible for all aspects of structural engineering, including analysis, design, investigation, inspection, construction document preparation, in cost estimating and in construction administration.

Project Experience

Duval County Courthouse
Jacksonville, FL

Jacksonville Courthouse
Jacksonville, FL

St. Johns County Courthouse Improvement
St. Johns County, FL

Sheriff's District 2 Administration & Operations Complex
Flagler County, FL

St. Johns County Health Department
St. Augustine, FL

BellSouth NE Florida Technical Center
Clay County, FL

Clay County Emergency Services Complex
Green Cove Springs, FL

St. Johns County Emergency Operations Center
St. Johns County, FL

Florida Public Utilities Office Building
Yulee, FL

JIA Administration Building
Jacksonville, FL

Thomas C. Nielsen, P.E., LEED AP

Senior Electrical Engineer
Years of Experience: 37 (23 years with McVeigh & Mangum)

Education
Bachelor in Electrical Engineering, Georgia Institute of Technology

Registration
Registered in the States of AL, AR, AZ, CA, FL, GA, KS, KY, MA, NV, NY, NC, OH, and SC.
LEED Accredited Professional

Thomas C. Nielsen, P.E., LEED AP, experienced in the design of power distribution, UPS and diesel generator emergency power systems, lighting applications, fire alarm, security and lightning protection systems. Project types include commercial, educational, retail, industrial, medical/ research, institutional, and governmental facilities.

Project Experience

City of Lakeland Electric & Water
Lakeland, FL

Clyde Atkins U.S. Courthouse
Miami, FL

Pensacola Courthouse
Pensacola, FL

Former City Hall Modifications
West Palm Beach, FL

IRS Upfit - Modis Building
Jacksonville, FL

Lake Helen City Hall Renovations
Lake Helen, FL

Montgomery Correctional Center Warehouse Expansion
Jacksonville, FL

NEI Headquarters Building
Winter Park, FL

Sherrif's District 2 Administration and Operations Complex
Flagler County, FL

St. Johns County Facilities Maintenance Headquarters
St. Johns County, FL

St. Johns County Health Department Building
St. Augustine, FL

Frank Yarizadeh, P.E., CBCP

Mechanical Engineer
Years of Experience: 32 (10 years with McVeigh & Mangum)

Education

BS, Mechanical Engineering, University of Florida
MS, Mechanical Engineering, University of Central Florida

Registration

Registered in the States of AL, CA, DE, FL, GA, KY, KS, MI, NC, PA, SC, VA, and WI.
Certified Building Commissioning Professional (CBCP)
LEED Accredited Professional
