APPENDIX B – ASSESSMENT ROLL ..... B

1. ASSESSMENT SUMMARY

On March 26, 2025, the City Council of the City of Eastvale (the "City"), under the Benefit Assessment Act of 1982 (the "1982 Act") adopted its Resolution No. 25-13, a Resolution Initiating Proceedings for the Annual Levy and Collection of Assessments and Ordering the Preparation of an Annual Report for Benefit Assessment District No. 2014-2 (the "District") (Tracts 32821 & 32821-1) for Fiscal Year 2025/26.

The Resolution Initiating Proceedings directed NBS to prepare and file an Annual Report for Fiscal Year 2025/26 pursuant to the requirements of the 1982 Act. The Annual Report presents the plans and specifications for the maintenance and operation of authorized services, an estimate of the costs of the maintenance and operation of the authorized services, an assessment diagram, and an assessment of the estimated costs of the maintenance and operation of the authorized services for the referenced fiscal year, assessing the net amount upon all assessable lots and/or parcels in the District in proportion to the special benefit received.

The following assessment is proposed to be authorized in order to pay the estimated costs of administration, maintenance, operation, and servicing of the improvements to be paid by the assessable real property in the District in proportion to the special benefit received. The following table summarizes the proposed assessment for the District.

Benefit Assessment District 2014-2

	Fiscal Year 2025/26
Maintenance, Operation, and Servicing Costs	$7,451.66
Incidental Expenses	3,640.30
Other Costs/Contributions	(6,054.47)
Total Net Amount to be Assessed	**$5,037.49**
Total Number of Benefit Points to be Assessed	1,750
Actual Assessment per Benefit Point (1)	**$2.87**
Maximum Allowable Assessment per Benefit	$3.46

(1) The unrounded assessment per benefit point is $2.87856.

2. INTRODUCTION

2.1 Reason for Assessment

Approval of the assessment covered by this Annual Report will generate the revenue necessary to provide for the maintenance and servicing of the improvements described in this Annual Report.

2.2 Process for Annual Assessment

On an annual basis, a report is prepared which contains a description of the services proposed to be financed, a description of each lot or parcel subject to the assessment, the amount of the proposed assessment for each parcel, and the basis and schedule of assessment.

2.3 Same or Lesser Assessment

If the assessments are to be levied in the same or lesser amounts than the maximum assessment amount approved, the City Clerk will give notice by causing the Resolution of Intention to be published. Any interested person may, prior to the conclusion of the public hearing, file a written protest which shall state all grounds of objection. The protest will contain a description sufficient to identify the property owned by the property owner filing the protest. During the course of, or upon conclusion of the hearing, the City Council may order changes in any of the matters provided in the report, including changes in the improvements, any zones within the District, and the proposed diagram for the proposed assessment.

2.4 Fiscal Year 2025/26 Assessment

The Fiscal Year 2025/26 assessments described in this Annual Report are not proposed to exceed the previously approved maximum assessment range formula that was approved at the time the District was formed. No land is proposed to be annexed to the District. There are no proposed new improvements or any substantial changes in existing improvements.

The net amount to be assessed in the District upon all assessable lots or parcels, as shown on the latest equalized roll at the County of Riverside (the "County") Assessor's Office, is shown on the Assessment Roll in Appendix B of this report.

3. PLANS AND SPECIFICATIONS

The District provides funding for the administration, maintenance, operation, and servicing of various improvements located in District.

3.1 Description of Improvements

The traffic signal to be operated and maintained is at the following location:

- Limonite Avenue & Scholar Way

The fossil filters to be managed and maintained are at the following locations:

- Seven along Scholar Way between Limonite Avenue and Primrose Road
- One on 58th Street west of Scholar Way

4. ESTIMATE OF COSTS

The estimated costs of administration, maintenance, operation, and servicing the improvements, as described in the Plans and Specifications for the District, are summarized below:

4.1 Benefit Assessment District 2014-2

4.1.1 ANNUAL BUDGET

The estimated costs associated with the District are shown below:

BAD 2014-2 Costs	Estimated 2025/26 Costs
Maintenance, Operation and Servicing Costs	
Traffic Signal	$5,651.66
Fossil Filters	1,800.00
Subtotal Maintenance, Operation and Servicing Costs	**$7,451.66**
Incidental Expenses	
Annual Administration (City)	$558.00
Annual Administration (Consultant)	2,869.07
County Collection Fees	213.23
Subtotal Incidental Expenses	**$3,640.30**
Total BAD 2014-2 Costs	**$11,091.96**
General Benefit Contribution	($6,054.47)
Operating Reserve Contribution	0.00
Operating Reserve Collection	0.00
Contribution From Other Sources	0.00
Total Costs to be Assessed	**$5,037.49**
Total Net BAD 2014-2 Assessment [(1)]	**$5,037.49**
Total BAD 2014-2 Benefit Points to be Assessed	1,750
Actual Assessment per Benefit Point – Fiscal Year 2025/26 [(2)]	**$2.87**
Maximum Allowable Assessment per Benefit Point – Fiscal Year 2025/26	**$3.46**

(1) Actual assessments may be rounded to the nearest even cent in accordance with the requirements of the County for placement on the tax rolls.
(2) The unrounded assessment per benefit point is $2.87856.

4.1.2 OPERATING RESERVE

It is the intent of the City to maintain an Operating Reserve which shall not exceed the estimated costs of maintenance and servicing of the improvements prior to December 10 of the fiscal year, or when the City expects to receive its apportionment of special assessments and tax collections from the County, whichever is later. The reserve balance information for the District is as follows:

Estimated Fiscal Year Ending 6/30/25 Operating Reserve Cash	$16,504.93
Estimated Operating Expenses – Fiscal Year 2025/26	
Estimated Operating Collection – Fiscal Year 2025/26	5,037.49
Estimated Fiscal Year Ending 6/30/26 Operating Reserve Cash	**$10,450.45**

(1) The City will be conducting an internal audit; fund balances will be updated when the reconciliation takes place.

The estimated Fiscal Year ending 6/30/25 Operating Reserve Cash balance is estimated based on the available cash balance, less actual expenses to date, and less estimated expenses through the end of the Fiscal Year.

4.1.3 ANNUAL ASSESSMENT INCREASE

The maximum allowable assessment per Benefit Point listed in the annual budget is the amount which was approved at the time of formation of the District, with the allowable annual increase over the maximum assessment for the previous year. The allowable annual increase is defined as: “the greater of two percent (2.0%) or the percentage increase, if any, in the Consumer Price Index for all Urban Consumers (“CPI-U”) for the Los Angeles-Riverside-Orange County California Standard Metropolitan Statistical area (“Index”) published by the Bureau of Labor Statistics of the United States Department of Labor. The annual CPI-U adjustment will be based on the increase, if any, in the Index as it stands on March of each year over the base Index for March of 2015.” Previously, the Los Angeles-Riverside-Orange County index was made up of Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. The BLS split this index into two areas; one that represents Los Angeles and Orange counties (Los Angeles-Long Beach-Anaheim) and another that represents Riverside and San Bernardino counties (Riverside-San Bernardino-Ontario). Beginning with the 2018/19 calculation, the City began using the Riverside-San Bernardino-Ontario CPI as of March for the purposes of computing annual changes in the assessment rates for the District.

Each year, prior to the assessments being placed on the tax roll, the City will review the cost estimate and determine the amount needed to maintain the improvements for the upcoming fiscal year. The actual assessment per Benefit Point will be based on the estimated costs, available fund balance, and maximum allowable assessment with the goal of maintaining the improvements in a satisfactory and operational condition. The actual assessment amount may be equal to or lower than the maximum allowable assessment; however, it may not exceed the maximum unless the increase is approved by the property owners in accordance with Proposition 218.

4.2 Definition of Budget Items

The following definitions describe the costs and expenses included in the cost estimate for the District:

4.2.1 MAINTENANCE, OPERATION AND SERVICING COSTS

Energy Costs for Streetlights: This item includes the cost of energy provided by the electric utility provider.

Fossil Filters: This item includes the cost of cleaning and furnishing services and materials for the ordinary and usual maintenance, operation, and servicing of the fossil filters and appurtenances, including repair, replacement, removal of trimmings, rubbish, debris, and other solid waste.

Field Inspection/Management: This item includes the cost of inspecting fossil filters, reporting, and compliance with applicable regulations.

Repair/Replacement: This item includes the cost of furnishing services and materials for the ordinary and usual maintenance, operation, and servicing of the fossil filters and appurtenances, including repair and replacement.

Traffic Signals: This item includes the cost of furnishing services and materials for the ordinary and usual maintenance, operation, and servicing of traffic signals and appurtenances, including repair and replacement.

4.2.2 INCIDENTAL EXPENSES

Annual Administration (City): This item includes the cost to departments and staff of the City for providing the administration, coordination, and management of District services, operation, and expenses. This item also includes management of the annual process including reports, resolutions, and public inquiries.

Annual Administration (Consultant): This item includes the contract fees and allowable expenses for annual administration of the District, including preparation of the Annual Report, preparation of resolutions, submittal of the levy to the County, responding to public inquiries, attendance at various meetings, and delinquency management. The contract fee is subject to a cost-of-living increase annually.

County Collection Fees: This item includes the fees charged by the County to process the levy submittal and collect and distribute funds on behalf of the City.

4.2.3 OPERATING RESERVE AND OTHER SOURCES

Operating Reserve Contribution: This item includes the amount to be credited to the annual assessment. When the Operating Reserve balance is greater than approximately one half of the annual costs, an Operating Reserve Contribution may be credited to the total costs.

Operating Reserve Collection: This item includes the amount to be collected to maintain reserves to enable the City to pay for the maintenance and servicing of the improvements prior to December 10

of the fiscal year, or whenever the City expects to receive its apportionment of special assessments and tax collections from the County, whichever is later. The Operating Reserve collection may continue until such a time the Reserve Fund balance is approximately one half of the annual costs.

Contributions From Other Sources: This item includes any amount contributed to the District from any source of funds other than the annual assessments.

Rounding Adjustment: This item includes any amount necessary to round the actual assessment amount for each parcel to an even cent, as the County requires that the total levy amount submitted be even, so that the amount can be divided into two equal installments on the tax roll.

5. METHOD OF ASSESSMENT

5.1 Legal Considerations

5.1.1 PROPOSITION 218

Proposition 218, the "Right to Vote on Taxes Act" was approved by California voters in 1996, which added Articles XIIIC and XIIID to the California State Constitution. The primary results of Proposition 218 were stricter definitions of assessments, special taxes, fees, and charges, and a general mandate for some type of voter approval for any new or increased tax, assessment, or property-related fee. The Proposition 218 Omnibus Implementation Act (the "Implementation Act") was approved July 1, 1997.

The Implementation Act provided direction for procedures throughout the notice, protest, and hearing process. It should be noted that this report has been prepared to be consistent with current practices and the California State Constitution.

Article XIII D, Section 4(a) of the California Constitution limits the amount of any assessment to the proportional special benefit conferred on the property. Article XIII D also provides that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

The net amount to be assessed may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels. Proposition 218 requires the Engineer to separate general benefit from special benefit, where only special benefit is assessed.

5.1.2 1982 ACT

Pursuant to the 1982 Act and Article XIII D, all parcels that have a special benefit conferred upon them as a result of the maintenance and operation of improvements and services shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire costs of the maintenance and operation of improvements. The 1982 Act, permits the establishment of assessment districts for the purpose of providing certain public services which include the maintenance and operation costs of drainage, flood control street lighting, and streets.

Section 54711 of the 1982 Act requires that benefit assessments must be related to the benefit to the parcel. This Section states:

> *"The amount of the assessment imposed on any parcel of property shall be related to the benefit to the parcel which will be derived from the provision of the service."*
>
> *"The annual aggregate amount of the assessment shall not exceed the estimated annual cost of providing the service…"*
>
> *"The revenue derived from the assessment shall not be used to pay the cost of any service other than the service for which the assessment was levied."*

5.2 Special Benefit

Pursuant to Article XIII D of the California Constitution, Section 2(i) "Special benefit means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute special benefit."

All parcels that have special benefit conferred upon them as a result of the services and activities provided shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire cost of the services and activities.

In accordance with Article XIII D §4(a), "No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and an agency shall separate the general benefits from the special benefits conferred on a parcel."

The maintenance and servicing of the District improvements (which are described in the Plans and Specifications Section of this report) are for the benefit of the properties in the District, and as such confer a special and direct benefit to parcels in the District, respectively. A description of the special benefit conferred to property in the District has been excerpted from the formation Engineer's Report and provided below:

5.2.1 TRAFFIC SIGNAL OPERATION AND MAINTENANCE

Traffic signals allow for the orderly flow of traffic for all roadway users and provide for increased safety of vehicles, their passengers and pedestrians. Conversely, a lack of traffic signalization can lead to roadway congestion and decreased safety. When evaluating safety of an intersection, one must look holistically at all system users to evaluate the benefit conveyed. Further, the task of traveling on the roadway system, whether by vehicle, by foot or by bicycle, involves searching for, finding, understanding, and applying the information, as well as reacting to unanticipated information. Once found and understood, the relevance of this information must be evaluated, decisions made and actions taken in response. This activity is cyclical, often occurring many times per second in complex, demanding environments. Traffic signals are one of the many pieces of information that must be processed as a traveler approaches an intersection in the roadway system.

- **Increased Safety to Motorists:** Traffic signals provide for the orderly movement of vehicular and pedestrian traffic at roadway intersections. While traffic signals cannot eliminate collisions, their installation has been shown to reduce the frequency of right-angle vehicle collisions, left-turn collisions, pedestrian collisions, and head-on collisions. Heavy traffic is interrupted to allow other vehicular traffic to pass through in a safe manner.
- **Increased Safety to Pedestrians:** Traffic signals prioritize movement across and through an intersection. By allowing pedestrians the right-of-way to enter and cross the roadway, traffic signals increase the safety to pedestrians.
- **Increased Traffic Capacity and Efficiency:** Use of properly timed traffic signals that smooth the traffic flow allow for increased vehicle traffic and reduce congestion. Ingress and egress from developments is more timely and efficient when traffic signals are installed.

5.2.2 FOSSIL FILTER MANAGEMENT, INSPECTION, AND MAINTENANCE

Fossil filters are designed to remove petroleum hydrocarbons from stormwater runoff that enters catch basins. Petroleum hydrocarbons are a primary energy source, utilized as combustible fuel. Petroleum hydrocarbons are also found in their solid form in asphalt used in roadway construction. Petroleum hydrocarbons are pollutants which are required to be removed from stormwater and runoff before they can be released into the environment. Properly operating fossil filtration systems provide the following special benefits to property:

- **Pretreatment of Local Drainage Stormwater:** Fossil filters pretreat stormwater by removing pollutants as the water flows through the filter into the storm sewer system. Vehicles and asphalt are the primary source of pollutants that enter the storm sewer system. In particular, localized vehicular traffic produces the majority of the pollutants that enter each catch basin which are removed by the fossil filters. Since the localized vehicular traffic, associated with local property, produces most of the pollution, the local property receives special benefit from the fossil filtration system by having the pollutants it produces removed from the stormwater runoff near the source of pollution.
- **Cleaner Local Drainage Catch Basins:** By managing, maintaining, and servicing the fossil filters, the catch basins are cleared of debris that might cause localized flooding. Catch basins are designed to collect storm water runoff that results from the large amount of impervious area on developed land. Without clear, functioning catch basins, the stormwater runoff pools and floods local streets and property. Fossil filtration system maintenance confers a special benefit to property by ensuring they are clear of debris so that stormwater runoff can flow freely into the catch basin and not flood local property.

The above-mentioned items affect the assessed property in a way that is particular and distinct from their effect on other parcels and that real property in general and the public at large do not share. They contribute to a specific enhancement of the properties in the District. Since these improvements were installed and are maintained specifically for the properties in the District; only properties in the District receive a special benefit and are assessed for said maintenance.

5.3 General Benefit

Article XIII D of the California Constitution requires any local agency proposing to increase or impose a special assessment to "separate the general benefits from the special benefits conferred on a parcel." General benefits are defined as those services or improvements which provide a general increase in property values to all property or provide benefits to the health, safety or education of the public. The rationale for separating special and general benefits is to ensure that the property owners are not charged with an assessment that pays for general benefits. Thus, a local agency carrying out projects or services that provide both special and general benefits may levy an assessment to pay for the special benefits but must acquire separate funding to pay for those general benefits.

5.4 General and Special Benefits Separated

The amount of general benefit that is conferred from the improvements and activities cannot be funded via benefit assessments. In order to separate only that portion of the budget which is related to special benefits conferred by the improvements and activities, thereby excluding those costs which are associated

with general benefits related to the improvements and activities, pass through traffic data has been reviewed.

General benefit conferred from the improvements cannot be funded by assessments. In order to separate only that portion of the cost of operating, maintaining, and servicing the improvements which is related to special benefits conferred, thereby excluding those costs which are related to general benefits, pass through traffic data has been analyzed.

The City's General Plan, adopted on June 13, 2012, indicates that streets within the City generally consist of local roads, secondary and major collectors, arterials and urban arterials. There is a general benefit component associated with traffic signals and fossil filter management along arterial/collector streets roughly equal to the percentage of pass-through trips using those streets (typically 15-25% based on the amount of traffic volume placed on each type of roadway). The following table summarizes the special and general benefit for the various types of roadways based on general industry practice standards:

In order to assess the parcels within the District for the special benefits received from the improvements and activities described in Section 3.1, the general and special benefits must be separated. The general benefit conferred by the improvements and activities is 81.25%. Accordingly, 18.75% of the benefits from the improvements and activities are considered to provide special benefits to the properties within the District and thus could be subject to assessment therein.

Roadway Type	Special Benefit	General Benefit	Comments
Local	98%	2%	Nearly all traffic is generated by local properties; the exception would be school busses, delivery and service vans/trucks, meter readers, and turn around traffic which is generally less than 2%.
Collector	50%	50%	Some General Benefit related to thru traffic and overall traffic safety benefits from traffic signals.
Arterial	25%	75%	Some General Benefit related to thru traffic and overall traffic safety benefits from traffic signals.

5.4.1 TRAFFIC SIGNAL OPERATION AND MAINTENANCE

The one traffic signal to be operated, maintained, and serviced is located along Limonite Avenue which is an Arterial according to the City of Eastvale General Plan. The intersecting roadway, Scholar Way is also an Arterial. Generally, Arterials would see an estimated 75% of trips attributed to pass through traffic rather than local traffic. The District is located on the west side of Scholar Way north of Limonite Avenue. Local traffic originates from District property, as well as from surrounding property. The additional local traffic from surrounding property not in the District results in a total portion of pass through traffic not related to District property of 81.25%.

5.4.2 FOSSIL FILTER MANAGEMENT, INSPECTION AND MAINTENANCE

Seven of the fossil filters to be managed, inspected, and maintained are located along Scholar Way which is an Arterial according to the City's General Plan. There is also one fossil filter on 58th Street which is a Collector. Generally, Arterials would see an estimated 75% of trips attributed to pass through traffic rather than local traffic. The District is located on the west side of Scholar Way north of Limonite Avenue and south

of 58th Street. Local traffic originates from District property, as well as from surrounding property. The additional local traffic from surrounding property not in the District results in a total portion of pass-through traffic not related to District property of 81.25%.

5.4.3 GENERAL BENEFIT PORTION

The total general benefit conferred as a result of the improvements and activities is 81.25% which is based on the share of pass-through traffic related to traffic signal operation and maintenance and fossil filter management, inspection and maintenance.

5.5 Method of Assessment Spread

Each of the parcels in District are deemed to receive special benefit from the improvements. Each parcel that has a special benefit conferred upon it as a result of the maintenance and operation of improvements are identified and the proportionate special benefit derived by each identified parcel is determined in relationship to the entire costs of the maintenance and operation of the improvements.

As outlined above, each of the parcels within the District receives special benefit from the operation, maintenance, and services of the improvements. Each parcel that has a special benefit conferred upon it is identified and the proportionate special benefit derived by each identified parcel is determined in relationship to the entire costs of the operation, maintenance, and services of the improvements. In order to facilitate this analysis, Benefit Points will be assigned based on the following factors:

5.5.1 TRAFFIC SIGNAL OPERATION AND MAINTENANCE AND FOSSIL FILTER MANAGEMENT, INSPECTION AND MAINTENANCE

Special benefit points are proportionally assigned to all parcels within the District for each of the following special benefits conferred:

- Increased Safety to Motorists
- Increased Safety to Pedestrians
- Increased Traffic Capacity and Efficiency
- Pretreatment of Local Drainage Stormwater
- Cleaner Local Drainage Catch Basins

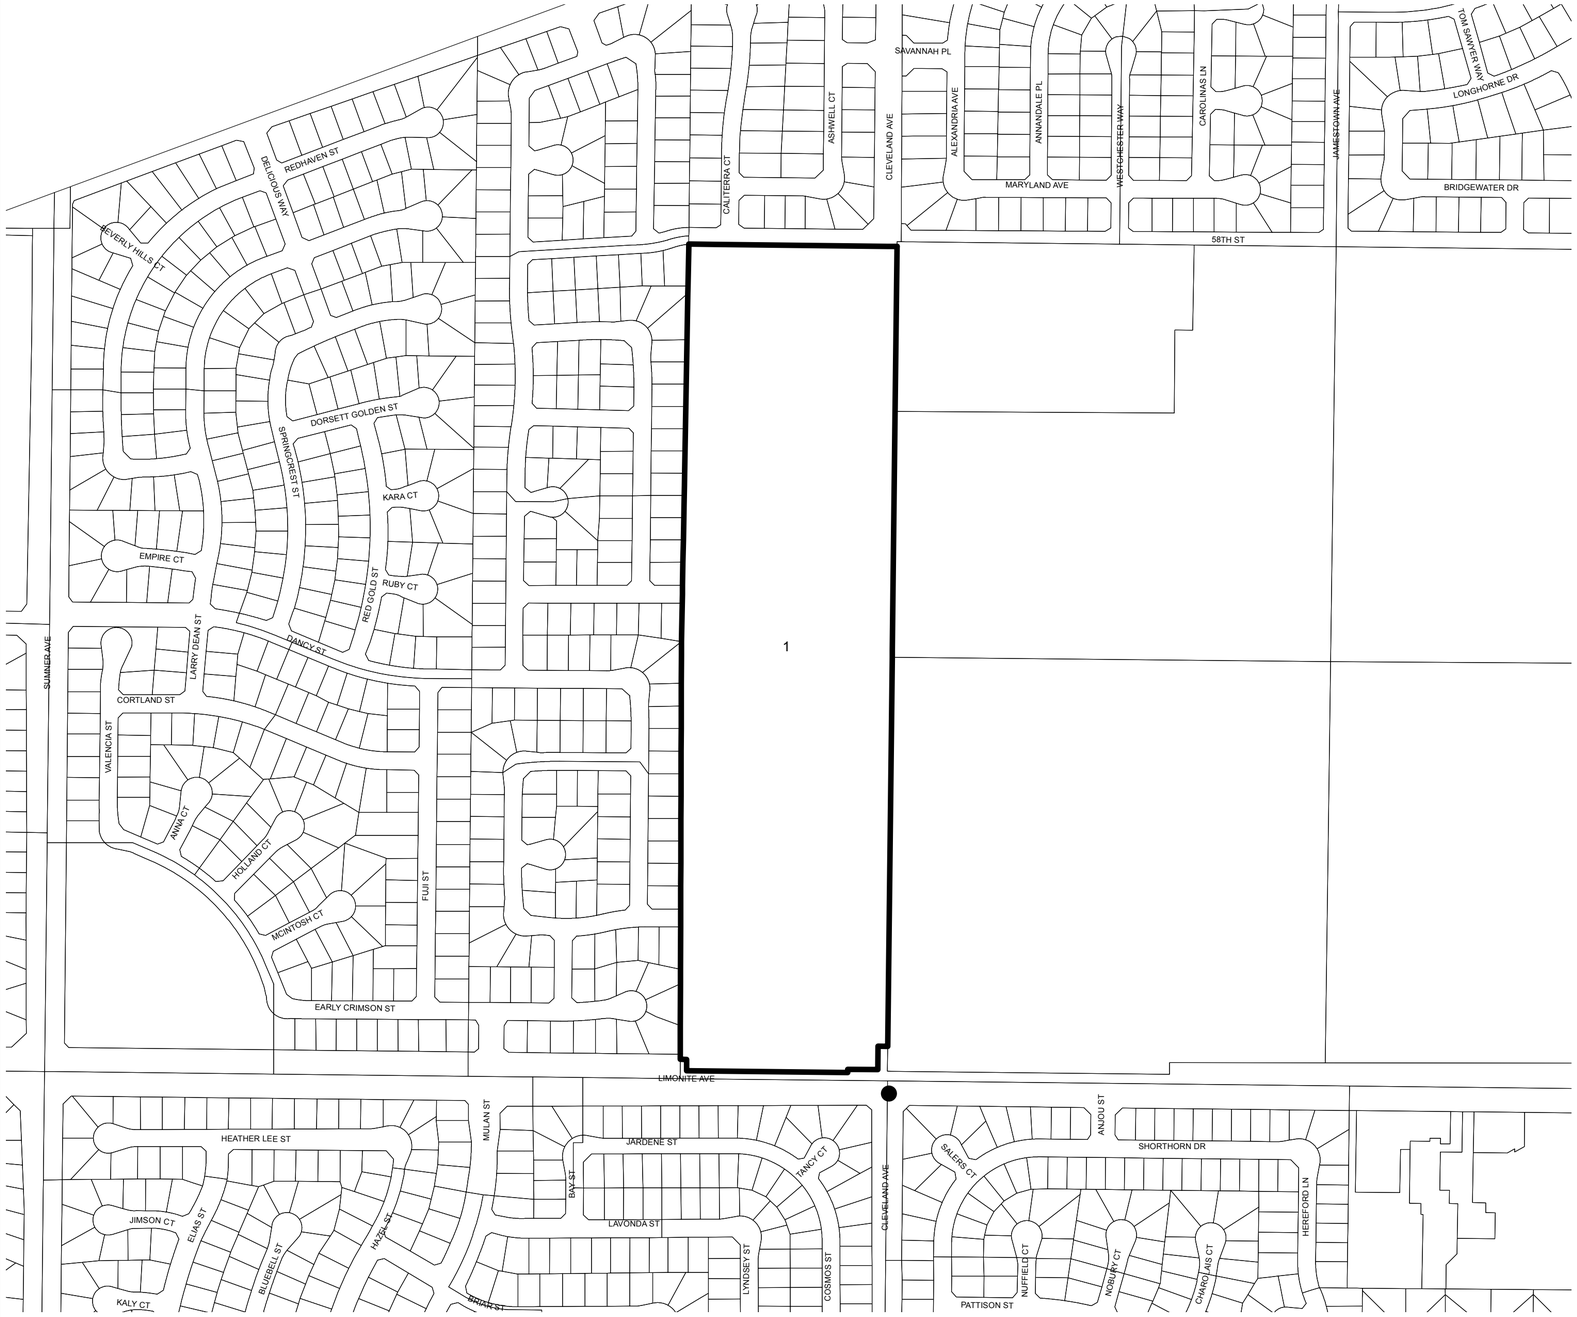
Each parcel with a residential county land use code is expected to generate traffic, which must pass through the signalized intersection and by the fossil filters, therefore, each parcel may be assigned one Benefit Point per dwelling unit per benefit. Likewise, each non-residential parcel is expected to generate traffic, which must pass through the signalized intersection and by the fossil filters, therefore each parcel may be assigned one Benefit Point per acre, or portion thereof, per benefit. (e.g. If the parcel acreage is 1.38, the parcel receives 1.38 Benefit Points per benefit.)

The maximum allowable assessment per parcel is the amount which was approved at the time of formation of the District, with the allowable annual increase also approved at the time of formation. A description of the allowable annual increase for the District has been excerpted from the formation Engineer's Report and provided below:

Benefit Assessment District 2014-2 – The annual assessment will be adjusted annually by the greater of 2% or the cumulative percentage increase in the CPI-U if any, as it stands as of March of each year over the base index for March of 2015.

The total amount of maintenance, servicing, and incidental costs for maintaining and operating the Improvements is assessed to the individual parcels of real property in the District in proportion to the special benefit received by such parcels of real property. The proposed individual assessments are shown on the Assessment Roll in this report.

6. APPENDICES



The following Appendices contain Appendix A – Assessment Diagram and Appendix B – Assessment Roll for the District.

APPENDIX A – ASSESSMENT DIAGRAM

The Assessment Diagram for the District is shown on the following pages. The lines and dimensions of each lot or parcel within the District are those lines and dimensions shown on the maps of the County Assessor of the County of Riverside, at the time this report was prepared, and are incorporated by reference herein and made part of this Annual Report.

APPENDIX B – ASSESSMENT ROLL

The assessment roll is a listing of the assessments for Fiscal Year 2025/26 apportioned to each lot or parcel, as shown on the last equalized roll of the Assessor of the County of Riverside.

Based on County Assessor's secured roll data, current assessor's parcels, including corrected and/or new assessor's parcels, will be submitted and/or resubmitted to the County Auditor/Controller. The annual assessment amount to be levied and collected for the resubmitted parcel(s) shall be determined in accordance with the method of apportionment and assessment rate approved in this Annual Report. Therefore, if a single assessor's parcel has a status change in development, other land use change, or subdivides into multiple assessor's parcels, the assessment amounts applied to each of the new assessor's parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment amount.

The assessment roll for Fiscal Year 2025/26 is listed on the following pages.

CITY OF EASTVALE

AGENDA STAFF REPORT

City Council Meeting
CONSENT CALENDAR
Agenda Item No. 11.8
May 28, 2025

Second Reading of an Ordinance Designating Fire Hazard Severity Zones

Prepared By:

Johnny Terfehr, Community Safety Director

Recommended Action(s)

Staff recommends that the City Council approve the second reading and adopt an ordinance entitled: AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF EASTVALE, CALIFORNIA DESIGNATE FIRE HAZARD SEVERITY ZONES

Summary

The State Fire Marshal is mandated by Government Code (GC) 51178 to identify levels of fire hazard based on consistent statewide criteria and the expected severity of fire hazards. Government Code 51179 requires the State Fire Marshal to make recommendations of fire hazard severity zones to local agencies, as defined per GC 51177(e), for their designation and adoption by ordinance.

Cal Fire has identified the City of Eastvale as having areas of moderate, high, and very high fire hazard and therefore must adopt an ordinance designating these zones. These zones are primarily used to inform building codes and wildfire mitigation strategies in high-risk areas.

The City of Eastvale is a general law city formed under the laws of the State of California. With respect to adoption of ordinances and resolutions, the City adheres to the requirements set forth in the Government Code. With the exception of urgency ordinances, Government Code Section 36934 requires two readings of standard ordinances more than five days apart. Ordinances must be read in full at the time of introduction or passage unless a motion waiving the reading is adopted by a majority of the City Council present. This Ordinance amendment was first introduced at the duly noticed City Council regular meeting on December 13, 2023.

Background

On March 24, 2025, the California Department of Forestry and Fire Protection (CAL FIRE) released new Fire Hazard Severity Zone maps. These maps indicate where the State's fire safety regulations apply and define responsibilities for local and county fire departments in responding to fires.

A Fire Hazard Severity Zone (FHSZ) is a geographic area classified by the State as having a Moderate, High, or Very High risk of wildfire. These classifications are based on factors like vegetation, terrain, weather patterns, and fire history, helping guide building codes and wildfire mitigation strategies in high-risk areas. The purpose of the map is to classify lands in accordance with whether a very high fire hazard is present so that public officials are able to identify measures that will reduce the rate of fire spread and the intensity of uncontrolled fire through vegetation management and implementation of building standards developed to minimize loss of life, resources and property.

Properties and areas within designated fire severity zones must comply with a range of requirements. These include, but are not limited to, materials and construction methods for exterior wildfire exposure; mandatory natural hazard disclosures in real estate transactions; defensible space clearances; property development standards concerning roads, water supply, and signage; and integration of wildfire risk considerations into the development of future General Plans.

In an effort to address statewide concerns about the impact of fire hazard severity maps on insurance rates, Insurance Commissioner Ricardo Lara has issued a fact sheet clarifying that Cal Fire maps do not influence insurance rates or availability.

To ensure compliance with Government Code 51179, The City of Eastvale is required to adopt an ordinance within 120 days to designate fire hazard severity zones.

Per the direction of City Council and the Public Safety Commission, notification letters were mailed to all properties that were identified as being in a fire severity zone.

Environmental

The proposed Ordinance is exempt from review under the California Environmental Quality Act (CEQA).

Strategic Plan Action - Priority Level: N/A | Target #: A | Goal #: F

Maintain fire response (Target A, Goal F).

Fiscal Impact

The proposed Ordinance will not result in a fiscal impact.

Prior City Council/Commission Action

On April 22, 2025 the Public Safety Commission reviewed and commented on the Ordinance designating fire hazard severity zones. The Commission has recommended that the City formally notify residents who are located within designated Fire Hazard Severity Zones, in order to enhance public awareness and preparedness.

On May 14, 2025, the City Council introduced, read by title, and waived further reading of an

ordinance entitled: An Uncodified Ordinance of The City Council of The City of Eastvale, California, To Designate Fire Hazard Severity Zones.

Attachment(s)

Attachment 1 - Ordinance Adopting Fire Hazard Severity Zones

Attachment 3 - California Insurance Commissioner Response to Fire Severity Zone Maps

ORDINANCE NO. 25-05

AN UNCODIFIED ORDINANCE OF THE CITY COUNCIL OF THE CITY OF EASTVALE, CALIFORNIA, TO DESIGNATE FIRE HAZARD SEVERITY ZONES

WHEREAS, California Government Code Section 51178 requires the State Fire Marshal to identify areas in the state as moderate, high and very high fire hazard severity zones based on consistent statewide criteria and the severity of fire hazard that is expected to prevail in those areas; and

WHEREAS, California Government Code Section 51179 requires a local agency to adopt an ordinance designating those areas within its jurisdiction that are within moderate, high, and very high fire hazard severity zones within 120 days of receiving the recommendations from the State Fire Marshal pursuant to Section 51178; and

WHEREAS. on March 24, 2025, the State Fire Marshal released updated fire hazard severity zone recommendations for Southern California.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF EASTVALE DOES ORDAIN AS FOLLOWS:

SECTION 1. Designation of Fire Hazard Zones. The City Council of the City of Eastvale hereby approves the recommendation of the State Fire Marshal made pursuant to California Government Code Section 51178 and designates those areas within the City of Eastvale as moderate, high, and very high fire hazard severity zones as shown on the Fire Hazard Severity Zone Map published by the Office of the State Fire Marshal.

SECTION 2. Adoption of Map. The City Council hereby adopts the portion of the State Fire Marshal's Fire Hazard Severity Zone Map covering the City of Eastvale as the "City of Eastvale Fire Hazard Severity Zone Map." A copy of the City of Eastvale Fire Hazard Severity Zone Map is on file with the City Clerk and can also be found on the City's website under fire services.

SECTION 3. Severability. If any chapter, subsection, subdivision, sentence, clause, phrase, or portion of this ordinance, is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision will not affect the validity of the remaining portions of this ordinance. The City Council hereby declares that it would have adopted this ordinance, and each Chapter, subsection, subdivision, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more Sections, subsections, subdivisions, sentences, clauses, phrases, or portions thereof be declared invalid or unconstitutional.

SECTION 4. Effective Date. This ordinance shall take effect thirty (30) days after its passage by the City Council.

SECTION 5. City Clerk Action. The City Clerk is authorized and directed to cause this Ordinance to be published within fifteen (15) days after its passage in a newspaper of general

circulation and circulated within the City in accordance with Government Code Chapter 36933(a) or, to cause this Ordinance to be published in the manner required by law using the alternative summary and pasting procedure authorized under Government Code Chapter 39633(c).

PASSED, APPROVED AND ORDAINED this __ day of _____, 2025.

Scale: 1:62,000 at 11" x 17"

Incorporated City | Waterbody | Unzoned LRA | Federal Responsibility Area (FRA)

Government Code section 51178 requires the State Fire Marshal to identify areas in the state as moderate, high, and very high fire hazard severity zones based on consistent statewide criteria and based on the severity of fire hazard that is expected to prevail in those areas. Moderate, high, and very high fire hazard severity zones shall be based on fuel loading, slope, fire weather, and other relevant factors including areas where winds have been identified by the Office of the State Fire Marshal as a major cause of wildfire spread.

The State of California and the Department of Forestry and Fire Protection make no representations or warranties regarding the accuracy of data or maps. Neither the State nor the Department shall be liable under any circumstances for any direct, special, incidental, or consequential damages with respect to any claim by any user or third party on account of, or arising from, the use of data or maps.

Gavin Newsom, Governor, State of California

CAL FIRE hazard maps do not affect insurance rates or availability

Insurance Commissioner Ricardo Lara issued a fact sheet explaining that CAL FIRE hazard maps do not affect insurance rates or availability. A Spanish-language fact sheet is also available.

For many years, insurance companies have been using wildfire risk models for determining where they will write and renew policies, and how much premium to charge a policyholder -- not the Fire Hazard Severity Zone maps. CAL FIRE's maps are required by law and their purpose is to drive local planning decisions, not insurance decisions.

Commissioner's POV: "Let me be clear: The CAL FIRE hazard maps are not used for insurance rates or underwriting decisions. But they will empower communities with more accurate information about the very real hazards we face. The reality is we all need to do more to protect our homes and communities from wildfires. When communities know and understand their risks, they can plan and prepare."

Background: The Department of Insurance is implementing a Sustainable Insurance Strategy aimed at supporting safer communities. Based on feedback gathered from thousands of town halls and meetings with homeowners, businesses, and individual consumers, Commissioner Lara implemented an aggressive approach to modernize insurance regulations to address insurance accessibility challenges for consumers.

Commissioner Lara's new Safer from Wildfires regulation clarifies what actions you should take to reduce wildfire risks and receive an insurance discount.

Insurance companies use computerized wildfire catastrophe models to determine which homes to write based on the risk of loss. Building on the Safer from Wildfires initiative — the nation's first wildfire safety discount program — the strategy requires catastrophe models to account for mitigation efforts by homeowners, businesses, and communities, something not possible even a few months ago under outdated regulations.

Learn More: The Department of Insurance fact sheet is posted at CAL FIRE's Fire Hazard Severity Zone web page where you can learn more about enhancing your property's fire safety and view current versions of maps.

Exciting News! 🌟 The California Department of Insurance (CDI) is proud to introduce the **Community Outreach and Education Partnership Initiative**. This dynamic program is designed to raise consumer awareness about CDI's vital services and expand understanding of key insurance topics and fraud prevention. RICARDO LARA
INSURANCE COMMISSIONER
California Department of Insurance

Q&A – Insurance and CAL FIRE Fire Hazard Severity Zone Maps

1. **How will the updated CAL FIRE maps affect insurance availability and affordability?**

CAL FIRE's maps are intended to drive local planning decisions, not insurance decisions. Under Commissioner Lara's new regulation finalized in October 2022, insurance companies must provide discounts for wildfire safety actions such as community mitigation and home-hardening, which CAL FIRE's maps do not assess. In addition, insurance companies are already using risk analysis tools and models that go beyond CAL FIRE's proposed maps in determining what properties they will underwrite.

Commissioner Lara's new wildfire safety regulation will help increase access to insurance by promoting wildfire safety across the state. Reducing wildfire risks throughout the state is the primary way we can make insurance more available and affordable, and our regulation is a major step towards that goal. CAL FIRE's maps support that goal through improving public education about hazard and the need for safety preparation.

2. **How will these maps benefit the public?**

Public education about where current wildfire hazards exist is essential to reducing the threat to local communities and maintaining access to available and affordable insurance. When communities know and understand their risks, they can plan and prepare.

In addition, the Department's first-ever report on climate insurance recommended updated wildfire hazard mapping to improve public safety.

3. **If you are a homeowner and your zone changed from High Hazard to Very High Hazard, will this impact your insurance premiums or renewal ability?**

For many years, insurance companies have been using alternate wildfire risk tools for determining where they will write and renew policies, and how much premium to charge a policyholder, not the Fire Hazard Severity Zone maps. Therefore, a change in designation on the maps for a single homeowner is unlikely to affect their insurance. The reality is that more accurate risk information enables homeowners and communities to reduce their wildfire risks, and Commissioner Lara's new wildfire mitigation regulation clarifies what actions you should take to reduce wildfire risks. Once that regulation is fully implemented, if a homeowner or business owner takes those risk mitigation actions, they will be able to see a discount in their insurance premium.

4. **How is the state addressing wildfire mitigation?**

By design, CAL FIRE's maps are focused on long-range wildfire hazard, which includes only certain variables, like wind, vegetation, ember production and movement, climate, topography, and fire history. CAL FIRE's maps will give up to date information to communities about the level of wildfire hazard they face, which could help target resources at the state and local level. Expanded state grant programs and Commissioner Lara's new wildfire safety regulation are aimed at reducing wildfire risks to communities through programs such as Firewise USA and the new Fire Risk Reduction Community designation from the California Board of Forestry and Fire Protection.

Agreement with Corona-Norco Unified School District for Traffic Study Reimbursement

Prepared By:

Stephanie Vasquez, Assistant to the City Manager

Recommended Action(s)

Staff recommends that the City Council approve and authorize the City Manager to execute the updated Traffic Study Reimbursement Agreement with Corona-Norco Unified School District for a term of one year with two automatic one-year renewal options.

Summary

Since 2012, the City of Eastvale and CNUSD have partnered to conduct traffic studies as needed to evaluate potential school crossing guard locations. These studies help inform decisions regarding student pedestrian safety and placement of crossing guards.

Under the prior agreement, traffic studies were reimbursed annually on a case-by-case basis. The new agreement maintains the 50/50 cost-sharing structure up to a maximum of $25,000 per fiscal year, but extends the term to one (1) year with two (2) additional automatic renewal options of one year each, unless either party provides 90-day written notice of non-renewal.

Background

The City of Eastvale conducts traffic studies, often initiated by CNUSD, to determine if conditions meet criteria for crossing guard placement near Eastvale schools. The original agreement allowed for a single-year commitment. CNUSD and the City now seek a more streamlined approach through multi-year framework that provides consistency and administrative efficiently.

Key provisions of the updated agreement include:

- 50% cost-sharing for eligible traffic studies
- $25,000 not-to-exceed annual reimbursement cap
- Initial term of one year from July 1, 2025-June 30, 2026
- Automatic renewal for up to two additional one-year terms
- 90-day notice requirement for termination or non-renewal

Environmental

The approval of the Traffic Study Reimbursement does not have environmental impact.

Strategic Plan Action - Priority Level: N/A | Target #: N/A | Goal #: N/A

Not Applicable.

Fiscal Impact

There is no change in fiscal impact from the prior agreement. The City's share of traffic study costs remains capped at $25,000 annually, budgeted within the General Fund under Engineering contract services account number 100-320-6490.

Prior City Council/Commission Action

City Council Approved a Traffic Study Reimbursement Agreement for one year at the June 12, 2024 Council Meeting.

Attachment(s)

Attachment 1 - EV TRAFFIC STDY NN 2024
Attachment 2 - Agreement for Traffic Study Reimbursement (2025 - 2028)

Agreement for Traffic Study Reimbursement

This Agreement ("Agreement") is entered into this 9th day of July 2024 by and between the City of Eastvale ("City") and Corona-Norco Unified School District ("District"), as follows:

RECITALS

A. City and District desire to conduct traffic studies to inform decisions regarding the provision of crossing guards at District schools within the City and for the City and District to split the costs associated with such traffic studies equally.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the promises made and recited herein, the parties do hereby enter into the Agreement as follows:

1. **TERM.**

This Agreement shall commence on July 10, 2024 and continue through June 30, 2025.

2. **REIMBURSEMENT.**

City may conduct traffic studies to inform the selection of sites within the City where crossing guard services will be provided. District agrees to reimburse City for 50% of the cost of performing such traffic studies not to exceed twenty-five thousand dollars ($25,000). Payment shall be made by District within thirty (30) days of District's receipt of an invoice from City.

3. **GENERAL PROVISIONS.**

a. **Applicable Law**. The laws of the State of California shall govern the interpretation and enforcement of this Agreement.

b. **Indemnification.** Either party shall indemnify and hold harmless the other party, its Board, agents and employees from any and all liabilities, claim, debts, damages, demands, suits, actions and cause of action of whatsoever kind, nature, including but not limited to attorneys' fees, arising out of or resulting from the acts or omissions of the other party.

c. **Assignment.** Neither party shall assign this Agreement without the prior written consent of the other party.

d. **Termination.** Either party may terminate this Agreement upon ninety (90) days prior written notice to the other Party. District's obligation to reimburse City for traffic studies previously conducted or underway shall survive termination of this Agreement.

e. **Notices**. All written notices to be given pursuant to the terms hereof shall be either delivered by personal or deposited in the United States mail first class, postage prepaid and addressed as follows:

2820 Clark Avenue
Norco, CA 92860
Attention: Student Services

CITY: City of Eastvale
12363 Limonite Avenue, Suite 910
Eastvale, CA 92880
Attention: City Manager

The foregoing names and addresses may be changed by written notice to the other Party as provided herein.

IN WITNESS WHEREOF, the parties hereto have executed this to the Agreement on the date and year first written above.

Agreement for Traffic Study Reimbursement

This Agreement ("Agreement") is entered into this __ day of _____ 2025 by and between the City of Eastvale ("City") and Corona-Norco Unified School District ("District"), as follows:

RECITALS

A. City and District desire to conduct traffic studies to inform decisions regarding the provision of crossing guards at District schools within the City and for the City and District to split the costs associated with such traffic studies equally.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the promises made and recited herein, the parties do hereby enter into the Agreement as follows:

1. TERM.

This Agreement shall commence on July 01, 2025 and continue through June 30, 2026. This Agreement will automatically renew for two (2) additional terms of one (1) year each unless either party gives written notice of non-renewal to the other party at least 90 days prior to the end of the then-current term.

2. REIMBURSEMENT.

City may conduct traffic studies to inform the selection of sites within the City where crossing guard services will be provided. District agrees to reimburse City for 50% of the cost of performing such traffic studies not to exceed twenty-five thousand dollars ($25,000). Payment shall be made by District within thirty (30) days of District's receipt of an invoice from City.

3. GENERAL PROVISIONS.

a. Applicable Law. The laws of the State of California shall govern the interpretation and enforcement of this Agreement.

b. Indemnification. Either party shall indemnify and hold harmless the other party, its Board, agents and employees from any and all liabilities, claim, debts, damages, demands, suits, actions and cause of action of whatsoever kind, nature, including but not limited to attorneys' fees, arising out of or resulting from the acts or omissions of the other party.

c. Assignment. Neither party shall assign this Agreement without the prior written consent of the other party.

d. Termination. Either party may terminate this Agreement upon ninety (90) days prior written notice to the other Party. District's obligation to reimburse City for traffic studies previously conducted or underway shall survive termination of this Agreement.

e. Notices. All written notices to be given pursuant to the terms hereof shall be either delivered by personal or deposited in the United States mail first class, postage prepaid and addressed as follows:

DISTRICT:	Corona-Norco Unified School District 2820 Clark Avenue Norco, CA 92860 Attention: Student Services
CITY:	City of Eastvale 12363 Limonite Avenue, Suite 910 Eastvale, CA 92880 Attention: City Manager

The foregoing names and addresses may be changed by written notice to the other Party as provided herein.

IN WITNESS WHEREOF, the parties hereto have executed this to the Agreement on the date and year first written above.

Amend Chapter 10.02 of Title 10 to the Eastvale Municipal Code Establishing the Speed Limits on Certain Streets

Prepared By:

Jimmy Chung, Public Works Director/City Engineer

Recommended Action(s)

Staff recommends that the City Council adopt the Ordinance amending Chapter 10.02 of Title 10 to the Eastvale Municipal Code Establishing the Speed Limits on Certain Streets.

Summary

On July 24, 2013, City Council approved the establishment and update of speed limits on street segments in Eastvale, followed by amendments approved on February 12, 2014; June 24, 2015; July 11, 2018; January 26, 2022; and January 11, 2023. Since the January 11, 2023 approval of the speed surveys, the following six (6) street segments have been studied:

- Segment 2: 65th Street between Archibald Avenue and Sumner Avenue
- Segment 23: Hamner Avenue between Bellegrave Avenue and Cantu Galleano Ranch Road
- Segment 28: Harrison Avenue between Limonite Avenue and Blossom Way
- Segment 32: Limonite Avenue between Hellman Avenue and Cucamonga Creek Channel
- Segment 33: Limonite Avenue between Cucamonga Creek Channel and Archibald Avenue
- Segment 46: Scholar Way between Citrus Street and Schleisman Road

Background

Posted speed limits are established to inform drivers of appropriate and safe travel speeds, and to protect the general public from the risks posed by reckless or unpredictable driving behavior. Research has shown that most drivers travel at speeds that are safe and reasonable, therefore, speed limits are established primarily on the consensus of the majority of those who use the roads.

Speed limits are not based on the actions of few.

In California, the California Vehicle Code (CVC) requires that speed limits be set using an Engineering and Traffic Survey (ETS), rather than through arbitrary methods. This approach ensures that speed limits are defensible and appropriate for the roadway conditions. The CVC also includes the Basic Speed Law (Section 22350), which states:

"No person shall drive a vehicle on a highway at a speed greater than is reasonable or prudent having due regard for weather, visibility, the traffic on, and the surface and width of the highway, and in no event at a speed which endangers the safety of persons or property."

Properly posted speed limits assist law enforcement in citing drivers who violate the Basic Speed Law and give drivers a clear warning of the maximum speed that is reasonable and prudent under typical driving conditions.

The engineering and traffic survey study involves the three major elements of data collection and analysis, as required by California Vehicle Code (CVC) Section 627 and as outlined in the California Manual on Uniform Traffic Control Devices (CA MUTCD), 2014 Edition, rev 9. The three elements of an Engineering and Traffic Survey, as described in the CVC, are:

1. Prevailing speed as determined by a spot speed survey
2. Collision records
3. Highway, traffic, and roadside conditions not readily apparent to the driver

Other factors that may also be considered include:

- Residential Density (as defined in CVC Section 627)
- Safety of bicyclists and pedestrians, with increased consideration for vulnerable pedestrian groups including children, seniors, persons with disabilities, users of personal assistive mobility devices, and the unhoused.

The City Council last adopted an Engineering and Traffic Survey on July 24, 2013, followed by amendments approved on February 12, 2014, June 24, 2015, July 11, 2018, January 26, 2022 and January 11, 2023. Since the January 11, 2023 approval of the speed surveys, the following six (6) street segments have been studied:

- Segment 2: 65th Street between Archibald Avenue and Sumner Avenue
- Segment 23: Hamner Avenue between Bellegrave Avenue and Cantu Galleano Ranch Road
- Segment 28: Harrison Avenue between Limonite Avenue and Blossom Way
- Segment 32: Limonite Avenue between Hellman Avenue and Cucamonga Creek Channel
- Segment 33: Limonite Avenue between Cucamonga Creek Channel and Archibald Avenue
- Segment 46: Scholar Way between Citrus Street and Schleisman Road

These segments were studied for the following reasons:

1. Establish the speed limit for a new segment:
   - Harrison Avenue between Limonite Avenue and Blossom Way - Segment 28
   - Limonite Avenue between Hellman Avenue and Cucamonga Creek Channel - Segment 32

- Limonite Avenue between Cucamonga Creek Channel and Archibald Avenue - Segment 33

2. Segment that required a resurvey in order to ensure speed limits are appropriate and enforceable by radar/lidar:

- 65th Street between Archibald Avenue and Sumner Avenue - Segment 2
- Hamner Avenue between Bellegrave Avenue and Cantu Galleano Ranch Road - Segment 23
- Scholar Way between Citrus Street and Schleisman Road - Segment 46

Based on the ETS results, the recommended speed limit to be established at these six (6) segments is shown below:

Segment No.	Street	Between	Current Speed Limit (mph)	Recommended Speed Limit (mph)
2	65th Street	Archibald Avenue and Sumner Avenue	40	40
23	Hamner Avenue	Bellegrave Avenue and Cantu Galleano Ranch Rd	50	45
28	Harrison Avenue	Limonite Avenue and Blossom Way	45	35
32	Limonite Avenue	Hellman Avenue to Cucamonga Creek Channel (New)	None	45
33	Limonite Avenue	Cucamonga Creek Channel to Archibald Avenue (New	None	45
46	Scholar Way	Citrus Street & Schleisman Road	35	35

The recommended speed limits were reviewed and found acceptable by the Riverside County Sheriff's Office, which provides contract law enforcement services to the City of Eastvale.

To ensure enforceability, each speed limit recommendation must be supported by an ETS that can withstand legal scrutiny. This survey includes all required documentation under State law. Once the ordinance is adopted, updates to posted speed limits will be implemented accordingly.

Environmental

Approval of the agreement is categorically exempt from California Environment Quality Act (CEQA) review under CEQA Guidelines Section 15301 - Existing Facilities.

Strategic Plan Action - Priority Level: 2 | Target #: 5 | Goal #: 7

Improve traffic mobility and management

Fiscal Impact

Several additional speed limit signs need to be installed at various locations throughout the City. The total cost to install these speed limit signs is estimated to be $3,000. Funds are available in the

Measure A fund, Capital Improvement Project number 92001, Account Number 210-510-6695.

Prior City Council/Commission Action

On July 24, 2013, City Council approved the establishment of speed limits on street segments in Eastvale. Subsequent amendments were approved on February 12, 2014, June 24, 2015, July 11, 2018, and January 26, 2022.

SECTION 1.0

INTRODUCTION

The purpose of this report is to document the results of an engineering and traffic survey conducted to update and to establish the speed limits for six (6) segments of the City of Eastvale arterial street network. The overall study was conducted to comply with existing State regulations concerning the increasing or decreasing of speed limits within City boundaries.

Posted speed limits are established to inform drivers of the safe speed limit and to protect the general public from reckless and unpredictable behavior of irresponsible drivers. Research has shown that most drivers travel at speeds that are safe and reasonable, therefore, speed limits are established primarily on the consensus of the majority of those who use the roads. Speed limits are not based on the actions of few. The California Vehicle Code requires the limits to be established on the basis of an engineering and traffic survey rather than by arbitrary methods.

Posted speed limits also provide law enforcement with a clearly understood method of identifying and apprehending violators of the Basic Speed Law (CVC Section 22350), which states: No person shall drive a vehicle on a highway at a speed greater than is reasonable or prudent having due regard for weather, visibility, the traffic on, and the surface and width of the highway, and in no event at a speed which endangers the safety of persons or property. The posted speed limit gives drivers a clear warning of the maximum speed that is reasonable and prudent under typical driving conditions.

It is generally accepted that speed limits cannot be successfully enforced without voluntary compliance by a majority of drivers. Consequently, only the driver whose behavior is clearly out of line with the normal flow of traffic is usually targeted for enforcement.

This report contains sufficient information to document that the conditions of the latest edition of the California Vehicle Code (CVC) Section 627 have been satisfied, that other conditions not readily apparent to a motorist are properly identified, and that the provisions of AB 43 have been incorporated in the analysis. To legally use radar for speed enforcement, Section 40802(b)of the CVC requires that limits be established per Sections 22357 and 22358 of the CVC, the limits mustbe justified by an Engineering and Traffic Survey conducted within five years prior to the date of the alleged violation. Section 40802(c) of the CVC allows cities to extend the survey period up to seven or 14years depending on specific criteria. California Assembly Bill (AB) 43, related to traffic safety, was signed into law on October 8, 2021. AB 43 modifies certain sections and adds new sections to the CVC pertaining to speed limits. Certain sections of AB 43 took effect on January 1, 2022, while other sections went into effect on January 1, 2023. All sections are currently in effect. Details of these CVC criteria and modifications are provided in Appendix A. CVC Section 627 also requires that the Engineering and Traffic Survey be conducted in accordance with thelatest edition of the California *Manual on Uniform Traffic Control Devices* (CA MUTCD). Details of these CA MUTCD criteria are provided in Appendix B. AB 43 also modified sections of the CA MUTCD, which took effect on January 1, 2023, when Revision 8 of the CA MUTCD was approved, and on April 1, 2025, when Revision 9 of the CA MUTCD was approved.

On July 24, 2013, City Council approved the establishment and update of speed limits on street segments in Eastvale, followed by amendments approved on February 12, 2014, June 24, 2015, July 11, 2018 January 26, 2022 and January 11, 2023. Since the January 11, 2023 City Council approval of the speed surveys, the following six (6) street segments have been studied:

2 65th Street between Archibald Avenue and Sumner Avenue
23 Hamner Avenue between Bellegrave Avenue and Cantu Galleano Ranch Road
28 Harrison Avenue between Limonite Avenue and Blossom Way
32 Limonite Avenue between Hellman Avenue and Cucamonga Creek Channel33 Limonite Avenue between Cucamonga Creek Channel and Archibald Avenue
46 Scholar Way between Citrus Street and Schleisman Road

The segments below were studied for the following reasons:

1. Establish the speed limit for a new segment:
    - Harrison Avenue between Limonite Avenue and Blossom Way – Segment 28
    - Limonite Avenue between Hellman Avenue and Cucamonga Creek Channel – Segment 32
    - Limonite Avenue between Cucamonga Creek Channel and Archibald Avenue – Segment 33
2. Segment that required a resurvey in order to ensure speed limits are appropriate and enforceable by radar/lidar:
    - 65th Street between Archibald Avenue and Sumner Avenue – Segment 2
    - Hamner Avenue between Bellegrave Avenue and Cantu Galleano Ranch Road – Segment 23
    - Scholar Way between Citrus Street and Schleisman Road – Segment 46

This survey will either verify, increase, or decrease the existing speed limits for the six (6) selected roadway segments within the City of Eastvale, based on the data and results obtained.

At six (6) locations on the City's network, spot speed surveys were taken in conformance with the State law for conducting engineering and traffic surveys for the purpose of establishing/updating prima facie speed limits. The data was collected in accordance with the latest edition of the 2025 CA MUTCD 2014, rev 9. Sections of the CA MUTCD that contain the regulations for conducting the required "Engineering and Traffic Survey" are presented in Appendix B. Also in Appendix B are definitions of terms used in speed zone surveys. As previously noted, excerpts from the CVC regarding regulations governing speed limits are presented in Appendix A. The speed zone radar surveys were conducted by Counts Unlimited, Inc. Certifications for their staff and equipment are provided in Appendix E.

SECTION 2.0

STUDY METHODOLOGY

The basic fundamentals for establishing speed limits recognize that the majority of drivers behave in a safe and reasonable manner, and, therefore, the normally careful and competent actions of a reasonable driver should be considered legal. Speed limits established on the fundamentals conform to the consensus that those who drive the highway determine what speed is reasonable and safe, not on the judgement of one or a few individuals. A radar spot speed survey is usually used to record the prevailing speed of reasonable drivers.

Speed zones are established to inform drivers of the safe speed limit and to protect the general public from unreasonable and reckless drivers. Research has shown that most drivers travel at speeds that are safe and reasonable, therefore, speed limits are established primarily on the consensus of the majority of those who use the roads. Speed limits are not based on the actions of few. The California Vehicle Code requires the limits to be established on the basis of an engineering and traffic survey rather than by arbitrary methods.

Speed limits are also established to advise drivers of conditions which may not be readily apparent to a reasonable driver. For this reason, collision history, roadway conditions, traffic characteristics and land use must also be analyzed before determining speed limits.

The engineering and traffic survey study involved the three major elements of data collection and analysis, as required by California Vehicle Code (CVC) Section 627 and as outlined in the California *Manual on Uniform Traffic Control Devices* (CA MUTCD), 2014 Edition, rev 9. The three elements of an Engineering and Traffic Survey, as described in the CVC, are:

1. Prevailing speed as determined by a spot speed survey
2. Collision records
3. Highway, traffic, and roadside conditions not readily apparent to the driver

Other factors that may also be considered include:

- Residential Density (as defined in CVC Section 627)
- Safety of bicyclists and pedestrians, with increased consideration for vulnerable pedestrian groups including children, seniors, persons with disabilities, users of personal assistive mobility devices, and the unhoused.

California Assembly Bill (AB) 43, passed in 2021, introduced concepts from Vision Zero into the determination of speed limits. AB 1938, passed in 2022, made further modifications. The goal of Vision Zero is to reduce traffic-related deaths and serious injuries to zero, based on the Safe System Approach. The basic tenet of Vision Zero is that human beings are vulnerable to traffic collisions, the severity of injuries and death are directly affected by speed, and roadway speeds should be reduced wherever possible, using the Safe System Approach, to achieve Vision Zero. AB 43 maintains the use of the 85th percentile speed as the base for setting speed limits, but makes it easier to reduce speed limits. The effects of AB 43 are discussed below, under Analysis.

Spot Speed Survey. Spot speed surveys, performed by a certified radar technician utilizing a calibrated radar gun, were conducted for six (6) roadway segments to determine existing vehicular travel speeds. A minimum of 100 observations were recorded, 50 for each direction of travel, on all the surveyed street segments. This data was used to calculate statistical information such as the 85th percentile speed, 10 mile per hour pace speed, percent of vehicles within the 10 mile per hour pace, median speed and other pertinent data for analysis. The 85th percentile speed is the speed at or below which 85 percent of the traffic is traveling. This threshold represents what is historically found to be a safe and reasonable speed for most drivers based on common roadway conditions.

Collision Rate. Mid-block traffic collision data for the six (6) roadway segments was tabulated from the City's and County's collision records as reported to the California Crash Reporting System (CCRS) for the period from January 1, 2023 through December 31, 2024 (two years). The collision rate was calculated and considered in recommending the speed limit.

Field Review. The streets were field reviewed to determine/confirm the existing roadway characteristics, condition and placement of signs and markings, adjacent land uses, pedestrian and bicycle activity (with increased consideration of vulnerable pedestrian groups),and to identify roadway characteristics that are not readily apparent to vehicle drivers.

Analysis. The three elements and two other factors described above were used to determine the recommended speed limit. The analysis began with the 85th percentile speed from the spot speed survey and was modified, as appropriate, by the collision rate, pedestrian and bicycle activity, and existing conditions not readily apparent to the driver.

The speed limit is initially established at the nearest 5 mph increment to the 85th percentile speed. It can then be reduced by 5 mph if it meets one of the following two options:

Option 1. CVC Sections 627 and 22358.5 allow the speed limit to be reduced by 5 mph from the nearest 5 mph increment of the 85th percentile speed under certain circumstances.

Option 2. For cases where the nearest 5 mph increment would require rounding up, CVC Section 21400(b) allows the speed limit to be rounded down to the nearest 5 mph increment below the 85th percentile speed, however, no further reduction is allowed.

The following examples explain the use of these speed limit criteria:

A. Using Option 1, when the 85th percentile speed is rounded down (i.e. the 85th percentile speed is 37 mph, so the speed limit would be established at 35 mph), the speed limit could be reduced another 5 mph, to 30 mph, if the special conditions are met and justification for using the lower speed limit are documented in the engineering and traffic survey.

B. Using Option 1, when the 85th percentile speed is rounded up (i.e. the 85th percentile speedis 38 mph, so the speed limit would be established at 40 mph), the speed limit could be reducedby 5 mph, to 35 mph, if the special conditions are met and justification for using the lower speed limit are documented in the engineering and traffic survey.

C. Using Option 2, when the 85th percentile speed is rounded up (i.e. the 85th percentile speed is 38 mph and would normally be rounded up to 40 mph), instead of rounding up, the speed limit can be reduced by 5 mph (established at 35 mph), but no further reduction can be applied.

AB 43 also allows the speed limits as determined above, to be reduced an additional 5 mph or the existing speed limits to be maintained under certain conditions. If a local authority, after

completing an engineering and traffic survey, finds that the speed limit is still more than is reasonable or safe, the local authority may, by ordinance:

- Reduce the speed limit by an additional five miles per hour on a section of highway designated as a Safety Corridor or if the highway is adjacent to any land or facility that generates high concentrations of bicyclists or pedestrians, especially those from vulnerable groups such as children, seniors, persons with disabilities, and the unhoused.
- Retain the currently adopted speed limit or restore the immediately prior speed limit if that speed limit was established with an engineering and traffic survey and if a registered engineer has evaluated the section of highway and determined that no additional general purpose lanes have been added to the roadway since the completion of the traffic survey that established that speed limit.
- Determine and declare a 25 or 20 miles per hour prima facie speed limit on a highway contiguous to a business activity district when posted with a sign that indicates a speed limit of 25 or 20 miles per hour.

A greater-than-expected collision rate is one of the special conditions under Option 1, allowing the speed limit to be established 5 mph lower than the rounded speed limit. The collision rate is based on mid-block collisions only. It is determined using the equation shown below and is then compared to the statewide average collision rate for similar roadways, found in *Crash Data on California State Highways (Road Miles, Travel, Crashes, Crash Rates)* published by Caltrans. The latest edition, 2022, was used for this 2025 analysis.

The collision rates are calculated using the following equation:

$$\text{Collision Rate} = \frac{\text{Number of Midblock collisions} \times 10^6}{\text{24-hour volume} \times 365 \times \text{segment length} \times \text{number of years}}$$

Where: Number of midblock collisions based on 2 years (January 1, 2023 through December 31, 2024), 24-hour traffic volume (both directions) in the survey segment and segment length in miles. Rates are shown in Collisions per Million Vehicle Miles (per year) or Col/MVM.

SECTION 3.0

SURVEY RESULTS

3.1 Spot Speed Radar Survey

Spot speed radar surveys were conducted at each street segment to establish a reasonable and effective speed limit based on the premise that the speed limit thus established conforms to the actual behavior of the majority of motorists. The speed limit should normally be established at the five mile per hour increment nearest the 85th percentile speed, as recorded for the surveyed segment. However, engineering judgment and other factors such as collision rates (Section 3.2) and Roadway Segment Field Review (Section 3.3) may indicate the need for further reduction in establishing reasonable and effective speed limits. Table 1 shows the existing speed limit and the 85th percentile speed for each studied segment.

The criteria used to conduct the radar survey are listed in Appendices A and B.

Appendix C contains the Engineering and Speed Survey Summary sheets for each of the six (6) segments surveyed as well as those for segments previously studied. The data collected and information calculated for the radar speed survey are as follows:

- Posted speed limit
- Direction of survey
- Date and time of speed survey
- Weather conditions
- Number of vehicles observed in each direction
- Speed of each surveyed vehicle
- 15th percentile speed
- 50th Percentile speed
- 85th Percentile speed
- 10 mph pace speed
- Percent over pace speed
- Percent in pace speed
- Percent under pace speed
- Average speed

The summary contains information about vehicular speed data observed, collision data, street classification, and any unusual conditions at the location.

Table 1: Segment Spot Speed Summary[1]

(Amended April 2025)

No	Street	Between	Dir	Existing Speed Limit[3] (mph)	85th%ile Speed (mph)	Recommended Speed Limit (mph)	Comments
1	58th Street	Scholar Way and Hamner Avenue	E/W	35	40	35	No Change - 85th%ile, Option 2
2	65th Street	Archibald Avenue and Sumner Avenue	E/W	40	40	40	No Change - 85th%ile
3		Sumner Avenue and Hamner Avenue	E/W	40	47	40	No Change - 85th%ile, Option 1 – Pedestrian & bicyclist safety, particularly for vulnerable pedestrian groups
4		Hamner Avenue and Wells Spring Street / East City Limit	E/W	35	42	35	No Change - 85th%ile, Option 1 – Pedestrian & bicyclist safety, particularly for vulnerable pedestrian groups
5	68th Street	Sumner Avenue and Hamner Avenue	E/W	45	49	45	No Change - 85th%ile, Option 2
6		Hamner Avenue and East City Limit	E/W	45	47	45	No Change - 85th%ile
7	Archibald Avenue	Bluff Street and Wind River/Grapewin Street	N/S	55	57	55	No Change - 85th%ile
8		Wind River/Grapewin Street and Schleisman Road	N/S	50	57	50	No Change - 85th%ile, Option 1 – Pedestrian & bicyclist safety, particularly for vulnerable pedestrian groups
9		Schleisman Road and Bellegrave Avenue / North City Limit	N/S	50	55	50	No Change - 85th%ile, Option 1
10	Baron Road	Archibald Avenue and Northernly Terminus	E/W	35	40	35	No Change - 85th%ile, Option 1
11	Bellegrave Avenue	Sumner Avenue and Hamner Avenue	E/W	50	53	50	No Change - 85th%ile, Option 2
12		Hamner Avenue and East City Limit	E/W	50	48	50	No Change - 85th%ile
13	Blossom Way	Harrison Avenue and Sumner Avenue	E/W	30	37	30	No Change - 85th%ile, Option 1 – Pedestrian & bicyclist safety, particularly for vulnerable pedestrian groups
14	Cantu-Galleano Ranch Road	Hamner Ave and I-15 Freeway	E/W	None	51	50	Established Speed Limit – 85th%ile
15	Chandler Street	Hellman Avenue and Harrison Avenue	E/W	45	52	45	No Change - 85th%ile, Option 1 – Pedestrian & bicyclist safety, particularly for vulnerable pedestrian groups
16	Citrus Street	Harrison Avenue and Scholar Way	E/W	45	47	45	No Change - 85th%ile
17		Scholar Way to Hamner Avenue	E/W	45	47	45	No Change - 85th%ile
18	Fieldmaster Street	Hall Road and Archibald Avenue	E/W	40	43	40	No Change - 85th%ile, Option 2
19	Goodman Way	Cantu-Galleano Ranch Road and Hamner Avenue	N/S & E/W	None	41	35	Establishing Speed Limit – 85%ile, Option 1, Very heavy truck traffic, many peds, no bike lanes
20	Hamner Avenue	South City Limit and Schleisman Road	N/S	50	52	45	Decreased - 85th%ile, Option 1
21		Schleisman Road and Limonite Avenue	N/S	45	51	45	No Change, - 85th%ile, Option 1 - Reduction of speed due to crash history
22		Limonite Avenue and Bellegrave Avenue	N/S	45	51	45	No Change - 85th%ile, Option 1
23		Bellegrave Avenue and Cantu-Galleano Ranch Road	N/S	50	48	45	Decrease – 85th%ile, Option 2. Matches segments to the north.
24		Cantu-Galleano Ranch Road and Riverside Drive	N/S	None	55	50	Established Speed Limit - 85th%ile, Option 2
25		Riverside Drive & Philadelphia Street	N/S	None	55	50	Established Speed Limit - 85th%ile, Option 2
26	Harrison Avenue	Chandler Street and Schleisman Road	N/S	45	50	45	No Change - 85th%ile, Option 1
27		Schleisman Road and Limonite Avenue[2]	N/S	45	47	45	No Change - 85th%ile, Option 1 – Pedestrian & bicyclist safety, particularly for vulnerable pedestrian groups
28		Limonite Avenue and Blossom Way[2]	N/S	45	40	35	Decrease - 85th%ile, Option 1, CVC 22358.6(b)
29	Hellman Avenue	River Road and Chandler Street	N/S	50	56	50	No Change - 85th%ile, Option 1
30		Chandler Street and Limonite Avenue	N/S	50	55	50	No Change - 85th%ile, Option 1
31		Limonite Avenue to North City Limit	N/S	None	42	35	Established Speed Limit – 85th%ile, Option 1 – Pedestrian & bicyclist safety; very heavy truck traffic
32	Limonite Avenue	Hellman Avenue to Cucamonga Creek Ch.	NE/SW	None[3]	52	45	Establishing speed limit - 85th%ile, Option 1, Ped & bike safety, CVC 22358.6(b)
33		Cucamonga Creek Ch to Archibald Avenue	NE/SW	None[3]	52	45	Establishing speed limit - 85th%ile, Option 1, Ped & bike safety, CVC 22358.6(b)
34		Archibald Avenue and Sumner Avenue	E/W	45	53	50	Increased - 85th%ile, Option 2
35		Sumner Avenue and East City Limit	E/W	45	52	45	No Change - 85th%ile, Option 1 - Segments of missing sidewalk, heavy pedestrian usage, no bike lanes

(Continued on Next Page)

No	Street	Between	Dir	Existing Speed Limit[3] (mph)	85th%ile Speed (mph)	Recommended Speed Limit (mph)	Comments
36	Mission Boulevard	S. Milliken Avenue and Ontario Freeway (I-15)	E/W	None	59	55	Established Speed Limit - 85th%ile, Option 2
37	Orange Street	Sumner Avenue and Scholar Way	E/W	30	45	30	No Change – AB 43 - New CVC Section 22358.8
38	Prairie Smoke Road	Hellman Avenue and Whitewell Road	E/W	35	42	35	No Change - 85th%ile, Option 1
39	River Road	Hellman Avenue and Archibald Avenue	E/W	40	49	40	No Change – AB 43 – New CVC Section 22358.8
40	Riverboat Drive	Massy Harris Way and Wells Springs Street	E/W	40	44	40	No Change - 85th%ile, Option 2
41	Riverside Drive	Hamner Avenue & East City Limit	E/W	50	47	45	Reduced - 85th%ile, Continuity with adjacent segment
42	Schleisman Road	Hellman Avenue and Archibald Avenue	E/W	50	57	50	No Change - 85th%ile, Option 1
43		Archibald Avenue and Sumner Avenue	E/W	45	49	45	No Change - 85th%ile, Option 2
44		Sumner Avenue and Scholar Way	E/W	45	48	45	No Change - 85th%ile, Option 2
45		Scholar Way and Hamner Avenue	E/W	45	51	45	No Change - 85th%ile, Option 1
46	Scholar Way	Citrus Street and Schleisman Road	N/S	35	43	35	No Change - 85th%ile, Option 2, CVC 22358.7.
47		Schleisman Road and Limonite Avenue	N/S	35	43	40	Increased - 85th%ile, Option 2
48		Limonite Avenue and Bellegrave Avenue	N/S	None	43	40	Established Speed Limit - 85th%ile, Option 2
49	Sumner Avenue	Citrus Street and 65th Street	N/S	45	51	45	No Change - 85th%ile, Option 1
50		65th Street and Bellegrave Avenue	N/S	45	51	45	No Change - 85th%ile, Option 1
51	Whitewell Road	Schleisman Road and Prairie Smoke Road	N/S	35	40	35	No Change - 85th%ile, Option 1 - Reduction of speed due to crash history

[1]Roadway segments studied for 2025 E&TS are highlighted in gray.

[2] Segment of Harrison Avenue between Schleisman Rd & Blossom Way was split into two segments at Limonite Ave since the character of the road north of Limonite Ave is different from south of Limonite Ave.

[3]Two segments, currently studied (Nos. 32 & 33), did not previously have a speed limit set by an Engineering and Traffic Survey.

[4]See Appendix A for modifications to CVC by new CA laws, AB 43 & AB 1938. See Appendix B, Line 12a, for explanations of Option 1 and Option 2.

3.2 Collision Rate Analysis

The mid-block collision rate for each roadway segment was determined by using the most recent collision records as required by CVC Section 627. Traffic collision data for the six (6) roadway segments being studied was collected from the Statewide Integrated Traffic Records System (SWITRS) collision records for the City of Eastvale from January 1, 2023 to December 31, 2024. Based on this data, the mid-blockcollision rates were calculated for each roadway segment in terms of "collisions per 1,000,000 vehiclemiles of travel."

It was then determined if any of the collision rates warranted a 5 mph reduction in the rounded 85th percentile speed per Option 1. The collision rates were compared to the statewide average collision rates for similar roadways. If the collision rate is greater than the statewide rate, a 5 mph reduction may be considered. Both of the calculated roadway segment collision rates were less than the statewide average, so neither roadway segment qualified for the 5 mph reduction based on the collision rate.

The results of the collision rate calculations are shown in Table 2 and in the Engineering and Traffic Survey Summary sheets (Appendix C). A sample collision rate calculation is shown below.

Example:

$$\text{Collision Rate} = \frac{\text{Number of Collisions} \times 10^6}{\text{Vehicles/Day} \times 365 \text{ Days/Year} \times \text{Miles} \times \text{Years of Collision Data}}$$

Collision rate on: Hamner Avenue between Bellegrave Avenue and Cantu-Galleano Ranch Road:

$$\text{Collision Rate} = \frac{3 \times 10^6}{25{,}139 \times 365 \times 0.83 \times 2}$$

$$= \textbf{0.20 collisions per million vehicle miles (Col/MVM)}$$

The comparison collision rates vary from year to year. The 2022 Statewide average rates, which are the most recent rates available, were used for the six (6) segments studied in the 2025 analysis, and are shown in the table below.

No.	Street	Between	Lane Type	Statewide Collision Rate[1]
2	65th Street	Archibald Avenue and Sumner Avenue	4 lanes, undivided	1.24
20	Hamner Avenue	Bellegrave Avenue & Cantu-Galleano Ranch Road	6 lanes, divided	1.17
26	Harrison Avenue	Limonite Avenue and Blossom Way	2 lanes, undivided	1.24
32	Limonite Avenue	Hellman Avenue to Cucamonga Creek Channel	4 lanes, divided	1.17
33	Limonite Avenue	Cucamonga Creek Channel to Archibald Avenue	4 lanes, divided	1.17
46	Scholar Way	Citrus Street & Schleisman Road	4 lanes, undivided	1.24

[1] *Statewide Collision Rates listed are averages for Suburban (Rural Inside City + Urban Outside City) roads.*

Table 2: Collision Analysis

(Amended April 2025)

No.	Street	Between	Segment Length (miles)	Segment Length (feet)	Average Daily Traffic (ADT) (vehs/day)	Midblock Collisions[2]	Collision Rate (Col/MVM) [3]	Statewide Collision Rate	Segment Rate More Than Statewide Rate?
1	58th Street	Scholar Way and Hamner Avenue	0.49	2,568	1,522	0	0.00	1.60	No

45		Scholar Way and Hamner Avenue	0.58	3,040	7,682	0	0.00	0.91	No
46	Scholar Way	Citrus Street & Schleisman Road	0.63	3,300	6,389	0	0.00	1.24	No
47		Schleisman Road and Limonite Avenue	0.99	5,250	4,721	0	0.00	0.91	No
48		Limonite Avenue and Bellegrave Avenue	0.70	3,700	6,678	1	0.20	1.60	No
49	Sumner Avenue	Citrus Street and 65th Street	1.12	5,935	4,028	0	0.00	0.93	No
50		65th Street and Bellegrave Avenue	1.03	5,422	7,857	2	0.23	0.93	No
51	Whitewell Road	Schleisman Road and Prairie Smoke Road	0.29	1,542	2,056	2	3.06	1.60	Yes

[1] Newly-surveyed roadway segments are highlighted in gray.
[2] Number of speed-related mid-block traffic collisions during most recently available 2-year period for newly surveyed segments and 3-year period for prior segments.
[3] Col/MVM = Collisions per Million Vehicle Miles per year; An actual rate greater than state average rate indicates condition that may allow a lower speed limit.
[4] The previous survey on Harrison Avenue (Segment 27) included the segment of Harrison Avenue between Schleisman Road and Blossom Way was split into two segments at Limonite Avenue. The latest surveyed segment (Segment 28) includes Harrison Avenue between Limonite Avenue and Blossom Way since, the portion of the road north of Limonite Ave is different from south of Limonite Ave, the previously-surveyed segment, in width and traffic volume..

3.3 Roadway Segment Field Review

Section 2B.13 of the CA MUTCD 2014, "Speed Limit Signs" states that the speed limit should be established at the nearest five mile per hour increment to the 85th percentile speed recorded during the spot speed survey. However, in matching existing conditions with the traffic safety needs of the community, engineering judgment may indicate the need for a further reduction in speed, as allowed under Option 1. Whenever such factors are considered to establish the speed limit, they should be documented on the speed survey or in the accompanying engineering report.

The roadway segments were driven and videorecorded by Mr. Alan Perkins, Senior Engineering Technician, and reviewed by Ruth Smith, Senior Traffic Engineer (contracted through Ardurra Group). The roadway characteristics, location of speed limit signs, conditions not readily apparent to the driver (lack ofsidewalks/bike lanes, driveways with limited sight distance, clustered driveways, heavy truck activity,etc.), type of land use adjoining the street (commercial, residential, school zone, parks, etc.) and type of roadway (divided, undivided, number of lanes, on-street parking etc.) were noted in the study on the Strip Maps, found in Appendix D. The roadway characteristics recorded were used to determine if any physical conditions warranted consideration of an *additional* five mile per hour reduction of the recommended speed in accordance with CVC Section 627 and Section 22358.6(b).

The results of the roadway segment field review for each segment are indicated on the Engineering and Speed Survey Summary sheets in Appendix C.

- Collision History
- Collision Rate
- Average Daily Traffic Volume
- Road Description, including on-street parking and unusual lane configurations
- Factors Indicating Land or Facility that generates high concentrations of bicyclists or pedestrians, including the presence of sidewalks, bikeways, crosswalks, schools, parks, employment centers, retail, senior centers, cultural areas, religious facilities, health/medical facilities and transit stops
- Pedestrian, Bicycle and Truck activity
- Driveways with limited sight distance or clustered driveways
- Adjacent Land Uses

SECTION 4.0

SURVEY FINDINGS AND RECOMMENDATIONS

4.1 Factors That May Be Considered

In accordance with the State-imposed speed limit establishment regulation, as defined by CVC Section 627 described in Appendix A, there are several factors that may be considered to justify setting the prima facie speed limit five mph below the rounded 85th percentile speed under Option 1.

The factors to be considered are highway, traffic, and roadside conditions, specifically including those listed below, however, factors that are readily apparent to motorists are not to be considered.

- Most recent collision record (mid-block)
- Roadway characteristics
- Shoulder condition
- Grade
- Alignment
- Sight Distance
- Roadside development and environment
- Parking practices and pedestrian activity
- Commercial driveway characteristics (land use)
- Pedestrian traffic with and without sidewalks
- Safety of bicyclists and pedestrians, with increased consideration for vulnerable pedestrian groups including children, seniors, persons with disabilities, users of personal assistive mobility devices, and the unhoused.
- Residential density

The above factors for each roadway segment surveyed are listed in the Engineering and Traffic Survey Summary sheets in Appendix C.

4.2 Recommended Speed Limits

The 85th percentile speed and the above factors were considered in verifying existing speed limits and recommending speed limit changes (increase or decrease). Additionally, discussions were held with City staff in making decisions with respect to changing existing speed limits. This allowed for consideration of any special knowledge of the segment. Table 1 shows the surveyed road segments with posted and recommended speed limits. Table 2, the amended Collision Survey Analysis, lists the street traffic volumes, total number of collisions and calculated collision rate.

4.3 Speed Limit Signing

All California motorists are required to know the basic 15, 25, and 55 MPH speed laws and are tested on the subject when applying for a driver's license. Consequently, speed limit signs covering these conditions need not be posted on City streets. However, although not required by law, speed limit signs for these situations may be posted on streets that have significant daily vehicular traffic volumes, a by-pass traffic situation, the continued violation of a residential 25 MPH speed zone, or with other applicable warrants.

It is normal policy to recommend the posting of speed limit signs only of streets that have been covered by the City speed limit ordinance or by warranted situations covered above.

Speed limit signs should be installed at about one-half mile intervals on the City streets which have been speed zoned. Signs are normally installed on the exit side of traffic signal controlled intersections and the more important intersections where there is high side street vehicle entry. It is important that motorists be given adequate information while not over signing, which tends to confuse the motorist.

Enforcement issues can occur when, (a) the highway is posted with inappropriate speed limit signs, (b)the highway is improperly or inadequately posted; or, (c) the highway is not posted nor covered by ordinance and therefore falls under the basic speed law. In any of these events, the result is a debatable validity that may be questioned in court cases where citations are issued and contested.

SECTION 5.0

SUMMARY AND CONCLUSIONS

5.1 Summary and Conclusions

1. The radar survey and the raw data collection were conducted per CVC Section 627 and California Manual on Uniform Traffic Control Devices, 2014, rev 9, Section 2B.13.
2. Daily traffic counts for six (6) of the selected roadway segments on the City's arterial roadway network were collected in 2025 on March 25.
3. Bicycle and Pedestrian mid-block collision frequency was low.
4. A summary of recommended speed limits is provided in Table 1.
5. It was concluded that the existing speed limits on four (4) of the six (6) studied roadway segments in the City of Eastvale should be changed or established, as listed below.

Roadway Segments with Recommended Changes to Speed Limit

No.	Street	Between	Existing Speed Limit (mph)	Recommended Speed Limit (mph)	Comments
23	Hamner Avenue	Bellegrave Avenue & Cantu-Galleano Ranch Road	50	45	Reducing speed limit by 5 mph – 85th percentile, Option 2
28	Harrison Avenue	Limonite Avenue & Blossom Way	45	35	Reducing speed limit by 10 mph – 85th percentile, Option 2
32	Limonite Avenue	Hellman Avenue & Cucamonga Creek Channel (new street segment)	None	45	Establishing Speed Limit – 85th percentile, CVC 22358.6(b)
33	Limonite Avenue	Cucamonga Creek Channel & Archibald Avenue (new street segment)	None	45	Establishing Speed Limit – 85th percentile, CVC 22358.6(b)

5.2 Speed Limit Ordinance

Based on the recommended speed zone changes, the revised "Speed Zone Ordinances" are as provided on the following pages.

APPENDIX A

Regulations Governing Speed Limits
(Excerpts from the California Vehicle Code)
(Updated April 2025)

RADAR SPEED ZONE SURVEYS

INTRODUCTION

This report presents the results of an Engineering and Traffic Survey for establishment of speed limits on city streets as required by Sections 22357 and 22358 of the California Vehicle Code. The review included radar surveys of prevailing vehicle speeds for each roadway segment, recent traffic counts, an analysis of reported traffic collisions recorded during the specific two-year interval of January 1, 2023 through December 31, 2024, and a field review of each roadway segment regarding roadway characteristics.

In order to enforce speed limits by radar or other electronic devices, a study must be conducted every five years. Section 40802 of the California Vehicle Code defines a speed limit enforced by radar and "….which speed limit is not justified by an engineering and traffic survey conducted within five years prior to the date of the alleged violation…" constitutes a speed trap, unless the following criteria are met:

> If officers have completed specialized training courses that are approved by the Commission on Peace Officer Standards Training, the time span between studies can be extended to seven years.
>
> If after seven years, " …a registered engineer evaluates the section of the highway and determines that no significant changes in roadway or traffic conditions have occurred, including, but not limited to, changes in adjoining property or land use, roadway width, or traffic volume…" the time span between studies can be extended to 14 years.

Since speed traps are illegal, the lack of an adequate study effectively precludes the police from using radar enforcement. Through adoption of this Engineering and Traffic Survey, the police department will be able to enforce posted speed limits with radar equipment.

REGULATIONS GOVERNING SPEED LIMITS

Under California law, the maximum speed limit for any passenger vehicle is 65 miles per hour (mph). All other speed limits are called prima facie limits which "on the face of it", are safe and prudent under normal conditions. Certain prima facie limits are established by law and include the 25 mph limit in business and residential districts; the 15 mph limit in alleys, at blindintersections and blind railroad grade crossings; and a part-time 25 mph limit in school zones whenchildren are going to and from school.

Intermediate speed limits between 25 and 65 mph may be established by local authorities based on engineering and traffic surveys. Such surveys include the analysis of roadway conditions, collisionrecords, and the prevailing speed of prudent drivers using the highway under study. If speed limitsare established below what the majority of drivers consider reasonable, they are often not obeyedand consequently, are difficult to enforce. Those drivers who do not comply with postedreasonable speed limits are, conversely, subject to equitable enforcement action.

The California Vehicle Code provides that the use of radar to enforce speed limits, which have not been based on an engineering and traffic survey within the preceding five years, constitutes a "speed trap". Since speed traps are also prohibited by the code, lack of the required study effectively prohibits local agencies from using radar or lidar enforcement.

APPLICABLE CALIFORNIA VEHICLE CODE SECTIONS

Increase of Local Limits

22357. Whenever a local authority determines upon the basis of an engineering and traffic survey that a speed greater than 25 miles per hour would facilitate the orderly movement of vehicular traffic and would be reasonable and safe upon any street other than a state highway otherwise subject to a prima facie limit of 25 miles per hour, the local authority may by ordinance determine and declare a prima facie limit of 25 miles per hours, the local authority may by ordinance determine and declare a prima facie speed limit of 30, 35, 40, 45, 50, 55, 60 miles per hour or a maximum speed limit of 65 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe. The declared prima facie or maximum speed limit shall be effective when appropriate signs giving notice thereof are erected upon the street and shall not thereafter be revised except upon the basis of an engineering and traffic survey. The provisions of this section shall not apply in respect to any 25-mile-per-hour prima facie limit, which is applicable when passing a school building or the grounds thereof.

Decrease of Local Limits

22358. Whenever a local authority determines upon the basis of an engineering and traffic survey that the limit of 65 miles per hour is more than is reasonable or safe upon any portion of any street other than a state highway where the limit of 65 miles per hour is applicable, the local authority may by ordinance determine and declare a prima facie speed limit of 60, 55, 50, 45,

40, 35, 30, 25, 20 or 15 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe, which declared prima facie limit shall be effective when appropriate signs giving notice thereof are erected upon the street. *(This section was modified by Assembly Bill 43 to include "20 or 15" and became effective on January 1, 2022.)*

Downward Speed Zoning Exceptions

22358.5 It is the intent of the Legislature that physical conditions such as width, curvature, grade and surface conditions or any other condition readily apparent to a driver, in the absence of other factors, would not require special downward speed zoning, as the basic rule of Section 22350 is sufficient regulation as to such conditions.

Initial Rounding to Nearest Five MPH

22358.6 (a) The Department of Transportation shall, in the next scheduled revision, revise and thereafter maintain the California Manual on Uniform Traffic Control Devices to require the Department of Transportation or a local authority to round speed limits to the nearest five miles per hour of the 85th percentile of the free-flowing traffic.

(b) In cases in which the speed limit needs to be rounded down to the nearest five miles per hour increment of the 85th-percentile speed, the Department of Transportation or a local authority may lower the speed limit by five miles per hour from the nearest five mile per hour increment of the 85th-percentile speed, in compliance with Sections 627 and 22358.5 and the California Manual on Uniform Traffic Control Devices, as it read on March 30, 2021, if the reasons for the lower speed limit are documented in an engineering and traffic survey. The Department of Transportation or a local authority may also take into consideration Sections 22353, 22353.2, 22353.3, 22353.4, and 22353.5, if applicable.

(c) In cases in which the speed limit needs to be rounded up to the nearest five miles per hour increment of the 85th-percentile speed, the Department of Transportation or a local authority may decide to instead round down the speed limit to the lower five miles per hour increment. If the speed limit is rounded down pursuant to this subdivision, the speed limit shall not be reduced any further pursuant to subdivision (b).

(d) In addition to subdivisions (b) and (c), a local authority may additionally lower the speed limit as provided in Section 22358.7.

(e) The total reduction in the speed limit pursuant to subdivisions (a) to (d), inclusive, shall not exceed 12.4 miles per hour from the 85th percentile speed.

(f) Notwithstanding subdivisions (a) to (e), inclusive, a local authority may retain the currently adopted speed limit as provided in Section 22358.8 without further reduction, or restore the immediately prior adopted speed limit as provided in Section 22358.8 without further reduction.

Note: Section 22358.6 was modified by Assembly Bill 1938, and the modifications became effective on January 1, 2023.

Additional Five MPH Reduction

22358.7 (a) If a local authority, after completing an engineering and traffic survey, finds that the speed limit is still more than is reasonable or safe, the local authority may, by ordinance, determine

and declare a prima facie speed limit that has been reduced an additional five miles per hour for either of the following reasons:

(1) The portion of highway has been designated as a safety corridor. A local authority shall not deem more than one-fifth of their streets as safety corridors.

(2) The portion of highway is adjacent to any land or facility that generates high concentrations of bicyclists or pedestrians, especially those from vulnerable groups such as children, seniors, persons with disabilities, and the unhoused.

(b) (1) As used in this section, "safety corridor" shall be defined by the Department of Transportation in the next revision of the California Manual on Uniform Traffic Control Devices. In making this determination, the department shall consider highways that have the highest number of serious injuries and fatalities based on collision data that may be derived from, but not limited to, the Statewide Integrated Traffic Records System.

(2) The Department of Transportation shall, in the next revision of the California Manual on Uniform Traffic Control Devices, determine what constitutes land or facilities that generate high concentrations of bicyclists and pedestrians, as used in paragraph (2) of subdivision (a). In making this determination, the department shall consider density, road use type, and bicycle and pedestrian infrastructure present on a section of highway.

(c) A local authority may not lower a speed limit as authorized by this section until June 30, 2024, or until the Judicial Council has developed an online tool for adjudicating infraction violations statewide as specified in Article 7 (commencing with Section 68645) of Chapter 2 of Title 8 of the Government Code, whichever is sooner. *Note: Revision 8 of the California Manual on Uniform Traffic Control Devices 2014 Edition, effective on January 26, 2023, includes the provisions of this section, making them currently effective.*

(d) A local authority shall issue only warning citations for violations of exceeding the speed limit by 10 miles per hour or less for the first 30 days that a lower speed limit is in effect as authorized by this section.

Note: Section 22358.7 was added to the CVC by Assembly Bill 43, and became effective on January 1, 2022.

Maintaining Existing Speed Limit

22358.8. (a) If a local authority, after completing an engineering and traffic survey, finds that the speed limit is still more than is reasonable or safe, the local authority may, by ordinance, retain the currently adopted speed limit or restore the immediately prior speed limit if that speed limit was established with an engineering and traffic survey and if a registered engineer has evaluated the section of highway and determined that no additional general purpose lanes have been added to the roadway since the completion of the traffic survey that established that speed limit.

(b) This section does not authorize a speed limit to be reduced by any more than 5 mph from the currently adopted speed limit nor below the immediately prior speed limit.

(c) A local authority shall issue only warning citations for violations of exceeding the speed limit by 10 miles per hour or less for the first 30 days that a lower speed limit is in effect as authorized by this section.

Note: Section 22358.8 was added to the CVC by Assembly Bill 43 and became effective on January

1, 2022, then was amended by Assembly Bill 1938, which became effective on January 1, 2023.

Business Activity District Prima Facie Speed Limit

22358.9. (a) (1) Notwithstanding any other law, a local authority may, by ordinance, determine and declare a 25 or 20 miles per hour prima facie speed limit on a highway contiguous to a business activity district when posted with a sign that indicates a speed limit of 25 or 20 miles per hour.

(2) The prima facie limits established under paragraph (1) apply only to highways that meet all of the following conditions:
  (A) A maximum of four traffic lanes.
  (B) A maximum posted 30 miles per hour prima facie speed limit immediately prior to and after the business activity district, if establishing a 25 miles per hour speed limit.
  (C) A maximum posted 25 miles per hour prima facie speed limit immediately prior to and after the business activity district, if establishing a 20 miles per hour speed limit.

(b) As used in this section, a "business activity district" is that portion of a highway and the property contiguous thereto that includes central or neighborhood downtowns, urban villages, or zoning designations that prioritize commercial land uses at the downtown or neighborhood scale and meets at least three of the following requirements in paragraphs (1) to (4), inclusive:

(1) No less than 50 percent of the contiguous property fronting the highway consists of retail or dining commercial uses, including outdoor dining, that open directly onto sidewalks adjacent to the highway.

(2) Parking, including parallel, diagonal, or perpendicular spaces alongside the highway.

(3) Traffic control signals or stop signs regulating traffic flow on the highway, located at intervals of no more than 600 feet.

(4) Marked crosswalks not controlled by a traffic control device.

(c) A local authority shall not declare a prima facie speed limit under this section on a portion of highway where the local authority has already lowered the speed limit as permitted under Section 22358.7, has retained the currently adopted speed limit under Section 22358.8, or has restored the immediately prior adopted speed limit under Section 22358.8.

(d) A local authority shall issue only warning citations for violations of exceeding the speed limit by 10 miles per hour or less for the first 30 days that a lower speed limit is in effect as authorized by this section.

Note: Section 22358.9 was added to the CVC by Assembly Bill 43 and became effective on January 1, 2022, and was then amended by Assembly Bill 1938, which became effective on January 1, 2023.

Speed Trap 40801. No peace officer or other person shall use a speed trap in arresting, or participating or assisting in the arrest of, any person for any alleged violation of this code nor shall any speed trapbe used in securing evidence as to the speed of any vehicle for the purpose of an arrest or prosecution under this code.

40802. (a) A "speed trap" is either of the following:

(1) A particular section of a highway measured as to distance and with boundaries marked, designated, or otherwise determined in order that the speed of a vehicle may be calculated by securing the time it takes the vehicle to travel the known distance.

(2) A particular section of a highway with a prima facie speed limit provided by this code or by local ordinance under paragraph (1) of subdivision (b) of Section 22352, or established under Section 22354, 22357, 22358, or 22358.3, if that prima facie speed limit is not justified by an engineering and traffic survey conducted within five years prior to the date of the alleged violation, and enforcement of the speed limit involves the use of radar or any other electronic device that measures the speed of moving objects. This paragraph does not apply to a local street, road, school zone, senior zone, or business activity district, or speed limit adopted under Section 22358.7 or 22358.8. *(This section was modified by Assembly Bill 43 to add "senior zone, or business activity district" and became effective on January 1, 2022, and was then amended by Assembly Bill 1938, which became effective on January 1, 2023.)*

(b) (1) For purposes of this section, a local street or road is one that is functionally classified as "local" on the "California Road System Maps," that are approved by the Federal Highway Administration and maintained by the Department of Transportation. It may also be defined as a "local street or road" if it primarily provides access to abutting residential property and meets the following three conditions *(This section was modified by Assembly Bill 43 regarding "local street or road" with no change to the meaning and became effective on January 1, 2022.)*:

(D) Roadway width of not more than 40 feet.

(E) Not more than one-half mile of uninterrupted length. Interruptions shall include officialtraffic control devices as defined in Section 445.

(F) Not more than one traffic lane in each direction.

(2) For purposes of this section, "school zone" means that area approaching or passing a school building or the grounds thereof that is contiguous to a highway and on which is posted a standard "SCHOOL" warning sign, while children are going to or leaving the school either during school hours or during the noon recess period. "School zone" also includes the area approaching or passing any schoolgrounds that are not separated from the highway by a fence, gate, or other physical barrier while the grounds are in used by children if that highway is posted with a standard "SCHOOL" warning sign.

(3) For purposes of this section, "senior zone" means that area approaching or passing a senior center building or other facility primarily used by senior citizens, or the grounds thereof that is contiguous to a highway and on which is posted a standard "SENIOR" warning sign, pursuant to Section 22352. *(This section was added by CA AB 43 and became effective on January 1, 2022.)*

(4) For purposes of this section, "business activity center" means a section of highway described in subdivision (b) of Section 22358.9 in which a standard 25 miles per hour or 20 miles per hour speed limit has been posted pursuant to paragraph (1) of subdivision (a) of that section. *(This section was added by CA AB 43 and became effective on January 1, 2022.)*

(c) (1) When all of the following criteria are met, paragraph (2) of this subdivision shall be applicable and subdivision (a) shall not be applicable:

(A) When radar is used, the arresting officer has successfully completed a radar operator course of not less than 24 hours on the use of police traffic radar, and the course was approved and certified by the Commission on Peace Officer Standards and Training.

(B) When laser or any other electronic device is used to measure the speed of moving objects, the arresting officer has successfully completed the training required in subparagraph (A) and an additional training course of not less than two hours approved and certified by the Commission on Peace Officer Standards and Training.

(C) (i) The prosecution proved that the arresting officer complied with subparagraphs (A) and (B) and that an engineering and traffic survey has been conducted in accordance with subparagraph (B) of paragraph (2). The prosecution proved that, prior to issuing the notice to appear, the arresting officer established that the radar, laser, or other electronic device conformed to the requirements of subparagraph (D).

(ii) The prosecution proved the speed of the accused was unsafe for the conditions present at the time of alleged violation unless the citation was for a violation of Section 22349, 22356 or 22406.

(D) The radar, laser, or other electronic device used to measure the speed of the accused meets or exceeds the minimal operational standards of the National Highway Traffic Safety Administration, and has been calibrated within the three years prior to the date of the alleged violation by an independent certified laser or radar repair and testing or calibration facility.

(2) A "speed trap" is either of the following:

(A) A particular section of a highway measured as to distance and with boundaries marked, designated, or otherwise determined in order that the speed of a vehicle may be calculated by securing the time it takes the vehicle to travel the known distance.

(B) (i) A particular section of highway or state highway with a prima facie speed limit that is provided by this code or by local ordinance under paragraph (1) of subdivision (b) of Section 22352, or established under Section 22354, 22357, or 22358.3, if that prima facie speed limit is not justified by an engineering and traffic survey conducted within one of the following time periods, prior to the date of the alleged violation, and enforcement of the speed limit involves the use of radar or any other electronic device that measures the speed of moving objects:

(I) Except as specified in subclause (II), seven years.

(II) If an engineering and traffic survey was conducted more than seven years prior to the date of the alleged violation, and a registered engineer evaluates the section of the highway and determines that no significant changes in roadway or traffic conditions have occurred, including, but not limited to, changes in adjoining property or land use, roadway width, or traffic volume, 14 years.

(ii) This subparagraph does not apply to local street, road or school zone, senior zone, business activity district or speed limit adopted under Section 22358.7 or 22358.8. *(This section was modified by Assembly Bill 43 to add "senior zone, or business*

activity district" and became effective on January 1, 2022, and was then modified by Assembly Bill 1938, which became effective on January 1, 2023.)

Speed Trap Evidence

40803. (a) No evidence as to the speed of a vehicle upon a highway shall be admitted in any court upon the trial of any person in any prosecution under this code upon a charge involvingthe speed of a vehicle when the evidence is based upon or obtained from or by the maintenance or use of a speed trap

(b) In any prosecution under this code of a charge involving the speed of a vehicle, where enforcement involves the use of radar or other electronic devices which measure the speed of moving objects, the prosecution shall establish, as part of its prima facie case, that the evidence or testimony presented is not based upon a speed trap as defined in subdivision (b) of Section 40802.

(c)When a traffic and engineering survey is required pursuant to subdivision (b) of Section 40802, evidence that a traffic and engineering survey has been conducted within five years of the date of the alleged violation or evidence that the offense was committed on a local street or road as defined in subdivision (b) of Section 40802 shall constitute a prima facie case that the evidence or testimony is not based upon a speed trap as defined in subdivision (b) 40802.

Engineering and Traffic Survey

627. (a) "Engineering and traffic survey" as used in this Code, means a survey of highway and traffic conditions in accordance with methods determined by the Department of Transportation for use by the state and local authorities.

(b) An engineering and traffic survey shall include, among other requirements deemed necessary by the department, consideration of all the following

(1) Prevailing speeds as determined by traffic engineering measurements.

(2) Collision records.

(3) Highway, traffic, and roadside conditions not readily apparent to the driver.

(c) When conducting an engineering and traffic survey, local authorities, in addition to the factors set forth in paragraphs (1) to (3), inclusive, of subdivision (b) may consider all of the following:

(1) Residential density, if any of the following conditions exist on the particular portionof highway and the property contiguous thereto, other than a business district:

(A) Upon one side of the highway, within a distance of a quarter of a mile, the contiguous property fronting thereon is occupied by 13 or more separate dwelling houses or business structures.

(B) Upon both sides of the highway, collectively, within a distance of a quarter of a mile, the contiguous property fronting thereon is occupied by 16 or more separate dwelling houses or business structures.

(C) The portion of highway is longer than one-quarter of a mile but has the ratio of

separate dwelling houses or business structures to the length of the highway described in either subparagraph (A) or (B).

(2) Safety of bicyclists and pedestrians, with increased consideration for vulnerable pedestrian groups including children, seniors, persons with disabilities, users of personal assistive mobility devices, and the unhoused. *(This section was modified by Assembly Bill 43 to add the increased consideration for vulnerable pedestrian groups, and became effective on January 1, 2022.)*

Business District

235. A "business district: is that portion of a highway and the property contiguous thereto (a) upon one side of which highway, for a distance of 600 feet, 50 percent of more of the contiguous property fronting thereon is occupied by buildings in use for business, or (b) upon both sided of which highway, collectively, for a distance of 300 feet, 50 percent or more of the contiguous property fronting thereon is so occupied. A business district may be longer than the distance specified in this section if the above ratio of buildings in use for business to the length of the highway exists.

Residence District

515. A "residence district" is that portion of a highway and the property contiguous thereto, other than a business district, (a) upon one side of which highway, within a distance of a quarter of a mile, the contiguous property fronting thereon is occupied by 13 or more separate dwelling houses or business structures, or (b) upon both sided of which highway, collectively, within a distance of a quarter of a mile, the contiguous property fronting thereonis occupied by 16 or more separate dwelling housed or business structures. A residence district may be longer than one quarter of a mile if the above ratio of separate dwelling houses or business structures to the length of the highway exists.

Business and Residence District: Determination

240. In determining whether a highway is within a business or residence district, the following limitations shall apply and shall qualify the definitions Section 235 and 515:

(a) No building shall be counted unless its entrance faces the highway and the front of the building is within 75 feet of the roadway.

(b) Where a highway is physically divided into two or more roadways, only those buildingsfacing each roadway separately shall be counted for the purpose of determining whetherthe roadway is within a district.

(c) All churches, apartments, hotels, multiple dwelling houses, clubs and public buildings, other than schools, shall be deemed to be business structures.

(d) A highway or portion of a highway shall not be deemed to be within a district regardlessof the number of buildings upon the contiguous property if there is no right of access tothe highway by vehicles from the contiguous property.

Maximum Speed Limit

22349. Except as provided in Section 22356, no person shall drive a vehicle upon a highway at a speed greater than 65 miles per hour.

Basic Speed Law

22350. No person shall drive a vehicle upon a highway at a speed greater than is reasonable or prudent having due regard for weather, visibility, the traffic on, and surface and width of, the highway, and in no event at a speed which endangers the safety of persons or property.

Speed Law Violations

22351. (a) The speed of any vehicle upon a highway not in excess of the limits specified in Section 22352 or established as authorized in this code is lawful unless clearly proved to be in violation of the basic speed law.

(b) The speed of any vehicle upon a highway in excess of the prima facie speed limits in Section 22352 or established as authorized in this code is prima facie unlawful unless the defendant establishes by competent evidence that the speed in excess of said limits did not constitute a violation of the basic speed law at the time, place and under the conditions then existing.

Prima Facie Speed Limits

22352. The prima facie limits are as follows and shall be applicable unless changed asauthorized in this code and, if so changed, only when signs have been erected giving notice thereof:

(a) Fifteen miles per hour:

1) When traversing a railway grade crossing, if during the last 100 feet of the approach to the crossing the driver does not have a clear and unobstructed view of the crossing and of any traffic on the railway for a distance of 400 feet in both directions along such railway. This subdivision does not apply in the case of any railway grade crossing where a human flagperson is on duty or a clearly visible electrical or mechanical railway crossing signal device is installed but does not then indicate the immediate approach of a railway train or car.

2) When traversing any intersection of highways if during the last 100 feet of the driver's approach to the intersection the driver does not have a clear and unobstructed viewof the intersection and of any traffic upon all of the highways entering the intersection for a distance of 100 feet along all those highways, except at an intersection protected by stop signs or yield right-of-way signs or controlled by official traffic control signals.

3) On any alley.

(b) Twenty-five miles per hour:

1) On any highway, in any business or residence district unless a different speed is determined by local authority or the Department of Transportation under procedures set forthin this code.

2) When approaching or passing a school building or the grounds thereof, contiguous to a highway and posted with a standard "SCHOOL" warning sign, while children are going to or leaving the school either during school hours or during the noon recess period. The prima facie limit shall also apply when approaching or passing any school grounds which arenot separated from the highway by a fence, gate, or other physical barrier while thegrounds are in use by children and the highway is posted with a standard "SCHOOL" warning sign. For the purposes of this subparagraph, standard "SCHOOL" warning signs may be placed at any distance up to 500 feet away from school grounds.

3) When passing a senior center or other facility primarily used by senior citizens, contiguous to a street other than a state highway and posted with a standard "SENIOR" warning sign. A local authority may erect a sign pursuant to this paragraph when the local agency makes a determination that the proposed signing should be implemented. A local authority may request grant funding from the Active Transporatation Program pursuant to Chapter 8 (commencing with Section 2380) of Division 3 of the Streets and Highways Code, or any other grant funding available to it, and use that grant funding to pay for the erection of those signs, or may utilize any other funds available to it to pay for the erection of those signs, including, but not limited to, donations from private sources.

(This section was modified by Assembly Bill 43 to add the grant funding, and became effective on January 1, 2022.)

State Highways within Local Jurisdictions

22354. (a) Whenever the Department of Transportation determines upon the basis of an engineering and traffic survey that the limit of 65 miles per hour is more than is reasonable or safe upon any portion of a state highway where the limit of 65 miles is applicable, the department may determine and declare a prima facie speed limit of 60, 55, 50, 45, 40, 35, 30, 25, 20, or 15 miles per hour, whichever is found most appropriate to facilitate the orderly movement of traffic and is reasonable and safe, which declared prima facie speed limit shall be effective when appropriate signs giving notice thereof are erected upon the highway.

(b) This section shall become operative on the date specified in subdivision (c) of Section 22366.

(This section was modified by Assembly Bill 43 and became effective on January 1, 2022.)

22354.5 (a) Whenever the Department of Transportation determines, upon the basis of an engineering and traffic survey, to increase or decrease the existing speed limit on a particular

portion of a state highway pursuant to Section 22354, it shall, prior to increasing or decreasing that speed limit, consult with, and take into consideration the recommendations of, the Department of the California Highway Patrol.

(b) The city council or board of supervisors of a city or county through which any portion of a state highway subject to subdivision (a) extends may conduct a public hearing on the proposed increase or decrease at a convenient location as near as possible to that portion of state highway. The Department of Transportation shall take into consideration the results of the public hearing in determining whether to increase or decrease the speed limit.

Boundary Line Streets

22359. With respect to boundary line streets and highways where portions thereof are within different jurisdictions, no ordinance adopted under Sections 22357 and 22358 shall be effective as to any such portion until all authorities having jurisdiction of the portions of the street concerned have approved the same. This section shall not apply in the case of boundary line streets consisting of separate roadways within different jurisdictions.

Multiple-Lane Highways

22361. On multiple-lane highways with two or more separate roadways, different prima facie speed limits may be established for different roadways under any of the procedures specified in Sections 22354 to 22359, inclusive.

APPENDIX B

Speed Zoning Regulations from
Caltrans California *Manual on Uniform Traffic Control Devices*
And Definitions of Terms

(Updated April 2025)

California Manual on Uniform Traffic Control Devices[1]
(Regarding Speed Limits)
(Updated April 2025)

Section 2B.13 Speed Limit Sign (R2-1)

Support:

00 The setting of speed limits can be controversial and requires a rational and defensible determination to maintain public confidence. Speed limits are normally set near the 85th-percentile speed that statistically represents one standard deviation above the average speed and establishes the upper limit of what is considered reasonable and prudent. As with most laws, speed limits need to depend on the voluntary compliance of the greater majority of motorists. Speed limits cannot be set arbitrarily low, as this would create violators of the majority of drivers and would not command the respect of the public. Artificially low speed limits can lead to poor compliance as well as large variations in speed within the traffic stream. Increased speed variance can also create more conflicts and passing maneuvers.

00a The most effective way to reduce speeds is through a combination of strategies using traffic control devices related to speed management, roadway design and engineering solutions, traffic calming techniques and measures, public education, and enforcement efforts. Effectively managing road user speed relies on numerous factors, which include enforcement, roadway characteristics, surrounding environment, adjacent land use, and traffic control devices. Many studies find that engineering changes, such as change a road's infrastructure, are one of the most important factors in reducing vehicle operating speeds. Engineering changes are also one of the most effective interventions at reducing pedestrian injury and fatality rates. Potential street engineering changes, such as curb extensions, median islands, raised crosswalks, roundabouts, and speed bumps or speed humps, naturally result in lower speeds. It is realized that these engineering changes can be costly and time-consuming to implement.

Standard:

01 Speed zones (other than statutory speed limits) shall only be established on the basis of an engineering and traffic survey (E&TS) ~~study~~ that has been performed in accordance with traffic engineering practices. The engineering study shall include an analysis of the current speed distribution of free-flowing vehicles.

02 The Speed Limit (R2-1) sign (see Figure 2B-3) shall display the limit established by law, ordinance, regulation, or as adopted by the authorized agency based on the engineering study. The speed limits displayed shall be in multiples of 5 mph.

03 Speed Limit (R2-1) signs, indicating speed limits for which posting is required by law, shall be located at the points of change from one speed limit to another.

04 At the downstream end of the section to which a speed limit applies, a Speed Limit sign showing the next speed limit shall be installed. Additional Speed Limit signs shall be installed beyond major intersections and at other locations where it is necessary to remind road users of the speed limit that is applicable.

05 Speed Limit signs indicating the statutory speed limits shall be installed at entrances to the State and, where appropriate, at jurisdictional boundaries in urban areas.

Support:

06 In general, the maximum speed limits applicable to rural and urban roads are established:

A. Statutorily – a maximum speed limit applicable to a particular class of road, such as freeways or city streets, that is established by State law; or

B. As altered speed zones – based on engineering studies.

07 State statutory limits might restrict the maximum speed limit that can be established on a

particular road, notwithstanding what an engineering study might indicate.

Option:

08 ~~If a jurisdiction has a policy of installing Speed Limit signs in accordance with statutory requirements only on the streets that enter a city, neighborhood, or residential area to indicate the speed limit that is applicable to the entire city, neighborhood, or residential area unless otherwise posted, a CITYWIDE (R2-5aP), NEIGHBORHOOD (R2-5bP), or RESIDENTIAL (R2-5cP) plaque may be mounted above the Speed Limit sign and an UNLESS OTHERWISE POSTED (R2-5P) plaque may be mounted below the Speed Limit sign (see Figure 2B-3).~~

Guidance:

09 A Reduced Speed Limit Ahead (W3-5 or W3-5a) sign (see Section 2C.38) should be used to inform road users of a reduced speed zone where the speed limit is being reduced by more than 10 mph, or where engineering judgment indicates the need for advance notice to comply with the posted speed limit ahead.

10 States and local agencies should conduct engineering studies at least once every 5, 7 or 14 years, in compliance with CVC Section 40802 to reevaluate non-statutory speed limits on segments of their roadways that have undergone significant changes since the last review, such as the addition or elimination of parking or driveways, changes in the number of travel lanes, changes in the configuration of bicycle lanes, changes in traffic control signal coordination, or significant changes in traffic volumes.

11 No more than three speed limits should be displayed on any one Speed Limit sign or assembly.

~~*12 When a speed limit within a speed zone is posted, it should be within 5 mph of the 85th- percentile speed of free-flowing traffic.*~~

CVC Section 22358.6 – 85th-Percentile, Rounding, 5 mph Increment, 5 mph speed reduction and Maximum Speed Reduction

Standard:

12a **When a speed limit is to be posted, it shall be established at the nearest 5 mph increment of the 85th-percentile speed of free-flowing traffic, except as shown in the two Options below for rounding down and using 5 mph speed reduction (CVC Section 22358.6(b)), or rounding up (CVC Section 22358.6(c)), or if using additional 5 mph speed reduction on local agency roadways for safety corridor designation (CVC Section 22358.7(a)(1)) or adjacent to land or facility generating high concentrations of bicyclists and pedestrians (CVC Section 22358.7(a)(2)).**

Option:

1. For cases in which the nearest 5 mph increment of the 85th-percentile speed would require a rounding down, the posted speed may be reduced by 5 mph from the nearest 5 mph increment of the 85th-percentile speed, in compliance with CVC Sections 627 and 22358.5. CVC Sections 22353, 22353.2, 22353.3, 22353.4, and 22353.5, may also be considered, if applicable. See Standard below for documentation requirements. Refer to CVC Section 22358.6(b).
2. For cases in which the nearest 5 mph increment of the 85th-percentile speed would require a rounding up, then the speed limit may be rounded down to the nearest 5 mph increment below the 85th percentile speed, if no further reduction is used. Refer to CVC Section 21400(f). Refer to CVC Section 22358.6(c).
3.

Standard:

12b **If the speed limit to be posted has had the 5 mph reduction applied, then an E&TS shall document in writing the conditions and justification for the lower speed limit and be approved by a registered Civil or Traffic Engineer. The reasons for the lower speed limit shall be in compliance with CVC Sections 627 and 22358.5. Refer to Section 22358.6(b).**

12c **The total reduction in the speed limit using the nearest 5 mph increment (CVC Section 22358.6(a)), rounding up (CVC Section 22358.6(c)), rounding down and using 5 mph speed reduction (CVC**

Section22358.6(b)), additional 5 mph speed reduction for safety corridor designation (CVC Section 22358.7(a)(1)) or adjacent to land or facility generating high concentrations of bicyclists and pedestrians (CVC Section 22358.7(a)(2)), this speed reduction shall not exceed 12.4 mph from the 85th-percentile speed. Refer to CVC Section 22358.6(e).

Support:

12d Refer to Tables 2B-103(CA) and 2B-104(CA), which provides examples of 85th-percentile speed values and the application of the speed limit policies and criteria applicable per CVC 22358.6 and 22358.7.

~~12c The following examples are provided to explain the application of these speed limit criteria:~~

~~Example 1. Using Option 1 above and first step is to round down: If the 85th percentile speed in a speed survey for a location was 37 mph, then the speed limit would be established at 35 mph since it is the closest 5 mph increment to the 37 mph speed. As indicated by the option, this 35 mph established speed limit could be reduced by 5 mph to 30 mph if the conditions and justification for using this lower speed limit are documented in the E&TS and approved by a registered Civil or Traffic Engineer.~~

~~Example 2. Using Option 1 above and first step is to round up: If the 85th percentile speed in a speed survey for a location was 33 mph, then the speed limit would be established at 35 mph since it is the closest 5 mph increment to the 33 mph speed. As indicated by the option, this 35 mph speed limit could be reduced by 5 mph to 30 mph if the conditions and justification for using this lower speed limit are documented in the E&TS and approved by a registered Civil or Traffic Engineer.~~

~~Example 3. Using Option 2 above and first step is to round up: If the 85th percentile speed in a speed survey for a location was 33 mph, instead of rounding up to 35mph, the speed limit can be established at 30mph, but no further reductions can be applied (which is allowed in the two examples above).~~

~~**Standard:**~~

~~12d **Examples 1 and 2 for establishing posted speed limits shall apply to engineering and traffic surveys (E&TS) performed on or after July 1, 2009 in accordance with the Department's Traffic Operations Policy Directive Number 09-04 dated June 29, 2009.**~~

~~Option:~~

~~12e After January 1, 2012, Example 3 may be used to establish speed limits. Refer to CVC 21400(f).~~

~~Support:~~

12e Any existing E&TS that was performed before January 1, 2022 in accordance with previous traffic control device standards is not required to be updated until it is due for reevaluation per the 5, 7 or 14 year criteria.

CVC Sections 22358.7, 22358.8 and 22358.9 – Applicability on State Highway System & Local Agency Roadways

Standard:

12f CVC Sections 22358.7, 22358.8 and 22358.9 and their related policies shall not be applicable to roadways on the State Highway System.

Support:

12g CVC Sections 22358.7, 22358.8 and 22358.9 and their related policies are applicable on local agency roadways.

12h CVC Sections 22358.7, 22358.8 and 22358.9 and their related policies are also applicable on any privately owned and maintained roads or commercial establishments, if the private road or private property has been subjected to the CVC application by the private property owner or a particular city or county enacts an ordinance or resolution to this effect. Refer to CVC Sections 21100, 21100.1, 21107, 21107.5, 21107.6, and 21107.7.

Standard:

12i **The additional 5 mph speed reduction allowed by CVC Section 22358.7 on designated safety corridors or on portions of highway adjacent to any land or facility that generates high concentrations of bicyclists or pedestrians, shall not be applicable on any roadway segment that is on the State**

Highway System

12j **The option allowed by CVC Section 22358.8 to retain the currently adopted speed limit or restore the immediately prior adopted speed limit, shall not be applicable on any roadway segment that is on the State Highway System.**

12k **Declaring prima facie speed limits of 25 mph or 20 mph on a highway contiguous to a business activity district allowed by CVC Section 22358.9 shall not be applicable on any roadway segment that is on the State Highway System.**

CVC Section 22358.7 – Safety corridor and Land or Facilities Generating High Concentrations of Bicyclists and Pedestrians

Standard:

12l **Additional lowering of the speed limits from those calculated using rounding (up or down) per CVC Section 22358.6(b) and 22358.6(c) and 5 mph speed reduction using CVC Section 22358.6(b), as included in paragraph 12a, and Options #1 and #2 processes, is prohibited, except for the local agency roadway segments designated as "safety corridor" or "land or facilities that generate high concentrations of bicyclists and pedestrians" in compliance with CVC Sections 22358.6(d) and 22358.7.**

Option:

12m Local agencies may additionally lower the speed limits by 5 mph from those calculated using rounding (up or down) per CVC Section 22358.6(b) and 22358.6(c) and 5 mph speed reduction using CVC Section 22358.6(b) if, after completing an E&TS, find that the speed limit is still more than is reasonable or safe, for either of the following reasons:

1. The portion of a highway has been designated as a safety corridor.
2. The portion of highway is adjacent to any land or facility that generates high concentrations of bicyclists or pedestrians, especially those from vulnerable groups such as children, seniors, persons with disabilities, and the unhoused.

CVC Section 22358.7(a)(1) – "Safety Corridor" Definition

Standard:

12n A safety corridor shall be defined as a roadway segment within an overall roadway network where the highest number of serious injury and fatality crashes occur.

12o One or more of the required crash weighting factors listed in the Table 2B-105(CA) shall be used to prioritize the locations of fatal and serious injury crashes in developing the "Safety Corridor".

Option:

12p Data used to determine a safety corridor may be from the most recent Engineering and Traffic Survey (E&TS) performed. The crash data source may include, but is not limited to, California Highway Patrol's (CHP) Statewide Integrated Traffic Records System (SWITRS).

Standard:

12q **The prioritized subset of safety corridors shall:**

1. **Identify specific locations with high crash occurrences.**
2. **Identify corridor-level segments with a pattern of crash reoccurrence.**
3. **Be able to be stratified by mode.**

12r **Safety corridors shall represent a prioritized subset of the overall roadway network within an authority's responsibilities and shall not exceed one-fifth of the overall roadway network.**

Guidance:

12s *A jurisdiction should use three to five years of the most recent crash data to determine a safety corridor based on Fatal and Serious Injury data.*

Option:

12t For crash coverage, safety corridors may identify the subset of the overall roadway network where a minimum of 25% of the Fatal + Serious Injury (F+SI) crashes occur. 12u To identify logical termini, the geographic extent of a safety corridor may be determined by non-engineering staff.

Standard:

12v **A licensed professional engineer shall sign off on logical termini identified for a safety corridor using existing E&TS.**

Option:

12w Crash/Volume rate may be used to provide additional locations to be included in the safety corridor. Local agencies may use proactive measures as indicators.

CVC Section 22358.7(a)(2) – "Land or facility that generates high concentrations of bicyclists or pedestrians" definition Standard:

12x **Except for the Option in first paragraph below, a land or facility that generates high concentrations of bicyclists or pedestrians shall be defined as the portion of the highway where one or more of any of the generators listed in Table 2B-106(CA) are present within a distance of 1320 feet.**

Option:

12y Crash data that demonstrates a highway segment is within the top twenty percent of pedestrian and/or bicyclist fatalities or serious injuries over a three-to-five-year period may be used in lieu of one of the generators listed in Table 2B-106(CA).

Option:

12z Crash data that demonstrates a highway segment is within the top twenty percent of pedestrian and/or bicyclist fatalities or serious injuries over a three-to-five-year period may be used in lieu of one of the generators listed in Table 2B-106(CA).

Standard:

12aa A highway segment shall be defined as the portion of the highway where a location that meets the aforementioned criteria is present within a distance of 1320 feet. Option:

12ab A highway segment may be longer than 1320 feet provided that a minimum of one location within the top twenty percent of fatal and serious injury pedestrian and/or bicyclist crashes within a three-to-five-year period is present for every 1320 feet. Standard:

12ac The top twenty percent of pedestrian and/or bicyclist fatalities or serious injury crashes within a three to five year period shall be based on the geographic area within the jurisdiction of the Engineer performing the E&TS.

Option:

12ad A high concentration of pedestrians and bicyclists may be longer than 1320 feet provided that a minimum of one generator is present for every 1320 feet.

12ae Data used to determine high concentration locations may be obtained from the most recently performed Engineering and Traffic Survey (E&TS). Standard:

12af The provisions of CVC Section 22358.7 to additionally lower the speed limit (by designating safety corridor or on portion of highway is adjacent to any land or facility that generates high concentrations of bicyclists or pedestrians), shall not be applicable until actions required per CVC Section 22358.7 by Department of Transportation and Judicial Council are completed or June 30, 2024, whichever is sooner.

CVC Section 22358.8 (Retain currently adopted or restore immediately prior speed limit)

Option:

12ag Local agency may retain the currently adopted speed limit without further reduction or restore the immediately prior adopted speed limit without further reduction as provided in CVC Section 22358.8.

Standard:

12ah Currently adopted speed limit or immediately prior adopted speed limit shall only be retained, by ordinance, if after completing an E&TS, local agency finds that the speed limit is still more than reasonable or safe, and that speed limit was established with an E&TS and if a registered engineer has evaluated the section of highway and determined that no additional general purpose lanes have been added to the roadway since completion of the traffic survey that established the prior speed limit.

12ai If local agency decides to use lower speed limit based on CVC Section 22358.8, after completing an E&TS and finding that the speed limit is still more than is reasonable or safe, it shall not be reduced by any more than 5 mph from the currently adopted speed limit nor below the immediately prior speed limit. Refer to CVC Section 22358.8(b).

CVC Section 22358.9 – Business Activity District

Option:

12aj A local authority may, by ordinance, determine and declare a 25 or 20 mph prima facie speed limit on a highway contiguous to a business activity district when posted with a sign that indicates a speed limit of 25 or 20 mph if the highway segment meets all of the following conditions:

1. A maximum of four traffic lanes.
2. A maximum posted 30 mph prima facie speed limit immediately prior to and after the business activity district, if establishing a 25 mph speed limit.
3. A maximum posted 25 mph prima facie speed limit immediately prior to and after the business activity district, if establishing a 20 mph speed limit.

12ak A "business activity district" is that portion of a highway and the property contiguous thereto that includes central or neighborhood downtowns, urban villages, or zoning designations that prioritize commercial land uses at the downtown or neighborhood scale and meets a least three of the following four requirements:

4. No less than 50 percent of the contiguous property fronting the highway consists of retail or dining commercial uses, including outdoor dining, that open directly onto sidewalks adjacent to the highway.
5. Parking, including parallel, diagonal, or perpendicular spaces located alongside the highway.
6. Traffic control signals or stop signs regulating traffic flow on the highway, located at intervals of no more than 600 feet. 7. Marked crosswalks not controlled by a traffic control device.

Standard:

12al A local authority shall not declare a prima facie speed limit on a portion of a highway where the local authority has already lowered the speed limit as permitted for designated safety corridors (CV Section 22358.7) or using the land or facility adjacent to high concentration of pedestrians and bicyclists (CVC Section 22358.7) or retained the currently adopted speed limit (CVC Section 22358.8) or have restored the immediately prior adopted speed limit (CVC Section 22358.8). Refer to CVC Section 22358.9(c).

13 Speed studies for signalized intersection approaches should be taken outside the influence areaof the traffic control signal, which is generally considered to be approximately 1/2 mile, to avoid obtaining skewed results for the 85th-percentile speed.

Support:

14 Advance warning signs and other traffic control devices to attract the motorist's attention to asignalized intersection are usually more effective than a reduced speed limit zone.

Guidance:

15 An advisory speed plaque (see Section 2C.08) mounted below a warning sign should be used to warn road users of an advisory speed for a roadway condition. A Speed Limit sign should not be used for this situation.

Option:

16 Other factors that may be considered when establishing or reevaluating speed limits are the following:

A. Road characteristics, shoulder condition, grade, alignment, and sight distance;
B. The pace;
C. Roadside development and environment;
D. Parking practices and pedestrian activity; and
E. Reported crash experience for at least a 12-month period.

17 Two types of Speed Limit signs may be used: one to designate passenger car speeds, including any nighttime information or minimum speed limit that might apply; and the other to show any special speed limits for trucks and other vehicles.

18 A changeable message sign that changes the speed limit for traffic and ambient conditions may be installed provided that the appropriate speed limit is displayed at the proper times.

19 A changeable message sign that displays to approaching drivers the speed at which they are

traveling may be installed in conjunction with a Speed Limit sign.

Guidance:

20 If a changeable message sign displaying approach speeds is installed, the legend YOUR SPEED XX MPH or such similar legend should be displayed. The color of the changeable message legend should be a yellow legend on a black background or the reverse of these colors.

Support:

21 Advisory Speed signs and plaques are discussed in Sections 2C.08 and 2C.14. Temporary TrafficControl Zone Speed signs are discussed in Part 6. The WORK ZONE (G20-5aP) plaque intended for installation above a Speed Limit sign is discussed in Section 6F.12. School Speed Limit signs are discussed in Section 7B.15.

22 Speed limits in California are governed by the California Vehicle Code (CVC), Sections 22348 through 22413; also, pertinent sections are found in Sections 627 and 40802 and others referenced in this section. See Section 1A.11 for information regarding this publication.

23 Refer to Part 6, Section 6C.01 for speed limit signs in temporary traffic control zones. Refer to Part 7 for speed limit signs in school areas.

Engineering and Traffic Survey (E&TS)

Support:

24 CVC Section 627 defines the term "Engineering and traffic survey" and lists its requirements.

Standard:

25 An engineering and traffic survey (E&TS) shall include, among other requirements deemed necessary by the department, consideration of all of the following:

A. Prevailing speeds as determined by traffic engineering measurements.

B. Collision records.

C. Highway, traffic, and roadside conditions not readily apparent to the driver.

Guidance:

26 The E&TS should contain sufficient information to document that the required three items of CVC Section 627 are provided and that other conditions not readily apparent to a driver are properly identified.

27 Prevailing speeds are determined by a speed zone survey. A speed zone survey should include:

A. The intent of the speed measurements is to determine the actual speed of unimpeded traffic. The speed of traffic should not be altered by concentrated law enforcement, or other means, just prior to, or while taking the speed measurements.

B. Only one person is required for the field work. Speeds should be read directly from a radar or other electronic speed measuring devices; or,

C. Devices, other than radar, capable of accurately distinguishing and measuring the unimpeded speed of free flowing vehicles may be used.

D. A location should be selected where prevailing speeds are representative of the entire speed zone section. If speeds vary on a given route, more than one speed zone section may be required, with separate measurements for each section. Locations for measurements should be chosen so as to minimize the effects of traffic signals or stop signs.

E. Speed measurements should be taken during off-peak hours between peak traffic periods on weekdays. If there is difficulty in obtaining the desired quantity, speed measurements may be taken during any period with free flowing traffic.

F. The weather should be fair (dry pavement) with no unusual conditions prevailing.

G. The surveyor and equipment should not affect the traffic speeds. For this reason, an unmarked car is recommended, and the radar speed meter located as inconspicuously as possible.

H. In order for the sample to be representative of the actual traffic flow, the minimum sample should be 100

vehicles in each survey. In no case should the sample contain less than 50 vehicles.

I. Short speed zones of less than 0.5 mile should be avoided, except in transition areas.

J. Speed zone changes should be coordinated with changes in roadway conditions or roadside development.

K. Speed zoning should be in 10 mph increments except in urban areas where 5 mph increments are preferable.

L. Speed zoning should be coordinated with adjacent jurisdictions.

Support:

28 Physical conditions such as width, curvature, grade and surface conditions, or any other condition readily apparent to the driver, in the absence of other factors, would not require special downward speed zoning. Refer to CVC 22358.5.

Option:

29 When qualifying an appropriate speed limit, local authorities may also consider all of the following findings:

A. Residential density, if any of the following conditions exist on the particular portion of highway and the property contiguous thereto, other than a business district:

1. Upon one side of the highway, within 0.25 mile, the contiguous property fronting thereon is occupied by 13 or more separate dwelling houses or business structures.
2. Upon both sides of the highway, collectively, within a distance of 0.25 mile the contiguous property fronting thereon is occupied by 16 or more separate dwelling houses or business structures.
3. The portion of highway is larger than 0.25 mile but has the ratio of separate dwelling houses or business structures to the length of the highway described in either subparagraph a or b.

B. Safety of bicyclists and pedestrians, with increased consideration for vulnerable pedestrian groups including children, seniors, persons with disabilities, users of personal assistive mobility devices, and the unhoused.

30 The following two methods of conducting E&TS may be used to establish speed limits:

1. State Highways - The E&TS for State highways is made under the direction of the Department of Transportation's District Traffic Engineer. The data includes:
   a. One copy of the Example of Speed Zone Survey Sheet (See Figure 2B-101(CA)) showing:
      - A north arrow
      - Engineer's station or post mileage
      - Limits of the proposed zones
      - Appropriate notations showing type of roadside development, such as "scattered business," "solid residential," etc. Schools adjacent to the highway are shown, but other buildings need not be plotted unless they are a factor in the speed recommendation or the point of termination of a speed zone.
      - Collision rates for the zones involved
      - Average daily traffic volume
      - Location of traffic signals, signs and markings
      - If the highway is divided, the limits of zones for each direction of travel
      - Plotted 85th percentile and pace speeds at location taken showing speed profile
   b. A report to the District Director that includes:
      - The reason for the initiation of speed zone survey.
      - Recommendations and supporting reasons.
      - The enforcement jurisdictions involved and the recommendations and opinions of those officials.
      - The stationing or reference post in mileage at the beginning and ending of each proposed zone and any intermediate equations. Location ties must be given to readily identifiable physical features.
2. City and County Through Highways, Arterials, Collector Roads and Local Streets.
   a. The short method of speed zoning is based on the premise that a reasonable speed limit is one that

conforms to the actual behavior of the majority of motorists, and that by measuring motorists' speeds, one will be able to select a speed limit that is both reasonable and effective. Other factors that need to be considered include but are not limited to: the most recent two-year collision record, roadway design speed, safe stopping sight distance, superelevation, shoulder conditions, profile conditions, intersection spacing and offsets, commercial driveway characteristics, and pedestrian traffic in the roadway without sidewalks.

b. Determination of Existing Speed Limits - Figures 2B-103(CA) & 2B-104(CA) show examples of data sheets which may be used to record speed observations. Specific types of vehicles may be tallied by use of letter symbols in appropriate squares.

31 In most situations, the short form for local streets and roads will be adequate; however, the procedure used on State highways may be used at the option of the local agency.

32 Any agency may lower the speed limit below the prima facie speed limit after performing, and based on the results of an E&TS.

Guidance:

33 The establishment of a speed limit of more than 5 mph below the 85th percentile speed should be done with great care as studies have shown that establishing a speed limit at less than the 85th percentile generally results in an increase in collision rates; in addition, this may make violators of a disproportionate number of the reasonable majority of drivers.

Support:

34 Generally, the most decisive evidence of conditions not readily apparent to the driver surface in collision histories.

35 Speed limits are established at or near the 85th percentile speed, which is defined as that speed at or below which 85th percent of the traffic is moving. The 85th percentile speed is often referred to as the critical speed. Pace speed is defined as the 10 mph increment of speed containing the largest number of vehicles (See Figure 2B-102(CA)). The lower limit of the pace is plotted on the Speed Zone Survey Sheets as an aid in determining the proper zone limits. Speed limits higher than the 85th percentile are not generally considered reasonable and prudent. Speed limits below the 85th percentile do not ordinarily facilitate the orderly movement of traffic and require constant enforcement to maintain compliance. Speed limits established on the basis of the 85th percentile conform to the consensus of those who drive highways as to what speed is reasonable and prudent, and are not dependent on the judgment of one or a few individuals.

36 The majority of drivers comply with the basic speed law. Speed limits set at or near the 85th percentile speed provide law enforcement officers with a limit to cite drivers who will not conform to what the majority considers reasonable and prudent.

Further studies show that establishing a speed limit at less than the 85th percentile (Critical Speed) generally results in an increase in collision rates.

Option:

37 When roadside development results in traffic conflicts and unusual conditions which are not readily apparent to drivers, as indicated in collision records, speed limits somewhat below the 85th percentile may be justified. Concurrence and support of enforcement officials are necessary for the successful operation of a restricted speed zone.

Guidance:

38 Speed zones of less than 0.5 mile and short transition zones should be avoided.

Signs

Standard:

39 The Speed Limit (R2-1) sign shall be used to give notice of a prima facie or maximum speed limit except as provided under Prima Facie Speed Limits in CVC 22352.

40 When used, the TRUCKS, 3 AXLES OR MORE 55 MAXIMUM (R6-3(CA)) sign shall be installed

approximately 750 feet following each R2-1 sign.

41 **The ALL VEHICLES WHEN TOWING 55 MAXIMUM (R6-4(CA)) sign shall be installed approximately 750 feet following the R6-3(CA) sign.**

Guidance:

42 *The R6-3(CA) and R6-4(CA) signs should be placed on highway segments where speeds in excess of 55 mph are permitted.*

Option:

43 The existing AUTOS WITH TRAILERS, TRUCKS 55 MAXIMUM (R6-1(CA)) sign may remain in place until it is knocked down, damaged, stolen, vandalized, or otherwise reaches the end of its useful life.

44 The local California Highway Patrol office may be consulted to identify highway segments where enforcement is an issue.

On these segments early replacement of existing R6-1(CA) signs may be necessary.

Support:

45 Refer to CVC Section 22406 for types of vehicles subject to the 55 mph maximum speed limit.

Option:

46 The Speed Zone Ahead (R2-4(CA)) sign (see Figure 2B-3(CA)) may be used to inform the motorist of a reduced speed zone.

47 **The R2-4(CA) sign shall always be followed by a Speed Limit (R2-1) sign installed at the beginning of the zone where the reduced speed limit applies.**

48 **The End Speed Limit (R3(CA)) sign shall only be used to mark the end of a speed zone.**

49 **The R3(CA) sign shall not be used at a transition into a change in speed limits within a reduced zone.**

Option:

50 The R3(CA) sign (see Figure 2B-3(CA)) may be used with the TRUCK (M4-4) plaque to mark the end of truck speed zones on descending grades.

Standard:

51 **Speed limit signs shall be placed at the beginning of all restricted speed zones.**

Option:

52 Where speed zones are longer than 1 mile, intermediate signs may be placed at approximate 1 mile intervals. For three or more lanes in each direction, dual installation may be used.

Standard:

53 **The Speed Limit (R2-1) and End Speed Limit (R3(CA)) signs, as appropriate shall be placed at the end of all restricted speed zones**.

54 **Freeways with 65 mph and those segments where a speed limit of 70 mph has been approved by the Department of Transportation, with approval by the California Highway Patrol, shall be posted as follows:**

- **At the segment entrance, R2-1 signs shall be installed right of traffic off of the right shoulder.**
- **R2-1 signs shall also be installed off of the right shoulder only, throughout the segment, at a maximum of 25 mile intervals.**

Option:

- The 25 mile interval may be modified to include locations following entrance ramps.

Standard:

- **The R6-3(CA) sign (see Figure 2B-3(CA)) shall be installed approximately 750 feet following each R2-1 sign, both at the beginning and throughout each 60, 65 or 70 mph segment.**
- **The R6-4(CA) sign (see Figure 2B-3(CA)) shall be installed approximately 750 feet following each R6-3(CA) sign.**

Option:

- The SLOWER TRAFFIC KEEP RIGHT (R4-3) signs may be installed at locations where there is a tendency of the motorists to drive in the left-hand lane(s) below the normal speed of traffic.

Standard:

- **Signs shall be placed in protected locations.**
- **At the end of the 70/65 mph segment, R2-1 signs shall be installed off of the right shoulder.**

55 **Freeway segments where a 55 mph speed limit has been approved by the Department of Transportation, with the approval of the California Highway Patrol, shall be posted as follows:**

- **The beginning of the segment shall be posted with an R2-1 sign installed on the right shoulder and left shoulder where the median is of sufficient width to permit sign maintenance without lane closures.**

Guidance:

- *Subsequent signs should then be posted on the right shoulder, on approximate 3 mile intervals, with no more than 3 interchanges between signs.*
- *At the end of the segment, an R2-1 sign with the appropriate number for the next speed limit should be posted on the right shoulder.*

56 Conventional highways with 55 mph speed limits should be posted as follows:

- The beginning of the segment shall be posted with an R2-1 sign installed on the right shoulder.

Guidance:

- *Subsequent signs should then be posted on approximate 5 to 10 mile intervals and immediately after locations where significant volumes of traffic enter the segment.*
- *At the end of the segment, an R2-1 sign with the appropriate number for the next speed limit should be posted on the right shoulder.*

Conventional highways with 65 mph speed limits should be posted as follows:

- *The beginning of the segment should be posted with an R2-1 sign installed on the right shoulder.*
- *Subsequent signs should then be posted at 5 to 10 mile intervals and after locations where significant volumes of traffic enter the segment.*
- *At the end of the segment, an R2-1 sign with the appropriate number for the next speed limit should be posted on the right shoulder.*

Option:

57 Pavement markings with appropriate numerals (see Section 3B.21) may be used to supplement speed limit signs.

Standard:

58 **The R2-1 and R6-3(CA) and R6-4(CA) signs giving maximum statewide speed limits for various types of vehicles shall be installed on all State highways near the points of entrance into California.**

Guidance:

59 *The R2-1 and R6-3(CA) and R6-4(CA) signs should be placed in a location to be most effectively viewed by the approaching motorists.*

Standard:

60 **Speed Limit (R2-1) signs shall be installed throughout segments of freeway with posted speed limits of 65 mph or 70 mph at a maximum of 25 mile intervals.**

Option:

61 The 25 mile interval may be modified to include locations following entrance ramps.

Standard:

62 **Speed Limit (R2-1) signs shall be installed throughout segments of conventional highways with a posted speed limit of 65 mph at 5 mile to 10 mile intervals.**

63 **Speed Limit (R2-1) signs shall be installed throughout segments of freeway with a posted speed**

limit of 55 mph at approximately 3 mile intervals with no more than 3 interchanges between signs.

64 **Speed Limit (R2-1) signs shall be installed throughout segments of conventional highways with a posted speed limit of 55 mph at 5 mile to 10 mile intervals.**

Speed Enforced Signs

Option:

65 The SPEED ENFORCED BY RADAR (R48(CA)) sign (see Figure 2B-3(CA)) may be used where the California Highway Patrol has received authority to use radar and requests such signs.

Guidance:

66 *One sign should be used in each direction at the beginning of the segment of roadway, and at intervening major route intersections, where radar enforcement is in effect.*

Support:

67 The R48(CA) sign is a stand-alone sign intended to alert motorists that speed is enforced by radar on a particular segment of roadway.

Option:

68 The RADAR ENFORCED (R48-1(CA)) sign (see Figure 2B-3(CA)) may be used in combination with the Speed Limit (R2-1) sign on any roadway where law enforcement has the authority to use radar.

Guidance:

69 *When used, the R48-1(CA) sign should be placed below the R2-1 sign, at the beginning of the segment of roadway and at intervening major intersections, where radar enforcement is in effect.*

Option:

70 The SPEED ENFORCED BY AIRCRAFT (R48-2(CA)) sign (see Figure 2B-3(CA)) may be placed, when requested by the California Highway Patrol, on sections of highway regularly patrolled by aircraft.

Standard:

71 **The R48-2(CA) sign shall be used for both directions of travel.**

Guidance:

72 *The R48-2(CA) sign should be placed at the beginning of the section and spaced at 25 mile intervals. See Figure 3B-105(CA).*

Vehicle Speed Feedback Signs

Option:

73 A Vehicle Speed Feedback sign that displays to approaching drivers the speed at which they are traveling may be installed in conjunction with a Speed Limit (R2-1) sign.

Standard:

74 **If a Vehicle Speed Feedback sign displaying approach speeds is installed, the legend shall be YOUR SPEED XX. The numerals displaying the speed shall be white, yellow, yellow-green or amber color on black background. When activated, lights shall be steady-burn conforming to the provisions of CVC Sections 21466 and 21466.5. Vehicle Speed Feedback signs shall not alternatively be operated as variable speed limit signs.**

Guidance:

75 *To the degree practical, numerals for displaying approach speeds should be similar font and size as numerals on the corresponding Speed Limit (R2-1) sign.*

Option:

76 When used, the Vehicle Speed Feedback sign may be mounted on either a separate support or on the same support as the Speed Limit (R2-1) sign.

77 In lieu of lights, legend may be retroreflective film for flip-disk systems.

78 The legend YOUR SPEED may be white on black plaque located above the changeable speed display.

Support:

79 Driver comprehension may improve when the Vehicle Speed Feedback Sign is mounted on the same support below the Speed Limit (R2-1) sign.

80 Vehicle Speed Feedback Signs are appropriate for use with advisory speed signs and with temporary signs in temporary traffic control zones.

Basic Speed Law and Prima Facie Speed Limits – See CVC 22350 & 22352

Support:

81 The basic speed law states "No person shall drive a vehicle upon a highway at a speed greater than is reasonable or prudent having due regard for weather, visibility, the traffic on, and the surface and width of, the highway, and in no event at a speed which endangers the safety of persons or property."

Standard:

82 Prima facie speed limits are specific limits and shall apply unless changed based upon an engineering and traffic survey (E&TS) and signs are posted that display the new speed limit.

Option:

83 Prima facie speed limits may be preempted by the basic speed law, when roadway, traffic or weather conditions warrant a lower speed.

Use of Metric System Designations – See CVC 21351.3

Option:

84 Dual units for speed limits on signs may be placed on local streets and roads in both Metric and English units.

Guidance:

85 If used, dual unit speed limits should be rounded to the nearest 10 km/h for Metric and 5 mph for English units for posting on signs on local streets and roads.

Support:

86 Refer to AASHTO's Traffic Engineering Metric Conversion Factors. See Section 1A.11 for information regarding this publication.

Standard:

87 Metric speed limits shall not be placed on State highways. For use in this California MUTCD, 70 mph shall be shown as a metric equivalent of 110 km/h, neither of which shall be used on any local street or road.

Legal Authority for Establishing Speed Limits

Support:

88 Delegation of legal authority to set speed limits on State highways is given to Department of Transportation's District Directors. The District Director of each transportation district is authorized to issue orders regulating the speed of traffic, up to 65 mph on State highways. The Director of the Department of Transportation retains the authority to approve variable, minimum, and maximum speeds up to 70 mph on State freeways.

Standard:

89 The speed limits shown in Table 2B-101(CA) shall apply, unless changed upon the basis of an engineering and traffic survey (E&TS).

Option:

90 The speed limits shown in Table 2B-102(CA) may apply, unless changed upon E&TS.

Variable Speed Limits on Freeways - See CVC 22355

Option:

91 The following speed limits may apply:

a. Whenever the Department of Transportation determines based upon an engineering and traffic survey (E&TS) that the safe and orderly movement of traffic upon any freeway segment will be facilitated by the establishment of variable speed limits.

b. The Department may erect, regulate, and control signs upon the state highway which is a freeway, or any portion thereof, which, if used, signs shall be designed to permit display of different speeds at various times of the day or night.
c. Such signs need not conform to the standards & specifications per CVC 21400, but if used, shall be of sufficient size and clarity to give adequate notice of the applicable speed limit.

Minimum Speed Limits on State Highways - See CVC 22400

Option:

92 The following speed limits may apply:

a. Whenever the Department of Transportation determines based upon an engineering and traffic survey (E&TS) that slow speeds on any part of a state highway consistently impede the normal and reasonable movement of traffic, the Department may determine and declare a minimum speed limit. Appropriate signs giving notice shall then be installed on that segment.
b. A motorist can be cited for stopping or impeding the normal and reasonable movement of traffic unless the stop is necessary for safe operation and in compliance with the law.

Speed Traps

Support:

93 Refer to CVC 40802 for Speed Traps.

Standard:

94 A speed trap shall not apply to a local street, road, or school zone.

Support:

95 Senior zone is an area approaching or passing a senior center building or other facility primarily used by senior citizens, or the grounds thereof that is contiguous to a highway and on which is posted a standard "SENIOR" warning sign pursuant to CVC Section 22352.

96 Business activity district is a section of highway described in CVC Section 22358.9(b) in which a standard 25 mph or 20 mph speed limit sign has been posted pursuant to CVC Section 22358.9(a)(1).

Standard:

97 A section of highway shall be defined as a speed trap if the prima facie speed limit is not justified by an engineering and traffic survey (E&TS) within five years, and the enforcement of the speed limit involves the use of radar or any other electronic device that measures the speed of moving objects.

98 This time provision shall be extended to seven years when using radar and all of the following criteria are met:

- **The arresting officer has successfully completed a minimum of 24 hours of certified radar operator course training.**
- **The radar used to measure the speed meets or exceeds the minimal operational standards of the National Traffic Highway Safety Administration, and has been calibrated within three years of thealleged violation.**

99 This time provision shall be extended to seven years when using laser or other electronic device (other than radar) and all of the following criteria are met:

- **The arresting officer has successfully completed a minimum of 24 hours of certified radar operator course training.**
- **The arresting officer has successfully completed a minimum of 2 hours of additional approvedcertified training.**
- **The radar used to measure the speed meets or exceeds the minimal operational standards of theNational Traffic Highway Safety Administration, and has been calibrated within three years of thealleged violation.**

Option:

100 This time provision for an E&TS may be extended to ten years when all of the above conditions are

met and no significant changes in roadway or traffic conditions have occurred, including changes in adjoining property or land use, roadway width, or traffic volume as determined by a registered engineer.

Truck Speed Zone on Descending Grades

Guidance:

101 Highway descending grades, if used for posting TRUCK Speed Limit signs (R2-1 and M4-4) for trucks travelling downhill, should have recorded incident history of runaway commercial vehicles. Descending grades shorter than 1 mile should be avoided for posting signs because deceleration of vehicles due to braking actioncan generally provide sufficient control on descending grades of less than 1 mile.

Support:

102 To establish a downhill truck speed limit, a physical profile showing length and gradient and a downhill speed profile for three or more axle commercial vehicles with a gross rating of 10,000 lbs. or more will be provided.

Standard:

103 Speed profiles for truck speed limits shall be prepared on the same form as other speed surveys. An analysis of collisions involving trucks shall be prepared.

Guidance:

104 Posted speeds should be on the low side of the scale, generally within the pace of loaded commercial vehicles.

Standard:

105 If warranted, the Department of Transportation's District Director shall issue a standard speed zone order.

Support:

106 Posting of the regulation will be by placement of a standard 36 x 45 inch Speed Limit (R2-1) sign with a TRUCK (M4-4) plate above.

Standard:

107 A standard End Speed Limit (R3(CA)) sign with TRUCK (M4-4) plate shall be posted at the end of the truck zone when appropriate.

Speed Zones in Temporary Traffic Control Areas

Support:

108 For signing and establishing speed zones in temporary traffic control areas, refer to Section 6C.01 in Part

Speed Zones and Traffic Signals

Standard:

109 An agency changing the speed limits within its jurisdiction shall report the speed limit change to the agency operating and maintaining traffic signals within the speed zone no later than 30 days before changing the posted speed limit.

Support:

110 Changing the signal timing and adjusting the advance detector loops based on the revised speed limits can enhance the operations of the traffic signal.

[1] *Black text is consistent with the federal MUTCD, blue text is where the CA MUTCD differs from the federal MUTCD, green text was added to the CA MUTCD in compliance with AB 43 & AB 1938.*

Table 2B-101(CA). Standard Application of Speed Limits per California Vehicle Code

Speed	Determined by	Roadway Facility	CVC Section
15 mph	State or local authority	▪ Railroad grade crossing with obstructed view ▪ Uncontrolled highway intersection with obstructed view ▪ An alley	22352.a.1
15 & 20 mph	State or local authority	Where the prima facie speed of 25 mph is more than is reasonable or safe ▪ Narrow street not exceeding 25 feet other than a State Highway in a business or residential area or in a public park ▪ Road near a school or senior center facility	22358.3 & 22358.4
25 mph	State or local authority	▪ Any highway in any business or residential district ▪ A street contiguous to senior citizen facility other than a State highway ▪ Adjacent to a children's playground in a public park, but only during particular hours or days when children are expected to use facilities	22352.b & 22357.1

[1] *Black text is consistent with the federal MUTCD, blue text is where the CA MUTCD differs from the federal MUTCD, green text was added to the CA MUTCD in compliance with AB 43 & AB 1938.*

Table 2B-102(CA). Standard Application of Speed Limits per California Vehicle Code

Speed	Determined by	Roadway Facility	CVC Section
15 to 60 mph	Caltrans	State highway, based on an E&TS where ethe limit of 65 mph is more than reasonable or safe	22354
15 to 60 mph	Local city council or county board of supervisors for Caltrans	State highway, local entities may conduct a public hearing on proposed increases or decreases and the State Department of Transportation shall take into consideration the results of the public hearing	22354.5
30 to 65 mph	Local authority	Any street other than a State highway, by ordinance, may post a prima facie speed limit based on an E&TS where a speed > 25 mph would facilitate the orderly movement of vehicular traffic and would be reasonable and safe	22357
15 to 60 mph	Local authority	Any street other than a State highway, by ordinance, may post a prima facie speed limit based on an E&TS where the limit of 65 mph is more than is reasonable and safe	22358.8(a)
20 to 50 mph for Trucks	State or local authority	Highways under their respective jurisdiction where 55 mph is more than is reasonable or safe for vehicles mentioned in CVC 22406 (Trucks and other large vehicles)	22407
Maximum Speed 55 mph	State or local authority	▪ Two-lane, undivided highway ▪ Any highway if driving any of the following vehicles: a. Motortruck or truck tractor with > 3 axles b. Passenger vehicle or bus towing any other vehicle c. School bus transporting any school pupil d. A farm labor vehicle when transporting passengers e. A vehicle transporting explosives f. A trailer bus	22349.b & .c and 22406
Maximum Speed Limit of 65 mph	State or local authority	Any highway, posted at 65 mph based upon an E&TS, for vehicles not subject to CVC 22406	22349(a) & 22349
Maximum Freeway Speed Limit 70 mph	Caltrans	Freeways, after consultation with the California Highway Patrol, based upon an E&TS, or upon the basis of appropriate designs standards and projected traffic volumes in the case of newly constructed freeway segments, for vehicles not subject to CVC 22406	22356

[1] *Black text is consistent with the federal MUTCD, blue text is where the CA MUTCD differs from the federal MUTCD, green text was added to the CA MUTCD in compliance with AB 43 & AB 1938.*

Table 2B-103(CA). Examples showing applicability of rounding and additional speed reduction on State Highway System

85th-Percentile Speed (mph)	Rounding to nearest 5 mph increment (CVC 22358.6(a))	If rounding to nearest is up, may round down (CVC 22358.6(c))	If rounding to nearest is down, may additionally lower by 5 mph (CVC 22358.6(b))
47.5-50.0	50	45	N/A
45.1-47.4	45	N/A	40
42.5-45.0	45	40	N/A
40.1-42.4	40	N/A	35

Note – CVC Sections 22358.7, 22358.8 & 22358.9 are applicable to local agency roadways and public properties subjected to CVC, they are not applicable to the State Highway System. Refer to Section 2B.13 for more details.

Table 2B-104(CA). Examples showing applicability of rounding and additional speed reduction on Local Agency's Roadways & Private Property Subjected to CVC

85th-Percentile Speed (mph)	Rounding to nearest 5 mph increment (CVC 22358.6(a))	If rounding to nearest is up, may round down (CVC 22358.6(c))	If rounding to nearest is down, may additionally lower by 5 mph (CVC 22358.6(b))	If safety corridor or adjacent to high concentration of bicyclists & pedestrians, may additionally lower by 5 mph (CVC 22358.7)*
47.5-50.0	50	45	N/A	40
45.1-47.4	45	N/A	40	35
42.5-45.0	45	40	N/A	35
40.1-42.4	40	N/A	35	30

* Note – CVC Sections 22358.7, 22358.8 & 22358.9 are applicable to local agency roadways and private properties subjected to CVC, they are not applicable to the State Highway System. Refer to Section 2B.13 for more details.

[1] *Black text is consistent with the federal MUTCD, blue text is where the CA MUTCD differs from the federal MUTCD, green text was added to the CA MUTCD in compliance with AB 43 & AB 1938.*

Table 2B-105(CA). Safety Corridor Factors

Category	Factors
Crash Weighting Factors to Develop One Serious/Fatal Injury Safety Corridor	▪ Crash severity: Fatal Crashes, Serious Injury Crashes ▪ Mode: Pedestrian-bicycle related crashes, vehicle/other ▪ Disadvantaged Community Status: MPO/RTPA or locally defined disadvantaged community status based on most current version of CalEnviroScreen ▪ Vulnerable Populations: Seniors (age 65 and older) and Youth (under age 15) based on the American Community Survey ▪ School proximity (within 0.25 miles) based on the California School Campus Database ▪ Systemic or Predicted Crashes
Crash Density	Each roadway segment block may be converted into ~ 0.25 mile overlapping or contiguous "corridor" segments to create a consistent unit of measurement and assess the concentration of linear patterns of crashes within a defined distance. The highest scoring (i.e. most fatal and serious injury crashes per mile) "corridor" segments within a street needs to be identified and an appropriate threshold set to determine safety corridor eligibility.
Maintenance	The jurisdiction may establish a review and re-evaluation frequency for safety corridors. However, such frequency need not exceed seven years.

[1] *Black text is consistent with the federal MUTCD, blue text is where the CA MUTCD differs from the federal MUTCD, green text was added to the CA MUTCD in compliance with AB 43 & AB 1938.*

Table 2B-106(CA). Requirements to determine Land or Facility that Generates High Concentrations of Bicyclists or Pedestrians

Category	Generator
Land Use	Employment centers
	Presence of retail
	Parks, multi-use trails, and recreational destinations
	Schools/universities
	Senior Centers
	Cultural areas, entertainment space areas, or areas of community significance
	Religious facilities
	Health/medical facilities
Transit Factors	Transit stops
	Transit Oriented Developments/Transit Priority Areas
Presence of Pedestrian/Bicyclist Infrastructure	Sidewalk presence
	Crosswalk presence
	Bikeway presence
	Nearby signalized intersections on four-way intersections
	Presence of micromobility devices such as bicycles or scooters
Demographic Factors	Presence of vulnerable groups including children, seniors, persons with disabilities, users of personal assistive mobility devices, and the unhoused
	MPO/RTPA or locally defined disadvantaged community status
	Presence of students (all levels)
Local Data	Need identified in a safety analysis such as a road safety audit or formalized planning document such as a local road safety plan

[1] *Black text is consistent with the federal MUTCD, blue text is where the CA MUTCD differs from the federal MUTCD, green text was added to the CA MUTCD in compliance with AB 43 & AB 1938.*

Definitions of Selected Terms Used in the CA MUTCD

Text Headings

Standard—a statement of required, mandatory, or specifically prohibitive practice regarding a traffic control device. All Standard statements are labeled, and the text appears in bold type. The verb “shall” is typically used. The verbs “should” and “may” are not used in Standard statements. Standard statements are sometimes modified by Options.

Guidance—a statement of recommended, but not mandatory, practice in typical situations, with deviations allowed if engineering judgment or engineering study indicates the deviation tobe appropriate. All Guidance statements are labeled, and the text appears in non-bolded type.The verb “should” is typically used. The verbs “shall” and “may” are not used in Guidance statements. Guidance statements are sometimes modified by Options.

Option—a statement of practice that is a permissive condition and carries no requirement or recommendation. Option statements sometime contain allowable modifications to a Standard or Guidance statement. All Option statements are labeled, and the text appears in non-bolded type. The verb “may” is typically used. The verbs “shall” and “should” are not used in Option statements.

Support—an informational statement that does not convey any degree of mandate, recommendation, authorization, prohibition, or enforceable condition. Support statements are labeled, and the text appears in non-bolded type. The verbs “shall,” “should,” and “may” are not used in Support statements.

Words and Phrases

Speed—speed is defined based on the following classifications:

(a) ***Average Speed***—the summation of the instantaneous or spot-measured speeds at a specific location of vehicles divided by the number of vehicles observed.

(b) ***Design Speed***—a selected speed used to determine the various geometric designfeatures of a roadway.

(c) ***85th-Percentile Speed***—the speed at or below which 85 percent of the motor vehicles travel.

(d) ***Operating Speed***—a speed at which a typical vehicle or the overall traffic operates. Operating speed might be defined with speed values such as the average, pace, or 85th-percentile speeds.

(e) ***Pace***—the 10 mph speed range representing the speeds of the largest percentage of vehicles in the traffic stream.

Speed Limit—the maximum (or minimum) speed applicable to a section of highway as established by law or regulation.

Posted Speed Limit—a speed limit determined by law or regulation and displayed on SpeedLimit signs.

Speed Zone—a section of highway with a speed limit that is established by law or regulation,but which might be different from a legislatively specified statutory speed limit.

Statutory Speed Limit—a speed limit established by legislative action that typically is applicable for a particular class of highways with specified design, functional, jurisdictionaland/or location characteristics and that is not necessarily displayed on Speed Limit signs.

Average Daily Traffic (ADT)—the average 24 hour volume, being the total volume during a stated period divided by the number of days in that period. Normally, this would be periodic daily traffic volumes over several days, not adjusted for days of the week or seasons of the year.

Bicycle Lane—a portion of a roadway that has been designated for preferential or exclusiveuse by bicyclists by pavement markings and, if used, signs. See Class II Bikeway.

Business District - A "business district" is that portion of a highway and the property contiguous thereto (a) upon one side of which highway, for a distance of 600 feet, 50 percent or more of the contiguous property fronting thereon is occupied by buildings in use for business, or (b) upon both sides of which highway, collectively, for a distance of 300 feet, 50 percent or more of the contiguous property fronting thereon is so occupied. A business districtmay be longer than the distances specified in this section if the above ratio of buildings in usefor business to the length of the highway exists. Refer to CVC 235.
CVC – California Vehicle Code.

Class II Bikeway (such as a Bike Lane) – Provides a restricted right-of-way designated forthe exclusive or semi-exclusive use of bicycles with through travel by motor vehicles or pedestrians prohibited, but with vehicle parking and crossflows by pedestrians and motoristspermitted. Refer to California Streets and Highways Code Section 890.4. Refer to Caltrans' Highway Design Manual Index 1003.2 for design criteria.

Divided Highway – A highway with separated roadbeds for traffic in opposing directions.

Engineer – a person registered under California Professional Engineers Act as a professional engineer, including any of the branches thereof. Refer to California Business and Professions Code Section 6706. 63b. Engineering and Traffic Survey – Refer to CVC 627.

Engineering Judgment—the evaluation of available pertinent information, and the applicationof appropriate principles, experience, education, discretion, provisions, and practices as contained in this Manual and other sources, for the purpose of deciding upon the applicability, design, operation, or installation of a traffic control device. Engineering judgment shall be

exercised by an engineer, or by an individual working under the supervision of an engineer, through the application of procedures and criteria established by the engineer. Documentationof engineering judgment is not required.

Engineering Study—the comprehensive analysis and evaluation of available pertinent information, and the application of appropriate principles, engineering judgment, experience, education, discretion, provisions, and practices as contained in this Manual and other sources, for the purpose of deciding upon the applicability, design, operation, or installation of a traffic control device. An engineering study shall be performed by an engineer, or by an individual working under the supervision of an engineer, through the application of procedures and criteria established by the engineer. An engineering study shall be documented.

Median—the area between two roadways of a divided highway measured from edge of traveled way to edge of traveled way. The median excludes turn lanes. The median widthmight be different between intersections, interchanges, and at opposite approaches of the same intersection.

Multi-Lane—more than one lane moving in the same direction. A multi-lane street, highway, or roadway has a basic cross-section comprised of two or more through lanes in one or both directions. A multi-lane approach has two or more lanes moving toward the intersection, including turning lanes.

Pedestrian—a person on foot, in a wheelchair, on skates, or on a skateboard. As per CVC 467, (a) A "pedestrian" is a person who is afoot or who is using any of the following: (1) A means of conveyance propelled by human power other than a bicycle. (2) An electric personal assistive mobility device. (b) "Pedestrian" includes a person who is operating a self-propelled wheelchair, motorized tricycle, or motorized quadricycle and, by reason of physical disability, isotherwise unable to move about as a pedestrian, as specified in subdivision(a).

Pedestrian Facilities—a general term denoting improvements and provisions made to accommodate or encourage walking.

Roadway—that portion of a highway improved, designed, or ordinarily used for vehicular travel and parking lanes, but exclusive of the sidewalk, berm, or shoulder even though such sidewalk, berm, or shoulder is used by persons riding bicycles or other human-powered vehicles. In the event a highway includes two or more separate roadways, the term roadway as used in this Manual shall refer to any such roadway separately, but not to all such roadwayscollectively. Refer to CVC 527.

Shared-Use Path (Class I Bikeway) —a bikeway outside the traveled way and physically separated from motorized vehicular traffic by an open space or barrier and either within the highway right-of-way or within an independent alignment. Shared-use paths are also used by pedestrians (including skaters, users of manual and motorized wheelchairs, and joggers) and other authorized motorized and non-motorized users. Refer to the Caltrans' Highway Design Manual Index 1003.1 for design criteria.

Shoulder – The portion of the highway contiguous with the roadway for accommodations of pedestrians, bicyclists, stopped vehicles, for emergency use, and for lateral support of baseand surface courses.

Sidewalk—that portion of a street between the curb line, or the lateral line of a roadway, andthe adjacent property line or on easements of private property that is paved or improved andintended for use by pedestrians. As per CVC 555, "Sidewalk" is that portion of a highway, other than the roadway, set apart by curbs, barriers, markings or other delineation for pedestrian travel.

Traffic Control Device—a sign, signal, marking, or other device used to regulate, warn, or guide traffic, placed on, over, or adjacent to a street, highway, private road open to public travel (see definition of private road open to public travel), pedestrian facility, or shared-use path by authority of a public agency or official having jurisdiction, or, in the case of a private road open to public travel (see definition of private road open to public travel), by authority ofthe private owner or private official having jurisdiction.

APPENDIX C

Engineering and Traffic Survey Summary Sheets

(Updated April 2025)

City of Eastvale

Engineering & Traffic Survey Summary

Location:	58th Street	Survey Date:	July 29, 2021
Between:	Scholar Way & Hamner Avenue	Segment No.:	1
Direction of Travel:	East/West		

Traffic Data	
Average Daily Traffic:	1,522
Length of Segment (feet):	2,586
Length of Segment (miles):	0.49
Lane Configuration:	Single Lane Each Direction
Street Classification:	Collector
Speed Survey Data	
85th Percentile:	40 mph
10 mph Pace:	31-40 mph
Posted Speed Limit:	35 mph
Collision History	
Date Range:	July 1, 2018 - June 30, 2021
Total Collisions:	0
Collision Rate (Accidents/MVM):	0.00, less than statewide collision rate
Statewide Collision Rate:	1.60
Conditions Not Readily Apparent	
Conditions: Sidewalk on north side only at Scholar Way.	
Roadway Geometrics:	
Comments: Ped/bike safety	
Adjacent Land Use:	Residential
Recommendation	
Recommended Speed:	35 mph
Speed Limit Change:	No
Recommendation based on:	85th percentile speed, Option 2 (rounded to 40 mph, then reduced 5mph)

Approved and Authorized for release by City Traffic Engineer*:

Ruth Smith, TE, PTP TE 1650

12/20/2021
Date

REGISTERED PROFESSIONAL ENGINEER RUTH MATTHEWS SMITH 1650 TRAFFIC STATE OF CALIFORNIA

* Contract services provided by Interwest Consulting Group

CITY OF EASTVALE

Engineering and Traffic Survey Summary

Location:	**65th Street**	Survey Date:	3/19/2025
Between:	**Archibald Avenue & Sumner Avenue**	Segment No.:	2
Direction of Travel:	East/West		

Traffic Data	
Average Daily Traffic:	6,155
Length of Segment (feet):	5,300
Length of Segment (miles):	1.00
Lane Configuration:	2 Lanes Each Direction w/ painted median
Street Classification:	Secondary Collector
Speed Survey Data	
85th Percentile Speed (mph):	46
10 mph Pace:	38 - 47 mph
Posted Speed Limit (mph):	40
Collision History	
Date Range:	January 1, 2023 - December 31, 2024
Total Collisions:	0
Collision Rate (crashes / MVM):	0.00
Statewide Collision Rate:	1.24
Conditions Not Readily Apparent	
Conditions: Heavy pedestrian & vehicular traffic during school. Sidewalk located next to curb, so vehicular traffic is in close proximity to pedestrians and bike traffic.	
Roadway Geometrics: 4-Lane, Divided. Straight alignment. bike lanes, but substandard.	
Comments: Near Cedar Creek Park at Cedar Creek Rd. Rosa Parks Elementary at Harrison Ave. Residences do not front on 65th St. - no direct access.	
Adjacent Land Use:	Residential
Speed Limit Recommendation	
Recommended Speed Limit:	**40 mph**

Engineering & Traffic Survey Summary

Location:	River Road	Survey Date:	September 14, 2021
Between:	Hellman Avenue & Archibald Avenue	Segment No.:	39
Direction of Travel:	East/West		

Traffic Data	
Average Daily Traffic:	7,806
Length of Segment (feet):	3,970
Length of Segment (miles):	0.75
Lane Configuration:	2 Lanes Each Direction w/Painted Median
Street Classification:	Collector
Speed Survey Data	
85th Percentile:	49 mph
10 mph Pace:	41-50 mph
Posted Speed Limit:	40 mph
Collision History	
Date Range:	July 1, 2018 - June 30, 2021
Total Collisions:	2
Collision Rate (Accidents/MVM):	0.31, less than statewide collision rate
Statewide Collision Rate:	1.32

Conditions Not Readily Apparent

Conditions:

Local business generate large vehicle traffic. Single Lane Each Direction from Hellman to Hall. 2 Lanes Each Direction from Hall to Archibald. Agricultural land west of Hall.

Roadway Geometrics:

Comments:

trucks present and ped/bike safety

Adjacent Land Use:	Residential / Agricultural
Recommendation	
Recommended Speed:	40 mph
Speed Limit Change:	No
Recommendation based on:	CVC Section 22358.8, which allows retaining the existing speed limit under certain conditions, which are met. Created by new AB 43, effective 1/1/2022. 85th percentile speed considered too high due to trucks present and ped/bike safety.

APPENDIX G

Radar/Lidar Gun and Operator(s) Certifications (Updated April 2025)

(to be provided)

ORDINANCE NO. 25-XX (DRAFT)

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF EASTVALE, CALIFORNIA, AMENDING IN ITS ENTIRETY CHAPTER 10.02 OF TITLE 10 TO THE EASTVALE MUNICIPAL CODE ESTABLISHING SPEED LIMITS ON CERTAIN STREETS

WHEREAS, California Vehicle Code Sections 22357 and 22358 provide that local entities may declare prima facie speed limits greater than 25 miles per hour on City streets on the basis of an engineering and traffic survey; and

WHEREAS, California Vehicle Code Section 40802 provides for the enforcement of the posted speed limit by the use of radar or other electronic devices which measures the speed of moving vehicles; and

WHEREAS, California Vehicle Code Section 627(b) defines an engineering and traffic survey to include consideration of all of the following:

1) Prevailing speeds as determined by traffic engineering measurements;
2) Collision Records;
3) Highway, traffic, and roadside conditions not readily apparent to the driver; and

WHEREAS, the City of Eastvale has completed a new engineering and traffic survey required under California Vehicle Code Sections 22357 and 22358.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF EASTVALE, DOES HEREBY ORDAIN AS FOLLOWS:

SECTION 1. Chapter 10.02 of Title10 to the Eastvale Municipal Code is amended in its entirety to read as follows:

"Sec. 10.02.010. - Findings.

(a) The City Council of the City of Eastvale finds that an engineering and traffic survey has been completed in full compliance with the requirements of the California Vehicle Code and the recommendations in the survey should be implemented. Based upon the review of the survey and related information, the City Council finds the prevailing or 85th percentile speeds of the vehicles are:

No.	Street	Between	85th %ile Speed (mph)
1	58th Street	Scholar Way and Hamner Avenue	40
2	65th Street	Archibald Avenue and Sumner Avenue	40
3		Sumner Avenue and Hamner Avenue	47
4		Hamner Avenue and Wells Spring Street / East City Limit	42
5	68th Street	Sumner Avenue and Hamner Avenue	49
6		Hamner Avenue and East City Limit	47

No.	Street	Between	85th %ile Speed (mph)
7	Archibald Avenue	Bluff Street and Wind River/Grapewin Street	57
8		Wind River/Grapewin Street and Schleisman Road	57
9		Schleisman Road and Bellegrave Avenue / North City Limit	55
10	Baron Road	Archibald Avenue and Northernly Terminus	40
11	Bellegrave Avenue	Sumner Avenue and Hamner Avenue	53
12		Hamner Avenue and East City Limit	48
13	Blossom Way	Harrison Avenue and Sumner Avenue	37
14	Cantu-Galleano Ranch Road	Hamner Avenue and I-15 Freeway	51
15	Chandler Street	Hellman Avenue and Harrison Avenue	52
16	Citrus Street	Harrison Avenue and Scholar Way	47
17		Scholar Way and Hamner Avenue	47
18	Fieldmaster Street	Hall Road and Archibald Avenue	43
19	Goodman Way	Cantu-Galleano Ranch Road and Hamner Avenue	41
20	Hamner Avenue	South City Limit and Schleisman Road	52
21		Schleisman Road and Limonite Avenue	51
22		Limonite Avenue and Bellegrave Avenue	51

Sec. 10.02.030 - Direction to City Engineer. On or after the effective date of the Ordinance of which this Chapter is derived, the City Engineer is directed to clearly post speed limit signs effectuating Section 10.02.020 above, to give notice that this Chapter is in effect."

SECTION 2. If any section, subsection, subdivision, sentence, clause, phrase, or portion of this Ordinance is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this Ordinance. The City Council hereby declares that it would have adopted this Ordinance, and each section, subsection, subdivision, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more sections, subsections, subdivisions, sentences, clauses, phrases or portions thereof be declared invalid or unconstitutional.

SECTION 3. The City Clerk shall certify to the adoption of this ordinance and shall cause the same to be published in accordance with the law.

PASSED, APPROVED AND ORDAINED this 28 day of May, 2025.

May 28, 2025

Support – H.R. 672 (Diaz-Balart), H.R. 1225 (Calvert), and S. 1455 (Scott)

Prepared By:

Alexander Fung, Economic Development Manager

Recommended Action(s)

Staff recommends that the City Council adopt a Resolution to support H.R. 672 (Diaz-Balart), H.R. 1225 (Calvert), and S. 1455 (Scott).

Summary

Throughout the past two years, staff partnered with federal and state legislators to introduce bills that support the City's independent Zoning Improvement Plan (ZIP) code advocacy efforts. Three bills were introduced in the current congressional cycle earlier this year. To further encourage the passage of these bills, staff recommends that the City Council adopt a Resolution to formally support the legislation. This item summarizes the details of each bill.

Background

Currently, the City shares ZIP Codes 91752 and 92880 with neighboring cities. The City's lack of an independent ZIP code has caused various challenges for the Eastvale community, including issues related to address mismatches, business attraction, community identity, election confusion, emergency management, insurance premium rates, mail delivery, and sports league participation.

Based on information shared by the U.S. Congressional Research Service, there are two ways for a municipality to request its ZIP code boundaries be changed:

ZIP Code Boundary Change Method 1: ZIP Code Boundary Review Process

Any municipality or community group seeking a ZIP code change can submit the request in writing

to the USPS. The USPS will evaluate the request based on cost, mail delivery impacts, and issues related to community identity. If the request is granted, the USPS will arrange a meeting with the proponent group to discuss USPS' proposed accommodation. Once an agreement is reached, the USPS will commission a formal survey of customers who would be affected by the proposed ZIP code change. If a simple majority of the impacted residents approve, the USPS will notify the affected customers of the official ZIP code change by mail, then provide the impacted residents with one year to transition their ZIP codes. In the event that a ZIP code boundary request is denied by the USPS, proponent groups have 45 days to submit appeals.

ZIP Code Boundary Change Method 2: Acts of Congress
Congress may introduce legislation that requires the USPS to create a single ZIP code for a specified community. The most recent example of a ZIP code created by statute occurred in 2006 as part of the Postal Accountability and Enhancement Act. This Act granted ZIP code changes to Bradbury, CA, Discovery Bay, CA, Auburn Township, OH, and Hanahan, SC.

2023 and 2024 Advocacy Recap
Since 2022, the City has innovatively and actively explored various ways of partnering with the USPS and federal representatives to resolve outstanding issues and challenges. In 2023, the City partnered with Congressmembers Ken Calvert and Norma Torres in the 118th Congress to introduce bills that would address Eastvale's ZIP code challenges, in addition to partnering with the City of Castle Pines in Colorado to launch the National ZIP Code Advocacy Coalition. The Coalition now provides a platform for jurisdictions that are experiencing similar ZIP code challenges to share best practices and partner with one another. Additional information regarding the Coalition can be found at https://www.eastvaleca.gov/community/national-zip-code-advocacy-coalition.

With the support from Senator Alex Padilla, Former Senator Laphonza Butler, and Congressmembers Ken Calvert and Norma Torres, the City successfully convinced the USPS via the USPS' ZIP Code Boundary Review Process to change ZIP Code 92880's designation from "Corona" to "Eastvale." The change was implemented on January 1, 2024, as displayed on the USPS website. While ZIP Code 92880's municipal designation was changed and some of the City's outstanding issues have been resolved, the City continues to experience challenges due to the lack of an independent ZIP code.

Analysis
The 119th Congress began on January 3, 2025 and will end on January 2, 2027. As a result, bills that are introduced in the current congressional cycle have until January 2, 2027 to pass through both chambers of Congress and be signed by the President. Due to the strong partnerships that were previously built with federal legislators in the 118th Congress, Eastvale is already included in three ZIP code bills in the first few months of the current congressional cycle.

Congressman Mario Diaz-Balart (R-FL-26) introduced H.R. 672 on January 23, 2025 to direct the USPS to establish new ZIP codes for several cities and communities across the nation, including Eastvale. Upon the bill's passage, the USPS must designate new ZIP codes for these cities and communities within 270 days. This bill is co-sponsored by a dozen Congressmembers, including Congressman Ken Calvert (R-CA-41) and Congresswoman Norma Torres (D-CA-35). H.R. 672 was passed by the House Committee on Oversight and Government Reform on May 21, 2025. Additional information regarding H.R. 672 can be found on https://www.congress.gov/bill/119th-congress/house-bill/672.

H.R. 672's Senate companion bill, S. 1455, was introduced by Senator Rick Scott (R-FL) on April 10, 2025. S. 1455's bill language largely mirrors the language of H.R. 672. The bill is co-sponsored by Senator Alex Padilla (D-CA) and Senator Joni Ernst (R-IA). S. 1455 has been read twice and referred to the Senate Committee on Homeland Security and Governmental Affairs. Additional information regarding S. 1455 can be found on https://www.congress.gov/bill/119th-congress/senate-bill/1455.

Additionally, Congressman Ken Calvert introduced H.R. 1225 on February 12, 2025 to direct the USPS to designate a single and unique ZIP code for Eastvale. Upon the bill's passage, the USPS must designate a new and independent ZIP code for Eastvale within 180 days. The bill is co-sponsored by Congresswoman Norma Torres and has been referred to the House Committee on Oversight and Government Reform. Additional information regarding H.R. 1225 can be found on https://www.congress.gov/bill/119th-congress/house-bill/1225.

Environmental

Pursuant to Section 15378 of the California Environmental Quality Act (CEQA) Guidelines, organizational or administrative activities of governments that do not result in direct or indirect physical changes in the environment are not considered as CEQA projects.

Strategic Plan Action - Priority Level: 2 | Target #: B | Goal #: C

Supporting H.R. 672, H.R. 1225, and S. 1455 can support the City to develop branding and identity for Eastvale by advocating for the City to have an independent ZIP code.

Fiscal Impact

Adopting a resolution to support the three bills does not result in any direct fiscal impacts.

Prior City Council/Commission Action

On March 22, 2023, the City Council voted to support H.R. 696 (Calvert), H.R. 860 (Diaz-Balart), and SJR 3 (Roth) and authorized the City Manager to submit the necessary letters of support to encourage the passage of these bills. H.R. 696 and H.R. 860 were introduced in the previous congressional legislative session to address Eastvale's ZIP code challenges, while SJR 3 was a California state resolution that affirmed the need for Eastvale to obtain an independent ZIP code.

Additionally, the City Council, the Planning Commission, and the Public Safety Commission receive presentations on the City's independent ZIP code advocacy efforts on a periodic basis. The previous update was provided to the City Council on December 11, 2024.

Attachment 1 - Proposed Resolution

RESOLUTION NO. 25-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF EASTVALE, CALIFORNIA, SUPPORTING H.R. 672 (DIAZ-BALART), H.R. 1225 (CALVERT), AND S. 1455 (SCOTT).

WHEREAS, the City of Eastvale shares Zoning Improvement Plan (ZIP) Codes 91752 and 92880 with neighboring jurisdictions, causing various challenges for the Eastvale community, including issues related to address mismatches, business attraction, community identity, election confusion, emergency management, insurance premium rate increases, mail delivery, and sports league participation;

WHEREAS, the City has partnered with Senators and Congressmembers in the United States Congress to introduce and support bills that support the City's independent ZIP code advocacy efforts;

WHEREAS, the 119th Congress began on January 3, 2025 and will end on January 2, 2027;

WHEREAS, Florida Congressman Mario Diaz-Balart introduced H.R. 672 on January 23, 2025 to direct the USPS to establish new ZIP codes for several cities and communities across the nation, including Eastvale, CA;

WHEREAS, H.R. 672's Senate companion bill, S. 1455, was introduced by Florida Senator Rick Scott on April 10, 2025;

WHEREAS, California Congressman Ken Calvert introduced H.R. 1225 on February 12, 2025 to direct the USPS to designate a single and unique ZIP code for Eastvale; and

WHEREAS, the City will be granted a unique and independent ZIP code if one of these bills is signed into law.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF EASTVALE DOES HEREBY FIND, DETERMINE, AND RESOLVE AS FOLLOWS:

SECTION 1. SUPPORT H.R. 672 (DIAZ-BALART), AS AMENDED ON MAY 28, 2025.

SECTION 2. SUPPORT H.R. 1225 (CALVERT), AS AMENDED ON MAY 28, 2025.

SECTION 3. SUPPORT S. 1455 (SCOTT), AS AMENDED ON MAY 28, 2025.

PASSED, APPROVED AND ADOPTED this 28TH day of May, 2025.

Partnership Agreement with the County of Riverside Emergency Management Department for Emergency Services Coordinator (ESC) Services

Prepared By:

Simone Blackwell, Senior Environmental Compliance Analyst

Recommended Action(s)

Staff recommends that the City Council:

1. Approve a partnership Agreement with the County of Riverside Emergency Management Department in the amount of $292,500 over three years; and
2. Authorize the City Manager to execute the contract amendment and other necessary documents.

Summary

The City currently has an agreement with the County of Riverside Emergency Management Department (EMD) for Emergency Services Coordinator (ESC) services, which is set to expire on June 30, 2025. To ensure continued services, the County has proposed a new three-year agreement for ESC services, effective July 1, 2025, through June 30, 2028 for total of $292,500.

Background

Since 2011, the City has partnered with the County of Riverside EMD to provide ESC services supporting emergency planning, mitigation, preparedness, response, and recovery efforts. In 2024, the City Council approved to increase the level of dedicated ESC services from a shared model to 50% coverage, following the elimination of the City's Emergency Management Specialist position.

The current agreement is set to expire on June 30, 2025. To ensure continuity of ESC services, the County has proposed a new three-year agreement, effective July 1, 2025, through June 30, 2028. Staff recommends the continued selection of Service Level III ESC services. Under the proposed agreement, the annual cost for Service Level III will increase from $80,000 to $97,500 per fiscal year. This increase is the result of a periodic review of service rates conducted by the County Auditor-Controller's Office to ensure rates are based on a reasonable methodology and reflect the full cost of providing services on an ongoing basis.

Service level III includes a dedicated ESC on-site 20 hours per week. Specific ESC responsibilities include, but are not limited to California Emergency Services Act Compliance, hosting Community Emergency Response Team courses (CERT), CERT volunteer management, grant management, regular reviews and updates of various Emergency Management Plans (ex. Emergency Operations Plan, Local Hazard Mitigation Plan, Disaster Recovery Plan, etc.). Additionally, this position interacts heavily with the community and is often requested to attend various meetings and provide presentations. This role also ensures City staff receives adequate emergency preparedness training.

Environmental

Not Applicable.

Strategic Plan Action - Priority Level: N/A | Target #: A | Goal #: F

Maintain Fire response

Fiscal Impact

The County charges for this position on a fixed fee schedule (Exhibit B). The City's contribution falls under Service Level III - 50% ESC services. The total cost is increasing from $80,000 to $97,500 per fiscal year. Funds for fire services are paid through the City's Fire Structural Fund, which comes from a portion of the City's property tax allocated for fire service. Budget is allocated in the Fire Fund Payments to Other Agencies account number 110-420-6480.

Prior City Council/Commission Action

On June 9, 2021, the City Council approved a three year partnership agreement with the County of Riverside Emergency Management Department for Emergency Management services.

On June 26, 2024, the City Council approved an amendment to extend the agreement to June 30, 2025 and increase ESC services to 50%.

AGREEMENT FOR
EMERGENCY MANAGEMENT DEPARTMENT UNIFIED SERVICES
BETWEEN THE
COUNTY OF RIVERSIDE AND THE CITY OF EASTVALE (AGENCY)

This Agreement is made as of _____ between the County of Riverside ("County") and the City of Eastvale ("Agency"). The parties agree as follows:

1. This Agreement is effective for three years, starting July 1, 2025, through June 30, 2028.

2. Through its Emergency Management Department ("EMD"), the County shall provide to the Agency the services of an Emergency Services Coordinator ("EMD Unified Services (EMDUS)") as described in Exhibits A, B, C & D.

3. The Agency shall pay the County for these EMDUS as stated in Exhibit B.

4. Either party may terminate this Agreement without cause upon 90 days' written notice to the other party. The Agreement may be terminated with cause upon 30 days' written notice to the other party. The County shall be entitled to receive compensation for all properly provided services rendered prior to termination.

5. If the Agency does not appropriate funds in its budget for payment, the Agency shall immediately notify the County in writing that such funds are not forthcoming. Such a notice shall be deemed cause for termination by the County or Agency. The County shall nevertheless be entitled to payment for properly provided services rendered prior to termination.

6. At all times during the performance period of this Agreement, the County shall maintain insurance or self-insurance reasonable and appropriate for a public entity the size of the County.

7. The County shall indemnify and hold harmless the Agency, its departments, agencies, districts, officials, officers, and employees from any liability, claim, damage, or action based or asserted upon any act or omission of the County relating to this Agreement, including but not limited to property damage, personal injury or death.

8. The Agency shall indemnify and hold harmless the County, its departments, agencies, districts, officials, officers, and employees from any liability, claim, damage, or action based or asserted upon any act or omission of the Agency relating to this Agreement, including but not limited to property damage, personal injury, or death.

9. The County shall maintain and keep records related to the EMDUS rendered in accordance with applicable County standards. In addition to their rights under applicable law, the Agency and its employees and agents shall have the right to review and audit such records during the County's normal business hours upon request and reasonable advance notice by the Agency.

10. The laws of the State of California shall govern this Agreement. The venue shall be in an appropriate court located in Riverside County, and the parties waive any provision of the law providing for a change of venue to

another location.

11. *This Agreement shall be administered by the Director of EMD, or their designee, on behalf of the County and by the Authorized Agent, or their designee, on behalf of that Agency.*

12. *Notices issued pursuant to this Agreement shall be sent via U.S. Mail to the following:*

TO COUNTY:	*TO AGENCYCONTRACTOR :*
Emergency Management Department	
450 E. Alessandro Blvd.	*Agency of _____*
Riverside, CA 92508	*Address*
Attn: Emergency Services Manager	*City, State Zip*
	Attn: Authorized Agent

13. *This Agreement may be executed in any number of counterparts, each of which will be an original but all of which together will constitute one instrument. Each party to this Agreement agrees to the use of electronic signatures, such as digital signatures that meet the requirements of the California Uniform Electronic Transactions Act ("CUETA," Civ. Code, §§ 1633.1 to 1633.17), for executing this Agreement. The parties further agree that the electronic signatures of the parties included in this Agreement are intended to authenticate this writing and to have the same force and effect as manual signatures. An electronic signature means an electronic sound, symbol, or process attached to or logically associated with an electronic record and executed or adopted by a person with the intent to sign the electronic record pursuant to the CUETA as amended from time to time. CUETA authorizes the use of an electronic signature for transactions and contracts among parties in California, including a government agency. A digital signature means an electronic identifier created by a computer, intended by the party using it to have the same force and effect as the use of a manual signature, and shall be reasonably relied upon by the parties. For purposes of this section, a digital signature is a type of "electronic signature" as defined in subdivision (i) of Section 1633.2 of the Civil Code.*

14. *This Agreement represents the full and final agreement between the parties related to this subject matter; no prior oral or written agreements shall apply. This Agreement may be modified or altered only by a written amendment signed by authorized representatives of both parties.*

EXHIBIT A

SCOPE OF SERVICE

1. EMD – YOUR PARTNER IN COMPREHENSIVE EMERGENCY MANAGEMENT

In today's unpredictable environment, ensuring the safety and resilience of your community is paramount. Partnering with Emergency Management Department Unified Services (EMDUS) offers your Agency a comprehensive, expert-driven approach to emergency management, delivering significant benefits that empower your community to prepare effectively, respond to and recover from disasters. Riverside County's Emergency Management Department is one of only three counties in California and one of 78 governmental programs nationwide to be certified through the Emergency Management Accreditation Program (EMAP). This certification highlights the county's unwavering commitment to upholding the highest standards in emergency management. It further reinforces Riverside County's dedication to maintaining a well-organized, efficient, and resilient emergency response system. By partnering with Riverside County, your Agency can benefit from proven best practices and expert guidance, enhancing disaster preparedness, improving response coordination, and streamlining recovery efforts.

1.1 The Unified Services Model: A Coordinated Approach to Emergency Management

The Unified Services Model, as implemented by EMDUS, is a comprehensive and coordinated approach to emergency management that ensures all agencies, departments, and organizations will work together seamlessly at every stage of an emergency—before, during, and after a crisis. This model promotes collaboration between Riverside County Departments, Special Districts, School Districts, Non-Governmental Organizations (NGOs), and nonprofits, creating a unified network that can effectively respond to and recover from emergencies. By integrating these diverse stakeholders, the Unified Services Model enables the efficient allocation of resources, enhances communication, and minimizes duplication of efforts. This collaborative framework strengthens the overall emergency management system, ensuring that all partners are aligned in their efforts to protect the community, reduce risk, and enhance resilience in the face of disasters. Through Unified Services, Agency wil be better equipped to handle complex emergencies, ensuring a more adaptive and coordinated response.

1.2 Comprehensive Strategic Planning for Emergency Preparedness

Effective emergency preparedness requires the development and implementation of strategic plans that address the Agency's-wide risks and vulnerabilities. These plans should be informed by input from all relevant stakeholders, including government agencies, first responders, community organizations, and private sector partners. By fostering collaboration and incorporating diverse perspectives, Agency will be able to create well-rounded emergency plans that enhance response coordination and resilience. A proactive approach to strategic planning ensures that potential threats are identified, resources are allocated efficiently, and communities are better equipped to handle emergencies when they arise.

1.3 Strengthening Preparedness Through Training and Exercises

Conducting joint training sessions and emergency drills is essential for ensuring that all partners involved in emergency response are well-prepared and able to collaborate effectively during a crisis. These exercises provide a valuable opportunity for responders to practice their roles, familiarize themselves with protocols, and identify potential gaps in their plans. By simulating real-world scenarios, training sessions help build trust and communication among all parties, including local agencies, first responders, and community organizations. Regularly scheduled drills ensure that everyone involved is capable of working together seamlessly under pressure, enhancing the overall efficiency and effectiveness of the emergency response.

1.4 **The Importance of Unified Coordination in Emergency Response**
Unified coordination is essential for ensuring a seamless and effective emergency response. By streamlining communication and operations among local government entities, emergency services, and community partners, a unified approach fosters collaboration while minimizing the risk of confusion or duplication of efforts. This coordinated effort ensures that all parties are aligned toward common goals, with clearly defined roles and responsibilities for each entity involved. Establishing a centralized system for decision-making and information sharing will enable Agency to respond quickly and efficiently to emergencies. Ultimately, this enhanced coordination improves the overall effectiveness of disaster response and recovery, ensuring that resources are utilized optimally and that communities are better protected during times of crisis.

1.5 **The Role of Resource Sharing in Enhancing Emergency Response and Recovery**
Resource sharing is a crucial element in improving the overall effectiveness of emergency preparedness, response, and recovery efforts. By pooling personnel, equipment, facilities, and expertise from various agencies, can optimize their resources and address any gaps in capabilities. This collaborative approach ensures that critical assets, such as specialized equipment or highly trained personnel, are deployed efficiently to areas where they are needed most, reducing response times and improving the effectiveness of disaster management. Furthermore, resource sharing strengthens the system's resilience by allowing greater flexibility and adaptability in the face of emergencies. This unified approach not only enhances the response and recovery process but also fosters a more agile and resourceful emergency management framework capable of handling diverse challenges.

1.6 **Community Resilience**
Building community resilience involves actively engaging schools, nonprofits, and NGOs to support a range of critical services during and after a disaster. These organizations play a vital role in providing shelter, mental health assistance, food distribution, and recovery programs, ensuring that the needs of affected individuals and families are met. Schools can serve as emergency shelters or distribution points, while nonprofits and NGOs often have established networks and expertise in offering immediate relief and long-term recovery assistance. By collaborating with these community-based groups, agencies can create a more robust and comprehensive support system that promotes recovery and strengthens the community's ability to bounce back from future crises.

1.7 **Enhancing Emergency Management through Service Integration and Collaboration**
By integrating services across various sectors, agencies can greatly improve the efficiency and effectiveness of their emergency management efforts. This collaborative approach streamlines processes reduces redundancy and ensures that resources are deployed where they are needed most, allowing for a more responsive and agile system. Integrating services promotes better coordination between local government agencies, emergency responders, healthcare providers, and community organizations, creating a unified front when responding to disasters. This interconnected framework not only strengthens the immediate response but also builds a more resilient system that protects residents and critical infrastructure. Ultimately, by fostering collaboration and integration, agencies can enhance their ability to adapt to and recover from future emergencies, creating a safer, more prepared community.

2. STRENGTHENING EMERGENCY MANAGEMENT THROUGH STRATEGIC COLLABORATION AND SPECIALIZED SUPPORT

EMDUS partners directly work with your leadership to provide specialized coordination and strategic guidance across all facets of emergency management. This collaboration streamlines critical operations, ensures compliance with industry standards, and delivers a fully unified program that enhances

preparedness, response, recovery, and mitigation efforts. By working with EMDUS, Agency will gain access to expertise and leadership that ensures a comprehensive, well-organized response to any emergency, such as:

2.1 **Strengthening Emergency Response with Specialized Personnel Support**
EMDUS strengthens Agency's emergency response capacity by providing highly qualified, dedicated emergency management personnel who seamlessly integrate with your local agencies. Depending on your service level, EMDUS assigns an Emergency Services Coordinator (ESC) who oversee the overall management of emergency operations, while a backup Emergency Management Program Supervisor (EMPS) ensures continuity of leadership and decision-making in the absence of the ESC. This dual support structure ensures that Agency remains well-prepared and responsive, improving the effectiveness and coordination of your emergency management efforts. By bolstering your team with EMDUS personnel, Agency enhances its resilience and capability to navigate any crisis.

2.2 **Unlocking Key Benefits Through Partnership with EMDUS**
Partnering with EMDUS offers Agency dedicated support, strategic collaboration, and access to critical funding opportunities. The expertise and leadership provided by EMDUS professionals help ensure Agency is thoroughly prepared for emergencies. These specialists offer invaluable guidance on best practices, operational strategies, and disaster readiness. EMDUS personnel serve as the primary point of contact for all emergency management activities, acting as liaisons between local agencies, departments, and external organizations. This coordination fosters seamless communication, reduces confusion during crises, and ensures resources are mobilized efficiently. By working with EMDUS, Agency enhances its emergency management capabilities while also benefiting from vital funding opportunities and a more resilient community.

2.3 **Building Stronger Emergency Networks Through Strategic Collaboration**
EMDUS plays a vital role in fostering collaboration among local, county, state, and federal agencies, as well as private-sector and community organizations. Through these strategic partnerships, EMDUS ensures a well-coordinated and efficient approach to emergency management, creating a network of stakeholders capable of quickly mobilizing resources and responding to emergencies. By integrating the strengths of government agencies, private-sector entities, and non-profit organizations, this collaborative framework improves communication, resource distribution, and crisis response. EMDUS strengthens the collective ability of all parties involved, ensuring that communities recover quickly and become more resilient in the face of future disasters.

3. IMPROVED FISCAL RECOVERY AND RISK REDUCTION IN EMERGENCY MANAGEMENT
Effective fiscal recovery and risk reduction are crucial in the mitigation and recovery phases of emergency management. These efforts ensure that agencies can efficiently restore operations, minimize financial losses, and enhance resilience against future disasters. Adopting best practices and compliance with regulatory frameworks such as the California Standardized Emergency Management System (SEMS), the National Incident Management System (NIMS), and laws such as AB 2140 significantly improve these outcomes.

3.1 **Fiscal Recovery in Mitigation and Recovery Phases**
Pre-disaster financial planning plays a vital role in ensuring agencies have the resources needed to respond effectively to emergencies. Establishing dedicated emergency funds and pre-arranged financial mechanisms allows for rapid response and recovery efforts. Conducting thorough risk assessments and cost-benefit analyses helps prioritize mitigation projects. Additionally, reducing financial exposure through risk transfer mechanisms, such as insurance and contingency funds, provides an added layer of financial security against unforeseen disasters.

3.2 **Maximizing Financial Efficiency in Post-Disaster Recovery**
Maximizing the efficient use of federal and state funds is critical for agencies seeking financial stability post-disaster. By leveraging federal programs such as Federal Emergency Management Agency's (FEMA) Public Assistance and Hazard Mitigation Grant Programs, agencies can offset the high costs associated with emergency response and recovery. Similarly, utilizing state disaster relief funds and insurance mechanisms provides additional financial support. Ensuring strict compliance with financial reporting requirements is necessary to maintain eligibility for future funding, avoid de-obligation, and ensure a steady stream of resources for ongoing recovery efforts.

3.3 **Effective Grant Support and Compliance for Disaster Recovery**
Streamlined grant management and compliance processes ensure that agencies can effectively secure and utilize funding without the risk of financial mismanagement. Compliance with funding requirements prevents the de-obligation of critical funds, ensuring they remain available for essential recovery efforts. Transparent financial tracking and auditing systems help optimize resource allocation, ensuring that funds are used efficiently and effectively. Proper training for staff on grant administration best practices further mitigates the risk of financial mismanagement, ensuring that all funding sources are managed responsibly.

3.4 **Leveraging Public-Private Partnerships for Disaster Recovery**
Public-private partnerships serve as a key component in supporting disaster recovery efforts. Engaging with private sector entities to fund and implement recovery initiatives allows agencies to expand their financial resources beyond government funding. Encouraging community-based financial resilience programs further supports individuals and businesses, promoting economic stability. Collaborations with non-profits provide additional funding and logistical support, allowing for a more comprehensive and effective disaster response and recovery strategy.

4. RISK REDUCTION DURING MITIGATION AND RECOVERY

The implementation of hazard mitigation plans is an essential strategy for reducing risks during the recovery phase. By identifying vulnerabilities and investing in both structural and non-structural mitigation measures, agencies can strengthen their resilience against future disasters. Incorporating land-use planning, infrastructure improvements, and building code enhancements helps minimize risks while ensuring community safety. Regular updates and reassessments of mitigation strategies ensure that plans remain relevant and adaptable to evolving threats.

4.1 **Enhancing Community Preparedness for Risk Reduction**
Strengthening community preparedness is another vital component of risk reduction. Conducting public education campaigns and emergency drills equips residents with the knowledge and skills needed to respond effectively in emergencies. Establishing resilient communication systems and emergency response protocols enhances coordination and response efforts during disasters. Providing incentives for residents and businesses to engage in preparedness activities fosters a culture of resilience and proactive risk management.

4.2 **Integrating Climate Adaptation into Disaster Mitigation**
Integrating climate adaptation strategies into disaster mitigation efforts further enhances an agency's ability to withstand environmental hazards. Utilizing climate data to inform mitigation planning ensures that strategies remain aligned with evolving climate risks. Enhancing natural disaster defenses, such as floodplain management and wildfire buffer zones, reduces exposure to climate-related disasters. Incorporating green infrastructure and nature-based solutions helps mitigate climate risks while promoting environmental sustainability.

5. BENEFITS OF COMPLIANCE WITH SEMS, NIMS, AND RELEVANT LAWS

Adherence to SEMS, NIMS, and relevant laws provides multiple benefits to agencies, including enhanced coordination and communication. Ensuring interoperability between local, state, and federal agencies during emergencies streamlines response efforts and reduces duplication. Strengthening mutual aid agreements and multi-agency coordination efforts enhances efficiency, ensuring that agencies can effectively manage emergency situations.

5.1 **Expanding Funding Opportunities Through Compliance**

Increased funding opportunities are another key benefit of compliance. Many federal and state disaster relief programs require adherence to SEMS and NIMS as a prerequisite for receiving funds. AB 2140 allows local agencies to integrate their hazard mitigation plans into their general plans, making them eligible for additional financial relief. Demonstrating adherence to best practices also attracts grant funding and private investment, further bolstering financial resources.

5.2 **Legal and Regulatory Protection Through Compliance**

Legal and regulatory protection is a crucial benefit of adhering to established standards, providing agencies with a solid foundation to justify their actions in legal and regulatory contexts. Compliance with national best practices reduces liability risks by demonstrating due diligence, minimizing legal exposure, and mitigating costly disputes. It strengthens the legal justification for emergency decisions, ensuring that actions align with recognized frameworks and are defensible in court. By following regulatory guidelines, agencies reduce exposure to litigation and avoid claims of arbitrary decision-making, fostering public trust and operational consistency. Ultimately, compliance serves as a safeguard against legal challenges, allowing agencies to focus on effective emergency response and governance without the burden of legal uncertainties.

5.3 **Enhancing Disaster Response through Standardized Command Structures and Coordination**

Improved disaster response efficiency is directly tied to the establishment of standardized command structures. These structures provide a clear, organized framework for emergency personnel, ensuring that decision-making is streamlined and that all responders are operating with a shared understanding of their roles and responsibilities. The implementation of a standardized command system not only reduces confusion during a crisis but also allows for more rapid and effective decision-making. In addition, continuous training and preparedness efforts contribute to better response times and more coordinated efforts across all teams. When elected officials and emergency management professionals work closely together, the overall disaster response is strengthened, ensuring that the response is not only fast but also effective in meeting the needs of the community. By fostering a unified approach, agencies can better manage resources, communicate effectively, and ultimately minimize the impact of disasters on residents and critical infrastructure.

5.4 **Building Community Resilience and Economic Stability Through Effective Disaster Management**

Community resilience and economic stability are vital outcomes of a well-executed disaster management strategy. When disaster response and recovery efforts are carried out efficiently, recovery times are significantly reduced, minimizing economic disruptions. This allows businesses to resume operations quickly, ensuring that local economies remain functional. In addition, strengthening infrastructure and investing in preparedness measures help lower the long-term costs associated with disaster recovery, alleviating the financial strain on agencies. Effective disaster management provides a solid foundation for economic recovery by safeguarding local businesses, maintaining workforce stability, and protecting tax revenue streams. As a result, communities are better equipped to remain financially viable and continue to thrive, even in the aftermath of a disaster, promoting sustained growth and stability in the long run.

5.5 **Public Scrutiny, Loss of Confidence, and Political Fallout**
Failure to implement effective fiscal recovery and risk reduction measures can lead to significant public scrutiny, eroding trust in Agency. Poor financial recovery efforts can result in public outrage, creating pressure on leadership to justify their decisions and actions. Ineffective disaster management can also lead to political consequences, including loss of public office, diminished credibility, and reputational damage for staff and politicians. Moreover, failure to comply with state and federal regulations may trigger audits, funding withdrawal, and potential legal actions against the Agency.

5.6 **Enhancing Fiscal Recovery and Risk Reduction Through Regulatory Compliance**
Agency's commitment to adhering to the SEMS, NIMS, AB 2140, and national best practices plays a crucial role in strengthening its financial resilience and disaster recovery capabilities. By proactively integrating these frameworks into emergency management operations, agencies can ensure more efficient financial management, access critical funding opportunities, and minimize the risk of funding de-obligation. Compliance with these standards also streamlines disaster response and mitigation efforts, enabling agencies to respond swiftly and effectively to emergencies while reducing long-term recovery costs. Ultimately, these measures foster a more resilient and financially stable community, better equipped to withstand and recover from future disasters.

6. SPECIALIZATION IN THE FOUR PHASES OF EMERGENCY MANAGEMENT

Our expertise spans the four essential phases of emergency management, ensuring a proactive, coordinated, and effective approach to disaster preparedness, response, recovery, and mitigation. Emergency management is a dynamic and continuous process aimed at minimizing the impact of disasters, protecting lives and property, and strengthening community resilience.

By integrating the following four phases into a comprehensive emergency management strategy, we help agencies, organizations, and communities anticipate potential hazards, respond efficiently, and recover resiliently. Our approach is rooted in collaboration, innovation, and a deep commitment to ensuring safety and preparedness at every level, such as:

6.1 **Mitigation: Building a Resilient Foundation Through Proactive Mitigation and Strategic Planning**
Effective mitigation requires a proactive approach to addressing hazards, strengthening community resilience, and securing essential funding to support long-term risk reduction efforts. A strong disaster resilience foundation begins with identifying vulnerabilities, assessing potential threats, and implementing strategic planning measures that prioritize public safety and infrastructure protection. EMDUS plays a critical role in this process by conducting a comprehensive Hazard Identification and Risk Assessment (HIRA) for the Agency, ensuring that all potential risks are thoroughly analyzed and addressed. Through the integration of targeted mitigation strategies, such as infrastructure enhancements, land-use planning, and community education initiatives, EMDUS helps agencies reduce exposure to disasters, minimize financial losses, and create a safer, more resilient future, such as:

6.1.1 **Land Use Planning -** Land use planning and building codes play a critical role in disaster risk reduction by ensuring that developments align with safety regulations designed to minimize the impacts of natural and human-made disasters. Effective land use planning helps identify hazard-prone areas, guiding development away from regions susceptible to floods, earthquakes, wildfires, and other threats. By implementing zoning laws and

environmental assessments, agencies can control where and how structures are built, reducing vulnerabilities and enhancing community resilience.

6.1.2 **Building Codes -** Building codes complement land use planning by establishing construction standards that improve structural integrity and occupant safety. These regulations mandate the use of disaster-resistant materials, proper engineering techniques, and design features that mitigate risks associated with extreme weather events, seismic activity, and other hazards. Regular code updates based on scientific research and lessons learned from past disasters ensure that buildings remain resilient to emerging threats.

6.1.3 **Infrastructure Resilience -** Strengthening critical infrastructure is vital for community resilience and the continuity of essential services during disasters. Key systems like transportation, energy, water, and healthcare must withstand hazards such as earthquakes, floods, and cyberattacks. This requires hazard-resistant design, including seismic retrofitting, flood barriers, and smart grids, along with regular maintenance and risk assessments to prevent costly damage. Integrating technologies like real-time monitoring and predictive analytics enhances early detection and mitigation. By investing in resilient infrastructure, governments and organizations improve disaster preparedness, recovery capabilities, and long-term security for communities.

6.1.4 **Community Education -** Community education is crucial for promoting awareness and preparedness, ensuring that individuals and businesses understand risks and know how to respond effectively to disasters. Public outreach programs, workshops, and emergency drills help equip communities with the knowledge and skills needed to mitigate risks, develop emergency plans, and access critical resources. Schools, workplaces, and local organizations play a key role in spreading preparedness messages, while digital platforms and social media enhance real-time communication. By fostering a culture of awareness and readiness, community education empowers people to take proactive measures, reducing the overall impact of disasters and strengthening resilience.

6.1.5 **Environmental Management -** Environmental management plays a vital role in mitigating disaster risks by protecting and preserving natural resources that serve as natural barriers against hazards. Healthy ecosystems, such as wetlands, forests, and mangroves, help absorb floodwaters, reduce soil erosion, and buffer against extreme weather events. Sustainable land-use practices, reforestation efforts, and pollution control measures contribute to long-term environmental resilience, minimizing the impact of disasters like droughts, landslides, and wildfires. Additionally, integrating environmental conservation into disaster planning ensures that communities not only reduce their vulnerability but also promote sustainable development. By safeguarding natural resources, environmental management strengthens resilience and enhances the ability to withstand and recover from disasters.

6.1.6 **Enhancing Mitigation -** EMDUS plays a vital role in enhancing mitigation programs by helping agencies secure essential funding for disaster mitigation through expert guidance on grant applications and compliance. By assisting communities in identifying eligible projects, developing strong proposals, and aligning with federal and state funding criteria, EMDUS ensures access to key programs like FEMA's Hazard Mitigation Grant Program (HMGP), Building Resilient Infrastructure and Communities (BRIC), and the Flood Mitigation Assistance (FMA) program. Additionally, developing a Local Hazard Mitigation Plan (LHMP) enables communities to assess vulnerabilities, prioritize risks, and create strategic actions to reduce disaster impacts. An approved LHMP enhances eligibility for federal funding, supporting risk reduction projects that improve public safety, infrastructure resilience, and long-term community preparedness, such as:

6.1.6.1 **Building Resilient Infrastructure and Communities (BRIC)** – The BRIC program is a federal hazard mitigation initiative administered by the Federal Emergency Management Agency (FEMA). Designed to reduce risks before

disasters occur proactively, BRIC provides funding and resources to support state, local, tribal, and territorial (SLTT) governments in strengthening community resilience against natural hazards.

6.1.6.2 **Flood Mitigation Assistance (FMA)** – The FMA program is a federal grant initiative managed by FEMA. Designed to reduce or eliminate the risk of repetitive flood damage, FMA provides funding to SLTT governments for projects that help mitigate flood hazards in high-risk areas.

6.1.6.3 **Hazard Mitigation Grant Program (HMGP)** – The HMGP is a federal program administered by FEMA that provides funding to SLTT governments to implement long-term hazard mitigation measures. The goal of HMGP is to reduce the impact of future disasters, enhance community resilience, and decrease the reliance on federal disaster recovery assistance.

6.1.6.4 **Grants Coordination and Support** – Securing Funds for Risk Reduction. Grants during this phase focus on reducing risks and preventing future disasters. Key funding sources include:

6.1.6.4.1 **Hazard Mitigation Grant Program (HMGP)** – Provides funding to states, tribes, and local governments for long-term hazard mitigation projects that reduce disaster risks and protect lives and property.

6.1.6.4.2 **Emergency Management Performance Grant (EMPG)** – supports SLTT emergency management agencies in building and sustaining preparedness capabilities under the National Preparedness System.

6.1.6.4.3 **State Homeland Security Program (SHSP)** – Provides risk-based funding to support prevention, protection, mitigation, response, and recovery efforts against terrorism and other threats.

6.1.6.5 **California Assembly Bill 2140 (AB 2140) –** This legislation enhances cost-sharing opportunities under the California Disaster Assistance Act (CDAA) for communities that integrate their LHMP into the Safety Element of their General Plan, helping them secure additional funding for disaster resilience.

6.1.6.6 **Financial Implications of a Catastrophic Event and the Importance of Compliance –** A catastrophic earthquake can impose overwhelming financial burdens on an agency, with recovery costs soaring to unprecedented levels. Effective disaster response and recovery require substantial funding, often shared among Federal, State, and Local Governments. Below is an outline of potential disaster expenses and an example of the cost-sharing distribution to illustrate how these costs are allocated. However, agencies that fail to comply with California Assembly Bill 2140 risk losing access to essential financial relief, further exacerbating the economic strain caused by the disaster. Ensuring compliance with AB 2140 and other regulatory frameworks is crucial for securing the maximum available funding and mitigating the long-term fiscal impact of such catastrophic events. As an example, if a disaster costs the Agency $100,000,000.00 in response and recovery costs, the cost-shared reimbursement will be as follows:

COST SHARE	OVERALL COST SHARE
Total Disaster Cost to Agency:	$ 100,000,000.00
Federal Government Cost Share (75%) Pays:	$ 75,000,000.00
State Government Cost Share Pays (75% of the remaining 25%):	$ 18,750,000.00
Agency Cost Share Pays:	$ 6,250,000.00
Agency compliant with AB 2140, no cost to the Agency:	$ 0.00

Mitigation Conclusion: Strengthening Resilience Through Mitigation and Strategic Planning - Building a resilient foundation for communities requires a proactive and multi-faceted approach to

disaster mitigation, planning, and resource management. EMDUS plays a key role in enhancing long-term resilience by helping Agency identify vulnerabilities, develop hazard mitigation strategies, and secure essential funding through programs such as FEMA's HMGP, BRIC, and FMA. By integrating land use planning, building codes, infrastructure resilience, community education, and environmental management, we ensure that communities are better prepared to face future hazards. Through continuous support in grants coordination, compliance with state and federal regulations, and expert guidance, EMDUS helps agencies mitigate risks, reduce potential disaster impacts, and strengthen their financial capacity to respond to catastrophic events, ultimately fostering safer, more resilient communities.

6.2 **Preparedness: Comprehensive Preparedness for Effective Emergency Management**
Preparedness is a critical component of emergency management, requiring a proactive approach to planning, training, and resource management. This involves developing comprehensive Emergency Operations Plans (EOPs), conducting training programs and exercises, enhancing public education and communication strategies, and establishing mutual aid agreements with neighboring agencies to strengthen response capabilities. To ensure operational readiness, EMDUS provides a full suite of preparedness services designed to help Agency meet the requirements of the California Emergency Services Act while enhancing their overall emergency response capabilities. Through strategic planning, training, and resource coordination, EMDUS ensures that agencies are fully equipped to handle emergencies effectively, minimizing risks and improving disaster response outcomes:

6.2.1 **Strategic Planning and Continuous Improvement –** Plan development in emergency management is the structured process of creating, organizing, and refining comprehensive response strategies to address potential disasters and emergencies. Plan Maintenance and Continuous Improvement by regularly reviewing and updating emergency plans based on new threats or incidents, policy changes, and technological advancements.

6.2.2 **Specialized Readiness Training for Critical Roles –** Specialized readiness training for critical roles focusing on high-risk, complex, or technical aspects of disaster response that require enhanced knowledge, hands-on practice, and often certifications to ensure effectiveness in real-world emergencies. Enhances operational effectiveness and ensures that responders execute their roles with precision under extreme conditions.

6.2.3 **Enhancing Public Trust and Confidence –** Enhancing public trust and confidence is essential for effective emergency management, as it reassures communities that response teams are well-prepared and capable of handling crises. When response teams undergo rigorous training, simulations, and continuous professional development, it demonstrates their commitment to protecting public safety. This preparedness not only ensures a quicker, more efficient response during emergencies but also fosters a sense of security and trust within the community. By showcasing their expertise and readiness, response teams can gain public confidence, strengthen community resilience, and ensure a more coordinated, effective response in times of crisis.

6.2.4 **Validating Preparedness Through Exercises –** Validating preparedness through exercises is a crucial component of emergency management, as it allows agencies to test, evaluate, and refine response plans, operational procedures, and interagency coordination in a controlled environment before a real-world disaster strikes. These exercises simulate various disaster scenarios, providing valuable insights into the effectiveness of response strategies and highlighting areas for improvement. By engaging in regular drills and tabletop exercises, agencies can identify gaps in communication, resource allocation, and decision-making processes, ensuring that teams are better prepared and more efficient when responding to actual emergencies.

This proactive approach strengthens overall readiness, reduces response times, and enhances the effectiveness of disaster management efforts.

6.2.5 **Strengthening Response Through Simulation -** Strengthening response through simulation is vital for improving emergency preparedness, as it allows agencies to identify gaps, weaknesses, and areas for improvement in their response efforts. These exercises create a controlled environment where participants can practice their specific roles, test communication systems, and refine decision-making processes without the stress and chaos of a real disaster. By simulating various emergency scenarios, agencies can assess their readiness, evaluate the effectiveness of operational procedures, and strengthen coordination between teams and organizations. This proactive approach ensures that when a real emergency occurs, response teams are better equipped, more efficient, and capable of managing complex situations effectively.

6.2.6 **Empowering Communities Through Education and Training –** Empowering communities through education and training enhances disaster preparedness by fostering active engagement and collaboration among residents, volunteers, and homeowners' associations (HOAs). The Community Emergency Response Team (CERT) Training Program is a key tool in this effort, providing individuals with essential skills and hands-on training to respond effectively in emergencies. By educating community members on topics like basic first aid, fire safety, search and rescue, and emergency communication, CERT ensures that local populations are better prepared to handle disasters independently or in coordination with emergency responders. This proactive approach not only strengthens public resilience but also builds a culture of preparedness and mutual support, ultimately improving community-wide disaster response and recovery efforts.

Preparedness Conclusion: **Strengthening Emergency Preparedness for Effective Response -** Comprehensive preparedness is the cornerstone of effective emergency management, ensuring that Agencies are equipped to respond to disasters with efficiency and confidence. EMDUS supports this by providing strategic planning, specialized training, and exercises that improve operational readiness and resource coordination. Through continuous improvement of emergency plans, hands-on training for critical roles, and empowering communities through education, EMDUS strengthens public trust and ensures that response teams are always prepared for the unexpected. Our commitment to validating preparedness through exercises and simulations further enhances response capabilities, ensuring that agencies are well-prepared to face real-world challenges. Ultimately, these proactive measures foster a resilient and well-coordinated emergency management system that minimizes risks and improves disaster response outcomes.

6.3 **Response: Effective Coordination Through Established Response Frameworks**

Response efforts are streamlined and coordinated through the use of standardized systems such as the Incident Command System (ICS), SEMS, and NIMS. These frameworks enable the efficient activation of the Emergency Operations Center (EOC), ensuring a well-organized and effective response to emergencies.

6.3.1 **Supporting Field Activities During a Catastrophic Event -** During a catastrophic event, it is crucial for the Agency's EOC to provide vital support to field activities, ensuring coordinated and effective response efforts. This includes managing and supporting operations like urban search and rescue, medical response, and evacuation planning, which require seamless communication and resource allocation. The EOC facilitates real-time information sharing, enabling first responders and partner agencies to make informed decisions quickly. Additionally, the EOC plays a key role in implementing public safety measures, such as sheltering displaced populations and activating alert and warning systems to keep the public informed and safe. This centralized coordination

ensures that field operations are well-supported and the overall response is efficient and organized. When disaster strikes, a swift and coordinated response is essential. Our 24/7 Duty Officer Program ensures immediate action, providing reliable emergency response around the clock. Backed by experienced personnel, strong agency partnerships, and advanced response equipment, we are committed to protecting communities with readiness and expertise.

6.3.2 **Dedicated On-Call Duty Officers: Always Ready -** EMDUS maintains a team of highly trained duty officers who are on standby 24/7, 365 days a year, ensuring that no emergency goes unanswered. Whether responding to natural disasters like wildfires and floods, or managing hazardous material spills and other critical incidents, our duty officers are always ready to assess the situation, mobilize resources, and coordinate an immediate response. With their expertise and availability around the clock, EMDUS ensures that communities receive timely, efficient assistance whenever emergencies arise, reinforcing public safety and rapid recovery.

6.3.3 **Building Strong Partnerships for Effective Disaster Response -** Effective disaster response depends on strong collaboration among various agencies and organizations. EMDUS works closely with key emergency partners, including the Riverside County Sheriff's Office, CAL FIRE/Riverside County Fire, county departments, utilities, school districts, local and tribal governments, and private and non-profit organizations. These partnerships enhance coordination by streamlining communication, improving resource sharing, and ensuring a unified approach to emergency operations. By fostering strong interagency relationships, EMDUS strengthens overall preparedness and response efforts, enabling a more efficient and effective disaster management system that benefits the entire community.

6.3.4 **Expert Emergency Operations Center (EOC) Management -** In times of crisis, a well-coordinated EOC serves as the backbone of an effective response, ensuring seamless communication and decisive action. EMDUS specializes in expert EOC management, transforming it into a centralized hub for coordination and operational efficiency. With Agency's support, we help ensure the EOC is staffed with trained personnel in key roles, utilizing streamlined processes to maintain control in rapidly evolving situations. By enhancing organization, resource management, and real-time decision-making, our approach strengthens the EOC's ability to respond effectively to any emergency, safeguarding communities and critical infrastructure.

6.3.5 **Optimizing Staff and Enhancing Situational Awareness –** EMDUS prioritizes optimizing existing staff by ensuring that key emergency management roles—from the Director of Emergency Services to logistics specialists—are filled by trained professionals who can effectively execute their responsibilities. By leveraging advanced tools such as GIS mapping, real-time data tracking, and WebEOC resource management systems, we enhance situational awareness and decision-making capabilities. These technologies provide a clear, real-time picture of evolving incidents, allowing leadership to visualize critical information, coordinate responses efficiently, and deploy resources where they are needed most. This strategic approach strengthens emergency operations, ensuring a swift and effective response to any crisis. EMDUS ensures that information flows seamlessly across agencies and up to the Operational Area, fostering a unified and proactive response. Whether managing natural disasters, public health emergencies, or large-scale security incidents, our specialized EOC management services empower organizations to respond rapidly, mitigate risks, and support the community.

6.3.6 **Public Information and Crisis Communication -** Effective communication is critical during emergencies, ensuring that the public receives timely, accurate, and actionable information. EMDUS's Public Information & Crisis Communication Team collaborates with the Agency 's Public Information Officer (PIO) to maintain clear and consistent

messaging across all platforms. This includes facilitating press briefings, managing social media updates, issuing emergency alerts, and coordinating with media and community leaders. By proactively addressing public concerns and preventing misinformation, our team helps build trust, enhance preparedness, and ensure that communities stay informed and responsive during crises.

Response Conclusion: Ensuring Coordinated and Efficient Disaster Response - In times of crisis, effective coordination and seamless communication are critical to managing and mitigating the impacts of a disaster. EMDUS excels in providing structured support through established response frameworks like ICS, SEMS, and NIMS, which streamline the activation of Emergency Operations Centers (EOCs) and ensure efficient resource allocation and decision-making. Our dedicated duty officers, expert EOC management, and strong partnerships with key agencies ensure timely, coordinated responses to emergencies. By optimizing staff roles, enhancing situational awareness, and facilitating crisis communication, EMDUS strengthens overall disaster response efforts, helping communities recover more quickly and efficiently. Through these comprehensive efforts, we ensure that agencies are well-prepared and capable of handling any crisis with confidence.

6.4 **Recovery: Comprehensive Disaster Recovery and Resilience**

EMDUS plays a vital role in guiding communities through the recovery process by coordinating damage assessments, facilitating financial assistance, and ensuring the swift restoration of critical infrastructure and services. Our approach includes implementing business continuity and economic recovery strategies to help local economies rebound while planning for long-term community rebuilding and resilience. Additionally, we prioritize mental health and social services support, recognizing the lasting impact disasters have on individuals and families. By providing structured recovery efforts and fostering resilience, EMDUS helps communities rebuild stronger, ensuring they are better prepared for future challenges.

6.4.1 **Strengthening Communities Through Resilient Recovery -** Resilient rebuilding is just as essential as preparedness, ensuring that communities recover effectively and emerge stronger after a disaster. EMDUS supports this process by integrating safer building practices, sustainable solutions, and risk-reduction strategies into recovery efforts. By focusing on long-term resilience, we help communities not only restore what was lost but also enhance their ability to withstand future challenges.

6.4.2 **Securing Vital Disaster Recovery Funding -** EMDUS has a proven track record of successfully securing essential recovery reimbursement. Through our expertise in navigating the State and Federal reimbursement processes and meeting compliance requirements, we help communities obtain the necessary funding to support disaster response and short and long-term recovery efforts.

6.4.3 **Expertise in FEMA and State Compliance Requirements -** EMDUS possesses in-depth knowledge of FEMA and state reimbursement compliance requirements, ensuring that disaster recovery-eligible projects meet all necessary standards. Our team navigates complex regulations and guidelines, helping to maintain and secure eligibility for vital disaster recovery reimbursement.

6.4.4 **Hands-On Support for Disaster Recovery and Operational Readiness -** EMDUS provides hands-on support to ensure ongoing disaster recovery reimbursement success through continuous training, exercises, and maintaining operational readiness. This proactive approach enhances skills, fosters collaboration, and strengthens overall recovery efforts, ensuring communities are ready to bounce back quickly when disaster strikes.

6.4.5 **Collaborative Community Engagement and Recovery -** EMDUS emphasizes a collaborative approach to community engagement and recovery, working closely with local governments, organizations, and residents. By fostering strong partnerships and open communication, we ensure that recovery efforts reflect the needs and priorities of the community. This inclusive process strengthens resilience, accelerates recovery, and ensures that all stakeholders are actively involved in rebuilding and improving their environment.

6.4.6 **Maximizing Disaster Recovery Funding -** No agency is equipped with a dedicated budget for disaster response, and financial constraints often limit available resources. EMDUS understands the importance of recovering funds spent during disaster events. The Disaster Recovery process involves identifying, documenting, and submitting eligible expenses for reimbursement, ensuring that agencies are not left to bear the full financial burden of response and recovery efforts. This approach helps alleviate fiscal pressures and supports long-term resilience.

6.4.6.1 **Ensuring Maximum Disaster Reimbursement Recovery -** As detailed in section 6.1.6.6, agencies have access to various cost-sharing options that can substantially offset disaster-related expenses. However, without careful tracking and documentation, agencies may miss out on millions of dollars in potential reimbursements. To mitigate this risk, EMDUS provides dedicated support through an EMD Recovery Specialist. This specialist helps navigate the complexities of disaster reimbursement, ensuring compliance with funding requirements and optimizing the financial recovery process to maximize reimbursements.

6.4.6.2 **Turning Disaster Recovery into Financial Resilience -** Successful disaster recovery not only aids in restoring communities but also leads to revenue generation by recouping funds spent on response and recovery efforts. By effectively leveraging reimbursement processes, agencies can recover costs and return critical resources to their budgets. This strengthens their financial resilience, ensuring that funds are available for future emergency response needs and helping maintain long-term preparedness and recovery capabilities.

6.4.6.3 **Proactive Financial Preparedness for Disaster Response -** In addition to post-disaster reimbursement, pre-disaster financial preparedness is crucial for ensuring that agencies are ready to meet evolving eligibility requirements. The EMDUS representative works closely with agencies' staff to stay ahead of changing funding policies and eligibility criteria, helping to position agencies for success before the next disaster strikes. This proactive approach ensures that resources are available when needed and that they are fully prepared for future response efforts.

Conclusion: Strengthening Financial Resilience for Future Disasters - By establishing robust financial tracking, documentation, and compliance practices, EMDUS ensures that agencies are not only prepared to recover funds after a disaster but also positioned to meet evolving eligibility requirements for future funding opportunities. This proactive approach minimizes financial strain, helps agencies capitalize on available resources, and strengthens long-term resilience. With the right preparedness measures in place, communities can ensure they are ready to respond effectively and recover quickly when the next disaster strikes, reinforcing their ability to protect public safety and recover swiftly.

7. Strengthening Leadership and Multi-Agency Coordination

EMDUS goes beyond the essential phases of emergency management by offering expert leadership support to ensure streamlined and effective operations. We focus on establishing clear roles and responsibilities, defining the authority of emergency management personnel, and ensuring full

compliance with ICS, SEMS, and NIMS standards for seamless coordination. Our approach encourages strong collaboration across multiple agencies, including law enforcement, fire services, EMS, public health, public works, and local government—while also developing mutual aid agreements. We ensure efficient coordination with state and federal agencies, such as CalOES, FEMA, and DHS, for compliance and additional support when needed.

7.1 **Access to Exclusive Resources -** Partnering with EMDUS grants Agency access to exclusive resources, including automatic inclusion in critical projects such as the LHMP and EOP. Additionally, Agency will benefit from opportunities for grant funding, disaster recovery resources, and specialized training programs. Your assigned ESC also serves as an EMD Duty Officer, bringing real-world expertise and applying best practices from **large-scale** incidents to enhance your emergency preparedness.

7.2 **Commitment to Public Service Excellence -** At EMDUS, our foremost priority is to serve the public with dedication, integrity, and efficiency. We are committed to delivering professional, transparent, and effective emergency management support to ensure that communities are well-prepared for any crisis. Our mission is to enhance the readiness of your agency by providing the necessary resources, expertise, and strategies to strengthen resilience and safeguard lives. Through proactive planning, rapid response, and continuous collaboration, we strive to build a safer, more resilient future for all.

7.3 **Agency's First Approach -** Your assigned EMDUS Personnel is dedicated primarily to the Agency, ensuring you are fully prepared to respond to and recover from emergencies. However, as part of a mutual aid framework, your EMDUS Personnel may occasionally be deployed to assist in regional disaster response efforts. This opportunity enhances their expertise and brings valuable lessons back to Agency, further improving preparedness and response.

7.4 **Extensive Support Network**
EMDUS provides not just assigned personnel, but also access to an extensive support network, including EMD supervisors, managers, and specialized personnel in grant management, disaster recovery, training, and exercises. This partnership ensures that Agency remains at the forefront of emergency management's best practices, benefiting from the full breadth of our resources and expertise.

7.5 **High Professional Standards and Support -** EMDUS personnel operate under the highest professional standards, with oversight and support from the County. The County provides standard emergency management equipment, and -specific needs can be accommodated at the Agency's expense. The EMDUS personnel are equipped with a fully maintained emergency response vehicle, ready to respond to incidents within the assigned area. The Agency is responsible for providing office space, equipment, supplies, and Agency-labeled attire (e.g., polo) to ensure EMDUS Personnel appropriately represent the Agency. Personnel will be available per your contracted service level, responding promptly to local incidents and coordinating with regional partners as needed.

7.6 **Commitments -** The success of EMDUS personnel in executing their assigned projects hinges on the full support of the Leadership. Their involvement is vital in providing strategic direction, addressing challenges, and securing the necessary resources for successful implementation.

7.7 **Formal Work Plan Sign-off -** A key element of this support is the formal sign-off on the three-year Agency work plan. This plan serves as a roadmap for aligning priorities, optimizing workflows, and achieving long-term goals. Establishing clear, measurable, and achievable objectives within this period is essential for ensuring progress and accountability.

7.8 **Annual Collaboration Meeting for Enhanced Partnership -** EMD Executive staff values open communication and collaboration with the Agency's Executive staff and believes that regular meetings are essential to maintaining a strong, productive relationship. Therefore, we propose meeting with members of the Executive staff at least once per year. These meetings will provide an opportunity to touch base on ongoing initiatives, discuss evolving needs or concerns, and ensure alignment in working toward shared goals. By fostering open dialogue, we can better understand

each other's expectations, identify areas for improvement, and continuously work to exceed those expectations, thereby strengthening our partnership and enhancing overall effectiveness.

7.9 **Quarterly Engagement for Continuous Improvement -** Leadership and EMDUS personnel must collaborate regularly through quarterly meetings to review ongoing initiatives, assess progress toward established goals, identify potential obstacles, and determine how leadership can provide the necessary support for successful project completion. This consistent engagement will help maintain alignment with the work plan, reinforce leadership's commitment, and ensure all stakeholders work cohesively to achieve the intended outcomes effectively.

Let EMDUS strengthen your Operational Area's readiness.

By choosing EMDUS, your **Operational Area** gains more than an emergency management provider—it gains a dedicated ally committed to protecting public safety, ensuring compliance, and enhancing disaster response and recovery capabilities. Let us handle the complexities of emergency management while you focus on leading your community with confidence.

EXHIBIT B

PAYMENT PROVISIONS

The Agency shall compensate the County for quarterly EMDUS, as set forth below.

1. Summary of Compensation for EMDUS:
The chart below summarizes the annual rates the County will charge for services under this Agreement. The Agency's selected option is specified therein.

To ensure Agencies receive the appropriate level of support for their emergency management needs, EMDUS offers a range of service levels tailored to different levels of engagement and operational requirements. Each service level outlines the dedicated time an assigned EMDUS personnel will spend working within the Agency, with additional hours as needed and available. Below is a breakdown of each level of service:

1.1 Service Level I (100%) – EMDUS personnel that are assigned to the Agency will, provide 40 hours of on-site service per week. Any additional hours worked beyond the standard 40-hour week on behalf of the Agency will be invoiced at the personnel's hourly rate**.**

OPTION (X)	ITEM DESCRIPTION	QUARTER 1 JUL-SEP	QUARTER 2 OCT-DEC	QUARTER 3 JAN-MAR	QUARTER 4 APR-JUN	TOTAL
☐	Service Level I @ 100% (40 hrs/wk)	$ 48,750.00	$ 48,750.00	$ 48,750.00	$ 48,750.00	$ 195,000.00

1.2 Service Level II (75%) – EMDUS personnel that are assigned to the Agency will provide 30 hours of on-site service per week. Any additional hours worked beyond 30 hrs. within a 40-hour week on behalf of the Agency will be invoiced for that time at the personnel's actual hourly rate.

OPTION (X)	ITEM DESCRIPTION	QUARTER 1 JUL-SEP	QUARTER 2 OCT-DEC	QUARTER 3 JAN-MAR	QUARTER 4 APR-JUN	TOTAL
☐	Service Level II @ 75% (30 hrs/wk)	$ 36,562.50	$ 36,562.50	$ 36,562.50	$ 36,562.50	$ 146,250.00

1.3 Service Level III (50%) – EMDUS personnel that are assigned to the Agency will provide 20 hours of on-site service per week. Any additional hours worked beyond 20 hrs. within a 40-hour week on behalf of the Agency will be invoiced at the personnel's hourly rate.

OPTION (X)	ITEM DESCRIPTION	QUARTER 1 JUL-SEP	QUARTER 2 OCT-DEC	QUARTER 3 JAN-MAR	QUARTER 4 APR-JUN	TOTAL
☒	Service Level III @ 50% (20 hrs/wk)	$ 24,375.00	$ 24,375.00	$ 24,375.00	$ 24,375.00	$ 97,500.00

1.4 Service Level IV (25%) – EMDUS personnel that are assigned to the Agency will provide 10

hours of on-site service per week. Any additional hours worked beyond 10 hrs. within a 40-hour week on behalf of the Agency will be invoiced at the personnel's hourly rate.

OPTION (X)	ITEM DESCRIPTION	QUARTER 1 JUL-SEP	QUARTER 2 OCT-DEC	QUARTER 3 JAN-MAR	QUARTER 4 APR-JUN	TOTAL
☐	Service Level IV @ 25% (10 hrs/wk)	$ 12,187.50	$ 12,187.50	$ 12,187.50	$ 12,187.50	$ 48,750.00

2. **Overtime or Extraordinary Costs –** These are not included in the established rate. Overtime and extraordinary costs shall be calculated at 1.5 times the current employee rate for EMD staff. They must receive prior approval from the Agency's authorized agent and the employee's supervisor.

Service Level	Hours Per Week	Total Weekly Commitment	Estimated Completion Time (52-Week Basis)	Additional Staff Required to complete plan in 1 Year *(Agency)*
100% (Full-Time)	**40 hours**	**1 FTE**	**Min. 12 months**	**0 FTE**
75% (Part-Time High)	**30 hours**	**.75 FTE**	**Min. 18 months**	**Min. .25 FTE**
50% (Part-Time Moderate)	**20 hours**	**.50 FTE**	**Min. 21 months**	**Min. .50 FTE**
25% (Part-Time Low)	**10 hours**	**.25 FTE**	**Min. 24 months**	**Min. .75 FTE**

3. **Fuel/Mileage:**
If ABH is requested, a fuel and mileage rate shall be applied for travel necessary to perform services to the Agency. This rate is in accordance with the current IRS "Standard Mileage Rate" and is subject to periodic review and adjustment under applicable laws, industry standards, and fluctuating fuel costs. This rate is intended to cover fuel costs, vehicle wear and tear, and other travel-related expenses incurred during service-related travel. Mileage shall be calculated based on the most direct route from the starting location to the service destination and back.

4. **Invoicing:**
The County will invoice the Agency at the end of each quarter. The payment is due by the 20th of the following month as follows:
   - Quarter 1 (July 1- September 30) - due October 30th
   - Quarter 2 (October 1- December 31) - due January 30th
   - Quarter 3 (January 1- March 31) - due April 30th
   - Quarter 4 (April 1 - June 30) - due July 30th

EXHIBIT C
WORKPLAN DEVELOPMENT AND IMPLEMENTATION

1. **Agency Workplan Development and Implementation**

This timeline has been designed to establish clear expectations for each Agency regarding developing emergency management plans. It assumes that full-time equivalent (100%) EMDUS personnel lead the process, with multiple departments contributing to specific sections. Following FEMA's Comprehensive Preparedness Guide (CPG 101) and the California Office of Emergency Services Crosswalk, the process ensures compliance with federal and state emergency management standards while optimizing efficiency through interdepartmental collaboration. Given the full-time commitment of the EMDUS personnel and the engagement from multiple departments, the timeline duration is twelve (12) months. This structure allows for comprehensive research, iterative drafting, meaningful stakeholder engagement, and rigorous compliance review. It balances the need for thorough planning with the expectation of timely completion, ensuring Agency meets the regulatory requirements while maintaining operational readiness; however, the information below may not consider significant interruptions or low participation levels from key staff in the planning process.

2. Emergency Operation Plan Development Phases & Timeline

This timeline provides a structured approach for an Emergency Operations Plan (EOP), Local Hazard Mitigation Program (LHMP), Continuity of Operations/Government (COOP/COG), etc., with a 100% Full-Time Emergency Manager leading development and multiple departments assisting in writing specific sections.

Plan Development Phases & Timeline (12 Months – 100% Full-Time EM with Department Support)

PHASE	KEY ACTIONS	ESTIMATED TIMELINE
Phase 1: Project Initiation & Stakeholder Engagement	Form the EOP Planning Team: - Assign roles and responsibilities - Review CPG 101 & Cal OES Crosswalk for alignment - Identify key departments and external agencies for collaboration	**Months 1-2**
Phase 2: Hazard & Risk Assessment	Review Local Hazard Mitigation Plan (LHMP): - Conduct Threat and Hazard Identification and Risk Assessment (THIRA) - Identify capability gaps & vulnerabilities - Gather hazard-specific data for wildfires, flooding, earthquakes, rail incidents, hazardous materials, etc.	**Months 3-4**
Phase 3: EOP Framework & Section Assignments	Develop the EOP framework (Basic Plan, Functional Annexes, Hazard-Specific Annexes): - Assign specific sections to Fire, Law Enforcement, Public Works, Utilities, Public Health, and Emergency Management - Cross-reference with Cal OES Crosswalk for compliance	**Months 5-6**
Phase 4: Writing the EOP – Basic Plan	Emergency Manager drafts the Basic Plan (Purpose, Concept of Operations, Roles & Responsibilities): - Develop organizational structure and incident command framework - Integrate emergency communication and coordination procedures	**Months 6-7**
Phase 5: Writing the EOP – Functional Annexes	Departments draft their respective Functional Annexes (e.g., Communications, Evacuations, Mass Care, Public Health, Resource Management, etc.): - Annex content aligns with departmental coordination and response procedures - Establish activation triggers and operational steps for each function	**Months 8-9**
Phase 6: Writing the EOP – Hazard-Specific Annexes	Departments draft Hazard-Specific Annexes (e.g., Wildfires, Flooding, Rail Incidents, Hazardous Materials, Earthquakes): - Integrate mitigation strategies and response protocols - Include mutual aid coordination and external agency response roles	**Months 10-11**
Phase 7:	Conduct an EOP Planning Team review of the complete draft:	**Month 11**

Internal Review & Compliance Check	- Ensure compliance with FEMA, Cal OES, and NIMS/ICS standards - Submit for peer review (Riverside County EMD or partner agency)	
Phase 8: Agency Approval & Adoption	Present final EOP to Agency approving body for approval: - Obtain required signatures from city leadership - Officially adopt and distribute the EOP	**Month 12**
Phase 9: Training & Public Outreach	Develop and deliver training for Agency staff, first responders, and key stakeholders: - Conduct community preparedness outreach (CERT, businesses, schools) - Plan annual exercises and drills to validate EOP procedures	**Ongoing after adoption**

3. Emergency Operation Plan Development Phases & Timeline

The table below outlines the distinct phases of the planning process, the key actions required within each phase to achieve its objectives, and the estimated timeline detailing the expected duration, sequence of phases, and milestones necessary to complete the Emergency Operations Plan (EOP). This planning framework can also be applied to other major plans, including but not limited to the Local Hazard Mitigation Plan (LHMP) and Continuity of Operations/Continuity of Government (COOP/COG) plans, etc.

The process follows FEMA's Comprehensive Preparedness Guide (CPG 101) and the Cal OES Crosswalk,
ensuring compliance with federal and state emergency management standards while maximizing efficiency through interdepartmental collaboration.

Due to the part-time schedule and multi-departmental involvement, the timeline is over 18 months, allowing for thorough research, drafting, stakeholder engagement, and compliance review while accommodating limited working hours.

This timeline provides a structured approach for an Emergency Operations Plan (EOP), Local Hazard Mitigation Program (LHMP), Continuity of Operations/Government (COOP/COG), etc., with a 50% Part-Time Emergency Manager leading development and multiple city departments assisting in writing specific sections.

Plan Development Phases & Timeline (18 Months – 50% Part-Time EM with Department Support)

Phase	Key Actions	Estimated Timeline
Phase 1: Project Initiation & Stakeholder Engagement	Form the EOP Planning Team: Assign roles and responsibilities Review CPG 101 & Cal OES Crosswalk for alignment Identify key departments and external agencies for collaboration	**Months 1-3**
Phase 2: Hazard & Risk Assessment	Review Local Hazard Mitigation Plan (LHMP): Conduct Threat and Hazard Identification and Risk Assessment (THIRA) Identify capability gaps & vulnerabilities Gather hazard-specific data for wildfires, flooding, earthquakes, rail incidents, hazardous materials, etc.	**Months 4-6**
Phase 3: EOP Framework & Section Assignments	Develop the EOP framework (Basic Plan, Functional Annexes, Hazard-Specific Annexes): - Assign specific sections to Fire, Law Enforcement, Public Works, Utilities, Public Health, and Emergency Management Cross-reference with Cal OES Crosswalk for compliance	**Months 7-8**
Phase 4: Writing the EOP – Basic Plan	Emergency Manager drafts the Basic Plan (Purpose, Concept of Operations, Roles & Responsibilities):	**Months 9-10**

	- Develop organizational structure and incident command framework Integrate emergency communication and coordination procedures	
Phase 5: Writing the EOP – Functional Annexes	Departments draft their respective Functional Annexes (e.g., Communications, Evacuations, Mass Care, Public Health, Resource Management, etc.): - Annex content aligns with departmental coordination and response procedures Establish activation triggers and operational steps for each function	**Months 11-13**
Phase 6: Writing the EOP – Hazard-Specific Annexes	Departments draft Hazard-Specific Annexes (e.g., Wildfires, Flooding, Rail Incidents, Hazardous Materials, Earthquakes): - Integrate mitigation strategies and response protocols Include mutual aid coordination and external agency response roles	**Months 14-16**
Phase 7: Internal Review & Compliance Check	Conduct an EOP Planning Team review of the complete draft: - Ensure compliance with FEMA, Cal OES, and NIMS/ICS standards Submit for peer review (Riverside County EMD or partner agency)	**Month 17**
Phase 8: Agency Approval & Adoption	Present final EOP to Agency approving body for approval: - Obtain required signatures from city leadership Officially adopt and distribute the EOP	**Month 18**
Phase 9: Training & Public Outreach	Develop and deliver training for Agency staff, first responders, and key stakeholders: - Conduct community preparedness outreach (CERT, businesses, schools) - Plan annual exercises and drills to validate EOP procedures	**Ongoing after adoption**

To meet timeline expectations, it is essential for departments to actively participate and comply with established deadlines throughout the Emergency Operations Plan (EOP) process. Timely engagement ensures that critical information, resource assessments, and operational responsibilities are accurately documented and incorporated into the plan. Departments must provide input, review draft sections, and complete assigned tasks within designated timeframes to prevent delays that could impact overall preparedness and compliance with regulatory requirements. Consistent participation also allows for effective coordination between agencies, ensuring that dependencies and response capabilities are aligned. By adhering to deadlines, departments contribute to a structured, efficient planning process, ultimately strengthening the Agency's ability to respond to and recover from emergencies.

SUBMITTAL TO THE BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA

ITEM: 3.10
(ID # 27471)
MEETING DATE:
Tuesday, May 06, 2025

FROM : EMERGENCY MANAGEMENT DEPARTMENT

SUBJECT: EMERGENCY MANAGEMENT DEPARTMENT: Approve the Emergency Management Partnership Agreement Template and Assistance by Hire Template, Authorize the Director of Emergency Management Department (EMD) to Execute Agreements with Entities in the County of Riverside for Emergency Coordinator Services, All Districts. [100% Local Funds].

RECOMMENDED MOTION: That the Board of Supervisors:

1. Approve the Emergency Management Partnership Agreement template and authorize the Emergency Management Department (EMD) Director, or his/her designee, to sign, on behalf of the County, agreements with entities in the County of Riverside, in substantially the same form as the attached Emergency Management Partnership Agreement template and as approved as to form by County Counsel, for Emergency Services Coordinator (ESC) Services from July 1, 2025 to June 30, 2028 or other period within that timeframe; and
2. Approve the Assistance by Hire Agreement template and authorize the Emergency Management Department (EMD) Director, or his/her designee, to sign, on behalf of the County, agreements with entities in the County of Riverside, in substantially the same form as the attached Assistance by Hire Agreement template and as approved as to form by County Counsel; and
3. Authorize the EMD Director, or his/her designee, to sign amendments to the agreements that stay within the intent and maximum term of the agreement, including allowing an entity to change between the options set forth in Exhibit B of the Emergency Management Partnership Agreement, as approved as to form by County Counsel; and
4. Approve the EMD Assistance by Hire (ABH) rates, attached hereto, for maximum hourly rate, overtime rate, and administrative costs, which will cover any overtime or extraordinary costs: (1) outside of the established rates set forth in Exhibit B (Payment Provisions) of the Agreement, and (2) for the invoicing of non-contract cities for services requested from EMD.

			For Fiscal Year: 25/26-27/28	

C.E.O. RECOMMENDATION: Approve

BACKGROUND:

Summary

On July 7, 2021, Item 3.10, the Board of Supervisors (Board) approved the Emergency Management Department (EMD) Partnership Agreement (Agreement) that allows the Emergency Management Department to offer direct Emergency Management Services to partners. The Partnership Agreement evaluates the need for a successful Emergency Management (EM) Program that includes all four phases of Emergency Management. The EM Services include but are not limited to four phases in Emergency Management: mitigation, preparedness, response and recovery.

On June 6, 2024, Item 3.14, the Board of Supervisors approved the Emergency Management Department (EMD) Partnership Agreements that allowed the Emergency Management Department an extension that was approved for an additional 1-year term.

This new Agreement serves to extend and refine the initial scope for a successful EM Program that includes all four phases of Emergency Management. With a basis on regulatory compliance and improved fiscal recovery and risk reduction, the EM Services include but are not limited to the four phases in Emergency Management of mitigation, preparedness, response and recovery.

There are four options for entities to choose from:

OPTION (X)	ITEM DESCRIPTION	TOTAL
☐	**Jurisdictional Service Level I 1 ESC**	**$ 195,000.00**
☐	**Jurisdictional Service Level II .75 ESC**	**$ 146,250.00**
☐	**Jurisdictional Service Level III .5 ESC**	**$ 97,500.00**

☐	**Jurisdictional Service Level IV .25 ESC**	**$ 48,750.00**

The above options allow each entity to create their ideal level of service while enabling the County to achieve a full cost recovery for services as they are provided. EMD is currently partnered with 14 entities, and the extension of this new agreement will allow those entities to continue the valuable work they have achieved in their respective EM Programs.

The Auditor-Controller's Office (ACO) reviewed the proposed rates and determined that the rates recover the full cost of providing services to contracting entities. A full cost recovery rates analysis will need to be reviewed by the ACO at the end of the 3rd year of the agreement to ensure the following: 1) a reasonable methodology has been adopted to calculate the rate for services, and 2) the cost used to calculate the rates are an actual reflection of the full cost on an ongoing basis.

The actions before the Board include delegating authority to the EMD Director or his or her designee to execute agreements with entities in the County, consistent with the attached template Agreement, and to execute amendments to those agreements, to the extent an entity elects to change service options during the term of the agreement, as approved as to form by County Counsel. The attached template Agreement has been approved as to form by County Counsel.

Impact on Residents and Businesses

Emergency services personnel dedicated to serving the entities will enhance the preparedness and response capabilities of the entities and residents in case of an emergency or natural disaster.

Additional Fiscal Information

The Agreements do not cover any extraordinary costs, such as overtime. Assistance by Hire (ABH) rates attached hereto set forth the maximum hourly rate, overtime rate, and administrative costs, and they are in line with the current County of Riverside cost allocation plan. Approval of these rates will ensure the coverage of any overtime or extraordinary costs outside of the established rates set forth in Exhibit B (Payment Provisions) of the Agreement and the rates for invoicing non-contract entities for services requested from EMD.

FUNCTIONAL MATRIX OF RESPONSIBILITIES

DESCRIPTION OF WORK - MITIGATION PHASE

Grants Management

Grants management" in emergency management refers to the process of administering and overseeing federal funds, typically provided by FEMA (Federal Emergency Management Agency), that are allocated to state, local, and tribal governments to enhance their emergency preparedness, response, and recovery capabilities through various grant programs like the Emergency Management Performance Grant (EMPG) - essentially managing the application, distribution, and accountability of these funds for disaster mitigation and related initiatives.

Level of Service	I	II	III	IV	V
Application review: Assessing grant proposals submitted by eligible entities to ensure they meet program criteria.	D	D	D	I-K	I-K
Award management: Distributing funds based on approved proposals and monitoring project implementation.	D	D	D	I-K	I-K
Reporting and accountability: Grant recipients must properly document their activities and expenditures and submit regular reports to demonstrate program effectiveness.	B	B	B	I-K	I-K
Compliance oversight: Monitoring adherence to grant guidelines and regulations to prevent misuse of funds.	D	D	D	I-K	I-K
Overall, Grant Support from EMD	D	D	D	I-K	I-K

Local Hazard Mitigation Plan

In emergency management, "Local Hazard Mitigation" refers to the process of identifying and taking proactive steps to reduce the potential damage and loss of life caused by natural disasters or other hazards within a specific local community, such as a city or county, by implementing preventative measures like land use planning, infrastructure improvements, and public education campaigns to minimize the impact of future disasters. As of 2028, new requirements in Local Hazard Mitigation plans within Emergency Management are likely to heavily focus on incorporating climate change impacts, including detailed analysis of projected extreme weather events like increased flooding, wildfires, heatwaves, and sea level rise, along with specific mitigation strategies to address these climate-driven hazards, potentially requiring nature-based solutions, community resilience building, and adaptation measures to vulnerable populations and infrastructure.

Level of Service	I	II	III	IV	V
Risk Assessment: Identifying potential natural hazards (e.g., earthquakes, floods, wildfires). Mapping vulnerable areas and critical infrastructure. Assessing the potential impacts of each hazard (loss of life, property damage, economic disruption)	H & K	H,K	H,K	I-K	I-K
Capability Assessment: Evaluating existing resources available for mitigation (personnel, equipment, funding). Assessing the community's ability to respond to a disaster. Identifying potential partnerships with other agencies	H,K	H,K	H,K	I-K	I-K
Plan Maintenance involves regularly reviewing and updating the plan based on new information and changing conditions, monitoring the implementation of mitigation actions, and engaging the community in the planning process.	D	D	D	D	I-K
Public participation: Involving residents, businesses, and community leaders in planning to ensure their needs are addressed.	H	H	H	H	I-K
Collaboration with other agencies: Coordinating with local, state, and federal agencies to leverage resources and expertise.	H	H	H	H	I-K
Legal and regulatory framework: Understanding applicable laws and regulations related to hazard mitigation.	H	H	H	H	I-K
Communication and education: Raising public awareness about hazards and mitigation strategies.	H	H	H	H	I-K

DESCRIPTION OF WORK - PREPAREDNESS PHASE

CA Emergency Services Act Compliance (New City or Non-Accredited City)

Mandated by law, the CA Emergency Services Act compliance in emergency management refers to adhering to the regulations outlined in the California Emergency Services Act (ESA), which mandates how state and local agencies must prepare for, respond to, and recover from natural or man-made disasters, essentially requiring them to follow standardized procedures for emergency management within the state of California; this includes using the Standardized Emergency Management System (SEMS) for coordinated responses across different agencies and jurisdictions to be eligible for state disaster assistance funding. A key aspect of compliance is using the SEMS, a standardized system for coordinating emergency response activities across multiple agencies and jurisdictions. Local agencies must comply with the ESA to be eligible for state disaster assistance funding for emergency response costs.

Level of Services	I	II	III	IV	V
□ Emergency Organization Coordination and Identification	N/A	N/A	N/A	N/A	N/A

Community Outreach

Community outreach in Emergency Management" refers to proactive efforts to engage with and educate members of a community about potential emergencies, disaster preparedness, and response plans, aiming to build trust, awareness, and collaboration between emergency management agencies and the public to ensure a more effective response during a crisis; essentially, it's about actively reaching out to the community to inform them about how to stay safe and prepared in emergency situations.

Level of Service	I	II	III	IV	V
□ Raising awareness: Educating the public about potential hazards, emergency procedures, evacuation routes, and essential contact information.	B, J	C, J	C, J	I-K	I-K
□ Communication strategies: Utilizing various communication channels like meetings, workshops, social media, local media, and community events to reach diverse populations.	C, J	C, J	C, J	I-K	I-K
□ Identifying vulnerable populations: Recognizing and addressing the specific needs of groups that may be disproportionately impacted by emergencies, like seniors, people with disabilities, or low-income communities.	D	D	D	I-K	I-K
□ Community engagement: Encouraging active participation from community members by involving them in planning processes, volunteer recruitment, and feedback loops.	K	K	K	I-K	I-K
□ Public education campaigns: Providing information about disaster preparedness kits, family communication plans, and weather alerts	D, K	D, K	D, K	I-K	I-K
□ Community training: Offering hands-on training in first aid and basic disaster response skills through the Community Emergency Response Team Training Program	D	D	D	I-K	I-K
□ Partnering with local organizations: Collaborating with community groups, faith-based institutions, and businesses to disseminate information and mobilize resources	D, K	D, K	D, K	I-K	I-K

Continuity Of Government Continuity of Government (COG) is a plan to ensure that a government can function during and after an emergency. It involves a coordinated effort between the executive, legislative, and judicial branches of government.					
Level of Service	I	II	III	IV	V
□ Essential Functions Identification: Prioritizing the most critical government operations that must continue during an emergency.	D	D	D	D	I-K
□ Orders of Succession: Defining who will assume leadership roles if primary officials are unavailable.	D	D	D	D	I-K
□ Delegation of Authority: Clearly outline which individuals are authorized to make decisions during a crisis.	D	D	D	D	I-K
□ Continuity Facilities: Identifying alternate locations where essential functions can be carried out.	D	D	D	D	I-K
□ Vital Records Management: Protecting and ensuring access to critical documents and data.	D	D	D	D	I-K
□ Communication Systems: Maintaining reliable communication channels between leadership and personnel.	D	D	D	D	I-K
□ Human Resources Planning: Identifying necessary personnel and their roles in continuity operations.	D	D	D	D	I-K
□ Devolution of Authority: Transferring decision-making power to appropriate individuals based on the situation.	D	D	D	D	I-K
□ Reconstitution Planning: Strategies to return to normal operations after an emergency.	D	D	D	D	I-K

Concept Of Operations The Concept of Operations (CONOPS) section broadly explains the intent of the EOP. The CONOPS presents a clear picture of the sequence and scope of the planned emergency response, what should happen, when, and at whose direction.					
Level of Service	I	II	III	IV	V
□ Emergency plan goals	D	D	D	D	I-K
□ Division of responsibilities	D	D	D	D	I-K
□ The sequence of actions—before, during, and after the incident	D	D	D	D	I-K
□ Requesting resources: (1) Who can request them, (2) Who will fill them, (3) How additional aid will be requested	D	D	D	D	I-K
□ Direction and control activities	D	D	D	D	I-K
□ Alert and warning processes	D	D	D	D	I-K
□ Continuity of operations (COOP) matters	D	D	D	D	I-K

Emergency Operation Plan An Emergency Operations Plan (EOP) in Emergency Management is a detailed document that outlines the procedures, responsibilities, and coordinated actions an organization or community should take during an emergency or disaster. It provides a structured framework to minimize impacts, facilitate response efforts, and restore normal operations as quickly as possible.					
Level of Service	I	II	III	IV	V
□ Provide Template	K	K	K	K	K
□ Administrative Planning Support & Guidance	D, H	D, H	D, H	I, K	I, K
□ Plan Development	D, H	D, H	D, H	I, K	I, K
□ Periodic Review/Update	D, H	D, H	D, H	I, K	I, K
□ Staff Report & Resolution	D, H	D, H	D, H	I, K	I, K
□ Departmental Coordination	D, H	D, H	D, H	I, K	I, K
MASS CARE & SHELTER					

Mass care and shelter planning involves providing temporary housing, food, and small and large animal care to people affected by disasters. It also includes coordinating essential services and life-sustaining resources. Mass Care & Shelter Operations cover but are not limited to Care & Reception (C&R), Temporary Evacuation Point (TEP), Cooling or Warming Centers, Congregate Sheltering Short and Long-Term Housing, AB781 – Sheltering of Pets in California, etc.)					
Level of Service	I	II	III	IV	V
□ Plan Development	D, K	D, K	D, K	D, K	D, K
□ Provide Template	I, K	I, K	I, K	I, K	I, K
□ Administrative Planning Support & Guidance	D, K	D, K	D, K	D, K	J, K
□ Plan Development	D, K	D, K	D, K	D, K	J, K
□ Periodic Review/Update	D, K	D, K	D, K	D, K	J, K
□ Evacuation: Moving people away from danger to a safer location	D, K	D, K	D, K	D, K	J, K
□ Human services: Providing services to disaster survivors	D, K	D, K	D, K	D, K	J, K
□ Shelter-in-place: Staying in a safe place, such as your home, while taking precautions to protect yourself from the danger	D, K	D, K	D, K	D, K	J, K
□ Mass care: Providing temporary housing, food, and first aid to people who need it	K	K	K	K	K
□ Emergency assistance: Providing essential services and statutory programs to disaster survivors	K	K	K	K	K

Situational Awareness & Common Operating Picture (SA/COP) Situational Awareness (SA) is the comprehensive understanding of an unfolding incident, including its current state, potential hazards, and evolving conditions. At the same time, a "Common Operating Picture" (COP) is a shared view of that situation, ensuring all involved agencies and personnel have access to the same critical information in real-time, allowing for coordinated response efforts; essentially, it's a unified picture of the incident across all levels of response, enabling effective decision-making and collaboration.					
Level of Service	I	II	III	IV	V
□ Real-time updates: Both concepts rely on continuous monitoring and data collection to provide the most current information about an emergency	K	K	K	K	K
□ Information sharing: A COP facilitates information sharing between different agencies and personnel involved in the response, ensuring everyone is on the same page	K	K	K	K	K
□ Decision-making tool: By providing a clear picture of the situation, a COP empowers responders to make informed decisions based on the latest data	K	K	K	K	K
□ Visual representation: Often, a COP is displayed visually through maps, diagrams, and data overlays on a shared platform, making it easily accessible and understandable	K	K	K	K	K

EMERGENCY OPERATIONS CENTER TRAINING & EXERCISING

An Emergency Operation Center (EOC) is a physical or virtual location from which leaders of a jurisdiction or organization coordinate information and resources to support incident management activities. EOC training courses present an overview of key NIMS principles relating to MACS, public information, resource management, mutual aid, and communication and information management. The EOC is a 24/7 self-sufficient operations hub geared towards training for disaster preparedness and coordinating relief and response efforts during major disasters. The EOC provides a total immersion in the incident-management training environment and allows supervisory-level responders a practical, simulated experience in managing a large-scale incident. Additionally, an Emergency Operations Center (EOC) is a component of the Multiagency Coordination System that plays a crucial role in emergency management. It coordinates and manages emergency response activities, such as hazard vulnerability assessments, physical site selection, mitigation considerations, information management systems, and training and exercises.

DESCRIPTION OF WORK - RESPONSE PHASE

RESPONSE OPERATIONS

In emergency management, the Response Phase refers to the immediate and short-term actions taken to address the effects of an emergency or disaster. These activities aim to reduce personal injuries, casualties, damage to property, and recovery time. The Response Phase involves coordinating and managing resources using the Standardized Emergency Management System and Incident Command System.

Level of Service	I	II	III	IV	V
□ Proficient in local response activities and able to assist in the coordination with other local, state, federal, private/non-profit partners	K	K	K	K	K
□ Assist the jurisdiction in responding to incidents and disasters that require the use and operation of an Emergency Operations Center.	K	K	K	K	K
□ Risk Assessment: Conduct a thorough risk assessment	K	K	K	K	K
□ Emergency Response Team (ERT): Manage emergencies effectively	K	K	K	K	K
□ Emergency Communication Plan: Develop a communication strategy	K	K	K	K	K
□ Evacuation Plans and Procedures: Outline evacuation procedures	D, K	D, K	D, K	D, K	I-K
□ Business Continuity Plan: Ensure business continuity during emergencies	D, K	D, K	D, K	D, K	I-K
□ Training and Awareness Programs: Educate staff on emergency management	D, K	D, K	D, K	D, K	I-K
□ Incident Documentation and Evaluation: Document and evaluate incidents	D, K	D, K	D, K	D, K	I-K
• Emergency Operations Plan (EOP) components include:	D, K	D, K	D, K	D, K	I-K
➢ Purpose and Scope: Define the purpose and scope of the EOP	D, K	D, K	D, K	D, K	I-K
➢ Roles and Responsibilities: Assign responsibilities to different roles	D, K	D, K	D, K	D, K	I-K
• Risk Assessment: Evaluate and address risks	D, K	D, K	D, K	D, K	I-K
• Prevention, Protection, Response, Recovery, and Mitigation: Address these areas in the EOP	D, K	D, K	D, K	D, K	I-K

DESCRIPTION OF WORK - RECOVERY PHASE					
DISASTER RECOVERY PLANNING Disaster recovery in emergency management involves long-term efforts to rebuild infrastructure, restore services, and help communities recover and rebuild after a disaster. It focuses on restoring, redeveloping, and revitalizing communities impacted by a disaster. The recovery phase aims to return a community to pre-disaster functioning levels.					
Level of Service	I	II	III	IV	V
□ Risk Assessment: Identifying potential hazards and their potential impacts on the organization.	D, K	D, K	D, K	D, K	I-K
□ Business Impact Analysis (BIA): Determining which systems and functions are critical to operations and the consequences of their disruption.	D, K	D, K	D, K	D, K	I-K
□ Recovery Strategies: Establishing procedures for data backup, system restoration, and alternate site activation.	J, K	J, K	J, K	J, K	J, K
□ Communication Plans: Defining protocols for disseminating information to staff, stakeholders, and the public during a disaster.	J, K	J, K	J, K	J, K	J, K
□ Roles and Responsibilities: Assigning specific tasks to individuals within the organization during a recovery process.	J, K	J, K	J, K	J, K	J, K
□ Testing and Training: Regularly practicing the DRP to ensure effectiveness and familiarize staff with their roles and responsibilities.	J, K	J, K	J, K	J, K	J, K
□ Recovery planning within a community is dependent on an active local government. Local governments are encouraged to:	J, K	J, K	J, K	J, K	J, K
□ Provide leadership in recovery planning and prioritization of goals	J, K	J, K	J, K	J, K	J, K
□ Determine need and deploy a Local Disaster Recovery Manager (LDRM) or equivalent	J, K	J, K	J, K	J, K	J, K
□ Incorporate principles of post-disaster planning into the recovery process	J, K	J, K	J, K	J, K	J, K
□ Coordinate with relevant regional planning organizations that provide resources and/or planning expertise	J, K	J, K	J, K	J, K	J, K
□ Promote partnerships between nonprofit organizations, faith-based organizations, the private sector or other relevant organizations, and non-traditional and underserved populations throughout the recovery process	J, K	J, K	J, K	J, K	J, K
□ Review pre-existing plans and cross-check against post-disaster planning priorities	J, K	J, K	J, K	J, K	J, K
□ Implement a transparent, accountable system to manage recovery resources	J, K	J, K	J, K	J, K	J, K
□ Manage overall recovery coordination at the local level	K	K	K	K	K
□ Communicate post-disaster planning as well as organizational and operational needs to the State	K	K	K	K	K
□ Lead an inclusive and accessible planning process, facilitating practices that comply with applicable laws, including civil rights mandates	K	K	K	K	K
□ Enforce all applicable federal worker protection laws for workers employed to rebuild the impacted community. These federal laws include the Fair Labor Standards Act, Occupational Safety and Health Regulations, National Labor Relations Act, and the laws administered by the Equal Employment Opportunity Commission (EEOC)	K	K	K	K	K
□ Implement, coordinate, and manage awareness and outreach efforts to individuals with disabilities, individuals with limited English proficiency, seniors, children, and other members of underserved populations	D, K	D, K	D, K	D, K	K
□ Disaster Recovery Process Training	D	D	D	D	D

DISASTER RECOVERY OPERATIONS

Disaster recovery operations in emergency management focus on restoring, redeveloping, and revitalizing communities impacted by a disaster. They involve strategies, procedures, and steps to ensure organizations can resume operations quickly and minimize negative impacts. These operations require a team effort at all government and private sector levels.

Level of Service	I	II	III	IV	V
Issuance of Local Emergency Proclamation within State and Federal guidelines and timelines	K	K	K	K	K
Ensures required accompanying documents to a Local Proclamation of an Emergency	K	K	K	K	K
Ensure jurisdictional that a timely and accurate notification process up to the Operational Area	K	K	K	K	K
Ensure local proclamation is ratified based on State and Federal guidelines and timelines	K	K	K	K	K
Ensure local proclamation is renewed based on State and Federal guidelines and timelines	K	K	K	K	K
Ensure local proclamation is terminated based on State and Federal guidelines and timelines	K	K	K	K	K
Maintain situational awareness of Disaster Recovery pathways, type of Operational Area, State or Federal proclamation/declarations, guide the overall jurisdictional leadership impacts, the services that are available to the jurisdiction, the roles that other jurisdictional Departments play in the recovery process, and completion and closer of jurisdictional disaster projects	K	K	K	K	K
Coordinate and facilitate with State and Federal Agencies in conducting individual and/or joint Preliminary Damage Assessments (PDA) to determine losses and recovery needs from that disaster	K	K	K	K	K
Participate with appropriate jurisdictional departments in required application briefings and kick-off meetings to obtain current recovery guidelines.	K	K	K	K	K
Timely submittal of the “Request for Public Assistance” to ensure the jurisdiction is eligible to participate in the disaster recovery process and the preservation of jurisdictional reimbursement	K	K	K	K	K
Ensure that the Recovery Scoping Meeting is scheduled in a timely meeting and that all jurisdictional department representatives are present	K	K	K	K	K
Ensure the list of jurisdictional projects is submitted in a timely manner to preserve jurisdictional reimbursement	K	K	K	K	K
Ensure all required reports are submitted based on the State and/or Federal timelines to preserve jurisdictional reimbursement	K	K	K	K	K
Based on State and Federal timelines, the status of all completed work in all categories	K	K	K	K	K
As a worst-case scenario, submit a time extension request(s) prior to the last approved project deadline	K	K	K	K	K
Within State and Federal guidelines, notify the state and/or federal oversight entities of any project cost overruns	K	K	K	K	K
Within State and Federal guidelines, notify the state and/or Federal oversight entities of any potential to appeal	K	K	K	K	K
Within State and Federal guidelines, ensure that all documentation is submitted close-out	K	K	K	K	K

Agenda Item No. 11.13
May 28, 2025

Second Amendment to Professional Services Agreement with NBS for Special Financing Districts Administration

Prepared By:

Amanda Wells, Finance Director/City Treasurer

Recommended Action(s)

Staff recommends that the City Council:

1. Approve Amendment No. 2 to the Professional Services Agreement with NBS with a revised scope, term, and compensation for a total not-to-exceed amount of $770,000; and
2. Authorize the City Manager to execute all necessary documents.

Summary

Since the City's inception, NBS Government Finance Group (NBS) has provided services specific to special financing districts including benefits assessment districts (BAD), landscape maintenance districts (LMD), and community facility districts (CFD). Services have ranged from administration of the districts, district audit services, district formation services, and most recently landscape and lighting district transfer services. On January 26, 2022 the City Council adopted a resolution to transfer Jurupa Community Services District (JCSD) lighting maintenance district zones located within the City of Eastvale. Adoption of the resolution initiated the process of transferring the districts to the City; at that point the City was responsible administration of the transferred zones including annual tax assessments. The City contracts for tax assessment administration with NBS. As a result of the transfers of districts, a new professional services agreement with NBS was approved, with a scope covering all special district administration services. At this time the City is considering forming several Community Facility Districts (CFD) in areas under development. This first amendment to the professional services agreement amends the term, scope of work, and total

compensation to encompass CFD formation services in addition to annual administrative services for the newly formed districts. This second amendment adds additional scope to account for annexation services for City Wide CFD 2024-2 and additional annual administration services for the future annexed zones.

Background

This second amendment to the current professional services agreement for special district administration is required to include future CFD annexations to the formed City Wide CFD 2024-2. The original term was for three years plus two one-year extensions, staff wishes to extend the final extension through the end of the 2026-27 fiscal year, to align the agreement with the full fiscal year. The scope will be amended to include CFD annexations and administration of the newly formed districts. Finally, compensation will be adjusted to reflect cost estimates for CFD annexations and annual administration. Cost estimates include annual Consumer Price Index (CPI) inflator, which staff estimates at 10%. The new amendment includes a cap of $770,000, which includes contingencies from the original agreement. All administration, auditing, or formation services provided by NBS will be charged to the special district funds, as such there is no General Fund impact.

Without approval of this item, the city will be unable to annex future development into the city's City Wide CFD 2024-2. Without CFD annexations of new development the city will not be able to collect levies to pay for the maintenance and operations of critical public infrastructure including but not limited to streets, curbs, gutters, sidewalks, street lights, traffic signals, and frontage landscape maintenance. Instead, the city will have to utilize General Fund or Gas Tax funding, which may not be sufficient to pay for services, or reduce services.

Environmental

Not Applicable.

Strategic Plan Action - Priority Level: N/A | Target #: N/A | Goal #: N/A

Not applicable, as Special Financing District formations and administration are a necessity of daily city operations.

Fiscal Impact

The cost of administration services is charged directly to the special districts, which include the City's 3 LLMD's (2014-1, 2014-3, 2014-4), 11 zones under LLMD 89-1, BAD 2014-2, 90 JCSD transferred LMDs, and six CFDs and related zones (2017-1, 2017-2, 2019-1, 2020-1, 2024-1, 2024-2). Accounting for the districts is located within the city's fund structure, funds 300-499. As the new CFD's are annexed, annexation and administration expenditures will be charged to new funds created for the new districts and collected through annual levies.

Prior City Council/Commission Action

The previous NBS Government Finance Group agreements and addendums were approved administratively. Separate agreements were processed for specific services. The current agreement was approved by City Council on February 23, 2022 under item 11.8 and amended on November 8, 2023 under item 11.2.

Attachment(s)

Attachment 1 - Second Amendment to NBS Professional Services Agreement
Attachment 2 - First Amendment to Professional Services Agreement
Attachment 3 - Original Professional Services Agreement

Second Amendment to Agreement

This Second Amendment to Agreement ("Second Amendment") is entered into this _____ day of _____, 2025 by and between the City of Eastvale, a California general law city ("City"), and NBS Government Finance Group, a California Corporation ("Contractor"), as follows:

RECITALS

A. City and Contractor entered into an agreement for Special Financing District Administration Services on or about February 23, 2022 ("Agreement") with a term limit of 5 years and compensation not-to-exceed $637,000.

B. On November 8, 2023, the City and Contractor executed the First Amendment to the Agreement to extend the term to June 30, 2028 for a total term of five years and four months, revise the scope of services, and amend the total compensation

C. City and Contractor desire revise the scope to include work related to the fiscal impact analysis, cost estimation, and community facility district formation and annexations and additional annual administrative services for said districts, and amend the total compensation to $770,000.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the promises made and recited herein, the parties do hereby enter into this Second Amendment which modifies and amends the Agreement as follows:

1. **AMENDMENTS.**

   a. **SCOPE OF SERVICES.** Section 2, paragraph (a) of the Agreement is amended to add additional Services as set forth in Exhibit "A" "Scope of Services."

   b. **COMPENSATION AND METHOD OF PAYMENT.** Section 4, paragraph (a) of the Agreement is amended to increase the compensation not to exceed amount to seven hundred seventy thousand dollars ($770,000). Exhibit "B" to the Agreement is amended in its entirety and is replaced with Exhibit "B" to this Second Amendment.

2. **GENERAL PROVISIONS.**

a. **Remainder Unchanged**. Except as specifically modified and amended in this Second Amendment, the Agreement remains in full force and effect and binding upon the parties.

b. **Integration**. This Second Amendment constitutes the entire understanding and agreement of the parties and supersedes all negotiations or previous agreements

between the parties with respect to all or any part of the transaction discussed in this Second Amendment.

c. **Effective Date**. This Second Amendment shall not become effective until the date it has been formally approved and executed by the appropriate authorities of the City and Consultant.

d. **Applicable Law**. The laws of the State of California shall govern the interpretation and enforcement of this Second Amendment.

e. **References**. All references to the Agreement include all their respective terms and provisions. All defined terms utilized in this Second Amendment have the same meaning as provided in the Agreement, unless expressly stated to the contrary in this Second Amendment.

IN WITNESS WHEREOF, the parties hereto have executed this Second Amendment to the Agreement on the date and year first written above.

CITY OF EASTVALE:

_____
Mark Orme, City Manager

APPROVED AS TO FORM:

_____
Erica L. Vega, City Attorney

ATTEST:

_____
Marc Donohue, City Clerk

NBS Government Finance Group

_____
Michael Rentner, President & CEO

Exhibit "A" Scope of Services

Community Facilities District Annexation Services

KICK-OFF MEETING, PROJECT SCHEDULE

- NBS will meet with City staff, legal counsel, and other interested parties to:
- Establish lines of communication
- Clarify the specific project goals and criteria that will meet the City's preference
- Identify and resolve any special circumstances regarding the annexation of property to the CFD
- Develop project schedules to meet legal requirements and provide for effective interaction of all involved parties
- Establish meeting dates consistent with schedule to achieve project milestones

LOCAL GOALS & POLICIES

NBS will review existing local goals and policies or assist the City in developing local goals and policies for the use of CFDs, as required by the Mello-Roos Community Facilities Act of 1982 (the "Act").

DATA COLLECTION

NBS will gather and review data relevant to the annexation of property to the CFD. Data will be obtained from various sources, including City records, Assessor's parcel maps, and County Assessor information.

CUSTOMIZED COST ESTIMATE

NBS will incorporate data relevant to estimating costs into an Excel-based Cost Estimation Tool. The set up will compile the annual maintenance costs, lifecycle of each improvement, replacement costs, cost escalation capabilities tied to appropriate indexes that will be used to arrive at the project cost estimate based on the inputs of improvement plans.

NBS will customize the ultimate deliverable to include the level of specificity desired by the City. The Cost Estimate Form will generally provide a summary of the improvements and costs in a format and with the specific details as identified by the City.

NBS will review plans to retrieve the types and quantities of improvements to be operated and maintained and services to be provided within the CFD. Those improvements will then be entered into the Cost Estimation Tool.

NBS will review the output of the Cost Estimation Tool to ensure both data accuracy of the calculations and reasonableness of the results. City of Eastvale Annexation Services & Release of Special Tax Lien 2

RATE AND METHOD OF APPORTIONMENT

NBS will review the CFD Rate and Method of Apportionment as it relates to the property to be annexed to the CFD.

UNANIMOUS APPROVAL FORM

NBS will prepare and mail the unanimous approval form to all landowner electors within the territory of the proposed annexation to the CFD. Final form of the unanimous approval will be approved by City staff and legal counsel.

NOTICES AND BALLOTS

NBS will prepare and mail notices and ballots to all landowner electors within the territory of the proposed Community Facilities District. The notices and ballots will comply with "Proposition 218, The Right to Vote on Taxes Act", the Act and all applicable provisions of the Elections Code. Final form of notices and ballots will be approved by City staff and legal counsel.

RESOLUTION

NBS will prepare the required resolution in accordance with the time schedule. The resolution will comply with the Act. Final form of the resolution will be reviewed and approved by legal counsel and the City.

ADDITIONAL CFD DOCUMENTS

NBS will prepare the Notice of Special Tax Lien in compliance with the Act. Final form of the Notice of Special Tax Lien will be approved by City staff and legal counsel.

Release of Special Tax Lien

AMENDED NOTICE OF SPECIAL TAX LIEN

NBS will prepare the Amended Notice of Special Tax Lien in compliance with the Act. Final form of the Amended Notice of Special Tax Lien will be approved by City staff and legal counsel.

Community Facilities District (CFD) Annexation Services not in Future Annexation Area

KICK-OFF MEETING, PROJECT SCHEDULE

- NBS will meet with City staff, legal counsel, and other interested parties to:
- Establish lines of communication
- Clarify the specific project goals and criteria that will meet the City's preference
- Identify and resolve any special circumstances regarding the annexation of property to the CFD
- Develop project schedules to meet legal requirements and provide for effective interaction of all involved parties
- Establish meeting dates consistent with schedule to achieve project milestones

LOCAL GOALS & POLICIES

NBS will review existing local goals and policies or assist the City in developing local goals and policies for the use of CFDs, as required by the Mello-Roos Community Facilities Act of 1982 (the "Act").

DATA COLLECTION

NBS will gather and review data relevant to the annexation of property to the CFD. Data will be obtained from various sources, including City records, Assessor's parcel maps, and County Assessor information.

DISTRICT BOUNDARIES

- NBS will make determinations of the property subject to the Special Tax
- Establish boundaries for the CFD annexation, giving consideration to both the project area and peripheral lands
- Verify ownership based on last equalized tax roll

COST ESTIMATE

NBS will obtain the estimate of project costs and incidental expenses and prepare a total project Cost Estimate.

RATE AND METHOD OF APPORTIONMENT

NBS will review the CFD Rate and Method of Apportionment as it relates to the property to be annexed to the CFD.

MAPPING

NBS will prepare the Boundary Map and related documents and present to the City as required by the Act.

RESOLUTIONS AND ORDINANCE

NBS will prepare the required resolutions and ordinance in accordance with the time schedule. The resolutions and ordinance will comply with the Act. Final form of the resolutions and ordinance will be reviewed and approved by legal counsel and the City.

INTENT MEETING

NBS will present to City Council and the public regarding the CFD annexation process.

CFD REPORT

Based on the results of the aforementioned reviews, discussions and modifications, NBS will prepare a detailed written report including the Cost Estimate, the Rate and Method of Apportionment and the Boundary Map and present to the City, legal counsel, and property owners. NBS will file the Special Tax Report with the City Clerk. City of Eastvale Annexation Services & Release of Special Tax Lien 4

NOTICES AND BALLOTS

NBS will prepare and mail notices and ballots to all landowner electors within the territory of the proposed annexation to the CFD. The notices and ballots will comply with "Proposition 218, The Right to Vote on Taxes Act", the Act and all applicable provisions

of the Elections Code. Final form of notices and ballots will be approved by City staff and legal counsel.

PUBLIC HEARING
NBS will present all necessary testimony and respond to public comments regarding the district annexation proceedings.

ADDITIONAL CFD DOCUMENTS
NBS will prepare the Notice of Special Tax Lien in compliance with the Act. Final form of the Notice of Special Tax Lien will be approved by City staff and legal counsel.

City's Responsibilities
The City shall furnish NBS with any pertinent information that is available to City and applicable to the Services. The City shall designate a person to act with authority on its behalf in respect to the Services. The City shall promptly respond to NBS' requests for reviews and approvals of its work, and to its requests for decisions related to the Services. City understands and agrees that NBS is entitled to rely on all information, data and documents (collectively, "Information") supplied to NBS by City or any of its agents, contractors or proxies or obtained by NBS from other usual and customary sources including other government sources or proxies as being accurate and correct and NBS will have no obligation to confirm that such Information is correct and that NBS will have no liability to City or any third party if such Information is not correct.

ENGINEER SIGNATURE AND STAMP OF ANNUAL ENGINEER'S REPORT – OPTIONAL SERVICE

Fee per Report $750.00

ANNUAL FEE INCREASES

Cost of living increases may be applied to the Administration services listed above on October 1 each year, beginning with the invoices issued on October 1, 2025. The COLA would be the actual cost of living increase based on the 12-month change from April/May to April/May in the U.S. Department of Labor, Bureau of Labor Statistics, Consumer Price Index for all urban consumers for the applicable region for the City's location.

EXPENSES

Customary out-of-pocket expenses will be billed to the Client at actual cost to NBS. These expenses may include, but not be limited to, mailing fulfillment, postage, reproduction, telephone, travel, meals and various third-party charges for data, maps, and recording fees.

ADDITIONAL SERVICES

The following table shows our current hourly rates. Additional services authorized by the Client but not included in the scope of services will be billed at this rate or the then applicable hourly rate.

Title	Hourly Rate
Senior Review	$275
Director	$250
Associate Director / Engineer	$225
Senior Consultant	$200
Consultant	$175
Senior Project Analyst	$165
Project Analyst	$150
Project Resource Analyst	$130
Clerical/Support	$110

TERMS

Consulting services will be invoiced monthly. Expenses will be itemized and included in the next regular invoice. Fees for all other services will be invoiced upon completion of the task. If the project is prematurely terminated by either party, NBS shall receive payment for work completed. Payment shall be made within 30 days of submittal of an invoice. If payment is not received within 90 days simple interest will begin to accrue at the rate of 1.5% per month. Either party may cancel this contract with 30 days' written notice.

First Amendment to Agreement

This First Amendment to Agreement ("First Amendment") is entered into this 8th day of November, 2023 by and between the City of Eastvale, a California general law city ("City"), and NBS Government Finance Group, a California Corporation ("Contractor"), as follows:

RECITALS

A. City and Contractor entered into an agreement for Special Financing District Administration Services on or about February 23, 2022 ("Agreement") with a term limit of 5 years and compensation not-to-exceed $637,000.

B. City and Contractor desire to amend the term limit and extend the term for four months, for a total term of 5 years and 4 months to include the entire fiscal year through June 30, revise the scope to include community facility district formations and additional annual administrative services for said districts, and amend the total compensation to $757,000.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the promises made and recited herein, the parties do hereby enter into this First Amendment which modifies and amends the Agreement as follows:

1. **AMENDMENTS.**

   a. **TERM OF AGREEMENT.** Section 1, paragraph (a) of the Agreement is amended to increase the total term of the agreement by four (4) months for a total term of five (5) years and four (4) months through June 30, 2028.

   b. **SCOPE OF SERVICES.** Section 2, paragraph (a) of the Agreement is amended to add additional Services as set forth in Exhibit "B" "Scope of Services."

   c. **COMPENSATION AND METHOD OF PAYMENT.** Section 4, paragraph (a) of the Agreement is amended to add additional costs as set forth in Exhibit "C" and to increase the total compensation of the agreement by an additional fifty one thousand five hundred dollars ($51,500) for district formation services and an additional forty four thousand nine hundred fifty dollars ($44,950) for annual administrative services, and an additional contingency of twenty three thousand six hundred eighty four ($23,684) for a total not to exceed amount of seven hundred fifty seven thousand dollars ($757,000).

2. **GENERAL PROVISIONS.**

a. **Remainder Unchanged**. Except as specifically modified and amended in this First Amendment, the Agreement remains in full force and effect and binding upon the parties.

b. **Integration**. This First Amendment constitutes the entire understanding and agreement of the parties and supersedes all negotiations or previous agreements between the parties with respect to all or any part of the transaction discussed in this First Amendment.

c. **Effective Date**. This First Amendment shall not become effective until the date it has been formally approved and executed by the appropriate authorities of the City and Consultant.

d. **Applicable Law**. The laws of the State of California shall govern the interpretation and enforcement of this First Amendment.

e. **References**. All references to the Agreement include all their respective terms and provisions. All defined terms utilized in this First Amendment have the same meaning as provided in the Agreement, unless expressly stated to the contrary in this First Amendment.

IN WITNESS WHEREOF, the parties hereto have executed this First Amendment to the Agreement on the date and year first written above.

CITY OF EASTVALE:

Mark Orme, City Manager

APPROVED AS TO FORM:

Erica L. Vega, City Attorney

ATTEST:

Marc Donohue, City Clerk

NBS Government Finance Group

Michael Rentner, President & CEO

Exhibit "B" Scope of Services

Community Facilities District Formation

KICK-OFF MEETING, PROJECT SCHEDULE

NBS will meet with City staff, legal counsel, and other interested parties to:

- Establish lines of communication
- Clarify the specific project goals and criteria that will meet the City's preference
- Identify and resolve any special circumstances regarding the formation of the CFD
- Develop project schedules to meet legal requirements and provide for effective interaction of all involved parties
- Establish meeting dates consistent with schedule to achieve project milestones

LOCAL GOALS & POLICIES

NBS will review existing local goals and policies or assist the City in developing local goals and policies for the use of CFDs, as required by the Mello-Roos Community Facilities Act of 1982 (the "Act").

DATA COLLECTION

NBS will gather and review data relevant to the formation of the CFD. Data will be obtained from various sources, including City records, Assessor's parcel maps, and County Assessor information.

DISTRICT BOUNDARIES

NBS will make determinations of the property subject to the Special Tax

- Establish boundaries for the CFD, giving consideration to both the project area and peripheral lands
- Verify ownership based on last equalized tax roll
- Formulate concepts with viable alternatives for spreading costs reasonably within the CFD boundary

CUSTOMIZED COST ESTIMATE

NBS will incorporate data relevant to estimating costs into an Excel based Cost Estimation Tool. The set up will compile the annual maintenance costs, lifecycle of each improvement, replacement costs, cost escalation capabilities tied to appropriate indexes that will be used to arrive at the project cost estimate based on the inputs of improvement plans.

NBS will customize the ultimate deliverable to include the level of specificity desired by the City. The Cost Estimate Form will generally provide a summary of the improvements and costs in a format and with the specific details as identified by the City.

NBS will review plans to retrieve the types and quantities of improvements to be operated and maintained and services to be provided within the Landscape Maintenance District. Those improvements will then be entered into the Cost Estimation Tool.

NBS will review the output of the Cost Estimation Tool to ensure both data accuracy of the calculations and reasonableness of the results.

RATE MODELING
NBS will analyze the property data and cost estimate to formulate concepts with viable alternatives for spreading costs reasonably within the CFD boundary, taking into account the overlapping debt, value to lien and overall tax burden on the property.

RATE AND METHOD OF APPORTIONMENT
NBS will formulate and present the Rate and Method of Apportionment to the City, legal counsel, the financial advisor and others, as appropriate.

MAPPING
NBS will prepare the Boundary Map and related documents and present to the City as required by the Act.

RESOLUTIONS AND ORDINANCE
NBS will prepare the required resolutions and ordinance in accordance with the time schedule. The resolutions and ordinance will comply with the Act. Final form of the resolutions and ordinance will be reviewed and approved by legal counsel and the City.

INTENT MEETING
NBS will present to City Council and the public regarding the CFD formation process, the analysis that led to the setting of CFD special tax rates, and the methodology developed for the special tax.

CFD REPORT
Based on the results of the aforementioned reviews, discussions and modifications, NBS will prepare a detailed written report including the Cost Estimate, the Rate and Method of Apportionment and the Boundary Map and present to the City, legal counsel, and property owners. NBS will file the Special Tax Report with the City Clerk.

NOTICES AND BALLOTS
NBS will prepare and mail notices and ballots to all landowner electors within the territory of the proposed Community Facilities District. The notices and ballots will comply with "Proposition 218, The Right to Vote on Taxes Act", the Act and all applicable provisions of the Elections Code. Final form of notices and ballots will be approved by City staff and legal counsel.

PUBLIC HEARING
NBS will present all necessary testimony and respond to public comments regarding the district formation proceedings.

ELECTION
NBS will assist legal counsel in the preparation of the ballot materials for the landowner election.

ADDITIONAL CFD DOCUMENTS
NBS will prepare the Notice of Special Tax Lien in compliance with the Act. Final form of the Notice of Special Tax Lien will be approved by City staff and legal counsel.

Community Facilities District Annexation Services

KICK-OFF MEETING, PROJECT SCHEDULE
NBS will meet with City staff, legal counsel, and other interested parties to:

- Establish lines of communication
- Clarify the specific project goals and criteria that will meet the City's preference
- Identify and resolve any special circumstances regarding the annexation of property to the CFD
- Develop project schedules to meet legal requirements and provide for effective interaction of all involved parties
- Establish meeting dates consistent with schedule to achieve project milestones

LOCAL GOALS & POLICIES
NBS will review existing local goals and policies or assist the City in developing local goals and policies for the use of CFDs, as required by the Mello-Roos Community Facilities Act of 1982 (the "Act").

DATA COLLECTION
NBS will gather and review data relevant to the annexation of property to the CFD. Data will be obtained from various sources, including City records, Assessor's parcel maps, and County Assessor information.

CUSTOMIZED COST ESTIMATE
NBS will incorporate data relevant to estimating costs into an Excel based Cost Estimation Tool. The set up will compile the annual maintenance costs, lifecycle of each improvement, replacement costs, cost escalation capabilities tied to appropriate indexes that will be used to arrive at the project cost estimate based on the inputs of improvement plans.

NBS will customize the ultimate deliverable to include the level of specificity desired by the City. The Cost Estimate Form will generally provide a summary of the improvements and costs in a format and with the specific details as identified by the City.

NBS will review plans to retrieve the types and quantities of improvements to be operated and maintained and services to be provided within the Landscape Maintenance District. Those improvements will then be entered into the Cost Estimation Tool.

NBS will review the output of the Cost Estimation Tool to ensure both data accuracy of the calculations and reasonableness of the results.

RATE AND METHOD OF APPORTIONMENT

NBS will review the CFD Rate and Method of Apportionment as it relates to the property to be annexed to the CFD.

UNANIMOUS APPROVAL FORM

NBS will prepare and mail the unanimous approval form to all landowner electors within the territory of the proposed annexation to the CFD. Final form of the unanimous approval will be approved by City staff and legal counsel.

ADDITIONAL CFD DOCUMENTS

NBS will prepare the Notice of Special Tax Lien in compliance with the Act. Final form of the Notice of Special Tax Lien will be approved by City staff and legal counsel.

AGREEMENT FOR SERVICES
Special Financing District Annual Administration Professional Services

This Agreement for Services ("Agreement") is entered into as of this 23rd day of February, 2022 by and between the City of Eastvale, a municipal corporation ("City") and NBS Government Finance Group, a California Corporation ("Contractor"). City and Contractor are sometimes hereinafter individually referred to as "Party" and hereinafter collectively referred to as the "Parties."

RECITALS

A. City has sought, by direct negotiation the performance of the services defined and described particularly in Section 2 of this Agreement.

B. Contractor, following submission of a proposal for the performance of the services defined and described particularly in Section 2 of this Agreement, was selected by the City to perform those services.

C. The Parties desire to formalize the selection of Contractor for performance of those services defined and described particularly in Section 2 of this Agreement and desire that the terms of that performance be as particularly defined and described herein.

D. The Parties agree that this Agreement shall supersede all previously executed agreements between the City and Contractor.

OPERATIVE PROVISIONS

NOW, THEREFORE, in consideration of the mutual promises and covenants made by the Parties and contained here and other consideration, the value and adequacy of which are hereby acknowledged, the Parties agree as follows:

SECTION 1. TERM OF AGREEMENT.

Subject to the provisions of Section 20 "Termination of Agreement" of this Agreement, the Term of this Agreement is for three (3) years with the option of extending for two (2) subsequent one (1) year terms commencing on the date first ascribed above.

SECTION 2. SCOPE OF SERVICES.

Contractor agrees to perform the services set forth in Exhibit "A" "Scope of Services" (hereinafter, the "Services") and made a part of this Agreement by this reference.

SECTION 3. ADDITIONAL SERVICES.

Contractor shall not be compensated for any work rendered in connection with its performance of this Agreement that are in addition to or outside of the Services unless such additional services are authorized in advance and in writing in accordance with Section 26 "Administration and Implementation" or Section 28 "Amendment" of this

Agreement. If and when such additional work is authorized, such additional work shall be deemed to be part of the Services.

SECTION 4. COMPENSATION AND METHOD OF PAYMENT.

(a) Subject to any limitations set forth in this Agreement, City agrees to pay Contractor the amounts specified in Exhibit "B" "Compensation" and made a part of this Agreement by this reference. The total compensation, including reimbursement for actual expenses, shall not exceed six hundred thirty-seven thousand dollars ($637,000), unless additional compensation is approved in writing in accordance with Section 26 "Administration and Implementation" or Section 28 "Amendment" of this Agreement.

(b) Each month Contractor shall furnish to City an original invoice for all work performed and expenses incurred during the preceding month. The invoice shall detail charges by the following categories: labor (by sub-category), travel, materials, equipment, supplies, and subcontractor contracts. Subcontractor charges shall be detailed by the following categories: labor, travel, materials, equipment and supplies. If the compensation set forth in subsection (a) and Exhibit "B" include payment of labor on an hourly basis (as opposed to labor and materials being paid as a lump sum), the labor category in each invoice shall include detailed descriptions of task performed and the amount of time incurred for or allocated to that task. City shall independently review each invoice submitted by the Contractor to determine whether the work performed and expenses incurred are in compliance with the provisions of this Agreement. In the event that no charges or expenses are disputed, the invoice shall be approved and paid according to the terms set forth in subsection (c). In the event any charges or expenses are disputed by City, the original invoice shall be returned by City to Contractor for correction and resubmission.

(c) Except as to any charges for work performed or expenses incurred by Contractor which are disputed by City, City will use its best efforts to cause Contractor to be paid within thirty (30) days of receipt of Contractor's correct and undisputed invoice.

(d) Payment to Contractor for work performed pursuant to this Agreement shall not be deemed to waive any defects in work performed by Contractor.

SECTION 5. INSPECTION AND FINAL ACCEPTANCE.

City may inspect and accept or reject any of Contractor's work under this Agreement, either during performance or when completed. City shall reject or finally accept Contractor's work within sixty (60) days after submitted to City. City shall reject work by a timely written explanation, otherwise Contractor's work shall be deemed to have been accepted. City's acceptance shall be conclusive as to such work except with respect to latent defects, fraud and such gross mistakes as amount to fraud. Acceptance of any of Contractor's work by City shall not constitute a waiver of any of the provisions of this Agreement including, but not limited to, Section 16 "Indemnification" and Section 17 "Insurance."

SECTION 6. OWNERSHIP OF DOCUMENTS.

All original maps, models, designs, drawings, photographs, studies, surveys, reports, data, notes, computer files, files and other documents prepared, developed or discovered by Contractor in the course of providing the Services pursuant to this Agreement shall become the sole property of City and may be used, reused or otherwise disposed of by City without the permission of the Contractor. Upon completion, expiration or termination of this Agreement, Contractor shall turn over to City all such original maps, models, designs, drawings, photographs, studies, surveys, reports, data, notes, computer files, files and other documents.

If and to the extent that City utilizes for any purpose not related to this Agreement any maps, models, designs, drawings, photographs, studies, surveys, reports, data, notes, computer files, files or other documents prepared, developed or discovered by Contractor in the course of providing the Services pursuant to this Agreement, Contractor's guarantees and warranties in Section 9 "Standard of Performance" of this Agreement shall not extend to such use of the maps, models, designs, drawings, photographs, studies, surveys, reports, data, notes, computer files, files or other documents.

All final work product developed by Contractor in the course of providing the Services pursuant to this Agreement shall become the sole property of City and may be used, reused or otherwise disposed of by City without the permission of the Contractor. Upon completion, expiration or termination of this Agreement, Contractor shall turn over to City all such final work product if paid for by the City. This provision specifically excludes Contractors' work notes and drafts, which are owned by Contractor, not City.

SECTION 7. CONTRACTOR'S BOOKS AND RECORDS.

(a) Contractor shall maintain any and all documents and records demonstrating or relating to Contractor's performance of the Services. Contractor shall maintain any and all ledgers, books of account, invoices, vouchers, canceled checks, or other documents or records evidencing or relating to work, services, expenditures and disbursements charged to City pursuant to this Agreement. Any and all such documents or records shall be maintained in accordance with generally accepted accounting principles and shall be sufficiently complete and detailed so as to permit an accurate evaluation of the services provided by Contractor pursuant to this Agreement. Any and all such documents or records shall be maintained for three (3) years from the date of execution of this Agreement and to the extent required by laws relating to audits of public agencies and their expenditures. In accordance with California Government Code Section 8546.7, if the total compensation in Section 4 exceeds ten thousand dollars ($10,000.00), this Agreement and the Contractor's books and records related to this Agreement shall be subject to the examination and audit of the State Auditor, at the request of City or as part of any audit of the City, for a period of three (3) years after final payment under the Agreement.

(b) Any and all records or documents required to be maintained pursuant to this section shall be made available for inspection, audit and copying, at any time during regular business hours, upon request by City or its designated representative. Copies of

such documents or records shall be provided directly to the City for inspection, audit and copying when it is practical to do so; otherwise, unless an alternative is mutually agreed upon, such documents and records shall be made available at Contractor's address indicated for receipt of notices in this Agreement.

(c) Where City has reason to believe that any of the documents or records required to be maintained pursuant to this section may be lost or discarded due to dissolution or termination of Contractor's business, City may, by written request, require that custody of such documents or records be given to the City. Access to such documents and records shall be granted to City, as well as to its successors-in-interest and authorized representatives.

SECTION 8. INDEPENDENT CONTRACTOR.

(a) Contractor is and shall at all times remain a wholly independent contractor and not an officer, employee or agent of City. Contractor shall have no authority to bind City in any manner, nor to incur any obligation, debt or liability of any kind on behalf of or against City, whether by contract or otherwise, unless such authority is expressly conferred under this Agreement or is otherwise expressly conferred in writing by City.

(b) The personnel performing the Services under this Agreement on behalf of Contractor shall at all times be under Contractor's exclusive direction and control. Neither City, nor any elected or appointed boards, officers, officials, employees or agents of City, shall have control over the conduct of Contractor or any of Contractor's officers, employees, or agents except as set forth in this Agreement. Contractor shall not at any time or in any manner represent that Contractor or any of Contractor's officers, employees, or agents are in any manner officials, officers, employees or agents of City.

(c) Neither Contractor , nor any of Contractor's officers, employees or agents, shall obtain any rights to retirement, health care or any other benefits which may otherwise accrue to City's employees. Contractor expressly waives any claim Contractor may have to any such rights.

SECTION 9. STANDARD OF PERFORMANCE.

Contractor represents and warrants that it has the qualifications, experience and facilities necessary to properly perform the Services required under this Agreement in a thorough, competent and professional manner. Contractor shall at all times faithfully, competently and to the best of its ability, experience and talent, perform all Services. In meeting its obligations under this Agreement, Contractor shall employ, at a minimum, generally accepted standards and practices utilized by persons engaged in providing services similar to the Services required of Contractor under this Agreement. In addition to the general standards of performance set forth this section, additional specific standards of performance and performance criteria may be set forth in Exhibit "A" "Scope of Work" that shall also be applicable to Contractor's work under this Agreement. Where there is a conflict between a general and a specific standard of performance or performance criteria, the specific standard or criteria shall prevail over the general.

SECTION 10. COMPLIANCE WITH APPLICABLE LAWS; PERMITS AND LICENSES.

Contractor shall keep itself informed of and comply with all applicable federal, state and local laws, statutes, codes, ordinances, regulations and rules in effect during the term of this Agreement. Contractor shall obtain any and all licenses, permits and authorizations necessary to perform the Services set forth in this Agreement. Neither City, nor any elected or appointed boards, officers, officials, employees or agents of City, shall be liable, at law or in equity, as a result of any failure of Contractor to comply with this section.

SECTION 11. PREVAILING WAGE LAWS

It is the understanding of City and Contractor that California prevailing wage laws do not apply to this Agreement because the Agreement does not involve any of the following services subject to prevailing wage rates pursuant to the California Labor Code or regulations promulgated thereunder: Construction, alteration, demolition, installation, or repair work performed on public buildings, facilities, streets or sewers done under contract and paid for in whole or in part out of public funds. In this context, "construction" includes work performed during the design and preconstruction phases of construction including, but not limited to, inspection and land surveying work.

SECTION 12. NONDISCRIMINATION.

Contractor shall not discriminate, in any way, against any person on the basis of race, color, religious creed, national origin, ancestry, sex, age, physical handicap, medical condition or marital status in connection with or related to the performance of this Agreement.

SECTION 13. UNAUTHORIZED ALIENS.

Contractor hereby promises and agrees to comply with all of the provisions of the Federal Immigration and Nationality Act, 8 U.S.C.A. §§ 1101, et seq., as amended, and in connection therewith, shall not employ unauthorized aliens as defined therein. Should Contractor so employ such unauthorized aliens for the performance of the Services, and should the any liability or sanctions be imposed against City for such use of unauthorized aliens, Contractor hereby agrees to and shall reimburse City for the cost of all such liabilities or sanctions imposed, together with any and all costs, including attorneys' fees, incurred by City.

SECTION 14. CONFLICTS OF INTEREST.

(a) Contractor covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, which would conflict in any manner with the interests of City or which would in any way hinder Contractor's performance of the Services. Contractor further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or subcontractor without the express written consent of the City Manager. Contractor agrees to at all times avoid conflicts of interest or the appearance of any conflicts of interest with the interests of City in the performance of this Agreement.

(b) City understands and acknowledges that Contractor is, as of the date of execution of this Agreement, independently involved in the performance of non-related services for other governmental agencies and private parties. Contractor is unaware of any stated position of City relative to such projects. Any future position of City on such projects shall not be considered a conflict of interest for purposes of this section.

(c) City understands and acknowledges that Contractor will perform non-related services for other governmental agencies and private Parties following the completion of the Services under this Agreement. Any such future service shall not be considered a conflict of interest for purposes of this section.

SECTION 15. CONFIDENTIAL INFORMATION; RELEASE OF INFORMATION.

(a) All information gained or work product produced by Contractor in performance of this Agreement shall be considered confidential, unless such information is in the public domain or already known to Contractor. Contractor shall not release or disclose any such information or work product to persons or entities other than City without prior written authorization from the City Manager, except as may be required by law.

(b) Contractor, its officers, employees, agents or subcontractors, shall not, without prior written authorization from the City Manager or unless requested by the City Attorney of City, voluntarily provide declarations, letters of support, testimony at depositions, response to interrogatories or other information concerning the work performed under this Agreement. Response to a subpoena or court order shall not be considered "voluntary" provided Contractor gives City notice of such court order or subpoena.

(c) If Contractor, or any officer, employee, agent or subcontractor of Contractor, provides any information or work product in violation of this Agreement, then City shall have the right to reimbursement and indemnity from Contractor for any damages, costs and fees, including attorney's fees, caused by or incurred as a result of Contractor's conduct.

Contractor shall promptly notify City should Contractor, its officers, employees, agents or subcontractors, be served with any summons, complaint, subpoena, notice of deposition, request for documents, interrogatories, request for admissions or other discovery request, court order or subpoena from any party regarding this Agreement and the work performed thereunder. City retains the right, but has no obligation, to represent Contractor or be present at any deposition, hearing or similar proceeding. Contractor agrees to cooperate fully with City and to provide City with the opportunity to review any response to discovery requests provided by Contractor. However, this right to review any such response does not imply or mean the right by City to control, direct, or rewrite said response. Contractor shall not be held criminally or civilly liable under any Federal or State trade secret law for the disclosure of a trade secret that is made in confidence to a Federal, State, or local government official or to an attorney solely for the purpose of reporting or investigating a suspected violation of law or for the disclosure of a trade secret that is made in a complaint or other document filed in a lawsuit or other proceeding, if

such filing is made under seal.

SECTION 16. INDEMNIFICATION.

(a) Indemnification for Professional Liability. Where the law establishes a professional standard of care for Contractor's services, to the fullest extent permitted by law, Contractor shall indemnify, protect, defend and hold harmless City and any and all of its officials, employees and agents ("Indemnified Parties") from and against any and all liability (including liability for claims, suits, actions, arbitration proceedings, administrative proceedings, regulatory proceedings, losses, expenses or costs of any kind, whether actual, alleged or threatened, including attorneys' fees and costs, court costs, interest, defense costs, and expert witness fees) arise out of, are a consequence of, or are in any way attributable to, in whole or in part, any negligent or wrongful act, error or omission of Contractor, or by any individual or entity for which Contractor is legally liable, including but not limited to officers, agents, employees or subcontractors of Contractor, in the performance of professional services under this Agreement.

(b) Indemnification for Other than Professional Liability. Other than in the performance of professional services and to the full extent permitted by law, Contractor shall indemnify, protect, defend and hold harmless City, and any and all of its employees, officials and agents from and against any liability (including liability for claims, suits, actions, arbitration proceedings, administrative proceedings, regulatory proceedings, losses, expenses or costs of any kind, whether actual, alleged or threatened, including attorneys' fees and costs, court costs, interest, defense costs, and expert witness fees), where the same arise out of, are a consequence of, or are in any way attributable to, in whole or in part, the performance of this Agreement by Contractor, or by any individual or entity for which Contractor is legally liable, including but not limited to officers, agents, employees or subcontractors of Contractor.

(c) Indemnification from Subcontractors. Contractor agrees to obtain executed indemnity agreements with provisions identical to those set forth in this section from each and every subcontractor or any other person or entity involved by, for, with or on behalf of Contractor in the performance of this Agreement naming the Indemnified Parties as additional indemnitees. In the event Contractor fails to obtain such indemnity obligations from others as required herein, Contractor agrees to be fully responsible according to the terms of this section. Failure of City to monitor compliance with these requirements imposes no additional obligations on City and will in no way act as a waiver of any rights hereunder. This obligation to indemnify and defend City as set forth herein is binding on the successors, assigns or heirs of Contractor and shall survive the termination of this Agreement or this section.

(d) City's Negligence. The provisions of this section do not apply to claims occurring as a result of City's sole negligence. The provisions of this section shall not release City from liability arising from gross negligence or willful acts or omissions of City or any and all of its officials, employees and agents.

SECTION 17. INSURANCE.

Contractor agrees to obtain and maintain in full force and effect during the term of this Agreement the insurance policies set forth in Exhibit "C" "Insurance" and made a part of this Agreement. All insurance policies shall be subject to approval by City as to form and content. These requirements are subject to amendment or waiver if so approved in writing by the City Manager. Contractor agrees to provide City with copies of required policies upon request.

SECTION 18. ASSIGNMENT.

The expertise and experience of Contractor are material considerations for this Agreement. City has an interest in the qualifications and capability of the persons and entities who will fulfill the duties and obligations imposed upon Contractor under this Agreement. In recognition of that interest, Contractor shall not assign or transfer this Agreement or any portion of this Agreement or the performance of any of Contractor's duties or obligations under this Agreement without the prior written consent of the City. Any attempted assignment shall be ineffective, null and void, and shall constitute a material breach of this Agreement entitling City to any and all remedies at law or in equity, including termination of this Agreement pursuant to Section 20 "Termination of Agreement." City acknowledges, however, that Contractor, in the performance of its duties pursuant to this Agreement, may utilize subcontractors.

SECTION 19. CONTINUITY OF PERSONNEL.

Contractor shall make every reasonable effort to maintain the stability and continuity of Contractor's staff and subcontractors, if any, assigned to perform the Services. Contractor shall notify City of any changes in Contractor's staff and subcontractors, if any, assigned to perform the Services prior to and during any such performance.

SECTION 20. TERMINATION OF AGREEMENT.

(a) City may terminate this Agreement, with or without cause, at any time by giving thirty (30) days written notice of termination to Contractor. In the event such notice is given, Contractor shall cease immediately all work in progress.

(b) Contractor may terminate this Agreement for cause at any time upon thirty (30) days written notice of termination to City.

(c) If either Contractor or City fail to perform any material obligation under this Agreement, then, in addition to any other remedies, either Contractor, or City may terminate this Agreement immediately upon written notice.

(d) Upon termination of this Agreement by either Contractor or City, all property belonging exclusively to City which is in Contractor's possession shall be returned to City. Contractor shall furnish to City a final invoice for work performed and expenses incurred by Contractor, prepared as set forth in Section 4 "Compensation and Method of Payment" of this Agreement. This final invoice shall be reviewed and paid in the same manner as set forth in Section 4 "Compensation and Method of Payment" of this Agreement.

SECTION 21. DEFAULT.

In the event that Contractor is in default under the terms of this Agreement, the City shall not have any obligation or duty to continue compensating Contractor for any work performed after the date of default. Instead, the City may give notice to Contractor of the default and the reasons for the default. The notice shall include the timeframe in which Contractor may cure the default. This timeframe is presumptively thirty (30) days, but may be extended, though not reduced, if circumstances warrant. During the period of time that Contractor is in default, the City shall hold all invoices and shall, when the default is cured, proceed with payment on the invoices. In the alternative, the City may, in its sole discretion, elect to pay some or all of the outstanding invoices during the period of default. If Contractor does not cure the default, the City may take necessary steps to terminate this Agreement under Section 20 "Termination of Agreement." Any failure on the part of the City to give notice of the Contractor's default shall not be deemed to result in a waiver of the City's legal rights or any rights arising out of any provision of this Agreement.

SECTION 22. EXCUSABLE DELAYS.

Contractor shall not be liable for damages, including liquidated damages, if any, caused by delay in performance or failure to perform due to causes beyond the control of Contractor. Such causes include, but are not limited to, acts of God, acts of the public enemy, acts of federal, state or local governments, acts of City, court orders, fires, floods, epidemics, strikes, embargoes, and unusually severe weather. The term and price of this Agreement shall be equitably adjusted for any delays due to such causes.

SECTION 23. COOPERATION BY CITY.

All public information, data, reports, records, and maps as are existing and available to City as public records, and which are necessary for carrying out the Services shall be furnished to Contractor in every reasonable way to facilitate, without undue delay, the Services to be performed under this Agreement.

SECTION 24. NOTICES.

All notices required or permitted to be given under this Agreement shall be in writing and shall be personally delivered, or sent by certified mail, postage prepaid and return receipt requested, addressed as follows:

To City:	City of Eastvale Attn: Amanda Wells, Finance Director/City Treasurer 12363 Limonite Ave., Suite 910 Eastvale, CA 91752
To Contractor:	NBS Government Finance Group Attn: Adina McCargo, Director 32605 Temecula Parkway, Suite 100

Temecula, CA 92592

Notice shall be deemed effective on the date personally delivered or, if mailed, three (3) days after deposit of the same in the custody of the United States Postal Service.

SECTION 25. AUTHORITY TO EXECUTE.

Each of the signatories hereto represents and warrants that he or she is competent and authorized to enter into this Agreement on behalf of the Party for whom he or she purports to sign. Each Party hereto agrees to defend, indemnify, and hold harmless the other Parties hereto against all claims, suits, actions, and demands, including necessary expenses of investigation and reasonable attorneys' fees and costs, arising out of claims that its signatory was not competent or so authorized to execute this Agreement.

SECTION 26. ADMINISTRATION AND IMPLEMENTATION.

This Agreement shall be administered and executed by the City Manager or his or her designated representative. The City Manager shall have the authority to issue interpretations and to make amendments to this Agreement, including amendments that commit additional funds, consistent with Section 28 "Amendment" and the City Manager's contracting authority under the Eastvale Municipal Code.

SECTION 27. BINDING EFFECT.

This Agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the Parties.

SECTION 28. AMENDMENT.

No amendment to or modification of this Agreement shall be valid unless made in writing and approved by the Contractor and by the City. The City Manager shall have the authority to approve any amendment to this Agreement if the total compensation under this Agreement, as amended, would not exceed the City Manager's contracting authority under the Eastvale Municipal Code. The Parties agree that the requirement for written modifications cannot be waived and that any attempted waiver shall be void. The City's City Manager may, but is not required to, make minor amendments not affecting substantive terms without further authorization from the City Council. The City Council hereby authorizes the City Manager to execute any such amendments as required by this Agreement or that do not otherwise reduce City's rights under this Agreement. All other amendments shall be approved by the City Council.

SECTION 29. WAIVER.

Waiver by any Party to this Agreement of any term, condition, or covenant of this Agreement shall not constitute a waiver of any other term, condition, or covenant. Waiver by any Party of any breach of the provisions of this Agreement shall not constitute a waiver of any other provision nor a waiver of any subsequent breach or violation of any provision of this Agreement. Acceptance by City of any work or services by Contractor shall not constitute a waiver of any of the provisions of this Agreement.

SECTION 30. LAW TO GOVERN; VENUE.

This Agreement shall be interpreted, construed and governed according to the laws of the State of California. In the event of litigation between the Parties, venue in state trial courts shall lie exclusively in the County of Riverside, California. In the event of litigation in a U.S. District Court, venue shall lie exclusively in the Central District of California, in Riverside.

SECTION 31. ATTORNEYS FEES, COSTS AND EXPENSES.

In the event litigation or other proceeding is required to enforce or interpret any provision of this Agreement, the prevailing Party in such litigation or other proceeding shall be entitled to an award of reasonable attorney's fees, costs and expenses, in addition to any other relief to which it may be entitled.

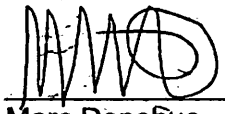
SECTION 32. ENTIRE AGREEMENT.

This Agreement, including the attached Exhibits "A" through "C", is the entire, complete, final and exclusive expression of the Parties with respect to the matters addressed therein and supersedes all other agreements or understandings, whether oral or written, or entered into between Contractor and City prior to the execution of this Agreement. No statements, representations or other agreements, whether oral or written, made by any Party which are not embodied herein shall be valid and binding.

SECTION 33. SEVERABILITY.

If any term, condition or covenant of this Agreement is declared or determined by any court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions of this Agreement shall not be affected thereby and the Agreement shall be read and construed without the invalid, void or unenforceable provision(s).

SECTION 34. CONFLICTING TERMS.



Except as otherwise stated herein, if the terms of this Agreement conflict with the terms of any Exhibit hereto, or with the terms of any document incorporated by reference into this Agreement, the terms of this Agreement shall control.

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement on the date and year first-above written.

EXHIBIT "C"
INSURANCE

A. Insurance Requirements. Contractor shall provide and maintain insurance, acceptable to the City, in full force and effect throughout the term of this Agreement, against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Services by Contractor, its agents, representatives or employees. Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII.

Contractor shall provide the following scope and limits of insurance:

1. Minimum Scope of Insurance. Coverage shall be at least as broad as:

(1) Commercial General Liability. Insurance Services Office form Commercial General Liability coverage (Occurrence Form CG 0001).

(2) Automobile. Insurance Services Office form number CA 0001 (Ed. 1/87) covering Automobile Liability, including code 1 "any auto" and endorsement CA 0025, or equivalent forms subject to the written approval of the City.

(3) Workers' Compensation. Workers' Compensation insurance as required by the Labor Code of State of California covering all persons providing Services on behalf of the Contractor and all risks to such persons under this Agreement.

(4) Professional Liability. Professional liability insurance appropriate to the Contractor's profession. This coverage may be written on a "claims made" basis, and must include coverage for contractual liability. The professional liability insurance required by this Agreement must be endorsed to be applicable to claims based upon, arising out of or related to Services performed under this Agreement. The insurance must be maintained for at least three (3) consecutive years following the completion of Contractor's services or the termination of this Agreement. During this additional three (3) year period, Contractor shall annually and upon request of the City submit written evidence of this continuous coverage.

2. Minimum Limits of Insurance. Contractor shall maintain limits of insurance no less than:

(1) Commercial General Liability. $1,000,000 general aggregate for bodily injury, personal injury and property damage.

(2) Automobile. $1,000,000 per accident for bodily injury and property damage. A combined single limit policy with aggregate limits in an amount of

not less than $2,000,000 shall be considered equivalent to the said required minimum limits set forth above.

(3) Workers' Compensation. Workers' Compensation as required by the Labor Code of the State of California of not less than $1,000,000 per occurrence.

(4) Professional Liability. $1,000,000 per occurrence.

B. Other Provisions. Insurance policies required by this Agreement shall contain the following provisions:

1. All Policies. Each insurance policy required by this Agreement shall be endorsed and state the coverage shall not be suspended, voided, cancelled by the insurer or either Party to this Agreement, reduced in coverage or in limits except after 30 days' prior written notice by certified mail, return receipt requested, has been given to City.

2. Commercial General Liability and Automobile Liability Coverages.

(1) City, and its respective elected and appointed officers, officials, and employees and volunteers are to be covered as additional insureds as respects: liability arising out of activities Contractor performs; products and completed operations of Contractor; premises owned, occupied or used by Contractor; or automobiles owned, leased, hired or borrowed by Contractor. The coverage shall contain no special limitations on the scope of protection afforded to City, and their respective elected and appointed officers, officials, or employees.

(2) Contractor's insurance coverage shall be primary insurance with respect to City, and its respective elected and appointed, its officers, officials, employees and volunteers. Any insurance or self-insurance maintained by City, and its respective elected and appointed officers, officials, employees or volunteers, shall apply in excess of, and not contribute with, Contractor's insurance.

(3) Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.

(4) Any failure to comply with the reporting or other provisions of the insurance policies, including breaches of warranties, shall not affect coverage provided to City, and its respective elected and appointed officers, officials, employees or volunteers.

3. Workers' Compensation Coverage. Unless the City Manager otherwise agrees in writing, the insurer shall agree to waive all rights of subrogation

against City, and its respective elected and appointed officers, officials, employees and agents for losses arising from work performed by Contractor.

C. Other Requirements. Contractor agrees to deposit with City, at or before the effective date of this Agreement, certificates of insurance necessary to satisfy City that the insurance provisions of this contract have been complied with. The City may require that Contractor furnish City with copies of original endorsements effecting coverage required by this Exhibit "C". The certificates and endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. City reserves the right to inspect complete, certified copies of all required insurance policies, at any time.

1. Contractor shall furnish certificates and endorsements from each subcontractor identical to those Contractor provides.

2. Any deductibles or self-insured retentions must be declared to and approved by City. At the option of City, either the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects City or its respective elected or appointed officers, officials, employees and volunteers, or the Contractor shall procure a bond guaranteeing payment of losses and related investigations, claim administration, defense expenses and claims.

3. The procuring of such required policy or policies of insurance shall not be construed to limit Contractor's liability hereunder nor to fulfill the indemnification provisions and requirements of this Agreement.

Exhibit A

SCOPE OF SERVICES

1972 Act Landscape and Lighting Maintenance District (LMD) and 1982 Act Benefit Assessment District (BAD) Administration

DATABASE DEVELOPMENT

NBS will update the database with current County Assessor's information including property owner names and addresses, and any other available data that will augment the existing database.

BUDGET PREPARATION

NBS will meet with City staff to review the district budget for the coming fiscal year. This budget will be based on historical costs and actual and/or projected changes in costs and/or improvements to be maintained. Cost categories may include but are not limited to capital improvements and maintenance costs, incidental costs (engineering, legal, City administration) and reserve funds.

ASSESSMENT COMPUTATION AND RATE ANALYSIS

NBS will compute the assessment for each parcel within the district according to the Method of Assessment. NBS will provide an assessment summary which will include the maximum assessments and current year assessments, separated by zone and method of assessment categories, if applicable.

ENGINEER'S REPORT PREPARATION

NBS will prepare the annual Engineer's Report and provide to City staff. The annual Engineer's Report does not require a Registered Professional Engineer (PE) signature and stamp unless an assessment increase, as defined by Proposition 218, occurs. The Report will consist of:

- District background information.
- A detailed and technically supported Method of Assessment.
- A description of the improvements and services that are being funded by the District.
- A cost estimate for the improvements and services being funded.
- Copy or reference to the original District Diagram.
- A table showing assessment levies by zone and method of assessment categories.
- An Assessment Roll listing assessments by parcel or reference a complete roll on file with the City.

REPORT REVIEW AND APPROVAL

NBS will meet via conference call with City staff to review the Engineer's Report for modifications and approval.

NOTICING AND RESOLUTION COORDINATION

NBS will coordinate activities to ensure that required tasks are completed within the scheduled time frame. NBS will assist the City (or the City's legal counsel) with preparation of any notice of public hearing or other meetings requiring publication. NBS will assist the City (or the City's legal counsel) with preparation of the staff report, all legal notices and the associated resolutions described below:

- Resolution describing improvements, initiating proceedings, and ordering the engineer to prepare and file a report for the City.
- Resolution preliminarily approving the Engineer's Report.
- Resolution of Intention declaring the intention of the City Council to levy and collect assessments and setting a date for the public hearing.
- Resolution authorizing the placement of assessments on the secured property tax bills.

PUBLIC HEARING ATTENDANCE

NBS will attend the public hearing as requested by the City.

LEVY SUBMITTAL

NBS will submit the levy to the County Auditor-Controller in the required format. Assessments rejected by the County Auditor-Controller will be researched and resubmitted for collection on the County Tax Roll. Any parcels that are not accepted by the County for collection will be invoiced with payment to be directed to the City.

MAINTAIN DISTRICT DATA

NBS will annually track all parcel changes to ensure that all changes are documented. Historical parcel change data will be maintained by NBS.

ANNUAL LEVY REPORT

NBS will provide an annual Levy Summary Report. The report will include a parcel listing with key rate identifiers and final levy amounts. Parcel and levy data can be provided via an emailed electronic file and printed, if desired.

CONSULTING SUPPORT

NBS shall provide a toll-free phone number for use by the City, other interested parties, and all property owners. NBS will be available to answer questions regarding the District and the ongoing collection of assessments. Bilingual staff is available to assist Spanish-speaking property owners.

Community Facilities District Administration (Non-Bonded)

DATA COLLECTION

NBS will gather and review data pertinent to the administration of the Community Facilities District (CFD). Data will be obtained from various sources such as assessor's parcel maps, building permits and county assessor information as determined to be necessary based on the requirements of the Rate and Method of Apportionment. NBS will maintain and periodically update a database of all parcels within the CFDs and relevant parcel information.

ADMINISTRATIVE COST RECOVERY

NBS will assist the City in identifying all costs associated with the administration of the CFD and recover those costs through the levy process as outlined in §53317(e) and §53340 of the Government Code of the State of California. Such costs may include but are not to be limited to: bank fees, legal fees, county tax collection fees, and costs and expenses of the City and its consultants related to administration of the CFD.

SPECIAL TAX REQUIREMENT

NBS will calculate the annual Special Tax Requirement that will include all necessary components as outlined in the Rate and Method of Apportionment, such as funds necessary for authorized services and maintenance, administrative expenses, collection costs for direct financing of services or facilities, and credits as determined from the analysis of the CFD funds.

LEVY CALCULATION

NBS will calculate the annual special tax levy for each parcel within the CFD following the guidelines established in the Rate and Method of Apportionment.

LEVY SUBMITTAL

NBS will submit the levy to the County Auditor-Controller in the required format by the County's deadline. Special Taxes rejected by the County Auditor-Controller will be researched and resubmitted for collection on the County Tax Roll. Any parcels that are not accepted by the County for collection will be invoiced directly to the parcel owner, with payment to be directed to the City.

SPECIAL TAX LEVY REPORT

NBS will provide an annual Special Tax Levy Report. This report will include a parcel listing with levy amounts and other parcel information, the details of the annual Special Tax Requirement, fund analysis, administrative expenses to be recovered, and status of the project and current issues affecting the CFD.

ADDITIONAL REPORTING

NBS will be a resource to the City by staying current and identifying any new legislation and reporting requirements as they relate to the CFD.

For each of the following reporting requirements, NBS will review all pertinent documents and obtain the information needed to:

- Prepare the required reporting to the California State Controller's Office California Government Code, Section 12463.2, enacted as part of AB 2109. Provide to City staff for inclusion in the annual financial transaction report.
- Assist in the filing of the SB 165 report to the City Council each year to comply with legislation that enforces additional reporting requirements. California Government Code, Sections 50075.3 or 53411.
- Prepare other reports as required by any State and/or Federal disclosure reporting requirements pertaining to each CFD, as applicable, amended, or newly enacted and required. This may be subject to additional fee.

NOTICE OF SPECIAL TAX DISCLOSURE

NBS will provide Notice of Special Tax Disclosure notices to requesting parties as required by §53340.2 and §53341.5 of the Government Code of the State of California. The fee of any Notice of Special Tax shall be billed to the party requesting the disclosure form.

CONSULTING SUPPORT

NBS will provide a toll-free phone number for use by the City, other interested parties, and property owners. Our staff will be available to answer questions regarding the CFD and ongoing collection of the special tax. Bilingual staff is available for Spanish-speaking property owners.

ADDITIONAL OPTIONAL SERVICES – HOURLY RATES

The following table shows our current hourly rates. Optional services authorized by the City but not included in the scope of services will be billed at this rate or the then applicable hourly rate. This may include attendance at additional meetings or other on-call consulting services, as requested.

Title	Hourly Rate
Director	$225
Associate Director / Engineer	$210
Senior Consultant / Manager	$175
Consultant	$155
Analyst	$130
Clerical / Support	$ 105

ANNUAL FEE INCREASES

Cost of living increases may be applied to the services listed above in October each year, beginning with October 2023. The increase would be the actual cost of living increase based on the U.S. Department of Labor, Bureau of Labor Statistics, Consumer Price Index (CPI) for all urban consumers for the City's area.

TERMS

Administration services fees are for the first year, with possible CPI adjustment in subsequent years, as referenced above. Such fees will be invoiced at the beginning of each quarter. Expenses will be itemized and included in the next regular invoice. Fees for all other services will be invoiced upon completion of the task. If the project is prematurely terminated by either party, NBS shall receive payment for work completed. Payment shall be made within 30 days of submittal of an invoice. If payment is not received within 90 days, simple interest will begin to accrue at the rate of 1.5% per month. Either party can cancel administration contracts with 30 days' written notice.

CITY OF EASTVALE

AGENDA STAFF REPORT

City Council Meeting
PUBLIC HEARINGS
Agenda Item No. 12.1
May 28, 2025

PLN24-20053 – Density Bonus Agreement, Tentative Tract Map 39022, and Major Development Review for Warmington Residential Development (CONTINUANCE)

Prepared By:

Jamie K. Cerda, AICP, Principal Planner

Recommended Action(s)

Staff recommends that the City Council take the following actions:

1. Find the project exempt from CEQA pursuant to CEQA Guidelines Section 15183 based on the findings and conclusions provided in the Exemption Determination Report, attached hereto and the conclusion that the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR (State Clearinghouse No. 20222080090);
2. Approve the Affordable Housing Agreement and Declaration of Restrictive Covenants between Warmington Residential California, Inc. and the City of Eastvale, and authorize the City Manager to execute;
3. Authorize City Manager or designee to execute Resale Restriction Agreement and related documents between the City and initial homeowner(s) of affordable units;
4. Approve Vesting Tentative Tract Map No. 39022 to subdivide three (3) existing residential lots totaling 8.3-acres (7.9 net acres) into 76 residential lots, four (4) for water quality and open space purposes and five (5) for private street purposes, subject to conditions of approval; and
5. Approve Major Development Review for the master building architecture and site planning of 76 single-family residential lots, landscaping, and parking areas, subject to conditions of approval.

Summary

The applicant, Warmington Residential California, Inc. is requesting approval of a density bonus agreement, Vesting Tentative Tract Map (VTTM) No. 39022 to subdivide three (3) existing residential lots totaling 8.3-acres (7.9 net acres)(properties addressed as 8312 Grapewin Street and 8330 Archibald Avenue) into 76 single-family residential lots, four (4) lots for water quality and open space purposes, and five (5) lots for private street purposes, as well as the master site planning and architecture of the 76 single-family residential homes with four (4) proposed as affordable to very-low income buyers.

As proposed, the project will utilize waivers from development standards through a density bonus agreement pursuant to California Government Code sections 65915 through 65918 and Eastvale Municipal Code (EMC) Section 120.05.090. Additionally, the proposed project is subject to the provisions of Housing Accountability Act (HAA), which requires the City to approve the project at the density permitted by the General Plan land use designation for the subject site. The project requires approval by the City Council for the density bonus to allow up to 9.16 dwelling units per acre (du/ac). Staff recommends approval of the applicant's requests as the project satisfies the intent of the Eastvale General Plan 2040's Housing Element to promote the development of adequate housing to meet the City's fair share of the region's housing needs for all income segments of the population and the provisions of HAA and State Density Bonus Law.

Background

The Housing Accountability Act ("HAA") (Government Code Section 65589.5) prohibits the City from denying a housing development project, or conditioning it to be a lower density, if the project complies with all applicable objective general plan, zoning, and subdivision standards and criteria unless a written finding is made supported by a preponderance of the evidence in the record that both the following conditions exist: (A) The housing development project would have a specific, adverse impact upon the public health or safety, and (B) There is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact other than disapproval of the project or conditioning the project to be built at a lower density. The HAA defines a "specific, adverse impact" as "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete."

The HAA further clarifies that a project is deemed to be consistent with applicable zoning standards and criteria if it is consistent with all applicable general plan standards and criteria but the zoning for the site is inconsistent with the General Plan. The HAA also specifies that the receipt of a density bonus, incentives, concessions, waivers or reductions of development standards under the Density Bonus Law is not a basis on which a proposed housing project can be found inconsistent with applicable standards.

On April 23, 2025, the City Council conducted a public hearing on the proposed residential development. At that meeting, City staff presented comprehensive information regarding the project's tentative tract map, site planning, architectural design, landscaping, and density bonus requests. The presentation also included a discussion of the Housing Accountability Act's applicability to the project. A copy of the April 23, 2025, staff report can be found as Attachment 1 of this report.

Following the presentation and public testimony, the City Council continued the item to the May 28, 2025 City Council meeting, to allow staff time to further analyze several health and safety concerns raised during the hearing. Chief among these concerns was the proximity of the project's sole drive aisle to a signalized intersection at Archibald Avenue, an urban arterial roadway with high vehicle speeds, and Grapewin Street. The Council expressed concern that the location of the primary access point could result in increased risk of traffic collisions, particularly from vehicles accelerating or decelerating in and out of the community at a location where line of sight visibility is hindered.

Additional concerns included the close proximity of residential units to Archibald Avenue and the potential impacts to future residents. Council also requested that the applicant explore the possibility of converting the proposed emergency vehicle access (EVA) connection to Grapewin Street into a full access point for residents. This would allow residents to utilize the existing signalized intersection at Archibald Avenue and Grapewin Street, potentially improving both ingress and egress safety. Lastly, parking concerns were raised by the City Council.

Analysis

Following the City Council's direction on April 28, 2025, staff initiated a focused review of the health and safety concerns associated with the project's proposed circulation and access design, particularly with respect to the proximity of the primary drive aisle to the signalized intersection at Archibald Avenue.

Access Proximity and Traffic Safety

Archibald Avenue is classified as an urban arterial roadway pursuant to the Eastvale 2040 General Plan with relatively high vehicle speeds and significant daily traffic volumes. The proposed main access point for the community is located 401 feet to a signalized intersection (i.e. Grapewin Street), which raised concerns by City Council about the potential for traffic conflicts related to turning movements, queuing, and acceleration/deceleration patterns. Included as **Attachment 7** is a memorandum prepared by City's Traffic Engineering consultant (i.e., Fehr & Peers) which analyzes several driveway access considerations including Riverside County Transportation Design Standards, right in/right out access, intersection control, and sight distance. In summary, Fehr & Peers found the project access satisfies local and state intersection distance considerations and proposes industry best practices to manage access to the unsignalized driveway. As such, staff did not identify any significant impacts to public health or safety.

Proximity of Residential Units to Archibald Avenue

Ten of the proposed residential lots rear on to Archibald Avenue with one (1) lot that sides onto Archibald Avenue. Of the eleven units adjacent to Archibald Avenue, Lot 10 has the smallest proposed setback from the public right-of-way at 12.3' (rear setback). Included in the ultimate right-of-way for Archibald Avenue is a 21' meandering trail inclusive of a five (5) foot sidewalk and 16 feet of landscaping prior to the roadway; therefore, the nearest residential unit to the roadway of Archibald Avenue is 33.3' (Lot 10). In review of the proposed project, staff identified a number of properties throughout the City that side or rear on to Archibald Avenue, Limonite Avenue, and Hamner Avenue with setbacks less than Lot 10. More specifically, five (5) properties north of the project site and south of Chandler Street, side or rear onto Archibald Avenue with a setback distance less than Lot 10 (12.3').

The smallest setback found was located at 14193 Creek Sand Court with an eight-foot side yard setback which also includes a 21' of meandering sidewalk and landscape to buffer the residential unit from the roadway. Similar to the existing residential units found adjacent to urban arterials each of the proposed lots would be mitigated from potential impacts by a six-foot-tall masonry wall and landscape buffer. For these reasons staff determines the location of the residential units is consistent with similar existing developments and will not have an adverse impact upon public health and safety.

Grapewin Street Access Option

At the Planning Commission's direction, and reiterated at the April 23, 2025, City Council meeting, staff has asked the applicant to initiate discussions with the private property owner of Grapewin Street to explore the feasibility of converting the proposed emergency vehicle access (EVA) into a full-access connection for residents. As illustrated in **Attachment 8**, the first 120 feet of Grapewin Street falls into the ownership of three different entities (i.e., City of Eastvale, River Glen Maintenance Corporation, and Jurupa Community Services District). In order to obtain full access rights for the future residents of Warmington's proposed community, the applicant must secure those rights with both River Glen Maintenance Corp and Jurupa Community Services District. If successful, this connection could offer an additional ingress/egress point aligned with the existing Grapewin/Archibald signal, which may reduce traffic volumes at the Archibald Avenue access and aid in overall circulation and emergency response access. However, it is important to note that full-access to the Project from Grapewin is not required to meet any health or safety standards applicable to the project.

Parking

In addition to the items noted above, parking concerns were voiced by City Council at the April 23, 2025 City Council meeting. Pursuant to Section 120.05.060 of the Eastvale Zoning Code, the project would exceed the City's minimum parking requirement of 152 spaces (2 spaces per dwelling unit) by 162 parking spaces. Each proposed dwelling unit would include two (2) garage spaces and two (2) driveway spaces, for a total of 304 spaces, as well as an additional 10 on-street parallel open/guest parking stalls. In addition to the City of Eastvale Municipal Code, the site is parked in compliance with California Government Code Section 65915(p)(1)(B)(C) in that California Density Bonus Law allows 2.5 parking spaces per four or more bedroom units, inclusive of handicapped and guest parking.

To proactively address any neighborhood parking impacts that could result from the project, the Conditions of Approval for the DR include provisions requiring the following parking management practices, to be incorporated into the final, recorded CC&Rs, and applicable throughout the life of the project:

- Requiring onsite parking permits (such as stickers or hangtags) for any parking in the surface guest parking spaces;
- Policies for maximum times vehicles may be parked in the surface guest spaces;
- Policies for towing unauthorized vehicles; vehicles parked in unauthorized locations, such as fire lanes; vehicles parked in surface guest parking without a sticker, hangtag, or other identifiers; and vehicles parked longer than any maximum guest parking timeframes allowed;
- Policies prohibiting the parking, storage, or driving of commercial vehicle, RV, boat, trailer, ATV, golf cart, or similar vehicle on-site;
- Policies requiring all garages be used for the sole purpose of housing parked vehicles (i.e., not

for storage purposes); and
- Policies authorizing routine garage inspections to ensure garages are available for vehicle parking

Based on the above, staff supports the proposed parking plan and does not anticipate a parking shortage from the project.

Analysis Conclusion

As analyzed in the April 23, 2025, staff report, the General Plan land use designation and zoning for the project site are inconsistent. The City has applied the R-1 zoning district standards to the project, which is the zoning district most consistent with the Single-Family Law general plan land use designation for the site, as is allowed by the HAA. This project deviates from the applicable general plan and zoning standards only as permitted by the Density Bonus Law. Therefore, the project is deemed consistent with all applicable objective General Plan, zoning and subdivision standards and criteria. Furthermore, the project has been reviewed by all relevant agencies and departments, including fire, and public works/engineering. No comments were received indicating that the project was inconsistent with any applicable, objective, written public health or safety standards; therefore, staff supports the applicants requests.

Environmental

Pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15183, because implementation of the proposed project would not result in impacts that are peculiar to the project site and the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR, no additional environmental review beyond a Section 15183 Exemption Report is required for the proposed project. A Section 15183 Exemption Report was prepared for the project and has been included as **Attachment 7** of this report.

Strategic Plan Action - Priority Level: N/A | Target #: B | Goal #: E

Diversify the housing stock with more options.

Fiscal Impact

Processing the proposed applications will have little to no fiscal impact on the City as the project is funded by the applicant.

Prior City Council/Commission Action

On March 19, 2025, the Planning Commission took public testimony on the requested items and by a 5-0 vote, recommended the Eastvale City Council find that the project is exempt from CEQA based on the findings in the Exemption Determination Report and approve Vesting Tentative Tract Map 39022, the Major Development Review and the Density Bonus Agreement with Warmington Residential to construct 76 single family residences with four units set aside for the very low-income category. The Planning Commission complimented the applicant on the proposed architecture of the homes and requested the applicant work with the property owners of Grapewin Street (private street) to obtain full ingress/egress access rights for their residential community.

On April 23, 2025, the City Council took public testimony on the requested items and by a 5-0 vote, continued the public hearing until May 28, 2025, to allow staff the opportunity to re-evaluate the

project for any potential health and safety issues and provide the applicant additional time to secure full ingress/egress access rights to the proposed emergency vehicle access located at the project's northwest boundary.

Agenda Item No. 12.1
April 23, 2025

PLN24-20053 – Density Bonus Agreement, Tentative Tract Map 39022, and Major Development Review for Warmington Residential Development

Prepared By:

Jamie K. Cerda, AICP, Principal Planner

Recommended Action(s)

Staff recommends that the City Council take the following actions:

1. Find the project exempt from CEQA pursuant to CEQA Guidelines Section 15183 based on the findings and conclusions provided in the Exemption Determination Report, attached hereto and the conclusion that the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR (State Clearinghouse No. 20222080090);
2. Adopt a Resolution Approving the Density Bonus, Vesting Tentative Tract Map No. 39022, and to subdivide three (3) existing residential lots totaling 8.3-acres (7.9 net acres) into 76 residential lots, four (4) for water quality and open space purposes and five (5) for private street purposes, subject to conditions of approval, and the Major Development Review for the master building architecture and site planning of 76 single-family residential lots, landscaping, and parking areas, subject to conditions of approval;
3. Approve the form of Density Bonus Agreement between Warmington Residential California, Inc. and the City of Eastvale and authorize the City Manager to execute;
4. Approve the form of Resale Restriction Agreement and related documents between the City and initial homeowner(s) of affordable units and authorize the City Manager to execute Resale Restriction Agreements with the initial homebuyers of the four affordable units.

Summary

The applicant, Warmington Residential California, Inc. is requesting approval of a density bonus, Vesting Tentative Tract Map (VTTM) No. 39022 to subdivide three (3) existing residential lots totaling 8.3-acres (7.9 net acres)(properties addressed as 8312 Grapewin Street and 8330 Archibald Avenue) into 76 single-family residential lots, four (4) lots for water quality and open space purposes, and five (5) lots for private street purposes, as well as the master site planning and architecture of the 76 single-family residential homes with four (4) proposed as affordable to very-low income buyers.

As proposed, the project includes a density bonus and waivers of development standards under the State Density Bonus Law (California Government Code Section 65915 through 65918) and Eastvale Municipal Code (EMC) Section 120.05.090 because the project sets aside four (4) units for very-low income buyers. The EMC requires density bonuses to be approved by the City Council. The proposed density of the site is 9.16 dwelling units per acre (du/ac). The General Plan land use designation and zoning for the project site are inconsistent, however, a change of zone is not required for the project under the Housing Accountability Act (HAA), which allows housing development projects to proceed in such situations if consistent with the General Plan land use designation. Staff is recommending approval of the applicant's requests due to the project satisfying the intent of the Eastvale General Plan 2040's Housing Element to promote the development of adequate housing to meet the City's fair share of the region's housing needs for all income segments of the population and because the State Density Bonus Law does not give local agencies discretion to deny a density bonus if an applicant has met all of the statutory criteria.

Background

Location

The 8.3-acre project site is located on three (3) existing residential lots addressed as 8330 Archibald Avenue and 8312 Grapewin Street at the southeast corner of Archibald Avenue and Grapewin Street. The project site is bound by residential to the north, Vantage Point Church to the south, the Santa Ana Watercourse to the east and Archibald Avenue to the west.

Housing Accountability Act (HAA)

The applicant is proposing the subject development pursuant to the Housing Accountability Act (HAA) pursuant to Government Code Section 65589.5 (**Attachment 1**). The HAA established the state's overarching policy that a local government may not deny, reduce the density of, or make infeasible housing development projects, emergency shelters, or farmworker housing that are consistent with objective local development standards. The HAA was originally enacted in 1982 to address local opposition to growth and change. Communities resisted new housing, especially affordable housing, and consequently, multiple levels of discretionary review often prevented or delayed development. As a result, developers had difficulty ascertaining the type, quantity, and location where development would be approved. The HAA was intended to overcome the lack of certainty developers experienced by limiting local governments' ability to deny, make infeasible, or reduce the density of housing development projects.

The application is subject to the HAA and, as such, the proposed development site will not be required to be rezoned, if found consistent with the objective General Plan standards for the property. Moreover, the development is required to comply with the objective Zoning Code

standards applicable to the property, but only to the extent that they facilitate the development at the density allowed by the General Plan. Although the project site is currently zoned A-1 Light Agriculture, City Staff has identified the R-1 One-Family Dwelling zoning designation as the most closely consistent zone with the existing General Plan land use designation for the purpose of establishing development standards for the project (per HAA).

State Density Bonus Law

The California Density Bonus law allows developers who meet the requirements of the state law to seek increases in base density in exchange for providing affordable units on site. To help make constructing on-site affordable units feasible, the law allows developers to seek up incentives/concessions and an unlimited number of development standard waivers if application of the standards would physically preclude the development of the project at the density proposed. The first version of the Density Bonus Law was adopted in 1979 and has since been amended at various times. In early 2017, the law was amended to restrict the ability of local jurisdictions to require studies to "justify" the density bonus. The Density Bonus Law provides that an agency "shall" approve a density bonus if the project sets aside the requisite number of units for sale or rent to qualifying households.

This project includes a density bonus but the applicant has not sought any incentives or concessions.

Waiver of Development Standards

Pursuant to HAA, the City has selected the One-Family Dwelling (R-1) development standards for the project. However, pursuant to the Density Bonus Law, the developer is seeking specific waivers from certain R-1 standards to facilitate development of the project at the density allowed under the Density Bonus Law. Table 1 outlines the waivers requested by the applicant.

Table 1: Requested Waivers

Item	**R-1 Standard**	**Requested**
Minimum Lot Size	7,200 square feet	2,805 square feet
Minimum Lot Width	60 feet	33 feet
Minimum Lot Depth	100 feet	80 feet
Side Interior Setback	5 feet	4 feet
Side Street Setback	10 feet	4 feet
Max Fence Height	6 feet	7.5' (1.5 retaining with 6' privacy fence) 9' (3' retaining with 6' privacy fence) 15' (9' retaining with 6' privacy fence)
Street Width	32 feet curb to curb 50-foot right-of-way	26 feet curb to curb 34-foot right-of-way (Modified County Standard 106, given private streets)

RDS-14 (PG 19)	For detached single-family residential homes . . . 51 to 99 units: minimum of four different floor plans	Three floor plans
RDG-7 (PG 20)	All projects of 10 or more residential lots should include at least one-single-story floor plan	Tow-story plan types (No single-story model)

The Density Bonus Law requires the City to waive development standards that physically preclude the development of the project at the density proposed unless the City can make a finding of "specific, adverse impact," as defined by the HAA, upon the health or safety, or the waiver would violate State or federal law.

To ensure the housing units remain affordable according to the density and waivers that are being granted by the City, the applicant is required to enter into a Density Bonus Agreement (**Attachment 8**) with the City. The Density Bonus Agreement identifies the affordable units, and their household income limits, and other pertinent language such as the requirement for a resale restriction agreement between the City and the initial homebuyers of the affordable units (**Attachment 8.1**). The Density Bonus Law requires the City to ensure the affordable units that qualified the development for a density bonus are initially sold to qualifying households at an affordable sales price and requires those initial buyers to enter into an equity sharing agreement that will apply in the event the home is sold. Details related to the Density Bonus Agreement are discussed under the Density Bonus Agreement section of this report.

Analysis

Tentative Tract Map No. 39022

The applicant has submitted an application for Vesting Tentative Tract Map (VTTM 39022) to subdivide three developed lots totaling 8.3 acres (7.9 net acres) into seventy-six (76) single family residential lots, four (4) lots for water quality and open space purposes and five (5) lots for private street purposes within the Single-Family-Low land use designation. At present, the project site is developed with a residential structure and livestock farm utilized for past agricultural purposes, all of which would be demolished with the development of the proposed tract.

Municipal Code requirements pertaining to subdivisions (Tract Maps and/or Parcel Maps) are governed by the *Subdivision Map Act* (State of California Government Code § 66410-66499.58), and Title 130 (Subdivision) of the Eastvale Municipal Code. Furthermore, all subdivision maps must comply with the provisions of the City General Plan, Zoning Code, and all other ordinances, statutes and laws pertaining to the use, sale, leasing or subdivision of land.

General Plan Consistency

The subject property is classified as Single-Family-Low in the Eastvale General Plan 2040. This classification allows up to a maximum of eight (8) dwelling units per acre or a base density of 66 total dwelling units for the project site (8 du/ac x 8.3 ac ≈ 66 du). Pursuant to the California Density Bonus law, the density bonus is the number of units permitted to be built in addition to the “base density”, or the number of units that would be permitted to be built under generally applicable local requirements without a density bonus. The amount of the density bonus is set on a sliding scale, based upon the percentage of affordable units at each income level (**Attachment 2- State Density**

Bonus Law).

With the applicant's utilization of State Density Bonus law providing an affordable unit percentage of five percent (5%) or four (4) affordable units for the very low-income category or $51,250 annually, adjusted for a four-person household size (66 total du X 0.05 affordability rate ≈ 4 affordable du) the applicant is entitled to a density bonus of twenty percent (20%) or an additional fourteen (14) units above the base density of what would be permitted to be built under the General Plan without a density bonus; however, it should be noted that while the applicant is entitled to construct 80 residential units under State Density Bonus Law (66 base units + 14 density bonus units = 80 allowable residential units), the applicant is requesting a total of only 76 residential units as part of this project.

Table 2: Density Bonus Calculation

Affordable Unit - 5% (4 units-very low income)*	**Density Bonus Calculation**	**Units Allowed**
Base Density - Single Family Low	8.3 acres x8 du/ac	66 Units
20 Percent State Density Bonus	(66 x 0.20)	+14 units
Total Units		**80 Units allowed, 76 units proposed**
*Affordable unit percentage is calculated excluding units added by a density bonus.		

Vesting Tentative Tract Map No. 39022 (**Attachment 3**) proposes a density of 9.16 du/ac (i.e., 76 residential lots ÷ 8.3 acres = 9.16 du/ac), exceeding the permitted density for the site per the General Plan (i.e., 8 du/ac); however, pursuant to State Density Bonus Law, units added by a density bonus (i.e., 14 additional units) are excluded from density calculation; therefore, the project has a proposed density of 7.9 du/ac (i.e., 66 base density units ÷ 8.3 acres = 7.9 du/ac); therefore consistent with the General Plan land use designation of Single-Family-Low.

Zoning Code Compliance
The property is zoned A-1 Light Agriculture. This designation is intended as an area for large lot single-family residential units with minimum lots sizes of 20,000 square feet.

As proposed, VTTM 39022 does not conform to the development standards of the A-1 zone in that the 76 proposed residential parcels do not satisfy the minimum lot size of 20,000 square feet, lot width of 100 feet, and lot depth of 150 feet. The smallest lots comprising VTTM 39022 have minimums of 2,805 square feet in size, 33 feet in width, and 80 feet in depth.

However, under the provisions of HAA, a housing development cannot be required to rezone the property if it is consistent with the objective General Plan standards for the property. As stated above the proposed project complies with the standards of the Single-Family - Low General Plan land use designation. The proposed development also needs to comply with the objective zoning code standards applicable to the property, but only to the extent they facilitate the development at the density allowed by the General Plan.

Since the development standards of the A-1 zone would preclude the development of the site at the density permitted by the General Plan, the applicant designed the community to reflect the

development standards of the R-1 zone outlined in Table 3.2-2 of the Eastvale Zoning Code to the greatest extent feasible and is formally requesting waivers from the development standards the project cannot satisfy in order to maintain the by-right density of eight (8) dwelling units/acre.

While the minimum lot size, width, and depth of the proposed lots do not meet all the minimum standards outlined in Table 3.2-2 of the Eastvale Zoning Code for the R-1 zone, the R-1 zone is the only zone designated for single family detached residential units. Although the proposed lots are unable to meet the minimum lot dimensions for the R-1 zone, the site planning of the community (i.e., plotting) does comply with the majority of the development standards for the R-1 zone. This will be discussed in greater detail later in this report. For these reasons, staff has determined that the project meets the intent of HAA.

Access and Circulation

Access to the tract is proposed via a single-entry driveway along Archibald Avenue with restricted right-in and right-out access. The entry road (i.e., Street "A") would extend into the site a distance of approximately 140 feet where it intersects a loop road providing vehicular access to all units within the project. The entry road would include decorative paving treatment, community identification signage, and enhanced landscape nodes at either side to create an attractive "grand entry." A secondary emergency-only access is provided at the terminus of Street "E" connecting the project site with Grapewin Street (private street). Access would be restricted to emergency personnel only with the posting of signage, a low height manual double swing gate with Knox box. All streets within the tract are proposed to be private and maintained by the Homeowners Association.

The streets are designed with a 26-foot paved section and 4- foot sidewalk on either side within a 34-foot-wide right-of-way, which does not meet minimum street standards for public streets; however, the streets are proposed to be private and are designed to meet Riverside County Modified County Standard 106 for Private Streets. The Riverside County Fire Department has reviewed the proposed street design and Fire Lane Striping Plan to ensure adequate circulation and is supportive of the proposed design. Lastly, the City Engineer has reviewed the proposed project access and on-site circulation and did not cite any concerns with the proposed design.

Grading and Drainage

Site elevation ranges from approximately 578 feet to about 591 feet above mean sea level having a relatively flat to gently sloping terrain with surface drainage generally directed to the west. The Santa Ana River watercourse is located adjacent to the eastern site boundary with water surface elevation of approximately 540 feet above mean sea level.

Regional water quality regulations require storage and treatment of stormwater on-site to the maximum extent feasible in order to reduce pollutant loads, prior to discharge downstream. Accordingly, the applicant's Hydrology Report proposes the project will direct onsite flows towards the northwest corner of the project site via a series of gutters throughout the development. Surface flows in these proposed gutters will be captured via catch basins and conveyed via an onsite storm drain system into bioretention basins to treat the onsite runoff prior to discharging into a proposed storm drain line going north to Grapewin Street which connects into an existing drainage channel.

The Engineering Division has reviewed the proposed grading and drainage plan for the project and has not expressed any concerns regarding the proposed design. Standard conditions of approval have been suggested that require final grading and drainage plans and the final Water Quality

Management Plan (WQMP) to be reviewed and approved by the City Engineer prior to issuance of a grading permit.

Traffic

As the proposed project is consistent with the development density allowed on the project site by the General Plan, the proposed 76-unit residential project would not result in transportation impacts that are peculiar or more severe than those disclosed in the General Plan EIR adopted and certified by the City Council on March 27, 2024. Further, the City Traffic Engineer has reviewed the project proposal and has determined that the surrounding public street circulation system is designed to accommodate the level of development proposed. Additionally, the City Traffic Engineer is satisfied that the proposed project will not adversely impact traffic circulation along the surrounding streets, nor will it compromise the level of traffic/pedestrian safety in the area.

Noise

In general, construction activities on the project site would increase ambient noise levels in the vicinity on an intermittent but temporary basis. Noise levels during construction would fluctuate depending on the construction phase, equipment type and duration of use, distance between the noise source and receptors (i.e., neighboring residences and schools in the vicinity), and the presence or absence of barriers between the noise source and receptors. Staff notes that construction-related noise is exempt from the City's noise control ordinance, provided that construction noise occurs between 6:00 a.m. and 6:00 p.m. June through September and between 7:00 a.m. and 6:00 p.m. October through May. Staff has also included a condition of approval reiterating allowable construction hours and emphasizing the sensitivity of this issue to surrounding neighboring residents and the Vantage Point Church. It is anticipated that the primary source of noise impacts to the project site would be traffic noise from Archibald Avenue that is adjacent to the west side of the project site.

Public Infrastructure

Implementation of the proposed project will result in additional demand on existing public services, including demand for fire and police services. However, this increase in demand can be accommodated by existing service levels, and therefore would be less than a significant impact. Additionally, the increase in demand to the utilities, i.e., water, gas, power, sewer, can be accommodated by existing service levels as there is sufficient capacity to serve the project site under present conditions. Jurupa Valley Community Services District (JCSD) has provided a will-serve letter for the proposed project confirming availability of sufficient water supply to serve the project.

In addition, Riverside County Fire Department has reviewed the proposed site plan for fire/emergency access and did not identify any significant issues of concern that would require further submittals to Riverside County Fire Department subsequent to any approval of the project granted by the City. Riverside County Fire Department suggest applicable standard conditions of approval, which staff has included in the attached conditions of approval.

Schools

The proposed project would not include significant or unplanned population growth as the proposed project is consistent with the General Plan. The project would be required to comply with SB 50 requirements, which allow school districts to collect impact fees from developers of new projects. According to Section 65997 of the California Government Code, payment of statutory fees is the exclusive method of mitigating environmental effects related to the adequacy of school facilities.

Thus, upon payment of required fees by the applicant consistent with existing State requirements, impacts would be less than significant. Furthermore, Corona-Norco Unified School District has provided the applicant a Will-Serve letter confirming their availability to accept student enrollment from the proposed development (**Attachment 14**).

Parks and Recreation

In an effort to develop and maintain a comprehensive system of parks, recreation and natural open space lands that meet the active and passive recreation and open space needs of all residents and visitors, the Eastvale General Plan, specifically Policy CO-2.4, requires new residential developments to dedicate land and/or payment of in lieu fees consistent with state law. As outlined in Section 130.20.020 of the Eastvale Municipal Code, applicants are required to provide three (3) acres of parkland per 1,000 residents within the subdivision. In the case of the subject project the applicant is required to provide a minimum of 0.68 acres of land for public parks and recreational purposes. This is calculated by the number of dwelling units in the subdivision (76 residential units) multiplied by the average number of persons per dwelling unit (2.98 persons per detached single family residential unit) multiplied by .003 (3 acres per 1,000 residents). As the proposed project will not offer any onsite public park and recreational facilities, the applicant will be required to remit necessary in lieu fees as a condition of approval. In lieu fees are calculated using the fair market value of the land divided by 8.3 (project site acreage) and multiplied by 0.68 (parks and recreation land dedication requirement). Prior to recording the Final VTTM, the applicant will be required to pay the required fees ensuring Eastvale's goal of a comprehensive system of parks, recreation and natural open space lands are available to all residents and visitors.

Major Development Review

In order to safeguard and enhance the appearance and quality of development in the City of Eastvale, Section 120.02.010 of the Eastvale Zoning Code requires Major Development Review approval for any new single-family subdivision development. This scope of review is outlined in the aforementioned code section, and includes, but is not limited to, exterior design, materials, textures, colors, as well as ensuring the proposed structures will be property related to the site and to the surrounding site in order to prevent structures detrimental to the character of the buildings already established in the area. The proposed project has been reviewed for compliance with the applicable development standards and required findings for a Major Development Review as set forth in Section 120.02.010 (C)(5) of the Eastvale Zoning Code. The required findings are detailed in **Attachment 9 – Draft Resolution**.

Architecture and Treatments

As proposed, the seventy-six (76) single-family homes are designed with quality urban design, architecture and landscaping. Based on staff's review, the project is generally consistent with the Eastvale Design Guidelines except for the requested waivers discussed below.

The applicant is proposing three (3) different model home plans. The table below provides a summary description of the models proposed:

Table 3: Plan Summary

Plan	Square Footage	No. of Stories	No. of Bedrooms	No. of Bathrooms	Garage Parking	Percentage of Total Project
Plan 1	1,905 sq. ft.	2	3 + loft (4 bedroom option	2.5	2/421 sq. ft.	33%
Plan 2	2,075 sq. ft.	2	4+ loft (5 bedroom option)	2.5	2/423 sq. ft.	33%
Plan 3	2.150 sq. ft.	2	3+ loft+ flex (5 bedroom option)	3	2/489 sq. ft.	34%

In addition to the three (3) different plan types, the following three (3) architectural styles are also proposed as part of the master architecture:

- Cottage (34 percent of units)
- Farmhouse (33 percent of units)
- Monterey (33 percent of units)

Included in the development plans (**Attachment 5**) the applicant proposes a total of eight (8) different color schemes, seven (7) different trim and siding colors, and five (5) different roofing materials for the above models. Additional architectural details include window shutters, wood siding, pronounced windowsills and ledges, and board and batten.

The variety of options available to all plans will ensure that a rich diversity of colors and materials will be apparent throughout the community. The illustrative color elevations contained within the project plan set provide further details regarding these proposed options.

Pursuant to the City of Eastvale's Design Standards and Guidelines (RDS-14) for single-family residential tracts with 51 to 99 units, there shall be a total of four (4) different floor plans proposed by an applicant; however, the project proposed by the applicant is requesting a wavier from Residential Design Standard 14 and offering a total of three (3) floor plans. Staff has reviewed the proposal and given the fact that each of the three (3) plans are evenly distributed throughout the community with no one plan being predominate, the three (3) distinct architectural styles of the units, and the numerus roofing materials, and color and trim schemes there is enough variation in the tract to grant the waiver of the fourth-floor plan.

Additionally, the City of Eastvale's Design Standards and Guidelines (RDG-7) requires all projects with ten (10) or more residential lots to include at least one single-story floor plan. The proposed project consists of 76 residential units with no single-story floor plan but rather three (3) two-story models. To achieve the necessary density of eight (8) dwelling units an acre afforded by HAA and State Density Bonus Law the individual lot sizes of the project are forced to be smaller than most R-1 zoned properties in that they range from 2,805 to 5,777 square feet. The applicant's proposed two-story models range in size from 1,950 – 2,150 square feet. Given the small lot size of Vesting Tentative Tract Map 39022 and the fact that single-story floor plans have larger footprints than two-

story floor plans it would not be feasible to construct a compatible or desirable single-story model in the proposed tract; therefore, staff is supportive of the requested waiver.

Site Planning
Staff reviewed the site plan for each of the lots under consideration as part of this Major Development Review. As noted above, the proposed development needs to comply with the objective zoning code standards applicable to the property, but only to the extent they facilitate the development at the density allowed by the General Plan.

To create consistency with the surrounding single-family residential neighborhoods and in compliance with HAA, the applicant designed the community to the R-1 One-Family Dwelling development standards, to the greatest extent feasible. Apart from side yard setback standards, requested to be waived, all residential units are plotted in compliance with the standards applicable to the R-1 One-family Dwelling zone. As such, staff is supportive of the proposed plotting as it meets the intent of HAA as well as creates a compatible development within an existing developed portion of the city.

Table: 4 Compliance with R-1 Development Standards

Compliance with R-1 One-Family Dwelling Residential Development Standards			
Standard	**Required**	**Proposed**	**Meets Standard**
Front Setback	20 feet	20 feet	Yes
Rear Setback	10 feet	10 feet	Yes
Side Yard Setback (Interior)	5 feet	4 feet	No
Side Yard Setback (Street side)	10 feet	4 feet	No
Building Height	40 feet maximum	27 feet	Yes
Off-Street Parking	2 covered spaces minimum	2 covered spaces and 2 driveway spaces	Yes

As stated previously, pursuant to Government Code Section 65915(e)(1), if a city development standard would physically prevent the project from being built at the permitted density, the developer may propose to have those standards waived or reduced. The applicant is requesting a one-foot reduction or waiver of the interior side yard setback from five (5) feet to four (4) which staff has evaluated and determined complies with California Building Code and does not pose a health and safety risk; that paired with the narrower lot width than typical R-1 zone property (33 feet versus 60 feet), staff supports the waiver request.

With regard to the request for a street side yard setback reduction from ten (10) feet to four (4), staff has determined that the location of on-site parallel parking spaces and the presence of water quality management basins are the cause for non-compliance for each of the properties unable to meet the street side yard setback development standard. Given the compact development and limited street parking, staff would support keeping the on-site parallel parking stalls, and water quality basins and allow for the reduction of street side yard setbacks on impacted lots (i.e., lots 10, 25, 50, 55, 56, 62, 69, 70).

Parking
Each proposed dwelling unit would include two (2) garage spaces and two driveway spaces, for a total of 304 spaces, as well as an additional 10 on-street parallel open/guest parking stalls. Pursuant to Section 120.05.060 of the Eastvale Zoning Code, the project would exceed the City's minimum parking requirement of 152 spaces (2 spaces per dwelling unit) by 162 parking spaces. In addition, the site is parked in compliance with California Government Code Section 65915(p)(1)(B)(C) in that California Density Bonus Law allows 2.5 parking spaces per four or more bedrooms, inclusive of handicapped and guest parking.

To proactively address any neighborhood parking impacts that could result from the project, the Conditions of Approval for the DR include provisions requiring the following parking management practices, to be incorporated into the final, recorded CC&Rs, and applicable throughout the life of the project:

- Requiring onsite parking permits (such as stickers or hangtags) for any parking in the surface guest parking spaces;
- Policies for maximum times vehicles may be parked in the surface guest spaces;
- Policies for towing unauthorized vehicles; vehicles parked in unauthorized locations, such as fire lanes; vehicles parked in surface guest parking without a sticker, hangtag, or other identifiers; and vehicles parked longer than any maximum guest parking timeframes allowed;
- Policies prohibiting the parking, storage, or driving of commercial vehicle, RV, boat, trailer, ATV, golf cart, or similar vehicle on-site,
- Policies requiring all garages be used for the sole purpose of housing parked vehicles (i.e., not for storage purposes); and
- Policies authorizing routine garage inspections to ensure garages are available for vehicle parking.

Walls and Landscaping
The applicant proposes to construct tract perimeter fencing along the boundaries of the site. Section 120.05.030 Table 5.3-1 of the Eastvale Zoning Code establishes the height and development standards for fences, walls and screens within residential zoning districts. Pursuant to Table 5.3-1 fencing is limited to a maximum of six feet (6') in height. Given the unique location, adjacent to the Santa Ana Riverbed, and the proposed site grading, the applicant's preliminary Wall and Fence Plan (**Attachment 6**) proposes four (4) different conditions for the tract perimeter fencing, requesting a waiver from Section 120.05.030 for three (3) of the four (4) wall conditions.

The proposed fencing along the project's western boundary (i.e., facing Archibald Avenue) would consist of a six-foot (6') tall split face block with a tan concrete masonry unit (CMU) cap, consistent with the Zoning Code. The northern tract boundary or rear walls of Lots 12-24 range in height due to the proposed grade differences between the subject site and the property to the north. The northern wall is a combination retaining/privacy screen wall ranging in total height from nine feet (3' retaining + 6' privacy/screen) to fifteen feet (9' retaining + 6' privacy/screen) as visible from the property to the north. The property owner to the north was approached by the applicant and made aware of the proposed development. To date no protest or concern has been received from the adjacent property owner. The applicant is requesting a waiver from the six-foot height limitation to construct the northern wall.

The fencing along the eastern tract boundary, like the northern boundary, varies in height due to its adjacency to the Santa Ana Riverbed. The proposed wall consists of a combination geo-grid block retaining wall ranging from 3.5' in height to 14' feet in height with a 6' tall tubular steel "view" fence placed immediately above, as visible from the riverbed. The applicant is again requesting a waiver from the six-foot height limitation to accommodate the design.

Finally, the tract perimeter fencing along the southern boundary of the site, shared with Vantage Point Church, proposes a six foot (6') tall split face block with tan CMU cap; however as one moves from west to east towards the Santa Ana Riverbed, the wall becomes a combination wall (retaining and privacy/screen wall) with a maximum of eight feet (8') retaining and six feet (6') for privacy fencing, as visible from the project site (i.e., future residents). Similar to those above, the applicant is requesting a waiver from Section 120.05.030. Vantage Point Church was approached by the applicant and made aware of the proposed development. To date no protest or concern has been received from Vantage Point Church as the adjacent property owner.

In addition to the requested waivers for the tract perimeter fencing, the applicant requests two additional waivers for interior fencing as well. To address the differences in grade, the rear yard interior walls of Lots 50-55 and 57-76 are proposed to be combination retaining/privacy screen walls with three feet (3') of retaining and six feet (6') of privacy fencing. The materials are proposed to be split face block with cream colored vinyl fencing. Lots 50-55 and Lots 63-69 are at a lower grade and would have the visual impact of a nine-foot (9') tall wall while Lots 57-62 and Lots 70-76 with whom they share a rear wall with would be at a higher elevation and have a six-foot (6') privacy fence.

As stated before, if a city development standard would physically prevent the project from being built at the permitted density, the developer may propose to have those standards waived or reduced according to Government Code Section 65915(e)(1). In the case of the applicant's Wall and Fence Plan, staff has reviewed the proposal and finds that the waivers are necessary to develop the site to the density permitted by right under the General Plan and HAA. The existing site topography with developed single family residential property to the north approximately nine feet lower in elevation, the Santa Ana Riverbed greater than twenty feet lower in elevation, and the established Vantage Point Church approximately eight feet higher in elevation, is necessary to retain and stabilize the site via retaining walls as well as provide future residents the expected level of privacy (i.e., 6' screen wall). The same justification can be applied for the internal rear property line walls proposed as combination retaining/privacy screen wall reaching a maximum of nine feet (9') in height. The existing topography of the site leaves the eastern boundary at a slightly higher elevation than the western boundary; therefore a three foot (3') retaining wall is necessary to have an effective site.

The applicant's Preliminary Landscape Plans (Attachment 6) offers an enhanced landscaped frontage (i.e., Archibald Avenue) and entrance into the future residential community (i.e., Street "A"), creating a sense of arrival. The frontage will be planted with Chinese Pistache, Southern Magnolia, California Pepper, and Australian Willow trees in addition to various shrubs such as Baby Bliss Flax Lily, 'Huntington Carpet' Creeping Rosemary, Sunset Heaven 'Golden Breath of Heaven'. Each of the project's four (4) water quality basins are also proposed to be well landscaped for both utilitarian and aesthetic purposes with Australian Willow trees, Berkely Sedge, Small Cape Rush, and Santa Barbara Dwarf Mexican Sage shrubs. Additionally, tract perimeter walls are also proposed to be clad in Boston Ivy to soften the appearance of the block walls and provide additional greening to the community. Finally, per the City of Eastvale's Residential Design Standards and Guidelines, each lot is

required to plant a minimum of one (1) yard tree. To meet the Residential Design Standard the applicant proposes the following trees for both accent and screening purposes: Strawberry, Peppermint, and Fern Pine trees.

Overall, staff believes that the proposed landscape and wall plans are satisfactory. They are generally consistent with other approved tract wall/landscape plans and will ensure aesthetic treatment of the tracts common areas and other perimeter (publicly visible) portions of the tract, and will support a high-quality community design, similar to other developments areas throughout the city. A final landscape plan will be reviewed during the building permit process to ensure that the details of the proposed landscape plan comply with the City landscape regulations.

Density Bonus Agreement

The Density Bonus Agreement for the project is provided as **Attachment 8**. The Agreement identifies the affordable units, and their household income limits, and other pertinent language such as the term of the agreement. The following summaries the salient sections within the Agreement.

Of the total units in the development, four (4) units are proposed to be affordable to households earning less than $51,250 (30-50 percent of the AMI, which is currently set at $97,500, adjusted for a four-person household size), as published by the California Department of Housing and Community Development (HCD). The applicant proposes all four (4) of the affordable units to be Plan 1 which consists of a 1,905 square foot, three-bedroom, two story unit with a two (2) car garage. The proposed units will be distributed throughout the 76-unit community and are required to be comparable to the market-rate units in their appearance, materials, and exterior and interior finishes, appliances, and fixtures.

Other terms and conditions of the Density Bonus Agreement include:

- Homebuyers will be required to execute a Resale Restriction Agreement with the City in which each restricted unit must be occupied as the homebuyer's principal residence and requires equity sharing with the City if the unit is resold (**Attachment 8.1**).
- Affordable units cannot be concentrated in one location within the project site but instead dispersed throughout the project.
- The City has the right to inspect the affordable units and documents.

Public Hearing Notification and Comment

The project requires a minimum 10-day public hearing notification period for property owners and tenants within a 600-foot radius of the project site. The public hearing notice was published in the Press Enterprise newspaper on April 13, 2025, for the City Council meeting on April 23, 2025, and mailing notices were mailed on April 10, 2025. The Notice of Public Hearing and a map showing the properties that received notification are included as **Attachment 12** and **Attachment 13**. As of this writing, staff has not received any correspondence on this project.

Environmental

Pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15183, because implementation of the proposed project would not result in impacts that are peculiar to the project site and the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR, no additional environmental review beyond a Section 15183 Exemption Report is required for the proposed

project. A Section 15183 Exemption Report was prepared for the project and has been included as **Attachment 7** of this report.

Strategic Plan Action - Priority Level: N/A | Target #: B | Goal #: E

Diversify the housing stock with more options.

Fiscal Impact

Processing the proposed applications will have little to no fiscal impact on the City as the project is funded by the applicant.

Prior City Council/Commission Action

On March 19, 2025, the Planning Commission took public testimony of the requested items and by a 5-0 vote, recommended the Eastvale City Council find that the project is exempt from CEQA based on the findings in the Exemption Determination Report and approve Vesting Tentative Tract Map 39022, the Major Development Review and the Density Bonus Agreement with Warmington Residential to construct 76 single family residences with four units set aside for the very low-income category. The Planning Commission complimented the applicant on the proposed architecture of the homes and requested the applicant work with the property owner of Grapewin Street (private street) to obtain full ingress/egress access rights for their residential community.

1 INTRODUCTION

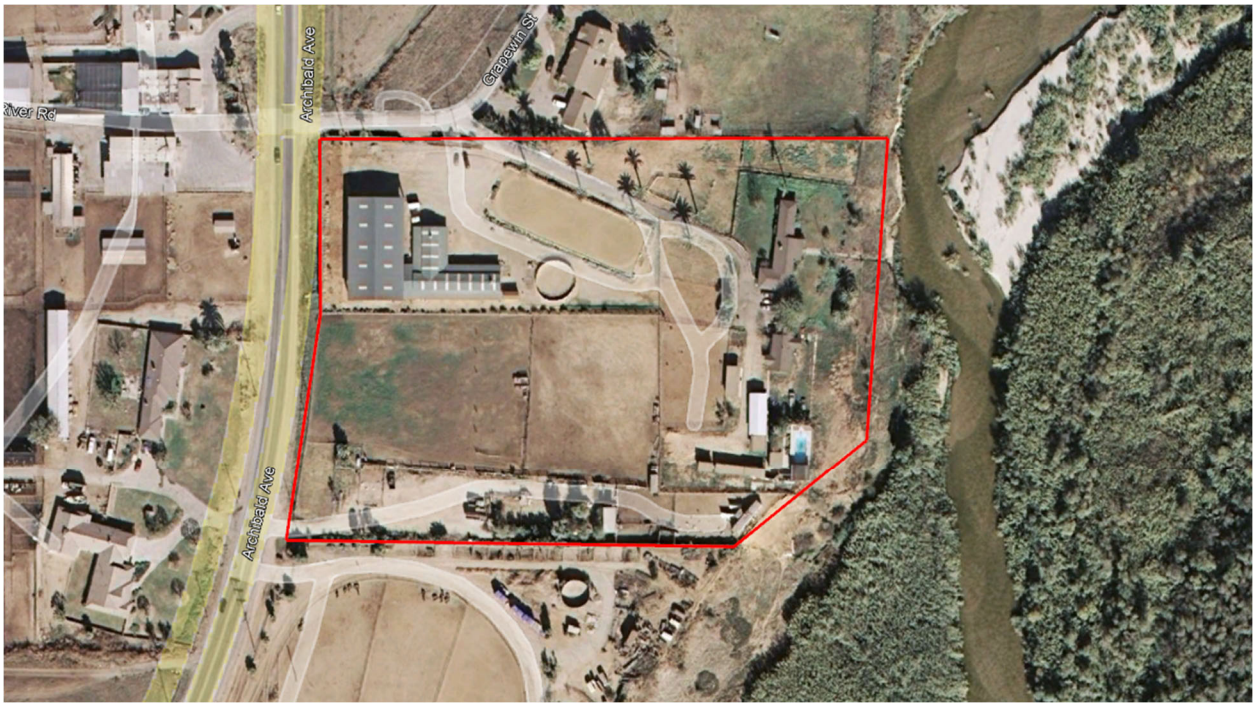
This Exemption Determination Report has been prepared pursuant to the requirements of the California Environmental Quality Act (CEQA) (California Public Resources Code, Sections 21000, et seq.) and the CEQA Guidelines (California Code of Regulations, Title 14, Sections 15000, et seq.).

CEQA Guidelines Section 15183, *Projects Consistent with a Community Plan or Zoning*, exempts from additional environmental review any project that is consistent with either the development density established by existing zoning, a community plan, or an existing general plan, for which an Environmental Impact Report (EIR) was previously certified, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site. This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies.

Pursuant to CEQA Guidelines Section 15183, a project cannot be exempt from CEQA if:

- project-specific impacts "peculiar" to the project or its site exist;
- there is a significant impact not evaluated in the prior EIR on the plan or zoning; and/or
- previously identified impacts are found to be more severe based on new information not known when the prior EIR was certified.

Further, Section 15183(c) of the CEQA Guidelines states, "If an impact is not peculiar to the parcel or to the project, has been addressed as a significant effect in the prior EIR, or can be substantially mitigated by the imposition of uniformly applied development policies or standards … then an additional EIR need not be prepared for the project solely on the basis of that impact."



On March 27, 2024, the City of Eastvale (City) Council adopted the Eastvale General Plan 2040 (General Plan; City of Eastvale 2024a) and certified the Final EIR for the General Plan (State Clearinghouse No. 2022080090). The intent of this report is to document that: (1) implementation of the proposed PLN24-20053 Warmington Residential project (project) would not result in impacts that are peculiar to the project site; and (2) there would be no new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger expanded environmental review, beyond this Section 15183 Exemption Report.

2 PROJECT DESCRIPTION

2.1 Project Location

The 8.3-acre project site is located at 8312 Grapewin Street and 8330 Archibald Avenue in Eastvale in Riverside County, California, on Assessor's Parcel Numbers (APNs) 130-070-015, 130-070-021, and 130-080-004. The project site is presently developed with a residence, horse training facility, and accessory structures (Figure 1). Residential development is adjacent to the north and west site boundary, with a church located to the south and the Santa Ana River and open space to the east.

FIGURE 1: PROJECT SITE

2.2 Project Characteristics

The project site is zoned as Light Agriculture (A-1) and is designated as Single-Family – Low (4.0-8.0 dwelling units per acre) by the General Plan. The project proposes the development of 76 single-family residences, which includes 4 very low-income residences. The residences would be two stories and would range between three and four bedrooms. A total of 314 parking spaces would be provided via a combination of garage spaces, driveway spaces, and street spaces on the project site. The project also includes the provision of open space adjacent to the Santa Ana River. Refer to Appendix A, Project Site Plan, for the proposed layout of the project features.

With approval of the project applicant's density bonus waiver on minimum lot size, which is allowable due to the provision of very low-income residential units, the proposed project would be consistent with the development density allowed on the project site by the General Plan.

3 ENVIRONMENTAL ANALYSIS

This section includes a discussion of the proposed project's consistency with the General Plan EIR, per CEQA Guidelines Section 15183. This analysis is based on a desktop review of the project site and project-specific technical studies. This section includes a brief discussion of environmental impacts that would be similar to those disclosed in the General Plan EIR, as well as a more detailed analysis of potential project impacts that could be site specific, including biological resources, cultural and tribal cultural resources, paleontological resources, geology and soils, and hazards and hazardous materials.

3.1 Environmental Topics Considered but Not Discussed Further

The following topics were considered but no peculiar impacts, and no new or more severe impacts beyond what was previously evaluated and disclosed by the General Plan EIR, were identified. As a result, there is no further discussion about these issues in this document.

- **Land Use and Planning:** With approval of the project applicant's density bonus waiver on minimum lot size, which is allowable due to the provision of very low-income residential units, the proposed project would be consistent with the development density allowed on the project site by the General Plan. Therefore, the proposed project would not result in land use and planning impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Air Quality:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, neither construction nor operation of the proposed 76-unit residential project would result in air quality impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Energy and Greenhouse Gases:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, neither construction nor operation of the proposed 76-unit residential project would result in energy or greenhouse gas impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Hydrology and Water Quality:** The project contractor would be required to comply with federal, state, and local regulations to ensure the proposed project would not result in construction-related hydrology or water quality impacts that are peculiar or more severe than those disclosed in the General Plan EIR. Additionally, implementation of a project-specific stormwater management plan would ensure that project operation would not result in peculiar or more severe operational impacts than those disclosed in the General Plan EIR.

- **Noise:** The project contractor would be required to comply with the City's Noise Ordinance, which restricts the timing on construction activities. Additionally, because the proposed project would be consistent with the development density allowed on the project site by the General Plan, construction and operation of the proposed 76-unit residential project would not result in noise impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Population and Housing:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, the proposed 76-unit residential project would not result in population and housing impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Public Services and Recreation:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, the proposed 76-unit residential project would not result in public services or recreation impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Transportation:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, the proposed 76-unit residential project would not result in transportation impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Utilities and Service Systems:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, the proposed 76-unit residential project would not result in utilities and service systems impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

- **Effects Found Not to Be Significant in the General Plan EIR:** Because the proposed project would be consistent with the development density allowed on the project site by the General Plan, the proposed 76-unit residential project would not result in aesthetics, agriculture and forestry resources, paleontological resources, mineral resources, or wildfire impacts that are peculiar or more severe than those disclosed in the General Plan EIR.

3.2 Biological Resources

Summary of Findings in the General Plan EIR: Impacts to biological resources were analyzed in Section 3.2, *Biological Resources*, of the General Plan EIR. Eastvale is generally a highly developed area with limited natural open space, although sensitive vegetation communities, jurisdictional waters and wetlands, and special-status plant and wildlife species occur (or have the potential to occur) within the City's boundaries. The most prominent natural resource within the City is the Santa Ana River and surrounding riparian and woodland habitat. The Santa Ana River forms the southern boundary of Eastvale and is an important local and regional open space resource. Portions of the City along the Santa Ana River, as well as the northernmost portion of the City, are included in the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP), of which the City is a signatory.

The General Plan EIR acknowledges that grading and construction activities associated with future development could impact sensitive biological resources. In accordance with MSHCP requirements, preparation of a project-specific General Biological Resource Assessment for development proposals located in areas with the potential to contain special-status species and/or sensitive habitat identified by the MSHCP would be required. Further, future development would be subject to compliance with relevant federal, state, and local requirements, including the federal and state Endangered Species Acts, Clean Water Act, Migratory Bird Treaty Act, California Fish and Code, and MSHCP policies.

The analysis in the General Plan EIR concluded that with implementation of the General Plan policies and the City's preapplication review process (which includes a project-specific General Biological Resource Assessment in areas with the potential to contain MSHCP-identified special-status species and/or sensitive habitat), as well as continued adherence to federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts to biological resources.

Impacts Associated with the Proposed Project: A Biological Resources Assessment dated January 2025 (CSLS 2025a) and a Western Riverside County MSHCP Consistency Determination dated January 31, 2025 (CSLS 2025b) were prepared for the proposed project by Carlson Strategic Land Solutions (CSLS). These technical studies are included as Appendices B-1 and B-2 of this report, respectively. No sensitive vegetation communities, potentially jurisdictional areas, special-status plant species (including MSHCP narrow endemic plants), or MSHCP riparian/riverine areas were observed on-site during the general biological assessment and jurisdictional delineation conducted on March 28, 2024, or the narrow endemic plant assessment and surveys conducted on March 28, June 11 and 25, and July 16, 2024.

Regarding special-status wildlife species, no burrowing owl (*Athene cunicularia*) were observed during the habitat assessment and focused burrowing owl surveys conducted March 28, June 11 and 25, July 16, and August 8, 2024.

A single special-status wildlife species was detected audibly on site, Southern California rufous-crowned sparrow (*Aimophila ruficeps canescens*), and two special-status wildlife species were audibly detected off-site in the Santa Ana River, yellow-breasted chat (*Icteria virens*) and yellow warbler (*Setophaga petechia*). Six additional special-status species have a low potential to occur but were not observed during the field surveys: glossy snake (*Arizona elegans occidentalis*), coastal whiptail (*Aspidoscelis tigris stejnegeri*), red-diamond rattlesnake (*Crotalus ruber*), tricolored blackbird (*Agelaius tricolor*), San Diego black-tailed jackrabbit (*Lepus californicus bennettii*), and Stephens' kangaroo rat (*Dipodomys stephensi*). Additionally, 2.25 acres of the eastern portion of the project site overlaps with the US Fish and Wildlife Service's least Bell's vireo (*Vireo bellii pusillus*) designated critical habitat map; however, the project site does not support any of the primary constituent elements needed for least Bell's vireo life processes and successful reproduction.

The following standardized Site Development Conditions (SDCs) will be required for the proposed project:

SDC BIO-1: **Biological Resources Monitoring.** A qualified biological monitor shall be present to monitor all vegetation removal to ensure no direct impacts occur to wildlife species.

SDC BIO-2: **Stephens' Kangaroo Rat Mitigation Fee.** Prior to issuance of the grading permit, the project applicant shall pay the Stephens' kangaroo rat mitigation fee pursuant to City Ordinance No. 663, which requires a fee of $500 per gross acre.

SDC BIO-3: **Preconstruction Nesting Bird Survey.** Prior to ground disturbances that would impact potentially suitable nesting habitat for avian species, the project applicant shall adhere to the following:

1. Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for raptors) to the extent feasible to avoid potential impacts to nesting birds protected by the Migratory Bird Treaty Act and California Fish and Game Code Sections 3503, 3503.5, and 3513.

2. Any construction activities that occur during the typical nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat, on-site and within 300 feet surrounding the site (as feasible), be thoroughly surveyed by a qualified biologist for the presence of nesting birds before commencement of ground disturbance activities. If active nests are identified, the qualified biologist would establish an appropriate buffer around the vegetation. All work within these buffers would be halted until the nesting effort is complete (i.e., the juveniles are surviving independent from the nest) as determined by the qualified biologist. Work can resume within these areas when no other active nests are found. Alternatively, a qualified biologist may determine that construction can be permitted within the buffer area and would develop a monitoring plan to prevent any impacts while the nest continues to be active (e.g., presence of eggs, chicks, or adult nesting behavior). Upon completion of the survey and any follow-up construction avoidance management, a report shall be prepared and submitted to City for mitigation monitoring compliance record keeping.

SDC BIO-4: **Preconstruction Burrowing Owl Survey.** In accordance with MSHCP species-specific objective #6 for burrowing owl, a preconstruction survey for burrowing owl shall be conducted within 30 days prior to ground disturbance by a qualified biologist where suitable habitat is present within the study area (project site and surrounding 500-foot buffer). If active burrowing owl burrows are detected during the breeding season (March 1 through August 31), all work within 300 feet of any active burrow will be halted until that nesting effort is finished as determined by a qualified biologist. Work can resume when no other active burrowing owl nesting efforts are observed. If active burrowing owl burrows are detected outside the breeding season (September 1 through February 28), then a Burrowing Owl Exclusion Plan shall be prepared by the project applicant and approved by the County of Riverside Environmental Programs Department in consultation with the California Department of Fish and Wildlife (CDFW). The Burrowing Owl Exclusion Plan shall be prepared in accordance with guidelines in the *CDFW Staff Report on Burrowing Owl* (2012) and the MSHCP, which allows for passive relocation (i.e., use of one-way doors and collapse of burrows). Burrowing owl burrows shall be excavated with hand tools by a qualified biologist when determined to be unoccupied and backfilled to prevent reentry.

SDC BIO-5: **Implement Standard Best Management Practices.** To ensure consistency with the goals and objectives of the Western Riverside County MSHCP, the proposed project will adhere to MSHCP Appendix C, Standard Best Management Practices.

Conclusion: With implementation of **SDC BIO-1** through **SDC BIO-5** and compliance with the Western Riverside County MSHCP, the proposed project would not result in impacts to biological resources that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

3.3 Cultural and Tribal Cultural Resources

Summary of Findings in the General Plan EIR: Impacts to cultural resources and tribal cultural resources were analyzed in Section 3.3, *Cultural Resources*, and Section 3.12, *Tribal Cultural Resources*, of the General Plan EIR. No historic resources listed in the National Register of Historic Places or the California Register of Historical Resources occur within the City's boundaries, although the City contains one locally historic resource, the Desi House. In accordance with Senate Bill 18 and Assembly Bill (AB) 52, the City notified local tribes about the General Plan on August 2, 2022. The Gabrielieño Tongva Indians of California, the Agua Caliente Band of Cahuilla Indians, and the Rincon Band of Luiseño Indians responded in August 2022 and declined consultation. The Gabrieleño Band of Mission Indians-Kizh Nation also declined consultation for the General Plan but requested to be consulted for future ground-disturbing development projects within the City.

The General Plan EIR acknowledges that grading and construction activities associated with future development could unearth unknown historical or archaeological resources and/or disturb human remains during ground-disturbing activities. General Plan Policy CO-6.4 requires a Phase I Cultural Resources Assessment for new development proposals that occur on native soils. Additionally, future site-specific development proposals subject to CEQA would be required to undergo government-to-government consultation in accordance with AB 52 requirements, and would be required to implement any project-specific SDCs to reduce impacts to tribal cultural resources. Further, future development would be subject to compliance with relevant federal, state, and local requirements, including California Health and Safety Code Section 7050.5 and California Public Resources Code Section 5097.98, which pertain to the treatment of human remains.

The analysis in the General Plan EIR concluded that with implementation of the General Plan policies and the City's preapplication review process (which includes a project-specific Cultural Resources Assessment for projects that could impact native soils and, if required, project-specific AB 52 consultation), as well as continued adherence to applicable federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts to cultural resources and tribal cultural resources.

Impacts Associated with the Proposed Project: A Phase I Cultural Resources Assessment and Built Environment Evaluation dated January 30, 2025 (VCS 2025) was prepared for the proposed project by VCS Environmental. This technical study is included as Appendix C of this report. The cultural resources records search indicated that a total of 20 cultural resource sites have been recorded within one mile of the project site. The records search also indicated that two previously recorded cultural resource sites occur on the project site. However, based on further review by VCS, it was discovered that these two cultural resource sites were incorrectly recorded as occurring within the project site; accordingly, no previously recorded

cultural resource sites occur on the project site (Attachment A of Appendix C-2; VCS 2025). Additionally, the results of the Native American Heritage Commission's Sacred Lands File search were negative for the presence of sacred lands in the vicinity of the project site (VCS 2025). An evaluation of the built environment on the project site, comprising 14 buildings and structures built after World War II and before 2003, was conducted in October 2024 (refer to Attachment D in Appendix C of this report; Urbana Preservation & Planning, LLC 2024) . The property was evaluated as not eligible for inclusion in the California Register of Historical Resources or the National Register of Historic Places; therefore, it does not qualify as a historical resource under CEQA. No other cultural resources were observed on the project site during the field surveys. Nonetheless, due to the proximity of the Santa Ana River to the project site and the presence of known archaeological sites along the river, it is assumed there is potential for the presence of buried cultural resources on-site.

The following standardized SDCs will be required for the proposed project:

SDC CUL-1: **Cultural Resources Monitoring Plan.** Prior to issuance of a grading permit, the project applicant shall provide written verification that a qualified archaeologist has been retained to develop and implement a Cultural Resources Monitoring Plan (CRMP). The CRMP shall address the details of all monitoring activities and procedures to be followed to reduce the impacts to cultural and historic resources to a less than significant level as well as addressing potential impacts to undiscovered buried archaeological resources associated with this project. The CRMP shall be reviewed by any consulting tribe(s) and reviewed and approved by the City.

SDC CUL-2: **Tribal Monitoring and Treatment Agreement.** The project applicant shall provide for Native American monitoring during grading. The Native American monitor(s) shall work in concert with the archaeological monitor to observe ground disturbances and search for cultural materials. The City shall coordinate with the consulting tribe(s) to facilitate communications with the project developer/applicant so that all parties can develop a mutually acceptable Tribal Monitoring and Treatment Agreement, which will include the scope of monitoring, scheduling of monitors from individual consulting tribe(s), and the course of action for inadvertent discoveries.

SDC CUL-3: **Cultural Resources Worker Sensitivity Training.** The project archaeologist and the consulting tribes(s) shall attend the pre-grading meeting with the City, the construction manager, and any contractors, and will conduct a mandatory cultural resources worker sensitivity training. The training will include a brief review of the cultural sensitivity of the project site and the surrounding area; what resources could potentially be identified during earth-moving activities; the requirements of the monitoring program; the protocols that apply in the event that inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols.

SDC CUL-4: **Inadvertent Discovery.** The protocols and stipulations that the contractor, City, consulting tribe(s), and project archaeologist will follow in the event of inadvertent

cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation, include the following.

1. During the original cutting of previously undisturbed deposits, the archaeological and tribal monitors (if applicable) shall be on-site, as determined by the consulting archaeologist, to monitor excavations. The frequency of inspections will depend upon the rate of excavation, the materials excavated, and the presence and abundance of artifacts and features. The consulting archaeologist shall have the authority to modify the monitoring program if the potential for cultural resources appears to be less than anticipated.

2. Isolates and clearly non-significant deposits will be minimally documented in the field so the monitored grading can proceed.

3. In the event that previously unidentified cultural resources are discovered, the archaeologist shall have the authority to divert or temporarily halt ground disturbance operation in the area of discovery to allow for the evaluation of potentially significant cultural resources. The archaeologist shall contact the City at the time of discovery. The archaeologist, in consultation with the City, shall determine the significance of the discovered resources. The City must concur with the evaluation before construction activities will be allowed to resume in the affected area. For significant cultural resources, a research design and data recovery program to mitigate impacts shall be implemented by the consulting archaeologist and approved by the City before being carried out using professional archaeological methods. If any human bones are discovered, the County coroner and City shall be contacted. In the event that the remains are determined to be of Native American origin, the Most Likely Descendant (as identified by the Native American Heritage Commission) shall be contacted in order to determine proper treatment and disposition of the remains.

4. Before construction activities are allowed to resume in the affected area, the artifacts shall be recovered, and features recorded using professional archaeological methods. The project archaeologist in consultation with the consulting tribe(s) shall determine the amount of material to be recovered for an adequate artifact sample for analysis.

SDC CUL-5: **Treatment of an Inadvertent Discovery.** One or more of the following treatments, in order of preference, shall be used in the event of a cultural resources discovery:

1. Preservation-in-place. Avoidance, or preservation-in-place, involves leaving a resource where it was found with no development affecting its integrity. Pursuant to Public Resources Code Section 21083.2(b), avoidance is the preferred method of preservation for archaeological and cultural resources.

2. Reburial on the project site in an area not subject to future disturbance. Reburial of a resource shall include provisions to protect the selected reburial area from any future impacts in perpetuity. Reburial shall not occur until all required cataloging and basic recording have been completed, with the exception of sacred items, burial goods, and Native American human remains. Any reburial process shall be culturally appropriate. The listing of contents and the location of the reburial shall be included in a confidential Final Monitoring Report (refer to SDC CUL-6).

3. If preservation-in-place or reburial is not feasible, all cultural material collected during the grading monitoring program shall be processed and curated according to the current professional repository standards in a Riverside County curation facility that meets the Office of Historic Preservation *Guidelines for the Curation of Archaeological Resources* (California Office of Historic Preservation 1993). The collections and associated records shall be transferred, including title, and accompanied by payment of the fees necessary for permanent curation.

SDC CUL-6: **Final Monitoring Report.** A Final Monitoring Report, documenting the field and analysis results and interpreting the artifact and research data within the research context, shall be completed and submitted to the satisfaction of the City prior to the issuance of any building permits. The report will include the California Department of Parks and Recreation's Primary and Archaeological Site Forms. The Final Monitoring Report shall be filed with the City under a confidential cover and not subject to Public Records Request and a copy of the report shall be submitted to the consulting tribe(s).

Conclusion: With implementation of **SDC CUL-1** through **SDC CUL-6** and compliance with relevant federal, state, and local requirements, including California Health and Safety Code Section 7050.5 and California Public Resources Code Section 5097.98, the proposed project would not result in impacts to cultural resources or tribal cultural resources that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

3.4 Paleontological Resources

Summary of Findings in the General Plan EIR: Impacts to paleontological resources were analyzed in Section 4.3, *Geology and Soils*, of the General Plan EIR. Portions of the City are designated as areas of high sensitivity for paleontological resources as mapped by the County of Riverside (City of Eastvale 2024b). The General Plan EIR acknowledges that much of the future development would occur on already developed sites and would not be anticipated to unearth unknown paleontological resources.

The analysis in the General Plan EIR concluded that with implementation of the City's preapplication review process (which includes a project-specific paleontological resources study for projects, as

determined necessary by the City Community Development Department), implementation of the General Plan would result in less than significant impacts to paleontological resources.

Impacts Associated with the Proposed Project: A paleontological resources records search was conducted as part of the project-specific Phase I Cultural Resources Assessment and Built Environment Evaluation dated January 30, 2025 (VCS 2025; refer to Attachment B in Appendix C). No paleontological resources are recorded on the project site or within one mile of the site. The geologic units underlying the project site consist of Holocene- and Pleistocene-aged alluvial deposits. Pleistocene alluvial units are highly paleontologically sensitive, and any unknown fossil materials at the project site would likely be scientifically significant.

The following standardized SDCs will be required for the proposed project:

SDC PAL-1: **Paleontological Resources Impact Mitigation Program.** Prior to the issuance of any grading permit, the project applicant shall provide written evidence to the City that the project applicant has retained a qualified paleontologist to develop and implement a Paleontological Resources Impact Mitigation Program (PRIMP) to guide monitoring procedures and establish protocols to follow in the event of a fossil discovery. The paleontologist shall be present at the pre-grading conference, shall describe procedures for paleontological resource surveillance, and shall establish in the PRIMP, in cooperation with the project applicant and City, procedures for temporarily halting or redirecting work to permit sampling, identification, and evaluation of the fossils. If the paleontological resources are found to be significant, the paleontologist shall determine appropriate actions, in cooperation with the project applicant, which ensure proper exploration and/or salvage.

SDC PAL-2: **Post-completion Discovery.** If paleontological resources are uncovered and after completion of the project, the project applicant shall submit the paleontologist's follow-up report for approval by the City. The report shall include the period of inspection, a catalogue and analysis of the fossils found, and the present repository of the fossils. The project applicant shall prepare excavated material to the point of identification. The project applicant shall offer excavated finds for curatorial purposes to the City or its designee, on a first refusal basis. These actions, as well as final mitigation and disposition of the resources, shall be subject to approval by the City. The project applicant shall make a one-time payment of curatorial fees for the storage of these resources in perpetuity.

Conclusion: With implementation of **SDC PAL-1** and **SDC PAL-2**, the proposed project would not result in impacts to paleontological resources that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

3.5 Geology and Soils

Summary of Findings in the General Plan EIR: Impacts to geology and soils were analyzed in Section 4.3, *Geology and Soils*, of the General Plan EIR. Earthquake risk is very high in western Riverside County (including Eastvale) due to the presence of two of California's most active faults: the San Andreas Fault and the San Jacinto Fault. In the City, earthquake-triggered geologic effects could include ground shaking, landslides, liquefaction, and subsidence. Future development would be required to comply with grading standards established in the City's Municipal Code, as well as the City's Building Code (Municipal Code Chapter 110.04) and the California Building Code. The General Plan includes several policies that would minimize risks to public health, safety, and welfare resulting from geologic and seismic hazards, including Policy S-2.3, which requires proposed developments in areas of known or suspected seismic or other geologic hazards to submit a project-specific geotechnical report and ensure appropriate SDCs are incorporated.

The analysis in the General Plan EIR concluded that with implementation of the General Plan policies and the City's preapplication review process (which includes a project-specific geotechnical report in areas of known or suspected seismic or other geologic hazards), as well as continued adherence to federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts to geology and soils.

Impacts Associated with the Proposed Project: A project-specific Geotechnical and Infiltration Evaluation (GeoTek 2024) is included as Appendix D of this report. Field exploration was conducted on March 26, 2024, and consisted of six geotechnical exploratory borings and two infiltration test borings on the project site. Based on laboratory testing conducted on the borings, as well as review of published geologic maps, the project site was determined to be underlain by some surficial undocumented fill soils, disturbed soils, and some relatively loose/soft older alluvium. These site soils are not considered suitable for foundation support; therefore, remedial grading, consisting of removal and recompaction of the upper site soils, would be necessary (GeoTek 2024).

The nearest known active fault to the project site is the Elsinore Fault zone (Chino section) located approximately 3.8 miles southwest. The project site is located within an area mapped by the County of Riverside as having a high to very high liquefaction potential hazard; accordingly, a liquefaction analysis was performed for the project site, which concluded that the project site has a relatively low liquefaction hazard potential. Further, the estimated lateral spread horizontal displacements are estimated to be negligible due to the low liquefaction hazard potential. Given the generally flat terrain on-site, there is no potential for seismic-induced landslides. Groundwater was not encountered within the exploratory borings, which were drilled to the maximum depth drilled of 47 feet below ground surface, although it is estimated the historical high groundwater depth is approximately 38 feet below existing grade on-site (GeoTek 2024). Because the project would not require excavation approaching these depths, groundwater is not anticipated to be encountered during project construction.

Conclusion: With adherence to the City's grading standards and Building Code, the California Building Code, and other applicable federal, state, and local regulations and requirements, the proposed project would not result in impacts to geology or soils that are peculiar to the project site, and there are no new

or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

3.6 Hazards and Hazardous Materials

Summary of Findings in the General Plan EIR: Impacts from hazards and hazardous materials were analyzed in Section 3.5, *Hazards and Hazardous Materials*, of the General Plan EIR. On June 20, 2023 (when the impact analysis for the General Plan EIR was conducted), there were 26 hazardous materials sites in the City's boundaries, with the closest hazardous materials site located approximately 0.6 miles north of the project site. It is noted that all 26 sites have been cleaned up and require no further action.

The General Plan EIR acknowledges that future development could involve grading and excavation activities that could expose construction workers and the public to previously unknown hazardous substances present in the soil. To reduce impacts associated with unknown hazardous wastes, future development would be required to prepare a project-specific Phase I Environmental Site Assessment for any properties identified on any list of hazardous materials compiled pursuant to Government Code Section 65962.5. Additionally, if asbestos-containing materials (ACM) and/or lead-based paints (LBP) are identified during site-specific hazardous materials inspections, abatement activities would be required to occur prior to demolition. The analysis in the General Plan EIR concluded that with implementation of the General Plan policies, as well as continued adherence to federal, state, and local regulations and requirements, implementation of the General Plan would result in less than significant impacts related to hazards and hazardous materials.

Impacts Associated with the Proposed Project: Because historical records indicate the project site was used for agricultural purposes between the 1930s and the 1960s, project site soils could contain pesticides, herbicides, lead, and/or arsenic. Accordingly, a Phase I and Phase II Environmental Site Assessment dated April 9, 2024 (Stantec 2024) was prepared for the project site by Stantec Consulting Services, Inc. The technical study is included as Appendix E of this report. During the site reconnaissance conducted on March 27, 2024, two empty unlabeled aboveground storage tanks were observed in the southwestern portion of the project site, which appear to be associated with livestock operations. There was no visible evidence of former aboveground storage tanks or existing or former underground storage tanks on the project site. Additionally, there were no observations of other signs of potential hazardous materials on or below the project site. On March 25 through 27, 2024, 12 soil borings were conducted on the project site to a maximum depth of about 3 feet. The amount of pesticides, herbicides, lead, and/or arsenic detected within the collected soil borings were below thresholds that trigger soil remediation on residential properties. Additionally, soil vapor samples were collected on March 27, 2024; however, tested gases were below thresholds triggering site remediation. Accordingly, no recognized environmental conditions or controlled recognized environmental conditions occur on the project site (Stantec 2024).

Although no samples were collected for testing, based on the age of the structures on-site (circa 1970s), an ACM and LBP survey would be required prior to demolition. If ACM and/or LBP are detected, the project contractor would be required to adhere to applicable federal, state, and local laws and regulations related to worker and public safety during building demolition.

Conclusion: With adherence to applicable federal, state, and local laws and regulations related to ACM and LBP abatement, including conducting an ACM and LBP survey of the structures that would be demolished, the proposed project would not result in impacts related to hazards and hazardous materials that are peculiar to the project site, and there are no new or more severe direct or cumulatively considerable impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR. Accordingly, the proposed project would not trigger additional environmental review.

4 ENVIRONMENTAL REVIEW CONCLUSION

The analysis presented in Section 3 demonstrates that the proposed project meets the requirements of CEQA Guidelines Section 15183, and as such, no additional CEQA review, such as a Subsequent or Supplemental EIR, is required for the project. Specifically:

- Upon approval of the project applicant's density bonus waiver on minimum lot size, which is allowable due to the provision of very low-income residential units, the proposed project would be consistent with the development density allowed on the project site by the adopted General Plan (CEQA Guidelines Sections 15183[a] and 15183[d]);
- The proposed project would not result in environmental impacts that are peculiar to the project or project site (CEQA Guidelines Section 15183[b][1]);
- The proposed project would not result in new significant environmental effects beyond those disclosed in the General Plan EIR (CEQA Guidelines Section 15183[b][2]);
- The proposed project would not result in potentially significant off-site or cumulative impacts beyond those disclosed in the General Plan EIR (CEQA Guidelines Section 15183[b][3]);
- There is no substantial new information that was unknown at the time the General Plan EIR was certified, and as such, the proposed project would not result in more severe adverse impacts than those disclosed in the General Plan EIR (CEQA Guidelines Section 15183[b][4]);

Pursuant to CEQA Guidelines Section 15183, because implementation of the proposed project would not result in impacts that are peculiar to the project site and the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR, no additional environmental review beyond this Section 15183 Exemption Report is required for the proposed project.

1.0 Introduction

Carlson Strategic Land Solutions (CSLS) prepared this Biological Resource Assessment for the SEC Archibald and Grapewin Residential Project (Project) in the City of Eastvale. The Biological Resource Assessment for the approximately 8-acre Project site and the surrounding 500-feet, collectively known as the "Study Area," incorporates the findings from field surveys for Biological Assessment, Jurisdictional Delineation, Narrow Endemic Plant Surveys, and Burrowing Owl Surveys.

The purpose of this study is to satisfy the requirements of the California Environmental Quality Act (CEQA) and incorporate the findings from the field surveys.

1.1 Purpose and Approach

This report provides a summary of the conditions present during the field surveys, which includes an assessment of the potential presence of sensitive biological resources, an analysis of the potential impacts to those resources due to Project implementation and proposed mitigation. This assessment describes the current biological resources present within the Study Area including habitat communities, jurisdictional waters, and the potential occurrence of listed and special status plant and wildlife species. The potential biological significance of site construction and development in view of federal, state, and local laws and regulations are also identified in this report. The report also recommends, as appropriate, Best Management Practices (BMPs) and avoidance and minimization measures to reduce or avoid potential impacts. While general biological resources are discussed, the focus of this assessment is on those resources considered to be sensitive. This assessment was prepared based upon results of a literature review and field survey.

1.2 Project Terms

The following terms will be used throughout this document and are defined as follows:

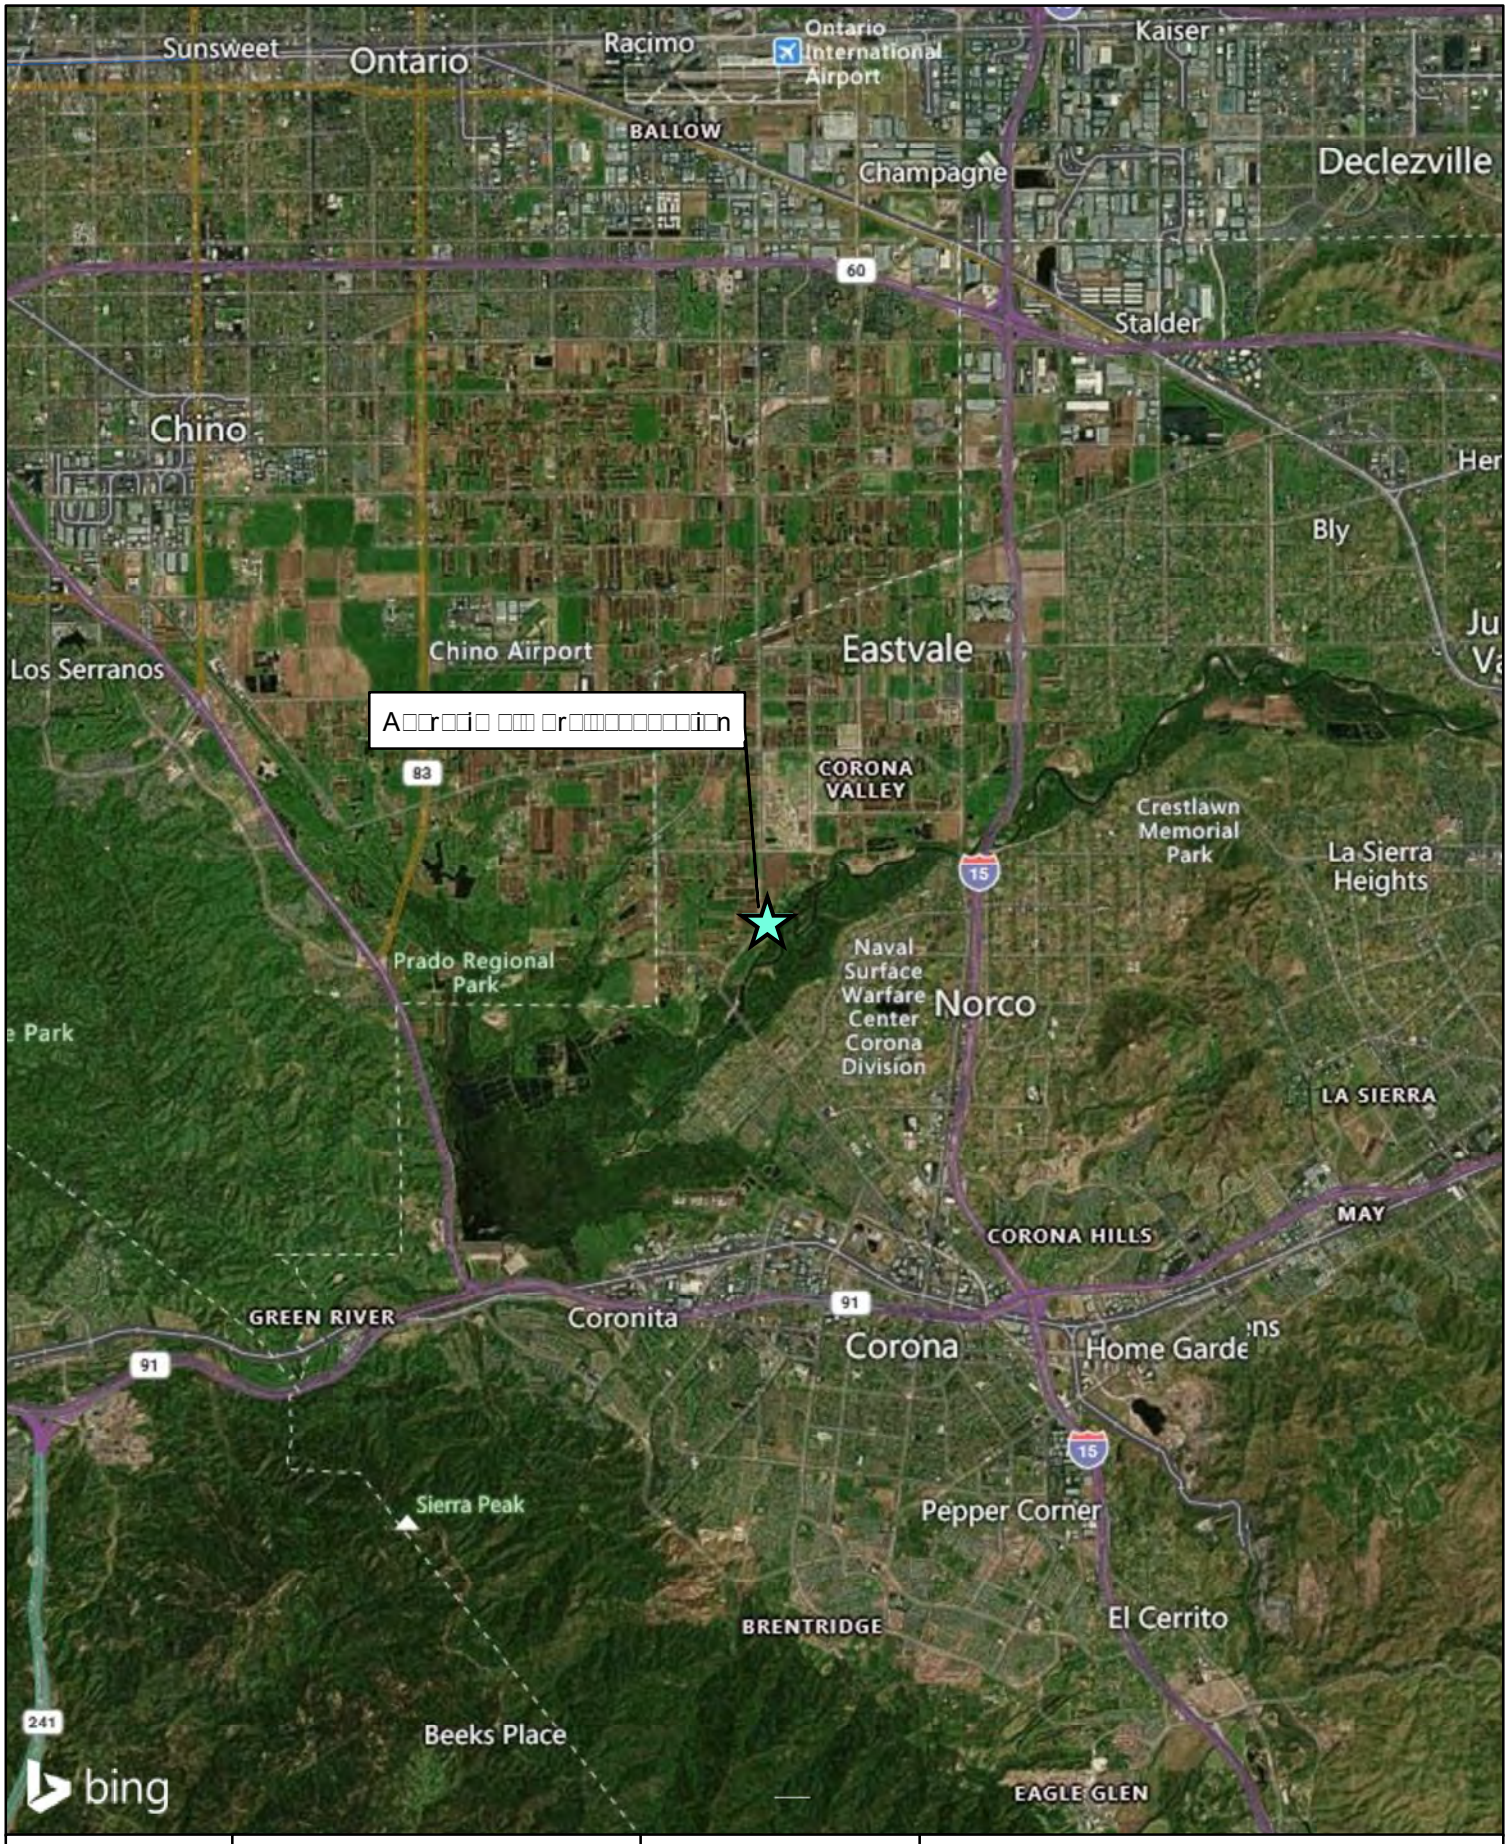
- Project site: the approximately 8-acre SEC Archibald and Grapewin Project site.
- Study Area: the area evaluated during the field survey, including the approximately 8-acre Project site and an approximate 500-foot buffer area surrounding the Project site.
- Project Vicinity: intended to be a general term to describe the broader area surrounding the Study Area.

1.3 Project Location

The Study Area is located east of Archibald Street and south of Grapewin Street, within the City of Eastvale in Riverside County, California (Figures 1 through 3). The Study Area is located within the United States Geological Survey (USGS) 7.5-Minute Topographic Map *Corona North* Quadrangle within Section 00, Township 2 South, and Range 7 West.

The Project's Assessor Parcel Numbers (APN) includes 130-070-021, 130-070-015, and 130-080-004.

Access to the Project site is from Grapewin Street, as well as Archibald Street.



1.4 Existing Conditions

The Project site consists of several developed animal pens for goats, sheep, cattle, etc. The Project site also contains 2 residential units with a pool house, covered horse arena, and stables. Overall, the site includes developed communities and ruderal habitat consisting of non-native species. Located to the east of the Project site is the Santa Ana River. Habitat within the Santa Ana River consists of arundo thickets and southern cottonwood willow riparian forest and open water.

The site is bounded by Vantage Point Church on the south, residential development to the west and north, and the Santa Ana River to the east.

2.0 Project Description

The Project proposes to construct 76 single-family lots, open space lots, water quality basins, and landscape. All development is anticipated to occur on the Project site, and no direct impacts to the Santa Ana River is anticipated. The proposed site plan is shown on Figure 4.

GENERAL NOTES

1. THE PROJECT IS LOCATED WITHIN FLOOD ZONE X BASED ON FEMA FLOOD INSURANCE RATE MAP PANEL 687 OF 3805, RIVERSIDE COUNTY CALIFORNIA.
2. THIS IS A CALIFORNIA DENSITY BONUS LAW PROJECT (SEE SITE SUMMARY TABLE). IT IS ALSO BEING PROCESSED WITH A PRELIMINARY SB 330 APPLICATION
3. PUBLIC STREET IMPROVEMENTS PER CITY OF EASTVALE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION.
4. THOMAS BROS. MAP BOOK PAGE: 713, GRID A4, 2024 EDITION
5. NO SUBSURFACE SEPTIC DISPOSAL PROPOSED.
6. ALL EXISTING STRUCTURES ON SITE TO BE DEMOLISHED.
7. ARCHIBALD TO BE OPEN TO THE PUBLIC AND IN-TRACT STREETS ARE TO BE PRIVATE.
8. ENTRY AT GRAPEWIN STREET TO BE USED FOR EMERGENCY ACCESS ONLY.
9. SINGLE FAMILY RESIDENTIAL DEVELOPMENT WILL NOT BE GATED.
10. ALL LOTS HAVE 1% MIN. GRADE TOWARDS THE STREET FOR DRAINAGE PURPOSES.
11. THERE ARE NO REMAINING PARCELS.
12. RUNOFF FROM THIS TRACT WILL BE ROUTED INTO THE AN EXISTING RIVERSIDE FLOOD CONTROL STORM DRAIN LINE THAT DISCHARGES INTO THE SANTA ANA RIVER.
13. PROJECT SITE IS NOT WITHIN COMMUNITY SERVICES DISTRICT.
14. THERE IS ONE KNOWN WELL ON THIS PROPERTY. IT WILL BE ABANDONED AND CAPPED.
15. SITE IS SUBJECT TO LIQUEFACTION.
16. ANY OPEN SPACE LOTS TO BE MAINTAINED BY HOME OWNERS ASSOCIATION.
17. PROJECT TO COMPLY WITH SCHEDULE A IMPROVEMENTS PER THE SUBDIVISION MAP ACT.
18. SIDE YARD W/ GATE SETBACK - 4' MIN.
    SIDE YARD W/ NO GATE SETBACK - 4' MIN.
    REAR YARD SETBACK - 10' MIN.
    STREET REAR YARD SETBACK - 5' MIN.
19. PROJECT WALLS AND FENCING WILL BE SHOWN ON THE TENTATIVE TRACT MAP AND CONCEPTUAL GRADE PLAN.
20. THIS PROJECT IS EXEMPT FROM HYDRAULIC CONDITIONS OF CONCERN (H.C.O.C.)
21. THE TENTATIVE TRACT MAP INCLUDES THE ENTIRE CONTIGUOUS OWNERSHIP OF THE LAND DIVIDER
22. IMPERVIOUS SQUARE FOOTAGE:

LEGAL DESCRIPTION

REAL PROPERTY IN THE CITY OF EASTVALE, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

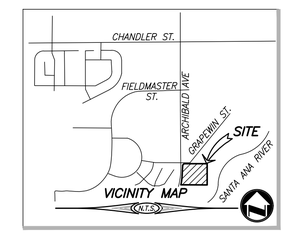
PARCEL 1:
THAT PORTION OF LOT "O" OF FULLER RANCHO, AS SHOWN BY MAP ON FILE IN BOOK 16 PAGE(S) 94 TO 97 INCLUSIVE OF MAPS, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, DESCRIBED AS FOLLOWS:
COMMENCING AT THE SOUTHEAST CORNER OF THE NORTHWEST QUARTER OF THE NORTHWEST QUARTER OF SECTION 2, TOWNSHIP 3 SOUTH, RANGE 7 WEST, SAN BERNARDINO BASE AND MERIDIAN, AND POINT ALSO BEING THE SOUTHEAST CORNER OF LOT "M" OF SAID FULLER RANCHO;
THENCE SOUTH 0° 04' 19" EAST, 623.4 FEET; THENCE SOUTH 40° 45' WEST, 974.3 FEET;
THENCE SOUTH 36° 15' WEST, 772.8 FEET; THENCE NORTH 84° 34' WEST, 192.4 FEET TO A POINT ON THE EAST LINE OF ARCHIBALD AVENUE;
THENCE SOUTH 0° 02' EAST, ALONG SAID EAST LINE OF ARCHIBALD AVENUE 225 FEET TO THE POINT OF BEGINNING;
THENCE SOUTH 84° 34' EAST 723.58 FEET;
THENCE SOUTH 0° 58' WEST, 144.9 FEET;
THENCE SOUTH 23° 54' WEST, 81.55 FEET;
THENCE NORTH 84° 34' WEST, 685.24 FEET TO A POINT ON SAID EAST LINE OF ARCHIBALD AVENUE;
THENCE NORTH 0° 02' WEST, ALONG SAID EAST LINE OF ARCHIBALD AVENUE 225 FEET TO THE TRUE POINT OF BEGINNING;
EXCEPT THE WESTERLY 450 FEET THEREOF, THE EASTERLY LINE OF SAID LOT 450 FEET BEING PARALLEL WITH THE EAST LINE OF ARCHIBALD AVENUE.

PARCEL 2:
THAT PORTION OF LOT "O" OF FULLER RANCHO, AS SHOWN BY MAP ON FILE IN BOOK 16 PAGE(S) 94 TO 97, INCLUSIVE OF MAPS, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF THE NORTHWEST QUARTER OF THE
NORTHWEST QUARTER OF SECTION 2, TOWNSHIP 3 SOUTH, RANGE 7 WEST, SAN BERNARDINO BASE AND MERIDIAN, SAID POINT ALSO BEING THE SOUTHEAST CORNER OF LOT "M" OF SAID FULLER RANCHO;
THENCE SOUTH 0° 04' 19" EAST, 623.4 FEET; THENCE SOUTH 40° 45' WEST 974.3 FEET;
THENCE SOUTH 36° 15' WEST, 772.8 FEET TO THE TRUE POINT OF BEGINNING;
THENCE SOUTH 84° 34' EAST, 545.84 FEET;
THENCE SOUTH 3° 51' WEST, 225.4 FEET;
THENCE NORTH 84° 34' WEST, 723.58 FEET TO A POINT ON THE EAST LINE OF ARCHIBALD AVENUE;
THENCE NORTH 0° 02' WEST, ALONG SAID EAST LINE OF ARCHIBALD AVENUE, 225 FEET;
THENCE SOUTH 84° 34' EAST, 192.4 FEET
TO THE TRUE POINT OF BEGINNING; EXCEPT THAT PORTION AS CONVEYED TO THE COUNTY OF RIVERSIDE BY DEED RECORDED JUNE 15, 1965 AS INSTRUMENT NO. 64094 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA. PARCELS 1 AND 2 ABOVE ARE ALSO SHOWN AS PORTIONS OF LOTS 13 AND 14 OF ASSESSORS MAP NO. 62.

PARCEL 3:
THAT PORTION OF LOT O OF FULLER RANCHO, AS SHOWN BY MAP ON FILE IN BOOK 16, PAGES 94 TO 97, INCLUSIVE, OF MAPS, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF THE NORTHWEST QUARTER OF THE NORTHWEST QUARTER OF SECTION 2, TOWNSHIP 3 SOUTH, RANGE 7 WEST, SAN BERNARDINO BASE AND MERIDIAN, ACCORDING TO THE OFFICIAL PLAT THEREOF, SAID POINT BEING THE SOUTHEAST CORNER OF LOT M OF FULLER RANCHO;
THENCE SOUTH 0° 04' 19" EAST, 623.4 FEET;
THENCE SOUTH 40° 45' WEST 974.3 FEET;
THENCE SOUTH 36° 15' WEST, 432.4 FEET;
THENCE CONTINUING SOUTH 36° 15' WEST, 339.4 FEET;
THENCE NORTH 84° 34' WEST, 192.44 FEET TO A POINT ON THE EASTERLY LINE OF ARCHIBALD AVENUE;
THENCE SOUTH 0° 02' EAST ON THE EASTERLY LINE OF ARCHIBALD AVENUE, 514.00 FEET TO THE TRUE POINT OF BEGINNING OF THIS DESCRIPTION.
THENCE SOUTH 84° 34' EAST, 616.92 FEET;
THENCE NORTH 47° 26' EAST, 93.84 FEET TO THE SOUTHEASTERLY CORNER OF THE LAND CONVEYED TO MILLER A. CRANE AND WIFE, BY DEED RECORDED JANUARY 3, 1934 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA;
THENCE NORTH 84° 34' WEST, 235.25 FEET;
THENCE NORTH 0° 02' WEST 225.00 FEET;
THENCE SOUTH 84° 34' WEST, 450.00 FEET TO THE EASTERLY LINE OF ARCHIBALD AVENUE;
THENCE SOUTH 0° 02' EAST, ALONG SAID EASTERLY LINE OF ARCHIBALD AVENUE, 289.00 FEET TO THE TRUE POINT OF BEGINNING;



EXCEPTING THEREFROM THAT PORTION AS CONVEYED TO THE COUNTY OF RIVERSIDE BY DEED RECORDED JANUARY 7, 1965 AS INSTRUMENT NO. 1679 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

3.0 Regulatory Context

The following is a list of the key local, state, and federal laws and regulations that apply to protecting plant communities, plants, wildlife, and water quality from project impacts relevant to the Project.

3.1 Federal Laws and Regulations

3.1.1 Federal Endangered Species Act

The Federal Endangered Species Act (ESA) of 1973 defines an endangered species as "any species which is in danger of extinction throughout all or a significant portion of its range." A threatened species is defined as "any species which is likely to become an Endangered species within the foreseeable future throughout all or a significant portion of its range." Under provisions of Section 9(a)(1)(B) of the ESA, unless properly permitted, it is unlawful to "take" any listed species. "Take" is defined in Section 3(18) of ESA: "...harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." Further, the US Fish and Wildlife Service (USFWS), through regulation, has interpreted the terms "harm" and "harass" to include certain types of habitat modification as forms of "take." These interpretations, however, are generally considered and applied on a case-by-case basis and often vary from species to species. In a case where a property owner seeks permission from a federal agency for an action which could affect a federally listed plant or animal species, the property owner and agency are required to consult with USFWS pursuant to Section 7 of the ESA if there is a federal nexus, or pursuant to Section 10 of the ESA. Section 9(a)(2)(b) of the ESA addresses the protections afforded to listed plants. All references to federally-protected species in this biological assessment include the most current published status or candidate category to which each species has been assigned by USFWS.

3.1.2 Migratory Bird Treaty Act (MBTA)

The Migratory Bird Treaty Act (MBTA) protects individuals as well as any part, nest, or eggs of any bird listed as migratory. In practice, Federal permits issued for activities that potentially impact migratory birds typically have conditions that require pre-disturbance surveys for nesting birds. In the event nesting is observed, a buffer area with a specified radius must be established, within which no disturbance or intrusion is allowed until the young have fledged and left the nest, or it has been determined that the nest has failed. If not otherwise specified in the permit, the size of the buffer area varies with species and local circumstances (e.g., presence of busy roads, intervening topography, etc.), and is based on the professional judgment of a monitoring biologist. A list of migratory bird species protected under the MBTA is published by USFWS.

3.1.3 Federal Clean Water Act (CWA)

The Clean Water Act (CWA), Section 401 provides guidance for the restoration and maintenance of the chemical, physical, and biological integrity of the nation's waters.

Section 401 requires a project operator to obtain a federal license or permit that allows activities resulting in a discharge to waters of the United States to obtain state certification, thereby ensuring that the discharge will comply with provisions of the CWA. The Regional Water Quality Control Board administers the certification program in California. Section 404 establishes a permit program administered by the United States Army Corps of Engineers (Corps) that regulates the discharge of dredged or fill material into waters of the United States, including wetlands. The Corps implementing regulations are found at 33 CFR 320 and 330. Guidelines for implementation are referred to as the Section 404(b)(1) Guidelines, which were developed by the United States Environmental Protection Agency in conjunction with Corps (40 CFR 230). The guidelines allow the discharge of dredged or fill material into the aquatic system only if there are no practicable alternatives that would have less adverse impacts.

3.1.4 Waters of the United States and Wetlands

Aquatic resources, including riparian areas, wetlands, and certain aquatic vegetation communities, are considered sensitive biological resources and fall under the jurisdiction of several regulatory agencies. The Corps exerts jurisdiction over waters of the United States, including all waters that are subject to the ebb and flow of the tide; wetlands and other waters such as lakes, rivers, streams (including intermittent or ephemeral streams), mudflats, sandflats, sloughs, prairie potholes, vernal pools, wet meadows, playa lakes, or natural ponds; and tributaries of the above features. The extent of waters of the United States is generally defined as the portion that falls within the limits of the Ordinary High-Water Mark (OHWM). The OHWM is defined as the "line on the shore established by the fluctuation of water and indicated by physical characteristics such as a clear, natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas."

The definition of waters of the United States has undergone several iterations, including a much more streamlined definition which was published and formally adopted in April 2020. However, in August 2021, the April 2020 Navigable Waters definition was challenged in the case *Pascua Yaqui Tribe v. Environmental Protection Agency*. In light of this case and subsequent order from US District Court for the District of Arizona, the U.S. Environmental Protection Agency (EPA) and Corps have halted implementation of the Navigable Waters Protection Rule from 2020 and are interpreting "waters of the United States" consistent with the pre-2015 regulatory regime. Then in March 2023 following a Supreme Court decision, the rule was once again changed and finalized to codify the pre-2015 definition with some revisions to the definition of waters of the United States and wetlands. On August 29, 2023 the EPA and Corps issued a final rule to amend the prior definition of waters of the United States. The final rule conforms with the definition of waters of the United States to the US Supreme Court's May 25, 2023 decision in the case *Sackett v. Environmental Protection Agency*. As a result of the case, key aspects of the regulatory text have been amended to conform to the Court's

decision, which revised the definitions of waters of the United States and became effective on September 8, 2023.

The September 2023 ruling codified the term (a) waters of the United States to mean:

1. Waters which are:
   i. Currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;
   ii. The territorial seas; or
   iii. Interstate waters;
2. Impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (a)(5) of this section;
3. Tributaries of waters identified in paragraph (a)(1) or (2) of this section that are relatively permanent, standing or continuously flowing bodies of water;
4. Wetlands adjacent to the following waters:
   i. Waters identified in paragraph (a)(1) of this section; or
   ii. Relatively permanent, standing or continuously flowing bodies of water identified in paragraph (a)(2) or (a)(3) of this section and with a continuous surface connection to those waters;
   iii. Waters identified in paragraph (a)(2) or (3) of this section when the wetlands either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section;
5. Intrastate lakes and ponds not identified in paragraphs (a)(1) through (4) of this section that are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3) of this section.
6. Intrastate lakes and ponds, streams, or wetlands not identified in paragraphs (a)(1) through (4) of this section:
   i. That are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3)(i) of this section; or
   ii. That either alone or in combination with similarly situated waters in the region, significantly affect the chemical, physical, or biological integrity of waters identified in paragraph (a)(1) of this section.

Wetlands, including swamps, bogs, seasonal wetlands, seeps, marshes, and similar areas, are defined by Corps as "those areas that are inundated or saturated by surface

or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions" (33 CFR 328.3[a]; 40 CFR 230.3[t]). Indicators of three wetland parameters (i.e., hydric soils, hydrophytic vegetation, and wetlands hydrology), as determined by field investigation, must be present and, as outlined within the March 2023 ruling, have adjacency with relative permanent, standing or continuously flowing bodies of water with continuous connection to Waters of the US. Wetlands must meet the parameters as outlined above classified as a wetland by Corps.

It is important to note that the RWQCB definition of wetland was redefined, and the new definition went into effect May 28, 2020. The definition of a wetland is as follows: An area is wetland if, under normal circumstances, (1) the area has continuous or recurrent saturation of the upper substrate caused by groundwater, or shallow surface water, or both; (2) the duration of such saturation is sufficient to cause anaerobic conditions in the upper substrate; and (3) the area's vegetation is dominated by hydrophytes, or the area lacks vegetation. This RWQCB modified three-parameter definition is similar to the federal definition in that it identifies three wetland characteristics that determine the presence of a wetland: wetland hydrology, hydric soils, and hydrophytic vegetation. Unlike the federal definition, however, the RWQCB wetland definition allows for the presence of hydric substrates as a criterion for wetland identification (not just wetland soils) and wetland hydrology for an area devoid of vegetation (less than 5% cover) to be considered a wetland.

Examples of waters that would be considered wetlands by the RWQCB definition, but not by the federal wetland definition, are non-vegetated wetlands, or wetlands characterized by exposed bare substrates like mudflats and playas, as long as they meet the three-parameters as described in the RWQCB definition. It is important to note that while the Corps may not designate a feature as a wetland, that feature could be considered a special aquatic site or other water of the U.S. by the Corps and potentially subject to Corps' jurisdiction.

3.2 California State Laws and Regulations

3.2.1 California Endangered Species Act (CESA)

The California Endangered Species Act (CESA) establishes the policy of the state to conserve, protect, restore, and enhance threatened or endangered species and their habitats. The CESA mandates that state agencies should not approve projects that would jeopardize the continued existence of threatened or endangered species if reasonable and prudent alternatives are available that would avoid jeopardy. There are no state agency consultation procedures under the CESA. For projects that would affect a listed species under both the CESA and the ESA, compliance with the ESA would satisfy the CESA if California Department of Fish and Wildlife (CDFW) determines that the federal incidental take authorization is "consistent" with the CESA under California Fish and Game Code (FGC) Section 2080.1. For projects that would result in take of a

species listed under the CESA only, the project operator would have to apply for a take permit under Section 2081(b).

3.2.2 California Fish and Game Code Section 1600-1616

Section 1602 of the California Fish and Game Code requires notifying CDFW prior to any project activity that might (1) substantially divert or obstruct the natural flow of any river, stream, or lake; (2) substantially change or use any material from the bed, channel, or bank of any river, stream, or lake; or (3) deposit or dispose of debris, waste, or other material containing crumbled, flaked, or ground pavement where it may pass into any river, stream, or lake. If, after this notification, the CDFW determines that the activity may substantially adversely affect fish and wildlife resources, a Lake or Streambed Alteration Agreement will need to be obtained. CDFW may then place conditions in the Section 1602 Streambed Alteration Agreement to avoid, minimize, and mitigate any potentially significant adverse impacts within CDFW jurisdictional limits.

3.2.3 California Fully Protected Species

California fully protected species are described in Sections 3511, 4700, 5050, and 5515 of the California Fish and Game Code. These statutes prohibit take or possession of fully protected species. CDFW is unable to authorize incidental take of fully protected species when activities are proposed in areas inhabited by those species.

3.2.4 Protection of Birds

Section 3503.5 of the California Fish and Game Code states that it is "unlawful to take, possess, or destroy any birds in the order Falconiformes or Strigiformes (birds of prey) or to take, possess, or destroy the nest or eggs of any such bird except as otherwise provided by this code or any regulation adopted pursuant thereto." Activities that result in the abandonment of an active bird of prey nest may also be considered in violation of this code. In addition, California Fish and Game Code, Section 3511 prohibits the taking of any bird listed as fully protected, and California Fish and Game Code, Section 3515 states that is it unlawful to take any non-game migratory bird protected under the MBTA.

3.2.5 Porter-Cologne Water Quality Act – California Code, Division 7

The RWQCB also has jurisdiction over waters deemed "isolated" or not subject to Section 404 jurisdiction under the Solid Waste Agency of Northern Cook County v. Corps decision. Dredging, filling, or excavation of isolated waters constitutes a discharge of waste to waters of the state and prospective dischargers are required to obtain authorization through an Order of Waste Discharge or waiver thereof from the RWQCB and comply with other requirements of Porter-Cologne Act.

Under Section 401 of the CWA, the local RWQCB (for this Project, the Santa Ana RWQCB) must certify that actions receiving authorization under Section 404 of the CWA also meet state water quality standards. The RWQCB requires projects to avoid impacts to wetlands if feasible and requires that projects do not result in a net loss of wetland

acreage or a net loss of wetland function and values. Compensatory mitigation for impacts to wetlands and/or waters of the state is required.

3.2.6 California Native Plant Protection Act

The California Native Plant Protection Act (NPAA) (California Fish and Game Code §§ 1900–1913) requires all State agencies to use their authority to carry out programs to conserve Endangered and Rare native plants. The NPAA gives the CDFW the regulatory authority to designate native plants as "Endangered" or "Rare" and prohibits the take of such plants with certain exceptions.

Provisions of the NPPA prohibit the taking of listed plants from the wild and require notification of CDFW at least 10 days in advance of any change in land use. This allows CDFW to salvage listed plant species that would otherwise be destroyed. The project operator is required to conduct botanical inventories and consult with CDFW during project planning to comply with the provisions of this act and sections of CEQA that apply to rare or endangered plants.

3.2.7 Sensitive Plant Communities

Sensitive plant communities include those habitat types considered sensitive by resource agencies, namely CDFW, due to their scarcity and/or their ability to support State and Federally listed Endangered, Threatened, and Rare vascular plants, as well as several sensitive bird and reptile species. CDFW maintains a natural plant community list, the List of California Terrestrial Natural Communities. Sensitive natural communities (also referred to by CDFW as 'rare', 'special-status', or 'special concern') are identified on the list by an asterisk and are considered high priority vegetation types (CDFW 2003; CDFW 2000).

3.2.8 California Native Plant Society

The California Native Plant Society (CNPS) is a private plant conservation organization dedicated to the monitoring and protection of sensitive species in California. CNPS has compiled an inventory comprised of the information focusing on geographic distribution and qualitative characterization of Rare, Threatened, or Endangered vascular plant species of California. The list serves as the candidate list for Threatened and Endangered by CDFW. CNPS has developed five categories of rarity, of which Ranks 1A, 1B, and 2 are particularly considered sensitive.

Sensitive species that occur or potentially could occur within the Study Area are based on one or more of the following: (1) the direct observation of the species within the Study Area during any field surveys; (2) a record reported in the CNDDB; and (3) the Study Area is within known distribution of a species and contains appropriate habitat.

3.3 Regulatory Permits

This report is prepared pursuant to and in support of CEQA, and any applicable regulatory permit applications, including the CDFW SAA, RWQCB Section 401 WQC or

Wastewater Discharge Report (WDR), Corps Section 404 permit, and USFWS Section 7 Biological Opinion.

3.4 Local Sensitive Resource Protection and Classifications

3.4.1 Western Riverside Multiple Species Habitat Conservation Plan

The Project site is located within the Western Riverside Multiple Species Habitat Conservation Plan (MSHCP). The MSHCP is a comprehensive plan that includes portions of the County of Riverside and numerous cities. The MSHCP plans for conservation of 146 species and proposes a reserve system of approximately 500,000 acres. The MSHCP is intended to contribute to the economic viability of the County of Riverside by providing landowners, developers, and public infrastructure projects a streamlined regulatory process.

The Western Riverside County Regional Conservation Authority MSHCP Information Application website was reviewed to verify any overlays that may occur on the Project site. Regardless of other overlays, MSHCP Section 6.1.2, *Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools*, is applicable to all projects within the MSHCP and describes the process through which protection of riparian/riverine areas, and vernal pools will occur within the MSHCP Area. Protection of these resources is important for a number of MSHCP conservation objectives. An assessment of a Project's potentially significant effects on riparian/riverine areas and vernal pools is required. Guidelines for determining whether or not these resources exist on site are described as follows:

- Riparian/Riverine Areas include "lands which contain habitat dominated by trees, shrubs, persistent emergent, or emergent mosses and lichens which occur close to, or which depend upon soil moisture from a nearby fresh water source or areas with fresh water flow during all or a portion of the year." Riparian/riverine areas under the MSHCP also include drainage areas that are vegetated or have upland (non-riparian/riverine) vegetation and that drain directly into an area that is described for conservation under the MSHCP (or areas already conserved).

- Vernal Pools are described by the MSHCP as "seasonal wetlands that occur in depression areas that have wetlands indicators of all three parameters (soils, vegetation, and hydrology) during the wetter portion of the growing season but normally lack wetlands indicators of hydrology and/or vegetation during the drier portion of the growing season."

  With the exception of wetlands created for the purpose of providing wetlands Habitat or resulting from human actions to create open waters or from the alteration of natural stream courses, areas demonstrating characteristics as described above which are artificially created are not included in these definitions.

4.0 Survey and Methods

Preparation for this biological assessment began with a review of relevant available literature and review of any prior biological documentation for the Study Area. This effort was followed by onsite field surveys to assess the existing habitat, map any onsite sensitive plant communities and jurisdictional waters, and determine whether special status plant and wildlife species occur or potentially occur within the Study Area.

4.1 Literature Review

The assessment began with a review of relevant available literature on the biological resources within the Study Area and Project Vicinity.

4.1.1 Sensitive Plant Communities

Sensitive plant communities (sensitive habitats) are of limited distribution statewide or within a county or region and are often vulnerable to environmental effects of projects. Sensitive habitats are often threatened with local extirpation and are therefore considered valuable biological resources. Plant communities are considered "sensitive" by the CNPS and CDFW if they meet any of the criteria listed below.

- The habitat is recognized and considered sensitive by CDFW, USFWS, and/or special interest groups such as CNPS.
- The habitat is under the jurisdiction of the Corps pursuant to Section 404 of the CWA.
- The habitat is under the jurisdiction of the CDFW pursuant to Sections 1600 through 1612 of the California Fish and Game Code.
- The habitat is known or believed to be of high priority for inventory in the California Natural Diversity Database (CNDDB).
- The habitat is considered regionally rare.
- The habitat has undergone a large-scale reduction due to increased encroachment and development.
- The habitat supports special status plant and/or wildlife species (defined below).
- The habitat functions as an important corridor for wildlife movement.

4.1.2 Critical Habitat

Under the ESA, the federal government is required to designate "critical habitat" for any species it lists under the ESA. Federal agencies are prohibited from authorizing, funding or carrying out actions that "destroy or adversely modify" critical habitats. Section 3 of the ESA defines critical habitat as:

- The specific areas within the geographic area occupied by a species, at the time it is listed in accordance with the ESA, on which are found those physical or biological features essential to the conservation of the species and that may require special management considerations or protection.

- The specific areas outside the geographic area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

"Conservation" means the use of all methods and procedures that are necessary to bring an endangered or a threatened species to the point at which listing under the ESA is no longer necessary. Critical habitat receives protection under Section 7(a)(2) of the ESA through the prohibition against destruction or adverse modification of critical habitat with regard to actions carried out, funded, or authorized by a federal agency. Section 7(a)(2) also requires conferences on federal actions that are likely to result in the destruction or adverse modification of proposed critical habitat.

The USFWS's online service for information regarding Threatened and Endangered Species Final Critical Habitat designation within California was reviewed to determine if the Study Area is within any species designated Critical Habitat (USFWS 2022a). The USFWS regulatory mapping process for the designation of critical habitat is broad-based mapping exercise of areas that may or may not include constituent elements of the critical habitat designation. Due to this approach in mapping, large areas are designated as critical habitat regardless of the existing habitat, and as a result may include developed areas, such as buildings, roads, hardscape, and other such facilities, as well as natural habitats.

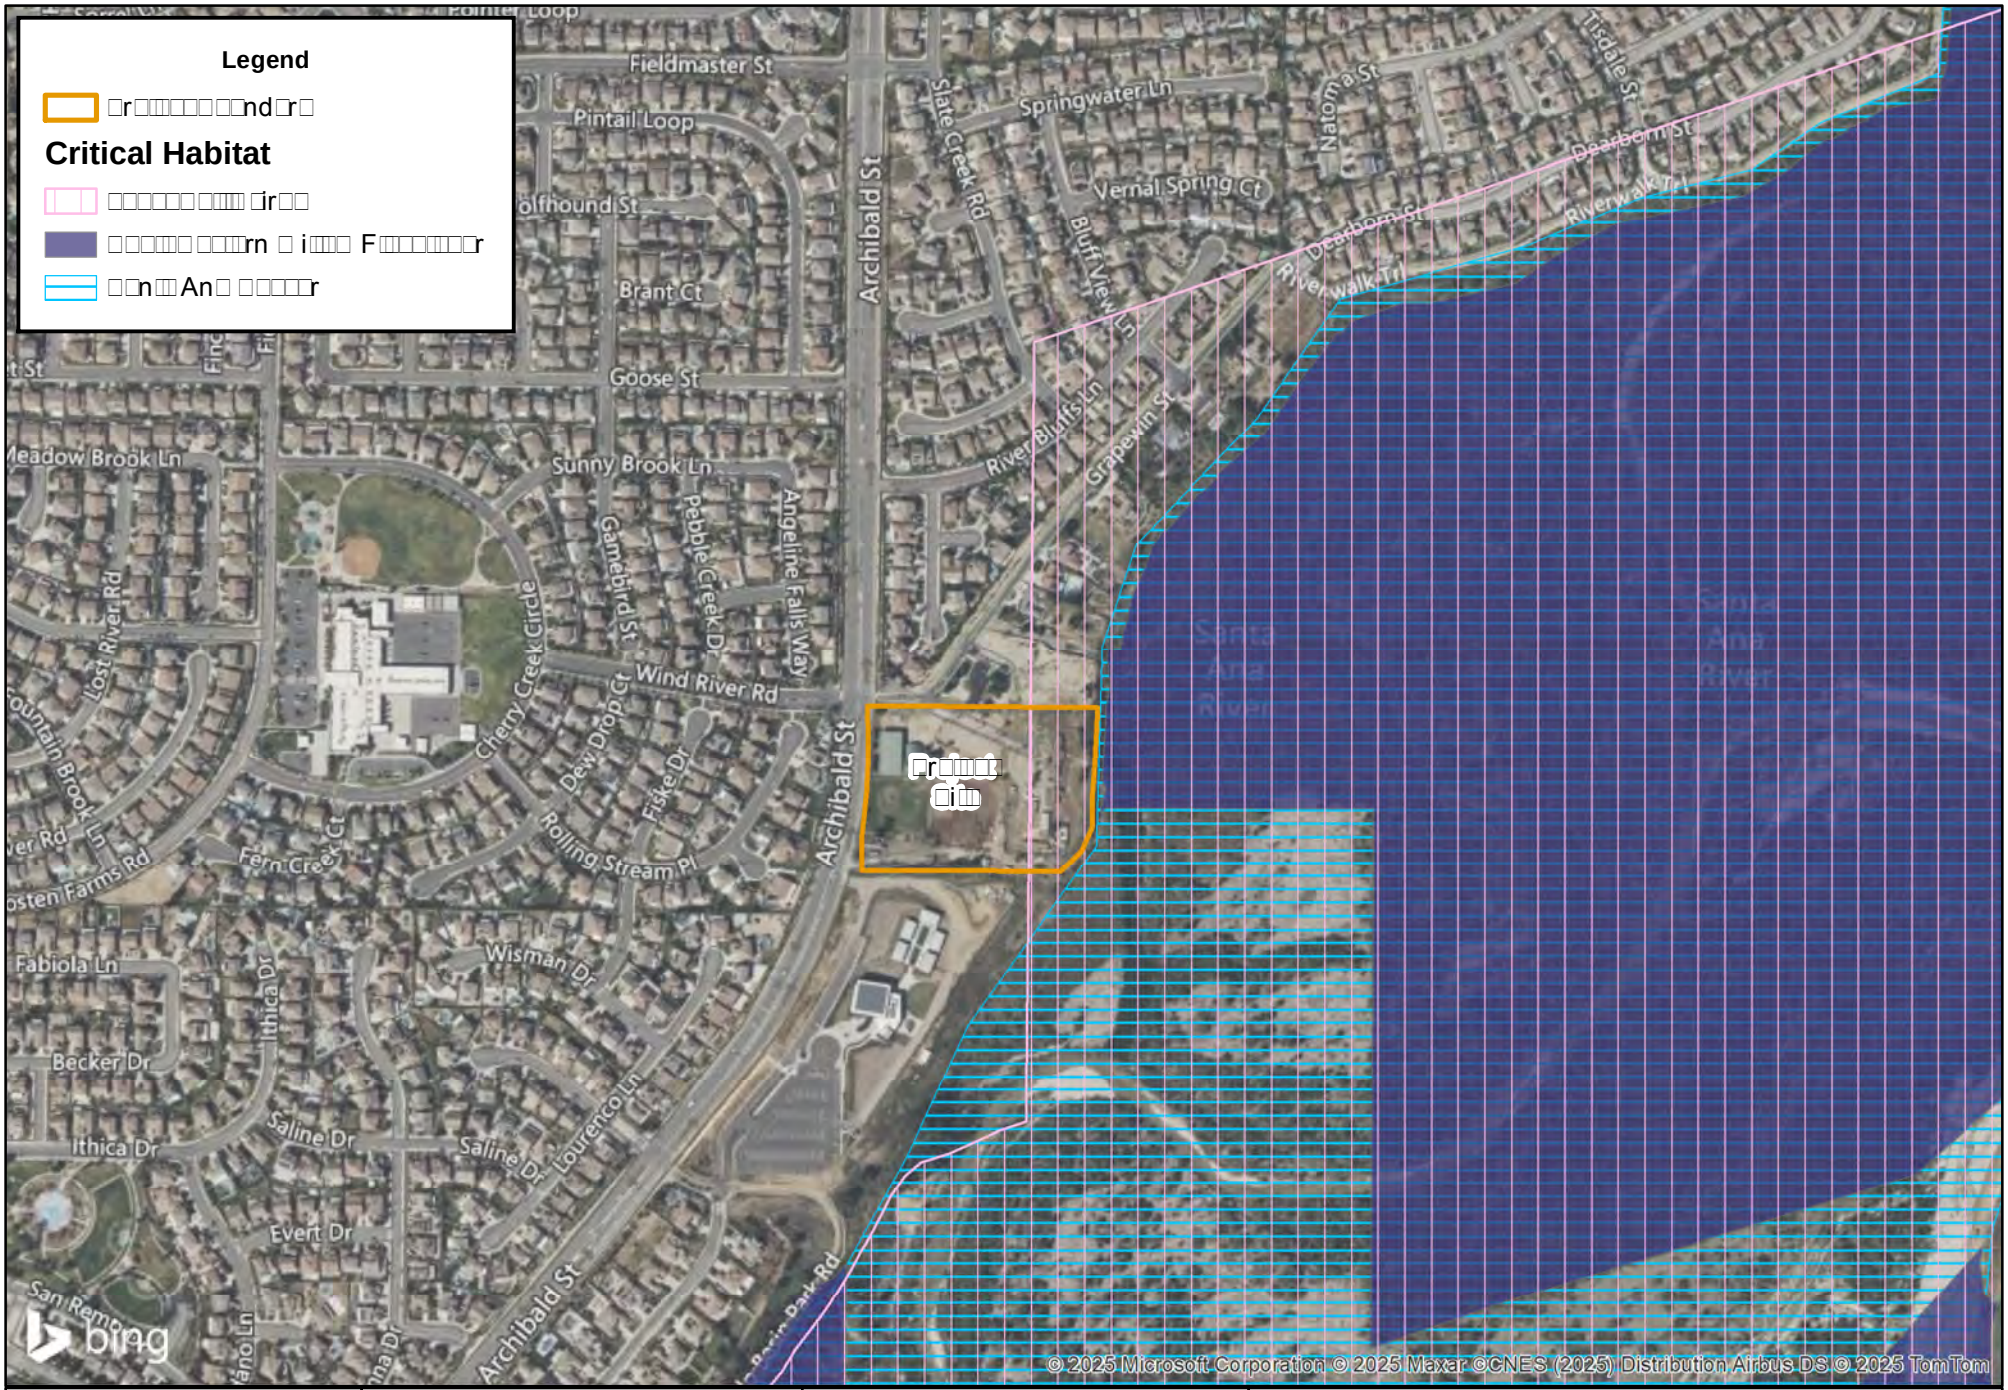
The constituent elements of the critical habitat designation consider the physical and biological features needed for life processes and successful reproduction of the listed species, including:

- Space for individual and population growth for normal behavior;
- Habitat cover or shelter;
- Food, water, or other nutritional or physiological requirements;
- Sites for breeding and rearing offspring; and
- Habitat that is protected from disturbance or is representative of the historical geographic and ecological distribution of a species.

4.1.3 Special Status Plants and Wildlife

Species of plants and animals are afforded "special status" by federal agencies, state agencies, and/or non-governmental organizations because of their recognized rarity, potential vulnerability to extinction, and local importance. These species typically have a limited geographic range and/or limited habitat and are referred to collectively as "special status" species. Plant and wildlife species are considered "special status" species if they meet any of the following criteria.

- Taxa with official status under ESA, CESA, and/or the NPPA.
- Taxa proposed for listing under ESA and/or CESA.



- Taxa designated a species of special concern by CDFW.
- Taxa designated a state fully protected species by CDFW.
- Taxa identified as sensitive, unique or rare, by the USFWS, CDFW, the United States Forest Service (USFS), the United States Bureau of Land Management (BLM), and/or the California Department of Forestry and Fire Protection (CDF).
- Plants that meet the definition of rare or endangered under CEQA §15380(b) and (d). Species that may meet the definition of rare or endangered include the following:
    - Species considered by CNPS and CDFW to be "rare, threatened or endangered in California" (California Rare Plant Rank [CRPR] 1A, 1B and 2) (CNPS 2024). A majority of the CRPR 3 and CRPR 4 plant species generally do not qualify for protection under CESA and NPPA.
    - Species that may warrant consideration on the basis of local significance or recent biological information.
    - Some species included on the CNDDB Special Plants, Bryophytes, and Lichens List (CDFW 2024g).
- Considered a locally significant species, that is, a species that is not rare from a statewide perspective but is rare or uncommon in a local context such as within a county or region (CEQA §15125 (c)) or is so designated in local or regional plans, policies, or ordinances (CEQA Guidelines, Appendix G). Examples include a species at the outer limits of its known range or a species occurring on an uncommon soil type.

Available literature and databases were reviewed regarding sensitive habitats and special status plant and wildlife species. Special status plant and wildlife species that have the potential to occur within the immediate region of the Study Area were identified. Several agencies, including the USFWS, CDFW, and CNPS publish lists of particular taxa (species and subspecies) and the associated level of protection or concern associated with each. Reviewed and consulted literature and databases focused on the Study Area, and included the following sources listed below:

- The CNDDB, a CDFW species account database that inventories status and locations of rare plants and wildlife in California, was used to identify any sensitive plant communities and special status plants and wildlife that may exist within a two-mile radius of the Project site. A CNDDB search was performed by assessing a two-mile radius around the Study Area (CDFW 2024f). In addition, the USGS 7.5-Minute Topographic Map *Corona North* and the surrounding eight quadrangles (Guasti, Fontana, Riverside West, Corona South, Black Star Canyon, Prado Sam, and Ontario) were also reviewer to further provided information regarding the distribution and habitats of special status wildlife in the Project Vicinity. CNDDB records are generally used as a starting point when determining what special status species, if any, may occur in a particular area. However, these records may be old, lack data not yet entered, and do not represent all the special status species that could be in that particular area.

- A map of USFWS critical habitat to determine species with critical habitat mapped in the general vicinity of the Project (Figure 5) (USFWS 2024a).
- Online CNPS Inventory of Rare and Endangered Plants of California (CNPS 2024). A search for the USGS 7.5-Minute Topographic Map *Corona North* and the surrounding eight quadrangles (Guasti, Fontana, Riverside West, Corona South, Black Star Canyon, Prado Sam, and Ontario) provided information regarding the distribution and habitats of special status vascular plants in the Project Vicinity.
- Online USFWS Information for Planning and Consultation (IPaC) tool was queried for any sensitive plant and animals to have potential to occur onsite.
- Pertinent maps, scientific literature, websites, and regional flora and fauna field guides.

The literature review was used as a resource to better understand the biological resources potentially occurring within the Study Area. Although the inventory list of special status plant and wildlife species was not exhaustive of all species that might occur on the property, it provides a wide range of species that are representative of the wildland habitats in the area. Species occurrence and distribution information is based on documented occurrences where surveys have taken place for individual projects; therefore, a lack of documented occurrence does not necessarily indicate that a given species is absent from the Study Area.

FIGURE 5

4.2 Biological Survey

4.2.1 General Biological Survey

Plant species were identified using plant field and taxonomical guides, such as The Jepson Manual: Vascular Plants of California, second edition (Baldwin et al. 2012). Vegetation communities were characterized utilizing vegetation alliances in accordance with the Manual of California Vegetation, Second Edition (MCVII) (Sawyer et al. 2009). Where necessary, deviations were made on best professional judgment when areas did not fit into a specific habitat description provided by MCVII. Plant communities were mapped in the field directly onto a 200-scale (1" = 200') aerial photograph and a Trimble R1 GNSS Receiver paired with the ARC Geographical Information System (ARCGIS) Collector Application was utilized during the survey. All plant species encountered during the field survey were identified and recorded in field notes. Information regarding the presence of suitable habitat and soils to support the species, known records or occurrence within the area, and known distribution and elevation range obtained from the relevant literature was used to determine presence or absence of sensitive species.

The biologist paid special attention to those habitat areas that had the potential to provide suitable habitat for special status plant and wildlife species. Aerial photographs and maps were used to assist in the delineation of plant community boundaries. Following field mapping, the plant communities were digitized, and the vegetation map was created.

General wildlife surveys were conducted on foot and with binoculars within the Study Area. All wildlife species encountered visually or audibly during the field survey were identified and recorded in field notes. Biologists also recorded signs of wildlife species including animal tracks, burrows, nests, scat, and remains. Binoculars were used to aid in the identification of observed wildlife. Wildlife field guides and photographs were used to assist with identification of wildlife species during the field survey, as necessary. Photographs were taken to document existing conditions within the Study Area (Appendix A).

4.2.2 Regional Connectivity/Wildlife Movement

Wildlife corridors link together areas of suitable habitat that are otherwise separated by rugged terrain, changes in vegetation, or human disturbance. The fragmentation of open space areas by urbanization creates isolated "islands" of wildlife habitat. In the absence of habitat linkages that allow movement to adjoining open space areas, various studies have concluded that some wildlife species, especially the larger and more mobile mammals, would not likely persist over time in fragmented or isolated habitat areas because they prohibit the infusion of new individuals and genetic information (MacArthur and Wilson 1967, Soule 1987, Harris and Gallager 1989). Corridors effectively act as links between different populations of a species. A group of smaller populations (termed "demes") linked together via a system of corridors is termed a

"meta-population." The long-term health of each deme within the meta-population is dependent upon its size and the frequency of interchange of individuals (immigration versus emigration). The smaller the deme, the more important immigration becomes, because prolonged inbreeding with the same individuals can reduce genetic variability. Immigrant individuals that move into the deme from adjoining demes mate with individuals and supply that deme with new genes and gene combinations that increases overall genetic diversity. An increase in a population's genetic variability is generally associated with an increase in a population's health.

Corridors mitigate the effects of habitat fragmentation by:

- Allowing animals to move between remaining habitats, which allows depleted populations to be replenished and promotes genetic diversity.
- Providing escape routes from fire, predators, and human disturbances, thus reducing the risk that catastrophic events (such as fires or disease) will result in population or local species extinction.
- Serving as travel routes for individual animals as they move within their home ranges in search of food, water, mates, and other needs (Fahrig and Merriam 1985, Simberloff and Cox 1987, Harris and Gallagher 1989).

Wildlife movement activities usually fall into one of three movement categories:

- Dispersal (e.g., juvenile animals from natal areas, individuals extending range distributions).
- Seasonal migration.
- Movements related to home range activities (foraging for food or water, defending territories, searching for mates, breeding areas, or cover).

A number of terms have been used in various wildlife movement studies, such as "wildlife corridor," "travel route," "habitat linkage," and "wildlife crossing" to refer to areas in which wildlife moves from one area to another. To clarify the meaning of these terms and facilitate the discussion on wildlife movement in this study, these terms are defined as follows:

- Travel route: a landscape feature (such as a ridge line, drainage, canyon, or riparian strip) within a larger natural habitat area that is used frequently by animals to facilitate movement and provide access to necessary resources (e.g., water, food, cover, den sites). The travel route is generally preferred because it provides the least amount of topographic resistance in moving from one area to another; it contains adequate food, water, and/or cover while moving between habitat areas; and provides a relatively direct link between target habitat areas.

- Wildlife corridor: a piece of habitat, usually linear in nature, which connects two or more habitat patches that would otherwise be fragmented or isolated from

one another. Wildlife corridors are usually bounded by urban land areas or other areas unsuitable for wildlife. The corridor generally contains suitable cover, food, and/or water to support species and facilitate movement while in the corridor. Larger, landscape-level corridors (often referred to as "habitat or landscape linkages") can provide both transitory and resident habitat for a variety of species.

- Wildlife crossing: a small, narrow area, relatively short in length and generally constricted in nature, which allows wildlife to pass under or through an obstacle or barrier that otherwise hinders or prevents movement. Crossings are typically manmade and include culverts, underpasses, drainage pipes, and tunnels to provide access across or under roads, highways, pipelines, or other physical obstacles. These are often "choke points" along a movement corridor.

4.3 MSHCP

The Project is not located within MSHCP survey areas for Criteria Area Plant Species, Amphibians, Mammals, or Special Linkage Areas. The Project site was assessed for MSHCP Section 6.1.2 Riparian and Riverine Areas and associated species, MSHCP Section 6.1.3 Narrow Endemic Plant, and Section 6.3.2 Species Survey Requirements for the western burrowing owl (*Athene cunicularia hypugaea* [BUOW]) habitat (Figure 6).

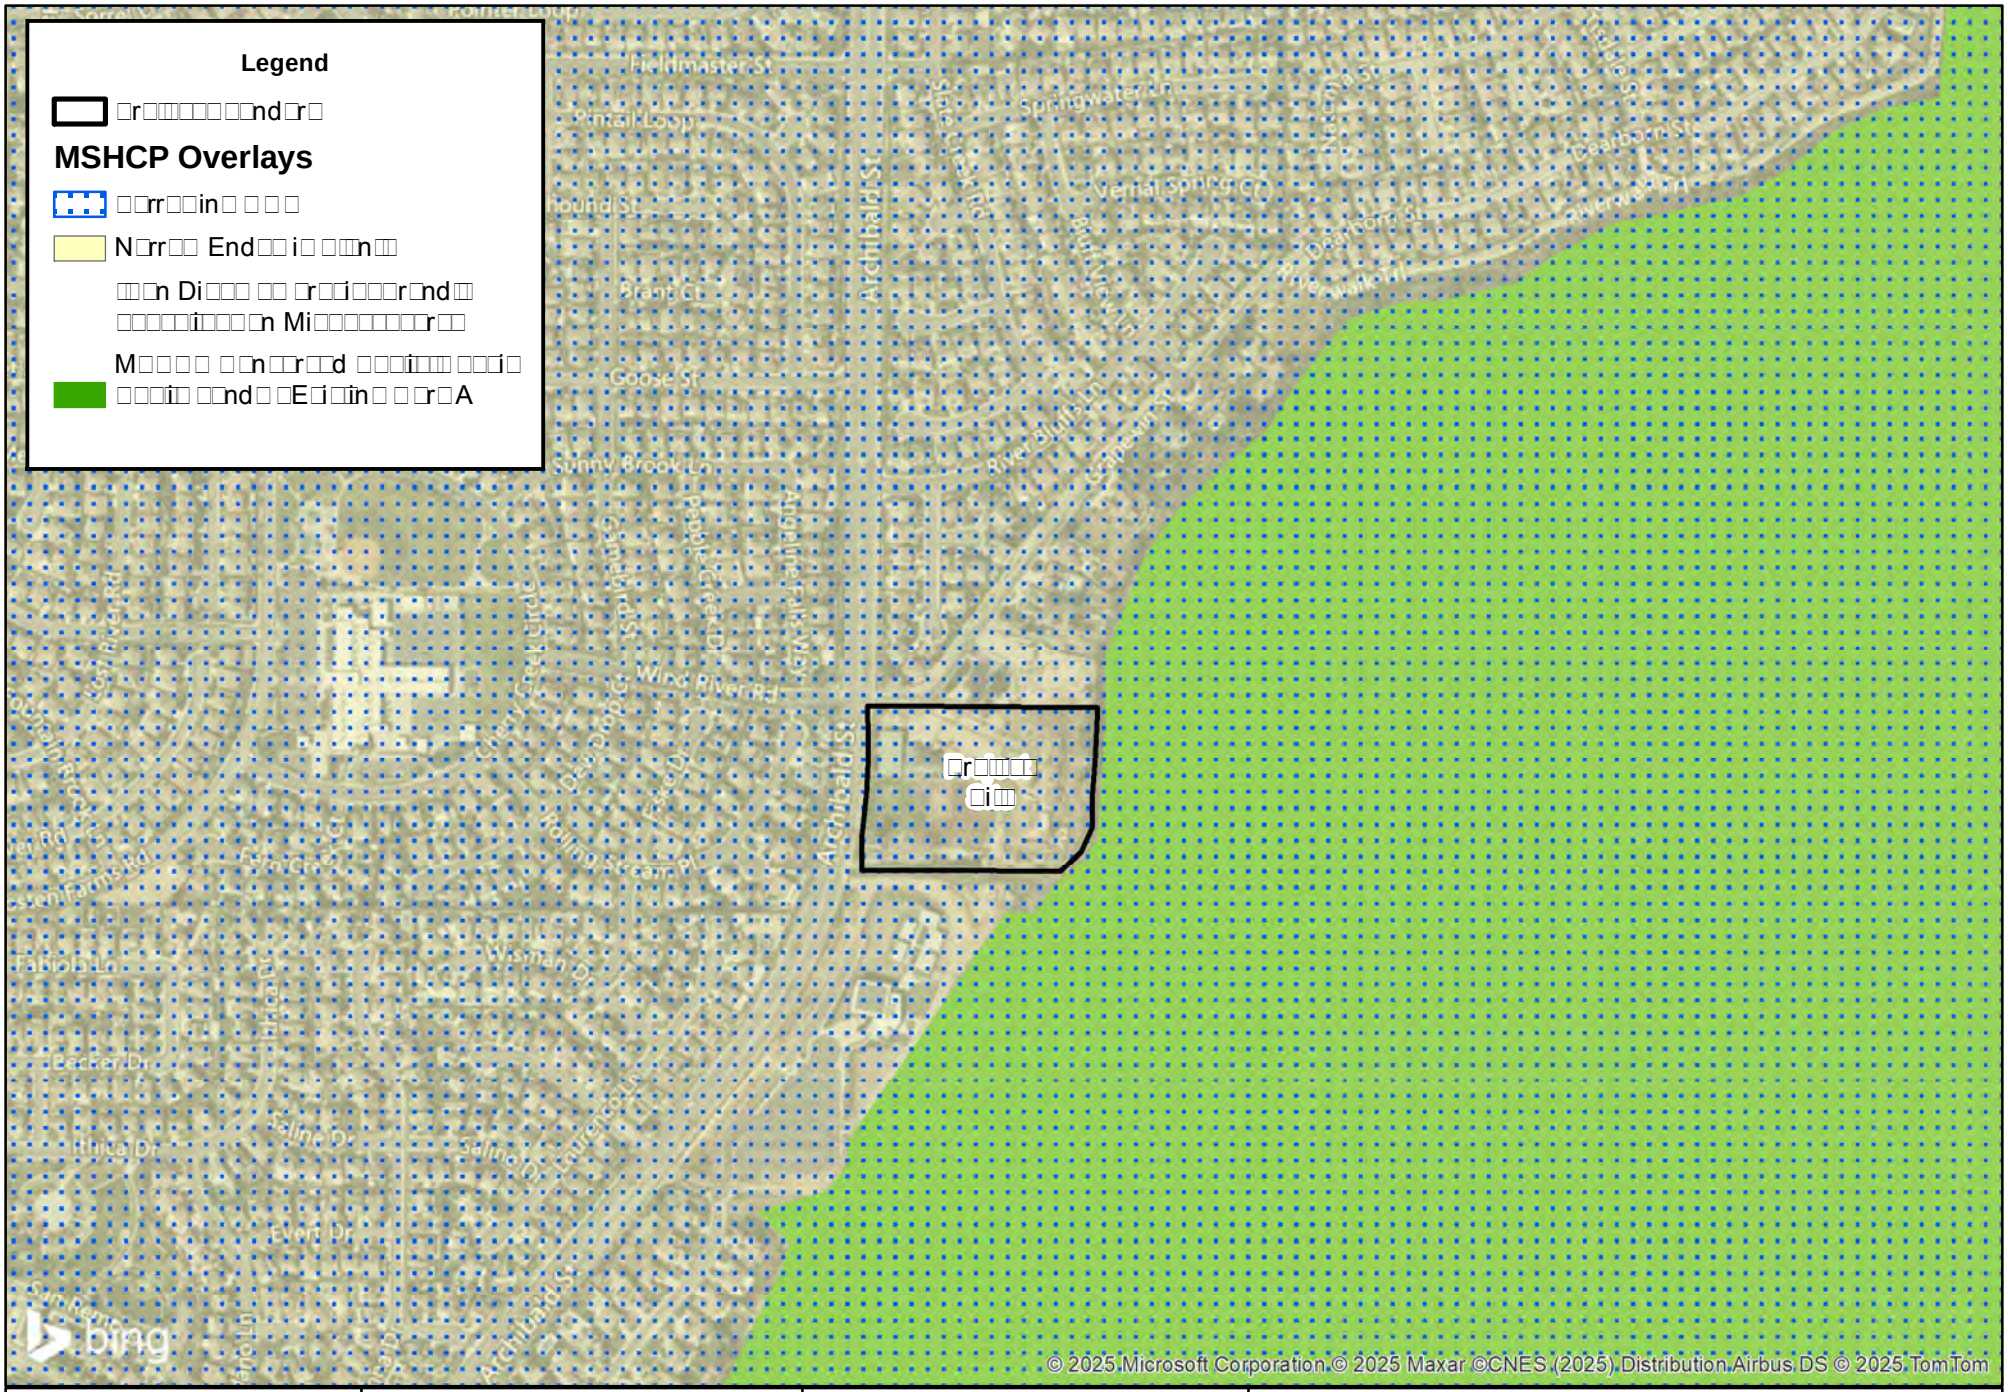
4.3.1 Section 6.1.2 Riparian/Riverine Areas and Vernal Pools

Volume I, Section 6.1.2 of the MSHCP describes the process through which protection of riparian/riverine areas and vernal pools would occur within the MSHCP Plan Area. The purpose is to ensure that the biological functions and values of these areas throughout the MSHCP Conservation Area are maintained. The MSHCP requires that as projects are proposed within the overall Plan Area, the effect of those projects on riparian/riverine areas and vernal pools must be addressed. The Study Area was evaluated for the presence/absence of MSHCP riparian/riverine areas and vernal pools. With respect to riparian habitat, the Study Area was evaluated for the potential habitat to support the special status species including the least Bell's vireo (*Vireo bellii pusillus*), southwestern willow flycatcher (*Empidonax traillii traillii*), the western yellow-billed cuckoo (*Coccyzus americanus occidentalis*), listed fairy shrimp, and other species identified in Section 6.1.2 of the MSHCP.

The Project site was evaluated to determine the limits of MSHCP riparian/riverine areas and vernal pools. Suspected areas were field checked for the presence of definable channels and/or wetland vegetation, soils and hydrology. Any MSHCP feature limits were recorded onto a 200-scale (1" = 200') color aerial photograph and a GPS unit paired with the ARCGIS Collector Application.

4.3.2 MSHCP Section 6.1.3 Narrow Endemic Plant

The Project site falls within Narrow Endemic Plants (Survey Area Number 7). The CNDDB and MSHCP were reviewed to determine known occurrences of special- status plants in the region. Based on this information, a list of target plants (including their suitable habitats and soil) was developed and incorporated into a survey program to achieve the following goals: (1) characterize the vegetation associations and land use; (2) prepare a detailed floral compendium; and (3) document the distribution and abundance of any special-status plant species within the Project site.



General surveys were conducted to identify potential sensitive plant habitats, and to establish the accuracy of the data identified from the literature review and previous biological assessment and search. An aerial photograph and topographic map were used to determine the community types and other physical features that may support sensitive species or communities within the Project site and surrounding buffer area. The reconnaissance surveys also considered the guidelines adopted by CNPS and CDFW (Nelson 1984, CNPS 2001).

Where potentially suitable habitat was present, focused plant surveys included those MSCHP Covered Species identified by the NEPSSA Survey Area Number 7. For any locations with positive survey results, the MSHCP requires that 90 percent of those portions of the property that provide for long-term conservation value for the identified species shall be avoided until it is demonstrated that conservation goals for the particular species are met. Findings of equivalency shall be made demonstrating that the 90-percent standard has been met.

4.3.3 Section 6.3.2 Burrowing Owl Habitat Assessment

Prior to the field survey, available literature and databases including the CNDDB, were reviewed to identify sensitive habitats and special status wildlife species, including BUOW in the vicinity of the Study Area. Consistent with the MSHCP Survey Instructions, pedestrian survey transects within the Project site were spaced approximately 10 to 15 meters apart to allow 100 percent visual coverage of the ground surface.

Consistent with the MSHCP guidelines and where feasible, CSLS biologists walked the perimeter of the property, which consists of a 150-meter (approximately 500 feet) buffer zone around the Project boundary. Parcels of land that could not be accessed (e.g. private property) were viewed using binoculars from vantage points to survey for BUOW activity or signs thereof, as well as other nesting bird activity.

SEC Archibald and Grapewin Project

1689

FIGURE 6

4.4 Jurisdictional Waters

The following sources were reviewed to determine the potential presence or absence of jurisdictional streams/drainages, wetlands, and their location within the watersheds associated with the Study Area, and other features that might contribute to federal or state jurisdictional authority located within watersheds associated with the Study Area:

- National Wetlands Inventory (NWI) maps (USFWS 2024c). The NWI database indicates potential wetland areas based on changes in vegetation patterns as observed from satellite imagery. This database is used as a preliminary indicator of wetland habitats because the satellite data are not precise.
- Title 33 Code of Federal Register (CFR): Navigation and Navigable Waters Part 328
- USGS National Hydrography Dataset (NHD). Provides the locations of "blue-line" streams as mapped on 7.5-Minute Topographic Map coverage.
- Aerial Imagery (Google Earth©) (Google 2024).
- USGS 7.5-Minute Topographic Maps.
- Natural Resource Conservation Service (NRCS) Soil Survey.

All depressions and drainages were evaluated for the presence of jurisdictional waters and wetlands according to the Corps, RWQCB, and CDFW delineation guidelines, including connectivity or lack of connectivity to Traditional Navigable Waters. Dominant vegetation within and adjacent to the jurisdictional features within the Study Area was identified and recorded.

The Corps and the RWQCB have jurisdiction over Waters of the United States. Jurisdictional non-wetland features for the Waters of the United States are typically determined through the observation of an Ordinary High Water Mark (OHWM), which is defined as the "line on the shore established by the fluctuation of water and indicated by physical characteristics such as a clear, natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas." Projects with impacts to Waters of the United States are regulated under Sections 401 and 404 of the Clean Water Act.

To determine the presence of a jurisdictional wetland for the Waters of the United States, three indicators are required: (1) hydrophytic vegetation, (2) hydric soils, and (3) wetland hydrology. The methodology published in the *United States Army Corps of Engineers 1987 Wetland Delineation Manual* and the *Arid West Supplement* sets the standards for meeting each of the three indicators, which normally require more than 50 percent cover of dominant plant species typical of a wetland, soils exhibiting characteristics of saturation, and hydrological indicators be present. In addition, based on the 2023 ruling, Corps jurisdiction must have adjacency with relatively permanent,

standing or continuously flowing bodies of water with continuous connection to waters of the U.S.

CDFW has jurisdiction over water of the Department's interest (California Fish and Game Code §§1600 et seq.; California Code of Regulations, Title 14, §720), referred to as Waters of the State. Section 1602 of the California Fish and Game Code (FGC) applies to all rivers, streams, lakes and streambeds. CDFW defines a stream as "a body of water that flows perennially or episodically and that is defined by the area in which water currently flows, or has flowed, over a given course during the historic hydrologic course regime, and where the width of its course can reasonably be identified by physical or biological indicators" (Brady and Vyverberg 2013). Likewise, CDFW regulates jurisdictional areas of riparian habitat only to the extent that those areas are part of a stream, river, or lake as defined above. Waters of the State pertaining to Porter-Cologne in relation to RWQCB jurisdiction are defined by California Water Code Section 13050(e) as any surface or ground water within the boundaries of the state.

Prior to the field investigation, CSLS biologist reviewed historical aerial imagery and topography for the Study Area to determine the potential for perennial, intermittent, or ephemeral drainages and associated riparian resources. Generally, indicators of jurisdictional drainages on an aerial photo include vegetation and/or incised lines indicating the path of flowing water. Following the desktop research, CSLS biologists conducted an onsite field investigation. Based on the collective results of the desktop investigation and the field surveys, any observed jurisdictional features were mapped using the following parameters:

- The limits of the Corps' jurisdiction extend to the OHWM. OHWM indicators include: the observation of benches, break in bank slope, particle size distribution, sediment deposits, drift, litter, and/or change in plant community.
- The RWQCB shares the Corps' jurisdictional methodology, and the Regional Board's May 2020 wetland definition.
- CDFW's jurisdiction applies to all perennial, intermittent, and ephemeral rivers, streams, and lakes in the state. CDFW's authority also includes riparian habitat (including wetlands) supported by a river, stream, or lake regardless of the presence or absence of hydric soils and saturated soil conditions. Generally, CDFW jurisdiction is mapped to the top of bank of the stream or the extent of streambed dependent vegetation.

5.0 Results

Table 1 outlines the field surveys performed for the Project site. CSLS biologists assessed and mapped vegetation communities, jurisdictional features, identified plants, wildlife, and any habitat areas that could be suitable for special status plant species.

5.1 Vegetation Communities

The vegetation communities and habitat conditions were inspected to confirm presence and habitat quality of the vegetation found onsite. Vegetation mapping and acreages for each vegetation community is based on the observations of the field surveys, which are listed below in Table 2 and graphically depicted on Figure 7. Representative photographs of the vegetation communities can be found in Appendix A. A complete list of species observed onsite can be found in Appendix B.

The deviations from MCVII alliance categories include ruderal and disturbed/ developed communities. The deviations were made due to the lack of alliances for these communities within MCVII. The field survey analyzed the Project site and a surrounding 500-foot buffer around the Project site to determine the existing vegetation types. As shown on Figure 7, the surrounding 500-foot buffer consists primarily of developed residential and Vantage Point Church located to the north, west, and south; to the east is Santa Ana River and associated southern cottonwood willow riparian forest habitat.

Table 2. Vegetation Community Observed Onsite

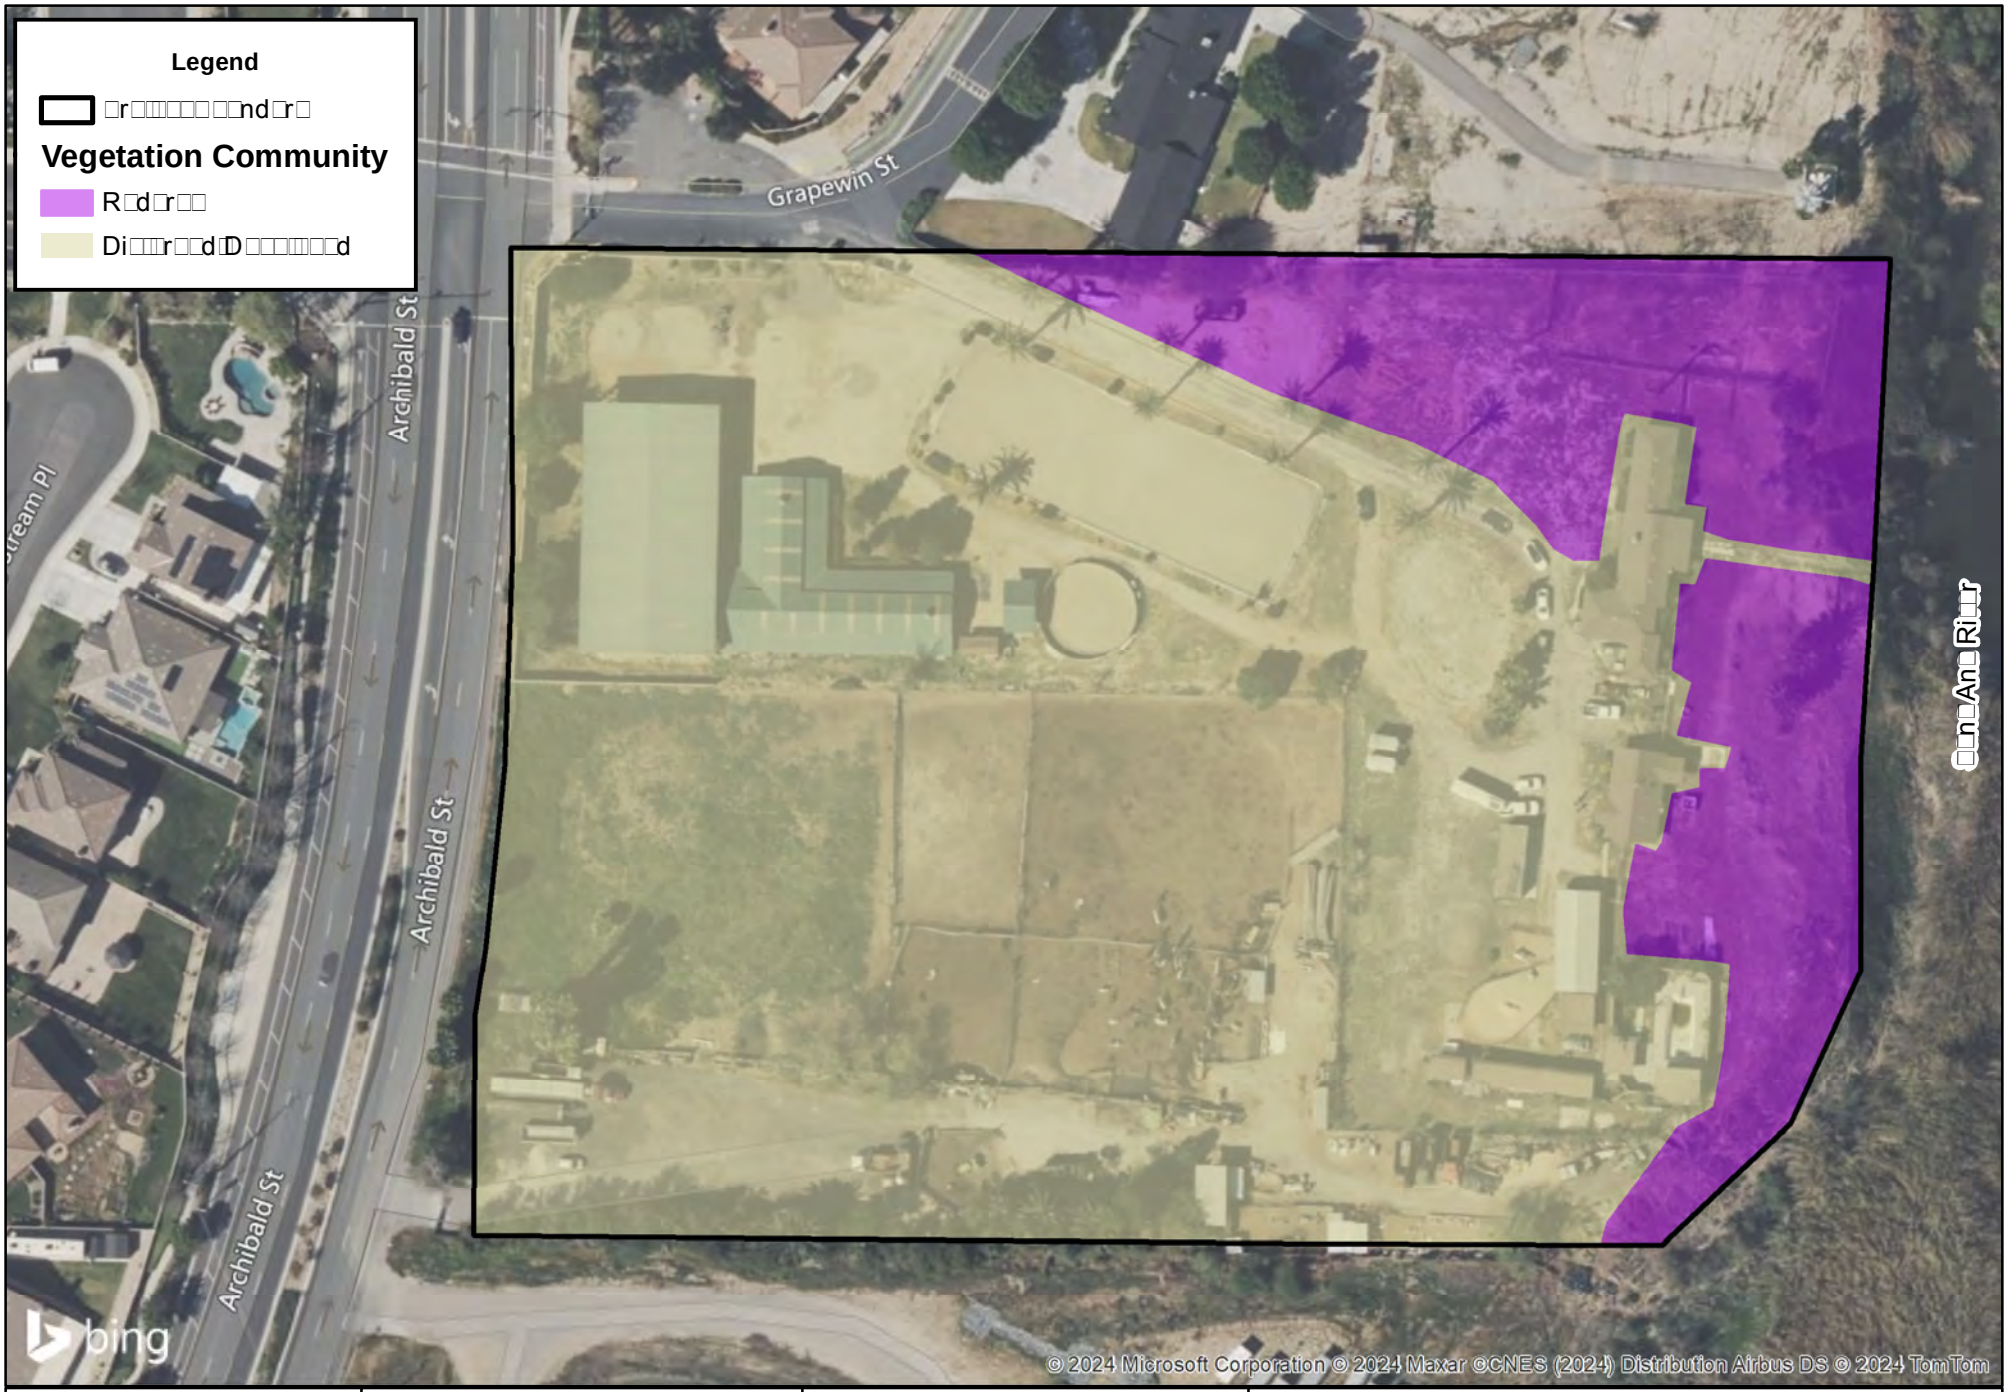
Vegetation Community	Acreage within the Project site (acres)
Ruderal	1.64
Disturbed/Developed	6.66
TOTAL	8.30

The general description of the habitat observed during the field survey are described below.

5.1.1 Ruderal

The Project site contains portions of the ruderal vegetation community. These areas are regularly mowed and maintained. The vegetation within this area is comprised of predominantly of summer mustard (*Hirschfeldia incana*). Other species include tocalote (*Centaurea melitensis*), canary island date palm (*Phoenix canariensis*), tree tobacco (*Nicotiana glauca),* wall barley (*Hordeum murinum*), cheeseweed (*Malva parviflora*), bristly ox tongue (*Helminthotheca echioides*), storksbill (*Erodium moschatum),* lemon trees (*Citrus limon*), oleander (*Nerium oleander*), prickly pear (*Opuntia littoralis),* and red brome (*Bromus rubens*).

5.1.2 Disturbed/Developed



The developed areas include animal pens, previously used equestrian corals and arena, residential homes, horse stalls, and animal pens. Ornamental species occur within this community and include Russian thistle (*Salsola australis*), horseweed (*Erigeron canadensis*), mustard, tocalote, carrotwood (*Cupaniopsis anacardioides*), pine tree (*Pinus ssp.*),a single cottonwood (*Populus fremontii),* Brazilian peppertree (*Schinus terebinthifolia*), and canary island date palm.

5.1.3 500-foot Buffer Area

Areas found to the north, west, and south of the Project are developed areas with residential homes and Vantage Point Church facility. The Santa Ana River occurs to the east and consists of arroyo thickets, open water, and southern cottonwood willow riparian forest.

5.2 Special-Status Vegetation Types

A CNDDB search within the *Corona North* USGS topographic quadrangle found three sensitive special status vegetation communities designated by CDFW. These include Southern California Arroyo Chub/Santa Ana Sucker Stream, Southern Cottonwood Willow Riparian Forest, and Southern Sycamore Alder Riparian Woodland. None of these habitats occur on the Project site.

SEC Archibald and Grapewin Project

FIGURE 7

5.3 Plants

Sensitive plants include those listed, or candidates for listing, by the USFWS and CDFW; and species considered sensitive by the CNPS (particularly Lists 1A, 1B, and 2). Several sensitive plant species were reported in the vicinity of the Study Area based on the CNDDB and within the Corona North quadrangle search. A total of four sensitive listed plant species occurs within the USGS 7.5' Corona North quadrangle and a single sensitive listed species was identified through IPaC. A brief description of the species is included below. A complete list of special status plant species found within the Corona North quad and surrounding 8 quads with the potential to occur on the Project site were analyzed based on distribution, habitat requirements, and existing site conditions (Appendix C). All plant species observed within the Project site during the field survey is listed in Appendix B.

Chaparral sand-verbena (*Abronia villosa var. aurita*)

Status: California Rare Plant Rank 1B.1
Habitat(s): Annual herb of sandy areas in chaparral and coastal sage scrub. Known from 80 to 1,600 meters (300 to 5,300 feet) MSL. Blooms January through August.
Status onsite: None. The Project site lacks suitable habitat. Not observed during the field visits.

Thread-leaved Brodiaea (*Brodiaea filifolia*)

Status: Federally Threatened, State Endangered, California Rare Plant Rank 1B.1
Habitat(s): Habitats include chaparral (openings), cismontane woodland, coastl scrub, playas, valley and foothill grasslands, and vernals pools often with clay soils. Known from 25 to 1,120 meters (80 to 3,675 feet) MSL. Blooms March through June.
Status onsite: None. The Project site lacks suitable habitat and soils. Not observed during the field visits.

Smooth Tarplant (*Centromadia pungens ssp. laevis)*

Status: California Rare Plant Rank 1B.1
Habitat(s): Habitats supporting chenopod scrub, meadows and seeps, playas, riparian woodland, and valley and foothill grasslands with alkaline soils. Known from 0 to 640 meters (0 to 2,100 feet) MSL. Blooms April through September.
Status onsite: None. The Project site lacks suitable habitat. Not observed during the field visits.

Many-stemmed dudleya (*Dudleya multicaulis)*

Status: California Rare Plant Rank 1B.2
Habitat(s): Habitats supporting chaparral, coastal scrub, and valley and foothill grasslands. Often found on clay soils or granitic outcrops. Known from below 800 meters (< 2,600 feet) MSL. Blooms May through July.
Status onsite: None. The Project site lacks suitable habitat. Not observed during the field visits.

Santa Ana River Woollystar (*Eriastrum densifolium ssp. sanctorum)*
Status: Federally Endangered, State Endangered, California Rare Plant Rank 1B.1
Habitat(s): Habitats supporting sandy soils of floodplains and terraced fluvial deposits of the Santa Ana River and larger tributaries. Known from 120 to 625 meters (400 to 4,100 feet) MSL. Blooms June through September.
Status onsite: None. The Project site lacks suitable habitat. Not observed during the field visits.

As determined through the field surveys and focused plant surveys conducted, no special status plant species were observed within the Project site. There is no potential for special status plant species to occur on the Project site due to lack of suitable habitat and soils.

5.4 Critical Habitat

The USFWS's online service for information regarding Threatened and Endangered Species Final Critical Habitat designation within California was reviewed to determine if the Project site is within any species designated Critical Habitat. The eastern portion of the Project site contains 2.25 of Least Bell's vireo least Bell's vireo (*Vireo bellii pusillus* [LBV]) designated Critical Habitat (Figure 6). The Project site does not contain any constituent elements either the physical and biological features needed for life processes and successful reproduction of the listed species. Approximately 40-feet north and east of the Project site is designated critical habitat for the southwestern willow flycatcher (*Empidonax traillii extimus*) and Santa Ana Sucker (*Catostomus santaanae*). The Santa Ana River, located offsite and to the east of the Project site includes suitable habitat for the three listed species and is identified as having past occurrences of the species. The Project site lack suitable habitat for the three species.

5.5 Wildlife

Special status wildlife species with the potential to occur within the Study Area were analyzed based on the species identified in USGS 7.5' Corona North quadrangle, distribution, habitat requirements, and existing site conditions (Appendix D). The following special status species are identified to occur within the Corona North quadrangle and noted as an occurrence within the 2-mile CNDDB search: southwestern pond turtle (*Actinemys pallida*), tricolored blackbird (*Agelaius tricolor*), southern California rufous-crowned sparrow (*Aimophila ruficeps canescens*), southern California legless lizard (*Anniella stebbinsi*), Bell's sparrow (*Artemisiospiza belli belli*), orange-throated whiptail (*Aspidoscelis hyperythra*), burrowing owl (*Athene cunicularia*), Crotch's bumble bee (*Bombus crotchii*), Swainson's hawk (*Buteo swainsoni*), Santa Ana sucker (*Catostomus santaanae*), western yellow-billed cuckoo (*Coccyzus americanus occidentalis*), San Diego banded gecko (*Coleonyx variegatus abbotti*), yellow rail (*Coturnicops noveboracensis*), red-diamond rattlesnake (*Crotalus ruber*), monarch butterfly (*Danaus plexippus*), Stephen's kangaroo rat (*Dipodomys stephensi*), southwestern willow flycatcher (*Empidonax traillii extimus*), western mastiff bat (*Eumops*

perotis californicus), arroyo chub (*Gila orcuttii*), yellow-breasted chat (*Icteria virens*), western yellow bat (*Lasiurus xanthinus*), California black rail (*Laterallus jamaicensis coturniculus*), pocketed free-tailed bat (*Nyctinomops ferorosaccus*), steelhead-southern California DPS (*Oncorhynchus mykiss irideus pop. 10*), coast horned lizard (*Phrynosoma blainvillii*), coastal California gnatcatcher (*Polioptila californica californica*), yellow warbler (*Setophaga petechia*), western spadefoot (*Spea hammondii*), least Bell's vireo (*Vireo belli pusillus*). A brief description of those species and their habitat is included below. A complete list of the special status species identified within the 9 quadrangles can be found in Appendix D.

Southwestern pond turtle
Status: Species of Special Concern
MSHCP: Covered
Habitat(s): Found in ponds, lakes, rivers, streams, creeks, marshes, and irrigation ditches, with abundant vegetation, and either rocky or muddy bottoms, in woodland, forest, and grassland. In streams, prefers pools to shallower areas. Logs, rocks, cattail mats, and exposed banks are required for basking. May enter brackish water and even seawater.
Status onsite: None. The site lacks suitable habitat. Not observed during field surveys.

Tricolor blackbird
Status: State Threatened
MSHCP: Covered
Habitat(s): Colonies require nearby water, a suitable nesting substrate, and open-range foraging habitat composed of grassland, woodland, or agricultural cropland.
Status onsite: Low. Suitable foraging habitat including ruderal habitat occurs on site and suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site. Not observed during field surveys.

Southern California rufous-crowned sparrow
Status: Watch List
MSHCP: Covered
Habitat(s): They are found on grass-covered hillsides, coastal sage scrub, and chaparral and often occur near the edges of the denser scrub and chaparral associations. Preference is shown for tracts of California sagebrush. Optimal habitat consists of sparse, low brush or grass, hilly slopes preferably interspersed with boulders and outcrops. The species may occur on steep grassy slopes without shrubs if rock outcrops are present. It is a very secretive species.
Status onsite: Present. Species was heard audibly during one of the field surveys. Species is a covered MSHCP species.

Southern California legless lizard
Status: Species of Special Concern
MSHCP: Not Covered

Habitat(s): Coastal sand dunes and a variety of interior habitats, including sandy washes and alluvial fans.
Status onsite: None. The site lacks suitable habitat and soil. Not observed during field surveys.

Bell's sparrow
Status: Watch List
MSHCP: Covered
Habitat(s): Suitable habitat includes Chaparral and coastal sage scrub along the coastal lowlands, inland valleys and in the lower foothills of local mountains.
Status onsite: None. The site lacks suitable habitat for foraging and nesting. Not observed during field surveys.

Orange-Throated Whiptail
Status: Watch List
MSHCP: Covered
Habitat(s): The species is generally found in semi-arid brushy areas typically with loose soil and rocks, including washes, stream sides, rocky hillsides, and coastal chaparral. Habitat types include low elevational chaparral, non-native grassland, (Riversidean) coastal sage scrub, juniper woodland and oak woodland. Associations include alluvial fan scrub and riparian areas. Friable soil appears to be a necessary requirement for excavating burrows and hiding eggs.
Status onsite: None. The site lacks suitable habitat and soil. Not observed during field surveys.

Burrowing Owl
Status: State Candidate Endangered
MSHCP: Covered
Habitat(s): Burrowing owls are a year-round resident of California including habitats of open, dry grassland, and desert. They are generally restricted to mostly flat, open country with suitable nest sites. They use rodent or other burrows for roosting and nesting cover and acquire their burrows from either abandonment or eviction. Burrowing owls typically hunt from a perch.
Status onsite: None. A habitat assessment and a series of focused surveys were performed, and it was determined the Project site does not contain occupied burrows or diagnostic signs of burrowing owls. Therefore, the Project site is not occupied by burrowing owl. The results of the burrowing owl habitat and focused surveys can be found in **Appendix E**. Not observed during the field surveys.

Crotch Bumble Bee
Status: State Candidate Endangered
MSHCP: Not Covered
Habitat(s): The crotch bumble bee inhabits open grassland and scrub habitats. This species occurs primarily in California, including the Mediterranean region, Pacific Coast,

Western Desert, Great Valley, and adjacent foothills through most of southwestern California. Crotch Bumble Bee is a generalist forager and visits a variety of flowering plants. It is a short-tongued bumble bee and is therefore best suited to forage on open flowers with short corollas. Plant families most commonly associated with Crotch bumble bee records in California include *Fabaceae, Apocynaceae, Asteraceae, Lamiaceae, Hydrophyllacae, Asclepiadaceae,* and *Boraginaceae*. Other reports commonly associate Crotch bumble bee with plants in the genera *Asclepias, Chaenactis, Lupinus, Medicago, Phacelia, and Salvia* as nectaring sources.
Status onsite: None. The Project site lacks suitable nectaring sources for the species. While burrows occur onsite that could potentially provide overwintering possibilities, the burrows were actively used by small mammals. Furthermore, the site is disturbed with active animal pens and regular activity. No suitable habitat is found within the Project site. Not observed during the field surveys.

Swainson's hawk
Status: State Threatened
MSHCP: Covered
Habitat(s): Swainson's hawks require large, open areas with abundant prey in association with suitable nest trees. Suitable foraging areas include native grasslands or lightly grazed pastures and croplands, open deserts, sparse shrub lands. Swainson's hawks often nest peripherally to riparian systems of the valley, as well as utilizing lone trees or groves of trees, such as oaks, cottonwoods, walnuts and willows, adjacent to their hunting areas. In the Great Basin, they typically nest in juniper trees of juniper-sage flats not near riparian zones.
Status onsite: None. While the Project site includes ruderal habitat, it is routinely maintained for minimal vegetation cover and does not provide suitable foraging habitat. No suitable habitat is found within the Project site. The adjacent Santa Ana River, located offsite and to the east of the Project site, could provide potential nesting habitat for the species. Not observed during the field surveys.

Santa Ana Sucker
Status: Federally Threatened
MSHCP: Covered
Habitat(s): Santa Ana suckers rely on perennial flows with suitable water quality and substrate to support breeding, feeding and sheltering. Over different life history stages, suckers depend on a variety of coarse substrate types, such as gravel, cobble, or mixtures of gravel or cobble with sand, and a variety of riverine features, like shallow riffles and deeper runs and pools.
Status onsite: None. No suitable habitat is found within the Project site. Not observed during the field surveys.

Western Yellow-billed Cuckoo
Status: Federally Threatened, State Endangered
MSHCP: Covered

Habitat(s): This species is an uncommon to rare summer resident of valley foothill and desert riparian habitats in scattered locations in California. Formerly much more common and widespread throughout lowland California. Roosts and nests in densely foliaged, deciduous trees and shrubs in extensive thickets, particularly willows.
Status onsite: None. The Project site does not include any thick willows suitable for nesting. However, suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site. Not observed during field surveys.

San Diego Banded Gecko
Status: Species of Special Concern
MSHCP: Covered
Habitat(s): The species ranges through most of Southern California north into the extreme southern part of Nevada and the southwestern tip of Utah, across northwest, southwest, and southeast Arizona into the bootheel of New Mexico, and south down the western edge of the state of Sonora, Mexico and down the entire length of Baja California. The species occurs in rocky areas in coastal sage and chaparral.
Status onsite: None. The site lacks suitable habitat. Not observed during the field surveys.

Yellow rail
Status: Species of Special Concern
MSHCP: Not Covered
Habitat(s): Yellow Rails occur in shallow marshes with fairly short vegetation. For breeding, taller emergent vegetation like cattails does not attract Yellow Rails, but they sometimes nest nearby, where water is shallower and vegetation shorter. They often nest among sedges and bulrushes. Because water levels change frequently in the prairies, nesting locations are not consistent in some areas from year to year. Migrating Yellow Rails turn up in wet meadows, shallow marshes, and agricultural fields with grassy cover or heavy stubble. Wintering Yellow Rails use shallow wetlands as they do in breeding areas, typically dominated by sedges, rushes, bulrushes, and grasses.
Status onsite: None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys.

Red-Diamond Rattlesnake
Status: Species of Special Concern
MSHCP: Covered
Habitat(s): It can be found from the desert, through dense chaparral in the foothills (it avoids the mountains above around 4,000 feet), to warm inland mesas and valleys, all the way to the cool ocean shore. It is most commonly associated with heavy brush with large rocks or boulders. Dense chaparral in the foothills, cactus or boulder associated coastal sage scrub, oak and pine woodlands, and desert slope scrub associations are known to carry populations of the northern red-diamond rattlesnake, however, chamise and red shank associations may offer better structural habitat for refuges and food

resources for this species than other habitats. They need rodent burrows, cracks in rocks or surface cover objects.
Status onsite: Low. Limited habitat is found onsite due to the presence of rodent burrows and ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Not observed during field surveys.

Monarch Butterfly
Status: Proposed Federally Threatened
MSHCP: Not Covered
Habitat(s): Monarch butterflies live mainly in prairies, meadows, grasslands and along roadsides, across most of North America. The adult butterfly drinks nectar from a variety of flowers, uncoiling and extending its long proboscis to sip food. During the breeding season, monarchs lay their eggs on their obligate milkweed host plant, and larvae emerge after two to five days. Larvae develop through five larval instars (intervals between molts) over a period of 9 to 18 days, feeding on milkweed and sequestering toxic chemicals (cardenolides) as a defense against predators. The larva then pupates into a chrysalis before emerging 6 to 14 days later as an adult butterfly. There are multiple generations of monarchs produced during the breeding season, with most adult butterflies living approximately two to five weeks; overwintering adults enter into reproductive diapause (suspended reproduction) and live six to nine months. In many regions where monarchs are present, monarchs breed year-round. Overwintering occurs in areas of moderate temperatures and are often include groves of trees, such as eucalyptus, Monterey pines, and Monterey cypresses.
Status onsite: None. No milkweed is identified on the Project site which is an obligate host plant for eggs and food source for larvae. The Project site lack suitable habitat for the stages of the monarch, for both breeding and overwintering. This is not a covered species within the MSHCP. Not observed during field surveys.

Stephen's kangaroo rat
Status: Federally Endangered, State Threatened
MSHCP: Covered
Habitat(s): This species prefers large areas of disturbed or patchy annual and perennial grasslands and open coastal sage scrub. Preferred perennials plant species include buckwheat and chamise and preferred annual plant species include brome grass.
Status onsite: Low. Limited habitat is found onsite due to the presence of rodent burrows and ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Not observed during field surveys.

Southwestern Willow Flycatcher
Status: Federally Endangered, State Endangered
MSHCP: Covered

Habitat(s): Suitable habitat includes riparian woodlands along streams and rivers with mature dense thickets of trees and shrubs.
Status onsite: None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys.

Western Mastiff Bat
Status: Species of Special Concern
MSHCP: Not Covered
Habitat(s): Western mastiff bats are found in a variety of habitats, such as semi-arid to arid habitats, including conifer and deciduous woodlands, coastal scrub, annual and perennial grasslands, palm oases, chaparral, desert scrub, and urban, but the species' distribution may be geomorphically determined, occurring primarily where there are significant rock features offering suitable roosting habitat. A cliff dwelling species, where maternity colonies of 30 to several hundred roost generally under exfoliating rock slabs and rock crevices along cliffs. Western mastiff bats can also be found in similar crevices in large boulders and buildings. When roosting in rock crevices they require a sizable drop from their roost in order to achieve flight. Western mastiff bats prefer deep crevices that are at least 15 or 20 feet above the ground. Foraging is concentrated around bodies of water but also includes coastal sage scrub, chaparral, and grassland habitats.
Status onsite: None. The site lacks suitable roosting habitat for the species. Not observed during the field surveys.

Arroyo Chub
Status: Species of Special Concern
MSHCP: Covered
Habitat(s): Arroyo chub are adapted to survive in cool to warm (10 – 24°C) streams that fluctuate between large winter storm flows, and low summer flows, and the low dissolved oxygen and wide temperature fluctuations associated with this flow regime. They are most common in slow flowing or backwater areas with sand or mud substrate but may also inhabit areas with velocities in excess of 80 cm/s over coarse substrate.
Status onsite: None. The site lacks suitable habitat. Not observed during the field surveys.

Yellow-breasted Chat
Status: Species of Special Concern
MSHCP: Not Covered
Habitat(s): In southern California they are primarily found in tall, dense, relatively wide riparian woodlands and thickets of willows, vine tangles, and dense brush with well-developed understories. Nesting areas are associated with streams, swampy ground, and the borders of small ponds. Breeding habitat must be dense to provide shade and concealment. It winters south to Central America.

Status onsite: None onsite; heard audibly in the Santa Ana River located offsite. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. This species was heard audibly during the field surveys within the Santa Ana River, which is densely vegetated with riparian habitat. Biologists heard this species within the Santa Ana River corridor while surveying the eastern portion of the Project site. Not observed onsite during the field surveys.

Western Yellow Bat
Status: Species of Special Concern
MSHCP: Not Covered
Habitat(s): Roost in trees, hanging from the underside of a leaf. Commonly found in the southwestern U.S. roosting in the skirt of dead fronds in both native and non- native palm trees and have also been documented roosting in cottonwood trees.
Status onsite: None. The site contains a single palm tree. The closest CNDDB occurrence recorded is located 1.20 miles to the east on October 4, 1989. Furthermore, no bat guano was observed around the single palm tree during the field surveys. Therefore it is determined the site lacks suitable habitat. Not observed during the field surveys.

California Black Rail
Status: State Threatened
MSHCP: Not Covered
Habitat(s): Black Rails nest in marshes and wet meadows across North America, including riparian marshes, coastal prairies, saltmarshes, and impounded wetlands. All of the habitats have stable shallow water. Nests are primarily made of southern cattail or spikerush and are elevated above the mud substrate in clumps of vegetation. Black rails have also been known to nest on top of a mat of dead vegetation from the previous years' growth.
Status onsite: None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys.

Pocketed Free-tailed Bat
Status: Species of Special Concern
MSHCP: Not Covered
Habitat(s): This bat species prefers rocky desert areas with high cliffs or rock outcrops. Rock crevices in cliffs are preferred as roosting sites, since the bat must drop from the roost to gain flight speed. Typically reproduces in rock crevices, caverns, or buildings. Ranges from southern California to New Mexico.
Status onsite: None. The site lacks suitable habitat. Not observed during the field surveys.

Steelhead – Southern California DPS
Status: Federally Endangered, State Candidate Endangered
MSHCP: Not Covered
Habitat(s): Historically, this species populated all coastal streams of southern California with permanent flows, as either resident or anadromous forms, or both. Today, the species occurs mostly within intermittent streams. The DPS includes all naturally spawned anadromous Coastal Rainbow trout populations downstream of natural and human-made barriers in streams from the Santa Maria River (San Luis Obispo County) to the Tijuana River on the U.S.-Mexico border. They are most abundant in the four largest watersheds in the northern portion of their range: the Santa Maria, Santa Ynez, Ventura, and Santa Clara rivers.
Status onsite: None. The site lacks suitable habitat. Not observed during the field surveys.

Coast Horned Lizard
Status: Species of Special Concern
MSHCP: Covered
Habitat(s): Occurs in a variety of vegetation types including coastal sage scrub, chaparral, annual grassland, oak woodland and riparian woodlands.
Status onsite: None. The site lacks suitable habitat. Not observed during field surveys.

Coastal California Gnatcatcher
Status: Federally Threatened, Species of Special Concern
MSHCP: Covered
Habitat(s): A non-migratory, permanent resident of coastal sage scrub habitat, which is a broad category of vegetation that includes the following plant communities: Ventura coastal sage scrub, Diegan coastal sage scrub, maritime succulent scrub, Riversidean sage scrub, Riversidean alluvial fan sage scrub, southern coastal bluff scrub, and coastal sage-chaparral scrub. They also use chaparral, grassland and riparian habitats next to coastal sage scrub, but these habitats are used dispersal and foraging. They avoid nesting on steep slopes.
Status onsite: None. The site lacks suitable habitat. Not observed during field surveys.

Yellow warbler
Status: State Threatened
MSHCP: Not Covered
Habitat(s): Riparian plant associations in close proximity to water. Frequently found nesting and foraging in willow shrubs and thickets, and in other riparian plants including cottonwoods, sycamores, ash, and alders.
Status onsite: None onsite; heard audibly in the Santa Ana River located offsite. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. This species was heard audibly during the field surveys within the Santa Ana River, which is heavily vegetated with riparian species. Biologists heard this species within the Santa

Ana River corridor while surveying the eastern portion of the Project site. Not observed onsite during the field surveys.

Western Spadefoot
Status: Species of Special Concern
MSHCP: Covered
Habitat(s): May be found in coastal sage scrub, open chaparral, pine-oak woodlands and grassland habitats, but is most common in grasslands with vernal pools or mixed grassland/coastal sage scrub areas. Within these habitats, they require rain pools/vernal pools in which to reproduce, and that persist with more than three weeks of standing water in which to metamorphose successfully. They can also breed in slow-moving streams (e.g., areas flooded by intermittent streams). Water breeding sites must lack fish, bullfrogs, and crayfish in order for to successfully reproduce and metamorphose.
Status onsite: None. The site lacks suitable habitat. Not observed during the field surveys.

Least Bell's Vireo
Status: Federally Endangered, State Endangered
MSHCP: Covered
Habitat(s): This species primarily occupies riverine riparian habitats that typically feature dense cover within 1-2 m of the ground and a dense, stratified canopy. Typically, it is associated with southern willow scrub, cottonwood-willow forest, mule fat scrub, sycamore alluvial woodland, coast live oak riparian forest, arroyo willow riparian forest, or mesquite in desert localities. It uses habitat which is limited to the immediate vicinity of water courses.
Status onsite: None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys.

Summary of Sensitive Wildlife Species
A single special status wildlife species or evidence of their presence were observed or heard during the field surveys conducted onsite. The species observed was the southern California rufous-crowned sparrow. A total of 3 species with low to moderate potential to occur onsite were not observed during field surveys. These species include Stephen's kangaroo rat, Red-diamond rattlesnake, and tricolor blackbird. Two sensitive species, the yellow-breasted chat and yellow warbler, were heard audibly during the field surveys within the Santa Ana River, which is heavily vegetated with riparian species. Biologists heard this species within the Santa Ana River corridor, located offsite, while surveying the eastern portion of the Project site. No riparian vegetation occurs onsite, therefore the Project site lacks suitable habitat for these species. The remaining 22 of the 28 sensitive wildlife species lack suitable habitat to occur within the Project site.

5.5.1 Wildlife Species Observed or Detected

Wildlife activity was moderate, and the species observed are typical urbanized species. The animal species or signs thereof observed during the CSLS surveys are listed below:

Birds:

- Chicken (*Gallus gallus domesticus*)
- Peacock (*Pavo cristatus*)
- Common yellowthroat (*Geothypis trichas*)
- Rufous-crowned sparrow (*Aimophila ruficeps*)
- Anna's hummingbird (*Calypte anna*)
- American crow (*Corvus brachyrhynchos*)
- American Kestrel (*Falco sparverius*)
- Bewick's wren (*Thryomanes bewickii*)
- Nuttall's woodpecker (*Picoides nuttallii*)
- California towhee (*Melozone crissalis*)
- California quail (*Callipepla californica*)
- Black phoebe (*Sayornis nigricans*)
- Spotted towhee (*Pipilo maculatus*)
- Northern mockingbird (*Mimus polyglottos*)
- house finch (*Haemorhous mexicanus*)
- mourning dove (*Zenaida macroura*)
- American bushtit (*Psaltriparus mimimus*)
- song sparrow (*Melospiza melodia*)
- Red-tailed hawk (*Buteo jamaicensis*)
- turkey vulture (*Cathartes aura*)
- yellow warbler (*Setophaga petechia*)
- Great horned Owl (*Bubo virginianus*)
- Barn owl (*Tyto alba*)
- Lesser goldfinch (*Spinus psaltria*)
- Song sparrow (*Melospiza melodia*)
- Yellow-breasted chat (*Icteria virens*)
- Turkey vulture (*Cathartes aura*)

Reptiles:

- western fence lizard (*Sceloporus occidentalis*)

Mammals:

- Desert cottontail (*Sylvilagus audubonii*)

5.6 Regional Connectivity/Wildlife Movement

No known wildlife corridors or linkage areas are identified in the MSHCP as a Core Linkage within the Project site. However, the Project site is adjacent to the Santa Ana River, which is designated as a wildlife corridor known as Existing Core A within the MSHCP. MSHCP Existing Core A consists of Prado Basin and the Santa Ana River and functions as a linage, connecting Orange County to the west with San Bernardino County to the north. The Existing Core A is constrained on all sides by existing urban

development and agricultural use, and planned land uses surrounding the Core exists largely of high impact land uses such as city and community development.

The Project site is characterized by exposed areas that lack suitable cover and resources that are typically associated with wildlife movement areas (i.e. water). Furthermore, the Project site is located at a substantially higher elevation than the Existing Core A of the MSHCP. The Project site includes several residential homes and fenced animal pens. Furthermore, north, west, and south of the Project is residential development and Vantage Point Church further restricting any regional movement. Therefore, the Project site is not used as a wildlife corridor, linkage, or specific travel route to and from nursery sites other important resources.

There is potential for smaller or "local" movement through the site. Movement on a smaller scale could occur within the site for species that are less restricted in movement pathway requirements or are adapted to urban areas due to the amount of development [e.g., raccoon (*Procyon lotor*), stripped skunk (*Mephitis mephitis*), and bird species in general). Habitat within the site is ruderal and disturbed/developed, which it may support some wildlife movement within the site and/or nearby areas for nesting and foraging. Common bird species may utilize the site for foraging and nesting.

In summary, the Project site supports foraging and nesting habitat for species on a local scale and is not used as a regional corridor, wildlife corridor, linkage, or specific travel route to and from nursery sites other important resources. This is due to the reason stated above, therefore, the Project site provides no function to facilitate movement for wildlife species on a regional scale.

5.7 MSHCP Assessment

The Project is located within the Eastvale Area Plan of the MSHCP; however, the Project site is not located within any MSHCP Criteria Areas, Cell Groups, or Subunits. Furthermore, the Project site is not located in survey areas for Amphibians, Mammals, or Special Linkage areas. The Project site was analyzed for MSHCP consistency for the following:

- Riparian and Riverine Areas (Section 6.1.2)
- Narrow Endemic Plant (Section 6.1.3)
- Urban Wildlands Interface Guidelines (Section 6.1.4)
- Western burrowing owl (*Athene cunicularia hypugaea*) (Section 6.3.2)

5.7.1 Section 6.1.2 Riparian Riverine

No MSHCP Riparian/Riverine features were identified onsite. The Project site contains no vernal pools as defined under MSHCP vernal pool features.

Located offsite and to the east of the Project site, within the 500-foot buffer, is the Santa Ana River that meets the definition of MSHCP Riparian and Riverine resources. The offsite Santa Ana River MSHCP Riparian/Riverine features that occur within the 500-feet surrounding the Project site is shown on Figure 8.

5.7.1.1 Species Protected under Section 6.1.2

The Project site does not contain any suitable habitat for the avian species listed in Section 6.1.2: Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools. The Santa Ana River located offsite and to the east of the Project site contains suitable habitat for Section 6.1.2 Protection of Species associated with Riparian/Riverine Area.

SEC Archibald and Grapewin Project

1709

FIGURE 8

5.7.1.2 Vernal Pools

No evidence of vernal pools, seasonal depressions, seasonally inundated road ruts or other wetland features were recorded on the Project Site. Vernal pools are depressions in areas where a hard-underground layer prevents rainwater from draining downward into the subsoils. When rain fills the pools in the winter and spring, the water collects and remains in the depressions. In the springtime, the water gradually evaporates away, until the pools became completely dry in the summer and fall. Vernal pools tend to have an impermeable layer that results in ponded water. The soil texture (the amount of sand, silt, and clay particles) typically contains higher amounts of fine silts and clays with lower percolation rates. Pools that retain water for a sufficient length of time will develop hydric cells. Hydric cells form when the soil is saturated from flooding for extended periods of time and anaerobic conditions (lacking oxygen or air) develop.

No indication of clay substrates or hydric soils were documented within the Project Site. Furthermore, a review of prior google aerials was reviewed to determine if inundated features were present during years of high rainfall when features would certainly be documented. Aerials taken in 2011 represent an ideal baseline during which known (previously documented) inundated vernal pools, seasonal depressions and road ruts can easily be seen. No sign or indication of inundation was documented within the Project Site during a review of historic aerials.

In summary, none of the conditions (i.e., no inundated depressions including road ruts, hydric soils, historic inundation, etc.) were observed on documented within the Project site. No features are present that would support fairy shrimp. No standing water or other sign of areas that pond water was observed.

5.7.2 Narrow Endemic Plant – Survey Area Number 7 (Section 6.1.3)

The Project site is located within the Narrow Endemic Plant Species Survey Area (NEPSSA) Number 7 overlay, which include the following target species:

- San Diego ambrosia (*Ambrosia pumila*)
  Status: California Rare Plant Rank 1B.1, federally endangered
  Habitat(s): Habitats supporting chaparral, coastal scrub, valley and foothill grasslands, and vernal pools. Observed in sandy loam or clay soils, sometimes alkaline soils. Known from 20 to 415 meters (65 to 1360 feet) MSL. Blooms April through October.
  Status onsite: None. The Project site lacks suitable habitat and soils. Not observed during field surveys and focused narrow endemic plant surveys.

- Brand's Star Phacelia (*Phacelia stellaris*)
  Status: California Rare Plant Rank 1B.1
  Habitat(s): Habitats supporting coastal dunes and coastal scrub Known from below 1 to 400 meters (5 to 1,310 feet) MSL. Blooms March through June.

Status onsite: None. None. The Project site lacks suitable habitat and soils. Not observed during field surveys and focused narrow endemic plant surveys.

- San Miguel Savory (*Clinopodium chandleri*)
  Status: California Rare Plant Rank 1B.2
  Habitat(s): Rocky areas in chaparral, cismontane woodland, coastal scrub, riparian woodland, and valley and foothill grassland. Soils include rocky and gabbroic substrates. Known from 120 - 1075 meters (395 - 3525 feet) MSL. Blooms March through July.
  Status onsite: None. None. The Project site lacks suitable habitat and soils. Not observed during field surveys and focused narrow endemic plant surveys.

Several rare plant surveys were conducted during the blooming periods of the identified species above. No special status plant species were observed during the focused 2024 narrow endemic plant surveys and, and none are expected to occur onsite due to the lack of suitable habitat or suitable soil found on the Project site.

5.7.3 Section 6.1.4 Urban/Wildlands Interface

The Project site is not designated as an existing or proposed MSHCP Conservation Area or Core Linkage areas. However, the Project site is adjacent to the Santa Ana River, which is designated as a wildlife corridor known as Existing Core A within the MSHCP. MSHCP Existing Core A consists of Prado Basin and the Santa Ana River and functions as a linage, connecting Orange County to the west with San Bernardino County to the north. The Existing Core A is constrained on all sides by existing urban development and agricultural use, and planned land uses surrounding the Core exists largely of high impact land uses such as city and community development.

The Project site is composed of large spans of ruderal and disturbed habitat lacking suitable cover and resources that are typically associated with wildlife movement areas (i.e. water). Furthermore, the Project site is located at a substantially higher elevation than the Existing Core A of the MSHCP. The Project site includes several residential homes and fenced animal pens. Furthermore, north, west, and south of the Project is residential development and Vantage Point Church further restricting any regional movement. Therefore, the Project site is not used as a wildlife corridor, linkage, or specific travel route to and from nursery sites other important resources.

However, due to the adjacency to Existing Core A and preserving the high-quality riparian habitat found within the Santa Ana River, the Project site would have indirect impacts due to construction noise and lighting. Therefore, the Project would adhere to the urban/wildland guidelines interface for the management of edge factors.

5.7.4 Burrowing Owl Habitat Assessment (Section 6.3.2)

Per the MSHCP BUOW Survey Instructions, a Habitat Assessment was conducted on March 28, 2024 to determine any suitable BUOW habitat onsite. Burrows were observed

onsite along the fence line as well as debris piles. Following the habitat assessment, additional focused surveys took place on June 11, June 25, July 16 and August 8, 2024 as identified within Table 1 above. The surveys were conducted during typical BUOW peak activity time and was not conducted during rain, high winds (> 20 miles per hour), dense cloud cover >75%, or extreme temperatures. Prior to the commencement of the survey, CSLS biologists scanned the Study Area using binoculars to look for burrowing owl. The Study Area was assessed for the suitability to support burrowing owls and all suitable burrows were inspected for signs of use by burrowing owls.

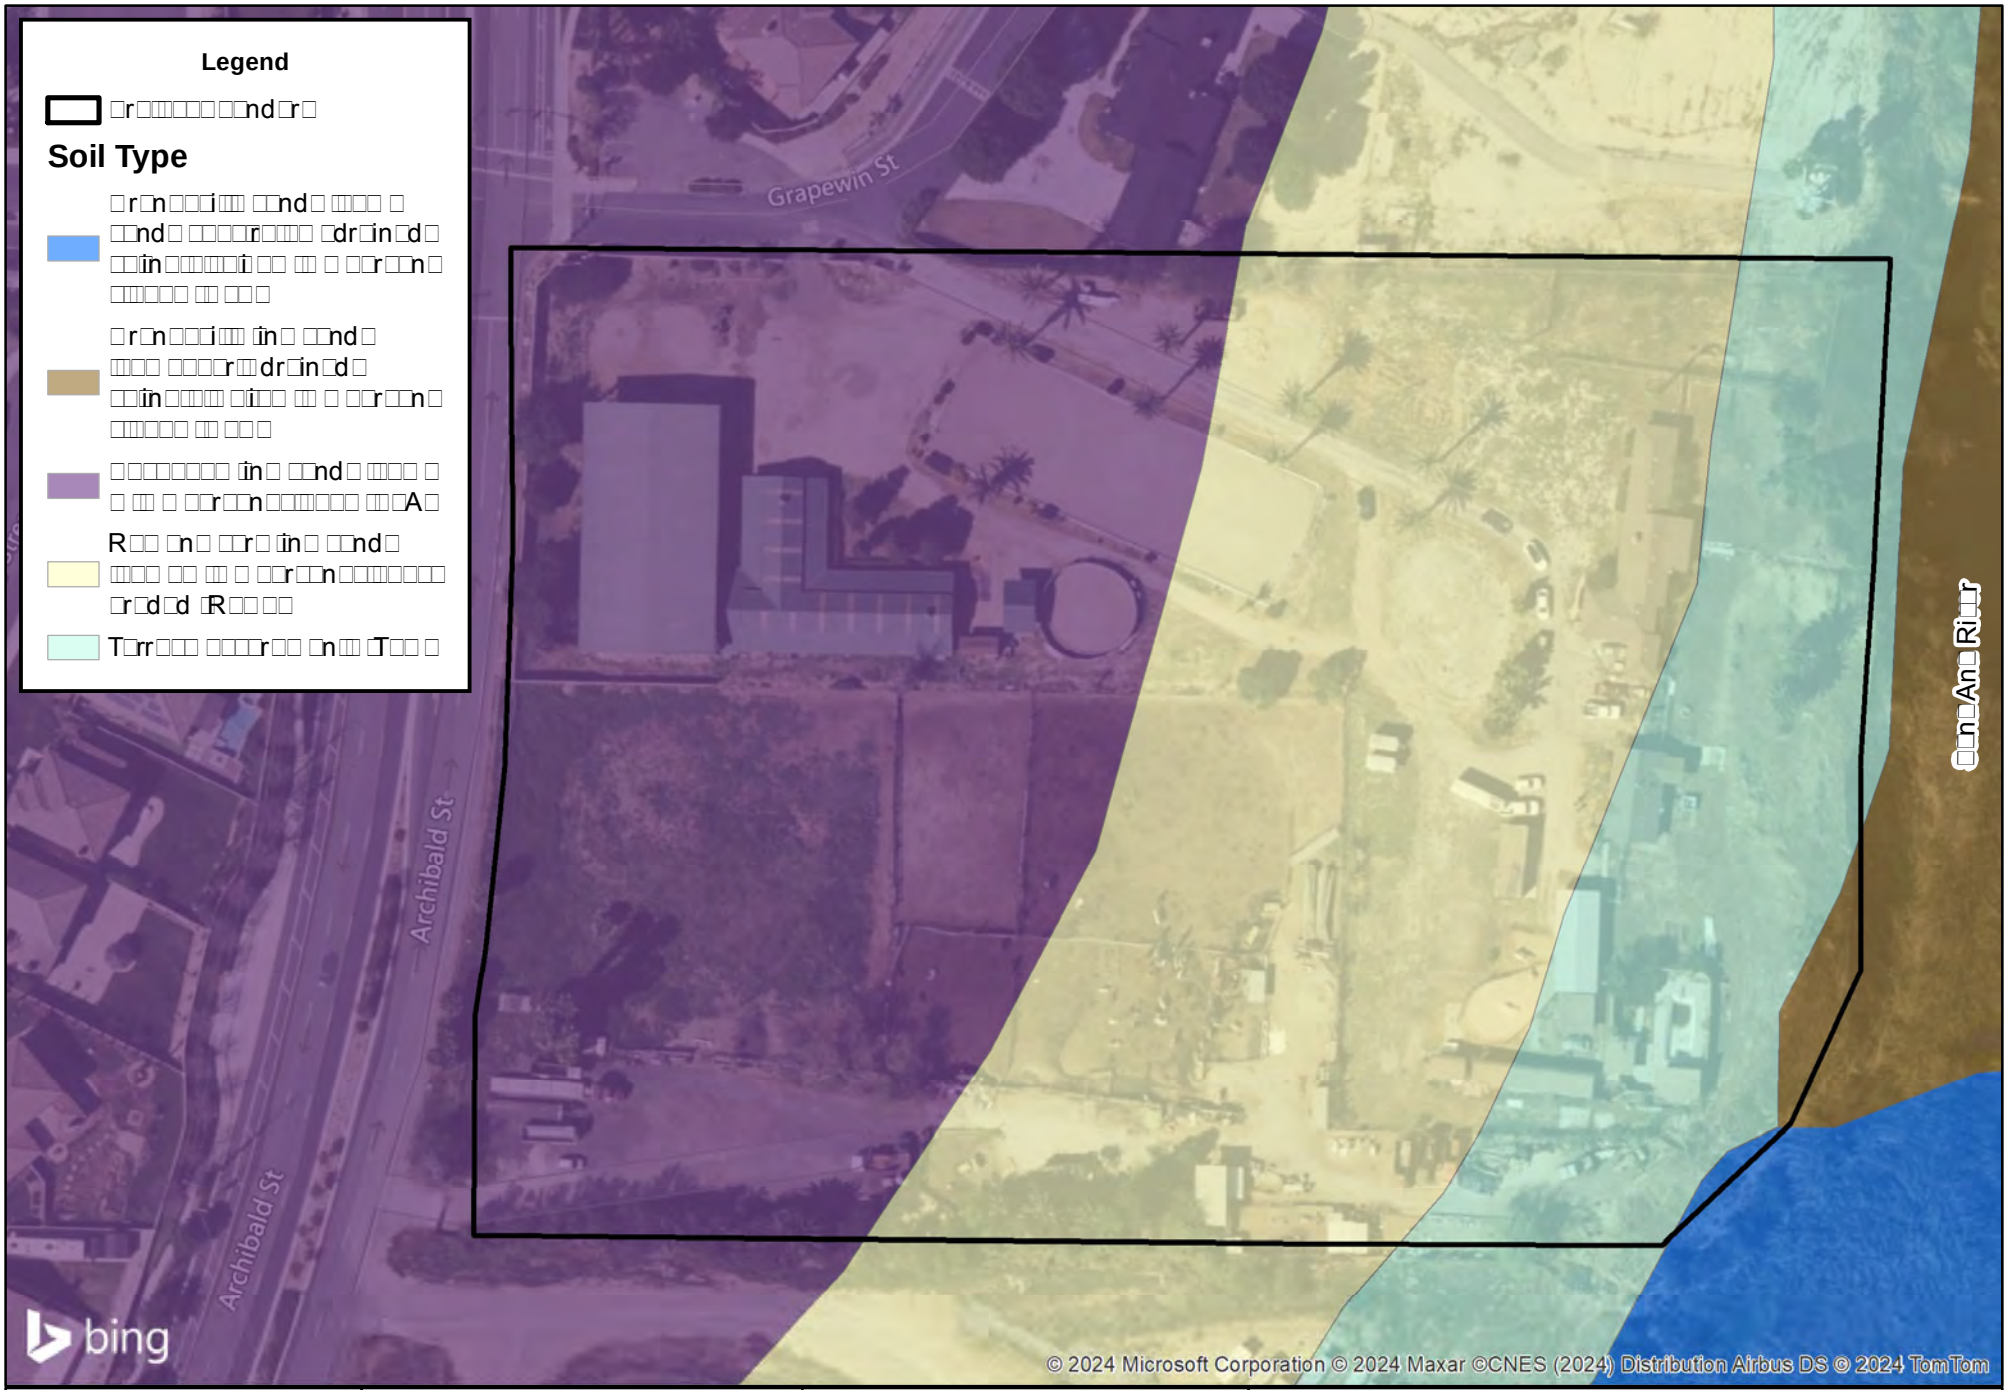
No BUOWs or evidence of BUOWs were observed on site within the Study Area during the focused surveys. A majority of the Project site is characterized by vegetated ruderal and disturbed/developed habitats and contains suitably sized burrows and satellite burrows to provide suitable nesting habitat for BUOW. Much of the buffer area is developed or consists of the Santa Ana River. California ground squirrels and their burrows were observed within the Study Area. These burrows were actively utilized by the California ground squirrels and contained no BUOW or keys signs (sight, whitewash, burrows, bones, feathers, pellets, nests, and calls). Therefore, based on the focused surveys it is determined the Project site is not occupied by BUOW. Please refer to Appendix E for the complete results for the focused surveys.

5.8 Jurisdictional Areas

5.8.1 Summary of Jurisdictional Waters

No features meeting the definitions of Waters of the State or Waters of the United States were identified onsite. The Project site contains no vernal pools, wetlands, or riparian habitat.

To the east of the Project site, within the 500-foot buffer, is the Santa Ana River that meets the definition of Waters of the State or Waters of the United states. The offsite Santa Ana River jurisdictional feature that occurs within the 500-feet surrounding the Project site is shown on Figure 8.



5.9 Soils Mapping

The United States Department of Agriculture Natural Resources Conservation Service lists five soil types (series) for the Project site (Figure 9). Please see below for the following soil type, which was used to determine the possibility for sensitive wildlife and plant species. No unique soil types as identified by the MSHCP, such as clays for vernal pools or soils for sensitive or rare plants, exist on the Project site. Furthermore, no soils that would potentially provide hydrophilic soils for vernal pools occur onsite.

The following soil types are mapped within the Study Area and shown on Figure 9:

- Grangeville sandy loam, sandy substratum, drained, saline-alkali , 0 to 5 percent slopes (GsB)

- Grangeville fine sandy loam, poorly drained, saline-alk ali, 0 to 5 percent slopes (GuB)
- Pachappa fine sandy loam, 0 to 2 percent slopes (PaA)
- Ramona very fine sandy loam, 0 to 8 percent slopes, eroded (ReC2)
- Terrace escarpments (TeG)

SEC Archibald and Grapewin Project

FIGURE 9

6.0 Threshold of Significance

Appendix G of the CEQA Guidelines is used by public agencies in determining whether a project may have a significant impact on biological resources. Under Appendix G, a project may have a significant impact on biological resources if it would:

Threshold BIO-A Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Threshold BIO-B Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Threshold BIO-C Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Threshold BIO-D Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Threshold BIO-E Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Threshold BIO-F Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

For the purposes of this impact analysis the following definitions apply:

- "Substantial adverse effect" means loss or harm of a magnitude which, based on current scientific data and knowledge would: (1) substantially reduce population numbers of a listed, candidate, sensitive, rare, or otherwise special status species; (2) substantially reduce the distribution of a sensitive plant community/habitat type; or (3) eliminate or substantially impair the functions and values of a biological resource (e.g., streams, wetlands, or woodlands) in a geographical area defined by interrelated biological components and systems. In the case of this analysis, the prescribed geographical area is considered to be the region

that includes the USGS topographic quadrangle for the site. For some species, the geographic area may extend to the vicinity of the site based on known distributions of the species.

- "Conflict" means contradiction of a magnitude, which based on foreseeable circumstances, would preclude or prevent substantial compliance.

- "Rare" means: (1) that the species exists in such small numbers throughout all, or a significant portion of, its range that it may become endangered if its environment worsens; or (2) the species is likely to become endangered within the foreseeable future throughout all or a significant portion of its range and may be considered "threatened" as that term is used in the ESA.

7.0 Significance Determination and Proposed Mitigation

7.1 Regulatory Setting

Sensitive species are provided protection by either Federal or State resource management agencies, or both, under provisions of the ESA and CESA.

There are a number of performance criteria and standard conditions that must be met as part of any review and approval of the proposed Project. These include compliance with all of the terms, provisions, and requirements with applicable laws that relate to Federal, State, and local regulating agencies related to potential impacts to sensitive plant and wildlife species, wetlands, riparian habitats, and blue lined stream courses. Impacts are sometimes locally important but not significant because, although they would result in an adverse alteration of existing local conditions, they would not substantially diminish or result in the permanent loss of an important resource on a population-wide or region-wide basis.

7.2 Project Related Impacts

For the purpose of this assessment, Project-related impacts consist of direct and indirect impacts. Direct impacts are considered to be those that involve the loss, modification or disturbance of natural habitats (i.e., vegetation or plant communities), which in turn, directly affect plant and wildlife species dependent on that habitat. Direct impacts also include the destruction of individual plants or wildlife, which is typically the case in species of no to low mobility (i.e., plants, amphibians, reptiles, and small mammals). The collective loss of individuals in these manners may also directly affect regional population numbers of a species or result in the physical isolation of populations thereby reducing genetic diversity and, hence, population stability.

Indirect impacts are considered to be those that involve the effects of increases in ambient levels of sensory stimuli (e.g., noise, light), unnatural predators (e.g., domestic cats and other non-native animals), and competitors (e.g., exotic plants, non-native animals). Indirect impacts may be associated with the construction and/or operation of a project; therefore, these impacts may be both short-term and long-term in their duration. These impacts are commonly referred to as "edge effects" and may result in changes in the behavioral patterns of wildlife and reduced wildlife diversity and abundance in habitats adjacent to project sites.

The determination of impacts in this analysis is based on the proposed Project development plan and the biological values of the habitat and/or sensitivity of plant and wildlife species to be affected. Any recommended mitigation measures to address impacts are discussed below, along with compliance of existing regulations.

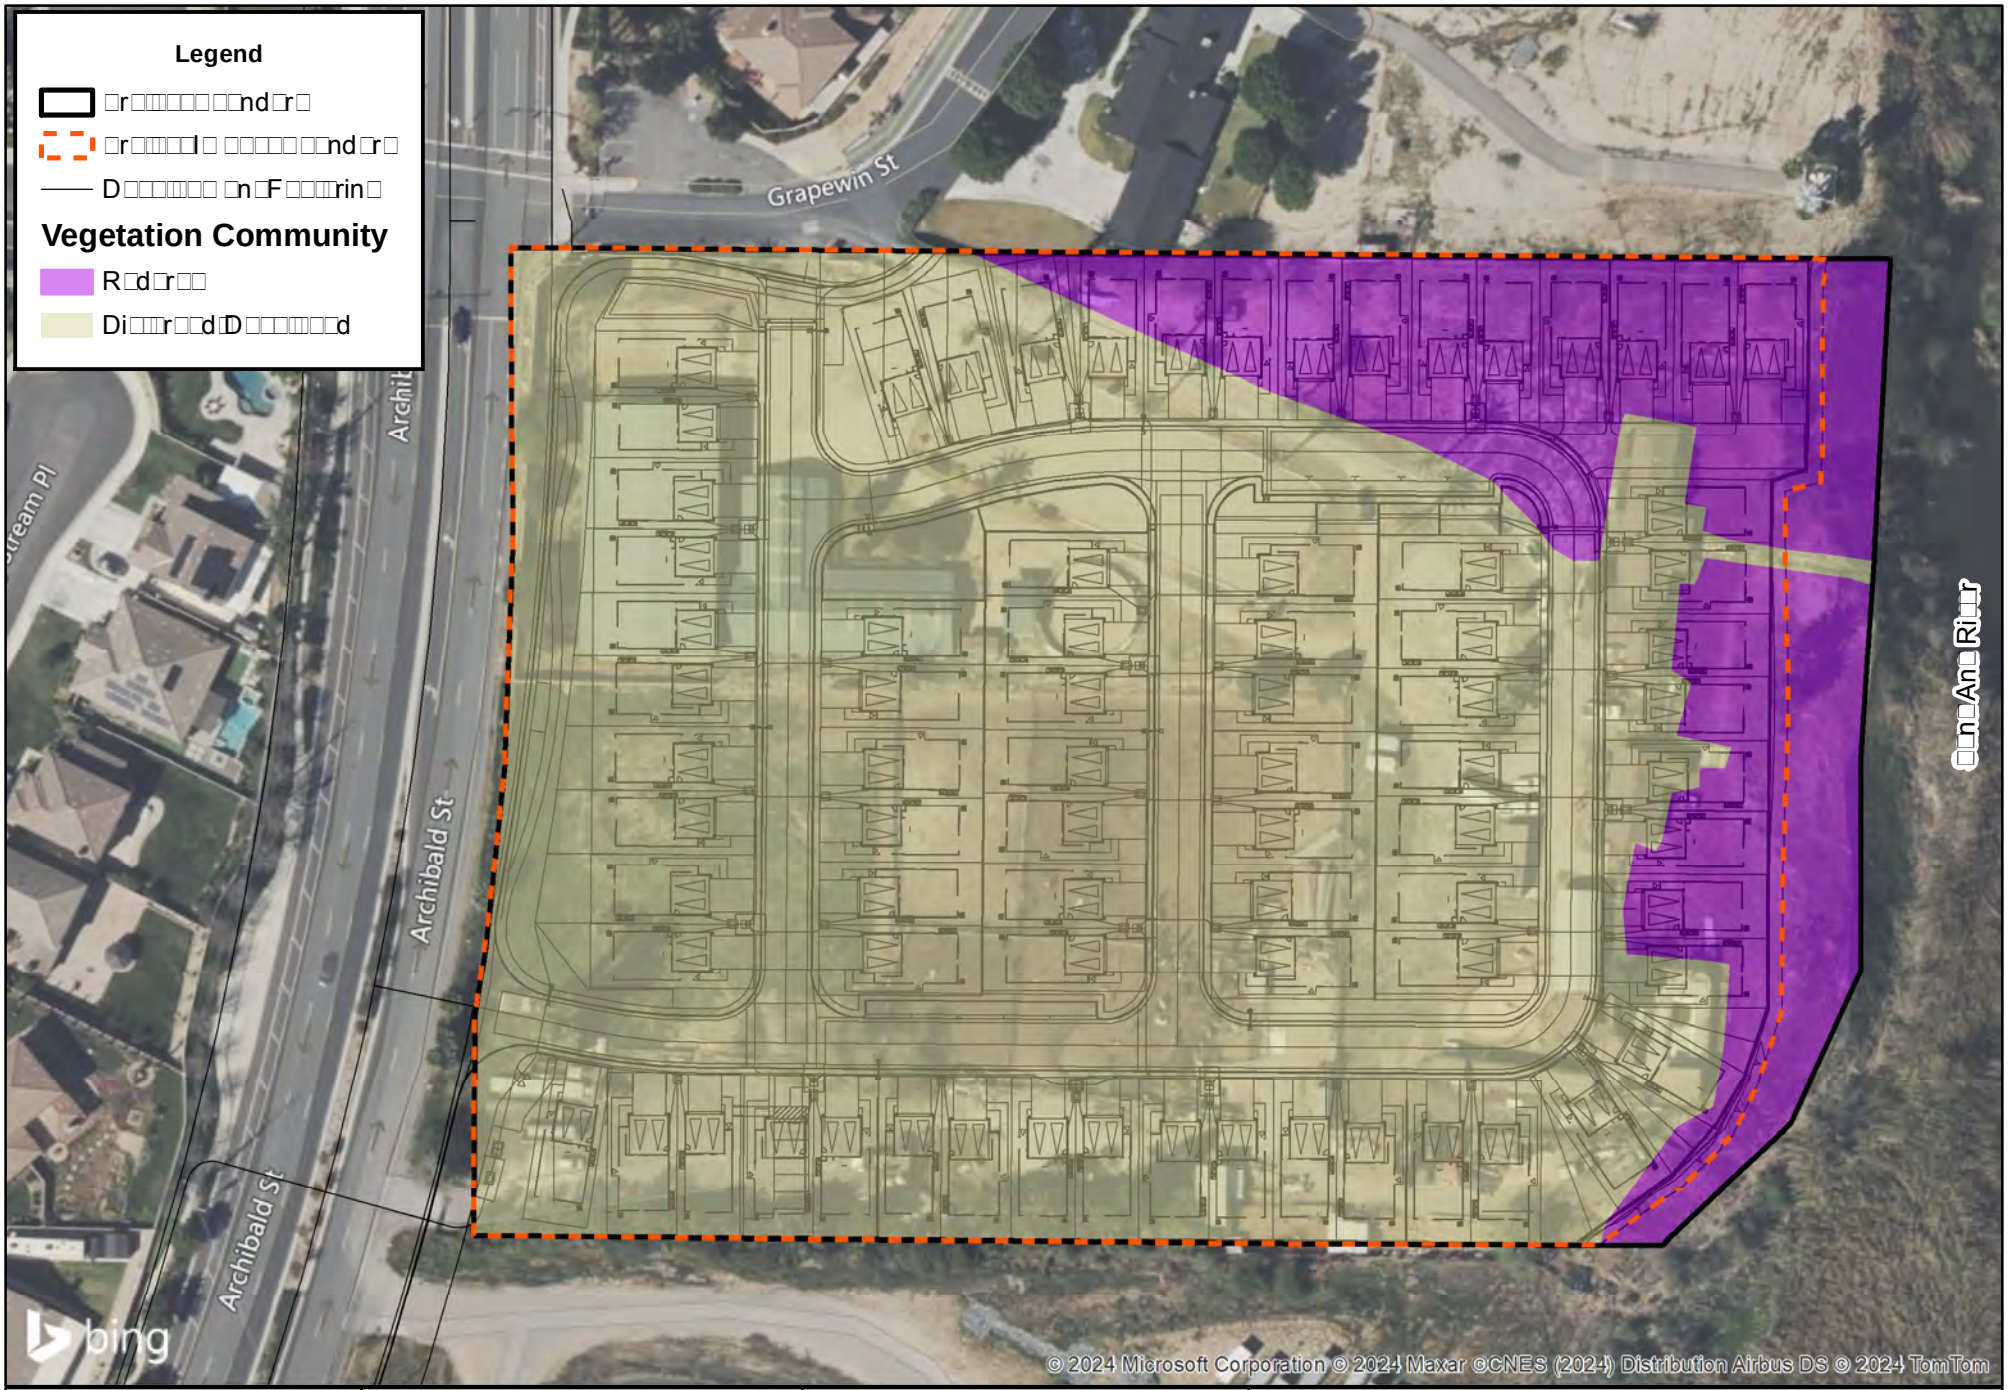
7.2.1 Impacts to Vegetation Communities

Direct impacts resulting from Project implementation consist of any ground-disturbing activities (i.e., vegetation removal, grading, paving, structures, landscaping, fuel modification zone, etc.). These areas would be permanently affected by the construction of the Project. Calculations are based on the currently proposed development design in conjunction with the vegetation map from the field survey and aerial imagery. The proposed development plan can be found on Figure 4.

Indirect temporary impacts to plant communities include the effects of fugitive dust created by grading activities, vehicle construction traffic, or offsite discharge of surface water runoff with its associated erosion and sedimentation. Grading-related dust could settle on plant surfaces and indirectly inhibit metabolic processes such as photosynthesis and respiration. Grading-related erosion, runoff, sedimentation, soil compaction, and alteration of drainage patterns may affect plants by altering site conditions so that the location in which they are growing becomes unfavorable. Another example of indirect impacts includes the introduction and spread of invasive, exotic plants which could result in permanent indirect impacts to adjacent native plant communities.

Figure 10 and Table 3 describe and list the approximate total acreages of vegetation communities that will be impacted by Project activities within the Project boundary. The Project impacts are concentrated along the western portion of the Project and avoids any direct impacts to Santa Ana River located to the east.

Table 3. Vegetation Community Impacts



Vegetation Community	Existing Vegetation (acres)	*Impacts (acres)*	Avoided (acres)
Ruderal	1.64	1.23	0.41
Disturbed/Developed	6.66	6.65	0.01
TOTAL	8.30	7.88	0.42

7.2.2 Impacts to Jurisdictional Features

Since there are no jurisdictional features that meet the definition of Waters of the US or Waters of the State located on the Project site, no features will be impacted. The Santa Ana River located to the east of the Project will not be directly impacted with the implementation of the Project.

7.2.3 MSHCP Riparian/Riverine Impacts

No features meeting the definition of MSHCP Riparian/Riverine features are located on the Project site, therefore, no features will be impacted. The Santa Ana River located to the east of the Project will not be directly impacted with the implementation of the Project.

SEC Archibald and Grapewin Project

1719

FIGURE 10

7.3 Threshold BIO - A

Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Less than Significant with Mitigation Incorporated.

7.3.1 Sensitive Plant Species

As determined through the field surveys and focused rare plant surveys conducted, no special status plant species were observed within the Project site. There is no potential for special status plant species to occur on the Project site due to lack of suitable habitat or soils with the specified habitat to support the special status plant species. Therefore, no impact would occur.

7.3.2 Sensitive Wildlife Species

Of the identified 28 sensitive wildlife species occurring within the quad, a single sensitive species was audibly heard, southern California rufous-crowned sparrow onsite. Two sensitive species, the yellow-breasted chat and yellow warbler, were heard audibly during the field surveys within the Santa Ana River, which is heavily vegetated with riparian species. Biologists heard this species within the Santa Ana River corridor, located offsite, while surveying the eastern portion of the Project site. No riparian vegetation occurs onsite, therefore the Project site lacks suitable habitat for these species. A total of 3 species have low potential to occur onsite. Those species include tricolor blackbird, red-diamond rattlesnake, and Stephen's Kangaroo Rat. All of the species are Covered MSHCP species.

Development of the Project site would result in the impact of 7.88-acres of ruderal and disturbed/developed vegetation communities, potentially causing disruption removal of habitat for red-diamond rattlesnake. Ruderal and disturbed/developed habitat is considered somewhat suitable habitat for the species causing potential adverse impacts. These are species of special concern and are MSHCP Covered Species. Mitigation Measure Bio – 1 (MM BIO-1) outlines a Biological sweep prior to vegetation removal to ensure that Project implementation activities affecting potential suitable habitat and loss of the species is mitigated.

Development of the Project site would result in the impact of 1.23-acres of ruderal vegetation communities, potentially causing disruption removal of habitat for Stephen's kangaroo rat, a federally threatened species and a state threatened species. Ruderal habitat is considered somewhat suitable habitat for the species and may be used for burrowing for the Stephen's kangaroo rat causing potential adverse impacts. However, the Project falls within the Stephen's kangaroo rat Fee Area outlined in the Riverside

County SKR Habitat Conservation Plan, as well as being a covered MSHCP species. Mitigation Measure Bio – 2 (MM BIO-2) is proposed to ensure that Project implementation activities affecting potential suitable habitat of Stephen's kangaroo rat is mitigated; the Applicant shall make the appropriate mitigation fee payment into the MSHCP Stephen's Kangaroo rate fee payment program. This program ensures the conservation of Stephen's Kangaroo rat occupied habitats in order to offset the loss of potentially suitable habitat onsite.

Development of the Project site would result in the impact of 1.23-acres of ruderal vegetation communities, potentially causing disruption removal of foraging habitat for tricolored blackbird and southern California rufous-crowned sparrow. Ruderal habitat is considered somewhat suitable habitat for the species and may be used for foraging habitat for the species. These are species of special concern and are MSHCP Covered Species. Mitigation Measure Bio – 3 (MM BIO-3) outlines a pre-construction nesting bird survey during typical nesting season to ensure that Project implementation activities affecting potential suitable habitat and loss of the species is mitigated.

Furthermore, during construction of the Project, indirect short-term noise impacts could temporarily affect avian species during breeding activities within the Santa Ana River, including the yellow-breasted chat and yellow warbler that was heard within the Santa Ana River. Mitigation Measure Bio – 3 (MM BIO-3) is proposed to ensure that activities affecting potential nesting habitat are restricted to periods outside of the avian breeding season or, where activities must occur, pre-activity surveys and avoidance measures are implemented.

Therefore, potential impacts to sensitive wildlife species would be less than significant with implementation of the mitigation measures.

Due to the level of existing disturbance onsite and within the vicinity impacts to the vegetation communities would not be expected to reduce the general wildlife populations below self-sustaining levels within the region and impacts to wildlife species do not meet the significance thresholds. Therefore, impacts to common wildlife species would not be considered a significant impact and no mitigation is required.

Potential adverse indirect impacts to common wildlife including an increase in construction related noise; an increase in litter, pollutants, dust, oil, and other human debris during construction; and an increase in noise and nighttime lighting during long-term operations. As part of the Project design, Standard Best Management Practices (BMPs) are to be implemented to provide proper trash receptacles and management

of dust/oil/pollutants. Furthermore, these indirect impacts are short in duration, only occurring during construction activities.

Short-term noise from construction activities could temporarily affect common and sensitive wildlife during breeding activities, both onsite and to the adjacent Santa Ana River. Mitigation Measure Bio – 3 (MM BIO-3) is proposed to ensure that activities affecting potential nesting habitat are restricted to periods outside of the avian breeding season or, where activities must occur, pre-activity surveys and avoidance measures are implemented. Therefore, noise-related impacts would be less than significant with implementation of the mitigation measures.

Direct impacts associated with vegetation removal may occur to all avian species covered under the Migratory Bird Treaty Act (MBTA) with the removal of potential nesting and foraging habitat. The MBTA protects nesting activities of avian species. Under the Act it is unlawful to harm, harass, or take a nest. If Project construction is scheduled to occur during the typical breeding bird season (January 15 through August 31 for raptors and February 15 through August 31 for all other avian species), direct removal of vegetation and indirect short-term noise effects to birds that may forage or nest onsite or within the buffer area may occur. In order to reduce direct and indirect impacts on nesting birds, if vegetation removal and/or construction activities were to occur during nesting bird season, a pre-construction nesting bird survey would be required within five (5) days of disturbances during typical nesting bird season to delineate any active nests found within the Project site. The loss of foraging habitat on the Project site is not a significant impact due to the adjacency to open space and additional foraging habitat located south of the Project site. Pre-construction nesting bird surveys as outlined within Mitigation Measure BIO– 3 (MM BIO- 3) would ensure protection against direct impacts associated with vegetation removal or indirect impacts associated with construction related noise impacts for avian species covered under the MBTA during the typical nesting bird season. Implementation of MM BIO-1 through MM BIO-3 would reduce potential impacts to the avian species and special status wildlife to a less than significant level.

MM BIO-1 *Prior to ground disturbances a biological pre-disturbance sweep shall take place to ensure wildlife species, sensitive and common, are cleared before large equipment removes vegetation.*

MM BIO-2 *Prior to issuance of the grading permit, the Applicant shall pay the Stephen's Kangaroo Rat mitigation fee pursuant to City Ordinance No. 663. Per Ordinance No. 663, a fee of $500 per gross acre is required.*

MM BIO-3 *Prior to ground disturbances that would impact potentially suitable nesting habitat for avian species, the Project Applicant shall adhere to the following:*

1. *Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for raptors) to the extent feasible to avoid potential impacts to nesting birds and/or ground nesters.*

2. *Any construction activities that occur during typical nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat, on-site and within 300-feet surrounding the site (as feasible), be thoroughly surveyed for the presence of nesting birds by a qualified biologist before commencement ground disturbances. If active nests are identified, the biologist would establish buffers around the vegetation (500 feet for raptors and sensitive species, 200 feet for non-raptors/non-sensitive species). All work within these buffers would be halted until the nesting effort is finished (i.e. the juveniles are surviving independent from the nest). The onsite biologist would review and verify compliance with these nesting boundaries and would verify the nesting effort has finished. Work can resume within these areas when no other active nests are found. Alternatively, a qualified biologist may determine that construction can be permitted within the buffer areas and would develop a monitoring plan to prevent any impacts while the nest continues to be active (eggs, chicks, etc.). Upon completion of the survey and any follow-up construction avoidance management, a report shall be prepared and submitted to City for mitigation monitoring compliance record keeping.*

7.3.3 Critical Habitat

The Project site contains a total of 2.25 acres of designated critical habitat for the least Bell's vireo within the eastern portion of the Project site. The Project site does not contain any constituent elements either the physical and biological features needed for life processes and successful reproduction of the listed species. Approximately 40-feet north and east of the Project site is designated critical habitat for the southwestern willow flycatcher. The Santa Ana River, located offsite and to the east of the Project site, includes suitable habitat for the two listed species and is identified as having past occurrences of the species. These bird species are migratory and indirect noise impacts may occur however, Mitigation Measure Bio – 3 (MM BIO-3) is proposed to ensure that Project implementation activities affecting potential nesting season are restricted to

periods outside of the breeding season or, where activities must occur, pre-construction surveys and avoidance measures are implemented.

Furthermore, the Santa Ana River is critical habitat for the Santa Ana Sucker. No impacts are anticipated to the Santa Ana River with the implementation of the Project. As part of the Project design a Storm Water Pollution Prevention Plan (SWPPP) would be prepared by the Project Engineer to ensure no run-off leaves the Project site.

Therefore, Implementation of MM BIO-3 would reduce potential impacts to a less than significant level.

7.4 Threshold BIO- B

Would the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

No Impact.

7.4.1 Sensitive Plant Communities

No sensitive plant communities occur on the Project site. Therefore, no impacts would occur.

7.4.2 Jurisdictional Waters

No jurisdictional features occur onsite. The Santa Ana River, located offsite and to the east of the Project site is considered Waters of the United States and Waters of the State, as regulated by the Corps, RWQCB, and CDFW. No impacts are anticipated to occur to the Santa Ana River due to Project implementation. Therefore, no mitigation is required.

7.5 Threshold BIO - C

Would the project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

No Impact.

No jurisdictional wetlands occur onsite. Therefore, there is no impacts anticipated and no mitigation is required.

7.6 Threshold BIO - D

Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Less than Significant with Mitigation Incorporated.

7.6.1 Wildlife Movement

No known wildlife corridors or linkage areas are identified in the MSHCP as a Core Linkage are located on the Project site onsite. However, the Project site is adjacent to the Santa Ana River, which is designated as a wildlife corridor known as Existing Core A within the MSHCP. MSHCP Existing Core A consists of Prado Basin and the Santa Ana River and functions as a linage, connecting Orange County to the west with San Bernardino County to the north. The Existing Core A is constrained on all sides by existing urban development and agricultural use, and planned land uses surrounding the Core exists largely of high impact land uses such as city and community development.

The Project site is further characterized by exposed areas that lack suitable vegetation cover outside and resources that are typically associated with wildlife movement areas (i.e. water). The Project site includes residential development, Vantage Point Church to the north, west, and south, and a steep slope to the Santa Ana River to the east. The site contains animal pens, equestrian stalls and arena, and residential homes all of which restrict any regional movement. Therefore, the Project site is not used as a wildlife corridor, linkage, or specific travel route to and from nursery sites other important resources.

The Project would not directly impact Existing Core A. However, the Project may indirectly impact Existing Core A. The Project indirect impacts by themselves would not be expected to interfere with the wildlands interface within the region; however, the due to the Santa Ana River being designated as the Existing Core A, the following Urban/Wildland Interface Guidelines will be implemented through the participation in the MSHCP and implemented through the Conditions of Approval.

Movement on a local scale likely occurs with species adapted to urban environments due to the surrounding development and disturbances in the vicinity of the site. Although implementation of the Project would result in disturbances to local wildlife movement within the site, those species adapted to urban areas would be expected to persist on-site following construction. As such, impacts would be less than significant, and no mitigation measures would be required.

7.6.2 Migratory Birds and Raptors

The Project site supports foraging habitat for migratory birds and raptors due to the ruderal and disturbed habitat occurring on the Project site. Nesting activity typically

occurs from January 15 through August 31 for raptors and February 15 through August 31 for all other avian species. Disturbing or destroying active nests is a violation of the MBTA (16 U.S.C. 703 et seq.). In addition, nests and eggs are protected under Fish and Wildlife Code Section 3503. As such, direct impacts to breeding birds (e.g. through nest removal) or indirect impacts (e.g. by noise causing abandonment of the nest) is considered a potentially significant impact. Compliance with the MBTA would reduce impacts to a less than significant level, as detailed in MM BIO-3.

7.7 Threshold BIO - E

Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

No Impact.

The Project is not subject to any local policies, such as a tree preservation ordinance, which protects biological resources. Therefore, no impacts would occur, and no mitigation is necessary.

7.8 Threshold BIO - F

Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

Less than Significant with Mitigation Incorporated.

The Project site is located within the MSHCP. The Project site is not located within any MSHCP Criteria Areas, Cell Groups, or Subunits. Furthermore, the Project site is not located in survey areas for Amphibians, Mammals, or Special Linkage areas. The Project site is subject to Riparian and Riverine Areas pursuant to MSHCP Section 6.1.2, Narrow Endemic Plants, pursuant to Section 6.1.3, and Western Burrowing Owl overlay pursuant to MSHCP Section 6.3.2.

No MSHCP Riparian/Riverine features occur onsite. The Santa Ana River occurs offsite and to the east of the Project site within the 500-foot buffer, which meets the definition of riparian and/or riverine as outline within the MSHCP Section 6.1.2. The Project site does not contain suitable habitat for any of the riparian/riverine vernal pool species listed in Section 6.1.2 of the MSHCP, including listed fairy shrimp. No impacts to those species listed in Section 6.1.2 of the MSHCP are associated with Project implementation due to the lack of suitable habitat onsite. However during construction of the Project, indirect short-term noise impacts could temporarily affect Section 6.1.2 species heard and identified to occur within the Santa Ana River during breeding season, including the yellow-breasted chat and yellow warbler that was heard within the Santa Ana River. Mitigation Measure Bio – 3 (MM BIO-3) is proposed to ensure that activities affecting potential nesting habitat are restricted to periods outside of the avian breeding season

or, where activities must occur, pre-activity surveys and avoidance measures are implemented.

Furthermore, the Project site lacks suitable soils, sign of inundation (seasonal depression, soil cracking, etc.) and/or characteristic vernal pool plant species, no suitable habitat for fairy shrimp is present onsite. The Project site is dominated by well drained substrates and focused surveys for fairy shrimp are not warranted.

No impacts are anticipated to occur to the Santa Ana River due to Project implementation. Therefore, no mitigation is required, and no Determination of Biologically Equivalent or Superior Preservation (DBESP) is required. Therefore, the Project is consistent with the goals and objectives within MSHCP Section 6.1.2.

Portions of the Project site are located within the Narrow Endemic Plant Species Survey Areas (NEPSSA) Number 7, which include the following target species:

- San Diego ambrosia
- Brand's phacelia
- San Miguel savory

No special status plant species were observed during the 2024 focused surveys and none are expected to occur onsite due to the lack of suitable habitat or suitable soil found on the Project site; therefore, there are no potential impacts to special status plants due to Project implementation and no mitigation required. Therefore, the Project is consistent with the goals and objectives within MSHCP Section 6.1.3.

The indirect Project impacts by themselves would not be expected to interfere with the wildlands interface within the region; however, the due to the Santa Ana River being designated as the Existing Core A, the following Urban/Wildland Interface Guidelines will be implemented through the participation in the MSHCP and implemented through the Conditions of Approval.

Water Quality/Hydrology

The Project will comply with all applicable water quality regulations and Best Management Practices as part of prepared Water Quality Management Plan (WQMP) and Stormwater Pollution Prevention Plan (SWPPP) prepared for the Project and required by Conditions of Approval.

Toxics

Toxic sources within the Project Site would be limited to those commonly associated with landscape activities such as pesticides, insecticides, herbicides, and fertilizers. The Project will comply with all applicable water quality regulations to ensure adequate long-term treatment.

Lighting
Night lighting associated with the proposed Project site improvements that are adjacent to the Santa Ana River and Existing Core A would be directed away to reduce potential indirect impacts to wildlife species.

Noise
The Project site impacts are limited to the western portion of the site, which is adjacent to Archibald Street therefore, already subject to ambient roadway noise. Short-term construction related noise impacts will be reduced by the implementation of the following as implemented within the Conditions of Approval:

- During all Project Site excavation and construction on-site, the construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturers' standards. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the Project site, which includes the Santa Ana River.
- The construction contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and noise sensitive receptors nearest the Project site during all project construction.
- The construction contractor shall limit all construction-related activities that would result in high noise levels according to the construction hours.

Invasive Species
As part of Project design, the landscape plans do not utilize any invasive species adjacent to the Santa Ana River/Existing Core A.

Implementation of the aforementioned guidelines will minimize Project indirect impacts to a less than significant level and would be consistent with the goals and objectives within MSHCP Section 6.1.4.

Furthermore, based on the Habitat Assessment and focused burrowing owl surveys it is determined the Project site is not occupied by BUOW. No BUOWs or evidence of BUOWs were observed within the Project site during the focused surveys. A majority of the Project site was characterized by ruderal fields, which may provide suitable nesting habitat for BUOW but lack proper vegetation cover for the species. Much of the buffer area is developed. California ground squirrels and their burrows were observed within the Study Area. These burrows were actively utilized by the California ground squirrels and contained no BUOW or keys signs (sight, whitewash, burrows, bones, feathers, pellets, nests, and calls).

Due to the negative results of the focused surveys and with the City's participation in the MSHCP, a BUOW pre-construction survey outlined within Mitigation Measure BIO-4

(MM BIO-4) will be required to ensure protection for this species and compliance with the conservation goals as outlined within the MSHCP.

MM BIO-4: *Prior to impacts, a pre-construction survey for burrowing owl within the Study Area (Project site and surrounding 500-foot buffer) shall be conducted by a qualified biologist where suitable habitat is present within 30 days to the commencement of ground disturbing activities.*

If active burrowing owl burrows are detected during the breeding season, all work within 300 feet of any active burrow will be halted until that nesting effort is finished. The on-site biologist will review and verify compliance with these boundaries and will verify the nesting effort has finished. Work can resume when no other active burrowing owl nesting efforts are observed.

If active burrowing owl burrows are detected outside the breeding season, then passive and/or active relocation pursuant to a Burrowing Owl Exclusion Plan that shall be prepared by the Applicant and approved by the County of Riverside Environmental Programs Department (EPD) in consultation with CDFW. The Burrowing Owl Exclusion Plan shall be prepared in accordance with guidelines in the CDFW Staff Report on Burrowing Owl (March 2012) and MSHCP.

Burrowing owl burrows shall be excavated with hand tools by a qualified biologist when determined to be unoccupied and backfilled to ensure that animals do not reenter the holes/dens.

With the implementation of MM BIO-4, potential impacts to burrowing owls are reduced to a less than significant level and the Project is consistent with the goals and objectives within MSHCP Section 6.3.2.

8.0 Cumulative Impacts

Cumulative impacts are defined as the direct and indirect effects of a proposed project which, when considered alone, would not be deemed a substantial impact, but when considered in addition to the impacts of related projects in the area, would be considered significant. "Related projects" refers to past, present, and reasonably foreseeable probable future projects, which would have similar impacts to the proposed Project. CEQA deems a cumulative impact analysis to be adequate if a list of "related projects" is included in the EIR or the proposed project is consistent with an adopted general, specific, master, or comparable programmatic plan [Section

15130(b)(1)(B)]. CEQA also states that no further cumulative impact analysis is necessary for impacts of a proposed project consistent with an adopted general, specific, master, or comparable programmatic plan [Section 15130(d)].

The loss of biological resources on the Project site must be considered in the context of the other development in the area. The Project's direct impact analysis identified four biological resources including; sensitive wildlife, nesting and foraging birds, and burrowing owl. When combined with impacts from other reasonably past, present, and future projects, could result in a cumulative biological impact.

Direct impacts may occur to sensitive wildlife, however, adherence and implementation of MM BIO – 1 and MM BIO – 2 will ensure impacts to sensitive species or their habitats are minimized thus reducing the Project's contribution to cumulative impacts to less than significant.

Direct impacts may occur to nesting birds, should construction activities and ground disturbances begin during the typical nesting season. However, adherence and implementation of MM BIO-3 will ensure impacts to avian species or their habitats are minimized thus reducing the Project's contribution to cumulative impacts to less than significant. Loss of foraging habitat is not considered significant due to adjacency of additional open space lands located within the vicinity, specifically south of the Project site.

Finally, impacts to burrowing owl could result in significant impacts. Pursuant to the MSHCP requirements, a pre-construction survey shall be conducted by a qualified Biologist to ensure protection for this species and compliance with the conservation goals as outlined within the MSHCP. With the implementation of MM BIO–4 impacts to the species are minimized thus reducing the Project's contribution to cumulative impacts to less than significant.

With the implementation of the above, the cumulative impacts would be less than significant with mitigation incorporated.

APPENDIX A

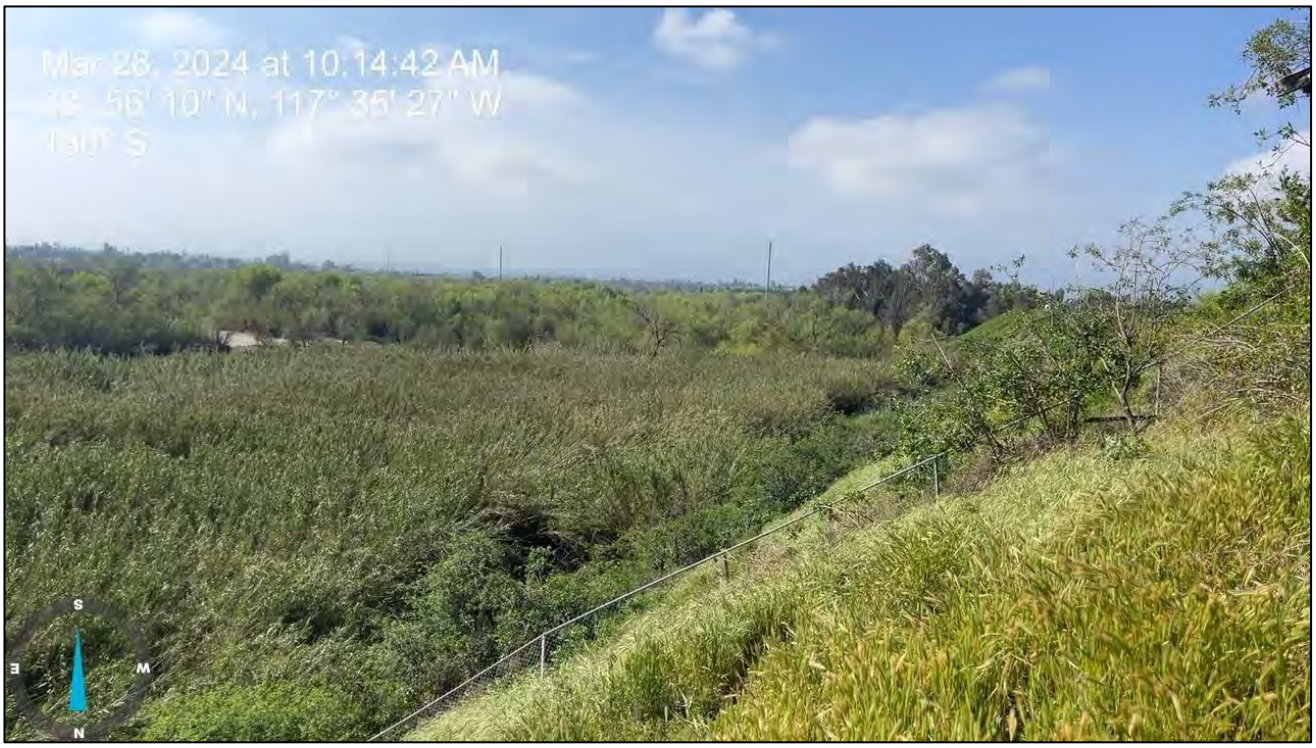
Representative Photographs of the Vegetation Community

Most of the Project site consists of disturbed/developed and ruderal habitat.

The Project site is regularly mowed. Two residential homes occur on the Project site.

Located offsite and to the east is the Santa Ana River.

The Project site is developed with horse arena and stalls.



The Project site also includes pens with cattle, goats, chickens, peacocks, and guard dogs.

The Project site also includes pens with cattle, goats, chickens, peacocks, and guard dogs.

The Project site also includes pens with cattle, goats, chickens, peacocks, and guard dogs.

Offsite and located to the east of the Project site is Santa Ana River with Arundo thickets.

Most of the site includes non-native species.

The Project site include horse stalls and an arena.

APPENDIX B

Plant Species Recorded During Field Surveys

Appendix B contains the list of vascular plant taxa recorded during the 2024 biological survey conducted within the Project site. Plant nomenclature and taxonomic order is based on *The Jepson Manual: Vascular Plants of California, s*econd Edition (Baldwin *et al.* 2012).

Plant Species Observed during the Field Survey

- EUDICOTS
  - VASCULAR SPECIES
    - APOCYNACEAE–Dogbane Family
      - Nerium oleander–oleander*
    - ASTERACEAE–Sunflower Family
      - Centaurea melitensis–Maltese star-thistle*
      - Erigeron canadensis–Canadian horseweed
      - Helminthotheca echioides–bristly oxtongue*
    - BRASSICACEAE–Mustard Family
      - Hirschfeldia incana–shortpod mustard*
    - CACTACEAE–Cactus Family
      - Opuntia littoralis–coast prickly pear
    - CHENOPODIACEAE–Goosefoot Family
      - Salsola australis–Russian thistle*
    - CUCURBITACEAE–Gourd Family
      - Cupaniopsis anacardioides–carrotwood*
    - GERANIACEAE–Geranium Family
      - Erodium moschatum–musky stork's bill*
    - MALVACEAE–Mallow Family
      - Malva parviflora–cheeseweed mallow*
    - SOLANACEAE–Nightshade Family
      - Nicotiana glauca–tree tobacco*
- MONOCOTS
  - VASCULAR SPECIES
    - ARECACEAE–Palm Family
      - Phoenix canariensis–Canary Island date palm*
    - POACEAE–Grass Family
      - Bromus madritensis ssp. rubens–red brome*
      - Hordeum murinum–mouse barley*

APPENDIX C

Special Status Plant Species Potential Occurrence Determination

APPENDIX C

Special Status Plant Species Potential Occurrence Determination

This table summarizes conclusions from analysis and field surveys regarding the potential occurrence of special status plant species within the Study Area. This table includes a complete list of special status plant species found within the *Corona North* quadrangle and surrounding 8 quads with the potential to occur on the Project site were analyzed based on distribution, habitat requirements, and existing site conditions. During the field surveys, the potential for special status plant species to occur within the Study Area was assessed based on the following criteria:

- Present: observed on the site during the field surveys, or recorded on-site by other qualified biologists.

- Known to Occur: observed on site in the recent past, but not observed during the most recent biological survey.

- High potential to occur: observed in similar habitat in the region by a qualified biologist or habitat on the site is a type often utilized by the species, and the site is within the known distribution and elevation range of the species.

- Moderate potential to occur: reported sightings in surrounding region, or the site is within the known distribution and elevation range of the species, and habitat on the site is a type occasionally used by the species.

- Low potential to occur: the site is within the known distribution and elevation range of the species, but habitat on the site is rarely used by the species or for which there are no known recorded occurrences of the species within or adjacent to the site.

- None: a focused study failed to detect the species or no suitable habitat is present.

- Unknown: the species' distributional/elevation range and habitat are poorly known.

Even with field surveys, biologists assessed the probability of occurrence rather than make a definitive conclusion about species presence or absence. Failure to detect the presence of the species is not definitive, and may be due to variable effects associated with fire, rainfall patterns, and/or season.

Special Status Plants: Potential to Occur within the Study Area

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
Abronia villosa var. aurita	chaparral sand-verbena	CRPR: 1B.1 MSHCP: Not covered	Annual herb of sandy areas in chaparral and coastal sage scrub. Known from 80 to 1,600 meters (300 to 5,300 feet) MSL. Blooming period: January through August.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Allium marvinii	Yucaipa onion	CRPR: 1B.2 MSHCP: Covered	Habitats include chaparral (clay, openings). Known from 760 to 1,650 meters (2,495 to 3,49500 feet) MSL. Blooming period: April through May	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Allium munzii	Munz's onion	ST, FE CRPR: 1B.1 MSHCP: Covered	Habitats include chaparral, Cismontane woodland, Coastal scrub, Pinyon and juniper woodland, Valley and foothill grassland. Known from 297 - 1070 meters (975 - 3510 feet) MSL. Blooming Period: March through May	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Ambrosia pumila	San Diego ambrosia	FE, CRPR: 1B.1, MSHCP: Section 6.1.3 NEPSSA 7	Habitats supporting chaparral, coastal scrub, valley and foothill grasslands, and vernal pools. Observed in sandy loam or clay soils, sometimes alkaline soils. Known from 20 to 415 meters (65 to 1360 feet) MSL. Blooming period: June through September	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Arenaria paludicola	marsh sandwort	ST, FE CRPR: 1B.1, MSHCP: Not Covered	Habitats include marshes and swamps (brackish, freshwater). Known from 3 - 170 meters (10-560 feet) MSL. Blooming Period: May through August	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Astragalus brauntonii	Braunton's milk-vetch	FE CRPR: 1B.1 MSHCP: Not Covered	Habitats supporting chaparral, Coastal scrub, Valley and foothill grassland. Known from 4 - 640 meters (15 - 2100 feet) MSL. Blooming Period: January through August	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Atriplex coulteri	Coulter's saltbush	CRPR: 1B.2 MSHCP: Not Covered	Habitats supporting coastal bluff scrub, Coastal dunes, Coastal scrub, Valley and foothill grassland. Known from 3 - 460 meters (10 - 1510	None. No suitable habitat or soils are found within the Project site. Not observed during

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
			feet) MSL. Blooming period: March through October	the field surveys or Sensitive Plant Surveys.
Baccharis malibuensis	Malibu baccharis	CRPR: 1B.1 MSHCP: Not Covered	Habitats supporting chaparral, Cismontane woodland, Coastal scrub, Riparian woodland. Known from 150 - 305 meters (490 - 1000 feet) MSL. Blooming Period: August	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Berberis nevinii	Nevin's barberry	FE, SE CRPR: 1B.1 MSHCP: Covered	Habitats supporting chaparral, Cismontane woodland, Coastal scrub, Riparian scrub. Known from 70 - 825 meters (230 - 2705 feet) MSL. Blooming Period: (Feb)March to June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Brodiaea filifolia	Thread-leaved Brodiaea	FT, SE CRPR: 1B.1 MSHCP: Covered	Habitats include chaparral (openings), cismontane woodland, coastl scrub, playas, valley and foothill grasslands, and vernals pools often with clay soils. Known from 25 to 1,120 meters (80 to 3,675 feet) MSL. Blooming Period: March through June.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Calochortus weedii var. intermedius	intermediate mariposa-lily	CRPR:1B.2 MSHCP: Covered	Habitats supporting chaparral, Coastal scrub, Valley and foothill grassland Known from 105 - 855 meters (345 - 2805 feet) MSL. Blooming Period: May through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Calystegia felix	lucky morning-glory	CRPR: 1B.1 MSHCP: Not Covered	Habitats supporting meadows and seeps (sometimes alkaline), Riparian scrub (alluvial). Historically associated with wetland and marshy places, but possibly in drier situations as well. Possibly silty loam and alkaline. Known from 30 - 215 meters (100 - 705 feet) MSL. Blooming Period: March through September	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Calystegia sepium ssp. binghamiae	Santa Barbara morning-glory	CRPR:1A MSHCP: Not Covered	Habitats supporting Marshes and swamps (coastal) Known from 5 meters (15 feet) MSL Blooming Period: August	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
Centromadia pungens ssp. laevis	smooth tarplant	CRPR:1B.2 MSHCP: Covered	Habitats supporting alkaline areas in chenopod scrub, meadows and seeps, ditches, playas, riparian woodland, and valley and foothill grassland. Known from below 480 meters (1,600 feet) MSL. Blooming period: April through September	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Chloropyron maritimum ssp. maritimum	salt marsh bird's-beak	SE, FE CRPR:1B.2 MSHCP: Not Covered	Habitats supporting coastal dunes, Marshes and swamps (coastal salt) Known from 0 - 30 meters (0 - 100 feet) MSL. Blooming period: May through October(Nov)	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Chorizanthe parryi var. fernandina	San Fernando Valley spineflower	SE CRPR: 1 B.1 MSHCP: Not Covered	Habitats supporting coastal scrub (sandy), Valley and foothill grassland Known from 150 - 1220 meters (490 - 4005 feet) MSL. Blooming period: April through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Chorizanthe parryi var. parryi	Parry's spineflower	CRPR:1B.2 MSHCP: Covered	Habitats supporting chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland. Known from 275 - 1220 meters (900 - 4005 feet) MSL. Blooming Period: April through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Chorizanthe polygonoides var. longispina	long-spined spineflower	CRPR:1B.2 MSHCP: Covered	Habitats supporting chaparral, Coastal scrub, Meadows and seeps, Valley and foothill grassland, Vernal pools. Known from 30 - 1530 meters (100 - 5020 feet) MSL. Blooming Period: April through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Cladium californicum	California saw-grass	CRPR:2B.2 MSHCP: Not Covered	Habitats supporting marshes and swamps (alkaline, freshwater), Meadows and seeps. Known from 60 - 1600 meters (195 - 5250 feet) MSL. Blooming Period: June through September	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Dodecahema leptoceras	Slender-horned spineflower	SE, FE CRPR: 1B.1 MSHCP:	Habitat supporting Chaparral, Cismontane woodland, Coastal scrub (alluvial fans). Known from 200-760 meters (655-2495 feet) MSL.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
			Blooming Period: April through June	
Deinandra paniculata	paniculate tarplant	CRPR: 4.2 MSHCP: Not covered	Habitats supporting coastal scrub and valley and foothill grassland/usually vernally mesic. Known from 25 to 9540 meters (80 to 3,085 feet) MSL. Blooming period: April through November.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Dodecahema leptoceras	slender-horned spineflower	SE, FE CRPR:1B.1 MSHCP: Not Covered	Habitats supporting chaparral, Cismontane woodland, Coastal scrub (alluvial fans) Known from 200 - 760 meters (655 - 2495 feet) MSL. Blooming Period: April through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Dudleya multicaulis	many-stemmed dudleya	CRPR:1B.2 MSHCP: Covered	Habitats supporting chaparral, coastal scrub, and valley and foothill grassland. Often found on clay soils or granitic outcrops. Known from below 800 meters (< 2,600 feet) MSL. Blooming period: May through July.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Eriastrum densifolium ssp. sanctorum	Santa Ana River woollystar	FE, SE CRPR: 1B.1 MSHCP: Covered	Found in sandy soils of floodplains and terraced fluvial deposits of the Santa Ana River and larger tributaries. Known from 120 to 625 meters (400 to 4,100 feet) MSL. Blooming period: June through September.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Hesperocyparis forbesii	Tecate cypress	CRPR: 1B.1 MSHCP: Not Covered	Habitats supporting chaparral, Closed-cone coniferous forest. Known from 80 - 1500 meters (260 - 4920 feet) MSL. Blooming Period: N/A	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Hesperocyparis goveniana	Gowen cypress	FT CRPR: 1B.2 MSHCP: Not Covered	Habitats supporting chaparral (maritime), closed-cone coniferous forest. Known from 30 - 300 meters (100 - 985 feet) MSL. Blooming Period: N/A	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
Horkelia cuneata var. puberula	mesa horkelia	CRPR: 1B.1 MSHCP: Not Covered	Habitats supporting chaparral (maritime), cismontane woodland, Coastal scrub. Known from - 810 meters (230 - 2660 feet) MSL. Blooming Period: February through July(Sep)	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Lasthenia glabrata ssp. coulteri	Coulter's goldfields	CRPR: 1B.1 MSHCP: Covered	Habitats supporting marshes and swamps (coastal salt), Playas, Vernal pools. Known from 1 - 1220 meters (5 - 4005 feet) MSL. Blooming Period: February through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Lepechinia cardiophylla	heart-leaved pitcher sage	CRPR: 1B.2 MSHCP: Covered	Habitats supporting chaparral, Cismontane woodland, Closed-cone coniferous forest Known from 520 - 1370 meters (1705 – 4495) feet MSL. Blooming Period: April through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Lepidium virginicum var. robinsonii	Robinson's pepper-grass	CRPR: 4.3 MSHCP: Not covered	Dry soils on chaparral and coastal sage scrub often around rock outcrops. Widespread throughout southern California foothills in dry, exposed locales. Blooming period: January to July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Lycium parishii	Parish's desert-thorn	CRPR: 2B.3 MSHCP: Not covered	Habitats supporting coastal scrub, Sonoran desert scrub. Known from 135- 1000 meters (445- 3280 feet) MSL. Blooming Period: March through April	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Malacothamnus parishii	Parish's bushmallow	CRPR: 1A MSHCP: Not Covered	Habitats supporting chaparral, Coastal scrub Known from 305 - 455 meters (1000-1495 feet) MSL. Blooming Period: June through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Monardella australis ssp. jokerstii	Jokerst's monardella	CRPR: 1B.1 MSHCP: Not Covered	Habitats supporting chaparral, Lower montane coniferous forest. Known from 1350 - 1750 meters (4430 - 5740 feet) MSL. Blooming Period: July through September	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
Monardella hypoleuca ssp. intermedia	intermediate monardella	CRPR: 1B.3 MSHCP: Not Covered	Habitats include Chaparral, Cismontane woodland, Lower montane coniferous forest (sometimes). Known from 400 - 1250 meters (1310 - 4100 feet) MSL. Blooming Period: April through September	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Monardella pringlei	Pringle's monardella	CRPR: 1A MSHCP: Not Covered	Habitats include Coastal scrub with sandy soils. Known From 300 - 400 meters (985 - 1310 feet) MSL. Blooming period: May through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Muhlenbergia utilis	aparejo grass	CRPR: 2B.2 MSHCP: Not Covered	Habitats include Chaparral, Cismontane woodland, Coastal scrub, Marshes and swamps, Meadows and seeps Known from 25 - 2325 meters (80 - 7630 feet) MSL. Blooming Period: March through October	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Nama stenocarpa	mud nama	CRPR: 2B.2 MSHCP: Covered	Habitats include Marshes and swamps (lake margins, riverbanks) Known from 5 - 500 meters (15 - 1640 feet) MSL. Blooming Period: January through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Navarretia prostrata	prostrate vernal pool navarretia	CRPR: 1B.2 MSHCP: Covered	Habitats include Coastal scrub, Meadows and seeps, Valley and foothill grassland (alkaline), Vernal pools. Known from 3 - 1210 meters (10-3970 feet) MSL. Blooming Period: April through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Nolina cismontana	chaparral nolina	CRPR: 1B.2 MSHCP: Not Covered	Habitats include Chaparral and Coastal scrub. Known from 140-1275 meters (460- 4185 Feet) MSL. Blooming Period: (Mar)May through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
Penstemon californicus	California beardtongue	CRPR: 1B.2 MSHCP: Covered	Habitats include chaparral, Lower montane coniferous forest, Pinyon and juniper woodland. Known from 1170 - 2300 meters (3840 - 7545 feet) MSL. Blooming Period: May through June(Aug)	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Pentachaeta aurea ssp. allenii	Allen's pentachaeta	CRPR: 1B.1 MSHCP: Covered	Habitats include coastal scrub (openings), Valley and foothill grassland Known from 75 - 520 meters (245 - 1705 feet) MSL. Blooming Period: March through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Phacelia keckii	Santiago Peak phacelia	CRPR: 1B.3 MSHCP: Covered	Habitats include chaparral and closed-cone coniferous forest. Known from 545 - 1600 meters (1790 - 5250 feet) MSL. Blooming period: May through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Phacelia stellaris	Brand's phacelia	CRPR: 1B.1 MSHCP: Section 6.1.3 NEPSSA 7	Habitats supporting coastal dunes and coastal scrub Known from below 1 to 400 meters (5 to 1,310 feet) MSL. Blooming period: March through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Pseudognaphalium leucocephalum	white rabbit-tobacco	CRPR: 2B.2 MSHCP: Not Covered	Habitats include Chaparral, Cismontane woodland, Coastal scrub, Riparian woodland. Known from 0 - 2100 meters (0 - 6890 feet) MSL Blooming Period: (Jul)August through November(Dec)	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Satureja chandleri	San Miguel savory	CRPR: 1B.2 MSHCP: Section 6.1.3 NEPSSA 7	Rocky areas in chaparral, cismontane woodland, coastal scrub, riparian woodland, and valley and foothill grassland. Soils include rocky and gabbroic substrates. Known from 120 - 1075 meters (395 - 3525 feet) MSL. Blooming period: March through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Senecio aphanactis	chaparral ragwort	CRPR: 2B.2 MSHCP: Not	Habitats supporting chaparral, Cismontane woodland, and Coastal scrub. Known from 15 - 800 meters (50 - 2625 feet) MSL.	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Study Area
		Covered Blooming Period: January through April(May)		
Sidalcea neomexicana	salt spring checkerbloom	CRPR: 2B.2 MSHCP: Not Covered	Habitats include Chaparral, Coastal scrub, Lower montane coniferous forest, Mojavean desert scrub, Playas. Known From 15 - 1530 meters (50 - 5020 feet) MSL. Blooming Period: March through June	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Sphenopholis obtusata	prairie wedge grass	CRPR: 2B.2 MSHCP: Not Covered	Habitats include Cismontane woodland, Meadows and seeps. Known from 300 - 2000 meters (985 - 6560 feet) MSL. Blooming Period: April through July	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Symphyotrichum defoliatum	San Bernardino aster	CRPR: 1B.2 MSHCP: Not Covered	Habitats include Cismontane woodland, Coastal scrub, Lower montane coniferous forest, Marshes and swamps, Meadows and seeps, Valley and foothill grassland (vernally mesic). Known from 2 - 2040 meters (5 - 6695 feet) MSL. Blooming Period: July through November	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.
Thysanocarpus rigidus	rigid fringepod	CRPR: 1B.2 MSHCP: Not Covered	Habitats include Pinyon and juniper woodland. Known from 600 - 2200 meters (1970 - 7220 feet) MSL. Blooming Period: February through May	None. No suitable habitat or soils are found within the Project site. Not observed during the field surveys or Sensitive Plant Surveys.

Legend
<u>*Federal Endangered Species Act (ESA) Listing Codes:*</u> federal listing is pursuant to the Federal Endangered Species Act of 1973, as amended (ESA). FE = federally listed as endangered: any species, subspecies, or variety of plant or animal that is in danger of extinction throughout all or a significant portion of their range. FT = federally listed as threatened: any species, subspecies, or variety of plant or animal that is considered likely to become endangered throughout all or a significant portion of its range within the foreseeable future. <u>*California Endangered Species Act (CESA) Listing Codes:*</u> state listing is pursuant to § 1904 (Native Plant Protection Act of 1977) and §2074.2 and §2075.5 (California Endangered Species Act of 1984) of the Fish and Game Code, relating to listing of Endangered, Threatened and Rare species of plants and animals. SE = state listed as endangered: any species, subspecies, or variety of plant or animal that are in serious danger of becoming extinct throughout all, or a significant portion, of their range.

ST = state listed as threatened: any species, subspecies, or variety of plant or animal that, although not presently threatened with extinction, is likely to become an endangered species in the foreseeable future.

California Rare Plant Ranks (Formerly known as CRPR Lists): the CRPR is a statewide, non-profit organization that maintains, with CDFG, an Inventory of Rare and Endangered Plants of California. In the spring of 2011, CRPR and CDFG officially changed the name "CRPR List" or "CRPR Ranks" to "California Rare Plant Rank" (or CPRP). This was done to reduce confusion over the fact that CRPR and CDFG jointly manage the Rare Plant Status Review Groups and the rank assignments are the product of a collaborative effort and not solely a CRPR assignment.

CRPR: 1B - California Rare Plant Rank 1B (formerly List 1B): Plants Rare, Threatened, or Endangered in California and Elsewhere. All of the plants constituting California Rare Plant Rank 1B meet the definitions of Sec. 1901, Chapter 10 (Native Plant Protection Act) or Sections 2062 and 2067 (California Endangered Species Act) of the California Department of Fish and Game Code, and are eligible for state listing. It is mandatory that they be fully considered during preparation of environmental documents relating to CEQA.

CRPR: 2 - California Rare Plant Rank 2 (formerly List 2): Plants Rare, Threatened, or Endangered in California, But More Common Elsewhere. All of the plants constituting California Rare Plant Rank 2 meet the definitions of Sec. 1901, Chapter 10 (Native Plant Protection Act) or Sections 2062 and 2067 (California Endangered Species Act) of the California Department of Fish and Game Code, and are eligible for state listing. It is mandatory that they be fully considered during preparation of environmental documents relating to CEQA.

CRPR: 4 - California Rare Plant Rank 4 (formerly List 4): Plants of Limited Distribution - A Watch List. Very few of the plants constituting California Rare Plant Rank 4 meet the definitions of Sec. 1901, Chapter 10 (Native Plant Protection Act) or Secs. 2062 and 2067 (California Endangered Species Act) of the California Department of Fish and Game Code, and few, if any, are eligible for state listing. Nevertheless, many of them are significant locally, and CRPR and CDFG strongly recommend that California Rare Plant Rank 4 plants be evaluated for consideration during preparation of environmental documents relating to CEQA.

California Native Plant Society (CRPR) Threat Ranks: The CRPR Threat Rank is an extension added onto the California Rare Plant Rank (CRPR) and designates the level of endangerment by a 1 to 3 ranking with 1 being the most endangered and 3 being the least endangered. A Threat Rank is present for all California Rare Plant Rank 1B's, 2's, 4's, and the majority of California Rare Plant Rank 3's. California Rare Plant Rank 4 plants are seldom assigned a Threat Rank of 0.1, as they generally have large enough populations to not have significant threats to their continued existence in California; however, certain conditions exist to make the plant a species of concern and hence be assigned a California Rare Plant Rank. In addition, all California Rare Plant Rank 1A (presumed extinct in California), and some California Rare Plant Rank 3 (need more information) plants, which lack threat information, do not have a Threat Rank extension.

0.1 = seriously endangered in California (over 80% of occurrences threatened / high degree and immediacy of threat)
0.2 = fairly endangered in California (20-80% occurrences threatened / moderate degree and immediacy of threat)

APPENDIX D

Special Status Wildlife Potential Occurrence Determination

APPENDIX D

Special Status Wildlife Potential Occurrence Determination

This table summarizes conclusions from analysis and field surveys regarding the potential occurrence of special status wildlife species within the Study Area. During the field surveys, the potential for special status wildlife species to occur within the Study Area was assessed based on the following criteria:

- Present: observed on the site during the field surveys, or previously recorded on-site by other qualified biologists.

- Known to Occur: observed on site in the recent past, but not observed during the most recent biological survey.

- High potential to occur: observed in similar habitat in the region by a qualified biologist or habitat on the site is a type often utilized by the species, and the site is within the known distribution and elevation range of the species.

- Moderate potential to occur: reported sightings in surrounding region, or the site is within the known distribution and elevation range of the species, and habitat on the site is a type occasionally used by the species.

- Low potential to occur: the site is within the known distribution and elevation range of the species, but habitat on the site is rarely used by the species or for which there are no known recorded occurrences of the species within or adjacent to the site.

- None: a focused study failed to detect the species or no suitable habitat is present.

- Unknown: the species' distributional/elevation range and habitat are poorly known.

Even with field surveys, biologists assessed probability of occurrence rather than make definitive conclusions about species presence or absence. Failure to detect the species is not definitive, and may be due to variable effects associated with migration, weather, fire, and/or time of day and year.

Special Status Wildlife: Potential to Occur within the Project Site

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
Accipiter cooperii	Cooper's hawk	WL MSHCP: Covered	The Cooper's hawk breeds primarily in riparian areas and oak woodlands and is most common in montane canyons. It frequents landscapes where wooded areas occur in patches and groves and often uses patchy woodlands and edges with snags for perching. Dense stands with moderate crown-depths are usually used for nesting. They hunt in broken woodland and habitat edges. Within the range in California, it most frequently uses dense stands of live oak, riparian deciduous or other forest habitats near water. They are also found and can breed in suburban and urban settings.	Low. Suitable foraging habitat occurs onsite. Any potential impacts during nesting season are mitigated by MM BIO-3.
Actinemys pallida	Southwestern pond turtle	FPT, SSC MSHCP: Covered	Found in ponds, lakes, rivers, streams, creeks, marshes, and irrigation ditches, with abundant vegetation, and either rocky or muddy bottoms, in woodland, forest, and grassland. In streams, prefers pools to shallower areas. Logs, rocks, cattail mats, and exposed banks are required for basking. May enter brackish water and even seawater.	None. Suitable habitat does not exist within the Project site. Not observed during field surveys.
Agelaius tricolor	Tricolored blackbird	BLMS, SSC, BCC MSHCP: Covered	Colonies require nearby water, a suitable nesting substrate, and open-range foraging habitat composed of grassland, woodland, or agricultural cropland.	Low. Suitable foraging habitat including ruderal habitat occurs on site and suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site. Species is a MSHCP covered species. Any impacts during nesting season are mitigated through MM BIO-3. Not observed during field surveys.
Aimophila ruficeps canescens	Southern California rufous-crowned sparrow	WL MSHCP: Covered	Species is found on grass-covered hillsides, coastal sage scrub, and chaparral and often occur near the edges of the denser scrub and chaparral associations. Preference is shown for tracts of California sagebrush. Optimal habitat consists of	Present. Species was heard audibly during one of the field surveys. Species is a covered MSHCP species. Any potential impacts during nesting season are

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
			sparse, low brush or grass, hilly slopes preferably interspersed with boulders and outcrops. The species may occur on steep grassy slopes without shrubs if rock outcrops are present. It is a very secretive species.	mitigated by MM BIO-3.
Ammodramus savannarum	Grasshopper sparrow	SSC MSHCP: Covered	Grasshopper Sparrows occur in grasslands, prairies, hayfields, and open pastures with little to no scrub cover and often with some bare ground. Birds in the western part of the range can tolerate some brushy habitat but avoid areas that are too overgrown.	None. The site lacks suitable habitat. Not observed during field surveys.
Anaxyrus californicus	Arroyo toad	FE, SSC MSHCP: Covered	The arroyo toad is found in the southern part of the Coast Ranges from northern San Luis Obispo Co. south to Baja California. This species is found in semi-arid regions near washes or intermittent streams. Habitats used include valley-foothill and desert riparian as well as a variety of more arid habitats including desert wash, palm oasis, and Joshua tree, mixed chaparral and sagebrush. A	None. The site lacks suitable habitat. Not observed during field surveys.
Anniella stebbinsi	Southern California legless lizard	SSC MSHCP: Not Covered	Coastal sand dunes and a variety of interior habitats, including sandy washes and alluvial fans.	None. The site lacks suitable habitat and soil. Not observed during field surveys
Antrozous pallidus	Pallid bat	SSC, BLMS MSHCP: Not covered	Found in a wide variety of habitats is occupied, including grasslands, shrublands, woodlands, and forests from sea level up through mixed conifer forests. The species is most common in open, dry habitats with rocky areas for roosting	None. The site lacks suitable habitat and soil. Not observed during field surveys
Arizona elegans occidentalis	California glossy snake	SSC MSHCP: Not Covered	This species is found in a variety of habitats, primarily arid scrub areas with sparse vegetation including chaparral and grasslands areas.	Low. Limited habitat is found onsite due to the presence of rodent burrows and ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Any impacts to the species are mitigated through MM BIO-1. Not observed during

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
				field surveys.
Aquila chrysaetos	Golden Eagle	BLMS, FP, WL, BBC MSHCP: Covered	Rolling foothills, mountain areas, sage-juniper flats, & desert. Cliff-walled canyons provide nesting habitat in most parts of range; also, large trees in open areas.	None. Suitable habitat does not exist within the Project site. Not observed during field surveys.
Artemisiospiza belli	Bell's sage sparrow	WL, BBC MSHCP: Covered	Chaparral and coastal sage scrub along the coastal lowlands, inland valleys and in the lower foothills of local mountains.	None. The site lacks suitable habitat for foraging and nesting. Not observed during field surveys.
Asio otus	Long-eared owl	SSC	Riparian habitats are required by the long-eared owl, but it also uses live-oak thickets and other dense stands of trees.	None. The site lacks suitable habitat and soil. Not observed during field surveys.
Aspidoscelis hyperythra beldingi	Orange-throated whiptail	SSC, FSS MSHCP: Covered	The species is generally found in semi-arid brushy areas typically with loose soil and rocks, including washes, stream sides, rocky hillsides, and coastal chaparral. Habitat types include low elevation chaparral, non-native grassland, (Riversidian) coastal sage scrub, juniper woodland and oak woodland. Associations include alluvial fan scrub and riparian areas. Friable soil appears to be a necessary requirement for excavating burrows and hiding eggs.	None. The site lacks suitable habitat and soil. Not observed during field surveys.
Athene cunicularia hypugaea	Burrowing owl	SCE, BLMS, BCC MSHCP: Covered	Burrowing owls are a year-round resident of California including habitats of open, dry grassland, and desert. They are generally restricted to mostly flat, open country with suitable nest sites. They use rodent or other burrows for roosting and nesting cover and acquire their burrows from either abandonment or eviction. Burrowing owls typically hunt from a perch.	None. A habitat assessment and a series of focused surveys were performed, and it was determined the Project site does not contain occupied burrows or diagnostic signs of burrowing owls. Therefore, the Project site is not occupied by burrowing owl. The results of the burrowing owl habitat and focused surveys can be found in Appendix E. Not observed during the field surveys.
Aspidoscelis tigris stejnegeri	Coastal whiptail	SSC	This species is found in a variety of habitats, primarily hot and dry open areas with sparse vegetation	Low. Limited habitat is found onsite due to the presence of rodent burrows and

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
		MSHCP: Covered	including chaparral, woodland, and riparian areas. This subspecies is found in coastal southern California, north into Ventura County, and south into Baja California. Additional important habitat characteristics include Important habitat components include shrub cover with accumulated leaf litter, and an abundance of invertebrate prey, particularly termites.	ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Any impacts to the species are mitigated through MM BIO-1. Not observed during field surveys.
Bombus crotchii	Crotch bumble bee	SCE MSHCP: Not Covered	The crotch bumble bee inhabits open grassland and scrub habitats. This species occurs primarily in California, including the Mediterranean region, Pacific Coast, Western Desert, Great Valley, and adjacent foothills through most of southwestern California. Crotch Bumble Bee is a generalist forager and visits a variety of flowering plants. It is a short-tongued bumble bee and is therefore best suited to forage on open flowers with short corollas. Plant families most commonly associated with Crotch bumble bee records in California include Fabaceae, Apocynaceae, Asteraceae, Lamiaceae, Hydrophyllacae, Asclepiadaceae, and Boraginaceae. Other reports commonly associate Crotch bumble bee with plants in the genera Asclepias, Chaenactis, Lupinus, Medicago, Phacelia, and Salvia as nectaring sources.	None. The Project site lacks suitable nectaring sources for the species. While burrows occur onsite that could potentially provide overwintering possibilities, the burrows were actively used by small mammals. Furthermore, the site is disturbed with active animal pens and regular activity. No suitable habitat is found within the Project site. Not observed during the field surveys.
Branchinecta sandiegonensis	San Diego fairy shrimp	FE MSHCP:	They are generally restricted to vernal pools and other non-vegetated ephemeral basins that are between 2 and 12 inches in depth. It is found in Riverside, Orange and San Diego counties and in northwestern Baja California, Mexico.	None. No suitable habitat is found within the Project site. Not observed during the field surveys.
Buteo swainsoni	Swainson's hawk	ST, BLMS, BCC MSHCP: Covered	Swainson's hawks require large, open areas with abundant prey in association with suitable nest trees. Suitable foraging areas include native grasslands or lightly grazed pastures and croplands, open deserts, sparse shrub lands. Swainson's hawks often nest	None. While the Project site includes ruderal habitat, it is routinely maintained for minimal vegetation cover and does not provide suitable foraging habitat. No suitable habitat is found within the

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
			peripherally to riparian systems of the valley, as well as utilizing lone trees or groves of trees, such as oaks, cottonwoods, walnuts and willows, adjacent to their hunting areas. In the Great Basin, they typically nest in juniper trees of juniper-sage flats not near riparian zones.	Project site. The adjacent Santa Ana River, located offsite and to the east of the Project site, could provide potential nesting habitat for the species. Not observed during the field surveys. Any indirect impact are mitigated through MM BIO-3.
Campylorhynchus brunneicapillus sandiegensis	Coastal cactus wren	SSC,BCC MSHCP: Covered	Live in scrubby areas in the Chihuahuan, Sonoran, and Mojave Deserts as well as in coastal sage scrub in California and thorn-scrub areas in Tamaulipas, Mexico. They inhabit areas with cholla, saguaro, and prickly-pear cacti, catclaw acacia, mesquite, whitethorn, desert willow, yucca, palo verde, and other desert shrubs	None. No suitable habitat is found within the Project site. Not observed during the field surveys.
Catostomus santaanae	Santa Ana sucker	FT, SSC MSHCP: Covered	Found in permanent streams with substrates that are generally coarse and consist of gravel rubble, and boulders with growths of filamentous algae.	None. No suitable habitat is found within the Project site. Not observed during the field surveys.
Ceratochrysis longimala	Desert cuckoo wasp	MSHCP: Not Covered	The preferable habitat of the wasp is a hot climate, the most species diversity is found in the hot desert regions, nonetheless, they are also found in the temperate and tropical forests	None. No suitable habitat is found within the Project site. Not observed during the field surveys.
Chaetodipus fallax fallax	Northwestern San Diego pocket mouse	SSC MSHCP: Covered	This species is a common resident of sandy herbaceous areas, often on sandy substrates (rocks or coarse gravel) in southwestern California. In San Diego County the species occurs mainly in arid coastal and desert border areas. Habitats include coastal scrub, chamise-redshank chaparral, mixed chaparral, sagebrush, desert wash, desert scrub, desert succulent shrub, pinyon-juniper, and annual grassland.	None. The site lacks suitable habitat. Not observed during field surveys.
Coccyzus americanus occidentalis	Western yellow-billed cuckoo	FT, SE, FSS, BCC MSHCP:	This species is an uncommon to rare summer resident of valley foothill and desert riparian habitats in scattered locations in California. Formerly much more common and widespread throughout lowland	None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
		Covered	California. Roosts and nests in densely foliaged, deciduous trees and shrubs in extensive thickets, particularly willows.	nesting habitat onsite. Species is a MSHCP covered species. Any indirect impacts during nesting season are mitigated through MM BIO-3. Not observed during field surveys.
Coleonyx variegatus abbotti	San Diego banded gecko	SSC MSHCP: Covered	The species ranges through most of Southern California north into the extreme southern part of Nevada and the southwestern tip of Utah, across northwest, southwest, and southeast Arizona into the bootheel of New Mexico, and south down the western edge of the state of Sonora, Mexico and down the entire length of Baja California. The species occurs in rocky areas in coastal sage and chaparral.	None. The site lacks suitable habitat. Not observed during the field surveys.
Coturnicops noveboracensis	Yellow rail	SSC MSHCP: Not Covered	Yellow Rails occur in shallow marshes with fairly short vegetation. For breeding, taller emergent vegetation like cattails does not attract Yellow Rails, but they sometimes nest nearby, where water is shallower and vegetation shorter. They often nest among sedges and bulrushes. Because water levels change frequently in the prairies, nesting locations are not consistent in some areas from year to year. Migrating Yellow Rails turn up in wet meadows, shallow marshes, and agricultural fields with grassy cover or heavy stubble. Wintering Yellow Rails use shallow wetlands as they do in breeding areas, typically dominated by sedges, rushes, bulrushes, and grasses.	None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys. Any indirect impacts during nesting season are mitigated through MM BIO-3. Not observed during field surveys.
Crotalus ruber	Red-diamond rattlesnake	SSC, FSS MSHCP: Covered	It can be found from the desert, through dense chaparral in the foothills (it avoids the mountains above around 4,000 feet), to warm inland mesas and valleys, all the way to the cool ocean shore. It is most commonly associated with heavy brush with large rocks or boulders. Dense chaparral in the foothills,	Low. Limited habitat is found onsite due to the presence of rodent burrows and ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Any

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
			cactus or boulder associated coastal sage scrub, oak and pine woodlands, and desert slope scrub associations are known to carry populations of the northern red-diamond rattlesnake, however, chamise and red shank associations may offer better structural habitat for refuges and food resources for this species than other habitats. They need rodent burrows, cracks in rocks or surface cover objects.	impacts to the species are mitigated through MM BIO-1. Not observed during field surveys.
Danaus plexippus	Monarch Butterfly	FT MSHCP: Not covered	Monarch butterflies live mainly in prairies, meadows, grasslands and along roadsides, across most of North America.	No milkweed is identified on the Project site which is an obligate host plant for eggs and food source for larvae. The Project site lack suitable habitat for the stages of the monarch, for both breeding and overwintering. This is not a covered species within the MSHCP. Not observed during field surveys.
Diplectrona californica	California diplectronan caddisfly	MSHCP: Not Covered	Habitats can include streams, both cool and warm, lakes, marshes, and ponds.	None. The site lacks suitable habitat. Not observed during field surveys.
Dipodomys merriami parvus	San Bernardino kangaroo rat	FE, SSC MSHCP: Covered	Typically found in Riversidean alluvial fan sage scrub and sandy loam soils, alluvial fans and floodplains, and along washes with nearby sage scrub.	None. The site lacks suitable habitat. Not observed during field surveys.
Dipodomys stephensi	Stephen's kangaroo rat	FE, ST MSHCP: Covered	This species prefers large areas of disturbed or patchy annual and perennial grasslands and open coastal sage scrub. Preferred perennials plant species include buckwheat and chamise and preferred annual plant species include brome grass. The nearest known populations are in Rancho Guejito and at the Naval Weapons Station in Fallbrook.	Low. Limited habitat is found onsite due to the presence of rodent burrows and ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Any impacts to the species are mitigated through MM BIO-2. Not observed during field surveys.
Elanus leucurus	White-tailed kite	BLMS MSHCP: Covered	White-tailed Kites are common in savannas, open woodlands, marshes, desert grasslands, partially cleared lands, and cultivated fields.	None. The site lacks suitable habitat. Not observed during field surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
Eremophila alpestris actia	California horned lark	MSHCP: Covered	Common habitats include prairies, deserts, tundra, beaches, dunes, and heavily grazed pastures.	None. The site lacks suitable habitat. Not observed during field surveys.
Eugnosta busckana	Busck's gallmoth	MSHCP: Not Covered	Coastal sand dunes.	None. The site lacks suitable habitat. Not observed during field surveys.
Empidonax traillii extimus	Southwestern willow flycatcher	FE, SE MSHCP: Covered	Suitable habitat includes riparian woodlands along streams and rivers with mature dense thickets of trees and shrubs.	None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat. Not observed during field surveys. Any indirect impacts are mitigated through MM BIO-3.
Eumops perotis californicus	Western mastiff bat	SSC, BLMS MSHCP: Not covered	Western mastiff bats are found in a variety of habitats, such as semi-arid to arid habitats, including conifer and deciduous woodlands, coastal scrub, annual and perennial grasslands, palm oases, chaparral, desert scrub, and urban, but the species' distribution may be geomorphically determined, occurring primarily where there are significant rock features offering suitable roosting habitat. A cliff dwelling species, where maternity colonies of 30 to several hundred roost generally under exfoliating rock slabs and rock crevices along cliffs. Western mastiff bats can also be found in similar crevices in large boulders and buildings. When roosting in rock crevices they require a sizable drop from their roost in order to achieve flight. Western mastiff bats prefer deep crevices that are at least 15 or 20 feet above the ground. Foraging is concentrated around bodies of water but also includes coastal sage scrub, chaparral, and grassland habitats.	None. The site lacks suitable roosting habitat for the species. Not observed during the field surveys.
Euphydryas editha quino	Quino checkerspot butterfly	FE MSHCP: Covered	Quino checkerspot butterfly habitat is characterized by patchy shrub or small tree landscapes with openings of several meters between large plants, or a landscape of open swales alternating with dense patches of shrubs; such habitats are often collectively	None. The site lacks suitable habitat. Not observed during field surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
			termed "scrublands." Quino will frequently perch on vegetation or other substrates to mate or bask, and they require open areas to facilitate movement. Optimal habitat appears to contain little or no invasive exotic vegetation. Sustained drought conditions can lead to extirpation of local populations, and broad scale climate anomalies may lead to phenological incompatibility between Quino checkerspot butterfly and their host plants.	
Gila orcutti	Arroyo chub	SSC, FSS MSHCP: Covered	Arroyo chub are adapted to survive in cool to warm (10 – 24°C) streams that fluctuate between large winter storm flows, and low summer flows, and the low dissolved oxygen and wide temperature fluctuations associated with this flow regime. They are most common in slow flowing or backwater areas with sand or mud substrate but may also inhabit areas with velocities in excess of 80 cm/s over coarse substrate.	None. The site lacks suitable habitat. Not observed during the field surveys.
Haliaeetus leucocephalus	Bald eagle	SE, BLMS MSHCP:	Bald eagles live within two and a half miles of the coast, bays, rivers, lakes, or other bodies of water, reflecting the availability of their main food source. They typically nest in large, mature, accessible trees, as well as cliffs and man-made structures. They often congregate in select wintering areas	None. The site lacks suitable habitat. Not observed during the field surveys.
Icteria virens	Yellow-breasted chat	SSC MSHCP: Covered	In southern California they are primarily found in tall, dense, relatively wide riparian woodlands and thickets of willows, vine tangles, and dense brush with well-developed understories. Nesting areas are associated with streams, swampy ground, and the borders of small ponds. Breeding habitat must be dense to provide shade and concealment. It winters south to Central America.	None onsite; heard audibly in the Santa Ana river located offsite. Not observed onsite during the field surveys. Any indirect impacts are mitigated through measure MM BIO-3.
Lasiurus xanthinus	Western yellow bat	SSC	Roost in trees, hanging from the underside of a leaf. Commonly found in the southwestern U.S. roosting in	None. The site contains a single palm tree. The closest CNDDB occurrence

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
		MSHCP: Not covered	the skirt of dead fronds in both native and non- native palm trees and have also been documented roosting in cottonwood trees.	recorded is located 1.20 miles to the east on October 4, 1989. Not observed during the field surveys. Furthermore, no bat guano was observed around the single palm tree during the field surveys. Therefore it is determined the site lacks suitable habitat.
Laterallus jamaicensis coturniculus	California black rail	ST, BLMS, BBC, Fully Protected MSHCP: Not covered	Black Rails nest in marshes and wet meadows across North America, including riparian marshes, coastal prairies, saltmarshes, and impounded wetlands. All of the habitats have stable shallow water. Nests are primarily made of southern cattail or spikerush and are elevated above the mud substrate in clumps of vegetation. Black rails have also been known to nest on top of a mat of dead vegetation from the previous years' growth.	None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys. Any indirect impacts are mitigated through MM BIO-3.
Lepus californicus bennettii	San Diego black-tailed jackrabbit	SSC MSHCP: Covered	The black-tailed jackrabbit is a habitat generalist occurring in open areas or semi-open country, typically in grasslands, agricultural fields or sparse coastal scrub. It primarily is found in arid regions supporting short grass habitats. Jackrabbits typically are not found in high grass or dense brush where it is difficult for them to locomote, and the openness of open scrub habitat probably is preferred over dense chaparral. They have also been found in annual grassland, Riversidean sage scrub, alluvial fan sage scrub, Great Basin sagebrush, chaparral, disturbed habitat, southern willow scrub and juniper woodland. They are not found in high mountain forests. It prefers valley bottoms or intermontane valleys.	Low. Limited habitat is found onsite due to the presence of rodent burrows and ruderal brush found onsite. The ruderal habitat is frequently mowed providing less covered for the species. This is a covered species within the MSHCP. Any impacts to the species are mitigated through MM BIO-1. Not observed during field surveys.
Myotis yumanensis	Yuma myotis	BLMS MSHCP: Not Covered	Found in moist and dry forests, riparian zones, grasslands, shrubsteppe, and deserts, and are closely associated with rivers, streams, ponds, and lakes	None. The site lacks suitable habitat. Not observed during the field surveys.
Neotoma lepida	San Diego desert	SSC	Habitat consists of a variety of shrub and desert	None. The site lacks suitable habitat. Not

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
intermedia	woodrat	MSHCP: Covered	habitat, showing a preference to large cactus patches and rock outcroppings.	observed during the field surveys.
Nyctinomops femorosaccus	Pocketed free-tailed bat	SSC MSHCP: Not covered	This bat species prefers rocky desert areas with high cliffs or rock outcrops. Rock crevices in cliffs are preferred as roosting sites, since the bat must drop from the roost to gain flight speed. Typically reproduces in rock crevices, caverns, or buildings. Ranges from southern California to New Mexico.	None. The site lacks suitable habitat. Not observed during the field surveys.
Nyctinomops macrotis	big free-tailed bat	SSC MSHCP: Not covered	Big free-tailed bats mainly inhabit rugged, rocky habitats in arid landscapes. It has been located in a variety of plant associations including desert shrub, woodlands, and evergreen forests.	None. The site lacks suitable habitat. Not observed during the field surveys.
Oncorhynchus mykiss irideus pop. 10	Steelhead – Southern California DPS	FE, SCE MSHCP: Not Covered	Historically, this species populated all coastal streams of southern California with permanent flows, as either resident or anadromous forms, or both. Today, the species occurs mostly within intermittent streams. The DPS includes all naturally spawned anadromous Coastal Rainbow trout populations downstream of natural and human-made barriers in streams from the Santa Maria River (San Luis Obispo County) to the Tijuana River on the U.S.-Mexico border. They are most abundant in the four largest watersheds in the northern portion of their range: the Santa Maria, Santa Ynez, Ventura, and Santa Clara rivers.	None. The site lacks suitable habitat. Not observed during the field surveys.
Pandion haliaetus	Osprey	WL MSHCP: Covered	Found in plenty of shallow water where fish are plentiful. They often built nests on small islands or structures over bodies of water that are difficult for predators to get to.	None. The site lacks suitable habitat. Not observed during field surveys.
Perognathus longimembris brevinasus	Los Angeles pocket mouse	SSC MSHCP: Covered	Habitat consists of alluvial deposits of sandy soil in sparsely vegetated areas.	None. The site lacks suitable habitat. Not observed during field surveys.
Onychomys	Southern	SSC	Common in arid desert habitats of the Mojave Desert	None. The site lacks suitable habitat. Not

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
torridus ramona	grasshopper mouse	MSHCP: Not covered	and southern Central Valley of California. Alkali desert scrub and desert scrub habitats are preferred, with somewhat lower densities expected in other desert habitats, including succulent shrub, wash, and riparian areas. Also occurs in coastal scrub, mixed chaparral, sagebrush, low sage, and bitterbrush habitats. Uncommon in valley foothill and montane riparian, and in a variety of other habitats.	observed during field surveys.
Phrynosoma blainvillii	Coast horned lizard	SSC, BLMS MSHCP: Covered	Occurs in a variety of vegetation types including coastal sage scrub, chaparral, annual grassland, oak woodland and riparian woodlands.	None. The site lacks suitable habitat. Not observed during field surveys.
Polioptila californica californica	Coastal California gnatcatcher	FT, SSC MSHCP: Covered	A non-migratory, permanent resident of coastal sage scrub habitat, which is a broad category of vegetation that includes the following plant communities: Ventura coastal sage scrub, Diegan coastal sage scrub, maritime succulent scrub, Riversidean sage scrub, Riversidean alluvial fan sage scrub, southern coastal bluff scrub, and coastal sage-chaparral scrub. They also use chaparral, grassland and riparian habitats next to coastal sage scrub, but these habitats are used dispersal and foraging. They avoid nesting on steep slopes.	None. The site lacks suitable habitat. Not observed during field surveys.
Rhaphiomidas terminates abdominalis	Delhi Sands flower-loving fly	FE MSHCP: Not covered	The Delhi Sands flower-loving fly is dependent on Delhi sands and Delhi sand dunes with less than 50% vegetation cover. Typical vegetation includes California buckwheat, California croton (*Croton californicus*), and telegraph weed (*Heterotheca grandiflora*).	None. The site lacks suitable habitat. Not observed during the field surveys.
Rhinichthys osculus ssp. 8	Santa Ana speckled dace	SSC MSHCP: Not covered	The Santa Ana speckled dace requires permanent flowing streams with summer water temperatures of 17-20 C. Typically, these streams are maintained by outflows of cool springs. The dace inhabits shallow cobble and gravel riffles	None. The site lacks suitable habitat. Not observed during the field surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
Salvadora hexalepis virgultea	coast patch-nosed snake	SSC MSHCP: Not covered	Inhabits semi-arid brushy areas and chaparral in canyons, rocky hillsides, and plains.	None. The site lacks suitable habitat. Not observed during the field surveys.
Setophaga petechial	Yellow warbler	SSC, BBC MSHCP: Covered	Riparian plant associations in close proximity to water. Frequently found nesting and foraging in willow shrubs and thickets, and in other riparian plants including cottonwoods, sycamores, ash, and alders.	None onsite; heard audibly in the Santa Ana river located offsite. Not observed onsite during the field surveys. Any indirect impacts are mitigated through measure MM BIO-3.
Spea hammondii	Western spadefoot	SSC, BLMS MSHCP: Covered	May be found in coastal sage scrub, open chaparral, pine-oak woodlands and grassland habitats, but is most common in grasslands with vernal pools or mixed grassland/coastal sage scrub areas. Within these habitats, they require rain pools/vernal pools in which to reproduce and that persist with more than three weeks of standing water in which to metamorphose successfully. They can also breed in slow-moving streams (e.g., areas flooded by intermittent streams). Water breeding sites must lack fish, bullfrogs, and crayfish in order for to successfully reproduce and metamorphose. They estivates in sandy, gravelly soil in upland habitats adjacent to potential breeding sites in burrows approximating 1 meter in depth.	None. The site lacks suitable habitat. Not observed during the field surveys.
Spinus lawrencei	Lawrence's goldfinch	BCC MSHCP: Not covered	Found mostly in dry, open oak woodlands with chaparral, weedy fields, and a source of freshwater. They also nest and forage in coastal scrub, pinyon pine–juniper woodlands, and streamside habitats	None. The site lacks suitable habitat. Not observed during the field surveys.
Taricha torosa	Coast Range newt	SSC MSHCP: Covered	Found in coastal areas and coastal range mountains in oak forests, woodlands, or rolling grasslands	None. The site lacks suitable habitat. Not observed during the field surveys.
Thamnophis hammondii	Two-striped gartersnake	SSC,BLMS	Found near permanent fresh water, often along streams with rocky beds bordered by willows and other riparian vegetation, including mountain slopes and desert oases	None. The site lacks suitable habitat. Not observed during the field surveys.

Scientific Name	Common Name	Status	General Habitat Description	Potential For Occurrence within the Project site
Taxidea taxus	American badger	SSC MSHCP: Not covered	Badgers prefer to live in dry, open grasslands, fields, and pastures. They are found from high alpine meadows to sea level	None. The site lacks suitable habitat. Not observed during the field surveys.
Vireo bellii pusillus	Least Bell's vireo	FE, SE MSHCP: Covered	Least Bell's vireos primarily occupy riverine riparian habitats that typically feature dense cover within 1-2 m of the ground and a dense, stratified canopy. Typically, it is associated with southern willow scrub, cottonwood-willow forest, mule fat scrub, sycamore alluvial woodland, coast live oak riparian forest, arroyo willow riparian forest, or mesquite in desert localities. It uses habitat which is limited to the immediate vicinity of water courses. 2,000 feet elevation in the interior. This species is generally restricted to major river systems in San Diego County.	None. While suitable habitat occurs within the Santa Ana River located offsite to the east of the Project site, the Project site does not include suitable foraging or nesting habitat onsite. Not observed during field surveys. Any indirect impacts are mitigated through MM BIO-3.

Legend

Federal Endangered Species Act (ESA) Listing Codes: federal listing is pursuant to the Federal Endangered Species Act (ESA) of 1973, as amended. The official federal listing of Endangered and Threatened Animals is published in the Federal Register, 50 CFR 17.11.
FE = federally listed as endangered: any species, subspecies, or variety of plant or animal that is in danger of extinction throughout all or a significant portion of their range.
FT = federally listed as threatened: any species, subspecies, or variety of plant or animal that is considered likely to become endangered throughout all or a significant portion of its range within the foreseeable future.
FC = federal candidate for listing.
FPT = federally proposed threatened.

California Endangered Species Act (CESA) Listing Codes: state listing is pursuant to §2074.2 and §2075.5 (California Endangered Species Act of 1984) of the Fish and Game Code, relating to listing of Endangered, Threatened and Rare species of plants and animals. The official California listing of Endangered and Threatened animals is contained in the California Code of Regulations, Title 14, and Section 670.5.
SE = state listed as endangered: any species, subspecies, or variety of plant or animal that are in serious danger of becoming extinct throughout all, or a significant portion, of their range.
ST = state listed as threatened: any species, subspecies, or variety of plant or animal that, although not presently threatened with extinction, is likely to become an endangered species in the foreseeable future.
SCT = state candidate for listing as threatened.
SCE = state candidate for listing as endangered.

California Department of Fish and Wildlife (CDFW):
SSC = species of special concern: status applies to animals which 1) are declining at a rate that could result in listing, or 2) historically occurred in low numbers and known threats to their persistence currently exist. The CDFW has designated certain vertebrate species as "species of special concern" because declining population levels, limited ranges, and/or continuing threats have made them vulnerable to extinction.
Fully protected: animal species may not be taken or possessed at any time and no licenses or permits may be issued for their take except for collecting these species for necessary scientific research and relocation of the bird species for the protection of livestock.
WL = watch list: these birds have been designated as "Taxa to Watch" in the *California Bird Species of Special Concern report* (Shuford and Gardali 2008). The report defines "Taxa to Watch" as those that are not on the current special concern list that (1) formerly were on the 1978 (Remsen 1978) or 1992 (CDFG 1992) special concern lists and are not currently listed as state threatened and endangered; (2) have been removed (delisted) from either the state or federal threatened and endangered lists (and remain on neither), or (3) are currently designated as "fully protected" in California.
United States Fish and Wildlife Service (USFWS):
BCC = USFWS bird of conservation concern: listed in the USFWS'S 2008 *Birds of Conservation Concern* report. The report identifies species, subspecies, and populations of all migratory non-game birds that, without additional conservation actions, are likely to become candidates for listing under the ESA. While all of the bird species included in the report are priorities for conservation action, the list makes no finding with regard to whether they warrant consideration for ESA listing.

United States Forest Service (USFS):
FSS = Forest Service sensitive: those plant and animal species identified by a Regional Forester that are not listed or proposed for listing under the ESA and for which population viability is a concern, as evidenced by: (a) significant current or predicted downward trends in population numbers or density or (b) significant current or predicted downward trends in habitat capability that would reduce a species' existing distribution."

United States Bureau of Land Management (BLM):
BLMS = BLM sensitive: those plant and animal species on BLM administered lands and that are (1) under status review by the USFWS/NMFS; or (2) whose numbers are declining so rapidly that federal listing my become necessary, or (3) with typically small and widely dispersed populations; or (4) those inhabiting ecological refugia or other specialized or unique habitats. BLM policy is to provide the same level of protection as USFWS candidate species.

California Department of Forestry and Fire Protection (CDF):
CDF: S = CDF sensitive: species is a California Department of Forestry and Fire Protection sensitive species. The Board of Forestry classifies as sensitive species those species that warrant special protection during timber operations.

APPENDIX E

Burrowing Owl Focused Survey

Information Summary

Report Date:	August 30, 2024
Report Title:	Results of MSHCP Focused Burrowing Owl Survey for the SEC Archibald and Grapewin Project in City of Eastvale
Principal Investigator:	Brianna Bernard Carlson Strategic Land Solutions 27134A Paseo Espada, Suite 323 San Juan Capistrano, CA 92675 949.542.7042 Office 916.218.2644 Mobile bbernard@carlsonsls.com

Report Summary

This letter describes the methods and results of a habitat assessment and focused burrowing owl (Athene cunicularia [BUOW]) surveys for the SEC Archibald and Grapewin Project (Project) located in the City of Eastvale. The Project site located located east of Archibald Street and south of Grapewin Street, within the City of Eastvale in Riverside County, California, within the City of Eastvale in Riverside County, California. The Study Area is located within Section 00 Township 2 South, Range 7 West in the United States Geological Survey (USGS) 7.5-Minute Topographic Map *Corona North* Quadrangle. The Assessor's Parcel Number (APN) includes 130-07-021, 130-07-015, and 130-08-004. Access to the Project site is off of Grapewin Street, as well as Archibald Avenue. Please refer to attached Figure 1 and Figure 2. The Project site and surrounding 500-foot buffer (Study Area) was surveyed.

The surveys were performed on the following days:

Survey Date	Time	Temp.	Surveys	Surveyors
March 28, 2024	0930 - 1215	70° F - 72° F Clear skies	Burrowing Owl Assessment	Brianna Bernard
June 11, 2024	0623 - 830	68° F 100% cloud cover	Burrowing Owl #1	Brianna Bernard and Sarah Vasquez
June 25, 2024	0615 - 0825	66° F - 79° F Clear skies	Burrowing Owl #2	Brianna Bernard and Sarah Vasquez
July 16, 2024	0630 - 0830	64° F - 66° F clear skies	Burrowing Owl #3	Brianna Bernard and Shawn Hernandez

Survey Date	Time	Temp.	Surveys	Surveyors
August 8, 2024	0630 - 0845	68° F - 75° F Clear skies and 50% cloud cover at approximately 8:00 am	Burrowing Owl #4,	Brianna Bernard and Dylan Donahoe

The Project site consists of several developed animal pens for goats, sheep, cattle, etc. The Project site also contains 2 residential units with a pool house, covered horse arena, and stables. Overall, the site includes developed communities and ruderal habitat consisting of non-native species. Located to the east of the Project site is the Santa Ana River. Habitat within the Santa Ana River consists of arundo thickets and southern cottonwood willow riparian forest and open water.

The site is bounded by Vantage Point Church on the south, residential development to the west and north, and the Santa Ana River to the east.

Scattered burrows were observed on the Project site, specifically around the perimeter near the fencing. All observed burrows were inspected carefully for any evidence of BUOW presence. Based on the lack of direct observation of BUOW or evidence of BUOW activity (e.g. evidence of active burrows with whitewash, pellets, feather, etc.) during the survey, the Study Area is not currently considered occupied by BUOW.

Field Survey Methods

Prior to the field survey, available literature and databases including the California Natural Diversity Database (CNDDB), were reviewed to identify sensitive habitats and special status wildlife species, including BUOW in the vicinity of the Study Area. Consistent with the MSHCP Survey Instructions, a burrowing owl habitat assessment was conducted on was conducted on March 28, 2024 to determine any suitable BUOW habitat onsite. Following the habitat assessment, additional focused surveys took place on June 11, June 25, July 16, and August 8, 2024. Pedestrian survey transects were spaced approximately 15 to 25 meters apart in suitable habitat to allow 100 percent visual coverage of the ground surface.

According to the MSHCP guidelines, the biologist should also walk the perimeter of the property, which consists of a 150-meter (approximately 500 feet) buffer zone around the Project boundary. If permission to access the buffer area cannot be obtained, the biologist shall not trespass, but visually inspect adjacent habitats with binoculars. Parcels of land that could not be accessed (e.g. private property) were viewed using binoculars from vantage points to survey for BUOW activity or signs thereof, as well as other nesting bird activity.

The Project site and surrounding 500-foot buffer, collectively referred to as the Study Area, was assessed for the suitability to support burrowing owls and all suitable burrows were inspected for signs of use by burrowing owls. After the initial assessment of the site and surrounding areas, the Project site was systematically walked in an east-west direction of the Project site within suitable habitat for BUOW. Adjacent suitable areas, where accessible, were also surveyed to determine possible presence of owls within the buffer area (500-feet surrounding the Project site). Areas not accessible were surveyed using binoculars.

All encountered burrows or structure entrances were checked for the presence of BUOWs, molted feathers, cast pellets, prey remains, eggshell fragments, tracks, or excrement at or near a burrow entrance. Natural or man-made structures and debris piles that could support BUOWs were also surveyed.

All wildlife species encountered, visually or audibly during the field survey, were identified and recorded in the field notes. Binoculars were used to aid in the identification of observed wildlife. Photographs were taken to document existing conditions within the Project site (Attachment A).

Results

The BUOW habitat assessment was conducted on March 28, 2024 on the Project site and surrounding 500-foot area within suitable Burrowing Owl habitat (Figure 2). Following the habitat assessment, additional focused surveys took place on June 11, June 25, July 16, and August 8, 2024. The survey was performed by Carlson Strategic Land Solutions (CSLS) biologists. The Biologists performed transects within areas that could potentially provide suitable BUOW habitat. Weather conditions during the survey was conducive to observing signs of BUOW activity, such as owls outside burrows. Temperatures during the surveys ranged from 70° F to 95° F with predominant sunny, clear skies and 0-2 mph winds. The survey was conducted during typical BUOW peak activity time and was not conducted during rain, high winds (> 20 miles per hour), dense cloud cover >75%, or extreme temperatures.

The Project site consists of several developed animal pens for goats, sheep, cattle, etc. The Project site also contains 2 residential units with a pool house, covered horse arena, and stables. Overall, the site includes developed communities and ruderal habitat consisting of non-native species. Located to the east of the Project site is the Santa Ana River. Habitat within the Santa Ana River consists of arundo thickets and southern cottonwood willow riparian forest and open water.

The site is bounded by Vantage Point Church on the south, residential development to the west and north, and the Santa Ana River to the east.

The Study Area contains a small population of California ground squirrels (*Spermophilus beecheyi*), specifically located along the perimeter fencing and around the animal pens, which in turn results in various burrows that could potentially support suitable BUOW foraging and nesting habitat. These areas were inspected carefully for the presence of BUOWs and active nests. No pellets, whitewash, feathers, tracks or any other signs indicative of burrowing owl presence were observed within the Study Area.

The Study Area provides suitable foraging and nesting habitats to support wildlife. Bird activity during the survey was moderate. During the field surveys the following species were observed/detected:

Birds:

- Chicken (*Gallus gallus domesticus*)
- Peacock (*Pavo cristatus*)
- Common yellowthroat (*Geothypis trichas*)
- Rufous-crowned sparrow (*Aimophila ruficeps*)
- Anna's hummingbird (*Calypte anna*)
- American crow (*Corvus brachyrhynchos*)
- American Kestrel (*Falco sparverius*)
- Bewick's wren (*Thryomanes bewickii*)
- Nuttall's woodpecker (*Picoides nuttallii*)
- California towhee (*Melozone crissalis*)
- California quail (*Callipepla californica*)
- Black phoebe (*Sayornis nigricans*)
- Spotted towhee (*Pipilo maculatus*)
- Northern mockingbird (*Mimus polyglottos*)
- house finch (*Haemorhous mexicanus*)
- mourning dove (*Zenaida macroura*)
- American bushtit (*Psaltriparus mimimus*)
- song sparrow (*Melospiza melodia*)
- Red-tailed hawk (*Buteo jamaicensis*)
- turkey vulture (*Cathartes aura*)
- yellow warbler (*Setophaga petechia*)
- Great horned Owl (*Bubo virginianus*)
- Barn owl (*Tyto alba*)
- Lesser goldfinch (*Spinus psaltria*)
- Song sparrow (*Melospiza melodia*)
- Yellow-breasted chat (*Icteria virens*)
- Turkey vulture (*Cathartes aura*)

Reptiles:

- western fence lizard (*Sceloporus occidentalis*)

Mammals

- California ground squirrel (*Spermophilus (Otospermophilus) beecheyi*)

Conclusion

No BUOWs or evidence of BUOWs were observed on site within the Study Area during the focused surveys. A majority of the Project site is characterized by vegetated ruderal and disturbed/developed habitats and contains suitably sized burrows and satellite burrows to provide suitable nesting habitat for BUOW. Much of the buffer area is developed or consists of the Santa Ana River. California ground squirrels and their burrows were observed within the Study Area. These burrows were actively utilized by the California ground squirrels and contained no BUOW or keys signs (sight, whitewash, burrows, bones, feathers, pellets, nests, and calls). Therefore, based on the focused surveys it is determined the Project site is not occupied by BUOW.

Certification

I hereby certify that the statements furnished above and in the attached exhibits present data and information required for this biological evaluation, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief.

Site Photographs

Most of the Project site consists of disturbed/developed and ruderal habitat.

The Project site is regularly mowed. Two residential homes occur on the Project site.

Suitable burrows were observed within the Project Site.

Suitable burrows were observed around the fences.

Some burrows were observed within the flat ruderal areas.

Some burrows were observed along the driveway.

Executive Summary

The SEC Archibald and Grapewin Project proposes to construct residential units with associated streets and infrastructure on the approximately 8-acre site. The Project site consists of ruderal and disturbed/developed vegetation communities.

The Project site is bounded by Vantage Point Church on the south, residential development to the west and north, and the Santa Ana River to the east.

The Project is located within the Eastvale Area Plan of the Riverside County Multiple Species Habitat Conservation Plan (MSHCP); however, the Project site is not located within any MSHCP Criteria Areas, Cell Groups, or Subunits. The Project is not located within any Reserve Features (Core, Linkage, Public/Quasi Public Land etc.). However, the Project site is adjacent to the Santa Ana River, which is designated as a wildlife corridor known as Existing Core A within the MSHCP. MSHCP Existing Core A consists of Prado Basin and the Santa Ana River and functions as a linage, connecting Orange County to the west with San Bernardino County to the north. The Existing Core A is constrained on all sides by existing urban development and agricultural use, and planned land uses surrounding the Core exists largely of high impact land uses such as city and community development.

Therefore, the Project is subject to:

- Riparian and Riverine Areas (Section 6.1.2)
- Narrow Endemic Plant Survey (Section 6.1.3)
- Urban/Wildland Interface Guidelines (Section 6.1.4)
- Western burrowing owl (*Athene cunicularia hypugaea*) (Section 6.3.2)

No MSHCP riparian/riverine features occur onsite, therefore no Determination of Biologically Superior or Equivalent Preservation (DBESP) is required. Furthermore, no MSHCP sensitive species associated with riparian/riverine areas protected under Section 6.1.2 were observed during the field surveys and no suitable habitat occurs for Section 6.1.2 plant and wildlife species. The proposed project is consistent with Section 6.1.2 of the MSHCP.

Portions of the Project site are located within the Narrow Endemic Plant Species Survey Areas (NEPSSA) Number 7, which include the following target species:

- San Diego ambrosia
- Brand's phacelia
- San Miguel savory

No special status plant species were observed during the 2024 focused surveys and none are expected to occur onsite due to the lack of suitable habitat or suitable soil found on the Project site; therefore, there are no potential impacts to special status plants due to Project implementation and no mitigation required. Therefore, the Project is consistent with the goals and objectives within MSHCP Section 6.1.3.

The Project site is not designated as an existing or proposed MSHCP Conservation Area or Core Linkage areas. However, the Project site is adjacent to the Santa Ana River, which is designated as a wildlife corridor known as Existing Core A within the MSHCP. MSHCP Existing Core A consists of Prado Basin and the Santa Ana River and functions as a linage, connecting Orange County to the west with San Bernardino County to the north. The Existing Core A is constrained on all sides by existing urban development and agricultural use, and planned land uses surrounding the Core exists largely of high impact land uses such as city and community development.

The Project site is composed of large spans of ruderal and disturbed habitat lacking suitable cover and resources that are typically associated with wildlife movement areas (i.e. water). Furthermore, the Project site is located at a substantially higher elevation than the Existing Core A of the MSHCP. The Project site currently includes several residential homes and fenced animal pens. Furthermore, north, west, and south of the Project is residential development and Vantage Point Church further restricting any regional movement. Therefore, the Project site is not used as a wildlife corridor, linkage, or specific travel route to and from nursery sites other important resources.

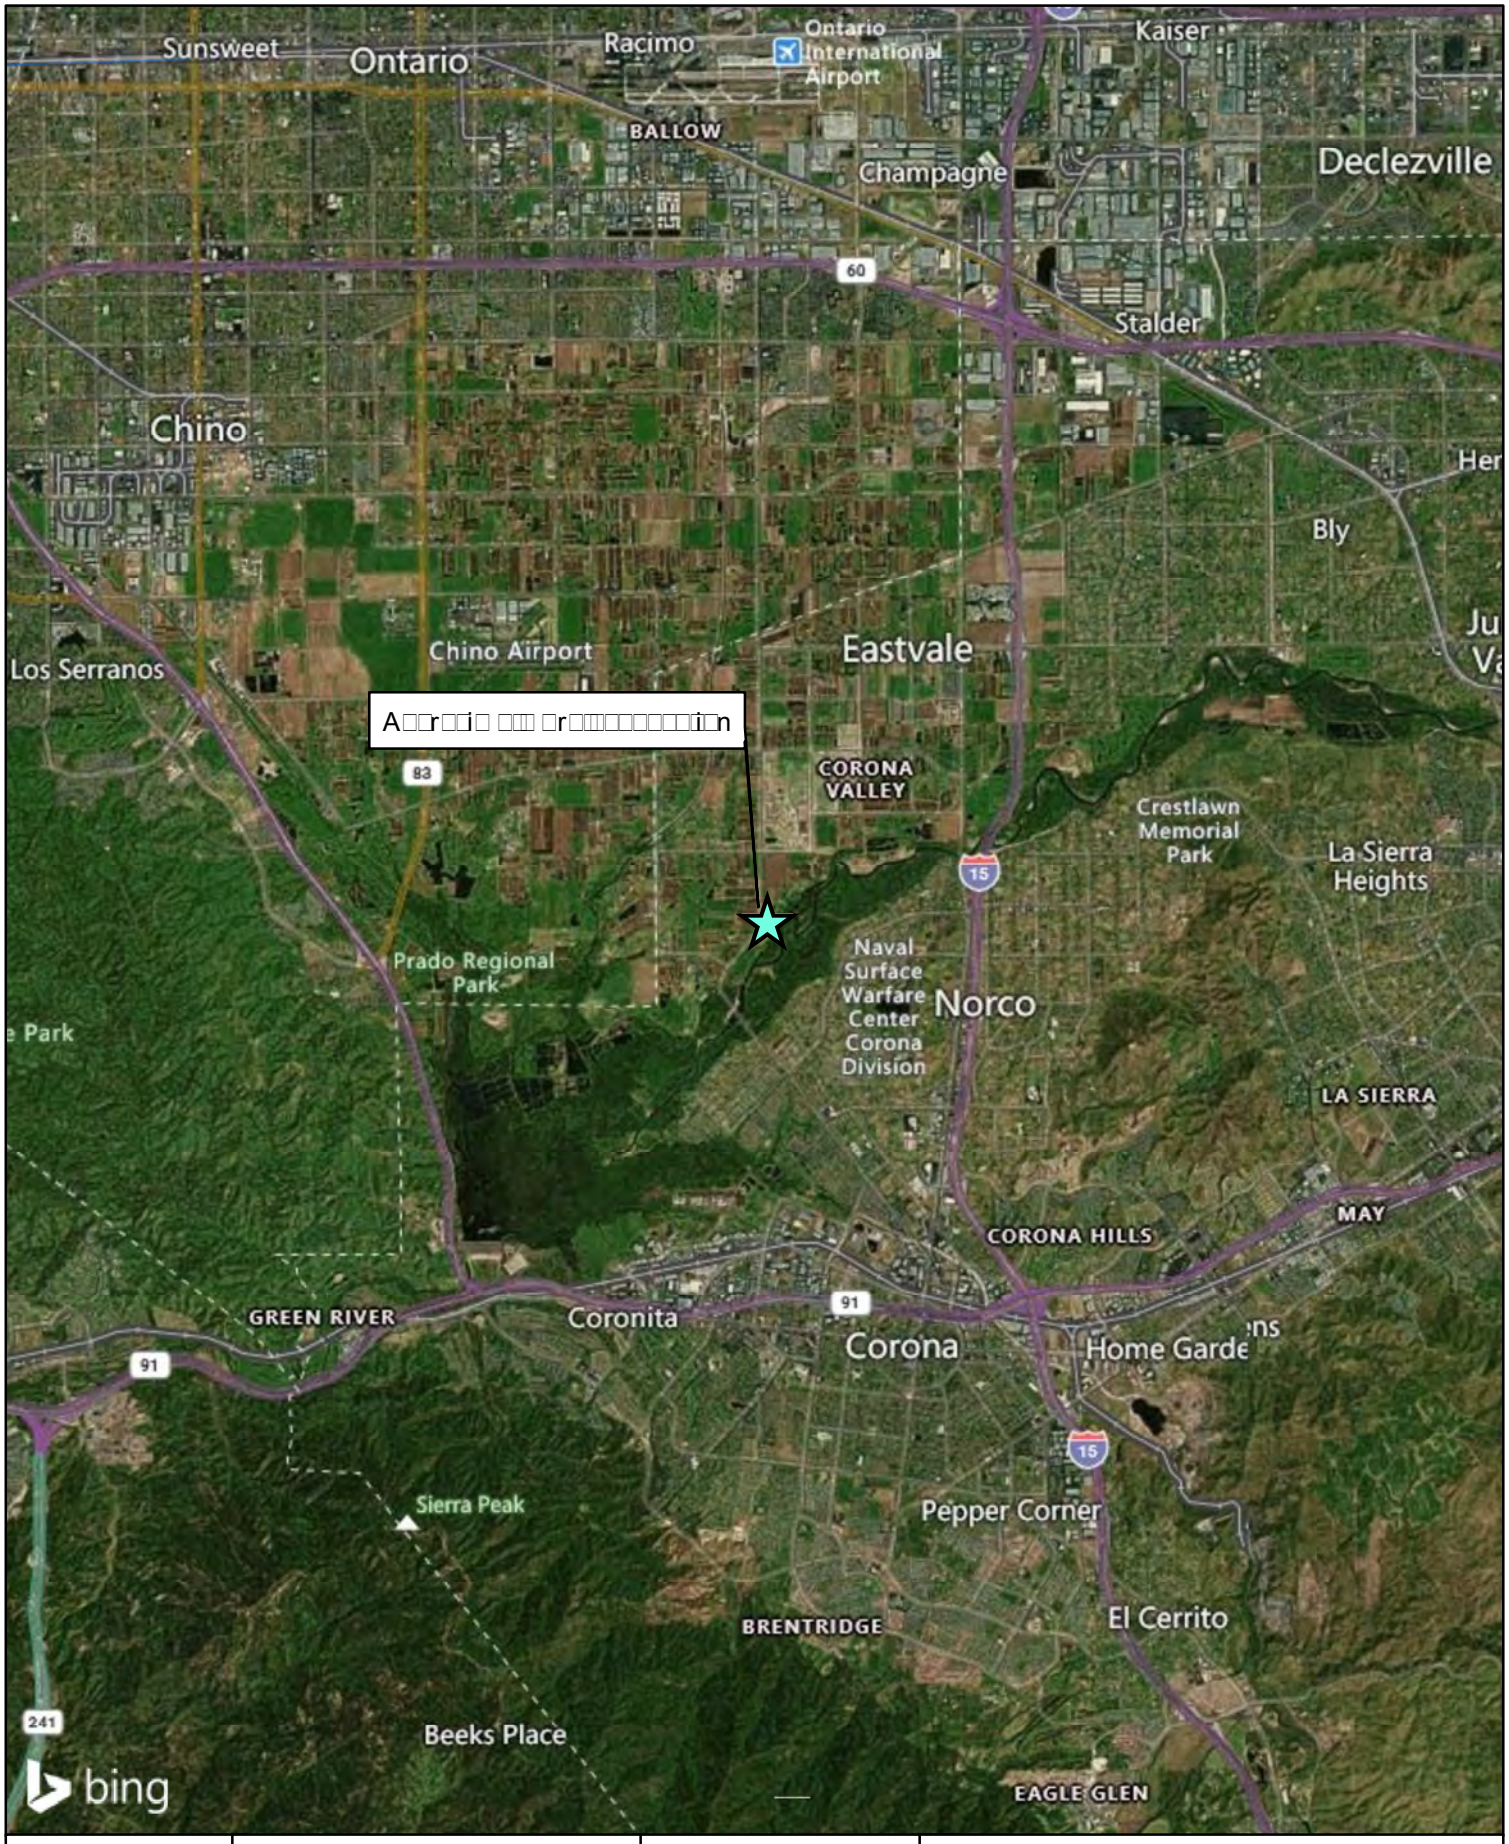
However, due to the adjacency to Existing Core A and preserving the high-quality riparian habitat found within the Santa Ana River, the Project site may have indirect impact to the Existing Core A due to noise and or lighting. Therefore, the Project would adhere to the urban/wildland guidelines interface for the management of edge factors.

The site was evaluated for suitable burrowing owl habitat pursuant to Section 6.3.2, Species Survey Requirements. It is determined the Project site is not occupied by BUOW. No BUOWs or evidence of BUOWs were observed within

the Project site during the focused surveys. A majority of the Project site was characterized by ruderal fields, which may provide suitable nesting habitat for BUOW but lack proper vegetation cover for the species. Much of the buffer area is developed. California ground squirrels and their burrows were observed within the Study Area. These burrows were actively utilized by the California ground squirrels and contained no BUOW or keys signs (sight, whitewash, burrows, bones, feathers, pellets, nests, and calls). However, a pre-construction survey will be conducted by a qualified biologist 30 days prior to the commencement of any ground disturbing activities. The proposed project is consistent with Section 6.3.2 of the MSHCP.

SEC ARCHIBALD AND GRAPEWIN PROJECT

Consistency Determination



Pursuant to MSHCP Section 6.1.2: *Protection of Species Associated with Riparian/Riverine Areas*
MSHCP Section 6.1.3: Narrow Endemic Plants
MSHCP Section 6.3.2: *Species Survey Requirements*

I. INTRODUCTION

The following Consistency Determination has been prepared by Carlson Strategic Land Solutions (CSLS), pursuant to Section 6.1.2 *Protection of Species Associated with Riparian/Riverine areas and Vernal Pools,* Section 6.1.3 *Narrow Endemic Plant Species,* Section 6.1.4 *Urban/Wildland Guidelines Interface*and Section 6.3.2 *Species Survey Requirements* of the Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP). This report presents the findings of the Consistency Determination for the approximately 8-acre Project Site known as the SEC Archibald and Grapewin in the City of Eastvale.

II. DEFINITION OF PROJECT AREA

The proposed Project site encompasses approximately 8-acres and is located in the City of Eastvale, California. The Project site can be found on the U.S Geological Survey (USGS) Map *Corona North* topographic map. The Project Site can be found within Section 00, Township 2 South, and Range 7 West. The Project Site is located is located n The Study Area is located east of Archibald Street and south of Grapewin Street. (Figures 1 and 2). The Project's Assessor Parcel Numbers (APN) includes 130-070-021, 130-070-015, and 130-080-004. Access to the Project site is from Grapewin Street, as well as Archibald Avenue.

SEC Archibald and Grapewin Project

FIGURE 2

The Project site consists of several developed animal pens for goats, sheep, cattle, etc. The Project site also contains 2 residential units with a pool house, covered horse arena, and stables. Overall, the site includes developed communities and ruderal habitat consisting of non-native species. Located to the east of the Project site is the Santa Ana River. Habitat within the Santa Ana River consists of arundo thickets and southern cottonwood willow riparian forest and open water. The Santa Ana River is designated as Existing Core A wildlife corridor and core linkage area. As such the Project would adhere to the urban/wildland guidelines interface for the management of edge factors and prevent any indirect impacts.

The site is bounded by Vantage Point Church on the south, residential development to the west and north, and the Santa Ana River to the east.

The Project Study Area discussed in this analysis consists of the 8-acre Project site and surrounding 500-foot buffer area. The buffer area was evaluated for potential off-site impacts.

The Project is located within the Eastvale Area Plan of the MSHCP. The Project is not located within any MSHCP Criteria Areas, Cell Groups, or Subunits. Portions of the Survey Area are located within MSHCP Section 6.1.2 Riparian and Riverine Areas, Section 6.1.3 Narrow Endemic Plants, and Section 6.3.2 Species Survey Requirements for the western burrowing owl (*Athene cunicularia hypugaea*) habitat. The Project site is not located within MSHCP survey areas for Criteria Area Plant Species, Amphibians, Mammals, Wildland corridor, or Special Linkage Areas. However, the Project is subject to adhere to the appropriate Urban/Wildland Guidelines due to the adjacency of the Santa Ana River and Existing Core A to prevent any indirect impacts.

III. Project Description

As shown in Figure 3, the Project proposes to construct 76 single-family lots, open space lots, water quality basins, and landscape. All development is anticipated to occur on the Project site, and no direct impacts to the Santa Ana River is anticipated.

IV. Methodology

The Project site is located within the Western Riverside Multiple Species Habitat Conservation Plan (MSHCP), but is not located within any Criteria Cells, Cell Groups, or Subunits. Portions of the Project Study Area are located within the

survey areas for narrow endemic plants and burrowing owl (*Athene cunicularia*) (Figure 4).

A number of these species have survey requirements based on a project's occurrence within a designated MSHCP survey area and/or based on the presence of suitable habitat. These include:

- Riparian/Riverine and Vernal Pools (MSHCP Volume I, Section 6.1.2);
- Species associated with riparian/riverine areas and vernal pool habitats, including least Bell's vireo, southwestern willow flycatcher, western yellow-billed cuckoo, and three species of listed fairy shrimp (MSHCP Volume I, Section 6.1.2);
- Narrow Endemic Plant Species (MSHCP Volume I, Section 6.1.3), as identified by the Narrow Endemic Plant Species Survey Areas (NEPSSA);
- Guidelines Pertaining to the Urban/Wildlands Interface (MSHCP Section 6.1.4);
- Criteria Area Plant Species (MSHCP Volume I, Section 6.3.2) identified by the Criteria Area Plant Species Survey Areas (CAPSSA);
- animal species (BUOW, mammals, amphibians) identified by survey areas (MSHCP Volume I, Section 6.3.2); and
- Best Management Practices (MSHCP Volume I, Appendix C).

An additional 28 species (MSHCP Volume I, Table 9.3) not yet adequately conserved have species-specific objectives for the species to become adequately conserved. However, these species do not have project-specific survey requirements.

The Western Riverside County Resource Conservation Authority (RCA) MSHCP Information Application website was reviewed to verify any overlays that may occur on the Project site.

Biologists and Regulatory Specialists from Carlson Strategic Land Solutions (CSLS) conducted site-specific surveys on the Study Area. Surveys included a general biological survey, vegetation mapping, a habitat assessment and focused burrowing owl survey, general plant survey, and a delineation of any jurisdictional waters and wetlands. The survey was conducted on the Project site by CSLS biologists. Findings from the field surveys conducted on March 28, June 11, June 25, July 16, and August 8, 2024 are included in the Biological Resource Assessment for the SEC Archibald and Grapewin Project prepared by Carlson Strategic Land Solutions dated August, 2024 (January 2025 Biological Resource Assessment).

CSLS conducted biological studies in three main components in order to identify and evaluate actual or potential impacts to biological resources associated with the proposed Project, including: (1) vegetation mapping; (2) site-specific biological surveys to evaluate the presence/absence of special-status species (or potentially suitable habitat) to the satisfaction of the MSHCP, CEQA, and Federal and State regulations; and (3) delineation of aquatic resources (including wetlands/riparian habitat) subject to the jurisdiction of the US Army Corps (Corps), Regional Water Quality Control Board (RWQCB) and California Department of Fish and Wildlife (CDFW).

Based on the RCA MSHCP Mapper and GIS Data, the Project site is not located within lands identified as Reserve Linkage or a Core area. However, the Project is located adjacent to the Santa Ana River which is designated as Existing Core A. Therefore, analysis and adherence of Urban/Wildlands Interface guidelines is warranted.

Based on the RCA MSHCP Mapper and GIS Data, the Project site does not occur within a predetermined Survey Area for criteria area species. No additional surveys are required.

Based on the RCA MSHCP Mapper and GIS Data, the Project site does not occur within a predetermined Survey Area for amphibians. No additional surveys are required.

Based on the RCA MSHCP Mapper and GIS Data, the Project site does not occur within a predetermined Survey Area for mammals. No additional surveys are required.

Since the Project is located within the MSHCP, Best Management Practices (MSHCP Volume I, Appendix C) will be implemented as part of Project Design features in order to be consistent with the MSHCP.

Based on the RCA MSHCP Mapper and GIS Data, the Project site is subject to Consistency Analysis with MSHCP Sections 6.1.2 (Riparian/Riverine Areas and Vernal Pools), 6.1.3 (Narrow Endemic Plants), 6.1.4 (Urban/Wildlands Interface Guidelines), and 6.3.2 (Special Survey Requirements).

GENERAL NOTES
1. THE PROJECT IS LOCATED WITHIN FLOOD ZONE X BASED ON FEMA FLOOD INSURANCE RATE MAP PANEL 687 OF 3805, RIVERSIDE COUNTY CALIFORNIA.
2. THIS IS A CALIFORNIA DENSITY BONUS LAW PROJECT (SEE SITE SUMMARY TABLE). IT IS ALSO BEING PROCESSED WITH A PRELIMINARY SB 330 APPLICATION
3. PUBLIC STREET IMPROVEMENTS PER CITY OF EASTVALE STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION.
4. THOMAS BROS. MAP BOOK PAGE: 713, GRID A4, 2024 EDITION
5. NO SUBSURFACE SEPTIC DISPOSAL PROPOSED.
6. ALL EXISTING STRUCTURES ON SITE TO BE DEMOLISHED.
7. ARCHIBALD TO BE OPEN TO THE PUBLIC AND IN-TRACT STREETS ARE TO BE PRIVATE.
8. ENTRY AT GRAPEWIN STREET TO BE USED FOR EMERGENCY ACCESS ONLY.
9. SINGLE FAMILY RESIDENTIAL DEVELOPMENT WILL NOT BE GATED.
10. ALL LOTS HAVE 1% MIN. GRADE TOWARDS THE STREET FOR DRAINAGE PURPOSES.
11. THERE ARE NO REMAINING PARCELS.
12. RUNOFF FROM THIS TRACT WILL BE ROUTED INTO THE AN EXISTING RIVERSIDE FLOOD CONTROL STORM DRAIN LINE THAT DISCHARGES INTO THE SANTA ANA RIVER.
13. PROJECT SITE IS NOT WITHIN COMMUNITY SERVICES DISTRICT.
14. THERE IS ONE KNOWN WELL ON THIS PROPERTY. IT WILL BE ABANDONED AND CAPPED.
15. SITE IS SUBJECT TO LIQUEFACTION.
16. ANY OPEN SPACE LOTS TO BE MAINTAINED BY HOME OWNERS ASSOCIATION.
17. PROJECT TO COMPLY WITH SCHEDULE A IMPROVEMENTS PER THE SUBDIVISION MAP ACT.
18. SIDE YARD W/ GATE SETBACK - 4' MIN.
    SIDE YARD W/ NO GATE SETBACK - 4' MIN.
    REAR YARD SETBACK - 10' MIN.
    STREET REAR YARD SETBACK - 5' MIN.
19. PROJECT WALLS AND FENCING WILL BE SHOWN ON THE TENTATIVE TRACT MAP AND CONCEPTUAL GRADE PLAN.
20. THIS PROJECT IS EXEMPT FROM HYDRAULIC CONDITIONS OF CONCERN (H.C.O.C.)
21. THE TENTATIVE TRACT MAP INCLUDES THE ENTIRE CONTIGUOUS OWNERSHIP OF THE LAND DIVIDER

SEC Archibald and Grapewin Project

1799

FIGURE 4

The field studies focused on a number of primary objectives that would satisfy the special provisions of the MSHCP and also comply with CEQA requirements, including: (1) general reconnaissance surveys and vegetation mapping; (2) general wildlife surveys; (3) habitat assessments and focused surveys for special-status plants; (4) habitat assessments and focused biological surveys for special-status animals (including species designated by MSHCP survey areas); (5) wildlife movement analysis; (6) assessments of riparian/riverine areas and vernal pool habitats; and (7) delineation of areas subject to the jurisdiction of the Corps, RWQCB, and CDFW. Observations of plant and wildlife species were recorded during the survey.

The January 2025 Biological Resource Assessment evaluates individual plants and animal species based on their special-status. For the purpose of the Biological Assessment, plants were considered special-status based on one or more of the following criteria:

- Listing through the Federal and/or State Endangered Species Act (ESA);
- Occurrence in the California Native Plant Society (CNPS) Rare Plant Inventory (List 1B, 2, 3, or 4);
- California Natural Diversity Database (CNDDB) Global/State Rankings; and/or
- Evaluation and coverage under the MSHCP.

Prior to conducting fieldwork, pertinent literature on the flora of the region was examined. A thorough archival review was conducted using available literature and other historical records. These resources included, but were not limited to, the following: CNPS *Inventory of Rare and Endangered Plants of California* [CNPS 2024]; CNDDB for the Corona North and surrounding USGS quadrangle maps (CNDDB 2024); and MSHCP Document, including Sections 6.1.2, Section 6.1.3, and 6.3.2; and Table 9.3 (Riverside County Integrated Project 2003).

Vegetation communities were characterized utilizing vegetation alliances in accordance with The Manual of California Vegetation, Second Edition (MCVII) (Sawyer et al. 2009). Where necessary, deviations were made when areas did not fit into exact habitat descriptions provided by MCVII. Plant communities were mapped in the field directly onto a 200-scale (1"=200') aerial photograph.

Section 6.1.2 Riparian/Riverine Areas and Vernal Pools

Volume I, Section 6.1.2 of the MSHCP describes the process through which protection of riparian/riverine areas and vernal pools would occur within the MSHCP Plan Area. The purpose is to ensure that the biological functions and

values of these areas throughout the MSHCP Conservation Area are maintained. The MSHCP requires that as projects are proposed within the overall Plan Area, the effect of those projects on riparian/riverine areas and vernal pools must be addressed. The Study Area was evaluated for the presence/absence of MSHCP riparian/riverine areas and vernal pools. With respect to riparian habitat, the Study Area was evaluated for the potential habitat to support the least Bell's vireo (*Vireo bellii pusillus*), southwestern willow flycatcher (*Empidonax traillii traillii*), the western yellow-billed cuckoo (*Coccyzus americanus occidentalis*), listed fairy shrimp, and other species identified in Section 6.1.2 of the MSHCP.

The Study Area was evaluated to determine the limits of (1) Corps jurisdiction pursuant to Section 404 of the CWA; (2) RWQCB jurisdiction pursuant to Section 401 of the CWA and Porter-Cologne; (3) CDFW jurisdiction pursuant to Division 2, Chapter 6, Section 1600 of the Fish and Game Code; and (4) MSHCP riparian/riverine areas and vernal pools. Suspected jurisdictional areas were field checked for the presence of definable channels and/or wetland vegetation, soils, and hydrology. Suspected wetland habitats on the Project site and surrounding buffer area were evaluated using the methodology set forth in the Corps' 1987 Wetland Delineation Manual (Wetland Manual) and the 2008 Regional Supplement to the Corps Wetland Delineation Manual: Arid West Region Version 2.0 (Arid West Supplement) and according to the March 2023 definition of Waters of the US. While in the field, the limits of MSHCP Features were recorded onto a 200-scale color aerial photograph using visible landmarks and limits of jurisdiction were recorded with a Trimble R1 Global Positioning System (GPS) receiver with ARC Collector application with sub-meter accuracy.

Section 6.1.3 Narrow Endemic Plants

The Project site falls within Narrow Endemic Plants (Survey Area Number 7). The CNDDB and MSHCP were reviewed to determine known occurrences of special- status plants in the region. Based on this information, a list of target plants (including their suitable habitats and soil) was developed and incorporated into a survey program to achieve the following goals: (1) characterize the vegetation associations and land use; (2) prepare a detailed floral compendium; and (3) document the distribution and abundance of any special-status plant species within the Project site.

General surveys were conducted to identify potential sensitive plant habitats, and to establish the accuracy of the data identified from the literature review and previous biological assessment and search. An aerial photograph and topographic map were used to determine the community types and other physical features that may support sensitive species or communities within the Project site and surrounding buffer area. The reconnaissance surveys also considered the guidelines adopted by CNPS and CDFW (Nelson 1984, CNPS 2001).

Where potentially suitable habitat was present, focused plant surveys included those MSCHP Covered Species identified by the NEPSSA Survey Area Number 7. For any locations with positive survey results, the MSHCP requires that 90 percent of those portions of the property that provide for long-term conservation value for the identified species shall be avoided until it is demonstrated that conservation goals for the particular species are met. Findings of equivalency shall be made demonstrating that the 90-percent standard has been met

Section 6.3.2 Special Survey Requirements
The CNDDB and MSHCP were initially consulted to determine known occurrences of special- status animals in the region. Based on this information, a list of target animal species (including their suitable habitats) was developed and incorporated into a survey program to achieve the following goals: (1) prepare a detailed faunal compendium; and (2) implement general reconnaissance field work and focused surveys to document the distribution and abundance of the special-status animal species within the Study Area.

The Study Area was evaluated for suitable burrowing owl habitat, and where present, focused surveys were conducted for the burrowing owl to satisfy the requirements of the MSHCP and CEQA.

General Biological Surveys
Wildlife species were evaluated and detected during field surveys by sight, call, tracks, and scat. Site reconnaissance was conducted in such a manner as to allow inspection of the Study Area by direct observation, including the use of binoculars. Observations of physical evidence and direct sightings of wildlife were recorded in field notes during each visit. A complete list of wildlife species observed within the Study Area is provided in the June 2024 Biological

Resource Assessment. Scientific nomenclature and common names for vertebrate species referred to in this report follow the Complete List of Amphibian, Reptile, Bird, and Mammal Species in California (CDFW 2023), Standard Common and Scientific Names for North American Amphibians, Turtles, Reptiles, and Crocodilians 6th Edition, Collins and Taggert (2009) for amphibians and reptiles, and the AOU Checklist (2010) for birds. The methodology (including any applicable survey protocols) utilized to conduct the focused surveys or the habitat assessments for special-status animals is included below.

Wildlife Movement Analysis

In order to evaluate direct, indirect, and cumulative impacts of the proposed Project on wildlife movement, an analysis of wildlife use/movement was conducted for the Study Area. The analysis considered the movement and use of large mammals (i.e., mountain lion and mule deer), medium-sized mammals (mesocarnivores), and other wildlife such as small mammals, birds, reptiles, and amphibians. Methods utilized for the wildlife analysis included a review of existing information on wildlife use (including the MSHCP), general and focused biological surveys to document the presence/absence of wildlife, and observations of mammal tracks and scat.

V. ENVIRONMENTAL SETTING

A. Existing Conditions

The Project site consists of several developed animal pens for goats, sheep, cattle, etc. The Project site also contains 2 residential units with a pool house, covered horse arena, and stables. Overall, the site includes developed communities and ruderal habitat consisting of non-native species. Located to the east of the Project site is the Santa Ana River. Habitat within the Santa Ana River consists of arundo thickets and southern cottonwood willow riparian forest and open water.

The site is bounded by Vantage Point Church on the south, residential development to the west and north, and the Santa Ana River to the east.

B. Soils

The United States Department of Agriculture Natural Resources Conservation Service lists five soil types (series) for the Project site (Figure 6). Please see below for the following soil type, which was used to determine the possibility for sensitive wildlife and plant species. No unique soil types as identified by the

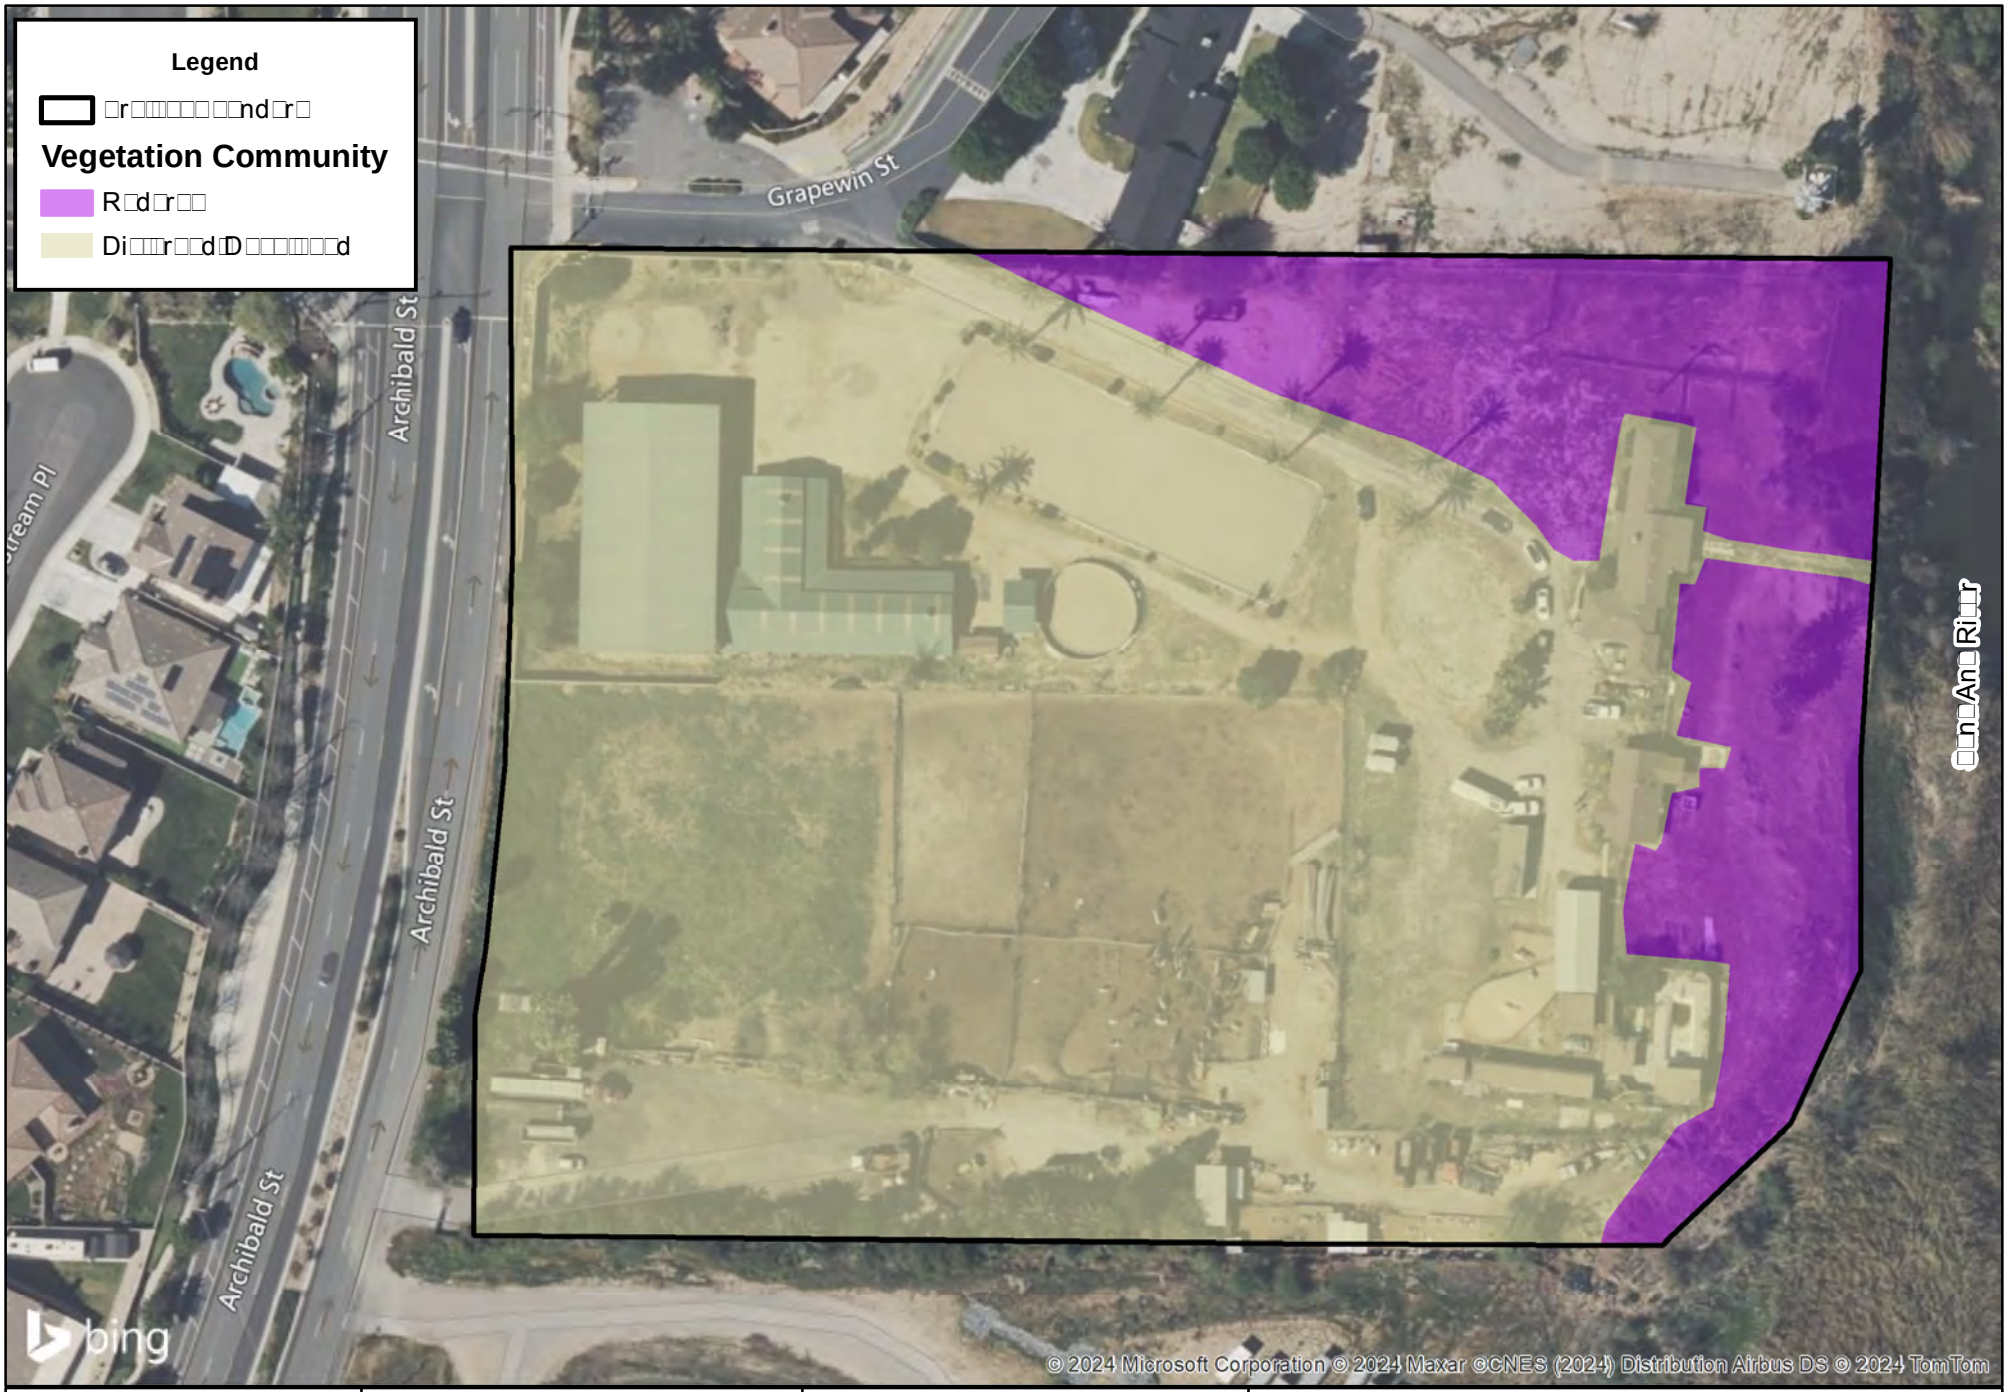
MSHCP, such as clays for vernal pools or soils for sensitive or rare plants, exist on the Project site. Furthermore, no soils that would potentially provide hydrophilic soils for vernal pools occur onsite.

The following soil types are mapped within the Study Area and shown on Figure 6:

- Grangeville sandy loam, sandy substratum, drained, saline-alkali , 0 to 5 percent slopes (GsB)
- Grangeville fine sandy loam, poorly drained, saline-alk ali, 0 to 5 percent slopes (GuB)
- Pachappa fine sandy loam, 0 to 2 percent slopes (PaA)
- Ramona very fine sandy loam, 0 to 8 percent slopes, eroded (ReC2)
- Terrace escarpments (TeG)

C. Topography and Hydrology

The Project site does not contain any jurisdictional features. Santa Ana River occurs to the east of the Project site within the 500-foot buffer and is considered Waters of the State and Waters of the United States, as regulated by CDFW, RWQCB, and the Corps. No impacts are anticipated to occur to Santa Ana River due to Project implementation.

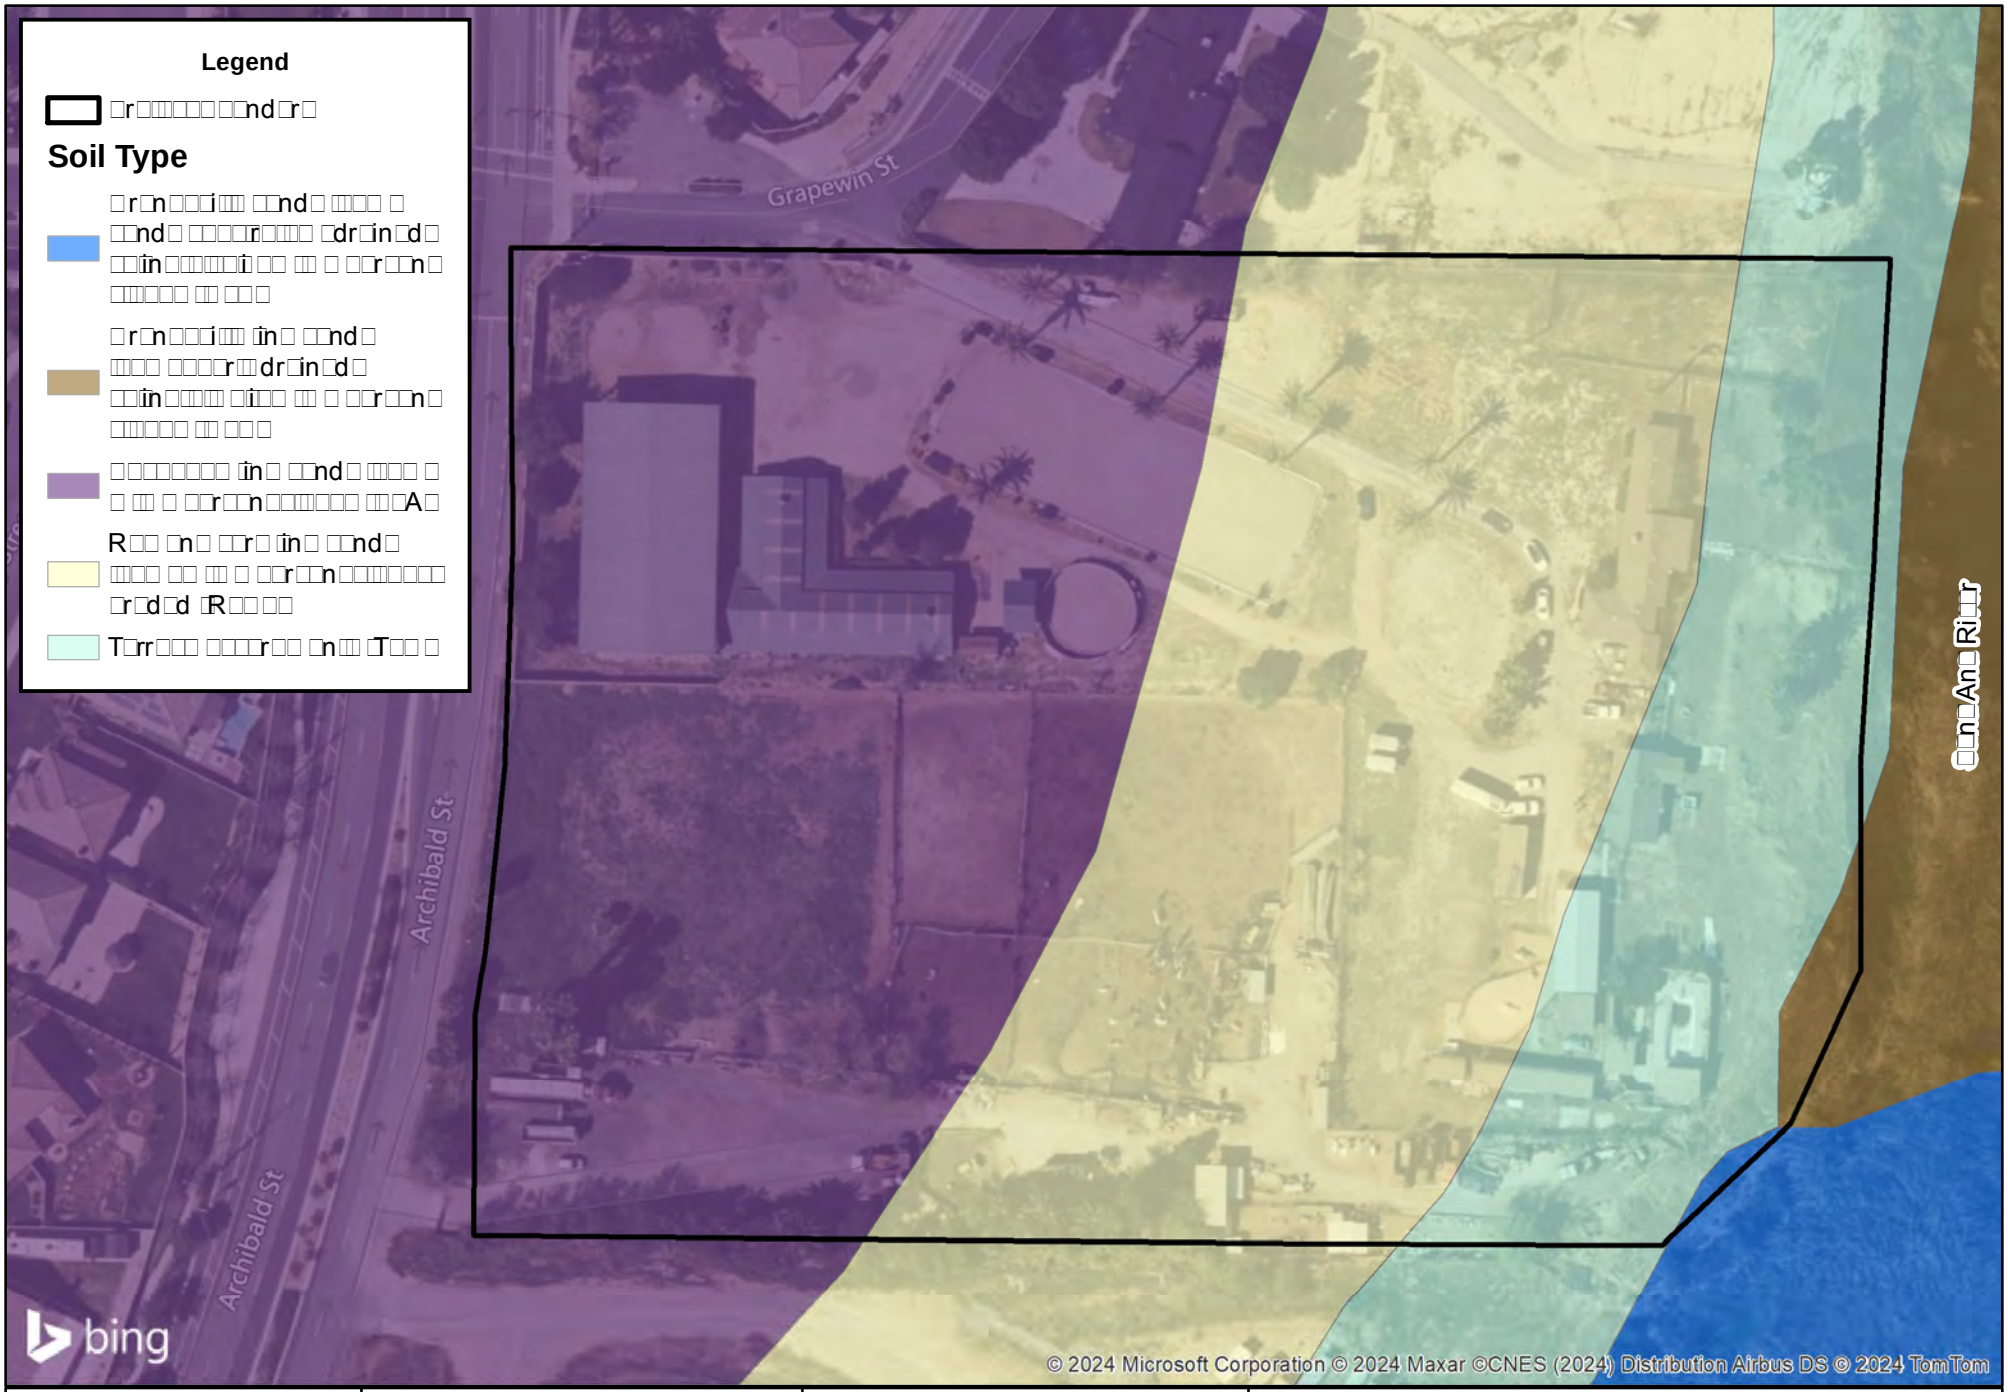


D. Plant Communities

Several plant communities were observed within the Study Area. The acreages of plant communities are shown in Table 1 and depicted in Figure 5. Site photographs are included within the January 2025 Biological Resource Assessment also provide representative photographs of site conditions.

Table 1. Vegetation Community Observed Onsite

Vegetation Community	Acreage within the Project site (acres)
Ruderal	1.64
Disturbed/Developed	6.66
TOTAL	8.30



The general description of the habitat observed during the field survey are described below.

SEC Archibald and Grapewin Project

1805

FIGURE 5

SEC Archibald and Grapewin Project

1806

FIGURE 6

Ruderal
The Project site contains portions of the ruderal vegetation community. These areas are regularly mowed and maintained. The vegetation within this area is comprised of predominantly of summer mustard (*Hirschfeldia incana*). Other species include tocalote (*Centaurea melitensis*), canary island date palm (*Phoenix canariensis*), tree tobacco (*Nicotiana glauca),* wall barley (*Hordeum murinum*), cheeseweed (*Malva parviflora*), bristly ox tongue (*Helminthotheca echioides*), storksbill (*Erodium moschatum),* lemon trees (*Citrus limon*), oleander (*Nerium oleander*), prickly pear (*Opuntia littoralis),* and red brome (*Bromus rubens*).

Disturbed/Developed
The developed areas include animal pens, previously used equestrian corals and arena, residential homes, horse stalls, and animal pens. Ornamental species occur within this community and include Russian thistle (*Salsola australis*), horseweed (*Erigeron canadensis*), mustard, tocalote, carrotwood (*Cupaniopsis anacardioides*), pine tree (*Pinus ssp.*),a single cottonwood (*Populus fremontii),* Brazilian peppertree (*Schinus terebinthifolia*), and canary island date palm.

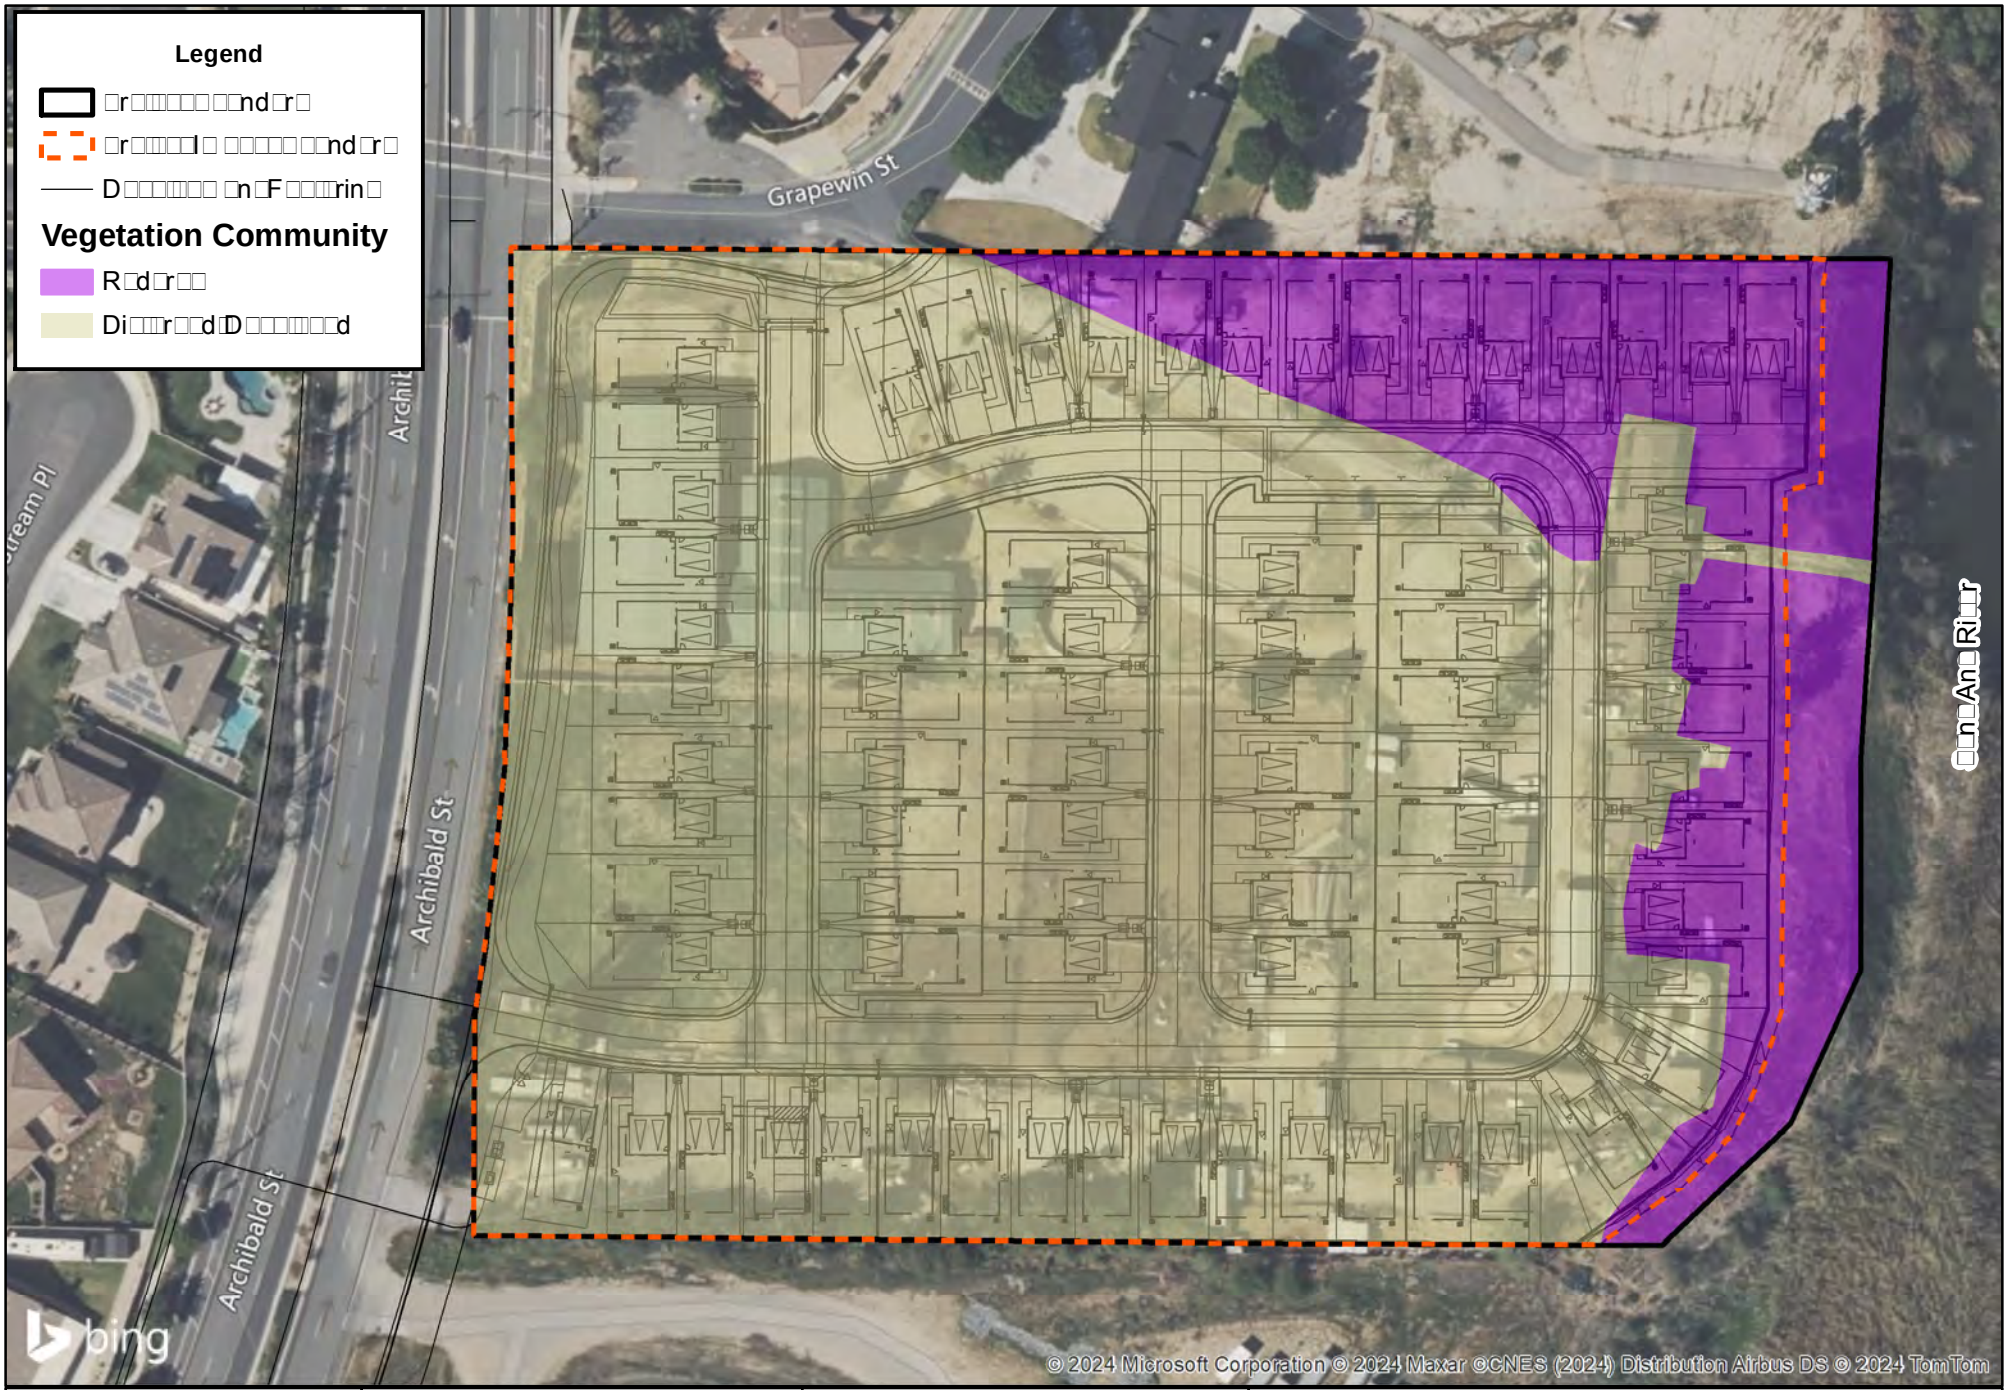
500-foot Buffer Area
Areas found to the north and west of the Project site are developed with single-family residential developments. To the south is developed with Vantage Point Church. To the east of the Project site is Santa Ana River.

E. Other MSHCP Sections

Based on the RCA MSHCP Mapper and GIS Data, the Project site is not:

- within a predetermined Survey Area for mammals. No additional surveys are required.

Since the Project is located within the MSHCP, Best Management Practices (MSHCP Volume I, Appendix C) will be implemented as part of Project Design features in order to be consistent with the MSHCP.



VI. IMPACT ANALYSIS

Proposed impacts to vegetation communities are summarized in Table 2 below. The determination of impacts in this analysis is based on the proposed Project development plan (Figure 3) and the biological values of the habitat and/or sensitivity of plant and wildlife species to be affected. Any recommended

mitigation measures to address impacts are discussed below, along with compliance of existing regulations. Based on the preliminary plans, the following vegetation impacts are anticipated (Figure 7). The Project site heavily disturbed/developed with Ruderal habitat, therefore, impacts as a result of Project implementation are to common vegetation species.

Table 2. Proposed Vegetation Communities Impacts

Vegetation Community	Existing Vegetation (acres)	*Impacts (acres)*	Avoided (acres)
Ruderal	1.64	1.23	0.41
Disturbed/Developed	6.66	6.65	0.01
TOTAL	8.30	7.88	0.42

SEC Archibald and Grapewin Project

1809

FIGURE 7

A. Section 6.1.2 -- Protection of Species Associated with Riparian/Riverine Areas

1. Description and Quantification of Unavoidable Impacts to Riparian/Riverine Areas

No MSHCP Riverine/Riparian features occur onsite. The offsite MSHCP Riverine/Riparian will not be impacted due to Project implementation.

2. Impacts to Species Protected under Section 6.1.2

No Riverine/Riparian habitat occurs onsite and no Section 6.1.2 special status plants were detected. Likewise, the Project site did not contain any suitable habitat for the avian species listed in Section 6.1.2: Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools. However, The Project site is located adjacent to the Santa Ana River, which is suitable habitat for Section 6.1.2 Sensitive Avian Species. Implementation of the Project may indirectly impact these Section 6.1.2 Sensitive Avian Species during breeding season should construction take place during the typical nesting season.

3. Vernal Pools

No evidence of vernal pools, seasonal depressions, seasonally inundated road ruts or other wetland features were recorded on the Project Site. Vernal pools are depressions in areas where a hard-underground layer prevents rainwater from draining downward into the subsoils. When rain fills the pools in the winter and spring, the water collects and remains in the depressions. In the springtime, the water gradually evaporates away, until the pools became completely dry in the summer and fall. Vernal pools tend to have an impermeable layer that results in ponded water. The soil texture (the amount of sand, silt, and clay particles) typically contains higher amounts of fine silts and clays with lower percolation rates. Pools that retain water for a sufficient length of time will develop hydric cells. Hydric cells form when the soil is saturated from flooding for extended periods of time and anaerobic conditions (lacking oxygen or air) develop.

No indication of clay substrates or hydric soils were documented within the Project Site. Furthermore, a review of prior google aerials was reviewed to determine if inundated features were present during years of high rainfall when features would certainly be documented. Aerials taken in 2011 represent an ideal baseline during which known (previously documented) inundated vernal pools, seasonal depressions and road ruts can easily be seen. No sign or indication of inundation was documented within the Project Site during a review of historic aerials.

In summary, none of the conditions (i.e., no inundated depressions including road ruts, hydric soils, historic inundation, etc.) were observed on documented within the Project site. No features are present that would support fairy shrimp. No standing water or other sign of areas that pond water was observed onsite.

B. Section 6.1.3 – Narrow Endemic Plants

The Project site is located within the Narrow Endemic Plant Species Survey Area (NEPSSA) Number 7 overlay, which include the following target species:

- San Diego ambrosia (*Ambrosia pumila*)
  Status: California Rare Plant Rank 1B.1, federally endangered
  Habitat(s): Habitats supporting chaparral, coastal scrub, valley and foothill grasslands, and vernal pools. Observed in sandy loam or clay soils, sometimes alkaline soils. Known from 20 to 415 meters (65 to 1360 feet) MSL. Blooms April through October.
  Status onsite: None. The Project site lacks suitable habitat and soils. Not observed during field surveys and focused narrow endemic plant surveys.

- Brand's Star Phacelia (*Phacelia stellaris*)
  Status: California Rare Plant Rank 1B.1
  Habitat(s): Habitats supporting coastal dunes and coastal scrub Known from below 1 to 400 meters (5 to 1,310 feet) MSL. Blooms March through June.
  Status onsite: None. None. The Project site lacks suitable habitat and soils. Not observed during field surveys and focused narrow endemic plant surveys.

- San Miguel Savory (*Clinopodium chandleri*)
  Status: California Rare Plant Rank 1B.2
  Habitat(s): Rocky areas in chaparral, cismontane woodland, coastal scrub, riparian woodland, and valley and foothill grassland. Soils include rocky and gabbroic substrates. Known from 120 - 1075 meters (395 - 3525 feet) MSL. Blooms March through July.
  Status onsite: None. None. The Project site lacks suitable habitat and soils. Not observed during field surveys and focused narrow endemic plant surveys.

Several rare plant surveys were conducted during the blooming periods of the identified species above. No special status plant species were observed during the focused 2024 narrow endemic plant surveys and, and none are expected to occur onsite due to the lack of suitable habitat or suitable soil found on the Project site.

C. Section 6.1.4 Urban/Wildlands Interface

The Project site is not designated as an existing or proposed MSHCP Conservation Area or Core Linkage areas. However, the Project site is adjacent to the Santa Ana River, which is designated as a wildlife corridor known as Existing Core A within the MSHCP. MSHCP Existing Core A consists of Prado Basin and the Santa Ana River and functions as a linage, connecting Orange County to the west with San Bernardino County to the north. The Existing Core A is constrained on all sides by existing urban development and agricultural use, and planned land uses surrounding the Core exist largely of high impact land uses such as city and community development.

The Project site is composed of large spans of ruderal and disturbed habitat lacking suitable cover and resources that are typically associated with wildlife movement areas (i.e. water). Furthermore, the Project site is located at a substantially higher elevation than the Existing Core A of the MSHCP. The Project site currently includes several residential homes and fenced animal pens. Furthermore, north, west, and south of the Project is residential development and Vantage Point Church further restricting any regional movement. Therefore, the Project site is not used as a wildlife corridor, linkage, or specific travel route to and from nursery sites other important resources. However, indirect impacts may occur due to the adjacency to the Existing Core A.

D. Section 6.3.2 -- Species Survey Requirements

Per the MSHCP BUOW Survey Instructions, a Habitat Assessment was conducted on March 28, 2024 to determine any suitable BUOW habitat onsite. Burrows were observed onsite along the fence line as well as debris piles. Following the habitat assessment, additional focused surveys took place on June 11, June 25, July 16 and August 8, 2024 as identified within January 2025 Biological Resource Assessment. The surveys were conducted during typical BUOW peak activity time and was not conducted during rain, high winds (> 20 miles per hour), dense cloud cover >75%, or extreme temperatures.

No BUOWs or evidence of BUOWs were observed on site within the Study Area during the focused surveys. A majority of the Project site is characterized by vegetated ruderal and disturbed/developed habitats and contains suitably sized burrows and satellite burrows to provide suitable nesting habitat for BUOW. Much of the buffer area is developed or is consists of the Santa Ana River. California ground squirrels and their burrows were observed within the

Study Area. These burrows were actively utilized by the California ground squirrels and contained no BUOW or keys signs (sight, whitewash, burrows, bones, feathers, pellets, nests, and calls). Therefore, based on the focused surveys it is determined the Project site is not occupied by BUOW. The Project is considered consistent with MSHCP Guidelines. Additional information can be found in the Biological Report.

VII. Description of Avoidance, Mitigation Measures and Consistency

The Project site is not located within any MSHCP Criteria Areas, Cell Groups, or Subunits. Furthermore, the Project site is not located in survey areas for Amphibians, Mammals, or Special Linkage areas. The Project site is subject to Riparian and Riverine Areas pursuant to MSHCP Section 6.1.2, Narrow Endemic Plants pursuant to MSHCP Section 6.1.3, Urban/Wildlands Interface Guidelines pursuant to MSHCP Section 6.1.4, and Western Burrowing Owl overlay pursuant to MSHCP Section 6.3.2.

No MSHCP Riparian/Riverine features occur onsite. The Santa Ana River occurs to the east of the Project site within the 500-foot buffer that meet the definition of riparian and/or riverine as outline within the MSHCP Section 6.1.2. The Project site does not contain suitable habitat for any of the riparian/riverine vernal pool species listed in Section 6.1.2 of the MSHCP, including listed fairy shrimp. No impacts to those species listed in Section 6.1.2 of the MSHCP are associated with Project implementation due to the lack of suitable habitat onsite. Specifically, the Project site lacks suitable soils, sign of inundation (seasonal depression, soil cracking, etc.) and/or characteristic vernal pool plant species, no suitable habitat for fairy shrimp is present onsite. The Project site is dominated by well drained substrates and focused surveys for fairy shrimp are not warranted.

No impacts are anticipated to occur to the offsite drainage due to Project implementation. Therefore, no mitigation is required, and no Determination of Biologically Equivalent or Superior Preservation (DBESP) is required. Therefore, the Project is consistent with the goals and objectives within MSHCP Section 6.1.2.

However, during construction of the Project, indirect short-term noise impacts could temporarily affect Section 6.1.2 species heard and identified to occur within the Santa Ana River during breeding season, including the yellow-breasted chat and yellow warbler, both of which were heard within the Santa

Ana River during the biological field surveys. As outlined within January 2025 Biological Resource Assessment Mitigation Measure Bio – 3 (MM BIO-3) is proposed to ensure that activities affecting potential nesting habitat are restricted to periods outside of the avian breeding season or, where activities must occur, pre-activity surveys and avoidance measures are implemented.

MM BIO-3 *Prior to ground disturbances that would impact potentially suitable nesting habitat for avian species, the Project Applicant shall adhere to the following:*

1. *Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for raptors) to the extent feasible to avoid potential impacts to nesting birds and/or ground nesters.*

2. *Any construction activities that occur during typical nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat, on-site and within 300-feet surrounding the site (as feasible), be thoroughly surveyed for the presence of nesting birds by a qualified biologist before commencement ground disturbances. If active nests are identified, the biologist would establish buffers around the vegetation (500 feet for raptors and sensitive species, 200 feet for non-raptors/non-sensitive species). All work within these buffers would be halted until the nesting effort is finished (i.e. the juveniles are surviving independent from the nest). The onsite biologist would review and verify compliance with these nesting boundaries and would verify the nesting effort has finished. Work can resume within these areas when no other active nests are found. Alternatively, a qualified biologist may determine that construction can be permitted within the buffer areas and would develop a monitoring plan to prevent any impacts while the nest continues to be active (eggs, chicks, etc.). Upon completion of the survey and any follow-up construction avoidance management, a report shall be prepared and submitted to City for mitigation monitoring compliance record keeping.*

Portions of the Project site are located within the Narrow Endemic Plant Species Survey Areas (NEPSSA) Number 7, which include the following target species:

- San Diego ambrosia
- Brand's phacelia
- San Miguel savory

No special status plant species were observed during the 2024 focused surveys and none are expected to occur onsite due to the lack of suitable habitat or suitable soil found on the Project site; therefore, there are no potential impacts to special status plants due to Project implementation and no mitigation required. Therefore, the Project is consistent with the goals and objectives within MSHCP Section 6.1.3.

Indirect Project impacts by themselves would not be expected to interfere with the wildlands interface within the region; however, the due to the Santa Ana River being designated as the Existing Core A, the following Urban/Wildland Interface Guidelines will be implemented through the participation in the MSHCP and implemented through the Conditions of Approval. No direct impacts are proposed within the Existing Core A.

Water Quality/Hydrology

The Project will comply with all applicable water quality regulations and Best Management Practices as part of prepared Water Quality Management Plan (WQMP) and Stormwater Pollution Prevention Plan (SWPPP) prepared for the Project and required by Conditions of Approval.

Toxics

Toxic sources within the Project Site would be limited to those commonly associated with landscape activities such as pesticides, insecticides, herbicides, and fertilizers. The Project will comply with all applicable water quality regulations to ensure adequate long-term treatment.

Lighting

Night lighting associated with the proposed Project site improvements that are adjacent to the Santa Ana River and Existing Core A would be directed away to reduce potential indirect impacts to wildlife species.

Noise

The Project site impacts are limited to the western portion of the site, which is adjacent to Archibald Street therefore, already subject to ambient roadway noise. Short-term construction related noise impacts will be reduced by the implementation of the following as implemented within the Conditions of Approval:

- During all Project Site excavation and construction on-site, the construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturers' standards. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the Project site, which includes the Santa Ana River.
- The construction contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and noise sensitive receptors nearest the Project site during all project construction.
- The construction contractor shall limit all construction-related activities that would result in high noise levels according to the construction hours.

Invasive Species

As part of Project design, the landscape plans do not utilize any invasive species adjacent to the Santa Ana River/Existing Core A.

Implementation of the aforementioned guidelines will minimize Project indirect impacts to a less than significant level and would be consistent with the goals and objectives within MSHCP Section 6.1.4.

Furthermore, based on the Habitat Assessment and focused burrowing owl surveys it is determined the Project site is not occupied by BUOW. No BUOWs or evidence of BUOWs were observed within the Project site during the focused surveys. A majority of the Project site was characterized by ruderal fields, which may provide suitable nesting habitat for BUOW but lack proper vegetation cover for the species. Much of the buffer area is developed. California ground squirrels and their burrows were observed within the Study Area. These burrows were actively utilized by the California ground squirrels and contained no BUOW or keys signs (sight, whitewash, burrows, bones, feathers, pellets, nests, and calls).

Due to the negative results of the focused surveys and with the City's participation in the MSHCP, a BUOW pre-construction survey outlined within the January 2025 Biological Resource Assessment Mitigation Measure BIO-4

(MM BIO-4) will be required to ensure protection for this species and compliance with the conservation goals as outlined within the MSHCP.

MM BIO-4: *Prior to impacts, a pre-construction survey for burrowing owl within the Study Area (Project site and surrounding 500-foot buffer) shall be conducted by a qualified biologist where suitable habitat is present within 30 days to the commencement of ground disturbing activities.*

If active burrowing owl burrows are detected during the breeding season, all work within 300 feet of any active burrow will be halted until that nesting effort is finished. The on-site biologist will review and verify compliance with these boundaries and will verify the nesting effort has finished. Work can resume when no other active burrowing owl nesting efforts are observed.

If active burrowing owl burrows are detected outside the breeding season, then passive and/or active relocation pursuant to a Burrowing Owl Exclusion Plan that shall be prepared by the Applicant and approved by the County of Riverside Environmental Programs Department (EPD) in consultation with CDFW. The Burrowing Owl Exclusion Plan shall be prepared in accordance with guidelines in the CDFW Staff Report on Burrowing Owl (March 2012) and MSHCP.

Burrowing owl burrows shall be excavated with hand tools by a qualified biologist when determined to be unoccupied and backfilled to ensure that animals do not reenter the holes/dens.

Therefore, with the implementation of the Mitigation Measure the Project is consistent with the goals and objectives within MSHCP Section 6.3.2.

Since the Project is located within the MSHCP, Best Management Practices (MSHCP Volume I, Appendix C) will be implemented as part of Project Design features in order to be consistent with the MSHCP.

VIII. CERTIFICATION

I hereby certify that the statements furnished above and in the attachments present the data and information required for this biological evaluation, and that the facts, statements, and information presented are true and correct to the best of my knowledge

Signature:  Date: 01/31/2025

APPENDIX C
PHASE I CULTURAL RESOURCES ASSESSMENT AND BUILT ENVIRONMENT EVALUATION

November 19, 2024 (Revised January 30, 2025)

Greg Ocasek
Warmington Residential - Southern California Division
3090 Pullman Street
Costa Mesa, CA 92626

Subject: Phase I Cultural Resources Assessment and Built Environment Evaluation, Eastvale Grapewin. Archaeological and Paleontological Records Searches, NAHC Sacred Land File Search, Built Environment Evaluation Memorandum

Dear Mr. Ocasek:

This Memorandum summarizes Archaeological and Paleontological records searches, an NAHC Sacred Lands File search, a pedestrian survey, and a built environment evaluation for the Eastvale Grapewin Project in the City of Eastvale, Riverside County, California.

As shown in Figure 1 below, the proposed Project site is located in Section 2 of Township 3 South, Range 7 West on the USGS *Corona North, CA* 7.5' Quadrangle Map. Figure 2 is an aerial depicting the Project site.

Cultural Resources Records Search

A California Historic Resources Information System (CHRIS) record search was requested of the South Coastal Information Center (SCIC) at San Diego State University on September 4, 2024 (Attachment A). Prior to the request, we learned that the Eastern Information Center (EIC) at the University of California, Riverside had recently closed permanently and that both Universities and the State Office of Historic Preservation (OHP) are working collaboratively to ensure that the records are transferred as efficiently and quickly as possible to the SCIC.

We received the following statement from Jaime Lennox at the SCIC on September 20, 2024. This statement is what the SCIC is currently sending to those requesting records searches:

> *The SCIC is taking on the Riverside County portion of the EIC's archive. At this time, we are able to offer PDF copies of Riverside reports and resource records as well as database output.*
>
> *WE DO NOT HAVE ACCESS TO RIVERSIDE MAPS and there is no GIS data available. Maps will only be available once we receive the full Riverside archive. We do not know when we'll be receiving Riverside County materials but once received, we will*

> *make everything available to clients ASAP including for in-house search appointments.*
>
> *We've recently updated our website to accept Riverside staff conducted records search requests, site forms, and reports, however we are not processing Riverside requests until we receive the Riverside archive.*
>
> *Please note that we cannot provide expected turnaround times for requests at this time. Once we receive the Riverside archive, clients can anticipate longer than normal processing times as the EIC already had a processing queue ahead of closing.*

Update: Jaime Lennox, SCIC Coordinator, informed us on November 12, 2024 that the Riverside archive was finally received this week, and we can expect our request to be completed and returned to us in approximately one month as the SCIC is working through a backlog of records search requests.

Paleontological Resources Records Search

Brittney Stoneburg, Collections Manager at the Western Science Center (WSC) in Hemet, completed a paleontological records search on October 21, 2024 (Attachment B) that determined no paleontological resources are recorded on the Project Site, nor within a one-mile radius, but the WSC does have fossil localities within similarly mapped units across southern California.

The geologic units underlying the Project site consist of Holocene and Pleistocene age alluvial deposits. Pleistocene alluvial units are highly paleontologically sensitive; therefore, any fossil material recovered from this project would likely be scientifically significant. The WSC, therefore, recommends requiring the preparation of a paleontological resource mitigation program to monitor, salvage, and curate any recovered fossils from the Project site (Stoneburg 2024).

Native American Heritage Commission (NAHC) Sacred Lands File Search

The Native American Heritage Commission responded to our Sacred Lands File (SLF) search request on September 17, 2024 (Green 2024). The results of the NAHC's SLF search are negative for the presence of sacred lands in the vicinity of the Project site (refer to Attachment C); however, the absence of specific cultural resources information does not necessarily indicate the absence of such resources on the Project site.

The NAHC identified 45 individuals from 24 Tribes as having traditional lands or cultural places in the vicinity. Please refer to Attachment C for the complete list.

Built Environment Evaluation – Urbana Preservation and Planning

Urbana Preservation and Planning conducted an evaluation of the project site's built environment (Baker & Kupel 2024). The site contains fourteen buildings and structures built after World War II and before 2003. The property was evaluated as not eligible for inclusion in the California Register of Historical Resources and, therefore, does not qualify as a historical resource under CEQA. No mitigation measures are recommended. Refer to Attachment D.

Summary/Recommended Mitigation Measures

Cultural Resources

Despite the largely built nature of the Project site, it does not appear to have been graded—particularly in the western and southern portions of the Project site. Because of the proximity of the Santa Ana River that attracted precontact populations, and the presence of known archaeological sites nearby along the river, archaeological monitoring of grading for the project is recommended.

Recommended Cultural Resources Mitigation Measures:

CUL-1: Prior to issuance of a grading permit, the applicant shall provide written verification that a qualified archaeologist has been retained to develop and implement a Cultural Resources Monitoring Plan (CRMP). The CRMP shall address the details of all monitoring activities and procedures to be followed to reduce the impacts to cultural and historic resources to a less than significant level as well as address potential impacts to undiscovered buried archaeological resources associated with this project. The CRMP shall be reviewed by the consulting Tribe and reviewed and approved by the City.

CUL-2: The Project applicant shall provide Native American monitoring during grading if the Lead Agency determines it is necessary. If applicable, the Native American monitor shall work in concert with the archaeological monitor to observe ground disturbances and search for cultural materials. The Lead Agency shall coordinate with the consulting Tribe(s) to facilitate communications with the Project developer/applicant so that all Parties can develop a mutually-acceptable Tribal Monitoring and Treatment Agreement which includes the scope of monitoring, scheduling of monitors from individual consulting Tribe(s), and the course of action for inadvertent discoveries.

CUL-3: The Project archaeologist and the Consulting Tribes(s) shall attend the pre-grading meeting with the City, the construction manager and any contractors and will conduct a mandatory Cultural Resources Worker Sensitivity Training to those in attendance. The Training will include a brief review of the cultural sensitivity of the Project and the surrounding area; what resources could potentially be identified during earthmoving activities; the requirements of the monitoring program; the protocols that apply in the event inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols.

CUL-4: The protocols and stipulations that the contractor, City, Consulting Tribe(s) and Project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation.

1. During the original cutting of previously undisturbed deposits, the archaeological and Tribal monitors (if applicable) shall be on-site, as determined by the consulting archaeologist, to monitor excavations. The frequency of inspections will depend upon the rate of excavation, the materials excavated, and the presence and abundance of artifacts and features. The consulting archaeologist shall have the authority to modify the monitoring program if the potential for cultural resources appears to be less than anticipated.

2. Isolates and clearly non-significant deposits will be minimally documented in the field so the monitored grading can proceed.

3. In the event that previously unidentified cultural resources are discovered, the archaeologist shall have the authority to divert or temporarily halt ground disturbance operation in the area of discovery to allow for the evaluation of potentially significant cultural resources. The archaeologist shall contact the Lead Agency at the time of discovery. The archaeologist, in consultation with the Lead Agency, shall determine the significance of the discovered resources. The Lead Agency must concur with the evaluation before construction activities will be allowed to resume in the affected area. For significant cultural resources, a Research Design and Data Recovery Program to mitigate impacts shall be implemented by the consulting archaeologist and approved by the Lead Agency before being carried out using professional archaeological methods. If any human bones are discovered, the county coroner and Lead Agency shall be contacted. In the event that the remains are determined to be of Native American origin, the Most Likely Descendant (as identified by the NAHC) shall be contacted in order to determine proper treatment and disposition of the remains.

4. Before construction activities are allowed to resume in the affected area, the artifacts shall be recovered, and features recorded using professional archaeological methods. The Project archaeologist in consultation with the consulting Tribe(s) shall determine the amount of material to be recovered for an adequate artifact sample for analysis.

CUL-5: One or more of the following treatments, in order of preference, shall be used in the event of a cultural resources discovery:

1. Preservation-in-Place. Avoidance, or preservation-in-place, involves leaving a resource where it was found with no development affecting its integrity. Pursuant to Public Resources Code Section 21083.2(b) avoidance is the preferred method of preservation for archaeological and cultural resources.

2. Reburial on the Project site in an area not subject to future disturbance. Reburial of a resource shall include provisions to protect the selected reburial area from any future impacts in perpetuity. Reburial shall not occur until all required cataloging and basic recording have been completed, with the exception of sacred items, burial goods and Native

American human remains. Any reburial process shall be culturally appropriate. The listing of contents and the location of the reburial shall be included in a confidential Phase IV monitoring report.

3. If Preservation-in-Place or reburial is not feasible, all cultural material collected during the grading monitoring program shall be processed and curated according to the current professional repository standards in a Riverside County curation facility that meets State Resources Department Office of Historic Preservation Guidelines for the Curation of Archaeological Resources (OHP 1993). The collections and associated records shall be transferred, including title and accompanied by payment of the fees necessary for permanent curation.

CUL-6: A Phase IV Monitoring Report, documenting the field and analysis results and interpreting the artifact and research data within the research context, shall be completed and submitted to the satisfaction of the Lead Agency prior to the issuance of any building permits. The report will include DPR Primary and Archaeological Site Forms. The Phase IV report shall be filed with the City under a confidential cover and not subject to Public Records Request and a copy of the report shall be submitted to the consulting Tribe(s).

Paleontological Resources

Deep excavations that extend down into paleontologically sensitive formations could uncover significant fossil remains. Therefore, paleontological monitoring is recommended to be conducted in the documented Pleistocene alluvial sediments during grading and trenching operations to recover any fossil remains quickly and professionally so as not impeding development. Sediment samples should be collected and processed as necessary to determine the small fossil potential in the proposed project area.

Recommended Paleontological Mitigation Measures:

PAL-1: Prior to the issuance of any grading permit, the project Applicant shall provide written evidence to the City, that the Applicant has retained a qualified paleontologist to develop and implement a Paleontological Resources Impact Mitigation Program (PRIMP) to guide monitoring procedures and establish protocols to follow in the event of a fossil discovery. The paleontologist shall be present at the pre-grade conference, shall describe procedures for paleontological resource surveillance, and shall establish in the PRIMP, in cooperation with the Applicant and City, procedures for temporarily halting or redirecting work to permit sampling, identification, and evaluation of the fossils. If the paleontological resources are found to be significant, the paleontologist shall determine appropriate actions, in cooperation with the Applicant, which ensure proper exploration and/or salvage.

PAL-2: If paleontological resources are uncovered and after completion of the project, the Applicant shall submit the paleontologist's follow-up report for approval by the City. The report shall include the period of inspection, a catalogue and analysis of the fossils found, and the present repository of the fossils. The Applicant's qualified paleontologist shall prepare excavated material to the point

of identification. The Applicant shall offer excavated finds for curatorial purposes to the City or its designee, on a first refusal basis. These actions, as well as final mitigation and disposition of the resources, shall be subject to approval by the City. Applicant shall make a one-time payment of curatorial fees for the storage of these resources in perpetuity.

The City of Eastvale may have standard mitigation measures that it may wish to use for cultural and paleontological resources monitoring that would be acceptable if the spirit of the above recommended measures is retained.

Please contact Patrick Maxon at pmaxon@vcsenvironmental.com or 949.234.6077 should you have any questions or comments.

Sincerely,

Patrick Maxon, M.A., RPA
Director, Cultural Services

San Juan Capistrano, CA 92675

Dear Mr. Maxon,

This letter presents the results of a record search conducted for the Eastvale Grapewin Project located in the city of Eastvale, Riverside County, California. The project area is located along Archibald Avenue at the southeast corner of Grapewin Street on Township 3 South, Range 7 West, on an unsectioned portion of the *Corona North CA* USGS 7.5 minute quadrangle.

The geologic units underlying the project are composed of alluvial deposits from the Holocene and Pleistocene epochs (Morton and Miller 2006). Pleistocene alluvial units are considered to be highly paleontologically sensitive. The Western Science Center does not have any localities within the project area or a 1 mile radius, but does have localities within similarly mapped units across Southern California.

Any fossil specimens recovered from the Eastvale Grapewin Project would be scientifically significant. Excavation activity associated with the development of the project area would impact the paleontologically sensitive Pleistocene units, and it is the recommendation of the Western Science Center that a paleontological resource mitigation program be put in place to monitor, salvage, and curate any recovered fossils from the study area.

If you have any questions, or would like further information, please feel free to contact me at bstoneburg@westerncentermuseum.org.

Sincerely,

Brittney Elizabeth Stoneburg, MSc
Collections Manager

Re: Eastvale Grapewin Project, Riverside County

To Whom It May Concern:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

RE: Historical Resource Assessment (HRA) Memorandum | 8312 Grapewin Street / 8330 Archibald Avenue, Eastvale, California.

Introduction and Purpose

The subject property at 8312 Grapewin Street and 8330 Archibald Avenue is composed of three developed parcels identified as Assessor Parcel Numbers (APN) 130-070-021, 130-070-015, and 130-080-004. The property contains fourteen buildings and structures built after World War Two and before 2003. The primary structure is a Ranch style single-family home (Building 1) constructed circa 1945-1948. Building 2 is a simple single-family home, also constructed between 1945 and 1948. The pool and pool structure (Building 6) were constructed between 1945 and 1948. An ancillary structure (Building 8) and a secondary pool structure (Structure 7) were constructed between 1948 and 1959. Three ancillary structures were constructed in 1970 (Building 9, Structures 13 & 14). Two ancillary structures (Buildings 3 and 5) and a stable (Building 4) were constructed between 1994 and 1998. A barn, riding arena, and ancillary structure (Buildings 10, 11, & 12) were constructed in 2003.

The property is not located within a historic district and is not identified on the California Built Environment Resource Directory (BERD). The property has not been previously surveyed for eligibility under the California Register of Historical Resources (CRHR), or the National Register of Historic Places (NRHP).

This Historical Resource Assessment (HRA) Memorandum was prepared by Urbana Preservation & Planning, LLC with contributions by Alexandrea Baker, MCP, and Douglas Kupel, Ph.D., RPA. Ms. Baker and Dr. Kupel exceed the Secretary of the Interior's Professional Qualification Standards in the disciplines of history and architectural history. Preparer qualifications are included as Attachment 2.

The purpose of the HRA Memorandum is to determine the potential for the property's eligibility under the criteria of the CRHR and to assess possible impacts to historical resources pursuant to Section 15064.5 of the California Environmental Quality Act Guidelines resultant from a proposed project.

Definition of Study Area / Area of Potential Impact

The study area encompasses the proposed project boundary which conforms to the parcel boundaries. The property is comprised of three parcels, addressed as 8312 Grapewin Street (Riverside County Assessor Parcel No. 130-070-021) and 8330 Archibald Avenue (Riverside County Assessor Parcel Nos. 130-070-015 & 130-080-004). The study area was intensively surveyed to inform historical resource identification and project impacts analysis.

A study area map is included as Figure 1 on the following page. Results are summarized in the following pages.

Figure 1. Study Area Map

Building 1: Ranch Style Single-Family Home, ca. 1945-1948
Building 2: Single-Family Home, ca. 1945-1948
Building 3: Ancillary Structure, ca. 1994-1998
Building 4: Stable, ca. 1994-1998
Building 5: Ancillary Structure, ca. 1994-1998
Building 6: Pool Structure, ca. 1945-1948
Structure 7: Pool Shelter, ca. 1948-1959
Building 8: Ancillary Structure, ca. 1948-1959
Building 9: Ancillary Structure/Tack, ca. 1970
Building 10: Barn, ca. 2003
Structure 11: Riding Arena, ca. 2003
Building 12: Ancillary Structure, ca. 2003
Structure 13: Ancillary Structure, ca. 1970
Structure 14: Ancillary Structure, ca. 1970
Property Boundaries:

Intensive Level Survey Findings

The study area and subject property, 8312 Grapewin Street / 8330 Archibald Avenue, is located within the Fuller Ranch subdivision. The property was originally platted circa 1942. At the time of the original development, much of the surrounding area was part of the Fuller "RanchO," owned by O.R. Fuller. The Fuller family operated a guest house at their home that was located approximately half a mile northeast of the subject property. In the late 1930s/early 1940s, Fuller began selling parcels adjacent to the Fuller Lake, located adjacent to the Santa Ana River and likely touted as an amenity to the subdivision. The subject property was one of these lakeside properties and was originally developed with a single-family ranch style residence after WWII. In the following years, the property was further developed with the addition of a second single family residence, pool structures, and ancillary structures related to equestrian/agricultural uses. Based on property reports, it appears that the property was divided into three separate parcels in the 1990s.

The property has been used as a residential property for most of its history, though in recent years it has been used as an equestrian training facility and as an agricultural property. The property features fourteen buildings and structures, eight of which date to the historic era (more than 45 years of age). The builder and architect of these buildings could not be identified.

There does not appear to have been significant alterations to the property, aside from the construction of additional buildings and structures. The most significant alteration was made to the secondary residence (Building 2); the residence was enlarged, and a porch cover was constructed between 1980 and 1994. This residence has also had window replacements. The main residence (Building 1) was also reroofed and has had window replacements. Most of the buildings and structures on the property are utilitarian in form with few architectural details. The primary residence (Building 1) is a simple example of the ranch style. While Building 1 exhibits common features of the style, it does not feature any architectural details that would distinguish it from the many other ranch style homes built in Southern California at the time.

The 8312 Grapewin Street / 8330 Archibald Avenue property does not qualify for designation under the CRHR. The property is not associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage under CRHR Criterion 1. It is not associated with the lives of persons important in California's past under CRHR Criterion 2. The property does not embody the distinctive characteristics of a type, period, or method of construction, or represent the work of an important creative individual or possess high artistic values under CRHR Criterion 3. There does not appear to be potential to yield information important in prehistory or history under CRHR Criterion 4.

The Urbana analysis included a site visit to the property during which the buildings were photographed and examined. Urbana researched the property using city directory listings, historic aerial imagery, Sanborn Fire Insurance maps, newspaper archives, County of Riverside Grantor/Grantee Index, permit records and Urbana's in-house architecture and construction history library. Urbana documented and evaluated the property on California Department of Parks and Recreation (DPR) 523 series forms. The DPR forms include current photos, a property description, construction history, historical narratives on Eastvale and the Fuller Ranch, ownership history, and include assessment under of the CRHR criteria. The DPR forms are included as Attachment 1.

Project Impacts Assessment

The 8312 Grapewin Street / 8330 Archibald Avenue property does not appear eligible for inclusion on the CRHR. As a result, the property does not qualify as an historical resource under CEQA. Future proposed projects would not cause an impact

to historical resources within the Study Area / Area of Potential Impact. Because significant resources have not been identified, additional historical analysis is not recommended.

Refer to the attached DPR forms for additional property history and please contact the office with any questions or comments.

Respectfully Submitted,

Alexandrea Baker, MCP

The subject property is sited at the southeast corner of Grapewin Street and Archibald Avenue, originally part of Lot O, Section 2 of the Fuller Rancho subdivision. Identified as Riverside County Assessor's Parcel Numbers 130-070-021, 130-070-015, and 130-080-004, the property is located immediately west of the Santa Ana River.

***P3a. Description:** The evaluated property is located on parcels identified as APNs 130-070-021, 130-070-015 & 130-080-004 and consists of fourteen detached buildings and structures, addressed as 8312 Grapewin Street and 8330 Archibald Avenue. The buildings are sited on three irregular parcels, totaling approximately 8.07 acres, located at the southeast corner of Grapewin Street and Archibald Avenue. 8312 Grapewin Street (130-070-021) consists of twelve buildings, including the two residences, a barn, and stables buildings. The 8330 Archibald Avenue property (APNs 130-070-015 & 130-080-004) consists largely of an open agricultural space, with a driveway and two ancillary structures (Structures 13 &14). The surrounding neighborhood is composed of detached single-family residences, a religious property, and open space. **See Continuation Sheet for additional description.**

P3a. Description (Continued from page 1)

8312 Grapewin Street / 8330 Archibald Avenue Current Description

The property was originally developed circa 1945-1948. It currently (2024) consists of fourteen detached structures: two single family residences, a barn, and eleven ancillary structures. The architect or builder of the property could not be determined. The buildings on the property were constructed gradually in three main periods: during World War Two and the immediate post-war era, in the 1970s, and from 1994 onward. A majority of the buildings are located at the eastern edge of the property overlooking the Santa Ana River. There is a long driveway leading from the southeast corner of Grapewin Street and Archibald Avenue along the north edge of the property to the residences. A second driveway enters the property from Archibald Avenue along the south edge of the property.

The main single-family residence (Building 1) was constructed in the ranch style of architecture by 1948. The second single family residence (Building 2) has minimal architectural details, most closely resembling a ranch style home. This structure was constructed between 1945 and 1948. Twelve of the buildings are located on the 8312 Grapewin Street property. Two of the structures are located on the 8330 Archibald Avenue property. A majority of the 8330 Archibald Avenue property is used as agricultural land.

Building 1 is a one-story single-family residence constructed by 1948. The building is constructed in the ranch style with minimal architectural details. The building has a T-shaped form with a low, broad mass. The building is clad in stucco with a hipped roof covered in composition shingles. The roof has a moderate overhang with boxed eaves. The front (west) elevation features a narrow front porch, with a concrete foundation, and a simple wood board railing. Set at the front elevation is a large exterior, stone chimney. There are two single doors set within the front porch area. There are two large, multi-lite windows within the front porch. To the left of the front porch, at the front elevation, there are two large multi-lite windows and two fixed round windows. On the right side of the front elevation, there is one door, and a one sash, multi-lite window. The western wing of the building is a double car garage, with a fixed multi-lite window at the west elevation. The two, rollup metal garage doors are located at the south elevation of the west wing.

The south elevation of Building 1 does not have any openings or features. The north elevation features one multi-lite fixed window. At the rear (east) elevation of the north wing of the building, there are five multi-lite sash windows, and one multi-lite fixed window. At the rear of the center wing of the building there are three multi-lite sash windows, seven multi-lite casement windows, one sliding glass door, and one rear entrance door. At the rear of the southern wing of the building there are three multi-lite sash windows, and one small sash window. Most of the windows are vinyl set within a wood opening. At the rear of the building, there is a small concrete step leading to a stone patio. From the patio, there is a long narrow stone staircase leading east towards the Santa Ana River.

Building 2 is a one-story single-family residence constructed between 1945 and 1948. The building has a simple, rectangular plan with minimal architectural features. The building has a side gable roof, clad in composition shingles. The roof has a moderate overhang with boxed eaves. At the front (west) elevation there is a simple front gable porch covering supported by two simple posts. The front elevation is asymmetrical, with a single front entrance door with a narrow sidelight next to it. There are three multi-lite sash windows at the front elevation. At the north elevation there are two fixed multi-lite windows with sconce lights above.

At the south elevation of Building 2, there is one (1) side entrance door with a small porch gable above. There is one fixed window at the south elevation. At the rear (east) elevation there is one rear door, and one sliding

glass door with a front gable porch roof above. At the rear elevation there is also one large, fixed window, one small, fixed window, one small sash window, and utility access door. There is a small concrete slab patio at the rear of the building, with several steps leading towards the east side of the property.

Building 3 is a simple ancillary structure. It has a rectangular plan with horizontal wood siding, constructed between 1994 and 1998. The building has a nearly flat shed roof with exposed rafters. The building is an agricultural ancillary building, with three doors at the east elevation, and three open windows with bars across at the west elevation.

Building 4 appears to be a horse stable that is currently used as storage, constructed between 1994 and 1998. The building has a rectangular plan with four individual stalls. The building has a metal frame and wood and metal siding. The building has a metal cross gable roof with and open gable for ventilation.

Building 5 is a small ancillary structure, constructed between 1994 and 1998. It was constructed of concrete blocks with a low pitched shed roof. The building has one door and one window opening at the west elevation. The building has one window opening at the east elevation. The building has an open gable.

Building 6 is a pool side amenity, constructed between 1945 and 1948. The building is constructed with concrete blocks that connect to the pool privacy wall. The building has an open east elevation, with an attached wooden bar area, and a small shower space. The building has a flat roof and a concrete floor. The west elevation has small openings in the concrete block wall.

Structure 7 is a pool shelter with a shed roof supported by three wood posts, constructed between 1948 and 1959. The structure is set on a concrete platform adjacent to the pool.

Building 8 is an agricultural ancillary building, constructed between 1948 and 1959. The building has a rectangular form with horizontal wood siding. The building has a gable roof with several large doors on each elevation. There is an open walkway through the center of the building.

Building 9 is a small ancillary building, constructed in 1970. It has a square plan, constructed of concrete blocks. The building as a side gable roof with door openings the north and south elevations.

Building 10 is a large barn, constructed in 2003. The building has an L-shaped form with the main opening located at the north elevation. The main opening is a set of large sliding doors. There is a large window, with a rounded transom above, set above the main entrance. The barn has windows and doors at each elevation. The building has open gables for ventilation.

Structure 11 is a large open-sided riding arena, constructed in 2003. The structure has a metal frame with a corrugated metal roof. There is simple fencing around each elevation with a flat, sawdust covered opening.

Building 12 is a simple ancillary structure, constructed in 2003. The building has a rectangular plan with a side gable roof. The building has vertical wood siding. There is one large door at the north elevation, and several horizontal sliding windows with wide wood trim around them.

Structures 13 and 14 are small ancillary structures, both constructed in 1970. They consist of corrugated metal roof coverings and open sides.

Additional features on the property include mature palm trees lining the driveway at the north edge of the property. There is a pool at the southeast corner of the property. The property is currently in use as an agricultural property, and there are a series of fences throughout the property. There are also several small temporary features throughout the property related to animal care.

Current views of the property are included below and in the following pages.

B6. Construction History (Continued from page 2)

The subject property was originally part of the larger Fuller Rancho. In the 1940s, the Fuller Rancho, located further north from the subject property, began selling off properties alongside the Santa Ana River and the Fuller Ranch that previously existed east of the subject property. These riverside properties were sold to wealthy owners, primarily for use as weekend or vacation homes.

The subject property was originally developed in circa 1945-1948. The primary, ranch style home (Building 1) was constructed by 1948. The secondary single-family home, was likely constructed around the same time. Both structures first appear on aerial images from 1948. The pool and pool structure at the southeast corner of the property was also constructed between 1942 and 1948.

Between 1948 and 1959, the pool shelter (Structure 7) and ancillary structure (Building 8) were constructed.

Starting in 1970, the tack room (Building 9), feed storage (Structure 13), and hay shed (Structure 14) were constructed (Permit No. 188494 & 188495). Property owner Glenn Gilstrap obtained the permits. Each of these buildings are agricultural/equestrian in use. In 1971, Gilstrap obtained a permit for electrical for a pump for irrigation water (Permit No. 202535).

Based on permit history and the County of Riverside Grantor/Grantee Index, it appear that the property was subdivided into separate parcels (APNs 130-070-021, 130-070-015 & 130-080-004) between 1970 and 1991.

Between 1994 and 1998, the Ancillary Building (#3), the stable (Building 4), and Ancillary Building (#5) were constructed.

In 2003, the barn (Building 10), riding arena (Structure 11), and Building 12 were constructed.

In 2008, Susan Peacock obtained a permit to construct a block wall (Permit No. BWL080422). The contractor for the project was Pacific Shore Masonry.

Further permits were identified through the County of Riverside property report; however, the following permits did not include dates, ownership, or contractor information.

A permit was issued to provide electric to a well (Permit No. 237937). A room addition and patio cover were constructed (Permit No. BAR030420). This permit likely refers to the secondary residence (Building 2); this building originally had a small footprint, and based on aerial images, was expanded between 1980 and 1994, including the addition of the front porch gable roof. Other notable permits issued include construction of a barn (Permit No. BXX024213), which likely refers to the barn and riding arena construction in 2003. A permit to reroof, replacing the shake shingles and installing composition shingles is listed (Permit No. BXX981290).

Available permits are listed below in Table 1:

Table 1. Permit History

B10. Significance (Continued from page 2)

Historic Overview of Eastvale

The land that would become the city of Eastvale was originally part of the Spanish Empire until 1810 and became Mexico after 1821. The government of Mexico awarded land grants to influential citizens. California became part of the United States in 1848 and became a state in 1850. Riverside County was created in 1893. At one of the first meetings of the Riverside County Board of Commissioners, "East Vale" was listed as one of the 53 school districts in the county. However, the area would not obtain cityhood until more than a century later in 2010.

The Eastvale area slowly developed as a farming and dairy community. The community remained as a low-density rural community for many decades. In 1940, the area had a population of only 755 people. By the 1950s, nearby Los Angeles was experiencing a population boom, and development began to expand into the outlying farmlands. In response, dairies began further east, into the Eastvale area. The dairies that operated out of Eastvale, Chino Valley, and Ontario were primarily owned and operated by Dutch and Portuguese families. Approximately half of present-day Eastvale was part of what became known as the Fuller Ranch. The Fuller Ranch totaled approximately 3,000 acres and was owned by the Fuller family from 1889 to 1954. Most of the southern half of the city, between Schleisman Road and the Santa Ana River (including the subject property), were formerly Fuller ranch land. The population in Eastvale grew slowly. By 1970, the population had reached 1,587, and by 2000, had reached 6,011.

In 2007, conversations regarding cityhood. In 2010, the city was officially incorporated as a city in Riverside County. The area had a significant population boom in the decade between 2000 and 2010. By 2010, the population reached 47,637. By 2017, the population reached 64,613.[1]

Fuller Ranch

Approximately half of the current city of Eastvale was previously part of the Fuller Ranch. The ranch originally measured approximately six square miles, about 3,000 acres, spanning between Schleisman Road to the Santa Ana River. The property was first called the Pioneer Ranch after a business owned by the Fuller family. The name was changed to the Fuller Ranch in 1925. The Fuller family owned the property for approximately 65 years, between 1889 and 1954.

Henry Harrison Fuller was born in 1832 in Buckstown, Pennsylvania. In his early life, Fuller worked as a bricklayer and in a dry goods store. In 1854, he married Mary Ann Morewood. Their daughter Anna Losta was born in 1855. In 1854, the family moved to Iowa where they had five more children: Charles Henry, Mary Drusilla, Ortus Benton, Ernest Pearl, and Grace Vivian. From 1873 to 1877, Fuller was working as an Indian Agent for the reservation at Lemhi, Idaho.

Fuller first visited California in 1877. In 1882, Fuller purchased a 200-acre ranch approximately 25 miles northeast of downtown Los Angeles, in the upper San Gabriel River Valley. His family joined him in 1883. Fuller sold the ranch in 1884 to G.D. Whitcomb and G.E. Gard. This land became the town sites of Glendora and Alosa. After selling their property, Harrison and Mary Ann Fuller purchased 20 acres further west, and in 1886, moved into a two-story house on the property. This home was located at what is now the corner of Citrus and Alosta Avenues in the City of Azusa. In Azusa, Fuller established one of the first orange groves in the San Gabriel River Valley. He also served as Los Angeles County Tax Collector for eight years. In 1889, the Fuller family purchased the ranch at what would become Eastvale, taking advantage of the end of the railroad boom and falling land prices. Harrison Fuller passed away in 1903.

The Fuller family saw commercial success in Los Angeles in the 1880s. The family was involved in merchandising, storage, construction, and local transportation. Charles and Ortus Fuller, and their brother-in-law Fred Zucker, were involved in several business ventures including the Fuller Department Stores, Los Angeles Warehouse Company, Enterprise Construction Company, and Pioneer Transfer Company.

The Pioneer Transfer Company was established to provide local freight transportation, to and from the railroads in Los Angeles. At the time, the company was using horse drawn vehicles, as motorized trucks would not exist for several more years. A ranch in present day Eastvale was purchased by the Fuller family between 1887 to 1892. It was established to raise draft horses for the Pioneer Transfer Company and named the Pioneer Ranch. It was located approximately 50 miles from downtown Los Angeles and approximately four miles from the Rincon railroad station. Around 1900, motor trucks replaced horses at the Pioneer Transfer Company, which was subsequently renamed to the Pioneer Truck and Transfer. By 1907, operations at the Pioneer Ranch changed their emphasis from draft horses to show horses and other animals.

The Pioneer Ranch was listed as being in South Riverside in 1893, as towns in the surrounding area had yet to be established. In 1893, Ortus Fuller was listed as a farmer at the property and appears to have been the primary operator of the ranch. However, by 1901, Charles and Ortus Fuller began focusing their business interests on Santa Barbara County, leaving the Pioneer Ranch in the hands of a hired manager. By then, the ranch had become known as one of the best cattle and racehorse breeding farms in California. The property had pasture land for horses, swine, and other livestock, several acres of barley and alfalfa crops, and more acres of vegetable crops including corn, melons, and beets. In addition to the 3,000 acres owned by the Fuller family, an additional 2,000 acres were leased and used as ranch property by 1907.

In 1915, approximately 2,000 acres of land were transferred from ownership by individual Fuller family members (Charles, Ortus, and Mary Fuller, and their spouses) to the family-owned Pioneer Ranch Corporation. By 1915, portions of the original 3,000-acre ranch had been sold. The land was sold and developed into the Persimmon, Kingston, and Cedar Rapids subdivision tracts, and by 1915, the Pioneer Ranch totaled approximately 1,885 acres.

The Pioneer Ranch remained in the Fuller family, with ownership passing to Olive Ransome (O.R.) Fuller, son of Charles Fuller, in 1925. O.R grew up in Kansas and moved to California to live with his father in 1900. He operated several successful auto dealerships and a passenger transit company, from 1907 to 1929. Ortus Fuller passed away in 1922; at the time, the Fuller family had minimal involvement in the running of the ranch. Charles and O.R. Fuller used the property as a weekend retreat, staying at the original ranch house, however, it appears they had a minimal interest in the property until after 1925.

In 1928, O.R. Fuller and his wife Ione designed a new home on the property, Casa Orone, which they used as a weekend retreat while living in Los Angeles. During the Great Depression Fuller lost all of his businesses, with his only remaining asset being the ranch. At this time, he changed the name to the Fuller Rancho, signifying his intent to take greater control of the property. He often spelled the word "RanchO" to emphasize his first initial. In 1931, the family, including O.R., Ione, and their eleven-year-old daughter Marcellie, moved to the ranch. At this time, in 1931, the Fuller ranch totaled 3,000 acres with about 1400 animals, including about 500 dairy cows. Milk and cream were sold in Corona and the surrounding area. There were also about 7,500 chickens, as well as many turkeys and other types of fowl, on the property. Within a few years of moving to the ranch full time, Fuller had become one of the largest turkey ranchers in Southern California. Fuller Rancho delivered milk and eggs across Southern California, and opened the Fuller Rancho Market, a drive-up grocery store, in Pomona.

In 1937, Fuller converted the main house, Casa Orone, into the Fuller Guest Rancho. The house had overnight accommodations for 25 guests, an Olympic-sized swimming pool, a poolside bar and a 5-star restaurant. Guests were able to visit the nearby lake and river, and ride horses through the area. The Ranch was also known for its illegal gambling. The ranch drew many visitors from nearby Los Angeles, including celebrities such as Olivia DeHavilland, Groucho Marx, Mary Pickford, Red Skelton, and Elizabeth Taylor.

In the late 1930s, Fuller also began subdividing the ranch into building lots, along the adjacent Santa Ana River. One of the notable early residents was actor Charles Grapewin who owned one of the riverside properties. His residence, a two story Mediterranean style home that has since been demolished, was located at the northern end of the street now known as Grapewin Street.

During World War II, medical staff and patients from the nearby Corona Naval Hospital in Norco visited the Rancho. O.R. Fuller passed away soon after the War, in August 1946. By that time, large portions of the original 3,000 acre Fuller Rancho had been sold or leased to third parties for ranches or housing development. Ione Fuller closed the guest ranch after her husband's death. She soon married Harvey Weeks in 1948 and remained at the Fuller Rancho until her death in 1951.

The remaining Fuller Rancho property was sold to Walter Koening, a local dairyman. Koening subsequently resold most of the land for agricultural use. In 1959, the guest house was purchased by the Good Samaritan Center, a retirement facility. In 1967, it was converted to the St. Katherine's Home for Boys, a youth counseling facility. In 2004, the property was demolished and subdivided into tract housing. In 2010, the 3,000 acres that originally made up the Fuller Rancho and the surrounding area, were incorporated as the City of Eastvale, California.[2]

Ranch Style Architecture

The Ranch style of architecture originated in the mid-1930s in southern California. Its simple form made it relatively cheap to construct, and it was one of the styles permitted to be built under FHA financing guidelines. Into the 1950s, Ranch style homes represented sheltered privacy and a sense of security from the happenings of the Cold War, when Civil Defense needs stressed strength of the family and home as strength of the country. Throughout the United States, the Ranch style dominated residential tracts developed in the 1950s, 1960s, and 1970s.

After World War II, the style began to gain popularity. It was the most popular style of architecture in the 1950s and 1960s. The style was often found in large, mass constructed subdivisions. Ranch house suburbs were common across the country, especially in areas that saw a housing boom post-war. The style was especially popular in the southern Sunbelt region, where relatively cheap land prices allowed for the sprawling style to be built. The increased use of automobiles after World War II facilitated the widespread construction of the ranch style house. Mass constructed ranch style suburbs were constructed on large swaths of undeveloped land – away from the cities. Cars made it possible for people to travel from the city to their homes in the suburbs.

The style was loosely based on early Spanish Colonial ranch houses in the American Southwest. The ranch style that came about in the mid-century was advertised as part of a casual family-oriented lifestyle for postwar families. It was more accessible to most Americans than other modern styles seen at the time. The style met the demand for housing that reflected the latest architectural aesthetic, stylistic details, and materials, including interior courtyards, aluminum framed windows, sliding glass doors, flat roofs, and masonry screen walls, while remaining affordable. The Ranch style home was typically built with a broad,

one-story shape, built low to the ground, with a low-pitched roof. The front entry is typically off-center and sheltered under the main roof of the house. The garage is typically attached, elongating the building's form. They typically have a large picture window and an asymmetrical façade.[3]
Identifying-exterior features of Ranch style residential buildings are listed below:

- Broad, one-story horizontal massing
- Built low to the ground
- Asymmetrical façade
- Off-center front door
- Low-pitched roof without dormers
- Moderate to wide roof overhang
- Large picture windows
- Multiple window shapes and sizes
- Integrated "slants"
- Different wall-cladding materials
- Garage attached to main façade
- One of four general subtypes that are based on roof form
    - Hipped roof
    - Cross-hipped roof
    - Side-gable roof
    - Cross-gable roof

The subject property features one ranch style residence. The building was constructed circa 1942 and is a simple example of the style. The one-story residence features several of the character defining features of the Ranch style. The residence has a broad, one-story horizontal form, built low to the ground. The building has an asymmetrical façade, clad in stucco with a large exterior stone chimney at the front elevation. The roof is low-pitched with a moderate overhang. The building has several large windows, and windows of different sizes and shapes. The garage is attached to the front elevation.

Property Ownership History

8312 Grapewin Street
John Ridgway was the first identified owner of the property. Earlier owners could not be identified after reviewing County of Riverside Grantor/Grantee indexes and genealogical research. It is possible that Ridgway was the original owner of the property, however no further information on Ridgway was available. Marcellie Fuller, daughter of O.R. Fuller, stated that river front properties were sold by her father to "a talent scout from Hollywood, a film director, an oilman from Long Beach, a shipbuilder from Long Beach, and a mortician from Long Beach." Ridgway sold the property to Cataldo and Mary Burke in 1965.

Cataldo and Mary Burke were married in Michigan in 1913 and moved to Southern California in 1928. The couple had five daughters. Burke was one of the earliest wholesale grape and wine merchants in the Los Angeles area. Burke and his brothers, Jim and Mike Burchierie, operated a winery, Gardena Vintage Co., for thirty years. Burke retired in 1960, and the couple moved to West Palm Springs. They purchased the subject property in 1965, though they only owned it for one year.[4]

The next owner was part of the Mezori family. Margaret Mezori was born in 1913 in California. Henry and Margaret Mezori had three children, Delores, Henry, and Suzanne Mezori. Delores was born in 1936, Henry in 1946, and Suzanne in 1949. From at least 1950 to 1958, the family was living in Elsinore, California. Delores

attended the University of California and married Donald Roy Parks in 1958.[5] In 1961, she was working at Beaumont Realty in 1961. Members of the Mezori family owned the property from 1966 to 1969.[6]

Glenn and Marjorie Gilstrap owned the property from circa 1969 to 2000. Glenn Eugene Gilstrap was born in Indiana in 1928. Marjorie June Heacock was born in Indiana in 1929. The couple was married in 1946 and welcomed their daughter, Glenda, in 1949. In 1950, the couple was living in Indiana with their daughter. At the time, Glenn Gilstrap was working as a delivery driver for an electrical company. By 1960, the family was living in Westminster, California. The family lived in Westminster until at least 1970. They had purchased the property by 1969, as noted on County of Riverside permits, and owned the property until 2000. Glenn Gilstrap passed away in 2011.[7]

In 2000, the property passed to Joanne Burt Peacock, although research indicates her grandson, Richard William Peacock Jr. was living at the property by 1994. Richard Peacock was born in 1934 in Oakland. He was a product manager at Ling Electronics for 26 years and was also an amateur radio operator. The couple had three sons: William Frank, Michael Davey, and Bradley Burt, and one grandson, Richard William Peacock Jr. In 1966, the family was living in Orange, California. Richard Peacock passed away in 1988.[8]

The property remained in the Peacock family until 2022. Research indicated that several members of the Peacock family occupied the property throughout the years, including Richard Peacock Jr. from 1994 to 2020, Michael Peacock from 2000 to 2014, and Bradly Peacock from1999 to 2022. It was most recently owned and used by Susan Hoffman Peacock for a business called "Dressage Peacock." The property was used as the location of a dressage apprenticeship program, run by Susan Peacock. The program was designed to prepare the participants for a career as a professional dressage trainer. The program participants were able to live at the property and participated in daily work with their own horse, supervised by Peacock and her staff. Susan Peacock is a trainer and national and international clinician. She is one of the few USDF nationality certified instructor/trainers in the United States. Joanne L. and Bradley Burt Peacock sold the property in 2022.

8330 Archibald Avenue

The 8330 Archibald Avenue does not contain any residential buildings, and as such does not have an occupancy history. According to the County of Riverside property report, the property was first established in 1991; the property may have been subdivided from the larger 8312 Grapewin Street property at this time. The

first identified, and current, owner is the Onesimo and Silvia Coronel Family Trust. Research indicated that several members of the Coronel family were associated with the property including Onesimo, Silvia (Delatorre), Laura, Griselda, Lissette, and Howard Coronel. Onesimo E. Coronel was born in 1953. Silvia B. Delatorre was born in 1952. The couple married in 1984 in Los Angeles. Onesimo Coronel is associated with the property as early as 1984. Further information about the family was not available. They are listed as the current owners of the property on Parlay ParcelQuest.

B10. Significance (Continued from page 2):

CALIFORNIA REGISTER OF HISTORICAL RESOURCES (CRHR) ELIGIBILTY REVIEW

CRHR Criterion 1: Association with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
Research and analysis indicates the subject property does not qualify for designation under Criterion 1. The subject property is located at the intersection of Grapewin Street and Archibald Avenue, with the Santa Ana River immediately to the east. The property was initially improved with a single family ranch style home, most likely in the immediate post-WWII period. A secondary home, pool, and ancillary structures were constructed soon after. The property was originally part of the Fuller Rancho, a 3,000 acre agricultural ranch owned by the Fuller family.

The subject property was built with the Fuller Rancho subdivision. Located alongside the Santa Ana River, it was presumably built as a rural country home, as the surrounding area had not yet been developed. The residence built was large, but simple. The pool and steps leading towards the river, as well as grounds for equestrian use, indicate the home's use as a rural property with plenty of opportunities for outdoor recreation. Research indicates the property has primarily been used as a residential property, with equestrian and agricultural uses in recent years. Its association with the Fuller Ranch via the development of former ranch property is not considered significant. The subsequent rural property use is not unique to the area, and the property does not appear to have an association with events that have made a significant contribution to the broad patterns of California's history and cultural heritage. For this reason, Urbana determined the property is not eligible under Criterion 1.

CRHR Criterion 2: Association with the lives of persons important in California's past.
The two longest owners of the property were Glenn Gilstrap and the Peacock family. Other owners were identified as only owning the property for a few years and are not strongly associated with the property.

Glenn Gilstrap owned the property between 1969 and 2000 and had the longest period of ownership. Gilstrap worked as a delivery driver. Gilstrap and his wife, Ione, had one daughter, Glenda. Research does not indicate that Gilstrap rises to the necessary level of significance for designation under Criterion 2.

The Peacock family owned the property between 1969 to 2022. Joanne Peacock purchased the property in 1969. Research indicates that several members of the Peacock family resided at the home over the years. Most recently, the property was used by Susan Peacock as an equestrian training facility. Research does not indicate that any members of the Peacock family rise to the necessary level of significance for designation under Criterion 2. Research and analysis determined the property is not associated with the lives of persons important to local or California history. Therefore, the subject property does not qualify under Criterion 2.

CRHR Criterion 3: Embodies the distinctive characteristics of a type, period, or method of construction, or represent the work of an important creative individual or possess high artistic values.
Under Criterion 3, the building is not the work of a master and does not possess high artistic values and does not rise to a level beyond the ordinary. The original architect or builder of the buildings could not be determined. The main building, Building 1, is a one-story Ranch style home. The residence features several characteristics of the Ranch style, including a wide asymmetrical floor plan, exterior stone chimney, large windows and windows of varying sizes, low roof pitch, and attached garage. However, the ranch style was extremely common in Southern California during the period of construction, and the subject property does not possess high artistic value. It is a typical example of the style and does not possess distinctive

characteristics that would raise it to the necessary level of significance. The other buildings on the property are largely utilitarian and lack distinctive characteristics or high artistic value. For this reason, Urbana determined that the property is not individually eligible under Criterion 3.

CRHR Criterion 4: Potential to yield information important in prehistory or history.
The subject property is not eligible under Criterion 4 as it is unlikely to yield important information in prehistory or history.

Integrity

Integrity is the ability to physically convey significance. Evaluation of integrity must always be grounded in an understanding of a resource's physical features and how they relate to its significance. To retain historic integrity, a resource will possess several, and usually most of the following seven aspects of integrity: location, materials, design, setting, workmanship, feeling, and association. If it is determined that a resource is eligible for designation because it meets one or more of the adopted designation criteria, the integrity of the resource must be evaluated. Integrity is the ability to convey its significance. Only after the historic significance of the resource is fully established can the issue of integrity be addressed.

The subject property has not been found by Urbana to be individually eligible for designation under any of the criteria. Further integrity analysis is not merited.

Man Held for Sale Of Bad Wine

LOS ANGELES, Feb. 6.—Cataldo Burke, of the Gardena Vintage Co., today faced a term of six months in jail or a fine of $500, following his conviction on charges of having broken seals on his state quarantined warehouse and selling wine that had been ruled unfit for use by the bureau of food and drug inspection of the state health department. Milton P. Duffy, chief of the state inspection bureau, charged that more than 20,000 gallons of the wine had been declared unfit for consumption on account of a high cid content.

Guest Book Tells Secret of Birthday

"I'm sorry it should have to end,
Such a lovely birthday did I spend."

It was thus that Marcelle (Mrs. Roger) Imhof wrote in the Charley Grapewins' guest book as she and Roger were leaving after a delightful week end at the Grapewin rancho, which adjoins the Fuller dude ranch at Corona. And this was the first time the Grapewins knew it was Marcelle's birthday, for nary a word had she said about it during the entire holiday.

The foursome spent happy hours, boating on the large lake adjoining the Grapewin estate, catching bass for breakfast and strolling through the orchards of apricot trees.

* * *

After "Tobacco Road" is finished, Jeeter Lester's cabin, the one which cost 20th Century-Fox $3800 to build and artificially age, will be given to Charley Grapewin as a memento of the picture and of the biggest role in his career.

Grapewin hopes to move the cabin all the way from Sherwood Forest (the "Tobacco Road" location) to his one-acre farm on the Fuller ranch near Corona.

Legend is that Grapewin won this property in a poker game years ago. He since has built a house on it and, between pictures, he spends most of his time there.

By ALEXANDER KAHN
(LP) Staff Correspondent

HOLLYWOOD—(LP)— Charley Grapewin is content, after 53 years of acting, to work only when he feels like it, spending the rest of his time fishing.

About four pictures a year are the limit for Grapewin, who may be found the rest of the year at No. 1 Grapewin Avenue, Corona, Cal., where he fishes for bass from Charley Grapewin's landing on the banks of Weeping Willow Lake.

At present the distinguished veteran of stage and screen is at work again in what he considers an outstanding role, one worthy of him to quit fishing for a while, at least. He's the Jeeter Lester of the screen in the film version of "Tobacco Road," the Broadway hit play which 0th Century-Fox is producing.

Virtually every player of character parts in Hollywood wanted the role and Grapewin thought enough of it to postpone his fishing while he underwent tests. He admits he was happy to get the part, one of the fattest to fall to any actor. But he says he wouldn't have been too dejected if he had failed in his quest.

"There's always the Grapewin landing," he chuckled, "and the bass are fine.

"Anyway, I'd done just about as much work for the years as I figured I needed to keep me in my accustomed state of comfort. I had a good long workout in 'The Grapes of Wrath' and

Landmark Will Be Rest Home

CORONA—Fuller Rancho, landmark and former showplace north of Corona, has been bought by Mrs. Mary Joyce Theriot and J. W. Koning of Anaheim and is being converted into a rest home.

The transaction involves only the main building and its immediate grounds of about seven acres.

The historic property on Grapewin Rd., between Archibald Ave. and Chandler St. embraces 70 acres of ranch land and two smaller residences in addition to the main structure acquired for a rest home. There is a swimming pool, tennis courts and dairy buildings on the Rancho.

Recently the entire Fuller Rancho property was offered to the County Probation Committee as a site for a new Juvenile Hall, at a price of $150,000, the amount of the federal inheritance tax appraisal.

The big Spanish type two-story dwelling being converted into a rest home is the old O. R. Fuller residence and contains a dozen bedrooms with baths, a main living room 22 by 40 feet, a dining hall 17 by 30 feet, a grill room 15 by 29 feet, a lounge 23 by 30 feet, a playroom 16 by 37 feet and a cardroom 14 by 23 feet.

The Rancho was developed by Fuller, founder of the Motor Transit Co. which eventually became part of the Pacific Electric system. His father, O. R. Fuller Sr., parlayed a Los Angeles draying concern into a trucking agency and then into a bus business.

The elder Fuller and his son were prominent in the early day development of motor transportation of passengers and freight in Soutern California. The Pioneer Transfer Co. now operating in Corona was once a part of the transportation owned and operated by the Fullers.

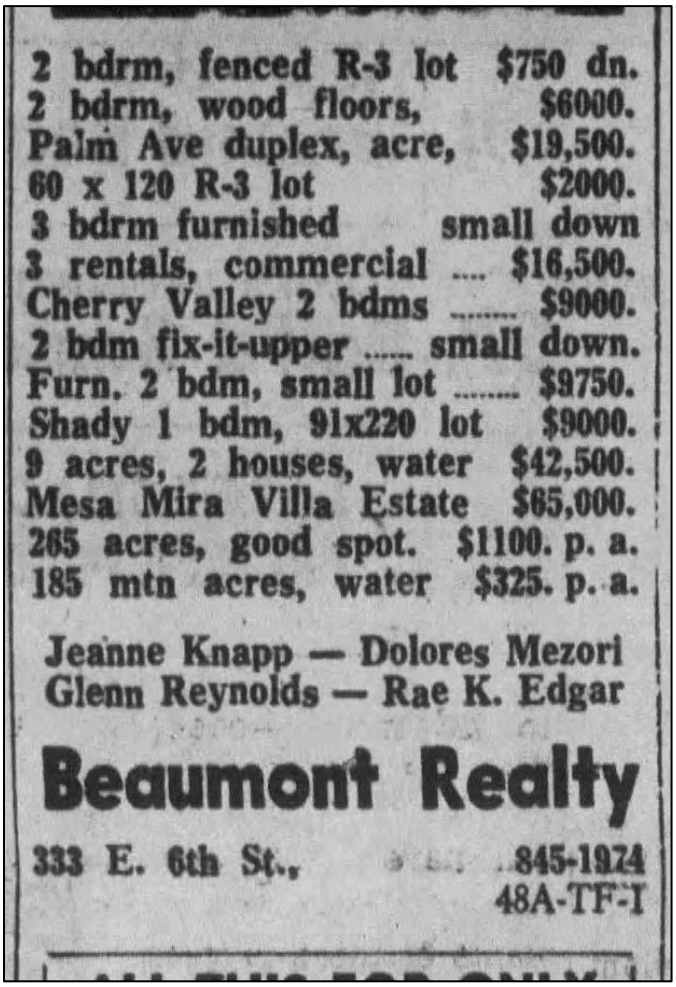
Dolores Mezori To Marry Roy Parks

● ELSINORE



The engagement of Miss Dolores Louise Mezori of Elsinore to Donald Roy Parks of San Diego has been announced by the bride-elect's parents, Mr. and Mrs. Henry Mezori of Lakeshore drive.

The announcement was made on a recent Sunday at a family gathering at the Mezori home here.

Miss Mezori is a second-year student at the Uiversity of California and is a graduate of the local high school. Roy formerly attended Elsinore schools, graduating from high school in Anaheim. Later he attended Gardena Junior college and Western Television institute in Los Angeles. At present he is serving with the U.S. Navy in San Diego in the nuclear field. His parents, Mr. and Mrs. William R. Parks, now live in Arlington.

Th marriage will take place April 20 in St. Frances Catholic church, Elsinore.

200 attend celebration of golden anniversary

Pioneer Southwest residents honored with dinner, program at church hall

Nearly 200 friends and relatives gathered in the banquet room at Crenshaw Christian church to celebrate the fiftieth wedding anniversary of Mr. and Mrs. Cataldo Burke, pioneer residents of the Southwest who now make their home in West Palm Springs.

The couple married in Detroit, Michigan, and in 1928 came to the Southwest where they settled on the present site of the St. Catherine Laboure church on West Redondo Beach boulevard.

Their five daughters were reared there and were graduated from Redondo high school.

Burke was one of the earliest wholesale grape and wine merchants in the district, and for 30 years he and his brothers, Jim and Mike Burchierie, operated a winery at Florence avenue and Hoover street. The establishment still is being operated by relatives.

In 1960 Burke retired, and he and Mrs. Burke built their new home in West Palm Springs where they presently reside.

Among the well-wishers at the anniversary party were their five daughters and their husbands, Messrs and Mesdames Maurice Contreras, John Jessimen, Joe Cicinelli, Kenny Whiteley, and Dr. and Mrs. Leon J. Ginsburg. Also attending were their 10 grandchildren and six great-grandchildren.

GOLDENWEDS: Mr. and Mrs. Cataldo Burke, pioneer residents of the Southwest, who now make their home in West Palm Springs, celebrated their golden wedding anniversary with a banquet at Crenshaw Christian church. Burke and his brothers operated a winery at Florence avenue and Hoover street for more than 30 years.

The Ronald Neals Honeymoon At Acapulco

Ronald J. Neal and his bride, the former Suzzanne E. Mezori daughter of Mrs. Margaret M. Mezori of Brea, are en route to Acapulco for a honeymoon. The couple were married Saturday afternoon in the Brea Congregational Church by Rev. Charles Harlow. Parents of the bridegroom are Mr. and Mrs. Vernon Neal of Brea.

Escorted to the altar by her uncle, Wilbert F. Dawson, who gave her in marriage, the bride wore a French imported silk organza A-line gown with watteau train trimmed with hand reembroidered seed pearls, sequins and chantilly lace appliques.

A single rose with drop pearls on the petals was her headpiece and held her float veil. She carried baby white roses and an orchid in a cascade bouquet.

Maid of honor for the double ring ceremony was Miss Vickie Magnusson and bridesmaids were Miss Diane M. Dawson, Mrs. Victor L. McCarty, Mrs. James C. Fluegge, and Mrs. Shari L. Reynoso. All wore apricot crepe gowns and carried cascades of carnations.

Lyndell Emrick was the best man and ushers were Terry Swindle, Alan Smith, Charles Hatfield, and Louis Costea. Twins, Terry and Gary Wilson, were flower girl and ring bearer; and junior hostesses were Judith and Jennifer Wollaston. Miss Karen French was the soloist and organist for the wedding was Richard Horn.

The Assistance League Clubhouse in Fullerton was the setting for the reception following the ceremony. Mrs. Clyde McCullum attended the guest book. Serving were Mrs. Don Howland, punch;

MRS. RONALD J. NEAL

and Mrs. Joe Harrison and Mrs. Jane McGowan, cake.

When the couple return from their wedding trip, they will make their home in Brea.

Both the bride and bridegroom were graduated from Brea-Olinda High School and both are students now at Fullerton Junior Collge. The new Mrs. Neal is an associate member in Epsilon Chapter of Alpha Gamma Sigma.

Miss Maloney

Sorority Names New Chairmen

Chairmen for Northern Orange County Council of Beta Sigma Phi Sorority for 1968-69 have been announced by Mrs. Betty Rowan of Placentia, president.

They are the Mmes. David Miles, Anaheim, Founder's Day; Glendon Lowery, Fullerton Valentine Ball; Charles Agte, Anaheim, budget committee; Richard Davis, Anaheim, coordinating committee; William Hughes, Yorba Linda auditing committee; and John Spring Jr., Brea, point system.

Wedding announcement of Suzanne Mezori and Ronald Neals. Suzanne is the daughter of the former owner, Margaret Mezori.

Car wrecked as horses hit, killed

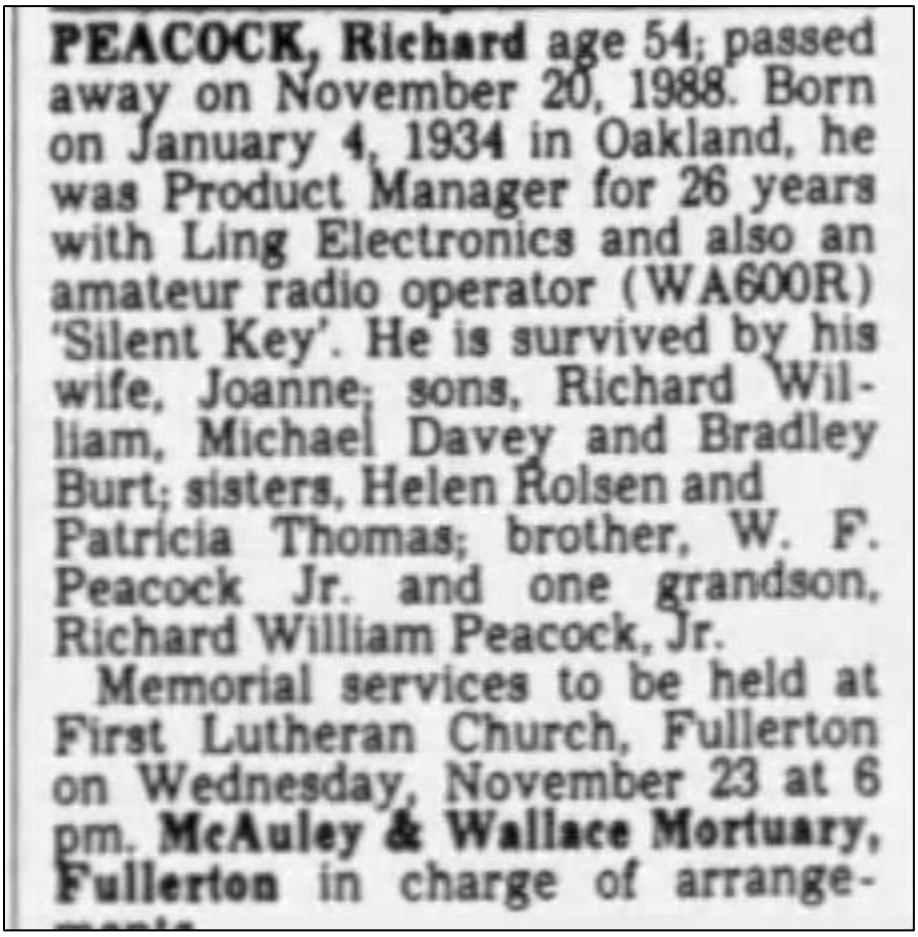
NORCO — A family of four escaped serious injury yesterday when their car hit three horses galloping toward them on Archibald Avenue.

The three horses died.

Richard Bailey, 37, of Norco, his wife, Brenda, 37, and their children, Connie, 8, and Tracey, 13, did not require hospital treatment. Their 1974 Buick station wagon, however, was totally wrecked, California Highway Patrol officer Roman Vondriska said.

Vondriska said five registered Thoroughbred mares, belonging to Margorie Gilstrap of Grapewin, got out of a fenced pasture and were galloping south on Archibald.

About 6:45 p.m., the Baileys' car, going north 45 to 50 miles an hour on Archibald, hit three of the animals, killing two and injuring a third. "They were running abreast," Vondriska said. He said there was no way the car could have avoided the horses.



He said it was surprising no one in the car was seriously injured. "If you had seen it you would have thought it was a fatal." The officer said the family members were wearing seat belts and he thinks they probably lay down on the seats because the roof of the car was caved in.

The injured horse was destroyed by a veterinarian summoned to the scene. The horse had two broken legs, Vondriska said.

The two horses that were not injured were corraled by farmers who live in the area.

Vondriska said he didn't know the value of the animals.

Article referencing Margorie Gilstrap while she was living at the subject property.

Attachment 2. Preparer Qualifications

Douglas E. Kupel, Ph.D., RPA
Senior Historian & Archaeologist
doug@urbanapreservation.com

Senior Historian and Archaeologist, ***Douglas Kupel,*** holds a Ph.D. in History from Arizona State University, a graduate certificate in Archaeology from the University of South Carolina, master's degrees from the University of Arizona and Northern Arizona University, and a Bachelor of Arts in History from the University of Oregon. Doug is a cultural resources expert with a diverse background in sustainable water resources, environmental planning, and historic preservation. He meets *The Secretary of the Interior's Historic Preservation Professional Qualifications Standards* in the disciplines of History, Architectural History, and Historical Archaeology. He brings extensive experience in preparing National Register Nominations and completing cultural resource surveys and inventories for properties in California, Nevada, and Arizona. He maintains exceptional leadership and project management skills having served as the Deputy Water Services Director and Environmental Program Manager for the City of Glendale, Arizona. In these positions Doug supervised several divisions and managed nine divisional budgets. He additionally worked for the City of Phoenix as a Water Advisor and Natural Resources Historian.

Doug began his career working as an archaeological and historic sites consultant in California and Arizona, and later served as a Historian for the Arizona State Historic Preservation Officer (SHPO), and the Cities of Phoenix and Glendale, Arizona. As the former National Register of Historic Places (NRHP) Coordinator for the Arizona SHPO, Doug processed many large and complex historic district nominations early in his career. He has continued his association with the NRHP program by serving on Arizona's Historic Sites Review Committee. Doug has authored 37 NRHP nominations including the Multiple Property Format NRHP Nomination for the Period of Conflict Between Native Americans and the U.S. Military in Arizona, 1846-1886, and the NRHP Nomination of the Fort Tuthill Historic District, Flagstaff, Arizona. Dr. Kupel is a court-recognized expert on water rights and has conducted substantive research and analysis on statewide water management and policy. For the City of Phoenix Law Department, he organized and directed research for litigation and water resources planning in the Arizona General Stream adjudication. He has served as expert witness for Native American and municipal water history topics. Dr. Kupel has worked on a number of significant Native American water rights settlements during his career at Phoenix and Glendale. These include the White Mountain Apache Tribe (WMAT) Water Rights Settlement, Verde River Yavapai – Apache Settlement, Gila River Indian Community Water Rights Settlement, Fort McDowell Indian Community Water Rights Settlement, and the Salt River Pima-Maricopa Indian Community Water Rights Settlement.

He has more than 30 years of experience in water civil engineering projects, including authoring historical narratives, manuscripts, and eligibility evaluations for the Bureau of Reclamation Salt River Project, and the Central Arizona Project. His experience provides understanding not only to historic properties and cultural resources, but also to larger management concerns and the federal regulatory process. His management of large publicly owned utilities speaks directly to his ability to supervise and organize large-scale projects in a complex regulatory environment. Dr. Kupel led a research and planning group as Deputy Director of a water utility and has wide experience with a variety of water resources, planning, safety, and emergency management programs. Dr. Kupel has served as a liaison on water planning and policy issues between municipal utilities and a wide range of local, state, and Federal agencies. His knowledge of imported water contracts, water supply planning efforts, and financial and economic analysis related to natural resources highlights his ability to integrate cultural resources planning within larger planning efforts.

Alexandrea Baker, MCP
Associate Urban / Preservation Planner + GIS Lead
alex@urbanapreservation.com

Alexandrea Baker holds a Bachelor of Arts in Geography, with a minor in Community and Regional Planning, from the University of Nebraska and a Master of City Planning degree from San Diego State University. She meets *The Secretary of the Interior's Historic Preservation Professional Qualifications Standards* in the discipline of History and Architectural History. At Urbana, Alex surveys historic-era built environment sites, conducts property specific and contextual research, identifies cultural landscapes consistent with NRHP Bulletin No. 36, authors technical reports, prepares GIS maps and manages all aspects of our GIS program. Recent project experience includes the City of La Quinta historical resource survey; the Post Rock Resources MPDF and NRHP nominations, Historic Designation and Mills Act Applications for private property owners throughout Southern California, on-call historic research services for multiple jurisdictions, and all historic sites database and GIS management for SCE projects. As the lead GIS planner and database manager on the Urbana team, she has prepared map packages for thousands of sites for projects throughout the West. Her cartography work products are regularly used for in-depth analyses and strategic decision making by client and agency partners. In addition to her preservation planning experience, Alex is adept ArcGIS StoryMaps.

Dear Mr. Ilich:

GeoTek, Inc. (GeoTek) is pleased to provide the results of this Geotechnical and Infiltration Evaluation for the proposed single-family residential project to be located at 8312 Grapewin Street in the City of Eastvale, Riverside County, California. This report presents the results of GeoTek's evaluation, discussion of findings, and provides geotechnical recommendations for foundation design and earthwork construction.

Based upon review and evaluation, site development appears feasible from a geotechnical viewpoint provided that the recommendations included in this report are incorporated into the design and construction phases of the project.

The opportunity to be of service is sincerely appreciated. If you should have any questions, please do not hesitate to contact GeoTek.

Respectfully submitted,
GeoTek, Inc.

1. PURPOSE AND SCOPE OF SERVICES

The purpose of this study was to evaluate the geotechnical engineering and geologic conditions at the project site, as outlined in GeoTek's proposal P-0301324-CR, dated February 28, 2024. Services provided for this study included the following:

- Research and review of available geologic data and general information pertinent to the site,
- Site exploration consisting of the excavation, logging, and sampling of six (6) exploratory test borings extending to depths ranging from 16.5 to 47 feet below grade,
- Excavation of two (2) additional borings to a depth of about five (5) feet below grade and performing an infiltration test in each boring,
- Laboratory testing of soil samples collected during the field investigation,
- Review and evaluation of site seismicity, and
- Preparation of this geotechnical report which presents GeoTek's findings, conclusions, and recommendations for this site.

2. SITE DESCRIPTION AND PROPOSED DEVELOPMENT

2.1 SITE DESCRIPTION

The approximate 8.24-acre irregular-shaped project site is located at 8312 Grapewin Street in the City of Eastvale, Riverside County, California (See Figure 1). Access to the site is available by either Archibald Avenue or Grapewin Street, both paved, improved streets located adjacent to the western and northern site boundaries, respectively.

The site is currently occupied by several residential structures, outbuildings, a large barn, animal pens, fences, and storage areas. The Santa Ana River watershed is located adjacent to the eastern site boundary with a water surface elevation of approximately 540 feet above mean sea level (amsl). Site elevations range from approximately 578 feet amsl to about 591 feet amsl in western and eastern portions, respectively. Topographically, the site can be considered as

having a relatively flat to gently sloping terrain, with surface drainage generally directed to the west.

Review of historic aerial photographs of the site indicated the site consisted of vacant, tilled agricultural land in 1938. Site conditions prior to 1938 are unknown. Between 1938 to 1949, a residential structure appears to have been constructed within the eastern portion of the site, with the western portion of the site possibly still used for agricultural purposes. Between 1949 to 2002, the site appears to mostly consist of vacant, undeveloped land, with the exception of the residence structure within the eastern portion. Between 2002 to 2005, various outbuildings, barns, and animal pens appear to have been constructed. Site conditions from 2005 to the present time appear to be relatively unchanged.

2.2 PROJECT DESCRIPTION

Based upon review of a *Conceptual Density Study* prepared by KTGY Architecture and Planning, dated March 1, 2024, GeoTek understands the subject property is to be developed with seventy-nine (79) one- to two-story single-family residences. Associated utilities, access and drive lanes, pavement, hardscape, and landscape improvements are also anticipated as part of the site development. Storm water disposal by means of on-site storm water disposal systems are anticipated for this project. The Best Management Practice (BMPs) system(s) to be selected for stormwater disposal are currently unknown.

The proposed residential structures are anticipated to be of wood-frame construction, two- to three-stories in height, and incorporate conventional shallow foundations and post-tensioned (PT) slab-on-grade floors. Sewage disposal will be by a public sewer. For the purposes of this report, it is assumed maximum column and wall loads will be about 75 kips and 3.5 kips per foot, respectively. Specific site development plans were not provided as of the date of this report. Once actual loads are known that information should be provided to GeoTek to determine if modifications to the recommendations presented in this report are warranted.

If site development differs from the assumptions made herein, the recommendations included in this report should be subject to further review and evaluation. Site development plans should be reviewed by GeoTek when they become available.

3. FIELD EXPLORATION AND LABORATORY TESTING

3.1 FIELD EXPLORATION

The field exploration for this report was conducted on March 26, 2024, and consisted of excavating six (6) geotechnical exploratory borings with a hollow-stem drill rig to depths ranging from about 16.5 to 47 feet below grade at the boring locations. The approximate locations of the GeoTek excavations are shown on the Exploration Location Map (Figure 2). A geologist from GeoTek logged the excavations and collected soil samples for use in subsequent laboratory testing. The logs of the exploratory borings are included in Appendix A.

Relatively undisturbed soil samples were recovered at various intervals in the geotechnical borings with a California sampler. The California sampler is a 3-inch outside diameter, 2.5-inch inside diameter, split barrel sampler lined with brass rings. The sampler was 18 inches long. The sampler conformed to the requirements of ASTM D 3550. A 140-pound automatic trip hammer was utilized, dropping 30 inches for each blow. The relatively undisturbed samples, together with bulk samples of representative soil types, were returned to the laboratory for testing and evaluation. The California sampler test data are presented on the boring logs in Appendix A.

In Boring B-2 standard penetration tests (SPT) were performed with a 2.0-inch outside diameter, 1.5-inch inside diameter, split-barrel sampler. The sampler was 18 inches long. The inside diameter of the sampler shoe was 1.4 inches. The sampler was unlined. The sampler conformed to the requirements of ASTM D 1586. A 140-pound automatic trip hammer was utilized, dropping 30 inches for each blow. The sampler penetration test data are presented on the Logs of Borings for Boring B-2.

Infiltration Testing

In addition to the geotechnical exploratory borings, two infiltration test borings (I-1 and I-2) were excavated in the areas of the proposed storm water management facilities, to depths of about five (5) feet each. The locations and depths of the infiltration test borings were provided by Warmington Residential. Infiltration/percolation testing was conducted in these borings in general accordance with the requirements of the County of Riverside.

The infiltration tests consisted of drilling an eight-inch diameter test hole to the desired depth and installing approximately two inches of gravel in the bottom of the hole. A three-inch diameter perforated PVC pipe, wrapped in a filter sock, was placed in the excavations and the

annular space was filled with gravel to prevent caving within the boring. Water was then placed in the borings to presoak the holes and percolation testing was performed the following the pre-soak period. The infiltration tests were then performed which consisted of adding water to each test hole and measuring the water drop over a 30-minute period. The water drop was recorded for twelve test intervals. Water was added to the test holes after each test interval. The field percolation rates were then converted to an infiltration rate using the Porchet Method. The results of the infiltration testing are summarized in the table below:

PRELIMINARY INFILTRATION TEST RESULTS		
Infiltration Boring No.	Depth of Boring (ft.)	Infiltration Rate* (inches per hour)
I-1	5	0.60
I-2	5	0.61

*Porchet Method converted infiltration rate from measured rate

The results of the conversions indicate infiltration rates at the test locations ranged from approximately 0.60 inches per hour (Boring I-1) to approximately 0.61 inches per hour (Boring I-2), indicating relatively poor infiltration rates. Copies of the infiltration test data sheets and the Porchet infiltration rate conversion calculations are presented in Appendix C. No factors of safety were applied to the rates provided. Over the lifetime of the infiltration areas, the infiltration rates may be affected by sediment build up and biological activities, as well as local variations in near surface soil conditions. A suitable factor of safety should be applied to the field rate in designing the infiltration system.

It should be noted that the infiltration rates provided above were performed in relatively undisturbed on-site soils. Infiltration rates will vary and are mostly dependent on the underlying consistency of the site soils and relative density. Infiltration rates may be impacted by weight of equipment travelling over the soils, placement of engineered fill and other various factors. GeoTek assumes no responsibility or liability for the ultimate design or performance of the storm water facility.

3.2 LABORATORY TESTING

Laboratory testing was performed on selected relatively undisturbed ring and bulk samples collected during the field exploration. The purpose of the laboratory testing was to confirm the field classification of the materials encountered and to evaluate their physical properties for use in the engineering design and analysis. Results of the laboratory testing program along with a brief description and relevant information regarding testing procedures are included on the exploratory borings logs included in Appendix A and in Appendix B.

4. GEOLOGIC AND SOILS CONDITIONS

4.1 REGIONAL SETTING

The subject property is situated in the Peninsular Ranges geomorphic province. The Peninsular Ranges province is one of the largest geomorphic units in western North America. It extends approximately 975 miles south of the Transverse Ranges geomorphic province to the tip of Baja California. This province varies in width from about 30 to 100 miles. It is bounded on the west by the Pacific Ocean, on the south by the Gulf of California and on the east by the Colorado Desert Province.

The Peninsular Ranges are essentially a series of northwest-southeast oriented fault blocks. Several major fault zones are found in this province. The Elsinore Fault zone and the San Jacinto Fault zone trend northwest-southeast and are found near the middle of the province. The San Andreas Fault zone borders the northeasterly margin of the province.

The site is located in an area geologically mapped by others to be underlain by older alluvium (Morton, D.M., Miller, F.K., 2006). No active faults are shown in the immediate site vicinity on the maps reviewed for the area. The nearest known active fault is the Elsinore Fault zone (Chino section) located approximately 3.8 miles southwest of the site.

4.2 GENERAL SOIL CONDITIONS

A brief description of the earth materials encountered is presented in the following section. Based on the site reconnaissance, the exploratory excavations and review of published geologic maps, the area investigated is locally underlain by some surficial undocumented fill and disturbed soils atop older alluvium.

4.2.1 Undocumented Fill

Undocumented fill soil was encountered within Borings B-2, B-3, and B-5 from the existing ground surface to depths of about 1 to 1.5 feet below existing grades. The placement of the undocumented fill was likely associated with the existing structural improvements at the site or past agricultural use of the property. The fill soil generally consisted of silty sands and clayey sands (SM and SC soil type based on the Unified Soil Classification System) and were encountered in a medium dense condition based on penetration samples obtained. Documentation of the placement of the fill soils encountered is understood to not be available or obtainable.

4.2.2 Disturbed Soils

Disturbed soils were encountered at the surface of five (5) of the borings. The disturbance of the upper site soils likely resulted from previous land uses at the site, including possible agricultural uses. The disturbed near surface soils encountered generally consisted of silty to clayey sands and sandy clays (SM, SC, and CL soil types) and were encountered at depths ranging from about 0.5 to 1 feet below existing grades at the boring locations.

4.2.3 Older Alluvium

Older alluvial soils were encountered in all of the borings performed, beneath either the undocumented fill or disturbed soil and extended to the maximum depth explored (47 feet). As encountered in the borings, the older alluvium consisted of interbedded layers of silty sands, relatively clean sands, clayey sands, and sandy clays (SM, SP, SC, and CL soil types based upon the Unified Soil Classification System). The coarse-grained alluvial soils (SM, SP, and SC soil types) were found to range between medium dense to very dense, while the fine-grained grained alluvial soils (CL soil type) were found to generally be soft to hard. The upper older alluvial soils encountered within some of the borings were observed to be in a loose or relatively soft condition.

Based on the laboratory test results, the near surface soils have a "Very Low" ($0 \leq EI \leq 20$) to "Low" ($21 \leq EI \leq 50$) Expansion Index (ASTM D 4829). Based on the laboratory test results, the near surface soils have a soluble sulfate content of less than 0.1 percent (ASTM D 4327). Additionally, selected samples of the upper site soils were found to exhibit a "very low" to "low" potential for hydroconsolidation (settlement upon wetting with or without additional loading). The test results are provided in Appendix B.

4.3 SURFACE WATER AND GROUNDWATER

4.3.1 Surface Water

If encountered during earthwork operations, surface water on this site will likely be the result of precipitation or possibly some minor surface run-off from the surrounding areas. Natural drainage at the site is interpreted to be to the west following the existing site topography in the area. Provisions for surface drainage will need to be accounted for by the project civil engineer.

4.3.2 Groundwater

Groundwater was not encountered within any of the exploratory borings drilled at the site to the maximum depth drilled of about 47 feet (Boring B-4) below the existing ground surface. Based on a review of groundwater depths noted on the California Department of Water

Resources Water Data Library website and review of site elevations, it is estimated the historic high groundwater depth is approximately 38 feet below existing grades at the site. Based on the results of the field exploration, review of site area geomorphology and geology, groundwater is not anticipated to adversely affect the proposed improvements.

4.4 FAULTING AND SEISMICITY

4.4.1 Faulting

The geologic structure of the entire California area is dominated mainly by northwest-trending faults associated with the San Andreas system. The site is in a seismically active region. However, the site is not situated within a State of California designated *"Alquist-Priolo"* Earthquake Fault Zone. The nearest known active fault to the site is the Elsinore Fault zone (Chino section) located approximately 3.8 miles to the southwest of the site.

4.4.2 Seismic Design Parameters

The site is located at approximately 33.9369 degrees West Latitude and -117.5922 degrees North Longitude. Due to the relatively dense nature of the site soil (average blow counts greater than 15) a Site Class "D" is considered appropriate for this site. Site spectral accelerations (S_a and S_1) for 0.2 and 1.0 second periods for a Class "D" site, was determined from the SEAOC/OSHPD web interface that utilizes the USGS web services and retrieves the seismic design data and presents that information in a report format. Using the ASCE 7-16 option on the SEAOC/OSHPD website results in the values for S_{M1} and S_{D1} reported as "null-See Section 11.4.8" (of ASCE 7-16). As noted in ASCE 7-16, Section 11.4.8, a site-specific ground motion procedure is recommended for Site Class D when the value S_1 exceeds 0.2. The value S_1 for the subject site exceeds 0.2.

For a site Class D, an exception to performing a site-specific ground motion analysis is allowed in ASCE 7-16 where S_1 exceeds 0.2 provided the value of the seismic response coefficient, Cs, is conservatively calculated by Eq 12.8-2 of ASCE 7-16 for values of $T \leq 1.5T_s$ and taken as equal to 1.5 times the value computed in accordance with either Eq. 12.8-3 for $T_L \geq T > 1.5T_s$ or Eq. 12.8-4 for $T > T_L$.

The results, based on the 2015 NEHRP and the 2022 CBC, are presented in the following table assuming that the exception as allowed in ASCE 7-16 is applicable. If the exception is deemed not appropriate, a site-specific ground motion analysis will be required.

SITE SEISMIC PARAMETERS	
Mapped 0.2 sec Period Spectral Acceleration, S_S	1.59g
Mapped 1.0 sec Period Spectral Acceleration, S_1	0.60g
Site Coefficient for Site Class "D", F_a	1.0
Site Coefficient for Site Class "D", F_v	1.7
Maximum Considered Earthquake Spectral Response Acceleration for 0.2 Second, S_{MS}	1.59g
Maximum Considered Earthquake Spectral Response Acceleration for 1.0 Second, S_{M1}	1.02g
5% Damped Design Spectral Response Acceleration Parameter at 0.2 Second, S_{DS}	1.06
5% Damped Design Spectral Response Acceleration Parameter at 1 second, S_{D1}	0.68
Peak Ground Acceleration (PGA_M)	0.72g
Seismic Design Category	D

Final selection of the appropriate seismic design coefficients should be made by the project structural engineer based upon the local practices and ordinances, expected building response and desired level of conservatism.

4.5 LIQUEFACTION

Liquefaction describes a phenomenon in which cyclic stresses, produced by earthquake-induced ground motion, create excess pore pressures in relatively cohesionless soils. These soils may thereby acquire a high degree of mobility, which can lead to lateral movement, sliding, consolidation and settlement of loose sediments, sand boils and other damaging deformations. This phenomenon occurs only below the water table, but, after liquefaction has developed, the effects can propagate upward into overlying non-saturated soil as excess pore water dissipates.

The factors known to influence liquefaction potential include soil type and grain size, relative density, groundwater level, confining pressures, and both intensity and duration of ground shaking. In general, materials that are susceptible to liquefaction are loose, saturated granular soils having low fines content under low confining pressures.

The project site is located within an area mapped by the County of Riverside as having a "High" to "Very High" liquefaction potential hazard. Based on the current mapping by Riverside County, a liquefaction analysis was performed for the subject site to estimate seismic-induced settlement potential. The seismic-settlement assessment (liquefaction and "dry sand") was performed utilizing the subsurface soil profile encountered within Boring B-2, with a PGA_m of 0.72g, and a USGS Unified Hazard Tool mean disaggregated moment magnitude event of 6.71 corresponding to a 2,475-year return period (2% probability of exceedance in 50 years). Based

on the analysis, relatively nominal seismic-induced settlements ("dry sand" and liquefaction) are estimated for the subject site – on the order of about ¼ inch total with estimated seismic-induced differential settlements of about ½ the total settlement over a 40-foot span.

4.6 OTHER SEISMIC HAZARDS

Due to the general flat terrain, the potential for seismic induced landslides is considered nil. Additionally, due to the estimated relatively low liquefaction hazard potential, the estimated lateral spread horizontal displacements are estimated to be negligible. The potential for secondary seismic hazards such as a seiche and tsunami is considered negligible due to site elevation and distance from an open body of water.

5. CONCLUSIONS AND RECOMMENDATIONS

5.1 GENERAL

Development of the site appears feasible from a geotechnical engineering viewpoint. The following recommendations should be incorporated into the design and construction phases of development.

The upper site soils encountered consisted of undocumented fill soils, disturbed soils, and some relatively loose/soft older alluvium. These upper site soils are not considered suitable for foundation support in their present state. Remedial grading, consisting of removal and recompaction of the upper site soils is recommended to provide a uniform bearing for the proposed improvements.

5.2 EARTHWORK CONSIDERATIONS

5.2.1 General

Earthwork and grading should be performed in accordance with the applicable grading ordinances of the City of Eastvale and the 2022 California Building Code (CBC), and recommendations contained in this report. The Grading Guidelines included in Appendix E outline general procedures and do not anticipate all site-specific situations. In the event of conflict, the recommendations presented in the text of this report should supersede those contained in Appendix E.

5.2.2 Site Clearing

Initial site preparation should commence with removal of debris, existing structures, pavements, underground utilities, foundations, slabs-on-grade, deleterious materials and vegetation within the limits of the planned improvements. Demolition of existing buildings/structures should include removal of all shallow foundations, floor slabs and any of below-grade construction. If any existing building/structure is supported by deep foundations, it is recommended that those foundation units be cut-off at least 3 feet below all new building foundations and floor slabs and one foot beneath all future utility lines. Existing utilities, not planned for re-use, should be capped off at the property boundaries and removed. All materials generated by demolition and site clearing operations should be properly disposed of off-site. Voids resulting from removing any materials should be replaced with engineered fill materials with expansion characteristics similar to the onsite materials.

5.2.3 Site Preparation

Due to the anticipated presence of undocumented fill, disturbed soil, and non-uniform nature of the near-surface upper site soils, it is recommended that the soils be removed beneath the planned building footprint to a depth of at least five (5) feet below existing natural grade, or three (3) feet below the base of the proposed foundations, whichever is greater. The lateral extent of this recommended over-excavation should extend at least 5 feet beyond the building limits, where obtainable. Removal bottoms should be relatively uniform in native soil type which is not visibly porous and having an in-place density of at least 85 percent of the soil's maximum dry density as determined by ASTM D 1557 test procedures. The actual depths of removals required should be determined and approved of by a GeoTek representative during site grading. Removals should include all undocumented fill, disturbed soil, and any relatively loose/soft and/or compressible, porous alluvium.

The subgrade soils below the limits of the proposed pavement and hardscape areas, and where surface improvements or new fill is planned, should be over-excavated to a depth of at least two (2) feet below existing natural grades.

Based on the known land use history, concentrated organics may be present at the project site. Additional earthwork recommendations related to the encountering of any concentrated areas of organic matter may be provided during site grading.

Following site clearing operations, over-excavation and lowering of site grades, where necessary, it is recommended that the exposed subgrade soils beneath all surface improvements be proof rolled with a heavy rubber-tired piece of construction equipment approved by and in the presence of the geotechnical engineering representative. All soil that ruts or excessively deflects during proof rolling should be removed as recommended by the GeoTek

representative. Following proof rolling and removal of any unsuitable bearing soil, the exposed subgrade should be scarified to a depth of about 12 inches, be moisture conditioned to slightly above the soil's optimum moisture content and then be compacted to at least 90 percent of the soil's maximum dry density as determined by ASTM D1557 test procedures.

5.2.4 Engineered Fill

The on-site soils are generally considered suitable for reuse as engineered fill provided they are free from vegetation, debris, oversized materials (6 inch diameter or greater) and other deleterious material. All areas should be brought to final subgrade elevations with fill materials that are placed and compacted in general accordance with minimum project standards. Engineered fill should be placed in 6-to-8-inch loose lifts, moisture conditioned to slightly above the optimum moisture content and compacted to a minimum relative compaction of 90 percent as determined by ASTM D1557 test procedures.

If wet soils are encountered during remedial grading, methods for drying soils such as stockpiling or mixing with dry soils may be required to bring the soils to the required moisture content for placement as engineered fill. Placement of engineered fill should be observed and tested on a full-time basis by a GeoTek representative during grading activities.

5.2.5 Transition Lot Condition

Building pads graded with a cut/fill transition should be undercut to reduce the potential for differential settlement. The cut portion of the cut/fill transition should be undercut to a depth of at least five (5) feet from natural grade or three (3) feet below the deepest proposed footing, whichever is deeper, and be backfilled with a properly compacted engineered fill. The bottom of the undercut should be sloped at a minimum of 1 percent toward the adjacent street/parking lot area.

5.2.6 Oversized Rock Disposal

Although unlikely, oversized cobbles, boulders and rock fragments may be encountered during rough grading and utility trench operations. If encountered, on-site disposal of oversized materials is possible, provided the oversized materials are placed as recommended on Plate 4 within Appendix E. Alternatively, oversized materials can be exported from the site.

5.2.7 Excavation Characteristics

Excavations in the on-site older alluvium should be readily accomplished with heavy-duty earthmoving or excavating equipment in good operating condition. All excavations should be formed in accordance with current Cal-OSHA requirements.

5.2.8 Trench Excavations and Backfill

Temporary trench excavations within the on-site materials should be stable at a 1.5:1 inclination for short durations during construction and where cuts do not exceed 15 feet in height. Deeper temporary excavations should be reviewed by GeoTek prior to their planned excavation to determine if supplemental recommendations or analysis are warranted. It is anticipated that temporary cuts to a maximum height of 4 feet can be excavated vertically.

Trench excavations should conform to Cal-OSHA regulations. The contractor should have a competent person, per OSHA requirements, on site during construction to observe conditions and to make the appropriate recommendations.

Utility trench backfill should be compacted to at least 90 percent relative compaction (as determined by ASTM D-1557 test procedures). Under-slab trenches should also be compacted to project specifications. Where applicable, based on jurisdictional requirements, the top 12 inches of backfill below subgrade for road pavements should be compacted to at least 95 percent relative compaction. On-site materials may not be suitable for use as bedding material but should be suitable as backfill provided particles larger than 6 inches are removed. Relatively abundant amounts of oversize materials may be encountered during excavations.

Compaction should be achieved with a mechanical compaction device. Ponding or jetting of trench backfill is not recommended. If backfill soils have dried out, they should be properly moisture conditioned prior to placement in trenches.

5.2.9 Shrinkage and Bulking

For planning purposes, a shrinkage loss of about 10 to 15 percent is anticipated for excavations within the undocumented fill, disturbed soils, and upper alluvium at the site. Several factors will impact earthwork balancing on the site, including shrinkage, trench spoil from utilities and footing excavations, as well as the accuracy of topography. Shrinkage and bulking are primarily dependent upon the degree of compactive effort achieved during construction, depth of fill and underlying site conditions.

A subsidence loss of up to about 0.10 feet is estimated for the site.

Site balance areas should be available in order to adjust project grades, depending on actual field conditions at the conclusion of earthwork construction.

5.2.10 Grading Plan Review

Upon completion of the site grading plans, it is recommended that those plans be provided to GeoTek for review. Based on that review, some modifications to the recommendations provided in this report may be necessary.

5.3 DESIGN RECOMMENDATIONS

5.3.1 Foundation Design Criteria

Post-Tensioned Slab Foundation Systems:

The soils are classified as having a "Very Low" (0≤EI≤20) and "Low" (21≤EI≤50) Expansion Index (EI) in accordance with ASTM D 4829. Since the California Building Code (CBC) indicates Post Tensioning Institute (PTI) design methodology is intended for expansive soils conditions, no e_m or y_m parameters as used in the PTI methodology are provided for structures to be constructed on soils having a "Very Low" EI. Preliminary e_m and y_m values were generated for structures to be constructed on soils having a "Low" (21≤EI≤50) Expansion Index (EI) based upon the following assumed parameters: Liquid Limit (LL) = 33, Plastic Limit (PL) = 19, and Plasticity Index (PI) = 14, Thornthwaite Moisture Index = -25; constant suction value = 3.6pF; post-equilibrium case assumed with wet (swelling) cycle going from 4.0pF to 3.0pF and drying (shrinking) cycle going from 4.0pF to 4.5pF. Structures to be constructed on soils having a "Very Low" EI can be constructed using "Low" EI design parameters.

The foundation elements for the proposed structures should bear entirely in engineered fill soils and should be designed in accordance with the *2022 California Building Code (CBC)*. The following design recommendations for post-tensioned (PT) foundations for this project are provided:

MINIMUM DESIGN REQUIREMENTS FOR POST-TENSIONED FOUNDATIONS		
Foundation Design Parameter	"Very Low" (0-20) Expansion Index	"Low" (21-50) Expansion Index
Foundation Depth or Minimum Perimeter Beam Depth/Turned Down Edge (inches below lowest adjacent grade)	One & Two-Stories – 12 inches Three-stories – 18 inches	One & Two-Stories – 12 inches Three-stories – 18 inches
Minimum Beam/Wall Foundation Width*	One & Two-Stories – 12 inches Three-stories – 15 inches	One & Two-Stories – 12 inches Three-stories – 18 inches
Minimum Slab Thickness (actual)	5 inches	5 inches
Edge Moisture Variation Distance, e_m	N/A	3.3 ft (Edge Lift – Swelling) 5.6 ft (Center Lift – Shrinkage)
Soil Differential Movement, y_m	N/A	≈ 0.55 inches (Edge Lift – Swelling) ≈ -0.15 inches (Center Lift – Shrinkage)
Effective Plasticity Index**	N/A	15 – Design Value
Presaturation of Subgrade Soil (Percent of Optimum)	Minimum 100% to a depth of 12 inches	Minimum 110% to a depth of 12 inches

*Code minimums per Table 1809.7 of CBC 2022
**Effective Plasticity Index should be verified at the completion of rough grading.

Conventional Reinforced Concrete Foundation Elements:

Alternatively, the site structures may be designed utilizing conventional reinforced concrete foundation systems. The conventional foundation elements for the proposed structures should bear entirely in compacted, engineered fill soils. Foundations should be designed in accordance with current Riverside County and 2022 CBC requirements.

Foundation design criteria for a conventional foundation system, in general conformance with the 2022 CBC are presented in this report. These are typical design criteria and are not intended to supersede the design by the structural engineer. It should be noted that the criteria provided are based on soil support characteristics only. The structural engineer should design the slab and beam reinforcement based on actual loading conditions. As previously discussed, the structural engineer needs to consider the estimated static and seismic settlements into their design.

Based on the expansion index testing performed for this report, site soils possess a "Very Low" (0≤EI≤20) to "Low" (21≤EI≤50) Expansion Index (EI) when tested in general accordance with ASTM D4829. Expansion index and soluble sulfate evaluation of the soils beneath conventional foundation elements should be performed during construction to evaluate the as-graded

conditions. Final recommendations should be based upon the as-graded soils conditions. A summary of the foundation design recommendations is presented in the following table:

DESIGN PARAMETER	"VERY LOW" (0≤EI≤20) EXPANSION INDEX (ASTM D 4829)	"LOW" (21≤EI≤50) EXPANSION INDEX (ASTM D 4829)
Building Foundation Depth or Minimum Perimeter Beam Depth (inches below lowest adjacent grade)	One & Two-Stories – 12 inches Three-stories – 18 inches	One & Two-Stories – 12 inches Three-stories – 18 inches
Minimum Foundation Width* (Inches)	One & Two-Stories – 12 inches Three-stories – 15 inches	One & Two-Stories – 12 inches Three-stories – 15 inches
Minimum Slab Thickness (actual)	4 inches	4 inches
Minimum Slab Reinforcing	6" x 6" – W1.4 x W1.4 welded wire fabric or No. 3 bars at 18 inch centers placed in middle of slab	6" x 6" – W2.9 x W2.9 welded wire fabric or No. 3 bars at 18 inch centers placed in middle of slab
Minimum Footing Reinforcement	Two No. 4 reinforcing bars, one placed near the top and one near the bottom of the footing	Two No. 4 reinforcing bars, one placed near the top and one near the bottom of the footing
Presaturation of Subgrade Soil (Percent of Optimum)	Minimum of 100 percent of the optimum moisture content to a depth of at least 12 inches prior to placing concrete	Minimum of 110 percent of the optimum moisture content to a depth of at least 12 inches prior to placing concrete

*Code minimums per Table 1809.7 of CBC 2022.

Based upon review, a modulus of subgrade reaction (E_I) of 175 pci may be used in the design of the post-tensioned slab foundation system or the conventional foundation system. It should be noted that this value is based upon standard one foot plate load tests. Depending upon the design methodology and foundation geometry this value may need to be modified by the following:

$$E_s = E_I \ ((B+1)/2B)^2$$

where: Es = design modulus
B = footing width

Post-tensioned slabs and conventional foundation systems should be designed in accordance with the *2022 CBC* and also the post-tensioned slabs should be designed according to PTI design methodology.

The following criteria for design of foundations are preliminary and should be re-evaluated based on the results of additional laboratory testing of samples obtained at/near finish pad grade.

5.3.1.1 An allowable bearing capacity of 2,000 pounds per square foot (psf) may be used for design of continuous and perimeter footings 12 inches deep and 12 inches wide, and pad footings 24 inches square and 12 inches deep. This allowable soil bearing capacity may be increased by 400 psf for each additional foot of footing depth and 250 psf for each additional foot of footing width to a maximum value of 3,000 psf. An increase of one-third may be applied when considering short-term live loads (e.g., seismic and wind loads). These bearing values contain a minimum factor of safety of three (3).

5.3.1.2 Structural foundations should be designed in accordance with the 2022 CBC, and to withstand a total static settlement of 1 inch and maximum differential static settlement of one-half of the total settlement over a horizontal distance of 40 feet.

5.3.1.3 The passive earth pressure may be computed as an equivalent fluid having a density of 325 psf per foot of depth, to a maximum earth pressure of 3,250 psf for footings founded on engineered fill or competent native soil. The allowable passive earth pressure contains a factor of safety of 1.5. A coefficient of friction between soil and concrete of 0.30 may be used with dead load forces. The coefficient of friction contains a reduction value of one-third (1/3). Passive pressure and frictional resistance may be combined without reduction. The upper one foot of soil should be ignored in the passive pressure calculations unless the surface is covered with pavements.

5.3.1.4 A grade beam, a minimum of 12 inches wide and 18 inches deep, should be utilized across large entrances. The base of the grade beam should be at the same elevation as the bottom of the adjoining footings.

5.3.1.5 A moisture and vapor retarding system should be placed below slabs-on-grade where moisture migration through the slab is undesirable. Guidelines for these are provided in the 2022 California Green Building Standards Code (CALGreen) Section 4.505.2, the 2022 CBC Section 1907.1 and ACI 360R-10. The vapor retarder design and construction should also meet the requirements of ASTM E 1643. A portion of the vapor retarder design should be the implementation of a moisture vapor retardant membrane.

It should be realized that the effectiveness of the vapor retarding membrane can be adversely impacted as a result of construction related punctures (e.g., stake penetrations, tears, punctures from walking on the vapor retarder placed atop the underlying aggregate layer, etc.). These occurrences should be limited as much as possible during construction. Thicker membranes are generally more resistant to accidental puncture than thinner ones. Products specifically designed for use as moisture/vapor retarders may also be more puncture resistant. Although the CBC

specifies a 6-mil vapor retarder membrane, it is GeoTek's opinion that a minimum 10 mil thick membrane with joints properly overlapped and sealed should be considered, unless otherwise specified by the slab design professional. The membrane should consist of Stego wrap or the equivalent.

Moisture and vapor retarding systems are intended to provide a certain level of resistance to vapor and moisture transmission through the concrete, but do not eliminate it. The acceptable level of moisture transmission through the slab is to a large extent based on the type of flooring used and environmental conditions. Ultimately, the vapor retarding system should be comprised of suitable elements to limit migration of water and reduce transmission of water vapor through the slab to acceptable levels. The selected elements should have suitable properties (i.e., thickness, composition, strength, and permeability) to achieve the desired performance level.

Moisture retarders can reduce, but not eliminate, moisture vapor rise from the underlying soils up through the slab. Moisture retarder systems should be designed and constructed in accordance with applicable American Concrete Institute, Portland Cement Association, Post-Tensioning Concrete Institute, ASTM and California Building Code requirements and guidelines.

GeoTek recommends that a qualified person, such as the flooring contractor, structural engineer, architect, and/or other experts specializing in moisture control within the building be consulted to evaluate the general and specific moisture and vapor transmission paths and associated potential impact on the proposed construction. That person (or persons) should provide recommendations relative to the slab moisture and vapor retarder systems and for migration of potential adverse impact of moisture vapor transmission on various components of the structures, as deemed appropriate.

In addition, the recommendations in this report and GeoTek's services in general are not intended to address mold prevention; since GeoTek, along with geotechnical consultants in general, do not practice in the area of mold prevention. If specific recommendations addressing potential mold issues are desired, then a professional mold prevention consultant should be contacted.

It is recommended that control joints be placed in two directions spaced approximately 24 to 36 times the thickness of the slab in inches. These joints are a

widely accepted means to control cracks and should be reviewed by the project structural engineer.

5.3.2 Miscellaneous Foundation Recommendations

5.3.2.1 To reduce moisture penetration beneath the slab on grade areas, utility trench excavations should be backfilled with engineered fill, lean concrete or concrete slurry where they intercept the perimeter footing or thickened slab edge.

5.3.2.2 Soils from the footing excavations should not be placed in the slab-on-grade areas unless properly compacted and tested. The excavations should be free of loose/sloughed materials and be neatly trimmed at the time of concrete placement.

5.3.3 Foundation Setbacks

Minimum setbacks for all foundations should comply with the 2022 CBC or City of Eastvale requirements, whichever is more stringent. Improvements not conforming to these setbacks are subject to the increased likelihood of excessive lateral movements and/or differential settlements. If large enough, these movements can compromise the integrity of the improvements. The top outside edge of all footings should be set back a minimum of H/3 (where H is the slope height) from the face of any descending slope. The setback should be at least five feet and need not exceed 40 feet.

5.3.4 Soil Corrosivity

The soil resistivity at this site was tested in the laboratory on a sample collected during the field investigation. The results of the testing indicate that the on-site soils are considered "*moderately corrosive*" (3,819 ohm-cm) (Roberge, 2000) to buried ferrous metal in accordance with current standards used by corrosion engineers. Recommendations for protection of buried ferrous metal should be provided by a corrosion engineer. Additional corrosion testing should be performed at the time of site grading to assess the corrosion potential of the as-graded soils.

5.3.5 Soil Sulfate Content

The sulfate content was determined in the laboratory on a sample collected during the field investigation. The results indicate that the water-soluble sulfate result is less than 0.1 percent by weight, which is considered "*negligible*" (S0 exposure category) as per Table 19.3.1.1 of ACI 318-19. Based on the test results and Table 19.3.1.1 of ACI 318-19, no special recommendations for concrete are required for this project due to soil sulfate exposure.

5.4 RETAINING WALL DESIGN AND CONSTRUCTION

5.4.1.1 General Design Criteria

Recommendations presented in this report apply to typical masonry or concrete vertical retaining walls. These are typical design criteria and are not intended to supersede the design by the structural engineer.

Retaining wall foundations should be embedded a minimum of 18 inches into engineered fill.

Retaining wall foundations should be designed in accordance with Section 5.3 of this report. Structural needs may govern and should be evaluated by the project structural engineer.

All earth retention structure plans, as applicable, should be reviewed by this office prior to finalization.

Earthwork considerations, site clearing and remedial earthwork for all earth retention structures should meet the requirements of this report, unless specifically provided otherwise, or more stringent requirements or recommendations are made by the designer. The backfill material placement for all earth retention structures should meet the requirement of Section 5.2.4 in this report.

In general, cantilever earth retention structures, which are designed to yield at least 0.001H, where H is equal to the height of the earth retention structure, may be designed using the "active" condition. Rigid earth retention structures (including but not limited to rigid walls, and walls braced at top, such as typical basement walls) should be designed using the "at-rest" condition.

In addition to the design lateral forces due to retained earth, surcharges due to improvements, such as an adjacent building or traffic loading, should be considered in the design of the earth retention structures. Loads applied within a 1:1 (horizontal: vertical) projection from the surcharge on the stem of the earth retention structure should be considered in the design.

Final selection of the appropriate design parameters should be made by the designer of the earth retention structures.

5.4.1.2 Cantilevered Walls

The recommendations presented below are for cantilevered retaining walls. Active earth pressure may be used for retaining wall design, provided the top of the wall is not restrained

from minor deflections. An equivalent fluid pressure approach may be used to compute the horizontal pressure against the wall. Appropriate fluid unit weights are given below for specific slope gradients of the retained material. These do not include other superimposed loading conditions such as traffic, structures, seismic events, or adverse geologic conditions.

ACTIVE EARTH PRESSURES	
Surface Slope of Retained Materials (horizontal:vertical)	Equivalent Fluid Pressure (pcf) Select Backfill* and Native Soils
Level	45
2:1	81

*The design pressures assume the backfill material has an expansion index less than or equal to 20. Backfill zone includes area between back of the wall to a plane (1:1 horizontal: vertical) up from bottom of the wall foundation (on the backside of the wall) to the ground surface.

For walls with a retained height greater than six (6) feet, an incremental seismic pressure should be included into the wall design. Where needed, it is recommended that a dynamic load increment of $14H^2$ [units: pounds per lineal feet of wall length] where H is the retained wall height, should be included into the wall design to account for seismic loading conditions. This dynamic load increment value may be considered to be applied to one-third of the wall height, H, above the base of the wall.

5.4.1.3 Retaining Wall Backfill and Drainage

The wall backfill should also include a minimum one (1) foot wide section of ¾- to 1-inch clean crushed rock (or an approved equivalent). The rock should be placed immediately adjacent to the back of the wall and extend up from a back drain to within approximately 24 inches of the finish grade. The upper 24 inches should consist of compacted on-site materials. The rock should be separated from the earth with filter fabric. The presence of other materials might necessitate revision of the parameters provided and modification of the wall designs. The backfill materials should be placed in lifts no greater than eight (8) inches in thickness and compacted to a minimum of 90% relative compaction as determined by ASTM D 1557 test procedures. Proper surface drainage needs to be provided and maintained.

As an alternative to the drain, rock and fabric, a pre-manufactured wall drainage product (example: Mira Drain 6000 or approved equivalent) may be used behind the retaining wall. The wall drainage product should extend from the base of the wall to within two (2) feet of the ground surface. The subdrain should be placed in direct contact with the wall drainage product.

Retaining walls should be provided with an adequate pipe and gravel back drain system to help prevent buildup of hydrostatic pressures. Backdrains should consist of a four (4)-inch diameter perforated collector pipe (Schedule 40, SDR 35, or approved equivalent) embedded in a minimum of one (1) cubic foot per linear foot of ¾- to 1-inch clean crushed rock or an approved equivalent, wrapped in filter fabric (Mirafi 140N or an approved equivalent). The drain system should be connected to a suitable outlet. Waterproofing of site walls should be performed where moisture migration through the walls is undesirable.

5.4.1.4 Restrained Retaining Walls

Retaining walls that will be restrained at the top that support level backfill or that have reentrant or male corners, should be designed for an equivalent at-rest fluid pressure of 66 pcf, plus any applicable surcharge loading. For areas of male or reentrant corners, the restrained wall design should extend a minimum distance of twice the height of the wall laterally from the corner, or a distance otherwise determined by the project structural engineer.

5.4.1.5 Other Design Considerations

- Wall design should consider the additional surcharge loads from superjacent slopes and/or footings, where appropriate.
- No backfill should be placed against concrete until minimum design strengths are evident by compression tests of cylinders.
- The retaining wall footing excavations, backcuts, and backfill materials should be approved by the project geotechnical engineer or their authorized representative.
- Positive separations should be provided in garden walls at horizontal distances not exceeding 20 feet.

5.5 PRELIMINARY PAVEMENT DESIGN RECOMMENDATIONS

Although planned final grades beneath the street improvements within the site are not yet known, the following preliminary pavement design recommendations are based on section minimums designated by the County of Riverside (Standard Plan No. 105). Preliminary pavement thickness design is based on the Caltrans Highway Design Manual (2018).

An R-value of 30 has been assumed for the preliminary design of the project pavement sections. Once the traffic loading information becomes more defined, revision to the pavement design recommendations may be warranted. It is recommended that the final pavement design be based on R-value testing of the as-graded subgrade soils within the pavement areas.

Based on the assumptions noted above the following preliminary pavement recommendations are provided for the site:

PRELIMINARY MINIMUM PAVEMENT SECTION			
Street Type	Traffic Index (TI)*	Thickness of Asphalt Concrete (inches)	Thickness of Aggregate Base (inches)
Local Street	5.5	3.0**	7.0
Collector Street	7.0	4.2**	9.0
Major Arterial (Archibald Avenue)	8.0	5.0**	10.5

*County of Riverside standards (Standard Plan No. 105).

**Minimum asphalt concrete thickness required by the County of Riverside.

Traffic Indices (TIs) used in the pavement design are designated by the County of Riverside and should provide a pavement life of approximately 20 years with a normal amount of flexible pavement maintenance. Irrigation adjacent to pavements, without a deep curb or other cutoff to separate landscaping from the paving may result in premature pavement failure. Traffic parameters used for design were selected based upon engineering judgment and not upon information furnished to us such as an equivalent wheel load analysis or a traffic study.

All base material and the upper 12 inches of subgrade should be compacted to at least 95 percent of the material's maximum dry density as determined by ASTM D1557 test procedures. All materials and methods of construction should conform to the requirements of the City of Eastvale and/or County of Riverside.

5.6 CONCRETE CONSTRUCTION

5.6.1 General

Concrete construction should follow the 2022 CBC and ACI guidelines regarding design, mix placement and curing of the concrete. If desired, GeoTek could provide quality control testing of the concrete during construction.

5.6.2 Concrete Mix Design

As discussed in Section 5.3.5, no special recommendations for concrete are required for this project due to soil sulfate exposure. Additional testing should be performed during grading so that specific recommendations can be formulated based on the as-graded conditions.

5.6.3 Concrete Flatwork

Exterior concrete flatwork is often one of the most visible aspects of site development. They are typically given the least level of quality control, being considered "non-structural" components. Cracking of these features is common due to various factors. While cracking usually does not affect the structural performance of the concrete, it is unsightly. It is recommended that the same standards of care be applied to these features as to the structure itself.

Flatwork should consist of a minimum four-inch (actual) thick concrete and the use of temperature and shrinkage control reinforcement is suggested. The project structural engineer should provide final design recommendations.

5.6.4 Concrete Performance

Concrete cracks should be expected. These cracks can vary from sizes that are hairline to more than 1/8 inch in width. Most cracks in concrete while unsightly do not significantly impact long-term performance. While it is possible to take measures (proper concrete mix, placement, curing, control joints, etc.) to reduce the extent and size of cracks that occur, some cracking will occur despite the best efforts to minimize it. Concrete undergoes chemical processes that are dependent on a wide range of variables, which are difficult, at best, to control. Concrete, while seemingly a stable material, is subject to internal expansion and contraction due to external changes over time.

One of the simplest means to control cracking is to provide weakened control joints for cracking to occur along. These do not prevent cracks from developing; they simply provide a relief point for the stresses that develop. These joints are a widely accepted means to control cracks but are not always effective. Control joints are more effective the more closely spaced they are. GeoTek suggests that control joints be placed in two orthogonal directions and located at a distance approximately equal to 24 to 36 times the slab thickness.

5.7 PLAN REVIEW AND CONSTRUCTION OBSERVATIONS

It is recommended that site grading, specifications, and foundation plans be reviewed by this office prior to construction to check for conformance with the recommendations of this report. It is also recommended that GeoTek representatives be present during site grading and foundation construction to observe and document for proper implementation of the geotechnical recommendations. The owner/developer should have GeoTek perform at least the following duties:

- Observe site clearing and grubbing operations for proper removal of all unsuitable materials.

- Observe and test bottom of removals prior to fill placement.
- Evaluate the suitability of on-site and import materials for fill placement and collect soil samples for laboratory testing where necessary.
- Observe the fill for uniformity during placement, including utility trench excavation backfill. Also, test the fill for density, relative compaction and moisture content.
- Observe and probe foundation excavations to confirm suitability of bearing materials with respect to density.

If requested, a construction observation and compaction report can be provided by GeoTek which can comply with the requirements of the governmental agencies having jurisdiction over the project. It is recommended that these agencies be notified prior to commencement of construction so that necessary grading permits can be obtained.

6. INTENT

It is the intent of this report to aid in the design and construction of the proposed development. Implementation of the advice presented in this report is intended to reduce risk associated with construction projects. The professional opinions and geotechnical advice contained in this report are not intended to imply total performance of the project or guarantee that unusual or variable conditions will not be discovered during or after construction.

The scope of GeoTek's evaluation is limited to the area explored that is shown on the Exploration Location Map (Figure 2). This evaluation does not and should in no way be construed to encompass any areas beyond the specific area of the proposed construction as indicated to GeoTek by the client. Further, no evaluation of any existing site improvements is included. The scope is based on GeoTek's understanding of the project and the client's needs, GeoTek's proposal (Proposal No. P-0301324-CR) dated February 28, 2024, and geotechnical engineering standards normally used on similar projects in this region.

7. LIMITATIONS

GeoTek's findings are based on site conditions observed and the stated sources. Thus, GeoTek's comments are professional opinions that are limited to the extent of the available data.

GeoTek has prepared this report in a manner consistent with that level of care and skill ordinarily exercised by members of the engineering at this time and location and science professions currently practicing under similar conditions in the jurisdiction in which the services are provided, subject to the time limits and physical constraints applicable to this report.

Since GeoTek's recommendations are based on the site conditions observed and encountered at the stated times and laboratory testing. Thus, GeoTek's conclusions and recommendations are professional opinions that are limited to the extent of the available data. Observations during construction are important to allow for any change in recommendations found to be warranted. These opinions have been derived in accordance with current standards of practice and no warranty of any kind is expressed or implied. Standards of care/practice are subject to change with time.

A - FIELD TESTING AND SAMPLING PROCEDURES

The Modified Split-Barrel Sampler (Ring)

The ring sampler is driven into the ground at various depths in accordance with ASTM D 3550 test procedures. The sampler, with an external diameter of 3.0 inches, is lined with 1-inch long, thin brass rings with inside diameters of approximately 2.4 inches. The sampler is typically driven into the ground 12 or 18 inches with a 140-pound hammer free falling from a height of 30 inches. Blow counts are recorded for every 6 inches of penetration as indicated on the log of boring. The samples are removed from the sample barrel in the brass rings, sealed, and transported to the laboratory for testing.

The Standard Penetration Test (SPT) Sampler

Standard penetration tests (SPT) were performed with a 2.0-inch outside diameter, 1.5-inch inside diameter, split-barrel sampler. The sampler was 18 inches long. The inside diameter of the sampler shoe was 1.4 inches. The sampler was unlined. The sampler conformed to the requirements of ASTM D 1586. A 140-pound automatic trip hammer was utilized, dropping 30 inches for each blow. Blow counts are recorded for every 6 inches of penetration as indicated on the log of boring. Disturbed samples are removed from the sample barrel, sealed in a plastic bag, and transported to the laboratory for testing.

Bulk Samples (Large)

These samples are normally large bags of earth materials over 20 pounds in weight collected from the field by means of hand digging or exploratory cuttings.

Bulk Samples (Small)

These are plastic bag samples which are normally airtight and contain less than 5 pounds in weight of earth materials collected from the field by means of hand digging or exploratory cuttings. These samples are primarily used for determining natural moisture content and classification indices.

B - BORING LOG LEGEND

The following abbreviations and symbols often appear in the classification and description of soil and rock on the log of borings:

SOILS

USCS	Unified Soil Classification System
f-c	Fine to coarse
f-m	Fine to medium

GEOLOGIC

B: Attitudes	Bedding: strike/dip
J: Attitudes	Joint: strike/dip
C: Contact line	
……..	Dashed line denotes USCS material change
———	Solid Line denotes unit / formational change
———	Thick solid line denotes end of boring

(Additional denotations and symbols are provided on the boring logs)

SUMMARY OF LABORATORY TESTING

Classification

Soils were classified visually in general accordance with the Unified Soil Classification System (ASTM Test Method D 2487). The soil classifications are shown on the logs of borings in Appendix A.

Collapse Test

Collapse tests were performed on selected samples of the site soils in general accordance with ASTM D 5333 test procedures. The results of this test are presented graphically in Appendix B.

Direct Shear

Shear testing was performed in a direct shear machine of the strain-control type in general accordance with ASTM D 3080 test procedures. The rate of deformation was approximately 0.035 inch per minute. The sample was sheared under varying confining loads in order to determine the coulomb shear strength parameters, angle of internal friction and cohesion. The tests were performed on soil samples remolded to approximately 90 percent of maximum dry density as determined by ASTM D 1557 test procedures. The shear test results are presented graphically in Appendix B.

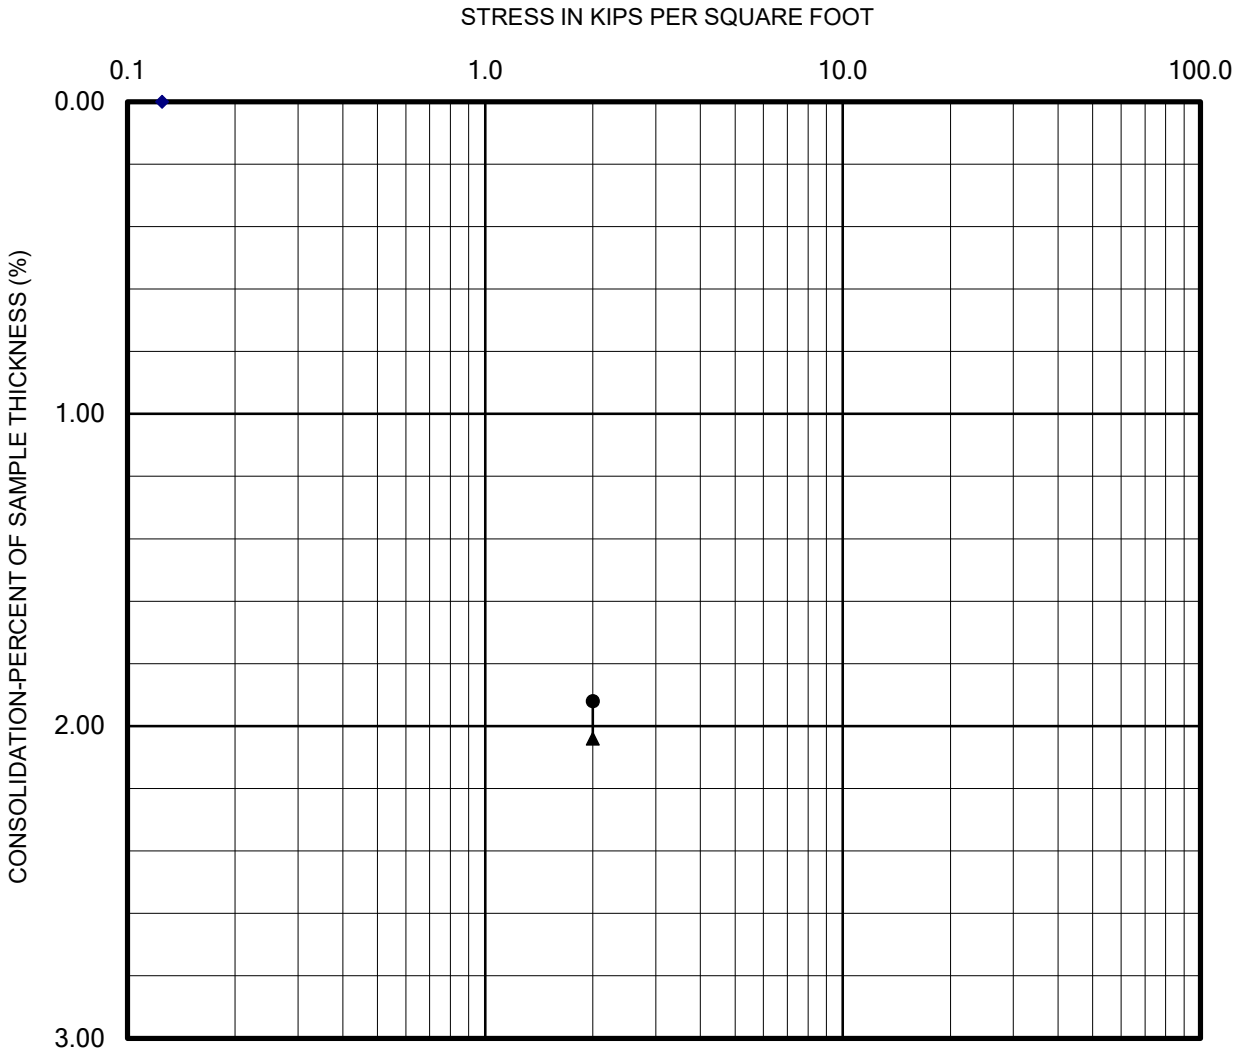
Expansion Index

Expansion Index testing was performed on two (2) soil samples obtained from the field exploration. Testing was performed in general accordance with ASTM D 4829 test procedures. The results of the testing are provided below.

Boring #	Depth (ft.)	Description	Expansion Index	Classification
B-2	0-5	Clayey/Silty Sand (SM)	0	Low
B-4	0-5	Clayey Sand (SC) to Sandy Clay (CL)	24	Very Low

In-Situ Moisture and Density

The natural water content of sampled soils was determined in general accordance with ASTM D 2216 test procedures on samples of the materials recovered from the subsurface exploration. In addition, in-place dry density of the sampled soils was determined in general accordance with ASTM D 2937 test procedures on relatively undisturbed samples to measure the unit weight of the subsurface soils. Results of these tests are shown on the boring logs at the appropriate sample depths in Appendix A.



Moisture-Density Relationship

Laboratory testing was performed on one (1) sample collected during the subsurface exploration. The laboratory maximum dry density and optimum moisture content for the soil was determined in general accordance with ASTM D 1557 test procedures. The results are presented graphically in Appendix B.

Sulfate Content, Resistivity and Chloride Content

Testing to determine the water-soluble sulfate content was performed in general accordance with ASTM D4327 test procedures. Resistivity testing was completed in general accordance with ASTM G187 test procedures. Testing to determine the chloride content was performed in general accordance with ASTM D4327 test procedures. The results of the testing are provided below and in Appendix B.

Boring #	Depth (ft.)	pH ASTM D4972	Chloride ASTM D4327 (mg/kg)	Sulfate ASTM D4327 (% by weight)	Resistivity ASTM G187 (ohm-cm)
B-2	0-5	7.2	7.0	0.0124	3,819

DIRECT SHEAR TEST

Project Name:	APNs 130-070-015 & -021; 130-080-(	***Sample Location:***	B-4 @ 0-5 Feet
Project Number:	3836-CR	***Date Tested:***	4/3/2024

Shear Strength: Φ = 28 ° , C = 244 psf

Notes: 1 - The soil specimen used in the shear box was a ring sample remolded to approximately 90% relative compaction from a bulk sample collected during the field investigation.

2 - The above reflect direct shear strength at saturated conditions.

3 - The tests were run at a shear rate of 0.01 in/min.

Cations and Anions, except Sulfide and Bicarbonate, tested with Ion Chromatography
mg/kg = milligrams per kilogram (parts per million) of dry soil weight
ND = 0 = Not Detected | NT = Not Tested | Unk = Unknown
Chemical Analysis performed on 1:3 Soil-To-Water extract
PPM = mg/kg (soil) = mg/L (Liquid)

Note: Sometimes a bad sulfate hit is a contaminated spot. Typical fertilizers are Potassium chloride, ammonium sulfate or ammonium sulfate nitrate (ASN). So this is another reason why testing full corrosion series is good because we then have the data to see if those other ingredients are present meaning the soil sample is just fertilizer-contaminated soil. This can happen often when the soil samples collected are simply surface scoops which is why it's best to dig in a foot, throw away the top and test the deeper stuff. Dairy farms are also notorious for these items.

If one lot pops up much more corrosive than all others, we would recommend collecting more samples from the lots surrounding the problem lot to determine if the peak is isolated to it.

GENERAL EARTHWORK GRADING GUIDELINES

Proposed Single-Family Residential Development
8312 Grapewin Street
Assessor's Parcel Numbers (APNs) 130-070-015 and -021; and 130-080-004
Eastvale, Riverside County, California
Project No. 3836-CR

GENERAL GRADING GUIDELINES

Guidelines presented herein are intended to address general construction procedures for earthwork construction. Specific situations and conditions often arise which cannot reasonably be discussed in general guidelines, when anticipated these are discussed in the text of the report. Often unanticipated conditions are encountered which may necessitate modification or changes to these guidelines. It is our hope that these will assist the contractor to more efficiently complete the project by providing a reasonable understanding of the procedures that would be expected during earthwork and the testing and observation used to evaluate those procedures.

General

Grading should be performed to at least the minimum requirements of governing agencies, Chapters 18 and 33 of the Uniform Building Code, CBC and the guidelines presented below.

Preconstruction Meeting

A preconstruction meeting should be held prior to site earthwork. Any questions the contractor has regarding our recommendations, general site conditions, apparent discrepancies between reported and actual conditions and/or differences in procedures the contractor intends to use should be brought up at that meeting. The contractor (including the main onsite representative) should review our report and these guidelines in advance of the meeting. Any comments the contractor may have regarding these guidelines should be brought up at that meeting.

Grading Observation and Testing

1. Observation of the fill placement should be provided by our representative during grading. Verbal communication during the course of each day will be used to inform the contractor of test results. The contractor should receive a copy of the "Daily Field Report" indicating results of field density tests that day. If our representative does not provide the contractor with these reports, our office should be notified.
2. Testing and observation procedures are, by their nature, specific to the work or area observed and location of the tests taken, variability may occur in other locations. The contractor is responsible for the uniformity of the grading operations; our observations and test results are intended to evaluate the contractor's overall level of efforts during grading. The contractor's personnel are the only individuals participating in all aspects of site work. Compaction testing and observation should not be considered as relieving the contractor's responsibility to properly compact the fill.
3. Cleanouts, processed ground to receive fill, key excavations, and subdrains should be observed by our representative prior to placing any fill. It will be the contractor's responsibility to notify our representative or office when such areas are ready for observation.

4. Density tests may be done on the surface material to receive fill, as considered warranted by this firm.
5. In general, density tests would be made at maximum intervals of two feet of fill height, or every 1,000 cubic yards of fill placed. Criteria will vary depending on soil conditions and size of the fill. More frequent testing may be performed. In any case, an adequate number of field density tests should be made to evaluate the required compaction and moisture content is generally being obtained.
6. Laboratory testing to support field test procedures will be performed, as considered warranted, based on conditions encountered (e.g. change of material sources, types, etc.) Every effort will be made to process samples in the laboratory as quickly as possible and in progress construction projects are our first priority. However, laboratory workloads may cause delays and some soils may require a **minimum of 48 to 72 hours to complete test procedures**. Whenever possible, our representative(s) should be informed in advance of operational changes that might result in different source areas for materials.
7. Procedures for testing of fill slopes are as follows:
   a) Density tests should be taken periodically during grading on the flat surface of the fill, three to five feet horizontally from the face of the slope.
   b) If a method other than over building and cutting back to the compacted core is to be employed, slope compaction testing during construction should include testing the outer six inches to three feet in the slope face to determine if the required compaction is being achieved.
8. Finish grade testing of slopes and pad surfaces should be performed after construction is complete.

Site Clearing

1. All vegetation, and other deleterious materials, should be removed from the site. If material is not immediately removed from the site it should be stockpiled in a designated area(s) well outside of all current work areas and delineated with flagging or other means. Site clearing should be performed in advance of any grading in a specific area.
2. Efforts should be made by the contractor to remove all organic or other deleterious material from the fill, as even the most diligent efforts may result in the incorporation of some materials. This is especially important when grading is occurring near the natural grade. All equipment operators should be aware of these efforts. Laborers may be required as root pickers.
3. Nonorganic debris or concrete may be placed in deeper fill areas provided the procedures used are observed and found acceptable by our representative.

Treatment of Existing Ground

1. Following site clearing, all surficial deposits of alluvium and colluvium as well as weathered or creep effected bedrock, should be removed unless otherwise specifically indicated in the text of this report.
2. In some cases, removal may be recommended to a specified depth (e.g. flat sites where partial alluvial removals may be sufficient). The contractor should not exceed these depths unless directed otherwise by our representative.
3. Groundwater existing in alluvial areas may make excavation difficult. Deeper removals than indicated in the text of the report may be necessary due to saturation during winter months.
4. Subsequent to removals, the natural ground should be processed to a depth of six inches, moistened to near optimum moisture conditions and compacted to fill standards.
5. Exploratory back hoe or dozer trenches still remaining after site removal should be excavated and filled with compacted fill if they can be located.

Fill Placement

1. Unless otherwise indicated, all site soil and bedrock may be reused for compacted fill; however, some special processing or handling may be required (see text of report).
2. Material used in the compacting process should be evenly spread, moisture conditioned, processed, and compacted in thin lifts six (6) to eight (8) inches in compacted thickness to obtain a uniformly dense layer. The fill should be placed and compacted on a nearly horizontal plane, unless otherwise found acceptable by our representative.
3. If the moisture content or relative density varies from that recommended by this firm, the contractor should rework the fill until it is in accordance with the following:
    a) Moisture content of the fill should be at or above optimum moisture. Moisture should be evenly distributed without wet and dry pockets. Pre-watering of cut or removal areas should be considered in addition to watering during fill placement, particularly in clay or dry surficial soils. The ability of the contractor to obtain the proper moisture content will control production rates.
    b) Each six-inch layer should be compacted to at least 90 percent of the maximum dry density in compliance with the testing method specified by the controlling governmental agency. In most cases, the testing method is ASTM Test Designation D 1557.
4. Rock fragments less than eight inches in diameter may be utilized in the fill, provided:
    a) They are not placed in concentrated pockets;
    b) There is a sufficient percentage of fine-grained material to surround the rocks;
    c) The distribution of the rocks is observed by, and acceptable to, our representative.

5. Rocks exceeding eight (8) inches in diameter should be taken off site, broken into smaller fragments, or placed in accordance with recommendations of this firm in areas designated suitable for rock disposal. On projects where significant large quantities of oversized materials are anticipated, alternate guidelines for placement may be included. If significant oversize materials are encountered during construction, these guidelines should be requested.
6. In clay soil, dry or large chunks or blocks are common. If in excess of eight (8) inches minimum dimension, then they are considered as oversized. Sheepsfoot compactors or other suitable methods should be used to break up blocks. When dry, they should be moisture conditioned to provide a uniform condition with the surrounding fill.

Slope Construction

1. The contractor should obtain a minimum relative compaction of 90 percent out to the finished slope face of fill slopes. This may be achieved by either overbuilding the slope and cutting back to the compacted core, or by direct compaction of the slope face with suitable equipment.
2. Slopes trimmed to the compacted core should be overbuilt by at least three (3) feet with compaction efforts out to the edge of the false slope. Failure to properly compact the outer edge results in trimming not exposing the compacted core and additional compaction after trimming may be necessary.
3. If fill slopes are built "at grade" using direct compaction methods, then the slope construction should be performed so that a constant gradient is maintained throughout construction. Soil should not be "spilled" over the slope face nor should slopes be "pushed out" to obtain grades. Compaction equipment should compact each lift along the immediate top of slope. Slopes should be back rolled or otherwise compacted at approximately every 4 feet vertically as the slope is built.
4. Corners and bends in slopes should have special attention during construction as these are the most difficult areas to obtain proper compaction.
5. Cut slopes should be cut to the finished surface. Excessive undercutting and smoothing of the face with fill may necessitate stabilization.

UTILITY TRENCH CONSTRUCTION AND BACKFILL

Utility trench excavation and backfill is the contractor's responsibility. The geotechnical consultant typically provides periodic observation and testing of these operations. While efforts are made to make sufficient observations and tests to verify that the contractors' methods and procedures are adequate to achieve proper compaction, it is typically impractical to observe all backfill procedures. As such, it is critical that the contractor use consistent backfill procedures.

Compaction methods vary for trench compaction and experience indicates many methods can be successful. However, procedures that "worked" on previous projects may or may not prove effective on a given site. The contractor(s) should outline the procedures proposed, so that we may discuss them **prior** to construction. We will offer comments based on our knowledge of site conditions and experience.

1. Utility trench backfill in slopes, structural areas, in streets and beneath flat work or hardscape should be brought to at least optimum moisture and compacted to at least 90 percent of the laboratory standard. Soil should be moisture conditioned prior to placing in the trench.
2. Flooding and jetting are not typically recommended or acceptable for native soils. Flooding or jetting may be used with select sand having a Sand Equivalent (SE) of 30 or higher. This is typically limited to the following uses:
   a) shallow (12 + inches) under slab interior trenches and,
   b) as bedding in pipe zone.

   The water should be allowed to dissipate prior to pouring slabs or completing trench compaction.
3. Care should be taken not to place soils at high moisture content within the upper three feet of the trench backfill in street areas, as overly wet soils may impact subgrade preparation. Moisture may be reduced to 2% below optimum moisture in areas to be paved within the upper three feet below sub grade.
4. Sand backfill should not be allowed in exterior trenches adjacent to and within an area extending below a 1:1 projection from the outside bottom edge of a footing, unless it is similar to the surrounding soil.
5. Trench compaction testing is generally at the discretion of the geotechnical consultant. Testing frequency will be based on trench depth and the contractor's procedures. A probing rod would be used to assess the consistency of compaction between tested areas and untested areas. If zones are found that are considered less compact than other areas, this would be brought to the contractor's attention.

JOB SAFETY

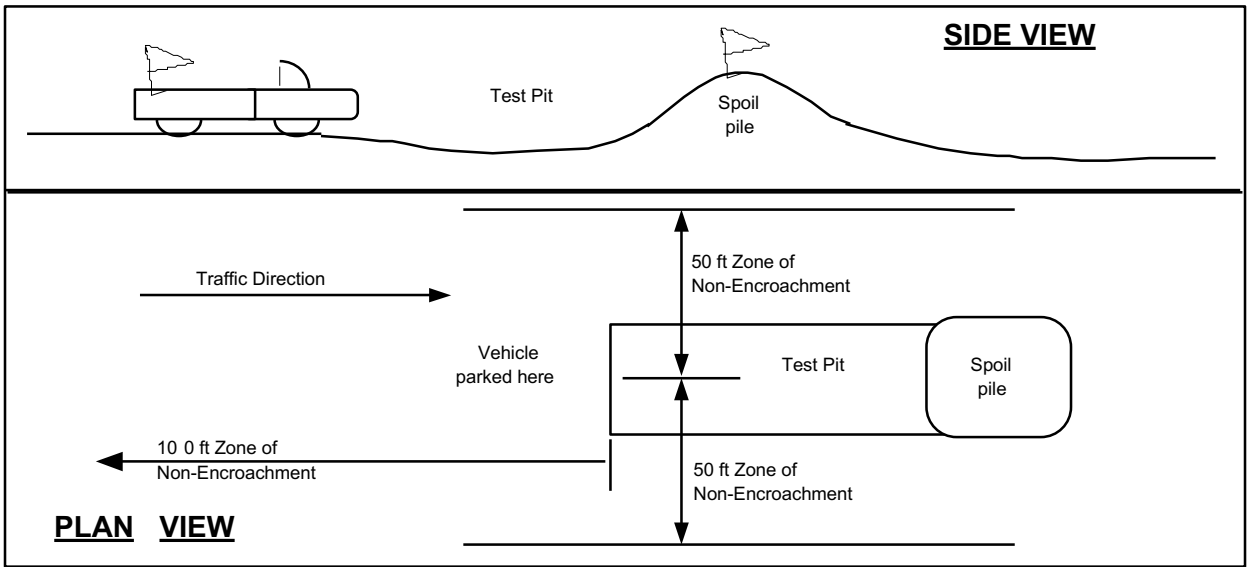
General

Personnel safety is a primary concern on all job sites. The following summaries are safety considerations for use by all our employees on multi-employer construction sites. On ground personnel are at the highest risk of injury and possible fatality on grading construction projects. The company recognizes that construction activities will vary on each site and that job site safety is the contractor's responsibility. However, it is imperative that all personnel be safety conscious to avoid accidents and potential injury.

In an effort to minimize risks associated with geotechnical testing and observation, the following precautions are to be implemented for the safety of our field personnel on grading and construction projects.

1. Safety Meetings: Our field personnel are directed to attend the contractor's regularly scheduled safety meetings.
2. Safety Vests: Safety vests are provided for and are to be worn by our personnel while on the job site.
3. Safety Flags: Safety flags are provided to our field technicians; one is to be affixed to the vehicle when on site, the other is to be placed atop the spoil pile on all test pits.

In the event that the contractor's representative observes any of our personnel not following the above, we request that it be brought to the attention of our office.



Test Pits Location, Orientation and Clearance

The technician is responsible for selecting test pit locations. The primary concern is the technician's safety. However, it is necessary to take sufficient tests at various locations to obtain a representative sampling of the fill. As such, efforts will be made to coordinate locations with the grading contractors authorized representatives (e.g. dump man, operator, supervisor, grade checker, etc.), and to select locations following or behind the established traffic pattern, preferably outside of current traffic. The contractors authorized representative should direct excavation of the pit and safety during the test period. Again, safety is the paramount concern.

Test pits should be excavated so that the spoil pile is placed away from oncoming traffic. The technician's vehicle is to be placed next to the test pit, opposite the spoil pile. This necessitates that the fill be maintained in a drivable condition. Alternatively, the contractor may opt to park a piece of equipment in front of test pits, particularly in small fill areas or those with limited access.

A zone of non-encroachment should be established for all test pits (see diagram below). No grading equipment should enter this zone during the test procedure. The zone should extend outward to the sides approximately 50 feet from the center of the test pit and 100 feet in the direction of traffic flow. This zone is established both for safety and to avoid excessive ground vibration, which typically decreases test results.

TEST PIT SAFETY PLAN

Slope Tests

When taking slope tests, the technician should park their vehicle directly above or below the test location on the slope. The contractor's representative should effectively keep all equipment at a safe operation distance (e.g. 50 feet) away from the slope during testing.

The technician is directed to withdraw from the active portion of the fill as soon as possible following testing. The technician's vehicle should be parked at the perimeter of the fill in a highly visible location.

Trench Safety

It is the contractor's responsibility to provide safe access into trenches where compaction testing is needed. Trenches for all utilities should be excavated in accordance with CAL-OSHA and any other applicable safety standards. Safe conditions will be required to enable compaction testing of the trench backfill.

All utility trench excavations in excess of 5 feet deep, which a person enters, are to be shored or laid back. Trench access should be provided in accordance with OSHA standards. Our personnel are directed not to enter any trench by being lowered or "riding down" on the equipment.

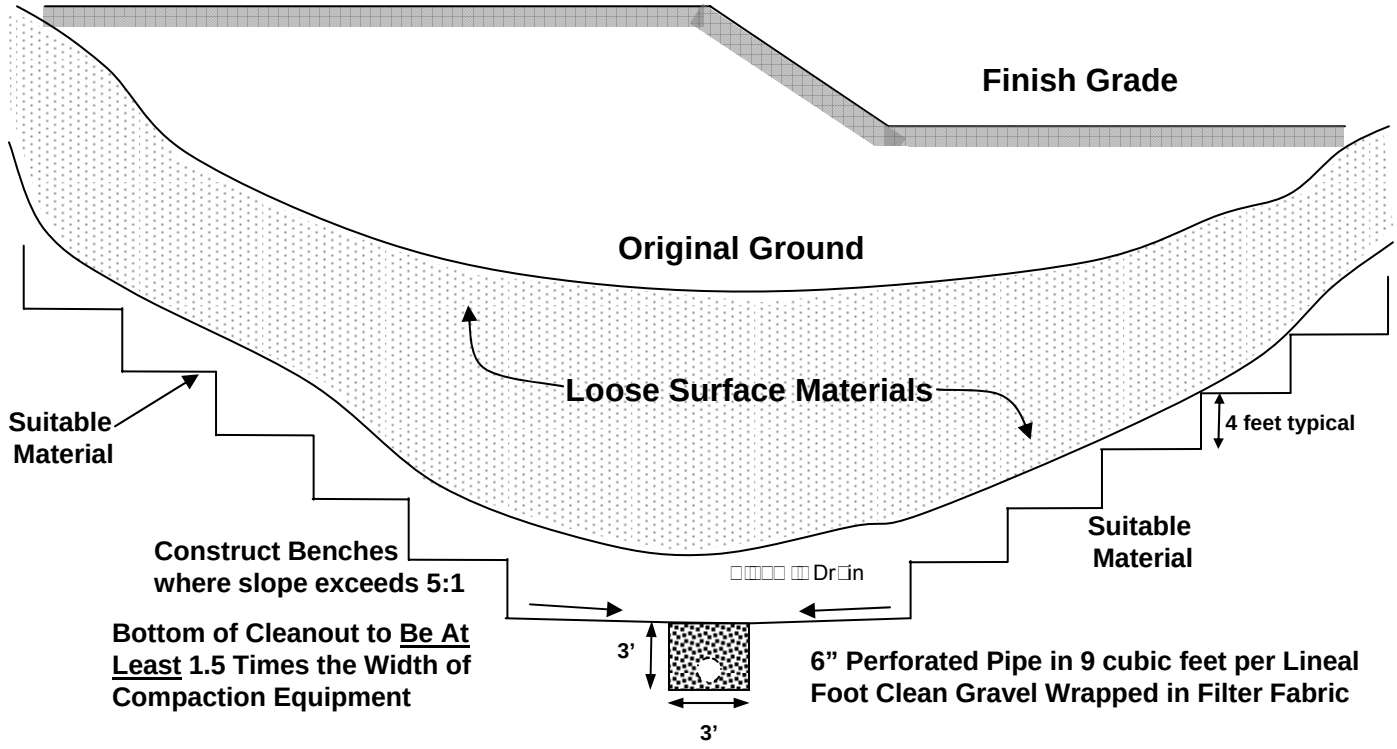
Our personnel are directed not to enter any excavation which;

1. is 5 feet or deeper unless shored or laid back,
2. exit points or ladders are not provided,
3. displays any evidence of instability, has any loose rock or other debris which could fall into the trench, or

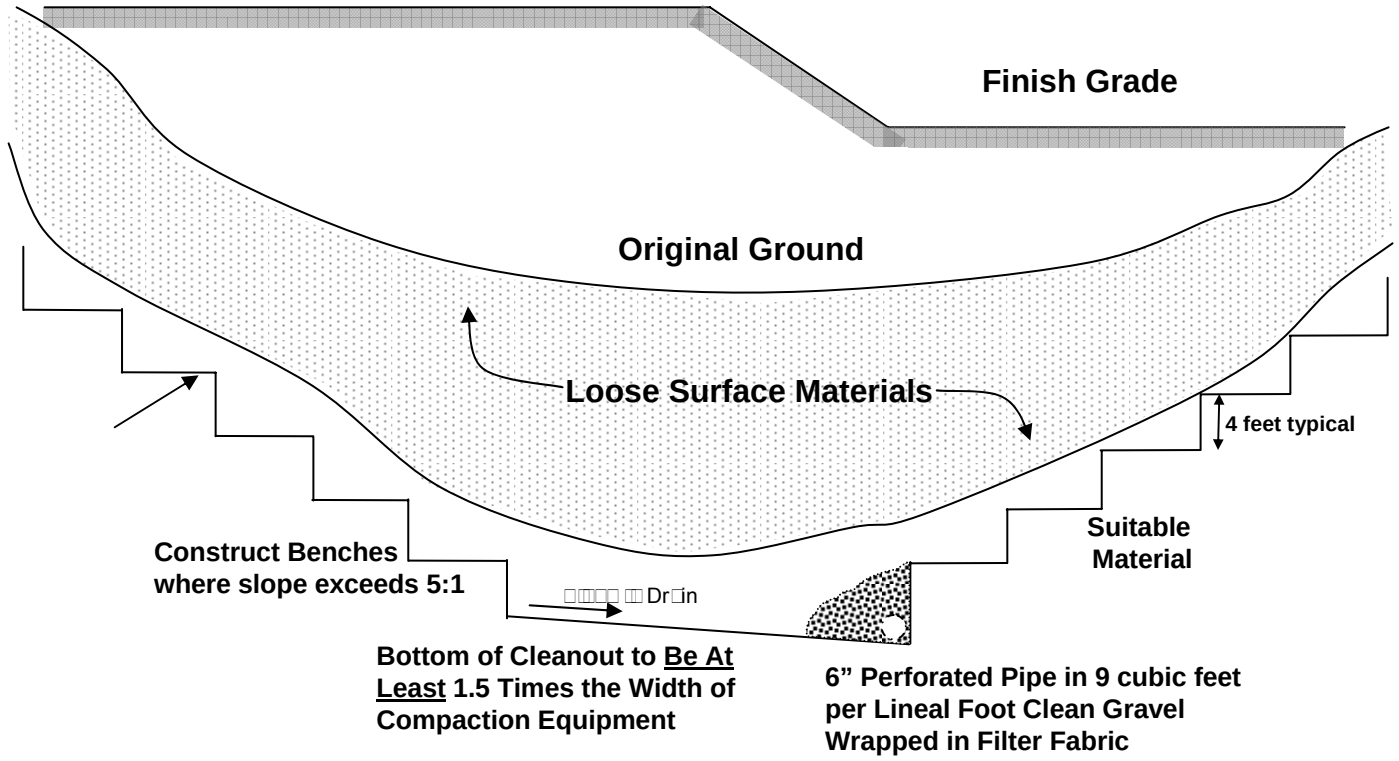
4. displays any other evidence of any unsafe conditions regardless of depth.

If the contractor fails to provide safe access to trenches for compaction testing, our company policy requires that the soil technician withdraws and notifies their supervisor. The contractors representative will then be contacted in an effort to effect a solution. All backfill not tested due to safety concerns or other reasons is subject to reprocessing and/or removal.

Procedures



In the event that the technician's safety is jeopardized or compromised as a result of the contractor's failure to comply with any of the above, the technician is directed to inform both the developer's and contractor's representatives. If the condition is not rectified, the technician is required, by company policy, to immediately withdraw and notify their supervisor. The contractor's representative will then be contacted in an effort to affect a solution. No further testing will be performed until the situation is rectified. Any fill placed in the interim can be considered unacceptable and subject to reprocessing, recompaction or removal.



In the event that the soil technician does not comply with the above or other established safety guidelines, we request that the contractor bring this to the technician's attention and notify our project manager or office. Effective communication and coordination between the contractors' representative and the field technician(s) is strongly encouraged in order to implement the above safety program and safety in general.

The safety procedures outlined above should be discussed at the contractor's safety meetings. This will serve to inform and remind equipment operators of these safety procedures, particularly the zone of non-encroachment.

The safety procedures outlined above should be discussed at the contractor's safety meetings. This will serve to inform and remind equipment operators of these safety procedures, particularly the zone of non-encroachment.

Project No.: 185806478

Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I and Phase II Environmental Site Assessment (Report) was prepared by Stantec Consulting Services Inc. (“Stantec”) for the account of Warmington Residential (the “Client”). The conclusions in the Report are Stantec’s professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient’s own risk.

Stantec has assumed all information received from the “Client” and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec’s contract with the Client. While the Report may be provided to applicable authorities having jurisdiction and others for whom the Client is responsible, Stantec does not warrant the services to any third party. The report may not be relied upon by any other party without the express written consent of Stantec, which may be withheld at Stantec’s discretion.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 EXECUTIVE SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property associated with Assessor's Parcel Numbers (APNs) 130-070-015, 130-080-004, and 130-070-021, located southeast of the intersection of Archibald Avenue and Grapewin Street, Eastvale, Riverside County, California (the "Subject Property"), on behalf of Warmington Residential (the "Client"). The work was performed according to Stantec's proposal and terms and conditions dated February 21, 2024. Warmington Residential (the "User") has been designated as the User of this report. The intended use of this Phase I ESA is for due diligence in support of potential redevelopment.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1527-21, and All Appropriate Inquiries (AAI) as defined by the United States Environmental Protection Agency (EPA) in Title 40 of the Code of Federal Regulations, Part 312 (40 CFR 312), except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Subject Property consists of approximately 8.3 acres of land associated with APNs 130-070-015 (2.27 acres), 130-080-004 (0.99 acres), and 130-070-021 (5.04 acres), associated with 8312 Grapewin Street and 330 Archibald Avenue, Eastvale, California 92880. The Subject Property is currently developed with a residential structure and livestock farm. Historical records indicate the Subject Property was utilized for agricultural purposes between the 1930s to 1960s, and partially residentially developed by the 1970s. Adjoining properties, as well as the nearby area, include the Santa Ana River, residential and commercial development. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

During the early stages of the Phase I ESA, Stantec identified the following recognized environmental conditions (RECs):

- Historical records indicate that the Subject Property and vicinity were historically utilized for agricultural purposes. Based on the historical agricultural use, organochlorine pesticides (OCPs) and or herbicides (that could contain lead and arsenic) may have been utilized on the Subject Property and near-surface soils may have potentially contained these compounds.
- Two nearby former dairy farm operations are located upgradient from the Subject Property. These sites reportedly had multiple underground storage tanks (USTs); the status of the USTs was not reported. Additionally, no records of methane surveys were reported for the historical dairy farm operations at the sites.

To evaluate the aforementioned RECs and data gap above, Stantec performed a Phase II ESA, between March 25 and 27, 2024, that consisted of a soil and soil vapor assessment on the Subject Property. The scope of work performed included the advancement of 12 soil borings (HA-1 through HA-12) to a maximum depth of approximately 3 feet below ground surface (bgs)to assess the Property for OCPs and lead and arsenic in the shallow soils. In addition, three soil borings (SVB-1 through SVB-3) were drilled to a maximum depth of approximately 5.5 feet bgs to collect soil vapor samples. Soil vapor probes were set in three soil borings (SVB-1 through SVB-3) at 5-feet bgs. The locations of the soil vapor borings were along the

western perimeter to evaluate the potential off-site release from the upgradient former dairy farms with former USTs.

The results of the completed assessment reported one minor detections of the OCP 4,4'-DDE at 0.0173 milligrams per kilogram (mg/kg). This detection of 4,4'-DDE is below the United States Environmental Protection Agency (USEPA) Regional Screening Level (RSL) of 2.0 mg/kg and below the hazardous waste level of 1.0 mg/kg used for waste disposal. There were no other detections of OCPs above their corresponding laboratory reporting limits.

There were two detections of arsenic reported at concentrations of 5.5 and 5.0 mg/kg which exceeded regulatory thresholds for residential soil set at 0.11 mg/kg. However, arsenic occurs naturally in California at levels up to 12 mg/kg, therefore exceeding the regulatory threshold. The State of California uses the background level of 12 mg/kg as the cleanup standard for arsenic. Therefore, the arsenic concentrations were detected below the regulatory cleanup levels. Lead was detected in all 15 soil samples at concentrations ranging from 2.0 to 8.6 mg/kg and concentrations were below regulatory thresholds for residential soil set at 80 mg/kg. Therefore, the historical agricultural use of the Subject Property is not considered a REC and no further assessment is recommended concerning is issue.

Soil vapor results showed minor detections of volatile organic compounds (VOCs) below their respective residential screening levels when applying the most conservative attenuation factor (AF) of 0.03 with the exception of benzene and chloroform. Benzene was reported at 5.0 ug/m3 and chloroform was reported at 9 ug/m3 in soil vapor sample SVB-1 which is above their respective residential screening levels of 3.23 and 4.0 ug/m3 when applying the most conservation attenuation factor of 0.03. However, the concentrations are below their respective residential screening levels of 97 and 120 ug/m3 when applying the attenuation factor of 0.001 which is used to evaluate risk. There were no other detections above the laboratory reporting limits (*i.e.*, the results were "non-detect") for any other VOCs in any of the soil vapor samples. Additionally, no methane was detected in any of the soil vapor samples collected.

Based on the results of Stantec subsurface assessment, historical agricultural use of the Subject Property is not considered a REC. Additionally, the minor impacts to the subsurface of the Subject Property from the former auto service operations and off-site dry-cleaning/fuel stations appear to be *de minimis* and no further assessment or remedial action appears to be warranted at this time. .

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property. Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed no recognized environmental conditions (RECs), Controlled RECs (CRECs), or significant data gaps in connection with the Subject Property. No further investigation appears to be warranted at this time.

This assessment has revealed the following items of note in connection with the Subject Property:

- Subject Property structures were constructed circa at least 1970s, and the presence of asbestos-containing materials (ACMs) and lead-based paint (LBP) is possible. It is recommended that an ACM and LBP survey be conducted prior to redevelopment in accordance with applicable federal and local regulations.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform AAI into the past ownership and uses of the Subject Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," Designation E1527-21. "All Appropriate Inquiries" is the process for evaluating a property's environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions ("RECs") of the Subject Property.

The ASTM E1527-21 standard indicates that the goal of the Phase I ESA is to identify RECs, as well as historical recognized environmental conditions ("HRECs") and controlled recognized environmental conditions ("CRECs") that may exist at a property. The term "recognized environmental conditions" is defined as:

1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment;

2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or

3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

ASTM defines a "HREC" as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., activity and use limitations or other property use limitations). A HREC is not considered a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The release of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor releases that generally do not present a material risk

to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER), defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the Subject Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA was conducted in accordance with our proposal to Warmington Residential dated February 21, 2024, and Client's authorization on March 8, 2024. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-21 notes that the availability of record information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property consists of approximately 8.3 acres of land associated with APNs 130-070-015 (2.27 acres), 130-080-004 (0.99 acres), and 130-070-021 (5.04 acres), associated with 8312 Grapewin Street and 330 Archibald Avenue, Eastvale, California 92880. The Subject Property is currently developed with a residential structure and livestock farm. Historical records indicate the Subject Property was utilized for agricultural purposes between the 1930s to 1960s, and partially residentially developed by the 1970s. Adjoining properties, as well as the nearby area, include the Santa Ana River, residential and commercial development. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Subject Property.

This report provides an evaluation of selected environmental conditions associated with the Subject Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Subject Property's environmental condition.

Stantec did not obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures, are not guaranteed. Before starting site work, the exact location of all such

utilities and structures must be confirmed by the client and the party performing the work, and Stantec assumes no liability resulting from damage to such utilities and structures.

The conclusions are based on the conditions encountered at the Subject Property by Stantec at the time the work was conducted. Accordingly, additional studies and actions may be required.

As the purpose of this report is to identify Subject Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Subject Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Subject Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of Federal, state, provincial or local governmental agencies.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

3.0 USER-PROVIDED INFORMATION

ASTM E1527-21 describe responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Subject Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	The User Questionnaire was completed by Bret Ilich, Project Manager with Warmington Residential, on March 7, 2024. Mr. Ilich was not aware of any environmental concerns associated with the Subject Property.
Environmental Liens or Activity and Use Limitations (AUL)	N/A	No environmental liens and/or activity and use limitations were identified in the Preliminary Title Reports provided by First American Title Company dated January 16, 2024 and January 30, 2024.
Previous Environmental Permits or Reports Provided by User	No	None provided.
Purpose of the Phase I ESA	Yes	The intended use of the Phase I is for redevelopment.

User-provided documents are provided in Appendix C.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Subject Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Subject Property. During the review of historical records, Stantec attempted to identify uses of the Subject Property from the present to the first developed use of the Subject Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Subject Property is provided in the table below with additional details in the following subsections:

Topography:	According to the United States Geologic Survey (USGS) Corona North topographic map provided in the Environmental Data Resources Inc. (EDR) Physical Setting Source Addendum (Appendix D), the topographic gradient in the vicinity of the Subject Property is to the southeast and the Subject Property is located at approximately 590 feet above mean sea level (ft. amsl).
Soil/Bedrock Data:	The United States Department of Agriculture – Natural Resources Conservation Service (USDA-NRCS), Web Soil Survey identifies the soils beneath the Subject Property as: • Ramona very fine sandy loam, with well-drained soil with moderately coarse textures. A typical soil profile is comprised of very fine sandy loam (0-14 inches), fine sandy loam (14-22 inches), sandy clay loam (22-69 inches), and gravelly sandy loam (68-74 inches).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Site specific groundwater investigations were not conducted during this ESA; however, according to a 2012 groundwater monitoring report for a site located approximately two miles southeast of the Subject Property, groundwater in the vicinity is approximately 23-28 feet below ground surface (bgs) with a flow direction to the south southeast.
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Subject Property Topography and Surface Water Flow

The Subject Property is located at an elevation of approximately 590 ft amsl. Based on the topography and existing surface conditions, general surface water flow is to the south-southeast.

4.1.2 Regional and Subject Property Geology

The Subject Property is located with the Upper Santa Ana Valley Groundwater Basin, Chino Subbasin (8-002.01). The Chino Subbasin is bound by the Rialto-Colton Fault to the east; the Jurupa Mountains to the southeast; the Puente Hills and Chino Fault to the south; the San Jose Fault to the northwest; and the San Gabriel Mountains and Cucamonga Fault to the north. Surface water drains south via San Antonio Creek and Cucamonga Creek towards Santa Ana River. Several of the faults create groundwater barriers which in turn generate changes in ground water elevations throughout the subbasin. Water-bearing formations within the subbasin are Holocene and Upper Pleistocene alluvium. The total groundwater storage capacity in the subbasin is approximately 18,300,000 acre-feet (DWR, 2003).

According to California DOC Earthquake Zone Map (Department of Conservation Map Server (ca.gov)), the Subject Property is not located within an Alquist-Priolo (AP) Earthquake Fault Zone boundary. The nearest fault is located approximately five miles to the west of the Subject Property.

4.1.3 Regional and Subject Property Hydrogeology

The Subject Property is located with the Upper Santa Ana Valley Groundwater Basin, Chino Subbasin (8-002.01). Several faults that lie within the subbasin create groundwater barriers which in turn generate changes in ground water elevations throughout the subbasin. Water-bearing formations within the subbasin are Holocene and Upper Pleistocene alluvium. The total groundwater storage capacity in the subbasin is approximately 18,300,000 acre-feet (DWR, 2003).

Site specific groundwater investigations were not conducted during this ESA; however, according to a 2012 groundwater monitoring report for a site located approximately two miles southeast of the Subject Property, groundwater in the vicinity is approximately 23-28 feet below ground surface (bgs) with a flow direction to the south-southeast.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from EDR, a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Subject Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Subject

Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be to the southeast. Observations about the Subject Property and adjoining properties made during the Subject Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Subject Property

The Subject Property is not listed in the EDR databases.

4.2.2 Listings for Adjoining and Nearby Sites with Potential to Impact Subject Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjoining and nearby sites to pose a REC, CREC, or HREC for the Subject Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Subject Property from an adjoining or nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]. ASTM E2600-22 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM, 2022) was used as the basis for a Tier I Vapor Encroachment Screen (VES) for the Subject Property. This included evaluation of release sites within 1/10 mile for Petroleum Hydrocarbon releases, and 1/3 mile for volatile and semi-volatile organic compound (VOC, SVOC), plus other potential vapor phase contaminants (such as mercury).

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Osterkamp Dairy 8301 Archibald Ave. Corona, CA	HIST UST, ENF, CIWQS, CERS, HWTS	0.024 mile/125 feet west southwest at lower elevation	Yes
This historic dairy farm operation is listed as having two historic 1,000-gallon USTs containing diesel and unleaded fuel. The status of the USTs is not reported. The site also is listed as having an animal waste discharge permit from at least 1979 to 2002. Given this site is upgradient and there is no information regarding UST status, this represents a VEC and is considered a REC for the Subject Property.			
True Cast Concrete Fertilizer /Oosten Dairy/Tofco Composting Facility/Corona Composting Plant 8247 Archibald Ave. Corona, CA	SWEEPS UST, HIST UST, CA FID UST, CIWQS, SWF/LF, ENF, HIST CORTESE	0.042 mile/224 feet northwest at lower elevation	Yes
This historic dairy farm/fertilizer operation is listed as having two historic 3,000-gallon USTs containing diesel and unleaded fuel. The status of the USTs is listed as active. The site also is listed as a historical composting facility of agricultural sludge waste. A cleanup/abatement order was issued at the site in 1987; no details are provided regarding the incident. Given this site is upgradient and there is no			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
information regarding UST status, this represents a VEC and is considered a REC for the Subject Property.			
Corona Composting Plant 8186 Archibald Ave. Corona, CA	WMUDS/SWAT	0.152 mile/802 feet north northwest at lower elevation	No
This site is listed as a historic composting plant. No additional details are provided. Given there are no reports of violations or releases, this site is not considered a REC for the Subject Property.			
Proposed Yorba Elementary School NE Corner of Fieldmaster Street and Cherry Creek Circle Eastvale, CA	ENVIROSTOR, SCH	0.225 mile/1,190 feet west northwest at lower elevation	No
This school site is listed in the DTSC's Envirostor database with case closure/no further action received on 6/1/2012. The site was under investigation due to former agricultural/livestock use and a historic LUST onsite. The LUST was removed in 2006, as well as excavation/treatment of contaminated soil, and treatment of groundwater. Additionally, an investigation was conducted to evaluate for residual PAHs, TPH, SVOCs, and OCPs due to former dairy operations and the LUST case. Findings concluded that OCPs, PAHs, VOCs, and SVOCs did not pose a risk to the site; however, a workplan was prepared for remediation of methane contamination. Methane monitoring occurred for nine quarters, and concentrations were shown to be decreasing at the site and stabilizing. Methane exceeding the DTSC action level of 5,000 ppmv were largely confined to a narrow strip in the northeastern and eastern parts of the site and not within proposed building footprint locations. The site received No Further Action status in 2012. Given the status of this site and distance from the Subject Property, this site does not appear to represent a REC.			

The remaining listings in the database search report, including listings of Orphan Sites provided in Appendix D do not constitute a potential REC for the Subject Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Subject Property use and/or indications of RECs in connection with the Subject Property:

4.3.1 Environmental Health Department

Agency Name Contact Information	Finding
Custodian of Records Riverside County Department of Environmental Health Via online: rivcoeh.org Submitted on March 5, 2024	A written request subject to the Freedom of Information Act (FOIA) was submitted to the Riverside County Department of Environmental Health to review their files regarding the Subject Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Subject Property. On March 12, 2024, the agency responded that they have no records for the Subject Property.

4.3.2 Fire Department

Agency Name Contact Information	Findings
Custodian of Records Riverside County Fire Department Via online: rvcfire.org Date Submitted: March 5, 2024	A written request subject to the FOIA was submitted to the County Fire Department to review their files regarding the Subject Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Subject Property. On March 14, 2024, the agency responded that they have no records for the Subject Property .

4.3.3 City and County Department Records

Agency Name Contact Information	Findings
Custodian of Records City of Eastvale Date Submitted: March 5, 2024	A written request subject to the FOIA was submitted to the City to review their files regarding the Subject Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action,

Agency Name Contact Information	Findings
	and case closure documentation, or any records that indicate environmental concern at the Subject Property. As of the writing of this report, a complete response has not been received from the agency.

4.3.4 State Department Records

Agency Name Contact Information	Finding
Custodian of Records Santa Ana Regional Water Quality Control Board (SARWQCB) Via email: filereview8@waterboards.ca.gov Submitted and accessed on March 1, 2024	Stantec researched Geotracker, the California Regional Water Quality Control Board public database, to evaluate if there are any reported releases at the Subject Property or on adjoining properties. There were no release sites listed for the Subject Property or adjoining properties. Additionally, the SARWQCB responded on March 5, 2024, that they do not have current or historical records for the Subject Property.
Department of Toxic Substances Control (DTSC), Envirostor database Cypress Regional Office Online database: https://www.envirostor.dtsc.ca.gov/public/ Via email: cypressfileroom@dtsc.ca.gov Submitted and accessed on March 5, 2024	Stantec researched Envirostor, the DTSC public database, to evaluate if there are any reported releases at the Subject Property or on adjoining properties. There were no release sites listed for the Subject Property. Additionally, the DTSC responded on March 7, 2024, that they have no current or historical records for the Subject Property.
California Geologic Energy Management (CalGEM) Online database: https://maps.conservation.ca.gov/doggr/wellfinder Accessed: March 6, 2024	The California Department of Conservation Geologic Energy Management Division (CalGEM) database was searched to identify the potential existence of oil and gas production wells within the vicinity of the Subject Property. No oil or gas wells were located within the Subject Property boundaries. The closest well is located approximately 1.3 miles to the southwest and is listed as idle (API 0407100105). No releases are reported for this well. This well is not expected to represent an environmental concern for the Subject Property.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Land title records, deeds, environmental liens, and activity and use limitation documentation were not provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. Copies of the historical aerial photographs are provided in Appendix E.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1931	1"=500'	The Subject Property appears undeveloped and partially lying within a river area on the eastern boundary. Adjoining properties appear to be vacant and agriculturally developed.
1938 1948 1953 1959	1"=500'	The Subject Property appears to be agriculturally developed and bound to the east by a river. Adjoining properties appear to be agriculturally developed. Structures are depicted on the Subject Property by 1948 along the east boundary. By 1959, residences are depicted adjoining to the north.
1967	1"=500'	The Subject Property appears vacant in the western half and partially developed with structures in the eastern half, and bound by a river to the east. Adjoining to the west and north appear to be agriculturally developed. Residences are also depicted adjoining north. Adjoining south and east are undeveloped/river.
1985 1989 1994 2002	1"=500'	A structure appears in the southwestern portion of the Subject Property. Adjoining to the west appears to be farmland. Adjoining north, south, and east appear similar to the 1967 photograph. An AST is depicted on the Subject Property by 1989, but is no longer depicted by 1994. An AST/site construction are depicted adjoining south in 1994.
2006 2009 2012 2016 2020	1"=500'	The Subject Property appears developed with additional structures in the northern portion. Adjoining north appears to be under construction/residential. Adjoining west appears to be farmland. Adjoining south appears to be under construction. The Subject Property borders the river adjoining east. By 2009, farmland to the west appears to be residentially developed. Commercial/industrial buildings are depicted adjoining south by 2020.

Aerial photographs source: The EDR Aerial Photo Decade Package

The historical agricultural use of the Subject Property constitutes a REC.

4.4.3 City Directories

Stantec retained a third party to research available city directories for the Subject Property and adjoining and nearby properties, in approximately five-year intervals. Copies of the city directory listings are provided in Appendix E.

Stantec retained a third party to research available city directories for the Subject Property and adjoining and nearby properties, in approximately five-year intervals. The Subject Property is listed in the city directory between 2020 and 1970 under various residential listings. Adjoining properties and properties within the vicinity include residential and farm/agricultural business listings.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Subject Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Subject Property and adjoining and nearby property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Subject Property. The Sanborn® Map Search Report indicating “No Coverage” is presented in Appendix E.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute Topographic Maps of the Corona North and Corona and Vicinity, California Quadrangles (scales 1:24,000 and 1:31,680), the historical USGS 15-minute Topographic Maps of the Corona, California Quadrangles (scale 1:50,000), and the historical USGS 30-minute Topographic Maps of the Corona, California (scale 1:125,000) to help identify past Subject Property and adjoining and nearby property usage and areas of potential environmental concern. Copies of the historical maps are provided in Appendix E.

The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1902	1:125,000	The Subject Property and adjoining properties appear undeveloped. A river is depicted adjoining to the east. Several roads are shown adjoining west.
1942	1:31,680	The Subject Property and adjoining properties are undeveloped.
1947 1954 1967	1:50,000 1:24,000 1:24,000	The Subject Property appears developed with a structure in the east portion. Adjoining properties appear undeveloped to the west and south, with several structures observed adjoining to the north, and a

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
		river adjoining to the east. By 1967, two structures are present on the Subject Property.
1973 1975 1981	1:24,000 1:24,000 1:24,000	The Subject Property is depicted with two structures. Multiple structures are depicted adjoining west and north. Adjoining south appears to be undeveloped. A river is depicted adjoining east.
2012 2015 2018 2022	1:24,000 1:24,000 1:24,000 1:24,000	The Subject Property and adjoining properties are depicted as vacant.

Historical topographic maps source: The EDR Historical Topographic Map Report

No RECs were identified in the EDR Historical Topographic Map Report.

4.4.6 Other Historical Sources

No other historical sources were searched as a part of this assessment.

5.0 SITE RECONNAISSANCE

A visit to the Subject Property and its vicinity was conducted by Alex Sobolew, Geologic Staff with Stantec, on March 27, 2024. Stantec was unaccompanied during the Subject Property visit. Figure 2 provides information about the Subject Property and adjoining sites and the location of potential areas of environmental concern. Detailed Subject Property features are shown on Figure 2. Photographs collected during the site reconnaissance are included in Appendix A.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Subject Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Subject Property boundary
- Traverse transects across the Subject Property
- Traverse the periphery of all structures on the Subject Property
- Visually observe accessible interior areas expected to be used by occupants or the public maintenance and repair areas, utility areas, and a representative sample of occupied spaces

Weather conditions during the visit to the Subject Property were clear and sunny. There were no weather-related Subject Property access restrictions encountered during the reconnaissance visit. The interior of the residential structure was not accessible during the site reconnaissance.

5.2 GENERAL DESCRIPTION

Subject Property and Area Description:	The Subject Property is located south of Grapewin Road and east of Archibald Avenue, in the City of Eastvale, in the County of Riverside, California. The surrounding area is a mix of residential properties and vacant land.
Subject Property Operations:	Subject Property is residential housing, and a livestock farm.
Structures, Roads, Other Improvements:	An asphalt driveway, residential housing, a barn, storage shed and stalls for livestock.
Subject Property Size (acres):	8.3 acres

Estimated % of Subject Property Covered by Buildings and/or Pavement:	20%
Observed Current Subject Property Use/Operations:	Subject Property is currently used as a livestock farm and residential housing
Observed Evidence of Past Subject Property Use(s):	None observed.
Sewage Disposal Method (and age):	Jurupa Community Services District
Potable Water Source:	Jurupa Community Services District
Electric and Natural Gas Utilities:	Southern California Edison and SoCal Gas.

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Subject Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14) with identified uses:	None observed.
Drums/Totes/Intermediate Bulk Containers (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
Polychlorinated biphenyl (PCB)-Containing Equipment:	None observed
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

Stantec was unable to access the interior of structures during the site reconnaissance.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Subject Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	A pool was observed in the southeastern portion of the Subject Property.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	None observed.
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed on the Subject Property.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	Stormwater is expected to infiltrate the soil, or flow westward into the Archibald Avenue drainage system or eastward into the Santa Ana River.
Wells:	No wells were observed.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None observed.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	Two empty unlabeled storage tanks were observed in the southwestern portion of the Subject Property. The storage tanks appear to be associated with livestock operations.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining sites:

NORTH	Grapewin Avenue, Eastvale Trail, and residential housing.
EAST	Santa Ana River.
SOUTH	Church under construction.
WEST	Residential development and Archibald Avenue.

Refer to Figure 2.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining sites providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds, or Lagoons on Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on adjoining sites:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.

WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Subject Property and Surrounding Area:	The Subject Property and surrounding area are relatively flat with a gentle slope to the northwest.

6.0 PHASE II ENVIRONMENTAL ASSESSMENT

During the early stages of the Phase I ESA, Stantec identified the following RECs:

- Historical records indicate that the Subject Property and vicinity were historically utilized for agricultural purposes. Based on the historical agricultural use, organochlorine pesticides (OCPs) and or herbicides (that could contain lead and arsenic) may have been utilized on the Subject Property and near-surface soils may have potentially contained these compounds.
- Two nearby former dairy farm operations are located upgradient from the Subject Property. These sites reportedly had multiple underground storage tanks (USTs); the status of the USTs was not reported. Additionally, no records of methane surveys were reported for the historical dairy farm operations at the sites.

The following scope of work was completed to address the identified RECs.

6.1 PRE-DRILLING ACTIVITIES

Prior to the commencement of fieldwork activities Stantec made the following preparations:

- Stantec obtained an Underground Service Alert (USA) ticket number prior to commencement of drilling activities.
- In accordance with federal OSHA regulations (29 CFR, Section 1910.120), Stantec developed a site-specific Health and Safety Plan (HASP) for the Property. All Stantec personnel and subcontractors associated with the project were required to be familiar with, and comply with, all provisions of the HASP.

6.2 INVESTIGATION

To evaluate the aforementioned RECs and data gap above, Stantec performed a Phase II ESA, between March 25 and 27, 2024, that consisted of a soil and soil vapor assessment on the Subject Property. The scope of work performed included the advancement of 12 soil borings (HA-1 through HA-12) to a maximum depth of approximately 3 feet below ground surface (bgs) to assess the Property for OCPs and lead and arsenic. In addition, three soil borings (SVB-1 through SVB-3) were drilled to a maximum depth of approximately 5.5 feet bgs. Soil vapor probes were set in three soil borings (SVB-1 through SVB-3) at 5-feet bgs. The locations of the soil vapor borings were along the western perimeter to evaluate the potential off-site release from the upgradient former dairy farms with former USTs.

The soil vapor samples were collected on March 27th, 2024 and were submitted for analysis for Methane and Fixed Gases by ASTM D1946 and VOCs by EPA Test Method 8260B.

6.3 SOIL VAPOR SAMPLING

Subsurface soil vapor sampling was performed in accordance with the July 2015 Department of Toxic Substances Control (DTSC) “Advisory - Active Soil Gas Investigations” (DTSC Advisory).

All of the soil vapor borings were advanced using a hand auger to 5.5-ft bgs. Following the advancement of each boring, the sample probes were constructed with a 10-inch sampling screen set across the sampling interval. Each of the sampling screens were connected to the ground surface via dedicated Nylaflow ® nylon tubing. The annulus around the exposed probe tip was backfilled with a silica sand filter pack to an elevation of about six inches above the sampling screen. Above the filter pack, a 6 to 12-inch transition zone was constructed using dry bentonite granules. From that point to ground surface, hydrated bentonite granules were utilized to seal the annular space. At the surface, the exposed nylon tubing was capped with tight fitting plastic endcaps and labeled to indicate sampling depth. The soil vapor sample probes were allowed to equilibrate for a minimum of 48 hours prior to leak testing and sample collection.

Prior to vapor sample collection from each probe, a shut-in test was performed that consisted of an above-ground apparatus of valves, line, and fitting located downstream from the top of the probe. The line was evacuated to a measured vacuum and the vacuum was shut in with closed valves on opposite ends of the sampling train. A vacuum gauge connected to the line was observed for any signs of a loss in vacuum.

As specified in the DTSC Advisory a default purge of 3 volumes of the sampling system was performed prior to sample collection. This process included purging the sampling system (tubing, sample screen, and void space of sand pack and dry bentonite) using a flow rate between 100 and 200 milliliters per minute (ml/min) while maintaining a low vacuum of 100 inches of water or less. The soil vapor samples were collected by a laboratory chemist and analyzed by an off-site laboratory for chemical analysis. All vapor samples collected were analyzed for Methane and Fixed Gases by ASTM D1946 and VOCs by EPA Method 8260B.

During soil vapor sampling a leak check was performed using isopropanol (IPA) as the tracer compound. The tracer compound was applied to a clean rag and situated around the sampling point and fittings to evaluate seal integrity. Seal integrity was confirmed by the absence of the tracer compound in the collected samples.

6.4 LABORATORY TESTING PROGRAM

Soil samples collected from the 1-ft interval during this investigation were analyzed for OCPs by EPA Method 8081A; and the metals lead and arsenic by EPA Method 6010B by Jones Environmental Inc. (JEI), located in Santa Fe Springs, California.

Soil vapor samples collected during this investigation were analyzed for Methane and Fixed Gases by ASTM D1946 and VOCs by USEPA Test Method 8260B by an off-site laboratory operated by ones Environmental Inc. (JEI), located in Santa Fe Springs, California.

All samples collected during this investigation were transported under chain-of-custody protocols and analyzed by certified for hazardous waste testing by the California State Water Resources Control Board

Environmental Laboratory Accreditation Program (ELAP). Complete laboratory reports, including QA/QC documentation is included in Appendix G.

6.5 INVESTIGATION RESULTS

6.5.1 FIELD OBSERVATIONS

Soils encountered during the investigation consisted largely of silt and clay with large cobbles. Groundwater was not encountered in any of the boreholes. No staining or odors were observed in any of the boreholes.

6.5.2 Soil Analytical Results

The results of the completed assessment reported one minor detections of the OCP 4,4'-DDE at 0.0173 milligrams per kilogram (mg/kg). This detection of 4,4'-DDE is below the United States Environmental Protection Agency (USEPA) Regional Screening Level (RSL) of 2.0 mg/kg and below the hazardous waste level of 1.0 mg/kg used for waste disposal. There were no other detections of OCPs above their corresponding laboratory reporting limits.

There were two detections of arsenic reported at concentrations of 5.5 and 5.0 mg/kg which exceeded regulatory thresholds for residential soil set at 0.11 mg/kg. However, arsenic occurs naturally in California at levels up to 12 mg/kg, therefore exceeding the regulatory threshold. The State of California uses the background level of 12 mg/kg as the cleanup standard for arsenic. Therefore, the arsenic concentrations were detected below the regulatory cleanup levels. Lead was detected in all 15 soil samples at concentrations ranging from 2.0 to 8.6 mg/kg and concentrations were below regulatory thresholds for residential soil set at 80 mg/kg. Therefore, the historical agricultural use of the Subject Property is not considered a REC and no further assessment is recommended concerning is issue.

6.5.3 Soil Vapor Analytical Results

Laboratory analytical test results from this assessment are attached as Appendix G. The laboratory test results from this phase of investigation are discussed below and soil vapor results were compared to the more conservative value between the Department of Toxic Substance Control (DTSC) HERO Note 3 screening level for residential sites (DTSC, 2022), and the United States Environmental Protection Agency (USEPA) Regional Screening Levels (RSLs) for commercial sites (USEPA, 2021), using both the official attenuation factor (AF) of 0.001 used for risk evaluations and the screening-level/guidance AF of 0.03. All soil vapor probe locations from this assessment are presented on Figure 2.

Soil vapor results showed minor detections of volatile organic compounds below their respective residential screening levels when applying the most conservative attenuation factor (AF) of 0.03 with the exception of benzene and chloroform. Benzene was reported at 5.0 ug/m3 and chloroform was reported at 9 ug/m3 in soil vapor sample SVB-1 which is above their respective residential screening levels of 3.23 and 4.0 ug/m3 when applying the most conservation attenuation factor of 0.03. However, the concentrations are below

their respective residential screening levels of 97 and 120 ug/m3 when applying the attenuation factor of 0.001 which is used to evaluate risk. There were no other detections above the laboratory reporting limits (*i.e.*, the results were "non-detect") for any other VOCs in any of the soil vapor samples. Additionally, no methane was detected in any of the soil vapor samples collected.

6.1 PHASE II ESA CONCLUSIONS AND RECOMMENDTAIONS

Based on the results of Stantec subsurface assessment, historical agricultural use of the Subject Property and the upgradient dairy farms with the former USTs are no longer considered a REC and no further assessment or remedial action is warranted.

Based on the results of Stantec subsurface assessment, historical agricultural use of the Subject Property is not considered a REC. Additionally, the minor impacts to the subsurface of the Subject Property from the former auto service operations and off-site dry-cleaning/fuel stations appear to be *de minimis* and no further assessment or remedial action appears to be warranted at this time.

7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and an inspection was evaluated to determine if RECs are present in connection with the Subject Property. Based on this information, Stantec made the following findings and developed the following opinions.

- Historical records indicate that the Subject Property and vicinity were historically utilized for agricultural purposes between the 1930s and 1960s. Based on the historical agricultural use, pesticides and or herbicides may have been utilized on the Subject Property and near-surface soils may have potentially contained these compounds. The Subject Property has not been fully redeveloped subsequent to agricultural use, and all surface soils have likely not been reworked. Therefore, the historical agricultural use of the Subject Property is considered to represent a REC for the Subject Property.

  To evaluate the aforementioned REC, Stantec performed a Phase II ESA, between March 25 and 27, 2024, that consisted of a soil and soil vapor assessment on the Subject Property. The results of that assessment are discussed above in Section 6.0.

  Based on the results of the soil sampling, Stantec concludes that the historical agricultural use does not represent a REC or a human health risk in light of the contemplated residential redevelopment of the Subject Property. No further investigation appears to be warranted.

- A historical dairy farm operation, located at 8301 Archibald Avenue approximately 125 west southwest upgradient to the Subject Property, is listed as having two historic 1,000-gallon USTs containing diesel and unleaded fuel. The status of the USTs is not reported. The site also is listed as having an animal waste discharge permit from at least 1979 to 2002. Given this site is upgradient and there is no information regarding UST status, this represents a potential vapor encroachment condition (VEC) and is considered a REC for the Subject Property.

  To evaluate the aforementioned REC, Stantec performed a Phase II ESA, between March 25 and 27, 2024, that consisted of a soil and soil vapor assessment on the Subject Property. The results of that assessment are discussed above in Section 6.0.

  Based on the results of the soil vapor sampling, Stantec concludes that the historical dairy farm operations and USTs do not represent a VEC/REC or a human health risk in light of the contemplated residential redevelopment of the Subject Property. No further investigation appears to be warranted.

- A historic dairy farm/fertilizer operation, located at 8247 Archibald Avenue approximately 224 feet northwest upgradient to the Subject Property, is listed as having two historic 3,000-gallon USTs containing diesel and unleaded fuel. The status of the USTs is listed as active. The site also is listed as a historical composting facility of agricultural sludge waste. A cleanup/abatement order was issued at the site in 1987; no details are provided regarding the incident. Given this site is upgradient and there is no information regarding UST status, this represents a VEC and is considered a REC for the Subject Property.

  To evaluate the aforementioned REC, Stantec performed a Phase II ESA, between March 25 and 27, 2024, that consisted of a soil and soil vapor assessment on the Subject Property. The results of that assessment are discussed above in Section 6.0.

  Based on the results of the soil vapor sampling, Stantec concludes that the historical dairy farm operations and USTs do not represent a VEC/REC or a human health risk in light of the contemplated residential redevelopment of the Subject Property. No further investigation appears to be warranted.

- Subject Property structures were constructed circa at least 1970s, and the presence of asbestos-containing materials (ACMs) and lead-based paint (LBP) is possible. It is recommended that an ACM and LBP survey be conducted prior to redevelopment in accordance with applicable federal and local regulations.

7.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-21 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None.
Weather-Related Restrictions to Site Reconnaissance:	None.
Facility Access Restrictions to Site Reconnaissance:	None.
Other Site Reconnaissance Restrictions:	None.
Data Gaps from Environmental Records Review:	None.

Gap	Discussion
Data Gaps from Historical Records Review:	None.
Data Gaps from Interviews:	Due to the sensitive nature of the transaction no on-site interview was conducted. Given the historical documents, the lack of an on-site interview is not considered to impact the findings of this report.
Other Data Gaps:	None.

7.3 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property. Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed no recognized environmental conditions (RECs), Controlled RECs (CRECs), or significant data gaps in connection with the Subject Property. No further investigation appears to be warranted at this time.

This assessment has revealed the following items of note in connection with the Subject Property:

- Subject Property structures were constructed circa at least 1970s, and the presence of asbestos-containing materials (ACMs) and lead-based paint (LBP) is possible. It is recommended that an ACM and LBP survey be conducted prior to redevelopment in accordance with applicable federal and local regulations.

8.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-13 non-scope services were performed as part of this Phase I ESA:

8.1 LEAD-BASED PAINT

Concern for LBP is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows:
  - Maximum risk is from paint applied before 1950.
  - There is severe risk from paint applied before 1960.
  - There is moderate risk from deteriorated paint applied before 1970.
  - There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

Construction Date	Residential (Yes/No)	Observed Condition of Painted Surfaces
1970s	Yes	No structures are present on the Subject Property. An LBP survey is recommended prior to redevelopment.

8.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

The Subject Property was developed circa 1970s; an ACM survey is recommended prior to redevelopment.

8.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Property (http://www.epa.gov/radon/zonemap.html).

EPA Radon Zones (w/Average Measured Indoor Radon concentrations)		
Zone 1 – High (>4.0 pCi/L)	Zone 2 – Moderate (2 to 4 pCi/L)	Zone 3 – Low (<2 pCi/L)
	X	
Normally occupied sub grade areas present? (i.e., basement apartments, offices, stores, etc.)		
No subgrade areas currently present at the Property.		

The Subject Property is located in Zone 2 and is considered to have a moderate potential for radon. To determine Subject Property-specific radon levels, a radon survey would have to be conducted. However, because the Subject Property does not have any occupied subgrade areas and is planned for redevelopment, further investigation of indoor radon issues does not appear to be warranted.

8.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the eastern border (adjoining the Santa Ana River) of the Subject Property is located within a 0.2% Annual Chance Flood Hazard Zone.

APPENDIX B
STANTEC RESUMES

Alicia Jansen CAC, LRCIA

Senior Scientist
21 years of experience

Alicia is a Senior Scientist with over twenty years of experience in Phase I and II Environmental Assessments, with strong emphasis in water quality and environmental research. Alicia has managed the preparation of environmental documents, training programs, and environmental compliance during large scale environmental monitoring projects. Alicia's environmental consulting experience includes performing asbestos and lead-based paint surveys, oversight of contractors during asbestos abatement, hazardous materials surveys, and Phase I Environmental Site Assessments (ESAs) in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-21 and the Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16.

PROJECT EXPERIENCE

HEALTH, SAFETY & INDUSTRIAL HYGIENE

Cochise County, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Arizona | Field Lead and Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple vacant structures including schools, multi-tenant apartment buildings, and commercial structures. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Field Lead | Dates involved: 2020-2022

Confidential Health Care Company, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | Staff

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple occupied hospitals and office spaces. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Field Lead | Dates involved: 2013-2020

State of California General Services, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | 2009 | Technical Support

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple communication towers in remote areas. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Technical Support | Cost: Unknown | Dates involved: 10/2009-10/2009

Indoor Air Quality Assessments* | San Jose, California | 2002-2005 | Staff

Alicia performed site inspections, interviews, and collected air samples to be analyzed for various air pollutants and molds including formaldehyde, penicillium, aspergillus, cladosporium, and stachybotry. She prepared reports summarizing findings and made recommendations.

Veteran's Administration of Puget Sound, Asbestos and Lead-Based Paint Survey | Seattle, Washington | 2009 | Project Scientist

Alicia served as the Project Scientist responsible for hazardous building material assessments, specifically asbestos and lead-based paint. These services were required as part of the pre-design tasks for this project. Over 300 samples were collected over the span of four days culminating in a final hazardous building materials report to be incorporated into the facility design as well as demolition activities once the construction phase of the

** denotes projects completed with other firms*

project commences.

Interim Remedial Action, Indoor Air Sampling, and Sub-Slab Soil Gas Sampling | Sunnyvale, California | 2004–2014 | Task Manager and Field Support

Alicia conducted an indoor air sampling survey using air sampling pumps, dosimeter badges, and flame ionization detector (FID) during a sump excavation. She performs semi-annual sub-slab soil vapor sampling and indoor air quality surveys using summa canisters. She assists with the preparation and submittal of reports summarizing the findings and provides recommendations to the local regulatory agency. Role: Indoor Air Sampling Survey | Cost: Unknown | Dates involved: 09/2004-09/2014

Lead Dust Assessment and Abatement Oversight | Fremont, California | 2009 | Technical Support

Alicia assisted with the evaluation of lead dust in an industrial facility. A total of 307 dust wipe samples were collected in order to evaluate the potential presence of lead dust throughout the two-story, 500,000 square foot manufacturing building. Role: Technical Support | Cost: Unknown | Dates involved: 01/2009-03/2009

Former Tesoro Coke Facility, Asbestos, Lead-Based Paint Survey | Pittsburg, California | Technical Support

Alicia assisted with an asbestos and lead paint survey of 20 structures at the facility ultimately scheduled for demolition. More than 200 samples were collected over the span of two days. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Technical Support | Cost: Unknown | Dates involved: 04/2009-04/2009

State of California General Services, Asbestos and Lead-Based Paint Survey | Southern California | 2014-2019 | Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos and lead-based paint at multiple bridges, maintenance stations, and roadways throughout Southern California. The scope of work involved sample collection for asbestos and lead-based paint that would require special handling and disposal. She assisted with the review and approval of reports summarizing findings. Role: Certified Asbestos Consultant | Cost: Unknown | Dates involved: 9/2014-10/2019

Confidential Client, Asbestos and Lead-Based Paint Survey | Multiple Sites, California | Task Manager and Certified Asbestos Consultant

Alicia conducts pre-demolition asbestos and lead paint surveys of structures ultimately scheduled for demolition. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Task Manager and Certified Asbestos Consultant| Dates involved: 2006 - present

PERMITTING, COMPLIANCE, AUDITING

Tesoro Refinery, Initial Study* | Benicia, California | 2005 | Staff

Alicia assisted with the background research and preparation of applicant-prepared initial study for the upgrade of a refinery.

Transmission Line Upgrade* | San Mateo to San Francisco, California | 2005 | Environmental Research and Compliance Staff

Alicia supported the environmental compliance program for the construction of a 27-mile 230 kV underground and overhead transmission line. She assisted with the preparation and submittal of variance requests, extra work space requests, and daily and weekly reports for submittal to the California Public Utilities Commission. She also conducted research and assisted with training and report preparation.

REMEDIAL INVESTIGATIONS & ASSESSMENTS

California Department of Transportation Portfolio | Multiple Sites, Northern California and Southern California, California | 2008-2019 | Task Lead Manager

Alicia prepared quarterly groundwater monitoring reports, subsurface investigation reports, sensitive receptor surveys, and preferential pathway studies for various California Department of Transportation locations throughout Northern California. She assisted with the utility locating, work plan preparation, field coordination, archived data onto the State Water Resource Control Board's (RWQCB) Geotracker electronic filing system. Alicia currently conducts site inspections for asbestos, lead-based paint, and hazardous materials for bridges, salt barns, and maintenance buildings associated with California Department of Transportation locations throughout Southern California. The scope of work involves sample collection for asbestos and lead-based paint that would require special handling and disposal. She assists with the preparation of reports summarizing findings. Role: Task Lead Manager | Cost: Unknown | Dates involved: 06/2008-02/2019

Soil Gas Sampling and Human Health Risk Assessment | San Jose, California | 2014 | Project Lead

Alicia performed a soil vapor survey in conformance with the DTSC Advisory Active Soil Gas Investigations, using soil vapor sampling devices and a mobile laboratory for onsite chemical analysis. She also assisted with the report preparation summarizing the findings and providing recommendations for further assessment. Role: Task Lead Manager | Cost: Unknown | Dates involved: 2014

Confidential Clients, Phase I Environmental Site Assessments | Multiple Sites, California, Arizona, New Mexico, Texas, Virginia | Task Manager

Alicia performs Phase I Environmental Site Assessments for multiple confidential clients in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13; ASTM E 1527-21; and Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16 to achieve compliance with requirements of the "All Appropriate Inquiries" rule required to obtain protection from liability under the federal Comprehensive Environmental Response, Cleanup and Liability Act (CERCLA). Previous sites include large industrial warehouses, multi-tenant

** denotes projects completed with other firms*

commercial buildings, large lots of vacant land, and residential properties. She reviews topographic maps, Sanborn Fire Insurance Maps, and files at local regulatory agencies. She interviews present and former property owners and performed site and adjacent property reconnaissance. She prepares reports summarizing the findings and provides recommendations for further assessment if applicable. Role: Task Lead Manager | Cost: $3,000-8,000 per report. | Dates involved: 2006-present

Goodyear Portfolio | California and Hawaii | 2005–2020 | Project Lead

Alicia performed Phase I Environmental Site Assessments (ESA) and Phase II Site Assessments for various Goodyear Tire & Rubber Company locations throughout California and Hawaii. She assisted with the installation of monitoring wells and exploratory borings; underground storage tank removals; site restoration; product removal with passive recovery system; archived data onto the State Water Resource Control Board's Geotracker electronic filing system; and assisted with the preparation of quarterly groundwater monitoring reports, sensitive receptor surveys, site conceptual models, and subsurface investigation reports. Approximately 250 Sites • Cost: $8,000 per site.

Jenny Alvarado

Project Biologist
9 years of experience

A wildlife biologist who specializes in the avian and botanical fields, Jenny performs threatened and endangered species surveys, protocol nesting bird surveys, biological resource assessments, habitat characterization surveys, and restoration monitoring across Southern California. Jenny has prepared permit applications for CDFG Streambed Alteration Agreements (CDFG Section 1600), Regional Water Quality Control Board Water Quality Certifications (Clean Water Act Section 401), and U.S. Army Corps of Engineers Permits (Clean Water Act Section 404). Jenny is also experienced with California Environmental Quality Act and National Environmental Policy Act compliance. Although her background is mainly avian biology, she has experience identifying mammals, reptiles, and aquatic species. She performs compliance monitoring for a wide array of clients, including Southern California Gas Company, Plains All American Pipeline, and Caltrans. She assists in preparing Initial Studies, Mitigated Negative Declarations, Environmental Assessments, and Environmental Impact Reports for a variety of land uses. Additionally, she has experience assisting with asbestos and lead building surveys in California and Hawaii.

PROJECT EXPERIENCE

WILDLIFE BIOLOGY

Los Angeles County Beaches and Harbors Beach Berm Construction* | Los Angeles County, California | Snowy Plover Monitor

Jenny conducted snowy plover monitoring on five Los Angeles County beaches during berm construction and deconstruction. Daily monitoring reports were submitted to the County.

United Water District, Least Tern Surveys* | United Water Conservation District | Saticoy, California | Biologist

Jenny conducted weekly least tern surveys over two nesting seasons at the United Water facility. She drafted the final results report for the District.

McGrath State Beach Tidewater Goby and Water Quality Monitoring* | California Department of Fish and Wildlife | Ventura, California | Biologist

Jenny conducted daily tidewater goby sein netting surveys and relocation for an emergency construction project in the Santa Clara River estuary. She also performed daily water quality sampling and invasive species removal.

Ormond Beach Snowy Plover and Least Tern Surveys* | California Department of Fish and Wildlife | Ventura, California | Biologist

Jenny conducted protocol nesting bird surveys for the snowy plover and least tern within protected enclosures. Nesting behaviors, nest location, and young were tracked, documented and monitored throughout the nesting season.

California State University Channel Islands, Least Bell's Vireo Surveys* | California State University Channel Islands | Camarillo, California | Biologist

Jenny conducted least Bell's vireo surveys on the CSUCI campus for one nesting season, and assisted in preparation of final reporting.

** denotes projects completed with other firms*

Special-Status Species Surveys* | Recurrent Energy | Kern County, California | Biologist

Jenny conducted desert tortoise, burrowing owl and kit fox surveys for several solar projects across Kern County.

Stantec Architecture, FedEx Construction Site Burrowing Owl Survey | Bloomington, California | Biologist

Jenny performed a pre-construction special status species survey as well as burrowing owl presence/absence surveys in support of a proposed expansion project at a FedEx Ground facility. While conducting the survey, Jenny observed one burrowing owl within the proposed project area and helped coordinate additional protocol surveys in accordance with the project's mitigation requirements.

Luis Oasis Senior Center, Biological Constraints Analysis | Orcutt, California | Biologist

Jenny performed a field reconnaissance survey to document existing site conditions, the potential for sensitive biological resources, and took an inventory of protected native trees. Jenny also drafted the Biological Constraints Analysis Report for the project.

Town Building and Development, ISBA | Ventura County, California | Biologist

Jenny performed a field reconnaissance survey and prepared an ISBA to document existing habitat conditions and the potential for sensitive biological resources in accordance with County of Ventura ISBA requirements.

Algonquin Power, SKIC 10 Solar Project San Joaquin Kit Fox, Burrowing Owl, Nesting Bird and Wildlife Clearance Surveys | Bakersfield, California | Biologist

Jenny performed San Joaquin kit fox, burrowing owl, nesting bird, and wildlife clearance surveys prior to project construction.

Comstock Homes, Burrowing Owl Surveys | Camarillo, California | Biologist

Jenny prepared a proposal and conducted burrowing owl presence/absence surveys for a residential development project in Camarillo. She also concurrently performed a nesting bird survey of the project area and prepared a report of the results.

ENVIRONMENTAL MONITORING

Pipeline Safety Enhancement Plan* | Southern California Gas Company | Ventura and Los Angeles Counties, California | Lead Environmental Monitor

Jenny conducted environmental monitoring for several gas pipeline replacement projects. She monitored biological resources, storm water and air quality, hazardous waste control, and cultural and archaeological resources, as well as performing water and polychlorinated biphenyl sampling. She also conducted pre-construction surveys, prepared project reports, and compliance monitoring documents.

Caltrans Bridge Replacement Project* | Santa Barbara, California | Biologist

Jenny conducted the biological monitoring for two bridge replacements that required monitoring stream diversion installation and removal. She performed aquatic species surveys, nesting bird surveys, and water diversion as well as general construction compliance monitoring.

Biological Monitoring, Line 63 Pipeline Replacement Project | Plains All American Pipeline Company | Castaic, California | Biologist

Jenny conducted biological and restoration monitoring of a petroleum pipeline replacement within the Angeles National Forest. She conducted sensitive species clearance surveys prior to daily construction activities and monitored habitat restoration and Best Management Practices (BMP) installation.

Plains All American Pipeline Drilling Project | Posey Canyon, Angeles National Forest, California | Biologist

Jenny provided biological resource monitoring, and nesting bird and wildlife surveys for a drilling project in the Angeles National Forest.

Riparian Habitat Assessment, Line 63 Replacement Project | Plains All American Pipeline Company (PAALP) | Santa Clara River, Los Angeles County, California | Biologist

Jenny was approved by CDFW as a qualified biological monitor and conducted environmental compliance monitoring for installation of a pipeline through the Santa Clara River via Horizontal Directional Drilling (HDD). During monitoring of construction activities Jenny also surveyed for potential frac- out during HDD operations.

Carpinteria Sanitary District, Carpinteria Creek Aquatic Species Surveys and Horizontal Direction Drilling (HDD) Monitoring | Carpinteria, California | Biologist

Jenny conducted pre-construction aquatic surveys within Carpinteria Creek for red-legged frog, southwestern pond turtle, tidewater goby, and two-striped garter snake. She also provided biological construction monitoring during HDD construction activities within the creek. Jenny detected a frac-out and was able to prevent any frac-out material from entering Carpinteria Creek by promptly alerting project personnel.

Phillips 66 Pipeline Biological Monitoring Project | Phillip 66 Pipeline LLC | Arroyo Grande, California | Biologist

Jenny conducted environmental compliance monitoring for a 5.6 mile pipeline project that crossed the Arroyo Grande Creek and an additional tributary. The project entailed dewatering a 70- foot section of creek and replacing a portion of pipeline underneath. Jenny also conducted SWPPP inspections for the entire project.

** denotes projects completed with other firms*

STREAM/RIVER RESTORATION

California State University Channel Islands, Restoration Monitoring* | Camarillo, California | Biologist

Jenny conducted quarterly and annual qualitative and quantitative monitoring for a creek restoration site on CSUCI campus. She also prepared quarterly status memos and annual restoration monitoring reports in accordance with agency requirements.

Restoration Monitoring* | City of Santa Barbara | Santa Barbara, California | Biologist

Jenny performed quarterly and annual qualitative and quantitative monitoring for two bridge projects over Mission Creek. She prepared annual restoration monitoring reports in accordance with agency requirements.

BOTANICAL SURVEYS

California State University Channel Islands, Vegetation Mapping* | California State University Channel Islands | Camarillo, California | Biologist

Jenny conducted vegetation habitat mapping on CSUCI campus and prepared survey results reports.

Oak Tree Inventory and Vegetation Mapping* | Confidential | Castaic, California | Biologist

Jenny conducted oak tree inventories for several hundred trees and prepared vegetation habitat maps for three adjacent parcels.

High Speed Rail Special-Status Floral Surveys* | Tehachapi, California | Biologist

Jenny conducted focused, rare plant surveys for a portion of a high-speed rail project through Tehachapi.

NATURAL RESOURCE DAMAGE ASSESSMENT AND OIL SPILL RESPONSE

Habitat Restoration Monitoring, Refugio Oil Spill | Plains All American Pipeline Company | Goleta, California | Biologist

Jenny conducted restoration monitoring and assisted with habitat assessments at multiple sites along the California coast following spill cleanup response efforts.

ASBESTOS, LEAD BASED PAINT, AND HAZARDOUS MATERIAL (MERCURY, PCB) ASSESSMENTS

Asbestos and Lead Surveys | Hawaii | Environmental Scientist

Jenny assisted with asbestos and lead surveys for several multi-story buildings for a confidential client. The surveys included exterior and interior sampling, mapping, and reporting. Additionally, inventories of hazardous materials were taken, including potential mercury and PCB-containing materials.

Asbestos and Lead Surveys | Westlake and Thousand Oaks, California | Environmental Scientist

Jenny assisted with asbestos and lead surveys for several shopping centers for a confidential client. The surveys included exterior and interior sampling, mapping, and reporting. Additionally, inventories of hazardous materials were taken, including potential mercury and PCB-containing materials.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California Issued 1985, Expires 2011

Professional Geologist #4066, State of California Issued 1985, Expires 2011

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminates involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Litigation Support and Expert Testimony
Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office
Commercial Developer - Environmental Remediation of Former Dry Cleaners, El Centro, California
Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments
Siting Studies
Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation
Assessment and Remedial Design, California (Project Supervisor)
Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*
Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*
Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

Domestic Landfill Development*
Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Clay Borrow Site Studies
Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)
Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California
Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California
Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)
Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately $2 million.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The over all cost savings for the client was more than $1 million. Total cost was less than $250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was $22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manager)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of and industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was $450,000.00.

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been $2.8 million to date.

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-21 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

1. Property Information

Property Name: Eastvale - Grapewin_____

Property Address(es): 8312 Grapewin Street and 8330 Archibald Ave_____

City: Eastvale_____State CA__Zip 92880_____

Property Owner Name: _____

Property Owner Phone #: _____

2. Contact For Site Access

Name: _____

Company/Organization/Title: _____

Phone # _____ E-Mail Address: _____

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

_____ Yes X_____ No

If yes, describe or attach details of the lien _____

_____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

_____ Yes X_____ No

If yes, describe or attach details of the limitations _____

_____

Zoho Sign Document ID: 2CB37C38-Y8DCIDCLGTUJIKA38P7HZBZ_GBRYNF_TUB29RAQDXBS

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

_____ Yes X_____ No

If yes, describe or attach details of your specialized knowledge or experience _____

_____

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

X_____Yes _____No

_____Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

_____No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?
_____Yes (describe) _____
_____
_____
X_____No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?
_____Yes (describe) _____
_____
_____
X_____No

Zoho Sign Document ID: 2CB37C38-Y8DCIDCLGTUJIKA38P7HZBZ_GBRYNF_TUB29RAQDXBS

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

_____Yes (describe) _____

_____

_____

X_____No

Do you know of any environmental cleanups that have taken place at the property?

_____Yes (describe) _____

_____

_____

X_____No

8. The Degree of Obviousness of Contamination. E1527-21 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?

_____Yes (describe) _____

_____

_____

X_____No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

_____Yes (describe) _____

_____

_____

X_____No

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based

upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of January 16, 2024 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

ABG GROUP, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

The estate or interest in the land hereinafter described or referred to covered by this Report is:

Fee

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2024-2025, a lien not yet due or payable.

2. General and special taxes and assessments for the fiscal year 2023-2024.

First Installment:	$21,083.19, PAID
Penalty:	$0.00
Second Installment:	$21,083.19, OPEN
Penalty:	$0.00
Tax Rate Area:	027-002
A. P. No.:	130-070-021

The County Tax Collector could not verify the amounts shown above at this time. Please verify the amounts with the County Tax Collector prior to the close of the contemplated transaction.

3. Supplemental taxes for the year 2021-2022 assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

First Installment:	$ 4,079.30, DELINQUENT
Penalty:	$ 407.93

Second Installment:	$ 4,079.30, DUE
Penalty:	$ 0.00
Tax Rate Area:	027-002
A. P. No.:	130-070-021

4. Supplemental taxes for the year 2022-2023 assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

First Installment:	$ 16,231.73, DELINQUENT
Penalty:	$ 1,623.17
Second Installment:	$ 16,231.73, DUE
Penalty:	$ 0.00
Tax Rate Area:	027-002
A. P. No.:	130-070-021

5. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

6. Mutual Rights Of Way Reserved To The Stearns Ran Cho Company And The Jurupa Land And Water Company, Their Successors Or Assigns, For Ditches, Canals Or Pipelines As May Be Deemed Necessary Or Proper By Said Parties For The Proper Irrigation Of Any Other Lands In The Jurupa Rancho, Or For The Supplying Of The Main Canal With Water, Provided, However, That Such Ditches Shall When Practicable Follow The Line Of The Surveyed Subdivisions Of The Jurupa Rancho, Recorded In Book 104 Page 322 Of Deeds, Records Of San Bernardino County, California, And By Deeds Recorded July 24, 1897 In Book 31 Page 337, March 2, 1899 In Book 69 Page 250, April 10, 1902 In Book 142 Page 101, January 8, 1906 In Book 216 Page 4 All Of Deeds, Records Of Riverside County, California.

   The location of the easement cannot be determined from record information.

7. Any facts, rights, interests or claims that may exist or arise by reason of matters, if any, disclosed by that certain Record of Survey filed in book 89, page 91 through 95 .

8. Any facts, rights, interests or claims that may exist or arise by reason of matters, if any, disclosed by that certain Record of Survey filed in book 93, page 83 through 93 .

9. Covenants, conditions, restrictions and easements in the document recorded June 03, 1939 as Book 415, page 581 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction, if any, indicating a preference, limitation, or discrimination based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, handicap, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, to the extent that such covenants, conditions or restrictions violate applicable state or federal laws. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

10. Covenants, conditions, restrictions and easements in the document recorded June 20, 1939 as Book 420, page 342 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction, if any, indicating a preference, limitation, or discrimination based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, handicap, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, to the extent that such covenants, conditions or restrictions violate applicable state or federal laws. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

11. Covenants, conditions, restrictions and easements in the document recorded October 20, 1942 as Book 559, page 201 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction, if any, indicating a preference, limitation, or discrimination based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, handicap, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, to the extent that such covenants, conditions or restrictions violate applicable state or federal laws. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

12. Intentionally Deleted

13. Intentionally Deleted

14. Rights of the public in and to that portion of the Land lying within any Road, Street, Alley or Highway.

15. Water rights, claims or title to water, whether or not shown by the Public Records.

16. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

Prior to the issuance of any policy of title insurance, the Company will require:

17. With respect to ABG GROUP, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY:
    a. A copy of its operating agreement or similar document and any amendments thereto;
    b. A official copy of its articles of organization or similar incorporation document and any corrections, amendments or restatements thereto;
    c. Evidence that the limited liability company is properly formed and is in good standing in the state of its domicile;
    d. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

18. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) SINGLE FAMILY RESIDENCE known as 8312 GRAPEWIN STREET, EASTVALE, CALIFORNIA.

2. According to the public records, there has been no conveyance of the land within a period of twenty four months prior to the date of this report, except as follows:

   A document recorded March 16, 2022 as INSTRUMENT NO. 2022-0128418 of Official Records.

   From: JOANNE L. PEACOCK, A WIDOW AND BRADLEY BURT PEACOCK AND SUSAN JEAN PEACOCK, HUSBAND AND WIFE, ALL AS JOINT TENANTS
   To: ABG GROUP, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

3. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE [(07-01-2021) v. 01.00]
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy and We will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, or regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.
   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.
2. Any power to take the Land by condemnation. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 17.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by You;
   b. not Known to Us, not recorded in the Public Records at the Date of Policy, but Known to You and not disclosed in writing to Us by You prior to the date You became an Insured under this policy;
   c. resulting in no loss or damage to You;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 5, 8.f., 25, 26, 27, 28, or 32); or
   e. resulting in loss or damage that would not have been sustained if You paid consideration sufficient to qualify You as a bona fide purchaser of the Title at the Date of Policy.
4. Lack of a right:
   a. to any land outside the area specifically described and referred to in Item 3 of Schedule A; and
   b. in any street, road, avenue, alley, lane, right-of-way, body of water, or waterway that abut the Land.
   Exclusion 4 does not modify or limit the coverage provided under Covered Risk 11 or 21.
5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.
7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.
9. Any lien on Your Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a. or 27.
10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown on Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown on Schedule A or $2,500 (whichever is less)	$5,000

ALTA OWNER'S POLICY [(07-01-2021) V. 01.00]
CLTA STANDARD COVERAGE OWNER'S POLICY [(02-04-22) V. 01.00]
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.

2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7. The 2021 CLTA Standard Coverage Owner's Policy will include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas,

uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of January 30, 2024 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

ONESIMO CORONEL AND SILVIA CORONEL, TRUSTEES, OR THEIR SUCCESSORS IN INTEREST, OF THE ONESIMO AND SILVIA CORONEL FAMILY TRUST DATED SEPTEMBER 28, 2022, AND ANY AMENDMENTS THERETO, SUBJECT TO EXCEPTION NO. 21

The estate or interest in the land hereinafter described or referred to covered by this Report is:

Fee

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2024-2025, a lien not yet due or payable.

2. General and special taxes and assessments for the fiscal year 2023-2024.

First Installment:	$1,032.80, PAID
Penalty:	$0.00
Second Installment:	$1,032.80, OPEN
Penalty:	$0.00
Tax Rate Area:	027-002
A. P. No.:	130-070-015

(Affects Portion of the land)

3. General and special taxes and assessments for the fiscal year 2023-2024.

First Installment:	$422.87, PAID
Penalty:	$0.00
Second Installment:	$422.87, OPEN
Penalty:	$0.00
Tax Rate Area:	027-002
A. P. No.:	130-080-004

(Affects Portion of the land)

4. The Land lies within the boundaries of proposed community facilities District No. 2, as disclosed by a map filed February 17, 1999 in Book 44, Page 82 of maps of assessment and community facilities districts and recorded February 17, 1999 as Instrument No. 061918 of Official Records.

5. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

6. MUTUAL RIGHTS OF WAY RESERVED TO THE STEARNS RANCHO COMPANY AND THE JURUPA LAND AND WATER COMPANY, THEIR SUCCESSORS OR ASSIGNS, FOR DITCHES, CANALS OR PIPELINES AS MAY BE DEEMED NECESSARY OR PROPER BY SAID PARTIES FOR THE PROPER IRRIGATION OF ANY OTHER LANDS IN THE JURUPA RANCHO, OR FOR THE SUPPLYING OF THE MAIN CANAL WITH WATER, PROVIDED, HOWEVER, THAT SUCH DITCHES SHALL WHEN PRACTICABLE FOLLOW THE LINE OF THE SURVEYED SUBDIVISIONS OF THE JURUPA RANCHO, RECORDED IN BOOK 104 PAGE 322 OF DEEDS, RECORDS OF SAN BERNARDINO COUNTY, CALIFORNIA, AND BY DEEDS RECORDED JULY 24, 1897 IN BOOK 31 PAGE 337, MARCH 2, 1899 IN BOOK 69 PAGE 250, APRIL 1902 IN BOOK 142 PAGE 101, JANUARY 8, 1906 IN BOOK 216 PAGE 4 ALL OF DEEDS, RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

   The location of the easement cannot be determined from record information.

7. Covenants, conditions, and restrictions in the document recorded JUNE 3, 1939 as BOOK 415, PAGE 581 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction, if any, indicating a preference, limitation, or discrimination based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, handicap, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, to the extent that such covenants, conditions or restrictions violate applicable state or federal laws. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

8. A deed of trust to secure an original indebtedness of $83,000.00 recorded JANUARY 16, 1991 as INSTRUMENT NO. 18440 of official records.

Dated:	JANUARY 8, 1991
Trustor:	ROLAND LACOMPTE AND ROSE LACOMPTE, HUSBAND AND WIFE
Trustee:	FIRST AMERICAN TITLE INSURANCE COMPANY, A CALIFORNIA CORPORATION
Beneficiary:	RALPH V. BEELER, A MARRIED MAN, AS HIS SOLE AND SEPARATE PROPERTY

According to the public records, the beneficial interest under the deed of trust was assigned to RALPH V. BEELER AND JEANNE L. BEELER, TRUSTEES OF THE BEELER REVOCABLE TRUST AGREEMENT, DATED MAY 14, 1996 by assignment recorded December 09, 1996 as INSTRUMENT NO. 463778 and also recorded on December 09, 1996 as INSTRUMENT NO. 463779 of official records.

a. If this deed of trust is to be eliminated in the policy or policies contemplated by this report/commitment, the company will require the following for review prior to the recordation of any documents or the issuance of any policy of title insurance:
   i. Original note and deed of trust.
   ii. Payoff demand statement signed by all present beneficiaries.
   iii. Request for reconveyance or substitution of trustee and full reconveyance must be signed by all present beneficiaries and must be notarized by a First American approved notary.

b. If the payoff demand statement or the request for reconveyance is to be signed by a servicer, we will also require a full copy of the loan servicing agreement executed by all present beneficiaries.

c. If any of the beneficial interest is presently held by trustees under a trust agreement, we will require a certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.

9. A deed of trust to secure an original indebtedness of $42,927.77 recorded DECEMBER 22, 1992 as INSTRUMENT NO. 486267 of official records.

Dated:	DECEMBER 21, 1992
Trustor:	ONESIMO CORONEL, A SINGLE MAN
Trustee:	ONTARIO ESCROW SERVICE, A CALIFORNIA CORPORATION
Beneficiary:	ROLAND LACOMPTE AND ROSE LACOMPTE, HUSBAND AND WIFE AS JOINT TENANTS

A document recorded February 14, 1995 as Instrument No. 045500 of Official Records provides that FIRST AMERICAN TITLE INSURANCE COMPANY, A CALIFORNIA CORPORATION was substituted as trustee under the deed of trust.

According to the public records, the beneficial interest under the deed of trust has been assigned to RALPH V. BEELER AND JEANNE L. BEELER HUSBAND AND WIFE, TRUSTEES OF THE BEELER REVOCABLE TRUST, DATED MAY 14, 1996 TO ELIZABETH LA COMPTE, ROLAND LA COMPTE II, AND ROSECHELLE LA COMPTE, SUCCESSOR TRUSTEES OF THE ROSARIO TENIENTE LA COMPTE LIVING TRUST DATED JANUARY 30, 1998 by various assignments, the last of which was recorded January 26, 1999 as Instrument No. 029523 of Official Records.

a. If this deed of trust is to be eliminated in the policy or policies contemplated by this report/commitment, the company will require the following for review prior to the recordation of any documents or the issuance of any policy of title insurance:
   i. Original note and deed of trust.
   ii. Payoff demand statement signed by all present beneficiaries.
   iii. Request for reconveyance or substitution of trustee and full reconveyance must be signed by all present beneficiaries and must be notarized by a First American approved notary.

b. If the payoff demand statement or the request for reconveyance is to be signed by a servicer, we will also require a full copy of the loan servicing agreement executed by all present beneficiaries.

c. If any of the beneficial interest is presently held by trustees under a trust agreement, we will require a certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.

The effect of a document entitled "SUBSTITUTION OF TRUSTEE AND FULL RECONVEYANCE", recorded May 19, 2017 as Instrument No. 2017-0202199 of Official Records.

Note: The Company will require satisfactory proof of full payment of the debt secured by said mortgage or deed of trust prior to removing this exception or insuring the contemplated transaction.

10. The effect of a map purporting to show the land and other property, filed BOOK 89, PAGES 91 THROUGH 93 of Record of Surveys.

11. The terms and provisions contained in the document entitled CERTIFICATE OF COMPLIANCE AND WAIVER OF PARCEL MAP recorded MAY 28, 1993 as INSTRUMENT NO. 201682 of Official Records.

12. The effect of a map purporting to show the land and other property, filed BOOK 91, PAGES 76 AND 77 of Record of Surveys.

13. The terms and provisions contained in the document entitled RESOLUTION 94-378, APPROVED BY THE BOARD OF SUPERVISORS FOR THE COUNTY OF RIVERSIDE, APPROVING THE ESTABLISHMENT OF THE MIRA LOMA ROAD AND BRIDGE BENEFIT DISTRICT, AND ESTABLISHING THE FEE SCHEDULE FOR APPROVED THOROUGHFARES AND BRIDGES recorded DECEMBER 19, 1994 as INSTRUMENT NO. 470555 of Official Records.

14. The effect of a map purporting to show the land and other property, filed BOOK 93, PAGES 83 THROUGH 88 of Record of Surveys.

15. The terms and provisions contained in the document entitled RESOLUTION NO. 98-025 recorded January 14, 1999 as INSTRUMENT NO. 015123 of Official Records.

16. Any lien, assessment, and/or violation or enforcement of any law, ordinance, permit or governmental regulation arising from the document entitled NOTICE OF NONCOMPLIANCE recorded January 23, 2002 as INSTRUMENT NO. 2002-037630 of Official Records.

17. An easement for PUBLIC ROAD AND DRAINAGE PURPOSES, INCLUDING PUBLIC UTILITY AND PUBLIC SERVICES and incidental purposes, recorded September 26, 2007 as INSTRUMENT NO. 2007-0602326 of Official Records.
In Favor of: COUNTY OF RIVERSIDE, A POLITICAL SUBDIVISION
Affects: as described therein

18. The effect of a document entitled "TRUST TRANSFER DEED", recorded October 03, 2022 as INSTRUMENT NO. 2022-0415628 of Official Records.

The requirement the document is re-recorded to include a complete and correct legal description.

19. Any right, title or interest of the spouse (if any) of ONESIMO CORONEL.

20. Rights of the public in and to that portion of the Land lying within any Road, Street, Alley or Highway.

21. Water rights, claims or title to water, whether or not shown by the Public Records.

22. Rights of parties in possession.

23. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

24. A deed from the spouse (if any) of ONESIMO CORONEL be recorded in the public records, or the joinder of the spouse named herein on any conveyance, encumbrance or lease to be executed by said married person.
The deed should contain the following statement:
"It is the express intent of the grantor, being the spouse of the grantee, to convey all right, title and interest of the grantor, community or otherwise, in and to the herein described property to the grantee as his/her sole and separate property."

Prior to the issuance of any policy of title insurance, the Company will require:

25. With respect to the trust referred to in the vesting:
a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

26. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. The property covered by this report is vacant land.

2. According to the public records, there has been no conveyance of the land within a period of twenty four months prior to the date of this report, except as follows:

   A document recorded October 03, 2022 as Instrument No. 2022-0415628 of Official Records.

   From: ONESIMO CORONEL, A MARRIED MAN AS HIS SOLE AND SEPARATE PROPERTY (WHO ACQUIRED TITLE AS A SINGLE MAN
   To: ONESIMO CORONEL AND SILVIA CORONEL, TRUSTEES, OR THEIR SUCCESSORS IN INTEREST, OF THE ONESIMO AND SILVIA CORONEL FAMILY TRUST DATED SEPTEMBER 28, 2022, AND ANY AMENDMENTS THERETO

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE [(07-01-2021) v. 01.00]
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy and We will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, or regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.
   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.
2. Any power to take the Land by condemnation. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 17.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by You;
   b. not Known to Us, not recorded in the Public Records at the Date of Policy, but Known to You and not disclosed in writing to Us by You prior to the date You became an Insured under this policy;
   c. resulting in no loss or damage to You;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 5, 8.f., 25, 26, 27, 28, or 32); or
   e. resulting in loss or damage that would not have been sustained if You paid consideration sufficient to qualify You as a bona fide purchaser of the Title at the Date of Policy.
4. Lack of a right:
   a. to any land outside the area specifically described and referred to in Item 3 of Schedule A; and
   b. in any street, road, avenue, alley, lane, right-of-way, body of water, or waterway that abut the Land.
   Exclusion 4 does not modify or limit the coverage provided under Covered Risk 11 or 21.
5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.
7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.
9. Any lien on Your Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a. or 27.
10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown on Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown on Schedule A or $2,500 (whichever is less)	$5,000

ALTA OWNER'S POLICY [(07-01-2021) V. 01.00]
CLTA STANDARD COVERAGE OWNER'S POLICY [(02-04-22) V. 01.00]
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.

2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7. The 2021 CLTA Standard Coverage Owner's Policy will include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas,

uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as numbers 1 through 7.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-SQG ---------- RCRA - Small Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System

US ENG CONTROLS ..... Engineering Controls Sites List
US INST CONTROLS ..... Institutional Controls Sites List

Federal ERNS list

ERNS ..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ..... State Response Sites

Lists of state and tribal leaking storage tanks

LUST ..... Geotracker's Leaking Underground Fuel Tank Report
INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land
CPS-SLIC ..... Statewide SLIC Cases

Lists of state and tribal registered storage tanks

FEMA UST ..... Underground Storage Tank Listing
UST ..... Active UST Facilities
AST ..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST ..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ..... Voluntary Cleanup Priority Listing
VCP ..... Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS ..... Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY ..... Recycler Database
HAULERS ..... Registered Waste Tire Haulers Listing
INDIAN ODI ..... Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ..... Torres Martinez Reservation Illegal Dump Site Locations
ODI ..... Open Dump Inventory
IHS OPEN DUMPS ..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ..... Delisted National Clandestine Laboratory Register
HIST Cal-Sites ..... Historical Calsites Database
CDL ..... Clandestine Drug Labs
Toxic Pits ..... Toxic Pits Cleanup Act Sites

CERS HAZ WASTE - California Environmental Reporting System Hazardous Waste
US CDL - National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

CERS TANKS - California Environmental Reporting System (CERS) Tanks

Local Land Records

LIENS - Environmental Liens Listing
LIENS 2 - CERCLA Lien Information
DEED - Deed Restriction Listing

Records of Emergency Release Reports

HMIRS - Hazardous Materials Information Reporting System
CHMIRS - California Hazardous Material Incident Report System
LDS - Land Disposal Sites Listing
MCS - Military Cleanup Sites Listing
SPILLS 90 - SPILLS 90 data from FirstSearch

Other Ascertainable Records

RCRA NonGen / NLR - RCRA - Non Generators / No Longer Regulated
FUDS - Formerly Used Defense Sites
DOD - Department of Defense Sites
SCRD DRYCLEANERS - State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR - Financial Assurance Information
EPA WATCH LIST - EPA WATCH LIST
2020 COR ACTION - 2020 Corrective Action Program List
TSCA - Toxic Substances Control Act
TRIS - Toxic Chemical Release Inventory System
SSTS - Section 7 Tracking Systems
ROD - Records Of Decision
RMP - Risk Management Plans
RAATS - RCRA Administrative Action Tracking System
PRP - Potentially Responsible Parties
PADS - PCB Activity Database System
ICIS - Integrated Compliance Information System
FTTS - FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS - Material Licensing Tracking System
COAL ASH DOE - Steam-Electric Plant Operation Data
COAL ASH EPA - Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER - PCB Transformer Registration Database
RADINFO - Radiation Information Database
HIST FTTS - FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS - Incident and Accident Data
CONSENT - Superfund (CERCLA) Consent Decrees
INDIAN RESERV - Indian Reservations
FUSRAP - Formerly Utilized Sites Remedial Action Program
UMTRA - Uranium Mill Tailings Sites
LEAD SMELTERS - Lead Smelter Sites
US AIRS - Aerometric Information Retrieval System Facility Subsystem
US MINES - Mines Master Index File

MINES MRDS	Mineral Resources Data System
ABANDONED MINES	Abandoned Mines
FINDS	Facility Index System/Facility Registry System
ECHO	Enforcement & Compliance History Information
DOCKET HWC	Hazardous Waste Compliance Docket Listing
UXO	Unexploded Ordnance Sites
FUELS PROGRAM	EPA Fuels Program Registered Listing
PFAS NPL	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES	Federal Sites PFAS Information
PFAS TRIS	List of PFAS Added to the TRI
PFAS TSCA	PFAS Manufacture and Imports Information
PFAS RCRA MANIFEST	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR	PFAS Contamination Site Location Listing
PFAS WQP	Ambient Environmental Sampling for PFAS
PFAS NPDES	Clean Water Act Discharge Monitoring Information
PFAS ECHO	Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAINING	Facilities in Industries that May Be Handling PFAS Listing
PFAS PART 139 AIRPORT	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC	Aqueous Foam Related Incidents Listing
BIOSOLIDS	ICIS-NPDES Biosolids Facility Data
PFAS	PFAS Contamination Site Location Listing
AQUEOUS FOAM	Former Fire Training Facility Assessments Listing
CA BOND EXP. PLAN	Bond Expenditure Plan
CHROME PLATING	Chrome Plating Facilities Listing
Cortese	"Cortese" Hazardous Waste & Substances Sites List
CUPA Listings	CUPA Resources List
DRYCLEANERS	Cleaner Facilities
EMI	Emissions Inventory Data
ENF	Enforcement Action Listing
Financial Assurance	Financial Assurance Information Listing
ICE	Inspection, Compliance and Enforcement
HWT	Registered Hazardous Waste Transporter Database
HWTS	Hazardous Waste Tracking System
HAZNET	Facility and Manifest Data
MINES	Mines Site Location Listing
MWMP	Medical Waste Management Program Listing
NPDES	NPDES Permits Listing
PEST LIC	Pesticide Regulation Licenses Listing
PROC	Certified Processors Database
Notify 65	Proposition 65 Records
HAZMAT	Hazardous Material Facilities
UIC	UIC Listing
UIC GEO	UIC GEO (GEOTRACKER)
WASTEWATER PITS	Oil Wastewater Pits Listing
WDS	Waste Discharge System
WIP	Well Investigation Program Case List
MILITARY PRIV SITES	MILITARY PRIV SITES (GEOTRACKER)
PROJECT	PROJECT (GEOTRACKER)
WDR	Waste Discharge Requirements Listing
CIWQS	California Integrated Water Quality System
CERS	CERS
NON-CASE INFO	NON-CASE INFO (GEOTRACKER)
OTHER OIL GAS	OTHER OIL & GAS (GEOTRACKER)
PROD WATER PONDS	PROD WATER PONDS (GEOTRACKER)
SAMPLING POINT	SAMPLING POINT (GEOTRACKER)

RGA LUST---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PROPOSED YORBA ELEME	***NE CORNER OF FIELDMA***	***WNW 1/8 - 1/4 (0.225 mi.)***	***8***	***21***

Status: No Further Action
Facility Id: 60000901

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
TOFCO COMPOSTING FAC	8247 ARCHIBALD DRIVE	NW 0 - 1/8 (0.042 mi.)	B5	16
Database: SWF/LF (SWIS), Date of Government Version: 11/06/2023				
Facility ID: 33-AA-0233				
Operational Status: Planned				
Regulation Status: Proposed				

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
COMPOSTING PLANT,COR	8186 ARCHIBALD AVE	NNW 1/8 - 1/4 (0.152 mi.)	7	20

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/23/2023 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PROPOSED YORBA ELEME	***NE CORNER OF FIELDMA***	***WNW 1/8 - 1/4 (0.225 mi.)***	***8***	***21***
Facility Id: 60000901				
Status: No Further Action				

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
OOSTEN DAIRY	***8247 ARCHIBALD AVE***	***NW 0 - 1/8 (0.042 mi.)***	***B4***	***14***
Status: A Tank Status: A Comp Number: 14142				

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 4 HIST UST sites within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
OSTERKAMP DAIRY	***8301 ARCHIBALD ST***	***WSW 0 - 1/8 (0.024 mi.)***	***A1***	***9***
Facility Id: 00000032462				
OSTERKAMP DAIRY	***8301 ARCHIBALD AVE***	***WSW 0 - 1/8 (0.024 mi.)***	***A2***	***12***
TRUE CAST CONCRETE F	8247 ARCHIBALD ST	NW 0 - 1/8 (0.042 mi.)	B3	13
Facility Id: 00000014142				
OOSTEN DAIRY	***8247 ARCHIBALD AVE***	***NW 0 - 1/8 (0.042 mi.)***	***B4***	***14***

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
OOSTEN DAIRY	***8247 ARCHIBALD AVE***	***NW 0 - 1/8 (0.042 mi.)***	***B4***	***14***
Facility Id: 33006757 Status: A				

Other Ascertainable Records

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

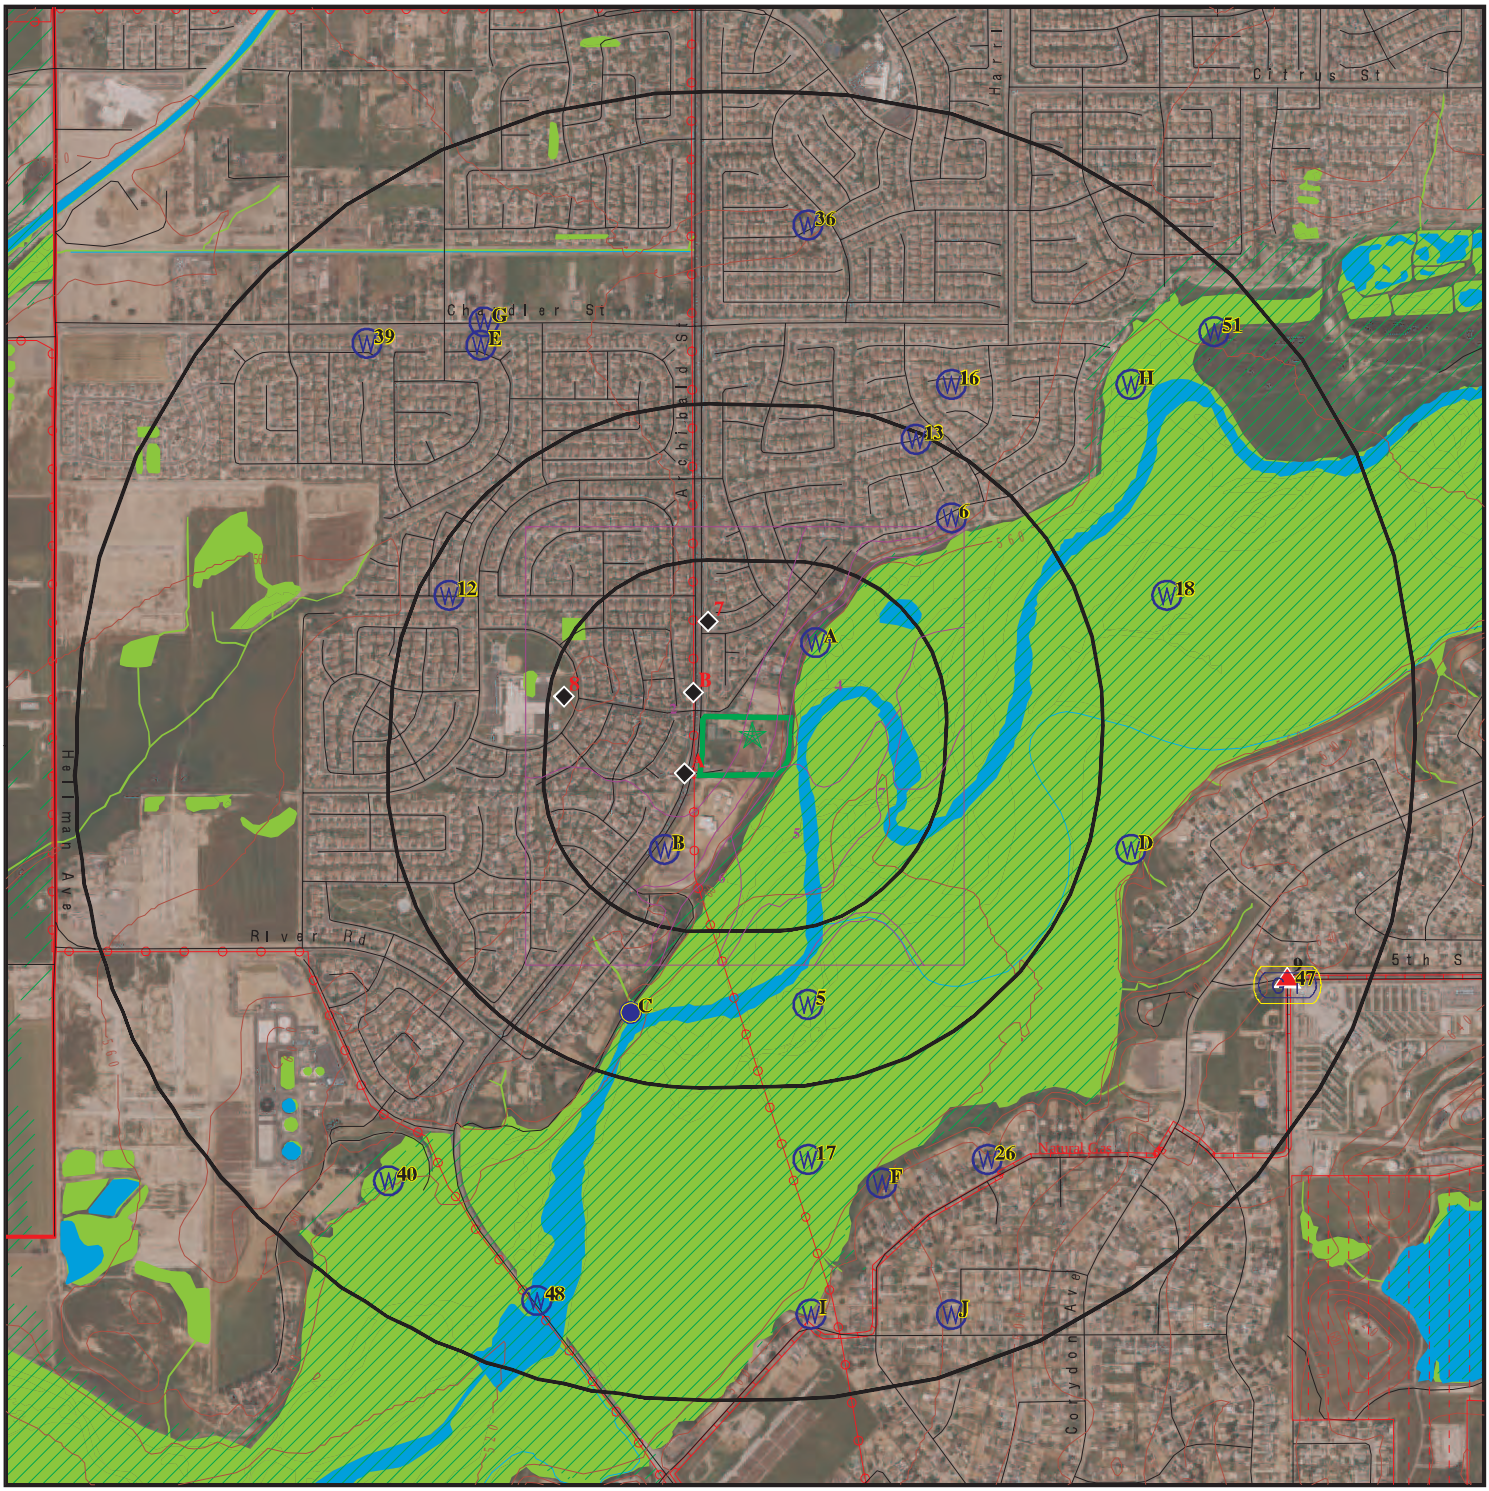
A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there

is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
COMPOSTING PLANT,COR Reg Id: 8 332034001	***8247 ARCHIBALD AVENU***	***NW 0 - 1/8 (0.042 mi.)***	***B6***	***18***

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A review of the HWP list, as provided by EDR, and dated 02/07/2024 has revealed that there is 1 HWP site within approximately 1 mile of the target property.



Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 09/19/2008
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/17/2008
Comments: Conference call involving DTSC (project manager, toxicologist, geologist) and Leighton (project manager, geologist) to discuss step out sample results, entire data, and TPH analysis by the MA laboratory. Consultant discussed proposed cleanup goal for TPH (diesel range).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 01/02/2009
Comments: DTSC conditionally approved the SSI Report w/ further action determination given that the District addresses DTSCs comments on the draft SSI Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report

PROPOSED YORBA ELEMENTARY SCHOOL (Continued) **S109034328**

Completed Date: 12/15/2010
Comments: Fieldwork completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/29/2011
Comments: Sampling completed

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/23/2012
Comments: DTSC approved the methane monitoring report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 06/01/2012
Comments: Approved the site with No Further Action determination based on methane sampling data (concentration and pressure trends).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/25/2011
Comments: DTSC forwarded an ESI letter to the District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Cost Recovery Closeout Memo
Completed Date: 08/02/2012
Comments: CRU memo issued to close out the project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 06/21/2010
Comments: Third round of quaterly monitoring activities was completed. Three additional soil gas probes were installed for methane caracterization in addition to replacement probes for the damaged probes.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/15/2011
Comments: Methane quaterly monitoring completed. Mr. Joe Hwong provided oversight.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 06/29/2011
Comments: Second quaterly report of 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

PROPOSED YORBA ELEMENTARY SCHOOL (Continued) **S109034328**

Completed Document Type: Supplemental Site Investigation Report
Completed Date: 11/18/2010
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: School Cleanup Agreement
Completed Date: 01/23/2009
Comments: Signed document will be sent to District via FedEx on Monday.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement
Completed Date: 05/27/2008
Comments: Signed agreement sent (FedEx) to District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 11/09/2009
Comments: DTSC approved the SSI Tech Memo with conditional approval that site be surveyed for condition of sampling probes prior to sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/07/2010
Comments: 1st monitoring event showed a decrease in methane values from the original PEA investigation except for one location north central of the site. A new probe was installed near that location and also showed elevated methane. Both locations are outside of the building footprint. DTSC discussed the sampling results with the consultant and possible actions. 4 additional probes will be installed to delineate the methane and provide clearance for the building footprint. This will possibly lead to elemination of the membrane and passive venting system.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/23/2010
Comments: Second round of quaterly sampling completed. Some probes were not sampled due to accumulation of water from the recent storms.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.15 Request
Completed Date: 01/26/2009
Comments: DTSC approved the 4.15 from.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2023
Date Data Arrived at EDR: 01/02/2024
Date Made Active in Reports: 01/24/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2023
Date Data Arrived at EDR: 01/02/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/26/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2024

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/29/2024

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/06/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

8312 GRAPEWIN ST
8312 GRAPEWIN ST
CORONA, CA 92880

TARGET PROPERTY COORDINATES

Latitude (North):	33.936709 - 33° 56' 12.15''
Longitude (West):	117.591546 - 117° 35' 29.57''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	445329.9
UTM Y (Meters):	3755101.8
Elevation:	590 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005749 CORONA NORTH, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

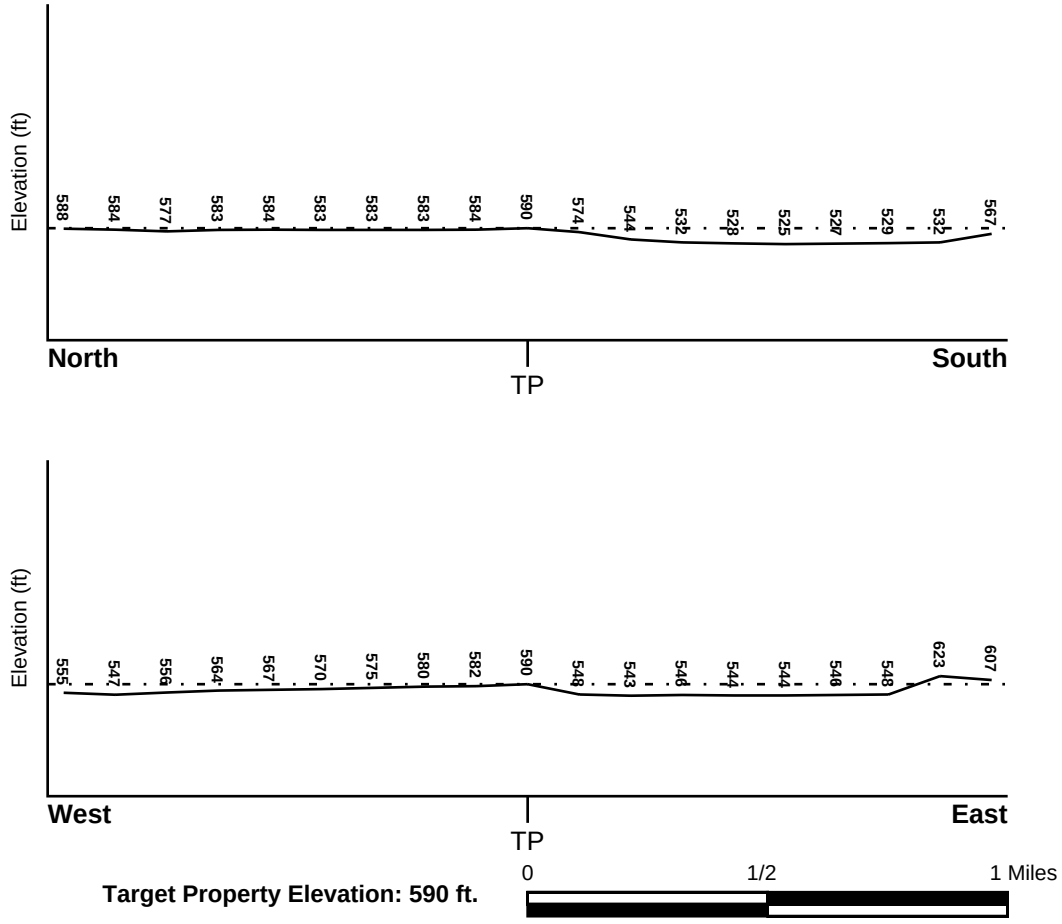
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C0687G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C9375H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CORONA NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: RAMONA

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	14 inches	22 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	22 inches	68 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	68 inches	74 inches	gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: PACHAPPA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	20 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.6
2	20 inches	62 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.6

Soil Map ID: 3

Soil Component Name: Terrace escarpments

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: GRANGEVILLE

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.4

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	16 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.4

Soil Map ID: 5

Soil Component Name: GRANGEVILLE

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	35 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 9 Min: 7.4
2	35 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 9 Min: 7.4

Soil Map ID: 6

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	9 inches	48 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
3	48 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

Soil Map ID: 7

Soil Component Name: DELLO

Soil Surface Texture: loamy sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
2	7 inches	35 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
3	35 inches	59 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Map ID: 8

Soil Component Name: GRANGEVILLE

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	16 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # B1BF-4F2B-AE06

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Dear Requestor:

We have received your Public Records Act Request from the Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs Data Management System. It tracks our cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov.

You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 714-4845337 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

Julie Chandler

PERMIT APPLICATION
County of Riverside Department of Building and Safety

527080

This permit becomes void if work not commenced within 180 days from date of issuance OR if work has been suspended or abandoned for a period of 180 days.

☐

LICENSED CONTRACTOR'S DECLARATION: I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER-BUILDER DECLARATION: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):)

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____, B. & P.C. (Attach Certificate)

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION: I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.)

☐ Certified copy is hereby furnished

☐ Certified copy is filed with the County Building Inspection Department or County _____ Department.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE: This section need not be completed if the permit is for one hundred ($100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or construction or dismantling thereof, will be more than thirty six (36) feet high. (Chap. 3.2, Grp 2, Art 2, Section 341, Title 8, C.A.C.)

☐ As owner-builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

☐ Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY: I certify that I have read this application and state that the information given is correct. I agree to comply with all state laws and county ordinances relating to building construction, and authorize a representative of the County of Riverside, Department of Building and Safety to enter upon the property for which I have applied for this permit for the purpose of making inspections.

OWNER-BUILDER VERIFICATION

Address _____

An "owner-builder" building permit has been applied for in your name and bearing your signature.

Please complete and return this information in the envelope provided at your earliest convenience to avoid unnecessary delay in processing and issuing your building permit. No building permit will be issued until this verification is received.

1. I personally plan to provide the major labor and materials for construction of the proposed property improvement (yes or no) yes

2. I (have/have not) have signed an application for building permit for the proposed work.

3. I have contracted with the following person (firm) to provide the proposed construction:

   Name _____ Phone _____

   Address _____ City _____

   Contractors License No. _____

4. I plan to provide portions of the work, but I have hired the following person to coordinate, supervise, and provide the major work:

   Name _____ Phone _____

   Address _____ City _____

   Contractors License No. _____

5. I will provide some of the work but I have contracted (hired) the following persons to provide the work indicated:

Name	Address	Phone	Type of Work

I DECLARE UNDER PENALTY OF PERJURY THAT THE FOREGOING IS TRUE AND CORRECT.

PROPERTY OWNER: Joseph L. Ottenheimer 5-4-89
(Signed) (Date)

284-2002 Rev: 1/83

DEPARTMENT OF BUILDING AND SAFETY
COUNTY OF RIVERSIDE

OWNER-BUILDER INFORMATION

Dear Property Owner:

An application for a building permit has been submitted in your name listing yourself as the builder of the property improvements specified.

For your protection you should be aware that as owner-builder you are the responsible party of record on such a permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name.

Contractors are required by law to be licensed and bonded by the State of California and, where required, to have a business license from the city or county. They are also required by law to put their license number on all permits for which they apply.

If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware of the following information for your benefit and protection.

If you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer.

If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers' compensation insurance, disability insurance costs, and unemployment compensation contributions.

There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance.

For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents.

If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions.

A frequent practice of unlicensed persons professing to be contractors is to secure an "owner-builder" building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Building permits are not required to be signed by property owners unless they are performing their own work personally.

Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814.

Please complete and return the enclosed owner-builder verification form so that we can confirm that you are aware of these matters. The building permit will not be issued until the verification is returned.

Sincerely,

DEPARTMENT OF BUILDING AND SAFETY

ADDITIONAL INFORMATION

LAND USE DIVISION
DEPT. OF BUILDING & SAFETY
RIVERSIDE OFFICE

2470

284-199 2/82

DEAR APPLICANT,

This department has an automated building permit management system. Certain information exists and/or will be added to the system which identifies conditions that must be met prior to, during, and after the issuance of a building permit. Upon issuance of a permit, the system will further assist us in tracking the progress both you and this department makes in completing the requirements that must be met prior to finalization of your permit.

So that we may assist you, we ask that you fill out the reverse side of this form. PLEASE PRINT AND COMPLETE THOSE PARTS OF THE FORM YOU UNDERSTAND ONLY. Upon completion of the form, a department representative at our Land Use Code Enforcement Counter will use this information to prepare your application. Thank you.

OWNER

Owner Glenn Gilstrap | Architect | Contractor
Address 8312 Grapewood | Address | Address
City Corona, Ca. | City | City
Phone | Phone | Phone

I (we) the undersigned, hereby certify and acknowledge that I (we) have read the application and agree that if Curb and Gutter, and Paving, and/or Dedication of right of way is required by the County of Riverside, the Riverside County Department of Building and Safety shall not make a Final Inspection until said requirements have been met. I am also aware that no work is to be done within the County R/W without an encroachment permit.

NOW, therefore, it is agreed that I (we) will not occupy said property and will not cause said property to be occupied until I (we) have complied with all laws of the County of Riverside and the State of California governing said property.

Notes and Definitions

ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
E	Estimated Concentration; concentration exceeds calibration ra
LCC	Leak Check Compound
MDL	Compound Reported to Method Detection Limit
1	Recovery outside of acceptable limits. LCS/LCSD recoveries and %RSD were within QC limits, therefore data was accepted.
SMS	Sample matrix prevented adequate surrogate recovery.
J	Value less then PQL but greater than MDL.
HHSR	High hydrocarbon concentration in this sample prevented adequate surrogate recovery.
HHSR	High hydrocarbon concentration in this sample prevented adequate surrogate recovery.
F	Sample was filtered in the lab before extraction.
HHTAR	High hydrocarbon concentration prevented in-range recovery of target analytes.
IHRPD	Target analyte recoveries were outside of range but accepted due to passing RPDs
AROL	Target analyte recovery exceeded recovery range but was accepted due to ND of that analyte in MB and sample(s).
ISO-H	Isomers could not be sufficiently chromatographically resolved according to method requirements due to hydrocarbon interference or other matrix effects. The isomers' reported individual concentrations were each calculated as the average of each of the individual isomers' concentrations.
2	Recovery outside of acceptable limits for either LCS or LCSD. CCV and LCS or LCSD recoveries were within limits; therefore data was accepted.
3	RPD outside of acceptable limits. Target analyte recoveries were within QC limits; therefore, data was accepted.
4	LCS and/or LCSD recoveries exceeded acceptability ranges. Target analyte recoveries were accepted due to passing CCV, in-range LCS/LCSD RPDs, and a clean MB in which all target analytes were < RL.

SAMPLE CONDITION RECORD

1. Are the samples within correct temperature criteria? (0 - 6°C)	No
2. If not within temp. criteria, were samples received on ice?	Yes
3. If not within temp. criteria, were samples received chilled on same day of sampling?	Yes
4. Is the Chain of Custody (COC) received filled out completely?	Yes
5. Does the total number of containers received match COC?	Yes
6. Are the sample container label(s) consistent with COC?	Yes
7. Are the sample container(s) intact and in good condition?	Yes
8. Were the proper containers & sufficient volume for analyses requested on COC?	Yes
9. Was the proper preservative indicated on COC/container for analyses requested?	Yes
10. Are the containers for volatile analysis free of headspace? (EPA 8260 water)	N/A
EDF Requested	N/A

Re: Phase I/II ESA

Enclosed are the results of analyses for samples received by the laboratory on 03/27/24. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Colby Wakeman
Lab Director

Notes and Definitions

ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
E	Estimated Concentration; concentration exceeds calibration ra
LCC	Leak Check Compound
MDL	Compound Reported to Method Detection Limit
1	Recovery outside of acceptable limits. LCS/LCSD recoveries and %RSD were within QC limits, therefore data was accepted.
SMSR	Sample matrix prevented adequate surrogate recovery.
J	Value less then PQL but greater than MDL.
HHSR	High hydrocarbon concentration in this sample prevented adequate surrogate recovery.
HHSR	High hydrocarbon concentration in this sample prevented adequate surrogate recovery.
F	Sample was filtered in the lab before extraction.
HHTAR	High hydrocarbon concentration prevented in-range recovery of target analytes.
IHRPD	Target analyte recoveries were outside of range but accepted due to passing RPDs
AROL	Target analyte recovery exceeded recovery range but was accepted due to ND of that analyte in MB and sample(s).
ISO-H	Isomers could not be sufficiently chromatographically resolved according to method requirements due to hydrocarbon interference or other matrix effects. The isomers' reported individual concentrations were each calculated as the average of each of the individual isomers' concentrations.
2	Recovery outside of acceptable limits for either LCS or LCSD. CCV and LCS or LCSD recoveries were within limits; therefore data was accepted.
3	RPD outside of acceptable limits. Target analyte recoveries were within QC limits; therefore, data was accepted.
4	LCS and/or LCSD recoveries exceeded acceptability ranges. Target analyte recoveries were accepted due to passing CCV, in-range LCS/LCSD RPDs, and a clean MB in which all target analytes were < RL.

SAMPLE CONDITION RECORD

1. Are the samples within correct temperature criteria? (0 - 6°C)	N/A
2. If not within temp. criteria, were samples received on ice?	N/A
3. If not within temp. criteria, were samples received chilled on same day of sampling?	N/A
4. Is the Chain of Custody (COC) received filled out completely?	Yes
5. Does the total number of containers received match COC?	Yes
6. Are the sample container label(s) consistent with COC?	Yes
7. Are the sample container(s) intact and in good condition?	Yes
8. Were the proper containers & sufficient volume for analyses requested on COC?	Yes
9. Was the proper preservative indicated on COC/container for analyses requested?	N/A
10. Are the containers for volatile analysis free of headspace? (EPA 8260 water)	N/A
EDF Requested	No

AFFORDABLE HOUSING AGREEMENT

AND

DECLARATION OF RESTRICTIVE COVENANTS

by and between

THE CITY OF EASTVALE

and

(Density Bonus Below Market-Rate For-Sale Units)

This Affordable Housing Agreement (this "**Agreement**") is entered into effective as of _____, 2025 (the "**Effective Date**") by and among the City of Eastvale, a California municipal corporation ("**City**"), _____, a _____ ("**Developer**"). City and Developer are referred to herein individually as a "Party" and collectively as the "Parties."

RECITALS

The following recitals are an integral part of this Agreement and are binding on the Parties. Capitalized terms used in these Recitals and elsewhere in this Agreement shall have the meanings ascribed to such terms as set forth in Section 2 below.

A. Developer is the owner of the real property located in the City of Eastvale, Riverside County, California consisting of approximately 8.3 acres, located at 8312 Grapewin Street and 8330 Archibald Avenue in the City of Eastvale, known as Riverside County Assessor's Parcel Nos. 130-070-021, 130-070-015, and 130-080-004 and more particularly described in Exhibit A attached hereto (the "**Property"**).

B. Developer intends to construct a seventy-six (76) unit residential development (the "**Project"**) on the Property in accordance with City of Eastvale City Council Resolution No. _____ adopted on _____, 2025, approving the Project subject to conditions of approval related to development of the Property and the Project (**"Conditions of Approval")**.

C. The Project includes the development of four (4) residential units that will be sold to Eligible Households at an Affordable Sales Price in accordance with the state density bonus provisions in Government Code sections 65915 to 65918 ("**Density Bonus Law**").

D. This Agreement is intended to satisfy the requirements of the Density Bonus Law, and to regulate and restrict the Project's Restricted Units for sale to Eligible Purchasers at Affordable Sales Prices. The Parties intend the covenants set forth in this Agreement to run with the land and to be binding upon Developer and Developer's successors and assigns.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. Recitals Incorporated. The Recitals set forth above are hereby incorporated into this Agreement.

2. Definitions. The following terms shall have the meanings set forth below whenever used in this Agreement or the Exhibits hereto, unless the context clearly indicates otherwise.

"Actual Household Size" means the actual number of persons in the applicable household.

"**Affordable Housing Cost**" means a monthly obligation to pay mortgage payments (principal and interest), property taxes, property insurance, mortgage insurance, utilities, and

homeowners' association dues (if applicable) in an aggregate amount not greater than one-twelfth of thirty percent (30%) of fifty percent (50%) of Area Median Income, adjusted for Household Size Appropriate for the Unit.

"Affordable Sales Price" means the maximum sales price for a Restricted Unit as determined by the City pursuant to Exhibit C that will result in an Affordable Housing Cost for the homebuyer.

"**Area Median Income**" **or** "**AMI**" means the median annual income for Riverside County, California, adjusted for Actual Household Size, as determined by the U.S. Department of Housing and Urban Development pursuant to Section 8 of the United States Housing Act of 1937 and as published from time to time by the State of California Department of Housing and Community Development in Section 6932 of Title 25 of the California Code of Regulations or successor provision published pursuant to California Health and Safety Code Section 50093(c).

"City" means the City of Eastvale, California

"City's Authorized Representative" means the City Manager of the City of Eastvale.

"City Council" means the City Council of the City of Eastvale.

"Claims" is defined in Section 10.

"Conditions of Approval" is defined in Recital B.

"Density Bonus Law" is defined in Recital C.

"Developer" is defined in the preamble to this Agreement. Each reference herein to the "Developer" shall mean the Developer and the Developer's successors and assigns.

"Eligible Purchaser" means a person whose annual household Gross Income does not exceed the qualifying limit for Very Low Income Households and who demonstrates to the reasonable satisfaction of the City that they:

(i) Will provide funds (cannot be financed) in the amount of at least three percent (3%) of the purchase price of the Restricted Unit;

(ii) Will qualify for and obtain a mortgage loan to finance acquisition of the Restricted Unit in a maximum amount equal to ninety-seven percent (97%) of the sales price plus closing costs; and

(iii) Will, after purchase of a Restricted Unit, have a monthly housing cost (principal, interest, taxes, insurance and homeowner association fees) that does not exceed Affordable Housing Cost.

"Excess Proceeds Note" means the Secured Promissory Note that each purchaser of a Restricted Unit will be required to execute for the benefit of City at the closing for the purchase of the Restricted Unit. The Excess Proceeds Note shall be in a form approved by City.

"Gross Income" shall have the meaning set forth in Section 6914 of Title 25 of the California Code of Regulations as such Section may be revised from time to time, and shall mean the combined Gross Income of all adult persons in the applicable household.

"Household Size Appropriate for the Unit" means the number of bedrooms in a dwelling unit plus one, consistent with Section 50052.5(h) of the California Health and Safety Code, subject to the application of federal rules and regulations applicable to Project financing sources (if any).

"Indemnitees" is defined in Section 10.

"Map" means the final Subdivision Map for the Property that will be recorded in the Official Records.

"Market-Rate Units" means the residential units to be constructed within the Project that are not Restricted Units.

"Official Records" means the Official Records of the Riverside County Recorder.

"Performance Deed of Trust" means the Performance Deed of Trust and Assignment of Rents, that each purchaser of a Restricted Unit will be required to execute for the benefit of City to secure the homebuyer obligations under the Resale Restriction Agreement and the Excess Proceeds Note. The Performance Deed of Trust will be in a form approved by City, and will be recorded in the Official Records at the closing for the sale of each Restricted Unit.

"Project" is defined in Recital B.

"Property" is defined in Recital A.

"**Resale Restriction Agreement**" means the Affordable Housing Resale Restriction Agreement and Option to Purchase that each purchaser of a Restricted Unit will be required to execute at the closing for the purchase of the Restricted Unit. The Resale Restriction Agreement shall be in a form approved and executed by City, and will be recorded in the Official Records against the Restricted Unit at the closing for the sale of the Restricted Unit.

"Restricted Units" means the four (4) residential units to be constructed within the Project that are required to be sold at Affordable Sales Price to Eligible Purchasers pursuant to this Agreement.

"Site Plan" means the site plan for the Project approved by the City Council in conjunction with its approval of the Project and attached hereto as Exhibit B. The Site Plan depicts the location of the Restricted Units.

"Very Low Income Household" means a household income that does not exceed the qualifying limit of AMI for very low income families for Riverside County, adjusted for Actual Household Size, as established and amended from time to time pursuant to Section 8 of the United States Housing Act of 1937 and published by the California Department of Housing and Community Development in the California Code of Regulations.

3. Compliance with Conditions of Approval. Developer shall construct the Project in accordance with plans approved by City, and shall satisfy all Conditions of Approval, including without limitation, all contingencies regarding the issuance of permits, entitlements, and certificates of occupancy for the Project, which shall remain in full force and effect and unmodified by this Agreement. Developer shall comply with the Density Bonus Law by selling four (4) residential units developed within the Project to Eligible Households at Affordable Sales Prices in accordance with the terms of this Agreement.

4. Restricted Units, Income Categories. Developer hereby covenants and agrees for itself and its successors and assigns, that all of the Restricted Units shall be sold to Eligible Households at Affordable Sales Price in accordance with this Agreement. The Restricted Units shall consist of four (4) three-bedroom units and shall be restricted for sale at Affordable Sales Prices to Eligible Purchasers that qualify as Very Low Income Households. Developer agrees for itself and its successors and assigns to give priority to Eligible Households that currently reside in the City of Eastvale in the purchase of the Restricted Units, to the extent permissible under applicable state and federal laws and regulations. In connection with the sale of each Restricted Unit, the City and the homebuyer will execute a Resale Restriction Agreement that will be recorded against the Restricted Unit, the homebuyer will be obligated to execute and deliver to City an Excess Proceeds Note, and the homebuyer will be obligated to execute a Performance Deed of Trust that will be recorded against the Restricted Unit. Among other requirements, the Resale Restriction Agreement for each Restricted Unit shall provide that the Restricted Unit must be occupied as the homebuyer's principal residence. Developer shall not sell or transfer any Restricted Unit unless and until the documents described above are executed and approved by City.

5. Phasing; Location; Amenities. The Restricted Units shall be constructed and made available for sale to Eligible Households concurrently with the Market-Rate Units throughout the construction of the Project. The Restricted Units shall not be concentrated in one location within the Project, but instead shall be dispersed throughout the Project, and shall be located as shown on the Site Plan. The Restricted Units shall be comparable to the Market-Rate Units in the Project in their appearance, materials, and exterior and interior finishes, appliances, and fixtures. The Restricted Units must contain dishwashers, refrigerators, garbage disposals, cooking facilities, and laundry facilities. The City shall have the right to inspect the Restricted Units to determine whether they have been constructed in accordance with this Section. Residents of Restricted Units shall have access to all Project amenities and recreational facilities available to residents of the Project's Market-Rate Units.

6. Recordation of Agreement; Term**.** This Agreement shall be recorded against the Property in the Official Records promptly following its execution by all Parties, and as a condition precedent to the recordation of a final subdivision map for the Property. This Agreement shall remain effective and fully binding regardless of any sale, assignment, transfer, or conveyance of the Property or the Project or any part thereof or interest therein, and shall remain in effect until all Restricted Units have been sold at Affordable Sales Prices to Eligible Households in accordance with this Agreement.

7. No Subordination. Developer hereby represents, warrants and covenants that with the exception of easements of record, absent the written consent of City which City may grant or withhold in the exercise of its sole discretion, this Agreement shall not be subordinated in priority to any lien (other than those pertaining to taxes or assessments), encumbrance, or other interest in the Property or the Project. If at the time this Agreement is recorded, any interest, lien, or encumbrance has been recorded against the Project in position superior to this Agreement, upon the request of City, Developer hereby covenants and agrees to promptly undertake all action necessary to clear such matter from title or to subordinate such interest to this Agreement consistent with the intent of and in accordance with this Section 7, and to provide such evidence thereof as City may reasonably request.

8. Binding on Successors; Covenants Run with the Land. Developer hereby subjects the Property to the covenants and restrictions set forth in this Agreement. The Parties hereby declare their express intent that the covenants and restrictions set forth herein shall be deemed covenants running with the land pursuant to California Civil Code §1468, and subject to the provisions of Section 9 below, shall be binding upon and inure to the benefit of the respective heirs, administrators, executors, successors in interest, transferees, and assigns of Developer and City, regardless of any sale, assignment, conveyance or transfer of the Property or any part thereof or interest therein. So long as this Agreement remains of record, any conveyance of the Property shall be conclusively held to have been delivered and accepted subject the requirements set forth in this Agreement, without regard to whether any party to such transaction has actual knowledge of the restrictions hereof. The burden of this Agreement touches and concerns each of the Restricted Units, the Project and the Property in that the restrictions set forth herein may render the owner's interest therein less valuable, and they enhance and increase the enjoyment and use of the Project, the Property and the Restricted Units by Eligible Purchasers who will benefit from such covenants and restrictions. Developer agrees for itself and for its successors that in the event that a court of competent jurisdiction determines that the covenants herein do not run with the land, such covenants shall be enforced as equitable servitudes against the Property in favor of City.

9. Reconveyance. Concurrently with the sale of each Restricted Unit to an Eligible Purchaser and recordation of the Resale Restriction Agreement and the Performance Deed of Trust, the Parties shall execute and record appropriate instruments to release and reconvey this Agreement as to such Restricted Unit. Such instrument shall be deposited with the escrow holder with instructions to record it concurrently with the close of escrow for the sale of the Restricted Unit to the Eligible Purchaser. Upon the sale of all Restricted Units, this Agreement shall terminate, and Developer shall be released from all obligations hereunder except those that expressly survive termination. Nothing contained herein shall terminate Developer's obligations if any, with regard to the construction and quality of the Restricted Units, which obligations shall survive the sale of the Restricted Units and shall terminate only as provided by law.

10. Hold Harmless and Indemnification. To the greatest extent permitted by law, Developer will indemnify, defend (with counsel approved by City) and hold harmless City and its elected and appointed officials, officers, employees, agents, consultants, contractors, and board members (all of the foregoing, collectively the "**Indemnitees**") from and against all liability, loss, cost, expense (including without limitation attorneys' fees and costs of litigation), claim, demand, action, suit, judicial or administrative proceeding, penalty, deficiency, fine, order, and damage

(all of the foregoing collectively "**Claims**") arising directly or indirectly, in whole or in part, as a result of or in connection with or relating in any manner to the Property, the Project, the Restricted Units, or Developer's performance or non-performance under this Agreement, except to the extent arising from the gross negligence or willful misconduct of the Indemnitees. The provisions of this Section shall survive the expiration or other termination of this Agreement and the release of part or all of the Property from the burdens of this Agreement.

11. Default; Remedies. In the event of any breach of this Agreement, the non-defaulting Party shall provide written notice of default to the Party in default. If the default is not cured within thirty (30) days after delivery of such notice, then the non-defaulting Party shall have the right to take legal or other action to enforce this Agreement, including without limitation, bringing an action for equitable relief seeking the specific performance of the terms and conditions of this Agreement, and/or enjoining, abating, or preventing any violation of such terms and conditions, and/or seeking declaratory relief or damages. Each of the remedies provided herein is cumulative and not exclusive, and each Party may exercise from time to time any rights and remedies available to it under applicable law or in equity, in addition to, and not in lieu of, any rights and remedies expressly provided in this Agreement.

12. Fair Housing; Non-Discrimination. Developer shall comply with all applicable State and federal fair housing laws in the marketing and sale of all residential units in the Project. Developer shall not restrict the rental, sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Property, the Project, or any portion thereof, on the basis of race, color, religion, creed, sex, sexual orientation, disability, actual or perceived gender identity, marital status, ancestry, or national origin of any person. Developer covenants for itself and all persons claiming under or through it, and this Agreement is made and accepted upon and subject to the condition that there shall be no discrimination against or segregation of any person or group of persons on account of any basis listed in subdivision (a) or (d) of Section 12955 of the Government Code, as those bases are defined in Sections 12926, 12926.1, subdivision (m) and paragraph (1) of subdivision (p) of Section 12955, and Section 12955.2 of the Government Code, in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Property or part thereof, nor shall Developer or any person claiming under or through Developer establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees or vendees in, of, or for the Property or part thereof. Developer shall include such provision in all deeds, leases, contracts and other instruments executed by Developer, and shall enforce the same diligently and in good faith.

13. Mortgagee Protection. No violation of any provision contained herein shall defeat or render invalid the lien of any mortgage or deed of trust made in good faith and for value upon all or any portion of the Project or the Property, and the purchaser at any trustee's sale or foreclosure sale shall not be liable for any violation of any provision hereof occurring prior to the acquisition of title by such purchaser. Such purchaser shall be bound by and subject to this Agreement from and after such trustee's sale or foreclosure sale.

14. Miscellaneous.

14.1 Notices. Except as otherwise specified herein, all notices to be sent pursuant to this Agreement shall be made in writing, and sent to the Parties at their respective addresses specified below or to such other address as a Party may designate by written notice delivered to the other parties in accordance with this Section. All such notices shall be sent by: (i) personal delivery, in which case notice is effective upon delivery; (ii) certified or registered mail, return receipt requested, in which case notice shall be deemed delivered upon receipt if delivery is confirmed by a return receipt; or (iii) nationally recognized overnight courier, with charges prepaid or charged to the sender's account, in which case notice is effective on delivery if delivery is confirmed by the delivery service.

City:

14.2 No Third-Party Beneficiaries. This Agreement is not intended to be for the benefit of any person other than the Parties and their permitted successors and assigns.

14.3 Attorneys' Fees. If any legal or administrative action is brought to interpret or enforce the terms of this Agreement, the prevailing party shall be entitled to recover all reasonable attorneys' fees and costs incurred in such action, including without limitation, attorneys' fees attributable to City's in-house counsel based upon comparable fees of private attorneys practicing in Riverside County.

14.4 Amendments. This Agreement may be amended, changed, or modified only by an agreement in writing signed by the Parties or their respective permitted successors and recorded in the Official Records.

14.5 No Waiver. Any waiver of any term or provision of this Agreement must be in writing. No waiver shall be implied from any delay or failure by a Party to take action on any breach or default hereunder or to pursue any remedy allowed under this Agreement or applicable law. No failure or delay by a Party at any time to require strict performance of any provision of this Agreement or to exercise any election contained herein or any right, power or remedy hereunder shall be construed as a waiver of any other provision or any succeeding breach of the same or any other provision hereof or a relinquishment for the future of such election.

14.6 Severability. If any provision of this Agreement is held by a court of competent jurisdiction to be invalid or illegal, such invalidity or illegality shall not affect, impair or

invalidate any other provision hereof, and such remaining provisions shall remain in full force and effect.

14.7 Headings; Interpretation. The captions used in this Agreement are for convenience only and shall not be considered in the construction or interpretation of any provision hereof. Unless expressly stated otherwise, each reference to a particular Section of this Agreement shall mean all subsections and subparagraphs of such Section. The language of this Agreement shall be construed as a whole according to its fair meaning and not strictly for or against any Party, notwithstanding the drafting of the Agreement by any Party or Party's representative. All references in this Agreement to particular statutes, regulations, ordinances or resolutions of the United States, the State of California, or the City of Eastvale shall be deemed to include the same statute, regulation, ordinance or resolution as hereafter amended or renumbered, or if repealed, to such other provisions as may thereafter govern the same subject.

14.8 Governing Law and Venue. This Agreement shall be construed and enforced in accordance with the laws of the State of California without regard to principles of conflicts of law. Any action to enforce or interpret this Agreement shall be filed and heard in the Superior Court of Riverside County, California or in the Federal District Court for the Central District of California.

14.9 Authority. Each person executing this Agreement on behalf of a Party represents warrants that he or she has the actual authority to execute and deliver the Agreement on behalf of such Party and that the Agreement is binding on such Party.

14.10 Entire Agreement; Exhibits. This Agreement, together with the Conditions of Approval, contains the entire agreement of Parties with respect to the subject matter hereof, and supersedes all prior oral or written agreements with respect thereto. Exhibits A through C attached hereto are incorporated herein by this reference. The Parties each acknowledge and agree that they have not relied on any representations of the other Parties or their representatives, except to the extent that such representations are expressly set forth herein.

14.11 Further Assurances. Each Party shall execute, acknowledge and deliver to the other Parties such other documents and instruments, and take such other actions, as either shall reasonably request as may be necessary to carry out the intent of this Agreement

14.12 Parties Not Co-Venturers; No Agency Relationship. Nothing in this Agreement is intended to or shall establish the Parties as partners, co-venturers, or principal and agent with one another. The relationship of the Parties shall not be construed as a joint venture, equity venture, partnership or any other relationship. City neither undertakes nor assumes any responsibility or duty to Developer (except as expressly provided in this Agreement) or to any third party with respect to the Project. Developer and its agents and employees shall at no time pretend to be or hold themselves out as employees or agents of City, and Developer shall have no authority to act as an agent or to bind City to any obligation.

14.13 Action by the City. Whenever action and/or approval by City is required under this Agreement, such action or approval shall be in writing, and the City's Authorized Representative or his or her designee may act on and/or approve such matter unless specifically

provided otherwise, or the City's Authorized Representative determines in his or her discretion that such action or approval requires referral to City Council for consideration.

14.14 Non-Liability of City and City Officials, Employees and Agents. No member, official, employee or agent of the City shall be personally liable to Developer or any successor in interest, in the event of any default or breach by the City, or for any amount of money which may become due to Developer, or their respective successors, or for any obligation of City under this Agreement.

14.15 Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be an original and all of which together shall constitute one agreement.

RESTRICTED UNIT SALE PRICES

	Affordable Sales Price Very Low Income Households Fiscal Year 2024 - 2025
3-Bedroom	**$103,000.00**

The Affordable Sales Price is based upon Area Median Income for the applicable household income category, the unit size, and an affordability percentage. These figures are combined with an estimated total housing payment. Pricing applies to homes sold within the specified fiscal year. Pricing is subject to change.

RESOLUTION NO. 25-____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF EASTVALE, CALIFORNIA, APPROVING THE DENSITY BONUS AGREEMENT, VESTING TENTATIVE TRACT MAP NO. 39022, AND THE MASTER SITE PLANNING AND ARCHITECTURE OF A 76 UNIT SINGLE FAMILY RESIDENTIAL COMMUNITY, WITH PARKING AREAS, LANDSCAPING, AND OPEN SPACE LOCATED AT THE SOUTHEAST CORNER OF ARCHIBALD AVENUE AND GRAPEWIN STREET. ASSESSORS PARCEL NUMBERS 130-070-021, 130-070-015, AND 130-080-004.

WHEREAS, the Planning Department of the City of Eastvale received an application (PLN24-20053) on June 27, 2024, from Warmington Residential California, Inc. (the "Applicant") requesting approval of Vesting Tentative Tract Map 39022 , Major Development Review, and a density bonus agreement to allow for the construction of a new 76-unit single family residential community, four (4) of which are proposed as onsite very low-income affordable units with associated parking areas, landscaping, and open space (the "Project"); and

WHEREAS, the proposed project (Project No. PLN24-20053) is considered a "Project" as defined by the California Environmental Quality Act, Public Resources Code Section 21000 et seq.; and

WHEREAS, review of the proposed project with respect to the proposed uses was evaluated in a Section 15183 Exemption Report and the General Plan Environmental Impact Report (State Clearinghouse No.2022080090), because the implementation of the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR, no additional environmental review beyond a Section 15183 Exemption Report is necessary; however, a Notice of Exemption will be filed following any action taken on the project; and

WHEREAS, the Housing Accountability Act (HAA) provides that "a proposed housing development project is not inconsistent with the applicable zoning standards and criteria, and shall not require a rezoning, if the housing development project is consistent with the objective general plan standards and criteria but the zoning for the project site is inconsistent with the general plan." In such cases, the local agency may require the proposed housing development project to comply with the objective standards and criteria of the zoning district that is consistent with the general plan; and

WHEREAS, the R-1 (One Family Dwelling) zoning designation is consistent with the General Plan land use designation for the property of Single-Family Low and the objective standards and criteria applicable within the R-1 district will apply to the project; and

WHEREAS, the applicant has filed for a 20% Density Bonus per Section 120.05.090(b)(2) and (d)(1)(b) of the Eastvale Municipal Code by setting aside at least five percent (5%) of the total units before the density bonus is granted within the project for very-low income households. The

California Density Bonus law (Government Code section 65915) allows developers whose projects qualify for a density bonus to request the city waive any development standards that "will have the effect of physically precluding the construction" of the project at the density permitted by the Density Bonus Law; and

WHEREAS, the applicant proposes setting aside 4 of the maximum 66 units permitted under the general plan density for the 8.3 acre site (approximately 6% of the units) for purchase by very low income households, making the project eligible for a 20% increase in density, or up to 80 units on the 8.3 acre site, though the developer is proposing 76 units. The developer has requested eleven development standard waivers (i.e., lot size, lot width, lot depth, side interior setback, side street setback, fence height, street width, Residential Design Guideline No. 7); and

WHEREAS, the State Density Bonus law does not provide the City with discretion to deny a density bonus request if that request is consistent with the requirements of the State Density Bonus law, and a request to waive development standards that physically preclude the construction of the project can only be denied if "the waiver or reduction would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact"; and

WHEREAS, on March 9, 2025, the City of Eastvale City Clerk published a legal notice in compliance with state law concerning PLN24-20053 in the *Press Enterprise*, a local newspaper of general circulation, regarding the Planning Commission meeting on March 19, 2025. In addition, on March 6, 2025, a public hearing notice was also mailed to commercial tenants and residents within a 600-foot radius of the projects site indicating time, date, and place of the public hearing for PLN24-20053; and

WHEREAS, the City of Eastvale Planning Commission conducted a duly noticed public hearing on March 19, 2025, at which time it received public testimony concerning Project No. PLN24-20053 and recommended the Eastvale City Council approve the proposed Vesting Tentative Tract Map, Major Development Review for the master site planning and architecture of the Project and Density Bonus Agreement; and

WHEREAS, on April 13, 2025, the City of Eastvale City Clerk published a legal notice in compliance with state law concerning PLN24-20053 in the *Press Enterprise*, a local newspaper of general circulation, regarding the City Council meeting on April 23, 2025. In addition, on April 10, 2025, a public hearing notice was also mailed to commercial tenants and residents within a 600-foot radius of the projects site indicating time, date, and place of the public hearing for PLN24-20053; and

WHEREAS, the City of Eastvale City Council conducted a duly noticed public hearing on April 23, 2025, at which time it received public testimony concerning Project No. PLN24-20053 and voted 5-0 to continue Project No. PLN24-20053 to the regularly scheduled May 28, 2025, City

Council meeting to allow staff additional time to evaluate potential health and safety concerns; and

WHEREAS, THE City of Eastvale City Council conducted a duly noticed public hearing on May 28, 2025, at which time it received public testimony concerning Project No. PLN24-20053 and considered the proposed Vesting Tentative Tract Map, Major Development Review for the master site planning and architecture of the Project and Density Bonus Agreement.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF EASTVALE, DOES HEREBY FIND, DETERMINE, AND RESOLVE AS FOLLOWS:

SECTION 1. ENVIRONMENTAL FINDINGS

Pursuant to the California Environmental Quality Act, including Public Resources Code Sections 21080(e) and 21082.2, and based on the record and/or as provided at the public hearing, the City Council hereby finds and determines that the project was adequately analyzed according to the CEQA Guidelines, as supported by the following Findings and Evidence:

Finding 1: The proposed project is exempt from further environmental review requirements.

Evidence: Pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15183, because implementation of the proposed project would not result in impacts that are peculiar to the project site and the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR (SCH # 2022080090), no additional environmental review beyond a Section 15183 Exemption Report is required for the proposed project. A Section 15183 Exemption Report was prepared for the project supporting this conclusion, a copy of which is included in the record for this project and incorporated herein by reference. As such, no further CEQA documentation would be warranted for the proposed project pursuant to CEQA Guidelines Section 15183.

SECTION 2. FINDINGS FOR VESTING TENTATIVE TRACT MAP NO. 39022

Pursuant to Eastvale Subdivision Ordinance No. 460, the staff report dated May 28, 2025, and all evidence and testimony heard at the public hearing of this item, the City Council hereby finds and determines as follows:

Finding 1: Vesting Tentative Tract Map No. 39022 is consistent with the City's General Plan and any applicable specific plan as specified in Government Code Section 65451.

Evidence: The proposed project and its design and improvements will be consistent with the Single-Family Low designation of the General Plan and are otherwise consistent with all other elements of the General Plan and any applicable specific plans. The proposed subdivision of land will create 76 single family residential lots, four (4)

open space lots for water quality purposes, and five (5) lots for private street purposes consistent with the various provisions of the General Plan. While 76 units exceeds the density permitted on the site under the General Plan, the project is utilizing the State of California's Density Bonus Law to allow for an increase in density of up to a twenty percent (20%) . The maximum unit yield for the 8.3-acre site using the Single-Family Low General Plan density and the State density bonus is 80 units, and the applicant is proposing to develop 76 units on the site; therefore, the Vesting Tentative map reflects the allowable density under Density Bonus Law.

Finding 2: The design or improvement of the proposed subdivision is consistent with the City's General Plan and any applicable specific plan.

Evidence: The proposed project is designed to meet all City standards applicable to residential development within the Single-Family Low land use designation and R-1 zoning district, except where a waiver is being granted pursuant to the State Density Bonus law, including street widths, drainage, utilities, lot size and configuration, grading, required dedications and providing satisfactory pedestrian and vehicular circulation, emergency vehicle access and on- and off-site public improvements.

Finding 3: The site is physically suitable for the type and proposed density of development.

Evidence: The site is physically suitable for the type and density of the proposed development. The proposed site consists of approximately 8.3-acres of land and is physically suitable for the proposed development, where access to the site will be from Archibald Avenue. The current General Plan land use designation of the project site is Single-Family Low, which applies to residential areas characterized by single-family housing. The General Plan density would allow up to 8 dwelling units per acres (du/ac). The proposed density is 9.16 du/ac, which would be permitted through Density Bonus Law through a separate density bonus agreement. The proposed density is below the Density Bonus Law provisions in the California Density Bonus Law for low-income projects (20-percent density bonus) which allows 9.64 du/ac on the project site. The applicant has submitted a conceptual development plan which illustrates that single-family dwelling units can be constructed on this 8.3-acre site without adversely affecting the health, safety, or welfare of anyone who will live within the development or anyone living within the surrounding community. Further, the infrastructure and utilities either already serve the site or can be readily expanded to serve the site, and there are no intractable topographical peculiarities associated with the physical character of the property that may prevent the development of seventy-six (76) lots with single family dwellings, four (4) for water quality purposes and five (5) for private street purposes.

Finding 4: The design of the subdivision or proposed improvements is not likely to cause significant environmental damage or substantially and avoidably injure fish or wildlife or their habitat.

Evidence: A Biological Resources assessment dated January 2025 and Western Riverside County MSHCP Consistency Determination dated January 31, 2025, were prepared for the proposed project. In said documents no sensitive vegetation communities, potentially jurisdictional areas, special-status plant species or MSHCP riparian/riverine areas were observed on site. Further no Burrowing Owel were observed. Several special-status wildlife species were audibly detected both on and off site and six special-status wildlife species have a low potential to occur and were not observed on site. However, site development conditions such as biological resource monitoring, preconstruction nesting bird surveys, preconstruction Burrowing Owl surveys, Kangaroo Rat Mitigation Fees, and implementing best management practices were identified and conditioned on the project to avoid or mitigate any potential significant effects on the environment to a point below the threshold of significance. As conditioned, the project will not have a significant effect on the environment or substantially and avoidably injure fish or wildlife or their habitat.

Finding 5: The design of the subdivision or type of improvements is not likely to cause serious public health problems.

Evidence: The design of the subdivision is in conformance with the City's General Plan, Zoning Code, and Subdivision Ordinance to the extent permitted under the HAA and State Density Bonus Law. Accordingly, the subdivision and improvements will comply with all applicable local, state, and federal laws to ensure the public's general health, safety, and welfare.

Finding 6: The design of the subdivision or the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision.

Evidence: The design of the subdivision and type of improvements will not conflict with easements, acquired by the public at large, for access through or use of the property within the proposed subdivision. Upon review of the project by the Engineering Division, there is no, known conflict with any easements, or right-of-ways an all in-tract streets are to be private streets with access easements for emergency personnel only.

SECTION 3. FINDINGS FOR MAJOR DEVELOPMENT REVIEW PLN24-20053

Pursuant to Section 120.02.010(c)(6) of the Eastvale Municipal Code, and in light of the record before it, including the staff report dated May 28, 2025, and all evidence and testimony heard at the public hearing of this item, the City Council hereby finds and determines as follows:

Finding 1: The proposed project is consistent with the objectives of the general Plan and complies with applicable zoning regulations, specific plan provisions, special planning area provisions, design guidelines, and improvement standards adopted by the city.

Evidence: The General Plan land use designation of the proposed site is Single Family-low. The Single Family-Low land use designation allows for the development of single-family residential development with a maximum density of eight (8) dwelling units per acre. Therefore, the proposed project would be consistent with the General Plan designation for the site with the application of State Density Bonus Law and will further the objectives of the General Plan. Finally, the proposed project would be consistent with the surrounding area and is consistent with the General Plan and Zoning to the extent permittable under the provisions of the HAA and State Density Bonus law.

Finding 2: The proposed architecture, site design, and landscape are suitable for the purposes of the building and site and will enhance the character of the neighborhood and community.

Evidence: The proposed project has been designed to conform to the logical pattern of development as envisioned by the Eastvale General Plan and has been designed to satisfy the General Plan design policies. The project has been designed with high-quality urban design, architecture and landscaping that includes landscape streetscapes, three architectural styles (i.e., Cottage, Farmhouse, Monterey), and connectivity between existing street networks for pedestrian and bicyclists. Finally, the project has been designed to meet the requirements and development standards of the Eastvale Zoning Code to the extent permitted under the HAA and State Density Bonus law. For these reasons, the proposed project, as conditioned will enhance the character of the neighborhood and community.

Finding 3: The architecture, including the character, scale, and quality of design, relationship with the site and other buildings, building materials, colors, screening of exterior appurtenances, exterior lighting, and signing and similar elements, establishes a clear design concept and is compatible with the character of buildings on adjoining and nearby properties.

Evidence: The architectural theme of the proposed single-family residential units are consistent with the surrounding neighborhoods in terms of character, scale, and quality to the extent allowed under the HAA and State Density Bonus law. These standards focus on high quality design and articulation to provide visual interest

and variety. The buildings include board and batten, shutters, flower boxes, decorative vents and exterior lights as examples of variation of materials designed to complement the exterior plaster and building finishes. Thus, the proposed design is consistent with the Eastvale Zoning Code and the General Plan.

Finding 4: The proposed project will not create conflicts with vehicular, bicycle, or pedestrian transportation modes of circulation.

Evidence: The proposed project is conditioned to ensure adequate circulation to and from the site. All streets have been designed to handle the type and quantity of vehicular traffic associated with the proposed project. As conditioned, the project will include sidewalks and pedestrian and bicycle connections that will not create conflicts with motorized vehicles. Finally, the City Engineer, Riverside County Sheriff's, and Fire Department have reviewed the proposed project access and on-site circulation design and do not have any concerns.

Finding 5: The proposed project is consistent with the most recently adopted version of the Chino Airport Land Use Compatibility Plan.

Evidence: The project site is not within the Chino Airport Influence Area.

SECTION 4. STATE DENSITY BONUS LAW

Pursuant to Section 120.05.090 of the Eastvale Municipal Code and the State Density Bonus law, and in light of the record before it, including the staff report dated May 28, 2025, and all evidence and testimony heard at the public hearing of this item, the City Council hereby finds and determines that the project as proposed satisfies the eligibility criteria for a 20% density increase by setting aside at least 5% of the units permitted prior to the density bonus for very-low income households, and that the requested development standard waivers would not have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact.

SECTION 5. MULTIPLE SPECIES HABITAT CONSERVATION PLAN (MSHCP)

The project is found to be consistent with the MSHCP. The project is located outside of any MSHCP criteria area, and mitigation is provided through payment of the MSHCP Mitigation Fee.

SECTION 6. RECORD OF PROCEEDING

The documents and other materials that constitute the record of the proceedings upon which the City Council's decision is based, which include but are not limited to the staff reports as well as all materials that support the staff reports for the proposed project, are located in the

City Clerk's office of the City of Eastvale at 12363 Limonite Avenue, Suite 910, Eastvale, CA 91752. The custodian of these documents is the City Clerk of the City of Eastvale.

SECTION 7. DETERMINATION

Based upon the findings outlined in Sections 1 through 5, the City Council of the City of Eastvale hereby approves PLN24-20053, the density bonus agreement between the City and applicant, Vesting Tentative Tract Map 39022 to subdivide three (3) existing residential lots totally 8.3 acres (7.9 net acres) into 76 single family residential lots with four (4) of the residential units proposed as affordable to very-low income, four (4) lots for water quality and open spaces purposes, and five (5) lots for private street purposes as well as the master site planning and architecture of the new residential community inclusive of parking, landscaping, and open space for the project site located at 8312 Grapewin and 8330 Archibald Avenue.

PASSED, APPROVED AND ADOPTED this 28th day of May, 2025.

CONDITIONS OF APPROVAL
Planning Application Number and Description: Project No. 24-20053 – Vesting Tentative Tract Map No. 39022 allows to subdivide three (3) existing residential lots totaling 8.3- acres (7.9 net acres) into 76 residential lots, four (4) for water quality and open space purposes and five (5) for private street purposes. The project site is located at 8312 Grapewin Street and 8330 Archibald Avenue.
Assessor's Parcel Numbers: 130-070-021, 130-070-015, and 130-080-004
City Council Approval Date:

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
General Conditions				
1.	The applicant shall review and sign below verifying the "Acceptance of the Conditions of Approval" and return the signed page to the Eastvale Planning Department. Project approval is not final until a signed copy of these conditions is filed with the City. Applicant Signature Date	Must be completed to finalize approval	Planning Division	
2.	In compliance with Section 15075 of the California Environmental Quality Act (CEQA) Guidelines, a Notice of Determination (NOE) shall be filed with the Riverside County Clerk within five (5) days of project approval. The NOE shall include the required California Department of Fish and Wildlife (CDFW) (Code Section 711.4.d.3) fee and the Riverside County Clerk administrative fee.	Five (5) days from project approval	Planning Division	
3.	The applicant shall indemnify, protect, defend, and hold harmless the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, from any and all claims, demands,	Ongoing	Planning Division	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	law suits, writs of mandamus, and other actions and proceedings (whether legal, equitable, declaratory, administrative or adjudicatory in nature), and alternative dispute resolutions procedures (including but not limited to arbitrations, mediations, and other such procedures) (collectively "Actions"), brought against the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, that challenge, attack, or seek to modify, set aside, void, or annul any action of, or any permit or approval issued by, the City and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof (including actions approved by the voters of the City), for or concerning the project, whether such Actions are brought under CEQA, the Planning and Zoning Law, the Subdivisions Map Act, Code of Civil Procedure Section 1085 or 1094.5, or any other state, federal, or local statute, law, ordinance, rule, regulation, or any decision of a court of competent jurisdiction. It is expressly agreed that the City shall have the right to approve, which approval will not be unreasonably withheld, the legal counsel providing the City's defense and that applicant shall reimburse City for any costs and expenses directly and necessarily incurred by the City in the course of the defense. City shall promptly notify the applicant of any Action brought and City shall cooperate with applicant in the defense of the Action.			
4.	Vesting Tentative Tract Map 39022 is granted for a period of two years, until **May 28, 2027**, at which time said Map shall expire unless prior to the expiration date, either the final map has recorded or a written request for time extension, accompanied by the appropriate fee, is received by the	Ongoing	Public Works Department

Conditions of Approval		Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
11.	Remove all graffiti within 24 hours pre-construction, during construction, and after a Certificate of Occupancy is issued.	Ongoing	Public Works Department	
12.	Provide street sweeping services for onsite and offsite within project frontages weekly.	Ongoing	Public Works Department	
13.	A City of Eastvale Encroachment Permit is required for any improvements within the public right-of-way.	Ongoing	Public Works Department	
14.	All street cuts for utilities shall be repaired in accordance with City Standard or as recommended; and any interim trench repairs shall consist of compacted backfill to the bottom of the pavement structural section followed by placement of standard base course material in accord by the City Engineer and with the Standard Specifications for Public Work Construction ("Greenbook"). The base course material shall be placed the full height of the structural section to be flush with the existing pavement surface and provide a smooth pavement surface until permanent cap paving occurs using an acceptable surface course material.	Ongoing	Public Works Department	
15.	In accordance with City's Moratorium policy to preserve newly paved streets, any and all street and/or trench cuts in newly paved streets will be prohibited or be subject to moratorium street repair standards as reference in Section 12.08.260 of the Eastvale Municipal Code.	Ongoing	Public Works Department	
16.	Any and all utility trenches or other excavations within existing asphalt concrete pavement of off-site streets resulting from the proposed development shall be backfilled and repaired in accordance with City of Eastvale Standard	Ongoing	Public Works Department

	Drawings. The developer shall be responsible for removing, grinding, paving and/or overlaying existing asphalt concrete pavement of off-site streets including pavement repairs in addition to pavement repairs made by utility companies for utilities installed for the benefit of the proposed development (i.e. Jurupa Community Services District, Southern California Edison, Southern California Gas Company, Time Warner, Verizon, etc.). Multiple excavations, trenches, and other street cuts within existing asphalt concrete pavement of off-site streets resulting from the proposed development may require complete grinding and asphalt concrete overlay of the affected off-site streets, at the discretion of the City Engineer. The pavement condition of the existing off-site streets shall be returned to a condition equal to or better than what existed prior to construction of the proposed development.			
17.	Construction signing, lighting and barricading shall be provided during all phases of construction in accordance with City Standards and the direction of the City Engineer. As a minimum, all construction signing, lighting and barricading shall be in accordance with Part 6 "Temporary Traffic Control" of the latest California Manual on Uniform Traffic Control Devices, or subsequent editions in force at the time of construction.	Ongoing	Public Works Department	
18.	If human remains are encountered, California Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the county coroner has made the necessary findings as to origin. Further, pursuant to California Public Resources Code Section 5097.98(b), remains shall be left in	Ongoing	Planning Division	

DRAFT

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	place and free from disturbance until a final decision as to the treatment and disposition has been made. Following discovery and during assessment of the remains, work will be diverted at least 50 feet from the burial. The discovery shall be kept confidential, and secure to prevent disturbance. If left overnight, remains will be covered with a muslin cloth and steel plate over the excavation to protect the remains. If this method of protection is not feasible, a guard will be posted. If the Riverside County coroner determines the remains to be of Native American origin, the NAHC must be contacted by the coroner within 24 hours of the coroner's determination. The NAHC must then immediately identify the most likely descendants(s) for purposes of receiving notification of discovery. The most likely descendant(s) shall then make recommendations within 48 hours from the time that site access is granted and engage in consultation concerning the treatment of the remains as provided in Public Resources Code Section 507.98.			
19.	If cultural resources are encountered during ground-disturbing activities, work in the immediate area shall cease and an archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for Archaeology shall be contacted immediately to evaluate the find(s). If the discovery proves to be significant under the California Environment Quality Act, additional work such as data	Ongoing	Planning Division

	recovery excavation may be warranted and shall be reported to the City.			
20.	To ensure consistency with the goals and objectives of the Western Riverside County MSHCP, the proposed project will adhere to MSHCP Appendix C, Standard Best Management Practices.	To be Implemented by the Applicant During Construction	Planning Division	
21.	The project shall comply with all recommendations contained in the project-specific Geotechnical Evaluation.	Ongoing	Planning Division	
22.	A water system (residential hydrants with one 4" outlet and on 2-1/2" outlets) capable of delivering the required fire flow shall be provided in accordance with Appendix B and C of the California Fire Code shall be provided. On-site water supply must be available before any combustible materials is place on the construction site. No portion of a building can be more than 600 feet from a hydrant.	Ongoing	Riverside County Fire Department	
23.	Parking is not permitted on fire apparatus access roads that are less than 32 feet in width. Parking on one side is permitted on a road that is at least 32 feet but less than 40 feet in width. Parking on two sides is permitted on a road that is 40 feet or more in width.	Ongoing	Riverside County Fire Department	
24.	Fire apparatus access roads shall be constructed with a surface to provide all-weather driving capabilities during	Ongoing	Riverside County Fire Department	

DRAFT

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	construction. See Riverside County Fire Department Guideline OFM-01A, Section 9.			
25.	Dead-end fire apparatus access roads more than 150 feet in length shall be provided with an approved area for turning around fire apparatus.	Ongoing	Riverside County Fire Department	
26.	Traffic Calming Devices are prohibited. Requests for installation of traffic calming design devices on fire apparatus access roads shall be submitted and approved by the Office of the Fire Marshal. Reference CFC 503.4.1.	Ongoing	Riverside County Fire Department	
27.	An approved source of water for firefighting and fire apparatus access roads, complying with Riverside County Fire Department Guideline OFM-01B and Riverside County Fire Department Guideline OFM-01A, shall be established and inspected by Riverside County Fire Department prior to building permit issuance	Ongoing	Riverside County Fire Department	
28.	The protocols and stipulations that the contractor, City, consulting tribe(s), and project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation, include the following. 1. During the original cutting of previously undisturbed deposits, the archaeological and tribal monitors (if applicable) shall be on-site, as determined by the	To be Implemented by the Applicant During Construction	Planning Division	

DRAFT

Conditions of Approval		Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	consulting archaeologist, to monitor excavations. The frequency of inspections will depend upon the rate of excavation, the materials excavated, and the presence and abundance of artifacts and features. The consulting archaeologist shall have the authority to modify the monitoring program if the potential for cultural resources appears to be less than anticipated. 2. Isolates and clearly non-significant deposits will be minimally documented in the field so the monitored grading can proceed. 3. In the event that previously unidentified cultural resources are discovered, the archaeologist shall have the authority to divert or temporarily halt ground disturbance operation in the area of discovery to allow for the evaluation of potentially significant cultural resources. The archaeologist shall contact the City at the time of discovery. The archaeologist, in consultation with the City, shall determine the significance of the discovered resources. The City must concur with the evaluation before construction activities will be allowed to resume in the affected area. For significant cultural resources, a research design and data recovery program to mitigate impacts shall be implemented by the consulting archaeologist and approved by the City before being carried out using professional archaeological methods. If any human bones are discovered, the County coroner and City shall be contacted. In the event that the remains are determined to be of Native American origin, the Most			

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	Likely Descendant (as identified by the Native American Heritage Commission) shall be contacted in order to determine proper treatment and disposition of the remains. 4. Before construction activities are allowed to resume in the affected area, the artifacts shall be recovered, and features recorded using professional archaeological methods. The project archaeologist in consultation with the consulting tribe(s) shall determine the amount of material to be recovered for an adequate artifact sample for analysis.			
29.	One or more of the following treatments, in order of preference, shall be used in the event of a cultural resources discovery: 1. Preservation-in-place. Avoidance, or preservation-in-place, involves leaving a resource where it was found with no development affecting its integrity. Pursuant to Public Resources Code Section 21083.2(b), avoidance is the preferred method of preservation for archaeological and cultural resources. 2. Reburial on the project site in an area not subject to future disturbance. Reburial of a resource shall include provisions to protect the selected reburial area from any future impacts in perpetuity. Reburial shall not occur until all required cataloging and basic recording have been completed, with the exception of sacred items, burial goods, and Native American human remains. Any	To be Implemented by the Applicant During Construction	Planning Division	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	reburial process shall be culturally appropriate. The listing of contents and the location of the reburial shall be included in a confidential Final Monitoring Report (refer to SDC CUL-6). If preservation-in-place or reburial is not feasible, all cultural material collected during the grading monitoring program shall be processed and curated according to the current professional repository standards in a Riverside County curation facility that meets the Office of Historic Preservation *Guidelines for the Curation of Archaeological Resources* (California Office of Historic Preservation 1993). The collections and associated records shall be transferred, including title, and accompanied by payment of the fees necessary for permanent curation.			
Prior to Grading Permit				
30.	The developer shall prepare an address blocking exhibit with the proposed addressing and street names for review and approval by the Planning Division. This plan, including updates to the plan, shall include addressing for buildings (primary address and units) and utilities such as but not limited to electrical/water/single/dual irrigation meter pedestal(s) or temporary power poles.	Prior to Grading Permit Issuance	Planning Division	
31.	Street names shall be approved by the Community Development Director. Suggested street names and alternatives shall be submitted in writing to the Community Development Director for approval. Phonic similarity with	Prior to Grading Permit Issuance	Planning and Building Divisions	

DRAFT

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	existing street names should be avoided.			
32.	A qualified biological monitor shall be present to monitor all vegetation removal to ensure no direct impacts occur to wildlife species.	Prior to Grading Permit Issuance	Planning Division	
33.	Prior to issuance of the grading permit, the project applicant shall pay the Stephens' kangaroo rat mitigation fee pursuant to City Ordinance No. 663, which requires a fee of $500 per gross acre.	Prior to Grading Permit Issuance	Planning Division	
34.	Prior to ground disturbances that would impact potentially suitable nesting habitat for avian species, the project applicant shall adhere to the following: 1. Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for raptors) to the extent feasible to avoid potential impacts to nesting birds protected by the Migratory Bird Treaty Act and California Fish and Game Code Sections 3503, 3503.5, and 3513. 2. Any construction activities that occur during the typical nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat, on-site and within 300 feet surrounding the site (as feasible), be thoroughly surveyed by a qualified biologist for the presence of nesting birds before commencement of ground disturbance activities. If active nests are identified, the qualified biologist would	Prior to Grading Permit Issuance	Planning Division	

DRAFT

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	establish an appropriate buffer around the vegetation. All work within these buffers would be halted until the nesting effort is complete (i.e., the juveniles are surviving independent from the nest) as determined by the qualified biologist. Work can resume within these areas when no other active nests are found. Alternatively, a qualified biologist may determine that construction can be permitted within the buffer area and would develop a monitoring plan to prevent any impacts while the nest continues to be active (e.g., presence of eggs, chicks, or adult nesting behavior). Upon completion of the survey and any follow-up construction avoidance management, a report shall be prepared and submitted to City for mitigation monitoring compliance record keeping.			
35.	In accordance with MSHCP species-specific objective #6 for burrowing owl, a preconstruction survey for burrowing owl shall be conducted within 30 days prior to ground disturbance by a qualified biologist where suitable habitat is present within the study area (project site and surrounding 500-foot buffer). If active burrowing owl burrows are detected during the breeding season (March 1 through August 31), all work within 300 feet of any active burrow will be halted until that nesting effort is finished as determined by a qualified biologist. Work can resume when no other active burrowing owl nesting efforts are observed. If active burrowing owl burrows are detected outside the breeding season (September 1 through February 28), then a	Prior to Grading Permit Issuance	Planning Division	

DRAFT

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	Burrowing Owl Exclusion Plan shall be prepared by the project applicant and approved by the County of Riverside Environmental Programs Department in consultation with the California Department of Fish and Wildlife (CDFW). The Burrowing Owl Exclusion Plan shall be prepared in accordance with guidelines in the *CDFW Staff Report on Burrowing Owl* (2012) and the MSHCP, which allows for passive relocation (i.e., use of one-way doors and collapse of burrows). Burrowing owl burrows shall be excavated with hand tools by a qualified biologist when determined to be unoccupied and backfilled to prevent reentry.			
36.	Prior to issuance of a grading permit, the project applicant shall provide written verification that a qualified archaeologist has been retained to develop and implement a Cultural Resources Monitoring Plan (CRMP). The CRMP shall address the details of all monitoring activities and procedures to be followed to reduce the impacts to cultural and historic resources to a less than significant level as well as addressing potential impacts to undiscovered buried archaeological resources associated with this project. The CRMP shall be reviewed by any consulting tribe(s) and reviewed and approved by the City.	Prior to Grading Permit Issuance	Planning Division	
37.	The project applicant shall provide for Native American monitoring during grading. The Native American monitor(s) shall work in concert with the archaeological monitor to observe ground disturbances and search for cultural materials.	Prior to Grading Permit Issuance	Planning Division	

DRAFT

Conditions of Approval		Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	The City shall coordinate with the consulting tribe(s) to facilitate communications with the project developer/applicant so that all parties can develop a mutually acceptable Tribal Monitoring and Treatment Agreement, which will include the scope of monitoring, scheduling of monitors from individual consulting tribe(s), and the course of action for inadvertent discoveries.			
38.	The project archaeologist and the consulting tribes(s) shall attend the pre-grading meeting with the City, the construction manager, and any contractors, and will conduct a mandatory cultural resources worker sensitivity training. The training will include a brief review of the cultural sensitivity of the project site and the surrounding area; what resources could potentially be identified during earth-moving activities; the requirements of the monitoring program; the protocols that apply in the event that inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols.	Prior to Grading Permit Issuance	Planning Division	
39.	Prior to the issuance of any grading permit, the project applicant shall provide written evidence to the City that the project applicant has retained a qualified paleontologist to develop and implement a Paleontological Resources Impact Mitigation Program (PRIMP) to guide monitoring procedures and establish protocols to follow in the event of a fossil discovery. The paleontologist shall be present at the pre-grading conference, shall describe procedures for	Prior to Grading Permit Issuance	Planning Division	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	paleontological resource surveillance, and shall establish in the PRIMP, in cooperation with the project applicant and City, procedures for temporarily halting or redirecting work to permit sampling, identification, and evaluation of the fossils. If the paleontological resources are found to be significant, the paleontologist shall determine appropriate actions, in cooperation with the project applicant, which ensure proper exploration and/or salvage.			
40.	Prior to the issuance of a Grading Permit, the Developer shall pay all necessary fees as determined by the City Engineer including, but not limited to Multiple Species Habitat Conservation Plan ("MSHCP") fees and grading permit fees.	Prior to Grading Permit Issuance	Public Works Department	
41.	Grading in excess of 199 cubic yards will required performance security to be posted with the City	Prior to Grading Permit Issuance	Public Works Department	
42.	A permit for the hauling of material to and from the project site shall be submitted to the City for approval.	Prior to Grading Permit Issuance	Public Works Department	
43.	Submit a California registered Civil Engineer prepared earthwork cut and fill certification letter to the Engineering Division for review. If the required earthwork in cubic yards is 50 CY or less, a Precise Grading/Paving Plan will not be required; however, the applicant is required to pull an NPDES/Public Works permit prior to issuance of a Building Permit for record purposes.	Prior to Grading Permit Issuance	Public Works Department	
44.	Development of the site is subject to the requirements of the National Pollution Discharge Elimination System ("NPDES") Permit for the City of Eastvale, under the Santa Ana Regional Water Quality Control Board, Board Order No. R8-2010-	Prior to Grading Permit Issuance	Public Works Department	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	0036. Pursuant to the NPDES Permit, the developer shall ensure development of the site incorporates post-construction Best Management Practices ("BMPs") in accordance with the Model Water Quality Management Plan ("WQMP") approved for use for the Santa Ana River Watershed. The developer is advised that applicable Site Design BMPs will be required to be incorporated into the final site design, pursuant to a site specific WQMP submitted to the City Engineer for review and approval. The site specific WQMP shall be submitted to the City Engineer for review and approval with the Precise Grading/Paving Plan.			
45.	Prior to commencing with any grading, the required erosion and dust control measures shall be in place. In addition, the following shall be included if not already identified: a. 6 foot high tan colored perimeter screened fencing b. Contractor information signage including contact information along the street frontage. c. Post dust control signage with the following verbiage: "Project Name, WDID No., IF YOU SEE DUST COMING FROM THIS PROJECT CALL: NAME (XXX) XXX-XXX, If you do not receive a response, please call the AQMD at 1-800-CUT-SMOG/1-800-228-7664"	Prior to Grading Permit Issuance	Public Works Department	
46.	A Notice of Intent ("NOI") to comply with the California General Construction Stormwater Permit is required via the California Regional Water Quality Control Board online Stormwater Multiple Application and Report Tracking System ("SMARTS"). A copy of the executed letter issuing a Waste Discharge Identification ("WDID") number shall be provided to the City Engineer. The Construction General Permit	Prior to Grading Permit Issuance	Public Works Department	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	requires the Developer's contractor to prepare and maintain a Storm Water Pollution Prevention Plan ("SWPPP"). The SWPPP requires all appropriate measures be implemented to prevent erosion and water pollution during construction.			
47.	A California registered Geotechnical Engineer prepared Geotechnical/Soils Report shall be required for and incorporated as an integral part of the grading/paving plan for the proposed development. A copy of the Geotechnical/Soils Report shall be submitted to the Engineering Division with the first submittal of the Precise Grading/Paving Plan.	Prior to Grading Permit Issuance	Public Works Department	
48.	All stormwater runoff passing through the site shall be accepted and conveyed across the property in a manner acceptable to the City Engineer. All on-site City Engineer approved retention or other facilities are required to contain the increase stormwater runoff generated from the proposed development. Provide a hydrology study to determine the volume of increased stormwater runoff due to development of the site, and to determine required stormwater runoff mitigation measures for the proposed development. The City Engineer must approve the final retention basin sizing and other stormwater runoff mitigation measures determined upon review and approval of the hydrology and may require redesign or changes to site configuration or layout consistent with the findings of the final hydrology study. The existing "pre-developed" condition compared to the proposed "developed" condition shall be used to calculate the volume of increased stormwater runoff to retain on-site under the 100-year frequency storm.	Prior to Grading Permit Issuance	Public Works Department	
49.	Direct release of on-site nuisance water or stormwater runoff shall not be permitted to the adjacent public streets. Provisions	Prior to Grading	Public Works	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	for the interception of nuisance water from entering adjacent public streets from the project site shall be provided through the use of a minor storm drain system that collects and conveys nuisance water to landscape or parkway areas, and in only a stormwater runoff condition, pass runoff directly to the streets through parkway or under sidewalk drains.	Permit Issuance	Department	
50.	The applicant shall make a good faith effort to acquire ingress/egress access rights to Grapwin Street from, or in partnership with the property owner.	Prior to Grading Permit Issuance	Planning Division	
Prior to Map Recordation				
51.	**VTTM No. 39022** is approved as shown on the Vesting Tentative Map submitted to the Planning Division and as approved by the **APPROVING AUTHORITY**, subject to conditions of approval and the City of Eastvale Municipal Code, as applicable.	Prior to Map Recordation	Planning Division	
52.	The applicant shall enter into a Density Bonus Agreement with the City of Eastvale, to the satisfaction of the City Attorney.	Prior to Map Recordation	Planning Division	
53.	The applicant shall enter into a Subdivision Improvement Agreement with the city and shall guarantee by posting security(ies) to include all public improvements that the developer is conditioned to construct as part of this approval.	Prior to Map Recordation	Public Works Department	
54.	Dedicate City Engineer approved additional right-of-way along the entire frontage as may be required to provide a property line at ultimate right-of-way in accordance with the City General Plan, any applicable Specific Plan and/or as requested by the City Engineer.	Prior to Map Recordation	Public Works Department	

Conditions of Approval		Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
55.	A Tract Map shall be prepared by a California registered Land Surveyor or qualified Civil Engineer and submitted to the Engineering Division for review and approval. A Title Report prepared for subdivision guarantee for the subject property, the traverse closures for the existing parcel and all lots created therefrom, and copies of record documents shall be submitted with the Parcel Map to the Engineering Division as part of the review of the Map. The Parcel Map shall be approved by the City Council prior to issuance of building permits.	Prior to Map Recordation	Public Works Department	
56.	Monument bond shall be posted with the City.	Prior to Map Recordation	Public Works Department	
Prior to Encroachment Permit Issuance				
57.	The minimum pavement section for all on-site pavements shall be 3 inches asphalt concrete pavement over 6 inches crushed aggregate base with a minimum subgrade of 24 inches at 95% relative compaction, or equal. The pavement section shall be determined using appropriate Traffic Index ("TI") accepted by the City Engineer. A California registered Geotechnical Engineer shall design the pavement section using "R" values from the project site and submitted to the City Engineer for approval.	Prior to Encroachment Permit Issuance	Public Works Department	
58.	Traffic Control Plan prepared by a California registered Civil Engineer or Traffic Engineer shall be submitted to the City Engineer for review and approval.	Prior to Encroachment Permit Issuance	Public Works Department	
Prior to Building Permit Issuance				
59.	Major Development Review and Density Bonus Agreement approval by the Eastvale City Council shall be accomplished	Prior to Building	Planning

	for development of Vesting Tentative Tract Map 39022.	Permit Issuance	Division	
60.	A Final Monitoring Report, documenting the field and analysis results and interpreting the artifact and research data within the research context, shall be completed and submitted to the satisfaction of the City prior to the issuance of any building permits. The report will include the California Department of Parks and Recreation's Primary and Archaeological Site Forms. The Final Monitoring Report shall be filed with the City under a confidential cover and not subject to Public Records Request and a copy of the report shall be submitted to the consulting tribe(s).	Prior to Building Permit Issuance	Planning Division	
61.	If paleontological resources are uncovered and after completion of the project, the project applicant shall submit the paleontologist's follow-up report for approval by the City. The report shall include the period of inspection, a catalogue and analysis of the fossils found, and the present repository of the fossils. The project applicant shall prepare excavated material to the point of identification. The project applicant shall offer excavated finds for curatorial purposes to the City or its designee, on a first refusal basis. These actions, as well as final mitigation and disposition of the resources, shall be subject to approval by the City. The project applicant shall make a one-time payment of curatorial fees for the storage of these resources in perpetuity.	Prior to Building Permit Issuance	Planning Division	
62.	The MDR has approved the overall architectural styles and enhanced elevations at specific location as identified on the site plan for each planning area. During plan check, the City may request minor adjustments/enhancements to limited	Prior to Building Permit Issuance	Planning Division	

DRAFT

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	aspects of the architectural details, without wholesale changes to the architectural style.			
63.	Construction and architectural detailing shall be in substantial conformance with the approved plans, including but not necessarily limited to elevation drawings and material/colors sample board submitted as a part of this application and as approved by the City Council, except that any modification shall be subject to the discretion of the Community Development Director upon finding that any changes are comparable in substance and quality to the original approval.	Prior to Building Permit Issuance	Planning Division	
64.	This project shall be subject to applicable school fees, the payment of which shall be documented to the satisfaction of the Building Official.	Prior to Building Permit Issuance	Building Division and Corona Norco Unified School District	
65.	Prior to building plan approval and construction, applicant/developer shall route a copy of the Water Improvement Plans (offsite) to the Fire Department for review of hydrant placement only. Water Improvement Plans (offsite) will not be reviewed or approved for the installation of onsite Private Fire Service Mains, private hydrants, or fire sprinkler system supplies. The private fire service main installing contractor shall submit a separate set of working plans designed in accordance with NFPA 13 and NFPA 24 to the Fire Department for a permit to install private water mains.	Prior to Building Permit Issuance	Riverside County Fire Department	
66.	The applicant must provide a fire hydrant system capable of delivering fire flow as required by the California Fire Code and Fire Department standards. Fire hydrants shall be spaced	Prior to Building Permit Issuance	Riverside County Fire Department	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	in accordance with the California Fire Code. Submit plans to the water district for review and approval prior to building permit issuance.			
67.	Fire apparatus access roads shall be at least 24 feet wide and comply with Riverside County Fire Department Guideline OFM-01A. Access roads shall be located outside of truck docks and between 15-40 feet from the building. Access roads shall not have a grade more than 16 percent and shall have an unobstructed vertical clearance not less than 13 feet and 6 inches. Access lanes will be designed to withstand the weight of 80,000 pounds. Apparatus weight is distributed as 55,000 pounds on tandem rear axles and 25,00 pounds on the front acle. Fire apparatus access roads shall have a turning radius capable of accommodating fire apparatus.	Prior to Building Permit Issuance	Riverside County Fire Department	
68.	The surface shall be designed, constructed, and maintained to provide all-weather driving capabilities. A letter or statement, wet-stamped and signed by a registered engineer, shall be provided on the plans certifying that any new road meets this 80,000, all weather requirement. Road base without an appropriate topping or binding material does not satisfy the all-weather requirement.	Prior to Building Permit Issuance	Riverside County Fire Department	
69.	Driveway loops, fire apparatus access lanes and entrance curb radius should be designed to adequately allow access of emergency fire vehicles. The applicant or developer shall include in the building plans the required fire lanes and include the appropriate lane printing and/or signs.	Prior to Building Permit Issuance	Riverside County Fire Department	
70.	A construction phasing plan shall be submitted to the Fire	Prior to Building	Riverside County

	Department for review and approval prior to building permit issuance.	Permit Issuance	Fire Department	
71.	The applicant shall provide specific fire department conditions on plans for building permit submittal	Prior to Building Permit Issuance	Riverside County Fire Department	
72.	Any future monumentation into the development shall be subject to review and approval by the Community Development Director and City Traffic Engineer.	Prior to Building Permit Issuance	Planning Division	
73.	Submit California registered civil engineer prepared street improvement plans to the Engineering Division for review and approval. Unless otherwise approved, the street improvement plans shall be approved concurrently with any street light, landscape and irrigation, and traffic signal plans. Street plans shall include: a. Right-of-way dedication to allow three (3) eastbound traffic lanes and a bike lane on Archibald Avenue, consistent with the City of Eastvale General Plan. b. Pedestrian improvements including curb, gutter, sidewalk, landscaping, and curb ramps in compliance with ADA requirements and Riverside County Standard Plans and Specs. c. Any necessary power pole undergrounding. d. Utility Improvements. e. Traffic signal relocation and modification. f. Striping and signage plan. g. Storm drain improvement plan.	Prior to Building Permit Issuance	Public Works Department	
74.	Submit California registered civil engineer or traffic engineer prepared traffic striping and signage plans for review and approval. All required traffic thermoplastic striping and signage improvements shall be completed concurrently with street improvements to the satisfaction of the City Engineer.	Prior to Building Permit Issuance	Public Works Department	

DRAFT

Conditions of Approval		Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
75.	Submit photometric of street lighting. All lights shall be Edison LS-3 tariff and utilize General Electric Evolve LED luminaires per City Specifications. The developer shall be responsible for applying with Southern California Edison ("SCE") for all appropriate service points and electrical meters early in the process to avoid delays. The developer must pay for the electrical service of new meter pedestals installed until such time the improvements have been accepted and the underlying property is annexed into LMD/CFD.	Prior to Building Permit Issuance	Public Works Department	
76.	The public street improvements outlined in these conditions of approval are intended to convey to the developer an accurate scope of required improvements; however, the City Engineer reserves the right to require reasonable additional improvements as may be determined in the course of the review and approval of street improvement plans required herein.	Prior to Building Permit Issuance	Public Works Department	
77.	The Precise Grading/Paving Plan shall be prepared in accordance with the City of Eastvale Grading handout and City Engineer approved prior to issuance of a grading permit.	Prior to Building Permit Issuance	Public Works Department	
78.	A WQMP and Storm Water BMP Transfer, Access and Maintenance Agreement shall be required, obligating the property owner(s) to appropriate operation and maintenance obligations of on-site BMPs constructed pursuant to the approved WQMP. The WQMP and Storm Water BMP Transfer, Access and Maintenance Agreement shall be approved prior to issuance of a building permit and shall be Public Works Staff recorded at the San Bernardino County Recorder's Office prior to issuance of a Certificate of	Prior to Building Permit Issuance	Public Works Department	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	Occupancy.			
79.	Provide pad elevation certifications for all building pads in conformance with the approved Precise Grading Plan to the Engineering Division prior to construction of any building foundation.	Prior to Building Permit Issuance	Public Works Department	
80.	The developer shall connect to the JCSD sewer system and apply for a sewer connection account with JCSD.	Prior to Building Permit Issuance	Public Works Department	
81.	Submit California registered civil engineer prepared sewer improvement plans to the JCSD/Engineering Division. The plans shall be JCSD approved prior to issuance of any building permits.	Prior to Building Permit Issuance	Public Works Department	
82.	The developer is advised that domestic water service is provided by JCSD. The developer shall be responsible for coordinating with JCSD and complying with all requirements for establishing domestic water service to the property.	Prior to Building Permit Issuance	Public Works Department	
83.	The developer shall pay all necessary impact and mitigation fees required. These fees include, but are not limited to, fees associated with Transportation Uniform Mitigation Fee (TUMF), Road Bridges Benefit District (RBBD) Fees, Quimby (parkland in-lieu) Fee, ADP and City Development Impact Fees.	Prior to Building Permit Issuance	Public Works Department	
Prior to Certificate Occupancy				
84.	Applicant shall participate in the final adopted program with regards to providing a non-potable water supply source and related infrastructure improvements for parks and green belt	Prior to Certificate of	JCSD	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	areas.	Occupancy		
85.	Any approval shall not be final until and unless the applicant's deposit account with Public Works has a balance of at least $10,000 to cover staff time to follow-up, monitoring, and other post-approval work by staff. The City reserves the right to request additional deposits to cover post-approval staff work and to half work if the deposit account is exhausted.	Prior to Certificate of Occupancy	Public Works Department	
86.	All parkway landscaping shall be guaranteed for a period of one (1) year from the date of the City Engineer acceptance. Any landscaping that fails during the one (1) year landscape maintenance period shall be replaced with similar plant material to the satisfaction of the City Engineer.	Prior to Certificate of Occupancy	Public Works Department	
87.	The development shall be annexed into all applicable CFD and/or LMD for traffic signals, street lights, full capture systems for all storm drains and landscape maintenance of raised landscape median and public parkways, to the satisfaction of the City Engineer or otherwise form a district where one is not currently in place.	Prior to Certificate of Occupancy	Public Works Department	
88.	All existing overhead utility lines shall be undergrounded within the project frontage(s). Utility undergrounding shall extend to the nearest off-site power pole. Unless City Engineer approved, no new power poles shall be installed. A letter from the owners of the affected utilities shall be submitted to the City Engineer prior to approval of the Precise Grading/Paving Plan, informing the City that they have been notified of the City's utility undergrounding requirement and their intent to commence design of utility undergrounding plans. When	Prior to Certificate of Occupancy	Public Works Department	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	available, the utility undergrounding plan shall be submitted to the City Engineer identifying all above ground facilities in the area of the project to be undergrounded.			
89.	Upon City Engineer approval of any improvement plan, the improvement plan shall be provided to the City in digital format, consisting of a DWG (AutoCAD drawing file), DXF (AutoCAD ASCII drawing exchange file), and PDF (Adobe Acrobat) formats. Variation of the type and format of the digital data to be submitted to the City may be authorized, upon prior City Engineer approval.	Prior to Certificate of Occupancy	Public Works Department	
90.	Prior to issuance of a Certificate of Occupancy or final City approvals, demonstrate that all structural BMP's have been constructed and installed in conformance with approved plans and specifications, and as identified in the approved WQMP.	Prior to Certificate of Occupancy	Public Work Department	
91.	Provide certification from JCSD to demonstrate that all water and/or wastewater service accounts have been documented.	Prior to Certificate of Occupancy	Public Works Department	
92.	All damaged, destroyed, or modified pavement legends, traffic control devices, signing, striping, and street lights, associated with the proposed development shall be replaced.	Prior to Certificate of Occupancy	Public Works Department	
93.	Remove existing, and construct new pavement with a minimum pavement section matching that new section to the southwest on Archibald with a minimum subgrade of 24 inches at 95% relative compaction, or equal, along the entire half-width street frontage in accordance with City of Eastvale Standard Drawings. The pavement section shall be	Prior to Certificate of Occupancy	Public Works Department	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	determined using appropriate Traffic Index ("TI") accepted by the City Engineer. A California registered Geotechnical Engineer shall design the pavement section using "R" values from the project site and submitted to the City Engineer for approval. Alternatively, depending on the existing street condition and as approved by the City Engineer, a street overlay, slurry seal, or other repair can be performed to preserve recent pavement improvements.			
94.	Construct an Americans with Disabilities Act ("ADA") compliant sidewalk behind curb along the entire frontage and interior streets in accordance with the General Plan, any Specific Plan, the City of Eastvale Standard Drawings, subject to the approval of the City Engineer.	Prior to Certificate of Occupancy	Public Works Department	
95.	Reconstruct Archibald Avenue to the centerline of the Street. Edge cuts shall line up with lane lines. No additional crown lines shall be added to any public street. All public streets shall have consistent cross slope.	Prior to Certificate of Occupancy	Public Works Department	
96.	Construct a City Engineer approved commercial driveway approach for the main entrance on Archibald in accordance with City of Eastvale Standard Drawings. The emergency vehicle access driveway approach on Grapwin Street shall be constructed as a limited access curb to discourage use, the top of "X" shall be a minimum 5 feet from the property line. Nothing shall be constructed or planted in the corner cut-off area which does or will exceed 30 inches in height required to maintain an appropriate corner sight distance.	Prior to Certificate of Occupancy	Public Works Department	
97.	Construct a curb ramp meeting current California State	Prior to	Public Works	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	Accessibility standards along both sides of the Street "A." The developer shall ensure that an appropriate path of travel, meeting ADA guidelines, is provided across the driveway, and shall adjust the location of the access ramps, if necessary, to meet ADA guidelines, subject to the approval of the City Engineer. If necessary, additional pedestrian and sidewalk easements shall be provided on-site to construct a path of travel meeting ADA guidelines.	Certificate of Occupancy	Department	
98.	Install PTZ cameras at each intersection to monitor traffic.	Prior to Certificate of Occupancy	Public Works Department	
99.	Install License Plate Reader Cameras to tie-into the existing Citywide system at each traffic signal servicing the property.	Prior to Certificate of Occupancy	Public Works Department	
100.	Install Class I bicycle lanes along Archibald Avenue.	Prior to Certificate of Occupancy	Public Works Department	
101.	Install conduit for fiber optic along the Archibald frontage per City's standard.	Prior to Certificate of Occupancy	Public Works Department	
102.	Relocate traffic signal and replace all necessary components. to accommodate new street right of way	Prior to Certificate of Occupancy	Public Works Department	
103.	The developer shall be responsible for coordinating with Riverside Transit Authority (RTA) regarding the location of existing, proposed, and future bus stops along the property	Prior to Certificate of	Public Works Department	

Conditions of Approval		Timing/ Implementation	Enforcement/ Monitoring	Verification (Date and Signature)
	frontage of all public streets. The developer shall design street and sidewalk improvements in accordance with the latest RTA bus stop guidelines and in compliance with current accessibility standards pursuant to the Americans with Disabilities Act (ADA) requirements. The developer shall design all bus stops to accommodate the RTA Shelters. The developer shall submit to Public Works verification from RTA acknowledging concurrence with the existing, proposed, and future bus stop improvements in conformance with the Premium Shelter design guidelines.	Occupancy		
104.	The project Covenants Conditions and Restrictions (CC&Rs) and/or a Property Owners Association document shall be provided to the City for final review and approval and shall address maintenance and operation of common areas and/or facilities including but not limited to private parking areas, private utilities, and water quality basins.	Prior to Certificate of Occupancy	Planning and Public Works Divisions	

General Compliance Items/Requirements and Information

The following items are noted for the applicant's information. These items are required by the City, other local agencies, or state and federal agencies, and are not conditions of approval of the project.

The applicant shall obtain City approval for any modifications or revisions to the approval of this project. Deviations not identified on the plans may not be approved by the City, potentially resulting in the need for the project to be redesigned. Amended entitlement approvals may be necessary as a result.

Should this project lie within any assessment/benefit district, the project proponent shall, prior to acceptance of improvements, make application for and pay for their reapportionment of the assessments or pay the unit fees in the benefit district unless said fees are otherwise deferred.

CONDITIONS OF APPROVAL				
Planning Application Number and Description: Project No. PLN24-20053– Major Development Review for the site planning and master architecture of 76 single family detached residential units on Vesting Tentative Tract Map 39022 subject to SB 330 and State Density Bonus Law, located at 8312 Grapewin Street and 8330 Archibald Avenue.				
Assessor's Parcel Number: 130-070-021, 130-070-015, 130-080-004				
City Council Approval Date:				
	Conditions of Approval	**Timing/ Implementation**	**Enforcement/ Monitoring**	**Verification (Date and Signature)**
General Conditions/Requirements				
1.	The applicant shall review and sign below verifying the "Acceptance of the Conditions of Approval" and return the signed page to the Eastvale Planning Department. Project approval is not final until a signed copy of these conditions is filed with the City. Applicant Signature Date	Must be completed to finalize approval	Planning Division	
2.	The applicant shall indemnify, protect, defend, and hold harmless the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, from any and all claims, demands, law suits, writs of mandamus, and other actions and proceedings (whether legal, equitable, declaratory, administrative, or adjudicatory in nature), and alternative dispute resolutions procedures (including but not limited to arbitrations, mediations, and other such procedures) (collectively "Actions"), brought against the City, and/or any of its officials, officers, employees, agents, departments, agencies, and instrumentalities thereof, that challenge, attack, or seek to modify, set aside, void, or annul any action of, or any permit or approval issued by, the City and/or any of its officials, officers,	Ongoing	Planning Division	

	employees, agents, departments, agencies, and instrumentalities thereof (including actions approved by the voters of the City), for or concerning the project, whether such Actions are brought under the California Environmental Quality Act, the Planning and Zoning Law, the Subdivisions Map Act, Code of Civil Procedure Section 1085 or 1094.5, or any other state, federal, or local statute, law, ordinance, rule, regulation, or any decision of a court of competent jurisdiction. It is expressly agreed that the City shall have the right to approve, which approval will not be unreasonably withheld, the legal counsel providing the City's defense, and that applicant shall reimburse City for any costs and expenses directly and necessarily incurred by the City in the course of the defense. City shall promptly notify the applicant of any Action brought and City shall cooperate with applicant in the defense of the Action.			
3.	Applicant understands and agrees that failure to comply with all conditions of approval may result in the City Council/Planning Commission taking action resulting in modification of conditions of approval and/or suspension or revocation of the Major Development Review permit.	Ongoing	Planning Division	
4.	Approval of Major Development Review (PLN24-20053) shall lapse and become void as of **May 28, 2027**, unless building permits have been issued and construction is commenced and diligently pursued towards completion on the structures that are the subject of Major Development Review (PLN24-20053), or a time extension is requested in writing prior to that date.	Ongoing	Planning Division	
5.	Approval of Major Development Review (PLN24-20053) is contingent upon approval of Vesting Tentative Tract Map 39022 and the Density Bonus Agreement. Failure to approve Vesting Tentative Tract Map 39022 and the Density Bonus Agreement shall render any approval of Major Development Review (PLN24-20053) null and void.	Ongoing	Planning Division	

6.	All applicable Tentative Tract Map 39022 conditions of approval (PLN24-20053) shall be incorporated herein by reference.	Ongoing	Building, Planning, and Public Works Divisions	
7.	Major Development Review (PLN24-20053) is for the site planning and architecture of 76 single-family residential dwellings within Vesting Tentative Tract 39022 along with four (4) lots for water quality and open space purposes and five (5) lots for private street purposes.	Ongoing	Planning Division	
8.	Provide street sweeping services for onsite and offsite within project frontages weekly.	Ongoing	Public Works Department	
9.	Remove all graffiti within 24 hours pre-construction, during construction, and after a Certificate of Occupancy is issued.	Ongoing	Public Works Department	
10.	A City of Eastvale Encroachment Permit is required for any improvements within the public right-of-way.	Ongoing	Public Works Department	
11.	All street cuts for utilities shall be repaired in accordance with City Standard or as recommended; and any interim trench repairs shall consist of compacted backfill to the bottom of the pavement structural section followed by placement of standard base course material in accord by the City Engineer and with the Standard Specifications for Public Work Construction ("Greenbook"). The base course material shall be placed the full height of the structural section to be flush with the existing pavement surface and provide a smooth pavement surface until permanent cap paving occurs using an acceptable surface course material.	Ongoing	Public Works Department	
12.	In accordance with City's Moratorium policy to preserve newly paved streets, any and all street and/or trench cuts in newly paved streets will be prohibited or be subject to moratorium street repair standards as reference in Section 12.08.260 of the Eastvale Municipal Code.	Ongoing	Public Works Department	

13.	Any and all utility trenches or other excavations within existing asphalt concrete pavement of off-site streets resulting from the proposed development shall be backfilled and repaired in accordance with City of Eastvale Standard Drawings. The developer shall be responsible for removing, grinding, paving and/or overlaying existing asphalt concrete pavement of off-site streets including pavement repairs in addition to pavement repairs made by utility companies for utilities installed for the benefit of the proposed development (i.e. Jurupa Community Services District, Southern California Edison, Southern California Gas Company, Time Warner, Verizon, etc.). Multiple excavations, trenches, and other street cuts within existing asphalt concrete pavement of off-site streets resulting from the proposed development may require complete grinding and asphalt concrete overlay of the affected off-site streets, at the discretion of the City Engineer. The pavement condition of the existing off-site streets shall be returned to a condition equal to or better than what existed prior to construction of the proposed development.	Ongoing	Public Works Department	
14.	Construction signing, lighting and barricading shall be provided during all phases of construction in accordance with City Standards and the direction of the City Engineer. As a minimum, all construction signing, lighting and barricading shall be in accordance with Part 6 "Temporary Traffic Control" of the latest California Manual on Uniform Traffic Control Devices, or subsequent editions in force at the time of construction.	Ongoing	Public Works Department	
15.	The protocols and stipulations that the contractor, City, consulting tribe(s), and project archaeologist will follow in the event of inadvertent cultural resources discoveries, including any newly discovered cultural resource deposits that shall be subject to a cultural resources evaluation, include the following. 1. During the original cutting of previously undisturbed deposits, the archaeological and tribal monitors (if applicable) shall be on-site, as determined by the consulting archaeologist, to monitor excavations. The	To be Implemented by the Applicant During Construction	Planning Division	

	frequency of inspections will depend upon the rate of excavation, the materials excavated, and the presence and abundance of artifacts and features. The consulting archaeologist shall have the authority to modify the monitoring program if the potential for cultural resources appears to be less than anticipated. 2. Isolates and clearly non-significant deposits will be minimally documented in the field so the monitored grading can proceed. 3. In the event that previously unidentified cultural resources are discovered, the archaeologist shall have the authority to divert or temporarily halt ground disturbance operation in the area of discovery to allow for the evaluation of potentially significant cultural resources. The archaeologist shall contact the City at the time of discovery. The archaeologist, in consultation with the City, shall determine the significance of the discovered resources. The City must concur with the evaluation before construction activities will be allowed to resume in the affected area. For significant cultural resources, a research design and data recovery program to mitigate impacts shall be implemented by the consulting archaeologist and approved by the City before being carried out using professional archaeological methods. If any human bones are discovered, the County coroner and City shall be contacted. In the event that the remains are determined to be of Native American origin, the Most Likely Descendant (as identified by the Native American Heritage Commission) shall be contacted in order to determine proper treatment and disposition of the remains. 4. Before construction activities are allowed to resume in the affected area, the artifacts shall be recovered, and features recorded using professional archaeological methods. The project archaeologist in consultation with the consulting tribe(s) shall determine the amount of material to be recovered for an adequate artifact sample for analysis.			

16.	One or more of the following treatments, in order of preference, shall be used in the event of a cultural resources discovery: 1. Preservation-in-place. Avoidance, or preservation-in-place, involves leaving a resource where it was found with no development affecting its integrity. Pursuant to Public Resources Code Section 21083.2(b), avoidance is the preferred method of preservation for archaeological and cultural resources. 2. Reburial on the project site in an area not subject to future disturbance. Reburial of a resource shall include provisions to protect the selected reburial area from any future impacts in perpetuity. Reburial shall not occur until all required cataloging and basic recording have been completed, with the exception of sacred items, burial goods, and Native American human remains. Any reburial process shall be culturally appropriate. The listing of contents and the location of the reburial shall be included in a confidential Final Monitoring Report (refer to SDC CUL-6). If preservation-in-place or reburial is not feasible, all cultural material collected during the grading monitoring program shall be processed and curated according to the current professional repository standards in a Riverside County curation facility that meets the Office of Historic Preservation Guidelines for the Curation of Archaeological Resources (California Office of Historic Preservation 1993). The collections and associated records shall be transferred, including title, and accompanied by payment of the fees necessary for permanent curation.	To be Implemented by the Applicant During Construction	Planning Division	
Prior to Map Recordation				
17.	The applicant shall enter into a Density Bonus Agreement with the City of Eastvale, to the satisfaction of the City Attorney.	Prior to Map Recordation	Planning Division	
18.	The applicant shall enter into a Subdivision Improvement Agreement with the city, and shall guarantee by posting security(ies) to include all	Prior to Map Recordation	Public Works Department	

	public improvements that the developer is conditioned to construct as part of this approval.			
19.	Dedicate City Engineer approved additional right-of-way along the entire frontage as may be required to provide a property line at ultimate right-of-way in accordance with the City General Plan, any applicable Specific Plan and/or as requested by the City Engineer.	Prior to Map Recordation	Public Works Department	
20.	A Tract Map shall be prepared by a California registered Land Surveyor or qualified Civil Engineer and submitted to the Engineering Division for review and approval. A Title Report prepared for subdivision guarantee for the subject property, the traverse closures for the existing parcel and all lots created therefrom, and copies of record documents shall be submitted with the Parcel Map to the Engineering Division as part of the review of the Map. The Parcel Map shall be approved by the City Council prior to issuance of building permits.	Prior to Map Recordation	Public Works Department	
21.	Monumentation bond shall be posted with the City.	Prior to Map Recordation	Public Works Department	
Notes on Grading and Construction Plans to be Implemented During Construction				
22.	The cover sheet of the building construction drawings shall include a blue line print of the City's conditions of approval and shall be attached to each set of plans submitted for City approval.	Ongoing	Planning Division	
23.	Dimensioned building setbacks and property lines, street centerlines, and between buildings or other structures shall be designed on the plot plan.	Ongoing	Building, Planning, and Public Works Divisions	
24.	All property lines and easements must be shown on the plot plan. A statement that such lines and easements are shown is required.	Ongoing	Building, Planning, and Public Works Divisions	

DRAFT

25.	To ensure consistency with the goals and objectives of the Western Riverside County MSHCP, the proposed project will adhere to MSHCP Appendix C, Standard Best Management Practices.	To be Implemented by the Applicant During Construction	Planning Division	
26.	The project will be subject to the general sound level standards of Eastvale Municipal Code Section 8.52.040, *General Sound Level Standards.*	To be Implemented by the Applicant During Construction	Planning and Community Enhancement and Safety Divisions	
27.	As an infill development site, construction will be occurring within a noise-sensitive environment. In accordance with Municipal Code requirements, any construction or maintenance activity on real property which may disturb the peace and comfort of inhabitants of the neighborhood or comfortable enjoyment of life and property is prohibited between the hours of 6:00 p.m. and 6:00 a.m. during the months of June through September and 6:00 p.m. and 7:00 a.m. during the months of October through May, unless said work is of an emergency nature or a prior permit has been obtained from the Community Development Director.	To be Implemented by the Applicant During Construction	Planning and Community Enhancement and safety Divisions	
Prior to Issuance of Encroachment Permit				
28.	The minimum pavement section for all on-site pavements shall be 3 inches asphalt concrete pavement over 6 inches crushed aggregate base with a minimum subgrade of 24 inches at 95% relative compaction, or equal. The pavement section shall be determined using appropriate Traffic Index ("TI") accepted by the City Engineer. A California registered Geotechnical Engineer shall design the pavement section using "R" values from the project site and submitted to the City Engineer for approval.	Prior to Issuance of Encroachment Permit	Public Works Department	

29.	Traffic Control Plan prepared by a licensed civil/traffic engineer shall be submitted to the City Engineer for review and approval.	Prior to Issuance Encroachment Permit	Public Works Department	
Prior to Issuance of Grading Permit				
30.	Prior to the issuance of a grading permit, the developer shall pay all necessary fees as determined by the City Engineer including but not limited to MSCHP fees and grading permit fees.	Prior to Issuance of Grading Permit	Public Works Department	
31.	Grading in excess of 199 cubic yards will required performance security to be posted with the City.	Prior to Issuance of Grading Permit	Public Works Department	
32.	A qualified biological monitor shall be present to monitor all vegetation removal to ensure no direct impacts occur to wildlife species.	Prior to Issuance of Grading Permit	Planning Division	
33.	Prior to issuance of the grading permit, the project applicant shall pay the Stephens' kangaroo rat mitigation fee pursuant to City Ordinance No. 663, which requires a fee of $500 per gross acre.	Prior to Issuance of Grading Permit	Planning Division	
34.	Prior to ground disturbances that would impact potentially suitable nesting habitat for avian species, the project applicant shall adhere to the following: 1. Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for raptors) to the extent feasible to avoid potential impacts to nesting birds protected by the Migratory Bird Treaty Act and California Fish and Game Code Sections 3503, 3503.5, and 3513. 2. Any construction activities that occur during the typical nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat, on-site and within 300 feet surrounding the site (as feasible), be	Prior to Issuance of Grading Permit	Planning Division	

	thoroughly surveyed by a qualified biologist for the presence of nesting birds before commencement of ground disturbance activities. If active nests are identified, the qualified biologist would establish an appropriate buffer around the vegetation. All work within these buffers would be halted until the nesting effort is complete (i.e., the juveniles are surviving independent from the nest) as determined by the qualified biologist. Work can resume within these areas when no other active nests are found. Alternatively, a qualified biologist may determine that construction can be permitted within the buffer area and would develop a monitoring plan to prevent any impacts while the nest continues to be active (e.g., presence of eggs, chicks, or adult nesting behavior). Upon completion of the survey and any follow-up construction avoidance management, a report shall be prepared and submitted to City for mitigation monitoring compliance record keeping.			
35.	In accordance with MSHCP species-specific objective #6 for burrowing owl, a preconstruction survey for burrowing owl shall be conducted within 30 days prior to ground disturbance by a qualified biologist where suitable habitat is present within the study area (project site and surrounding 500-foot buffer). If active burrowing owl burrows are detected during the breeding season (March 1 through August 31), all work within 300 feet of any active burrow will be halted until that nesting effort is finished as determined by a qualified biologist. Work can resume when no other active burrowing owl nesting efforts are observed. If active burrowing owl burrows are detected outside the breeding season (September 1 through February 28), then a Burrowing Owl Exclusion Plan shall be prepared by the project applicant and approved by the County of Riverside Environmental Programs Department in consultation with the California Department of Fish and Wildlife (CDFW). The	Prior to Issuance of Grading Permit	Planning Division	

DRAFT

	Burrowing Owl Exclusion Plan shall be prepared in accordance with guidelines in the CDFW Staff Report on Burrowing Owl (2012) and the MSHCP, which allows for passive relocation (i.e., use of one-way doors and collapse of burrows). Burrowing owl burrows shall be excavated with hand tools by a qualified biologist when determined to be unoccupied and backfilled to prevent reentry.			
36.	Prior to issuance of a grading permit, the project applicant shall provide written verification that a qualified archaeologist has been retained to develop and implement a Cultural Resources Monitoring Plan (CRMP). The CRMP shall address the details of all monitoring activities and procedures to be followed to reduce the impacts to cultural and historic resources to a less than significant level as well as addressing potential impacts to undiscovered buried archaeological resources associated with this project. The CRMP shall be reviewed by any consulting tribe(s) and reviewed and approved by the City.	Prior to Issuance of Grading Permit	Planning Division	
37.	The project applicant shall provide for Native American monitoring during grading. The Native American monitor(s) shall work in concert with the archaeological monitor to observe ground disturbances and search for cultural materials. The City shall coordinate with the consulting tribe(s) to facilitate communications with the project developer/applicant so that all parties can develop a mutually acceptable Tribal Monitoring and Treatment Agreement, which will include the scope of monitoring, scheduling of monitors from individual consulting tribe(s), and the course of action for inadvertent discoveries.	Prior to Issuance of Grading Permit	Planning Division	
38.	The project archaeologist and the consulting tribes(s) shall attend the pre-grading meeting with the City, the construction manager, and any contractors, and will conduct a mandatory cultural resources	Prior to Issuance of Grading Permit	Planning Division	

DRAFT

	worker sensitivity training. The training will include a brief review of the cultural sensitivity of the project site and the surrounding area; what resources could potentially be identified during earth-moving activities; the requirements of the monitoring program; the protocols that apply in the event that inadvertent discoveries of cultural resources are identified, including who to contact and appropriate avoidance measures until the find(s) can be properly evaluated; and any other appropriate protocols.			
39.	Prior to the issuance of any grading permit, the project applicant shall provide written evidence to the City that the project applicant has retained a qualified paleontologist to develop and implement a Paleontological Resources Impact Mitigation Program (PRIMP) to guide monitoring procedures and establish protocols to follow in the event of a fossil discovery. The paleontologist shall be present at the pre-grading conference, shall describe procedures for paleontological resource surveillance, and shall establish in the PRIMP, in cooperation with the project applicant and City, procedures for temporarily halting or redirecting work to permit sampling, identification, and evaluation of the fossils. If the paleontological resources are found to be significant, the paleontologist shall determine appropriate actions, in cooperation with the project applicant, which ensure proper exploration and/or salvage.	Prior to Issuance of Grading Permit	Planning Division	
40.	A permit for the hauling of material to and from the project site shall be submitted to the City for approval.	Prior to Issuance of Grading Permit	Public Works Department	
41.	Submit a California civil engineer prepared earthwork cut and fill certification letter to the Engineering Division for review. If the required earthwork in cubic yards is 50 CY or less, a Precise Grading/Paving Plan will not be required; however, the applicant is	Prior to Issuance of Grading Permit	Public Works Department	

DRAFT

	required to pull an NPDES/Public Works permit prior to issuance of a Building Permit for record purposes.			
42.	Development of the site is subject to the requirements of the National Pollution Discharge Elimination System (NPDES) Permit for the City of Eastvale, under the Santa Ana Regional Water Quality Control Board, Board Order No. R8-2010-0036. Pursuant to the NPDES Permit, the developer shall ensure development of the site incorporates post-construction Best Management Practices ("BMPs") in accordance with the Model Water Quality Management Plan ("WQMP") approved for use for the Santa Ana River Watershed. The developer is advised that applicable Site Design BMPs will be required to be incorporated into the final site design, pursuant to a site specific WQMP submitted to the City Engineer for review and approval. The site specific WQMP shall be submitted to the City Engineer for review and approval with the Precise Grading/Paving Plan.	Prior to Issuance of Grading Permit	Public Works Department	
43.	Prior to commencing with any grading, the required erosion and dust control measures shall be in place. In addition, the following shall be included if not already identified: a. 6 foot high tan colored perimeter screened fencing b. Contractor information signage including contact information along the street frontage. c. Post dust control signage with the following verbiage: "Project Name, WDID No., IF YOU SEE DUST COMING FROM THIS PROJECT CALL: NAME (XXX) XXX-XXX, If you do not receive a response, please call the AQMD at 1-800-CUT-SMOG/1-800-228-7664"	Prior to Issuance of Grading Permit	Public Works Department	
44.	A Notice of Intent (NOI) to comply with the California General Construction Stormwater Permit is required via the California Regional Water Quality Control Board online SMARTS system. A	Prior to Issuance of Grading Permit	Public Works Department	

	copy of the executed letter issuing a Waste Discharge Identification (WDID) number shall be provided to the City Engineer. The General Construction Permit requires the developer's contractor to prepare and maintain a Storm Water Pollution Prevention Plan ("SWPPP"). The SWPPP requires all appropriate measures be implemented to prevent erosion and water pollution during construction.			
45.	A California registered Geotechnical Engineer prepared Geotechnical/Soils Report shall be required for and incorporated as an integral part of the grading/paving plan for the proposed development. A copy of the Geotechnical/Soils Report shall be submitted to the Engineering Division with the first submittal of the Precise Grading/Paving Plan.	Prior to Issuance of Grading Permit	Public Works Department	
46.	All stormwater runoff passing through the site shall be accepted and conveyed across the property in a manner acceptable to the City Engineer. All on-site City Engineer approved retention or other facilities are required to contain the increase stormwater runoff generated from the proposed development. Provide a hydrology study to determine the volume of increased stormwater runoff due to development of the site, and to determine required stormwater runoff mitigation measures for the proposed development. The City Engineer must approve the final retention basin sizing and other stormwater runoff mitigation measures determined upon review and approval of the hydrology and may require redesign or changes to site configuration or layout consistent with the findings of the final hydrology study. The existing "pre-developed" condition compared to the proposed "developed" condition shall be used to calculate the volume of increased stormwater runoff to retain on-site under the 100-year frequency storm.	Prior to Issuance of Grading Permit	Public Works Department	
47.	Direct release of on-site nuisance water or stormwater runoff shall not be permitted to the adjacent public streets. Provisions for the interception of nuisance water from entering adjacent public streets from the project site shall be provided through the use of a minor	Prior to Issuance of Grading Permit	Public Works Department	

DRAFT

	storm drain system that collects and conveys nuisance water to landscape or parkway areas, and in only a stormwater runoff condition, pass runoff directly to the streets through parkway or under sidewalk drains.			
48.	Street names shall be approved by the Community Development Director prior to issuance of grading permit. Suggested street names and alternatives shall be submitted in writing to the Community Development Director for approval. Phonic similarity with existing street names should be avoided.	Prior to Issuance of Grading Permit	Planning Division	
49.	The applicant shall be responsible for creating a proposed addressing list and exhibit for review and approval by the Community Development Director, prior to issuance of grading permit. Addresses shall be suggested for any building(s) and/or any electrical/water single/dual irrigation meter pedestal(s) or temporary power poles.	Prior to Issuance of Grading Permit	Planning Division	
50.	The applicant shall make a good faith effort to acquire ingress/egress access rights to Grapwin Street from, or in partnership with the property owner.	Prior to Issuance of Grading Permit	Planning Division	
Prior to Issuance of Building Permit				
51.	A Final Monitoring Report, documenting the field and analysis results and interpreting the artifact and research data within the research context, shall be completed and submitted to the satisfaction of the City prior to the issuance of any building permits. The report will include the California Department of Parks and Recreation's Primary and Archaeological Site Forms. The Final Monitoring Report shall be filed with the City under a confidential cover and not subject to Public Records Request and a copy of the report shall be submitted to the consulting tribe(s).	Prior to Building Permit Issuance	Planning Division	
52.	If paleontological resources are uncovered and after completion of the project, the project applicant shall submit the paleontologist's	Prior to Building Permit Issuance	Planning Division	

	follow-up report for approval by the City. The report shall include the period of inspection, a catalogue and analysis of the fossils found, and the present repository of the fossils. The project applicant shall prepare excavated material to the point of identification. The project applicant shall offer excavated finds for curatorial purposes to the City or its designee, on a first refusal basis. These actions, as well as final mitigation and disposition of the resources, shall be subject to approval by the City. The project applicant shall make a one-time payment of curatorial fees for the storage of these resources in perpetuity.			
53.	Submit California registered civil engineer prepared street improvement plans to the Engineering Division for review and approval. Unless otherwise approved, the street improvement plans shall be approved concurrently with any street light, landscape and irrigation, and traffic signal plans. Street plans shall include: a. Right-of-way dedication to allow three (3) eastbound traffic lanes and a bike lane on Archibald Avenue, consistent with the City of Eastvale General Plan. b. Pedestrian improvements including curb, gutter, sidewalk, landscaping, and curb ramps in compliance with ADA requirements and Riverside County Standard Plans and Specs. c. Any necessary power pole undergrounding. d. Utility Improvements. e. Traffic signal relocation and modification. f. Striping and signage plan. g. Storm drain improvement plan.	Prior to issuance of Building Permits	Public Works Department	
54.	Submit California registered civil engineer or traffic engineer prepared traffic striping and signage plans for review and approval. All required traffic thermoplastic striping and signage improvements shall be completed concurrently with street improvements to the satisfaction of the City Engineer.	Prior to issuance of Building Permits	Public Works Department	
55.	Submit photometric of street lighting. All lights shall be Edison LS-3 tariff and utilize General Electric Evolve LED luminaires per City Specifications. The developer shall be responsible for applying with Southern California Edison (“SCE”) for all appropriate service	Prior to issuance of Building Permits	Public Works Department	

	points and electrical meters early in the process to avoid delays. The developer must pay for the electrical service of new meter pedestals installed until such time the improvements have been accepted and the underlying property is annexed into LMD/CFD.			
56.	The public street improvements outlined in these conditions of approval are intended to convey to the developer an accurate scope of required improvements; however, the City Engineer reserves the right to require reasonable additional improvements as may be determined in the course of the review and approval of street improvement plans required herein.	Prior to issuance of Building Permits	Public Works Department	
57.	The Precise Grading/Paving Plan shall be prepared in accordance with the City of Eastvale Grading handout and City Engineer approved prior to issuance of a grading permit.	Prior to issuance of Building Permits	Public Works Department	
58.	A WQMP and Storm Water BMP Transfer, Access and Maintenance Agreement shall be required, obligating the property owner(s) to appropriate operation and maintenance obligations of on-site BMPs constructed pursuant to the approved WQMP. The WQMP and Storm Water BMP Transfer, Access and Maintenance Agreement shall be approved prior to issuance of a building permit and shall be Public Works Staff recorded at the Riverside County Recorder's Office prior to issuance of a Certificate of Occupancy.	Prior to issuance of Building Permits	Public Works Department	
59.	Provide pad elevation certifications for all building pads in conformance with the approved Precise Grading Plan to the Engineering Division prior to construction of any building foundation.	Prior to issuance of Building Permits	Public Works Department	
60.	The developer shall connect to the JCSD sewer system and apply for a sewer connection account with JCSD.	Prior to issuance of Building Permits	JCSD	

DRAFT

61.	Submit California registered civil engineer prepared sewer improvement plans to the JCSD/Engineering Division. The plans shall be JCSD approved prior to issuance of any building permits.	Prior to issuance of Building Permits	Public Works Department and JCSD	
62.	The developer is advised that domestic water service is provided by JCSD. The developer shall be responsible for coordinating with JCSD and complying with all requirements for establishing domestic water service to the property.	Prior to issuance of Building Permits	JCSD	
63.	The developer shall pay all necessary impact and mitigation fees required. These fees include, but are not limited to, fees associated with Transportation Uniform Mitigation Fee (TUMF), Road Bridges Benefit District (RBBD) Fees, Quimby (parkland in-lieu) Fee, ADP and City Development Impact Fees.	Prior to issuance of Building Permits	Building Division	
64.	All construction shall comply with the most recently adopted City and State building codes: 2022 California Building Code 2022 California Residential Code 2022 California Electrical Code 2022 California Mechanical Code 2022 California Plumbing Code 2022 California Fire Code 2022 California Green Code	Prior to issuance of Building Permits	Building Division	
65.	Special Inspections-As California Building Code Section 1704 indicates, the owner shall employ one or more special inspectors who shall provide special inspections when required by CBC Section 1704.	Prior to Building Permits	Building Division	
66.	The Title Sheet of the plans shall include: Occupancy Group	Prior to Building Permits	Building Division	

DRAFT

	Occupant Load Description of use Type of Construction Height of Building(s) Floor area of building(s) and/or occupancy group(s)			
67.	The project applicant is required to pay school impact fees. California Government Code Section 65996 indicates that payment of school impact fees is considered full mitigation for project impacts to a school district.	Prior to issuance of Building Permits	Building Division and Corona Norco Unified School District	
68.	Dimensioned building setbacks, property lines, street centerlines, and between buildings or other structures shall be designed on the plot plan.	Prior to issuance of Building Permits	Building Division	
69.	The project design will conform to energy conservation measures articulated in Title 24 of the California Code of Regulations and address measures to reduce energy consumption, such as flow restrictors for toilets, low-consumption light fixtures, and insulation. It shall also use drought landscaping to the extent feasible.	Prior to issuance of Building Permits	Building Division	
70.	The plot plan must show all property lines and easements, and a statement stating that such lines and easements are shown is required.	Prior to issuance of Building Permits	Building Division	
71.	Per the Business and Professionals Code, a design professional will be required to prepare plans for proposed improvements at the time of construction drawings.	Prior to issuance of Building Permits	Building Division	
72.	Public and private site improvements shall be designed per the Americans with Disabilities Act and Chapter 11 of California Building Code. The site plan shall include a site accessibility plan identifying exterior routes of travel and detailing running slope, cross slope, width, pedestrian ramp, curb ramps, handrails, signage, and	Prior to issuance of Building Permits	Building Division	

	truncated domes. Path of travel shall be provided form the public right of way and accessible parking to the building. The design professional shall ensure that the site accessibility plan complies with the latest Federal and State regulations.			
73.	The project applicant will be required to comply with the recommendations of the Riverside County Waste Management Department and all federal, State, and local statutes and regulations related to solid waste, including the Solid Waste Reuse and Recycling Access Act of 1991.	Prior to issuance of Building Permits	Waste Management	
74.	The project applicant, developer, or successor in interest shall provide written verification that the Jurupa Community Services District can and will provide potable water service to the project.	Prior to issuance of Building Permits	Building Divisions	
75.	A Final Site Plan of Development shall be approved prior to issuance of any building permits. The Final Site Plan of Development shall include but is not limited to the following: a. Master home plans and elevations. b. Dimensioned site plan showing, but not limited to, the following: o Setbacks o Location of mailboxes c. Final grading plan d. Landscape and irrigation plans for private, common, and public areas e. Wall and fence plans f. Photometric Lighting Plan to ensure proper outdoor light, pursuant to City of Eastvale Municipal Code Section 120.05.050, Outdoor Lighting	Prior to Issuance of Building Permit	Planning Department	

DRAFT

76.	Construction and architectural detailing shall be in substantial conformance with the approved plans, including but not necessarily limited to elevation drawings and material/colors sample board, submitted as part of this application and as approved by the City Council.	Prior to Issuance of Building Permits	Planning Division	
77.	Any future modification to the building colors or architectural style approved by the City Council shall be subject to review and approval by the Community Development Director. At the Community Development Director's discretion, proposed color or architectural style modifications may be referred to the City Council for Major Development Review approval.	Prior to Issuance of Building Permits	Planning Division	
78.	Final plotting of homes on lots within Major Development Review (PLN24-20053) shall be subject to review and approval by the Planning Division.	Prior to Issuance of Building Permits	Planning Division	
79.	An even mix of exterior façade treatments, colors, and roof tile colors shall be used on the homes approved per this Major Development Review to the satisfaction of the Community Development Director. Applicant shall provide a tabulation of proposed architectural styles and colors schemes to be implemented on lots for review and approval by the Planning Division prior to issuance of building permits.	Prior to Issuance of Building Permits	Planning Division	
80.	Mailboxes shall be designed, installed and located by the developer to the satisfaction of the Community Development Director.	Prior to Issuance of Building Permits	Planning Division	
81.	Any future entry monumentation into the development of Vesting Tentative Tract Map 39022 shall be subject to review and approval by the Community Development Director and the City Traffic Engineer prior to issuance of a building permit.	Prior to Issuance of Building Permits	Planning Division	

DRAFT

82.	All mechanical equipment, including but not limited to HVAC units, shall be screened from public view and sound buffered from adjacent properties to the satisfaction of the Community Development Director and Building Official	Prior to Issuance of Building Permits	Planning and Building Divisions	
83.	The master conceptual wall and fence plan approved by the City Council as part of **PLN24-20053** shall serve as the master plan of development for community walls and fences within VTTM 39022. The final design and location of project walls and fences shall be subject to review and approval of the Community Development Director.	Prior to Issuance of Building Permits	Planning Division	
84.	A digital copy of construction landscape plans shall be submitted to the Planning Division for review and approval. The plan shall be certified by a licensed landscape architect as required, taking into account approved preliminary landscape plan (if any), adopted plant alette guides, applicable scenic and specific plan requirements, and water conservation measures. **This submittal shall be made to the Planning Division with the appropriate Application and fee.**	Prior to Issuance of Building Permits	Planning Division	
85.	The above-described plans shall be in substantial conformance with the conceptual landscape plans as approved by the City Landscape Architect, City Administrative staff, Planning Commission and/or City Council. Notes, details, and specifications shall be included.	Prior to Issuance of Building Permits	Planning Division	
86.	All landscape and irrigation plans shall be consistent with the Eastvale Municipal Code Chapter 14.24, Water Conservation for Landscaping, and Chapter 120.05.040, Landscape Requirements.	Prior to Issuance of Building Permit	Planning Division	
87.	Landscape construction plans shall be drawn at a scale of 20 feet equal to 1 Inch or larger. The city will not accept plans drawn at 30 feet scale or smaller. Plans set shall include a title sheet with all project information, construction plans and details, irrigation plans and details, planting plans and details and a photo exhibit sheet of selected planting palettes for communication of the palette and plants	Prior to Issuance of Building Permit	Planning Division	

	form, size, and character, in addition to site features and material to express design intent.			
88.	Concrete mow curbs shall be required at edges defining maintenance responsibility such as property boundaries in frontage areas and for separating turf or groundcover from shrub areas.	Prior to Issuance of Building Permit	Planning Division	
89.	Planting shall offer horizontal and vertical variation in form, texture, and scale and shall include multiple species to prevent against loss of a monoculture of a single species from species specific pest or other cause.	Prior to Issuance of Building Permit	Planning Division	
90.	Canopy shade trees fully surrounded by hardscape shall be, based on the direction of the City Landscape Architect required to have special planting techniques including, specialized soil mixes, geotechnical support structures, or other instruments for maintaining uncompacted and healthy soil root zones for the trees needs based on species or size required and site-specific characteristics.	Prior to Issuance of Building Permit	Planning Division	
91.	No light fixture, electric transformer, fire detector check, fire hydrant, or other utilities shall be designed for any location in a planting area, which would make it necessary to eliminate a tree. All overhead light fixtures and utilities shall be identified on the grading and site plans. Utilities shall be screened appropriately with landscaping. Any trees that are determined to be in conflict through the design development process shall be relocated to keep the same quantities shown on the approved entitlement plan, this shall include adjusting, adding, and revising or creating additional planting areas to support the total required number.	Prior to Issuance of Building Permit	Planning Division	
92.	All trees shall be double staked with vinyl type ties nailed to the lodge pole stakes in at least two vertical locations. Trees in high wind corridors or trees requiring special support measures shall require additional staking and or specialized staking material as needed.	Prior to Issuance of Building Permit	Planning Division	

DRAFT

93.	Root barriers shall be installed for all trees planted within 5 feet of hardscape, paving, or walls/ structures. All trees requiring root barriers shall extend 10' from the center of the trunk in either direction and be a minimum of 24" deep.	Prior to Issuance of Building Permit	Planning Division	
94.	Any water quality basins shall utilize hand planted shrubs and ground cover on all slopes. The bottom of the basin shall be as planted as recommended by the WQMP and approved by the City Landscape Architect.	Prior to Issuance of Building Permit	Planning Division	
95.	All irrigation in shrub areas shall be designed and installed using drip irrigation. A weather-based smart irrigation controller shall be installed that measures evapo-transpiration. A rain shut off device shall be installed free of overhead obstruction and connected with the irrigation controller in addition to a master valve, flow sensor and separate Landscape water meter are required in addition to the above for all projects with landscape areas above 2500 square feet.	Prior to Issuance of Building Permit	Planning Division	
96.	A water conservation statement shall be included in the landscape documentation package as well as Irrigation schedules for both establishment and maintenance, maintenance schedule, soil management plan (Soil test and recommendations) and the requirement for a third-party water audit of the installed irrigation system prior to final sign off.	Prior to Issuance of Building Permit	Planning Division	
97.	All plants shall be hydrozoned from low to medium water use according to WUCOLS IV as a general guide.	Prior to Issuance of Building Permit	Planning Division	
98.	Suggested irrigation and planting maintenance schedules shall be included for compliance with MWELO requirements.	Prior to Issuance of Building Permit	Planning Division	
99.	A soil management plan shall be included for compliance with MWELO requirements.	Prior to Issuance of Building Permit	Planning Division	

100	A digital PDF reduced to the smallest size shall be submitted and approved by the Planning Division and the City Landscape Architect once the Entitlement process has been completed. A licensed Landscape Architect shall prepare and sign/ certify the plans.	Prior to Issuance of Building Permit	Planning Division	
101	Any plans that include areas to be classified as a Landscape Maintenance District or similar instrument to be maintained by the City shall be required to meet the most current Riverside County Transportation and Land Management Agency- Standards and Specifications (https://trans.rctlma.org/landscaping) per Public Works direction.	Prior to Issuance of Building Permit	Planning Division	
102	The above-described plans shall be in substantial conformance with the adopted city ordinances and or requirements as approved by the City Landscape Architect, City Planning Staff, Planning Commission and/or City Council. Notes, details, and specifications shall be included.	Prior to Issuance of Building Permit	Planning Division	
103	City required inspection schedule and signature block shall be included in the plans and be located on the tittle sheet.	Prior to Issuance of Building Permit	Planning Division	
104	All fertilizers and soil amendments used during planting preparation and installation shall be derived from organic based materials as a best management practice for storm water source control. Mycorrhizae and humate shall be incorporated into each plant pit in accordance with the manufacturer's specifications and the recommendations of the soil management plan.	Prior to Issuance of Building Permit	Planning Division	
105	A copy of the soil fertility recommendations and soil management plan specified using organic fertilizers and soil amendments shall be included on the first submittal of the landscape plans unless extensive grading is anticipated. In that case the landscape contractor shall provide the soil fertility recommendations and soil management plan prior to the pre-job meeting on site.	Prior to Issuance of Building Permit	Planning Division	

DRAFT

106	The City Landscape Architect shall meet with the job site superintendent and the landscape contractor for a pre-job meeting. Copies of required landscape submittals shall be presented for approval including soil test results per the soil management plan. The overall inspection schedule shall be reviewed, and all procedures shall be reviewed. No landscaping shall occur prior to the meeting.	Prior to Issuance of Building Permit	Planning Division	
107	The Applicant shall submit a set of development plans, including a lighting plan, to the Eastvale Police Department for review and approval for appropriate safety measures including, but not limited to, the following: PROPERTY GATES AND KNOX BOX ENTRY a. The installation of the Knox Rapid Entry System if property gates are installed. This system permits law enforcement, fire, and first responders to obtain independent access to the property in the event of an emergency. The necessary order forms for the Knox Company may be obtained by contacting the Jurupa Valley Sheriff's Station Crime Prevention Programs Coordinator at (951) 955-9225. ADDRESS NUMBERING: b. Prominently displayed address numbering in size and contrasting in color from the building façade or on a fixed sign near the street/main entrances. The numbers need to be visible from the street and interior property sides for any approaching emergency vehicles. No obstructions should limit their visibility (i.e., landscaping). SECURITY AND LIGHTING PLAN c. Adequate crime prevention measures to assist with identifying any suspect(s) of any potential future vandalism or theft attempts. Due to the high possibility of theft/vandalism attempts during construction, additional	Prior to Issuance of Building Permit	Building and Police Departments	

	security measures should be added during that time frame of proposed construction. All exterior access points should be properly illuminated to make clearly visible any person on or about the premises during the hours of darkness. Residential units shall be equipped with solid core doors and quality dead bolt locking devices at entry points.			
108	Prior to building plan approval and construction, applicant/developer shall route a copy of the Water Improvement Plans (offsite) to the Fire Department for review of hydrant placement only. Water Improvement Plans (offsite) will not be reviewed or approved for the installation of onsite Private Fire Service Mains, private hydrants, or fire sprinkler system supplies. The private fire service main installing contractor shall submit a separate set of working plans designed in accordance with NFPA 13 and NFPA 24 to the Fire Department for a permit to install private water mains	Prior to Building Permit Issuance	Riverside County Fire Department	
109	The applicant must provide a fire hydrant system capable of delivering fire flow as required by the California Fire Code and Fire Department standards. Fire hydrants shall be spaced in accordance with the California Fire Code. Submit plans to the water district for review and approval prior to building permit issuance.	Prior to Building Permit Issuance	Riverside County Fire Department	
110	Fire apparatus access roads shall be at least 24 feet wide and comply with Riverside County Fire Department Guideline OFM-01A. Access roads shall be located outside of truck docks and between 15-40 feet from the building. Access roads shall not have a grade more than 16 percent and shall have an unobstructed vertical clearance not less than 13 feet and 6 inches. Access lanes will be designed to withstand the weight of 80,000 pounds. Apparatus weight is distributed as 55,000 pounds on tandem rear axles and 25,00 pounds on the front acle. Fire apparatus access roads shall have a turning radius capable of accommodating fire apparatus.	Prior to Building Permit Issuance	Riverside County Fire Department	

DRAFT

111	The surface shall be designed, constructed, and maintained to provide all-weather driving capabilities. A letter or statement, wet-stamped and signed by a registered engineer, shall be provided on the plans certifying that any new road meets this 80,000, all weather requirement. Road base without an appropriate topping or binding material does not satisfy the all-weather requirement.	Prior to Building Permit Issuance	Riverside County Fire Department	
112	Driveway loops, fire apparatus access lanes and entrance curb radius should be designed to adequately allow access of emergency fire vehicles. The applicant or developer shall include in the building plans the required fire lanes and include the appropriate lane printing and/or signs.	Prior to Building Permit Issuance	Riverside County Fire Department	
113	A construction phasing plan shall be submitted to the Fire Department for review and approval prior to building permit issuance.	Prior to Building Permit Issuance	Riverside County Fire Department	
114	The applicant shall provide specific fire department conditions on plans for building permit submittal	Prior to Building Permit Issuance	Riverside County Fire Department	
115	Plans should reflect that all street lights and other outdoor lighting are hooded or shielded to prevent either the spillage of lumens or reflection into the sky or above the horizontal plane.	Prior to Issuance of Building Permit	Planning Division	
Prior to Issuance of Certificate of Occupancy				
116	Any approval shall not be final until and unless the applicant's deposit account with Public Works has a balance of at least $10,000 to cover staff time to follow-up, monitoring, and other post-approval work by staff. The City reserves the right to request additional deposits to cover post-approval staff work and to half work if the deposit account is exhausted.	Prior to Issuance of Certificate of Occupancy	Public Works Department	

DRAFT

117	A copy of the covenants, conditions, and restrictions (CC&R's) shall be submitted to the Community Development Director for review and approval, prior to execution.	Prior to Issuance of Certificate of Occupancy	Planning Division	
118	Applicant shall include notification within the CC& R's as well as within the project sales office informing potential homeowners that landscaping within City or H.O.A.-maintained areas is not to be modified in any way by the homeowner, without express authorization by the entity (either the City or H.O.A) responsible for maintain said landscape.	Prior to Issuance of Certificate of Occupancy	Planning Division	
119	Prior to the request for final inspection the Applicant shall have completed the installation of all landscape items, passed all construction sequence inspections in addition to having a completed 3rd party water audit with report, as built documents, controller charts submitted and approved prior by the City Landscape Architect. Failure to do so will result in delays for final inspection and or sign off.	Prior to Issuance of Certificate of Occupancy	Planning Department	
120	All parkway landscaping shall be guaranteed for a period of one (1) year from the date of the City Engineer acceptance. Any landscaping that fails during the one (1) year landscape maintenance period shall be replaced with similar plant material to the satisfaction of the City Engineer.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
121	The development shall be annexed into all applicable CFD and/or LMD for traffic signals, street lights, full capture systems for all storm drains and landscape maintenance of raised landscape median and public parkways, to the satisfaction of the City Engineer or otherwise form a district where one is not currently in place.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
122	All existing overhead utility lines shall be undergrounded within the project frontage(s). Utility undergrounding shall extend to the nearest off-site power pole. Unless City Engineer approved, no new power poles shall be installed. A letter from the owners of the affected utilities shall be submitted to the City Engineer prior to	Prior to Issuance of Certificate of Occupancy	Public Works Department	

	approval of the Precise Grading/Paving Plan, informing the City that they have been notified of the City's utility undergrounding requirement and their intent to commence design of utility undergrounding plans. When available, the utility undergrounding plan shall be submitted to the City Engineer identifying all above ground facilities in the area of the project to be undergrounded.			
123	Upon City Engineer approval of any improvement plan, the improvement plan shall be provided to the City in digital format, consisting of a DWG (AutoCAD drawing file), DXF (AutoCAD ASCII drawing exchange file), and PDF (Adobe Acrobat) formats. Variation of the type and format of the digital data to be submitted to the City may be authorized, upon prior City Engineer approval.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
124	Prior to issuance of a certificate of occupancy or final City approvals, demonstrate that all structural BMP's have been constructed and installed in conformance with approved plans and specifications, and as identified in the approved WQMP.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
125	Provide certification from JCSD to demonstrate that all water and/or wastewater service accounts have been documented.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
126	All damaged, destroyed, or modified pavement legends, traffic control devices, signing, striping, and street lights, associated with the proposed development shall be replaced.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
127	Remove existing and construct new pavement with a minimum pavement section matching that new section to the southwest on Archibald with a minimum subgrade of 24 inches at 95% relative compaction, or equal, along the entire half-width street frontage in accordance with City of Eastvale Standard Drawings. The pavement section shall be determined using appropriate Traffic Index ("TI") accepted by the City Engineer. A California registered Geotechnical Engineer shall design the pavement section using "R" values from the project site and submitted to the City Engineer for approval.	Prior to Issuance of Certificate of Occupancy	Public Works Department	

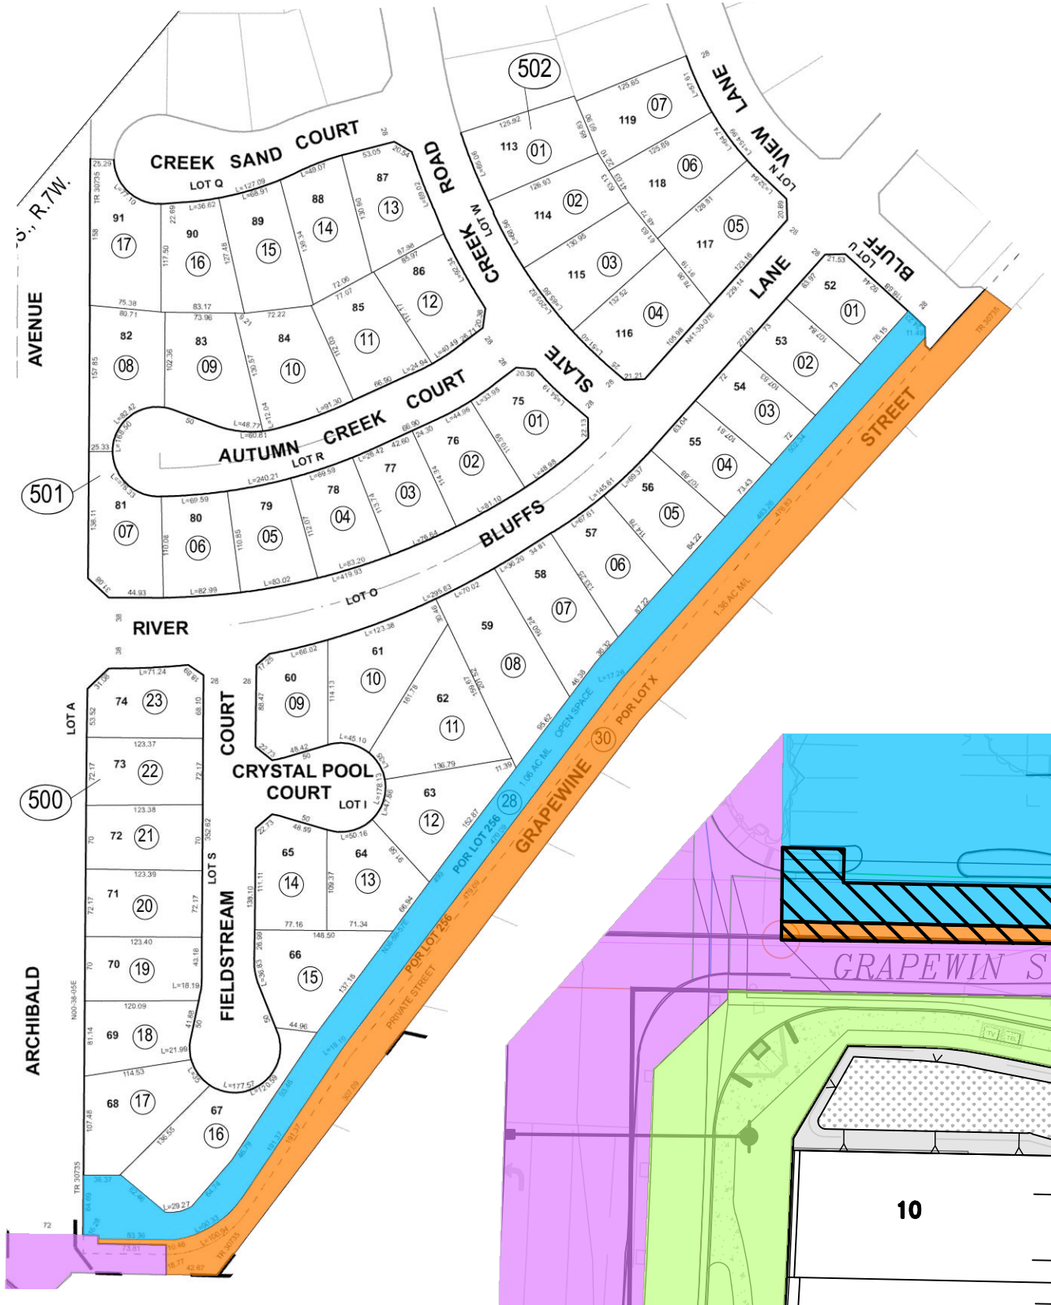
	Alternatively, depending on the existing street condition and as approved by the City Engineer, a street overlay, slurry seal, or other repair can be performed to preserve recent pavement improvements.			
128	Construct an Americans with Disabilities Act (ADA) compliant sidewalk behind curb along the entire frontage in accordance with the General Plan, any Specific Plan, the City of Eastvale Standard Drawings, subject to the approval of the City Engineer.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
129	Install PTZ cameras at each intersection to monitor traffic.	Prior to issuance of Certificate of Occupancy	Public Works Department	
130	Install License Plate Reader Cameras to tie-into the existing Citywide system at each traffic signal servicing the property.	Prior to issuance of Certificate of Occupancy	Public Works Department	
131	Install conduit for fiber optic along the Archibald frontage per City's standard.	Prior to issuance of Certificate of Occupancy	Public Works Department	
132	Install Class I bicycle lanes along Archibald Avenue.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
133	Relocate traffic signal and replace all necessary components to accommodate new street right of way.	Prior to issuance of Certificate of Occupancy	Public Works Department	
134	Construct a City Engineer approved commercial driveway approach for the main entrance on Archibald in accordance with City of Eastvale Standard Drawings. The emergency vehicle access driveway approach shall be constructed as a limited access curb to discourage use, the top of “X” shall be a minimum 5 feet from the property line. Nothing shall be constructed or planted in the corner	Prior to Issuance of Certificate of Occupancy	Public Works Department	

DRAFT

	cut-off area which does or will exceed 30 inches in height required to maintain an appropriate corner sight distance.			
135	The developer shall be responsible for coordinating with Riverside Transit Authority (RTA) regarding the location of existing, proposed, and future bus stops along the property frontage of all public streets. The developer shall design street and sidewalk improvements in accordance with the latest RTA bus stop guidelines and in compliance with current accessibility standards pursuant to the Americans with Disabilities Act (ADA) requirements. The developer shall design all bus stops to accommodate the RTA Shelters. The developer shall submit to Public Works verification from RTA acknowledging concurrence with the existing, proposed, and future bus stop improvements in conformance with the Premium Shelter design guidelines.	Prior to issuance of Certificate of Occupancy	Public Works Department	
136	Construct a curb ramp meeting current California State Accessibility standards along both sides of the commercial driveway approach. The developer shall ensure that an appropriate path of travel, meeting ADA guidelines, is provided across the driveway, and shall adjust the location of the access ramps, if necessary, to meet ADA guidelines, subject to the approval of the City Engineer. If necessary, additional pedestrian and sidewalk easements shall be provided on-site to construct a path of travel meeting ADA guidelines.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
137	Reconstruct Archibald Avenue to the centerline of the Street. Edge cuts shall line up with lane lines. No additional crown lines shall be added to any public street. All public streets shall have consistent cross slope.	Prior to Issuance of Certificate of Occupancy	Public Works Department	
138	Applicant shall participate in the final adopted program with regards to providing a non-potable water supply source and related infrastructure improvements for parks and green belt areas.	Prior to Issuance of Certificate of Occupancy	JCSD	

General Compliance Items/Requirements and Information

The following items are noted for the applicant's information. These items are required by the City, other local agencies, or state and federal agencies, and are not conditions of approval of the project.



The applicant shall obtain City approval for any modifications or revisions to the approval of this project. Deviations not identified on the plans may not be approved by the City, potentially resulting in the need for the project to be redesigned. Amended entitlement approvals may be necessary as a result.

Should this project lie within any assessment/benefit district, the project proponent shall, prior to acceptance of improvements, make application for and pay for their reapportionment of the assessments or pay the unit fees in the benefit district unless said fees are otherwise deferred.

Fehr & Peers

Memorandum

Date: May 12, 2025

To: Brian Sandona, P.E. City of Eastvale

From: Paul Herrmann, P.E.
Joshua Geronimo

Subject: Archibald Avenue Housing Development Access Review

Fehr & Peers was retained by the City of Eastvale (City) for transportation engineering peer review services. This memorandum was motivated by resident concerns over access to a proposed Archibald Avenue Housing Development project (Project). This memorandum reviews the proposed access against applicable design standards and determines that the driveway placement is consistent with typical practice.

Project Description

The Project is a 76 single family unit residential development located at the southeast corner of Archibald Avenue and Grapewin Street/Wind River Road intersection. Access to the Project is proposed to be a right-in/right-out driveway approximately 350' south of the Archibald Avenue and Grapewin Street/Wind River Road intersection. The Project will maintain the existing median on Archibald Avenue and will not provide left- in/left-out access. The City's General Plan Circulation Element classifies Archibald Avenue as an Urban Arterial and has a posted speed limit of 50 miles per hour.

Driveway Access Considerations

Riverside County Transportation Design Standards

As the Project's driveway is proposed as an unsignalized intersection, Riverside County Standard 208 is the best available guidance and states, "No portion of any drive approach shall be permitted within 150' of the flowline of an intersecting street or as approved by the Director of Transportation." Given the distance between Grapewin Street and the Project driveway exceeds County Standard 209's intersection spacing requirement by nearly 200', access to the Project meets County standards.

Right In/Right Out Access

The Project proposes the project access intersection as right-in/right-out. Right-in/right-out intersections eliminate major conflict points created by left turns and reduces the total conflict points from nine to two (Oregon Department of Transportation, 1998). In particular, maintaining the continuous Archibald Avenue median restricts left-turn movements to and from the driveway. This eliminates the need for drivers to cross several lanes with up to 50 miles per hour oncoming traffic.

Intersection Control

Given the relatively small trip generation from the development, intersection signalization is not appropriate as it would not meet a traffic signal or all-way stop warrant, per the California Manual on Uniform Traffic Controls (CA MUTCD). The current site plans show no intersection controls, but a stop sign at driveway egress may be appropriate as a Condition of Approval to force departing drivers to fully examine gaps between oncoming Northbound traffic prior to turning onto Archibald Avenue.

Sight Distance

Providing appropriate stopping sight distance is critical in roadway design to ensure drivers have sufficient time to react to hazards and avoid collisions. The driveway should be reviewed to ensure that appropriate sight distance is provided and the length of roadway is visible to a driver ahead (clear sight triangles). Any obstructions within the line of sight from the driveway should be removed.

Conclusion

The proposed Project access satisfies local and state intersection spacing considerations and proposes industry best practices to manage access to the unsignalized driveway.

Request

1. City Council finds the project exempt from CEQA pursuant to CEQA Guidelines Section 15183 based on the findings and conclusions provided in the Exemption Determination Report, attached hereto and the conclusion that the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR (State Clearinghouse No. 20222080090);

2. City Council approve the Density Bonus Agreement between Warmington Residential California, Inc. and the City of Eastvale;

3. Authorize City Manager or designee to execute Resale Restriction Agreement and related documents between the City and initial homeowner(s) of inclusionary units;

4. City Council approve Vesting Tentative Tract Map No. 39022 to subdivide three (3) existing residential lots totaling 8.3-acres (7.9 net acres) into 76 residential lots, four (4) for water quality and open space purposes and five (5) for private street purposes, subject to conditions of approval; and

5. City Council approve the Major Development Review for the master building architecture and site planning of 76 single-family residential lots, landscaping, and parking areas, subject to conditions of approval.

City Council Concerns

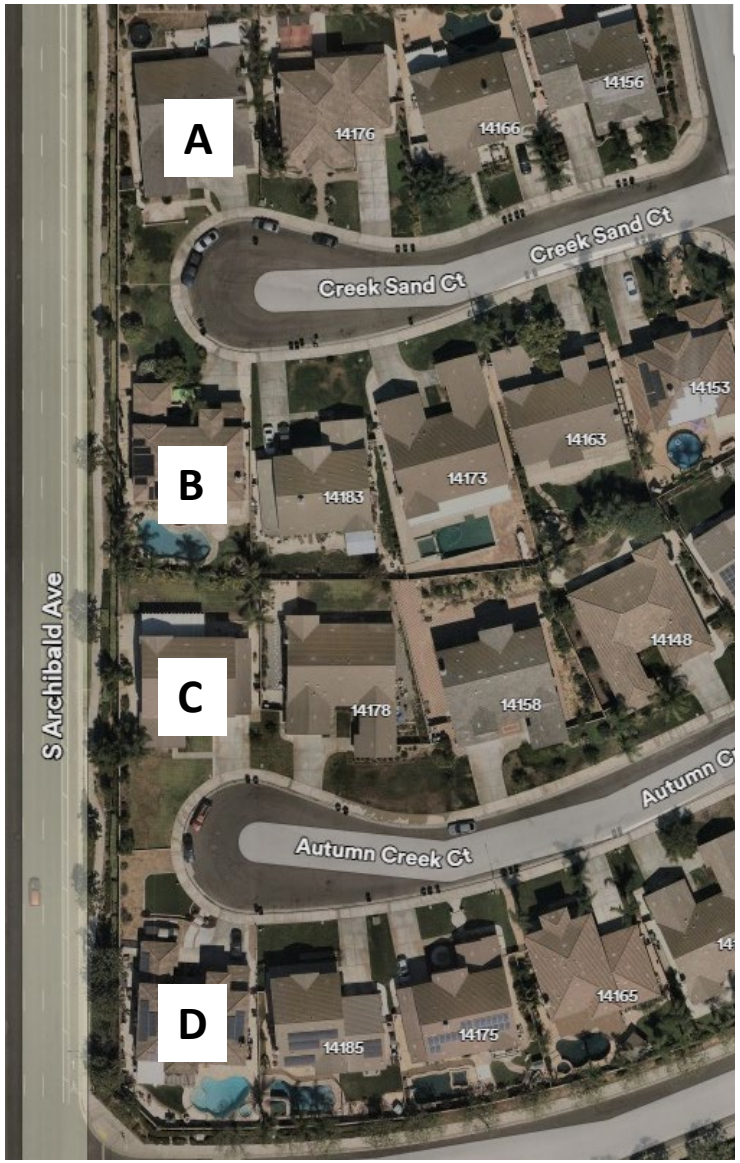
1. Driveway Access/Proximity to Intersection and Traffic Safety
2. Proximity of Residential Units to Archibald Avenue
3. Grapewin Street Access
4. Onsite Parking
5. Priority to Eligible Eastvale Residents

“Specific, Adverse Impact”

The Housing Accountability Act defines a “specific, adverse impact” as:

“a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete.”

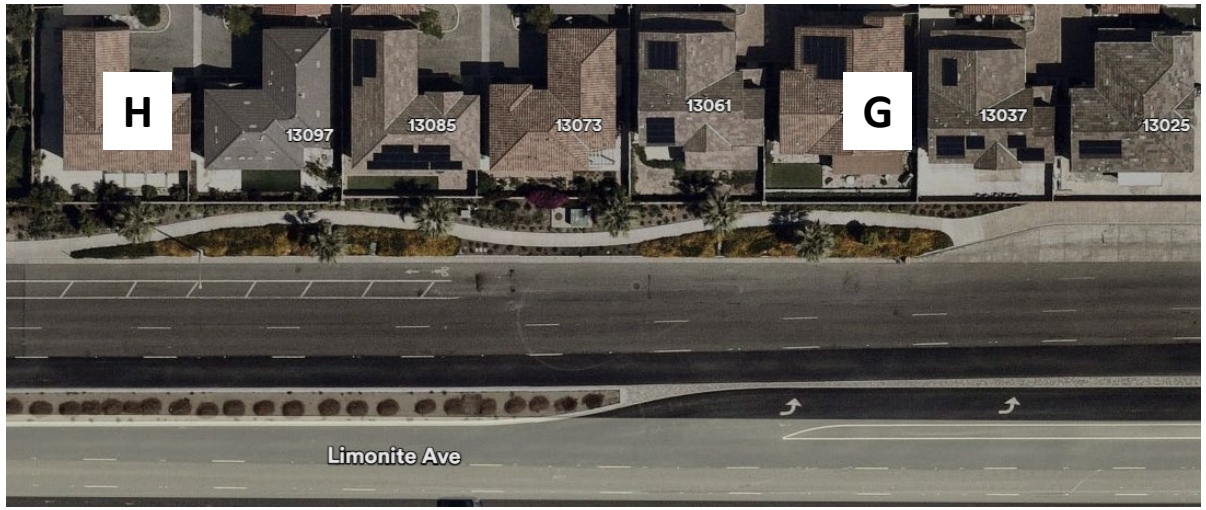
Driveway Access/Proximity to Intersection and Traffic Safety



Proximity of Residential Units to Archibald Avenue

A. 14196 Creek Sand Court
   - Side yard setback of 9 ft.

B. 14193 Creek Sand Court
   - Side yard setback of 8 ft.



C. 14198 Autumn Creek Court
   - Side yard setback of 12 ft.

D. 141965Autumn Creek Court

Tel:(951) 688-0241 • Fax:(951) 688-0599

Parking

- **Eastvale Zoning Code Section 120.05.060:**
  - Each single-family residential unit is required to provide 2 covered spaces
    - Project Specific:152 parking spaces (76 units x 2 garage spaces)
- **State Density Bonus Law**
  - Limits the City from requiring more than 2.5 parking spaces for a four-bedroom unit
    - Project Specific: 190 parking spaces (76 units x 2.5 parking spaces)
- **Proposed Parking**
  - Two car garage and two driveway spaces (minimum of 8.5’ x 18’ per space)
    - Four parking spaces per unit or 304 parking spaces (4 spaces x 76 units)
  - 10 parallel on street parking spaces
  - **Total of 314 parking spaces provided**

Eastvale Resident Priority

4. Restricted Units, Income Categories.

Developer agrees for itself and its successors and assigns to give priority to Eligible Households that currently reside in the City of Eastvale in the purchase of the Restricted Units, to the extent permissible under applicable state and federal laws and regulations.

Environmental Review

- March 27, 2024, City Council adopted the Eastvale 2040 EIR
- The proposed project does not exceed the previously analyzed development in terms of size or intensity of use.
- The proposed project remains consistent with the analysis of the General Plan EIR.
- Site specific analysis: Biological Resources, Cultural and Tribal Cultural Resources, Paleontological Resources, Geology and Soils, and Hazards and Hazardous Materials.
- No additional environmental analysis is necessary.
- Site Development conditions included in the Exemption Determination Report are included as conditions of approval.

Recommendation

Staff recommends that the City Council take the following actions:

1. Find the project exempt from CEQA pursuant to CEQA Guidelines Section 15183 based on the findings and conclusions provided in the Exemption Determination Report, attached hereto and the conclusion that the proposed project would not result in new or more severe impacts to the environment beyond what was previously evaluated and disclosed by the General Plan EIR (State Clearinghouse No. 20222080090);
2. Approve the Density Bonus Agreement between Warmington Residential California, Inc. and the City of Eastvale;
3. Authorize the City Manager or designee to execute Resale Restriction Agreement and related documents between the City and initial homeowner(s) of inclusionary units;
4. Approve Vesting Tentative Tract Map No. 39022 to subdivide three (3) existing residential lots totaling 8.3-acres (7.9 net acres) into 76 residential lots, four (4) for water quality and open space purposes and five (5) for private street purposes, subject to conditions of approval; and
5. Approve the Major Development Review for the master building architecture and site planning of 76 single-family residential lots, landscaping, and parking areas, subject to conditions of approval.

CITY OF EASTVALE

AGENDA STAFF REPORT

City Council Meeting
PUBLIC HEARINGS
Agenda Item No. 12.2
May 28, 2025

Status of Vacant Positions as Required by Assembly Bill 2561 (AB2561)

Prepared By:

Maricela Mejia, Assistant Human Resources & Risk Management Director

Recommended Action(s)

Staff recommends that the City Council receive and file the 2025 Status of Vacant Positions as Required by Assembly Bill 2561.

Summary

On September 22, 2024, Governor Newsom signed Assembly Bill ("AB") 2561 into law to amend the Meyers-Milias Brown Act by adding Government Code Section 3502.3, imposing new obligations on public agencies related to tracking and presenting information on job vacancies at least once per fiscal year prior to the adoption of their respective budgets to report on vacancy levels, recruitment and retention efforts, and allow for participation by recognized bargaining units. The new law and the legal obligations took effect January 1, 2025.

Background

AB 2561 requires public agencies to:

- Report annually on vacancies, recruitment activity, and retention strategies.
- Identify any policies or practices that may hinder hiring or retention.
- Provide recognized bargaining units with an opportunity to present during the public hearing; and
- Upon request by a recognized bargaining unit with a vacancy rate of 20% or more, provide additional data, including applicant volume, hiring timelines, and efforts to improve compensation, benefits, and working conditions.

The City of Eastvale currently does not have bargaining units and is thus not required to meet the requirements pertaining to bargaining units but is still required to report annually and to identify items that may be hindering hiring or retention efforts.

Analysis

The City is committed to maintaining high service standards for its community and recognizes the critical role that qualified leadership and experienced professionals play in ensuring the effective delivery of municipal programs and services.

In response to ongoing organizational needs and the competitive labor market, the City has prioritized the recruitment and onboarding of highly qualified staff. The ability to fill key vacancies in a timely manner is essential to sustaining operational continuity, advancing strategic initiatives, and meeting community expectations. As such, the City has taken steps to enhance its recruitment and retention efforts and continues to adapt the process to the changing labor market.

As of May 15, 2025, the City has 71 full time equivalent budgeted positions and a vacancy rate of approximately 9.86% citywide. Vacancies arise from a range of factors, including retirements, promotions, resignations, and separations. The percentage discussed above translates to a total of 7 vacancies throughout the organization.

Table 1: Citywide Vacancies Effective May 15, 2025

Department or Division	# of Vacancies	# of Budgeted FTE's	% of Vacancies
City Manager	.5	2.5	7.0%
HR & Risk Management	.5	4.5	7.0%
Community Services & Recreation	0	5	0.0%
Government Services (GS)	0	1	0.0%
GS-Communication	0	2	0.0%
GS-City Clerk	0	3	0.0%
Finance	1	9	14.1%
Community Development	0	2	0.0%
Economic Development	0	3.5	0.0%
Planning	0	4	0.0%
Community Safety	0	5.5	0.0%
Building & Safety	0	5	0.0%
Code Enforcement	0	5	0.0%
PW/Engineering Admin	1	4	14.1%
Public Works	2	6	28.2%
Engineering	1	9	14.1%

CITYWIDE VACANCIES	6	71	8.45%

Recruitment Efforts:

The City is continuously recruiting and onboarding new hires, including full-and part-time personnel. In 2024, the City hired 27 new full-time employees. Between January 1, 2025, to May 15, 2025, the City hired 12 full-time employees. Although AB 2561 requires local agencies to present annually on the status of vacancies and efforts to recruit and retain staff, the City has always prioritized recruitments to fill vacancies, and retention efforts to minimize turnover. Table 2 below provides information regarding the number of applicants, recruitments, and hires for fiscal years 2022-2023 through 2024-2025 (through May 15, 2025).

The City casts a wide net in attracting qualified applicants and since the adoption of the recommendations for the Classification and Compensation Study, we have seen a tremendous increase in the quantity and quality of applicants for our roles.

Table 2: Total Number of Citywide Recruitments

Fiscal Year	Number of Applicants	# of Recruitments*	# of New Hires
2022-23	1110	28	21
2023-24	2349	28	21
2024-25 (through May 15, 2025)	4006	26	14

**The number of recruitments within a fiscal year will not always align with the number of hires in the fiscal year due to starting some of the recruitments near the end of the fiscal year. Some hires are brought it after the start of the new fiscal year.*

The City recognizes that recruitment is about identifying, attracting, and hiring the right people for the organization, and retention is about keeping employees engaged, satisfied, and committed to the organization in the long term. Both efforts are critical for the organization's success, especially in today's competitive job market. AB 2561 acknowledges that recruitment and retention is currently a challenge for public sector employers in California. In this regard, the City experiences similar challenges with respect to its recruitment efforts since it is competing for a limited pool of qualified candidates among other cities within the region. As discussed in further detail below, the City Council has taken proactive measures to support the City's recruitment and retention efforts by enhancing compensation levels, benefits, and supporting initiatives that enhance a better work-life balance for employees.

Retention Efforts:

Employee retention remains a central focus of the City's workforce strategy. In 2024, the City implemented several initiatives designed to improve employee satisfaction, promote longevity, and enhance professional growth. The City implemented the following retention efforts:

- Conducted a citywide classification and compensation study and implemented a compensation philosophy of positioning the city 10% ahead of market average for all positions

- Adopted multi-year cost of living adjustments of 3.5% over a three year period from FY 24-25 to FY 26-27
- Enhanced the City's benefits package to be more competitive and include comprehensive health benefits, retirement benefits, and work-life balance support.
- Continued employee recognition efforts through the City's Employee Recognition Committee including Employee of the Quarter, Employee of the Year, Years of Service, and other professional recognition events.
- Continued to offer training and development opportunities organization wide.

As part of the City's workforce planning and in alignment with AB 2561, the City continues to assess internal practices and workforce conditions to identify and address recruitment and retention efforts. This ongoing self-assessment helps the City to become an employer of choice, supports organizational resilience, and ensures effective delivery of public services.

Assembly Bill 2561: Vacancy Report

May 14, 2025

CITY OF EASTVALE

KINDNESS. GRIT. SOLUTIONS-DRIVEN.

What is AB2561

- Addition of Government Code Section 3502.3 to the Meyers-Milias Brown Act
- Obligation to track and present information on Job Vacancies, Recruitment & Retention Efforts
- Intended to enhance transparency and accountability in public agency staffing.

AB2561 Requirements

- Report Annually
- Identify Policies or Practices that may hinder hiring or retention
- Provide recognized bargaining units with opportunity to present during public hearing
- Upon request by a recognized bargaining unit with a vacancy rate of 20% or more, provide additional data, including applicant volume, hiring timelines, and efforts to improve compensation, benefits, and working conditions.
- The City does not currently have bargaining units

Vacancy Status

- Reporting date: May 15, 2025
- Number of FTE: 71
- Number of FTE vacancies: 6
- Duration of vacancies: Average of 92.07 days from job posting to hire date.
- Overall FTE vacancy rate: 8.45%

Recruitment Efforts

- Adoption of recommendations in the Classification & Compensation Study resulted in a tremendous increase in the quantity and quality of applicants.

Table 2: Total Number of City Recruitments

Fiscal Year	# of Applicants	# of External Recruitments*	# of New Hires	# of Internal Recruitments*	# of Promotions
2022-2023	1110	27	21	1	2
2023-2024	2349	27	21	1	2
2024-2025 (as of 5/15/2025)	4087	22	14	4	6

Retention Efforts

- Conducted a citywide classification and compensation study and implemented a compensation philosophy of positioning the city 10% ahead of market average for all positions
- Adopted multi-year cost of living adjustments of 3.5% over a three-year period from FY 24-25 to FY 26-27
- Enhanced the City's benefits package to be more competitive and include comprehensive health benefits, retirement benefits, and work-life balance support.
- Continued employee recognition efforts through the City's Employee Recognition Committee including Employee of the Quarter, Employee of the Year, Years of Service, and other professional recognition events.
- Continued to offer training and development opportunities organization wide.

Recommended Actions

Staff recommends that the City Council:

- Receive and file the 2024 AB2561 Vacancy Report

AGENDA STAFF REPORT

City Council Meeting
CITY COUNCIL BUSINESS
Agenda Item No. 13.1
May 28, 2025

Quarterly Economic Development Updates

Prepared By:
Alexander Fung, Economic Development Manager

Recommended Action(s)
Staff recommends that the City Council receive and file the report.

Summary
Based on the goals and priorities set by the City Council in the City's Strategic Plan, the City's Economic Development Division aims to develop, support, and implement programs directed at improving the business climate through efforts in business retention and expansion, small business development, neighborhood development, business finance, marketing, and technology transfer. The Division also leads special projects and programs that address the City's emerging challenges, promotes economic growth, and collaborates with other departments to support programs and initiatives that fund infrastructure and services.

Staff desires to provide the City Council with updates regarding the City's economic development efforts in the past several months.

Background
The 2023 Eastvale Strategic Plan has outlined specific actions for the City's Economic Development Team to support the City Council's goals. These actions include:

- Utilize software and technology to help attract and retain businesses (Level 1);
- Conduct monthly minitours in partnership with the Eastvale Chamber of Commerce (Level 1);
- Utilize business incentive programs to attract restaurants and businesses that align with community needs (Level 1);
- Connect with businesses and inform of resources and opportunities for growth and expansion

(Level 1);
- Enhance business attraction and retention by building and maintaining relationships with brokers, developers, and commercial property managers (Level 1);
- Develop campaigns targeting quality and unique businesses (Level 1);
- Update Zoning Code to support entitlement of high-quality businesses (Level 1);
- Create incentives for businesses and developers to create and display art within or outside their businesses (Level 2);
- Identify and utilize data analytics software to attract and retain businesses (Level 3); and
- Market Eastvale to attract businesses that generate sales tax at ICSC and other regional trade shows (Level 3).

In addition to the specific actions that were listed, the 2023 Eastvale Strategic Plan directs the Economic Development Team to implement programs and initiatives that support the following goals (Target B):

- Goal A: Attract and retain businesses that align with diverse community needs and provide choices;
- Goal B: Create "Destination Eastvale" with high-quality and unique businesses;
- Goal C: Develop branding and identity for Eastvale;
- Goal D: Develop strategies for business retention, business support, and business reward;
- Goal E: Diversify the housing stock with more options;
- Goal F: Implement strategies to retain local talent, such as increasing the number of local jobs and matching talent to businesses;
- Goal G: Reinvest in and revitalize existing shopping centers; and
- Goal H: Streamline the development process.

A copy of the 2023 Eastvale Strategic Plan can be found in Attachment 1.

Analysis

This section summarizes major updates regarding the City's Economic Development programs and initiatives for the past several months.

Awards and Recognition

This month, the City's Economic Development Team was proud to be recognized by the California Association for Local Economic Development (CALED) and received two merit awards from the organization. The 2025 CALED Awards recognized the City's Business First Walks, formerly known as the Monthly Business Walks, and the City's Staybridge Suites Project under the "Programs and Promotions" category. Both projects were successful examples that demonstrated the City's effective and efficient manners of carrying out economic development activities.

Business Attraction Analysis

With a limited amount of land and sites available, the Economic Development Team is exploring innovative ways to attract desirable businesses and high sales tax generating businesses for the City. Staff is currently performing a Business Attraction Analysis in partnership with HdL Companies to identify top sales tax generating businesses that are currently expanding in Southern California. The results of this study will guide the City's business attraction efforts for the next few years.

Business First Initiative

Staff will soon unveil several resources to enhance the City's efficiency, effectiveness, and service delivery for Eastvale's businesses as part of the Business First Initiative. The Economic Development Team is currently developing checklists, flowcharts, and short videos for businesses to further understand the City's inspection, plan checks, and submission processes. Additionally, a formal Concierge Program will be established to support businesses while their plans and documents are being reviewed by the City. These resources are scheduled to be unveiled by the end of June 2025. The Business First Initiative aims to further promote Eastvale as a genuine business-friendly city.

Business First Walks

Originally launched by the City's Economic Development Division, the Eastvale Business First Walks has since evolved to incorporate elected officials, Riverside County Workforce Development Board, Riverside County Sheriff's Department, Eastvale Chamber of Commerce, and Eastvale's Community Enhancement Volunteers. The program now features three distinct initiatives:

- Council Business Walks allow city staff to partner with the Eastvale Chamber of Commerce and Eastvale's City Council to visit the three most frequented businesses in each of Eastvale's shopping centers. The group also began visiting the "Legacy" and "Newest" businesses in each shopping center to further recognize local businesses for their accomplishments.
- Public Safety Walks involve city staff partnering with the Riverside County Sheriff's Department to share public safety enhancement recommendations with local businesses.
- Staff Business Walks offer an opportunity for City and County staff members to engage directly with the business community to strengthen connections and share important resources. Staff Business Walks include visitations to each and every business in Eastvale's shopping centers.

While these walks take place at various times in different shopping centers each month, they collectively make up Eastvale's Business First Walk program, emphasizing the importance of interagency and departmental collaboration.

Business Incentive Updates

The City currently operates two business incentive programs to support local businesses, which are the Business Incentive Loan Program and the Shopping Center License Plate Reader (LPR) Camera Grant Program. Information regarding both programs can be found on the City's website at https://www.eastvaleca.gov/business/resources.

On March 12, 2025, the City Council awarded up to $3,200 to support Lewis Retail Centers to install a total of four Flock Safety Cameras in Eastvale Gateway South, Hamner Place, and Marketplace at the Enclave. Additionally, the Economic Development Team is partnering with stakeholders to further highlight the City's Business Incentive Loan Program as a tool to attract additional upscale, high-end, or premium casual dining restaurants.

Community Development Block Grant

The City's Economic Development Team operates and manages the City's Community Development Block Grant (CDBG). According to federal law, CDBG funds are allocated by the U.S. Department of Housing and Urban Development for state and local governments to develop programs that improve economic development activities, revitalize neighborhoods, and improve community facilities. On November 8, 2023, the City Council voted to allocate $15,000 of the City's FY 2024-2025 CDBG funds to the Corona-Norco Family YMCA. As of this month, the Corona-Norco Family YMCA had successfully utilized its awarded funds.

Community Outreach and Engagement
The Economic Development Division actively partners with the Communications Division to ensure that important information is shared with local residents and businesses via the City's website, social media platforms, newsletters, and podcast episodes. The City's Economic Development Webpage, which can be accessed via https://www.eastvaleca.gov/business, includes various resources for businesses and individuals who are interested in starting businesses in Eastvale.

The City celebrated the 2025 Economic Development Week earlier this month and featured various social media contents regarding the City's business attraction activities. Residents and stakeholders who are interested in learning more can visit the City's website at https://www.eastvaleca.gov/business/resources/how-the-city-attracts-businesses-what-it-means-for-the-community#!/.

The Economic Development Team also fosters and maintains a close partnership with neighboring cities' economic development teams, key community organizations such as the Eastvale Chamber of Commerce, and federal, state, and county economic development organizations and alliances. These relationships allow the City to expand its networks and inform partners of available retail and development opportunities in Eastvale.

Furthermore, the Economic Development Team strives to increase its presence in major city events, with the goal of educating residents, businesses, and visitors about Eastvale's economic development programs and available development opportunities. Staff recently participated in the 2025 Eastvale Lantern Festival in February 2025 and the Boots in the Park Country Festival in March 2025 to speak with participating business vendors at the event to build relationships.

Educational Institution Partnerships
As Eastvale continues to grow and develop, higher education institutions began to be interested in exploring the possibility of establishing remote campuses in the community. Higher education institutions bring in students and attract employers that value an educated workforce, resulting in an increase in the number of jobs available in the community. The Economic Development Team is supportive of collaborating with interested universities and businesses to drive innovation and workforce development, and is in the process of meeting with representatives from interested universities.

Grants and Earmark Requests
The Economic Development Division leads the City's efforts to obtain federal funds via the Congressional Community Project Funding (CPF)/Congressional Directed Spending (CDS) Programs, formerly known as the Congressional Earmark Requests. This year, staff submitted the following funding requests to Congress in hopes of securing federal funds to support the City's efforts:

- $8,500,000 request for the United States Postal Service (USPS) to establish a post office in Eastvale;
- $6,000,000 request to support the construction of the new Eastvale Library;
- $6,000,000 request to support the construction of the new Eastvale Police Station; and
- $2,350,820 request to support the removal of hazardous fire fuels in the Santa Ana Riverbed.

Congress will review submitted requests from state and local government agencies, nonprofits, and

other organizations over the next several months. If awarded, the City has the option to accept or deny the awarded funds.

I-15 Economic Development Collaborative: Preparing for the 2028 Los Angeles Summer Olympics
The City of Eastvale led the formation of the I-15 Economic Development Collaborative in Fall 2024 with the Cities of Corona, Eastvale, Fontana, Jurupa Valley, Norco, Ontario, and Rancho Cucamonga. The Collaborative identified an opportunity for Economic Development Teams across these cities to leverage resources in preparation for the 2028 Summer Olympics. After sending a letter to the LA28 Olympics Hosting Committee, the Collaborative successfully engaged with LA28 representatives and began developing work plans for community engagement and economic development projects in preparation for the Olympics.

ICSC and Real Estate Conferences
The City's Economic Development Team continues to network with brokers, developers, and business representatives and share Eastvale's available retail, commercial, and industrial opportunities. For the month of May 2025, staff will be attending the International Council of Shopping Centers (ICSC) Las Vegas Conference between May 18, 2025 and May 20, 2025 and the Discover Inland Empire Conference on May 22, 2025. These conferences are excellent opportunities for City to meet with real estate representatives and understand their needs and perspectives with regards to business expansion.

Strategic Planning
The Economic Development Division conducts internal strategic planning activities annually to ensure that the Division's projects, programs, and initiatives effectively support the City Council's goals and objectives. On February 25, 2025, the Division held a workshop to evaluate existing projects and tasks and the internal goals that were previously established. Through thorough analyses and evaluations, staff identified 16 additional projects that can elevate and enhance the City's economic development, workforce development, and community development activities. Five of the 16 additional projects will be implemented this year, while the remaining projects will be planned for subsequent years:

1. Broker Engagement Enhancement Strategy;
2. Commercial Entertainment Attraction;
3. Economic Competitiveness Evaluation;
4. Grant Tracking Strategy; and
5. Industrial User Evaluation and Engagement

Work plans for these five new projects will be completed in Summer 2025, with implementation scheduled for Fall 2025.

Workforce Development: Job Fair
On April 15, 2025, the City's Economic Development Team partnered with the Riverside County Workforce Development Board to host the City's first job fair at the Staybridge Suites. 15 employers hosted recruitment booths and offered more than 700 employment opportunities. Due to venue constraints, job seekers were required to register for attendance ahead of time, with all 300 pre-registration tickets reserved prior to the start of the event. Witnessing the success of the event, staff will plan to host another job fair, in partnership with the Riverside County Workforce Development Board, next year.

Environmental

Pursuant to Section 15378 of the California Environmental Quality Act (CEQA) Guidelines, organizational or administrative activities of governments that do not result in direct or indirect physical changes in the environment are not considered as CEQA projects.

Strategic Plan Action - Priority Level: 1 | Target #: B | Goal #: A

The City's Economic Development Team supports efforts to attract and retain businesses in Eastvale.

Fiscal Impact

Funds to implement the City's economic development initiatives are budgeted within the Economic Development Division in the General Fund. Staff actively continues to search for relatable grant funding to support additional economic development efforts.

Prior City Council/Commission Action

The City Council receives quarterly economic development updates during City Council meetings. The Planning Commission and the Public Safety Commission also receive periodic updates from the Economic Development Team. The previous update provided to the City Council was on February 12, 2025.

CITY OF EASTVALE

STRATEGIC PLAN

2023 UPDATE

2767

INTRODCUTION

On February 9, 2023 the City Council, staff, and residents participated in a Strategic Plan Workshop. During the workshop, the City Council engaged in a participatory process, in which they established expectations for the workshop and intended outcomes; identified the organizations strengths, weaknesses, opportunities, and threats; reaffirmed and reorganized the seven major targets; and, reaffirmed and reorganized the priority goals.

The City of Eastvale operates under a City Council/City Manager form of government. The City Council consists of five Council Members. The members of the City Council set policy and enact City laws. The City Manager is appointed by the members of the Eastvale City Council. One of the primary responsibilities of the City Manager is to implement the plan set forth by the City Council, utilizing the City Departments and Executive Team. The purpose of the workshop was to assist the City of Eastvale's Mayor, City Council, and City Manager in developing Eastvale's Strategic Plan including clearly defined targets and goals in order to provide staff with clear direction. A strong strategic plan is like a good roadmap—it identifies a destination and lays out a clear path to get there.

At the conclusion of the workshop, the Mayor and City Council had effectively established clear direction and focus for the Executive Team related to targets and goals. The City Council clearly communicated its desire and intent to blend this exercise with the results of the community survey in the future allocation of resources related to programs and services. It was further intended that this plan remain a fluid and evolving document to be re-visited at regular intervals for progress and re-shifting of priorities, as needed.

Inclusion

TARGET E
Infrastructure

TARGET F
Innovation & Technology

TARGET G
Organizational Development

ACTION PLAN TARGETS

PRIORITY LEVEL 1 GOALS

- Develop and Construct Civic Center (Target E, Goal A)
- Attract and retain Business (Target B, Goal A)
- Conduct financial planning for newly proposed infrastructure (Target C, Goal A)
- Construct a Police Substation building (Target A, Goal A)
- Create “Destination Eastvale” (Target B, Goal B)
- Evaluate Parks & Recreation as a City Service (Target E, Goal B)

PRIORITY LEVEL 2 GOALS

- Develop branding and identity for Eastvale (Target B, Goal C)
- Improve traffic mobility and management throughout the city’s major corridors and around the schools (Target E, Goal F)

PRIORITY LEVEL 3 GOALS

- Collaborate to provide cultural and diverse events and celebration (Target D, Goal A)
- Develop and Implement a Smart City (Target F, Goal B)
- Develop City-wide WIFI (Target F, Goal C)
- Develop long-term financial model (Target C, Goal C)
- Ensure that City revenues align with expenditures (Target C, Goal H)

PUBLIC SAFETY

TARGET A
Public Safety

PRIORITY LEVEL	GOAL	GOAL
1	A	Construct a Police Substation
	B	Develop a public safety campaign/educational aspect using social media and door knocks
	C	Implement a K-9 program
	D	Increase community involvement with law enforcement
	E	Increase law enforcement involvement with community
	F	Maintain Fire response
	G	Neighborhood Watch and Volunteer program collaboration
	H	Use innovation and technology to enhance public safety with consideration and balance of privacy and public trust

ECONOMIC DEVELOPMENT

TARGET B
Economic Development

PRIORITY LEVEL	GOAL	GOAL
1	A	Attract and retain businesses that align with diverse community needs and provide choices
1	B	Create “Destination Eastvale” with high quality and unique businesses
2	C	Develop branding and identity for Eastvale
	D	Develop strategies for business retention, business support, and business reward
	E	Diversify the housing stock with more options
	F	Implement strategies to retain local talent e.g. increase local jobs and match talent to businesses
	G	Re-invest in and revitalize existing shopping centers
	H	Streamline the development process

FINANCIAL PLANNING

TARGET C
Financial Planning

PRIORITY LEVEL	GOAL	GOAL
1	A	Conduct financial planning for newly proposed infrastructure (e.g. Civic Center)
	B	Be intentional about how we spend our money – do it once, and do it right
3	C	Develop long-term financial model
	D	Develop ongoing strategies for investing
	E	Develop strategies to manage/control the public safety contract
	F	Ensure that businesses invest back in the City
	G	Ensure that City's infrastructure keeps pace with development and that developers pay their share
3	H	Ensure that City revenues align with expenditures
	I	Evaluate connection between economic development and financial planning
	J	Leverage grant funding

INCLUSION

TARGET D
Inclusion

PRIORITY LEVEL	GOAL	GOAL
3	A	Collaborate to provide cultural and diverse events and celebration
	B	Develop branding associated with events
	C	Develop strategies for the arts in public places
	D	Ensure that the City is inclusive of everyone; develop an inclusionary action plan and put policy to practice
	E	Evaluate feasibility of creating a position dedicated to cultural inclusion, or use of consultant services
	F	Expand modes of communication beyond social media
	G	Identify and/or develop venues for inclusion; including events and gathering places

INFRASTRCUTURE

TARGET E
Infrastructure

PRIORITY LEVEL	GOAL	GOAL
1	A	Develop and construct Civic Center (City Hall, Library, Police Substation, and 3rd Fire Station
1	B	Evaluate Parks & Recreation as a City service
	C	Plan for landscape, roads, and street maintenance
	D	Plan for synchronized traffic signals
	E	Improve connectivity through the trails system
2	F	Improve traffic mobility management around the schools

INNOVATION & TECHNOLOGY

TARGET F
Innovation & Technology

PRIORITY LEVEL	GOAL	GOAL
	A	Create a City application for use on smart phones
3	B	Develop City-wide WIFI
3	C	Develop and implement a Smart City
	D	Empower staff to innovate for efficiencies; create a culture of innovation
	E	Engage with developers to implement technology
	F	Explore and evaluate alternative modes of transportation technology
	G	Implement a global GIS component to digitize all City records and plans
	H	Invest internally in software/technology improvements to enhance customer service

ORGANIZATIONAL DEVELOPMENT

TARGET G
Organizational Development

PRIORITY LEVEL	GOAL	GOAL
	A	Developing talent
	B	Ensure that customer service levels are exceeding Eastvale's expectations everyday
	C	Identify and recommend tools necessary for optimal employee performance
	D	Implement strategies to remain competitive in attracting and retaining talent
	E	Right-size the organization and staffing consistent with City services, needs, expectations, and strategic plan priorities
	F	Transition Contract Services in house for compliance with CalPERS
