RE: **Livermore Isabel Neighborhood Plan – Rezoning Addendum – VMT Assessment**

INTRODUCTION

This technical memorandum prepared by Kittelson & Assoc., Inc, summarizes the VMT assessment for the rezoning of the Isabel Neighborhood plan (INP). Following the INP DEIR/SEIR and the subsequent Isabel Village application by Harridge which has proposed to reduce the number of residential units in Parcels 3b and 3c, we understand the City of Livermore is concerned about a reduction in residential units to meet their overall RINA's housing needs. As a result, they have proposed two potential options to replace some of the planned office development with additional residential units in the INP. These options are being evaluated as an addendum to the SEIR.

Kittelson has modeled the two options using the citywide Isabel Neighborhood plan model and extracted VMT and intersection forecasts so that the city can assess the effects of the addendum options on the D/SEIR. This memorandum focuses on the VMT, while a subsequent memo will address the intersection level of service impact assessment.

This memorandum provides a qualitative review of VMT primarily for information purposes, and a statement of whether the change in project would substantially affect the VMT findings compared to the DEIR/SEIR.

Previously, Kittelson prepared a VMT Analysis to determine if the Harridge proposed modifications to the Isabel Neighborhood Specific Plan (INSP) by the Livermore Transit Village project (Modified Project) incur the same or any additional VMT impacts compared to the Environmental Impact Report (EIR) certified on May 14, 2018, and Supplemental Environmental Impact Report (SEIR) dated September 30, 2020, for the INSP. A summary of those results and findings are shown below.

Senate Bill 743

Senate Bill (SB) 743, signed into law in 2013, required CEQA lead agencies to shift from using traditional LOS standards and automobile delay to determine significant traffic impacts. Under SB 743, the State Office of Planning and Research is required to update CEQA guidelines and criteria to promote greenhouse gas emissions reductions, multimodal transportation networks and diverse land uses. The Office of Planning and Research proposes using VMT as the metric for evaluating the significant traffic impacts, where projects that decrease VMT compared to existing conditions may be considered to have a less than significant transportation impact. SB 743 provides that, once the State adopts updated CEQA Guidelines for alternatives to LOS-based significance determinations, automobile delay as described by LOS shall not be considered a significant impact on the environment. However, the State guidelines were still under

development at the time of the DEIR. Accordingly, the City of Livermore determined to utilize the LOS-based methodology for significance determination in the DEIR, and VMT was reported for information purposes only. Given the addendum tiers off the DEIR, this assessment reports the VMT and net change for informational purposes.

Summary of Land Use Changes

We understand that the city is considering two options for rezoning, including sites within INSP areas 3a and/or 1d. The intent of the proposed rezoning is to ensure no net loss of housing opportunity sites, in accordance with the City's adopted Housing Element, for the INSP area. Proposed and constructed developments in the INSP area have not met the anticipated unit counts identified in the INSP and/or Housing Element; therefore, the city desires to rezone certain parcels within the INSP to ensure that there is adequate opportunity for the development of housing within the INSP area. The current shortfall of residential units is 344 units, with the trend of housing unit shortfalls anticipated to continue as the INSP area is built out.

The two options being considered for rezoning by the city include:

Option 1: Rezone the following parcel to residential: Assessor's Parcel Number (APN) 903-10-36-3, BART Parcel West (INSP 3a), 913 units.

- Increase of 569 residential units and decrease of 946,994 square feet (sf) of office space, as compared to the certified INSP EIR

Option 2: Rezone the following parcels to residential: APN 905-10-23, Comcast Parcel West (INSP 1d), 350 units; APN 905-10-24, Comcast Parcel East (INSP 1d), 512 units; APN 903-10-36-3, BART Parcel West (INSP 3a), 913 units.

- Increase of 1,431 residential units and decrease of 1,531,486 sf of office space, as compared to the certified INSP EIR

Figure 1 displays the location of the parcels considered for rezoning.

Figure 1: INSP Addendum Rezoning Parcels

Summary of VMT Assessment

Previously, the D/SEIR summarized VMT results for informational purposes. At that time, the Office of Planning and Research (OPR) had not yet finalized their VMT recommendations per SB 743, so the DEIR team opted to present VMT results as informational, while LOS remained as the primary impact metric for transportation. The metrics used were total VMT and VMT per Service population (residential population + jobs). The method used for computing the VMT for the Addendum is slightly different to the methods used in 2018, so the results do vary slightly. For consistency, the D/SEIR VMT was restated for consistent comparison to the addendum options. **Table 1** summarizes the VMT results for the D/SEIR and the Addendum options.

Table 1 Daily Vehicle Miles Traveled (VMT)

Year	*Scenario*	*Daily Vehicle Trips*	*Daily VMT*	*Service Population*	*VMT/ Service Population*
2013	No Project	57,730	599,393	14,671	40.9
2040	DEIR Project	112,183	1,168,901	36,273	32.2
2040	Addendum Option 1	104,771	1,123,732	34,379	32.7
2040	Addendum Option 2	104,657	1,157,280	35,328	32.8

Note: Total VMT and VMT/Service Population may be different to those reported in DEIR, due to updated methodology, but the net comparison with the DEIR remains consistent.

Source: Kittelson & Associates, Inc., 2024

As mentioned in the footnote, the Total VMT and VMT/Service Population may be different to those reported in the DEIR due to use of an updated methodology, but the net comparison with the DEIR remains consistent.

The following is observed when comparing the VMT results from the 2040 D/SEIR with the 2040 Addendum options:

- The 2013 results are provided as representing the original baseline.
- The DEIR was evaluated under 2040 cumulative conditions.
- The total VMT for the 2040 Addendum options decreases compared to the DEIR (from 1,168,901 to 1,123,732 and 1,157,280). This is a result of reductions in office related VMT offset by increases in residential VMT. Overall, the net change in total VMT shows a slight reduction, but the result is not substantially significant.
- The VMT/Service population increases very slightly from 32.2 for the DEIR to 32.7 and 32.8 with the two Addendum options. Since the VMT/service population combines the VMT for the two land use types, the change in the ratio is not substantially significant compared to the DEIR.

Overall VMT findings suggest the Addendum options would not substantially increase VMT impacts compared to the INSP DEIR.

Conclusion

VMT is provided for informational purposes. Based on this assessment, the increase of residential units and reduction of office commercial in three parcels for the addendum is not expected to have a substantial effect on VMT compared to the DEIR findings.

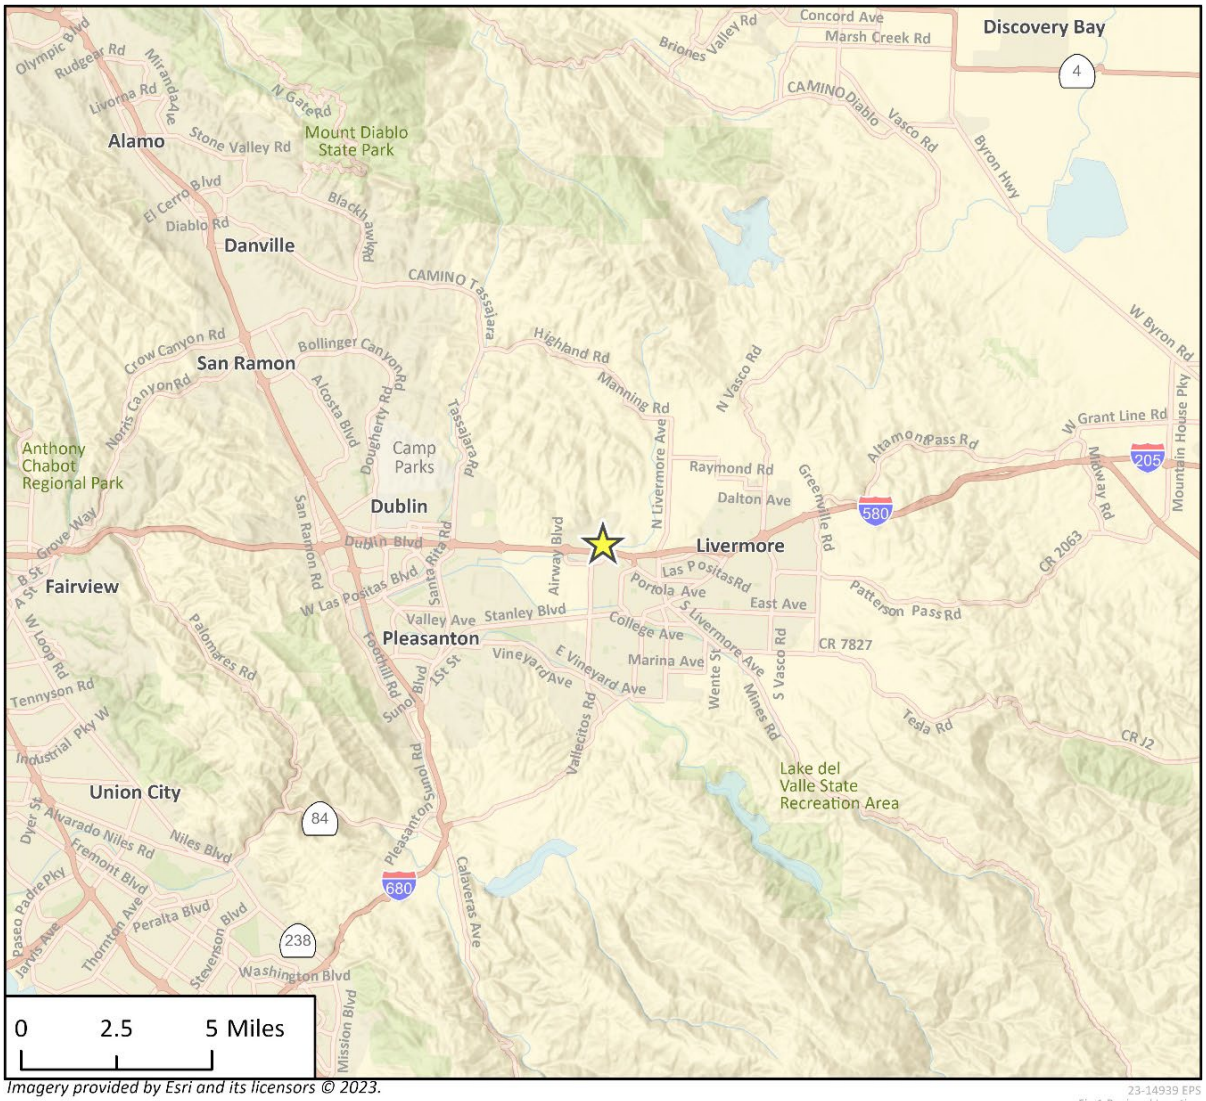
1 Introduction

This report is an update to the 2017 Water Supply Assessment (WSA) for the Isabel Neighborhood Specific Plan (INSP) (City of Livermore 2017). The 2017 WSA was approved with certification of the project's INSP Environmental Impact Report (EIR) in 2018 (City of Livermore 2018) for compliance with the California Environmental Quality Act (CEQA). A Supplemental EIR for the project was later certified in 2020 (City of Livermore 2020). An Addendum to the Supplemental EIR is currently being prepared for the Isabel Crossing and No Net Loss Project, which consists of changes to the development program for a portion of the INSP area; these changes are henceforth referred to as the "proposed project." Section 1.1, *Project Overview,* provides a comparison between the approved project (i.e., the adopted INSP) and the proposed project.

The purpose of this WSA Update is to assess water demands of the changes to the INSP contemplated in the proposed project in comparison to the approved project and incorporate 2020 Urban Water Management Plan (UWMP) data into the analysis of water supply availability and reliability. Water demands of the approved project were assessed in the 2017 WSA for the INSP and accounted for in the 2020 UWMPs for Livermore Municipal Water (LMW) and Zone 7 Water Agency ("Zone 7"); see Section 1.4, *Water Supply Providers*, for information on these water provides. Water supply availability and reliability projections included in the 2020 UWMPs determined that with implementation of planned water supply projects, sufficient water would be available to meet anticipated needs under normal year, single dry-year, and multiple dry-year conditions and, should shortfall(s) occur prior to full implementation of planned water supply projects, Water Shortage Contingency Plans (WSCPs) for LMW and Zone 7 would be implemented to ensure sufficient supply to meet anticipated demands; see Section 3, *Supply Availability Projections*, for further discussion.



This WSA Update is being prepared because the proposed project would increase water demands of the approved project beyond those accounted for in the 2017 WSA for the INSP and the 2020 UWMPs for LMW and Zone 7. The proposed project also meets one of the thresholds defined by SB 610 as requiring a WSA, which is the introduction of 500 or more new residential units. The proposed project would increase the number of residential units previously approved for the INSP area by 1,431 units; see Section 1.2, *Project Overview*, for further discussion. This WSA Update builds off the 2017 WSA by providing analysis of the proposed changes to the approved project, and by using the same approach as the approved 2017 WSA; see Section 2, *Senate Bill 610*.

1.1 Project Location

The proposed project site includes three distinct areas. Figure 1 and Figure 2 on the following pages portray the proposed project regional location and the proposed project site. The proposed project includes the Isabel Crossing Project and the No New Loss Project.

- The Isabel Crossing Parcels (Assessor's Parcel Numbers [APN] 903-10-36-3, 905-10-23, and 905-10-24) encompass approximately 45 acres located at the southwest corner of Isabel Avenue and Portola Avenue in the INSP area of the City of Livermore in Alameda County. The Isabel Crossing Parcels are located within the 3b and 3c Subareas of the previously approved INSP. Subareas 3b and 3c are core areas of the INSP with a general objective of creating a vibrant residential neighborhood with retail uses that generate transit ridership.

Fig 1 Regional Location

Project Location

N

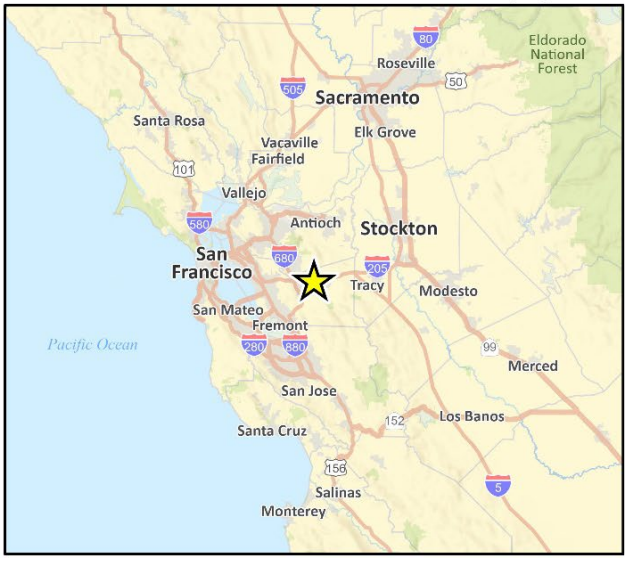

Figure 2 Project Location

Imagery provided by Microsoft Bing and its licensors © 2024.

24-16209 EPS
Fig 2 Project Location

- The No Net Loss Parcels make up the remaining two areas of the proposed project site, including the BART Parcel and the Comcast Parcels. The BART Parcel (6.53 acres, APN 903-10-36-3) is located to the east of the intersection of I-580 and Isabel Avenue, and the Comcast Parcels (26.832 total acres, APNs 905-10-23 and 905-10-24) are located northwest of North Canyons Parkway at 3055 Triad Place in Livermore. The BART Parcel is located within Subarea 3a of the INSP. Subarea 3a land uses include Office Core and Core Residential (60-100 du/ac). The Comcast Parcels are located within Subarea 1d of the INSP. Subarea 1d is designated for Business Park land uses.

The Isabel Crossing Parcels and the BART Parcel are currently undeveloped with sparse vegetation. The Comcast Parcels are currently developed with existing office buildings and parking.

1.2 Project Overview

The proposed project consists of proposed development on the Isabel Crossing Parcels as well as land use designation changes for the BART Parcel and Comcast Parcels within the INSP area to ensure no net loss of housing opportunity sites within the INSP area, in accordance with the City's updated Housing Element which was adopted on March 13, 2023, and covers the period from 2023 to 2031. The current shortfall of residential units is 344 units, with the trend of housing unit shortfalls anticipated to continue as the INSP area is built out. The proposed project would change the land use designations of the following parcels from the approved project, to provide for additional residential uses needed to address the current housing shortfall, based upon the City's updated Housing Element: Assessor's Parcel Number (APN) 905-10-23, Comcast Parcel West (INSP Subarea 1d); APN 905-10-24, Comcast Parcel East (INSP Subarea 1d); APN 903-10-36-3, BART Parcel West (INSP Subarea 3a).

The Isabel Crossing Project and No Net Loss Parcels combined would result in a net Increase of 1,431 residential units and a net decrease of 1,531,486 square feet of office space, compared to what was analyzed in the 2018 EIR and 2020 SEIR for the INSP. Table 1, below, provides a comparison between the characteristics of the proposed project (including the Isabel Crossing Project and No Net Loss Project) and the approved project (original INSP design), to demonstrate how land uses would change under the proposed project.

Table 1 Net Growth Projections with Proposed Project (Isabel Crossing Project and No Net Loss Project)

Project Characteristic	Proposed Project	Approved Project	Change (Proposed Compared to Approved Project)
Isabel Crossing Project			
Office/Commercial	74,362 square feet	206,825[1] square feet	-132,463 square feet
Residential Units	1,299 units	1,338 units[2]	-39 units
Other Existing and Planned Development in the INSP + Isabel Crossing Project			
Residential Units	2,299 units	2,642 units	-344 units
No Net Loss Parcels			
Office/Commercial (Comcast Parcels)	0	584,482 square feet	-584,482 square feet
Residential Units (BART Parcel)	0	946,994 square feet	-946,994 square feet

Project Characteristic	Proposed Project	Approved Project	Change (Proposed Compared to Approved Project)
Residential Units (Comcast Parcels)	862 units	0 units	+862 units
Residential Units (BART Parcel)	913 units	244 units	+669 units
Overall Growth Projections (Isabel Crossing Project + No Net Loss Parcels)			
Office/Commercial	--	--	-1,531,486 square feet
Residential Units	--	--	1,431 units

[1] The office buildout for the project site was estimated using the acreage for proposed products within the Office Core area of the project site and a minimum floor area ratio of 1.0 as planned for the Office Core designation in the Land Use chapter of the INSP.

[2] The calculated target buildout of the project site considered in the INSP.

[3] The maximum height allowed in the project site.

Source: Appendix A; City of Livermore 2020

This WSA Update assesses the difference in water demands between the proposed project and the approved project, as summarized in the table above, in comparison to the anticipated water supply availability and reliability from the local water supply providers. Water demands are addressed below in Section 1.3, followed by water supply providers which are discussed in Section 1.4.

1.3 Water Demands

Water demands of the approved project were defined in the 2017 WSA for the INSP for both the City of Livermore's LMW and Cal Water-Livermore service areas, as the INSP would include development within both service territories. As discussed below in Section 1.4, *Water Supply Providers*, the proposed project would only affect development within LMW's service area. Water demands of the approved project are summarized in Table 2.

Table 2 Approved Project Water Demands (AFY)

Water Supplier	Proposed Development	Existing Development	Total
Livermore Municipal Water (LMW)	441	395	836
Cal Water-Livermore	153	36	189
Total	**594**	**431**	**1,025**

Source: City of Livermore 2017: 11

As shown in the table, the approved project would introduce new development with water demands totaling 594 acre-feet per year (AFY); in combination with the 431 AFY demands of existing development, total water demand of the approved INSP would be 1,025 AFY, across the service territories of LMW and Cal Water-Livermore.

As discussed in the introduction to this section, water demands of the approved project were assessed in the 2017 WSA for the INSP and accounted for in the LMW and Zone 7 2020 UWMPs. The 2017 WSA concluded that the additional water demand associated with development proposed under the INSP, as presented above in Table 2, would represent less than one percent of total demands for LMW and Cal Water-Livermore combined, and is therefore within the margin of error for water supply planning purposes (City of Livermore 2017: 12). The 2020 UWMPs for LMW and Zone 7, which are discussed in detail in Section 1.4, *Water Supply Providers*, below, determined that

with the approved project's new water demands, sufficient supplies would be available during normal year and dry year conditions, including during potential shortages requiring implementation of the providers' respective WSCPs to ensure supply sufficiency.

The proposed project would introduce new water demands that were not accounted for in the 2017 WSA or the 2020 UWMPs. In comparison to the approved project, the proposed project would increase residential development by 1,431 units and decrease office space by 1,531,486 square feet. Table 3, below, presents water demands of the proposed project in comparison to the approved project, including increased demand for residential uses and decreased demand for office space.

Table 3 Proposed Project Water Demands

Proposed Land Use	Water Use Rate[1]	Water Demands (GPD)	Water Demands (AFY)[2]
+1,431 residential units[3]	▪ Multi-family: 94 GPD/unit	+134,514	+151
-1,531,486 sf of office space[4]	▪ Office Core (6.53 acres): 2,070 GPD/acre ▪ Business Park (26.83 acres): 690 GPD/acre	-32,030	-36
Difference	**n/a**	**+102,484**	**+115**

1. Water use rates were identified in the 2017 WSA for the approved project; the same water use rates were used to calculate demands of the proposed project to provided consistency between the 2017 WSA and this WSA Update.
2. AFY = (gallons per day*365 days per year)/325,851 gallons per acre-foot
3. The 1,431 additional residential units include 350 units on APN 905-10-23, Comcast Parcel West (INSP 1d), 512 units on APN 905-10-24, Comcast Parcel East (INSP 1d), and 913 units on APN 903-10-36-3, BART Parcel West (INSP 3a), less the 344 unit shortfall.
4. The 1,531,486 sf of reduced office space include 6.53 acres in the Office Core and 26.83 acres in the Business Park.

Sf = square feet

As shown in the table, the proposed project would increase water demands of the approved project by approximately 115 AFY. This new demand would be for potable water, as it would serve new residential units and office space; non-potable water needs associated with the INSP were already accounted for in the approved project demands reflected in Table 2 and accounted for in the 2020 UWMPs. Because the proposed project demands were not previously accounted for in local water supply planning documents, they are assessed herein using the same approach employed for analysis of the approved project in the 2017 WSA.

1.4 Water Supply Providers

The INSP area is within the jurisdiction of two water suppliers, the City of Livermore's LMW and Cal Water-Livermore. Both suppliers receive water supply from Zone 7, a wholesaler of imported surface water and stored water for retailers within the Livermore-Amador Valley. Development associated with the proposed project would occur exclusively within LMW's service territory; therefore, this WSA Update does not include analysis of Cal Water-Livermore as a water supply source. Water supply for the proposed project would be provided by LMW, which receives imported surface water supply from Zone 7.

The 2017 WSA for the approved project was informed by the 2015 UWMPs for LMW and Zone 7. Since approval of the 2017 WSA, LMW and Zone 7 have each published a 2020 UWMP with updated supply availability projections that account for current and anticipated land uses, including the approved project as detailed in Table 1. This WSA Update includes supply and demand tables from the respective 2020 UWMPs to inform consideration of water supply availability and reliability for the proposed project's new water demands of 115 AFY.

LMW Supply Sources

LMW obtains all of its potable water as imported surface water provided by Zone 7, discussed below. LMW does not self-supply surface water and does not pump groundwater to meet any water demands of the municipal water service area (City of Livermore 2021: 45). LMW has access to short-term, emergency water transfers through interties with the California Water Service Company, City of Pleasanton, and Dublin-San Ramon Services District, as well as a small intertie with the San Francisco Public Utilities Commission (SFPUC) water system via the Lawrence Livermore National Laboratory.

LMW produces and distributes recycled water meeting Title 22 disinfected tertiary recycled water requirements for beneficial use and in accordance with their Regional Water Quality Control Board (RWQCB) permit. The City owns and operates the Livermore Water Reclamation Plant (LWRP), which currently distributes an average of about 2.2 million gallons per day (MGD) of recycled water, with a peak demand of almost 3.3 MGD, and a design capacity of up to 8 MGD. The LWRP treats all wastewater collected within the city limits of Livermore, which includes the entire LMW service area and the Cal Water-Livermore service area.

Zone 7 Supply Sources

Zone 7 water supply sources include imported surface water, local surface runoff, and stored water. On average, imported surface water directly provides 80 percent of the water that Zone 7 supplies, locally captured watershed runoff makes up 10 percent, and previously-imported supplies stored in the local groundwater basin make up the remaining 10 percent (Zone 7 2021: 45). Groundwater is not considered a separate source of supply because Zone 7 only extracts water from underground storage that is recharged from surface water supplies (Zone 7 2021: 45).

The projects presented below are designed for use during all water year types (normal year, single dry year, and multiple dry year), and are accounted for in the projections of water supply availability and reliability presented in Zone 7's 2020 UWMP; see Section 3, *Supply Availability Projections*. These sources were also accounted for in Zone 7's 2015 UWMP, which informed the 2017 WSA for the approved project.

Existing Supplies

- **State Water Project (SWP) Table A.** Each SWP contractor is limited to a maximum annual contract amount as specified in Article 6(c) and Table A of the SWP Contract; this amount is therefore commonly referred to as "Table A" supplies. Zone 7's current Table A allocation is 80,619 AFY. The amount of Table A water physically available in a given year depends upon hydrologic conditions and other demands on the SWP system, as well as the extent of SWP water in storage, SWP facility capacity, and environmental/regulatory requirements. (Zone 7 2021: 49)
- **SWP Carryover.** As a SWP contractor, Zone 7 has the option to store unused Table A water from one year to the next in the SWP's San Luis Reservoir, when there is storage capacity available. This "carryover" water is also called Article 12e or 56c water, in reference to the relevant contract terms. Article 12e water must be taken by March 31 of the following year, but Article 56c water may remain as carryover as long as San Luis Reservoir storage is available. Zone 7 assumes it would carry over 10,000 acre-feet (AF) of water each year on average.

- **Arroyo Valle.** Zone 7 also stores local runoff from the Arroyo Valle watershed in a local reservoir (Lake Del Valle) located in Livermore Valley, which is owned by the California Department of Water Resources (DWR) as a SWP storage reservoir and operated by the East Bay Regional Parks District.
- **Main Basin.** Zone 7 overlies the Livermore Valley Groundwater Basin (DWR Basin No. 2-10), where the Main Basin Management Area (Main Basin) is used by Zone 7 as a storage facility. Zone 7 does not have access to naturally recharged water, and only withdraws water that has been artificially recharged with surface water supplies.
- **Semitropic.** Since 1998, Zone 7 has acquired 78,000 AF of groundwater banking storage capacity available to augment water supplies during drought and emergency conditions and as needed. Zone 7 can store up to 5,883 AFY (less 10 percent loss) in the Semitropic Water Storage District (Semitropic) groundwater bank. Under the contract terms, Zone 7 can request up to 9,100 AF of pumpback water (pumped from the Semitropic aquifer into the SWP system) and up to 8,645 AF of Table A exchange water.
- **Cawelo.** Since 2006, Zone 7 has acquired 120,000 AF of groundwater banking storage capacity available with the Cawelo Water District (Cawelo). Zone 7 can store up to 5,000 AFY in the groundwater bank. Zone 7 can request up to 10,000 AFY of pumpback (or SWP exchange water) from Cawelo.

Planned Supplies

- **Bay Area Regional Desalination Project (BARDP) and Potable Reuse.** The BARDP involves constructing a regional brackish water treatment plant in collaboration with Contra Costa Water District (CCWD) that would produce 10-20 MGD of desalinated water for reuse. Potable Reuse involves treating wastewater, with lower-yield estimates relying only on Livermore wastewater supply (year-round operations) and higher-yield estimates incorporating seasonal availability of wastewater from the Dublin San Ramon Services District (DSRSD) (Zone 7 2021: 70). As described above in Table 4 and the associated footnotes, Zone 7 anticipates reliably receiving approximately 5,000 AFY from the BARDP and/or Potable Reuse, with either or both systems online by 2030 (Zone 7 2021: 70); the estimated Zone 7 water yield from this project will be refined further and will depend on project yield and demands from the final participants.
- **Delta Conveyance Project (DCP).** DWR's proposed DCP would install a new tunnel to convey freshwater from north of the Delta to a point south of the Delta to increase SWP reliability and improve water quality. The DCP is not anticipated to be in service until the end of the 2020 UWMP planning period, and its impacts on supply were not included in DWR's 2019 Delivery Capability Report (DCR) for the SWP; however, in November 2020, the Zone 7 Board approved continued participation in the DCP at a 2.2 percent participation level based on Zone 7's Table A amount of 80,619 AF, which equates to 1,773 AF (Zone 7 2021: 68).
- **Los Vaqueros Reservoir (LVR) Expansion.** LVR is an off-stream reservoir owned by CCWD and located in southeastern Contra Costa County. It was constructed in 1997 and currently has a capacity of 160,000 AF. CCWD is planning to further expand the reservoir to 275,000 AF and construct the Transfer-Bethany Pipeline, which would connect the reservoir to the SBA and the California Aqueduct, increasing water supply reliability for Bay Area water agencies (Zone 7 2021: 72).

- **Sites Reservoir Project.** Sites Reservoir is a proposed new 1,500,000 AF off-stream storage reservoir in northern California near Maxwell. In its 2019 Water Supply Evaluation (WSE) Update, Zone 7 considered 5,000 to 10,000 AFY of average yield from Sites Reservoir, in combination with other water supply options. The availability of this supply was varied based on hydrology, with more water delivered to Zone 7 during dry years. At Zone 7's request, water would be released from Sites Reservoir annually to the Sacramento River, then conveyed by the SWP system through the Delta and to the South Bay Aqueduct (SBA).
- **SWP Transfers.** A transfer agreement with another SWP contractor using the SWP system—which Zone 7 is already invested in—is likely the most expedient and cost-effective transfer option. The transfer amount could vary from year-to-year depending on hydrology but could average between 5,000 and 10,000 AFY. For the 2020 UWMP, Zone 7 assumed a constant 5,000 AFY in water transfers through 2030.
- **Chain of Lakes.** Chain of Lakes is a series of former or active gravel quarry pits in the heart of the Livermore-Amador Valley, connected through a series of conduits. The Chain of Lakes would ultimately cover approximately 1,500 acres and have about 150,000 AF of total storage volume, of which 31,000 AF is estimated to be available for operational storage (Zone 7 2021: 73).

Table 4, below, provides further discussion of the supply sources listed above, including implementation timelines.

Table 4 Water Supply Development Projects and Programs

Project or Program[1]	Parties Involved[2]	Overview	Implementation Year	Expected Increase in Water Supply (AF)[3]
Bay Area Regional Desalination Project (BARDP)	Zone 7; CCWD; SFPUC; SCVWD	Brackish water desalination in eastern Contra Costa County	2030	5,600[4]
Potable Reuse	Zone 7; City of Livermore; DSRSD; City of Pleasanton; Cal Water-Livermore	Use of purified water derived from wastewater effluent to supplement potable water supplies	2030	4,000 – 7,000[4]
Delta Conveyance Project	Zone 7; DWR; other SWP Contractors	Construction of new intakes and tunnel as part of the SWP	2040	1,773[5]
Los Vaqueros Reservoir (LVR) Expansion	Zone 7; CCWD; Bay Area M&I water agencies, GWD, and SLDMWA	Expansion of LVR and construction of the Transfer-Bethany Pipeline to connect LVR to the South Bay Aqueduct and California Aqueduct	2025 (Pipeline) and 2030 (LVR Expansion)	10,000[6]
Sites Reservoir Project	Zone 7; Sites Project Authority; Sites Reservoir Project committee members	Construction of a new 1.5-million-AF off-stream reservoir in Colusa County	2030	10,000

Project or Program[1]	Parties Involved[2]	Overview	Implementation Year	Expected Increase in Water Supply (AF)[3]
State Water Project (SWP) Transfers	Other SWP contractors	Temporary water transfer agreements until major water projects are implemented	2021	Varies
Chain of Lakes	Zone 7; EBMUD	Provide alternate means of delivering water to Zone 7 during Delta and/or SBA outages	2030	Varies

1. These projects are in the conceptual or planning stages and Zone 7 is participating in planning efforts. It is expected that a subset of these projects would be needed to meet future water demands and increase the reliability of Zone 7's system. The planned supply and implementation year are estimates and may need to be adjusted when a final project/program has been approved.
2. The "parties involved" are potential partners; final participation will be determined when the project has been approved by the respective agencies' governing boards. CCWD = Contra Costa Water District; DSRSD = Dublin San Ramon Services District; DWR = Department of Water Resources; EBMUD = East Bay Municipal Utilities District; GWD = Grassland Water District; M&I = Municipal and Industrial; SBA = South Bay Aqueduct; SCVWD = Santa Clara Valley Water District; SFPUC = San Francisco Public Utilities District; SLDMWA = San Luis and Delta-Mendota Water Authority; SWP = State Water Project
3. Volumes are in acre-feet (AF).
4. Zone 7's 2020 UWMP assumes that the BARDP, producing desalinated brackish water, and/or Potable Reuse, producing purified water from wastewater effluent, would provide approximately 5,000 AFY of new supply, with either or both systems anticipated to be online by 2030 (Zone 7 2021: 70). As stated in table note (1) above, it is expected that a subset of planned future projects and programs would be needed to meet future water demands. The BARDP and Potable Reuse are both joint ventures with multiple other parties involved; while this table shows the total water supply benefit associated with the BARDP and Potable Reuse, Zone 7 anticipates the portion of new water that would be available to Zone 7 is approximately 5,000 AFY (Zone 7 2021: 77).
5. The Delta Conveyance Project (DCP) is not anticipated to be in service until the end of the 2020 UWMP planning period, and its impacts on supply were not included in DWR's 2019 Delivery Capability Report (DCR) for the SWP; however, in November 2020, the Zone 7 Board approved continued participation in the DCP at a 2.2 percent participation level based on Zone 7's Table A amount of 80,619 AF, which equates to 1,773 AF (Zone 7 2021: 68).
6. Zone 7's 2019 Water Supply Evaluation Update assumes emergency storage in Los Vaqueros Reservoir at 10,000 AF (Zone 7 2021: 73).

Source: Zone 7 2021: 75

2 Senate Bill 610

SB 610 was passed by the California Senate on January 1, 2002, amending California Water Code to require detailed analysis of water supply availability for certain types of development projects. The purpose of SB 610 is to improve the linkage between water and land use planning by ensuring greater communication between water providers and local planning agencies, and ensuring that land use decisions for certain large development projects are fully informed as to whether sufficient water supplies are available to meet project demands.

SB 610 requires the preparation of a WSA for certain types of projects that are subject to CEQA and would use groundwater to meet some or all of the project's water demands. A WSA is required to address the questions listed below, with responses provided for the proposed project.

1) Is there a public water system that will service the proposed project?

Yes, there is a public water system that will service the project. The INSP area is within the service territory of two existing water suppliers, LMW and Cal Water-Livermore. The proposed project, which would add 1,431 residential units and remove 1,531,486 square feet of office space from the approved project, is located exclusively within the service territory of LMW. Therefore, this WSA Update addresses LMW and Zone 7 as LMW's wholesale supplier.

2) Is there a current Urban Water Management Plan (UWMP) that accounts for the project demand?

There are two UWMPs applicable to the proposed project, including the LMW 2020 UWMP and the Zone 7 2020 UWMP. Both UWMPs account for the water demands of the approved project, based upon previous CEQA documents and the 2017 WSA for the INSP, and both UWMPs determined there is sufficient water supply available to reliably meet the demands of the approved INSP over a 20-year planning horizon and with consideration to varying climatic conditions (normal water year, single dry year, multiple dry years). The proposed project would increase water demands of the approved project by approximately 115 AFY (37.5 MG/Year), as discussed in Section 1.2, *Water Demands*. This WSA Update includes data from the 2020 UWMPs to inform consideration of water supply availability and reliability for the proposed project's increased water demand of 115 AFY.

3) Is groundwater a component of the supplies for the project?

No, groundwater is not a component of supplies for the project. Water supply for the project would be provided by LMW, which provides imported surface water from Zone 7 and locally developed recycled water. Zone 7 uses the Livermore Valley Groundwater Basin (Main Basin) to store surplus surface water when available, and also participates in groundwater banking projects in cooperation with Semitropic and Cawelo; however, the source water used to conduct such recharge is surface water, not local groundwater. Zone 7 withdraws only as much water from the groundwater storage areas as was recharged for storage; Zone 7 does not produce local groundwater as part of its water supply portfolio.

4) Are there sufficient supplies to serve the project over the next twenty years?

This WSA Update assesses the water supply availability and reliability for the 115 AFY of increased demand that would occur under the proposed project, based upon data provided in the 2020 UWMPs for LMW and Zone 7. Please see Section 4, *Findings and Recommendations*, for further discussion.

The primary question to be answered in a WSA is:

Will the total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection meet the projected water demand of the proposed project, in addition to existing and planned future uses of the identified water supplies, including agricultural and manufacturing uses?

This WSA Update builds upon the 2017 WSA for the INSP to assess water supply availability and reliability for the proposed project's additional water demands of approximately 115 AFY, which were not previously accounted for in the 2017 WSA or the 2020 UWMPs for LMW and Zone 7. Section 4, *Conclusions*, addresses the WSA question presented above, regarding the sufficiency of available water supplies to meet projected demands over 20 years and with consideration to normal, single dry, and multiple dry water years.

3 Supply Availability Projections

The 2017 WSA for the INSP (approved project) was informed by the 2015 UWMPs for LMW, which would provide water service to the proposed project area, and for Zone 7, which provides imported surface water supply to LMW. Zone 7 also provides supply reliability to its retailers, including LMW, during dry year conditions through the use of stored surplus water and groundwater banking operations. As discussed in Section 2, *Senate Bill 610*, neither LMW nor Zone 7 produces local groundwater as part of its supply portfolio.

This section provides supply and demand comparisons for both water providers, LMW and Zone 7, for all climatic conditions required for consideration in a WSA, including normal water year conditions, single dry year conditions, and multiple dry year conditions. The purpose of this section is to inform consideration of water supply availability and reliability for the proposed project, which would increase water demands by 115 AFY compared to the approved project.

3.1 Normal Water Year

Livermore Municipal Water

Table 5, below, provides an overview of LMW's projected supply and demands through 2045 under normal water year (non-drought) conditions. During a normal water year, purchased supplies from Zone 7 are assumed to provide 100 percent of the LMW'S potable water demand.

Table 5 LMW Normal Water Year Conditions (AF)

	2025	2030	2035	2040	2045
Supply Total	8,338	8,559	8,780	9,004	9,004
Demand Total	8,338	8,559	8,780	9,004	9,004
Difference	0	0	0	0	0

* Volumes reported in acre-feet (AF)

Source: Livermore 2021: 69

As shown in the table, LMW projects that available supply is sufficient to meet projected demands during normal water year conditions through 2045, which is the anticipated buildout of the approved INSP. The proposed project's new demand of 115 AFY represents approximately 1.3 to 1.4 percent of LMW's total demands during normal year conditions. As shown in Section 1.3, *Water Demands,* the proposed project would introduce an additional 115 AFY of potable water demand to LMW's service territory. LMW would acquire this potable water from Zone 7, discussed below.

LMW would offset increasing potable demands with recycled water produced from local wastewater used for non-potable purposes including landscaping throughout the INSP. As reported in its 2020 UWMP, LMW anticipates producing approximately 1,890 AF (616 MG) of recycled water in 2025, which would increase to 2,059 AF (671 MG) in 2045; this increase is associated with buildout of the INSP and associated use of recycled water for landscape irrigation (City of Livermore 2021: 69). The proposed project's additional water demand of 115 AFY equates to approximately 5.6 percent of LMW's planned recycled water production in 2045, or approximately 1.3 percent of LMW's potable supply from Zone 7 in 2045, for normal water year conditions.

Zone 7 Water Agency

Table 6, below, provides an overview of Zone 7's projected supply and demands through 2045 under normal water year (non-drought) conditions. Zone 7 provides supply reliability through storage of surplus supplies as carryover, as recharge to the Main Basin (of the Livermore Valley Groundwater Basin) for later use when needed, and as banked water in Kern County groundwater banks managed by Semitropic and Cawelo. The supply projections shown below are representative of expected normal conditions or normal operational targets (Zone 7 2021: 102).

Table 6 Zone 7 Normal Water Year Conditions (AF)

	2025	2030	2035	2040	2045
Supplies[1]					
SWP Table A	47,000	46,000	45,000	43,500	43,500
SWP Carryover	10,000	10,000	10,000	10,000	10,000
Arroyo Valle	5,500	5,500	5,500	5,500	5,500
Main Basin	9,200	9,200	9,200	9,200	9,200
BARDP/Potable Reuse	0	5,000	5,000	5,000	5,000
Sites Reservoir Project	0	10,000	10,000	10,000	10,000
Transfers	5,000	5,000	0	0	0
Supply Totals	**76,700**	**90,700**	**84,700**	**83,200**	**83,200**
Demands					
Retailer Demand	43,000	43,200	43,400	43,700	43,700
Untreated Water Demand	5,500	7,800	8,300	8,300	8,300
Direct Retail Demand	800	800	800	800	800
Losses	1,000	1,000	1,000	1,000	1,000
Demand Totals	**50,300**	**52,80**	**53,800**	**55,300**	**55,300**
Difference	**26,400**	**37,900**	**30,900**	**27,900**	**27,900**

1. Please see Section 1.3, *Water Supply Providers*, for an overview of Zone 7's water supply sources.
2. Volumes reported in acre-feet (AF)

Source: Zone 7 2021: 102

As shown in the table, Zone 7 anticipates that available supply is sufficient to meet projected demands during normal water year conditions through 2045. The proposed project's new demand of 115 AFY represents approximately 0.2 percent of Zone 7's total demands during normal year conditions. As described above, Zone 7 stores and banks surplus supplies for future use as needed, thereby providing supply reliability to its retailers, including LMW, through variable climatic conditions.

3.2 Single Dry Water Year

Livermore Municipal Water

Table 7, below, below, provides an overview of LMW's projected supply and demands through 2045 under single dry-year conditions, which would be provided by Zone 7 as imported surface water; as discussed below, LMW also produces recycled water from local wastewater flows to offset potable water uses. The table below assumes that water demands during a single dry year would be the

same as demands during a normal water year; this is a conservative approach because during dry years, conservation measures would likely reduce local demands. In addition, the single dry year is based on 2014 critically dry conditions which is the historically lowest allocation from the SWP within the modeling time period of 1922 through 2003; this scenario assumes the worst local conditions with no local water available (City of Livermore 2021: 69).

Table 7 LMW Single Dry-Year Conditions (AF)

	2025	2030	2035	2040	2045
Supply Total	8,338	8,559	8,780	9,004	9,004
Demand Total	8,338	8,559	8,780	9,004	9,004
Difference	0	0	0	0	0

* Volumes reported in acre-feet (AF)

Source: City of Livermore 2021: 70

As shown in the table, LMW anticipates it would receive sufficient supply from Zone 7 to meet projected demands for potable water during single dry-year conditions through 2045. The proposed project's new demand of 115 AFY represents approximately 1.3 to 1.4 percent of LMW's potable water demands during single dry-year conditions.

Single dry year supplies are anticipated to be reliable because during drought conditions, demand would be reduced in accordance with LMW's 2020 WSCP, and because Zone 7 would draw from stored supplies to deliver potable water to LMW, as discussed below under "Zone 7 Water Agency." In addition, LMW would continue producing recycled wastewater to offset potable water uses; as stated in Section 3.1, LMW anticipated producing 1,890 AF of recycled water in 2025, increasing to 2,059 AF in 2045. Recycled wastewater is considered a drought-proof supply source because it is based upon municipal water uses which occur during all climatic conditions.

Zone 7 Water Agency

Table 8, below, provides an overview of Zone 7's projected supply and demands through 2045 under single dry-year conditions. These values reflect average output from Zone 7's water supply risk model, which was initialized given 2020 conditions and configured to simulate a single dry year beginning in each year required in the drought risk assessment (e.g., 2025, 2030, etc.) (Zone 7 2021: 103). The single dry year is based on 2014 critically dry conditions, the worst-case scenario for the SWP with five percent water deliveries, such that Zone 7 would receive approximately 4,000 AF of its maximum 80,619-AFY Table A allocation of SWP water. This scenario also assumes the worst local conditions with no local water available (Zone 7 2021: 103).

Table 8 Zone 7 Single Dry-Year Conditions (AF)

	2025	2030	2035	2040	2045
Supplies[1]					
SWP Table A	4,400	4,400	4,400	4,400	4,400
SWP Carryover	15,500	12,000	13,800	12,600	12,700

Untreated Water Demand	5,500	7,800	8,300	8,300	8,300
Direct Retail Demand	800	800	800	800	800
Losses	1,000	1,000	1,300	2,500	2,500
Demand Totals	**50,300**	**52,800**	**53,800**	**55,300**	**55,300**
Difference	**15,300**	**39,300**	**40,400**	**37,200**	**37,000**

1. Please see Section 1.3, *Water Supply Providers*, for an overview of Zone 7's water supply sources.
2. Volumes reported in acre-feet (AF)

Source: Zone 7 2021:104

As shown in the table, Zone 7 projects that available supply is sufficient to meet projected demands during normal water year conditions through 2045. The proposed project's new demand of 115 AFY represents approximately 0.2 percent of Zone 7's total demands during single dry-year conditions. Compared to normal water year conditions, during a single dry year, Zone 7 does not anticipate collecting surface runoff from the Arroyo Valle watershed, and would rely on water stored in the Semitropic and Cawelo groundwater banking programs, as well as the Chain of Lakes.

Water savings from conservation are not included in the demands shown above; any extra supply as a result of conservation would remain in storage or go towards storage (Zone 7 2021: 103). The table above shows that during a single dry-year, Zone 7 would have a surplus of 15,300 AF in 2025, increasing to 37,000 AF in 2040; as discussed in Section 1.4, *Water Supply Providers*, these projections assume buildout of planned water supply projects. It is possible that operational constraints may occur during dry-year conditions, such as during a Delta outage that reduces water moving through the SBA from the Delta. Due to planned water projects currently being in planning stages or not fully operational yet, near-term water supply shortages could occur until such projects are implemented (Zone 7 2021: 103). Zone 7's 2020 WSCP would be implemented to address shortages, as needed, and could include voluntary or mandatory conservation measures and operational adjustments (Zone 7 2021: 103).

The proposed project's additional water demand of 115 AFY represents approximately 0.23 percent of Zone 7's total anticipated demands in 2025 and 0.21 percent of its total demands in 2045, under single dry-year conditions. For comparison, as discussed in Section 1.3, *Water Demands*, under

Table 2, the 2017 WSA for the approved project concluded that water demands for the INSP represented less than one percent of total demands for LMW and Cal Water-Livermore, and are therefore considered within the margin of error for water supply planning purposes (City of Livermore 2017: 12).

3.3 Multiple Dry Water Years

Livermore Municipal Water

Table 9, below, provides an overview of LMW's projected supply and demands through 2045 under multiple dry-year conditions, which would be provided by Zone 7 as imported surface water; as discussed below, LMW also produces recycled water from local wastewater flows to offset potable water uses. The table below is informed by a water supply risk model that simulates varying hydrologic conditions based upon the five-consecutive-dry-year scenario that occurred from 1987 through 1991 (City of Livermore 2021: 70).

Table 9 LMW Multiple Dry-Year Conditions (AF)

	2025	2030	2035	2040	2045
First Year					
Supply Total	8,338	8,559	8,780	9,004	9,004
Demand Total	8,338	8,559	8,780	9,004	9,004
Difference	0	0	0	0	0
Second Year					
Supply Total	8,338	8,605	8,826	9,004	9,004
Demand Total	8,338	8,605	8,826	9,004	9,004
Difference	0	0	0	0	0
Third Year					
Supply Total	8,427	8,648	8,869	9,004	9,004
Demand Total	8,427	8,648	8,869	9,004	9,004
Difference	0	0	0	0	0
Fourth Year					
Supply Total	8,470	8,692	8,915	9,004	9,004
Demand Total	8,470	8,692	8,915	9,004	9,004
Difference	0	0	0	0	0
Fifth Year					
Supply Total	8,516	8,737	8,958	9,004	9,004
Demand Total	8,516	8,737	8,958	9,004	9,004
Difference	0	0	0	0	0

Source: City of Livermore 2021: 70-71

As shown in the table, LMW anticipates it would receive sufficient supply from Zone 7 to meet projected potable demands during multiple dry-year conditions through 2045. Purchased supplies from Zone 7 are assumed to provide 100 percent of LMW's potable water demand and recycled water would be produced to meet all non-potable demands during the multiple dry-year event (City

of Livermore 2021: 70). The proposed project's new demand of 115 AFY represents approximately 1.3 percent to 1.4 percent of LMW's potable water demands during multiple dry-year conditions.

Multiple dry-year supplies from Zone 7 are anticipated to be reliable because during drought conditions, demand would be reduced in accordance with LMW's 2020 WSCP, and because Zone 7 would draw from stored supplies to deliver potable water to LMW, as discussed below under "Zone 7 Water Agency." In addition, as with the single dry-year scenario, LMW would continue producing recycled wastewater to offset potable water uses, with 1,890 AF of recycled water expected in 2025, increasing to 2,059 AF in 2045.

Zone 7 Water Agency

Table 10, below, provides an overview of Zone 7's projected supply and demands through 2045 during the first year of multiple dry-year conditions.

As shown in the table, Zone 7 projects that available supply is sufficient to meet projected demands during the first year of multiple dry-year conditions through 2045. The proposed project's new demand of 115 AFY represents approximately 0.2 percent of Zone 7's total demands during Year 1 of multiple dry-year conditions, for all years projected.

Table 11, below, provides an overview of Zone 7's projected supply and demands through 2045 during the second year of multiple dry-year conditions.

1. Please see Section 1.3, *Water Supply Providers*, for an overview of Zone 7's water supply sources.
2. Volumes reported in acre-feet (AF)

Source: Zone 7 2021: 109

As shown in the table, Zone 7 projects that available supply is sufficient to meet projected demands during the fifth year of multiple dry-year conditions through 2045. The proposed project's new demand of 115 AFY represents approximately 0.2 percent of Zone 7's total demands during Year 5 of multiple dry-year conditions, for all years projected.

As discussed in Section 3.2, *Single Dry Water Year*, water savings from conservation are not included in the demands shown above; any extra supply as a result of conservation would remain in storage or go towards storage (Zone 7 2021: 103). It is possible that operational constraints may occur during dry-year conditions, and that such constraints could result in near-term water supply shortages before major water supply projects are implemented (Zone 7 2021: 103). In such cases, Zone 7's 2020 WSCP would be implemented and could include voluntary or mandatory conservation measures and operational adjustments to minimize shortages (Zone 7 2021: 103).

4 Conclusions

The proposed project is estimated to increase potable water demand in the INSP area by approximately 115 AFY, compared to the approved project which was analyzed in the 2017 WSA for the INSP and accounted for in the 2020 UWMPs for LMW and Zone 7. The proposed project demand of 115 AFY would occur only within LMW's service territory, and LMW would provide water for the project purchased from Zone 7, which provides all of LMW's potable water supply. The proposed project's new water demand of 115 AFY is not explicitly identified in LMW or Zone 7's 2020 UWMP; therefore, this WSA Update includes supply and demand projections from both UWMPs to consider potential availability of 115 AFY of additional potable water to meet the proposed project demands.

As discussed in Section 1.3, *Water Demands*, the 2017 WSA for the INSP concluded that water demands of the approved project would represent less than one percent of total demands for LMW and Cal Water-Livermore combined, and demands of this size are considered within the margin of error for water supply planning purposes (City of Livermore 2017: 12). The supply and demand tables in Section 3, *Supply Availability Projections*, indicate that LMW and Zone 7 both anticipate having sufficient supply available to meet demands under all climatic scenarios, and that the proposed project's new demand of 115 AFY would represent a very small portion of those demands. Under all projected scenarios (normal year, single dry year, multiple dry year), the proposed project demand of 115 AFY represents approximately 1.3 to 1.4 percent of LMW's total demands, and approximately 0.2 percent of Zone 7's total demands for the same years. Consistent with the rationale of the 2017 WSA's conclusions, the proposed project's water demands are within the margin of error for water supply projections.

As discussed throughout Section 3, *Supply Availability Projections,* LMW expects to have sufficient potable water supply available through Zone 7 under all considered climatic conditions. During drought years, water demands would be reduced as needed through implementation of the LMW and Zone 7 WSCPs, and Zone 7 would use its storage projects to access water that was stored during surplus years for later use during dry years. In addition, LMW is producing recycled wastewater that would be used for non-potable uses under the INSP, offsetting demands for potable water from Zone 7. Zone 7 expects to have surplus water supply available under all considered climatic conditions. As discussed in Section 1.4, *Water Supply Providers*, Zone 7 utilizes a suite of storage options including below-ground storage (Semitropic and Cawelo) and planned reservoir storage (Sites Reservoir and LVR Expansion) to support its water supply reliability during dry conditions.

Zone 7's anticipated water supply availability accounts for key projects that are currently in the planning or implementation stages, such as the Delta Conveyance Project (see Table 4), which would increase the reliability of SWP deliveries. If operational constraints such as an outage of the SWP system through the Delta were to occur prior to the completion of planned water supply projects, near-term water supply shortages could occur. In the case of an anticipated water supply shortage, both LMW and Zone 7 have a 2020 WSCP that would be implemented to reduce local demands and ensure supply availability within the respective service territories. Implementation of the WSCPs could include voluntary or mandatory conservation measures and operational adjustments to minimize shortages (Zone 7 2021: 103).

Based upon the information and analysis provided in this WSA Update, as well as the 2017 WSA which is incorporated by reference herein, sufficient water supply would be available for the proposed project under normal year, single dry-year, and multiple dry-year conditions.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

AN ORDINANCE APPROVING DEVELOPMENT CODE AMENDMENT 24-001, FOR THE ISABEL CROSSING PROJECT, THAT WOULD AMEND THE ALTERNATIVE MEANS OF COMPLIANCE AND AFFORDABILITY REQUIREMENTS IN LIVERMORE DEVELOPMENT CODE SECTION 10.06.050 ("INCLUSIONARY ORDINANCE")

On September 22, 2022, the City of Livermore ("City") received an application from the Applicant to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On March 13, 2023, the City Council adopted the 2023 to 2031 Livermore Housing Element, providing adequate sites to support CA's Regional Housing Needs Allocation (RHNA) Sixth Cycle requirements (2023 – 2031).

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA) 22-001, Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new community facilities district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

The City did not meet the Lower Income RHNA requirements for the Fifth RHNA Cycle (2014 – 2022).

The City's existing Inclusionary Ordinance does not require all for-sale development projects in the Isabel Neighborhood Specific Plan to provide Lower Income housing.

Providing adequate Lower Income affordable housing with each development project is critical to keep pace with Livermore's RHNA requirements and to provide a range of housing opportunities for residents of all income levels.

The proposed Inclusionary Ordinance amendments would provide the City Council more flexibility to secure Lower Income affordable housing and ensure future for-sale

development projects within the Isabel Neighborhood provide Lower Income affordable units.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LIVERMORE DOES ORDAIN AS FOLLOWS:

Section 1. *Purpose*. This Ordinance makes several changes to Livermore Development Code Section 10.06.050 *Inclusionary Ordinance* to amend the Alternative Means of Compliance and Affordability requirements.

Section 2. *Instruction for Publication*. The amendments made by this Ordinance are made as follows for transparency. Deletions are reflected in this ordinance using a strikethrough, and new language is underlined. However, language with a strikethrough, and the underlines, will not be codified. The codification will only reflect the final language. Exhibit B shows the final amended Development Code text.

Section 3. *Amendment – Development Code.* The Livermore Development Code is hereby amended as follows:

A. 10.06.050(A)(1)(c) is hereby amended so it reads as follows:

c. Isabel Neighborhood Specific Plan Area. In the Isabel Neighborhood Specific Plan area, provide affordable housing in accordance with section 10.06.050(D)(4)(c) below. ~~that at least 20 percent of the total dwelling units shall be affordable housing as follows:~~

~~(1) For-Sale Units. The affordable housing units for for-sale residential developments must be sold to median- and moderate-income households. Of the total number of dwelling units (20 percent) set aside, at least five percent shall be reserved for sale to median-income households with the balance set aside for moderate-income households. Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as median-income units. For example, a 110-unit for-sale residential development would be required to provide 15 percent, or 16.5 units, at the moderate-income level and five percent, or five and one-half units, at the median-income level. Therefore, 16 units shall be provided at the moderate-income level and six units shall be provided at the median-income level.~~

~~(2) Rental Units. The affordable housing units for rental residential developments must be designated or reserved for rental to very-low-income, and low-income, median-income, and moderate-income households. Of the total number of dwelling units (20 percent) set aside, at least six percent shall be reserved for rental to very-low-income households, at least seven percent shall be reserved for low-income households, and at least four percent shall be reserved for median-income households, with the balance set aside for moderate-income households. Whenever the inclusionary requirement results in a fraction of units, the units shall be~~

~~combined and provided as very-low-income units. For example, a 110-unit rental residential development would be required to provide six percent, or six and six-tenths units, at the very-low income level; seven percent, or seven and seven-tenths units, at the low-income level; four percent, or four and four-tenths units at the median-income level; and three percent, or three and three-tenths units, at the moderate-income level. The combined fractional units equate to two units that shall be provided as very-low-income units. Therefore, eight units shall be provided at the very-low income level, seven units shall be provided at the low-income level, four units shall be provided at the median-income level, and three units shall be provided at the moderate-income level.~~

B. 10.06.050 (D)(4)(c) is hereby amended so it reads as follows:

c. Isabel Neighborhood Specific Plan Area.

(1) For-Sale Units. The developer shall reserve ~~20~~ 15 percent or more of the for-sale units as affordable units to be sold to ~~median~~ low-and moderate-income households at a price that does not exceed the maximum affordable purchase price for a unit for those households. The maximum purchase price for ~~median~~ low- and moderate-income households shall be as adopted annually by City Council resolution.

(a) At least ~~five~~ seven-and-one-half (7.5) percent of the reserved units shall be set aside for low ~~median~~-income households, ~~with the balance set aside~~ and at least seven-and-one-half (7.5) percent for moderate-income households.

(b) Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as low ~~median~~-income units ~~as described in subsection A of this section~~.

(c) The for-sale units shall be encumbered in a manner acceptable to the City, so that if a buyer resells the reserved unit within the restricted time period for a price in excess of the inflation-adjusted purchase price, then the excess profit will be returned to the City for use in affordable housing programs.

(2) Rental Units. The developer shall reserve 20 percent or more of the rental units as affordable units to be rented to very-low-income, low-income, median-income, and moderate-income households at a cost that does not exceed maximum monthly rental rates for those households. The maximum monthly rental rates for very-low-income, low-income, median-income, and moderate-income households, shall be adopted annually by City Council resolution.

(a) At least six percent of the reserved units shall be set aside for very-low-income households, at least seven percent shall be set aside for low-income

households, and at least four percent shall be set aside for median-income households, ~~with the balance~~ and three percent set aside for moderate-income households.

(b) Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as very-low-income units as described in subsection A of this section.

(c) The rental units shall be marketed and made available through an application process directed by the City and the development shall be managed by an experienced management company acceptable to the City.

C. 10.06.050 (E) is hereby amended so it reads as follows:

E. Implementation – Alternative Means of Compliance.

1. Satisfy Housing Requirement. The following alternatives must be economically equivalent to the affordable housing requirement and may satisfy part or all of the affordable housing requirement.
2. City Council Approval Required. Alternatives to constructing affordable units on site specified in subsections E. 4. a through E.4.~~d~~e of this section require prior City Council approval.
3. As Part of Application Submittal. A request to use one of these alternatives shall be presented to the City Council as part of a tentative subdivision map or land use entitlement application that is submitted to the City.
4. Report Required. The request shall be accompanied by a report proposing the particular alternative requested, how the alternative will be economically equivalent to the requirement and further affordable housing opportunities in the City, and demonstrating why it is not feasible for the applicant to strictly conform to the requirements of Section 10.06.050 (A)~~construct affordable units within the development project~~ (through independent data, including financial information).

    a. Accessory Dwelling Units.
        (1) In a project of more than 50 dwelling units, up to 20 percent of the requirement for reserved units may be satisfied by including accessory dwelling units accessory to the market-priced units.
        (2) Each accessory dwelling unit provides a credit of 20 percent of a required affordable unit, without regard to unit size or other minimum standards specified in subsection D.7 of this section (Comparability of Units).
        (3) The accessory dwelling unit shall comply with the standards specified in Section 6.03.120 (Accessory Dwelling Units).

    b. Off-Site Construction.

(1) A developer may satisfy the affordable housing requirement by constructing, or making provisions to construct, reserved housing units on a site other than the primary project site.
(2) The off-site units are subject to the standards specified in subsections D.1 through D.8 of this section.
(3) A developer may not satisfy the affordable housing requirement by applying credits from reserved units on previously constructed projects.
(4) Other existing units in projects already completed may not be substituted to satisfy the affordable housing requirement.

c. In-Lieu Fee.
(1) A developer may satisfy the affordable housing requirement by paying an in-lieu fee for each market-priced unit.
(2) The method of calculating the in-lieu fee is specified in LMC 3.26.050.
(3) Whenever the number of affordable units required to be constructed includes a fraction of a unit, the payment of a proportional in-lieu fee shall satisfy that partial unit requirement.
(4) For residential subdivisions or rental projects with 10 or fewer units, a developer may satisfy the affordable housing requirement by paying an in-lieu fee for each market-priced unit. This does not require City Council approval.
(5) The applicable fee rate shall be determined at the time of building permit application unless otherwise agreed to in the project's low income housing agreement.

d. Dedication of Land.
(1) A developer may satisfy the affordable housing requirement by dedicating to the City a parcel of land suitable for development of housing units equal to or exceeding the number of affordable units required to be provided in compliance with this section.
(2) The General Plan designation and zoning designation on the land proposed for dedication shall be consistent with the intended use of the property for affordable housing at the appropriate density, and there shall be direct access to improved streets and utilities.

e. <u>Isabel Neighborhood Specific Plan – Alternative Affordable Plan</u>
<u>(1) Within the Isabel Neighborhood Specific Plan, A developer may satisfy the affordable housing requirement through an Alternative Affordable Plan.</u>
<u>(2) The Alternative Affordable Plan shall meet the following requirements:</u>

i. May only be considered as part of a Development Agreement between a developer and the City of Livermore; and

ii. May only be considered within the Specific Plan Core Area (Subareas 3a, 3b, and 3c).

Section 4. *Recommendation*. The Planning Commission held a duly noticed public hearing on July 2, 2024, to consider adoption of an ordinance approving the Development Code Amendment and by its Resolution No. 18-24, attached hereto as Exhibit A, recommended that the City Council adopt the ordinance and approve the Development Code Amendment.

Section 5. *Public Hearing*. Prior to taking action on the Project, and at a properly noticed public hearing, the City Council of the City of Livermore reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony; and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The City Council's determination is based on the Record Evidence, which is incorporated into this Ordinance by reference.

Section 6. *Environmental Review*. The City Council has adopted Resolution No. [_____] adopting the Isabel Crossing Addendum to the Isabel Neighborhood Specific Plan Final Supplemental Environmental Impact Report (State Clearinghouse No. 2016042039), and finding that no subsequent or supplemental Environmental Impact Report is required, under the provisions of the California Environmental Quality Act ("CEQA") per CEQA Guidelines section 15164.

Section 7. *Consistency*. Development Code Amendment (DCA) 24-001 is consistent with the General Plan, the Isabel Neighborhood Specific Plan, and the Livermore Development Code.

Section 8. *Findings and Approval*. The City Council has considered the findings made in Planning Commission Resolution No. 18-24, attached hereto as Exhibit A, and hereby adopts the same findings by this reference and incorporates them herein, and based upon the City Council's own independent review of the Record Evidence and considerations, it adopts this Ordinance approving the Development Code Amendment.

Section 9. *Publication and Effective Date.* This ordinance or a comprehensive summary thereof shall be published once in a newspaper of general circulation of the city of Livermore within 15 days after its adoption and shall take effect and be in force 30 days from and after its adoption.

Section 10. *Filing.* The Planning Manager is directed to file a Notice of Determination for the Isabel Crossing Addendum with the Alameda County Clerk.

Section 11. *Documents.* The documents that constitute the record of proceedings upon which this decision is based on can be found in the City Clerk's Office, 1052 S. Livermore Avenue, Livermore, California.

Section 12. *Severability*. If any part of this ordinance is declared unconstitutional or invalid by a court, such unconstitutionality or invalidity shall not affect any remaining parts.

The foregoing ordinance was introduced at the meeting of the City Council of the City of Livermore held on July 22, 2024, by the following vote:

Exhibit A – Planning Commission Resolution 18-24
Exhibit B – Livermore Development Code Text Amendment

IN THE PLANNING COMMISSION OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION RECOMMENDING THAT THE CITY COUNCIL APPROVE DEVELOPMENT CODE AMENDMENT 24-001, FOR THE ISABEL CROSSING PROJECT, THAT WOULD AMEND THE ALTERNATIVE MEANS OF COMPLIANCE AND AFFORDABILITY REQUIREMENTS IN LIVERMORE DEVELOPMENT CODE SECTION 10.06.050 ("INCLUSIONARY ORDINANCE")

On September 22, 2022, the City received an application from Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant") to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-00, Development Agreement (DA) 22-001, Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new tax district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

DCA 24-001 proposes an amendment to Livermore Development Code section 10.06.050.1.c, modifying the affordable housing requirements in the Isabel Neighborhood Specific Plan Area, and amending section 10.06.050.E.4., establishing alternative means of compliance for development within a portion of the Isabel Neighborhood Specific Plan Area.

On July 2, 2024, the Planning Commission held a duly noticed public hearing to consider the Amendment, together with the Project, staff recommendations, all public comments and testimony, and findings.

Together with this Resolution, the Planning Commission concurrently considered resolutions for: 1) the Project's Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, and Master Sign Program Amendment (MSP) 24-00 applications; 2) the Project's Development Agreement (DA) 22-001 application; 3) the Project's Specific Plan Amendment (SPPA) 24-001 application; and 4) the Project's Consistency Determination (CD) 24-004 application.

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of

Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the Planning Commission reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The Planning Commission's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED that the Planning Commission of the City of Livermore has considered the Record Evidence and recommends the City Council adopt a resolution adopting an Addendum to the 2020 Isabel Neighborhood Specific Plan Supplemental Environmental Impact Report (SCH #2016042039), consistent with the requirements of the California Environmental Quality Act ("CEQA").

BE IT FURTHER RESOLVED, with respect to Development Code Amendment (DCA) 24-001, the Planning Commission finds based upon the information presented that:

1. The proposed amendment is consistent with the General Plan and any applicable Specific Plan.

   Findings: The Project proposes a Development Code Amendment to: 1) Enable the approval of the Project's proposed alternative means of compliance with applicable City affordable housing requirements; and 2) Replace the existing Specific Plan's for-sale affordable requirements with the Citywide rates of 7.5% Lower and 7.5% Moderate. Each component of the Amendment is consistent with the General Plan and Isabel Neighborhood Specific Plan, as follows:

   Consistency with General Plan Housing Element

   The proposed Inclusionary Ordinance amendments are consistent with the following General Plan Housing Element policies:

   - Policy 1.2: Facilitate the development of a range of housing types through area planning efforts.
   - Policy 2.1: Facilitate the provision of affordable housing, infill development, and mixed-use projects in locations served by existing infrastructure, particularly transit services.
   - Policy 3.1: Facilitate the production of affordable housing through regulation of and incentives to new development.

   The proposed Inclusionary Ordinance amendments would allow for a distinct Alternative Means of Compliance within the Isabel Neighborhood Specific Plan. The proposed Alternative Means of Compliance would allow the City Council to authorize a development to deviate from the Inclusionary Ordinance requirements, so long as the alternative is economically equivalent. In this way, the amendment facilitates the production of affordable housing by allowing for more flexibility and novel approaches to housing production.

   Project proposes a creative approach whereby the market-rate for-sale units

offset the financial costs of the required affordable housing. By untethering affordable housing from every product type, affordable units could be focused in portions of the site and additional affordable units could be provided, beyond that required. Further, the City Council still ensures the alternative proposal is economically equivalent to the standard inclusionary requirements, guaranteeing each project will still provide sufficient affordable housing and a range of housing types.

The Amendment to the Inclusionary Ordinance would also modify the required affordability levels from 20% median and moderate, to 15% Lower and Moderate. Historically, Livermore has overperformed its RHNA numbers in the Median and Moderate categories, and underperformed in the Lower category. This modification ensures future for-sale product would be required to provide Lower Income units, ensuring Specific Plan policy better keeps pace with Livermore's RHNA requirements and a range of housing types is provided.

Consistency with Isabel Neighborhood General Plan Designation

The project site has a General Plan land use designation of Isabel Neighborhood. The Isabel Neighborhood seeks to create a safe, vibrant, complete neighborhood that includes amenities for residents, workers, and students; ensure new development is compatible with existing development and community character; and support transit ridership and citywide goals for increased transportation options, housing choices, and economic vitality [Livermore General Plan Land Use Element, p. 3-23]. The proposed amendments would facilitate the proposed Project, which will provide diverse housing choices that are affordable to a range of income levels.

Consistency with Isabel Neighborhood Specific Plan

The proposed Inclusionary Ordinance Amendments are consistent with the following Specific Plan Goals:

- G-LU-5: Support a diverse housing stock that provides options for students, seniors, low-income families, first-time homebuyers, and people with disabilities.
- G-LU-6: Promote the production of affordable for-sale and rental units and mixed-income developments such that at least 25 percent of all new units at build-out are offered at below-market rates, in order to provide affordable housing opportunities for rent and ownership in the Isabel Neighborhood and to take advantage of the strong connection between transit use and affordable housing.

The proposed Amendments would allow for more flexibility in affordable housing production by granting the City Council the authority to allow alternative affordable plans. Such plans could provide higher quantities of affordable units by allowing projects to deviate from the Inclusionary Ordinance's comparability

standards. For example, the proposed Isabel Crossing Project focuses affordability levels in certain unit types and in certain portions of the site plan, but provides 28% overall affordability, which is 8% higher than required. This helps drive up overall affordability levels in the Specific Plan, furthering Specific Plan G-LU-6. In addition, the proposed modifications to the affordability requirements would require for-sale units in the Specific Plan to provide Lower Income housing units. This would increase the diversity of Livermore's housing stock, ensuring options for individuals and families of all incomes. The proposed changes align with the proposed Specific Plan amendments that allow for the same.

2. The proposed amendment will not be detrimental to the public interest, health, safety, convenience, or welfare of the City.

   Findings: Any Alternative Affordable Plan would still be required to demonstrate economic equivalence, ensuring all projects continue to meet their affordable obligations. Further, the proposed changes to the affordability requirements would increase Livermore's production of Lower Income units, diversifying Livermore's housing stock and increasing housing opportunities for lower income individuals and families. The changes would not change the required project review process. All projects would still be required to provide utilities and services to all new residents and would be required to protect the environment. The City Council may deny a proposed affordable plan or a proposed project if it does not meet City standards. Therefore, the proposed Amendment will not be detrimental to the public interest, health, safety, convenience, or welfare of the City.

3. The proposed amendment is internally consistent with other applicable provisions of this Development Code.

   Findings: The proposed amendments only affect the Inclusionary Ordinance, codified in section 10.06.050 of the Development Code. The proposed alternative affordable plan language is consistent with the existing Alternative Means of Compliance section of the Inclusionary Ordinance, in that it allows for the City Council to authorize certain deviations from the Development Code if the project demonstrates economic equivalence. The proposed amendments to the affordability requirements within the Isabel Neighborhood Specific Plan Area, aligns the Specific Plan with the rest of the City, where for-sale units are required to provide 15% affordable units, divided evenly between the Lower and Moderate-income levels. Therefore, both changes are consistent with existing Inclusionary Ordinance standards and will not conflict with any other provision of the Development Code.

BE IT FURTHER RESOLVED that the Livermore Planning Commission, based upon its own independent review of the Record Evidence and considerations, and based on the above findings which are necessary to protect the public health, safety, and general welfare, hereby recommends the City Council approve Development Code Amendment (DCA) 24-001.

BE IT FURTHER RESOLVED that the Livermore Planning Commission recommends the City Council direct the Planning Manager to file a Notice of Determination for the Project with the Alameda County Clerk if the Project is approved.

The documents that constitute the record of proceedings upon which this decision is based can be found in the Community Development Department 1052 S. Livermore Avenue, in Livermore, California.

On the motion by Commissioner Kronzak, seconded by Commissioner Leary, the foregoing Resolution was adopted at the Planning Commission meeting of July 2, 2024 by the following vote:

AYES: DUNBAR, FINTSCHENKO, KRONZAK, LEARY.
NOES: NONE.
ABSENT: ANDERSON.

Jacob Anderson, Chairperson

Stephen Riley

by Stephen Riley, Planning Manager
Secretary to the Planning Commission

10.06.050(A)(1)(c)

c. Isabel Neighborhood Specific Plan Area. In the Isabel Neighborhood Specific Plan area, provide affordable housing in accordance with section 10.06.050(D)(4)(c) below. ~~that at least 20 percent of the total dwelling units shall be affordable housing as follows:~~

> ~~(1) For-Sale Units. The affordable housing units for for-sale residential developments must be sold to median- and moderate-income households. Of the total number of dwelling units (20 percent) set aside, at least five percent shall be reserved for sale to median-income households with the balance set aside for moderate-income households. Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as median-income units. For example, a 110-unit for-sale residential development would be required to provide 15 percent, or 16.5 units, at the moderate-income level and five percent, or five and one-half units, at the median-income level. Therefore, 16 units shall be provided at the moderate-income level and six units shall be provided at the median-income level.~~
>
> ~~(2) Rental Units. The affordable housing units for rental residential developments must be designated or reserved for rental to very-low-income, and low-income, median-income, and moderate-income households. Of the total number of dwelling units (20 percent) set aside, at least six percent shall be reserved for rental to very-low-income households, at least seven percent shall be reserved for low-income households, and at least four percent shall be reserved for median-income households, with the balance set aside for moderate-income households. Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as very-low-income units. For example, a 110-unit rental residential development would be required to provide six percent, or six and six-tenths units, at the very-low income level; seven percent, or seven and seven-tenths units, at the low-income level; four percent, or four and four-tenths units at the median-income level; and three percent, or three and three-tenths units, at the moderate-income level. The combined fractional units equate to two units that shall be provided as very-low-income units. Therefore, eight units shall be provided at the very-low income level, seven units shall be provided at the low-income level, four units shall be provided at the median-income level, and three units shall be provided at the moderate-income level.~~

10.06.050(D)(4)(c)

c. Isabel Neighborhood Specific Plan Area.

> (1) For-Sale Units. The developer shall reserve ~~20~~ 15 percent or more of the for-sale units as affordable units to be sold to ~~median~~ low-and moderate-income households at a price that does not exceed the maximum affordable purchase price for a unit for those households. The

maximum purchase price for ~~median~~ low- and moderate-income households shall be as adopted annually by City Council resolution.

(a) At least ~~five~~ seven-and-one-half (7.5) percent of the reserved units shall be set aside for ~~median~~low-income households, ~~with the balance set aside~~ and at least seven-and-one-half (7.5) percent for moderate-income households.

(b) Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as ~~median~~low-income units ~~as described in subsection A of this section~~.

(c) The for-sale units shall be encumbered in a manner acceptable to the City, so that if a buyer resells the reserved unit within the restricted time period for a price in excess of the inflation-adjusted purchase price, then the excess profit will be returned to the City for use in affordable housing programs.

(2) Rental Units. The developer shall reserve 20 percent or more of the rental units as affordable units to be rented to very-low-income, low-income, median-income, and moderate-income households at a cost that does not exceed maximum monthly rental rates for those households. The maximum monthly rental rates for very-low-income, low-income, median-income, and moderate-income households, shall be adopted annually by City Council resolution.

(a) At least six percent of the reserved units shall be set aside for very-low-income households, at least seven percent shall be set aside for low-income households, and at least four percent shall be set aside for median-income households, ~~with the balance~~ and three percent set aside for moderate-income households.

(b) Whenever the inclusionary requirement results in a fraction of units, the units shall be combined and provided as very-low-income units as described in subsection A of this section.

(c) The rental units shall be marketed and made available through an application process directed by the City and the development shall be managed by an experienced management company acceptable to the City.

E. Implementation – Alternative Means of Compliance.

1. Satisfy Housing Requirement. The following alternatives must be economically equivalent to the affordable housing requirement and may satisfy part or all of the affordable housing requirement.

2. City Council Approval Required. Alternatives to constructing affordable units on site specified in subsections E. 4. a through E.4.de of this section require prior City Council approval.

3. As Part of Application Submittal. A request to use one of these alternatives shall be presented to the City Council as part of a tentative subdivision map or land use entitlement application that is submitted to the City.

4. Report Required. The request shall be accompanied by a report proposing the particular alternative requested, how the alternative will be economically equivalent to the requirement and further affordable housing opportunities in the City, and demonstrating why it is not feasible for the applicant to strictly conform to the requirements of Section 10.06.050 (A) ~~construct affordable units within the development project~~ (through independent data, including financial information).

   a. Accessory Dwelling Units.

      (1) In a project of more than 50 dwelling units, up to 20 percent of the requirement for reserved units may be satisfied by including accessory dwelling units accessory to the market-priced units.

      (2) Each accessory dwelling unit provides a credit of 20 percent of a required affordable unit, without regard to unit size or other minimum standards specified in subsection D.7 of this section (Comparability of Units).

      (3) The accessory dwelling unit shall comply with the standards specified in Section 6.03.120 (Accessory Dwelling Units).

   b. Off-Site Construction.

      (1) A developer may satisfy the affordable housing requirement by constructing, or making provisions to construct, reserved housing units on a site other than the primary project site.

      (2) The off-site units are subject to the standards specified in subsections D.1 through D.8 of this section.

      (3) A developer may not satisfy the affordable housing requirement by applying credits from reserved units on previously constructed projects.

      (4) Other existing units in projects already completed may not be substituted to satisfy the affordable housing requirement.

   c. In-Lieu Fee.

(1) A developer may satisfy the affordable housing requirement by paying an in-lieu fee for each market-priced unit.

(2) The method of calculating the in-lieu fee is specified in LMC 3.26.050.

(3) Whenever the number of affordable units required to be constructed includes a fraction of a unit, the payment of a proportional in-lieu fee shall satisfy that partial unit requirement.

(4) For residential subdivisions or rental projects with 10 or fewer units, a developer may satisfy the affordable housing requirement by paying an in-lieu fee for each market-priced unit. This does not require City Council approval.

(5) The applicable fee rate shall be determined at the time of building permit application unless otherwise agreed to in the project's low income housing agreement.

d. Dedication of Land.

(1) A developer may satisfy the affordable housing requirement by dedicating to the City a parcel of land suitable for development of housing units equal to or exceeding the number of affordable units required to be provided in compliance with this section.

(2) The General Plan designation and zoning designation on the land proposed for dedication shall be consistent with the intended use of the property for affordable housing at the appropriate density, and there shall be direct access to improved streets and utilities.

e. <u>Isabel Neighborhood Specific Plan – Alternative Affordable Plan</u>

<u>(1) Within the Isabel Neighborhood Specific Plan, A developer may satisfy the affordable housing requirement through an Alternative Affordable Plan.</u>

<u>i. The Alternative Affordable Plan shall meet the following requirements:
May only be considered as part of a Development Agreement between a developer and the City of Livermore; and</u>

<u>ii. May only be considered within the Specific Plan Core Area (Subareas 3a, 3b, and 3c).</u>

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION APPROVING SPECIFIC PLAN AMENDMENT 24-001, FOR THE ISABEL CROSSING PROJECT, THAT WOULD AMEND THE ISABEL NEIGHBORHOOD SPECIFIC PLAN'S MASTER PLANNING AND INCLUSIONARY POLICIES AND AMEND THE LAND USE MAP

On September 22, 2022, the City of Livermore ("City") received an application from Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant") to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On March 13, 2023, the City Council adopted the 2023 to 2031 Livermore Housing Element, providing adequate sites to support CA's Regional Housing Needs Allocation (RHNA) requirements.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA 22-001), Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new community facilities district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

The City did not meet the Lower Income RHNA requirements for the Fifth RHNA Cycle (2014 – 2022).

The City's existing Isabel Neighborhood Specific Plan affordable policy does not require all for-sale development projects in the Isabel Neighborhood to provide Lower Income housing.

Providing adequate Lower Income affordable housing with each development project is critical to keep pace with Livermore's RHNA requirements and to provide a range of housing opportunities for residents of all income levels.

The Project provides fewer Lower Income units than anticipated in the Livermore Housing Element's Sites Inventory and is required to undergo a No Net Loss Review, as required by Government Code Section 65863.

Isabel Neighborhood Specific Plan Subarea 3a is an adequate site to accommodate the net loss, and changing its land use designation to residential would result in No Net Loss of Lower Income units, as required by Government Code Section 65863.

The City's existing Isabel Neighborhood Specific Plan master planning policy allows for averaging densities within and across Isabel Neighborhood subareas. The policy intends to provide development flexibility and further Specific Plan buildout.

Allowing for both density averaging and mixing of uses within and across subareas increases development flexibility and encourages development.

The proposed Specific Plan amendments would provide the City Council more options to secure Lower Income affordable housing, ensure future for-sale development projects within the Isabel Neighborhood provide Lower Income affordable units, satisfy No Net Loss requirements, and facilitate development flexibility and Specific Plan buildout.

On July 2, 2024, at a duly noticed public hearing, the Planning Commission considered the Project, heard public testimony, made the necessary findings, and adopted Planning Commission resolution No. 17-24, attached hereto as Exhibit A, recommending the City Council approve the Project.

On July 22, 2024, the City Council held a duly noticed public hearing to consider the Project, Planning Commission and staff recommendations, all public comments and testimony, and findings.

Together with this resolution, the City Council concurrently considered resolutions for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Master Sign Program Amendment (MSP) 24-001, the Density Bonus request, No Net Loss, the Master Plan, and the Alternative Affordable Plan; and ordinances for: 1) the Project's Development Agreement (DA) 22-001 application; and 2) the Project's Development Code Amendment (DCA) 24-001 application.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the City Council reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The City Council's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED that the City Council of the City of Livermore has considered the Record Evidence and adopted a resolution adopting an Addendum to the 2020 Isabel Neighborhood Specific Plan Supplemental Environmental Impact Report (SCH #2016042039), consistent with the requirements of the Environmental Quality Act ("CEQA").

BE IT FURTHER RESOLVED that the City Council of the City of Livermore has considered the findings made in Planning Commission Resolution No. 17-24, attached hereto as Exhibit A, and the City Council hereby adopts the same findings by this reference and incorporates them as their own findings as part of this resolution, and as described below:

1. A Specific Plan may only be amended if first found consistent with the General Plan in compliance with Government Code Section 65454.

   Findings: The Project proposes a Specific Plan Amendment to: 1) Amend INSP Policy P-LU-8 to permit master planning for the multi-subarea, master planned Project, which would enable the averaging of densities and land uses across the entire Project Site and enable the Project to align its conceptual master plan with the applicable land use requirements, goals and policies set forth in the INSP; 2) Amend INSP Policy P-LU-34 to enable the approval of the Project's proposed alternative means of compliance with applicable City affordable housing requirements, and to replace the existing Specific Plan's for-sale affordable requirements with the Citywide rates of 7.5% Lower and 7.5% Moderate; and 3) Amend the land use map in Specific Plan Subarea 3a to change the allowed Office Core uses to Residential Core uses. Each component of the Amendment is consistent with the General Plan, as follows:

   Consistency with Isabel Neighborhood Designation

   The project site has a General Plan land use designation of Isabel Neighborhood. The Isabel Neighborhood seeks to create a safe, vibrant, complete neighborhood that includes amenities for residents, workers, and students; ensure new development is compatible with existing development and community character; and support transit ridership and citywide goals for increased transportation options, housing choices, and economic vitality [Livermore General Plan Land Use Element, p. 3-23]. The proposed amendments would facilitate the proposed Project. The Project is consistent with the land use designation and implements the General Plan goals for the Isabel Neighborhood. For example, the Project would create a new complete and vibrant neighborhood, with a mixed-use main street commercial core served by a range of amenities, including a public park, public plazas, a private community pool, public art, and tree-lined streets. The Project is also compatible with surrounding development since the building heights step down towards the existing residential and office uses

to the west and north and the buildings are designed with traditional architectural features common in Livermore, like brick, deep eave overhangs, and strong roof cornice elements.

The Project also supports transit ridership and mode shift by adding new bus stops and protected bike lanes, and by locating the project near the future Valley Link commuter train station and existing LAVTA bus lines. Increased housing choices are provided for nearby students and faculty at Las Positas College and other individuals and families through a range of for-sale and for-rent units of differing sizes, including units reserved for individuals and families of very low to moderate incomes. Finally, the project would increase the area's economic vitality by adding a mix of commercial and office uses, supporting jobs and a larger tax base, which implements the General Plan goals for the Isabel Neighborhood.

Consistency with Land Use Element

More specifically, the proposed Master Planning Policy amendment is consistent with the following General Plan Land Use Element policies:

- Objective LU-1.1 Locate new development so as to create a consolidated pattern of urbanization, maximizing the use of existing public services and facilities.
- Objective LU-1.2 Create neighborhoods that include a mix of uses and a range of housing types to meet the needs of all residents.
- Objective LU-3.1 Create neighborhoods near transit that include a mix of uses and a range of housing types to meet the needs of all residents.

In addition to allowing for averaging densities within and across Specific Plan subareas, the proposed Master Plan amendments would allow for distributing land uses as well. This provides more development flexibility and better allows for mixed-use neighborhoods, since uses can be located anywhere within a subarea, not only as prescribed in the conceptual Specific Plan land use map, effectively creating large mixed-use zones. Further, mixing uses within the subarea prevents urban sprawl and creates more compact development, since uses are no longer required to be separated by Euclidean districts, but can be collocated. Collocated uses reduce Vehicles Miles Traveled, by ensuring daily needs and jobs (like commercial and office uses) are within walking distance of residential.

Consistency with Housing Element

Further, the proposed Inclusionary Policy amendments and the proposed land use map amendment are consistent with the following General Plan Housing Element policies:

- Policy 1.2: Facilitate the development of a range of housing types through area planning efforts.
- Policy 2.1: Facilitate the provision of affordable housing, infill development, and mixed-use projects in locations served by existing infrastructure, particularly transit services.
- Policy 3.1: Facilitate the production of affordable housing through regulation of and incentives to new development.

The proposed Inclusionary Policy amendments would allow for a distinct Alternative Means of Compliance within the Specific Plan, similar to that allowed in the City's Inclusionary Ordinance. The proposed Alternative Means of Compliance would allow the City Council to authorize a project's affordable plan that deviates from the Inclusionary Ordinance requirements, so long as the alternative is economically equivalent. In this way, the amendment facilitates the production of affordable housing by allowing for more flexibility and novel approaches to housing production. For example, the Project proposes a creative approach whereby the market-rate for-sale units offset the financial costs of the required affordable housing. By untethering affordable housing from every product type, affordable units could be focused in portions of the site and additional affordable units could be provided, beyond that required. Further, the City Council still ensures the alternative proposal is economically equivalent to the requirements, guaranteeing each project will still provide sufficient affordable housing and a range of housing types.

The Amendment to the Inclusionary Policy would also modify the required affordability levels from 20% median and moderate, to 15% Lower and Moderate. Historically, Livermore has overperformed its RHNA numbers in the Median and Moderate categories, and underperformed in the Lower category. This modification ensures future for-sale product would be required to provide Lower Income units, ensuring Specific Plan policy better keeps pace with Livermore's RHNA requirements and a range of housing types is provided. Further, the proposed land use map amendment would revise the Office Core designations within Subarea 3a to Residential Core, the densest most compact residential development in the City. Subarea 3a is directly adjacent to the future commuter rail Valley Link station. In this way, the land use changes would implement General Plan policy by promoting infill development near transit, facilitate a range of housing types by allowing for smaller units, and by providing more affordable units overall since the site is being upzoned from office uses.

BE IT FURTHER RESOLVED that, based upon the City Council's own independent review of the Record Evidence and considerations, the City Council hereby approves Specific Plan Amendment (SPPA) 24-001, attached hereto as Exhibits B and C, for the Isabel Crossing Project.

BE IT FURTHER RESOLVED that the City Council of the City of Livermore directs the Planning Manager to file a Notice of Determination with the Alameda County Clerk.

BE IT FURTHER RESOLVED that the City Council of the City of Livermore finds that the effective date of this resolution shall be the effective date of Development Agreement (DA) 22-001 and Development Code Amendment (DCA) 24-001.

The documents that constitute the record of proceedings upon which this decision is based can be found in the City Clerk's Office, 1052 S. Livermore Avenue, in Livermore California.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on July 22, 2024, by the following vote:

Exhibit A – Planning Commission Resolution No. 17-24
Exhibit B – Specific Plan Map Amendment
Exhibit C – Specific Plan Text Amendment

IN THE PLANNING COMMISSION OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION RECOMMENDING THAT THE CITY COUNCIL APPROVE SPECIFIC PLAN AMENDMENT 24-001, FOR THE ISABEL CROSSING PROJECT, THAT WOULD AMEND THE ISABEL NEIGHBORHOOD SPECIFIC PLAN'S MASTER PLANNING AND INCLUSIONARY POLICIES AND AMEND THE LAND USE MAP

On September 22, 2022, the City received an application from the Isabel Portola Owner, LLC (Harridge Development Group), ("Applicant") to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-00, Development Agreement (DA) 22-001, Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new tax district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

On July 2, 2024, the Planning Commission held a duly noticed public hearing to consider the Amendment, together with the Project, staff recommendations, all public comments and testimony, and findings.

Together with this Resolution, the Planning Commission concurrently considered resolutions for: 1) the Project's Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, and Master Sign Program Amendment (MSP) 24-00 applications; 2) the Project's Development Agreement (DA) 22-001 application; 3) the Project's Development Code Amendment (DCA) 24-001 application; and 4) Consistency Determination (CD) 24-004.

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the Planning Commission reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The Planning Commission's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED that the Planning Commission of the City of Livermore

has considered the Record Evidence and recommends the City Council adopt a resolution adopting an Addendum to the 2020 Isabel Neighborhood Specific Plan Supplemental Environmental Impact Report (SCH #2016042039), consistent with the requirements of the California Environmental Quality Act ("CEQA").

BE IT FURTHER RESOLVED, with respect to Specific Plan Amendment (SPPA) 24-001, the Planning Commission finds based upon the information presented that:

1. A Specific Plan may only be amended if first found consistent with the General Plan in compliance with Government Code Section 65454.

   Findings: The Project proposes a Specific Plan Amendment to: 1) Amend INSP Policy P-LU-8 to permit master planning for the multi-subarea, master planned Project, which would enable the averaging of densities and land uses across the entire Project Site and enable the Project to align its conceptual master plan with the applicable land use requirements, goals and policies set forth in the INSP; 2) Amend INSP Policy P-LU-34 to enable the approval of the Project's proposed alternative means of compliance with applicable City affordable housing requirements, and to replace the existing Specific Plan's for-sale affordable requirements with the Citywide rates of 7.5% Lower and 7.5% Moderate; and 3) Amend the land use map in Specific Plan Subarea 3a to change the allowed Office Core uses to Residential Core uses. Each component of the Amendment is consistent with the General Plan, as follows:

   Consistency with Isabel Neighborhood Designation

   The project site has a General Plan land use designation of Isabel Neighborhood. The Isabel Neighborhood seeks to create a safe, vibrant, complete neighborhood that includes amenities for residents, workers, and students; ensure new development is compatible with existing development and community character; and support transit ridership and citywide goals for increased transportation options, housing choices, and economic vitality [Livermore General Plan Land Use Element, p. 3-23]. The proposed amendments would facilitate the proposed Project. The Project is consistent with the land use designation and implements the General Plan goals for the Isabel Neighborhood. For example, the Project would create a new complete and vibrant neighborhood, with a mixed-use main street commercial core served by a range of amenities, including a public park, public plazas, a private community pool, public art, and tree-lined streets. The Project is also compatible with surrounding development since the building heights step down towards the existing residential and office uses to the west and north and the buildings are designed with traditional architectural features common in Livermore, like brick, deep eave overhangs, and strong roof cornice elements.

   The Project also supports transit ridership and mode shift by adding new bus stops and protected bike lanes, and by locating the project near the future Valley Link commuter train station and existing LAVTA bus lines. Increased housing choices are provided for nearby students and faculty at Las Positas College and other individuals and families through a range of for-sale and for-rent units of differing sizes, including units reserved for individuals and families of very low

to moderate incomes. Finally, the project would increase the area's economic vitality by adding a mix of commercial and office uses, supporting jobs and a larger tax base, which implements the General Plan goals for the Isabel Neighborhood.

Consistency with Land Use Element

More specifically, the proposed Master Planning Policy amendment is consistent with the following General Plan Land Use Element policies:

- Objective LU-1.1 Locate new development so as to create a consolidated pattern of urbanization, maximizing the use of existing public services and facilities.
- Objective LU-1.2 Create neighborhoods that include a mix of uses and a range of housing types to meet the needs of all residents.
- Objective LU-3.1 Create neighborhoods near transit that include a mix of uses and a range of housing types to meet the needs of all residents.

In addition to allowing for averaging densities within and across Specific Plan subareas, the proposed Master Plan amendments would allow for distributing land uses as well. This provides more development flexibility and better allows for mixed-use neighborhoods, since uses can be located anywhere within a subarea, not only as prescribed in the conceptual Specific Plan land use map, effectively creating large mixed-use zones. Further, mixing uses within the subarea prevents urban sprawl and creates more compact development, since uses are no longer required to be separated by Euclidean districts, but can be collocated. Collocated uses reduce Vehicles Miles Traveled, by ensuring daily needs and jobs (like commercial and office uses) are within walking distance of residential.

Consistency with Housing Element

Further, the proposed Inclusionary Policy amendments and the proposed land use map amendment are consistent with the following General Plan Housing Element policies:

- Policy 1.2: Facilitate the development of a range of housing types through area planning efforts.
- Policy 2.1: Facilitate the provision of affordable housing, infill development, and mixed-use projects in locations served by existing infrastructure, particularly transit services.
- Policy 3.1: Facilitate the production of affordable housing through regulation of and incentives to new development.

The proposed Inclusionary Policy amendments would allow for a distinct Alternative Means of Compliance within the Specific Plan, similar to that allowed in the City's Inclusionary Ordinance. The proposed Alternative Means of Compliance would allow the City Council to authorize a project's affordable plan

that deviates from the Inclusionary Ordinance requirements, so long as the alternative is economically equivalent. In this way, the amendment facilitates the production of affordable housing by allowing for more flexibility and novel approaches to housing production. For example, the Project proposes a creative approach whereby the market-rate for-sale units offset the financial costs of the required affordable housing. By untethering affordable housing from every product type, affordable units could be focused in portions of the site and additional affordable units could be provided, beyond that required. Further, the City Council still ensures the alternative proposal is economically equivalent to the requirements, guaranteeing each project will still provide sufficient affordable housing and a range of housing types.

The Amendment to the Inclusionary Policy would also modify the required affordability levels from 20% median and moderate, to 15% Lower and Moderate. Historically, Livermore has overperformed its RHNA numbers in the Median and Moderate categories, and underperformed in the Lower category. This modification ensures future for-sale product would be required to provide Lower Income units, ensuring Specific Plan policy better keeps pace with Livermore's RHNA requirements and a range of housing types is provided. Further, the proposed land use map amendment would revise the Office Core designations within Subarea 3a to Residential Core, the densest most compact residential development in the City. Subarea 3a is directly adjacent to the future commuter rail Valley Link station. In this way, the land use changes would implement General Plan policy by promoting infill development near transit, facilitate a range of housing types by allowing for smaller units, and by providing more affordable units overall since the site is being upzoned from office uses.

BE IT FURTHER RESOLVED that the Livermore Planning Commission, based upon its own independent review of the Record Evidence and considerations, and based on the above findings which are necessary to protect the public health, safety, and general welfare, hereby recommends the City Council approve Specific Plan Amendment (SPPA) 24-001 and the Project.

BE IT FURTHER RESOLVED that the Livermore Planning Commission recommends the City Council direct the Planning Manager to file a Notice of Determination for the Project with the Alameda County Clerk if the Project is approved.

The documents that constitute the record of proceedings upon which this decision is based can be found in the Community Development Department 1052 S. Livermore Avenue, in Livermore, California.

On the motion by Commissioner Kronzak, seconded by Commissioner Leary, the foregoing Resolution was adopted at the Planning Commission meeting of July 2, 2024 by the following vote:

AYES: DUNBAR, FINTSCHENKO, KRONZAK, LEARY.
NOES: NONE.
ABSENT: ANDERSON.

Secretary to the Planning Commission

EXHIBIT B

FIGURE 2-3: SUBAREA DIAGRAM

DYETT & BHATIA
Urban and Regional Planners

Master Planning Policy

P-LU-8: The City shall encourage property owners to collaborate and prepare Master Plans by residential subarea. (Refer to Figure 2-3 for the subarea map.) For the purposes of this Specific Plan, Master Planning shall mean the subdivision and/or site plan design review application of at least one entire subarea. If Master Planned~~,~~: 1) ~~r~~Residential densities may be averaged or distributed across the subarea rather than calculated at the parcel level; and 2)~~,~~ Land Uses allowed within each residential or non-residential designation of each subarea may be permitted in any location within the subarea. ~~provided that the Master Plan complies with:~~ A subarea may only be Master Planned if the following standards are met:

1. The Master plan must comply with t~~T~~he target subarea unit count and the performance measures identified in Table 2-6.~~; and~~
    a. The City may consider a unit count lower than the average subarea unit count within a Master Plan, if there are demonstrated, significant regulatory, environmental, or other constraints within the subarea, as determined by the Director.
2. Development within each Master Plan shall comply with the development standards identified in Tables 2-2 through 2-5.
    a. Each non-residential use shall comply with the development standards of the non-residential designation that matches the use.
    b. Each residential use shall comply with the development standards of the residential designation that most closely aligns with the product density. ~~All other applicable development and design standards for the land use~~. [Format changed by staff, July 10, 2024].
3. Land uses may only be Master Planned within the Specific Plan Core area (Subareas 3a, 3b, and 3c); [Text added by staff, July 10, 2024].
4. If Master Planning more than one subarea, the densities may be averaged and~~or~~ the permitted land uses may be distributed across those subareas;~~.~~ and
5. The Community Development Director shall approve a Master Plan pursuant to this policy.

~~If Master Planning more than one subarea, the densities may be averaged or distributed across those subareas. The City may consider a unit count lower than the average subarea unit count within a Master Plan, if there are demonstrated, significant regulatory, environmental, or other constraints within the subarea, as determined by the Director.~~

Affordable Policy

P-LU-34: All new residential development shall either:

1. ~~c~~Comply with the City's Inclusionary Ordinance (Section 10.06.050 of the Livermore Development Code)~~,~~; or,
2. Comply with an Alternative Affordable Plan approved by the City Council through a Development Agreement. The Alternative Affordable Plan shall meet the following requirements:
    a. May only be considered within the Specific Plan Core area (Subareas 3a, 3b, and 3c); and

b. Shall be, at a minimum, economically equivalent to the requirements of the Inclusionary Ordinance. The applicant shall demonstrate economic equivalence through reports, studies, or other analysis as determined by the Director.

The City's Inclusionary Ordinance standards for the Specific Plan area are as follows: ~~including at least 20 percent of units for each project shall be affordable (i.e., offered at below-market rates) in the Isabel Neighborhood. The affordable housing units for for-sale residential subdivisions must be sold to moderate- and median-income households. Of the total number of for-sale dwelling units (20 percent) set aside, at least five percent (5%) shall be reserved for sale to median-income households with the balance set aside for moderate-income households. Whenever the inclusionary requirement results in a fractional unit(s), the fractional unit(s) shall be combined to the nearest whole number and provided as median-income units.~~

1. For-Sale Units. A total of fifteen percent (15%) of all for-sale residential developments must be sold to low- and moderate-income households. Of the total number of dwelling units (15%) set aside, at least seven and one-half percent (7.5%) shall be reserved for sale to low-income households and at least seven and one-half percent (7.5%) for moderate-income households. Whenever the inclusionary requirement results in an odd number of units, the majority of units shall be provided as low-income. Whenever the total number of affordable units required to be constructed includes a fraction of a unit, the payment of a proportional in-lieu fee shall satisfy that partial unit requirement.

~~*Example: Calculation of the number of inclusionary units required for a 110-unit for sale residential development:*~~

~~*Required units reserved for moderate-income households: 110 units x 15% = 16.5 units*~~

~~*Required units reserved for median-income households: 110 units x 5% = 5.5 units*~~

~~*Combined fractional units: 0.5 unit + 0.5 unit = 1 unit*~~

~~*Required units to be provided: Moderate-income households = 16 units Median-income households = 6 units*~~

~~*Example: Calculation of the number of inclusionary units required for a 112-unit-for-sale residential development:*~~

~~*Required units reserved for moderate income households: 112 units x 15% = 16.8 units*~~

~~*Required units reserved for median-income households: 110 units x 5% = 5.6 units*~~

~~*Combined fractional units: 0.8 unit + 0.6 unit = 1.4 units*~~

~~*Required units to be provided: Moderate-income households = 16 units Median-income households = 6 units Remaining fractional unit to be paid in-lieu = 0.4 unit*~~

2. Rental Units. A total of twenty percent (20%) of all rental residential developments ~~The affordable housing units for rental residential projects~~ must be designated or reserved for rent to very-low-, low-, median, and moderate-income households. Of the total number of rental dwelling units (20 percent) set aside, at least six percent (6%) shall be reserved for rental to very-low income households, seven percent (7%) shall be reserved for rental to low income households four percent (4%) shall be reserved for rental to median-income households, and three percent (3%) shall be reserved for rental to moderate-income households. Whenever the inclusionary requirements result in a fractional unit(s), the fractional unit(s) shall be combined to the nearest whole number and provided as very low-income units. Whenever the total number of affordable units required to be constructed includes a fraction of a unit, the payment of a proportional in-lieu fee shall satisfy that partial unit requirement.

Example: Calculation of the number of inclusionary units required for a 110-unit rental residential development:

Required units reserved for very-low-income households: 110 x 6% = 6.6 units

Required units reserved for low-income households: 110 x 7% = 7.7 units

Required units reserved for median-income households: 110 x 4% = 4.4 units

Required units reserved for moderate-income households: 110 x 3% = 3.3 units

Combined fractional units: 0.6 unit + 0.7 unit + 0.4 unit + 0.3 unit = 2 units

Required units to be provided: Very-low-income households = 8 units Low-income households = 7 units Median-income households = 4 units Moderate-income households = 3 units

Example: Calculation of the number of inclusionary units required for a 112-unit rental residential development:

Required units for very-low-income households: 112 x 6% = 6.72 units

Required units reserved for low-income households: 112 x 7% = 7.84 units

Required units reserved for median-income households: 112 x 4% = 4.48 units

Required units reserved for moderate-income households: 112 x 3% = 3.36 units

Combined fractional units: 0.72 unit + 0.84 unit = 0.48 unit + 0.36 unit = 2.4 units

Required units to be provided: Very-low-income households = 8 units Low-income households = 7 units Median-income households = 4 units Moderate-income households = 3 units Remaining fractional unit to be paid in-lieu = 0.4 unit

Under the City's Inclusionary Ordinance, affordable housing units shall be built on site and integrated within new residential developments unless the City Council approves an alternative method of compliance. For projects that utilize land dedication as a compliance method, the dedicated land must

be located within the Isabel Neighborhood area and equivalent in actual value to the affordable units it is replacing.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

AN ORDINANCE APPROVING DEVELOPMENT AGREEMENT (DA) 22-001 WITH ISABEL PORTOLA OWNER LLC, FOR THE ISABEL CROSSING PROJECT, THAT WOULD VEST DEVELOPMENT RIGHTS FOR 20 YEARS, PROVIDE FINANCIAL CERTAINTY FOR THE APPLICANT, AND SECURE A RANGE OF COMMUNITY BENEFITS FOR THE CITY OF LIVERMORE

CA Government Code Section 65864 (implemented by Livermore Development Code Chapter 9.04) allows local jurisdictions and private parties to enter into Development Agreements in order to vest certain development rights and to meet local public purpose.

On May 9, 2022, the City Council authorized staff to begin Development Agreement ("Agreement") negotiations with Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant").

On September 22, 2022, the City of Livermore ("City") received an application from the Applicant to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA) 22-001, Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new community facilities district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF LIVERMORE DOES ORDAIN AS FOLLOWS:

Section 1. *Authority*. Pursuant to Government Code Section 65864 et seq., the City Council considers that certain document under City Application No. Development Agreement 22-001 and entitled "Development Agreement (DA) 22-001 for the Isabel

Crossing Project" ("Development Agreement"). The Development Agreement is attached hereto as Exhibit B.

Section 2. *Recommendation*. The Planning Commission held a duly noticed public hearing on July 2, 2024, to consider adoption of an ordinance approving the Development Agreement and by its Resolution No. 19-24, attached hereto as Exhibit A, recommended that the City Council adopt the ordinance and approve the Development Agreement.

Section 3. *Public Hearing*. Prior to taking action on the Project, and at a properly noticed public hearing, the City Council of the City of Livermore reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony; and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The City Council's determination is based on the Record Evidence, which is incorporated into this Ordinance by reference.

Section 4. *Environmental Review*. The City Council has adopted Resolution No. [_____] adopting the Isabel Crossing Addendum to the Isabel Neighborhood Specific Plan Final Supplemental Environmental Impact Report (State Clearinghouse No. 2016042039), and finding that no subsequent or supplemental Environmental Impact Report is required, under the provisions of the California Environmental Quality Act ("CEQA") per CEQA Guidelines section 15164.

Section 5. *Consistency*. Development Agreement 22-001 is consistent with the General Plan and the Livermore Development Code Chapter 9.04.

Section 6. *Findings and Approval*. The City Council has considered the findings made in Planning Commission Resolution No. 19-24, attached hereto as Exhibit A, and hereby adopts the same findings by this reference and incorporates them herein, and based upon the City Council's own independent review of the Record Evidence and considerations, it adopts this Ordinance approving the Development Agreement.

Section 7. *Signing Authority.* The City Manager is hereby authorized to sign the Development Agreement, attached hereto as Exhibit B, on behalf of the City of Livermore.

Section 8. *Publication and Effective Date.* This ordinance or a comprehensive summary thereof shall be published once in a newspaper of general circulation of the city of Livermore within 15 days after its adoption and shall take effect and be in force 30 days from and after its adoption.

Section 9. *Filing.* The Planning Manager is directed to file a Notice of Determination for the Isabel Crossing Addendum with the Alameda County Clerk.

Section 10. *Recording.* The City Clerk is directed to record the Development Agreement within 10 days after the effective date of the Development Agreement.

Section 11. *Documents.* The documents that constitute the record of proceedings upon which this decision is based on can be found in the City Clerk's Office, 1052 S. Livermore Avenue, Livermore, California.

Section 12. *Severability.* If any part of this ordinance is declared unconstitutional or invalid by a court, such unconstitutionality or invalidity shall not affect any remaining parts.

The foregoing ordinance was introduced at the meeting of the City Council of the City of Livermore held on July 22, 2024, by the following vote:

Exhibit A – Planning Commission Resolution 19-24
Exhibit B – Development Agreement

IN THE PLANNING COMMISSION OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION RECOMMENDING THAT THE CITY COUNCIL APPROVE DEVELOPMENT AGREEMENT (DA) 22-001, FOR THE ISABEL CROSSING PROJECT, THAT WOULD VEST DEVELOPMENT RIGHTS FOR 20 YEARS, PROVIDE FINANCIAL CERTAINTY FOR THE APPLICANT, AND SECURE A RANGE OF COMMUNITY BENEFITS FOR THE CITY

CA Government Code Section 65864 (implemented by Livermore Development Code Chapter 9.04) allows local jurisdictions and private parties to enter into Development Agreements in order to vest certain development rights and to meet local public purpose.

On May 9, 2022, the City Council authorized staff to begin Development Agreement ("Agreement") negotiations with Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant").

On September 22, 2022, the City received an application from the Applicant to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA) 22-001, Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new community facilities district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

On July 2, 2024, the Planning Commission held a duly noticed public hearing to consider the Agreement, together with the Project, staff recommendations, all public comments and testimony, and findings.

Together with this Resolution, the Planning Commission concurrently considered Resolutions for the following: 1) The Project's Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Master Sign Program Amendment (MSP) 24-00 applications; 2) The Project's Development Code Amendment (DCA) 24-001 application; 3) The Project's Specific Plan

Amendment (SPPA) 24-001 application; and 4) the Project's Consistency Determination (CD) 24-004

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the Planning Commission reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The Planning Commission's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED that the Planning Commission of the City of Livermore has considered the Record Evidence and recommends the City Council adopt a resolution adopting an Addendum to the 2020 Isabel Neighborhood Specific Plan Supplemental Environmental Impact Report (SCH #2016042039), consistent with the requirements of the California Environmental Quality Act ("CEQA").

BE IT FURTHER RESOLVED, with respect to Development Agreement 22-001, the Planning Commission finds based upon the information presented that:

1. The Development Agreement provides benefit to the City.

   Findings: The Development Agreement will facilitate the development of the proposed Isabel Crossing master planned development project (Project), which provide substantial benefits to the City.

   The Project would contribute to the City's housing and economic development goals. The proposed development consists of 1,299 residential units on approximately 45 acres of land. This would consist of 535 market-rate for-sale townhomes, 10 affordable for-sale townhomes, 241 market-rate for-sale condos, 47 affordable for-sale condos, 160 market-rate for-rent apartments, and 306 affordable for-rent apartments. While the Project is only required to provide a total of 260 affordable units (20%) under the applicable Isabel Neighborhood Specific Plan (INSP), the Project proposes to provide a total of 363 affordable units; 28% of the total units provided and 103 more affordable units than would otherwise be required by the INSP. The units will be deed restricted for sale and rent to median-, moderate-, low-income and very low income households, with 65 very low income rental units, 113 low income rental units, 65 median income rental units, 63 moderate income rental units, 18 median income for-sale units, and 39 moderate income for-sale units. These affordable units – and in particular the higher number of low and very low income units than would otherwise be required by strict compliance with INSP standards – will contribute toward Livermore's 2023-2031 RHNA allocation of 4,570 units and provide much needed low and very low income housing units to help the city meet its specific RHNA goals of producing a total of 1,317 very low and 758 low income units during the current Housing Element cycle ending in 2031.

   This Project will also serve the best interests, and the public health, safety, and welfare of the residents and invitees of the City through: the provision of substantial public revenue in the form of impact fees and increased real property and sales taxes; the provision of land uses that are compatible with the physical nature of the Property and the surrounding area; a new commercial main street that would provide new permanent

jobs and community-serving retail and other commercial uses; new road and alternative transportation infrastructure including an access point for a future light rail station; new public open space and recreational facilities including a neighborhood park, private recreation center and multiple public plazas; and financial contributions to City funds. More information regarding each City benefit is described below:

Economic and Fiscal

According to the *Fiscal / Economic Analysis* report prepared by Kosmont, the Project will provide an estimated $1 million in net new annual tax revenue at full buildout, accounting for Project utility and service needs. Further, the Project would provide over 3,700 construction jobs onsite during the construction period, and an estimated $615 million in total economic output during construction (representing new labor income and goods and services produced within Livermore). During operations at full buildout, the Project would generate $43 million in new local retail spending, provide 200 new jobs, with an estimated $70 million total annual economic output (representing new jobs, new spending, and new wages). The Project represents an approximately $600 million initial investment into the City of Livermore.

Alternative Transportation Infrastructure

The Agreement secures one additional mile of bike lanes beyond the normal developer frontage obligations, one fully protected bike intersection, two additional bus stops, an extra 1,500-foot-long landscaped street median, and two fully-protected pedestrian crossings.

Commercial Uses

The Agreement ensures a non-membership grocer or food sales use will occur onsite, requires temporary commercial activation of the site, and incentivizes the Main Street retail uses to build out earlier than the current market would likely deliver retail uses onto Main Street.

Affordable Housing

The Agreement secures eight percent more affordable housing than required, representing 103 more overall units than required, representing an investment of approximately $15 million above the requirement. Of the total, the Project is providing 116 more Lower Income units than required. Further, the Agreement requires an $11.4 million low-income housing bond to ensure the low-income housing is constructed.

Architecture and Design

Given new state housing laws requiring objective design standards for new buildings, the Agreement secures high quality design that reflects the character of Livermore.

Public Art

The Agreement will ensure all Project-generated public art funds will be used within the Project site, and that a comprehensive Art Master Plan will be formed to secure high-quality pieces and one integrated design theme.

Financial Contributions

The Agreement secures an additional $1.2 million in public funding for the City's Community Benefit Fund and $800,000 into the Social Opportunity Endowment Fund. In addition, the Project will pay $2 million worth of Park Fees early, to facilitate the City's current capital park construction needs.

Public Safety

As a requirement of the Agreement, the Developer will install a range of closed-circuit television cameras and vehicle license plate reader cameras along the periphery and within the Project site. The cameras will be connected via fiber optic lines to the Real Time Awareness Center and will help increase the Police Department's situational awareness and keep residents safe.

Construction Sales Tax

Livermore will be designated as the point of sale for all construction materials, ensuring the City receives additional sales tax proceeds during construction.

2. The Development Agreement is consistent with the purpose, intent, goals, policies, programs, and land use designations of the General Plan, any applicable Specific Plan, and this Development Code.

Findings: The Project would not change the General Plan land use designation of Isabel Neighborhood ("IN") and would comply with the General Plan and IN's purpose, intent, goals, policies, and program. The Project is designed to develop a vibrant, safe, and complete neighborhood with a wide range of housing options at different affordability levels, commercial spaces, public open space and recreational amenities, public art and cultural opportunities, and new construction and permanent job opportunities, as well as supporting transit ridership and citywide goals for increased transit options and alternative transportation.

The Project would also be consistent with the regulations and provisions of the INSP, inclusive of the proposed Specific Plan Amendment. The Project proposes a new master planned development that would realign project planning areas, development blocks, land uses, infrastructure elements, and streets within subarea 3b and 3c of the INSP in a manner that substantially conforms to the intent of the INSP to create a vibrant, walkable mixed-use community. The neighborhood will include higher density residential uses providing a mix of product types, unit sizes, and affordability levels, public open space amenities that promote recreation and alternative forms of transportation including a new neighborhood park, recreation center, public plazas, new bike lanes and trails, public art and cultural opportunities, and job-producing

commercial uses within a new commercial main street, all within close, walkable proximity of one another.

Further, the Project ensures that its proposed land uses are compatible with existing neighboring residential and commercial uses and transportation infrastructure by minimizing conflicts between adjacent land uses with respect to scale, safety, noise, privacy, transportation, and other potential nuisances and hazards. The Project proposes contemporary architecture with traditional design elements and articulated facades, multiple building types that are differentiated while providing cohesive design and site plan layouts, and multiple material types, consistent with applicable General Plan and INSP goals and policies.

Together with the Density Bonus request, the Project conforms to all design and development standards required by the Specific Plan, Development Code, and the Citywide Design Standards and Guidelines.

3. The Development Agreement complies with the requirements of Government Code Sections 65864 through 65869.5.

   Findings: The Development Agreement between the City and the Developer regulates development of the Project site (Project Site) with the Project. Pursuant to the applicable requirements of the California Government Code governing development agreements, the Development Agreement specifies the duration of the agreement, the permitted uses of the property, the density and intensity of uses, the maximum height and size of proposed buildings, the provision of affordable housing, the provision and dedication of land for public purposes, and the timing and sequencing of proposed construction, among other terms and applicable requirements for California development agreements. Review, approval, and recordation of the Development Agreement will furthermore be conducted in accordance with the provisions of Government Code sections 65864 through 65869.5.

   Government Code Section 65867.5 requires that, if a Development Agreement includes a subdivision, that the Tentative Map complies with Government Code Section 66473.7, which mandates that sufficient water supply be made available for new subdivisions. The Project includes a Tentative Map. The Conditions of Approval require sufficient water supplies be made available. In addition, the Project EIR Addendum conducted a water supply analysis and found that both the City of Livermore (retailer) and Zone 7 (wholesaler) have sufficient water supplies to serve the Project over the next 20 years. Therefore, the Project complies with Government Code Section 65867.5.

BE IT FURTHER RESOLVED that the Livermore Planning Commission, based upon its own independent review of the Record Evidence and considerations, and based on the above findings which are necessary to protect the public health, safety, and general welfare, hereby recommends the City Council approve Development Agreement 22-001 and the Project.

BE IT FURTHER RESOLVED that the Livermore Planning Commission recommends

the City Council direct the Planning Manager to file a Notice of Determination for the Project with the Alameda County Clerk if the Project is approved.

BE IT FURTHER RESOLVED that the Livermore Planning Commission recommends the City Council direct the City Clerk to record with the Alameda County Recorder a copy of the Agreement within 10 days of the City entering into the Agreement.

BE IT FURTHER RESOLVED that the Livermore Planning Commission recommends the City Council direct the Planning Manager to periodically review the terms of the Agreement at least every 12 months per Development Code section 9.04.070, and ensure the Applicant or Successor is demonstrating good faith compliance with the terms of the Agreement.

The documents that constitute the record of proceedings upon which this decision is based can be found in the Community Development Department 1052 S. Livermore Avenue, in Livermore, California.

On the motion by Commissioner Kronzak, seconded by Commissioner Leary, the foregoing Resolution was adopted at the Planning Commission meeting of July 2, 2024 by the following vote:

AYES: DUNBAR, FINTSCHENKO, KRONZAK, LEARY.
NOES: NONE.
ABSENT: ANDERSON.

Jacob Anderson, Chairperson

Stephen Riley

by Stephen Riley, Planning Manager
Secretary to the Planning Commission

RECORDING REQUESTED BY AND WHEN RECORDED RETURN TO: City Clerk City of Livermore 1052 S. Livermore Avenue Livermore, CA 94550 No fee for recording pursuant to California Government Code Section 27383	

DEVELOPMENT AGREEMENT (DA22-001) ISABEL CROSSING DEVELOPMENT PROJECT IN THE ISABEL NEIGHBORHOOD SPECIFIC PLAN AREA

This Development Agreement **("Agreement")** is entered into on _____, 2024, between the City of Livermore, a municipal corporation, **("City")** and ISABEL PORTOLA OWNER, LLC, a Delaware limited liability company qualified to do business in California **("Developer")**. At times in this Agreement, the City and the Developer are referred to individually as a **"Party"** and collectively as the **"Parties"** for certain terms, conditions, and responsibilities that benefit them or are owed by them to the other, either individually or collectively.

RECITALS

This Agreement is based on the following facts:

A. The City is authorized by California Government Code section 65864 *et seq.* **("Development Agreement Statutes")** and Livermore Development Code Chapter 9.04 to execute development agreements in order to vest certain rights in the Developer, and to meet certain public purposes of the local government, as set forth in those laws.

B. The Developer represents and warrants the following to the City, and City has relied upon such representations for this Agreement, as of the Effective Date:

(1) Organization. The Developer is a limited liability company duly organized, validly existing and in good standing under the laws of the State of Delaware, and qualified to do business in California, with full power and authority to conduct its business as presently conducted and to execute, deliver, and perform its obligations under this Agreement.

(2) Authorization. The Developer has taken all necessary action to authorize its execution, delivery and, subject to any conditions set forth in this Agreement, performance of the Agreement. Upon the Effective Date of this Agreement, this Agreement shall constitute a legal, valid, and binding obligation of the Developer, enforceable against the Developer in accordance with its terms.

(3) No Conflict. The execution, delivery and performance of this Agreement by the Developer does not and will not conflict with, or constitute a violation or breach of, or constitute a default under (i) the charter or incorporation documents of Developer, (ii) any applicable law, rule or regulation binding upon or applicable to the Developer, or (iii) any material agreements to which the Developer is a party.

C. The Developer is the owner of the property comprised of approximately 46 acres of undeveloped land located at the southwest corner of Isabel Avenue and Portola Avenue in the City of Livermore, County of Alameda, County Assessor Numbers 903-0010-054-00l; 903-0010-053-00; 903-0010-052-00; 903-0010-047-00; 903-0010-046-00; 903-0010-048-00; 903-0010-049-00; 903-0010-050-00; 903-0010-051-00; 903-0010-037-02; 903-0010-035-01, more particularly described in Exhibit A, attached hereto and incorporated herein by reference **("Property").**

D. The Property is located within the Isabel Neighborhood that is identified in the City's Isabel Neighborhood Specific Plan **("INSP")**. The INSP establishes the regulatory framework guiding private and public development and redevelopment within the Isabel Neighborhood planning area until 2040. The INSP planning area covers 1,138 acres that are located in the northwest part of the City. The objectives of the INSP include: create a safe, vibrant, complete neighborhood that includes amenities for residents, workers, and students; ensure new development that is compatible with existing development and community character; support transit ridership and citywide goals for increased transportation options, housing choices, and economic vitality; and support the Valley Link project through development of a complete neighborhood. The complete neighborhood envisioned by the INSP has a complete mix of housing, commercial and office uses, and community uses that provide residents and workers with easy well-connected access to everyday services such as grocery stores and restaurants. The INSP contains a subarea diagram, Figure 2-3, **("INSP Subarea Diagram")** that identifies the plan's subareas and corresponding land uses for property owners to use as a tool to prepare master plans for those subareas, with density averaged and land uses distributed across the subarea rather than at the parcel level, which is attached hereto as Exhibit K.

E. The Property is identified as subareas 3b and 3c within the INSP. Subareas 3b and 3c are planned by the INSP for a mix of uses, predominantly focused on higher density mixed-income residential uses with robust affordable housing requirements. Subareas 3b and 3c also include a neighborhood park and other public open space and recreational areas, in addition to focused commercial and retail uses. The INSP encourages developers to create "Master Plans" for different residential subareas to promote efficient and orderly development.

The Developer proposes to develop the Property into a mixed residential and commercial development consisting of approximately 1,299 dwelling units, approximately 75,000 square feet of commercial uses along a new commercial main street, public open space uses and amenities including a neighborhood park, community center, and public bike paths. The 1,299 dwelling units provided by the project include 363 new covenanted affordable units of which 178 will be provided as Low and Very Low Income affordable rental units, 128 Moderate- and Median-Income affordable units, and 57 Moderate and Median Income for-sale units. The Project's residential uses are provided within townhomes, multi-family apartments, and stacked flats provided with a variety of product types and sub-types. The Project also provides over two acres of neighborhood park and public recreational spaces, public plazas, public meeting places, and a location for a new access point for the future Valley Link Isabel Train Station. The project will also provide new streets, street lighting,

landscaping, and other public infrastructure and improvements as described herein and in the conceptual land use plan attached as Exhibit B **("Project").**

F. The Project furthers the INSP's goal to provide approved higher-density residential and other approved uses in an efficient and orderly manner and provides a master plan for INSP subareas 3b and 3c by creating nineteen (19) distinct planning areas **("Master Planning Areas")**, which are also depicted in Exhibit B, hereto. The Master Planning Areas proposed for the Project include a wide variety of higher density mixed-income housing product types and sub-product types and designs, in addition to park and public open space areas and commercial uses, and include the following, as further depicted on Exhibit B:

INSP Subarea	Planning Area	Project Description
3b	N1	5.18 acres with 94 3-story attached and 4 3- story detached townhouse-style residences.
3b	N2	3.08 acres with 54 3-story attached and 2 3- story detached townhouse-style residences
3b	N3-A	1.89 acres with 40, 3-story attached townhouse-style residences
3b	N3-B	1.50 acre Neighborhood Park
3b	N3-C	0.45 acres planned for a Recreation Center
3b	C1-A	2.89 acres with 62 3-story attached townhouse-style residences
3b	C1-B	1.49 acres with 114 multi-family apartment units, 50% of which shall be deed restricted as Median Income Rental Units and 50% of which shall be deed restricted Moderate Income Rental Units and 18,992 square feet of commercial uses, inclusive of a public plaza
3b	C1-C	0.17 acre Pocket Plaza
3b	C2-A	1.72 acres with 116 stacked flat condo units, 15 of which shall be deed restricted as For Sale Moderate Units and 20,719 square feet of commercial uses inclusive of a public plaza
3b	C2-B	0.99 acres with 16 3-story attached and 1 detached townhouse-style residences
3b	C2-C	0.19 acre Pocket Plaza

3b	C3	1.88 acres with 45 3-story attached townhouse-style residences
3b	C5	3.79 acres with 84 3-story attached townhouse-style residences
3b	TS	0.22 acre Town Square
3b	S1	2.55 acres with 172 stacked flat condo units 20 of which shall be deed restricted as For Sale Moderate Units and 23,924 square feet of commercial uses
3c	S2	3.36 acres with 102 3-story attached townhouse-style residences
3c	S3-A	1.12 acres with 114 multi-family apartment units all deed restricted as Lower Income Housing Rental Units
3c	S3-B	1.38 acres with 200 multi-family apartment units, 40 of which shall be dedicated as affordable multi-family rental housing units consistent with the applicable requirements of the City's Inclusionary Housing Ordinance
3c	S4	1.33 acres with 41 3-story attached townhouse-style residences, 10 of which shall be deed restricted as For Sale Moderate Units

G. The Developer has submitted an application to the City of Livermore for the following entitlements **("Entitlements")** for the Project, including Development Agreement (DA22-001) for this Agreement, as required under the Livermore Development Code to be vested in accordance with the Agreement subject to their conditions of approval:

- Vesting Tentative Tract Map 8659 (SUB22-008)
- Conditional Use Permit 24-002
- Site Plan Design Review 24-003
- Specific Plan Amendment 24-001
- Consistency Determination (CD) 24-004
- Master Sign Program Amendment (MSP) 24-001
- Development Code Amendment (DCA) 24-001

The Parties recognize the difficulty of predicting the precise timing and sequencing of all Project development, but also recognize the importance of ensuring that key Project elements are delivered in a sequence that meets the needs of the City and the public. The intent of the Parties is to ensure

the Project proceeds with reasonable diligence while providing the necessary flexibility for the Developer to respond to economic conditions and development opportunities, engage with future partners, lenders and builders, and go through the permitting process for the full buildout in a feasible, commercially reasonable manner. To achieve these purposes, this Agreement establishes certain sequencing parameters that ensure that key Project elements including infrastructure, commercial uses, parks, and affordable housing units are delivered in an orderly and logical manner, while also providing the Developer sufficient flexibility to respond to market conditions and development opportunities to ensure the successful buildout of the Project as a whole.

H. Reserved

I. Reserved

J. This Agreement will promote and encourage the development of the Project by providing the Developer and its creditors with a greater degree of certainty of the Developer's ability to expeditiously and economically complete the development effort for the Project, and the parties agree that the consideration to be received by the City pursuant to this Agreement and the rights secured to the Developer hereunder constitute sufficient consideration to support the covenants and agreements of the City and the Developer. By entering into this Agreement, the City desires to allow the Developer to design, apply for, and if approved to develop the Project pursuant to this Agreement, the land-use ordinances, rules, regulations and policies applicable on the "Effective Date," as defined in Section 3 below, and to vest in Developer, to the fullest extent possible under the law, all possible development entitlements in order to complete the Project.

K. The Project and the terms and conditions in this Agreement have been extensively reviewed and considered by the City and its officers, agencies and departments. That proposed use has been found to accommodate the City's recommendations and suggestions in order to protect the public's interest and to enhance the desirability, from the public's perspective, of the Project.

L. The City Council has also found that the Project and this Agreement are in the public interest and will provide substantial public benefits and help attain certain public objectives without limitation: (i) providing affordable housing to families and individuals; (ii) increasing the number of community parks and plazas for public recreation and discourse; (iii) providing improved bike lanes with increased safety; (iv) enhancing pedestrian and bicycle connectivity; (v) expanding the urban forest and providing carbon sequestration; (vi) providing commercial development to reduce food deserts and providing commercial activity to meet City and Regional goals; (vii) providing the City with additional revenue in the form of increased real property taxes and sales tax; (viii) providing a land use compatible with the physical nature of the project site and the surrounding area; and (ix) is in the public's interest.

M. As required by Government Code section 65867.5(c), the City Council has also found the provisions of this Agreement are consistent with the City's General Plan and the INSP.

N. The City conducted duly noticed public hearings on this Agreement pursuant to Government Code section 65867 and Livermore Development Code sections 9.04.040 and 9.04.050 and found that the provisions of this Agreement and its purposes are consistent with the objectives, policies, general land uses and programs specified in the City's General Plan and Livermore Development Code.

O. This Agreement was adopted by ordinance of the City Council on _____, 2024, and approved upon a second reading on _____, 2024, after notice and public hearings before the Planning Commission and City Council, and after City Council adoption/approval/certification of the Isabel Crossing and Not Net Loss Specific Plan Amendment Project EIR Addendum, CEQA Guidelines Section 15182 Exemption, and/or streamlining via CEQA Guidelines Section 15183 and the Final SEIR certified for the INSP and the Mitigation, Monitoring, and Reporting Program approved for the INSP, all in accordance with the California Environmental Quality Act, Public Resources Code section 21000 *et seq*.

NOW, THEREFORE, the City and Developer hereby agree that the aforementioned recitals are true and correct and are incorporated by reference as fully set forth below, and further agree as follows:

1. The Property. The Property which is the subject of this Agreement is described in Recital C above and Exhibit A, attached hereto.

2. The Project. The Project is described in Recitals E and F above, and Exhibit B, for a mixed residential and commercial development.

3. Effective Date. The effective date of this Agreement ("Effective Date") is the later of (a) thirty (30) days after the date the Ordinance approving this Agreement is adopted by the City Council and attested by the City Clerk, or (b) if a referendum petition is timely and duly circulated, filed and qualified by the Elections Official and thereafter ordered to election by the City Council, then the date the election results on the ballot measure by City voters approving this Agreement are certified by the City Council in the manner provided by the Elections Code. This Agreement shall be executed by the City within ten (10) days after the Effective Date and recorded as provided in Government Code section 65868.5.

4. Term. The duration of this Agreement is for a term of twenty (20) years, commencing on the Effective Date, and terminating on its anniversary date twenty (20) years later ("Term"). The term may be amended or extended as set forth in Section 12 and consistent with the Development Agreement Statutes and the Livermore Development Code by the written consent of the Parties; or, (ii) as set forth in Section 13. If the Agreement is not amended, extended, terminated, or cancelled as set forth in either Section 12 or Section 13 consistent with the Development Agreement Statutes and the Livermore Development Code, then this Agreement shall terminate on its 20th anniversary date without further action by the Parties.

5. Definitions. In addition to the terms defined elsewhere in this Agreement, Exhibit H contains defined terms that apply to this Agreement and to all Exhibits.

6. Exhibits. The following exhibits are attached to and incorporated into this Agreement:

   Exhibit A: Legal Property Description

   Exhibit B: Development Plans

   Exhibit C: Master Project Infrastructure Timing, Repair and Replacement and Impact Fee Special Provisions

Exhibit D: Affordable Housing

Exhibit E: Commercial Uses

Exhibit F: City Fee Schedule

Exhibit G: Form of Estoppel Certificate

Exhibit H: Definitions

Exhibit I: Fee Creditable Improvements

Exhibit J: Community Facilities District (CFD) Provisions

Exhibit K: INSP Figure 2.3, Subarea Diagram

Exhibit L: Core Vested Regulations

Exhibit M: Reserved

Exhibit N: Reserved

Exhibit O: Affordable Housing Template Agreement

Exhibit P: Public Art

Exhibit Q: Financial Contributions

Exhibit R: Law Enforcement Assets

Exhibit S: Proposed CFD Eligible Infrastructure

7. Vested Development Rights. As set forth in this Agreement, and during the term of this Agreement, the Developer has the right to develop and use the Property in accordance with the approved Project Approvals for the Project identified in Exhibit B and the following that regulate the uses for the Property, including its density and intensity of use, height and size of buildings, and the provisions for the reservation and dedication of land for public purposes, all as required by Government Code section 65865.2 for this Agreement:

    a. The City's General Plan, Isabel Neighborhood Specific Plan, and the Livermore Development Code in effect on the Effective Date. For reference, the INSP Land Use Designation from the General Plan, and the Land Use Map and Development Standards from the Isabel Neighborhood Specific Plan are attached hereto as Exhibit L ("Core Vested Regulations").

    b. In addition, all other City policies, ordinances, resolutions, rules, regulations and standards applicable to development or use of the Property on the Effective Date, except that Developer shall:

        i. Pay the processing and development impact fees that are in effect and

applicable citywide at the time the fees are paid by Developer to City. Payment for said fees shall be made when the City issues any building permits for the Project. As provided in Section 8(e) the Developer is not required to pay any new development impact fees enacted after the Effective Date unless they qualify as a Permitted Change in Applicable Regulations, but for those development impact fees enacted by the City on or before the Effective Date and identified in Exhibit F (City Fee Schedule") the Developer shall pay the corresponding amount for those fees that are in effect on the date the fees are paid;

ii. Comply with Building Code requirements that are in effect and applicable citywide at the time when the permits for building construction are issued by the City;

iii. Comply with construction and technical building standards or specifications for public improvements that are in effect and applicable citywide at the time when the permits for public improvement construction are issued by the City;

iv. Comply with changes in City laws, regulations, plans or policies applicable citywide, that are found by the City Council, based on substantial evidence, to be necessary to protect members of the public from a condition dangerous to their health or safety;

v. Comply with a change in City law, regulations, plans or policies that is one or more of the following:

1. Specifically mandated by state or federal law, or by any regional governmental agency that has legal authority over the City under state law or a joint powers agreement; or

2. A result of or in response to state or federal law, or regional agency action, made necessary in order for the City to avoid losing or not receiving substantial funding or other substantial public benefits or facilities that would be available to the City only if it makes such a change; or

3. Specifically mandated by, or necessary for compliance with or implementation of the terms of any permit, entitlement or other authorization necessary for the development of the Property issued or granted to the City, County and/or Developer by any federal, state or regional agency; and,

4. Comply with the Project conditions of approval, including all required mitigation measures from subsequent environmental review associated with, for all subsequent Project approvals that are consistent with this Agreement ("Subsequent Project Approvals").

c. Developer acknowledges pursuant to and consistent with Government Code section

65866, this Agreement does not prevent the City in subsequent actions applicable to the Property, from applying new rules, regulations, and policies which do not conflict with the rules, regulations, and policies applicable to the Property as set forth herein, nor shall this Agreement prevent the City from denying or conditionally approving a subsequent development project application on the basis of these existing or new rules, regulations, and policies.

d. Developer further acknowledges that execution of this Agreement by the City does not constitute approval of any required permits, applications, or allocations, and in no way limits the discretion of the City in the permit, allocation, and approval process in accordance with the limitations set forth herein.

e. City agrees that Developer, in Developer's sole discretion may reconstruct the Project, or any portion thereof, within the Term of this Agreement should it become necessary or desirable due to natural disaster, changes in seismic requirements, acts of God, acts of terrorism, or damage to work in progress by reason of fire, floods or other casualties, commercial infeasibility, or functional obsolescence. Any such reconstruction shall be subject to the Core Vested Regulations, and shall comply with the Project Approvals or subsequent Project Approvals, as applicable to the Project of portion thereof to be reconstructed, and shall comply with the technical building codes existing at the time of such reconstruction.

8. Developer Obligations.

a. The Developer agrees to all the terms, conditions, and covenants in connection with the Project that are set forth in the conditions of approval for the Entitlements as well as the Subsequent Project Approvals.

b. Subsequent to the approval of the Vesting Tentative Tract Map 8659 the Developer will record large lot Final Maps for all Master Planning Areas in accordance with the requirements of the Subdivision Map Act (California Government Code section 66410, et seq.) and the Livermore Development Code. Following any transfers of Master Planning Areas to successors who would construct the Planning Areas in accordance with the terms of this Agreement, said successors would prepare in-tract improvement plans and record small lot Final Maps or Condominium Maps for the respective Planning Areas.

c. As required by the Livermore Development Code and the Subdivision Map, the City's approval of Vesting Tentative Tract Map 8659 is conditioned upon the Developer constructing improvements and making dedications to the City to ensure the parcels created:

    i. Are provided with adequate public services and utilities, including any appropriate cable television services, to meet the needs of future residents or users;

    ii. Are of adequate design in all respects in compliance with this Development Code;

iii. Act to mitigate any potential environmental impacts specified in the Environmental Impact Report (EIR) or by other means; and

iv. Provide for proper grading and erosion control, including the prevention of sedimentation or damage to off-site property.

d. Developer shall provide adequate security for all public improvements required by Vesting Tentative Tract Map 8659 ("Master Project Infrastructure") when acquiring the City's approval for said map, and then prior to the issuance of any building permit as set forth in Exhibit C, Timing and Processing, construct such Master Project Infrastructure. Nothing in this Agreement shall prevent Developer from transferring the Developer obligations herein to a third-party developer or builder, in accordance with Section 10. To the extent any provision of this Agreement conflicts with the Conditions of Approval for the Vesting Tentative Tract Map, the Conditions of Approval shall control. (*BIA v. Patterson* (2008) 162 Cal.App.4th 1068.)

e. Developer shall pay all applicable fees as set forth in Section 7(b)(1) in the amounts that are in effect when the payment is made. A copy of the processing and development impact fees applicable on a citywide basis are attached as Exhibit F ("City Fee Schedule".) The amount specified for each processing and development impact fee reflects the amount in effect as of the Effective Date and are simply included for reference, and the Developer shall pay the amount corresponding to those fees that are in effect when the payment is made. Unless new Development Impact Fees that are adopted by the City after the Effective Date validly qualify as a Permitted Change in Applicable Regulations, they shall not apply to the Project or to the development of the Project, and shall not be a payment obligation of Developer, without Developer's prior written consent.

f. Developer shall use good faith efforts to the maximum extent allowed by law to require all persons and entities providing bulk lumber, concrete, structural steel and pre- fabricated building components, such as roof trusses, to be used in connection with the construction and development of, or incorporated into, the Project, to: (a) obtain a use tax direct payment permit; (b) elect to obtain a subcontractor permit for the job site of a contract valued at Five Million Dollars ($5,000,000) or more; or (c) otherwise designate the Property as the place of use of material used in the construction of the Project in order to have the local portion of the sales and use tax distributed directly to the City instead of through the county-wide pool. Developer shall instruct each of its subcontractors to cooperate with the City to ensure the full local sales/use tax is allocated to City. To assist City in its efforts to ensure that the full amount of such local sales/use tax is allocated to the City, Developer shall:

i. Provide City with an annual spreadsheet, which includes a list of all subcontractors with contracts in excess of the amount set forth above, a description of all applicable work, and the dollar value of such subcontracts. City may use said spreadsheet to contact each subcontractor who may qualify for local allocation of use taxes to the City.

ii. Include in all contracts with a general contractor, project manager for construction, and all subcontractors the following language:

"The Developer is requiring that all contractors and subcontractors on the jobsite participate in directing local tax to the City of Livermore wherever possible and consistent with legal requirements. This direction is not expected to increase the contractor's tax liability; however, it will increase the percentage amount of tax revenue the City will receive. The Developer is requiring that the contractors and subcontractors work together with the City officials and consultants to achieve an equitable outcome.

The Developer will require that the contractors and subcontractors exercise their option to obtain a California Department of Tax & Fee Administration construction site sub permit for the jobsite and allocate all eligible use tax payments to the City of Livermore. Prior to any construction on-site, the Developer will require that the contractor and subcontractor provide the City of Livermore with either a copy of their sub-permit that shows their CDTFA account number or a signed statement that sales and use tax does not apply to their portion of the project. The Developer will provide the City and their consultant with a list of subcontractors associated with the project."

g. The precise timing and sequencing of Project development is influenced by numerous factors such as market orientation and demand, interest rates, absorption, completion, and other economic and practical factors, some of which are not within the Developer's control. Nevertheless, the Developer understands the INSP's need for the Developer to deliver certain key Project elements to the City and the Livermore community as part of the consideration for this Agreement to ensure the development of a complete neighborhood contemplated by the INSP for residential and commercials places for residents and workers and easy well-connected access to everyday services. Therefore, the Developer agrees to all the terms, conditions, and covenants for the Project that are set forth in the Entitlements and the below Exhibits, and further agrees to construct and complete the following Project elements consistent with the schedule and/or sequencing for performance for each as set forth in corresponding Exhibits.

h. The City has extensively reviewed the terms and conditions of this Agreement and, in particular, has specifically considered and approved the impact and benefits of the Project upon the regional welfare. The terms and conditions of this Agreement have been found by the City to be fair, just, and reasonable, and to provide appropriate benefits to the City. This Agreement and the pursuit of the Project will serve the best interests, and the public health, safety, and welfare of the residents and invitees of the City and the general public. This Agreement will help ensure a desirable and functional community environment; provide effective and efficient development of public facilities, infrastructure and services in the vicinity of the Property; help maximize effective utilization of resources within the City, increase City tax revenues; and provide other substantial public benefits to the City and its resident by achieving the goals and purposes of the Government Code, the General Plan, the INSP and Livermore Development Code, which particular benefits include, without

limitation: (i) the development of a mixed-use multi-family housing development with significant dedicated affordable housing, including for-sale affordable units; (ii) provision of new housing that helps meet State and regional housing production goals; (iii) provision of substantial public revenue in the form of impact fees and increased real property and sales tax; (iv) the provision of a land use compatible with the physical nature of the Property and the surrounding area; (v) new infrastructure for alternative transportation including dedicated bicycle lanes, and other public improvements; and (vi) financial contributions from Developer to the City's Social Opportunity Endowment Fund, Community Benefit Fund, and Springtown Open Space Improvements. The community benefits of the Agreement are set forth further in the below Exhibits. The Developer agrees to all the terms, conditions, and covenants in connection with the Project that are set forth in the following Exhibits:

i. Exhibit C Master Project Infrastructure and Site Improvements sets for the infrastructure improvement requirements and the timeframes in which the Developer shall complete them.

ii. Exhibit D Affordable Housing Obligations sets forth the Developer's obligations for construction of affordable housing within the Project site.

iii. Exhibit E Commercial Uses sets forth the Developer's obligations for constructing a Temporary Commercial Activation site and for making a good faith effort to enter into lease agreements for specified commercial uses within the Project site.

iv. Exhibit J Community Facilities District (CFD) Provisions sets forth the Developer's obligations with respect to formation of a New Facilities CFD and Maintenance CFD.

v. Exhibit P Public Art sets forth the Developer's obligations to prepare a comprehensive Art Master Plan that covers the entire project site and provides for how the Developer's Public Art obligation for the project will be met.

vi. Exhibit Q Financial Contributions sets forth cash contributions the Developer shall pay, in addition to other consideration provided by Developer for this Agreement, to the Social Opportunity Endowment Fund, Community Benefit Fund, Public Art Fund, and to City Park Improvements.

i. The City and Developer shall enter into an Affordable Housing Agreement, the form of which is attached hereto as Exhibit O.

j. As permitted by Government Code section 65865.2, Developer shall commence and complete the "Master Project Infrastructure" as set forth in Exhibit C.

k. The Developer and any Successor(s) shall construct the Project in accordance with this Agreement and the Project Approvals for the Project identified in Exhibit B, including with respect to the approved architectural design, landscape design, site design, residential density, non-residential FAR and coverage, and any other design

feature, or development standard, subject to the Subsequent Approvals provisions, below.

9. City Obligations.

a. City agrees to all the terms, conditions, and covenants in connection with the Project that are set forth in the conditions of approval for the Entitlements as well as the Subsequent Project Approvals.

b. Subsequent Approvals for the Project

i. In connection with any future discretionary City approvals required by code for the Project, including approvals that only apply in one or more Planning Areas described in Recital F and depicted in Exhibit B, without limitation, Site Plan Review and Design Review (collectively "Subsequent Approvals"), if the Director or his or her designee determines that the request for a Subsequent Approval for Site Plan Review or Design Review substantially conforms with Exhibit B, the Site Plan Review or Design Review approval may be issued by the Director on behalf of the City in accordance with Livermore Development Code Section 9.07.030.B. Otherwise, the Director may refer a Site Plan Review or Design Review Subsequent Approval request to the Planning Commission. The City shall accept for processing and timely review and act on all applications for Subsequent Approvals in as expeditious a manner as is reasonably possible.

ii. The City acknowledges that Developer may require minor adjustments to the configuration or size of individual lots or parcels within a Planning Area in the VTTM, or infrastructure elements depicted thereon, to be modified from that shown on the VTTM in any Final Maps, which may be necessitated by changes occasioned by the final permitting and design of a Planning Area within the Project that would come after this Agreement. To facilitate development of the Project, the Parties agree that the size and configuration of the proposed lots or parcels and dimensions and/or locations of improvements within a Planning Area may be so adjusted at the Developer's discretion, subject to the provisions of and the approvals required by the Subdivision Map Act and the Livermore Development Code, and provided that the aggregate total density and intensity of the Project Site are not increased, and the permitted uses and design thereon are not substantially modified from those provided in the Project Approvals, and the parcels and lots and improvements thereon are in accordance with the Applicable Rules that apply to project upon approval including but not limited to INSP, Citywide Design Standards and Guidelines, Development Code and Municipal Code regulations., including without limitation, all minimum lot size, lot configuration, set-back and construction standards set forth therein.

iii. If the Director or his/her designee finds that a proposed amendment or modification to the Project or any portion thereof does not conflict with any material terms of this Agreement, Applicable Law, and state law requirements, the amendment shall be determined to be an "Administrative

Project Amendment" and the City Manager, the Director, or a designee may approve the Administrative Project Amendment on behalf of the City without notice and public hearing. The Parties herein agree and recognize that this assessment by the City is objective in nature and therefore an Administrative Project Amendment shall be a ministerial agency approval.

1. Without limiting the generality of the foregoing, lot line adjustments, minor increases or decreases in the intensity, scale or scope of the Project, minor alterations in vehicle circulation patterns or vehicle access points, substitutions of comparable landscaping for any landscaping shown on any final development plan or landscape plan, minor variations in the location of structures that do not substantially alter the design concepts of the Project, swapping out of building materials for replacement materials with similar appearance and quality, variations in the location or installation of utilities and other infrastructure connections or facilities that do not substantially alter the design concepts of the Project, and minor adjustments to the Project or Property legal description shall be treated as Administrative Project Amendments.

iv. The Developer reserves the right to apply to the City for permits to develop portions of the Project in a manner which may be materially inconsistent with the Project as described herein and approved with the Project Approvals ("Major Project Modifications"). In such event, such portion of the Project shall be reviewed pursuant to the rules, regulations, and procedures of the City in effect at the time the Developer makes application to the City for such Major Project Modifications, including, without limitation, at the City's discretion, to require an amendment to this Agreement or a new development agreement for the affected portions of the Project. Nothing herein shall be interpreted to require the City to approve a Major Project Modification.

v. As a result of constructability or financing issues, the Developer may reduce the quantity of Project residential units as follows, as approved by the Director:

1. Planning Areas S1 and C2-A. The Developer or any Successor(s) may reduce the quantity of units in Planning Areas S1 and C2-A, if the following findings can be made:

A. The Project shall provide a density of at least 50 dwelling units per acre in Planning Areas S1 and C2-A.

B. The Project shall provide at least 1,236 total housing units, which is collectively the minimum required in Isabel Neighborhood Specific Plan Subareas 3b and 3c.

C. The quantity and affordability levels of all affordable housing units in all Planning Areas shall remain as described in this Agreement and the Project Plans (Exhibit B) and shall not be reduced or diminished.

D. The building footprints, architectural style, and exterior design of each building shall substantially conform to the Project Plans (Exhibit B) and shall not be modified unless approved by the City under this Section of the Agreement.

2. All Other Planning Areas. The Developer or any Successor(s) may reduce the quantity of units in any other Planning Area, if the following findings can be made:

A. The quantity of units to be reduced in any Planning Area shall not exceed five percent (5%) of the total quantity of approved units for that Planning Area.

B. The Project shall provide at least 1,236 total housing units, which is collectively the minimum required in Isabel Neighborhood Specific Plan Subareas 3b and 3c.

C. The quantity and affordability levels of all affordable housing units in all Planning Areas shall remain as described in this Exhibit and the Project Plans (Exhibit B) and shall not be reduced or diminished.

D. The building footprints, architectural style, and exterior design of each building shall substantially conform to the Project Plans (Exhibit B) and shall not be modified unless approved by the City under this Section of the Agreement.

vi. The City has conducted extensive environmental review of the Project and has certified an Environmental Impact Report, a Supplemental Environmental Impact Report, and an Addendum that fully analyze the potential environmental impacts of the Project consistent with the requirements of CEQA. The City intends that future discretionary approvals for the Project, to the fullest extent permitted by law, shall be subject to CEQA's subsequent review provisions under Public Resources Code, Section 21166 and CEQA Guidelines, Sections 15162 and 15164, whereby any additional environmental review for such future discretionary approvals shall only be required where "major revisions" to the prior EIRs for the Project are required, as defined by CEQA.

c. Community Facilities District

i. The Property, or a portion thereof, is located within City of Livermore Community Facilities District No, 2016-2 (the "Existing CFD"). In accordance with this Section 9(c), and the Community Facilities District Financing Parameters set forth in Exhibit J attached hereto, Developer desires to form a new Community Facilities District with respect to the Project (the "New Facilities CFD") for the Property pursuant to the Mello Roos Community Facilities Act of 1983, California Government Code, Sections 53311 et seq., as the same may be amended from time to time, ("Mello Roos Act"), that, among other things, refunds a portion of the outstanding bonds of the Existing CFD, and pays the prepayment penalty for those bonds, in accordance with Section 53313.5(g) of the Mello Roos Act, thereby allowing for the release of the lien of the Existing CFD from the Property, and finances all of the facilities and improvements and fees described in Exhibit J, attached hereto (the "Community Facilities District (CFD) Provisions") and Exhibit S, attached hereto (the "Proposed CFD Eligible Infrastructure").

ii. At such time during the term of this Agreement as Developer submits a written request to the City Manager to establish the New Facilities CFD, the City Manager shall notify Developer whether the City is willing to establish the New Facilities CFD in accordance with Section C of Exhibit J or prefers the Developer to work with a joint powers authority to establish the CFD in accordance with Section D of Exhibit J, provided, however, that, at Developer's election, Developer shall have the right to pursue the adoption of a CFD with a joint powers authority instead of the City.

iii. The Developer and the City will cooperate to provide for annexation of the Property to the Isabel Maintenance CFD (as defined in Exhibit J) in accordance with Section B of Exhibit J.

d. Upon satisfaction of all Developer's and the subsequent owners' obligations related to the Property, or a portion of the Property, the City shall record a Notice of Termination for each affected parcel in a form satisfactory to the City Attorney in the Office of the Alameda County Recorder.

e. The City shall refund Developer Transferable Development Credits and Traffic Impact Fees as required pursuant to Exhibits C, E, and I.

10. Binding Effect; Recordation; Assignment.

a. This Agreement is binding upon, and the benefits of the Agreement shall inure to, all successors in interest to the Parties to this Agreement as set forth in Government Code section 65868.5

b. This Agreement shall:

i. be recorded in the office of the County Recorder;

ii. run with the land; and, shall

iii. be binding upon and inure to the benefit of the heirs, administrators, assigns, executors, and successors in interest and in title to the Property and all portions thereof.

c. Every contract, deed, or other instrument hereafter executed covering or conveying a portion of the Property shall be held conclusively to have been executed, delivered and accepted subject to the covenants and restrictions in this Agreement, regardless of whether such covenants or restrictions are set forth in such contract, deed or other instrument, unless the City expressly terminates the Agreement as to the portion of the Property transferred as set forth in Section 13.

d. Developer shall have the right to sell, transfer, or assign the Property or any portion or Planning Area thereof (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code, Sections 66410, et seq., as the same may be amended from time to time) to any person, partnership, joint venture, firm, or corporation at any time during the Term of this Agreement, together with the rights granted to and obligations imposed upon the Property pursuant to this Agreement and as set forth in Section 15. Developer shall give, prior to closing on any such transfer, written notice to the City of its intention to assign or transfer any of its interests, rights or obligations under this Agreement and a complete disclosure of the identity of the assignee or transferee, including copies of the Articles of Incorporation in the case of corporations and the names of partners in the case of partnerships. Any failure by Developer to provide said notice shall be curable in accordance with the provisions of Section 20. Any successor to Developer that owns or otherwise holds a controlling property interest and is assigned rights, obligations and requirements under this Agreement for only a portion of the Project or a Planning Area(s) that is less than the entire Property shall only have the rights, obligations and requirements of this Agreement that are, by its express terms, applicable to the Planning Area(s) or portions thereof of the Project owned or otherwise controlled by that successor of Developer.

e. Subject to the notice requirements herein, where the Developer sells or otherwise transfers title to any portion of the Property that includes Master Project Infrastructure, as described in Exhibit C ("Master Project Infrastructure Timing, Repair and Replacement and Impact Fee Special Provisions"), that subsequent owner and Developer shall be jointly and severally liable for any obligations under this Agreement as to that portion of the Property, unless Developer is released by City, which release shall not be unreasonably withheld, so long as the subsequent owner provides City with security equivalent to any security previously provided by Developer to secure performance of its obligations hereunder, if any.

f. Subject to the notice requirements herein, where the Developer sells or otherwise transfers title to any portion of the Property that includes one or more Planning Areas but does not include Master Project Infrastructure, so long as the subsequent owner provides City with security equivalent to any security previously provided by Developer to secure performance of its obligations hereunder, if any, City shall release Developer from any further obligations or requirements under this Agreement with respect to the construction of improvements within those transferred Planning Areas.

g. The provisions of this Agreement shall constitute covenants which shall run with the land comprising the Property for the benefit thereof and as a burden thereon, and the burdens and benefits hereof shall bind and inure to the benefit of all assignees, transferees, and successors to the Parties hereto.

11. Mortgagee Protections.

a. Developer shall have the same right to encumber Developer's right, title and interest in, to and under this Agreement and the Property that Developer would have absent this Agreement, pursuant to one or more Mortgages, provided that each such Mortgage is given for the purpose of securing funds to be used for financing the acquisition of the Property or any portion thereof, the construction of improvements thereon, and any other expenditures reasonably necessary and appropriate to develop the Property.

b. Except as otherwise set forth herein, all of the provisions contained in this Agreement shall be binding on and for the benefit of any person who acquires title to the property or any portion thereof by foreclosure, trustee's sale, deed in lieu of foreclosure, lease termination or expiration or other involuntary transfer under a Mortgage.

c. The City hereby agrees to cooperate in including in this Agreement by suitable amendment from time to time any provision which may reasonably be requested by any proposed Mortgagee for the purpose of allowing such Mortgagee reasonable means to protect or preserve the lien and security interest of the Mortgage hereunder as well as such other documents containing terms and provisions customarily required by Mortgagees (taking into account the customary requirements of their participants, syndication partners or ratings agencies) in connection with any such financing. The City agrees to execute and deliver (and to acknowledge, if necessary, for recording purposes) any agreement necessary to effectuate any such amendment; provided, however, that any such amendment shall not in any way materially adversely affect any rights of any Party under this Agreement. If there is any conflict between this Section and any other provision contained in this Agreement, this Section shall control. Nothing herein is intended to or shall require the City to approve any amendments to this Agreement unrelated to what is reasonably necessary to enable a Mortgagee to appropriately protect its lien or security interest, nor shall the City be required to take any action that may risk the priority of this Agreement as an encumbrance against the Property through the Term of this Agreement.

d. If the City receives notice from a mortgagee requesting a copy of any notice of default given hereunder and specifying the address for services thereof, and the said mortgagee has recorded a copy of such request in the official records of Alameda County in the manner required under Civil Code, Section 2924b with respect to Requests for Notices of Default, then the City shall deliver to such mortgagee, concurrently with service thereon to the applicable Party, any notice given to the Party with respect to any claim that such Party has not complied in good faith with the terms of this Agreement or has committed an event of default. Each mortgagee shall have the right, but not the obligation, for a period of ninety (90) days after the

receipt of such notice to cure or remedy, or to commence to cure or remedy, the claimed default or act of noncompliance set forth in the notice. If the default is of a nature which can only be remedied or cured by such mortgagee upon obtaining possession, such mortgagee may, but is not obligated to seek to obtain possession with diligence and continuity through foreclosure, a receiver or otherwise, and may, but is not obligated to, thereafter remedy or cure the default or noncompliance within thirty (30) days after obtaining possession. If any such default or noncompliance cannot, with diligence, be remedied or cured within such thirty (30) day period, then such mortgagee shall have such additional time as may be reasonably necessary to remedy or cure such default or noncompliance if such mortgagee commences that cure during such thirty (30) day period, and thereafter diligently pursues and completes such cure.

12. Amendment or Extension. As set forth in Development Agreement Statutes, including Government Code section 65868, this Agreement may be amended by the Parties, including amendments of, or extensions to, the Term set forth in Section 4 consistent with the procedures set forth in the Development Agreement Statutes and the Livermore Development Code, as they are amended from time-to-time. Developer shall send to the City a notice specifying the requested amendment or extension, and obtain the City's written consent, before submitting an application to the City to amend or extend this Agreement pursuant to the procedures set forth in the Development Agreement Statutes and the Livermore Development Code.

13. Cancellation; Termination.

    a. This Agreement may be canceled or terminated, in whole or in part, as follows:

        i. By formal application by any Party to cancel or terminate this Agreement as set forth in and as is consistent with the Development Agreement Statutes, including Government Code section 65868.

        ii. Upon the occurrence of any of the following events:

            1. Expiration of this Agreement's Term pursuant to Section 4;

            2. The release of the Developer, or a portion of the Property, from this Agreement as set forth in Sections 10(d) through 10(f), which cancellation or termination shall only be as to the Parties and as to the portion of the Property transferred as specified;

            3. The dedication of any portion of the Property to a public agency provided the termination shall only be as to the dedicated portion of the Property; and

            4. The conveyance of any portion of the Property to a homeowner's association for which all improvements required by the Project Approvals and Subsequent Project Approvals for that portion of the Property have been

completed or guaranteed to the City's satisfaction, but the termination shall only be as to that portion of property so conveyed.

b. Cancellation or termination of this Agreement as provided in this Section shall not constitute termination of any Project Approvals or Subsequent Project Approvals approved by the City for the Property prior to the date of cancellation or termination.

c. In the event this Agreement is terminated, neither party shall have any further rights or obligations hereunder except for those obligations of Developer set forth in Section 16 (No Damages Relief), Section 24 (Legal Actions), and Section 25 (Attorneys' Fees), except that the provisions of this Agreement that are specified to survive termination of this Agreement shall run with the land in perpetuity and remain in full force and effect following such termination.

d. The cancellation or termination of this Agreement, in whole or in part, pursuant to this section shall be processed by the City consistent with the requirements in the Development Agreement Statutes.

14. Reserved.

15. Release Upon Transfer.

a. *As to Developer upon Transfer*. Upon the sale, transfer, or assignment (collectively "Transfer") of Developer's title to any portion of the Property, then Developer and the subsequent owner of the portion of the Property transferred are jointly and severally liable for the Developer's obligations under this Agreement as to that portion of the Property transferred unless Developer is released by City as provided in this subsection, which release shall not be unreasonably withheld, and which release must be conditioned on the subsequent owner providing the City with security equivalent to any security previously provided by Developer to secure performance of the obligations hereunder for the portion of the Property transferred. Developer shall be released by City from its obligations under this Agreement with respect to the portion of the Property transferred provided: (i) Developer (or transferee) is not in default of this Agreement at the time of the transfer; (ii) Developer has provided prior written notice of the transfer to the City, subject to cure under Section 20, below; and, (iii) with respect to the transfer of any parcel or lot of the Property that has not been fully developed as contemplated by the Project, the intended transferee executes and delivers to the City a written assumption agreement in a form acceptable to the City in which (aa) the name and address of the transferee is set forth, and (bb) the transferee expressly assumes all obligations of the Developer under this Agreement as to the portion of the Property to be transferred. Failure to deliver a written assumption to the City prior to transfer of the portion of the Property to the subsequent owner shall not negate, modify, or otherwise affect the liability of any transferee or the Developer pursuant to the terms and conditions of this Agreement.

b. *As to Property transferred.* Upon a Transfer, as defined in subsection (a) above, of title to any portion of the Property, the subsequent owner of the portion of the Property transferred may request release of that portion of the Property from the

obligations under this Agreement, which release shall not be unreasonably withheld, provided that: (i) Developer (or transferee) is not in default of this Agreement at the time of the transfer; (ii) Developer has provided prior written notice of the transfer to the City; and, (iii) with respect to the transfer of any parcel or lot of the Property that has not been fully developed as contemplated by the Project, the intended transferee executes and delivers to the City a written assumption agreement in a form acceptable to the City in which (aa) the name and address of the transferee is set forth, and (bb) the transferee expressly assumes all obligations of the Developer under this Agreement as to the portion of the Property to be transferred. Failure to deliver a written assumption to the City prior to transfer of the portion of the Property to the subsequent owner shall not negate, modify, or otherwise affect the liability of any transferee or the Developer pursuant to the terms and conditions of this Agreement.

16. No Damages Relief. The parties acknowledge that neither Party would have entered into this Agreement had it been exposed to damage claims from the other Party for any breach thereof. As such, the Parties agree that in no event shall either Party be entitled to recover damages against the other Party for breach of this Agreement. To the extent permitted by law, specific enforcement of this Agreement, including specific performance of Developer's payment obligations set forth in Section 8 and Exhibit F, and the City's Traffic Impact Fee (TIF) and Transferable Development Credit (TDC) obligations set forth in Exhibit F, is the proper and desirable remedy.

17. Subsequent Legislation.

    a. To the fullest extent permitted by law, any initiatives, referenda, moratoria, or amendments to the Core Vested Regulations adopted or enacted after the Effective Date that contain "slow/no growth" measures, limit or in any way control the provision of public services or utilities to the Property, or which by their terms are intended to or by operation have such effect, shall have no application to the Project.

        i. Because the California Supreme Court held in *Pardee Construction Co. v. City of Camarillo*, 37 Cal.3d 465 (1984), that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over the parties' agreement, it is the Parties' intent to avoid that result by acknowledging, that unless provided for in this Agreement, Developer shall have the right (without obligation) to develop the Property in such order and at such rate and at such times as Developer deems appropriate within the exercise of its subjective business judgment, subject to the terms, requirements and conditions of the Entitlements and this Agreement. Developer will use its best efforts, in accordance with its own business judgment and taking into consideration market conditions and other economic factors influencing Developer's business decision, to commence or to continue development, and to develop the Project in a regular, progressive, and timely manner in accordance with the terms, requirements and conditions of the Entitlements and this Agreement. Nothing in this subsection concerning the expectations set by the Parties for the timing of development in response to *Pardee Construction Co.*

v. City of Camarillo, 37 Cal.3d 465 (1984) is intended, nor shall it be construed, to relieve Developer from any time related requirements set forth in the schedules of performance for specified Project elements, the Subdivision Map Act, the Project Approvals, or the Subsequent Project Approvals.

b. The Parties agree that the terms and conditions in this Agreement, and the Financial Contributions and amenities provided by Developer to the City for this Agreement, were negotiated based upon the specific Project contemplated by the Agreement and in conjunction with housing law in effect at the time of Project approval. In the event the Developer or any Successor(s) seek to utilize additional housing laws adopted by the State of California to alter, amend, or terminate the applicable development standards, approved uses, or the material terms of this Agreement for Planning Areas C1-B, C2-A, S1, C1-C, C2-C or TS as of the Effective Date of this Agreement ("Commercial Block Standards") which were specifically negotiated to ensure the Project in the Isabel Neighborhood Specific Plan Area has the appropriate mix of uses for a complete neighborhood, then the specific changes will be evaluated by the City pursuant to provisions of Section 9(b), regarding Subsequent Approvals for the Project, as set forth therein, to determine whether the changes constitute an Administrative Project Amendment, a Major Project Modification, an amendment to this Agreement, or a new development agreement. If the change in state housing law nonetheless enables revisions to Commercial Block Standards in a manner that eliminates the commercial uses, plazas or affordable housing for those areas, then the Developer or any Successor must still deliver the undelivered commercial tenant spaces, affordable units, and plazas to the City as part of any new development agreement and the City may eliminate its Fee Reduction obligations under Section 8 of Exhibit E, Commercial Uses, for the Planning Area in which such changes are sought.

18. Force Majeure.

a. The Term of this Agreement shall be extended by, and the performance by any Parties of their obligations hereunder (other than for payment of money) shall be excused during, any period of "Force Majeure" as hereinafter defined. "Force Majeure" means a delay caused by any war, insurrection, acts of God, acts of public enemy, labor disputes or strikes, labor or materials shortages or embargoes, pandemic, fire, unusual delay in transportation, earthquakes, floods, tornadoes or extreme wind or other adverse weather conditions not reasonably foreseeable by Developer, third party litigation or referenda against the Project, restrictions imposed by other government agencies that reasonably prevent the Project from going forward, or other similar basis for excused performance not within the reasonable control of the Party, excluding financial inability to perform.

b. An extension of time for Force Majeure shall only be for the period of the delay, which period shall commence to run from the time of the notification of the delay by the Party requesting the extension to the other Party. The Party requesting an extension of time under this Section shall give notice promptly following knowledge of the delay to the other Party. If, however, notice by the Party claiming such

extension is sent to the other Party more than thirty (30) days after knowledge of the commencement of the delay, the period shall commence to run upon the earlier of (i) thirty (30) days prior to the giving of such notice or (ii) the date that the other Party received knowledge of the events giving rise to the delay.

c. The Force Majeure provisions in this Section do not apply to any proceedings with respect to bankruptcy or receivership initiated by or on behalf of Developer or, if not dismissed within ninety (90) days, by any third parties against Developer.

19. Annual Review. Review of the Agreement shall be made annually, consistent with Government Code section 65865.1 and Livermore Development Code Chapter 9.04. If, as a result of an annual review, the City finds and determines, on the basis of substantial evidence, that the Developer or successor in interest thereto has not complied in good faith with the terms or conditions of this Agreement, then the City may amend or terminate this Agreement as set forth in Section 12 and Section 13 of this Agreement, respectively.

a. No later than sixty (60) days before the yearly anniversary of the Effective Date, Developer shall submit to the Director, in a form which the Director may reasonably establish, information demonstrating Developer's compliance with this Agreement. The failure of the Developer to timely submit this document shall be a curable breach.

b. On or before the yearly anniversary of the Effective Date, the Director shall make a determination regarding whether or not Developer has complied in good faith with the provisions and conditions of this Agreement. This determination shall be made in writing with reasonable specificity, any determination of non-compliance must be supported by substantial evidence, and a copy of the determination shall be provided to Developer in a manner prescribed in this Section. The failure of the Director of the City to make a determination on Annual Review shall not be considered a breach of the Agreement.

c. In the event the Director makes a finding and determination of non-compliance, Developer shall be entitled to appeal that determination to the Planning Commission in the manner prescribed by Livermore Development Code Section 9.15.

d. If, as a result of this Annual Review procedure, it is found and determined by the Director if no appeal is taken, or the Planning Commission on appeal, that Developer has not complied in good faith with the provisions and conditions of this Agreement, upon receipt of the notice of default, Developer shall promptly commence to cure the identified default(s) at the earliest reasonable time after receipt of the notice of default and shall complete the cure of such default(s) not later than sixty (60) days after receipt of the notice of default, or such longer period as is reasonably necessary to remedy such default(s), by mutual consent of the City and the Developer, provided that Developer shall continuously and diligently pursue such remedy at all times until such default(s) is cured.

e. If the Director finds and determines that Developer has not cured a default pursuant to this Section, the City may elect to terminate or modify this Agreement pursuant to Sections 12 and 13.

f. Developer shall reimburse the City for its actual costs, reasonably and necessarily incurred, to accomplish the required Annual Review.

20. Notice of Default and Right to Cure. Whenever the City delivers any notice to the Developer of the occurrence of a Developer event of default (a "Cure Notice"), the City shall not exercise any remedy available to it unless and until each of the following have occurred: (a) written notice of the Developer event of default is provided to each and every then-existing holder of record of any Security Financing Interest (each an "Encumbrance Holder") that has notified the City in writing of (i) its interest in receiving such a notice, and (ii) its address for the receipt of such notice; and (b) such Developer event of default remains uncured after the expiration of the applicable cure period set forth in Section 19(d), above. The Cure Notice shall be sent simultaneously with any similar notice or notices of a Developer event of default that the City may be required to provide to Developer in this Agreement. An Encumbrance Holder shall have the right and the power to cure any Developer event of default specified in a Cure Notice within the cure periods set forth in Section 19(d), above, and, if such Developer event of default is so cured, this Agreement shall remain in full force and effect. Nothing contained in this Agreement shall be deemed to permit or authorize such Encumbrance Holder to undertake or continue the construction or completion of the improvements (beyond the extent necessary to conserve or protect such improvements or construction already made) without first having expressly assumed in writing the Developer's obligations to the City under this Agreement. The Encumbrance Holder in that event must agree to complete, in the manner provided in this Agreement, the construction of the improvements. Any such Encumbrance Holder properly completing construction of the improvements pursuant to this section shall assume all rights and obligations of Developer under this Agreement and shall be entitled, upon written request made to the City, to a Certificate of Occupancy from the City.

21. Remedies for Default. If a Party is in default under this Agreement, then the non-defaulting Party may pursue one or more of the following courses of action, after 30 days' written notice to the defaulting Party (or such longer period as may be required to cure the default so long as such defaulting Party commences the cure within such 30 day period and diligently pursues the cure to completion): (a) waive the default; (b) in the City's case, pursue administrative remedies including denial or otherwise withholding issuance of building permits, certificates of occupancy or other approvals; (c) pursue judicial remedies; or (d) terminate this Agreement. Any purported default by a party hereunder shall be subject to, and tolled by, any event of Force Majeure (or any other event or circumstance beyond the reasonable control of the party obligated to perform) which prevents such party from performing the act necessary to avoid or cure such purported default. Any such tolling shall end at the termination of the event of Force Majeure or other event or circumstance.

22. Rights and Remedies Cumulative. Except as otherwise provided, the rights and remedies of the Parties are cumulative, and the exercise or failure to exercise any right or remedy shall not preclude the exercise, at the same time or different times, of any right or remedy for the same default or any other default.

23. No Litigation. There is no existing or, to the Developer's actual knowledge, pending or threatened litigation, suit, action or proceeding before any court or administrative agency affecting the Developer or the Property that would, if adversely determined, materially and

adversely affect the Developer or the Property or the Developer's ability to perform its obligations under this Agreement or to develop the Project.

24. Legal Action. If the City chooses to defend any third party claim or suit challenging any action taken by the City with regard to this Agreement or any procedure or aspect of the City's approval of the development of the Project, including the environmental review process, the Developer in its capacity as either Developer or owner of the Property agrees to reimburse the City for its reasonable attorney's fees, expert witness fees, and related costs as the City may incur in connection with its retention of outside counsel, and for any award of court costs or fees against the City. The City has the right to choose and retain such legal counsel as the City deems appropriate. After expenses reach $100,000, and each $100,000 thereafter, the Parties will confer to review the status of the litigation and their options for proceeding or settling, and they will negotiate in good faith about how the subsequent expenses will be allocated. The Developer in its capacity as the Developer or owner of the Property shall have no obligation to reimburse the City for costs incurred after the date on which the Developer or owner of the Property gives the City written notice of their decision to settle a case, even if the City does not agree to the settlement.

25. Attorney's Fees. In the event any legal action is commenced to interpret or to enforce the terms of this Agreement or to collect damages as a result of any breach thereof, each Party shall bear their own attorneys' fees and no attorneys' fees may be awarded to the Party prevailing in the action.

26. Parties Not Co-Venturers. Nothing in this Agreement is intended to or does establish the Parties as partners, co-venturers, or principal and agent with one another.

27. Notices. The regular and email address of each party for the purpose of all notices permitted or required by this Agreement follows:

The written address of either party set forth above may be changed by written notice given not less than five (5) days prior to the date such change is to be in effect. All notices under this Agreement shall be in writing, shall be properly addressed and shall be sent by personal delivery, United States mail (registered, certified, or Express Mail, return receipt requested and postage prepaid), or by overnight courier delivery service. All such notices shall be considered delivered:

(i) if personally delivered, on the date of delivery; (ii) if sent by United States mail in the manner prescribed above, on the date shown on the return receipt for acceptance or rejection; or (iii) if sent by overnight courier delivery service, on the date of delivery or attempted delivery as shown by the written delivery record of such service.

All notices pursuant to this Agreement shall also be transmitted with an email courtesy copy to be sent at the time the written notice is transmitted by personal delivery, U.S. mail, or overnight courier service, and the email courtesy copy shall be transmitted with a delivery receipt requested.

28. No Third Party Beneficiaries. This Agreement is entered only for the benefit of the Parties executing this Agreement, and their respective successors in interest. This Agreement is not for the benefit of any other individual, entity or person. Nothing herein shall be construed to create any right of any third party to enforce this Agreement or to seek any benefit therefrom.

29. Time Is of the Essence. Time is of the essence for each provision of this Agreement for which time is an element.

30. Survival. Upon termination of this Agreement, the following provisions of this Agreement shall survive: Section 16 (No Damages Relief); Section 17 (Subsequent Legislation); Section 24 (Legal Actions); Section 25 (Attorneys' Fees); and Section 37 (Integration; Tolling Agreement; Entire Understanding of the Parties). This Section 30 exists for reference purposes only, and does not alter the scope or nature of the surviving provisions.

31. Estoppel Certificates. Developer may, at any time, request City to respond in writing: (i) whether this Agreement is in full force and effect; (ii) whether this Agreement has been amended or modified, and if so amended, the nature of any such amendments; or (iii) whether to the best of City's knowledge Developer is in default in the performance of any of its obligations under this Agreement, and if in default, the nature of any such default. City shall endeavor in good faith to respond to any such request within thirty (30) days

following the receipt thereof. Developer shall be entitled to one certificate of compliance per year without any fee being assessed by the City. For any additional certificates of compliance requested in a single year, the City may charge the requesting party a reasonable fee related to the actual cost to prepare the additional certificate. The form for the estoppel certificates shall be in substantially the same form as the form attached hereto as Exhibit G. The Parties acknowledge City's production of an estoppel certificate is an administrative function that may be performed by the City Manager or their designee.

32. Titles and Sections. Any titles of the sections or subsections of this Agreement are inserted for convenience of reference only and shall be disregarded in interpreting any part of its provision. References "Sections" are to sections of this Agreement, unless otherwise specifically provided.

33. Applicable Law. This Agreement is governed by and shall be interpreted under and pursuant to the laws of the State of California.

34. Further Assurances. Each Party hereby agrees to perform, or cause to be done or performed, all such further acts, and shall execute and deliver all such further agreements, certificates, instruments, and documents, as such other Party may reasonably request in order to carry out the intent and accomplish the purposes of this Agreement.

35. No Obligation to Build Project. The Parties herein acknowledge that it is their mutual intent to ensure that the Project is commenced and developed promptly and in a commercially reasonable manner, provided, however, that this Agreement confers upon Developer the rights and obligations provided herein, but does not impose the affirmative obligation on Developer to actually commence the construction of the Project; Developer may elect not to commence the construction of the Project, in its sole and absolute discretion, and such election shall not breach this Agreement, but once Developer commences construction on any aspect of the Project, then it must be developed in accordance with this Agreement.

36. Severability. If any term, provision, covenant or condition of this Agreement is held in a final disposition by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions shall continue in full force and effect, and shall be valid and enforceable to the fullest extent permitted by law, unless the rights and obligations of the Parties have been materially altered or abridged by such invalidation, voiding or unenforceability.

37. Integration; Tolling Agreement; Entire Understanding of the Parties. This Agreement constitutes the entire understanding and agreement of the Parties with respect to Developer's application to develop the Property, except for the Project Entitlements, the development agreement burdening the Property prior to the execution of this Agreement, and the Tolling Agreement executed by the Parties on June 29, 2023 ("Tolling Agreement"). With respect to the Tolling Agreement, this Agreement shall constitute the City's final and unappealable approval for the Alternative Project contemplated by the Tolling Agreement once its approval is beyond the period where it is subject to a timely legal challenge or referendum, and shall thereby give effect to the waivers, releases and discharges of all claims, demands, obligations, liabilities, causes of action, damages, losses, costs, and expenses against the City related in any way to the Preliminary Application, and

Preliminary Project as those terms are defined in the Tolling Agreement. This section is not intended to modify, and shall not be interpreted to modify, any terms and conditions in the Tolling Agreement, but is intended to effectuate the Developer's waivers, releases and discharges in that Tolling Agreement.

38. Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which constitute one and the same instrument.

IN WITNESS WHEREOF, the Parties have signed this Development Agreement on the dates indicated below.

EXHIBIT C

Master Project Infrastructure Timing, Repair and Replacement and Impact Fee Special Provisions

Introduction

This Exhibit C describes the Developer obligations for the timing and completion of the major project infrastructure for the Project.

Timing and Processing

1. Phase I Project Infrastructure Timing and Sequencing:

    a. *Offsite, Bus Stop, and Bike Lane Improvements.* Shall be completed by the Developer and operational within the following timelines:

        i. Portola/North Canyons/Campus Hill Drive Improvements: All Offsite, Bus Stop, and Bike Lane Improvements located on or adjacent to Portola Avenue/ North Canyons Parkway/Campus Hill Drive shall be completed within twenty-four (24) months of the issuance of improvement plan approvals for such work by the City, subject to Enforced Delay provisions.

        ii. Isabel Avenue Improvements. All Offsite, Bus Stop, and Bike Lane Improvements located on or adjacent to Isabel Avenue shall be completed within forty-eight (48) months of the issuance of improvement plan approvals for such work by the City, subject to Enforced Delay provisions.

    b. *Primary Internal Improvements*. The Primary Internal Improvements shall be completed within sixty (60) months of the commencement of their construction. The Primary Internal Improvements are intended to be constructed by Developer in one continuous phase. For clarity, this time limit is subject to Enforced Delay conditions.

    c. *Caltrans Embankment Master Landscaping*. The Parties recognize that the proposed landscaping work on the California Department of Transportation ("Caltrans") embankment (as depicted in Exhibit I) is dependent upon obtaining Caltrans approval.

        i. Prior to Improvement Plan approval for the Isabel Avenue Improvements as required by the Livermore Development Code and Engineering Plan Check and Procedures Manual, Developer shall engage the City of Livermore and Caltrans for the proposed landscaping work on the Caltrans embankment.

        ii. If, with reasonably diligent efforts, Developer is unable to obtain CA Department of Transportation approval for the work prior to the commencement of construction of the Offsite Improvements, Developer may submit a written request to the Director to be relieved of the obligation, which approval the Director shall not unreasonably withhold.

d. *Campus Hill Drive Bike Lanes*. Prior to Improvement Plan approval, Developer shall submit an engineer's estimate identifying total costs of the north and southbound bike lanes along Campus Hill Drive. Prior to Improvement Plan approval, Director shall determine whether a Class II or Class IV bike lane (as those terms are used in the Livermore Active Transportation Plan) shall be constructed.

e. *Law Enforcement Assets.* Developer or Successor shall install all Perimeter Assets subject to the following:

   i. Perimeter Assets shall be installed within forty-eight (48) months of the issuance of improvement plan approvals by the City, subject to force majeure provisions in the Agreement.

   ii. Perimeter Assets shall connect to the Livermore Police Department's Real Time Awareness Center, as approved by the Director, Police Chief, and Administrative Services Director.

   iii. Perimeter Assets shall be located on City traffic signals, streetlights, or other infrastructure, as approved by the Director, Police Chief, and Administrative Services Director.

f. *Mutual Cooperation.* The Parties recognize that the Developer and another separate project to the east (Shea) are responsible for a range of on and offsite improvements within the public right-of-way along Isabel Avenue and Portola Avenue. In order to promote timely, efficient, and coordinated construction within the public right-of-way, and in order to minimize traffic delays and hazardous roadway conditions, the Developer shall work cooperatively with Shea and the City to coordinate all construction activities within the public right-of-way, to the extent practical.

2. <u>Phase II Project Infrastructure Timing and Sequencing:</u>

a. *Park and Plaza Design*. Developer shall submit Park and Plaza designs no later than the time of the submittal of the Improvement Plans and shall include the information below:

   i. As approved by the Director and LARPD, the Park design plans shall include: a picnic area with tables, barbeques, and a shade structure adjacent to the children's play area; the children's play area shall include a shade structure; and the park shall include design details ensuring appropriate space activation, enclosures, and programming.

   ii. The Parties shall coordinate on the final design of the Neighborhood Park with LARPD, subject to the credit provisions, below.

   iii. Park design shall include a law enforcement camera or cameras connected to the Livermore Police Department's Real Time

   iv. Awareness Center, as approved by the Police Chief, Director, and LARPD.

v. Developer shall work with the City of Livermore and LARPD to incorporate motion-detection lighting in the park, as agreed upon and approved by the Police Chief, Director, and LARPD.

vi. Developer shall work with the City of Livermore and LARPD to explore including stationary outdoor exercise equipment in the park.

b. *Timing of Opening of Neighborhood Park.* The Neighborhood Park (Planning Area N3-B) shall be fully constructed and shall open prior to the Final Building Permit Inspection of Planning Areas N1, N2, N3-A and either C3 or C5.

c. *Timing of the Town Square.* The Town Square (TS) shall be constructed and opened prior to the issuance of the first Certificate of Occupancy for a residential unit in Planning Area S1.

d. *Timing of Pocket Plazas.* The Pocket Plazas (C1-C and C2-C) shall be constructed and open prior to the issuing a Certificate of Occupancy for the first residential unit of the respective adjacent Planning Areas, Planning Areas C2-A and C1-B.

e. *Timing of Temporary Commercial Activation.* The timing for the Temporary Commercial Activation shall be as set forth in Exhibit E.

f. *Primary Internal Streets (Final Lift).* The final lift for Primary Internal Streets shall be completed prior to the first Residential Move-In or Commercial Move-In for the nearest adjacent Planning Area.

g. *Valley Link Access Easement.* Developer shall provide to the City an irrevocable offer of an easement for access and permanent operation for a potential Valley Link Tunnel and Landing Area or Valley Link Overcrossing and Landing Area, on the Final Map, as approved by the Director.

h. *Law Enforcement Assets.* Controllers, cameras, sensors, etc. necessary for monitoring public safety in the Project Area. See Exhibit R for the location of said equipment.

i. All Interior Assets, except Knox Boxes, shall connect to the Livermore Police Department's Real Time Awareness Center, as approved by the Director, Police Chief, and Administrative Services Director.

ii. All Interior Assets, except Knox Boxes, shall be located on City streetlights or other infrastructure, as approved by the Director, Police Chief, and Administrative Services Director.

i. Developer or Successor shall work cooperatively with the Director, Police Chief, and Fire Chief to assess the feasibility of Commercial Block Knox Box installation.

j. *Recreation Facility Access.* The Project's recreation facility (Planning Area N3-C) shall be accessible by any for-sale resident within the Project site, including all for-sale affordable units.

EXHIBIT C

Developer Repair and Replacement Obligation

1. Infrastructure and Improvement Repair. Regarding the Phase I and Phase II Project Infrastructure, if, following the final release of performance bonds by the City for said infrastructure but before completion of the Project, said infrastructure is damaged or destroyed as a result of Project construction activities, the Developer shall ensure such infrastructure is adequately repaired or, if necessary, replaced with like new features that substantially conform to the original work to the reasonable satisfaction of the Director.

2. Master Landscaping Performance. It shall be the sole responsibility of the Developer to ensure all Master Landscaping shall take and thrive. Master Landscaping shall be subject to an 18-month establishment period from initial planting. If any Master Landscaping dies or is identified as unhealthy by a certified arborist or landscape architect within the establishment period, Developer shall take reasonably necessary steps to replace or restore the Master Landscaping, including but not limited to any necessary changes to irrigation, soil, spacing, etc. within six months of notification of such dead or unhealthy Master Landscaping.

Impact Fees

1. Park Fees

    a. *Pocket Plaza Improvements.* Pocket Plaza and the Town Square (Planning Areas C1-C, C2-C, and TS) permanent improvements shall be eligible for Park Fee credits for construction of public improvements. The total credit amount shall be determined by an engineer's estimate prior to Improvement Plan approval, as approved by the Director.

    b. *Neighborhood Park Improvements.* Neighborhood Park (Planning Area N3-B) permanent improvements shall be eligible for Park Fee credits for construction of public improvements. The total credit amount shall be determined by an engineer's estimate prior to Improvement Plan approval, as approved by the Director.

    c. *Neighborhood Park Land.* The Neighborhood Park land (Planning Area N3-B) of 1.5 acres shall be eligible for $2 million in Park Fee credits.

2. Traffic Impact Fees

    a. *Credits.* All infrastructure identified as credit eligible in Exhibit I shall be eligible for City Traffic Impact Fee ("TIF") credits.

    b. *Credit Procedure.* The City shall credit the Developer, or assignee, in accordance with all standards listed in the Traffic Impact Fee on Development section of the Livermore Municipal Code (Chapter 12.30).

    c. *Main Street Reimbursement.* Upon issuance of the final core and shell Certificate of Occupancy for all commercial spaces in either Planning Area C1-B or C2-A, the City shall reimburse the Developer's, or their assignee, Traffic Impact Fees

EXHIBIT C

for all Main Street Improvements, from Gateway Avenue to Street A, in the amount of an engineer's estimate, up to $2.2 million.

EXHIBIT D

Affordable Housing

Introduction

This Exhibit D establishes Developer Obligations for construction of affordable housing within the Project site.

1. Low Income Rental Housing Units (Planning Area S3A)

    a. *Quantity and Location*. The Project shall construct one hundred and fifty two (152) units of "low income" multi-family rental housing units in Planning Area S3A ("**Low Income Housing Units**").

    b. *Affordability Levels*. The units shall be comprised of fifty three (53) units reserved for "Very Low Income Household" rental housing, as the term is defined in Health & Safety Code, Section 50105, and ninety nine (99) units reserved for "Lower Income Household" rental housing, as the term is defined in Health & Safety Code, Section 50079.5 (collectively, "**Low Income Housing Units**"). Said Low Income Housing Units shall be constructed within Planning Area S3A.

    c. *Unit Mix*. The unit mix shall include one-bedroom, two-bedroom, and, three-bedroom units. With respect to three-bedroom units, the Parties recognize and agree that the intent of this Agreement is to include three- bedroom affordable units in Planning Area S3A. However, to maintain flexibility for the purpose of ensuring the proposed affordable units in Planning Area S3A are consistent with the requirements of public affordable housing financing providers' point-system-based competitive application processes while also ensuring the overall economic viability of the Low Income Housing Units, the final unit mix and number of three- bedroom units in Planning Area S3A shall be determined by Developer and/or the Affordable Developer in the manner that maximizes the units' eligibility for earning points for subsidized public affordable housing financing while maintaining economic viability for the Low Income Housing Units. Planning Area S3A shall not contain any age restricted residential units.

    d. *City Concurrence on Affordable Housing Developer*. Developer may elect to transfer Planning Area S3A to or otherwise partner with a third-party affordable housing developer ("**Affordable Developer**") to provide the Low Income Housing Units. However, prior to any such transfer or partnership being finalized, Developer shall obtain the City's prior approval of the Affordable Developer, which shall not be unreasonably withheld, conditioned, delayed or denied, so long as said Affordable Housing Developer makes a reasonable demonstration of relevant experience developing affordable housing and the financial ability to develop the Project's Low Income Housing Units.

    e. *Affordable Housing Timing*. Within twenty-four (24) months of the Effective Date of this Agreement, Developer and/or the Affordable Developer shall have submitted to

the State of California complete applications for tax credit and multifamily housing bond financing for the Low Income Housing Units.

f. *Performance Bond to Fund Low Income Housing Units*. On or before the date upon which the Final Map that includes Planning Area S3A is recorded, Developer shall post in an escrow account the sum of eleven million, four hundred thousand dollars ($11,400,000.00) (the "**Low Income Housing Amount**") in cash ("**Low Income Housing Cash Payment**") or, provided at Developer's sole expense, a performance bond ("**Low Income Housing Bond**") with the City as the obligee and sole beneficiary in the Low Income Housing Amount. The Low Income Housing Amount can be met through a combination of a Low Income Housing Cash Payment and a Low Income Housing Bond, so long as it totals the full Low Income Housing Amount. The Low Income Housing Cash Payment or Low Income Housing Bond shall secure: (i) delivery of fee title of S3-A to the Affordable Developer; (ii) delivery of the S-3A Pad; and (iii) close of escrow by the affordable Developer of Low Income Housing Tax Credit (LIHTC) financing for the final number of Low Income Housing Units to be constructed in Planning Area S3A [(i), (ii) and (iii) above being hereinafter collectively referred to as the "**LIHTC Financing Conditions**"]. The Low Income Housing Bond and escrow instructions shall enable the City to, in its sole and absolute discretion, withdraw the Low Income Housing Cash Payment or put a call on the Low Income Housing Bond for the Low Income Housing Amount no sooner than six (6) years from the Effective Date if Developer has not completed the LIHTC Financing Conditions ("**LIHTC Time Limit**"). In such a case, the Low Income Housing Cash Payment or Low Income Housing Bond funding shall be used by the City to fund the construction of the Project's Low Income Housing Units on Parcel S3-A. The Low Income Housing Cash Payment or Low Income Housing Bond shall be immediately released upon Developer's completion the LIHTC Financing Conditions. For clarity, the six (6) year LIHTC Time Limit is subject to Enforced Delay provisions. The entirety of the Low Income Housing Cash Payment or Low Income Housing Bond in the Low Income Housing Amount is not required to be expended by the City if sufficient low income project financing can be obtained to construct the Project's final permitted number of Low Income Housing Units. The City's release of the Low Income Housing Amount does not remove the Developer's obligation to provide the Low Income Housing units, as described in this exhibit. The Developer, Affordable Developer, and all successors are obligated to ensure the Low Income Housing units are constructed and made available for rent in accordance with this Agreement and the approved Project plans.

g. *Developer Obligations*. Developer meets all *Performance Bond to Fund Low Income Housing Units* requirements under this Agreement for the provision of Low Income Housing Units in Planning Area S3A and shall not be in breach of this Agreement with respect to the same where it either: (1) transfers Planning Area S3A to an Affordable Developer with funding commitments sufficient to construct the final number of approved Low Income Housing Units; or (2) places in an escrow account, consistent with the requirements of this subsection, the Low Income Housing Bond, the Low Income Housing Cash Payment, or a combination thereof, in the full Low Income Housing Amount; and transfers Planning Area S3A in fee title to the City of Livermore, as described in the *Land Ownership Transfer* section below. Developer

has elected to work with a third-party Affordable Developer to provide the Project's Low Income Housing units. The Developer, Affordable Developer, and all successors are obligated to ensure the Low Income Housing units are constructed and made available for rent in accordance with this Agreement and the approved Project plans, as the same may be amended pursuant to this Agreement, as agreed upon by both Parties.

h. *Land Ownership Transfer*. If the LIHTC Time Limit is reached without Developer having met the LIHTC Financing Conditions, the City may, at its own election and in its sole discretion, deliver written notice to Developer stating the City wishes to take ownership of Planning Area S3-A to ensure the construction of the Low Income Housing Units using the Low Income Housing Amount. If, at the time of such written notice is provided by the City, Developer is the fee owner of Planning Area S3-A, Developer shall deed fee ownership of Planning Area S3A to the City at no cost to the City, to enable the City to develop Low Income Housing Units pursuant to the requirements of this Section. If Developer transfers ownership of Planning Area S3A to an Affordable Developer before the LIHTC Time Limit is reached, said transfer shall include a binding commitment and written agreement from the Affordable Developer to agree to take Planning Area S3A subject to the City retaining an extinguishable right of reversion of fee ownership if the LIHTC Time Limit is reached without the LIHTC Financing Conditions having been met. The grounds upon which this reversion right is extinguishable shall only be where said extinguishment is required by a bona fide provider of affordable financing for the Low Income Housing Units, in which case the reversion right shall be permanently and irrevocably extinguished by the City, conditioned upon the closing of affordable financing. Where such extinguishment is required, either Developer or the Affordable Developer shall deliver to the City a letter from said provider of affordable housing financing indicating it is requiring extinguishment of the reversion right herein, wherein the City shall promptly – but in no case more than ten (10) business days of receipt of said letter – deliver to Developer or the Affordable Developer written confirmation that its right of reversion is permanently waived and extinguished pursuant to the terms of this provision conditioned upon the closing of the affordable housing financing.

   i. *Clean Title*. For any transfer to the City of ownership of Planning Area S3A under this provision, title shall be delivered free of liens, loans, notes, taxes, and other encumbrances, except for: (1) any easements, encumbrances and exceptions depicted on the Final Map; (2) any easements for utilities, storm drains or other flood control devices or conveyances; and (3) any other easements or encumbrances expressly agreed to by the City.

i. *Cooperation*. The Parties covenant and agree to cooperate with one another to help achieve the key purpose of this Agreement that Developer and/or the Affordable Developer to obtain affordable housing financing for the Low Income Housing Units and to execute and deliver to the other all such other and further instruments and documents as may be necessary to carry out this purpose, which may include, without limitation, the City issuing a formal written release of its reversionary ownership rights hereunder in connection with the closing of affordable project financing by

EXHIBIT D
Affordable Housing

Developer and/or the Affordable Housing Developer.

2. Moderate/Median Income Rental Housing

a. *Moderate Income Housing in Planning Area C1-B.* The Project shall construct one hundred and fourteen (114) units of "median and moderate income" multi-family rental housing units, which shall be comprised of fifty- seven (57) units reserved for "persons and families of moderate income," as the term is defined in Health & Safety Code, Section 50093(b) [120% area median income ("**AMI**") level] ("**Moderate Income Rental Units**"), and fifty-seven (57) units reserved for "persons and families of median income," as the term is defined in Health & Safety Code, Section 50093(c) [100% AMI level] ("**Median Income Rental Units**"), all of which are to be constructed in Planning Area C1-B.

b. *Unit Mix*. The unit mix for Moderate and Median Income Rental Units in Planning Area C-1B stated herein shall include one, two, and three bedroom units. The mix shall be 25 percent 3-bedroom units, 25 percent 2-bedroom units, 25 percent 1-bedroom units, and 25 percent studio units. An equal quantity of Median and Moderate Income Rental units shall be provided for each bedroom type, and any fractional units shall be apportioned to the Median category.

c. *Timing Requirements*. The timing requirements for the provision of Moderate and Median Income Rental Units in Planning Area C1-B of the Project is as set forth in Exhibit C.

3. Inclusionary Housing in Planning Area S3-B

a. The Project shall construct forty (40) units of affordable multi-family rental housing units consistent with the Affordable Housing requirements under Section 10.06.050-A.1.c.2 of the Livermore Development Code, as the same is in effect on the Effective Date**,** all of which are to be constructed in Planning Area S3-B. Said total comprises twenty percent (20%) of the planned 200 rental housing units in Planning Area S3-B.

b. *Unit Mix.* The inclusionary housing units in Planning Area S3-B shall consist of one and two bedroom units consistent with the units sizes and product types indicated for Planning Area S3-B on Exhibit B. However, if any three bedroom units are built in Planning Area S3-B, a proportionate number of such units shall be included as inclusionary housing units consistent with the unit size limitations set forth in Exhibit B.

4. Moderate/Median Income For-Sale Housing

a. *For-Sale Affordable Units In Planning Area S1*. The Project shall provide a total of twenty (20) for-sale affordable units, which shall be comprised of fifteen (15) units for "persons and families of moderate income," as the term is defined in Health & Safety Code, Section 50093(b) [120% AMI level] ("**Moderate Income For-Sale Units**"), and five (5) units reserved for "persons and families of median income," as

the term is defined in Health & Safety Code, Section 50093(c) [100% AMI level] ("**Median Income For- Sale Units**") in Planning Area S1.

i. *Unit Mix*. The affordable unit mix shall match the market-rate unit mix. The same proportion of one- two- and three-bedroom units shall be apportioned to market-rate and affordable units. If two-and- three-bedroom affordable units are provided, Developer may select which of the market-rate two-and-three-bedroom units are designated as affordable units in Planning Area S1. All affordable units must represent a unit type that is also sold as market-rate and must be adequately dispersed around the Planning Area, as determined by the Director.

b. *For-Sale Affordable Units In Planning Area C2-A.* The Project shall provide a total of fifteen (15) for-sale affordable units, which shall be comprised of eleven (11) Moderate Income For-Sale Units, and four (4) Median Income For-Sale Units, all of which are to be constructed in Planning Area C2-A.

i. *Unit Mix*. The affordable unit mix shall match the market-rate unit mix. The same proportion of one- two- and three-bedroom units shall be apportioned to market-rate and affordable units. If two-and- three-bedroom affordable units are provided, Developer may select which of the market-rate two-and-three-bedroom units are designated as affordable units in Planning Area C2-A. All affordable units must represent a unit type that is also sold as market-rate and must be adequately dispersed around the Planning Area, as determined by the Director.

c. *For-Sale Affordable Units In Planning Area S4.* The Project shall provide a total of ten (10) for-sale affordable units, which shall be comprised of seven (7) Moderate Income For-Sale Units, and three (3) Median Income For-Sale Units, all of which are to be constructed in Planning Area S4.

i. *Unit Mix*. The affordable unit mix shall match the market-rate unit mix. The same proportion of one- two- and three-bedroom units shall be apportioned to market-rate and affordable units If two-and-three-bedroom affordable units are provided, Developer may select which of the market- rate two-and-three-bedroom units are designated as affordable units in Planning Area S4. All affordable units must represent a unit type that is also sold as market-rate and must be adequately dispersed around the Planning Area, as determined by the Director.

d. *Affordable Unit Maximum Sale and Rent Prices*. The City shall establish the maximum sales and rent prices for the Project's for-sale and for-rent affordable units, in accordance with applicable City ordinances and policies and applicable state and federal law and policy on an annual basis, except that all rents and sales prices for units receiving state tax credit shall be established by state standards.

5. Additional Affordable Units:

EXHIBIT D
Affordable Housing

a. *Developer will provide an additional* twelve (12) Moderate and Median Income For-Sale Units within Planning Areas S1 or C2-A ("Additional Affordable Units").

b. *Affordability Levels*. The Additional Affordable Units shall be comprised of six (6) Moderate Income For-Sale Units, and six (6) Median Income For- Sale Units.

c. *Unit Mix*. The Additional Affordable Units shall all be the smallest three- bedroom unit types available in Planning Areas S1 or C2-A.

6. Compliance with Inclusionary Ordinance and Specific Plan. Except as allowed by this Agreement and the Project Approvals, Project shall fully conform to the City's Inclusionary Housing Ordinance (Livermore Development Code Section 10.06.050) and INSP affordable housing policies, including with respect to security, the Low-Income Housing Agreement, monitoring, restriction, alternative means of compliance, and enforcement. Nothing in this Agreement shall preclude the City from enforcing the applicable provisions of the Inclusionary Housing Ordinance, the Low-Income Housing Agreement, and INSP policies related to affordable housing.

7. Low Income Housing Agreement. Prior to issuance of building permits on any Planning Area upon which Affordable Housing is to be constructed, the City and Developer shall enter into an Affordable Housing Agreement which shall detail Affordable Housing requirements for the Project and be consistent with the requirements of this Agreement, which Affordable Housing Agreement shall be substantially consistent with the City's standard form of agreement attached hereto as Exhibit O, as said standard form agreement may be amended by the City from time to time. In addition to any other revisions agreed to by the Parties, the Affordable Housing Agreement shall include additional provisions stating that the City may pre-approve certain Affordable Developers for the Project. The Low-Income Housing Agreement shall be recorded separately from this Agreement.

EXHIBIT E

Commercial Uses

Introduction

This Exhibit E describes the Developer obligations for the timing and completion of the commercial uses for the Project.

Timing and Processing

1. Commercial and Residential Construction/Linkage

    a. *Planning Areas C1A and C1B.* Building Permits shall not be issued for Planning Area C1A until building permits have been issued and impact fees have been paid for Planning Area C1B.

    b. *Planning Areas C2A and C2B.* Building Permits shall not be issued for Planning Area C2B until building permits have been issued and impact fees have been paid for Planning Area C2A.

    c. *Planning Areas S1 and S2.* Building permits for more than forty-two (42) residential dwelling units in Planning Area S2 shall not be issued until building permits have been issued and impact fees have been paid for Planning Area S1.

2. Occupancy of Planning Area S1

    a. Developer shall be required to make all reasonable efforts to enter into a long-term lease agreement with a Permanent Commercial Grocer or Food Hall in the Retail Market portion of Planning Area S1, as shown in Exhibit B (Development Plans), within 24 months of S1 Certificate of Occupancy issuance.

    b. Until a long-term lease agreement is secured, temporary interim uses shall be allowed in the Retail Market portion of Planning Area S1 through Temporary Use Permits, as described in Livermore Development Code Chapter 9.09, or as amended, and as approved by the Director. The temporary uses shall have the following characteristics, as determined by the Director:

        i. Shall be allowed in the subject zone; and

        ii. Shall be of a neighborhood serving character (e.g. food service, entertainment, etc.).

    c. If the Developer is not able to secure a long-term lease with a Permanent Commercial Grocer or Food Hall within such 24 months, Developer may lease the Retail Market portion of Planning Area S1 to any food based use (either fresh or prepared food), provided that a minimum of 25% of the floor area is reserved for fresh food retail

use, unless otherwise approved in writing by the Director.

3. Temporary Commercial Activation

a. *Plan Approval*. Prior to Final Occupancy of the Project's 50th residential dwelling unit, Developer shall submit a site plan and management plan that identify locations, sizes, uses, operations and maintenance of all Temporary Commercial Activation uses. The plans shall be approved in writing by the Director.

b. *Pad Construction.* As described in Exhibit C (Master Infrastructure), the Temporary Commercial Activation site shall be constructed prior to issuance of the Project's first residential dwelling unit Building Permit.

c. *Location*. The Temporary Commercial Activation site shall be located on one of the Project's Commercial Blocks. If a Commercial Block with the Temporary Commercial Activation Site is to be developed, the Temporary Commercial Activation site shall be relocated to a vacant Commercial Block, at Developer's discretion, or another location agreed to by the Parties, until the limit established in the *Period of Operation* section is reached.

d. *Timing*. Prior to issuance of a building permit for the Project's 195th residential dwelling unit, the Temporary Commercial Activation site shall be operational and open to the public.

e. *Period of Operation*. Unless otherwise approved by the City, Temporary Commercial Activation shall remain in operation until a building permit is issued for the third of the Project's three Commercial Blocks, or as otherwise agreed to by the Developer and Director in writing.

f. *Operations and Management.*

i. The Developer or its management entity shall be responsible for tenanting, leasing, and managing all temporary commercial operators on the Temporary Commercial Activation site, as approved by the Director.

ii. The Developer or its management entity shall ensure the Temporary Commercial Activation site is publicly accessible and operational a minimum of two days a week on average throughout the year, as determined by the Director.

iii. Developer or its management entity shall ensure the Temporary Commercial Activation site remains in good condition at all times and that sufficient facilities are provided to ensure proper site function to facilitate commercial activity and use by the public (e.g. parking, trash, restrooms, seating areas, etc.).

g. *Leases*. All Temporary Commercial Activation site operators herein will be required to enter into commercial leases with Developer or its management entity on terms reasonably satisfactory to Developer or its management entity, which shall include

standard commercial lease terms including, without limitation, permitted use restrictions, tenant improvement and permitting requirements, repair and maintenance requirements, casualty provisions, insurance requirements, common area maintenance expenses, and time, place and manner restrictions, among other standard commercial lease terms for temporary leases for similar uses in similar locations. In Developer's sole and absolute discretion, if the Temporary Commercial Activation site operator is a commercial retail operation providing goods or services to the community, the Temporary Commercial Activation site operator may be provided a base rent of zero, and Developer or its management entity may instead accept rent as a commercially reasonable percentage of monthly gross receipts.

h. *Vacancy and Rent.* If the Developer cannot find rent-paying commercial operators for the Temporary Activation site and the Temporary Commercial Activation site is vacant for more than three months, use of the site shall be offered rent free or otherwise with a base rent of zero until such time as suitable rent paying tenants can be identified.

4. Main Street and Gateway Avenue Ground Floor Uses.

a. *Non-Commercial Uses*. The following uses shall be permitted in up to 50 percent of Main Street and Gateway Avenue ground floor tenant spaces (Planning Areas C1-B, C2-A, an S1), excluding the S1 Retail Market space of 18,500 square feet as described in Exhibit B (Development Plans):

i. Flexible Co-Workspace Uses, as defined in this Agreement and as amended;

ii. Public and Quasi Public Uses, as defined in the Livermore Development Code, as amended; and

iii. Office Core uses, as defined in the Isabel Neighborhood Specific Plan, as amended.

b. *Restaurant and Retail Uses*. At least 75 percent of all tenant spaces directly fronting onto the public plazas (Planning Areas C1-C, C2-C, and TS) shall be occupied with restaurant, retail and related uses, as determined by the Director and as allowed in the Ground Floor Retail/ Overlay Flex Space and Office Core zones.

c. *Public and Quasi Public Dedication*. Upon written request of the City, the Developer shall dedicate the northern-most ground floor tenant space not to exceed 3,000 gross square feet unless agreed to in writing by Developer in Planning Area C2-A to public/ quasi-public uses, to include but not limited to: a public library, art space, police substation, bike share facility, etc. Compensation for the Public and Quasi Public tenant space and any required tenant improvements shall be negotiated in good faith between the Parties prior to the City occupying the tenant space. Compensation may include art fee contributions, or other compensation as agreed upon mutually by the Director and the Developer.

5. The Parties recognize that the successful permanent and temporary use of the commercial component of Planning Area S1 and the temporary activation of the Commercial Blocks

EXHIBIT E
Commercial Uses

depends on the Developer's ability and on the City's support to attract and enter into permanent and temporary leases with reputable, desirable Permanent Commercial Grocers, Temporary Commercial Operators, and Temporary Commercial Activation uses.

6. Mutual Cooperation. The Parties will work cooperatively to: meet regularly with prospective tenants, leasing agents, brokers, vendors, and coordinators; establish timelines for permit and document review and submittal; and will collaboratively provide for a positive environment to attract permanent and temporary commercial uses to the Project.

7. Operations of Pocket Plazas

    a. *The Pocket Plazas* (Planning Areas C1-C and C2-C) and the Town Square (Planning Area TS) shall be operated and maintained by the owner or tenant of the respective adjacent Planning Areas, Planning Areas C1-B, C2-A, and S1, or in accordance with another arrangement approved by the Director.

8. Fee Reductions

    a. *Downtown Traffic Impact Fee Rate Reduction.* The Project creates a walkable, dense, compact mixed-use commercial Gateway and Main Street core (Planning Areas C1B, C2A, and S1), which is similar to a downtown environment and lessens the traffic impact on the City. Therefore the Developer may obtain reimbursement of the Project's City Traffic Impact Fees ("TIF") in the amount of the difference between the applicable standard citywide TIF rates and the reduced Downtown TIF rates for said fees ("Downtown Fee Rate Reduction") upon the performance of the mixed-use Planning Areas. This strategy reduces TIF from the citywide rate to the Downtown Rate when a complete neighborhood with mix of uses is completed and operational.

    Payment of Citywide TIF and reimbursement shall occur as follows:

        i. At time of building permit issuance for residential units and non- residential spaces, the developer shall pay citywide TIF rate.

        ii. Once the final core and shell Certificate of Occupancy for commercial areas is issued for the first Commercial Block, the City shall reimburse the developer, or their assignee, 50% of the difference between the citywide TIF rate and the Downtown TIF rate, collected to date.

        iii. Once the final core and shell Certificate of Occupancy for commercial areas is issued for the second Commercial Block, the City shall reimburse the developer the remaining difference between the citywide TIF rate and the Downtown TIF rate, collected to date.

        iv. After the final core and shell Certificate of Occupancy for commercial areas is issued for the second Commercial Block, the Developer shall pay the Downtown TIF rate.

        v. The TIF fee shall be collected at time of building permit issuance. Fees for

which credits or reimbursement are provided pursuant to this provision shall not be included in the Project Community Facilities District (Exhibit J).

vi. The City shall retain all interest earned on TIF fees collected up until the time of reimbursement. All interest earned shall be committed to TIF related expenditures.

b. *Transferrable Development Credit ("TDC") in-lieu fees.* The NLUGB Initiative (Initiative) establishes a Transferable Development Credit program which assigns credits to property owners in North Livermore, which may be used within the Urban Growth Boundary ("UGB") to increase allowable development elsewhere in the City.

The purpose of Initiative (Section 1) is to (among other items) prevent further sprawl, reduce traffic congestion and hazards, limit air pollution, and avoid government expenditures for extended facilities and services.

The Initiative finds (Section 2h) that more compact, properly planned residential development lowers housing and other living costs; and reduces the costs of public facilities and services, especially where infrastructure is available.

The Initiative acknowledges the necessity to provide housing beyond the UGB and authorizes Council to approve housing beyond the UGB to meet state housing requirements (Section 4c). The Initiative states (Section 20b) that development credits may be used, as the City Council approves in accordance with the General Plan and other City regulations, in areas within the City boundary and Urban Growth Boundary to build dwelling units and commercial and industrial space, including space that otherwise would not be permitted or not permitted until a later time. Additionally, with reasonable justification, the Council may permit more development per credit in some receiving areas and for certain types of uses.

The 2022 Housing Element of the Livermore General Plan identifies the Project Site in the Housing Sites Inventory and states a majority of the 6th cycle regional housing allocations (4,570 units) will be constructed in the Isabel Neighborhood. Falling short of the estimated number of units will require the City to identify additional housing locations due to no net loss obligations and potentially require identifying sites outside of the UGB. The Livermore General Plan states the TDC requirements in a specific plan area, if any, shall be set forth in the specific plan for that area.

Specific Plan policy P-IMP-6: Transferable Development Credit (TDC) regulations shall be applied to the Specific Plan consistent with Livermore Development Code. Modifications to the TDC program may be made through a Development Agreement on a project-specific basis as recommended by the Director and approved by City Council if such modifications are shown to be necessary to meet Specific Plan goals.

The Livermore Municipal Code establishes a TDC in-lieu fee whereby development can choose to pay a fee for units constructed above baseline density rather than acquiring land in North Livermore. The in-lieu fee is adjusted based on density range and product type ranging from 1.5 credits for single family units to 1/2 credit for

multi-family units.

Further, section 4.02.60(D)(4) of the LDC authorizes the Council to, through the adoption of a specific plan and implemented consistently by development agreement, make modifications to the transferable development credits regulations to meet the specific plan's density, design policies, and goals that are not inconsistent with the transferable development credit program.

The Project proposes the highest densities on each mixed-use "**Commercial Block**" (Planning Areas C1B, C2A, and S1). Given such densities, the Parties find the following:

i. Under today's market conditions, constructing at these densities along with commercial uses can be challenging;

ii. The Commercial Block densities are critical in supporting the City's overall housing goals and in helping the City meet its 6th Cycle RHNA obligations;

iii. The mixed-use Commercial Blocks create more compact and dense development within the Urban Growth Boundary, preventing sprawl, reducing traffic congestion and hazards, limiting air pollution, and avoiding government expenditures for extended facilities and services, as contemplated by the Initiative; and

iv. The Commercial Blocks' density ranges, mix of uses, and proximity to future transit warrant a higher level of development per credit than other areas in the City.

The higher density of development per credit shall only be assessed once the Commercial Blocks are built, consistent with the provisions of this agreement. Therefore, consistent with the Initiative, General Plan, Specific Plan, and Livermore Municipal and Development Codes, the parties agree to modify the TDC program as follows:

i. At time of Master Final Map, Developer shall pay Transfer Development Credit in-lieu fees for all units proposed as part of the Project. The Project is comprised of a range of multifamily product types and subject to a fee equivalent of 1/2 TDC credit per unit.

ii. The City shall reimburse the developer 7/16 credit per unit within each individual Commercial Block if the following performance triggers are met (this credit is based on the density range for the mixed-use Commercial Blocks):

    a. A Building Permit is issued for a Commercial Block within 7 years of the effective date of this agreement.

        1. The Director may permit reimbursement beyond 7 years if the

EXHIBIT E
Commercial Uses

Project shows significant and substantial progress towards completion, as determined by the Director.

b. The density of the Commercial Blocks as a whole meets all other requirements of this Agreement, including Section 9(b)(v) related to unit reductions.

iii. The City shall retain all interest earned on TDC fees collected up until the time of reimbursement in the City's TDC Fund.

CITY OF LIVERMORE COMMUNITY DEVELOPMENT DEPARTMENT

(1) Areas within the California Water Service Area do not pay a City water connection fee. Areas within the Greenville/Vasco Assessment District or within Triad Park do not pay a City water connection fee. The fee for a single family residential unit is the 5/8 inch meter fee.

(2) All projects within the Downtown Specific Plan are subject to both City Wide General Plan & Downtown Specific Plan cost recovery. Any project that paid planning entitlement fees prior to July 27, 2008 is not subject to this fee, regardless of when they pull building permits.

NOTE: Subject to adjustment each year per Construction Cost Index

NOTE: No impact fees can be charged for ADUs less than 750 square feet. Impact fees allowed for ADUs 750 square feet or larger but shall be charged proportionately in relation to square footage of the primary dwelling.

Governing Municipal Code Section: 13.28.050
Index Used: ENR 20- City Construction Cost Index

Indices:	*Base Year* (A)	*Previous Fee Update* (B)	*Current Fee Update* (C)	*% Change Previous Update to Current Update* (D) =(C/B)-1
Index Date	May-10	Jun-22	Jun-23	
Index Value	8,761.47	13,110.50	13,229.57	0.91%

Discussion:

The base year unit fees for Flow, BOD, and SS were determined in the March 2010 Wastewater, Water, Storm Drain Connection Fee Study for Expansion of Sanitary Sewer, Water Reclamation Plant, and Wastewater Disposal Facilities prepared for the City of Livermore by Craig R. Lawson Utility Management Consultant.

Notes:

1. Building square footage means the square footage sum of the floor area at each floor level included with the surrounding principal outside faces of exterior walls of a building or portions thereof, including mezzanines and lobbies. It does not include floor area devoted to vehicle parking, necessary interior driveways and ramps. The gross floor area of a building or portions thereof that doesn't have surrounding exterior walls shall include the usable area under the horizontal projection of the roof or floor above.

2. Theaters can alternately estimate daily flow based on 2 gallons per seat ($87.72 per seat)

3. Mixed Use applies to parcels with Mixed Use zoning in the Downtown Core District and in the INSP.

4. This value is based by formula on BOD

6. Adjustments. The city council may, by resolution, adjust the fee schedule, including the flow factors, from time to time. Once the fee is established, it shall automatically be increased annually based upon the Engineering News Record (ENR) 20- City construction Cost Index. In calculating the adjustment, the rate (in each use category, including the flow, BOD and SS costs) for the base year is multiplied by the index for the then-current year, divided by the base year index.

Subject: 2024 Municipal and Industrial (M&I) Water Connection Fee Increase

Dear Andrew Hall,

This letter is to inform you that on October 18, 2023, the Zone 7 Board of Directors voted to increase the basic connection fee for the Zone 7 and Dougherty Valley service areas. Within Alameda County, the basic fee (5/8-inch size displacement type meter) will increase to **$34,530** from $33,730, and within Contra Costa County (Dougherty Valley) the basic fee (5/8-inch size displacement type meter) will increase to **$33,130** from $32,360, **all effective January 1, 2024**. A new water service connection fee schedule is enclosed. Please distribute revised fee schedule to appropriate staff.

If there are any questions, please contact me at jli@zone7water.com or at (925) 454-5017. Thank you for your help in this matter.

Sincerely yours,

Junming Li
Junior Engineer

WATER CONNECTION FEE INFORMATION SHEET

New fee schedule effective January 1, 2024

I. GENERAL BACKGROUND

A. The Water Connection Charge Ordinance No. FC 72-1 as amended for Zone 7 was established January 18, 1972. The ordinance is applicable over the Zone 7 area that includes Livermore, Pleasanton, Dublin, Sunol, and surrounding communities. The Ordinance requires a one-time water connection fee for all new water services from a water system that is directly connected to the Zone 7 water supply system. This fee is used for funding the costs of expanding the Zone 7 water treatment and distribution system to serve new development.

B. The amount charged for a water connection is determined by the size of the meter to be installed. The meter sizes and corresponding water connection fees are listed below.

II. PROCEDURES FOR PAYMENT OF WATER CONNECTION FEES IN LIVERMORE, PLEASANTON, & DUBLIN

The water connection fees are collected by the Building Departments of the Cities of Livermore and Pleasanton, and by the Dublin San Ramon Services District, which are agents for Zone 7. For that area within the California Water service area which is located outside of the Livermore city limits, connection fees will be paid at the Zone 7 office in Livermore.

III. WATER CONNECTION FEE SCHEDULE - FEES ARE REVIEWED AND SUBJECT TO PERIODIC MODIFICATION

Meter Size	Meter Brand/Type	Fee Factor	Connection Fee
5/8" & 1" FS	DISPLACEMENT TYPE	10	$34,530
3/4"	DISPLACEMENT TYPE	15	$51,795
1"	DISPLACEMENT TYPE	25	$86,325
3/4" Short Diehl	ULTRASONIC METER **(Pleasanton only)**	30	$103,590
3/4" Long Diehl	ULTRASONIC METER **(Pleasanton only)**	30	$103,590
1" Diehl	ULTRASONIC METER **(Pleasanton only)**	55	$189,915
1" Kamstrup	ULTRASONIC METER **(Livermore only)**	55	$189,915
1 1/2"	DISPLACEMENT TYPE	50	$172,650
	KAMSTRUP ULTRASONIC **(Pleasanton only)**	120	$414,360
	OMNI C2	160	$552,480
	OMNI T2	160	$552,480

2"	OMNI WITH 50 GPM RESTRICTION	50	$172,650
	DISPLACEMENT TYPE	80	$276,240
	OMNI WITH 80 GPM RESTRICTION	80	$276,240
	Mueller MVR	115	$397,095
	OMNI WITH 120 GPM RESTRICTION	120	$414,360
	SENSUS SR/SRII	160	$552,480
	KAMSTRUP SHORT ULTRASONIC **(Pleasanton only)**	160	$552,480
	KAMSTRUP LONG ULTRASONIC **(Pleasanton only)**	160	$552,480
	OMNI C2	160	$552,480
	OMNI T2	200	$690,600
	evoQ4 MAGNETIC **(Pleasanton only)**	220	$759,660

Note - Connection fees for meters 3-inch and larger and for meters with fee factors other than those listed above, will be determined by Zone 7, using the fee factor for Maximum Rate for Continuous Operation, as defined by AWWA. These fees are based on the Maximum Continuous Flow Rate through a 5/8" meter and are proportional based on flow ratings for the various sized meters. Flow ratings for displacement type meters are defined by AWWA C700 for Cold-Water Meter -- Displacement Type, Bronze Case. Flow ratings for turbine type meters are defined by AWWA C701 for Cold Water Meters -- Turbine Type, For Customer Service. Any changes to meter capacities will affect the above connection fees.

IV. EXEMPTIONS

No fee will be collected for SEPARATE private fire service connections. See Section VI of the Ordinance (copy available upon request).

V. PARTIAL EXEMPTIONS

A partial exemption sometimes applies for domestic fire sprinkling systems up to 1" meter size. See Section VI of the Ordinance (copy available upon request).

VI. FOR FURTHER INFORMATION

Contact Junming Li at (925) 454-5017, or jli@zone7water.com.

	OMNI T2	200	$690,600
	evoQ4 MAGNETIC **(Pleasanton only)**	220	$759,660
3" to 10"			**

* Per Fee Ordinance Section VI, combined domestic and fire service connections are subject to the connection charge based on the meter size for the combined system, except the basic charge shall be collected for combined systems, up to a maximum one-inch (1") meter size, for single family and duplex housing units with fire sprinkler systems approved by the appropriate fire department and installed in accordance with applicable building requirements. Contact the Zone 7 office with any additional questions.

** Connection fees for meter sizes 3-inches and above will be determined by using the fee factor for maximum rate for continuous use.

Fees for meters other than those listed above will be determined based upon the AWWA maximum continuous flow rating for the brand, type, and size of meter.

These fees are based on the Maximum Continuous Flow Rate through a 5/8" meter as defined by AWWA C700 for Cold-Water Meter -- Displacement Type, Bronze Case.
Any changes to meter capacities will affect the above connection fees.

Currently, the Diehl, Kamstrup, & evoQ4 meters are only available in Pleasanton and/or Livermore as indicated in the table.

EXHIBIT F

RESOLUTION NO. 044-19/20

TO UPDATE STATUTORY DEVELOPER FEES IMPOSED ON NEW RESIDENTIAL AND COMMERCIAL/INDUSTRIAL DEVELOPMENT PROJECTS PURSUANT TO EDUCATION CODE SECTION 17620

WHEREAS, the School Board ("Board") of the Livermore Valley Joint Unified District ("District") provides for the educational needs for TK-12 students within the City of Livermore and a portion of the unincorporated counties of Alameda and Contra Costa (collectively, "Counties"); and

WHEREAS, The State Allocation Board has taken action pursuant to Government Code Section 65995(b)(3), which authorizes Districts to increase Statutory Developer Fees to $4.08 per square foot for assessable space of residential development and $0.66 per square foot of chargeable covered and enclosed space for all categories of commercial/industrial development, as long as such Statutory Developer Fees are properly justified by the District pursuant to law; and

WHEREAS, new residential and commercial/industrial development continues to generate additional students for the District's schools and the District is required to provide school facilities ("School Facilities") to accommodate those students; and

WHEREAS, overcrowded schools within the District would have an impact on the District's ability to provide an adequate quality education and negatively impacts the educational opportunities for the District's students; and

WHEREAS, the District does not have sufficient funds available for the construction or reconstruction of the School Facilities, including acquisition of sites, construction of permanent School Facilities, and acquisition of interim School Facilities, to accommodate students from new residential and commercial/industrial development; and

WHEREAS, the Board of the District has received and considered two studies entitled "Residential Development School Fee Justification Study for Livermore Valley Joint Unified District" and "Commercial/Industrial Development School Fee Justification Study for Livermore Valley Joint Unified District" ("Studies"), which Studies include information, documentation, and analysis of the School Facilities needs of the District, including (a) the purpose of the Statutory Developer Fees; (b) the use to which the Statutory Developer Fees are to be put; (c) the nexus (roughly proportional and reasonable relationship) between the residential and commercial/industrial development; and (1) the use for Statutory Developer Fees; (2) the need for School Facilities; (3) the cost of School Facilities; and the amount of Statutory Developer Fees from new residential and commercial/industrial development; (d) a determination of the impact of the increased number of employees anticipated to result from the commercial/industrial development (by category) upon the cost of providing School Facilities within the District; (e) an evaluation and projection of the number of students that will be generated by new residential development; (f) the new School Facilities that will be required to serve such students; and (g) the cost of such School Facilities; and

WHEREAS, said Studies pertaining to the Statutory Developer Fees and to the capital facilities needs of the District were made available to the public as required by law before the Board considered at a regularly scheduled public meeting the Statutory Developer Fees; and

EXHIBIT F

WHEREAS, all required notices of the proposed Statutory Developer Fees have been given; and

WHEREAS, a Public Hearing was held at a regularly scheduled meeting of the Board of the District relating to the proposed Statutory Developer Fees; and

WHEREAS, Education Code Section 17621 provides that the adoption, increase or imposition of any fee, charge, dedication, or other requirement, pursuant to Education Code Section 17620 shall not be subject to Division 13 (commencing with Section 21000) of the Public Resources Code.

NOW, THEREFORE, THE SCHOOL BOARD OF THE LIVERMORE VALLEY JOINT UNIFIED SCHOOL DISTRICT DOES HEREBY RESOLVE, DETERMINE, AND ORDER AS FOLLOWS:

Section 1. That the Board accepts and adopts the Studies.

Section 2. That the Board finds that the purpose of the Statutory Developer Fees imposed upon new residential development is to fund the additional School Facilities required to serve the students generated by the new residential development upon which the Statutory Developer Fees are imposed.

Section 3. That the Board finds that the Statutory Developer Fees imposed on new residential development will be used only to finance those School Facilities described in the Study and related documents and that these School Facilities are required to serve the students generated by the new residential development within the District; and that the use of the Statutory Developer Fees will include construction or acquisition of additional School Facilities, remodeling existing School Facilities to add additional classrooms, and technology, and acquiring and installing additional portable classrooms and related School Facilities, with the specific location of new schools, remodeling of existing School Facilities, and additional portables to be determined based on the residence of the students being generated by such new residential development, as well as any required central administrative and support facilities, within the District.

Section 4. That the Board finds that there is a roughly proportional, reasonable relationship between the use of the Statutory Developer Fees and the new residential development within the District because the Statutory Developer Fees imposed on new residential development by this Resolution, will be used to fund School Facilities which will be used to serve the students generated by such new residential development.

Section 5. That the Board finds that there is a roughly proportional, reasonable relationship between the new residential development upon which the Statutory Developer Fees are imposed, and the need for additional School Facilities in the District because new students will be generated from new residential development within the District and there is not sufficient capacity in the existing School Facilities to accommodate all additional students.

Section 6. That the Board finds that the amount of the Statutory Developer Fees levied on new residential development as set forth in this Resolution is roughly proportional and reasonably related to, and does not exceed the cost of, providing the School Facilities required to serve the students generated by such new residential development within the District.

EXHIBIT F

Section 7. That the Board finds that the purpose of the Statutory Developer Fees imposed on new commercial/industrial development is to fund the additional School Facilities required to serve the students generated by the new commercial/industrial development upon which the Statutory Developer Fees are imposed.

Section 8. That the Board finds that the Statutory Developer Fees imposed on new commercial/industrial development (by category) will be used only to finance those School Facilities described in the Studies and related documents and that these School Facilities are required to serve the students generated by such new commercial/industrial development; and that the use of the Statutory Developer Fees will include construction or acquisition of additional School Facilities, remodeling existing School Facilities to add additional classrooms and technology, and acquiring and installing additional portable classrooms and related facilities, with the specific location of new schools, remodeling of existing School Facilities, and additional portables to be determined based on the residence of the students being generated by such new commercial/industrial development, as well as any required central administrative and support facilities within the District.

Section 9. That the Board finds that there is a roughly proportional, reasonable relationship between the use of the Statutory Developer Fees and new commercial/industrial development by category within the District because the Statutory Developer Fees imposed on commercial/industrial development by this Resolution will be used to fund School Facilities which will be used to serve the students generated by such new commercial/industrial development.

Section 10. That the Board finds that there is a roughly proportional, reasonable relationship between the new commercial/industrial development by category, upon which the Statutory Developer Fees are imposed, and the need for additional School Facilities in the District because new students will be generated from new commercial/industrial development within the District and the District does not have sufficient student capacity in the existing School Facilities to accommodate these anticipated students.

Section 11. That the Board finds that the amount of the Statutory Developer Fees levied on new commercial/industrial development by category as set forth in this Resolution is roughly proportional and reasonably related to and does not exceed the cost of providing the School Facilities required to serve the students generated by such new commercial/industrial development within the District.

Section 12. That the Board finds that a separate account has been established for the deposit of Statutory Developer Fees imposed on residential and commercial/industrial development and that said account has at all times since been separately maintained, except for temporary investments, from other funds of the District.

Section 13. That the Board finds that the funds of the account, described in Section 12, consisting of the proceeds of Statutory Developer Fees have been imposed for the purposes of constructing and reconstructing those School Facilities necessitated by new residential and commercial/industrial development, and thus, these funds may be expended for those purposes. The Statutory Developer Fees may also be expended by the District for the costs of performing any study or otherwise making the findings and determinations required under subdivisions (a), (b), and (d) of Section 66001 of the Government Code. In addition, the District may also retain, as appropriate, an amount not to exceed in any fiscal year, three percent (3%) of the fees collected in that fiscal year pursuant to Education Code Section 17620 for reimbursement of the administrative costs incurred by the District in collecting the Statutory Developer Fees.

EXHIBIT F

Section 14. That the Board hereby increases the Statutory Developer Fees as a condition of approval of new residential development projects and imposes the Statutory Developer Fees on such development projects in the following amounts:

A. $4.08 per square foot of assessable space for new single family detached residential development and new multifamily attached residential development, including new residential projects, manufactured homes and mobile homes as authorized under Education Code Section 17625, and including residential construction other than new construction where such construction results in an increase of assessable space, as defined in Government Code Section 65995, in excess of 500 square feet. However, these amounts shall not be imposed on any development project used exclusively for housing senior citizens, as described in Civil Code Section 51.3, or as described in Subdivision J of Section 1569.2 of the Health and Safety Code or paragraph 9 of subdivision (d) of Section 15432 of the Government Code or any mobile home or manufactured home that is located within a mobile home park, subdivision, cooperative or condominium for mobile homes limited to older persons as defined by the Federal Fair Housing Amendments of 1988.

B. $0.66 per square foot of assessable space for new residential development used exclusively for the housing of senior citizens, as described in Section 51.3 of the Civil Code or as described in subdivision J of Section 1569 of the Health and Safety Code or paragraph 9 of subdivision (d) of Section 15432 of the Government Code or any mobile home or manufactured home that is located within a mobile home park, subdivision, cooperative or condominium for mobile homes limited to older persons as defined by the Federal Fair Housing Amendments of 1988.

Section 15. That this Board hereby increases the Statutory Developer Fees as a condition of approval of new commercial/industrial development projects and levies the Statutory Developer Fees on such development projects in the following amounts per square foot of chargeable covered and enclosed space for the following categories of commercial/industrial development:

Retail and Services	$0.624
Office	$0.66
Research and Development	$0.66
Industrial/Warehouse/Manufacturing	$0.66
Hospitals	$0.66
Hotel/Motel	$0.316
Self-Storage	$0.018

Section 16. That the proceeds of the Statutory Developer Fees established pursuant to this Resolution shall continue to be deposited into that account identified in Section 12 of this Resolution, the proceeds of which shall be used exclusively for the purpose for which the Statutory Developer Fees are to be collected, including accomplishing any study, findings or determinations required by subdivisions (a), (b) and (d) of Section 66001 of the Government Code or retaining an amount not to exceed in any fiscal year, three percent (3%) of the fees collected in that fiscal year pursuant to Education Code Section 17620 for

reimbursement of the administrative costs incurred by the District in collecting the Statutory Developer Fees or in financing the described Study or in defending the imposition of Statutory Developer Fees.

Section 17. That the Superintendent, or her designee, is directed to cause a copy of this Resolution to be delivered to the building official of the Cities and Counties within the District's boundaries and the Office of Statewide Health Planning and Development ("OSHPD") along with a copy of all the supporting documentation referenced herein and a map of the District clearly indicating the boundaries thereof, advising the Cities, Counties, and OSHPD that new residential and commercial/industrial development is subject to the Statutory Developer Fees readopted pursuant to this Resolution and requesting that no building permit or approval for occupancy be issued by any of these entities for any new residential development project, mobile home, or manufactured home subject to the Statutory Developer Fees absent a certification from this District of compliance of such project with the requirements of the Statutory Developer Fees, nor that any building permit be issued for any non-residential development absent a certification from this District of compliance with the requirements of the applicable Statutory Developer Fees.

Section 18. That the Board hereby establishes a process that permits the party against whom the commercial/industrial Statutory Developer Fees are imposed, the opportunity for a hearing to appeal that imposition of Statutory Developer Fees for commercial/industrial development as required by Education Code Section 17621(e)(2). The appeal process is as follows:

A. Within ten (10) calendar days of being notified, in writing, (by personal delivery or deposit in the U.S. Mail) of the commercial/industrial Statutory Developer Fees to be imposed or paying the commercial/industrial Statutory Developer Fees, pursuant to Education Code Section 17620, a party shall file a written request for a hearing regarding the imposition of commercial/industrial Statutory Developer Fees. The party shall state in the written request the grounds for opposing the imposition of commercial/industrial Statutory Developer Fees and said written request shall be served by personal delivery or certified or registered mail to the Superintendent of the District.

B. The possible grounds for that appeal include, but are not limited to, the inaccuracy of including the project within the category pursuant to which the commercial/industrial Statutory Developer Fees are to be imposed, or that the employee generation or pupil generation factors utilized under the applicable category are inaccurate as applied to the project.

C. Within ten (10) calendar days of receipt of the written request for a hearing regarding the imposition of commercial/industrial Statutory Developer Fees, the Superintendent of the District, or her designee, shall give notice in writing of the date, place and time of the hearing to the party appealing the imposition of commercial/industrial Statutory Developer Fees. The Superintendent, or her designee, shall schedule and conduct said hearing within thirty (30) calendar days of receipt of the written request. The Superintendent, or her designee, shall render a written decision within ten (10) days following the hearing on the party's appeal and serve it by certified or registered mail to the last known address of the party.

D. The party against whom the commercial/industrial Statutory Developer Fees are imposed may appeal the Superintendent's, or her designee's, decision to the Board of the District.

E. The party appealing the Superintendent's, or her designee's decision, shall state in the written appeal the grounds for opposing the imposition of the commercial/industrial Statutory Developer Fees and said written appeal shall be served by personal delivery or certified or registered mail to the Superintendent of the District.

F. The possible grounds for that appeal to the Board of the District include, but are not limited to, the inaccuracy of including the project within the category pursuant to which the commercial/industrial Statutory Developer Fees are to be imposed, or that the employee generation or pupil generation factors utilized under the applicable category are inaccurate as applied to the project.

G. Within ten (10) calendar days of receipt of the written request for a hearing regarding the imposition of commercial/industrial Statutory Developer Fees, the Superintendent of the District, or her designee, shall give notice in writing of the date, place and time of the hearing to the party appealing the imposition of commercial/industrial Statutory Developer Fees. The Board of the District shall schedule and conduct said hearing at the next regular meeting of the Board, provided that the party is given notice at least five (5) working days prior to the regular meeting of the Board. The Board shall render a written decision within ten (10) days following the hearing on the party's appeal and serve the decision by certified or registered mail to the last known address of the party.

H. The party appealing the imposition of the commercial/industrial Statutory Developer Fees shall bear the burden of establishing that the commercial/industrial Statutory Developer Fees are improper.

Section 19. That the Superintendent is authorized to cause a certificate of compliance to be issued for each development project, mobile home and manufactured home for which there is compliance with the requirement for payment of the Statutory Developer Fees in the amount specified by this Resolution. In the event a certificate of compliance is issued for the payment of Statutory Developer Fees for a development project, mobile home or manufactured home and it is later determined that the statement or other representation made by an authorized party concerning the development project as to square footage is untrue, then such certificate shall automatically terminate, and the appropriate City shall be so notified.

Section 20. That no statement or provision set forth in this Resolution, or referred to therein shall be construed to repeal any preexisting fee previously imposed by the District on any residential or nonresidential development.

Section 21. That the District's Statutory Developer Fees will become effective sixty (60) days from the date of this Resolution unless a separate resolution increasing the fees immediately on an urgency basis is adopted by the Board.

Date: April 19, 2021

Subject: ADOPT the Tri-Valley Transportation Development Fee Construction Cost Index Annual Adjustment

---

BACKGROUND

The Joint Exercise of Powers Agreement (JEPA) for the Tri-Valley Transportation Development Fee (TVTDF) specifies that the TVTDF amounts are to be adjusted automatically as of July 1 of each year to reflect changes in regional construction costs. JEPA Section 3(D)(I) requires the TVTC adopt the adjustment by a simple majority.

DISCUSSION

The amount of the adjustment is based on the change in the "Construction Cost Index" (CCI) for the San Francisco Bay Area, as reported annually in the Engineering News Record (ENR). The December 2020 ENR CCI for the San Francisco Bay Area is **+3.2%**.

RECOMMENDATION

The TVTC Finance Committee recommends the TVTC adopt the Tri-Valley Transportation Development Fee Construction Cost Index Annual Adjustment and notify each TVTC member agency to collect the TVTDF rates as listed below starting **July 1, 2021**:

Single Family Residential	$5,057.00/Dwelling Unit (DU)
Multi-Family Residential	$3,484.00/DU
Office	$8.59/sq. ft. Gross Floor Area
Retail	$3.74/sq. ft. Gross Floor Area
Industrial	$5.00/sq. ft. Gross Floor Area
Other	$5,620.00/average am/pm peak hour trip
ADU/SDU	$0
Affordable Housing	$0

EXHIBIT F

TVTDF Historical Fee Rates

	2019	2020	2021
Single Family Residential (per DU)	$4,650.56	$4,901.00	$5,057.00
Multi-Family Residential (per DU)	$3,203.48	$3,376.00	$3,484.00
Office (per SF Gross Floor Area)	$7.90	$8.33	$8.59
Retail (per SF Gross Floor Area)	$3.41	$3.63	$3.74
Industrial (per SF Gross Floor Area)	$4.60	$4.85	$5.00
Other (average am/pm peak hour trip)	$5,167.00	$5,446.00	$5,620.00
Affordable Housing *	$0.00	$0.00	$0.00
ADU/SDU**	$0.00	$0.00	$0.00

FORM OF ESTOPPEL CERTIFICATE

Isabel Portola Owner, LLC
1875 Century Park East, Suite 1130
Los Angeles, CA 90067

RE: Estoppel Certificate – Development Agreement dated _____ by and between the City of Livermore, a California municipal corporation (the "City") and Isabel Portola Owner, LLC, a Delaware limited liability company qualified to do business in California ("Developer"), recorded on _____ as Document No. _____ in the official records of Alameda County, California (the "Development Agreement")

To Whom it May Concern:

Pursuant to the Development Agreement, request has been made of the undersigned to make this Estoppel Certificate to you in your capacity as [status of party requesting Estoppel Certificate], on behalf of the City, in connection with the [event triggering request for Estoppel Certificate] regarding that certain real property described in Recital C of the Development Agreement ("Property"). Capital terms used and not defined herein shall have the same meaning ascribed to them in the Development Agreement.

Pursuant to Section 31 of the Development Agreement, the undersigned, on behalf of the City, certifies as follows:

1. The Development Agreement as defined herein is in full force and effect and has not been amended, modified or assigned, either orally or in writing; and

2. There exists no material default in the performance of the obligations set forth in the Development Agreement, and any and all development obligations affecting the Property have been, to date, satisfied in full.

The undersigned understands that you are relying on this Estoppel Certificate in connection with [event triggering request for Estoppel Certificate]. The statements set forth herein shall be binding only to the extent required by the Development Agreement and for no other purpose and to no other persons or entities.

The City of Livermore, a municipal corporation

EXHIBIT H

Introduction

In addition to terms defined elsewhere in the Agreement and its Exhibits, this Exhibit H identifies definitions for convenience.

Definitions

1. "Affordable Housing" means the Low Income Housing Units, the Moderate Income Rental Units, the Median Income Rental Units, the Moderate Income For- Sale Units, and the Median Income For-Sale Units, collectively, as these terms are defined herein.

2. "Commercial Blocks" means Planning Areas C1-B, C2-A, and S1, as shown on Exhibit B (Development Plans).

3. "Commercial Component of Planning Area S1" means a first-floor commercial tenant space of approximately 23,924 square feet as described in Exhibit B (Development Plans).

4. "Commercial Component of Planning Area C2-A" means a first-floor commercial tenant space of at least 27,918 square feet as described in Exhibit B (Concept Design Plan).

5. "Community Benefit Fund" means the City's Community Benefit Fund with the purpose of building a vibrant and amenity-rich community consistent with Isabel Neighborhood Specific Plan goals and Strategic Plan Goals.

6. "Enhanced Paving" means decorative surface designs with greater detail than typical, including unique colors, materials, patterns, etc. Examples of such paving include decorative stamped asphalt, scored asphalt, inlaid thermoplastic, etc., to be located along Main Street and at primary Project entrance points.

7. "Flexible Co-Workspace" means any office use that provides a communal workspace or shared facilities for multiple employers, employees, or users. Such communal or shared space may consist of any of the following: offices, breakrooms, kitchens, restrooms, and any other rooms necessary to facilitate shared office work.

8. "Food Hall" means a marketplace with multiple vendors, with a focus on local vendors or selling locally-sourced food or beverage products. At least 8,000 gross square feet of commercial building space shall be occupied by vendor within the Food Hall that sell fresh, unprepared foods such as meat, fish, dairy, grains, fruit, vegetables, and related items,. The Director may revise the square footage limit upon the written request of the Developer.

9. "Fully Furnished" means the provision of seating, tables, landscape, hardscape, walkways, public art, and other amenities for Outdoor Plaza Areas in Planning Areas C1-C, C2-C, and TS, as identified in Recital F and Exhibit B (Development Plans).

10. "Knox Box" means a mutual locking mechanism installed on building entries to provide 24-

hour fire and law enforcement access to the building.

11. "LARPD" means the Livermore Area Recreation and Park District.

12. "Landing Area" is as described in Exhibit C

13. "Landscaping" means any tree, shrub, or groundcover installed as part of the Phase I or Phase II Project Infrastructure.

14. "Low Income Housing Amount" is as defined in Exhibit D.

15. "Low Income Housing Cash Payment" is as defined in Exhibit D.

16. "Low Income Housing Rental Units" means the Project's units of "low income" multi-family rental housing reserved for "Very Low Income Household" rental housing, as the term is defined in Health & Safety Code, Section 50105, and the units reserved for "Lower Income Household" rental housing, as the term is defined in Health & Safety Code, Section 50079.5.

17. "LIHTC Financing Conditions" is as defined in Exhibit D.

18. "Permanent Commercial Grocer" means a business that generally conforms to NAICS code 445110, "Supermarkets and Other Grocery (except Convenience) Stores." Such establishments are generally known as food markets and grocery stores and primarily engaged in retailing a general line of groceries and sundries and prepared food.

19. "Phase I Project Infrastructure" means all of the following components as depicted in Exhibit C:

    a. *"Primary Internal Improvements"*:

        i. The construction of the first lift of pavement for the Primary Internal Streets, including sidewalks, crosswalks and intersections, and Enhanced Paving, as shown in Exhibit B.

        ii. Main arterial sewer, water, storm water, and joint trench conduit along Primary Internal Streets, as identified in Exhibits B.

        iii. Delivery of mass graded pads within Planning Areas.

        iv. Utilities (sewer, storm drain, water and joint trench conduit only) stubbed to Planning Area S3A, as identified on the VTTM and depicted in Exhibit B.

        v. Delivery of paved, 15,000 square foot temporary commercial activation space with temporary water and power, as described in Exhibit E.

        vi. Sidewalk, curb, gutter, street trees, irrigation (water and power) on Primary Internal Streets and Project Frontage.

        vii. Bioretention areas on Primary Internal Streets.

EXHIBIT H

viii. Trail corridor in the southern side of Planning Areas S1, S2 and S4, providing a pedestrian connection along Isabel Avenue between Gateway Drive and Shea Center Drive.

ix. Street Lighting on Primary Internal Streets.

b. *"Offsite Improvements"*

i. Traffic signal at the intersection of Isabel Avenue and Gateway Avenue.

ii. Traffic signal at the intersection of Isabel Avenue and Street A, including Enhanced Paving in the intersection and in four- legged crosswalks.

iii. Traffic signal at the intersection of Isabel Avenue and Gateway Avenue, including enhanced intersection paving and four-legged crosswalks with enhanced paving.

iv. Traffic signal at the intersection of Portola Avenue and Main.

v. Street, including enhanced intersection paving and four-legged crosswalks with enhanced paving.

vi. Isabel Avenue center median improvements, including curb, planter, landscaping, street trees, irrigation (water and power) connected to the City's centralized irrigation system, etc. from Portola Avenue to Interstate-580 interchange up to the Caltrans Right-of-Way.

vii. Caltrans Embankment Landscaping;

viii. Enhanced at-grade crossing at intersection of Gateway Avenue and Isabel Avenue.

1. The enhanced at grade crossing shall include bulb outs, center median refuge, flashing beacons, or any other features to enhance pedestrian safety, comfort, and visibility.

c. "*Bus Stop Improvements*"

i. Bus stop located on the easternmost northbound lane of Highway 84/Isabel Ave, directly to the north of Street A, as identified in Exhibit B (Development Plans).

ii. Bus stop located on the westernmost southbound lane of Highway 84/Isabel Ave, directly to the south of Street A, as identified in Exhibit B (Development Plans).

iii. Bus Stop located on the westbound lane of Portola Avenue, within 150 east or west of the Cayetano Park entrance.

iv. Concrete pad and shelter for the existing bus stop located on the south side

of Portola Avenue at the Montage Drive intersection.

d. *"Bike Lane Improvements"*

i. Class IV bike lane on the south side of Portola Avenue, aligning from the Project's western property boundary to Isabel Avenue.

ii. Class IV bike lane on the southbound Isabel Avenue frontage between Portola Avenue and the Interstate 580 interchange up to the Caltrans Right-of-Way.

iii. Class IV bike lane on south side of Portola Ave from Collier Canyon Road to the Project's western property boundary.

iv. Class IV bike lane on north side of Portola Avenue from Campus Hill Drive to Montage Drive.

v. Class IV bike lane on the north side of Portola Avenue from Collier Canyon Road to Copper Crest Common.

vi. Class IV bike lane on the north side of Portola Avenue from the Cayetano Park entrance to Campus Hill Drive.

vii. Class IV bike lanes on the east and west sides of Campus Hill Drive, from Portola Avenue to Heligan Lane, subject to the Director's determination if the bike lane will be Class IV or Class II as set forth Exhibit C.

viii. Separated bike islands at the southwest, northwest, and northeast corners of the Isabel Avenue/Portola Avenue intersection, as shown in the Development Plans (Attachment B).

ix. Class III bike lane along Gateway Avenue from the western project boundary to Collier Canyon Road.

x. Class II bike lane along the northbound Shea Center Drive frontage.

e. *"Law Enforcement Assets – Perimeter"*

i. All Vehicle License Plate Reader and CCTV cameras identified as "Perimeter Assets" on Exhibit R.

ii. All necessary fiber optic and electrical connections to all required Vehicle License Plate Reader and CCVT cameras.

20. "Phase II Project Infrastructure" means all of the following components as depicted in Exhibit C:

a. *Final lift of pavement for Primary Internal Streets;*

b. *Neighborhood Park in Planning Area N3-B;*

EXHIBIT H

c. *Town Square in Planning Area TS;*

d. *Pocket Plazas in Planning Areas C1-C and C2-C;*

e. *Pedestrian lighting on Primary Internal Streets; and*

f. *"Law Enforcement Assets – Interior".*

i. All CCTV cameras identified as "Interior Assets" on Exhibit R.

ii. Knox Boxes or other mutual access tools installed at each exit stairwell of each Commercial Block, granting access to both Livermore Fire Department and Livermore Police Department personnel, as feasible.

21. "Primary Internal Street(s)" means each of the Project's public streets that serve Subareas and connect to existing public streets, including Main Street, Gateway Avenue, Street A, Street B, and Street C, as identified on Exhibit B (Development Plans).

22. "Social Opportunity Endowment (SOE) Fund" means the City's Social Opportunity Endowment Fund with the purposes of providing a long-term stable funding source for the delivery of quality human services to low-income city residents.

23. "Springtown Open Space Improvements" (CIP No. 202319) means the new three-four-acre park within the Springtown Open Space between the Springtown Library and Springtown Homeowner Association facilities. The park will include the following:

a. *an active play area,*

b. *shade structures and picnic benches, and*

c. *a multipurpose field and a community garden.*

24. "Temporary Commercial Activation" is as defined below and in Exhibit E.

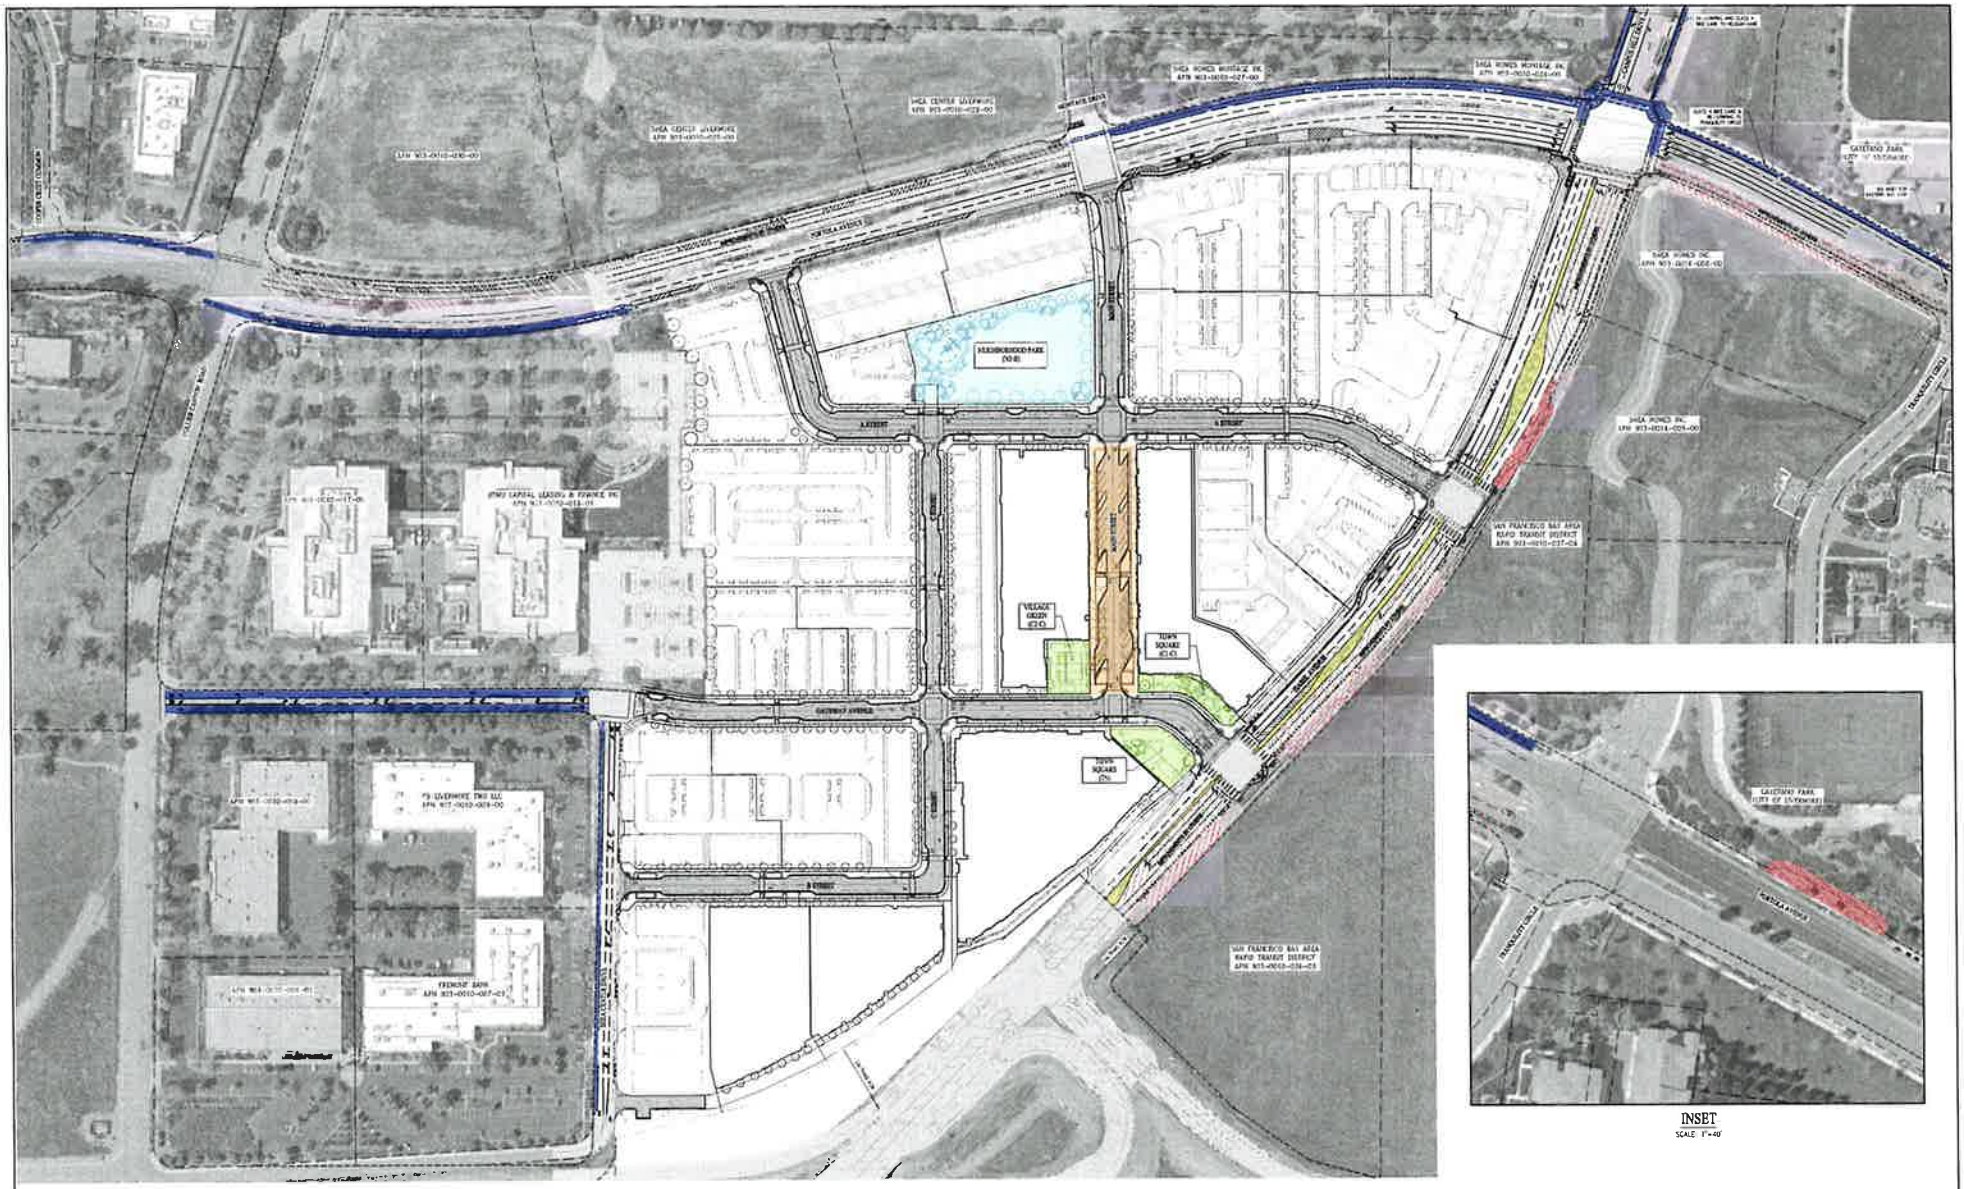
a. Shall mean an area of no less than 15,000 square feet in the aggregate that is located adjacent to and easily accessible from Main Street for use as temporary commercial space. The Temporary Commercial Activation shall include the installation of asphalt, concrete, and/or other landscape and hardscape elements, lighting, temporary trees, temporary power, temporary water, temporary restroom and sanitation facilities, temporary parking, temporary seating, and other elements necessary to facilitate commercial activity and use by the public, subject to Community Development Department Director approval, but shall not require the construction of vertical structures or buildings.

b. *Uses*. The type of uses and events allowable as Temporary Commercial Activation shall include but are not limited to: sale of fresh and prepared food, drink and related products ("Temporary Commercial Operator"), which may include mobile food vendors; specialty goods retail; general commercial services provided to the general public; community events such as live music, cultural arts performances, farmer's

markets, outdoor films, or similar community event uses.

25. "Temp Power" means temporary power is provided to the Planning Area authorized for temporary electrical service.

26. "Temp Water" means water service available to the Planning Area authorized for temporary use for fire suppression purposes.



27. "TIF" means traffic impact fees.

28. "Tolling Agreement" is as defined in Section 37.

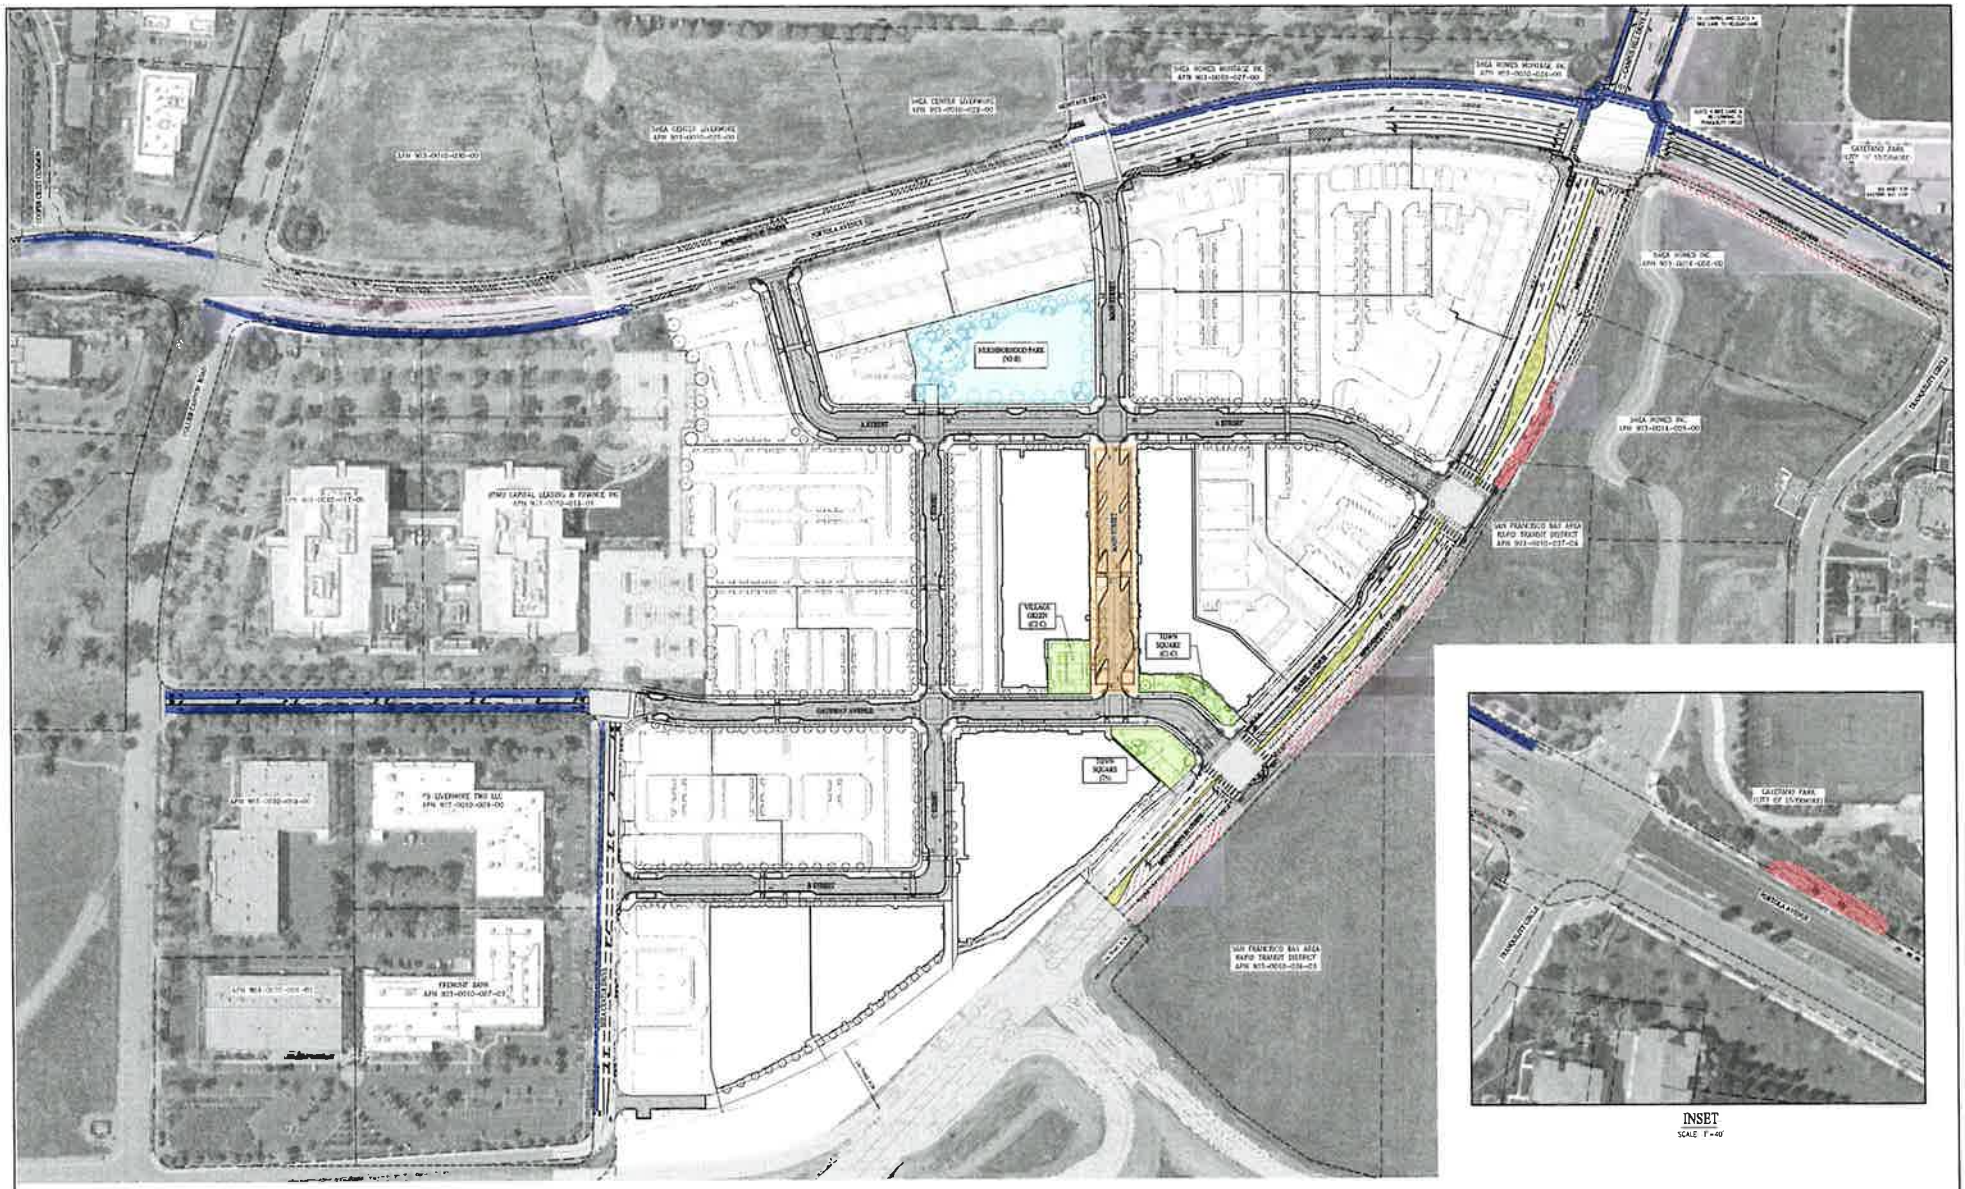
Community Facilities District (CFD) Provisions

A. General Terms

1. Formation of the New Facilities CFD**.** If Developer submits a written request to the City Manager to establish the New Facilities CFD during the term of the Development Agreement, the City Manager shall, within sixty (60) days, notify the Developer in writing whether the City, subject to City Council approval, is willing to establish the New Facilities CFD in accordance with Section C of this Exhibit J or prefers the Developer to work with a joint powers authority to establish the CFD in accordance with Section D of this Exhibit J.

2. Annexation of the Property into the Isabel Maintenance CFD. Developer shall annex the Property into City of Livermore Community Facilities District No. 2023-1 (Isabel Neighborhood Specific Plan Services) ("**Isabel Maintenance CFD**") in accordance with Section B of this Exhibit J.



3. Tax Rate Limitation. The Total Tax Obligation (as defined below) for each residential unit in the Project as a result of the annexation of the Property to the Isabel Maintenance CFD and the formation of the New Facilities CFD, calculated at the time of the Resolution of Intention for the New Facilities CFD and based upon the expected or assigned special tax rates (and not on the back-up special tax rates) for the New Facilities CFD and the Isabel Maintenance CFD special tax rates set forth in Section B of this Exhibit J, shall be no greater than one and eighty-six hundredths percent (1.86%) of the anticipated sales price of such residential unit ("**Tax Rate Limitation**"). The anticipated sales price of a residential unit may be based on reasonable projections of value over time proposed by the Developer and acceptable to the City.

For purposes of this Section, the term "**Total Tax Obligation**" means, with respect to a residential unit at the time of calculation, the sum of: (a) the ad valorem taxes actually levied or projected to be levied if the residential unit were developed at the time of calculation; (b) the Maximum Facilities Special Tax Rates levied or projected to be levied in the New Facilities CFD if the residential unit were developed at the time of calculation; (c) the maximum Isabel Maintenance CFD special tax rates; and (d) all other special taxes (based on assigned special tax rates) or assessments secured by a lien on the residential unit levied or projected to be levied if the residential unit was developed at the time of calculation. Homeowner's association fees shall not be included in the calculation of the Total Tax Obligation.

4. Disclosure to Property Owners. Developer agrees to provide, or cause to be provided, the disclosure to purchasers of property in the Project related to the Isabel Maintenance CFD and the New Facilities CFD in the manner and at the time required by the Mello Roos Act.

5. Limitation on Other Land-Secured Financing Districts. Other than the Isabel Maintenance CFD, the New Facilities CFD and one or more citywide special tax or assessment districts, City shall not form any additional land-secured financing district over any portion of the property in the Project without Developer's written consent which may be given in its sole discretion.

EXHIBIT J

B. Formation of the Isabel Maintenance CFD

1. Timing for Annexation to the Isabel Maintenance CFD. Prior to recordation of the initial final map for the Project], Developer and City shall complete annexation of the Property into the Isabel Maintenance CFD. The parties agree that the steps required to complete the annexation of the Property into the Isabel Maintenance CFD shall include (a) execution and delivery by the Developer of a Unanimous Approval prepared by the City's bond counsel and special tax consultant, (b) approval of the annexation by the City Council and (c) recordation of a notice of special tax lien in accordance with the Mello Roos Act.

2. Isabel Maintenance CFD Special Tax Rates. The maximum special tax rates applicable to the Property pursuant to the rate and method of apportionment for the Isabel Maintenance CFD ("Isabel Maintenance CFD RMA") shall be not less than the following:

ISABEL MAINTENANCE CFD MAXIMUM SPECIAL TAX RATES
FISCAL YEAR 2024/25*

Land Use Category	Maximum Special Tax Rate	Per
Residential Property	$434.74	Unit
Non-Residential Property	0.00	BSF
Mixed-Use Property	See below	
Accessory Dwelling Unit	See below	

*On July 1 of each Fiscal Year, commencing on July 1, 2025, the Maximum Special Tax rates for the Property 1 shall be increased by the February annual percentage change in the Consumer Price Index for all Urban Consumers ("CPI-U") for the San Francisco-Oakland- Hayward, CA, plus one percent (1.0%). If the percentage change in the CPI-U is negative, the Maximum Special Tax rates shall not be decreased. In the event the index described above ceases to be published, it shall be replaced by another reasonably comparable index, as determined by the City.

3. Perpetual Term of Isabel Maintenance CFD. Developer acknowledges that the Isabel Maintenance CFD RMA shall authorize the City to levy special taxes on the Property for a perpetual term.

4. Increased Isabel Maintenance CFD Special Taxes Following Delinquencies. Consistent with Section D of the Isabel Maintenance CFD RMA, under no circumstances will the special taxes levied by the City for the Isabel Maintenance CFD on any taxable parcel in the Project be increased by more than 10% as a consequence of delinquency or default in the payment of special taxes levied by the City for the Isabel Maintenance CFD by the owner of any other taxable parcel in the Isabel Maintenance CFD.

C. Formation of the New Facilities CFD by the City

1. Petition for the New Facilities CFD Formed by the City. At any time during the term of the Development Agreement, but only after annexation of the Property into the Isabel

Maintenance CFD is complete and after the City Manager has notified Developer that the City wishes to establish the New Facilities CFD, Developer may submit a petition to City in accordance with the Mello Roos Act to establish the New Facilities CFD over the Property. In its petition, Developer may include proposed specifications for the New Facilities CFD, including (subject to the Tax Rate Limitation for residential units) the maximum rates ("New Facilities CFD Special Tax Rates") of the special taxes to be levied by the City for the New Facilities CFD ("New Facilities CFD Special Taxes"), the term of the New Facilities CFD, the New Facilities CFD boundaries, and any proposed tax zones. Developer's proposed specifications will be based on Developer's development plans, market analysis, and required preferences, but in all cases will be subject to the Development Agreement and the City's goals and policies for community facilities districts adopted in accordance with the Mello Roos Act ("Goals and Policies"). Unless otherwise agreed by the City and the Developer in connection with the formation of the New Facilities CFD, the New Facilities CFD will not include any improvement areas. Following City's receipt of a petition, Developer and City will meet with City's public financing consultants to determine reasonable and appropriate terms of the proposed New Facilities CFD that are consistent with this Exhibit J and the City's goals in policies for community facilities districts in effect as of the date of this Agreement.

2. Commencement of Formation of New Facilities CFD. Within ninety (90) days following City's receipt of a petition and a reasonable deposit required by Section 53318 of the Mello Roos Act, the City Council shall adopt one or more resolutions of intention to form the New Facilities CFD consistent with the petition. Formation of the New Facilities CFD shall be subject to City Council approval after holding a public hearing in accordance with the Mello Roos Act. The resolutions of intention for the New Facilities CFD shall include a rate and method of apportionment of special tax (the "New Facilities CFD RMA") and authorization to issue one or more series of special tax bonds ("New Facilities CFD Bonds"). Upon City Council approval of the New Facilities CFD and a favorable two-thirds vote in a special tax election in accordance with the Mello Roos Act, the City shall record a notice of special tax lien required by Section 3114.5 of the California Streets and Highways Code (the "Notice of Special Tax Lien") against each taxable parcel within the New Facilities CFD.

3. City Manager Obligations. Subsequent to City Council adoption of the Resolution(s) of Intention, the City Manager shall recommend the City Council approve a Resolution of Formation and shall fully support the formation of a New Facilities CFD for the Project, as described in this Exhibit.

4. Cooperation. The New Facilities CFD RMA shall be consistent with the Developer's petition so long as such petition is consistent with this Development Agreement and the Goals and Policies. Developer and City will each use good faith reasonable efforts at all times to furnish timely to the other, or to obtain and then furnish to the other, any information necessary to develop the New Facilities CFD RMA, such as Developer's plans for the types, sizes, numbers, and timing for construction of buildings within the New Facilities CFD.

5. Maximum New Facilities CFD Special Tax Rates for Developed Property. The New Facilities CFD RMA will specify the maximum New Facilities CFD Special Tax rates (the "Maximum New Facilities CFD Special Tax Rates") for Developed Property (property for

which a building permit has been issued) within the New Facilities CFD. The Maximum New Facilities CFD Special Tax Rates for Developed Property may vary based on sizes, densities, types of buildings to be constructed, and other relevant factors. The New Facilities CFD RMA will establish Maximum New Facilities CFD Special Tax Rates assuming that any New Facilities CFD Bonds issued will have a minimum debt service coverage- ratio of one hundred ten percent (110%).

6. Term of the New Facilities CFD and Bonds. The New Facilities CFD shall have a term of not less than thirty-five (35) years following the initial fiscal year in which the New Facilities CFD Special Taxes are levied. The City and the Developer expect that the New Facilities CFD Bonds will be structured with a term not to exceed thirty-five (35) years.

7. No Requirement for Credit Enhancements. The City shall not obligate the Developer to provide credit enhancements pertaining to the New Facilities CFD. Nothing in this paragraph shall be deemed to prohibit the City from requiring capitalized interest for any New Facilities CFD Bonds not to exceed eighteen (18) months, a value-to-burden ratio for the New Facilities CFD Bonds of greater than three-to-one or the funding of one or more debt service reserve funds for the New Facilities CFD Bonds.

8. Compliance with Tax Rate Limitation. The Maximum New Facilities CFD Special Tax Rates will be set so that the Total Tax Obligation on any residential unit within the New Facilities CFD will comply with the Tax Rate Limitation.

9. Escalation of Maximum New Facilities CFD Special Tax Rates. If requested by the Developer in its petition for the New Facilities CFD, the Maximum New Facilities CFD Special Tax Rates shall increase by two percent (2%) per year.

10. Use of Special Taxes For Direct Payment of Eligible Facilities.

    a. Developer and City agree that the New Facilities CFD RMA and the New Facilities CFD formation proceedings shall provide that Eligible Facilities may be financed directly on a pay-as-you-go basis from Remainder Taxes (as defined below) both before and after the issuance of CFD Bonds, but the Developer (or its assigns) shall not be entitled to pay-as-you-go financing for longer than 10 years after the initial levy of New Facilities CFD Special Taxes in the New Facilities CFD ("pay-as-you-go period"). Accordingly, the New Facilities CFD RMA will provide that Remainder Taxes may be used to directly finance Eligible Facilities for the pay-as-you-go period. For the New Facilities CFD, annually, on the day following each Principal Payment Date (as defined below), all Remainder Taxes will be deposited in the applicable Remainder Taxes Project Account (as defined below).

        i. The term "Remainder Taxes" means, in each year, as of the day following the Principal Payment Date, all New Facilities CFD Special Taxes collected prior to such date in excess of the total of: (a) debt service on the outstanding New Facilities CFD Bonds in the current calendar year, if any; (b) priority and any other reasonable administrative costs that are payable by City or expected to be payable by City prior to the receipt of additional New Facilities CFD Special Tax proceeds; and (c) amounts levied to replenish

any reserve fund as of the Principal Payment Date, including amounts reserved for reasonable anticipated delinquencies, if any.

ii. The term "Principal Payment Date" means, either before or after New Facilities CFD Bonds are issued, September 1 of each year, regardless of whether principal payments are actually due in any particular year.

iii. The term "Remainder Taxes Project Account" means a separate account created by City for the New Facilities CFD and maintained by City to hold all Remainder Taxes of the New Facilities CFD to be used for financing Eligible Facilities.

b. *No Pledge for New Facilities CFD Debt Service.* Remainder Taxes deposited in the Remainder Taxes Project Account will not be deemed or construed to be pledged for payment of debt service on any New Facilities CFD Bonds, and neither Developer nor any other person will have the right to demand or require that City or Fiscal Agent, as applicable, use funds in the Remainder Taxes Project Account to pay debt service, although the City may reserve the right in the applicable indenture to use amounts in the Remainder Taxes Project Account to pay administrative costs, debt service on any New Facilities CFD Bonds or replenishment of debt service reserve funds for the New Facilities CFD Bonds.

11. Prepayment. The New Facilities CFD RMA will include provisions allowing a property owner within the New Facilities CFD to prepay its New Facilities CFD Special Tax obligation as long as it is not in default in the payment of New Facilities CFD Special Taxes. Prepaid New Facilities CFD Special Taxes (defined below) will be placed in a segregated account in accordance with the applicable indenture. The New Facilities CFD RMA and the indenture will specify the use of prepaid New Facilities CFD Special Taxes. Before New Facilities CFD Bonds are issued, all prepayment amounts other than those required for administrative expenses shall be used to finance Eligible Facilities ("Prepaid New Facilities CFD Special Taxes").

12. New Facilities CFD Bonds. Subject to approval of the City Council, the City, on behalf of the New Facilities CFD, intends to issue one or more series of New Facilities CFD Bonds for the purposes set forth in this Exhibit J, but only upon the written request of Developer. The City and Developer intend for the proceeds of any such New Facilities CFD Bonds to refund all outstanding bonds of the Existing CFD, pay the prepayment penalty for those bonds, allow for the release of the lien of the Existing CFD from the Property, and finance the Eligible Facilities.

a. *Underwriting.* The City shall select its financing team for any New Facilities CFD Bonds, including bond counsel, disclosure counsel, municipal advisor, underwriter and special tax consultant.

b. *Timing of Sale.* Developer has informed the City that it intends to ask the City to issue the New Facilities CFD Bonds as soon as possible after the Property in the CFD has achieved a 3:1 value-to-lien ratio. Notwithstanding the foregoing, the parties have agreed that (i) the New Facilities CFD Bonds shall be sold no sooner than the

issuance of any applicable state and federal environmental and cultural permits for the Project (unless otherwise mutually agreed to by the Parties) and (ii) after consulting with the Developer, the City shall determine the timing for the issuance of the New Facilities CFD Bonds, in consultation with its municipal advisor, the underwriter and the other financing participants. The City has informed the Developer that it intends to issue the New Facilities CFD Bonds in a manner that is consistent with sound municipal finance practices.

c. *New Facilities CFD Bonds Temporarily Excused.* The City will be authorized to temporarily suspend the issuance of any New Facilities CFD Bonds during the time in which:

   i. Developer is in default in the payment of any ad valorem tax, New Facilities CFD Special Taxes or Isabel Maintenance CFD special taxes levied on any taxable parcel it then owns in the Project;

   ii. Developer is in default under the Development Agreement;

   iii. Developer fails to cooperate reasonably with the City as necessary to implement the issuance of the New Facilities CFD Bonds in accordance with this Exhibit J;

   iv. In the judgment of the City, after consultation with Developer, and based upon the purposes set forth in this Exhibit J and advice of City staff and consultants, market conditions or conditions affecting the property in the Project (such as tax delinquencies, assessment appeals, damage or destruction of improvements, litigation or proceedings, inquiries or investigations, at law or in equity, or by or before any court, governmental agency, public board or body) make it fiscally imprudent or infeasible to incur the requested indebtedness at the time;

   v. There is an action, suit, proceeding, inquiry or investigation, at law or in equity, or by or before any court, governmental agency, public board or body, pending or threatened against the City or the New Facilities CFD: (A) wherein an unfavorable decision, ruling or finding would adversely affect the existence of the City or the New Facilities CFD or the title of any official of the City to such person's office; (B) seeking to restrain or enjoin the issuance, sale or delivery of the New Facilities CFD Bonds; (C) in any way contesting or affecting the validity or enforceability of the indenture or the New Facilities CFD Bonds; (D) contesting in any way the completeness or accuracy of the Official Statement related to the New Facilities CFD Bonds; or (E) contesting the power of the City or its authority with respect to the New Facilities CFD Bonds or the applicable indenture, or there is any basis for any such action, suit, proceeding, inquiry or investigation, wherein an unfavorable decision, ruling or finding would materially adversely affect the validity of the indenture or the authorization, execution, delivery or performance by the City of the New Facilities CFD Bonds, or the related indenture; or

vi. the underwriter for any issue of New Facilities CFD Bonds exercises any right to cancel its obligation to purchase the New Facilities CFD Bonds during the occurrence and continuation of events specified in its bond purchase agreement.

13. Joint Community Facilities Agreements. The Mello Roos Act requires that the City Council enter into one or more joint community facilities agreements with other governmental entities if any of those governmental entities will own or operate any of the Eligible Facilities to be financed by the New Facilities CFD. The Developer has informed the City that joint community facilities agreements may be required between the City and, among other agencies, the Livermore Area Recreation and Parks District, Alameda County Zone 7 Water Agency, Tri-Valley Transportation JPA, and Livermore Joint Unified School District. City and Developer agree that they will take all reasonable steps to procure the authorization and execution of any required joint community facilities agreements with other governmental entities before the issuance of any New Facilities CFD Bonds that will finance the construction or acquisition of Eligible Facilities that will be owned or operated by such other governmental entities. Developer acknowledges and agrees that the ability of City to enter into joint community facilities agreements is subject to the discretion of the other governmental entities.

14. Miscellaneous New Facilities CFD Provisions

a. *Reserve Fund Earnings.* The indenture for each issue of New Facilities CFD Bonds will provide that earnings on any reserve fund that are not then needed to replenish the reserve fund to the reserve requirement will be transferred to the debt service fund held by the Fiscal Agent under the indenture.

b. *Authorization of Reimbursements.* City will take all actions necessary to satisfy Section 53314.9 of the Government Code or any similar statute subsequently enacted to use New Facilities CFD Bond proceeds and Remainder Taxes (during the pay-as-you-go period) to reimburse Developer for: (i) New Facilities CFD formation and New Facilities CFD Bond issuance deposits and (ii) advance funding of Eligible Facilities or costs.

c. *Acquisition Agreement.* Contemporaneously with the formation of the New Facilities CFD, Developer and City will execute an acquisition and funding agreement (the "Acquisition Agreement") that will apply to the acquisition and construction of the Eligible Facilities for the New Facilities CFD. The Acquisition Agreements shall contain an acknowledgment by City and Developer as to the following:

i. Developer may construct Eligible Facilities before New Facilities CFD Bond proceeds, Remainder Taxes, and Prepaid Special Taxes (herein, "Funding Sources") that will be used to acquire them are available;

ii. City will inspect Eligible Facilities and process payment requests even if Funding Sources for the amount of pending payment requests are not then sufficient to satisfy them in full;

iii. Eligible Facilities may be conveyed to and accepted by City or other

governmental entity before the applicable payment requests are paid in full;

iv. If City or other governmental entity accepts Eligible Facilities before the applicable payment requests are paid in full, the unpaid balance will be paid when sufficient Funding Sources become available, and the Acquisition Agreement will provide that the applicable payment requests for Eligible Facilities accepted by City or other governmental entity may be paid: (A) in any number of installments as Funding Sources become available; and (B) irrespective of the length of time payment is deferred; and

v. Developer's conveyance or dedication of Eligible Facilities to City or other governmental entity before the availability of Funding Sources to acquire the Eligible Facilities is not a dedication or gift, or a waiver of Developer's right to payment of Eligible Facilities under this Development Agreement or any Acquisition Agreement or joint community facilities district executed by City and Developer.

d. *Initial and Continuing Disclosure.* In connection with each issue of New Facilities CFD Bonds, Developer shall provide customary disclosure about Developer and its development and financing plans. In addition, Developer shall comply with all of its obligations under any continuing disclosure agreement it executes in connection with the offering and sale of any New Facilities CFD Bonds. Developer acknowledges that a condition to the issuance of any Bonds may be Developer's execution of a continuing disclosure agreement.

e. *Administrative Expenses.* In determining coverage requirements for any reason (e.g., bond sizing, parity bonds, etc.), City shall prioritize the payment of administrative costs for the New Facilities CFD.

f. *Eligible Facilities.* The New Facilities CFD shall be authorized to finance all or any portion of the items described in Section 53313.5 of the Mello Roos Act that are required to be built in connection with development of the Project at the time of formation of the New Facilities CFD, including, but not limited to street and transit improvements, including grading, paving, curbs and gutters, sidewalks, street signalization and signage, street lights and landscaping related thereto, storm drain facilities, sewer facilities, electric power facilities, including transmission lines, backbone cable, conduits and transformers, school facilities and land, rights-of-way and easements necessary for any of such facilities, the Master Project Infrastructure and the Bike Lane (collectively, the "Eligible Facilities"). To the extent permitted by the Mello Roos Act, the Eligible Facilities may be financed directly or by financing Impact Fees. The City may issue any New Facilities CFD Bonds on a federally taxable basis to finance Impact Fees in its sole discretion.

15. Indemnification; Waiver. The Developer agrees to indemnify, defend, protect, and hold harmless the City, the New Facilities CFD and the City's consultants, Councilmembers, officers, employees and agents, from and against any and all claims, losses, damage, expenses and liability of every kind, nature, and description, directly or indirectly arising from the City's formation of the New Facilities CFD, the levy of the New Facilities CFD

Special Taxes, the execution of any joint community facilities agreements, the issuance of any New Facilities CFD Bonds or any other actions related to the New Facilities CFD.

D. Formation of the New Facilities CFD by a Joint Powers Authority

1. Petition for a Joint Powers Authority to Form the New Facilities CFD. At any time during the term of the Development Agreement, but only after annexation of the Property into the Isabel Maintenance CFD is complete and after the City Manager has notified Developer that the City does not wish to establish the New Facilities CFD, Developer may submit a petition to a joint powers authority acceptable to the City in accordance with the Mello Roos Act to establish the New Facilities CFD over the Property.

2. City Manager Obligations. Subsequent to the Developer's Joint Powers Authority petition, the City Manager shall recommend the City Council approve a Resolution authorizing the JPA to establish the New Facilities CFD and approving an Acquisition Agreement between the City and the Developer and shall fully support the formation of a New Facilities CFD for the Project, as described in this Exhibit.

3. City Council Approval. Concurrently with submitting the petition to the joint powers authority pursuant to the preceding subsection, the Developer shall submit a written request to the City to (a) authorize the joint powers authority to establish the New Facilities CFD, levy special taxes on taxable property in the New Facilities CFD and issue special tax bonds for the New Facilities CFD and (b) approve an Acquisition Agreement between the City and the Developer.

4. Limitations on the New Facilities CFD Formed by a Joint Powers Authority.

    a. Any New Facilities CFD formed by a joint powers authority shall be authorized to finance only Eligible Facilities and Impact Fees, and the City hereby reserves the discretion to direct the joint powers authority to finance any such Eligible Facilities or Impact Fees on a federally taxable basis.

    b. The Maximum New Facilities CFD Special Tax Rates will be set by the Developer and the joint powers authority so that the Total Tax Obligation on any residential unit within the New Facilities CFD will comply with the Tax Rate Limitation.

    c. The New Facilities CFD RMA adopted by the joint powers authority shall provide that Eligible Facilities may be financed directly on a pay-as-you-go basis from Remainder Taxes both before and after the issuance of New Facilities CFD Bonds, subject to the limitations on the pay-as-you-go-period set forth in Section C.

    d. The Developer agrees to indemnify, defend, protect, and hold harmless the City, the New Facilities CFD and the City's consultants, Councilmembers, officers, employees and agents, from and against any and all claims, losses, damage, expenses and liability of every kind, nature, and description, directly or indirectly arising from the New Facilities CFD formed by the joint powers authority.

Low Income For Sale Housing Agreement between City of Livermore and [Developer]

This Low Income For Sale Housing Agreement ("Agreement") is entered into on_____, _____, 2024 by and between the City of Livermore, a municipal corporation ("City"), and _____ ("Developer"), with reference to the following facts:

RECITALS

A. A serious shortage of affordable housing exists in the City. Of particular concern is the shortage of housing for low-income and moderate-income households.

B. The impact that for-sale residential units have on the need to meet affordable housing was determined by conducting a Residential Nexus Analysis and Residential Feasibility Analysis. The analyses found that the need for affordable housing is commensurate with a 15% inclusionary requirement. The 20% inclusionary requirement for the Isabel Neighborhood Specific Plan was developed to be economically equivalent to the 15% inclusionary requirement for the General Plan Area.

C. The City's General Plan Housing Element has the goal of providing housing affordable to all economic segments of the community and requires that in the General Plan area 15% of the dwelling units be affordable, in the Downtown Specific Plan area 10% of the dwelling units be affordable, and in the Isabel Neighborhood Specific Plan Area 20% of the dwelling units be affordable. Chapter 10.06.050 of the Livermore Development Code provides that this affordability requirement may also be satisfied by alternative means including payments to the City's Housing Trust Fund for use in affordable housing projects.

D. The Developer desires to build a residential development in the Isabel Specific Plan Area of the City of Livermore, and to enter into this Agreement to satisfy its affordable housing requirement.

AGREEMENT

NOW THEREFORE, in consideration of the terms, conditions and covenants set forth herein, City and Developer agree that the recitals are true and correct and further agree as follows:

1) Development
The Developer intends to develop a subdivision consisting of ___ for sale single-family, attached housing units ("Units") as described in that certain Vesting Tentative Tract Map ____ (the "Map"), located at _____, in Livermore, California (the "Development").

2) Affordable Housing Requirement
Based on the Conditions of Approval for Vesting Tentative Tract Map ____, and Chapter 10.06.050 of the Livermore Development Code, the Developer is required to provide ____ residential units ("Units") for sale at affordable prices to median-income and moderate-income households.

3) Satisfying the Affordable Housing Requirement
In satisfaction of the affordable housing requirement described in Section 2 above, the Developer hereby agrees to: (i) construct _____ Units within the Development, ___ of which will be reserved for sale at Median Income Sales Prices, and _____ of which will be reserved for sale at Moderate Income Prices as defined in Section 7 below, (the "Affordable Units"); and, (ii) for the fractional remainder of the requirement, pay to the City's Housing Trust Fund the in lieu fee, as defined in Section 4, below.

4) Payment Schedule and Calculation
The Development is to pay the in lieu fee for 0.__ Units in the Development which totals $_____, and is calculated as described in Attachment 2. The in lieu fee shall be paid in equal installments of $_____ per Unit at the time of building permit application for each of the ____ unrestricted, market rate Units in the Development (the "Market Rate Units").
The in-lieu fee amount shall be fixed for any Market Rate Units constructed in the Development within five (5) years of the date of execution of this Agreement. Thereafter, the in-lieu fee calculation shall be subject to adjustment to the current Affordable Housing In-Lieu fee per square foot as noted in Attachment 2.

5) Location and Description of Affordable Units
   a) The Affordable Units shall be located on the base lots described below and further depicted in Attachment 1, attached hereto and incorporated herein.

EXHIBIT O

Lot Number	Model	Plan	No. of Bedrooms	No. of Baths	Square footage (+/-)	Affordable Sales Price Category

b) All Affordable Units shall be sold at the sales prices adopted by City Council that are applicable during the year the Affordable Units are sold (the "Median Income Price" and "Moderate Income Price"). For the initial year of this Agreement, the Median and Moderate Income Prices are as set forth in Attachment 3 attached hereto.

c) The Lots listed in Section 5.a and identified in Attachment 1 on which the Affordable Units are to be constructed may be changed with the mutual written consent of the City and Developer not to be unreasonably withheld provided that any change in the Lots does not materially detract from the value of the Affordable Units as determined by the City in accordance with the City's affordable housing ordinance (Dev. Code § 10.06.050).

d) Each Affordable Unit shall
   i. be built in conformance with the models and plans noted in Section 5 (a) above as such plans were approved in connection with Vesting Tentative Tract Map _____ and,
   ii. consist of the square feet of living space comprised of a family room, dining room, kitchen, laundry, bedrooms and bathrooms, as stated in Section 5 (a) above, and
   iii. contain the same standard amenities, fixtures and finishes, such as appliances, cabinets, counters, flooring, etc., as the market

rate units in the Development. Any proposed amenities, fixtures and finishes that differ from those in the Market Rate Units must be pre-approved by the City in writing prior to marketing the first Affordable Unit.

6) Selection of Purchasers

The purchasers ("Purchasers") of the Affordable Units shall be participants in the City's Affordable Homeownership Program (the "Program"). The Program requires, among other things that:

a) For those Affordable Units designated to be sold to median income households, each Purchaser's income shall not exceed one-hundred percent (100%) of the median income for Alameda County, adjusted for actual household size, as published annually by the California Department of Housing and Community Development ("Median Income Purchaser").

b) For those Affordable Units designated to be sold to moderate income households, each Purchaser's income shall not exceed one-hundred twenty percent (120%) of the median income for Alameda County, adjusted for actual household size, as published annually by the California Department of Housing and Community Development ("Moderate Income Purchaser").

c) Median and Moderate Income Purchasers must be first time homebuyers and meet credit and eligibility standards described in the City's Affordable Homeownership Program Guidelines.

d) To the extent required under the Program, Developer agrees to market the Affordable Units through specified City programs to implement applicant selection preferences in accordance with City's Affordable Homeownership Program Guidelines. The Developer may elect to have the City identify and select eligible Median and Moderate Income Purchasers for the Affordable Units.

e) If the Developer elects to utilize the services of the City:

i. The City will establish a list identifying income-eligible households based on preferences established by the Livermore City Council, provide first time homebuyers access to consumer credit counseling, identify to first time homebuyers possible financing options, assist homebuyers through the escrow process, monitor resale restriction agreements and related documents, and comply with all federal and state fair housing laws and regulations.

ii. Upon close of escrow for the sale of each Affordable Unit, the City shall be paid from escrow an administrative fee equal to one and half percent (1.5%) of the Total Purchase Price to conduct the activities described in Section 6 (d)(i) on behalf of Developer.

iii. In order to ensure timely delivery notification of eligible Purchasers, Developer shall send to the City's Housing and Human Services Division Manager, a written notice as soon as Developer, in its reasonable opinion, believes that a particular Affordable Unit is at least one hundred twenty (120) days from being ready for occupancy. At that point, the City will begin marketing and identifying eligible Median and Moderate Income Purchasers. The City shall provide to Developer the names of Median and Moderate Income Purchasers eligible under the Program.

f) If the Developer does not elect to utilize the services of the City, the Developer must meet all of requirements described in this section (6.d.i). The City will monitor the Developer to ensure compliance.

7) Sales Price Limits & Permitted Options

a) For those Affordable Units sold to Median Income Purchasers and Moderate Income Purchasers, the purchase price for each unit shall not exceed the sum of (i) the "Median Income Price" or "Moderate Income Price" plus (ii) the total cost of any Options (as that term is hereafter defined) for the particular Affordable Unit. The Median Income Price and Moderate Income Price are established annually by the City and set forth as Affordable For-Sale Prices, Rental Rates and Maximum Income Limits. The 2024 schedule is attached hereto as Attachment 3, incorporated herein as reference, and adopted by City Council Resolution 2001-204 ("Below Market Price Limits.") The Developer and the City acknowledge that the Below Market Price Limits may be adjusted from time to time and agree that in the event of such adjustment the Median Income Prices and Moderate Income Prices of the Affordable Units shall be adjusted to match the then current Below Market Price Limits at the time the Developer notices the City of an Affordable Unit(s) for sale and/or the marketing of the Affordable Unit(s) begins as mutually agreed upon.

b) The term "Options" shall mean any options, improvements, or upgrades to an Affordable Unit that Developer has made available to a Purchaser and that Purchaser has agreed to purchase at its sole cost and expense and may not be financed. Notwithstanding anything in this agreement to the contrary, the total cost of the Options that a particular Purchaser may purchase for an Affordable Unit shall not exceed five percent (5%) of the Median Income Price and Moderate Income Price for that Affordable Unit. Developer acknowledges and agrees that its sole compensation for any sale of an Affordable Unit shall be the sum of (a) the Median Income Price or Moderate Income Price and (b) the total cost of the Options. The sum total of items (a) and (b) above is hereafter referred to as the "Total Purchase Price".

c) All permitted upgrades and options for the Affordable Units must be pre-approved by the City prior to marketing the first Affordable Unit.

d) For property assessment purposes, the Total Purchase Price for each Affordable Unit shall be reported to the Alameda County Assessor's Office.

8) Affordability Restrictions

To effectuate the affordability restrictions, as a condition to the close of escrow on any Affordable Unit, the Developer shall require Purchaser to execute a promissory note in favor of the City in an amount equal to the difference between the fair market value as determined by an appraisal of the Affordable Unit and the Median Income Price or Moderate Income Price(the "Promissory Note"). In addition to the Promissory Note, the Purchaser shall execute a deed of trust and a resale restriction agreement in favor of the City that will be recorded in a second-priority position at the close of escrow. The Resale Restriction Agreement, Deed of Trust and Promissory Note shall be referred to as the "City Loan Documents" and shall be substantially in the form of Attachment 4.

9) Assignment

This Agreement shall be binding upon the successors and assigns of the parties. Where the Developer sells or otherwise transfers title to any portion of the Property, that subsequent owner and Developer are jointly and severally liable for the obligations under this Agreement as to that portion of the Property sold or transferred unless Developer is released by City, which release shall not be unreasonably withheld, so long as the subsequent owner provides City with security equivalent to any security previously provided by Developer to secure performance of its obligations hereunder. Developer acknowledges that it shall be reasonable for City to condition such release of the Developer upon Developer and its successor entering into a written assignment and assumption agreement requiring the successor to satisfy Developer's outstanding obligations under this Agreement.

10) Breach

No party shall be in material breach of this Agreement unless and until (i) the breaching party receives from the non-breaching party a written notice ("Breach Notice") stating the nature of the breach and (ii) the breaching party has failed to cure such breach within thirty (30) days of the date it receives the Breach Notice; provided, however, if the nature of the breach is of a type or nature that cannot be cured within thirty (30) days, then the breaching party shall not be in material default of this Agreement so long as it (i) commences curing of the breach within thirty (30) days of the date it receives the Breach Notice and (ii) diligently pursues curing the breach to completion.

11) Agreement Lawful and Enforceable.

The Developer acknowledges and concedes that this Agreement is lawful and enforceable and waives any and all legal challenges or other objections to this Agreement. The Developer shall not in any judicial action or proceeding, affirmatively or by way of defense, seek to invalidate or otherwise avoid the application of the terms of this Agreement.

12) Notice

Unless specified otherwise herein, any notice, tender or delivery to be given pursuant to this Agreement by either party shall be in writing and may be accomplished by delivery in person, express delivery service, or first class certified mail, return receipt requested. Any notice shall be deemed received on the date shown on the receipt as the date of delivery, refusal of delivery or the date returned as undeliverable. Notices shall be addressed as set forth below, but each party may change his or her address by written notice in accordance with this Section.

13) Attorneys' Fees

If any legal action is commenced to interpret or to enforce the terms of this Agreement or to collect damages as a result of any breach of this Agreement, then the party prevailing in any such action shall be entitled to recover all reasonable attorneys' fees and costs incurred.

14) Compliance

Compliance with this Agreement satisfies the affordable housing development obligations of Developer under the City's Affordable Housing Ordinance (Section 10.06.050 of the Livermore Development Code), and the Vesting Tentative Tract Map 8609 conditions of approval.

15) Modification

This Agreement shall not be modified except by written instrument executed by and between the parties.

16) Entire Agreement

This Agreement constitutes the entire understanding and agreement of the parties with respect to the sale of the Affordable Units.

17) Binding Effect
This Agreement shall be binding upon and inure to the benefit of the heirs, executors, administrators, successors and assigns of the parties.

18) Severability
If any term of this Agreement is held in a final disposition by a court of competent jurisdiction to be invalid, then the remaining terms shall continue in full force unless the rights and obligations of the parties have been materially altered by such holding of invalidity.

19) Governing Law
This Agreement shall be governed by the laws of the State of California.

20) Incorporation by Reference
Any exhibits referred to in this Agreement are incorporated in this Agreement by such reference.

21) Counterparts
This Agreement may be executed in counterparts, by actual or facsimile signature (with originals to be forwarded by overnight mail). Each counterpart shall be deemed an original and all, when taken together, shall constitute one agreement.

22) Termination
This Agreement and all terms and conditions contained herein and the encumbrance of this Agreement on title shall automatically terminate once all obligations under this Agreement have been satisfied by the Developer without signing or recording any instrument of release, provided City shall sign any such release to the extent requested by Developer and/or required by any title company insuring the sale or transfer of Units. Notwithstanding the foregoing this Agreement shall terminate in its entirety and be of no further force and effect with respect to, (a) any portion (or interest in) of the Property, upon dedication or conveyance to a homeowners association, public entity or public utility, and (b) any completed Unit, upon the sale of such Unit to a member of the general public. In any such event, such portion of the Property (or interest therein) shall be deemed automatically released from the encumbrance of this Declaration, without signing or recording any instrument of release, provided City shall sign any such release to the extent requested by Developer and/or required by the title company insuring such sales or transfers.

RESALE RESTRICTION AGREEMENT

Owner: _____

Residence: _____
Livermore, CA 94551

This Resale Restriction Agreement (the "Agreement") is entered into as of this _____ day of _____, 2021 by and between the City of Livermore, a municipal corporation (the "City") and _____ (the "Owner").

RECITALS

A. There is currently a shortage of single family housing in the City of Livermore that is affordable to low income households, causing many low and moderate income households to be unable to purchase single family homes.

B. To assist low and moderate income households in purchasing single family homes, the City has granted developers certain regulatory concessions and in return developers have agreed to cooperate with the City in developing affordable single family homes.

C. In order to further its plan to assist in the purchase of homes by low and moderate income households, the City has developed a secondary financing program designed to assist qualified purchasers to purchase single family homes while preventing unfair windfall profits to the purchasers (the "Affordable Homeownership Program").

D. Without the City's Inclusionary housing requirements, which require the developers to build homes at an affordable price, the Owner would not have had the opportunity to purchase a single family residence.

E. The City's secondary financing represents the value that the owner has received as a result of the City's Inclusionary requirements.

F. The Owner desires to purchase an affordable single family home and to participate in the Affordable Homeownership Program.

G. The Owner has qualified for City financing with a combined household income which does not exceed One Hundred Twenty percent (120%) of median income of Alameda County, adjusted for actual household size, as published by the California Department of Housing and Community Development.

H. The City wishes to establish resale controls to protect its financial interest in the Residence and to provide for the continued availability of affordable housing.

I. In order to protect its financial interest and its program of providing housing for low income households, the City has required the Owner to execute, in addition to this Agreement, a promissory note in favor of the City (the "City Note").

J. This Agreement and the City Note shall be secured by a deed of trust in a lesser lien position (the "City Deed of Trust") subordinate to the lien of that deed of trust executed by the Owner in favor of the First Lender.

K. The purpose of this Agreement is to place resale controls on the Residence and establish eligibility requirements for subsequent purchasers.

L. The City intends to apply the production of this Residence, to the extent permitted by law, toward the satisfaction of the requirements of Health and Safety Code Section 33413(b)(2).

AGREEMENT

NOW, THEREFORE, in consideration of the benefits received by the Owner and the City, the Owner and the City agree, as follows:

1. DEFINITIONS

The following terms are specially defined for this Agreement:

A. "Affordable Purchase Price" shall mean the maximum purchase price for Moderate Income (120% AMI) housing, adjusted for number of bedrooms, as adopted annually by the City Council of the City.

B. “Affordable Rent” shall mean the lesser of the actual housing costs (including mortgage, homeowners’ insurance, hazard and flood insurance, homeowners’ association dues) or City affordable rental maximum plus reasonable and customary property management services fee.

C. “City Option” shall mean the City’s option to purchase Residence as defined in Section 15.A.

D. “Excess Rental Proceeds” shall mean all rental proceeds collected by the Owner that exceed the Affordable Rent.

E. “Excess Sales Proceeds” shall mean the portion of the gross sales proceeds received by the Owner from a subsequent purchaser, which exceeded the Affordable Sales Price for the Residence that is due to the City. The amount of Excess Sales Proceeds due to the City shall be no greater than the equivalent amount of 3% compounded annual interest on the principal amount of the City Note for a maximum of twenty (20) years. The actual amount of excess sales proceeds due to the City shall be calculated according to the number of years outstanding on the City’s Note.

F. "Fair Market Value" shall be determined by an appraisal of the Residence performed as provided in the Resale Restriction Agreement. Nothing in this subparagraph shall preclude the Owner and the City from establishing the Fair Market Value of the Residence by mutual agreement in lieu of an appraisal.

G. “First Lender” shall mean .

H. “First Lender Deed of Trust” shall mean the deed of trust from Owner to .

I. "First Lender's Loan" shall mean the loan to Owner made by and any loan to Owner in the name of or held by CalHFA.

J. "Median Income" shall mean the median annual income, adjusted for household size, for a household in Alameda County as published by the California Department of Housing and Community Development.

K. "Proposed Purchaser" shall mean the potential home buyer proposed by the Owner to purchase the Residence from the Owner.

L. "Sales Price" shall mean the maximum sales price that the Owner may receive for any Transfer of the Residence to an eligible Purchaser, as calculated in accordance with Section 14 below.

M. "Transfer" shall mean any sale, assignment or transfer, voluntary or involuntary, of any interest in the Residence, including, but not limited to, a fee simple interest, a joint tenancy interest, a life estate, a leasehold interest, (other than as may be permitted in Section 8 of the Resale Restriction Agreement) or an interest evidenced by a land contract by which possession of the Residence is transferred and Owner retains title, or deed of trust.

A Transfer shall not include a transfer by gift, devise or inheritance: (i) to an existing spouse, domestic partner, surviving joint tenant, or child; (ii) by an Owner to a spouse or domestic partner where the spouse or domestic partner becomes the co-owner of the Residence; (iii) between spouses as part of a marriage dissolution proceeding; (iv) to an existing spouse or domestic partner of Owner by devise or inheritance following the death of Owner; (v) by Owner into an inter vivos trust in which Owner is the beneficiary; or (vi) refinance of the First Mortgage meeting the requirements of Section 17 of this Agreement; provided, however, that Owner shall provide written notice of all such transfers to City; and Owner shall continue to occupy the Residence as his or her principal place of residence (except where the transfer occurs pursuant to subsection (iii) or (iv) above, in which event the transferee shall owner-occupy the Residence and affirmatively assume Owner's obligations under this Agreement and the City Note.

2. DESCRIPTION OF PROPERTY

This Agreement concerns the real property commonly known as, _____, Livermore, California, (the “Residence”), which is more fully described in Exhibit A attached hereto and

incorporated by reference.

3. TERM OF AGREEMENT

The term of this Agreement shall commence as of the date of this Agreement and shall expire on that date fifty-five (55) years from the date of this Agreement (the "Term").

4. OWNER CERTIFICATIONS; OWNER OCCUPANCY MONITORING

The Owner certifies that all financial and other information provided in order to qualify to purchase the Residence is true and correct as of the date first written above.

The Owner further covenants and agrees to occupy the Residence as Owner's primary residence for the duration of Owner's ownership and shall not rent or lease the property or portion thereof during the Term of this Agreement without prior written approval of City. The Owner shall be considered as occupying the Residence if the Owner is living in the Residence for at least ten months out of each calendar year. The City may grant a temporary waiver of this occupancy requirement for good cause in its sole discretion. Without limiting the generality of the foregoing, any absence from the Residence by Owner for a period 60 days or more days shall be deemed an abandonment of the Residence as the primary residence of Owner in violation of the conditions of this Section 4. On or before May 1 of each calendar year, the Owner shall provide an annual written certification to the City, in the form shown in Exhibit C, that the Owner is occupying the Residence as Owner's principal place of residence, and that Owner is not renting the Residence, or any portion thereof, to another party. Owner shall comply with all applicable laws relating to the use and maintenance of the Residence, including but not limited to the City of Livermore Municipal Code, City of Livermore Planning and Zoning Code, and all other local, state and federal laws.

5. NO CRIMINAL ACTIVITY

Owner agrees that no resident residing on the Property, their guests or persons under their control shall permit, engage in, or facilitate criminal activity on the Property, in any building on the Property, or in the streets bordering the Property. This includes, without limitation the foregoing: (i) the illegal manufacture, sale, distribution, use or possession with the intent to manufacture, sell, distribute or use a controlled substance as defined in Section 102 of the Controlled Substances Act (21 U.S.C. § 802); (ii) the unlawful discharge of firearms; and (iii) all acts or threats of violence, harming, or intending to harm a person or

property.

6. NO RENTING OR LEASING OF HOME

The Owner shall not rent or lease the Residence, or any portion thereof, to another party, unless such rental or lease is first approved in writing by the City. The City shall approve the renting or leasing of the Residence only if *all* of the following conditions are met: (1) the term of the rental or lease is not greater than twelve (12) months and cannot be extended without City approval; (2) the Owner demonstrates to the City's reasonable satisfaction that the Owner will incur substantial hardship, that would at the City's discretion not otherwise be remedied through the sale of the property, if he or she is not permitted to rent or lease the Residence to a third party; (3) the tenant qualifies as an Income Eligible Household, as certified to the City, and (4) the rent for the Residence does not exceed the Affordable Rent. Any rental or lease of the Residence in violation of this Agreement is prohibited, and shall be a default under this Agreement and the City Deed of Trust. The Owner further agrees that, in the event the Owner rents or leases the Residence to a third party in violation of this Section 6, any Excess Rental Proceeds paid to the Owner by the lessee over the Affordable Rent shall be due and payable to the City immediately upon receipt thereof by the Owner. Owner agrees that the collection of rents shall be monitored and administered through an independent, licensed property manager who shall be pre-approved by the City. Such Excess Rental Proceeds shall be considered a recourse debt of the Owner to the City, as evidenced by the Note, which the City may collect by legal action against the Owner, including by foreclosure under the City Deed of Trust. The Owner hereby agrees that City shall not be responsible for any relocation, eviction, legal or moving expenses if the lessee is required to vacate the premises.

7. MAINTENANCE AND INSURANCE REQUIREMENTS

A. Maintenance. The Owner shall maintain the Residence, including landscaping, in good repair and in a neat, clean and orderly condition (and, as to landscaping, in a healthy condition) and in accordance with all applicable laws, rules, ordinances, orders and regulations of all federal, state, county, municipal, and other governmental agencies and bodies having or claiming jurisdiction and all their respective departments, bureaus, and officials. Owner will not permit deterioration of the Residence, and shall make all repairs and replacements necessary to keep the Residence in good condition and repair. Failure by the Owner to maintain the Residence shall constitute a default under this Agreement for which

the City may exercise the City Option to purchase the Residence pursuant to Section 15 below. In case of default, funds to clean-up or repair damage to the property shall come from the Owner.

B. Insurance. The Owner shall maintain a standard all risk property insurance policy equal to the replacement value of the Residence (adjusted every five (5) years by appraisal, if requested by City), naming the City as an additional insured. Additional insurance requirements are set forth in Section 2 of the City Deed of Trust. The Owner shall provide the City with evidence of required insurance coverage upon request of the City.

8. SALE AND TRANSFER RESTRICTIONS

A. Prohibition on Transfer. Any Transfer without satisfaction of the provisions of this Agreement is prohibited and shall constitute a default by Owner for which the City may exercise the City Option pursuant to Section 15 below.

B. Inheritance. In the event a Transfer occurs by devise or inheritance due to death of the Owner, the administrator of the Owner's estate or the person inheriting the Residence shall provide written notice to the City of the Owner's death within thirty (30) days of the date of death and the following procedures shall apply:

1. If the person inheriting the Residence (the "Inheriting Owner") is a qualified inheritor under the City's definition of eligible parties not subject to Transfer (an "Inheriting Party"), that person shall provide the City documentation of his or her qualifications as an Inheriting Party, to be verified by the City. If the Inheriting Party fails to provide required documentation demonstrating the his or her relationship to the Owner within 60 days of the date of the Owner's death, the party shall be deemed not to qualify as an Inheriting Party. The Inheriting Party shall succeed to the Owner's interest and obligations under this Agreement, the City Note, and the City Deed of Trust and shall execute an assumption agreement containing the terms of the Agreement, City Note and Deed of Trust between the Inheriting Owner and the City and recorded against the Residence.

2. If the Inheriting Owner is not a qualified Inheriting Party, he or she shall Transfer the Residence to an Eligible Purchaser at a price not exceeding the Affordable Purchase Price, pursuant to the procedures set forth in Sections 9 through 14 below and the City may exercise the City Option pursuant to Section 15 below. Prior to initiating a Transfer pursuant to this section, the Inheriting Owner shall provide the City with an Owner's

Notice of Intent to Sell within sixty (60) days of the date of death of the Owner.

3. Failure of an Inheriting Owner to follow the procedures and file the notices described in this Section 8 shall constitute a Default under this Agreement and the City may then exercise any of the remedies set forth in Section 18 below, including, without limitation, exercise of the City Option upon Default.

9. NOTICE OF INTENDED TRANSFER

In the event the Owner intends to Transfer or vacate the Residence, the Owner shall promptly notify the City in writing of such intent. The written notice shall be given in accordance with Section 26 of this Agreement at least one hundred twenty (120) days prior to the actual date of the Transfer or vacation of the Residence, or such other time period as may be mutually agreed upon by the Owner and the City. Said notice from the Owner shall be sent by certified mail, return receipt requested. Following receipt of such notice, the City may notify the Owner within thirty (30) days regarding exercise of the City Option. If the City chooses not to exercise the City Option, City will notify prospective Eligible Purchasers of the Residence that the Residence is available for purchase and shall further provide a Response Notice to Owner that will include the following information: (1) the maximum qualifying income for an Eligible Purchaser; (2) the certifications required of an Eligible Purchaser; and (3) the Sales Price the Owner may receive for the Residence, calculated by the City pursuant to Section 14 below. The Owner may receive referrals for Eligible Purchasers by the City and or its approved homeownership counseling provider for a reasonable administrative fee.

10. REPAYMENT OF CITY NOTE UPON TRANSFER BY OWNER

If a Transfer of the Residence occurs to other than an Eligible Purchaser, the Owner shall pay all amounts due under the City Note (Exhibit B). Thereafter, this Agreement shall terminate and have no further effect.

11. ASSUMPTION OF THE CITY NOTE

If the Owner transfers the Residence to an Eligible Purchaser in a transaction that meets the Eligible Transfer requirements of Section 13 of this Agreement, the City will allow the Eligible Purchaser to assume the obligations under the City Note and the City Deed of Trust, subject to the Eligible Purchaser executing a new promissory note in the amount of

the difference between the Fair Market Value and the Affordable Sales Price at the time of Transfer and a new deed of trust in favor of the City and a new resale restriction agreement. Upon the approval of an Eligible Purchaser's assumption of the Owner's obligations under the City Note and the City Deed of Trust and the execution of a new promissory note, deed of trust and resale restriction agreement by the Eligible Purchaser, the City shall release the Owner from any obligations under this Agreement, the City Note, and City Deed of Trust. The Eligible Purchaser's assumption of the Owner's obligations under the City Note and City Deed of Trust shall be credited by Owner to the Eligible Purchaser as a partial payment of the purchase price for the Residence in the amount of the City Note.

12. TRANSFER BY OWNER

The Owner may sell the Residence to a person of the Owner's choosing (the "Proposed Purchaser") on the terms set forth in this Section.

A. Transfer to Ineligible Purchasers. If the Owner Transfers the Residence in a transaction that does not meet the Eligible Transfer requirements of Section 13 below, the Owner shall first pay (i) all of the principal and interest due to the First Lender, and (ii) all principal and amounts owed on the City Note. Thereafter this Agreement shall terminate and have no further effect.

B. Transfer to Eligible Purchaser. If the Owner Transfers the Residence in a transaction that meets the Eligible Transfer requirements of Section 13 below, the City shall allow the obligations under the City Note to be assumed by the Eligible Purchaser pursuant to Section 13. A. (5) and (6) of this Agreement. The maximum amount that the Owner may receive for the Transfer after the payment of customary and reasonable closing costs for the sale of the Residence shall be lesser of: 1) the Fair Market Value of the Residence; or 2) the Affordable Purchase Price in effect at the date of sale as established by Council, subject to any adjustments due to Advances by the City or as described further in Section 14.

13. ELIGIBLE TRANSFER

A transfer that meets the requirements set forth in this Section shall qualify as an approved Transfer to an Eligible Purchaser ("Eligible Transfer").

A. Disclosures and Submittals. The Owner and the Proposed Purchaser shall provide the following information to City:

EXHIBIT O

1. The name, address and telephone number in writing of the Proposed Purchaser.

2. A signed financial statement of the Proposed Purchaser in a form acceptable to the City and any other supporting documentation requested by the City. The financial information shall be used by the City to determine the income eligibility and credit worthiness of the Proposed Purchaser.

3. The proposed sales contract and all other related documents, which shall set forth the terms of the sale of the Residence, including the following terms:

   a. The sales price, setting out the amount of the first loan and the amount of the City Note which is to be assumed; and

   b. The price to be paid by the Proposed Purchaser for the Owner's personal property, if any, and for the services of the owner, if any.

4. A written certification, from the Owner and the Proposed Purchaser, in a form acceptable to the City that the sale shall be closed in accordance with the terms of the sales contract and other documents submitted to and approved by the City. The certification shall also provide that the Proposed Purchaser or any other party has not paid and will not pay to the Owner, and the Owner has not received and will not receive from Proposed Purchaser or any other party, money or other consideration in addition to what is set forth in the sales contract and documents submitted to the City, including personal property. The written certification shall also include a provision that in the event a Transfer is made in violation of the terms of this Agreement or false or misleading statements are made in any documents or certification submitted to the City, the City shall have the right to file an action at law or in equity to make the parties terminate and/or rescind the sales contract and/or declare the sale void, notwithstanding the fact that the sale may have closed and become final as between the Owner and the Proposed Purchaser. In any event, any costs, liabilities or obligations incurred by Owner and/or the Proposed Purchaser for the return of any moneys paid or received in violation hereunder or for any costs and legal expenses, shall be borne by Owner and/or the Proposed Purchaser and they shall hold the City harmless and reimburse their expenses, legal fees and costs for any action they reasonably take in good faith in enforcing the terms of this Agreement. An executed resale restriction agreement by the Proposed Purchaser with substantially the same provisions as this Agreement and subject to City approval. The recordation of the resale restriction agreement shall be a condition of the City's approval of the proposed sale. The City may require the Proposed Purchaser to pay a reasonable fee to the City and reimburse it for out of pocket costs to cover the costs of administering its rights and obligations under this Agreement.

5. An executed deed of trust and a promissory note from the Proposed Purchaser

in favor of the City except that the principal amount of the new promissory note shall equal the difference between the Fair Market Value and the Affordable Purchase Price at the time of Transfer. The new promissory note shall be subject to the Affordable Homeownership Program terms at the time of Transfer.

6. Upon the close of the proposed sale, certified copies of the recorded deed of trust, a copy of the recorded resale restriction agreement, a copy of the final sales contract, settlement statement, escrow instructions, and any other document which the City may reasonably request.

B. Eligibility Of Purchaser. A purchaser who meets the following requirements shall be an Eligible Purchaser ("Eligible Purchaser"):

1. Each purchaser shall certify that he or she will occupy the Residence as his or her principal residence. The Residence shall be considered the principal residence of the purchaser if the purchaser lives in the Residence for at least ten (10) months out of each calendar year.

2. The combined income for all household members of the purchaser does not exceed One Hundred Twenty percent (120%) of median income of Alameda County, adjusted for actual household size, as published by the California Department of Housing and Community Development.

14. DETERMINATION OF SALES PRICE

A. To Eligible Purchaser. The maximum sales price (the "Sales Price") that the Owner may charge for a Transfer of the Residence to an Eligible Purchaser shall be lesser of: (i) the Fair Market Value of the Residence; or (ii) the Affordable Purchase Price, plus the amount of the Excess Sales Proceeds. In the event that the sum of the Affordable Purchase Price plus the amount of the Excess Sales Proceeds under the City Note exceeds the Fair Market Value of the Residence, the amount of the City Note shall be reduced until the sum of the Affordable Purchase Price plus the amount of the City Note equals the Fair Market Value. No adjustments to the Affordable Purchase Price shall be made for any improvements or upgrades to the unit.

B. Adjustments to Owner’s Net Proceeds Sales Price. The owner’s net proceeds may be decrease by the amount necessary to repair damage to the Residence, if any, and to place the Residence into saleable condition as reasonably determined by the City

including, without limitation, amounts attributed to cleaning; painting; replacing worn carpeting and window coverings; making necessary structural, mechanical, electrical and plumbing repairs; addressing damage noted in the pest report, and repairing or replacing built-in appliances and fixtures. Owner hereby covenants to, at Owner's expense, maintain the Residence in the same condition as in existence on the date of City's Notice of Exercise, reasonable wear and tear excepted to cover any advances made by the City.

C. To Ineligible Purchaser. The sales price that the owner may charge for a Transfer of the Residence to an Ineligible Purchaser shall be reached by mutual consent between the owner and buyer of the residence. If the residence is sold to an ineligible purchaser the owner will be subject to conditions set forth in Section 12. A. of this Agreement.

D. Payment to City of Excess Sales Proceeds. If the Owner Transfers the Residence at an unrestricted price pursuant to this Section 14, or if the Owner makes a Transfer in violation of this Agreement, the Owner shall pay the principal balance of the City Note plus any Excess Sales Proceeds to the City.

15. OPTION TO PURCHASE

A. City Option to Purchase. Owner hereby grants to the City an option to purchase all of Owner's right, title and interest in and to the Residence ("City Option") upon the occurrence of an Option Event as defined in Section 15. C. below, subject to the terms and conditions contained herein.

B. Assignment of the City Option. The City may assign the City Option to another government entity, a nonprofit affordable housing or service provider, or a person or family that qualifies as an Eligible Purchaser. The City's assignment of the City Option shall not extend any time limits contained herein with respect to the exercise period of the City Option or the period within which the Residence must be purchased.

C. Events Giving Rise to Right to Exercise Option. The City shall have the right to exercise the City Option upon the occurrence of any of the following events (each an "Option Event"):

1. Receipt of a Notice of Intent to Transfer (as defined in Section 9);
2. Any actual, attempted or pending sale, conveyance, transfer, lease or other attempted disposition of the Residence or of any estate or interest therein,

except as defined as Events not constituting a Transfer in Section 1.M.;

3. Any actual, attempted or pending encumbrance of the Residence, including without limitation by way of mortgage or deed of trust, or by judgment, mechanics, tax or other lien, except as provided in Section 17 below;
4. Recordation of a notice of default and/or notice of sale pursuant to California Civil code section 2924 (or successor provisions) under any deed of trust or mortgage with a power of sale encumbering the Residence;
5. Commencement of a judicial foreclosure proceeding regarding the Residence;
6. Commencement of a proceeding or action in bankruptcy, whether voluntary or involuntary, pursuant to Title 11 of the United States Code or other bankruptcy statute, or any other insolvency, reorganization, arrangement, assignment for the benefit of creditors, receivership or trusteeship, concerning the Owner; or
7. Any violation by Owner of any provision of this Agreement including, without limitation, the conditions set forth in Sections 4, 5, 6, and 7 above.

16. FAIR MARKET VALUE

If it is necessary to determine the Fair Market Value of the Residence, the Fair Market Value shall be determined by a real estate appraiser approved by the Owner and the City. The cost of the Appraisal shall be borne equally by the Owner and the City. Nothing in this section shall preclude the Owner and the City from establishing the fair market value of the Residence by mutual agreement in lieu of an appraisal pursuant to this section.

17. REFINANCING OF THE RESIDENCE

If authorized by a First Lender, Owner may refinance the First Lender's loan provided the loan amount of such refinancing does not exceed the then outstanding balance of the First Lender's loan plus 2% non-recurring closing costs. However, Owner may not refinance a First Lender's loan with a loan that contains any provisions for negative amortization or balloon payments. Upon Owner's request, the City shall subordinate the City Deed of Trust to a deed of trust or mortgage made by or held by an institutional lender or investor which is given in connection with any refinancing of the First Lender's Loan which meets the criteria set out in this Section 17 of this Agreement.

18. DEFAULTS AND REMEDIES / DEFAULT BY OWNER

Upon a violation of any of the provisions of this Agreement by the Owner, the City shall give written notice to the owner specifying the nature of the violation. If the violation is not corrected to the satisfaction of the City within thirty (30) days after the date the notice is mailed, or within such further time as the City determines is necessary to correct the violation, the City may declare a default under this Agreement. Upon the declaration of a default or if the Owner makes any misrepresentation in connection with receiving any benefits under this Agreement, the City may: (a) declare all amounts due under the City Note immediately due and payable without further demand and may invoke the Power of Sale under the Deed of Trust; and/or (b) exercise the City Option; and/or (c) apply to a court of competent jurisdiction for specific performance of this Agreement, for an injunction prohibiting a proposed sale or transfer in violation of this Agreement, for a declaration that a transfer in violation of this Agreement is void, or for any such other relief at law or in equity as may be appropriate.

19. NOTICE OF DEFAULT AND FORECLOSURE

A request for notice of default and any notice of sale under any deed of trust or mortgage with power of sale encumbering the Residence shall be recorded by the City in the Office of the Recorder of Alameda County for the benefit of the City. The City may declare a default under this Agreement upon receipt of any notice given to the City pursuant to Civil Code Section 2924b, and may exercise its rights as provided in Section 15 of this Agreement.

In the event of default and foreclosure, the City shall have the same right as the Owner to cure defaults and redeem the Residence prior to the foreclosure sale. Nothing herein shall be construed as creating any obligation of the City to cure any such default, nor shall this right to cure and redeem operate to extend any time limitations in the default provisions of the underlying deed of trust or mortgage.

If the City failed to file the request for notice of default, the City Option shall commence from the date the notice of default is given by the City to the Owner.

20. BINDING EFFECT

This Agreement shall bind, and the benefit hereof shall inure to, the Owner, his or her heirs, legal representatives, executors, successors in interest and assigns, and to the City and its successors, until the earlier of (a) the date the City Note is repaid, or (b) the date of

a Transfer of the Residence to an Eligible Purchaser in accordance with Section 12. B. above, or (c) at least 55 years from the date of this Agreement.

21. SUPERIORITY OF AGREEMENT

The Owner covenants that he or she has not, and will not, execute any other agreement with provisions contradictory to or in opposition to the provisions hereof, and that, in any event, this Agreement is controlling as to the rights and obligations between and among the owner, the City and their respective successors.

22. RIGHTS OF BENEFICIARIES UNDER DEEDS OF TRUSTS

Notwithstanding any other provision hereof, this Agreement shall not diminish or affect the rights of a First Lender under the First Lender's Deed of Trust or any subsequent First Lender deeds of trust hereafter recorded against the Residence and the provisions of this Agreement shall be subordinate to the lien of a First Lender Deed of Trust and shall not impair the rights of a First Lender, or such lender's assignee or successor-in-interest (including but not limited to the United States Department of Housing and Urban Development (HUD), Federal National Mortgage Association (FNMA), or the Veterans Administration, if applicable), to exercise its remedies under the First Lender Deed of Trust in the event of default under the First Lender Deed of Trust by the Owner. Such remedies under a First Lender Deed of Trust include the right of foreclosure or acceptance of a deed or assignment in lieu of foreclosure. After such foreclosure or acceptance of a deed in lieu of foreclosure, this Agreement shall be forever terminated and shall have no further effect as to the Residence or any transferee thereafter; provided, however, if the holder of such First Lender Deed of Trust acquired title to the Residence pursuant to a deed or assignment in lieu of foreclosure this Agreement shall automatically terminate upon such acquisition of title, provided that (i) the City has been given written notice of default under such First Lender Deed of Trust, which requirement shall be satisfied by recordation of a notice of default under California Civil Code Section 2924, and (ii) the City shall not have cured the default under the First Lender Deed of Trust within ninety (90) days of such notice.

23. AMENDMENTS AND MODIFICATIONS

This Agreement, and any provisions hereof, may not be modified, amended, waived, extended, changed, discharged or terminated orally or by any act or failure to act on the part of any party hereto, but only by an agreement in writing signed by the party against whom enforcement of any modification, amendment, waiver, extension, change, discharge or

termination is sought.

24. SEVERABILITY

If any term, covenant or condition of this Agreement is held to be invalid, illegal or unenforceable in any respect, this Agreement shall be construed without such term, covenant or condition and the validity or enforceability of the remaining terms, covenants or conditions shall not in any way be affected.

25. CONTROLLING LAW

The terms of this Agreement shall be interpreted under the laws of the State of California.

26. NOTICES

Notices under this Agreement must be delivered to the addresses below by deposit in the United States mail or by overnight delivery service, with postage prepaid and delivery confirmation and shall be deemed to be effective as of the date received or the date delivery was refused as indicated on the return receipt as follows:

To the Owner:

To the City: City of Livermore
1052 S. Livermore Ave.
Livermore, CA 94550
Attn: City Manager

27. INTERPRETATION OF AGREEMENT

The terms of this Agreement shall be interpreted so as to avoid speculation on the Residence and to insure to the extent possible that its sales price and mortgage payment remain affordable to persons and families of low income.

EXHIBIT O

28. EXHIBITS

Any exhibits referred to in this Agreement are incorporated in this Agreement by such reference.

29. COUNTERPARTS

This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original and all of which when taken together shall constitute one and the same Agreement.

Promissory Note

EXHIBIT O

NOTICE TO BORROWER: **Loan No.**

THIS DOCUMENT CONTAINS PROVISIONS
RESTRICTING RESALES AND ASSUMPTIONS

PROMISSORY NOTE

Secured by a Deed of Trust

$ Dated:

Livermore, California

FOR VALUE RECEIVED, the undersigned (the "Borrower") promises to pay to the order of the City of Livermore, a municipal corporation (the "City") at 1052 South Livermore Ave., Livermore, California, or such other place as the City may designate in writing, the principal sum of $ plus any amounts due the City as Excess Sales Proceeds.

1. Definitions. Unless otherwise defined herein, all capitalized terms shall have the meanings ascribed to them in the Resale Restriction Agreement, executed by the parties and of even date herewith.

2. Purpose of City Note. Borrower is purchasing the Residence pursuant to the City's Affordable Homeownership Program, which makes homes available at a price affordable to low or moderate income households. Pursuant to the City's Affordable Housing Ordinance, Livermore Development Code Section 10.06.050, the purchase price of the Residence is substantially below the market value to ensure the Residence will be affordable for purchase by low or moderate income households. Because the purchase price has been set below the market value, the Borrower is required and has agreed to execute a Resale Restriction Agreement that restricts the price of the Residence upon resale and requires the Borrower to pay any Excess Sales Proceeds to City upon resale . In addition, the Resale Restriction Agreement prohibits the renting or leasing of the Residence except with prior written approval of the City.

EXHIBIT O

3. Borrower's Obligation. This Note evidences the Borrower's obligation to pay the City the principal amount of Dollars ($) plus Excess Sales Proceeds for the repayment of the financial assistance provided to the Borrower by the City in connection with the purchase of the Residence as defined in Paragraph 4, below.

4. Security. This Note is secured by a Deed of Trust (the "Deed of Trust") dated the same date as this Note recorded against the property located at , Livermore, California (the "Residence").

5. Repayment. The total amount of the principal and any Excess Sales Proceeds owed under this Note shall immediately become due and payable (i) in the event of an uncured default by Borrower under this Note, the Deed of Trust, or the Resale Restriction Agreement between the City and Borrower, or (ii) on the date a Transfer is made to other than an Eligible Purchaser whether voluntarily, involuntarily, or by operation of law and whether by deed, contract of sale, gift, devise, bequest or otherwise

There shall be no payments due on amounts owed under this Note so long as the Borrower owns the Residence and is not in violation of any provisions of this Note, the Resale Restriction Agreement, or the Deed of Trust. This Note is due and payable upon sale or transfer of title.

At the request of the Borrower, the City shall relieve Borrower of all obligations under this Note, provided that the Residence is sold to an Eligible Purchaser pursuant to the Resale Restriction Agreement, and the Eligible Purchaser executes a new resale restriction agreement, deed of trust, and a new promissory note pursuant to provisions of the Resale Restriction Agreement.

The City shall forgive the principal due under this Note at the time of a Transfer or repayment of this Note to the extent necessary to ensure that the Borrower's obligations to repay the principal due on this Note and on all promissory notes secured by deeds of trust superior to the Deed of Trust do not exceed the Fair Market Value of the Residence.

6. Assumption of Note is Restricted. Borrower acknowledges that this Note is given in connection with the purchase of the Residence as part of a program of the City to assist in the purchase of homes by low or moderate-income persons. Consequently, this Note is not automatically assumable, but is subject to Section 711.5 of the California Civil Code, which allows the City to accelerate all amounts due under this Note if any subsequent sale or transfer of the Residence of any kind does not comply with the provisions of the Resale Restriction Agreement executed between the Borrower and the City and dated the same date as this Note.

7. Prepayments. Borrower may prepay all or any amount of the principal balance due under this Note.

EXHIBIT O

8. Default and Acceleration. Upon the occurrence of an uncured default under this Note, the Resale Restriction Agreement or the Deed of Trust, the City shall have the right to declare the full amount of the principal along with any Excess Sales Proceeds under this Note immediately due and payable. Any failure by the City to pursue its legal and equitable remedies upon default shall not constitute a waiver of the City's right to declare a default and exercise all of its rights under this Note, the Deed of Trust, and the Resale Restriction Agreement. Nor shall acceptance by the City of any payment provided for herein constitute a waiver of the City's right to require prompt payment of any remaining principal and interest owed.

9. No Offset. Borrower hereby waives any rights of offset it now has or may hereafter have against the City, its successors and assigns, and agrees to make the payments called for herein in accordance with the terms of this Note.

10. Waiver; Attorneys' Fees. Borrower and any endorsers or guarantors of this Note, for themselves, their heirs, legal representatives, successors and assigns, respectively, severally waive diligence, presentment, protest, and demand, and notice of protest, dishonor and non-payment of this Note, and expressly waive any rights to be released by reason of any extension of time or change in terms of payment, or change, alteration or release of any security given for the payments hereof, and expressly waive the right to plead any and all statutes of limitations as a defense to any demand on this Note or agreement to pay the same, and jointly and severally agree to pay all costs of collection when incurred, including reasonable attorneys fees. If an action is instituted on this Note, the undersigned promises to pay, in addition to the costs and disbursements allowed by law, such sum as a court may adjudge reasonable as attorneys' fees in such action.

11. Severability. If any provision of this Note shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions hereof shall not in any way be affected or impaired thereby.

12. No Waiver by the City. No waiver of any breach, default or failure of condition under the terms of this Note shall be implied from any failure of the City to take, or any delay by the City in taking, action with respect to such breach, default or failure or from any previous waiver of any similar or unrelated breach, default or failure; and a waiver of any term of the Note must be made in writing and shall be limited to the express written terms of such waiver.

13. Joint and Several Obligations. This Note is the joint and several obligation of all makers, sureties, guarantors and endorsers, and shall be binding upon them and their successors and assigns.

14. Governing Law. This Note shall be construed in accordance with and be governed by the laws of the State of California.

EXHIBIT O

15. Non-recourse; Assignment by City. This Note constitutes a portion of the unpaid balance of the purchase price of the Residence. Borrower shall have no personal liability for any deficiency on this Note and the only remedy available to the City or any holder in due course shall be foreclosure pursuant to law as provided in the Deed of Trust. The City may assign its right to receive the proceeds under this Note to any person and upon notice to Borrower by the City all payments shall be made to the assignee.

DEED OF TRUST AND ASSIGNMENT OF RENTS
(Short Form)

THIS DEED OF TRUST, made this between

TRUSTOR: whose address is

TRUSTEE:
and BENEFICIARY: City of Livermore, a Municipal Corporation

Witnesseth: That Trustor IRREVOCABLY GRANTS, TRANSFERS AND ASSIGNS to TRUSTEE IN TRUST, WITH POWER OF SALE, that property in the City of Livermore, Alameda County, State of California, described as:

SEE EXHIBIT "A" ATTACHED HERETO AND MADE A PART HEREOF

The lien of this Deed of Trust is inferior and subordinate to the lien of that certain Trust Deed executed by Trustors named above for the benefit of dated securing an original amount of $, which is recorded concurrently herewith.

If the Trustor/Grantor shall sell, convey or alienate said property, or any part thereof, or any interest therein, or shall be divested of his title or any interest therein in any manner or way, whether voluntarily or involuntarily, without the written consent of the Beneficiary being first had and obtained, Beneficiary shall have the right, at its option, except as prohibited by law, to declare any indebtedness or obligations secured hereby, irrespective of the maturity date specified in any Note evidencing the same, immediately due and payable.

TOGETHER WITH the rents, issues, and profits thereof, SUBJECT, HOWEVER, to the right, power and authority given to and conferred upon Beneficiary by paragraph 10 of the provisions, incorporated by reference, to collect and apply such rents, issues and profits.
FOR THE PURPOSE OF SECURING: 1. Performance of each agreement of Trustor, incorporated by reference or contained herein. 2. Payment of the indebtedness evidenced by one Promissory Note of even date herewith, and any extension or renewal thereof, in the principal sum of $, executed by Trustor in favor of Beneficiary or order. 3. Payment of such further sums as the then record Owner of said property hereafter may borrow from Beneficiary, when evidenced by another Note (or Notes) reciting it is so secured
TO PROTECT THE SECURITY OF THIS DEED OF TRUST, TRUSTOR AGREES: By the execution and delivery of this Deed of Trust and the Note secured hereby, that provisions (1) to (14), inclusive, of the fictitious deed of trust recorded in Santa Barbara County and Sonoma County on October 18, 1961, and in all other counties on October 23, 1961, in the book and page of the Official Records in the office of the county recorder of the county where said property is located, noted below and opposite the name of such county, viz:

DO NOT RECORD

The following is a copy of provisions (1) to (14), inclusive, of the fictitious Deed of Trust, recorded in each county In California, as stated in the foregoing Deed of Trust and incorporated by reference In said Deed of Trust as being a part thereof as if set forth at length therein.

TO PROTECT THE SECURITY OF THIS DEED OF TRUST, TRUSTOR AGREES:

(1) To keep said property in good condition and repair; not to remove or demolish any building thereon; to complete or restore promptly and in good and workmanlike manner any building which may be constructed, damaged or destroyed thereon, and to pay when due all claims for labor performed and materials furnished therefore; to comply with all laws affecting said property or requiring any alterations or improvements to be made thereon; not to commit or permit waste thereof; not to commit, suffer or permit any act upon said property in violation of law; to cultivate, irrigate, fertilize, fumigate, prune and do all other acts which from the character or use of said property may be reasonably necessary, the specific enumerations herein not excluding the general.

(2) To provide, maintain and deliver to Beneficiary fire Insurance satisfactory to and with loss payable to Beneficiary. The amount collected under any fire or other insurance policy may be applied by Beneficiary upon indebtedness secured hereby and in such order as Beneficiary may determine, or at option of Beneficiary the entire amount so collected or any part thereof may be released to Trustor. Such application or release shall not cure or waive any default or notice of default hereunder or invalidate any act done pursuant to such notice.

(3) To appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; and to pay all costs and expenses, including cost of evidence of title and attorneys' fees in a reasonable sum, in any such action or proceeding in which Beneficiary or Trustee may appear, and in any suit brought by Beneficiary to foreclose this Deed.

(4) To pay: at least ten days before delinquency, all taxes and assessments affecting said property, including assessments on appurtenant water stock; when due, all encumbrances, charges and liens, with interest, on said property or any part thereof, which appear to be prior or superior hereto; all costs, fees and expenses of this Trust. Should Trustor fail to make any payment or to do any act as herein provided, then Beneficiary or Trustee, but without obligation so to do and without notice to or demand upon Trustor and without releasing Trustor from any obligation hereof, may: make or do the same in such manner and to such extent as either may deem necessary to protect the security hereof, Beneficiary or Trustee being authorized to enter upon said property for such purposes; appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; pay, purchase, contest or compromise any encumbrance, charge or lien which in the judgment of either appears to be prior or superior hereto; and, in exercising any such powers, pay necessary expenses, employ counsel and pay his reasonable fees.

(5) To pay Immediately and without demand all sums so expended by Beneficiary or Trustee, with interest from date of expenditure at the rate called for in the note secured hereby, or at the amount allowed by law at date of expenditure, whichever is greater, and to pay for any statement provided for by law in effect at the date hereof regarding the obligation secured hereby any amount demanded by the Beneficiary not to exceed the maximum allowed by law at the time when said statement is demanded.

(6) That any award of damages in connection with any condemnation for public use of or injury to said property or any part thereof is hereby assigned and shall be paid to Beneficiary who may apply or release such moneys received by him in this same manner and with the same effect as above provided for disposition of proceeds of fire or other insurance.

(7) That by accepting payment of any sum secured hereby after its due date, Beneficiary does not waive his right either to require prompt payment when due of all other sums so secured or to declare default for failure so to pay.

(8) That at any time or from time to time, without liability therefore and without notice, upon written request of Beneficiary and presentation of this Deed of Trust and said note for endorsement, and without affecting the personal liability of any person for payment of the indebtedness secured hereby, Trustee may: reconvey any part of said property; consent to the making of any map or plat thereof; join in granting any easement thereon; or join in any extension agreement or any agreement subordinating the lien or charge hereof.

(9) That upon written request of Beneficiary stating that all sums secured hereby have been paid, and upon surrender of this Deed of Trust and said Note to Trustee for cancellation and retention and upon payment of its fees, Trustee shall reconvey, without warranty, the property then held hereunder. The recitals in such reconveyance of any matters or facts shall be conclusive proof of the truthfulness thereof. The Grantee is such reconveyance may be described as "the person or persons legally entitled thereto.· Five years after issuance of such full reconveyance, Trustee may destroy said Note and this Deed of Trust (unless directed in such request to retain them.)

(10) That as additional security, Trustor here6y gives to and confers upon Beneficiary the right, power and authority, during the continuance of these Trusts, to collect the rents, issues and profits of said property, reserving unto Trustor the right, prior to any default by Trustor in payment of any indebtedness secured hereby or in performance of any agreement hereunder, to collect and retain such rents, issues and profits as they become due and payable. Upon any such default, Beneficiary may at any time without notice, either in person, by agent, or by a receiver to be appointed by a court, and without regard to the adequacy of any security for the indebtedness hereby secured, enter upon and take possession of said property or any part thereof, in his own name sue for or otherwise collect such rents, issues and profits, including those past due and unpaid, and apply the same, less costs and expenses of operation and collection, including reasonable attorneys' fees, upon any indebtedness secured hereby, and in such order as Beneficiary may determine. The entering upon and taking possession of said property, the collection of such rents, Issues and profits and the application thereof as aforesaid, shall not cure or waive any default or notice of default hereunder or invalidate any act pursuant to such notice.

(11) That upon default by Trustor in payment of any indebtedness secured hereby or in performance of any agreement hereunder, Beneficiary may declare all sums secured hereby immediately due and payable by delivery to Trustee of written declaration of default and demand for sale and of written notice of default and of election to cause to be sold said property, which notice Trustee shall cause to be filed for record. Beneficiary also shall deposit with Trustee this Deed of Trust, said Note(s) and all documents evidencing expenditures secured hereby.

After the lapse of such time as may then be required by law following the recordation of said notice of default, and notice of sale having been given as then required by law, Trustee, without demand on Trustor, shall sell said property at the time and place fixed by it in said notice of sale, either as a whole or in separate parcels, and In such order as it may determine, at public auction to the highest bidder for cash in lawful money of the United States, payable at time of sale. Trustee may postpone sale of all or any portion of said property by public announcement at such time and place of sale, and from time to time thereafter may postpone such sale by public announcement at the time fixed by the preceding postponement. Trustee shall deliver to such purchaser its deed conveying the property so sold, but without any covenant or warranty, express or implied. The recitals in such deed of matters or facts shall be conclusive proof of the truthfulness thereof. Any person, including Trustor, Trustee, or Beneficiary as hereinafter defined, may purchase at such sale.

After deducting all costs, fees and expenses of Trustee and of this Trust, including cost of evidence of title in connection with sale, Trustee shall apply the proceeds of sale to payment of: all sums expended under the terms hereof, not then repaid, with accrued interest at the amount allowed by law in effect at the date hereof; all other sums then secured hereby; and the remainder, if any, to the persons or persons legally entitled thereto .. -

(12) Beneficiary, or any successor in ownership of any Indebtedness secured hereby may, from time to time, by instrument in writing, substitute a successor or successors to any Trustee named herein or acting hereunder, which instrument, executed by the Beneficiary and duly acknowledged and recorded in the office of the recorder of the county or counties where said property is situated, shall be conclusive proof of proper substitution of such successor Trustee or Trustees, who shall, without conveyance from the Trustee predecessor, succeed to all its titJe, estate, rights, powers and duties, must contain the name of the original Trustor, Trustee and Beneficiary hereunder, the book and page where this Deed of Trust Is recorded and the name and address of the new Trustee.

(13) That this Deed of Trust applies to, insures to the benefit of, and binds all parties hereto, their heirs, legatees, devisees, administrators, executors, successors and assigns. The term Beneficiary shall mean the owner and holder, Including pledgees, of the Note secured hereby, whether or not named as Beneficiary herein. In this Deed of Trust, whenever the context so required, the masculine gender includes the feminine and/or neuter, and the singular number includes the plural.

(14) That Trustee accepts this Trust when this Deed of Trust, duly executed and acknowledged, is made a public record as provided by law. Trustee is not obligated to notify any party hereto of pending sale under any other Deed of Trust or of any action or proceeding in which Trustor, Beneficiary or Trustee shall be party unless brought by Trustee.

Exhibit P

Public Art Contribution

Introduction

This Exhibit P describes the Developer obligations for the public art contribution for the Project.

Public Art

The City established an Art in Public Places Program (Art Program) (LMC Chapter 12.51) to promote cultural and artistic assets on private development, to improve the City's aesthetic and visual quality, to revitalize the City, and to promote the public's understanding and enjoyment of cultural diversity. To these ends, the Art Program requires the following:

1. Private Development projects are required to contribute to the City's Art Program in an amount no less than 1/3 of one percent of the total Project construction costs.

2. The Art Program allows contributions to consist of public artwork or in-lieu fees.

3. Public artwork means works of art created by artists as unique and original works, in any medium including but not limited to painting, drawing, printmaking, photography, calligraphy, ceramic, sculpture, glass, liquid, water features, murals, light earthworks, conceptual and temporal pieces, functional elements if designed by a professional artist, and art that is integrated into a project's architecture. It may include space for exhibitions, displays or demonstrations and public performances. The artwork may be created through collaboration between the Commission for the Arts, the artist and the community.

The Project's art contributions shall implement the City's Art Program, as follows:

1. Art Master Plan. To ensure a cohesive art design throughout the Project site, the Developer shall prepare a comprehensive Art Master Plan that covers the entire project site and includes a variety of art installations and programs. The requirements of the Master Plan are outlined below:

    a. *Timing and Review*. Within twelve (12) months of Development Agreement approval, Developer shall submit an Art Master Plan to the Director for review. The Developer shall obtain Art Master Plan approval from the Director and the Commission for the Arts within twenty-four (24) months of Development Agreement approval, subject to the Force Majeure provisions of the Agreement.

    b. *Content.* The Arts Master Plan shall include required art as identified in paragraph b(i), below, and a series of art options listed in paragraphs b(ii) – b(iv), below, developer or developer's representative may choose from any of the items listed in paragraphs b(ii) – b(iv), below, to meet the City's art requirements, subject to the

final approval of the Director.

i. Iconic Art. The Art Master Plan shall include the "Iconic Sculpture Installations" in the locations shown on Sheet L1-4 of the Development Plans (Exhibit B). The Iconic Sculptures shall be the largest, most prominent art pieces in the Project and shall be visible from the public right-of-way.

1. The Art Master Plan shall include the sizes, conceptual designs, locations (including Project Planning Areas), and value of all proposed art pieces.

ii. Small Art Installations: The remaining Murals, Small Sculptures, and Decorative Arts shown on Sheet L1-4 of the Development Plans (Exhibit B) and any other art installations may be included in the Art Master Plan, subject to the requirements of this section. The Art Master Plan shall include conceptual locations and reference imagery of proposed small art installations.

iii. Art Space. At the discretion of Director, consistent with Exhibit E (Commercial Exhibit) of this Agreement, the Art Master Plan may include dedication of commercial tenant square footage or Temporary Commercial Activation areas as an art gallery, public art space, or other space for exhibitions, displays or demonstrations and public performances.

1. Consistent with Exhibit E (Commercial Exhibit) of this Agreement, the Master Art Plan shall include the value of the dedicated commercial tenant square footage.

iv. Arts and Cultural Programming. The Art Master Plan may include Arts and Cultural Programming to be held within the Project site.

1. The Art Master Plan shall include a description of the proposed programming and quantity of events.

2. The Art Master Plan shall include the value of the Arts and Cultural Programming.

c. *Commission for the Arts.* The Developer recognizes that the Commission for the Arts is a public body and may require modifications to the proposed Art Master Plan. The Developer further recognizes that Commission for the Arts review may take up to six (6) months. At the discretion of the Director, the timeframes of section 1.a., above, may be extended upon the reasonable request of the Developer for the purposes of accomplishing the purposes of this Exhibit.

2. Contributions. Consistent with the Art Program and prior to the first Building Permit issuance for each Planning Area, the Developer or Successor(s) shall pay, and the City shall accept, an Art fee in an amount equivalent to 1/3 of one percent of the such Planning Area's total construction costs, subject to the following:

Exhibit P
Public Art Contribution

a. The Administrative Services Director shall place such funds in an art account dedicated to the Project (the "Project Art Account").

b. The funds shall only be used within the Project site.

c. The funds shall be used to implement the approved Art Master Plan.

3. Implementation. Developer shall work with a master Art Consultant as follows:

a. The Art Consultant shall construct or oversee the construction of all art pieces and coordinate any Arts and Cultural Programming identified in the approved Art Master Plan.

b. Each Art Piece and the Arts and Cultural Programming shall be consistent with that shown in the Art Master Plan, including with respect to size, quantity, location, design, operating characteristics, etc.

c. The Art Consultant shall utilize, and the Administrative Services Director shall disperse, funds from the Project Art Account to pay for installation of the required artwork and Arts and Cultural Programming.

d. Prior to installation of public art or execution of an arts program, the Art Consultant shall propose projects to the Commission for the Arts, which will make a finding of consistency with the Art Master Plan or identify necessary changes to achieve consistency with the Plan.

e. The Art Consultant shall construct the art pieces and host the Arts and Cultural Programming subject to the timelines described in this Exhibit.

4. Art Easement. Prior to small lot Final Map approval for each Planning Area identified in Exhibit B, Developer or any Successor(s) shall provide an Art Piece Easement on the small lot Final Map in the "Iconic Sculpture Installation" locations and the locations of any small art piece installations specified in the Art Master Plan, as approved by the Director.

5. Art Installation. Prior to the first Certificate of Occupancy of the last building within each Planning Area, the Art Consultant shall install, or cause to install, the art pieces, as described in the Art Master Plan, unless otherwise approved through an art installation plan by the Director.

a. *Other Permits.* The Developer and Art Consultant shall obtain all required permits (e.g. Building Permits, Encroachment Permits, etc.) prior to installation.

6. Unused Funds. If any funds remain in the Project Art Account after implementation of the Art Master Plan is complete, the remaining account balance shall be used for Arts and Cultural Programming, additional art pieces within the Project site, or paid to the City as an in-lieu arts fee for use citywide, as determined by the Director.

Exhibit P
Public Art Contribution

7. Failure to Perform. The Developer and Art Consultant shall adhere to the Art Master Plan, the incorporated schedule, and the requirements of this Exhibit. If the Developer and Art Consultant fail to perform in accordance with the requirements of this Exhibit, subject to the Force Majeure and default and cure provisions under Sections 18, 20 and 21 of this Agreement, the City may use any and all funds in the Project Art Account for public art purposes citywide. Further, if the Developer fails to perform, nothing in this Exhibit precludes the City from utilizing any other remedy described in this Agreement.

8. Amendment. The City and/or Developer may amend the approved Master Art Program subject to further approval by the Commission of the Arts.

EXHIBIT Q

Financial Contribution Exhibit

Introduction

This Exhibit Q describes the Developer obligations for financial contributions for the Development Agreement and the Project.

Social Opportunity Endowment (SOE) Fund

1. Developer shall make a $800,000 funding contribution to the Livermore SOE Fund pursuant to the following payment structure:

    a. Prior to recordation of the first Final Map, Developer shall pay $300,000 to the City.

    b. Prior to tract acceptance, Developer shall pay $500,000 to the City.

Community Benefit Fund

1. Developer shall make a $1.2 million funding contribution to the Livermore Community Benefit Fund, subject to the following:

    a. Prior to recordation of the first Final Map, Developer shall pay $300,000 to the City.

    b. Prior to tract acceptance, Developer shall pay $300,000 to the City.

    c. Prior to the first Certificate of Occupancy of the first Commercial Block, Developer shall pay $600,000 to the City.

    d. Half of the total funds ($600,000) shall be utilized to facilitate tenancy or temporary commercial occupancy within the Project to support and enhance the vitality of the neighborhood serving commercial district.

Early Park Contribution

1. Developer shall make an early $2,000,000 funding contribution to the City for Park Improvements concurrently with the formation of the Infrastructure Financing CFD (Exhibit J). This early park improvement funding contribution shall be credited against the Developer's overall required Park Fee contribution.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION APPROVING VESTING TENTATIVE TRACT MAP (VTTM) 8659 - SUBDIVISION (SUB) 22-008, SITE PLAN DESIGN REVIEW (SPDR) 24-003, CONDITIONAL USE PERMIT (CUP) 24-002, AND MASTER SIGN PROGRAM AMENDMENT (MSP) 24-001; THE DENSITY BONUS REQUEST; THE NO NET LOSS ANALYSIS; THE PROPOSED MASTER PLAN; AND THE PROPOSED ALTERNATIVE AFFORDABLE PLAN FOR THE ISABEL CROSSING PROJECT

On September 22, 2022, the City of Livermore ("City") received an application from Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant") to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On March 13, 2023, the City Council adopted the 2023 to 2031 Livermore Housing Element, providing adequate sites to support CA's Regional Housing Needs Allocation (RHNA) requirements.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA 22-001), Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new community facilities district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

The Applicant provided all the necessary information to qualify for relief under State Density Bonus Law (CA Government Code Sections 65915 - 65918), upon amended application submittal on May 10, 2024. The Applicant qualifies for unlimited Waivers and two Incentives/ Concessions. The Applicant has requested nine Waivers and one Incentive/Concession.

The Project provides fewer Lower Income units than anticipated in the Livermore Housing Element's Sites Inventory and is required to undergo a No Net Loss Review, as required by Government Code Section 65863.

The Project seeks a Master Plan and an Alternative Affordable Plan, pursuant to the Isabel Neighborhood Specific Plan and the Livermore Development Code, as amended.

On July 2, 2024, at a duly noticed public hearing, the Planning Commission considered the Project, heard public testimony, made the necessary findings, and adopted: 1) Planning Commission resolution No. 16-24, attached hereto as Exhibit A, recommending the City Council approve the Project; and 2) Planning Commission resolution No. 20-24, attached hereto as Exhibit B, finding the Project's easement vacation to be consistent with the General Plan.

On July 22, 2024, the City Council held a duly noticed public hearing to consider the Project, Planning Commission and staff recommendations, all public comments and testimony, and findings.

Together with this resolution, the City Council concurrently considered a resolution for the Project's Specific Plan Amendment (SPPA) 24-001 application; and ordinances for 1) the Project's Development Agreement (DA) 22-001 application; and 2) the Project's Development Code Amendment (DCA) 24-001 application.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the City Council reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The City Council's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED that the City Council of the City of Livermore has considered the Record Evidence and adopted a resolution adopting an Addendum to the 2020 Isabel Neighborhood Specific Plan Supplemental Environmental Impact Report (SCH #2016042039), consistent with the requirements of the Environmental Quality Act ("CEQA").

BE IT FURTHER RESOLVED that the City Council of the City of Livermore has considered the findings made in Planning Commission Resolution No. 16-24, attached hereto as Exhibit A, and the City Council hereby adopts the same findings by this reference and incorporates them as their own findings as part of this resolution, and as described below:

Vesting Tentative Tract Map 8659 – Subdivision 22-008:

1. The proposed map is consistent with the General Plan and any applicable specific plan, any policy or guideline implementing the General Plan (including the City's Design Standards and Guidelines), or other applicable provisions of this Development Code;

   Findings: The Project is consistent with the intent of the General Plan designation of Isabel Neighborhood Specific Plan given that it provides higher density housing adjacent to transit service and job centers and provides a mix of unit types, sizes, and affordability levels. The Project also implements the Land Use, Housing, Community Character, and Climate Change elements by providing affordable housing near transit that is of a high-quality architectural design and that provides sustainable features like photovoltaic arrays and EV chargers. The Project is consistent with the density range, open space, and design standards and guidelines of the Isabel Neighborhood Specific Plan. With the use of State density bonus Waivers, the Project is consistent with the development standards related to setbacks and height.

2. The site is physically suitable for the proposed type of development;

   Findings: The site is located within the Isabel Neighborhood, which is identified as one of the densest areas in the City. The site is entirely within the City limits and is surrounded by street rights of way and urbanized residential uses. The site is approximately 45 acres. The size of the developable land is large enough to accommodate the proposed apartment buildings, mixed-use buildings, and three-story townhouse buildings, two pocket plazas, town square, recreation center, neighborhood park, and private open spaces. The applicant prepared Phase I, geologic, and biological, studies that found the site contains no hazards, is suitable for residential development, and contains no special-status species. Therefore, the site is physically suitable for the proposed type of development.

3. The site is physically suitable for the proposed density of development;

   Findings: As currently zoned on the project site, the lsabel Neighborhood Specific Plan establishes density ranges of 25-40 units per acre for the Village zoning district, 40-60 units for the Center zoning district, and 60-100 units for the Core zoning district. The developable acreage of the site is approximately 45 acres with a proposed 1,299 units. The Specific Plan Amendment will include the re-designation of zones on the project site to remove the Core zoning designation and average the uses and densities across the project site. Given the existing urbanized nature of surrounding parcels, all required public utilities are located adjacent to the site in the street right-of-way, including: water, sewer, storm drain, telecommunications, and electricity. Services including police, fire, and medical already serve the neighborhood area, including the parcel. The Project is within the Specific Plan's and EIR's anticipated density range even with the proposed

Specific Plan amendment. The Isabel Neighborhood Specific Plan Final EIR and Supplemental Final EIR concluded that existing utilities and services have sufficient capacity to accommodate buildout of the Specific Plan, including the incremental increase in demand from the Project. In addition, an Addendum to the Specific Plan EIR has been prepared for the proposed Project and found that no significant impacts would occur as a result of the change in zoning, use, and density. Therefore, the site is physically suitable for the proposed density of development.

4. The design of the subdivision or the proposed improvements will not cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat. Notwithstanding the foregoing, the Commission or Council may approve a tentative map if an Environmental Impact Report was prepared with respect to the Project and a statement of overriding considerations was made to the effect that specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the EIR;

   Findings: The Isabel Neighborhood Specific Plan Final EIR and Supplemental Final EIR analyzed all potential environmental impacts of development in the Isabel Neighborhood. The EIR was prepared at a "zoning action" level, for purposes of Public Resources Code section 21083.3 and CEQA Guidelines section 15183, in that it includes enough specificity for future Specific Plan projects to rely on its analysis and limits the need for CEQA review for future Specific Plan projects. The City Council adopted a Statement of Overriding Considerations with the EIR and found that the plan would have significant and unavoidable impacts with respect to traffic, air quality, aesthetics, noise, cultural/ tribal resources, and agricultural resources, but that the City's transit, housing, and economic goals outweighed the impacts, as allowed under CEQA.

   The Council found that the mitigation measures identified in the EIR would reduce all other impacts to a less than significant level. Given that the Project is within the density and intensity levels contemplated by the EIR, no environmental impacts beyond those identified in the EIR would occur. Although the proposed Project proposes a change in zoning and the implementation of Master Planning, an Addendum to the Specific Plan EIR has been prepared for the proposed Project and found that no significant impacts would occur as a result of the change in zoning, use, and density. Further, the applicant prepared geologic, biological, and noise studies and found no impacts peculiar to the Project would occur beyond those identified in the EIR. The Project is also conditioned to conform with the Mitigation, Monitoring, and Reporting Program (MMRP) adopted with the certified EIR, ensuring all other environmental impacts remain less than significant.

5. The design of the subdivision or the type of improvements will not cause serious public health problems;

Findings: The Project will not be detrimental to the public health, safety, or general welfare, and not cause serious health problems. The Project provides adequate emergency vehicle access throughout the site and necessary ladder pads for fire access to upper floors. The Project complies with the County Airport Land Use Compatibility Plan with respect to height, density, or noise and complies with FAA height standards. Water and sewer service will be provided to all units and stormwater will be appropriately managed on site. The site layout is suitable for trash truck pickup and adequate space will be provided in each unit garage, including those units in the apartments and mixed-use buildings, for all waste streams. The applicant prepared, geologic, biological, and noise studies that found no significant impacts would occur beyond those identified in the EIR. Interior noise levels would not exceed 45 dBA, as required by CA Building Code. In addition, no surficial or subsurface hazardous materials were discovered onsite, and the residential use would not produce any hazardous materials, nor substantial noise, odor or vibration during regular operations. The Project will work with the Alameda County Vector Control to minimize vermin spread to adjacent properties during construction. For these reasons, the design of the subdivision or the type of improvements will not cause serious public health problems.

6. The design of the subdivision or the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision. (The Commission or Council may approve a tentative map if it finds that alternative easements for access will be provided, and that these will be substantially equivalent to ones previously acquired by the public. This Subparagraph shall apply only to easements of record or to easements established by judgment of a court of competent jurisdiction, and no authority is hereby granted to the Commission to determine that the public at large has acquired easements for access through or use of property within the proposed subdivision.); and

   Findings: The Project Site contains existing easements for utilities, emergency vehicle access, and pedestrian access. All of the public easements would remain in place or, if it becomes necessary, would be modified with the agreement of all public easement right holders in manner that preserves any required public services associated with any such easements. Additionally, an avigation easement is on record for the property that would remain in place. The easements will not conflict with the Project's proposed building footprints. Accordingly, the design of the subdivision and the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision.

7. Any proposed phases and their proposed sequence of construction are identified on the submitted tentative map. The City may impose reasonable conditions relating to the filing of multiple final maps in conjunction with the approval of the tentative map (Section 66456.1).

Findings: The Project proposes a master, large lot VTTM proposed to be implemented in a single-phase. The VTTM includes appropriate conditions of approval that ensure that required improvements needed to serve the Project and otherwise improve the Project Site and surrounding streets for the benefit of the City and the public. Future Planning Area-specific subdivision maps would be proposed for the City's approval as the Project's Planning Areas are built out on a Planning Area-basis in accordance with the sequence of construction set forth in the Project approvals and consistent with the sale of Planning Areas to builders, market conditions and demand.

Site Plan Design Review 24-003:

1. The proposed development will be permitted within the subject zone.

   Findings: The Project Site is zoned INSP, which generally permits multi-family housing, office, business park, and commercial uses. Within the INSP zone, the Project Site includes INSP zoning designations Village, Center, Core, Neighborhood Commercial, Office Core and Open Space, in addition to the Ground Floor Retail/Flex Space Overlay. The Project proposes a mix of development that includes multi-family housing, retail, restaurant and commercial development, a community serving grocery store or food hall, and a variety of public open space areas and amenities, including a new neighborhood park, public plazas, public trails, and bike lanes. All of the Project's proposed uses are permitted by the Project Site's applicable zoning designations, inclusive of the proposed approval of the Project as a master planned development pursuant to INSP Policy P-LU-8, as amended by the Specific Plan Amendment.

2. The proposed development will be designed such that:

   a. The project will not be detrimental to the public health, safety, or general welfare, and not detrimental to adjacent property;
   b. Architectural design and functional plan of the structure(s) and related improvements are of reasonable aesthetic quality and compatible with adjacent developments;
   c. Structure(s) and related improvements are suitable for the proposed use of the property and provide adequate consideration of the existing and contemplated uses of land and orderly development in the general area of the subject site; and
   d. The project's site plan and design are consistent with the City's Design Standards and Guidelines.

      Findings: The proposed Project will not be detrimental to the commercial, residential and institutional uses of adjacent properties. The Project provides adequate emergency vehicle access throughout the site and necessary ladder pads for fire access on upper floors. The Project does not conflict with the County Airport Land Use Compatibility Plan with respect to height, density, or

noise and complies with FAA height standards. Water and sewer service will be provided to all units and stormwater will be appropriately managed on site. The site layout is suitable for trash pickup and adequate space will be provided in each residential unit garage and each apartment and mixed-use buildings for all waste streams.

The Project proposes a variety of architectural styles that vary by building type, emphasizing contemporary designs and building materials. The design will feature contemporary and traditional architectural styles. A total of 10 residential product types are proposed, which include apartments, flats, townhomes, duplexes, and triplexes, and three of the proposed apartments and flat buildings are mixed-use buildings designed with ground floor commercial uses.

The proposed contemporary and traditional architectural styles incorporate design features and materials that will be compatible with existing and future developments in the surrounding areas. Additionally, the Project utilizes varied building materials, neutral colors, and varied building facades to reduce massing, distinguish each building, and provide a high degree of visual interest, variation and articulation. The proposed color palette and design are compatible with the existing earth tones used in neighboring residential developments.

The Project site is vacant. The proposed structures and improvements to be developed would be suitable for the Project's proposed mix of uses. The Project's Master Plan is configured into 19 different planning areas with varying development types that include townhomes, apartments, condominiums, duplexes, triplexes, open space areas and amenities, and commercial uses oriented around the proposed new commercial Main Street. The structures and improvements would be compatible with the business park and commercial uses to the west of the Project site and residential uses to north of the Project site across Portola Avenue and to the east of the Project site across Isabel Avenue. Additionally, the arrangement of structures and improvements provides for appropriately scaled and orderly development and circulation throughout the Project Site.

The Project proposes a variety of architectural styles that vary by building type, emphasizing contemporary designs and building materials that are consistent with the Specific Plan and the City's design standards and guidelines. The townhomes, duplexes, and triplexes feature slanted roofs, board and batten, gable trim, awnings and canopies, box windows, and columns. The condominiums and apartments feature flat roofs and articulated building facades. The building's fenestration promotes order and variety. Massing is generally repeated at regular intervals, establishing a rhythm throughout the Project. Additionally, the proposed color palette is compatible with existing earth tones used in neighboring residential developments. The project

proposes a richly detailed and varied blend of contemporary, traditional, and modern style and complies with the design requirements of the City's Design Standards and Guidelines.

The Project is also conditioned to conform with the Mitigation, Monitoring, and Reporting Program (MMRP) adopted with the certified 2020 Supplemental EIR. The Project is not detrimental to adjacent properties and considers adjacent uses in the general area. All project frontages contain substantial landscaping and trees to appropriately screen the proposed buildings. The Project meets applicable parking standards. The residential use promotes synergy with surrounding uses, locating residents close to job centers, and will not produce any dust, odor, noise, or glare during regular operations. The structures are suitable for the site and the site plan is consistent with the City's Design Standards and Guidelines.

3. The proposed development is designed to include the following criteria, as applicable:

   a. Compliance with Chapter 9.07 of the Development Code (Site Plan and Design Review), Municipal Code Title 15 (Buildings and Construction), and any other applicable City regulations and policies;
   b. Efficient site layout and design;
   c. Compatible and appropriate in scale to neighboring properties and developments.
   d. Efficient and safe public access (both pedestrian and vehicular) and parking;
   e. Appropriate and harmonious arrangement and relationship of proposed structures and signs to one another and to other development in the vicinity, based on good standards of design;
   f. Appropriate relationship to land use and development of adjacent properties, including topographic and other physical characteristics of the land;
   g. Proper site utilization and the establishment of a physical and architectural relationship to existing and proposed structures on the site;
   h. Compatible architectural style with the character of the surrounding area, both to avoid repetition of identical design where not desired, and to ensure compatibility in design where desired;
   i. Harmonious relationship with existing and proposed developments and the avoidance of both excessive variety and monotonous repetition;
   j. Compatible in color, material, and composition of the exterior elevations to neighboring visible structures;
   k. Appropriate exterior lighting which provides for public safety and is not of a nature that will constitute a hazard or nuisance to adjacent properties;
   l. Compatible in scale and aesthetic treatment of proposed structures with public areas;
   m. Appropriate open space and use of water efficient landscaping; and
   n. Consistent with the General Plan and any applicable Specific Plan.

Findings: The proposed mixed-use development is compliant with the Project site's zoning and would comply with all building code requirements and any additional applicable City regulations pertaining to the development and operation of the Project.

The design, location, size, and operating characteristics of the Project makes the Project Site suitable for the type, density, and intensity of use being proposed. The Project, much like the neighboring residential developments located north of Portola Avenue and east of Isabel Avenue, will feature a variety of residential unit types with community amenities and gathering spaces. Non-residential spaces such as the neighborhood park, recreation center, and pocket plaza, will provide residents and guests with areas for leisure, exercise, and gathering.

The Project is of compatible and appropriate scale to neighboring properties and development. Directly adjacent to the property to the east is the Lam Research facility and a business park. North of the Project Site across Portola Avenue is an existing residential development of similar scale that features various unit types, including townhomes. East of the Project Site across Isabel Avenue is vacant land and beyond that is another existing residential development that also features a variety of residential unit mixes and residential amenities. Southwest of the Project Site across I-580 are office, commercial, and industrial uses. Accordingly, the Project would be compatible with existing neighboring developments.

The existing street network will serve the project. Vehicular access would be provided via four access points. Two points of vehicular ingress and egress would be located along Portola Avenue and two points of vehicular ingress and egress would be located along Isabel Avenue. The project proposes four new public streets and several new private alleys that would be internal to the development. Four community entries are proposed throughout the Project Site. The community entries would be located at the ends of the private streets and would also include pedestrian pathways to ensure pedestrian safety.

The Project Site's proximity to major roadways and highways and the internal roadways within the Project provide sufficient public and emergency vehicle access. The Project would provide 2,167 parking spaces within private garages, above-grade parking garages, on the proposed streets. A bus stop would be located along Isabel Avenue and another along Portola Avenue. Accordingly, the Project would provide efficient and safe public access.

The structures are strategically arranged and designed to be visually appealing, functional, and to facilitate pedestrian and vehicular traffic throughout the Project site. A neighborhood sign element is proposed at one of the access points along Isabel Avenue.

The adjacent properties to the east and west consist of similar, mostly flat, topographic conditions. The proposed land use and development would be compatible with adjacent properties. The mixed-use development would be carefully configured within existing city streets and proposed internal streets, allowing for efficient circulation and access. Additionally, the Project would feature a pedestrian connection to the neighboring business park along the proposed Gateway Avenue which would run perpendicular to the existing Shea Center Drive.

The Project site does not contain any existing structures. The Project's configuration is harmonious with neighboring developments, creating a gradual increase in density generally from the north where there are existing residential units to the south where densities are higher in the proposed Project.

The proposed residential and mixed-use buildings and recreation facility would be properly configured with respect to existing Project Site conditions. There are a total of 10 different product types. The townhomes, duplexes, and triplexes will feature contemporary and traditional architectural styles. The apartments and condos will feature modern architectural styles. The combination of product types and architectural styles vary the building massing. Additionally, courtyards and podiums break up the massing in the apartment and condominium unit types. Massing is generally repeated at regular intervals, which would establish an effortless rhythm throughout the Project.

The Project proposes a variety of architectural styles that vary by building type, emphasizing contemporary designs and building materials. As discussed previously, the architectural styles include contemporary and traditional architectural styles that are compatible with the existing residential development in the vicinity. However, variations are incorporated so that the residential developments in different portions of the Project site are uniquely identifiable. The residential development will consist of a mix of flats, townhomes, triplexes, and duplexes, so that they are not repetitious and contribute to a desirable walkable environment.

The Project is designed such that it will be well integrated with the adjacent Business Park and features a pedestrian connection to the Business Park along Gateway Avenue. The Project, like neighboring residential Projects, features a variety of unit mixes and types and community open space and amenity spaces. The architectural styles and color palette is compatible with the contemporary styles and earth tone colors used in neighboring developments, avoiding excessive variety. At the same time, the Project maintains its own unique character to avoid monotonous repetition.

The composition of buildings and exterior elevations are compatible with neighboring business park and residential uses. The proposed contemporary, modern, and traditional architectural styles incorporate design features and

materials that distinguish the Project from surrounding developments, while complementing other styles within the Specific Plan and surrounding areas. The proposed color palette is compatible with existing earth tones used in neighboring residential developments. The proposed materials are appropriate, standard materials like those used in adjacent developments.

The Project provides appropriate exterior lighting that promotes public safety and is not of the nature that will constitute a hazard or nuisance to adjacent properties. Streetlights consistent with City standards are proposed throughout the Project's internal roads to provide internal lighting for pedestrian and vehicular travel. Pedestrian-scale lighting is concentrated primarily along Main Street, with additional lighting on the eastern end of Gateway Avenue and along the Project Site's other internal streets. Roadway lights are proposed along Isabel Avenue. All lighting would all comply with the City's lighting standards and will be down shielded to avoid impacts to aircraft.

Proposed structures in public areas will be compatible with the surrounding structures within the development in terms of scale, design and materiality. Additionally, any aesthetic and architectural treatment ensure consistency with the development and with surrounding properties.

The Project proposes to provide 447,259 square feet of open space. The Project would feature water-efficient landscaping throughout, resulting in 203,020 square feet of water efficient landscaping. The Project Site would be Maximum Allowed Water Allowance (MAWA) compliant. In addition, the Project would utilize recycled water for non-potable purposes including irrigation throughout the Project Site.

The Project is consistent with the General Plan in that the Project is located so as to create a consolidated pattern of urbanization, maximizing the use of existing public services and facilities (Objective LU-1.1); it creates neighborhoods that include a mix of uses and a range of housing types to meet the needs of all residents (Objective LU-1.2); it create neighborhoods near transit that include a mix of uses and a range of housing types to meet the needs of all residents (Objective LU-3.1). It maintains and enhances Livermore's urban design quality and encourage high quality design in all new development and redevelopment (Objective CC-2.1); it implements policies and actions that will encourage existing businesses to remain and grow in Livermore and attract a range of new businesses to locate in Livermore (Objective ED-1.1). It encourages and provides greater support for infill, mixed use, and higher density development in order to reduce Greenhouse Gas (GHG) emissions associated with vehicle travel (Objective CLI-1.2); it supports measures that encourage alternative modes of transportation and alternative fuels in order to reduce emissions associated with vehicle travel (Objective CLI-1.3); it enhances existing water efficiency and conservation measures and uses recycled water use and water efficiency in order to reduce energy and GHGs

associated with water use (Objective CLI-1.4); and, it expands the number of trees in Livermore in order to provide a larger carbon sink or area containing natural sources that retain more carbon than what those sources emit (Objective CLI-1.6).

The Specific Plan Goals and Policies are outlined in the Land Use, Transportation, Parks, Public Facilities, and Infrastructure, Urban Design, and Environmental Resources and Conservation chapters. A matrix of the Specific Plan Goals and Policies, and how the Project is consistent with them, is referred to and included in the City Council report as Attachment 36.

Conditional Use Permit (CUP) 24-002:

1. The proposed use is consistent with the General Plan and any applicable Specific Plan;

   Findings: The Development is consistent with the existing General Plan land use designation of Isabel Neighborhood Specific plan and is consistent with Specific Plan requirements as proposed in the Specific Plan Amendment, and meets the Specific Plan goals and intention for subareas 3b and 3c to create a vibrant, walkable mixed-use community with higher density residential uses, public open space amenities that promote recreation and alternative forms of transportation, and job-producing commercial uses within close, walkable proximity of one another. The Project would create a vibrant, safe, and complete neighborhood with a wide range of housing options, commercial spaces, and new job opportunities, as well as support transit ridership and citywide goals for increased transit options. The Project would also be compatible with and would not adversely affect surrounding uses.

2. The proposed use is allowed within the subject zone and complies with all other applicable provisions of this Development Code and the Municipal Code;

   Findings: The Isabel Neighborhood Specific Plan zone generally permits multi-family housing and commercial development uses proposed by the Project. The Project site is within subareas 3b and 3c and uses are further regulated by the Specific Plan designations including Village, Center, Core, Neighborhood Commercial, Office Core and Open Space, in addition to the Ground Floor Retail/Flex Space Overlay. All proposed uses within the mixed-use Project are permitted by the Project site's zoning, as allowed by the Specific Plan Amendment herein and the Specific Plan Master Planning provisions implemented for the Project. The Project otherwise complies with applicable provisions of the Development Code, as proposed to be amended by this project, and the Municipal Code.

3. The design, location, size, and operating characteristics of the proposed activity will be compatible with the existing and future land uses in the vicinity;

Findings: The Project Site is surrounded by office and industrial uses to the west, residential uses and a community college campus to the north; vacant land, open space, and residential uses to the east, and commercial, industrial, and residential uses and an airport to the south, across the I-580 Freeway. The mixed-use development would therefore be consistent and compatible with surrounding uses. The Project would include residential developments that are compatible with the residential uses to the north across Portola Avenue and to the east across Isabel Avenue, and the Project would include public open space amenities including offsite bike lanes and other transportation improvements and community-serving commercial uses that will serve and complement the surrounding commercial, educational and residential uses in a manner consistent with the Master Planning for the Project site under the Specific Plan. The Project would also help to integrate existing surrounding commercial, office, industrial, and residential uses with future uses on vacant adjacent parcels, including a proposed future Valley Link station.

4. The subject site is:

    a. Physically suitable in terms of design, location, size, and operating characteristics, shape, size, topography, and the provision of public and emergency vehicle (e.g., fire and medical) access and public services and utilities; and

    b. Served by highways and streets adequate in width and improvement to carry the kind and quantity of traffic the proposed use would likely generate.

Findings: The 45.38-acre Project site has gently sloping grades that can accommodate the 1,299-unit mixed-use residential and commercial development that is proposed without substantial grading or excavation. While the Project Site is vacant and has not been developed, it is in an area that is surrounded by urban development and is adequately served by public and emergency vehicle access via the City's existing network of public roads and is fully served by existing public services and utilities. Additionally, as a part of the development, the Project will construct a new internal street network that will service the Project site and provide internal vehicular access and utility connections throughout the Project to ensure that the development is adequately served by utilities and public services, including the provision of emergency access through compliance with applicable Development, Municipal, Building, and Fire code standards.

The Project site is located at the southwestern corner of the intersection of Isabel Avenue and Portola Avenue and is located northwest of State Route 84 and north of Interstate 580. As determined by prior environmental analysis of the Specific Plan and for the Project, the kind and quantity of traffic the Project would generate will be adequately served by the Project site's internal streets and the existing network of external roadways and highways in proximity to the Project. Vehicular access would be provided via five proposed vehicular access points. Two points

of vehicular ingress and egress would be located along Portola Avenue, two points of vehicular ingress and egress would be located along Isabel Avenue, and one point along Shea Center Drive. The Project would also add two new traffic signals at the intersection of Isabel Avenue and Gateway Avenue, and at Isabel Avenue and A Street, and improve the existing traffic signal at Main Street and Portola Avenue.

5. The site's suitability ensures that the type, density, and intensity of use being proposed will not endanger, jeopardize, or otherwise constitute a hazard to the public interest, health, safety, convenience, or welfare, or be materially detrimental to the improvements, persons, property, or uses in the vicinity and zone in which the property is located; and

   Findings: The Project proposes to develop 1,299 dwelling units, grocery store, retail, restaurant, and other commercial space, a public park and plazas, other open space, and other residential amenities. The Project is designed to create a harmonious environment where homes and job opportunities are created, and residents and employees have access to regional and local transit. The Project density does not exceed the overall density permitted by the Specific Plan, and the uses proposed would not endanger, jeopardize, or otherwise constitute a hazard to public interest, health, safety, or become a nuisance in the vicinity.

6. The applicant agrees in writing to comply with any and all of the conditions imposed by the review authority in the approval of the Conditional Use Permit or Zoning Use Permit.

   Findings: The Applicant has agreed to comply with any and all of the conditions imposed by the reviewing authority in the approval of the Conditional Use Permit, subject to Development Agreement 22-001.

7. That any other findings prerequisite to approval of a Conditional Use Permit or Zoning Use Permit stated elsewhere in the Development Code can be made. (Ord. 1927 § 3 (Exh. C), 2011.)

   Findings: The Project is not subject to any additional findings prerequisite to approval of a Conditional Use Permit.

Master Sign Program Amendment (MSP) 24-001:

1. The Program is consistent with the regulations in Chapter 4.06 of the Development Code.

   Findings: The current Master Sign Program will no longer encumber the Project's parcels but will remain in effect for all other parcels that it applies to as described in the Planning Commission staff report dated July 2, 2024.

2. The Program conforms to City's Design Standards and Guidelines.

   Findings: The conformance to the City's Design Standards and Guidelines will continue for the affected Master Sign Program area and is no longer applicable in the areas of the Project site. Any project signs will be subject to the applicable INSP and citywide Design Standards and Guidelines.

Density Bonus Request (CA Government Code Sections 65915 – 65918):

Waivers

The Developer has requested the following waivers: The reduction of the porch separation in Parcel N-1, private open space dimensions in Parcel N-2 and N3-A, front setback and floor to ceiling height requirement in Parcel C1-B, front setback, height limit, and floor to ceiling height requirement in Parcel C2-A, minimum commercial FAR and height limit requirement in Parcel S1, private open space in S2 and S4, height limit in Parcel S3-A, and height limit in Parcel S3-B. Pursuant to Government Code Section 65915 – 65918, a local jurisdiction may deny any and all Waivers if the following findings can be made:

1. The waiver or reduction would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact.

   Findings: The proposed Waivers are primarily for development standards that impact the Project's internal areas. Porch separation, private open space dimensions, and front setback primarily impact the building massing and usable open space. Although these standards would be reduced, the Waivers are focused to specific buildings within each Planning Area, and not all buildings. Further, each unit would still provide the required open space area, just in a different configuration than required, and with dimensions of one foot less than required, ensuring each unit still contains private outdoor open space for residents to utilize. Further, in no case will any porch be less than 7.5 feet from any other porch along paseos, ensuring adequate accessible, fire, and utility access, and ensuring light and air between buildings. The proposed commercial space ceiling height would still meet all requirements of the CA Building Code. All buildings would be required to undergo FAA review prior to Building Permit issuance, to ensure their heights do not present a hazard to nearby aircraft. For these reasons, the waivers would not result in a specific adverse impact upon public health and safety.

2. The waiver or reduction would have an adverse impact on any real property that is listed in the California Register of Historical Resources.

Findings: The property is not listed on the National Register of Historical Resources, the California Register of Historical Resources, nor on the City of Livermore's Historical Resources Inventory. No historic resources would be materially impaired.

3. The waiver or reduction would be contrary to state or federal law.

   Findings: The above listed standards for which the Project is seeking waivers, are established by local ordinance and would not violate any State or Federal law. In addition, requested waivers would not cause the project to encroach on any sensitive habitat, riparian areas, wetland areas, or state or federal property. The Specific Plan has found no sensitive habitat, riparian areas, wetland areas, state property, or federal property on or adjacent to the project site. All buildings will be required to undergo FAA review prior to Building Permit, ensuring they are consistent with all federal aviation standards. For these reasons, the requested Waivers are consistent with all state and federal laws.

Given that none of the findings above can be made, State Density Bonus Law requires the City to grant the requested Waivers.

Incentive/ Concession

The Developer has requested one Incentive/ Concession to reduce the required office FAR within the Office Core designation. Pursuant to Government Code Section 65915 – 65918, a local jurisdiction may deny any and all Incentives/Concessions if the following findings can be made:

1. The Concession or Incentive does not result in identifiable and actual cost reductions, consistent with subdivision (k), to provide for affordable housing costs, as defined in Section 50052.5 of the Health and Safety Code, or for rents for the targeted units to be set as specified in subdivision (c).

   Findings: Although not required by state law, the applicant has provided an economic analysis of the current office market, as shown in the *Commercial and Office Economic Feasibility* study by *Kosmont*. The study notes that Livermore's office market has experienced negative absorption, meaning more vacant commercial spaces over time, large vacancy rates, and asking rents that cannot support construction prices. Therefore, office spaces in Livermore currently have a net negative residual land value and new office construction is financially infeasible or would result in a loss. Therefore, reducing the required amount of office onsite would reduce the Project's economic losses, reducing overall Project costs, and ensuring additional for-sale and for-rent housing can be built. For this reason, the finding that the Incentive/ Concession would not result in cost reductions cannot be made.

2. The developer incentives would have a specific adverse impact, as defined in paragraph (2) of Subdivision (d) of Section 65589.5, upon public health and safety or the physical environment or an any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low- and moderate-income households.

   Findings: The requested Incentive/ Concession would ensure a reduced quantity of office space in the Project. The office space would be replaced with residential uses, which are compatible with other proposed uses within the Project site. Further, the net reduction in office would allow for an increased quantity of affordable units, providing more housing opportunities for individuals and families of Lower Incomes. The reduction of office would not alter the Project boundaries, and the proposed residential that is replacing the office would not produce any hazardous operating impacts. The property is not listed on the National Register of Historical Resources, the California Register of Historical Resources, nor on the City of Livermore's Historical Resources Inventory. For these reasons, the reduction in the required quantity of onsite office space would not adversely impact public health, safety, the environment, or any historic resource.

3. The developer incentives would be contrary to State or Federal law.

   Findings: Office FAR requirements are established by local ordinance. The Incentive/ Concession to eliminate the office FAR would not violate any State or Federal law.

Given that none of the findings above can be made, State Density Bonus Law requires the City to grant the requested Incentive/ Concession.

No Net Loss Analysis (CA Government Code Section 65863):

The Project provides more Median and Moderate units than anticipated in the Housing Element Sites Inventory, but less Lower Income units, producing a net deficit of 612 units. As a result of the net loss in Lower Income units, the Project proposes to upzone Isabel Neighborhood Specific Plan Subarea 3a from office uses to residential uses. With this change in land use, the Project would provide a net surplus of 120 Lower Income units. As required by Government Code Section 65863, the following No Net Loss findings must be made:

1. Remaining sites identified in the Housing Element are adequate to meet the jurisdiction's remaining RHNA for the planning period by income category.

Findings: There are no remaining sites in the Housing Element Sites Inventory that are adequate to meet Livermore's remaining RHNA for the Lower Income category, necessitating rezoning.

2. Include a quantification of the remaining unmet need for the jurisdiction's RHNA at each income level and the remaining capacity of sites identified in the Housing Element, to accommodate that need by income level.

   Findings: The Project's Lower-Income-unit net deficit before any rezoning action is 612 units, including the Housing Element buffer. There are no remaining sites beyond the buffer that can accommodate the remaining need, necessitating rezoning.

3. If the approval of a development at a lower residential density results in the remaining sites capacity becoming inadequate to accommodate the RHNA by income category, a jurisdiction has up to 180 days from the approval to identify, or rezone, "sufficient additional, adequate, and available sites" to accommodate the remaining RHNA for each income category. Sites identified or rezoned must meet the following criteria:

   a. Must be considered an adequate site pursuant to the requirements of Government Code section 65583.2.
   b. If the capacity to be replaced was on a site that was zoned by-right pursuant to Government Code section 65863.2 (h) and (i), then the replacement site must also satisfy those requirements.

   Findings: Given the Lower Income deficit, the project proposes to concurrently amend Specific Plan Subarea 3a's land use designation from Office Core, to Residential Core (APNs 903-10-37-4 and 903-10-36-3). This would result in an increase of 732 residential units. The change in land use designation would accommodate the remaining Lower Income RHNA and would result in a Lower Income surplus of 120 units. The proposed sites are adequate since they are: 1) currently vacant; 2) are located within a land use designation that allows for a density of 30 units per acre or more; and 3) can realistically accommodate the density, allocating 80 percent of the site to residential uses and 20 percent of the site to ancillary uses like open space, street networks, parking, etc. Given that the proposed land use changes will occur concurrently with Project approval, and given that the changes will result in a new surplus of Lower Income units, there is No Net Loss in RHNA units, as required by Government Code Section 65863.

Proposed Master Plan:

The Project proposes to Master Plan Specific Plan Subareas 3b and 3c, in accordance with Isabel Neighborhood Specific Plan and Master Planning Policy P-LU-8, as amended. As described in the staff report, residential densities would

be averaged across the site and office uses, main street commercial uses, open space uses, and the circulation network have been distributed across the site. The City Council may authorize Master Planning if all of the findings below are met:

1. The Master Plan must comply with the target subarea unit count and the performance measures identified in Table 2-6.
    a. The City may consider a unit count lower than the average subarea unit count within a Master Plan, if there are demonstrated, significant regulatory, environmental, or other constraints within the subarea, as determined by the Director.

    Findings: The 1,299-unit Project exceeds the Specific Plan's required minimum density but does not meet the target density of 1,477 units. However, the Developer has submitted the Housing Density Economic Hardship and Commercial and Office Economic Feasibility economic studies from Kosmont.

    The studies note that: 1) There is not currently sufficient demand for the quantity of Project commercial space envisioned by the Specific Plan; 2) That new office development is financially infeasible given that construction costs are higher than anticipated net operating incomes; and 3) That in order to increase residential Project density to that proposed to meet the target density, the Project would have to reduce its contributions margin by approximately $15 million. Ultimately, taken together, the studies demonstrate that the required non-residential land uses and target density of Subareas 3b and 3c present a significant financial constraint for the Project. For these reasons, there are significant constraints within the Subarea, allowing for Master Planning to occur with a unit count lower than the Specific Plan's target (average) unit count.

2. Development within each Master Plan shall comply with the development standards identified in Tables 2-2 through 2-5.

    a. Each non-residential use shall comply with the development standards of the non-residential designation that matches the use.
    b. Each residential use shall comply with the development standards of the residential designation that most closely aligns with the product density.

    Findings: As described in the Staff Report, the Project meets all required Development Standards, with the exception of the requested Density Bonus Waivers and Incentive/ Concession, as allowed by state law. Each nonresidential use within the Master Plan complies with its respective Development Standards within the Specific Plan (i.e. commercial uses comply with the commercial development standards) and each residential use complies with the residential Development Standards that most closely match its proposed density (i.e. denser residential product types use Residential Core Development Standards, while less dense product types use Village).

3. Land uses may only be Master Planned within the Specific Plan Core area (Subareas 3a, 3b, and 3c).

   Findings: The Project proposes to Master Plan Subareas 3b and 3c, which are located within the Specific Plan Core.

4. If Master Planning more than one subarea, the densities may be averaged, and the permitted land uses may be distributed across those subareas.

   Findings: The Project proposes to Master Plan Subareas 3b and 3c together, averaging densities and distributing land uses across the subareas, as permitted.

5. The City Council shall approve a Master Plan pursuant to this policy.

   Findings: The City Council is the ultimate review authority on this Project.

Proposed Alternative Affordable Plan:

In accordance with Isabel Neighborhood Specific Plan, Affordable Policy P-LU-34, as amended, and the Inclusionary Ordinance, as amended, all new residential development shall either:

1. Comply with the INSP inclusionary affordable housing requirements and the City's Inclusionary Ordinance (Section 10.06.050 of the Livermore Development Code); or
2. Comply with an Alternative Affordable Plan approved by the City Council through a Development Agreement. The Alternative Affordable Plan shall meet the following requirements:

   a. May only be considered within the Specific Plan Core area (Subareas 3a, 3b, and 3c); and
   b. Shall be, at a minimum, economically equivalent to the requirements of the Inclusionary Ordinance. The applicant shall demonstrate economic equivalence through reports, studies, or other analysis as determined by the Director.

   Findings: The Project proposes an Alternative Affordable Plan (Affordable Plan). The Affordable Plan is proposed together with the Development Agreement application, as required. The Affordable Plan is proposed within Subarea 3b and 3c, as required. The City Council is the final review authority for the Project, as required. The Project proposes to designate 28% of the residential units as affordable, including 13.7% as Lower Income, exceeding the required quantity and depth of affordability, in exchange for concentrating the units primarily into the mixed-use commercial and high-density residential blocks. As required, the Developer has submitted the Affordable Housing Economic Equivalency Analysis,

by Kosmont. The analysis finds that the proposed Affordable Plan, with 104 extra affordable units and close to triple the required number of Low-Income units, represents an increased Developer investment of approximately $15 million over the costs of strictly meeting Inclusionary Ordinance/ Specific Plan requirements. Therefore, the proposed Affordable Plan exceeds the economic value of the Specific Plan's required affordable, satisfying the economic equivalence requirement. The proposed Affordable Plan will provide for a higher quantity of overall affordable units than required, even exceeding the Specific Plan's aspirational goal of 25% affordability for the entire INSP area. In addition, the Affordable Plan will provide nearly triple the required quantity of Lower Income units, helping the City towards satisfying the 6th Cycle RHNA Lower Income requirements, and provide for more units affordable to individuals and families in the service sector, students, and other underserved communities.

BE IT FURTHER RESOLVED that based upon the City Council's own independent review of the Record Evidence and considerations, in accordance with the State Density Bonus Law and the Housing Crisis Act of 2019 (SB 330), the City Council hereby approves Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Master Sign Program Amendment (MSP) 24-001, Density Bonus Request, No Net Loss analysis, proposed Master Plan, and proposed Alternative Affordable Plan, as shown in the proposed plans, attached hereto as Exhibits C, D, E, and F, and subject to the Conditions of Approval, attached hereto as Exhibit G, for the Isabel Crossing Development.

BE IT FURTHER RESOLVED that the City Council of the City of Livermore directs the Planning Manager to file a Notice of Determination with the Alameda County Clerk.

BE IT FURTHER RESOLVED that the City Council of the City of Livermore finds that the effective date of this resolution shall be the effective date of Development Agreement (DA) 22-001 and Development Code Amendment (DCA) 24-001.

The documents that constitute the record of proceedings upon which this decision is based can be found in the City Clerk's Office, 1052 S. Livermore Avenue, in Livermore California.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on July 22, 2024, by the following vote:

IN THE PLANNING COMMISSION OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION RECOMMENDING THAT THE CITY COUNCIL APPROVE VESTING TENTATIVE TRACT MAP (VTTM) 8659 - SUBDIVISION (SUB) 22-008, SITE PLAN DESIGN REVIEW (SPDR) 24-003, CONDITIONAL USE PERMIT (CUP) 24-002, AND MASTER SIGN PROGRAM AMENDMENT (MSP) 24-001; ACCEPT THE DENSITY BONUS REQUEST; FIND NO NET LOSS; APPROVE A MASTER PLAN; AND APPROVE AN ALTERNATIVE AFFORDABLE PLAN FOR THE ISABEL CROSSING PROJECT

On September 22, 2022, the City received an application from Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant") to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On March 13, 2023, the City Council adopted the 2023 to 2031 Livermore Housing Element, providing adequate sites to support CA's Regional Housing Needs Allocation (RHNA) requirements.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA 22-001), Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new tax district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

The Applicant provided all the necessary information to qualify for relief under State Density Bonus Law (CA Government Code Sections 65915 - 65918), upon amended application submittal on May 10, 2024. The Applicant qualifies for unlimited Waivers and two Incentives/ Concessions. The Applicant has requested 12 Waivers and one Incentive/Concession.

The Project provides fewer Lower Income units than anticipated in the Livermore Housing Element's Sites Inventory and is required to undergo a No Net Loss Review, as required by Government Code Section 65863.

On July 2, 2024, the Planning Commission held a duly noticed public hearing to consider the Project, staff recommendations, all public comments and testimony, and findings.

Together with this Resolution, the Planning Commission concurrently considered resolutions for: 1) the Project's Development Agreement (DA) 22-001 application; 2) the Project's Specific Plan Amendment (SPPA) 24-001 application; 3) the Project's Development Code Amendment (DCA) 24-001 application; and 4) the Project's Consistency Determination (CD) 24-004 application.

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the Planning Commission reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The Planning Commission's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED that the Planning Commission of the City of Livermore has considered the Record Evidence and recommends the City Council adopt a resolution adopting an Addendum to the 2020 Isabel Neighborhood Specific Plan Supplemental Environmental Impact Report (SCH #2016042039), consistent with the requirements of the California Environmental Quality Act ("CEQA").

BE IT FURTHER RESOLVED, with respect to Vesting Tentative Tract Map 8659 – Subdivision 22-008, the Planning Commission finds based upon the information presented that:

1. The proposed map is consistent with the General Plan and any applicable specific plan, any policy or guideline implementing the General Plan (including the City's Design Standards and Guidelines), or other applicable provisions of this Development Code;

   Findings: The Project is consistent with the intent of the General Plan designation of Isabel Neighborhood Specific Plan given that it provides higher density housing adjacent to transit service and job centers and provides a mix of unit types, sizes, and affordability levels. The Project also implements the Land Use, Housing, Community Character, and Climate Change elements by providing affordable housing near transit that is of a high-quality architectural design and that provides sustainable features like photovoltaic arrays and EV chargers. The Project is consistent with the density range, open space, and design standards and guidelines of the Isabel Neighborhood Specific Plan. With the use of State density bonus Waivers, the Project is consistent with the development standards related to setbacks and height.

2. The site is physically suitable for the proposed type of development;

   Findings: The site is located within the Isabel Neighborhood, which is identified as one of the densest areas in the City. The site is entirely within the City limits and is surrounded by street rights of way and urbanized residential uses. The site is approximately 45 acres. The size of the developable land is large enough to accommodate the proposed apartment buildings, mixed-use buildings, and three-story townhouse buildings, two pocket plazas, town square, recreation center, neighborhood park, and private open spaces. The applicant prepared Phase I, geologic, and

biological, studies that found the site contains no hazards, is suitable for residential development, and contains no special-status species. Therefore, the site is physically suitable for the proposed type of development.

3. The site is physically suitable for the proposed density of development;

   Findings: As currently zoned on the project site, the Isabel Neighborhood Specific Plan establishes density ranges of 25-40 units per acre for the Village zoning district, 40-60 units for the Center zoning district, and 60-100 units for the Core zoning district. The developable acreage of the site is approximately 45 acres with a proposed 1,299 units. The Specific Plan Amendment will include the re-designation of zones on the project site to remove the Core zoning designation and average the uses and densities across the project site. Given the existing urbanized nature of surrounding parcels, all required public utilities are located adjacent to the site in the street right-of-way, including: water, sewer, storm drain, telecommunications, and electricity. Services including police, fire, and medical already serve the neighborhood area, including the parcel. The Project is within the Specific Plan's and EIR's anticipated density range even with the proposed Specific Plan amendment. The Isabel Neighborhood Specific Plan Final EIR and Supplemental Final EIR concluded that existing utilities and services have sufficient capacity to accommodate buildout of the Specific Plan, including the incremental increase in demand from the Project. In addition, an Addendum to the Specific Plan EIR has been prepared for the proposed Project and found that no significant impacts would occur as a result of the change in zoning, use, and density. Therefore, the site is physically suitable for the proposed density of development.

4. The design of the subdivision or the proposed improvements will not cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat. Notwithstanding the foregoing, the Commission or Council may approve a tentative map if an Environmental Impact Report was prepared with respect to the Project and a statement of overriding considerations was made to the effect that specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the EIR;

   Findings: The Isabel Neighborhood Specific Plan Final EIR and Supplemental Final EIR analyzed all potential environmental impacts of development in the Isabel Neighborhood. The EIR was prepared at a "zoning action" level, for purposes of Public Resources Code section 21083.3 and CEQA Guidelines section 15183, in that it includes enough specificity for future Specific Plan projects to rely on its analysis and limits the need for CEQA review for future Specific Plan projects. The City Council adopted a Statement of Overriding Considerations with the EIR and found that the plan would have significant and unavoidable impacts with respect to traffic, air quality, aesthetics, noise, cultural/ tribal resources, and agricultural resources, but that the City's transit, housing, and economic goals outweighed the impacts, as allowed under CEQA.

   The Council found that the mitigation measures identified in the EIR would reduce all other impacts to a less than significant level. Given that the Project is within the density and intensity levels contemplated by the EIR, no environmental impacts beyond those identified in the EIR would occur. Although the proposed Project proposes a change in

zoning and the implementation of Master Planning, an Addendum to the Specific Plan EIR has been prepared for the proposed Project and found that no significant impacts would occur as a result of the change in zoning, use, and density. Further, the applicant prepared geologic, biological, and noise studies and found no impacts peculiar to the Project would occur beyond those identified in the EIR. The Project is also conditioned to conform with the Mitigation, Monitoring, and Reporting Program (MMRP) adopted with the certified EIR, ensuring all other environmental impacts remain less than significant.

5. The design of the subdivision or the type of improvements will not cause serious public health problems;

   Findings: The Project will not be detrimental to the public health, safety, or general welfare, and not cause serious health problems. The Project provides adequate emergency vehicle access throughout the site and necessary ladder pads for fire access to upper floors. The Project complies with the County Airport Land Use Compatibility Plan with respect to height, density, or noise and complies with FAA height standards. Water and sewer service will be provided to all units and stormwater will be appropriately managed on site. The site layout is suitable for trash truck pickup and adequate space will be provided in each unit garage, including those units in the apartments and mixed-use buildings, for all waste streams. The applicant prepared, geologic, biological, and noise studies that found no significant impacts would occur beyond those identified in the EIR. Interior noise levels would not exceed 45 dBA, as required by CA Building Code. In addition, no surficial or subsurface hazardous materials were discovered onsite and the residential use would not produce any hazardous materials, nor substantial noise, odor or vibration during regular operations. The Project will work with the Alameda County Vector Control to minimize vermin spread to adjacent properties during construction. For these reasons, the design of the subdivision or the type of improvements will not cause serious public health problems.

6. The design of the subdivision or the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision. (The Commission or Council may approve a tentative map if it finds that alternative easements for access will be provided, and that these will be substantially equivalent to ones previously acquired by the public. This Subparagraph shall apply only to easements of record or to easements established by judgment of a court of competent jurisdiction, and no authority is hereby granted to the Commission to determine that the public at large has acquired easements for access through or use of property within the proposed subdivision.); and

   Findings: The Project Site contains existing easements for utilities, emergency vehicle access, and pedestrian access. All of the public easements would remain in place or, if it becomes necessary, would be modified with the agreement of all public easement right holders in manner that preserves any required public services associated with any such easements. Additionally, an avigation easement is on record for the property that would remain in place. The easements will not conflict with the Project's proposed building footprints. Accordingly, the design of the subdivision and the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision.

7. Any proposed phases and their proposed sequence of construction are identified on the submitted tentative map. The City may impose reasonable conditions relating to the filing of multiple final maps in conjunction with the approval of the tentative map (Section 66456.1).

   Findings:

   The Project proposes a master, large lot VTTM proposed to be implemented in a single-phase. The VTTM includes appropriate conditions of approval that ensure that required improvements needed to serve the Project and otherwise improve the Project Site and surrounding streets for the benefit of the City and the public. Future Planning Area-specific subdivision maps would be proposed for the City's approval as the Project's Planning Areas are built out on a Planning Area-basis in accordance with the sequence of construction set forth in the Project approvals and consistent with the sale of Planning Areas to builders, market conditions and demand.

BE IT FURTHER RESOLVED, with respect to Site Plan Design Review 24-003, the Planning Commission finds based upon the information presented that:

1. The proposed development will be permitted within the subject zone.

   Findings: The Project Site is zoned INSP, which generally permits multi-family housing, office, business park, and commercial uses. Within the INSP zone, the Project Site includes INSP zoning designations Village, Center, Core, Neighborhood Commercial, Office Core and Open Space, in addition to the Ground Floor Retail/Flex Space Overlay. The Project proposes a mix of development that includes multi-family housing, retail, restaurant and commercial development, a community serving grocery store or food hall, and a variety of public open space areas and amenities, including a new neighborhood park, public plazas, public trails, and bike lanes. All of the Project's proposed uses are permitted by the Project Site's applicable zoning designations, inclusive of the proposed approval of the Project as a master planned development pursuant to INSP Policy P-LU-8, as amended by the Specific Plan Amendment.

2. The proposed development will be designed such that:

   a. The project will not be detrimental to the public health, safety, or general welfare, and not detrimental to adjacent property;
   b. Architectural design and functional plan of the structure(s) and related improvements are of reasonable aesthetic quality and compatible with adjacent developments;
   c. Structure(s) and related improvements are suitable for the proposed use of the property and provide adequate consideration of the existing and contemplated uses of land and orderly development in the general area of the subject site; and
   d. The project's site plan and design is consistent with the City's Design Standards and Guidelines.

   Findings:

The proposed Project will not be detrimental to the commercial, residential and institutional uses of adjacent properties. The Project provides adequate emergency vehicle access throughout the site and necessary ladder pads for fire access on upper floors. The Project does not conflict with the County Airport Land Use Compatibility Plan with respect to height, density, or noise and complies with FAA height standards. Water and sewer service will be provided to all units and stormwater will be appropriately managed on site. The site layout is suitable for trash pickup and adequate space will be provided in each residential unit garage and each apartment and mixed-use buildings for all waste streams.

The Project proposes a variety of architectural styles that vary by building type, emphasizing contemporary designs and building materials. The design will feature contemporary and traditional architectural styles. A total of 10 residential product types are proposed, which include apartments, flats, townhomes, duplexes, and triplexes, and three of the proposed apartment and flat buildings are mixed-use buildings designed with ground floor commercial uses.

The proposed contemporary and traditional architectural styles incorporate design features and materials that will be compatible with existing and future developments in the surrounding areas. Additionally, the Project utilizes varied building materials, neutral colors, and varied building facades to reduce massing, distinguish each building, and provide a high degree of visual interest, variation and articulation. The proposed color palette and design are compatible with the existing earth tones used in neighboring residential developments.

The Project site is vacant. The proposed structures and improvements to be developed would be suitable for the Project's proposed mix of uses. The Project's Master Plan is configured into 19 different planning areas with varying development types that include townhomes, apartments, condominiums, duplexes, triplexes, open space areas and amenities, and commercial uses oriented around the proposed new commercial Main Street. The structures and improvements would be compatible with the business park and commercial uses to the west of the Project site and residential uses to north of the Project site across Portola Avenue and to the east of the Project site across Isabel Avenue. Additionally, the arrangement of structures and improvements provides for appropriately scaled and orderly development and circulation throughout the Project Site.

The Project proposes a variety of architectural styles that vary by building type, emphasizing contemporary designs and building materials that are consistent with the Specific Plan and the City's design standards and guidelines. The townhomes, duplexes, and triplexes feature slanted roofs, board and batten, gable trim, awnings and canopies, box windows, and columns. The condominiums and apartments feature flat roofs and articulated building facades. The building's fenestration promotes order and variety. Massing is generally repeated at regular intervals, establishing a rhythm throughout the Project. Additionally, the proposed color palette is compatible with existing earth tones used in neighboring residential developments. The project proposes a richly detailed and varied blend of contemporary, traditional, and modern style and complies with the design requirements of the City's Design Standards and

Guidelines.

The Project is also conditioned to conform with the Mitigation, Monitoring, and Reporting Program (MMRP) adopted with the certified 2020 Supplemental EIR. The Project is not detrimental to adjacent properties and considers adjacent uses in the general area. All project frontages contain substantial landscaping and trees to appropriately screen the proposed buildings. The Project meets applicable parking standards. The residential use promotes synergy with surrounding uses, locating residents close to job centers, and will not produce any dust, odor, noise, or glare during regular operations. The structures are suitable for the site and the site plan is consistent with the City's Design Standards and Guidelines.

3. The proposed development is designed to include the following criteria, as applicable:

   a. Compliance with Chapter 9.07 of the Development Code (Site Plan and Design Review), Municipal Code Title 15 (Buildings and Construction), and any other applicable City regulations and policies;
   b. Efficient site layout and design;
   c. Compatible and appropriate in scale to neighboring properties and developments.
   d. Efficient and safe public access (both pedestrian and vehicular) and parking;
   e. Appropriate and harmonious arrangement and relationship of proposed structures and signs to one another and to other development in the vicinity, based on good standards of design;
   f. Appropriate relationship to land use and development of adjacent properties, including topographic and other physical characteristics of the land;
   g. Proper site utilization and the establishment of a physical and architectural relationship to existing and proposed structures on the site;
   h. Compatible architectural style with the character of the surrounding area, both to avoid repetition of identical design where not desired, and to ensure compatibility in design where desired;
   i. Harmonious relationship with existing and proposed developments and the avoidance of both excessive variety and monotonous repetition;
   j. Compatible in color, material, and composition of the exterior elevations to neighboring visible structures;
   k. Appropriate exterior lighting which provides for public safety and is not of a nature that will constitute a hazard or nuisance to adjacent properties;
   l. Compatible in scale and aesthetic treatment of proposed structures with public areas;
   m. Appropriate open space and use of water efficient landscaping; and
   n. Consistent with the General Plan and any applicable Specific Plan.

Findings:

The proposed mixed-use development is compliant with the Project site's zoning and would comply with all building code requirements and any additional applicable City regulations pertaining to the development and operation of the Project.

The design, location, size, and operating characteristics of the Project makes the Project Site suitable for the type, density, and intensity of use being proposed. The

Project, much like the neighboring residential developments located north of Portola Avenue and east of Isabel Avenue, will feature a variety of residential unit types with community amenities and gathering spaces. Non-residential spaces such as the neighborhood park, recreation center, and pocket plaza, will provide residents and guests with areas for leisure, exercise, and gathering.

The Project is of compatible and appropriate scale to neighboring properties and development. Directly adjacent to the property to the east is the Lam Research facility and a business park. North of the Project Site across Portola Avenue is an existing residential development of similar scale that features various unit types, including townhomes. East of the Project Site across Isabel Avenue is vacant land and beyond that is another existing residential development that also features a variety of residential unit mixes and residential amenities. Southwest of the Project Site across I-580 are office, commercial, and industrial uses. Accordingly, the Project would be compatible with existing neighboring developments.

The existing street network will serve the project. Vehicular access would be provided via four access points. Two points of vehicular ingress and egress would be located along Portola Avenue and two points of vehicular ingress and egress would be located along Isabel Avenue. The project proposes four new public streets and several new private alleys that would be internal to the development. Four community entries are proposed throughout the Project Site. The community entries would be located at the ends of the private streets and would also include pedestrian pathways to ensure pedestrian safety.

The Project Site's proximity to major roadways and highways and the internal roadways within the Project provide sufficient public and emergency vehicle access. The Project would provide 2,167 parking spaces within private garages, above-grade parking garages, on the proposed streets. A bus stop would be located along Isabel Avenue and another along Portola Avenue. Accordingly, the Project would provide efficient and safe public access.

The structures are strategically arranged and designed to be visually appealing, functional, and to facilitate pedestrian and vehicular traffic throughout the Project site. A neighborhood sign element is proposed at one of the access points along Isabel Avenue.

The adjacent properties to the east and west consist of similar, mostly flat, topographic conditions. The proposed land use and development would be compatible with adjacent properties. The mixed-use development would be carefully configured within existing city streets and proposed internal streets, allowing for efficient circulation and access. Additionally, the Project would feature a pedestrian connection to the neighboring business park along the proposed Gateway Avenue which would run perpendicular to the existing Shea Center Drive.

The Project site does not contain any existing structures. The Project's configuration is harmonious with neighboring developments, creating a gradual increase in density generally from the north were there are existing residential units to the south were densities are higher in the proposed Project.

The proposed residential and mixed-use buildings and recreation facility would be properly configured with respect to existing Project Site conditions. There are a total of 10 different product types. The townhomes, duplexes, and triplexes will feature contemporary and traditional architectural styles. The apartments and condos will feature modern architectural styles. The combination of product types and architectural styles vary the building massing. Additionally, courtyards and podiums break up the massing in the apartment and condominium unit types. Massing is generally repeated at regular intervals, which would establish an effortless rhythm throughout the Project.

The Project proposes a variety of architectural styles that vary by building type, emphasizing contemporary designs and building materials. As discussed previously, the architectural styles include contemporary and traditional architectural styles that are compatible with the existing residential development in the vicinity. However, variations are incorporated so that the residential developments in different portions of the Project site are uniquely identifiable. The residential development will consist of a mix of flats, townhomes, triplexes, and duplexes, so that they are not repetitious and contribute to a desirable walkable environment.

The Project is designed such that it will be well integrated with the adjacent Business Park and features a pedestrian connection to the Business Park along Gateway Avenue. The Project, like neighboring residential Projects, features a variety of unit mixes and types and community open space and amenity spaces. The architectural styles and color palette is compatible with the contemporary styles and earth tone colors used in neighboring developments, avoiding excessive variety. At the same time, the Project maintains its own unique character to avoid monotonous repetition.

The composition of buildings and exterior elevations are compatible with neighboring business park and residential uses. The proposed contemporary, modern, and traditional architectural styles incorporate design features and materials that distinguish the Project from surrounding developments, while complementing other styles within the Specific Plan and surrounding areas. The proposed color palette is compatible with existing earth tones used in neighboring residential developments. The proposed materials are appropriate, standard materials like those used in adjacent developments.

The Project provides appropriate exterior lighting that promotes public safety and is not of the nature that will constitute a hazard or nuisance to adjacent properties. Streetlights consistent with City standards are proposed throughout the Project's internal roads to provide internal lighting for pedestrian and vehicular travel. Pedestrian-scale lighting is concentrated primarily along Main Street, with additional lighting on the eastern end of Gateway Avenue and along the Project Site's other internal streets. Roadway lights are proposed along Isabel Avenue. All lighting would all comply with the City's lighting standards and will be down shielded to avoid impacts to aircraft.

Proposed structures in public areas will be compatible with the surrounding structures within the development in terms of scale, design and materiality. Additionally, any

aesthetic and architectural treatment ensure consistency with the development and with surrounding properties.

The Project proposes to provide 447,259 square feet of open space. The Project would feature water-efficient landscaping throughout, resulting in 203,020 square feet of water efficient landscaping. The Project Site would be Maximum Allowed Water Allowance (MAWA) compliant. In addition, the Project would utilize recycled water for non-potable purposes including irrigation throughout the Project Site.

The Project is consistent with the General Plan in that the Project is located so as to create a consolidated pattern of urbanization, maximizing the use of existing public services and facilities (Objective LU-1.1); it creates neighborhoods that include a mix of uses and a range of housing types to meet the needs of all residents (Objective LU-1.2); it create neighborhoods near transit that include a mix of uses and a range of housing types to meet the needs of all residents (Objective LU-3.1). It maintains and enhances Livermore's urban design quality and encourage high quality design in all new development and redevelopment (Objective CC-2.1); it implements policies and actions that will encourage existing businesses to remain and grow in Livermore and attract a range of new businesses to locate in Livermore (Objective ED-1.1). It encourages and provides greater support for infill, mixed use, and higher density development in order to reduce Greenhouse Gas (GHG) emissions associated with vehicle travel (Objective CLI-1.2); it supports measures that encourage alternative modes of transportation and alternative fuels in order to reduce emissions associated with vehicle travel (Objective CLI-1.3); it enhances existing water efficiency and conservation measures and uses recycled water use and water efficiency in order to reduce energy and GHGs associated with water use (Objective CLI-1.4); and, it expands the number of trees in Livermore in order to provide a larger carbon sink or area containing natural sources that retain more carbon than what those sources emit (Objective CLI-1.6).

The Specific Plan Goals and Policies are outlined in the Land Use, Transportation, Parks, Public Facilities, and Infrastructure, Urban Design, and Environmental Resources and Conservation chapters. A matrix of the Specific Plan Goals and Policies, and how the Project is consistent with them, is referred to and included as Attachment 11 in the Description, Context, and Staff Analysis Memo.

BE IT FURTHER RESOLVED, with respect to Conditional Use Permit (CUP) 24-002, the Planning Commission finds based upon the information presented that:

1. The proposed use is consistent with the General Plan and any applicable Specific Plan;

Response: The Development is consistent with the existing General Plan land use designation of Isabel Neighborhood Specific plan and is consistent with Specific Plan requirements as proposed in the Specific Plan Amendment, and meets the Specific Plan goals and intention for subareas 3b and 3c to create a vibrant, walkable mixed-use community with higher density residential uses, public open space amenities that promote recreation and alternative forms of transportation, and job-producing commercial uses within close, walkable proximity of one another. The Project would

create a vibrant, safe, and complete neighborhood with a wide range of housing options, commercial spaces, and new job opportunities, as well as support transit ridership and citywide goals for increased transit options. The Project would also be compatible with and would not adversely affect surrounding uses.

2. The proposed use is allowed within the subject zone and complies with all other applicable provisions of this Development Code and the Municipal Code;

   Response: The Isabel Neighborhood Specific Plan zone generally permits multi-family housing and commercial development uses proposed by the Project. The Project site is within subareas 3b and 3c and uses are further regulated by the Specific Plan designations including Village, Center, Core, Neighborhood Commercial, Office Core and Open Space, in addition to the Ground Floor Retail/Flex Space Overlay. All proposed uses within the mixed-use Project are permitted by the Project site's zoning, as allowed by the Specific Plan Amendment herein and the Specific Plan Master Planning provisions implemented for the Project. The Project otherwise complies with applicable provisions of the Development Code, as proposed to be amended by this project, and the Municipal Code.

3. The design, location, size, and operating characteristics of the proposed activity will be compatible with the existing and future land uses in the vicinity;

   Response: The Project Site is surrounded by office and industrial uses to the west, residential uses and a community college campus to the north; vacant land, open space, and residential uses to the east, and commercial, industrial, and residential uses and an airport to the south, across the I-580 Freeway. The mixed-use development would therefore be consistent and compatible with surrounding uses. The Project would include residential developments that are compatible with the residential uses to the north across Portola Avenue and to the east across Isabel Avenue, and the Project would include public open space amenities including offsite bike lanes and other transportation improvements and community-serving commercial uses that will serve and complement the surrounding commercial, educational and residential uses in a manner consistent with the Master Planning for the Project site under the Specific Plan. The Project would also help to integrate existing surrounding commercial, office, industrial, and residential uses with future uses on vacant adjacent parcels, including a proposed future Valley Link station.

4. The subject site is:

   a. Physically suitable in terms of design, location, size, and operating characteristics, shape, size, topography, and the provision of public and emergency vehicle (e.g., fire and medical) access and public services and utilities; and

   b. Served by highways and streets adequate in width and improvement to carry the kind and quantity of traffic the proposed use would likely generate.

   Response: The 45.38-acre Project site has gently sloping grades that can accommodate the 1,299-unit mixed-use residential and commercial development that

is proposed without substantial grading or excavation. While the Project Site is vacant and has not been developed, it is in an area that is surrounded by urban development and is adequately served by public and emergency vehicle access via the City's existing network of public roads and is fully served by existing public services and utilities. Additionally, as a part of the development, the Project will construct a new internal street network that will service the Project site and provide internal vehicular access and utility connections throughout the Project to ensure that the development is adequately served by utilities and public services, including the provision of emergency access through compliance with applicable Development, Municipal, Building, and Fire code standards.

The Project site is located at the southwestern corner of the intersection of Isabel Avenue and Portola Avenue and is located northwest of State Route 84 and north of Interstate 580. As determined by prior environmental analysis of the Specific Plan and for the Project, the kind and quantity of traffic the Project would generate will be adequately served by the Project site's internal streets and the existing network of external roadways and highways in proximity to the Project. Vehicular access would be provided via five proposed vehicular access points. Two points of vehicular ingress and egress would be located along Portola Avenue, two points of vehicular ingress and egress would be located along Isabel Avenue, and one point along Shea Center Drive. The Project would also add two new traffic signals at the intersection of Isabel Avenue and Gateway Avenue, and at Isabel Avenue and A Street, and improve the existing traffic signal at Main Street and Portola Avenue.

5. The site's suitability ensures that the type, density, and intensity of use being proposed will not endanger, jeopardize, or otherwise constitute a hazard to the public interest, health, safety, convenience, or welfare, or be materially detrimental to the improvements, persons, property, or uses in the vicinity and zone in which the property is located; and

   Response: The Project proposes to develop 1,299 dwelling units, grocery store, retail, restaurant, and other commercial space, a public park and plazas, other open space, and other residential amenities. The Project is designed to create a harmonious environment where homes and job opportunities are created and residents and employees have access to regional and local transit. The Project density does not exceed the overall density permitted by the Specific Plan, and the uses proposed would not endanger, jeopardize, or otherwise constitute a hazard to public interest, health, safety, or become a nuisance in the vicinity.

6. The applicant agrees in writing to comply with any and all of the conditions imposed by the review authority in the approval of the Conditional Use Permit or Zoning Use Permit.

   Response: The Applicant has agreed to comply with any and all of the conditions imposed by the reviewing authority in the approval of the Conditional Use Permit, subject to Development Agreement 22-001.

7. That any other findings prerequisite to approval of a Conditional Use Permit or Zoning Use Permit stated elsewhere in the Development Code can be made. (Ord. 1927 § 3 (Exh. C), 2011.)

   Response: The Project is not subject to any additional findings prerequisite to approval of a Conditional Use Permit.

BE IT FURTHER RESOLVED, with respect to Master Sign Program Amendment (MSP) 24-001 the Planning Commission finds based upon the information presented that:

1. The Program is consistent with the regulations in Chapter 4.06 of the Development Code.

   Response: The current Master Sign Program will no longer encumber the Project's parcels but will remain in effect for all other parcels that it applies to as described in the Planning Commission staff report dated July 2, 2024.

2. The Program conforms to City's Design Standards and Guidelines.

   Response: The conformance to the City's Design Standards and Guidelines will continue for the affected Master Sign Program area and is no longer applicable in the areas of the Project site. Any project signs will be subject to the applicable INSP and citywide Design Standards and Guidelines.

BE IT FUTHER RESOLVED, with respect to the Density Bonus request, in accordance with Government Code Section 65915 - 65918, the Planning Commission finds based upon the information presented that:

Waivers

The Developer has requested the following waivers: The reduction of the porch separation in Parcel N-1, private open space dimensions in Parcel N-2 and N3-A, front setback and floor to ceiling height requirement in Parcel C1-B, front setback, height limit, and floor to ceiling height requirement in Parcel C2-A, minimum commercial FAR and height limit requirement in Parcel S1, private open space in S2 and S4, height limit in Parcel S3-A, and height limit in Parcel S3-B. Pursuant to Government Code Section 65915 – 65918, a local jurisdiction may deny any and all Waivers if the following findings can be made:

1. The waiver or reduction would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact.

   Findings: The proposed Waivers are primarily for development standards that impact the Project's internal areas. Porch separation, private open space dimensions, and front setback primarily impact the building massing and usable open space. Although these standards would be reduced, the Waivers are focused to specific buildings within each Planning Area, and not all buildings. Further, each

unit would still provide the required open space area, just in a different configuration than required, and with dimensions of one foot less than required, ensuring each unit still contains private outdoor open space for residents to utilize. Further, in no case will any porch be less than 7.5 feet from any other porch along paseos, ensuring adequate accessible, fire, and utility access, and ensuring light and air between buildings. The proposed commercial space ceiling height would still meet all requirements of the CA Building Code. All buildings would be required to undergo FAA review prior to Building Permit issuance, to ensure their heights do not present a hazard to nearby aircraft. For these reasons, the waivers would not result in a specific adverse impact upon public health and safety.

2. The waiver or reduction would have an adverse impact on any real property that is listed in the California Register of Historical Resources.

   Findings: The property is not listed on the National Register of Historical Resources, the California Register of Historical Resources, nor on the City of Livermore's Historical Resources Inventory. No historic resources would be materially impaired.

3. The waiver or reduction would be contrary to state or federal law.

   Findings: The above listed standards for which the Project is seeking waivers, are established by local ordinance and would not violate any State or Federal law. In addition, requested waivers would not cause the project to encroach on any sensitive habitat, riparian areas, wetland areas, or state or federal property. The Specific Plan has found no sensitive habitat, riparian areas, wetland areas, state property, or federal property on or adjacent to the project site. All buildings will be required to undergo FAA review prior to Building Permit, ensuring they are consistent with all federal aviation standards. For these reasons, the requested Waivers are consistent with all state and federal laws.

Given that none of the findings above can be made, State Density Bonus Law requires the City to grant the requested Waivers.

Incentive/ Concession

The Developer has requested one Incentive/ Concession to reduce the required office FAR within the Office Core designation. Pursuant to Government Code Section 65915 – 65918, a local jurisdiction may deny any and all Incentives/Concessions if the following findings can be made:

1. The Concession or Incentive does not result in identifiable and actual cost reductions, consistent with subdivision (k), to provide for affordable housing costs, as defined in Section 50052.5 of the Health and Safety Code, or for rents for the targeted units to be set as specified in subdivision (c).

   Findings: Although not required by state law, the applicant has provided an economic analysis of the current office market, as shown in the *Commercial and Office Economic Feasibility* study by *Kosmont*. The study notes that Livermore's office market has experienced negative absorption, meaning more vacant

commercial spaces over time, large vacancy rates, and asking rents that cannot support construction prices. Therefore, office spaces in Livermore currently have a net negative residual land value and new office construction is financially infeasible or would result in a loss. Therefore, reducing the required amount of office onsite would reduce the Project's economic losses, reducing overall Project costs, and ensuring additional for-sale and for-rent housing can be built. For this reason, the finding that the Incentive/ Concession would not result in cost reductions cannot be made.

2. The developer incentives would have a specific adverse impact, as defined in paragraph (2) of Subdivision (d) of Section 65589.5, upon public health and safety or the physical environment or an any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low- and moderate-income households.

   Findings: The requested Incentive/ Concession would ensure a reduced quantity of office space in the Project. The office space would be replaced with residential uses, which are compatible with other proposed uses within the Project site. Further, the net reduction in office would allow for an increased quantity of affordable units, providing more housing opportunities for individuals and families of Lower Incomes. The reduction of office would not alter the Project boundaries, and the proposed residential that is replacing the office would not produce any hazardous operating impacts. The property is not listed on the National Register of Historical Resources, the California Register of Historical Resources, nor on the City of Livermore's Historical Resources Inventory. For these reasons, the reduction in the required quantity of onsite office space would not adversely impact public health, safety, the environment, or any historic resource.

3. The developer incentives would be contrary to State or Federal law.

   Findings: Office FAR requirements are established by local ordinance. The Incentive/ Concession to eliminate the office FAR would not violate any State or Federal law.

Given that none of the findings above can be made, State Density Bonus Law requires the City to grant the requested Incentive/ Concession.

BE IT FURTHER RESOLVED, with respect to state RHNA requirements, the City's Housing Element Sites Inventory, and No Net Loss Law (Government Code Section 65863), the Planning Commission finds based upon the information presented that:

The Project provides more Median and Moderate units than anticipated in the Housing Element Sites Inventory, but less Lower Income units, producing a net deficit of 612 units. As a result of the net loss in Lower Income units, the Project proposes to upzone Isabel Neighborhood Specific Plan Subarea 3a from office uses to residential uses. With this change in land use, the Project would provide a net surplus of 120 Lower Income units. As required by Government Code Section 65863, the following No Net Loss findings must be made:

1. Remaining sites identified in the Housing Element are adequate to meet the jurisdiction's remaining RHNA for the planning period by income category.

   Findings: There are no remaining sites in the Housing Element Sites Inventory that are adequate to meet Livermore's remaining RHNA for the Lower Income category, necessitating rezoning.

2. Include a quantification of the remaining unmet need for the jurisdiction's RHNA at each income level and the remaining capacity of sites identified in the Housing Element, to accommodate that need by income level.

   Findings: The Project's Lower-Income-unit net deficit before any rezoning action is 612 units, including the Housing Element buffer. There are no remaining sites beyond the buffer that can accommodate the remaining need, necessitating rezoning.

3. If the approval of a development at a lower residential density results in the remaining sites capacity becoming inadequate to accommodate the RHNA by income category, a jurisdiction has up to 180 days from the approval to identify, or rezone, "sufficient additional, adequate, and available sites" to accommodate the remaining RHNA for each income category. Sites identified or rezoned must meet the following criteria:

   a. Must be considered an adequate site pursuant to the requirements of Government Code section 65583.2.
   b. If the capacity to be replaced was on a site that was zoned by-right pursuant to Government Code section 65863.2 (h) and (i), then the replacement site must also satisfy those requirements.

   Findings: Given the Lower Income deficit, the project proposes to concurrently amend Specific Plan Subarea 3a's land use designation from Office Core, to Residential Core (APNs 903-10-37-4 and 903-10-36-3). This would result in an increase of 732 residential units. The change in land use designation would accommodate the remaining Lower Income RHNA and would result in a Lower Income surplus of 120 units. The proposed sites are adequate since they are: 1) currently vacant; 2) are located within a land use designation that allows for a density of 30 units per acre or more; and 3) can realistically accommodate the density, allocating 80 percent of the site to residential uses and 20 percent of the site to ancillary uses like open space, street networks, parking, etc. Given that the proposed land use changes will occur concurrently with Project approval, and given that the changes will result in a new surplus of Lower Income units, there is No Net Loss in RHNA units, as required by Government Code Section 65863.

BE IT FURTHER RESOLVED, with respect to the Isabel Neighborhood Specific Plan and Master Planning Policy P-LU-8, as amended, the Planning Commission finds based upon the information presented that:

The Project proposes to Master Plan Specific Plan Subareas 3b and 3c. As described

in the staff report, residential densities would be averaged across the site and office uses, main street commercial uses, open space uses, and the circulation network have been distributed across the site. The City Council may authorize Master Planning if all of the findings below are met:

1. The Master Plan must comply with the target subarea unit count and the performance measures identified in Table 2-6.

    a. The City may consider a unit count lower than the average subarea unit count within a Master Plan, if there are demonstrated, significant regulatory, environmental, or other constraints within the subarea, as determined by the Director.

    Findings: The 1,299-unit Project exceeds the Specific Plan's required minimum density but does not meet the target density of 1,477 units. However, the Developer has submitted the Housing Density Economic Hardship and Commercial and Office Economic Feasibility economic studies from Kosmont.

    The studies note that: 1) There is not currently sufficient demand for the quantity of Project commercial space envisioned by the Specific Plan; 2) That new office development is financially infeasible given that construction costs are higher than anticipated net operating incomes; and 3) That in order to increase residential Project density to that proposed to meet the target density, the Project would have to reduce its contributions margin by approximately $15 million. Ultimately, taken together, the studies demonstrate that the required non-residential land uses and target density of Subareas 3b and 3c present a significant financial constraint for the Project. For these reasons, there are significant constraints within the Subarea, allowing for Master Planning to occur with a unit count lower than the Specific Plan's target (average) unit count.

2. Development within each Master Plan shall comply with the development standards identified in Tables 2-2 through 2-5.

    a. Each non-residential use shall comply with the development standards of the non-residential designation that matches the use.

    b. Each residential use shall comply with the development standards of the residential designation that most closely aligns with the product density.

    Findings: As described in the Staff Report, the Project meets all required Development Standards, with the exception of the requested Density Bonus Waivers and Incentive/ Concession, as allowed by state law. Each nonresidential use within the Master Plan complies with its respective Development Standards within the Specific Plan (i.e. commercial uses comply with the commercial development standards) and each residential use complies with the residential Development Standards that most closely match its proposed density (i.e. denser residential product types use Residential Core Development Standards, while less dense product types use Village).

3. Land uses may only be Master Planned within the Specific Plan Core area (Subareas 3a, 3b, and 3c).

   Findings: The Project proposes to Master Plan Subareas 3b and 3c, which are located within the Specific Plan Core.

4. If Master Planning more than one subarea, the densities may be averaged, and the permitted land uses may be distributed across those subareas.

   Findings: The Project proposes to Master Plan Subareas 3b and 3c together, averaging densities and distributing land uses across the subareas, as permitted.

5. The City Council shall approve a Master Plan pursuant to this policy.

   Findings: The City Council is the ultimate review authority on this Project.

BE IT FURTHER RESOLVED, with respect to the Isabel Neighborhood Specific Plan, Affordable Policy P-LU-34, as amended, and the Inclusionary Ordinance, the Planning Commission finds based upon the information presented that:

All new residential development shall either:

1. Comply with the INSP inclusionary affordable housing requirements and the City's Inclusionary Ordinance (Section 10.06.050 of the Livermore Development Code); or
2. Comply with an Alternative Affordable Plan approved by the City Council through a Development Agreement. The Alternative Affordable Plan shall meet the following requirements:
   a. May only be considered within the Specific Plan Core area (Subareas 3a, 3b, and 3c); and
   b. Shall be, at a minimum, economically equivalent to the requirements of the Inclusionary Ordinance. The applicant shall demonstrate economic equivalence through reports, studies, or other analysis as determined by the Director.

Findings: The Project proposes an Alternative Affordable Plan (Affordable Plan). The Affordable Plan is proposed together with the Development Agreement application, as required. The Affordable Plan is proposed within Subarea 3b and 3c, as required. The City Council is the final review authority for the Project, as required. The Project proposes to designate 28% of the residential units as affordable, including 13.7% as Lower Income, exceeding the required quantity and depth of affordability, in exchange for concentrating the units primarily into the mixed-use commercial and high-density residential blocks. As required, the Developer has submitted the Affordable Housing Economic Equivalency Analysis, by Kosmont. The analysis finds that the proposed Affordable Plan, with 104 extra affordable units and close to triple the required number of Low-Income units, represents an increased Developer

investment of approximately $15 million over the costs of strictly meeting Inclusionary Ordinance/ Specific Plan requirements. Therefore, the proposed Affordable Plan exceeds the economic value of the Specific Plan's required affordable, satisfying the economic equivalence requirement. The proposed Affordable Plan will provide for a higher quantity of overall affordable units than required, even exceeding the Specific Plan's aspirational goal of 25% affordability for the entire INSP area. In addition, the Affordable Plan will provide nearly triple the required quantity of Lower Income units, helping the City towards satisfying the 6th Cycle RHNA Lower Income requirements, and provide for more units affordable to individuals and families in the service sector, students, and other underserved communities.

BE IT FURTHER RESOLVED that the Livermore Planning Commission, based upon its own independent review of the Record Evidence and considerations, and based on the above findings which are necessary to protect the public health, safety, and general welfare, hereby recommends the City Council approve Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, and Master Sign Program Amendment (MSP) 24-001; Accept the Density Bonus Request; Find No Net Loss; Approve a Master Plan; and Approve an Alternative Affordable Plan for the Isabel Crossing Development, together with the following friendly amendments:

1. To the extent practicable, the pedestrian trail located on the east side of Planning Area S1 should be designed to accommodate bicyclists and should connect directly to Isabel Avenue.
2. In all locations where feasible, pedestrian curb ramps shall be directional.
3. To the extent practicable, the pedestrian bulb outs along Isabel Avenue shall be extended to shorten crossing distance.
4. Project bike racks shall be evenly distributed across the site and shall be located within 50 feet commercial entries.
5. Community Development Department staff shall coordinate with Livermore Amador Valley Transit Authority staff to explore bus stops within the Project site, where feasible.
6. To the extent practicable, A Street and Gateway Avenue should be modified to ensure dedicated bicycle lanes are located along the curb face and separated from the travel lane with automobile parking.

BE IT FURTHER RESOLVED that the Livermore Planning Commission recommends the City Council direct the Planning Manager to file a Notice of Determination for the Isabel Crossing Project with the Alameda County Clerk if the Project is approved.

The documents that constitute the record of proceedings upon which this decision is based can be found in the Community Development Department 1052 S. Livermore Avenue, in Livermore, California.

On the motion by Commissioner Dunbar, seconded by Commissioner Kronzak, the foregoing Resolution was adopted at the Planning Commission meeting of July 2, 2024 by the following vote:

AYES: DUNBAR, FINTSCHENKO, KRONZAK, LEARY.
NOES: NONE.
ABSENT: ANDERSON.

IN THE PLANNING COMMISSION OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION APPROVING CONSISTENCY DETERMINATION (CD) 24-004, FOR THE ISABEL CROSSING PROJECT

On September 22, 2022, the City received an application from Isabel Portola Owner, LLC (Harridge Development Group) ("Applicant") to develop the approximately 45-acre vacant parcel located at the southwest corner of the Portola Avenue and Isabel Avenue intersection with a mixed-use residential/ commercial development project.

On May 10, 2024, the City received an amended application from the Applicant for Vesting Tentative Tract Map (VTTM) 8659 – Subdivision (SUB) 22-008, Site Plan Design Review (SPDR) 24-003, Conditional Use Permit (CUP) 24-002, Consistency Determination (CD) 24-004, Master Sign Program Amendment (MSP) 24-001, Development Agreement (DA 22-001), Development Code Amendment (DCA) 24-001, and Specific Plan Amendment (SPPA) 24-001 (collectively, the "Project"). The Project would develop vacant land located southwest of the Isabel Avenue and Portola Avenue intersection, implementing the Isabel Neighborhood Specific Plan ("Project"). The Project includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, approximately 90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional approximately 0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new tax district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

The Planning Commission, as the City's planning agency, is required by Government Code Section 65402(a) to determine that the abandonment and re-acquisition of easements for public purposes is consistent with the City's General Plan.

A Consistency Determination for the abandonment and re-dedication of easements does not constitute a project for the purposes of the California Environmental Quality Act (CEQA) per section 21065 of the California Environmental Quality Act and CEQA Guidelines. Therefore, no environmental review under CEQA is required for CD 24-004.

On July 2, 2024, the Planning Commission held a duly noticed public hearing to consider the Project, staff recommendations, all public comments and testimony, and findings.

NOW, THEREFORE, BE IT RESOLVED by the Planning Commission of the City of Livermore that prior to taking action on the Project, and at a properly noticed public hearing, the Planning Commission reviewed written and oral staff reports, conducted a public hearing on the Project and took testimony, and received into the record all pertinent documents related to the Project (collectively, the "Record Evidence"). The Planning Commission's determination is based on the Record Evidence, which is incorporated into this Resolution by reference.

BE IT FURTHER RESOLVED, with respect to the Consistency Determination application, the Planning Commission finds based upon the information presented that:

1. Acquisition and disposition of real property is determined to be consistent with the City of Livermore General Plan.

2. The subject parcels to be acquired and disposed are unnecessary for present or prospective public use.

   Findings: The Project Site contains various utility, access, and other public use easements in favor of the City, as described and depicted on Page TM 2.0 of Vesting Tentative Tract Map No. 8659, and as discussed in the Planning Commission staff report dated July 2, 2024. Vacation of the easements does not conflict with any General Plan policies and does not detrimentally affect the implementation of the General Plan or Specific Plan. The proposed vacation is consistent with the policies of the Infrastructure and Public Services Element and the Specific Plan land use designation of the General Plan.

   The above easements are proposed to be abandoned, as they are not necessary for any public purpose and are inconsistent with the Project, as proposed. New easements necessary to provide public services to the Project Site and any surrounding areas or that are otherwise necessary to serve any other legitimate public purpose will be dedicated by the Project in a manner that is consistent with its proposed design, which easements would be created and dedicated consistent with the requirements of the Specific Plan, the Development Code, City codes, and State law. Because the vacated easements are no longer necessary due to the Project and conflict with its design, the Project would be conditioned to provide required public easements, and the Project is consistent with and promotes key policies and objectives of the General Plan, as set forth above.

BE IT FURTHER RESOLVED that the Livermore Planning Commission, based upon its own independent review of the Record Evidence and considerations, and based on the above findings which are necessary to protect the public health, safety, and general welfare, hereby approves Consistency Determination (CD) 24-004.

BE IT FURTHER RESOLVED that the Livermore Planning Commission finds that a Consistency Determination for the acquisition of real property and abandonment of an easement does not constitute a project for the purposes of the California Environmental Quality Act (CEQA) per section 21065 of the California Environmental Quality Act and CEQA Guidelines. Therefore, no environmental review under CEQA is required for CD 24-004.

The documents that constitute the record of proceedings upon which this decision is based can be found in the Community Development Department 1052 S. Livermore Avenue, in Livermore, California.

On the motion by Commissioner Leary, seconded by Commissioner Kronzak, the foregoing Resolution was adopted at the Planning Commission meeting of July 2, 2024 by the following vote:

AYES: DUNBAR, FINTSCHENKO, KRONZAK, LEARY.
NOES: NONE.
ABSENT: ANDERSON.

Enhanced Elevation:

Setback:

Setback Table PA: C2-B	Proposed	Provided	Notes
Existing Zoning: Core	Village		
Front	**Facing Main Street:** Refer to Table 2-5 for ground floor and upper floor setbacks (for ground floor retail/flex). **Facing Major Streets:** 20 ft from curb **Facing All Other Streets:** 10 ft from PL	10 ft from PL	Compliant
Interior	Min. 15 ft. where abutting existing residential uses; otherwise, Min. 0 ft. setback for all stories along alleyways and for first story not along alleyways; Min. 5 ft. for second story; Min. 10 ft. for third story and above	10 ft from PL	Compliant
Rear	Same as Interior Setback	Setback from rear PL: appx. 33' all floors	Compliant
Building Separation	Min. 10 ft. separation between primary windows (living, cining, bedroom) of residential units.	7'-6" between buildings. There are no primary windows from living, dining, bedrooms)	Compliant
Alley Garage Separation	Min. 20 ft. paved width for alleys, unless otherwise approved by LPFD and City Staff. Min. 28 ft. measured garage face to garage face along alleys, unless otherwise approved by LPFD and City Staff.	Min. 26' paved width / garage face to garage face doesn't apply because garages do not face each other.	Compliant
Porch Separation	Porches facing each other must be separated by 15 ft. (min.) along paseos. Limited encroachments consistent with Livermore Development Code section 4.02.020 are permitted.	Porches encroach 2'-6" into the setback	Compliant
Notes			One (1) triplex building has been added to fit the site constraints.

EXHIBIT C

*NOTE: Parcel S1. The INSP Table 2-3: Development Standards Commercial Categories permits Mixed Use Projects with the evaulation as part of a Conditional Use Permit. We are proposing a Mixed Use building with ground floor retail/office and stacked flat condos above.
(Residential "Core" standards applied to residnetial units)

Project Summary - S1

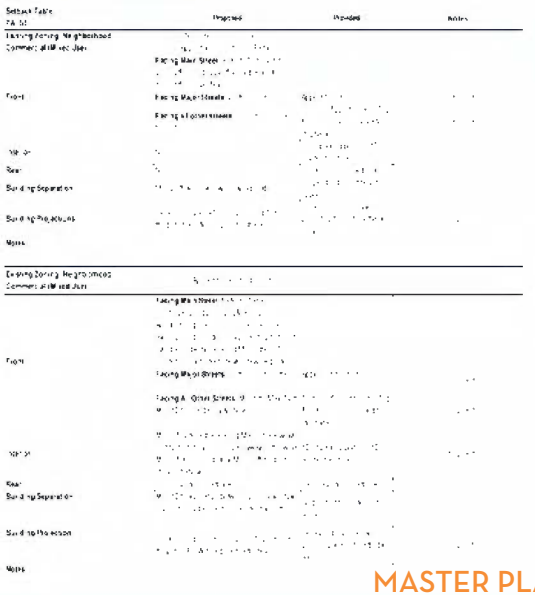
Gross
Land Area: ± 2.8 Acres

Net
Land Area: ± 2.5 Acres

Total Units: 172 Homes

Density: 67.5 Homes per Acre

Open Space:



Neighborhood Commercial
Required: Min. 0.25 acres on Neighborhood Commercial block

Neighborhood Commercial
Provided: *Provided 0.27 AC plaza in Town Square (TS)

Residential (Core)
Required: 21,500 SF Total (125 SF per home)
- Common: 12,900 SF (75 SF per home; 10' min. dim.)
- Private: 8,600 SF (50 SF per home; 4' W. x 8' D min. dim.)

Residential (Core)
Provided: 27,671 SF Total (161 SF per home)
- Common: 19,071 SF (10' Min. Dimension)
- Private: 8,600 SF (50 SF per home)

Setback:

ETAF Calculations	
REGULAR LANDSCAPE AREAS	
TOTAL ETAF x AREA	56,222
TOTAL AREA	212,402
AVG. ETAF	26.47%

MAWA FORMULA
MAXIMUM APPLIED WATER ALLOWANCE (MAWA) GALLONS PER YEAR
MAWA = (ETo)(0.62)[(LA x 0.55) + (0.45 x SLA)]

ETo = REFERENCE EVAPOTRANSPIRATION
0.55= ET ADJUSTMENT FACTOR
LA=LANDSCAPED AREA (SQUARE FEET)
0.62 = CONVERSION FACTOR (GALLONS/SQ.FT/YR)

ETWU FORMULA
ESTIMATED TOTAL WATER USE (ETWU) GALLONS PER YEAR
ETWU= ((ETO)(.62)(ETAF x LA))

ETo = REFERENCE EVAPOTRANSPIRATION
PF = PLANT FACTOR FOR HYDROZONES
HA = HYDROZONE AREA (SQ.FT)
0.62 = CONVERSION FACTOR (GALLONS/SQ.FT/YR)

IE = IRRIGATION EFFICIENCY (0.81)-BUBBLER/DRIP
IE = IRRIGATION EFFICIENCY (0.75)-ROTORS/SPRAY

"I HAVE COMPLIED WITH THE CRITERIA OF THE ORDINANCE AND APPLIED THEM FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN."

CONDITIONS OF APPROVAL

Vesting Tentative Tract Map 8659 (SUB) 22-008, Development Agreement (DA) 22-001, Consistency Determination (CD) 24-004, Conditional Use Permit (CUP) 24-002, Site Plan Design Review (SPDR) 24-003, Specific Plan Amendment (SPPA) 24-001, Master Sign Program Amendment (MSP) 24-001, and Development Code Amendment (DCA) 24-001

Hearing to consider the "Isabel Crossing" mixed-use development Project on approximately 45 acres within the Isabel Neighborhood. The Project is a Master Plan for the Neighborhood's core and includes 1,299 residential units, including 363 units affordable to individuals and families of lower, median, and moderate incomes, ~90,000 square feet of ground-floor commercial, office, and amenity space, an approximately 1.5-acre neighborhood park with an additional ~0.5 acres of public plaza space, new bike lanes, street improvements, street trees, public art, and utility infrastructure. The residential units consist of for sale townhomes and duplexes and mid-rise condominiums and rental apartments. The Project also includes a 20-year Development Agreement between the City and Developer, a new community facilities district to finance Project infrastructure, and Specific Plan amendments. The Project is seeking relief under state housing/streamlining laws.

Location: Southwest corner of Isabel Avenue and Portola Avenue (APNs: 903-10-46 through 903-10-54)

Recommended by Planning Commission: July 2, 2024

Approved by City Council: _____

A. PROJECT AUTHORIZATION

1. The project shall be in conformance with all City Ordinances, rules, regulations, and policies except as set forth in the Project's Development Agreement ("DA"), Vesting Tentative Tract Map ("VTTM"), and Specific Plan Amendment ("SPPA") (collectively, the "Project Approvals"). The conditions listed below are particularly pertinent to this permit and shall not be construed to permit violation of other laws and policies not so listed.

2. Approval is limited to conformance of the land uses allowed in the Village, Core, Neighborhood Commercial, Office Core, Ground Floor Retail/Overlay Flex Space, and Open Space zoning designations in Subarea 3b and 3c of the Isabel Neighborhood Specific Plan, in accordance with the Project Approvals. Use of the property shall be limited to those permitted by the Isabel Neighborhood

Specific Plan as it exists now and pursuant to the Project Approvals, as the same may be amended in the future.

3. Vesting Tentative Tract Map 8659 and associated Site Plan Design Review and all other project approvals shall expire 20 years from the effective date of the Development Agreement 22-001, pursuant to any time extensions in the Development Agreement.

B. PROJECT SPECIFIC CONDITIONS

The applicant shall respond in writing to all conditions contained in this document and its attachments. Responses shall describe how the condition has been met and shall, where applicable, direct the plan checker to the page and/or drawing detail that demonstrates compliance with the condition. A copy of these responses shall be provided with each set of revised plans.

1. The following subsequent approvals are or may be required:
    a. A staff-level Site Plan Design Review for in-tract landscaping within each planning area is required prior to building permit issuance of the first building in all planning areas.
    b. If the Site Plan Design Review for in-tract landscaping is processed with another entitlement requiring a public hearing, then a public hearing may also be required. The review authority for subsequent Site Plan Design Review applications shall be as established in Livermore Development Code Table 9.3 (Review Authority for Site Plan and Design Review).
    c. A Tentative Map is required for any proposed small-lot land subdivision prior to Building Permit issuance of the first building in each Planning Area, subject to Livermore Development Code review process requirements. A public hearing is typically required for approval of a Tentative Map per the Development Code.
2. Prior to Improvement Plan approval, applicant shall revise landscape plan to ensure 20 percent of all onsite trees have a 24-inch box size or larger, as approved by the Community Development Department Director.
3. Prior to Improvement Plan approval, applicant shall revise landscape plan to ensure all shrubs shall have a minimum 5-gallon size, as approved by the Community Development Department Director.
4. Prior to sign installation, applicant shall submit for, and receive approval of, all required sign design review and building permit applications.
5. Prior to Improvement Plan approval, applicant shall demonstrate the project's use of recycled water for irrigation purposes, as approved by the City Engineer. All onsite irrigation shall use recycled water.
6. Prior to Building Permit approval, the applicant shall submit a photometric plan that demonstrates adequate site lighting. Exterior parking areas shall maintain a minimum light level of one foot-candle at the parking surface.

Pathways and private open space areas shall be sufficiently illuminated for safety, but respectful of the residential context, as approved by the Community Development Department Director.

7. Prior to the first Building Permit approval, applicant shall submit an acoustical study showing the project is consistent with all applicable state, INSP and GP standards. All acoustical study recommendations shall be incorporated into the submittal of the Building Permit applications.
8. Prior to Building Permit approval, building plans shall show that all rooftop mechanical equipment be designed to be fully screened from public view by roof parapet or architecturally integrated roof screen. Construction drawings shall include section drawings and roof plans demonstrating conformance with this requirement. To the extent practical, all ground-mounted mechanical equipment shall be relocated to roof areas. Ground mounted equipment shall be fully screened from public view, as approved by the Community Development Department Director.
9. All exterior furnishings and equipment in planning areas C1-C, C2-C, TS, and N3-B shall require review and approval of Community Development Director prior to issuance of a a Building Permit and final inspection.
10. Project shall conform to all applicable INSP Policies as listed in Attachment 2.
11. Project shall conform to all required Mitigation Measures listed in the INSP EIR Addendum MMRP (Attachment 3).
12. Project shall conform to all requirements listed in Development Agreement 22-001.
13. Prior to Improvement Plan approval, the Plans shall show that all trees adjacent to public infrastructure shall use control features like root barriers and engineered soils to prevent infrastructure damage, as approved by the Community Development Department Director.
14. Prior to Improvement Plan approval, the applicant shall demonstrate on the landscape plans compliance with the City's Water Efficient Landscape Ordinance (WELO), as approved by the Community Development Department Director.
15. Prior to Improvement Plan approval, exterior backflow preventers shall be screened from public view with landscape or by other appropriate means, as approved by the Community Development Department Director.
16. The project applicant and/or contractor shall treat any human remains encountered during ground-disturbing activities in accordance with California Health and Safety Code Section 7050.5.
17. Prior to receiving a Building Permit for excavation, grading or construction on development site, the applicant shall contact the Alameda County Vector Control Services District to determine if any pre-baiting requirements are necessary to control migration of vermin to adjacent property.
18. All project appliances shall be electric, as set forth in the 2018 Isabel Neighborhood Specific Plan Environmental Impact Report Mitigation,

Monitoring, and Reporting Program, subject to applicable Building Code exceptions.

19. Prior to occupancy of the Town Square on the southwest corner of Isabel and Gateway Avenue, applicant shall work with the City to implement site features to mitigate noise along Isabel Avenue. Site features shall include berms, landscaping, low walls, glass partitions, or other features as determined by the Community Development Department Director.
20. Transportation Management Agency/ Transportation Demand Management
    a. Prior to the Project's first Certificate of Occupancy, Developer shall submit, and the City shall approve, the Project's Master Homeowners' Association (HOA) Covenants, Conditions, and Restrictions (CC&Rs) for consistency with this condition. The CC&Rs shall include the following, as approved by the Director:
        i. The HOA shall implement all provisions of Isabel Neighborhood Specific Plan (Specific Plan) Policy P-TRA-22.
        ii. The HOA shall work cooperatively with the City and all other HOAs in the Specific Plan to implement Specific Plan Policy P-TRA-22.
        iii. The HOA, in conjunction with all other Specific Plan HOAs, shall bear applicable Transportation Management Agency/ Transportation Demand Management costs associated with Specific Plan Policy P-TRA-22.
    b. The Transportation Management Agency shall be formed within 180 days of HOA formation, subject to the Force Majeure provisions of the DA and extensions agreed to in writing by the Director.

21. Pursuant to Government Code Section 65867.5 (c), a sufficient water supply shall be available for the Project. Proof of the availability of a sufficient water supply shall be requested by the subdivision applicant or local agency, at the discretion of the local agency, and shall be based on written verification from the applicable public water system within 90 days of a request.
22. <u>To the extent practicable, the pedestrian trail located on the east side of Planning Area S1 should be designed to accommodate bicyclists and should connect directly to Isable Avenue (Condition added by Planning Commission on July 2, 2024).</u>
23. <u>In all locations where feasible, pedestrian curb ramps shall be directional (Condition added by Planning Commission on July 2, 2024).</u>
24. <u>To the extent practicable, the pedestrian bulb outs along Isabel Avenue shall be extended to shorten crossing distance (Condition added by Planning Commission July 2, 2024).</u>
25. <u>Project bike racks shall be evenly distributed across the site and shall be located within 50 feet commercial entries (Condition added by Planning Commission July 2, 2024).</u>
26. <u>Community Development Department staff shall coordinate with Livermore Amador Valley Transit Authority staff to explore bus stops within the Project site, where feasible (Condition added by Planning</u>

Commission July 2, 2024).

27. To the extent practicable, A Street and Gateway Avenue should be modified to ensure dedicated bicycle lanes are located along the curb face, and separated from the travel lane with automobile parking (Condition added by Planning Commission July 2, 2024).

C. GENERAL CONDITIONS OF APPROVAL

1. Development shall conform to the approved plans as shown in Exhibit B-1. Exhibit B-1 plans shall include but are not limited to subdivision, master landscape, and architectural plans reviewed and approved by the Planning Commission and City Council and amended by the applicant to reflect any changes indicated above in the Project Specific Conditions or required by the City in the approval process.

2. The development impact fees (subject to annual increases) are vested with the Development Agreement.
3. The Community Development Department may approve minor amendments to the permit, provided that the permit is still in substantial conformance with the original approval and all requirements of Development Agreement 22-001.
4. Approval of the Site Plan Design Review and Tentative Tract Map entitlements is not an authorization to commence construction. Building construction, alterations, repairs, sign erection, or occupancy shall not be permitted without prior approval of the Building Division through issuance of any required permits.
5. To the extent permitted by law, the project applicant shall defend, indemnify and hold harmless the City, its City Council, its officers, boards, commissions, employees and agents from and against any claim, action, or proceeding brought by a third party against the indemnified parties and the applicant to attack, set aside, or void the approval of the project or any permit authorized hereby for the project, including (without limitation) reimbursing the City its attorney's fees and costs incurred in defense of the litigation. The City may, in its sole discretion, elect to defend any such action with attorneys of its choice.

D. ENGINEERING DIVISION

1. Development shall conform to the attached Engineering Considerations, dated June 27, 2024 (Attachment 1).

E. BUILDING DIVISION

1. Each project shall conform to CA codes adopted at time of project Building permit submittal.
2. Commercial spaces shall submit separate Tenant Improvement applications than the shell permits based on use.
3. Community pool shall submit separate plans for Alameda County Health approval in addition to City of Livermore approval.

F. FIRE DEPARTMENT

The Fire Prevention Bureau reviews building/civil drawings for conceptual on-site fire mains and fire hydrant locations only. Plan check comments and approval DO NOT include: 1.) Installation of the on-site fire mains and fire hydrants. Specific installation drawings submitted by the licensed underground fire protection contractor shall be submitted to the Fire Prevention Bureau for approval; and 2.) Backflow prevention or connections to the public water mains.

1. FIRE HAZARDS: The project developer shall keep the site free of fire hazards from the start of lumber construction until the final inspection.

2. FIRE CODE: All construction shall conform to the requirements of the 2022 Livermore Fire Code and local ordinances. All required permits shall be obtained prior to work commencement.

3. SITE SAFETY: Site safety during construction shall be in accordance with Fire Code chapter 33.

4. FIRE SPRINKLERS: Automatic fire sprinklers shall be installed in all occupancies in accordance with the 2022 Livermore Building, Fire and Residential Codes with local amendments and ordinances.

5. EMERGENCY RESPONDER RADIO: Emergency responder radio coverage shall be provided in accordance with section 510 of the Fire Code.

6. FIRE PROTECTION FACILITIES: Prior to any construction framing, the applicant shall provide adequate fire protection facilities, including, but not limited to a water supply and water flow in conformance to the City's Fire Department Standards able to suppress a major fire.

7. WATER FLOW AND CONTROL VALVES: All fire sprinkler system water flow and control valves shall be complete and serviceable prior to final inspection. Prior to the occupancy of a building having a fire alarm system, the Fire Department shall test and witness the operation of the fire alarm system.

8. ELECTRICAL CONDUIT: Electrical conduit shall be provided to each fire protection system control valve including all valve(s) at the water connections. The Livermore-Pleasanton Fire Department requires electronic supervision of all valves for automatic sprinkler systems and fire protection systems.

9. LISTED: All commercial, industrial, and multi-family residential occupancies shall have valve tamper and water flow connected to a listed Central Station Service in accordance with NFPA 72. Fire Department plan check includes specifications, monitoring, installation, and alarm company certificates. Fire alarm control panel and remote annunciation shall be at location(s) approved by the Fire Prevention Bureau. All systems shall be point identified by individual device and annunciated by device type and point.

10. HAZARDOUS MATERIALS: Should any operation or business activity involve the use, storage or handling of hazardous materials, the firm shall be responsible for contacting the Livermore-Pleasanton Fire Department prior to commencing operations. Please contact the Hazardous Materials Coordinator at 925/454-2361.

11. FIRE HYDRANTS: Fire hydrants shall be installed at spacing not greater than 300 feet in industrial and commercial developments. Fire hydrants shall be installed at spacing not greater than 400 feet in residential developments.

12. FIRE LANE MARKING: On-site access ways, turn arounds, and internal drives shall be designated as fire lanes and identified as such by red curb striping and posted with signs at locations approve by the Fire Department. Signs shall be according to State standards and read “No Parking – Fire Lane” and must be shown on the plans. The red curb striping, sign location(s), and sign language shall be included in the building permit submittal for review and approval by the Livermore-Pleasanton Fire Department prior to building permit issuance.

    a. The following schedule for NO PARKING signs shall apply:

Width	*Requirements*
36 feet or greater	No requirements
Between 28 and 36 feet	Post one side
Between 20 and 28 feet	Post both sides
Less than 20 feet	Not permitted
Cul-de-Sac	Not permitted

13. EMERGENCY VEHICLE ACCESS ROADS: Access roads shall have 13 feet, 6 inches unobstructed vertical clearance, 20 feet of unobstructed width (26 feet where occupied building floors exceed 30 feet height), and inside turning radius of 31 feet and outside turning radius of 51 feet. Unobstructed shall mean a clear travel way, excluding parking width, and designed for an emergency vehicle weight of 70,000 pounds under all weather conditions. Unobstructed width shall not include the width of rolled curbs, sidewalks, or non-drivable surfaces. All exterior portions of buildings must be within 200 feet of an access road. Yard and parking area may be able to be located farther than 200 feet from access roads, depending on the specific use.

14. PREMISES IDENTIFICATION: Address numbers shall be installed on the front or primary entrance for all buildings. Minimum building address character size shall be 12-inch high by 1-inch stroke. In all cases address numerals shall be of contrasting background and clearly visible in accordance with the Livermore-Pleasanton Fire Department Premises Identification Standards. This may warrant field verification and adjustments based upon topography, landscaping or other obstructions.

15. FINAL INSPECTION: Prior to request for final inspection, all access roads, on-site access and fire hydrants shall be provided. All fire hydrants shall be accepted, inspected and tested to applicable City Standards.

G. LIVERMORE MUNICIPAL AIRPORT

1. Prior to the first Certificate of Occupancy for each planning area, Developer or Successor shall submit and gain approval of form 7460-1 (or any other required forms or approvals) from the Federal Aviation Administration (FAA), and shall provide documentation of such approval to the City, as approved by the Community Development Department Director and Airport Manager.
2. Prior to commencement of all crane operations, Developer or Successor shall submit and gain approval of form 7460-1 (or any other required forms or approvals) from the Federal Aviation Administration (FAA), and shall provide documentation of such approval to the City, as approved by the Community Development Department Director and Airport Manager.
3. Prior to approval of any grading or building permit, Developer or Successor shall submit, and the City shall approve, a complete Dust Control Plan, as approved by the City Engineer and Airport Manager.
4. Prior to approval of Final Map, Developer shall show Avigation Easements on the Final Map, as approved by the City Engineer and Airport Manager.
5. Prior to the Project's first Occupancy, Developer or Successor shall cause to be recorded the required deed notification as provided in the Livermore Executive Airport - Airport Land Use Compatibility Plan, Chapter 3.3.4.6, on all properties in the Project site for which this discretionary development permit is issued, and provide proof of recordation, as follows:

   NOTICE OF AIRPORT IN VICINITY

   This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibration, or odors). Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are

associated with the property before you complete your purchase and determine whether they are acceptable to you.

6. Residential and commercial buildings greater than 30 feet in height shall provide emergency apparatus aerial access within a minimum of 15 feet and a maximum of 30 feet of the face of the building from an interior drive aisle or a public street, unless alternative emergency access is approved by LPFD.
7. Downturned lights shall be used to mitigate glare.

H. WATER RESOURCES DIVISION

1. The project shall install full trash capture devices on the storm drainage system for this project. Full trash capture systems must be on the San Francisco Regional Water Quality Control Board's approved list : https://www.sfestuary.org/approved-trash-capture-devices/

2. Any future tenants in the commercial portion of this "mixed-use" project that is a "food service establishment" must comply with the Livermore Municipal Code 13.32.330, which states the following:

> *New and Existing Food Service Establishments. All new food service establishments are required to install, operate, and maintain an approved type and adequately sized grease interceptor with a minimum capacity of 750 gallons necessary to maintain compliance with the objectives of this chapter.*
>
> *Any existing food service establishment that does not have an approved grease interceptor with a minimum capacity of 750 gallons with planned modifications that include a building permit evaluation of $50,000 or greater will be required to install a grease interceptor pursuant to the requirements of this chapter… Grease interceptors shall be installed at a location where it shall be easily accessible for inspection, cleaning, and removal of intercepted grease. All such grease interceptors shall be serviced and emptied of accumulated waste content as required in order to maintain minimum design capability. Use of biological or chemical additives for grease remediation or as a supplement to grease interceptor or grease trap maintenance is prohibited. Sanitary wastes from water closets, urinals, garbage disposals, and high temperature dishwashers are not allowed to be connected to sewer lines intended for grease interceptor service.*

3. The applicant shall construct a separate grease waste sewer line for the commercial portion of this requirement to facilitate future tenants' compliance with this requirement if necessary.

I. ENVIRONMENTAL SERVICES DIVISION

1. For parcels that have building trash chutes and central trash enclosures within the common garages, Developer or Successor shall ensure that containers and service for recyclable and organic materials is at the same or at an equally convenient location as garbage.

J. LIVERMORE SANITATION

1. For Planning Areas C1-B, C2-A, S1, S3-A, and S3-B, Developer or Successor shall establish a trash bin and cart staging area. Signage and/or striping shall be provided at each staging area to indicate trash pickup days and no parking time frames, as approved by the Community Development Department and Livermore Sanitation.
2. The designated staging areas shall be within the Public Right-of-Way, directly adjacent to, or in line with, each garage or trash enclosure entrance, and located in the general vicinity of each location specific in the attached Staging Area Map (Attachment 4), or such other location recommended by the applicant's waste management consultant and approved by the Director in consultation with Livermore Sanitation.
3. Prior to the first Certificate of Occupancy of Planning Areas C1-B, C2-A, S1, S3-A, and S3-B, Developer or Successor shall provide Livermore Sanitation and the Community Development Department Director a plan to establish all staging areas, signage, and pickup schedules that will be subject to Community Development Department review and approval.
4. Given the residential proximity to the commercial uses, accounts will be serviced after 6:00am on each pickup day.

M. POLICE DEPARTMENT

1. Prior to occupancy of Planning Areas C1-B, C2-A, S1, S3-A, and S3-B, Developer or Successor shall prepare and submit a Security Plan, as approved by the Police Department.
2. The Project shall conform to Livermore Municipal Code Chapter 15.18, Building Security.
3. The Project shall implement all Law Enforcement Assets described in the Development Agreement.

Exhibits:

A: Engineering Considerations
B: Specific Plan Policy Matrix
C: Isabel Neighborhood Specific Plan Environmental Impact Report Mitigation, Monitoring, and Reporting Program
D: Livermore Sanitation Trash Staging Exhibit

DATE: June 27, 2024

ENGINEERING CONSIDERATIONS - EXHIBIT "A"
(Subject to revision prior to final approval
by Planning Commission and City Council)

TENTATIVE TRACT: 8659 (SUB22-008)
Isabel Crossings

LOCATION: 359 Portola Avenue

APPLICANT: Isabel Portola Owner LLC (Harridge)

Note: Special conditions are shown in standard type. Standard conditions that apply to this project are shown in italics. In addition, standard conditions of approval for this project are listed in Section II of the Development Plan Check and Procedures Manual.

1. DEFINITIONS

For the purpose of this agreement, the following words shall have the meanings respectively ascribed to them by this section:

Developer: *Person(s) or Corporation(s) signing final map(s) and subdivision agreement(s)*

Improvement Plans: *Construction drawings for required public and private improvements*

Services: *Utility lateral, or any portions of a conduit cable or duct, between a utility distribution line and the site it serves*

Project: *The work to be performed by Developer*

2. VESTING TENTATIVE MAP

Approval or conditional approval of this vesting tentative map shall not limit the City Engineer's ability to require workable designs on future grading and improvement plans based upon these Engineering Considerations and the City's standard engineering specifications and details.

3. GENERAL

The project shall be in conformance with all City Ordinances, rules, regulations, and policies except as set forth in the Development Agrrement. *The conditions listed below are particularly pertinent to this permit and shall not be construed to permit violation of other laws and policies not so listed.* If the following conditions conflict with the Development Agreement, Veting Tentative Map, or the resolutions adopted as part of the Project approvals (collectively "Project Approvals"), the Project Approvals shall control over the conditions

All required improvements shall be constructed in accordance with the Development Agreement.

In accordance with Development Agreement 22-001 (DA), the Developer has agreed to design and construct various improvements and amenities as specified in the Isabel Neighborhood Specific Plan. These Engineering Considerations provide additional requirements for the design and construction of these improvements and amenities.

In order to provide for future construction of a pedestrian crossing of Isabel Avenue for public access to the future Valley Link Station, the Developer shall dedicate easements to the City for the public access, construction and operation of this crossing on the final map within the Town Square. The final location of this easement will be determined by the City Engineer working with the Developer.

In order to provide public access to the proposed multi-use trail at the southern end of the project, the Developer shall dedicate a public access easement over the trail on the final map as depicted on th Tentative Map.

In order to provide for the access to emergency vehicles at the southern end of the project, the Developer shall dedicate a emergency vehicle access easement over the trail on the final map as depicted on the Tentative Map.

In accordance with the Isabel Neighborhood Specific Plan, the Developer shall construct a neighborhood park at the northwest corner of Main Street and A Street. Because this park is intended to accommodate a variety of public programs and events. The park may include passive open space, playgrounds, picnic area, and pathways. Because LARPD will be maintaining and programming this park, the Developer shall design and construct this park per LARPD standards. LARPD approval signature will be required on the final plan set for the park. The developer shall dedicate the plaza parcels to the City on the final map.

In accordance with the Isabel Neighborhood Specific Plan, the Developer shall design and construct three plazas. Two located on Gateway Avenue at the entrance to the neighborhood and at the northwest corner of Main Street and Gateway Avenue. These plazas are central to the neighborhood and will serve as community gathering spaces. The plazas may include but are not limited to outdoor dining spaces, public art, kiosks, and specialty street furniture and lighting that encourages socialization and may include fountains. The developer shall dedicate the park parcel to the City on the final map.

In accordance with the DA, the Developer shall install Law Enforcement Assets that connect to the Livermore Police Department's Real Time Awareness Center. These assets shall be located on City traffic signals, streetlights, or other infrastructure, as approved by the Director, Police Chief, and Administrative Services Director.

In accordance with the Isabel Neighborhood Specific Plan, the Developer shall establish a Transportation Management Association (TMA). The purpose of the TMA is to provide strategies to help make alternative modes of transportation as convenient, affordable and safe as solo

driving. The strategies that may be included in the TMA are outlined in Chapter 3 of the Isabel Neighborhood Specific Plan.

A. IMPROVEMENT PLANS - Exhibit A-1

An engineered improvement plan shall be prepared by the Developer for approval by the City's Departments (including the Community Development, Public Services, Fire, and Police Department), which shall include, but not necessarily be limited to, existing site conditions, dedications, grading plans, street design and grades, curb, gutter, sidewalk and driveway grades, and type, size and location of all public works improvements as herein required. Approval of this tentative map does not constitute approval of the details shown thereon.

B. STANDARDS FOR IMPROVEMENT PLANS AND MAPS

All improvement plans and maps shall conform to the following City of Livermore documents except as modified by these engineering considerations:

1. *City of Livermore Standard Specifications and Details*
2. *Development Plan Check and Procedures Manual*

Completed final map and improvement plan checklists from the manual entitled "City of Livermore, Development Plan Check and Procedures Manual" shall be submitted with the first plan check submittal for each phase.

C. STANDARD CONDITIONS OF APPROVAL IN THE DEVELOPMENT PLAN CHECK AND PROCEDURES MANUAL

All of the standard conditions of approval for subdivisions and major projects as listed in Part II of the City of Livermore Development Plan Check and Procedures Manual apply except for the following: A-2, A-4, A-3, A-10, B-7, B-8, B-9, B-10, B-11, B-12, B-13, B-14, and B-16.

D. WORK IN OTHER JURISDICTIONS

The Developer is responsible for obtaining permits and approvals for construction work and property acquisition that are required by agencies other than the City of Livermore.

Creek improvements may be subject to requirements of any or all of the following agencies: (1) California Department of Fish and Game, (2) the Army Corps of Engineers, (3) the Regional Water Quality Control Board, (4) State Department of Water Resources (5) the U.S. Fish and Wildlife Service, and (6) Alameda County Flood Control and Water Conservation District (Zone 7).

Portions of Isabel Avenue are within Caltrans right-of-way. Any construction within the Caltrans right-of-way will require a permit from Caltrans prior to construction. Other than the proposed Caltrans embankment landscaping, the project has been designed to avoid constructing improvements in the Caltrans right-of-way.

4. STREETS

A. SPECIFIC REQUIREMENTS:

The Developer shall offer easements and dedications for, and shall improve his share of the ultimate street widths for the following named streets in accordance with the City's General Plan:

Isabel Avenue

Isabel Avenue is a major street in the General Plan. Along the project frontage Isabel Avenue is currently a 4-lane road with a striped median to accommodate turning lanes and a Class IIa bike lane in each direction.

The intersection of Isabel Avenue and Portola Avenue shall be redesigned and constructed as a protected intersection to provide for enhanced safety provisions for bicyclists and pedestrians moving through the intersection. The redesign of the intersection shall include but is not limited to the extension of the bike lane around the intersection that is protected with corner islands and bicycle signals. Final design features to be approved by the City Engineer. The revised intersection design shall be coordinated with the Shea Aura Tract 8612 (SUB21-007) project across the street.

The Isabel Neighborhood Specific Plan (INSP) requires that the existing bike lanes on Isabel Avenue be replaced with a new Class IV separated bike lane with buffer along the project frontage. Installation of this Class IV bike lane will include a physically raised barrier.

The Class IV bike lane will be comprised of an 8’ bike lane and 3’ median buffer. The median buffer shall have 6” deep curbs and be filled with landscaping and a decorative surface treatment subject to the review and approval of the Community Development Department. The buffer area shall be designed with a combination of median buffer planters and open segments to provide cyclists with both a travel lane separated from traffic and periodic openings with breakaway bollards to enter and exit the buffered bike lane. The median buffer planters shall be approximately 60’ in length and 3’ wide and have 6” deep curbs. The Developer shall provide a minimum of 3 samples of proposed decorative surface treatments for the median buffer during the design phase for review and approval by the Community Development Department.

Final design of the Class IV bike lane shall include but is not limited to appropriate transitions to and from the existing Class IIa to the Class IV bike lane; modifications to signing and striping; any surface treatments and/or structures, and any necessary utility services needed for the maintenance of the median buffer.

To accommodate the space needed for the Class IV bike lane the lane configurations on Isabel Avenue will vary depending on location.

Intersection with Portola Avenue:

At the intersection with Portola Avenue the lane configuration shall be constructed as follows:

8’ Class IV bike lane
3’ raised buffer median
11.5’ merge lane
11.5’ travel lane
11.5’ travel lane
9’ raised median
11.5’ left turn lane
11.5’ left turn lane
11.5’ travel lane
11.5’ travel lane
11.5’ right turn lane
3’ raised buffer median
8’ Class IV bike lane

The Developer shall be responsible for constructing the 9’ median but will need to coordinate its construction with the Developer of Shea Aura Tract 8612 (SUB21-007) by locating the Isabel Avenue’s lane configurations in their ultimate locations.

The raised median shall expand in size and eventually taper down a 6’ width at the intersection of Isabel and A Street where the lane configuration transitions as follows:

8’ Class IV bike lane
3’ raised buffer median
11’ right turn lane
11.5’ travel lane
11.5’ travel lane
11’ striped future left turn lane
6’ raised median
11.5’ travel lane
11.5’ travel lane
3’ raised buffer median
8’ Class IV bike lane

Just north of the intersection with A Street, the Developer shall construct a northbound bus stop and turnout with a raised platform to accommodate the Class IV bike lane in accordance with Figure 17 in FHWA’s Separated Bike Lane and Planning Design Guide. The Developer shall install the appropriate transitions for the bike lane into and out of the bus stop.

Intersection with A Street:

The intersection of Isabel Avenue and A Street shall be designed and constructed as a protected intersection to provide for enhanced safety provisions for bicyclists and pedestrians moving through the intersection. The design of the intersection shall include but is not limited to the extension of the bike lane around the intersection that is protected with corner islands and bicycle signals. Final design features to be approved by the City Engineer.

South of the intersection of Isabel Avenue and A Street, the lane configuration shall be constructed as follows:

8’ Class IV bike lane
3’ raised buffer median (minimum)
11.5’ travel lane
11.5’ travel lane
10’ raised median
11’ left turn lane
11.5’ travel lane
11.5’ travel lane
3’ raised buffer median
8’ Class IV bike lane

Just south of the intersection with A Street, the Developer shall construct a southbound bus stop and turnout with a raised platform to accommodate the Class IV bike lane in accordance with Figure 17 in FHWA’s Separated Bike Lane and Planning Design Guide. The Developer shall install the appropriate transitions for the bike lane into and out of the bus stop.

Intersection with Gateway Avenue:

North of the intersection with Gateway Avenue the lane configuration shall be constructed as follows:

8’ Class IV bike lane
3’ raised buffer median
11.5’ travel/right turn lane
11.5’ travel lane
11’ striped future left turn lane
8’ raised median
11.5’ travel lane
11.5’ travel lane
3’ raised buffer median
8’ Class IV bike lane

South of the intersection with Gateway Avenue the lane configuration shall transition as follows:

6’ Class IV bike lane
3’ raised buffer median
11’ travel lane
11’ travel lane
11’ striped future left turn lane
5’ raised median
11’ left turn lane
11’ left turn lane

11’ travel lane
11’ travel lane
3’ raised buffer median
6’ Class IV bike lane

The median shall then extend out to a width of 22.5’ and terminate at the Caltrans right-of-way limit.

Streetlights on Isabel Avenue shall be installed along the project frontage and within the Isabel Avenue median in accordance with City Standards and Details. The project frontage streetlights shall be installed in accordance with Details ST-14A and ST14B. The median streetlights shall be double mast arm and shall be installed in accordance with Details ST-14A and ST-14B.

Portola Avenue

Portola Avenue is a major street in the General Plan. Along the project frontage Portola Avenue is a 4-lane road with a landscaped median to accommodate turning lanes and a Class IIa bike lane in each direction.

The Isabel Neighborhood Specific Plan (INSP) requires that the existing bike lane at the project location be replaced with a new Class IV separated bike lane with buffer along the project frontage in the eastbound direction. Installation of this Class IV bike lane will include a physically raised barrier.

To accommodate the Class 4 bike lane the lane configuration of Portola Avenue shall be modified in segments as follows:

Eastbound - West of Montage (south of median)

12’ travel lane
12’ travel lane
8.5’ buffer
8’ bike lane

East of Montage (north to south)
8’ bike lane
9’ buffer
11’ travel lane
12 travel lane
12’ turn lane
10’ existing median
11’ travel lane
12’ travel lane
8’ bike lane
3.5’ minimum buffer

The buffer for this section shall expand as necessary to accommodate the existing bus turn out

East of Isabel (north to south)

8’ bike lane
9’ buffer
11’ travel lane
11’ travel lane
10’ existing median
11’ turn lane
11’ travel lane
11’ travel lane
11’ turn lane
11’ turn lane
3.5’ buffer
6’ bike lane

Isabel to Cayetano Park entrance (north of median)

8’ bike lane
2’ buffer
10’ travel/turn lane
10’ travel lane
1l’ turn lane
10’ turn lane
11’ turn lane

The Class IV bike lane will be comprised of a bike lane and buffer area of varying width as noted above. The buffer area shall be designed with a combination of median buffer planters and open segments to provide cyclists with both a travel lane separated from traffic and periodic openings with breakaway bollards to enter and exit the buffered bike lane. The median buffer planters shall be approximately 60’ in length and varying width and have 6” deep curbs. Where feasible, each median buffer planter shall be planted with 3 street trees per standard detail L-3G with groundcover and/or hardscape per standard detail L-2B. Median buffer planting shall be reviewed and approved by the Community Development Department. City Engineer may modify the final lane widths shown above as needed to fit within available right-of-way.

Final design of the Class IV bike lane shall include but is not limited to appropriate transitions to and from the existing Class IIa to the Class IV bike lane; modifications to signing and striping; traffic signal timing, irrigation of planter area, any surface treatments and/or structures, and any necessary utility services needed for the maintenance of the median buffer planter.

Per Development Agreement 22-001, the Developer shall install additional Class IV bike lanes at the following locations:

1. Westbound on North Canyons Parkway and Portola Avenue completing the segment of Class

IV bike lanes installed with Denova Amarone Tract 8657 and Shea Serenity Tract 8613
2. Westbound on Portola Avenue completing the segment of Class IV bike lane between Shea Serenity Tract 8613 and Campus Hill Drive.
3. Westbound between Campus Hill drive and just beyond the entrance to Cayetano Park.
4. Eastbound between Collier Canyon Road and the project frontage.

To further enhance bicycle safety, the Developer shall install bike boxes at the intersection of Portola Avenue and Montage Drive.

Portola Avenue along the tract boundary shall be given a 1-1/2" A.C. overlay across the full width. Key cutting will be required at the conform points and along the gutter.

Isabel Avenue and Portola Avenue shall include relinquishment of abutter's rights on the final map.

Campus Hill Drive

In order to maximize the functionality of the redesigned intersection of Isabel Avenue and Portola Avenue as a protected intersection, the Developer shall extend the Class IV bike lane on both sides of Campus Hill Drive up to Heligan Lane.

Due to the right-of-way constraints of Campus Hill Drive, the Class IV bike lane shall be comprised of an 8’ bike lane on the west side and a 6’ bike lane on the east side with 2’ buffers on both sides.

Final design of the Class IV bike lane shall include but is not limited to appropriate transitions to and from the Class IV bike lane; modifications to signing and striping; traffic signal timing, irrigation of planter area, any surface treatments and/or structures, and any necessary utility services needed for the maintenance of the median buffer planter.

Main Street

Main Street is the primary street within the project and is meant to serve the commercial core of the Isabel Neighborhood Specific Plan. It is intended to contribute to street life and provide a sense of identity for the neighborhood. The streetscape for Main Street shall include but is not limited to design features such as specialty stamped concrete sidewalk, specialty streetlights and lighting, specialty wayfinding signs, kiosks, planters, trash and recycling receptacles, public art, special event banners and benches. During the design phase the Developer shall provide a minimum of 3 stamped concrete samples for the review and approval of the Community Development Department. The streetlights on Main Street shall include secondary outlets to provide for additional power for special events.

The Developer shall construct Main Street in two segments as follows:

Between Gateway and A Street, Main Street shall be comprised of a 92’ right-of way width that shall contain will 2 – 12’ travel lanes with 18’ wide angled parking on both sides with landscaped islands interspersed among the parking stalls. Along the edge of pavement 4’ planter strips shall be installed with 12’ sidewalks on both sides of the street. The sidewalk along Main Street shall be

decorative stamped concrete and shall extend around the corners onto Gateway Avenue. During the design phase the Developer shall provide a minimum of 3 stamped concrete samples for the review and approval of the Community Development Department.

The intersection of Mainstreet and Gateway Avenue shall be an all-way stop controlled intersection.

Between A Street and Portola Avenue, Main Street shall narrow to a 64' right-of-way width that shall contain 2 – 12' travel lanes with 8' parallel parking on both sides. Along the edge of pavement 4' planter strips shall be installed with 8' sidewalks on both sides of the street.

Streetlights on Main Street between Gateway Ave and A Street shall be decorative and installed in accordance with City Standards and Detail ST-14F. This will serve to identify this segment of Main Street as part of the core of the Isabel Neighborhood Specific Plan.

Streetlights on Main Street between A Street and Portola Avenue and shall be decorative and installed in accordance with City Standards and Detail ST-14D.

Gateway Avenue

Gateway Avenue is a Pedestrian Street in the Isabel Neighborhood Specific Plan. Pedestrian Streets are intended to serve as the entry point into the Isabel Neighborhood and be the main walking route within the neighborhood that is comfortable for pedestrians. Between Isabel Avenue and Main Street, Gateway Avenue shall have specialized streetscape features that include but is not limited to planter boxes, specialty lighting, benches, public art, special event banners, and wayfinding signage for pedestrians, bicyclists and drivers. Other specialty streetscape features may include specialty paving at intersections to enhance the visibility of pedestrian crossings.

The right-of-way width for Gateway Avenue varies in width from 77' to 60'. In general, Gateway Avenue shall be comprised of two travel lanes with pedestrian serving features such as 6' sidewalks and 6' planter strips on both sides of the street. 8' parallel parking shall be provided in designated parking bays where space is available.

Between Isabel Avenue and Main Street, Gateway Avenue shall have a right-of-way width of 77' to include additional travel lanes to accommodate traffic entering and exiting the neighborhood. Additionally, Gateway Avenue shall include a bike box at the intersection with Isabel Avenue to facilitate left turns for bicyclists onto Isabel Avenue. No parking will be allowed for this segment of Gateway Avenue.

Between Main Street and C Street Gateway Avenue shall have a right-of-way width of 61'. This segment of Gateway Avenue shall be comprised of a 10' travel/turn lane, 2 – 10' travel lanes and 8' parking bay along the south side of the street. The planter strips shall be narrowed in this segment to fit within the 61' right-of-way width.

Between C Street and Shea Center Drive

Between C Street and Shea Center Drive Gateway Avenue shall have a right-of-way width of 60'.

This segment of Gateway Avenue shall be comprised of 2 – 10' travel lanes and 8' parking bays along both sides of the street.

In accordance with the Isabel Neighborhood Specific Plan, Class III bike lanes shall be installed within the entire Gateway Avenue right-of-way from Isabel Avenue to Collier Canyon Road. Class III bike lanes share the travel way with vehicles. The Developer shall sign and stripe the Class III bike lane within Gateway in locations that are deemed appropriate by the City Engineer.

Streetlights on Gateway Avenue between Isabel Avenue and C Street shall be decorative and installed in accordance with City Standards and Detail ST-14F. This will serve to identify this segment of Gateway Avenue as part of the core of the Isabel Neighborhood Specific Plan.

Streetlights on the remainder of Gateway Avenue shall be decorative and installed in accordance with City Standards and Detail ST-14D.

A Street

A Street is a Bicycle Street in the Isabel Neighborhood Specific Plan. Bicycle Streets are intended to provide connection to the City's bicycle and trail network through Class II bike lanes. Bicycle streets have narrow travel lanes and parking bays on both sides where space is available. Bicycle streets also have planter strips and sidewalk on both sides. A Street shall have a 76' right-of-way width that is comprised of 2-10' travel, 2- 6' Class II bike lanes separated from the travel lanes by 2' striped buffers. The parking bays shall be 8' wide and the planter strip and sidewalk for A Street shall be 6' wide.

Streetlights on A Street shall be decorative and installed in accordance with City Standards and Detail ST-14D.

B and C Streets

B and C Streets are Pedestrian treets in the Isabel Neighborhood Specific Plan. These streets shall have a 62' right-of-way width comprised of 2- 11' travel lanes with 8-foot parking bays, 6' planter strips and 6' sidewalk on both sides.

Streetlights on B and C Streets shall be decorative and installed in accordance with City Standards and Detail ST-14D.

Shea Center Drive

In accordance with the Isabel Neighborhood Specific Plan, Class II bike lanes shall be installed within the Shea Center Drive right-of-way in both directions from Gateway Avenue to Constitution Drive. The Developer shall sign and stripe the Class II bike lane within Shea Center Drive. To accomplish this the street shall be restriped for 2- 10' travel lanes, 2- 6' bike lanes and a 10' dual left turn lane.

Mid-block Crossings

Where mid-block crossings are proposed on any street the Developer shall install Rectangular Rapid Flashing Beacons (RRFB) to increase safety at these locations. Installation shall include all utility connections and services.

Emergency Vehicle Access

The Developer shall construct and dedicate an easement for a 26 feet wide Emergency Vehicle Access as shown on the Tentative Map.

Additionally, prior to the start of framing for any buildings, full street sections shall be installed to provide access for emergency vehicles during construction of the buildings. Full street sections shall include installation of fire hydrants, utilities and curb and gutters.

CASp Certification for Public Walkways/Sidewalks

The Developer shall have a certified CASp Specialist review and certify that the design for all pedestrian improvements within the public right-of-way or a public easement complies with the following applicable regulations: American with Disabilities Act (ADA) requirements, the Public Rights-of-Way Accessibility Guidelines (PROWAG), and the requirements found in Chapter 11B of the 2019 California Building Code. If an accessibility design cannot meet the above listed applicable standards, the Developer shall propose and the CASp Specialist shall concur with a design exception request for approval by the City Engineer or their designee. In addition, the Developer shall have the certified CASp Specialist inspect and certify that pedestrian improvements are installed per the CASp certified design. Pedestrian improvements include new trails, walkways, sidewalks, accessible ramps, connections between existing and new pedestrian improvements, and modifications to existing pedestrian improvements within or adjacent to the project site, as shown on the approved plans.

5. TRAFFIC SIGNALS

Install fully traffic actuated traffic signals per current City and Caltrans standards and using equipment as specified by the City Engineer at the following intersections:

Isabel Avenue and Portola Avenue - redesign as a protected intersection

Isabel Avenue and Gateway – design as a protected intersection with a bike box on Gateway Avenue

Isabel Avenue and Street A – modify to accommodate striping for the Class IV bike lanes

Portola and Main Street/Montage Drive - modify to accommodate striping for the Class IV bike lanes and add bike boxes on Main Street and Montage Drive

Traffic signals shall be in operation seven days prior to the first occupancy or at the approval of the

City Engineer.

6. TRAFFIC IMPACT FEE CREDITS AND REIMBURSEMENTS:

In accordance with Development Agreement 22-001 the Developer will be eligible for credits or reimbursements for TIF eligible improvements as outlined in the Development Agreement. The following is a summary of the improvements that will receive TIF Credit or reimbursement under the terms of Development Agreement 22-001:

Main Street between Gateway Avenue and A Street
Gateway Avenue between Main Street and Isabel Avenue
Isabel Avenue Medians and non-frontage off-site improvements
Portola Avenue non-frontage improvements
Shea Center Drive southbound bike lane
Gateway Avenue bike lanes west of Shea Center Drive

A. CREDITS

Traffic impact fee credits will be calculated at the time the subdivision agreement is prepared prior to final map approval. The traffic impact fee credit for construction will be based on cost estimates for the T.I.F. work as approved by the City Engineer. The final calculated traffic impact fee for construction will determine the number of building permits eligible to receive traffic impact fee credits at permit issuance.

B. REIMBURSEMENTS

In accordance with DA the Developer may be eligible to receive a reimbursement of a portion of TIF paid at building permit issuance if certain performance parameters are met as outlined in the DA. The portion of TIF fees to be reimbursed will be the difference between the full TIF rate and the Downtown TIF rate in effect at the time of building permit issuance. Additionally, following fulfillment of the performance parameters for TIF reimbursement as outlined in the DA, the Downtown TIF rate will be applied for all subsequent building permits issued for the project.

7. SANITARY SEWERS

The Developer is proposing to relocate an existing 12’ public sanitary sewer main along the southern end of the project within a 30’ sanitary sewer easement. The Developer is proposing to relocate the sewer main under the proposed multi-use trail along the southern edge of the project.

In order to relocate this main the Developer shall dedicate a new 30’ sanitary sewer easement on the final map for the relocated portion of the sewer main.

Following installation of the relocated sewer main and the new main has passed City inspection tests for use, the Developer shall remove the unused sewer main and prepare documents for the vacation of the sanitary sewer easement that will no longer be used for review and approval by the

City. Vacation of the sanitary were easement that is no longer needed shall occur prior to tract acceptance.

The Developer will be installing the City standard asphalt street section for the majority of the streets in the project with only specialty paving (i.e. pavers, stamped concrete, stamped asphalt, etc.) in a few areas to act as "accents" to the project entry or other areas as approved by the City Engineer. In order to facilitate the maintenance and repair of the public sanitary sewer lines in the future, the Developer shall install double-walled pipe or other pipe protective measures as approved by the City Engineer, in all locations where the pipe runs under specialty paving. Additionally, no pipe joints will be allowed in specialty paving areas.

Sewer lines shall be extended across all frontages and stubbed to each Planning Area.

Sewer laterals with cleanouts behind the curb shall be installed to each lot or site before the streets are surfaced.

8. STORM WATER DRAINAGE AND TREATMENT REQUIREMENTS

A. General

1. This site is subject to the National Pollutant Discharge Elimination System (NPDES) Program. Prior to the issuance of the initial grading or building permit, the Developer shall provide evidence that the site is covered by the statewide General Permit to Discharge Storm Water associated with construction activity. This requires confirmation that a Notice of Intent (NOI) and the applicable fee was sent to the State Water Resources Control Board. In addition, the grading plans need to state: "All grading shall be in accordance with the Storm Water Pollution Prevention Plan prepared by the Developer per the Notice of Intent on file with the State Water Resources Control Board".

2. Necessary interceptor ditches shall be concrete. Field inlets and storm drainage pipe may be necessary in conjunction with concrete interceptor ditches as secondary drainage releases. All interceptor ditches shall be privately maintained.

B. Storm Drainage Requirements

1. Drainage from this site currently outfalls to the Arroyo Las Positas which is identified in the Zone 7 Stream Management Master plan and Stream WISE Program, Project R5-2, dated August 2006 as impacted for sediment. The necessary improvements needed to alleviate this deficiency include removing the sediment from Airway Blvd. to Kitty Hawk Road. To avoid worsening downstream creek impacts the Developer shall evaluate the impacts to the creek as a result of this development and demonstrate that they are equal to or less than the existing impacts to the creek prior to development. If the impacts of the proposed development are found to exceed the pre-project impacts to the creek the Developer may: 1) choose to complete the improvements as part of their project; 2) wait until the improvements are completed by the City or Zone 7 with a future CIP project prior to proceeding with their project; or 3) provide with their project, on-site facilities that create post-development storm flows that are less than or equal to pre-development flows and

meet the City's discharge guidelines. If detention is needed the Developer shall regulate storm water flows up to and including the 100-year storm with the discharge rate the same as that required by the Hydromodification Management Plan "HMP". Developer shall submit calculations demonstrating that the added detention and flow regulation results in post project flows that are equal or less than the existing impacts to the creek prior to development.

2. *This project is located within an impacted storm drainage basin as identified in the City's Storm Drain Master Plan (dated July 2004). The necessary improvements needed to increase downstream capacity are not currently identified as a project within the City's current Capital Improvement Program (CIP). The applicant may: 1) choose to install the storm drain improvements as part of their project; 2) wait until the improvements are installed by the City with a future CIP project prior to proceeding with their project; or 3) provide with their project, on-site facilities that create post-development storm flows that are less than or equal to pre-development flows.*

Per the City's Facilities Planning Guidelines (dated June 2005), the flows must have the following characteristics:

> *For a 10-year design discharge: a hydraulic grade line (HGL) is no higher than 1.25 feet below the top of curb elevation at any manhole or inlet.*
>
> *For a 100-year design discharge: a HGL does not exceed the top of curb elevation. (This is required for item 3 above.)*

For additional detail on these guidelines, the applicant should refer to the following resources: City of Livermore Storm Drain Master Plan & City of Livermore Facilities Planning Guidelines (both available at the Engineering counter at City Hall).

Stormwater Hydromodification Vault

The storm drainage for the site shall be conveyed to the proposed stormwater hydromodification vault located at the southern end of the project as shown on the tentative map. This stormwater hydromodification vault shall be sized to serve the ultimate development of the site and detain the difference between pre-development and post development storm water flows for the 100-year storm based upon the City's NPDES storm water discharge permit. This stormwater hydromodification vault shall be privately owned and maintained.

C. Stormwater Infrastructure Maintenance Funding

The cost to maintain all private storm water infrastructure installed with this project shall be funded by the Developer.

D. Channels – Not Used

E. Storm Water Treatment, Detention and Low Impact Development Requirements

1. *The Developer shall treat the storm water runoff from this site prior to having the storm water enter the City's storm water distribution system. Stormwater Treatment, Low Impact Development, and Trash Capture is required by the Regional Water Quality Control Board. The Developer shall complete and or update the Stormwater Requirements Checklist. The Developer shall provide a storm water treatment plan with calculations indicating treatment that meets the latest requirements described in Section C.3 of the City's NPDES Permit with the Regional Water Quality Control Board. City approval of this plan and calculations is required prior to the approval of the improvement plans.*

2. *This project is greater than one acre, the Developer shall provide a Hydrograph Modification Plan (HMP) with calculations in accordance with the Alameda Countywide Cleanwater Program (ACCWP) Bay Area Hydrology Model (BAHM) guidelines. The software for the design of control measures to meet the Flow Duration Control is available to download from* www.bayareamodel.org. *For additional information you may contact Debbie Salgado in the City's Engineering Department at (925-960-4558)*

3. *Prior to final map approval, the applicant shall enter into a maintenance agreement with the City of Livermore for all storm water treatment devices deemed necessary on this site. If the stormwater treatment devices will be maintained by the individual homeowners a cleanout will be necessary at the property lines to allow the residents to maintain their portion of the private storm drain underdrain. If the stormwater treatment device will be maintained by a Homeowners Association, then the cleanouts at each of the property lines may not be needed. The storm drain treatment devices shall be shown on the plat plans and included in the Operations and Maintenance Agreement. The Operations and Maintenance Agreement(s) shall be recorded prior to recordation of the Final Map.*

F. Stormwater Treatment Infrastructure Maintenance Funding

The cost to maintain all private storm water treatment, detention and low impact development infrastructure installed with this project shall be funded by the Developer.

The cost to maintain storm water treatment devices located within a public street will be maintained by the City through the INSP Maintenance CFD.

9. REQUIRED SOURCE CONTROL STORMWATER MEASURES

The Regional Water Quality Control Board adopted Order R2-2022-0018 issuing the Alameda Countywide NPDES municipal storm water permit for the Alameda Countywide Clean Water Program. The 17 member agencies, including Livermore, are subject to this permit and all its requirements including the following:

> *"The Permittees shall, as part of their continuous improvement process, submit enhanced new development and significant redevelopment Performance Standards*

that summarize source control requirements for such projects to limit pollutant generation, discharge, and runoff, to the maximum extent practicable…"

In accordance with this requirement, the following source control measures, included as part of these Conditions of Approval, shall be implemented as a part of this project.

A. Structural Control Measures

1. Illegal Dumping to Storm Drain Inlets and Waterways

On-site storm drain inlets, except inlets located in landscaped areas, shall be clearly marked with the words "No Dumping! Flows to Bay" on a stainless steel marker. The stainless steel markers are available for purchase from the Water Resources Division. For ordering information, please call 925-960-8100. For projects with newly-developed, privately-maintained streets, agency staff will verify that storm drain inlets have been marked before the final sign-off on the project's building permit or encroachment permit.

2. Interior Floor Drains

Approved interior floor drains shall be plumbed to the sanitary sewer system and shall not be connected to the storm drain system. The applicant shall contact the Water Resources Division for specific connection and discharge requirements.

3. Parking Garages

Interior level parking garage floor drains shall be connected to a sand/oil interceptor or equivalent water treatment device approved by the Water Resources Division prior to discharging to the sanitary sewer system.

4. Pesticide/Fertilizer Application and Irrigation

a. Landscaping shall be designed to minimize irrigation and runoff, promote surface infiltration where possible, minimize the use of fertilizers and pesticides that can contribute to storm water pollution, and incorporate appropriate Bay-Friendly Landscaping principles.

b. If a landscaping plan is required as part of a development project application, the plan shall meet the following conditions related to reduction of pesticide use on the project site:

I. Where feasible, landscaping shall be designed and operated to treat storm water runoff by incorporating elements that collect, detain, and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolonged exposure to water shall be specified.

II. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.

III. Existing native trees, shrubs, and ground cover shall be retained and incorporated into the landscape plan to the maximum extent practicable.

IV. Unless otherwise specified, proper maintenance of landscaping shall be the responsibility of the property owner.

V. Integrated pest management (IPM) principles and techniques shall be encouraged as part of the landscaping design. Some examples of IPM principles and techniques include the following:

i. Select plants that are well adapted to soil conditions at the site.

ii. Select plants that are well adapted to sun and shade conditions at the site. Consider future conditions when plants reach maturity. Consider seasonal changes and time of day.

iii. Provide irrigation appropriate to the water requirements of the selected plants.

iv. Select pest and disease resistant plants.

v. Plant a diversity of species to prevent a potential pest infestation from affecting the entire landscaping plan.

vi. Use "insectary" plants in the landscaping to attract and keep beneficial insects.

VI. Landscaping shall also comply with City of Livermore's "Water Efficient Landscape Ordinance". However, areas of a site used for bio-swales or other landscaped areas that function as a storm water treatment measure shall be exempt from the Water Efficient Landscaping requirements.

VII. An efficient irrigation system shall be installed in areas requiring irrigation. An example of an efficient irrigation system is one that includes a weather-based (automatic, self-adjusting) irrigation controller with a moisture and/or rain sensor shutoff, and in which sprinkler and spray heads are not permitted in areas less than 8 feet wide.

5. Pool, Spa, and Fountain Discharges

a. New or rebuilt swimming pools, hot tubs, spas and fountains must have a connection to the sanitary sewer to facilitate draining. This connection could be a drain in the pool to the sanitary sewer or a cleanout located close enough to the pool so that a hose can readily direct the pool discharge into the sanitary sewer cleanout.

b. When draining is necessary, a hose or other temporary system shall be directed into a sanitary sewer cleanout, or vegetated areas that are large enough to accommodate the volume without allowing the discharged water to flow to the storm drain system or receiving water body.

6. Food Service Equipment Cleaning

a. Food service facilities (including grocery stores) shall have a sink or other container for cleaning floor mats, equipment, and hood filters, which is connected to a grease interceptor prior to discharging to the sanitary sewer system. The cleaning area shall be large enough to allow for the largest type of equipment that must be cleaned at the facility. The cleaning area shall be indoors or in a roofed area outdoors and must be plumbed to the sanitary sewer. The discharge of wastewater from these washing activities to the storm drain system is prohibited. Outdoor cleaning areas shall be designed to prevent storm water run-on from entering the sanitary sewer and to prevent wastewater runoff to the storm drain from washing activities. Signs shall be posted indicating that all food service equipment washing activities shall be conducted in this area.

b. An oil and grease interceptor with a minimum size of 750 gallons is required for all food service facilities (including restaurants and grocery stores). Facilities that do not have any cooking or any other grease generating processes may request an exemption from this requirement.

7. Refuse Areas

a. New or redevelopment projects shall provide a roofed and enclosed area for dumpsters, recycling containers, compactors, and food waste containers. The area shall be designed to prevent water run-on to the area, to prevent runoff from the refuse area and to properly contain litter and trash. Dumpster leakage from covered trash and food compactor enclosures shall drain to the sanitary sewer via connection to an approved oil and grease interceptor device.

b. Runoff from trash enclosures, recycling areas, and/or food compactor enclosures or similar facilities shall not discharge to the storm drain system. Trash enclosure areas shall be designed to avoid run-on to the trash enclosure area. In most cases, drains are not permitted within trash enclosure areas. A drain, however, must be provided for compactors. If a drain is required in or beneath dumpsters, compactors, and tallow bin areas, it shall be connected to a grease removal device prior to discharging to the sanitary sewer.

8. Outdoor Process Activities/Equipment [1]

[1] Examples of businesses that may have outdoor process activities and equipment include machine shops and auto repair shops, and industries that have pretreatment facilities.

a. Process activities shall be performed either indoors or in roofed outdoor areas. If performed outdoors, the area shall be designed to prevent the "run-on" of storm water drainage, as well, as the runoff from the area with process activities.

b. Process equipment areas shall drain to the sanitary sewer system. The applicant shall contact the Water Resources Division for specific connection and discharge requirements.

9. Outdoor Equipment/Materials Storage

a. All outdoor equipment and materials storage areas shall be covered and/or bermed, or shall be designed with Best Management Practices (BMP) that effectively minimize the potential runoff and contact of storm water to pollutants.

b. Storage areas containing non-hazardous liquids shall be covered by a roof and be contained by berms, dikes, liners, vaults or similar spill containment devices.

c. All on-site hazardous materials and wastes, as defined and/or regulated by the California Public Health Code must be used, managed, and stored in compliance with the applicable Livermore Pleasanton Fire Department's requirements and regulations.

10. Vehicle/Equipment and Commercial/Industrial Cleaning

a. Wastewater from vehicle and equipment washing operations shall not be discharged to the storm drain system. Auto dealerships, however, may rinse off vehicle exterior surfaces for appearance purposes, provided only a minimum volume of water is used without soap or other cleaning agents.

b. Commercial/industrial facilities having vehicle/equipment cleaning needs shall either provide a roofed, bermed area for washing activities or discourage vehicle/equipment washing by removing hose bibs (faucets) and installing signs prohibiting such uses. Vehicle/equipment washing areas shall be paved, designed to prevent run-on to or runoff from the area, and plumbed to drain to the sanitary sewer via an oil water separator with a minimum size of 750-gallons or an approved equivalent pretreatment device.

c. Commercial car wash facilities shall be designed and operated such that no runoff from the facility is discharged to the storm drain system. Wastewater from the facility shall discharge to the sanitary sewer via an oil water separator with a minimum size of 750-gallons or an approved equivalent pretreatment device.

d. All facilities, which discharge wastewater generated from vehicle or equipment washing, must obtain a wastewater discharge permit from the City of Livermore's Water Resources Division prior to the commencement of the discharge.

11. Vehicle/Equipment Repair and Maintenance

a. Vehicle/equipment repair and maintenance shall be performed in a designated area indoors, or if such services must be performed outdoors, in an area designed to prevent the run-on and runoff of storm water. Oil and other automotive fluid change service must always be performed indoors.

b. Secondary containment shall be provided for exterior work areas where hazardous materials or hazardous wastes are used or stored. Drains shall not be installed within the secondary containment areas.

c. Vehicle service facilities shall not contain floor drains.

d. Tanks, containers, or sinks used for parts cleaning or rinsing shall not be connected to the storm drain system. Tanks, containers, or sinks used for such purposes shall not be directly connected to the sanitary sewer. Discharges to the sanitary sewer from such operations require prior approval from the Water Resources Division. The applicant shall contact the Water Resources Division for specific connection and discharge requirements.

12. Fuel Dispensing Areas

a. Fueling areas[2] shall have impermeable surfaces (i.e., portland cement concrete or equivalent smooth impervious surface) that are: a) graded at the minimum slope necessary to prevent ponding; and b) separated from the rest of the site by a grade break that prevents run-on of storm water to the maximum extent practicable.

b. Fueling areas shall be covered by a canopy or roof that extends a minimum of ten feet in each direction from each pump. Roof downspouts from the canopy or roof shall not drain onto the fueling area.

13. Loading Docks

a. Loading docks shall be graded to minimize run-on to and runoff from the loading area. Roof downspouts shall be positioned to direct storm water away from the loading area. Storm water runoff from loading dock areas shall be connected to a post-construction storm water treatment measure(s) prior to discharge to the storm drain system.

b. Door skirts between the trailers and the building shall be installed to prevent exposure of loading activities to rain, unless one of the following conditions applies: the loading dock is covered, or the applicant demonstrates that rainfall will not result in an exposure of storm water to pollutants.

14. Fire Sprinkler Test Water

[2] The fueling area shall be defined as the area extending a minimum of 6.5 feet from the corner of each fuel dispenser or the length at which the hose and nozzle assembly may be operated plus a minimum of one foot, whichever is greater.

Provisions shall be made in the project design and construction to allow for the discharge of fire sprinkler test water to an onsite vegetated area. If this is not feasible, provide for discharge to the sanitary sewer in accordance with current plumbing codes.

15. Miscellaneous Drain or Wash Water

a. Boiler drain lines shall be connected to the sanitary sewer system and may not discharge to the storm drain system.

b. For small air conditioning units, air conditioning condensate shall be directed to landscaped areas as a minimum BMP. For large air conditioning units, in new developments or significant redevelopments, condensation lines shall be connected to the sanitary sewer system, wherever feasible.

c. Roof drains shall discharge and drain away from the building foundation to landscaped areas wherever feasible.

d. Washing and/or steam cleaning activities must be performed at an appropriately equipped facility that drains to the sanitary sewer as specified in Section J. Any outdoor washing or pressure washing must be in compliance with the City's Stormwater Management Program requirements and managed in such a way that there is no discharge of soaps or other pollutants to the storm drain system. The applicant shall contact the Water Resources Division for specific discharge requirements.

16. Architectural Copper Installation

Projects with architectural copper should, if possible, purchase copper materials that have been pre-patinated at the factor. Whether patination is done offsite or onsite, applicant should consider coating the copper materials with an impervious coating that prevents further corrosion and runoff. If patination is done on-site, implement one or both of the following:

a. Collect rinse water in a tank and pump to the sanitary sewer. Contact the City of Livermore Water Resources before discharging to the sanitary sewer.

b. Collect the rinse water in a tank and haul off-site for proper disposal.

B. II. OPERATIONAL BMPS

This section details Best Management Practices (BMP) that private property owners and/or the occupants of private property must implement following the construction of projects. Ultimately, the responsibility for implementation of these BMPs rests with the property owners. The City of Livermore's Source Control Program routinely performs inspections of industrial and commercial sites to verify BMP implementation and effectiveness.

1. Paved Sidewalks and Parking Lots

Sidewalks and parking lots shall be swept regularly to minimize the accumulation of litter and debris. Wash water resulting from the pressure washing of parking lots must be captured, pretreated (if necessary) to meet local discharge limits, and discharged to the sanitary sewer. Wash water resulting from the pressure washing of sidewalks may be allowed to drain to the storm drain system provided that (a) no soap or other cleaning agents are used, and (b) all debris are trapped and collected to prevent entry into the storm drain system. Under no circumstances shall wash water containing any soap or other cleaning agents be discharged to the storm drain system.

2. Private Streets, Utilities and Common Areas

   a. The owner of private streets and storm drains shall prepare and implement a plan for street sweeping of paved private roads and cleaning of all storm drain inlets.

   b. For residential developments, where other maintenance mechanisms are not applicable or otherwise in place, a Property Owners Association, Landscape& Lighting District, or an equivalent mechanism shall be created and shall be responsible for maintaining all private streets and private utilities and other privately owned common areas and facilities on the site including landscaping. These maintenance responsibilities shall include implementing and maintaining storm water BMPs associated with improvements and landscaping. CC&R's creating the association shall be reviewed and approved by the City prior to the recordation of the Final Map and recorded prior to the sale of the first residential unit. The CC&R's or Landscape & Lighting District shall describe how the storm water BMPs associated with privately owned improvements and landscaping shall be maintained and detail contact information for the entity responsible for such maintenance activities.

3. Vehicle/Equipment Repair and Maintenance

   a. No person shall dispose of, or permit the disposal, directly or indirectly, of vehicle fluids, hazardous materials, or rinse water from parts cleaning operations into storm drains.

   b. No vehicle fluid removal shall be performed outside a building, or on asphalt or ground surfaces, whether inside or outside a building, except in such a manner as to ensure that any spilled fluid will be in an area of secondary containment. Leaking vehicle fluids shall be contained or drained from the vehicle immediately.

   c. No person shall leave unattended drip parts or other open containers containing vehicle fluid, unless such containers are in use or in an area that cannot discharge to the storm drain.

4. Fueling Areas

The property owner shall dry sweep the fueling area and spot clean leaks and drips on a routine basis. Fueling areas shall not be washed down with water unless the wash water is

collected and prevented from discharging to the storm drain system. Wash water resulting from the pressure washing of fueling areas must be captured, pretreated (if necessary) to meet local discharge limits, and discharged to the sanitary sewer or hauled offsite for proper disposal through a licensed waste hauler.

5. Loading Docks

The property owner shall ensure that BMPs are implemented to prevent potential storm water pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control, and spill clean-up.

6. On-site Storm Drains

All on-site storm drains must be inspected and, if necessary, cleaned at least once a year immediately prior to the rainy season.

7. Architectural Copper Cleaning, Treating or Washing

When cleaning, treating or washing architectural copper features, implement one or both of the following:

a. Collect rinse water in a tank and pump to the sanitary sewer. Contact the City of Livermore Water Resources before discharging to the sanitary sewer.

b. Collect the rinse water in a tank and haul off-site for proper disposal.

10. WATER SUPPLY (CITY)

The Developer is installing City standard asphalt street section for the majority of the streets within the project with specialty paving (i.e. pavers, stamped concrete, stamped asphalt, etc.) in a few areas to act as "accents" to the project entry or other areas as approved by the City Engineer. In order to facilitate the maintenance and repair of the water lines in the future, the Developer shall install double-walled pipe or other pipe protective measures as approved by the City Engineer, in all locations where the pipe runs under specialty paving. Additionally, no pipe joints will be allowed in specialty paving areas.

Water mains shall be extended across all frontages of each phase and all waterline valves must notate "EPDM" on the valve body.

The developer shall install pressure reduction valves (PRVs), backflow prevention devices and appurtenances on the potable and reclaimed water services as directed by the City Engineer

The fire service backflow preventer(s) shall be effectively screened from the public right-of-way while at the same time preserving ease of maintenance access to the backflow preventer(s). Screening shall be as specified on City Standard Detail W-10A, B and C. The fire service

backflow preventer(s) shall meet the performance standards of the backflow preventer shown in City Standard Detail W-10A, B and C.

Prior to removal of a 1-inch, a 1.5-inch, or a 2-inch water service, the Developer shall contact the City's Water Resources Division at (925) 960-8100 and ask if the City would like to convert the service to a water sampling station. Existing water services (of any size) that will not be used by the proposed development shall be abandoned at the main. Large services shall be abandoned by placing a blind flange on the tee at the main. Small services shall be abandoned by removing the corporation stop valve and installing the appropriate plug in the service saddle. Any valves or meters on abandoned services shall be removed. The meters shall be returned to the Water Resources Division if they are not reused. The Developer shall coordinate water service removals with the City's Water Resources Division as well as with the public works inspector.

Because the project is located within the City of Livermore Water Zone 1, the developer shall install pressure reduction valves (PRVs), backflow prevention devices and appurtenances on the potable and reclaimed water services as directed by the City Engineer.

The fire service backflow preventer(s) shall be effectively screened from the public right-of-way while at the same time preserving ease of maintenance access to the backflow preventer(s). Screening shall be as specified on City Standard Detail W-10A, B and C. The fire service backflow preventer(s) shall meet the performance standards of the backflow preventer shown in City Standard Detail W-10A, B and C.

Because the project is located within a reclaimed water service area, the irrigation system shall be connected to the reclaimed water system. If the Reclaimed water main is not currently located along the sight frontage of this project, the Developer shall extend the water main as necessary to connect to the main along said project site frontage.

Furthermore, the Developer shall Prepare a "Reclaimed Water Engineer's Report" for review and shall obtain City approval of the "Reclaimed Water Engineer's Report" prior to the approval of the final map.

11. UNDERGROUNDING OF UTILITIES:

All existing and new electric (with the exception of any 60 KV and higher voltage wires) and communication lines along the project frontage and within the project shall be placed underground. Electric, gas, Comcast and SBC utilities are required and shall be placed in a common trench. All electric transformers shall be placed underground.

12. TRAILWAY/BIKEWAY REQUIREMENTS

Active Transportation Plan

Certain portions of this development are within the City of Livermore Active Transportation Plan established and adopted as part of the General Plan.

In accordance with this plan, the Developer will be required to construct Class IV bike lanes including but not limited to the project frontages of Portola Avenue and Isabel Avenue.

In accordance with the DA the developer shall install a multi-use trail at the southern end of the project to provide neighborhood connectivity and a visual buffer from I-580. The trail shall be 26' wide and shall coexist with an Emergency Vehicle Access. The Developer shall dedicate a public access easement over the trail for pedestrian access on the final map. Prior to the filing of the final map, the Developer shall enter into a Maintenance Agreement with the City to ensure the long-term maintenance of this trail.

13. MEDIANS AND OTHER LANDSCAPED AREAS

Since the City has a new centralized irrigation system with a computer terminal and modem located at the City's Maintenance Service Center, the Developer shall install a City standard centralized irrigation controller system with communication accessories as approved by the City. The City may exempt this requirement based on the limited size of the landscape area.

14. HORTICULTURIST'S REPORT

A Horticulturist's report will be required if the site is located north of Highway I-580.

15. SPECIAL DISTRICTS

A. Landscaping and Lighting Maintenance and Operation

This development is within Landscape Maintenance District LL-821 that was created to maintain public improvements installed by Shea for the development of commercial properties. Because the property has been rezoned from commercial to residential, the Developer shall de-annex this property from LL-821 and annex into Landscape Maintenance District LL-857 which was created to maintain public improvements within Shea residential properties. The Developer shall initiate and bear the costs for the de-annexation from LL-821 and the annexation to LL-857.

The Developer may provide an alternative source of funding for its share of the maintenance of the public improvements within LL-857 subject to approval by the City.

B. Assessment District

Portions of this development are within Community Facilities District 2016-2 (Shea Properties) (CFD) and is subject to the charges and requirements thereof. Because the CFD was formed with a non-residential use for the parcels within Tract 8659, the Developer shall bear the costs for any changes or modifications to the CFD that will be necessary to reconfigure the assessments for the new residential use within Tract 8659.

The development shall annex into Community Facilities Maintenance District 2023-1 (Isabel Neighborhood Specific Plan) to provide the City maintenance funds to maintain portions of public

infrastructure and landscaping that is installed with the Isabel Neighborhood Specific Plan in accordance with the applicable rate and method of approtionment.

The Developer shall initiate and bear the costs for the annexation into CFD 2023-1.

Annexation documents shall be filed with the filing of the final map. The necessary documentation shall be submitted for City review with the first improvement plan submittal.

C. Mello Roos District

This development is within the Triad Community Facilities District 90-1A and is subject to the charges and requirements thereof.

In accordance with DA, the Developer is proposing to form a Community Facilities District (CFD) to fund the construction of back bone infrastructure and certain development impact fees. The formation of this new CFD must be completed prior to the filing of the final map.

16. AIRPORT LOCATION

This development is located in the vicinity of the Livermore Municipal Airport. Aircraft operations in the vicinity of the property may potentially create nuisances, including but not limited to noise, vibration or odors. The owner and or future buyer should be aware that operations and flight numbers at the Livermore Municipal Airport could increase in the future. A report must be filed with the Division of Real Estate relative to this matter.

An avigation easement shall be granted to the City. The grant shall be made on the City's "Avigation Easement" form.

17. SUBDIVISION AGREEMENT AND SECURITY

Following tentative map approval, the Subdivision Improvement Agreement will not be submitted to the City Council until the Developer has submitted all of the documents indicated in the "Final Approval of Tract Map Checklist" in the Development Plan Check and Procedures Manual (28) days prior to the city council meeting at which the final map will be considered for final approval by the City Council.

18. FEE AMOUNTS

The Developer will be required to pay the applicable development impact fees and project processing fees due in connection with this subdivision. The fee shall be the amount in effect at the time the fee is required to be paid.

19. VEHICLE ACCESS

Prior to or with the submittal for the first plan check of the tract improvement plans and final map, the Developer shall submit for review and approval a traffic control plan for providing safe entry

to and exit from the site. The purpose of the plan is to ensure that there will be safe entry and exit by construction and other vehicles prior to the installation of the required permanent street improvements.

Access to the development by construction equipment, material delivery and other heavy loads shall be limited by the Developer to the following route:

I-580, Isabel Avenue, Portola Avenue

Such heavy loads will not be allowed on existing residential streets in the vicinity of the development.

The wheel-loading on the above routes shall not exceed State load limits.

20. PHASING

The developer is proposing to file multiple final maps for the project. Per the Tentative Map for Tract 8659, the first final map will subdivide the project to create parcels for future tentative maps. The first final map will also create the primary backbone streets and infrastructure to serve the entire project. The Developer has also proposed to construct the required on-site and off-site master infrastructure improvements as set forth in the Development Agreement, in two phases, which generally proceed as follows (please refer to Development Agreement for the particular sequencing requirements):

Phase 1:
a) Backbone Infrastructure - On-site streets, utilities and amenities
b) Off-site improvements on Isabel Avenue, North Canyons Parkway, Campus Hill Drive, Shea Center Drive and Gateway Avenue and Portola Avenue
c) Caltrans Embankment Landscaping
d) Law Enforcement Assets located on or within City infrastructure

Phase 2:
a) Neighborhood Park
b) Neighborhood Plazas
c) Law Enforcement Assets located on or within Phase 2 improvements

FL:DES

VTTM 8659 (SUB22-008) Harridge - Isabel Crossings

EXHIBIT B

INSP Policy Table	
Land Use	
Goal/Policy	Whether the Project is consistent and an explanation. If the policy is not applicable, it is marked N/A.
G-LU-1: Provide a mix of residential, neighborhood-serving commercial, and office uses that supports transit ridership in both commute directions and support a vibrant and livable neighborhood.	
P-LU-1: Establish a new Main Street through the center of the Planning Area that accommodates neighborhood-serving businesses and places for social gathering ,and helps create a sense of place for the Isabel Neighborhood.	Consistent. The Project includes construction of a new commercial Main Street in the central portion of the Planning Area with commercial retail and other commercial uses on the ground floor for future neighborhood-serving businesses and commercial uses, as well as adjacent town squares and a neighborhood park for social gatherings to help create a sense of place for the Isabel Neighborhood.
P-LU-2: Require buildings with Ground Floor Retail/Overlay Flex Space on Main Street between Constitution Drive and Portola Avenue to provide active ground floor uses facing Main Street that are publicly accessible and that generate walk-in clientele.	Consistent. The Planning Area no longer has a Constitution Drive. However, Parcels C2-A, C1-B, and S-1 adjacent to Main Street between Gateway Avenue and Portola Avenue will have ground floor active uses, including a grocery store and retail spaces, to generate walk-in clientele and create a walkable neighborhood where housing and jobs are located in close proximity.
P-LU-3: Establish a neighborhood-serving retail center anchored by a grocery store. This center shall: • Be visible and accessible from the Valley Link station and Main Street; and • Incorporate a major public space such as a plaza or park.	Consistent. As discussed above, the Project will have ground floor retail stores and a grocery store/ food hall along Main Street, as well as adjacent open space town squares, connecting pedestrians to the proposed Valley Link Station a short walking distance away.

EXHIBIT B

P-LU-4: Allow live/work units in the Neighborhood core as an option for increasing both housing alternatives and business opportunities, particularly before the retail market matures: • Up to 20 percent of the ground floor frontage on each block of Main Street may be live/work units. These units may be converted entirely to a commercial use. The ground floor of these units are required to be active non-residential uses such as retail or flex space (cannot become residential) per the Retail/Flex Space Overlay development standards. • Live/work units located in the Ground Floor Retail / Flex overlay on Main Street shall be designed to meet the ground floor retail design standards and guidelines (Chapter 5, Urban Design) and Building Code standards for retail uses. • Live/work units located within residential areas not located on Main Street must be located adjacent to a public street and may not be converted entirely to a commercial use. These units must remain in residential use, with the option to also operate a business within the unit. • Live/work units shall count as one unit for the purposes of density calculation, open space requirements, and tracking housing. The density calculation shall be based on the underlying residential zone. – The City will require a Zoning Clearance for businesses operating in live/work units within the Ground Floor Retail / Flex overlay. – The non-residential ground floor use of Live/work units within the Ground Floor Retail / Flex overlay shall adhere to the City's HOP standards with the following exceptions: 1. Do not require commercial uses to be clearly incidental and secondary to the residential use; 2. May have in-person contact with clients, customers or employees at the residence; 3. May store up to 250 cubic feet of supplies/ stock/merchandise in the unit;	N/A. The Project does not propose live/work units.

EXHIBIT B

4. May employ people who do not live in the live/work unit; 5. May have visible signage on vehicles and at the unit, subject to the Ground floor Retail signage standards (Chapter 5, Urban Design); 6. May have one commercial grade vehicle associated with the business; and 7. May include photography studios and retail/ wholesale sales of products as permitted business types.	
P-LU-5: Encourage the continued operation of, and investment in, existing business park, light industrial, and commercial uses.	Consistent. The Project includes commercial uses on the ground floor along the new proposed commercial Main Street, which will be able to support uses that support the neighboring business park and commercial uses.
P-LU-6: Ensure that land uses are compatible with existing residential uses and minimize conflicts between adjacent land uses with respect to scale, safety, noise, privacy, and other potential nuisances and hazards.	Consistent. The Project proposes 1,299 residential units, residential amenities, 2.13 acres of town squares, pocket plazas, and a neighborhood park, as well as a grocery store and retail spaces that support the existing and future residential uses. The Project is designed to be compatible with the existing residential uses and would not pose potential nuisances and hazards to the existing communities.
P-LU-7: Plan the provision of high quality, cost effective child care facilities are provided throughout the Neighborhood. • Encourage new residential, office, and mixed use developments to incorporate child day care facilities early in the site planning and design process. • Consider applying regulatory and/or financial incentives to support child care centers close to the Valley Link station to serve commuters. • Partner with other public agencies such as Alameda County,	N/A. Small and Large Family Day Cares, Day Care Centers are a permitted use in all residential districts within the Project site. Day Care Centers are additionally permitted in the ground floor retail/flex overlay space and allowed through a Zoning Use Permits in all other commercial zones.

EXHIBIT B

non-profit organizations, and private child care providers to leverage resources and assist with planning efforts.	
P-LU-8: The City shall encourage property owners to collaborate and prepare Master Plans by residential subarea. (Refer to Figure 2-3 for the subarea map.) For the purposes of this Specific Plan, Master Planning shall mean the subdivision and/or site plan design review application of at least one entire subarea. If Master Planned, residential densities may be averaged or distributed across the subarea rather than calculated at the parcel level, provided that the Master Plan complies with: 1. The target subarea unit count and the performance measures identified in Table 2-6; and 2. All other applicable development and design standards for the land use. If Master Planning more than one subarea, the densities may be averaged or distributed across those subareas. The City may consider a unit count lower than the average subarea unit count within a Master Plan, if there are demonstrated, significant regulatory, environmental, or other constraints within the subarea, as determined by the Director.	Consistent. The Project encompasses subareas 3b and 3c subareas and proposes 1,299 dwelling units across the two subareas. Table 2-6 expects a minimum of 1,236 dwelling units to be constructed across the two subareas, and the Project meets or exceeds this requirement.
P-LU-9: Retail/Flex Space Overlay on the BART property north of I-580 is diagrammatic on Figure 2-1. As the Plan is implemented, the Overlay shall apply to all building frontages along the Isabel Path between the north end of the Valley Link pedestrian bridge and Isabel Avenue.	Consistent. The project proposes a grocery store or food hall on Parcel S1, a town square (Parcel TS), and two pocket plazas (Parcels C2-C and C1-C) directly north of Isabel Avenue, and it proposes additional ground floor retail spaces along Main Street and a neighborhood park on Parcel N3-B. The Retail/Flex Space Overlay areas on Parcels C2-A, C1-A, S1, and the town square and

EXHIBIT B

	parks, would create a walkable environment for pedestrians traveling between Isabel Avenue and Portola Avenue.
P-LU-10: Allow mobile food vendors to operate in non-residential areas within the Isabel Neighborhood with a Temporary Use Permit (TUP), subject to the following regulations: • Mobile food vendors are responsible for providing a solid waste receptacle and maintaining a clean environment around their facility. • No loud music. • No blocking driveways or taking up more than two spaces in private parking lots. • Mobile food vendors must provide copies of relevant permits from the Alameda County Health Department and obtain a City of Livermore Business License, as part of the TUP application. • The TUP shall identify the locations in which vendors would be allowed to locate and during which hours of the day (between 8:00 AM and 9:00 PM, for example). • The TUP shall be effective for one calendar year with no limit on the number of days in which it can operate. Each TUP shall be subject to annual renewal. • There may be up to 10 active TUPs for the Isabel Neighborhood at any point in time. This number may be reduced by the Community Development Director when the Neighborhood Commercial uses and Main Street commercial uses begin to open. • The requirement for a TUP would not apply to mobile food vendors that are part of special events such as festivals and farmer's markets, which would require a Special Event Permit.	As specified in the Development Agreement, the Project will provide Temporary Commercial Activation prior to the Commercial Block construction. Temporary Commercial Activation may include farmers markets, food trucks, mobile vendors, and other community-serving uses..
G-LU-2: Protect scenic views to the extent possible and create new view corridors from within the Planning Area.	Consistent. Although the mixed-use commercial buildings may block hillside views from Interstate 580, as ministerially allowed by state law, the Project proposes a neighborhood park, town square, and two pocket plazas, as well as a recreation center.

EXHIBIT B

	These features contribute to the creation of new view corridors within the Planning Area to nearby hillsides. The heights of the Project buildings are designed and oriented to protect views.
P-LU-11: In areas exempt from the Scenic Corridor Policy height limits, certain architectural elements may exceed the established height limits by up to 10 feet. Examples of allowable architectural elements include: • Church spires, cupolas, dormers, chimneys, and vents; • Television and radio receiving antennas; and • Wireless telecommunication facilities and associated screening (subject to Section 6.02.100 of the Livermore Development Code)	Consistent. The Project proposes three-story townhomes over the majority of the Site with central mixed-use buildings, including the five-story building over the proposed grocery store/food hall on Parcel S-1. The Project does not propose any designs that would be incompatible with or significantly obstruct views from the surrounding neighborhoods. The taller buildings proposed within the Project are located to the south along Isabel Avenue or along Main Street, where higher intensity developments are expected and planned for in the INSP.
P-LU-12: The Isabel Neighborhood shall be exempt from the "Special Height Regulations" in Section 4.02.040 of the Livermore Development Code.	Consistent.
P-LU-13: The Core, East Airway, and Portola areas, as identified on Figure 2-4, are exempt from the City's existing Scenic Corridor policies as defined in the Community Character Element of the Livermore General Plan. Maximum building height above mean sea level for these three areas are established by Figure 2-4. All other buildings proposed on this site remain subject to the Scenic Corridor Policy. Any buildings outside of the exception area remain subject to the Scenic Corridor Policy, or the prescribed height limits in the Plan area, whichever is more restrictive.	Consistent. The Project is consistent with the maximum building height above mean sea level as established by Figure 2-4. The Project proposes to exceed the applicable height limits in portions of Planning Areas C2-A, C-5, S-1, and S3-B; however, the Project has requested a "waiver or concession" under to the State Density Bonus Law for additional height in these locations. The areas where additional height is provided are located internal to the Project Site or near Isabel Avenue where the additional height, which is not substantial, would not block key views for neighboring properties in locations where higher development intensity is planned by the INSP.
P-LU-14: Development on all sites subject to Federal Aviation Regulations Part 77 must demonstrate compliance with the height limits established for airspace protection.	Consistent. The Project would comply with Federal Aviation Regulations Part 77. The Project has reviewed with FAA's Obstruction Evaluation Group the proposed heights of the proposed buildings, who have indicated that the proposed height would not pose a hazard to air navigation or require further analysis. The Project would only be required to notify the FAA five days after the construction reaches its greatest height.

EXHIBIT B

P-LU-15: Residential buildings shall be within the following ranges: 2-3 stories for Transition, 2-4 stories for Village, 3-5 stories for Center, and 3-6 stories for Core.	Consistent. The residential buildings the Project proposes are primarily three-story townhomes that comply with applicable INSP standards pursuant to the approved master plan. The Project proposes a four-story mixed-use building on Parcel C1-B and five-story mixed-use buildings on Parcel C2-A in the central area of the Project Site, where the additional height is expected and planned for in accordance with applicable INSP standards pursuant to the approved master plan. The Project's proposed mixed-use buildings that are five or six stories tall in Planning Areas S3-A, S3-B and S-1 are consistent with applicable INSP standards pursuant to the approved master plan.
P-LU-16: For Office, Office Core, General Commercial, and Business Park uses, maximum building height may be increased to 55 feet with a CUP if in compliance with Scenic Corridor policy.	N/A. The Project does not propose standalone commercial buildings. All commercial uses are within mixed-use residential and commercial buildings.
G-LU-3: Provide a variety of public open spaces and common areas within residential developments.	Consistent. The Project proposes a recreation center, a neighborhood park, two pocket plazas, and a town square within the proposed residential development.
P-LU-17: Ensure that all new development provides ample landscaped areas, private open space, common open space, and publicly accessible open space. Up to 10 percent of the common area requirement may be satisfied through the provision of common indoor areas. • When provided as Ground-floor Retail/ Flex space, these indoor spaces may not be converted to commercial use if utilized in the calculation of open space requirements – unless new common area is provided in kind as a replacement.	Consistent. The Project provides 5.42 acres of common open space, including playgrounds, community gardens, pocket plazas,and trails, and it provides 16,262 sf of indoor amenity space and 83,317 sf of private open space. The Project provides a total of 319,614 sf of open space for 1,299 dwelling units, an average of 246 sf of open space per dwelling unit, which exceeds applicable INSP and code requirements.
P-LU-18: New development under the Isabel Neighborhood Specific Plan shall fund the cost of ongoing maintenance and replacement for all new City landscape and open space assets.	Consistent. The Project would construct and maintain landscaping and open space within the Project boundary.
P-LU-19: For residential project sites that are one acre or less, required common open space may be provided on-site or off-site. Any open space provided off-site must be located within the Isabel Neighborhood Specific Plan area.	N/A. The Project exceeds one-acre in size.

EXHIBIT B

P-LU-20: For residential project sites greater than one acre and located adjacent to a neighborhood park (including across a public street), up to 25 percent of the required common open space may be satisfied through payment of an in-lieu fee.	N/A. The Project would exceed the required open space and would not need to satisfy open space requirement through payment of an in-lieu fee.
P-LU-21: Required landscaping, common open space, and publicly accessible open space areas may be located within required setbacks provided that these areas are appropriately designed to be used as common open space.	Consistent. The Project would provide landscaping and open space throughout the Project area, including within setbacks.
P-LU-22: Site plans must incorporate pathways to the larger street network, and, where feasible, the open space and trails network.	Consistent. The Project includes new streets, open space, and pedestrian trails.
G-LU-4: Encourage preservation of existing farmland under conservation easements and mitigation for the loss of important farmland.	N/A. The Site does not have existing farmland.
P-LU-23: Preserve land north of I-580 in the Planning Area that is classified as Farmland of Statewide Importance or Unique Farmland by the California Department of Conservation Farmland Mapping and Monitoring Program.	N/A.
P-LU-24: The City recommends that development of the BART site provide compensatory mitigation, per the BART to Livermore Extension EIR. To the maximum extent feasible, compensatory mitigation should be implemented in Eastern Alameda County at sites immediately adjacent to the area of the Valley Link project impacts. If this is not acceptable to Resource Agencies, other properties in North Livermore and Doolan Canyon (within unincorporated Alameda County) offer many opportunities. Potential mitigation areas that are farther from the Valley Link to Livermore Extension project footprint but still within Eastern Alameda County include: Altamont Hills, Greenville Road, and South Livermore.	N/A.
P-LU-25: Open space preservation should prioritize land that is adjacent to urban growth boundaries and/or existing easements, in order to create and protect wildlife corridors.	N/A.

EXHIBIT B

P-LU-26: The City shall work with Valley Link, and Alameda County to leverage other resources for farmland preservation to maximize the value of the mitigation and benefits to North Livermore.	N/A.
P-LU-27: Development of the Gandolfo property shall acquire Prime farmland at a 1:1 ratio of compensatory mitigation under permanent easement.	N/A.
G-LU-5: Support a diverse housing stock that provides options for students, seniors, low-income families, first-time homebuyers, and people with disabilities.	Consistent. The 1,299-dwelling-unit Project proposes to provide 363 affordable units, which is 28% of the total units provided, and 103 more affordable units than would otherwise be required by the IHO and the INSP including a complete range of affordability levels from very low income to moderate income housing, thus providing housing options for a broad array of persons. The Project also includes market rate and affordable for-sale units.
P-LU-28: Assist Las Positas College with pursuing opportunities for student and faculty housing projects.	N/A.
P-LU-29: Each product type within new residential developments shall provide at least two unit types which differ in the number of bedrooms.	Consistent. The Project proposes at least two unit types on each Planning Area within the Project Site.
P-LU-30: For residential projects with at least 10 dwelling units, 10 percent of the units must adhere to principles of Universal Design. Any fraction greater than or equal to 0.50 shall be rounded up to nearest whole number. No additional unit shall adhere to principles of Universal Design for a fractional unit of less than 0.50. Such features include but are not limited to: • Entrances without steps and a flat or very low threshold – • living space on one floor or stair landings big enough to accept lifts – • wide interior doors, hallways, and alcoves, and • clear floor space in kitchens and bathrooms. All residential development shall comply with the California Building Code for accessibility.	Consistent. The Project's housing units adhere to the principles of Universal Design, maximizing access for all persons through ground floor access points, wide walkways and access points, and open floor plans, among other elements. Additionally, the Project would comply with ADA requirements to ensure that at least 10% of the apartments have hallways, kitchens, and bathrooms that are ADA accessible.

EXHIBIT B

P-LU-31: Residential projects may achieve a density bonus consistent with the Livermore Development Code density bonus provisions.	Consistent. The Project requests incentives and waivers pursuant to the State Density Bonus Law (but not additional density).
P-LU-32: Encourage the construction of single room occupancy, studio, and accessible units.	Consistent. The Project proposes studio or one-bedroom units on Parcels C1-B, C2-A, S1, S3-A, and S3-B and will comply with Universal Design principles and ADA accessibility requirements.
G-LU-6: Promote the production of affordable for-sale and rental units and mixed-income developments such that at least 25 percent of all new units at build-out are offered at below-market rates, in order to provide affordable housing opportunities for rent and ownership in the Isabel Neighborhood and to take advantage of the strong connection between transit use and afford-able housing.	Consistent. The 1,299-dwelling-unit Project proposes to provide 363 affordable units, which is 28% of the total units provided, and 103 more affordable units than would otherwise be required by the IHO and the INSP.
P-LU-33: All new residential development shall comply with the City's Inclusionary Ordinance (Section 10.06.050 of the Livermore Development Code), except that at least 20 percent of units for each project shall be affordable (i.e., offered at below-market rates). The affordable housing units for for-sale residential subdivisions must be sold to moderate and median-income households. Of the total number of for-sale dwelling units (20 percent) set aside, at least five percent (5%) shall be reserved for sale to median-income households with the balance set aside for moderate-income households. Whenever the inclusionary requirement results in a fractional unit(s), the fractional unit(s) shall be combined and provided as median-income units. For example, a 110unit for-sale residential development would be required to provide 15 percent, or 16.5 units, at the moderate-income level and 5 percent, or 5.5 units, at the median-income level. Therefore, 16 units shall be provided at the moderate-income level and 6 units shall be provided at the median-income level. The affordable housing units for rental residential projects must	Consistent. The 1,299-dwelling-unit Project proposes to provide 363 affordable units, which is 28% of the total units provided, and 103 more affordable units than would otherwise be required by the IHO and the INSP.

EXHIBIT B

be designated or reserved for rent to very-low-, low-, median, and moderate-income households. Of the total number of rental dwelling units (20 percent) set aside, at least six percent (6%) shall be reserved for rental to very-low income households, four percent (4%) shall be reserved for rental to median-income households, and three percent (3%) shall be reserved for rental to moderate-income households. Whenever the inclusionary requirements results in a fractional unit(s), the fractional unit(s) shall be combined and provided as very-low-income units. For example, a 110-unit rental residential development would be required to provide 6 percent, or 6.6 units, at the very-low income level; 7 percent, or 7.7 units, at the low-income level; 4 percent , or 4.4 units at the median-income level; and 3 percent, or 3.3 units, at the moderate-income level. The combined fractional units equates to two units that shall be provided as very-low-income units. Therefore, 8 units shall be provided at the very-low income level, 7 units shall be provided at the low-income level, 4 units shall be provided at the median-income level, and 3 units shall be provided at the moderate-income level. Under the City's Inclusionary Ordinance, affordable housing units shall be built on site and integrated within new residential developments unless the City Council approves an alternative method of compliance. For projects that utilize land dedication as a compliance method, the dedicated land must be located within the Isabel Neighborhood area and equivalent in actual value to the affordable units it is replacing.	
P-LU-34: Coordinate with BART to maximize affordable housing on BART-owned property north of the Valley Link station and achieve their goal of at least 20 percent affordability.	N/A. The Project Site is not owned by the San Francisco Bay Area Rapid Transit District/ BART. However, the Project is providing 28% of the dwelling units as affordable units.

EXHIBIT B

P-LU-35: Establish a program to reduce the development cost of affordable units. For example, adopt flexible parking standards for the Core and Center land use categories to reduce housing costs associated with excess parking (see parking ratios and policies in Chapter 3, Transportation).	N/A.
P-LU-36: Pursue grant opportunity funds for transit-oriented development such as those using cap and trade funds (i.e., the Affordable Housing and Sustainable Communities program).	N/A.
P-LU-37: Use Affordable Housing Fund subsidies as appropriate to: • Acquire land for affordable housing in the Isabel Neighborhood. • Partner with property owners and non-profit developers to develop affordable and mixed-income projects. • Match funding from state and federal sources for affordable housing projects. • Support non-profit organizations that convert units from market-rate to below-market rate. • Subsidize infrastructure costs for affordable housing projects.	N/A.
G-LU-7: Minimize the involuntary displacement of existing residents resulting from increased property values after the Valley Link project.	N/A. The Site is currently vacant and contains no existing housing units.
P-LU-39: Develop an anti-displacement strategy in the event of rapidly rising rents after the opening of the Isabel Valley Link station. This may include providing rental assistance for long-time residents of nearby neighborhoods (within one mile of the Valley Link station).	N/A.
P-LU-40: Leverage the home repair program or establish a new program to help preserve the mobile home parks near to the Isabel Neighborhood.	N/A.
G-LU-8: Advance economic development goals of the City through a coordinated strategy for the Isabel Neighborhood.	Consistent. The Project would construct 1,299 dwelling units including 363 affordable units, ground floor commercial space,

EXHIBIT B

	and a grocery store, which would advance the economic development goals and housing goals of the City.
P-LU-41: Assist new businesses with locating in the Planning Area, and support existing businesses with retention and expansion efforts.	Consistent. The Project provides approximately 75,000 square feet of new commercial area, which is proposed to include grocery, restaurant, general retail, and office uses, among other potential allowed commercial uses.
P-LU-42: Work with local businesses, civic organizations, schools, and other local groups to establish and implement programs that foster a sense of community and make the Isabel Neighborhood an interesting place to live, work, and visit. Examples include events featuring local creative industries such as food, art, music, artisanal products and beer, wine and spirits tasting.	N/A. The Project is still in the pre-development stage and thus cannot yet establish public cultural programs. However, the Project proposes a robust public art program, includes ample public open space for social gatherings, activities and events and includes temporary commercial activation spaces during build out that would attract foot traffic and support a variety of local businesses and vendors.
P-LU-43: Help connect businesses to the Valley Link station through existing and emerging transportation technologies.	Consistent. The Project proposes ground floor commercial spaces along Main Street, which is an easy walking distance from and would thus enhance the walkability between Portola Avenue and the proposed future site of the Valley Link station. The Project also proposes enhanced crosswalks crossing Portola Avenue where the station is proposed to be located to improve pedestrian access and safety. The enhanced walkability through the Project Site would help connect businesses to the Valley Link station.
P-LU-44: Support employment opportunities including but not limited to job training programs, such as State of California approved Joint Labor Management Apprenticeship Programs, for Livermore residents of all skill levels to ensure the benefits of regional rail and transit-oriented development investments are spread among the entire community.	Staff has encouraged the Developer to work with local trades and labor organizations. As of the preparation of this report, the Developer is actively negotiating with labor groups for participation in Project construction.
P-LU-45: Promote construction workforce outcomes such as local hire, paying area standard wages and employing youth and employing youth and at-risk workers who are enrolled in State of California approved Joint Labor/Management Apprenticeship Programs.	

EXHIBIT B

P-LU-46: Encourage the use of a local construction workforce who are paid area standard wages. See P-IMP-8 regarding the use of Community Workforce and Training Agreements.	
P-LU-47: Allow for a mix of office space and land use types and flexible retail requirements that can respond to changing economic conditions and business needs overtime.	Consistent. The Project is designed with flexible retail spaces on the ground floor along Main Street and Gateway Avenue. The retail spaces are designed to be flexible so that they can respond to the changing economic conditions and business needs over time serving a variety of commercial uses.
P-LU-48: Require new large-scale industrial, warehouse and distribution uses that require outdoor storage to locate outside the Planning Area, in more appropriate parts of Livermore such as the Oaks Business Park and the east side of Livermore.	N/A. The Project does not propose any large-scale industrial, warehouse, or distribution uses.
G-LU-9: Establish the Innovation Hub as a dedicated space for attracting, growing, and retaining innovation-oriented companies.	N/A.
P-LU-49: Support the development of a campus environment that includes Class A offices, flexible/collaborative work spaces, common areas, business support services, and shared amenities. This may include assistance with assembling land or master planning, or subsidizing programs or amenities.	N/A.
P-LU-50: Utilize the latest communication infrastructure in the Innovation Hub.	N/A.
P-LU-51: Pursue a shared marketing strategy, business association, and/or maintenance district in coordination with Innovation Hub tenants and property owners.	N/A.
P-LU-52: Encourage collaboration between Innovation Hub tenants and Las Positas College, existing/new businesses, and/or the Labs.	N/A.
Transportation	
G-TRA-1: Develop a street network that implements the land use diagram and is sized to meet projected demands for vehicle travel.	Consistent. The Project would construct several new internal and connector streets through the Site, including A Street, B Street, C Street, Gateway Avenue, and Main Street to meet projected demands for vehicle travel.

EXHIBIT B

P-TRA-1: Create a walkable street grid within a half-mile radius of the Valley Link station (Neighborhood core area). • Block sizes within this area should range from 300-400 feet, with a maximum length of 600 feet. Where block lengths exceed 400 feet, mid-block crossings shall be installed.	Consistent. The Project proposes a town square, pocket plazas, a neighborhood park, and various ground floor commercial spaces and a grocery store along Main Street, creating an active street frontage and a walkable neighborhood in close proximity to the Valley Link Station. While some of the block sizes exceed 300 feet, the Project is designed with multiple pedestrian entrances along the frontages so that the streets would be safe and provide ample access for pedestrians.
P-TRA-2: For the purposes of development associated traffic studies, road improvement design, and capital improvement priorities, the upper limit of acceptable service at signalized intersections shall be mid-level D, except at the following intersections near the freeway, which shall be LOS E: • Airway Boulevard/North Canyons Parkway • Airway Boulevard/I-580 westbound ramps • Airway Boulevard/I-580 eastbound ramp-Kitty Hawk Road • Isabel Avenue/Portola Avenue • Isabel Avenue/I-580 westbound ramps • Isabel Avenue/I-580 eastbound ramps • Isabel Avenue/Airway Boulevard	Consistent. The Project would provide improvements along Isabel Avenue and Portola Avenue adjacent to the Site, as well as establish new streets within the Project Site and comply with this requirement. As set forth in the Project's Focused Traffic Study, the Project complies with the applicable Level of Service requirements.
G-TRA-2: Establish a comfortable, safe, and efficient network for pedestrians and bicyclists.	Consistent. The Project contributes to the bicycle network through the construction and contribution to of a variety of new Class II and IV proposed bicycle lanes along Isabel Avenue, Portola Avenue and Campus Hill Drive. The Project also creates a walkable central street that will be safe for and provide facilities for bicyclists along Main Street through the use of ground floor commercial spaces, a grocery store, and various open spaces. The other streets within the Project Site would be smaller residential streets designed to be safe for pedestrians and bicyclists.
P-TRA-3: Connect existing uses, new development, the Main Street, Valley Link station, bus stops, parks, natural areas, Las	Consistent. The Project would provide sidewalks, bicycle and pedestrian trails, and code required bicycle parking spaces to

EXHIBIT B

Positas College, and other key destinations with sidewalks, pedestrian and bicycle trails, and bicycle facilities.	connect the proposed development, the Main Street, with existing uses and the Valley Link Station.
P-TRA-4: Create a continuous trail loop within the Isabel Neighborhood and links to the regional trail network outside of the Planning Area. • Partner with LARPD, East Bay Regional Parks District, and Alameda County to identify funding opportunities. • Advocate for a pedestrian and bicycle trail as the top priority for the bicycle connection along the future North Canyons Parkway/ Dublin Boulevard extension, followed by a buffered bike lane as a second priority (as opposed to a traditional Class II facility).	Consistent. The Project proposes sidewalks and pedestrian trails that would provide safe pathways for pedestrians and bicyclists within the Project Site and connect them to the regional trail network outside of the Project Site and the new external bike lanes provided by the Project.
P-TRA-5: Design pedestrian and bicycle trails to be highly visible and accessible from adjacent development. • Any fencing along trails should be as low and visually permeable as possible, such as three-foot high split rail fencing. • Allow and encourage property owners to provide direct access to trails that abut their properties through the installation of access gates where fencing currently exists. • Work with property owners and Zone 7 to address safety, security, and maintenance in selecting access points and designing fencing.	Consistent. The Project's proposed sidewalks and trails would not be fenced in as the fences would detract from the usability of the sidewalks and the trails; however, the sidewalks and trails would be highly visible and accessible from the Project and would be internal and along the perimeter of the Project Site.
P-TRA-6: Provide pedestrian bridges and under-crossings to enhance the connectivity of the trail network and provide direct access to the Valley Link station. • Orient pedestrian bridges to be as short, direct, and publicly visible as possible.	N/A.
P-TRA-7: Provide multiple safe bicycle and pedestrian crossings of I-580 within the Isabel Neighborhood. • Encourage Valley Link station pedestrian bridges to be available for non-Valley Link patron use when the station is open.	N/A. The Project does not cross I-580.
P-TRA-8: Provide four-legged crosswalks at new signalized or stop-controlled intersections.	Consistent. The Project would provide four-legged crosswalks at new signalized intersections at the Isabel Avenue and Gateway Avenue, and Isabel Avenue and A Street intersections.

EXHIBIT B

P-TRA-9: Implement on-street improvements such as new crosswalks and bike lanes to enhance the safety and convenience of walking and biking in the outer portions of the Planning Area and to provide interim connections along the proposed trail loop before major off-street improvements are in place. Consider adding on-street markings to more clearly show the path of bicycle travel on and near freeway interchanges.	Consistent. The Project provides high visibility crosswalks and both on and offsite new bike lanes within and around the Project Site that connect the Site to the regional bicycle trial network.
P-TRA-10: Provide bicycle parking areas at trailheads and major destinations at major intersections.	Consistent. The Project would provide crosswalks and bike lanes within and around the Project Site in addition to provide bicycle parking areas, including bike parking adjacent to the proposed onsite trail.
P-TRA-11: Incorporate traffic calming measures to slow vehicle speeds and increase the visibility of pedestrian crossings.	Consistent. The Project's proposed streets have been designed with vehicle speed and pedestrian/bicyclist safety in mind to create a safe environment for pedestrians and bicyclists, including through the provision of stop signs, signalized intersections, protected crosswalks, and signage.
P-TRA-12: Coordinate implementation of the planned trail, pedestrian, and bicycle improvements with the City's adopted Bicycle, Pedestrian, & Trails Active Transportation Plan. • Improvements to existing major streets in the Planning Area shall refer to the adopted Bicycle, Pedestrian, & Trails Active Transportation Plan for specific bicycle facility type, sidewalk improvements, and crossing improvements. • The design of new streets should refer to the Bicycle, Pedestrian, & Trails Active Transportation Plan for specific design considerations related to the bicycle, pedestrian, and trail network and street crossings.	Consistent. The Project would provide on and offsite bicycle trails and pedestrian pathways.
P-TRA-13: Require development to meet the on-site bicycle parking requirements listed in Table 3-3. Development applications shall show bicycle parking on site plans, including spaces to be provided within garages of individual dwelling units. Bicycle stalls shall meet the following requirements:	Consistent. The Project provides code required bicycle parking spaces and bicycle facilities.

EXHIBIT B

• Stalls shall be capable of supporting a bicycle in an upright or hanging position and enable a user to lock his or her bicycle to such a device. • The areas containing stalls shall be surfaced with hardscape or paving. • When located within a parking area, stalls shall be protected by curbs, fences, planter areas, bumpers, or similar barriers for the mutual protection of bikes, automobiles and pedestrians, unless deemed by the City to be unnecessary. • Where required, "secured, covered" bicycle parking may include garages, lockers, storage rooms, or fenced areas with restricted access. • Publicly accessible bicycle parking may include uncovered racks.	
G-TRA-3: Provide safe, convenient access to and from the Valley Link station by all transportation modes.	Consistent. The Project proposes enhanced crosswalks crossing Portola Avenue where the station is proposed to be located to improve pedestrian access and safety. The enhanced walkability through the Project Site would help connect the Project to the Valley Link station for easy and safe pedestrian access.
P-TRA-14: Encourage Valley Link station infrastructure to be integrated into the Neighborhood's circulation and land use networks.	N/A.
P-TRA-15: Prioritize pedestrian safety when designing roadways serving the Valley Link station.	N/A.
P-TRA-16: Support direct, comfortable, shaded, safe, visible, and well-lit walking paths between the Valley Link platform and surrounding development.	N/A.
P-TRA-17: Support the research, piloting, and deployment of emerging technologies and new services such as real-time parking availability signage, real-time bus arrival updates, and rideshare matching.	N/A.

EXHIBIT B

P-TRA-18: Work with Valley Link to ensure adequate bicycle parking at the Isabel Valley Link station and to consider bicycle needs when designing elevators.	N/A.
G-TRA-4: Reduce dependency on vehicle travel and congestion on neighborhood streets to create a safer, cleaner neighborhood environment.	Consistent. The Project provides bicycle parking spaces and creates pedestrian sidewalks and walkways to reduce the dependency on vehicle travel and congestion within and around the Project Site. By locating residential homes near the Valley Link Station and onsite and offsite job opportunities, the Project further contributes to the reduction of vehicle dependency within the City.
P-TRA-19: Employ a range of Transportation Demand Management (TDM) strategies to help make alternative modes of transportation as convenient, affordable, and safe as solo driving. Strategies include sponsored transit passes, parking cash-out programs, sponsored rideshare programs, bicycle commuter tax reimbursement, and bikeshare programs.	N/A.
P-TRA-20: Design the street network to minimize cut-through vehicle traffic in residential areas.	Consistent. The Project's proposed internal streets have been carefully planned to minimize cut-through vehicle traffic in residential areas and maximize pedestrian traffic in areas with ground floor commercial spaces and parks.
P-TRA-21: Continue working with transit operators, developers, technology providers, corporate shuttles, Transportation Network Companies, bike share operators, and other entities to minimize neighborhood impacts, and reduce private car ownership need and parking demand.	N/A.

EXHIBIT B

P-TRA-22: With the exception of business park and general commercial users outside of the Core Area (generally bound by I-580, Collier Canyon Road, Portola Avenue, and the seasonal drainage running south from Cayetano Park), require property owners, residents, and tenants, to form a Transportation Management Association (TMA) for the Isabel Neighborhood. Required actions shall be determined by the TMA and may include but are not limited to the following: • Monitor and manage the vehicular and bicycle parking supply for all retail uses north of I-580, rather than on a project or site basis. • Work with LAVTA and Valley Link to alter or add bus routes and/or provide free shuttle service between the Valley Link station and major destinations such as Las Positas College. • Establish neighborhood-wide car-sharing and/or bike sharing programs. • Implement programs for streetscape maintenance and beautification projects along Main Street, Pedestrian Streets, and Bicycle Streets. • Implement informational campaigns using brochures, boards/kiosks, or other communication outlets. • Provide technical support to businesses and homeowner associations in the implementation of TDM measures. • Implement a wayfinding signage program for motorists, bicyclists, and pedestrians.	Consistent. The Project would comply with the TMA requirement for any TMA established pursuant to the INSP.
P-TRA-23: Require Office and Business Park projects exceeding 15,000 square feet within a half-mile of the Valley Link station to implement the following site design measures: • Integration of passenger loading zones near the main building entrance on large sites; • Access to electrical vehicle charging stations for 10 percent of residential parking spaces and two percent of commercial or	N/A. The Project is not an office or business park project.

EXHIBIT B

industrial parking spaces; • On-site showers and lockers for employees; and • Preferential parking for carpools, vanpools, and low emission vehicles.	
P-TRA-24: Following station opening, require businesses within a half-mile of the Valley Link station to participate in the TMA and implement at least two of the following TDM programs (to be implemented through the initial Site Plan Design Review process for new development or through the Zoning Clearance process after construction): • Parking cash-out for employees that do not drive to work. • Transit passes (such as the Clipper Card) for employees. • Car-sharing or bike-sharing program. • Carpool and vanpool ride-matching services. • Guaranteed ride home for transit users and car/vanpoolers. • Flexible work schedules, shortened work weeks, or options to telecommute.	Consistent. The Project would comply with the TMA requirement for any TMA established pursuant to the INSP.
G-TRA-5: Proactively manage the supply of on- and off-street parking to match demand, while minimizing the land dedicated to and the costs associated with parking.	Consistent. The Project would provide code required bicycle and automobile parking spaces to match the demands expected of the Project Site.
P-TRA-25: Monitor Valley Link parking supply and demand. In the event of parking shortages: • Work with property owners to provide surface or shared parking arrangements. • Work with LAVTA, Valley Link, and other partners to implement additional TDM strategies such as enhanced shuttle/bus service.	N/A.
P-TRA-26: Monitor and manage parking supply and demand, spillover in neighborhoods, available technologies, programmatic parking management options, and cost implications of providing parking structures. Potential mechanisms for reducing conflicts include: • Add paid parking on all public streets throughout the Planning Area	N/A

EXHIBIT B

• Implement a residential parking permit system. • Add time-limited parking to residential streets.	
P-TRA-27: Consider charging for on-street parking and/or enforcing time limits along Main Street and additional areas as needed to encourage turnover in front of businesses and to encourage use of longer-term parking in off-street lots. • Install Smart pay stations that accept coins, credit/debit cards and pay-by-phone.	N/A.
P-TRA-28: Implement the parking minimum and maximum on-site vehicle parking requirements for development listed in Table 3-2. • When calculating the minimum parking requirement, any fraction greater than or equal to 0.50 shall be rounded up to nearest whole number; no additional space shall be required for a fractional unit of less than 0.50. • Parking requirements based on floor area in square feet (for example: 1 space for each 1,000 sf) shall be based upon the square feet of gross interior floor area, excluding mechanical equipment areas and stairwells, unless stated otherwise (e.g., ground area). • A single use with accessory components may be required to provide parking for each component, at the Director's discretion. For example, a hotel with a restaurant shall provide space for both program elements. • On-site parking requirements for unlisted uses may be determined by the Director based on available data, consistent with the intent of the Development Code. • On-street parking spaces located on Main Street shall count	Consistent. The Project Site has a minimum parking requirement of 1,873 spaces and a maximum parking allowance of 2,584 spaces. The Project is proposes 2,413 parking spaces.

EXHIBIT B

toward the required non-residential parking requirement for development on adjacent blocks. • When uses change, and additional parking is required, an in-lieu fee may be applied if construction of additional parking is infeasible.	
P-TRA-29: Developers shall install required paid parking infrastructure.	Consistent. The Project would provide all required paid parking infrastructure within commercial parking areas.
P-TRA-30: For projects with demonstrable lower parking needs allow reductions in the minimum parking requirements by up to 20 percent, subject to Community Development Director approval. • Requests for parking reductions will be based on factors such as: parking demand (including time of day/week), provision of bicycle parking, share of affordable (below market rate) units, specific user needs, proximity to the Valley Link station and other transit services, proximity and capacity of public parking lots, and proposed TDM strategies. • Applicants shall provide sufficient documentation to support the proposed reduction. • The City shall grant a reduction only upon finding that the proposed parking plan would not have an adverse effect on the surrounding properties. • When a use that was granted a parking reduction is discontinued, the required parking shall be provided on-site, off-site within a quarter mile of the site, or through payment of the in-lieu fee. The new use, however, may request a parking reduction under this policy.	N/A.

EXHIBIT B

P-TRA-31: Establish an in-lieu parking fee for retail-commercial uses in the Neighborhood's core area. • Developers of Ground floor Retail/Flex space may satisfy up to 30 percent of the minimum parking requirement through payment of the in-lieu fee. • Developers of Neighborhood Commercial uses on the Retail Center block may satisfy up to 10 percent of the minimum parking requirement through payment of the in-lieu fee. • The City will use the fees generated to pay for the cost of providing public parking, including on-street parking intended to serve retail users along Main Street.	N/A.
P-TRA-32: If a property owner/developer is unable to provide some or all of the required parking on-site, the minimum parking requirement may be satisfied by one or more alternatives: • Off-site. The owner may provide the required parking on other property within 600 feet of the site proposed for development. The owner shall provide a recorded parking agreement reflecting the arrangement with the other site. The form of agreement must first be approved by the City. • Shared Parking. Up to 50 percent of the minimum on-site parking requirement may be provided through a shared parking arrangement, contingent upon a parking study and subject to approval by the Community Development Director. The shared parking facility must be located within 600 feet of the site, if located on private property, or within a quarter mile if located on public property. Distances shall be based on the shortest feasible walking route.	N/A.
P-TRA-33: Encourage shared parking between users with different hours of peak demand.	N/A.
P-TRA-34: Require parking lots along Main Street and Gateway Avenue (between Isabel Avenue and Shea Center Drive) to be available for public use as secured through an agreement with the City (e.g., as part of a Development Agreement) or a land use	Consistent. The Project's parking lots proposed along Main Street and Gateway Avenue for commercial parking would be available for public use.

EXHIBIT B

entitlement condition of approval. Where an existing private lot is converted to a shared lot that is open for non-exclusive use, spaces that are provided in excess of the amount required may be leased to other establishments.	
P-TRA-35: Encourage vehicle parking configurations that provide for efficient use of land such as tandem, underground, and structured parking.	Consistent. The Project proposes parking spaces on the ground floor of the proposed townhomes, or within the building envelopes of the mixed-use buildings. The Project strives to provide efficient parking configurations where parking spaces are primarily located away from the public streets to enhance pedestrian and bicyclist safety.
P-TRA-36: Vehicle parking in residential projects, with the exception of Transition housing units, shall be "unbundled," such that residents pay for parking separately from the sales price or rent for the housing unit.	Consistent. The parking spaces located within townhomes would necessarily be "bundled" to the unit that they are attached to. However, the mixed-use buildings and flats would have unbundled parking spaces within proposed parking structures.
P-TRA-37: Encourage resident parking in new residential developments to be secured and accessed separately from commercial parking.	Consistent. The Project is designed so that the residential parking spaces are secured and accessed separately from commercial parking areas.
Parks, Public Facilities, and Infrastructure	
G-PF-1: Provide an integrated park, recreation, and open space system that serves a variety of functions: provide opportunities for recreation and exercise, allow for community gathering and special events, enhance the greenery and overall aesthetics of the Neighborhood, and support the general enjoyment of the outdoors.	Consistent. The Project provides a recreation center, a neighborhood park, two pocket plazas, and a town square to allow for community gathering and special events, enhance the greenery and the overall aesthetics of the neighborhood, as well as support the general enjoyment of the outdoors.
P-PF-1: Incorporate nodes (parks, plazas, and common areas) and linear elements (trails, paseos, and streets) to form a cohesive, hierarchical open space system for the Neighborhood.	Consistent. The Project creates several different types of open space areas, including a recreation center, a neighborhood park, two pocket plazas, and a town square as well as pedestrian trails, streets, and sidewalks, to meet different outdoor needs of the neighborhood.
P-PF-2: Provide a mix of amenities and programs that respond to the diverse needs and preferences of the community. Design physically accessible, multi-generational spaces to serve children, young adults, seniors, and people with limited mobility.	Consistent. The Project proposes a wide variety of amenities and outdoor areas to meet the diverse needs of this 1,299-dwelling-unit development and to meet the needs of the businesses that would be located on the ground floor along Main Street.

EXHIBIT B

P-PF-3: Construct three new neighborhood-serving Urban Parks (pursuant to Part 8, Civic Space Types, of the Livermore Development Code) in the general locations shown on Figure 4-1, with the following minimum sizes: • 3 acres along Collier Canyon Creek; • 1.5 acres located along the proposed Main Street; and • 2 acres south of the freeway, east of Stealth Street.	Consistent. The Project proposes a 1.5 acre neighborhood park along Main Street on Parcel N3-B.
P-PF-4: Require developers to provide land or in lieu fees for parks, as governed by the terms of the Quimby Act. Developers of the three park sites as shown on Figure 4-1 shall be required to dedicate land for such purpose and provide park improvements at the time of development.	Consistent. The Project would provide amply parks and open space in addition to paying required park fees in excess of available fee credits for the provision of in-project open space.
P-PF-5: Design new parks to be easily accessible to residents and highly visible from the adjacent streets and surrounding uses.	Consistent. The Project's substantial proposed open space areas are designed with the residents in mind and are designed to be usable and accessible by the residents and the patrons of the businesses.
P-PF-6: Each new park shall include a variety of amenities such as: benches, pathways, picnic areas, dog stations, children's play areas, and landscaping. • The new park located next to Collier Canyon Creek should include a sports field, other compatible uses, and trail amenities. • The new park located along the proposed Main Street shall be scaled appropriately to fit the surrounding mixed use/commercial context. The new park located along the proposed Main Street should be designed to accommodate community events, oriented such that residents can view the park, and provide adequate lighting and on-street parking. Park design shall be consistent with the standards set-forth in section 8.01.070 of the Livermore Development Code for Urban Parks, as it exists today or amended in the future. • The new park located south of the freeway should incorporate	Consistent. The Project's parks, plazas, and town square onsite would include amenities such as benches, pathways, children's play area, dog stations, picnic areas, and landscaping.

EXHIBIT B

features that honor the history of the site and agricultural heritage of the Planning Area.	
P-PF-7: Design the new park located next to Collier Canyon Creek to minimize adverse effects resulting from the proximity to the freeway. • Locate the most active uses in the northern portion of the park. • Provide on-street parking along the southern end of the park.	N/A.
P-PF-8: The final selection of amenities within new public parks shall: • Involve community outreach and coordination with LARPD; • Utilize low-maintenance vegetation and high quality, durable materials; and • Minimize long-term operational costs.	Consistent. The Project's landscaping plans utilize low-maintenance vegetation and high quality, durable materials to minimize long term operational costs within the Project's various landscaped areas and landscape features. Pursuant to the Development Agreement, the Project's park design shall be reviewed by LARPD prior to Occupancy.
P-PF-9: Incorporate a plaza in the Retail Center site as a central gathering place that can accommodate special events, outdoor dining, and pedestrian circulation, consistent with design principles in Chapter 5, Urban Design.	Consistent. The Project proposes two pocket plazas and a town square adjacent to the ground floor commercial spaces and the grocery store/ food hall. These areas can accommodate special events, outdoor dining, and pedestrian circulation, consistent with the design principles in Chapter 5, Urban Design.
P-PF-10: Coordinate with Valley Link and BART on the design of Pocket Plazas at each base of the pedestrian bridge to the station, consistent with open space goals and design principles in Chapter 5, Urban Design. The City of Livermore recommends that the total	Consistent. The two proposed pocket plazas are 0.17 and 0.19 acres respectively, and the proposed town square is 0.25 acres.

EXHIBIT B

size of the plazas not exceed 0.25 acre unless a larger area is necessary for pedestrian circulation purposes.	
P-PF-11: Incorporate recreational amenities such as bike parking, Pocket Plazas, children play structures, and dog stations along active frontages in the Neighborhood Core.	Consistent. The proposed open spaces would be located along active frontages and would incorporate bike parking, children play structures, dog stations, and pocket plazas.
P-PF-12: Private developments shall provide on-site common outdoor areas in the form of Pocket Parks or Pocket Plazas (pursuant to Part 8, Civic Space Types, of the Livermore Development Code).	Consistent. The Project is providing two pocket plazas.
P-PF-13: Connect new and existing parks, open spaces, and common areas on private property directly to the trail network or through pedestrian-friendly streets and paseos.	Consistent. The Project is providing sidewalks and pedestrian trails to connect the proposed open spaces.
P-PF-14: Install landscaping and enhance natural habitats to enhance the aesthetic quality and recreational value of trail corridors and other passive open spaces.	Consistent. The Project's landscaping plans provide ample landscaping around and within the Project Site to enhance the aesthetic quality and recreational value of the trails and the open spaces.
P-PF-15: Designate a 2.5:1 buffer from the toe of all natural (non-channelized) creeks plus 20 feet, consistent with Zone 7 creek setback criteria. Pedestrian and bicycle trails and associated amenities may be located within this buffer, subject to the trail polices in Chapter 3, Transportation, design standards and guidelines in Chapter 5, Urban Design, and necessary regulatory permits.	N/A.
P-PF-16: Increase the availability of athletic facilities through shared use agreements with Las Positas College and/or K-12 schools in the Planning Area.	N/A.
P-PF-17: Incorporate a consistent theme of wayfinding signage and Neighborhood-identifying features into parks, plazas, and other open spaces, based on the Pedestrian Streetscape palette described in Chapter 5, Urban Design.	Consistent. The Project incorporates consistent themes and design with wayfinding signage and neighborhood-identifying features throughout the Site, including within the onsite parks, plazas, and other open space areas.

EXHIBIT B

P-PF-18: Require that development projects involving the alteration, relocation, or demolition of historical resources include interpretative signage with historical images and information for residents, employees, and passers-by to learn about the property and its significance. The content of the interpretive signage shall be prepared by a qualified Architectural Historian and graphic design professional.	N/A. The Site is vacant and does not contain historic resources.
P-PF-19: Incorporate elements commemorating Gandolfo Ranch into the park development south of the freeway, east of Stealth Street in order to promote understanding among visitors of the site's historical significance. The preservation of structures and other character-defining features is strongly encouraged.	N/A.
P-PF-20: Require, prior to issuance of permits for the alteration, relocation, or demolition of a historical resource, that the project sponsor conduct Historic American Buildings Survey (HABS) and Historic American Landscapes Survey (HALS) Level II documentation. The HABS is a federal preservation program used to document architectural heritage and the HALS is a federal program used to document landscapes.	N/A. The Site is vacant and does not contain historic resources.
G-PF-2: Promote adequate and accessible educational facilities for Isabel Neighborhood residents.	N/A.
P-PF-21: Work closely with the School District to monitor student enrollment and school facility needs to ensure accommodation of the future student population in Livermore.	Based on the letter received from the School District, existing school capacity is sufficient to accommodate the incremental increase in students generated by the Project
P-PF-22: Work with the School District, LARPD, Livermore Amador Valley Transit Authority (LAVTA), property owners, and developers to create and/or improve safe walking/biking routes to the public schools serving the Isabel Neighborhood. • Incorporate school access into the Neighborhood's Transportation Demand Management program (described in Chapter 3, Transportation). Strategies to consider include LAVTA public bus, school busing, carpooling programs, Walk/Bike to School Days, a Walking School Bus program, and bicycle trains.	N/A.

EXHIBIT B

G-PF-3: Maintain Livermore as a safe and livable community.	Consistent. The Project is designed with a variety of open space, pedestrian and bicyclist trails and sidewalks, and thoughtfully designed streets and access points. The Project includes a variety of housing options and commercial spaces. The proposed development would allow residents to work where they live and to enjoy nearby open space facilities that they can access on foot, creating a safe and livable community.
P-PF-23: Ensure that new development in the Planning Area adequately addresses public safety considerations in building design, site planning, and business operations.	Consistent. The Project addresses public safety considerations through building design and site planning. The design ensures that active streets are provided along Main Street, and residential parcels would have relative security where access within their areas would be monitored.
P-PF-24: Work with the LPFD to monitor the need for a new Fire Station if Station #10 needs to be relocated and/or additional equipment is needed to serve the Isabel Neighborhood.	N/A.
P-PF-25: Ensure that LPFD and the Police Department have sufficient staffing to serve all new development and associated population growth in the Isabel Neighborhood.	N/A.
P-PF-26: Coordinate with the Fire Department to incorporate a small police substation, for internal uses only, into another public facility. The facility should be large enough to include an office, break room, restroom, interview room, and storage for equipment and bikes.	N/A.
G-PF-4: Provide materials collection services that are safe, sanitary, environmentally acceptable, efficient, and affordable.	Consistent. The Project would have onsite refuse collection throughout the Site consistent with state and local solid waste requirements. The Project would work the City's franchise hauler to encourage recycling, composting, and organic material collection and waste reduction and diversion.

EXHIBIT B

P-PF-27: Work with residents, businesses, LARPD, and the City's franchise hauler to exceed the City's 75 percent waste diversion goal in the Isabel Neighborhood. • Design new development to make recycling, composting, and organic material collection as convenient as possible for residents, employees, and visitors. • Reduce the amount of materials that must be processed through implementation of recycling programs, composting, source reduction (such as packaging), purchasing policies, and manufacturing processes. • Continue to implement educational and outreach programs on available diversion programs and best practices. • Encourage businesses to participate in the Bay Area's Green Business Program. • Support the expansion of organics capacity in Alameda County.	Consistent. The Project would have onsite refuse collection throughout the Site and would work with LARPD and the City's franchise hauler to encourage recycling, composting, and organic material collection and waste reduction and diversion.
P-PF-28: Continue to work with the current materials collection franchise hauler in the review of development projects to ensure compliance with materials collection requirements. • Ensure that streets and alleys are designed to allow collection vehicles to make safe, unobstructed turning movements. • For residential projects that will have wheeled cart service, ensure that streets and alleys are designed to accommodate the placement of carts on the street during collection day. • Periodically update the interior and exterior trash collection standards to reflect current goals, regulations, and best practices, particularly for multi-story buildings in the residential, Office, and Ground floor Retail/Flex areas of the Isabel Neighborhood. • Refer to StopWaste resources such as the Recycling Guidelines for Multi-Family Housing Design.	Consistent. The Project has proposed thoughtful refuse collection locations to ensure refuse collection and recycling areas are appropriately accessible and would not become a nuisance to the businesses and residents onsite.
G-PF-5: Provide sufficient water supplies and facilities to serve new development under the Isabel Neighborhood Specific Plan.	Consistent. The Project's projected water usage is within the water supply limits analyzed in 2017 Water Supply Assessment prepared for the INSP's EIR, which conclude sufficient water supplies exist over a 25-year time horizon from 2017 to serve the full buildout of

EXHIBIT B

	the INSP. As established in the Project's CEQA Addendum, the Project reduces water usage from the proposed development analyzed for the Site in the original INSP.
P-PF-29: Continue to coordinate with Zone 7 and Cal Water to monitor and plan for the City's future water needs.	N/A.
P-PF-30: Require new development projects to construct an adequate potable water distribution and sanitary sewer systems and pay applicable fees to construct necessary facilities, as identified under the Isabel Neighborhood Specific Plan and the City's Capital Improvement Plan.	Consistent. The Project would construct an adequate potable water distribution and sanitary sewer system and pay applicable fees to construct necessary facilities to serve its residents and businesses.
P-PF-31: Connections to the water distribution and sanitary sewer systems should occur concurrently with construction of new roadways to maximize efficiency and minimize disturbance due to construction activity	Consistent. The Project would connect to the water distribution and sanitary sewer system at the time of the construction of its backbone infrastructure.
P-PF-32: Require new development to install water efficient appliances and fixtures such as low-flow faucets and toilets.	Consistent. The Project would install water efficient appliances as required by state Title 24 regulations.
P-PF-33: Require new development to comply with State and City's mandatory water efficient landscape ordinance (WELO).	Consistent. The Project would install water efficient landscape as required by state and local codes.
P-PF-34: Require new development within the Municipal Water service area to connect to the recycled water system and to use recycled water for landscape irrigation, where economically feasible.	Consistent. The Project would connect to the recycled water system and use recycled water for landscaping within public rights of way, as available.
P-PF-35: Allow the use of rainwater harvesting systems, consistent with regional permit requirements	Consistent. The Project would comply with applicable Low Impact Development (LID) standards, which may include requirements to install rainwater harvesting systems and other storm water retention and treatment facilities where needed to meet LID standards.
P-PF-36: Restaurants and other uses that discharge grease into the wastewater treatment system shall be required to reduce impacts through individual or collective pretreatment facilities.	Consistent. The Project would install grease interceptors or other grease capture systems as needed to divert restaurant grease as required by applicable state and local building codes.
G-PF-6: Develop a stormwater drainage system that maintains the health and safety of residents, provides flood control,	Consistent. The Project would comply with LID requirements and develop a stormwater drainage system to provide flood control,

EXHIBIT B

reduces long-term maintenance costs, minimizes pollution, and enhances aesthetic quality.	minimize pollution, reduce long-term maintenance costs, and enhance aesthetic quality.
P-PF-37: Design new streetscape and landscaped areas in the public right-of-way for stormwater management and the efficient use of water through: • The installation of low-maintenance, drought-resistant plant palettes; • Use of large retention basins; • Use of low-flow irrigation systems; and/or • Use of bioswales and rain gardens in planting areas, curb extensions, and other green infrastructure.	Consistent. The Project's new streetscape and landscape areas would be designed with low maintenance and drought resistant plants, as well as utilizes bioswales, retention basins, and low-flow irrigation systems, as set forth in the approved Landscape Plans.
P-PF-38: Require new development to incorporate low impact landscape design, such as natural drainage systems and groundwater recharge features, consistent with stormwater permit requirements.	Consistent. The Project would incorporate low impact landscape designs, as set forth in the approved Landscape Plans.
P-PF-39: Continue to partner with Zone 7 to improve and maintain the flood control system.	N/A.
P-PF-40: Allow stream modifications associated with new development only if necessary to better contain flood flows, restore creek conveyance capacity, enhance groundwater recharge, stabilize creek beds and banks, control erosion, remove sediment and debris, provide public access for maintenance and emergency vehicles, and/or restore creek natural habitat. • Any stream modifications and flood control structure improvements shall be done in accordance with the National Flood Insurance Program and Community Rating System Class Standards and appropriate engineering design, resource agency approvals, and current environmental restoration best management practices.	N/A.
G-PF-7: Facilitate the development and maintenance of all utilities at the appropriate levels of service to accommodate the City's projected growth.	N/A.

EXHIBIT B

P-PF-41: Ensure that utilities (i.e., electricity, natural gas, telecommunications, and cable) are available to serve new development in an environmentally responsible, aesthetically acceptable, and safe manner. However, the ultimate responsibility for ensuring that the utilities are available to support new development rests on the sponsor of proposed projects.	Consistent. The Project has reviewed its utility needs with the applicable service providers to ensure capacity to provide adequate service.
P-PF-42: Require new development to place underground all utility distribution lines, including new and existing aboveground utilities located in the abutting street right-of-way (consistent with Section 4.02.090 of the Livermore Development Code as it exists now or is amended in the future). • The City shall work with PG&E and other public agencies to underground existing overhead utility lines that are not adjacent to a potential development site (i.e., the Change Areas described in Chapter 2, Land Use).	Consistent. The Project occurs within and vacant area and will underground all utility distribution lines.
P-PF-43: Encourage new development to consider and incorporate telecommunications facilities into the initial building design. • Industrial and public buildings should be designed to accommodate wireless antennas in a manner that integrates with the architecture.	Consistent. The Project seamlessly incorporates telecommunication facilities into building design. Any future telecom applications will be required to obtain necessary design review permits from the Community Development Department.
P-PF-44: Support the development of a fiber optic network in and around the Innovation Hub.	N/A.
Environmental Resources & Conservation	
G-ENV-1: Ensure that development is compatible with Livermore Municipal Airport safety zones.	Consistent. The Project would not cause obstruction to the Livermore Municipal Airport as determined based on review with FAA's Obstruction Evaluation Group of the proposed heights of the proposed buildings. The FAA indicated that the proposed height would not pose a hazard to air navigation or require further analysis. The Project will notify the FAA five days after the construction reaches its greatest height.

EXHIBIT B

P-ENV-1: Increase resident awareness of their proximity to the Livermore Municipal Airport. • Provide overflight notifications and avigation easements and Buyer's Awareness Measures on new residential development within the Airport Influence Area (AIA). • Send annual reminders to residents that they knowingly purchased property in the AIA. • Provide information on the City's website about the APA overlay zone and Airport Land Use Compatibility Plan (ALUCP). • Proactively advise potential residents who inquire about buying property in the overlay zone that their property will be subject to aircraft noise (via the Permit Center).	Consistent. The Project conditions of approval require avigation easements and airport vicinity notifications for all new residences.
G-ENV-2: Ensure that the Isabel Neighborhood is a pleasant place to live and work by protecting residents, workers, and visitors from noise that affects comfort and health.	N/A.
P-ENV-2: Amend the General Plan to clarify that the Isabel Neighborhood Specific Plan is exempt from Noise Compatibility Guidelines, recognizing that certain existing and future exterior noise sources are higher in the Planning Area.	N/A.
P-ENV-3: In accordance with Title 24 of California Building Code, all residential building spaces must be improved or constructed in such a manner that interior noise levels in any habitable room do not exceed a maximum of 45 dBA with windows closed. If windows must be closed 100 percent of the time to achieve this standard, a fresh air ventilation system must be utilized.	Consistent. The Project will comply with Title 24 of the California Building Code applicable at the time of permitting.
P-ENV-4: Require residential and other noise sensitive land uses within the 60 dBA or higher contours for freeway or major street noise to complete a noise analysis to verify that the interior noise standard can be met.	Consistent. The Project conditions require acoustical studies prior to Building Permit issuance.
P-ENV-5: Although not anticipated, any noise sensitive land uses within the 60 dBA contour for the airport shall incorporate adequate noise attenuation into the design and site planning of	Consistent. The Project conditions require acoustical studies prior to Building Permit issuance.

EXHIBIT B

the project in order to achieve an interior noise level of not more than 45 dBA CNEL.	
P-ENV-6: Recreational facilities within new public parks and common open space areas on private development sites should be located and designed such that ambient noise levels do not exceed 70 dBA CNEL. This guideline does not apply to pedestrian and bicycle trails or private outdoor spaces within developments (refer to Chapter 2, Land Use, for open space definitions).	Consistent. The Project has placed the recreation facilities, parks, and common open space in areas where ambient noise would not exceed 70 dBA CNEL.
P-ENV-7: Reduce vibration impacts associated with construction activities by requiring construction contractors to implement measures to help reduce vibration levels at nearby sensitive receptors. Measures to reduce vibration levels include, but are not limited to, the following: • Operating heavy equipment as far as practical from residential uses; • Using smaller bulldozers (operating weight less than 20,000 pounds) when grading must occur within approximately 50 feet of residential uses or other vibration sensitive uses; and • Using quiet pile driving technology (such as predrilling piles, using sonic or vibratory pile drivers, or using more than one pile driver to shorten the total duration of pile driving).	Consistent. The Project is a residential and retail commercial development that would not entail any ongoing vibration impacts. However, during construction, the Project would comply with the City's applicable requirements to reduce potential construction vibration impacts.
P-ENV-8: The following limits shall apply to noise-generating land uses, as measured from the property line: • In residential areas of the Isabel Neighborhood, exterior noise levels may not exceed 65 dBA from 7:00 a.m. to 12:00 a.m or 60 dBA from 12:00 a.m. to 7:00 a.m. • Along Main Street and in the office, commercial, or business park areas of the Isabel Neighborhood, exterior noise levels may not exceed 75 dBA from 7:00 a.m. to 12:00 a.m. or 65 dBA from 12:00 a.m. to 7:00 a.m.	Consistent. The Project would comply with applicable City noise ordinance requirements.

EXHIBIT B

P-ENV-9: Require that project applicants for future development in areas where noise is projected to exceed compatibility standards prepare a detailed acoustical analysis of the noise environment and project characteristics. The analysis should determine whether noise insulation or protection features are required to achieve consistency with the applicable exterior and interior noise compatibility standards. The City shall review and approve the acoustical analyses for proposed projects prior to the issuance of building permits or as part of the planning entitlement process. Project applicants shall then be required to implement measures to ensure exterior noise compatibility with the applicable standards, where feasible.	Consistent. The Project is a residential and retail commercial development that would not entail any ongoing substantial noise sources that would exceed applicable compatibility standards.
P-ENV-10: Prohibit Category 1 facilities (according to the FTA guidelines, including research facilities with vibration-sensitive equipment) that use vibration-sensitive equipment that could be affected by Valley Link train vibration in areas located within 600 feet of the Valley Link tracks (noting that 600 feet is the FTA screening distance for Category 1 land uses). These types of facilities shall be allowed within the Planning Area in locations that are more than 600 feet from the Valley Link tracks.	N/A.
G-ENV-3: Minimize exposure of new development, especially residents and other sensitive pollution groups, to air quality hazards.	Consistent. The Project is a residential and retail commercial development that would not entail the use or emissions of hazardous air contaminants. Project construction would comply with the standards and applicable mitigation measures adopted into the INSP EIR.
P-ENV-11: Require new residential projects and other new sensitive receptors such as schools, child day cares, nursing and retirement homes located within 500 feet of I-580 to install indoor air quality equipment, such as high-efficiency particulate air filters (HEPA) filters or equivalent mechanisms to minimize health risks for future residents.	N/A. No childcare center, schools, or nursing and retirement homes are proposed onsite.

EXHIBIT B

P-ENV-12: Require project proponents within identified high risk Overlay Zones surrounding existing hazardous sites, roadways, or TAC sources, to assess health risks at the location in question and to incorporate feasible design-related risk mitigation measures, such as HEPA filters or equivalent indoor air quality equipment mechanisms, as appropriate and determined in consultation with the City.	N/A.
P-ENV-13: Require new large commercial projects to prepare a loading plan aimed to minimize truck idling and reduce diesel particulate emissions related to truck loading.	N/A.
P-ENV-14: Require construction projects to implement the following measures recommended by the BAAQMD, as applicable: • All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day; • All haul trucks transporting soil, sand, or other loose material off-site shall be covered; • All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited; • All vehicle speeds on unpaved roads shall be limited to 15 mph; • All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used; • Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations). Clear signage shall be provided for construction workers at all access points; • All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be	Consistent. The Project is conditioned to comply with these requirements.

EXHIBIT B

checked by a certified visible emissions evaluator; and • A publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints shall be posted. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.	
P-ENV-15: Require that applicants proposing development of projects within the Planning Area require contractors, as a condition of contract, to reduce construction-related exhaust emissions by ensuring that all off-road equipment greater than 50 horsepower (hp) shall operate on an EPA-approved Tier 4 or newer engine. Exemptions can be made for specialized equipment where Tier 4 engines are not commercially available within 200 miles of the project construction site. The construction contractor must identify these pieces of equipment, document their unavailability from at least two construction equipment rental firms, and ensure that they operate on no less than an EPA-approved Tier 3 engine.	Consistent. The Project is conditioned to comply with these requirements.

EXHIBIT B

P-ENV-16: Require that applicants proposing development of projects within the Planning Area require contractors, as a condition of contract, to reduce construction-related fugitive ROG emissions by ensuring that low-VOC coatings that have a VOC content of 10 grams/liter (g/L) or less be used during construction. All project applicants shall submit evidence of the use of low-VOC coatings to BAAQMD prior to the start of construction.	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-17: Ensure that all applicants proposing new development projects within the Planning Area require their contractors, as a condition of contract, to reduce construction-related GHG emissions through implementation of the Bay Area Air Quality Management District's recommended best practices, including but not limited to the following measures (based on BAAQMD's 2017 CEQA Guidelines): • Ensuring alternative fueled (e.g. biodiesel, electric) construction vehicles/equipment make up at least 15 percent of the fleet; • Ensuring at least 10 percent of building materials are local building materials (sourced from within 100 miles of the Planning Area); and • Recycling or reusing at least 50 percent of construction waste or demolition materials.	Consistent. The Project is conditioned to comply with these requirements.
G-ENV-4: Protect and improve the quality of biological resources and habitat areas.	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-18: Creek setbacks shall be 2.5:1 from the toe of the channel plus 20 feet, consistent with Zone 7 creek setback criteria. New development shall be restricted within the buffer. • Expand the buffer edge in areas where the City determines there is high biological value. • Where feasible, allow public access in the form of open space or a pedestrian or bicycle trail within the creek edge buffer, and incorporate interpretive signage for educational purposes in public access areas along creeks.	N/A.

EXHIBIT B

P-ENV-19: Promote the healthy growth of trees and minimize the removal of trees within the Isabel Neighborhood through the City's Tree Protection Ordinance (Section 12.20 of the Livermore Municipal Code).	N/A.
P-ENV-20: Design pedestrian and vehicle bridges over creeks to span the bed and bank of the creek and to avoid placing bridge piers or footings within the creek, within bridge safety limits.	N/A.
P-ENV-21: Require that new development inventory sensitive resources and develop adequate measures to avoid or mitigate impacts for any parcel that may include special-status species habitat with a moderate or greater potential to exist in the Isabel Neighborhood. The inventory must be conducted by an independent, qualified biologist, and follow guidelines established for federally-listed species. If special-status species are identified, an avoidance strategy must be pursued where feasible.	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-22: Require that project proponents avoid or minimize the introduction or spread of invasive plant species through measures such as the following: • Cleaning construction equipment and vehicles in a designated wash area prior to entering and exiting the construction site. • Treating small, isolated infestations with eradication methods that have been approved by or developed in conjunction with CDFW and USFWS to prevent or destroy viable plant parts or seeds. • Minimizing surface disturbance to the greatest extent feasible to complete the work. • Using native, non-invasive species or non-persistent hybrids in erosion control plantings to stabilize site conditions and prevent invasive plant species from colonizing. • Using weed free imported erosion control materials (or rice straw) in upland areas.	Consistent. The Project is conditioned to comply with these requirements.

EXHIBIT B

P-ENV-23: Require project proponents to comply with the East Alameda County Conservation Strategy (EACCS). Development activities will either obtain compensatory habitat mitigation through the EACCS, or use the mitigation prescribed in EACCS as a basis for near-term and longer-term mitigation and obtain coverage under separate applicable State and federal permits from CDFW and USFWS. The project proponent will be responsible for acquiring, funding, monitoring, restoring, enhancing, reporting, and implementing compensatory habitat mitigation and contingency actions per the applicable State and federal permits. In accordance with the EACCS, the project proponent will implement compensatory mitigation for impacts on habitat for the following species under or consistent with EACCS at the corresponding mitigation ratios. • Vernal pool fairy shrimp—10:1 ratio (mitigation area to impact area) dependent on impact location relative to mitigation location • Callippe silverspot butterfly—5:1 dependent on impact location relative to mitigation location • California tiger salamander and California red-legged frog—3:1 dependent on impact location relative to mitigation location, or above through coordination with relevant regulatory agency/ies • Burrowing owl—3:1 dependent on impact location relative to mitigation location, or above through coordination with relevant regulatory agency/ies	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-24: Where a biologist has identified areas supporting or potentially supporting sensitive biological resources, require project proponents to prepare and implement a worker environmental awareness training program prior to equipment staging, grading, or vegetation removal. The training program should be provided to all construction personnel (contractors and subcontractors) and include the following information: • The need to avoid effects on sensitive biological resources and the importance of protecting habitat;	Complies. The Project would comply with this requirement.

EXHIBIT B

• Penalties for not complying with applicable State and federal laws and permit requirements; • General restrictions and guidelines to be followed by all construction personnel to reduce or avoid effects on sensitive biological resources during construction; • The life history and habitat requirements of special-status species potentially occurring in or adjacent to the improvements footprint; and • The terms and conditions of the Biological Opinions and other applicable permits. In addition, the training program should educate construction supervisors and managers about invasive plant identification and the importance of controlling and preventing the spread of invasive plant infestations:	
P-ENV-25: If any work remains to be completed after the start of the rainy season or during the upland migration periods of protected amphibians (October 15 to June 1), require project proponents or their contractors to install exclusion fencing and erosion control measures prior to any ground disturbance within 50 feet of wetlands and vernal pools to be avoided by construction (where feasible) under the guidance of a City-approved biologist. The fencing should be installed around the perimeter of vernal pools and other seasonal wetlands and be erected and maintained under the supervision of the biologist.	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-26: Require that construction within 300 feet of freshwater marsh or streambank habitat take place during the non-breeding season for tricolored blackbirds (September 1 through January 31) to the extent feasible.	N/A.
P-ENV-27: Require that construction and structure demolition/modification activities be conducted outside of the bird nesting season (February 1 to August 31) to the extent feasible.	Consistent. The Project is conditioned to comply with these requirements.

EXHIBIT B

P-ENV-28: Require project proponents to compensate for tree removal during construction. Prior to the removal of any trees, proponents of projects within the Planning Area shall obtain a tree removal permit, and if necessary, develop a tree avoidance, minimization, and replacement plan in consultation with a certified arborist, the City of Livermore's Department of Public Works and/or the Community Development Department, and is consistent with the City of Livermore's Street Tree and Tree Preservation Ordinance Chapter 12.20. Replacement plantings should be native species where practicable. Invasive species (as defined by the California Invasive Plant Council) should not be planted.	N/A
G-ENV-5: Minimize the exposure of new development in the Planning Area to hazardous materials and flooding.	Complies. The Project would comply with this requirement.
P-ENV-29: Require documentation of the site investigation and any required cleanup to be submitted to City staff during the entitlement review process. Remediation and clean-up of any contaminated sites in the Planning Area shall be in accordance with federal and State standards.	N/A
P-ENV-30: Ensure compliance with the City's Stormwater Master Plan to reduce flooding and stormwater hazards and for information on site-specific flooding areas. • Development that falls within potential flooding areas shall design buildings to be at least 12 inches above the potential flooding elevation. • The City may require a site-specific flooding hazard analysis where the City determines there is moderate to high flooding potential.	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-31: Ensure new projects within the 100-year flood zone are designed to reduce flood risk. In accordance with Municipal Code Chapter 16.12, Flood Control Regulations, strategies include site planning, grading to minimize flood risk, and flood proofing new commercial construction.	N/A

EXHIBIT B

P-ENV-32: If any structure or grading for the Isabel Station parking will alter the floodplain, a floodplain analysis including a conditional letter of map revision and letter of map revision may be required to meet FEMA requirements in the City.	N/A.
P-ENV-33: Require that a final drainage study be prepared for projects in the Planning Area by a registered civil engineer and submitted to the City of Livermore with the initial grading plan check in accordance with City, County, and engineering standards, prior to issuance of a grading permit. The final study shall identify stormwater runoff quantities (to mitigate the 100-year storm event) from the development of the site and upstream of the site, and shall identify all existing or proposed drainage facilities intended to discharge this runoff. The final study shall include a capacity analysis verifying the adequacy of all facilities to convey runoff to an adequate outfall capable of receiving the stormwater runoff without damage to public or private property. If the receiving facilities are determined to be under capacity, then onsite detention would be considered.	Consistent. The Project is conditioned to comply with these requirements.
P-ENV-34: The 6.4-acre property located at the bend of Airway Boulevard across from the Livermore Municipal Airport is within the floodplain and covered by a Zone 7 Flood Control Easement. Any development on this parcel cannot hinder the purpose, intent and use of the easement for flood control purpose. Interim uses such as surface parking and temporary sales with no permanent buildings can be considered with approval by City and Zone 7. The large oak tree shall also be preserved in good health as part of any physical change on the property.	N/A.
G-ENV-6: Reduce risks resulting from geologic and seismic hazards.	Consistent. The Project would comply with this requirement through compliance with state and local building code requirements and engineer recommendations.
P-ENV-35: Ensure continued compliance with City standards and procedures for minimizing risks associated with geology and soils,	Consistent. The Project would comply with this requirement through compliance with state and local building code requirements and engineer recommendations.

EXHIBIT B

including through integration of required geotechnical investigations into the planning and design of projects.	
P-ENV-36: Require development applications to include a preliminary soils report and hydrologic and hydraulic analyses in accordance with the City's Facility Planning Guidelines, the City's Scenic Corridor Polices, and the Development Plan Check Manual.	Consistent. The Project would comply with this requirement.
G-ENV-7: Protect and conserve cultural resources within the Planning Area.	Consistent. The Project would comply with this requirement through the implementation of INSP mitigation measures to protect cultural resources.
P-ENV-37: When future individual projects are proposed and require site-specific environmental reviews, require project proponent to retain a professional who meets the Secretary of the Interior's standards for archaeology to conduct a project-level study of the proposed action. Such studies will include the following: • Review of the NWIC records search or conduct an updated records search, if necessary; • Archaeological pedestrian survey of the proposed project area; and • Formal evaluation to determine NRHP or CRHR eligibility. In those instances where it has been determined that unique archaeological resources may be impacted, recommended mitigation measures, including but not limited to, avoidance, preservation in place, and data recovery may be applied.	N/A. The Project Site is vacant.

EXHIBIT B

P-ENV-38: Require that all applicants proposing development projects within the Planning Area retain a qualified paleontologist, as defined by the Society for Vertebrate Paleontology, who is experienced in teaching non-specialists, prior to the start of any excavation, drilling, or pile-driving activities. The qualified paleontologist will train all construction personnel who are involved with earthmoving activities, including the site superintendent, regarding the possibility of encountering fossils, the appearance and types of fossils that are likely to be seen during construction, and proper notification procedures should fossils be encountered. Procedures to be conveyed to workers include halting construction within 50 feet of any potential fossil find and notifying a qualified paleontologist, who will evaluate the significance. The qualified paleontologist will also make periodic visits during earthmoving in high sensitivity sites to verify that workers are following the established procedures.	Consistent. The Project would comply with this requirement through the implementation of INSP mitigation measures for paleontological resources as enforceable conditions of approval.

EXHIBIT B

P-ENV-39: Require development to follow the following steps regarding discovery of paleontological resources: • If paleontological resources are discovered during earthmoving activities, the construction crew will immediately cease work near the find and notify the project applicant. Construction work in the affected areas will remain stopped or be diverted to allow recovery of fossil remains in a timely manner. • The project applicant will retain a qualified paleontologist to evaluate the resource and prepare a recovery plan in accordance with Society of Vertebrate Paleontology guidelines. The recovery plan may include a field survey, construction monitoring, sampling and data recovery procedures, museum storage coordination for any specimen recovered, and a report of findings. • Recommendations in the recovery plan that are determined by the project applicant to be necessary and feasible will be implemented before construction activities can resume at the site where the paleontological resources were discovered. • The project applicant may be responsible for ensuring that the monitor's recommendations regarding treatment and reporting are implemented. • If the remains are of Native American origin: – The descendants of the deceased Native Americans have made a recommendation to the landowner or the person responsible for the excavation work, for means of treating or disposing of, with appropriate dignity, the human remains and any associated grave goods as provided in Public Resources Code Section 5097.98; or – The Native American Heritage Commission was unable to identify a descendant or the descendant failed to make a recommendation within 24 hours after being notified by the commission.	Consistent. The Project would comply with this requirement through the implementation of INSP mitigation measures for paleontological resources as enforceable conditions of approval.
Implementation & Financing Strategies	
G-IMP-1: Require property owners to undertake all required infrastructure and public improvements within their properties	Consistent. The Project would undertake all required infrastructure and public improvements within the Site.

EXHIBIT B

P-IMP-1: All development projects are required to construct all proposed public infrastructure identified in this Plan within their property, along their frontage, and off site as may be necessary for public improvements, such as the proposed street network shown on Figure 3-1 in the Plan.	Consistent. The Project would construct all proposed public infrastructures within the Site and along the outward facing street frontages.
G-IMP-2: Develop ongoing funding sources for maintenance of public infrastructure	N/A.
P-IMP-2: Require property owners to participate in Community Facilities Districts as necessary to fund ongoing private maintenance, including capital replacement, of public infrastructure such as streets, trails, drainage facilities, lighting and landscaping, signage, traffic signals and amenities in the public rights of way, except for Major Streets.	Consistent. The Project would participate in existing applicable Community Facilities Districts and calls for the formation of a new Project-specific CFD.
P-IMP-3: Fund ongoing maintenance of Major Streets out of gas and countywide transportation taxes.	N/A.
G-IMP-3: Facilitate the construction of mixed-use development to support the complete neighborhood vision.	Consistent. The Project proposes a mixed-use development that includes townhomes, flats, ground floor commercial spaces, a grocery store, and ample open space to support the INSP's complete neighborhood vision for the Site.
P-IMP-4: To encourage future tenants to occupy commercial spaces and facilitate the complete neighborhood vision, mixed-use development shall pay the mixed-use commercial wastewater connection fees at the time of initial construction as identified in the City's Fee Schedule.	Consistent. The Project would pay any applicable mixed-use commercial wastewater connection fee at the time of initial construction.
G-IMP-4: Monitor and track the Isabel Neighborhood Specific Plan and Valley Link Rail project progress	N/A.
P-IMP-5: The City shall review the progress of the Specific Plan every two years, starting from the date of its adoption. This review shall include an evaluation of the public infrastructure to ensure continued public health and safety. • The City will monitor the progress of the Valley Link rail project leading up to the anticipated opening in year 2028. In the event that the anticipated opening date of the Valley Link rail project is	N/A.

EXHIBIT B

altered, the City has the discretion to require additional environmental analysis for development projects within the Specific Plan area.	
G-IMP-5: Consider a variety of strategies to meet the Specific Plan goals and requirements	N/A.
P-IMP-6: The City shall modify the Transferable Development Credits In-Lieu Fee Program to establish new multi-family housing rates to facilitate the development of the densities and building types identified within the Specific Plan. The new rates shall apply to developments that build at or above 25 dwelling units per acre and that meet or exceed the target housing unit count by subarea shown in Table 2-6, Performance Measures by Subarea. The new multi-family housing rates shall apply to the Isabel Neighborhood Specific Plan area only.	N/A.
P-IMP-7: The City shall consider a Transferable Development Credits In-Lieu Fee credit program to encourage residential development to meet or exceed the target housing unit count by subarea shown in Table 2-6, Performance Measures by Subarea. The credit program shall apply to the Isabel Neighborhood Specific Plan area only and take effect upon compliance with Master Planned subareas consistent with P-LU-8.	N/A.
P-IMP-8: For projects over 150 residential units or over 100,000 square feet of commercial or retail space, the project developer is encouraged to consider a Community Workforce and Training Agreement with building trades locals that provides for the local hire of the construction workforce, the use of apprentices enrolled in State of California approved apprentice programs and the payment of area standard wages.	N/A.

EXHIBIT B

P-IMP-9: The City shall consider using a suite of options to fulfill Specific Plan requirements, such as allowing an in-lieu fee payment to meet a standard.	N/A.

3.3-5 Implementation of the proposed Plan would expose sensitive receptors to substantial pollutant concentrations from new sources of toxic air containments.	**Mitigation Measure AQ-4: Require Future Projects Located within 1,000 Feet of Receptors Perform a Construction Health Risk Assessment**. All applicants proposing development of projects within 1,000 feet of existing sensitive receptors, as defined by the Bay Area Air Quality Management District (BAAQMD), shall prepare a site-specific construction health risk assessment (HRA) taking into account both project-level and cumulative health risks (including existing TAC sources). If the HRA demonstrates, to the satisfaction of the City, that the health risk exposures for adjacent receptors may be less than BAAQMD project-level and cumulative thresholds (as appropriate), then additional mitigation would be unnecessary. However, if the HRA demonstrates that health risks would exceed BAAQMD project-level and/or cumulative thresholds (as appropriate), additional feasible on- and offsite mitigation shall be analyzed by the applicant to help reduce risks to the greatest extent practicable. 	• In residential areas of the Isabel Neighborhood, exterior noise levels may not exceed 65 dBA from 7:00 a.m. to 12:00 a.m or 60 dBA from 12:00 a.m. to 7:00 a.m. • Along Main Street and in the office, commercial, or business park areas of the Isabel Neighborhood, exterior noise levels may not exceed 75 dBA from 7:00 a.m. to 12:00 a.m or 65 dBA from 12:00 a.m. to 7:00 a.m.		
Biological Resources			
3.7-1 Implementation of the proposed Plan would have a substantial adverse effect, either directly or through habitat modifications, on special-status species.	**MM-BIO-1**: If impacts to special-status plan species are unavoidable, Prepare and implement a salvage, relocation, or propagation and monitoring plan for special-status plant species. If a protocol-level botanical survey reveals the presence of special-status plant species in the Planning Area, all directly affected areas of special-status plants will be documented by a qualified botanist or ecologist retained by project proponents prior to issuance of grading permits, consistent with Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Natural Communities State of California (CDFW, 2009). Documentation will include density and percent cover; key habitat characteristics, including soil type, associated species, hydrology, and topography; and photographs of preconstruction conditions. Impacts to rare (California Rare Plant Rank 1 and 2) native plant species will be avoided where feasible. If impacts to such species are unavoidable, the project proponent will notify USFWS and/or CDFW and a qualified botanist or restoration ecologist will prepare a salvage, relocation, or propagation and monitoring plan in coordination with USFWS and/or CDFW prior to construction to address affected special-status plant species. The plan will include provisions that address the techniques, location, and procedures required for the successful establishment of the plant populations. The plan will include provisions for performance that address survivability	COL. Zone 7, CDFW, USFW	TM, C, PC

	requirements, maintenance, monitoring, implementation, and the annual reporting requirements. Monitoring and success criteria applicable to special-status plant salvage, relocation, or propagation will require the following. • At least two surveys by a qualified botanist or ecologist per monitoring year. • At least 80 percent of the planted area must support vegetation composition and density consistent with reference population conditions. • At least 80 percent of the planted area must support target species amounts similar to reference feature conditions. • A minimum of five consecutive years of monitoring to ensure success criteria are met. • Remedial actions to restore intended ecological function of planted areas that fail to meet the success criteria for three consecutive years. MM-BIO-2: Avoid nesting birds where feasible. Proponents (or their contractors) of specific projects under the proposed Plan shall conduct construction activities outside the bird nesting season (February 1 to August 31) to the extent feasible. If construction initiation is unavoidable during this time, the project proponent or its contractor will retain a qualified wildlife biologist with demonstrated nest-searching experience to conduct preconstruction surveys for nesting birds (including raptors, but excluding burrowing owl) within 300 feet and including the near-term or longer-term improvements environmental footprints. Adjacent lands outside the development footprints will be scanned with binoculars from the limit of ground-disturbance and publicly accessible areas. Preconstruction surveys will occur no more than three days prior to the onset of ground-disturbing activities (including clearing, grubbing, and

	staging) at each development area. If active nests are found in the development footprints, the biologist will establish a no-disturbance buffer around the nest and mark the buffer perimeter with high-visibility fencing, flagging, or pin flags. The size of the buffer will be based on the species' sensitivity to disturbance and planned work activities in the vicinity; typical buffer sizes are 250 feet for raptors and 50 feet for other birds. The buffer will remain in place until the nest is no longer active, as determined by the biologist. Buffers for any nests found outside but within 300 feet of the development sites will be established based on the biologist's best professional judgment whether the work would result in nest abandonment. If a lapse in construction activities of 15 days or longer at a previously surveyed environmental footprint occurs, another preconstruction survey will be conducted. If structure demolition activities cannot occur outside of the nesting season, the project proponent or its contractor will remove inactive nests from the structure to be demolished and install nest exclusion measures (e.g., fine mesh netting, panels, or metal projectors) outside of the nesting season. All exclusionary devices will be monitored and maintained throughout the breeding season to ensure that they are successful in preventing the birds from accessing the cavities or nest sites. No more than three days prior to structure demolition activities, a qualified biologist will conduct a preconstruction survey of all potential nesting habitat on the structures to be demolished/modified and the surrounding areas for the presence of active nests. If active nests are found on the structures or in the affected area, then demolition/modification activities will not proceed until the biologist verifies that all nests on the structures are inactive. After all surveys and/or nest deterrence activities are completed at each development footprint, the biologist will complete a memorandum detailing

	the survey effort and results and submit the memorandum to the project proponent within seven days of survey completion. MM-BIO-3: Avoid burrowing owl nesting where feasible. Prior to any construction activity planned during the fall and winter non-nesting season (September 1 through January 31) or at any time during the construction process, proponents of projects proposed within the Planning Area will retain a qualified wildlife biologist to conduct a preconstruction survey for burrowing owls. Surveys will be conducted at each area of suitable habitat that will be disturbed no more than seven days prior to ground-disturbing activities and will cover all suitable burrowing owl habitat subject to disturbance pursuant to CDFW's Staff Report on Burrowing Owl Mitigation (California Department of Fish and Game, 2012). If any burrowing owls are found within the disturbance area, the project proponent will notify CDFW and will proceed under CDFW direction. If construction is planned to occur during the nesting season (February 1 through August 31), the project proponent will retain a qualified wildlife biologist to conduct a breeding season burrowing owl survey in the year prior to construction. The survey will be conducted to determine if there is a breeding pair within approximately 500 feet of each development footprint, unless the biologist determines that a smaller survey buffer around the construction footprint is warranted based on preexisting background disturbance and conditions. Survey visits will be timed in accordance with CDFW guidelines (California Department of Fish and Game, 2012). This will provide the project team advance notice of nesting owls in the development area and allow ample time to discuss appropriate avoidance measures with CDFW. In addition, preconstruction surveys will be conducted no more than seven days prior to ground disturbance in all areas of the development footprint supporting burrowing owl habitat. If the biologist identifies the

	presence of a burrowing owl nest in an area scheduled to be disturbed by construction, a 660-foot no-activity buffer will be established and maintained around the nest while it is active. Surveys and buffer establishment will be performed by qualified wildlife biologists, and buffers will be coordinated with CDFW by contacting the appropriate CDFW personnel, and will be subject to CDFW review and oversight. **MM-BIO-4**: Avoid tricolored blackbird breeding habitat where feasible. If construction activities in or within 300 feet of freshwater emergent wetland habitat occur during the breeding season (February 1 through August 31), the project proponent will retain a qualified biologist to conduct surveys for the presence of a tricolored blackbird nesting colony or nests. If an active nest colony or nest is observed by the qualified biologist, then a no-disturbance buffer of 250 feet will be established until the end of the breeding season or until the nesting colony or nest is determined inactive by the biologist. Nest buffers may be reduced if site-specific conditions reduce the possibility of near-term or longer-term improvements disturbance, as determined by the qualified biologist in coordination with CDFW. **MM-BIO-5**: Avoid western pond turtle where feasible. Prior to the start of construction within western pond turtle habitat (i.e., any undeveloped areas within 400 feet of riverine aquatic habitat, freshwater emergent wetlands, vernal pools, or seasonal wetlands), proponents of proposed projects within the Planning Area shall retain a biologist approved by the CDFW to survey for western pond turtles. Surveys will be conducted at each habitat area no more than seven days prior to the initiation of ground disturbance at that location. If preconstruction surveys identify active nests, the biologist will establish 50-foot no-disturbance buffer zones around each nest using temporary orange construction fencing with a four-inch-tall gap

	below the fence. The fencing will be permeable to young turtles and allow them to move away from the nest following hatching. The buffer zones and fencing will remain in place until the biologist has confirmed that the young have left the nest. If non-nesting pond turtles are found in the footprint, the biologist will remove and relocate them to suitable habitat outside the environmental footprint. Relocation sites will be subject to CDFW approval. **MM-BIO-6**: Avoid San Joaquin kit fox and American badger where feasible. Within one year but no less than three months prior initiating construction, proponents of specific projects within the Planning Area will retain qualified biologists to identify potential kit fox and badger dens in the development footprint and surrounding 200 feet. The biologist will prepare a report summarizing the survey observations and results, including maps depicting the locations of potential badger dens and, if possible, occupancy. The report will be submitted to the project proponent and CDFW. Prior to construction, the project proponent will retain qualified biologists to implement preconstruction surveys of previously identified potential kit fox and badger dens to determine if they are natal kit fox or American badger dens no less than 14 days and no more than 30 days before the initiation of construction at each development footprint (e.g., one week ahead of the construction crew for linear components). Construction activities will not occur within 100 feet of a potential den during the natal period (February 1 to September 30). If a known den or natal den is present within the permanent construction footprint or within 200 feet of the construction footprint during the natal period (100-foot buffer during the nonnatal period), the kit fox or badger will be excluded outside of the natal period (from November 1 to January 31). A summary report will be prepared by the biologists and submit to the project proponent and CDFW following completion of all kit fox or badger avoidance and exclusion activities.

SUMMARY OF IMPACT	SUMMARY OF MITIGATION MEASURE	AGENCY RESPONSIBLE FOR VERIFICATION	TIMING OF VERIFICATION
	MM-BIO-7: Avoid California tiger salamander and California red-legged frog where feasible. Proponents of specific projects within the Planning Area shall retain a USFWS and/or CDFW-approved biologist (as appropriate) to identify and flag (pin flags or 4-foot lath) all suitable aquatic habitat for California tiger salamander and California red-legged frog outside of but adjacent to development footprints and ground-disturbance areas prior to staging, vegetation clearing, grading, or other construction activities. The project proponent or its contractor will protect habitat areas by installing orange exclusion and erosion control fencing at the maximum practicable distance from the work site or, if feasible, at least 500 feet from the aquatic habitat edge, wet or dry, to make it easily visible by construction crews. A qualified biologist will conduct a preconstruction survey each morning before construction activities begin and continue to monitor ground-disturbing construction activities where suitable habitat occurs during all phases of construction to remove any California tiger salamander and California red-legged frogs found in the development footprint. Individual salamanders and frogs will be moved immediately to a relocation site that is a minimum of 330 feet from the construction boundary. The relocation site will be determined in coordination with USFWS and/or CDFW prior to the commencement of construction activities. Construction activities near drainages and wetland complexes identified as potential movement corridors shall take place between July 1 and October 1, when the California tiger salamander and California red-legged frog are least likely to be present in the development area. To discourage California tiger salamander and California red-legged frogs from entering the improvements areas via ditches, the ditches will be

	equipped with lightweight, one-way flow gates. These will be designed so that water can easily pass from the construction site to the ditches, but small vertebrates such as the salamander or frog cannot move upstream from ditches to the development area. MM-BIO-8: Avoid Callippe silverspot butterfly where feasible. Prior to construction, proponents of specific projects within the Planning Area will retain a qualified botanist or biologist with experience in identifying Viola pedunculata, the host plant for Callippe silverspot butterfly, to identify and flag (with pin flags or 4-foot lath) any Viola pedunculata individuals during its blooming season (February to April) when the species is readily identifiable in and within 50 feet of the near-term and longer-term improvements that will affect California annual grassland. The locations of Viola pedunculata outside of the ground disturbance area of the near-term or longer-term improvements will be included on grading plans and avoided by construction personnel. The biologist will document the number and density of host plants that are unavoidable in development footprints. This information shall be compiled in a report and submit to USFWS prior to initiation of ground disturbance. The project proponent or its contractor will adhere to the following host plant avoidance measures. • No herbicide application will occur within 100 feet of host plant populations. Spot application to cut stumps, frilled stems, or injection into stems is acceptable. No broadcast herbicide applications will be used. • Cut trees that are removed in the vicinity of host plants will be hand carried rather than dragged to disposal areas. • Avoid or minimize the removal of host plant, Viola pedunculata.

SUMMARY OF IMPACT	SUMMARY OF MITIGATION MEASURE	AGENCY RESPONSIBLE FOR VERIFICATION	TIMING OF VERIFICATION
	• Avoid work in suitable habitat during the flight and mating season (mid-May to mid-July) to the extent feasible. **MM-BIO-9**: Avoid roosting bats where feasible. If tree removal and trimming cannot be conducted between September 15 and October 30, proponents of projects implemented under the proposed Plan will retain a qualified biologist to examine trees to be removed or trimmed for suitable bat roosting habitat no more than 2 weeks before removal and trimming. High-quality habitat features (large tree cavities, basal hollows, loose or peeling bark, larger snags, palm trees with intact thatch, etc.) will be identified and the area around these features searched for bats and bat signs (e.g., guano, culled insect parts, urine staining, etc.). Mixed willow riparian scrub and stands of mature broadleaf trees should be considered potential habitat for solitary foliage-roosting bat species. Passive monitoring using full spectrum bat detectors may be needed if identification of bat species is required. Survey methods will be discussed with CDFW prior to the start of surveys. Measures to avoid and minimize impacts on sensitive bats species will be determined in coordination with CDFW and may include the following. • Tree removal will be avoided between April 1 and September 15 (the maternity period) to avoid effects on pregnant females and active maternity roosts (whether colonial or solitary). • All tree removal will be conducted between September 15 and October 30, which corresponds to a time period when bats have not yet entered torpor or would be caring for nonvolant (non-flying) young. • Each tree will be removed in pieces rather than felling the entire tree. • If a maternity roost is located, whether solitary or colonial, that roost will remain undisturbed until September 15 or a qualified biologist

	has determined the roost is no longer active. • If avoidance of nonmaternity roost trees is not possible, and tree removal or trimming must occur between October 30 and September 15, qualified biologists will monitor tree trimming and removal. If possible, tree trimming and removal should occur in the late afternoon or evening when it is closer to the time that bats would normally arouse. Prior to removal and trimming, each tree will be shaken gently and several minutes should pass before felling trees or limbs to allow bats time to arouse and leave the tree. The biologists will search downed vegetation for dead and injured bats. The presence of dead or injured bats that are species of special concern will be reported to CDFW. The biologist will prepare biological monitoring report, which will be provided to the project proponent and CDFW.		
3.7-2 Implementation of the proposed Plan would not adversely affect riparian habitat and/or other sensitive natural communities in the Planning Area.	**MM-BIO-10:** Avoid and protect riparian habitat during construction. Proponents of specific projects under the proposed Plan will ensure that a qualified resource specialist (i.e., biologist, botanist, or ecologist) will clearly identify riparian habitat to be preserved abutting the development area and outside of the direct construction area with high-visibility construction fencing or markers (e.g., lathe or pin flags) before site preparation. Construction will not encroach upon sensitive natural communities identified by the resource specialist. The resource specialist will use the project's verified wetland delineation, soils data, and land cover data to confirm the location of riparian habitat boundaries based on existing conditions at the time of the avoidance marking. Exclusion fencing or markers will be installed before construction activities are initiated, and the fencing will be maintained throughout the construction period. No construction activity, traffic, equipment, or materials will be permitted in fenced sensitive natural	COL. ZONE 7, USFW, CDFW	TM, C

	community areas. Exclusion fencing and markers will be removed following completion of construction activities. All conditions imposed by State and federal permits for individual improvements will be clearly identified in the construction plans and specifications and monitored during and after construction to ensure compliance. **MM-BIO-11:** Compensate for loss of riparian habitat. • For direct effects on woody riparian trees that cannot be avoided, proponents of specific projects under the proposed Plan will compensate for the loss of riparian habitat to ensure no net loss of habitat functions and values. Compensation ratios will be based on site-specific information and determined through coordination with the appropriate State and federal agencies during the permitting process. At a minimum, the compensation ratio will be 2:1 (e.g., two acres restored/created/enhanced or credits purchased for every 1 acre removed) for permanent impacts and 1:1 for temporary impacts (where riparian habitat will regenerate to pre-activity character within one year). Compensation may be a combination of offsite restoration or mitigation credits. The project proponent or its contractor will develop a restoration and monitoring plan that describes how riparian habitat will be enhanced or recreated and monitored over at least 5 years, or as determined by the appropriate State and federal agencies. • If the project proponent identifies suitable onsite areas (adjacent to the permanent construction footprint) that are outside the development footprint and chooses to compensate onsite or in the project's vicinity, a revegetation plan will be prepared. The revegetation plan will be developed prior to the removal of existing riparian vegetation and will be conducted onsite or in the near-term

SUMMARY OF IMPACT	SUMMARY OF MITIGATION MEASURE	AGENCY RESPONSIBLE FOR VERIFICATION	TIMING OF VERIFICATION
	or longer-term improvements vicinity to the extent feasible; however, mitigation site selection will avoid areas where future development or maintenance are likely. The revegetation plan will be prepared by a qualified botanist or restoration specialist with experience in riparian restoration and reviewed by the appropriate agencies. The revegetation plan will specify the planting stock appropriate for each riparian land cover type and each mitigation site, ensuring the use of genetic stock from the corresponding development area by project. The plan will employ the most successful techniques available at the time of planting. Success criteria will be established as part of the plan and will include a minimum of 70 percent revegetation success after three years, 80 percent revegetation success at the end of five years, and 75 percent vegetative coverage after five years. • The project proponent or its contractor will retain a qualified botanist, restoration ecologist, or biologist with experience in riparian restoration to monitor the plantings as necessary for five years. The project proponent or its contractor will be responsible for maintaining the plantings, including managing invasive plants (as defined by the California Invasive Plant Council) and other weeds, and implementing irrigation and plant protection if necessary. The project proponent or its contractor will submit annual monitoring reports to the regulatory agencies issuing permits related to habitat effects, including CDFW, USACE, and USFWS. Replanting will be necessary if success criteria are not met, and replacement plants subsequently will be monitored and maintained to meet the success criteria. The riparian habitat mitigation will be considered successful when the sapling trees established meet the success criteria, the habitat no longer requires substantial active management, and vegetation is arranged in groups that, when mature, replicate the area, natural structure, stratification, and species composition of similar riparian habitats in the region.

LIVERMORE
CALIFORNIA

CITY COUNCIL STAFF REPORT **ITEM NO. 7.1**

DATE: July 22, 2024

TO: Honorable Mayor and City Council

FROM: Tina Olson, Administrative Services Director

SUBJECT: Resolution adopting 180-day wait period exception to hire retired annuitant, Nancy Dias, former Human Resources Manager, in accordance with Government Code section 7522.56 of the Public Employees' Retirement Law.

RECOMMENDED ACTION

Staff recommends that the City Council adopt a resolution approving the hiring of retired annuitant, Nancy Dias, former Human Resources Manager, in accordance with Government Code section 7522.56 of the Public Employees' Retirement Law.

SUMMARY

A California Public Employees Retirement System (CalPERS) retiree who returns to employment with a CalPERS agency is referred to as a "retired annuitant." CalPERS requires that retirees serve a 180-day waiting period between their retirement date and their first day of post-retirement employment. Government Code 7522.56 permits an agency to waive the 180-day waiting period in instances where the retired annuitant is needed to perform work of a limited duration, work on special projects, or to perform work due to work exceeding staff capacity. Human Resources Manager Nancy Dias retired as the Human Resources Manager on April 19, 2024. While the hiring for a new Human Resources Manager is underway, hiring Ms. Dias back as a retired annuitant will provide operational support as well as allow for a cohesive transition for the new Human Resources Manager.

DISCUSSION

In accordance with Government Code section 7522.56 and to ensure continuity of operations, staff recommends that City Council adopt a resolution approving the hiring of retired annuitant, Nancy Dias as a Special Projects Coordinator absent a 180-day waiting period. The Human Resources division currently has multiple, complex projects in progress. Due to current staffing and employee workloads, additional support is needed to move the projects forward. As the former Human Resources Manager, Ms. Dias has the experience, familiarity, and the skill to work on these complex projects with little to no training and allow for continuity of critical operations, whereas if the City were to hire a consultant or other temporary staff, it would take additional staff time to bring them up to speed. Further, when a new

Human Resources Manager is identified, having Ms. Dias as a retired annuitant will allow for training and knowledge transfer to the new Human Resources Manager. Given the volume of high level, complex projects, that the Human Resources Division currently has, Ms. Dias will provide the Division up to an additional 960 hours of operating support as she knows Livermore's processes, systems, and challenges.

The retiree did not receive any retirement related incentive, such as a "golden handshake" or any other incentive to retire. CalPERS rules dictate that compensation paid to retirees cannot be less than the minimum nor exceed the maximum monthly base salary paid to other employees performing comparable duties.

FISCAL AND ADMINISTRATIVE IMPACTS

The Special Projects Coordinator is not a "regular staff position" and there will be no net increase in headcount to make the temporary hire noted above. Retired annuitants are not entitled to any city employment benefits or property rights associated with regular employment. Therefore, the cost of hire is limited to salary only. The fiscal impact to make the temporary hire noted above is approximately $74,500 that will be funded through savings generated by vacant positions in the Human Resources Division.

COMMUNITY PILLAR

5: A City That Works

GOAL

8: Attract, develop, engage, and retain a diverse and highly skilled workforce across the organization.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION ADOPTING 180-DAY WAIT PERIOD EXCEPTION TO HIRE A RETIREE IN ACCORDANCE WITH GOVERNMENT CODE SECTIONS 7522.56 AND 21224 OF THE PUBLIC EMPLOYEES' RETIREMENT LAW

WHEREAS, in compliance with Government (Gov.) Code section 7522.56 of the Public Employees' Retirement Law, the City Council for the City of Livermore must provide CalPERS this certification resolution when hiring a retiree before 180 days has passed since their retirement date; and

WHEREAS, Nancy Dias retired from the City of Livermore in the position of Human Resources Manager, effective April 19, 2024; and

WHEREAS, Gov. Code section 7522.56 requires that post-retirement employment commence no earlier than 180 days after the retirement date, which is October 16, 2024 without this certification resolution; and

WHEREAS, Gov. Code section 7522.56 provides that this exception to the 180-day wait period shall not apply if the retiree accepts any retirement-related incentive; and

WHEREAS, the City Council, the City of Livermore, and Nancy Dias, certify that Nancy Dias has not and will not receive a Golden Handshake or any other retirement-related incentive; and

WHEREAS, the City Council for the City of Livermore hereby appoints Nancy Dias as an extra help retired annuitant to perform the duties of a Special Projects Coordinator for the City of Livermore under Gov. Code section 21224, effective August 6, 2024; and

WHEREAS, the entire employment agreement, contract or appointment document between Nancy Dias and the City of Livermore has been reviewed by this body and is attached herein; and

WHEREAS, no matters, issues, terms, or conditions related to this employment and appointment have been or will be placed on a consent calendar; and

WHEREAS, the employment shall be limited to 960 hours per fiscal year for all CalPERS employers; and

WHEREAS, the compensation paid to retirees cannot be less than the minimum nor exceed the maximum monthly base salary paid to other employees performing comparable duties, divided by 173.333 to equal the hourly rate; and

WHEREAS, the maximum base salary for this position is $16,800.01 and the hourly equivalent is $96.92, and the minimum base salary for this position is $13,440.01, and the hourly equivalent is $77.54; and

WHEREAS, the hourly rate paid to Nancy Dias will be $77.54; and

WHEREAS, Nancy Dias has not and will not receive any other benefit, incentive, compensation in lieu of benefit or other form of compensation in addition to this hourly pay rate; and

THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby certifies the nature of the appointment of Nancy Dias as described herein and detailed in the appointment document, attached hereto as Exhibit A, and that this appointment is necessary to fill the critically needed position of Special Projects Coordinator for the City of Livermore by August 6, 2024, because due to current staffing and employee workloads in the Human Resources Division, additional support is needed to move the projects forward. Nancy Dias has the experience, familiarity, and the skill to work on these complex projects. As the City of Livermore prepares to recruit for a new Human Resources Manager, Nancy Dias will help mitigate any service disruptions, allow for continuity of critical operations, and will assist with training and knowledge transfer to the new Human Resources Manager.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on July 22, 2024, by the following vote:

LIVERMORE
CALIFORNIA

[Date to be inserted after the resolution approving the certification is adopted]

Nancy Dias
XXXX **[Home address redacted from publication]**
XXXX

Dear Nancy:

We are pleased to inform you that the City of Livermore is extending an offer of employment to you as a temporary employee in the Human Resources Division of the Administrative Services Department. Your job title will be Special Projects Coordinator. Your first day of employment will be [**date to be inserted**]. Continued temporary employment is contingent upon the successful completion of the City's backgrounding process, which includes Livescan fingerprinting and a DMV report. A Human Resources representative will contact you to provide information on scheduling your Livescan fingerprinting appointment.

In accepting this temporary position, you will be paid at the rate of $77.54 per hour and will be subject to changes in your work shift, schedule, or location as the need of the City may require. Your temporary employment is for up to 29 hours per week not to exceed 960 hours in a fiscal year.

Temporary employees are not eligible for benefits and are at-will employees. As per the City of Livermore Personnel Rules & Regulations, at-will employees are defined as an employee who does not have a legal right to continued employment with the City and who therefore may be disciplined or discharged with or without cause and without the right of appeal. All City of Livermore regular job openings are posted on our website: https://www.governmentjobs.com/careers/livermoreca. Interested candidates are encouraged to review the site regularly as new jobs are frequently posted.

Please confirm your acceptance of our job offer by signing this letter and bringing it to the Human Resources Division on your first day of work.

The Federal Immigration Act requires that you provide us with proof of citizenship or authorization to work in the United States. You are required to provide us with this proof within three days of your hire date. Enclosed is a list of acceptable documents for proof of identity and legal ability to work in the United States. You will need to bring these document(s) to Human Resources on the day you begin your employment with the City, and no later than 72 hours after reporting to work at your jobsite.

EXHIBIT A

We welcome you back and wish you every success in your employment with the City of Livermore.

Please contact us if you have any additional questions at (925) 960-4100.

Sincerely,

Tina Olson
Administrative Services Director

LISTS OF ACCEPTABLE DOCUMENTS

All documents containing an expiration date must be unexpired.
* Documents extended by the issuing authority are considered unexpired.
Employees may present one selection from List A or a
combination of one selection from List B and one selection from List C.
Examples of many of these documents appear in the Handbook for Employers (M-274).

LIST A Documents that Establish Both Identity and Employment Authorization	OR	LIST B Documents that Establish Identity	AND	LIST C Documents that Establish Employment Authorization
1. U.S. Passport or U.S. Passport Card		**1.** Driver's license or ID card issued by a State or outlying possession of the United States provided it contains a photograph or information such as name, date of birth, gender, height, eye color, and address		**1.** A Social Security Account Number card, unless the card includes one of the following restrictions: **(1)** NOT VALID FOR EMPLOYMENT **(2)** VALID FOR WORK ONLY WITH INS AUTHORIZATION **(3)** VALID FOR WORK ONLY WITH DHS AUTHORIZATION
2. Permanent Resident Card or Alien Registration Receipt Card (Form I-551)		**2.** ID card issued by federal, state or local government agencies or entities, provided it contains a photograph or information such as name, date of birth, gender, height, eye color, and address		**2.** Certification of report of birth issued by the Department of State (Forms DS-1350, FS-545, FS-240)
3. Foreign passport that contains a temporary I-551 stamp or temporary I-551 printed notation on a machine-readable immigrant visa		**3.** School ID card with a photograph		**3.** Original or certified copy of birth certificate issued by a State, county, municipal authority, or territory of the United States bearing an official seal
4. Employment Authorization Document that contains a photograph (Form I-766)		**4.** Voter's registration card		**4.** Native American tribal document
5. For an individual temporarily authorized to work for a specific employer because of his or her status or parole: **a.** Foreign passport; and **b.** Form I-94 or Form I-94A that has the following: **(1)** The same name as the passport; and **(2)** An endorsement of the individual's status or parole as long as that period of endorsement has not yet expired and the proposed employment is not in conflict with any restrictions or limitations identified on the form.		**5.** U.S. Military card or draft record		**5.** U.S. Citizen ID Card (Form I-197)
		6. Military dependent's ID card		**6.** Identification Card for Use of Resident Citizen in the United States (Form I-179)
		7. U.S. Coast Guard Merchant Mariner Card		**7.** Employment authorization document issued by the Department of Homeland Security For examples, see **Section 7** and **Section 13** of the M-274 on **uscis.gov/i-9-central**. The Form I-766, Employment Authorization Document, is a List A, **Item Number 4.** document, not a List C document.
		8. Native American tribal document		
		9. Driver's license issued by a Canadian government authority		
		For persons under age 18 who are unable to present a document listed above:		
		10. School record or report card		
		11. Clinic, doctor, or hospital record		
		12. Day-care or nursery school record		
6. Passport from the Federated States of Micronesia (FSM) or the Republic of the Marshall Islands (RMI) with Form I-94 or Form I-94A indicating nonimmigrant admission under the Compact of Free Association Between the United States and the FSM or RMI				

Acceptable Receipts

May be presented in lieu of a document listed above for a temporary period.
For receipt validity dates, see the M-274.

• Receipt for a replacement of a lost, stolen, or damaged List A document. • Form I-94 issued to a lawful permanent resident that contains an I-551 stamp and a photograph of the individual. • Form I-94 with “RE” notation or refugee stamp issued to a refugee.	OR	Receipt for a replacement of a lost, stolen, or damaged List B document.	Receipt for a replacement of a lost, stolen, or damaged List C document.

*Refer to the Employment Authorization Extensions page on **I-9 Central** for more information.

SPECIAL PROJECTS COORDINATOR

DEFINITION

This is a temporary classification used for temporary employees who are hired to perform project/program support functions requiring specialized knowledge, skills, and abilities. This classification may not be used for ongoing or repetitive use. Duties will vary widely based on the needs of the department, division, or section.

DISTINGUISHING CHARACTERISTICS

This is a temporary, part-time, at-will position working less than 1,000 hours per fiscal year. Temporary employment does not include benefits.

SUPERVISION AND TRAINING RECEIVED

Receives direct supervision and direction from assigned supervisory or management staff.

SUPERVISION EXERCISED

None.

EXAMPLES OF IMPORTANT AND ESSENTIAL FUNCTIONS

The following list is designed to be a sample of the required essential functions:

- Completes special projects requiring specialized skills and knowledge.
- Prepares reports, memos, and records.
- Gathers records, and/or analyzes data.
- May make oral presentations.
- Interfaces orally and in writing with members of the public, and City employees.
- Provides information and assistance to the public.
- Maintains files and records.
- Operates program related equipment.
- Operates general office equipment including word processing, spreadsheet, data base, and other computer applications.
- Performs related work as required.

OTHER

Effectively applies the required knowledge and skills in the daily performance of assigned duties including but not limited to; reads, comprehends, and interprets a variety of City written materials including policies, codes, ordinances, and regulations. Must successfully complete a full background investigation as a condition of employment. May require possession of a valid California Class C Driver's License and a satisfactory driving record as determined by the City.

Livermore Housing Authority (LHA)

Annual Update

JULY 2024

PRESENTED BY SARAH RAMLER, EXECUTIVE DIRECTOR

1

Livermore Housing Authority (LHA)

Programs

- **Affordable Housing – 167 units**
  LHA owns and operates
  - 27 units in Springtown – Bluebell Apartments
    Mix of affordable, transitional and market rate units
  - 9 units off of N. Livermore - Las Posadas Apartments
    Affordable units at 50%-60% AMI
  - 6 units off of N. Livermore – Chestnut Apartments
    Affordable units at 30% and 60% AMI
  - 125 units – Leahy Square Apartments
    Project based Section 8 units
- **Section 8/Housing Choice Voucher Program – 707 families**
  LHA administers rental subsidies

2

What is Section 8/Housing Choice Voucher Program?

- The Section 8 Program is a federally funded rental subsidy program administered locally by Public Housing Authorities.
- Established in 1974, Section 8 is the largest rent subsidy program in the US serving over 9 million people.
- The program provides a rental subsidy on behalf of low and extremely low-income households by making housing assistance payments directly to landlords in the open rental market.
- Program participants generally pay approximately 30% of their gross income towards rent in a market rate unit and the Housing Authority pays the remaining portion.
- Funding for this program is appropriated annually by Congress. Funding levels typically do not allow for expansion of the program but rather maintain the current level of funding to ensure the program remains. Some additional funding has been made available for Special Purpose Vouchers which are awarded through a competitive process.
- Program participants renew their program eligibility annually and the Housing Authority inspects the units they reside in to ensure minimum housing quality standards are met.

3

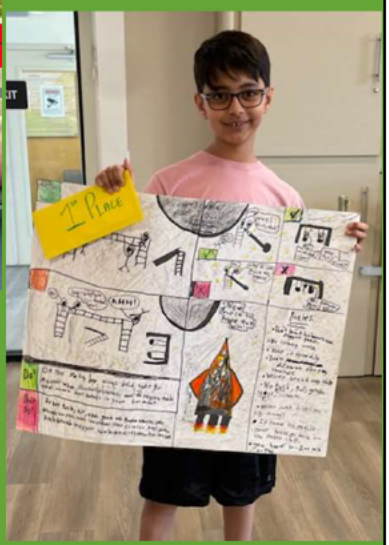
LHA HUD Programing

Housing Choice Voucher Program (Section 8) – *707 rental subsidy vouchers*

- **457** Tenant Based Vouchers – traditional voucher program
- **179** Project Based Vouchers – unit-based subsidy program **(15 committed to the Family Homeless Challenge Grant awarded by the State)**
- **40** Mainstream Vouchers – non-elderly persons with disabilities vouchers
- **24** Veteran Affairs Supportive Housing – homeless Veteran vouchers **(8 committed to Vineyard 2.0)**
- **1** Homeownership Vouchers – mortgage assistance subsidy
- **5** Stability Vouchers – homeless or at-risk, fleeing domestic violence, veterans and families of veterans
- **1** Foster Youth Initiative Voucher *pending award from HUD*

4

Key Accomplishments



- Achieved "High Performer" rating by US Department of Housing and Urban Development for LHA administered programs
- Increased the utilization of our federal funds by 5% to achieve over 100% utilization for CY2023 - pulled 100 people from our waiting list
- Applied for and were awarded through a competitive process HUD's prestigious designation of a Move to Work (MTW) Agency
  - This allows LHA to creatively utilize federal dollars to create policies and programs that are specifically suited to the needs of Livermore. Exempts LHA from certain regulatory requirements to allow for more efficient use of resources.
- Actively beginning the development process to bring at least 125 new affordable housing units to Livermore.
  - This was made possible by successfully transitioning out of the Public Housing program in August 2023 which significantly increased cashflow to the agency.

Categories: Helena

Exercise Caution: This message is from outside the City email system. Do not open links or attachments from untrusted sources.

This is regarding Agenda Item 5.15, Item 1. As a taxpayer in the city of Livermore, I oppose any funding for any drag queens, or drag queen story hours. I have nothing against drag queens, but no funding should be permitted towards adult entertainment. This drag queen activity may be considered to be "art" by some, but it is wholly inappropriate to be presented to anyone under the age of 18.

Sincerely,

Ron Ybarra

Dear City Council Members,
I strongly encourage a vote against these fund allocations for item 5.15 Livermore Pride. There are many other programs that are in need of additional funds to support our Livermore community values. I have seen other cities that have supported similar funding allocations and I do not feel that these programs are appropriate which has led to unnecessary exposure to our impressionable youths. I don't feel that this is healthy, nor a good source of tax payer dollars. Let these programs be funded privately, should they need support.

LIVERMORE

INTEROFFICE MEMORANDUM

Date: July 22, 2024

To: Brent Smith, Community Development Director

From: Jason R. Alcala, City Attorney

Subject: *Dougherty Valley Settlement Agreement*, Expenditure of Funds
Effect of Citizens for Balanced Growth's Refusal to Meet-and-Confer

This memorandum provides information about the requirements in the *Dougherty Valley Settlement Agreement* for the expenditure of funds and the effect of Citizens for Balanced Growth's refusal to meet-and-confer.

Dougherty Valley Settlement Agreement.

The *Dougherty Valley Settlement Agreement* (DVSA) dated November 2, 1999, is an agreement settling water litigation involving the Dougherty Valley Specific Plan that was approved by Contra Costa County. A copy of the agreement is attached.

The settlement agreement resulted in a fund to be used by the Livermore City Council to purchase permanent easements or fee title to land for conservation or agricultural preservation purposes.[1] The DVSA expressly states that the settlement funds are to be used "exclusively for the purchase from willing sellers."[2] . The current DVSA fund balance is approximately $5,028,960.

Expenditure of Funds.

The DVSA provides that prior to expending its funds the Livermore City Council will receive recommendations from City staff concerning proposed acquisitions.[3] The DVSA also provides that "city staff will meet-and-confer with [Citizens for Balanced Growth] prior to formulating its recommendations for acquisitions."[4] If the recommendations by City staff differ from those preferred by Citizens for Balanced Growth, then "the staff report to the City Council shall specify and explain the differences."[5] The City Council must then place

[1] DVSA, section 6.a.
[2] Ibid.
[3] DVSA, section 6.d.
[4] Ibid.
[5] Ibid.

the acquisition on a City Council meeting agenda for public discussion before deciding whether to expend DVSA funds for an acquisition.

Attempts to Meet and Confer.

City staff has attempted to meet-and-confer with Citizens for Balanced Growth since December 2023 to discuss staff recommendations for open space acquisitions using DVSA funds. Citizens for Balanced Growth has rebuffed those requests, and unilaterally imposed new conditions on the meet-and-confer. It has also demanded documentation not previously required prior to meeting. City staff produced the requested documents within the City's control and attempted to work through the new conditions, but Citizens for Balanced Growth has not yet met with staff. A brief timeline of those efforts is set forth in the staff report for agenda item 5.22 identified in the agenda for the City Council meeting on July 22, 2024.

As a result of Citizens for Balanced Growth refusal to meet, City staff sent the attached letter dated April 9, 2024, stating that in the absence of the meet-and-confer, the staff report would state that Citizens for Balanced Growth did not support staff's recommendations.

Citizens for Balanced Growth's Decision to Not Meet-and-Confer.

On July 8, 2024, a representative from Citizens for Balanced Growth objected to the City's consideration of the staff recommendation to use DVSA funds to acquire the Hartford Property because staff had not met-and-conferred with them. In addition, on July 19, 2024, legal counsel for Citizens for Balanced Growth sent the attached letter to the Mayor and City Council wherein they confirm staff's outreach and their refusal to meet. The letter attempts to justify Citizen for Balanced Growth's failure to accept staff' offer to meet-and-confer, and asserts the City breached the agreement. Their position is that the Council's action is illegal and exposes the City to litigation since City staff had not met-and-conferred with them. The position of Citizens for Balanced Growth is wrong.

The meet-and-confer requirement in the DVSA is a condition precedent to the City Council's consideration of staff's recommendation. However, its purpose is to provide Citizens for Balance Growth with an opportunity to evaluate staff's recommendation and to express its own preference. Citizens for Balanced Growth was afforded the opportunity to meet-and-confer with staff over a period of several months. But it was Citizens for Balanced Growth who failed to meet-and-confer with the City. In addition, Citizens for Balanced Growth has attempted to impose new rules for the meet-and-confer that were not previously utilized. That behavior suggests to staff that Citizens for Balanced Growth is not interested in a meet-and-confer to review and comment on staff's recommendation, and instead is attempting to delay open space acquisitions.

It is important to note that the DVSA does not provide a remedy if a party declines to meet-and-confer. However, contract law provides that Citizens for Balanced Growth cannot prevent the City Council from acting when Citizens for Balanced Growth is the one who failed to perform.[6] Here, it is Citizens for Balanced Growth's own departure from the terms-and-conditions in the DVSA, and their unilateral attempt to change the usual rules for a meet-and-confer, that prevented the meeting from taking place. The party complaining of breach cannot pursue a remedy when it was the one who failed to act.[7]

Therefore, the application of contract law to these facts will most likely find that Citizens for Balanced Growth has either breached the agreement or waived the condition. Regardless of the conclusion at law, they have not been prejudiced since they declined the opportunity afforded them to express their preference, and to the extent they want to comment on staff's recommendation, they have also appeared before the City Council and declined to express their preference in response to staff's recommendation. Citizens for Balanced Growth's refusal to meet-and-confer does not affect the City Council's ability to consider and approve the use of DVSA funds to acquire otherwise eligible property. The City Council can proceed. If litigation is filed, the City Attorney's Office is prepared to meet with your staff within the attorney-client privilege to evaluate the City's response.

Future Meet-and-Confers

Please note the request that legal counsel representing Citizens for Balanced Growth that all future communications to meet-and-confer be through them from this point forward. I will share that the legal counsel has expressed a willingness to meet, so I encourage your staff to follow up and schedule that meeting to discuss future acquisitions that contemplate utilizing DVSA funding.

AGREEMENT TO SETTLE WATER LITIGATION

BY AND BETWEEN

ZONE 7 WATER AGENCY
DUBLIN SAN RAMON SERVICES DISTRICT
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT
CITY OF LIVERMORE, CITIZENS FOR BALANCED GROWTH
WINDEMERE RANCH PARTNERS
SHAPELL INDUSTRIES, INC.

NOVEMBER 2, 1999

Citizens for Balanced Growth v. Alameda County Flood Control and Water Conservation District, et al. (Sacramento County Superior Court Case 98CS02670); and *City of Livermore v. Alameda County Flood Control and Water Conservation District, et al.* (Sacramento County Superior Court Case 98CS02671)

AGREEMENT TO SETTLE WATER LITIGATION

THIS AGREEMENT TO SETTLE WATER LITIGATION (the "Agreement") is entered into as of November 2, 1999, by and between Zone 7 of the Alameda County Flood Control and Water Conservation District, commonly known as the Zone 7 Water Agency ("Zone 7"); the Alameda County Flood Control and Water Conservation District ("ACFCWCD"); Dublin San Ramon Services District, a community services district ("DSRSD"); the City of Livermore, a municipal corporation ("City"); Citizens for Balanced Growth, a California non-profit corporation ("Citizens"); Windemere Ranch Partners, a California limited partnership ("Windemere"); and Shapell Industries, Inc., a Delaware corporation ("Shapell"). Zone 7, ACFCWCD, DSRSD, City, Citizens, Windemere and Shapell are referred to collectively below as the "Settling Parties."

RECITALS

A. On December 22, 1992, the Board of Supervisors of Contra Costa County (the "County") approved a specific plan (the "Dougherty Valley Specific Plan") providing for the development of approximately 6,000 acres of real property owned in part by Windemere and in part by Shapell and located in the unincorporated area of the County.

B. As required by a September 1995 agreement settling certain litigation filed by the East Bay Municipal Utility District ("EBMUD") against the County, Windemere and Shapell in connection with the County's approval of the Dougherty Valley Specific Plan, Windemere and Shapell undertook efforts to secure permanent water service to an approximately 4400-acre portion of the Dougherty Valley (as defined more specifically in Section 1(a) below and shown on attached Exhibit A attached hereto, the "Dougherty Valley Service Area") from the Berrenda Mesa Water District ("BMWD") and DSRSD and/or Zone 7.

C. On August 23, 1994, Zone 7 and DSRSD entered into that certain "Contract between Zone 7 of Alameda County Flood Control and Water Conservation District and Dublin San Ramon Services District for a Municipal & Industrial Water Supply" (the "Water Supply

Agreement"). In February and March, 1998, following certification by Zone 7 of a subsequent environmental impact report (the "SEIR"), Zone 7 and DSRSD approved an amendment to the Water Supply Agreement. This amendment, commonly known as the "First Amendment," would expand DSRSD's service area under the Water Supply Agreement to include the Dougherty Valley Service Area and establish certain other terms and conditions pursuant to which Zone 7 will furnish and provide water to DSRSD for delivery to the Dougherty Valley Service Area.

D. In connection with its approval of the First Amendment, Zone 7 has also approved: (1) an agreement, dated January 28, 1998, to purchase from the Berrenda Mesa Water District ("BMWD"), for use in the Dougherty Valley Service Area, entitlements to 7,000 acre-feet of firm water entitlements from SWP (the "Water Purchase Agreement"), which Water Purchase Agreement provides for a transfer of such water entitlements from the Kern County Water Agency ("KCWA") to Zone 7; (2) an agreement, dated January 28, 1998, to purchase from the Semitropic Water Storage District ("SWSD") storage capacity in the groundwater banking program owned and operated by SWSD (as amended, the "Water Storage Agreement"); and (3) an agreement by and between Zone 7, DSRSD and BMWD establishing an escrow for the deposit and delivery of certain funds and instruments relative to the transfer of water entitlements to Zone 7 pursuant to the Water Purchase Agreement, as amended by that certain First Amendment to Water Service Escrow Agreement, dated as of April 30, 1998 (the "Water Service Escrow Agreement").

E. On March 19, 1998, Citizens initiated in the Alameda County Superior Court a proceeding action challenging the legality of the First Amendment and, on April 1, 1998, the City initiated in the Alameda County Superior Court a separate proceeding also challenging, among other things, the legality of the First Amendment. These proceedings subsequently were consolidated and transferred to the Sacramento County Superior Court where they currently are pending as: *Citizens for Balanced Growth v. Alameda County Flood Control and Water Conservation District et al.* (Sacramento County Superior Court Case 98CS02670) and *City of Livermore v. Alameda County Flood Control and Water Conservation District, et al.* (Sacramento County Superior Court Case 98CS02671), respectively (collectively, the "Water Litigation").

F. During the course of the consolidated proceedings, Judge Robie denied motions for summary judgment filed by respondents and petitioners on the question of whether Zone 7 was authorized under its enabling legislation to enter into the First Amendment. Judge Robie further sustained a demurrer to the City's claims that Zone 7's actions were not conducted in compliance with the California Environmental Quality Act (CEQA), which demurrer was sustained on the basis that the City had failed to join certain indispensable parties prior to the expiration of applicable the statute of limitations. Judge Robie thereafter suggested that the parties to the Water Litigation mediate their disputes.

G. Having accepted Judge Robie's suggestion and conducted successfully a mediation through the offices of J.A.M.S. Endispute, the Settling Parties now desire to settle the Water Litigation on the terms and conditions set forth below.

AGREEMENT

NOW THEREFORE, for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, IT IS HEREBY AGREED as follows:

1. SERVICE TO DOUGHERTY VALLEY SERVICE AREA.

a. **Availability of Water.** Notwithstanding anything contained in section B.4 of Appendix I of the First Amendment, in no year shall Zone 7 provide to DSRSD for service to the "Dougherty Valley Service Area" (as that area currently is shown on Figure 1 attached to the First Amendment and Exhibit A attached hereto) an amount of water that is greater than the amount of water received by Zone 7 in such year for service to the Dougherty Valley Service Area. For the purposes of this Section 1(a), the amount of water so received by Zone 7 in such year for service to the Dougherty Valley Service Area shall be deemed to be equal to the sum of:

(i) the amount of entitlement, interruptible, and turnback pool water that Zone 7 receives in such year from DWR and which is derived from 6,080 acre-feet of the 7,000 acre-foot annual entitlement that Zone 7 will acquire as a result of the transfer of water entitlements from KCWA under the Water Purchase Agreement (the "Dougherty Valley Water Supply");

(ii) the amount of water that is returned by DWR or SWSD to Zone 7 in such year that is derived from that portion of the Dougherty Valley Water Supply previously placed in the 43,000 acre feet of storage acquired in accordance with Article 5 of the Water Storage Agreement; and

(iii) the amount of any other water hereafter secured by or through DSRSD and received by Zone 7 in such year, all in a manner consistent with the terms and provisions of this Agreement applicable to the securing, receipt and delivery of such water for and to the Dougherty Valley Service Area.

b. **Availability of Treatment and Conveyance Facilities.**

(i) *Adequacy of Facilities in General.* DSRSD and Zone 7 shall ensure that any Zone 7 facilities used for the treatment or conveyance of water to the Dougherty Valley Service Area are designed and constructed so that, at times of peak demand, DSRSD's water service to the Dougherty Valley Service Area will not actually and materially impair or actually and materially diminish service to the now-existing customers of Zone 7's contractors (i.e., metered connections served as of the date of this Agreement by DSRSD, California Water Service Company, the City of Pleasanton or the City of Livermore as retailers for Zone 7). DSRSD further agrees to pay to Zone 7, upon close of the water transfer, funds in the following amounts: (1) an amount sufficient to compensate Zone 7 for the Dougherty Valley Service Area's pro rata share of certain general obligation bond debt as and in the amount set forth in Section 3(e) of the Water Service Escrow Agreement; and (2) as and in the amount set forth in Section 3(f) of the Water Service Escrow Agreement, the present value of any projected impact on Zone 7's capital fund due to the provision of service to the Dougherty Valley Service Area (i.e., due to, among other things, an accelerated schedule for the construction of capital facilities) and for which Zone 7 will not receive compensation through the payment of water connection fees by the Dougherty Valley Service Area.

(ii) *Design and Construction.* DSRSD shall evaluate the adequacy of Zone 7 facilities to accommodate peak demands for each new phase of development within the Dougherty Valley Service Area, and if adequate facilities are not so available, design and construct such facilities (and Zone 7 and DSRSD shall cooperate with each other in such design and construction) in accordance with section D.4 of Appendix I of the First Amendment as and

when needed to serve such phase in a manner that avoids causing any actual and material impairment or actual and material diminishment of service to the now-existing customers of Zone 7's contractors. In the event DSRSD so designs and constructs any such facilities, such facilities shall be Zone 7 facilities and DSRSD shall receive compensation for its design and construction costs through a credit against future connection payments otherwise due as set forth in section D.4 of Appendix I of the First Amendment.

(iii) *Suspension of Water Connections.* If Zone 7 and DSRSD fail to provide adequate Zone 7 facilities for any new phase of development within the Dougherty Valley Service Area as required under subsections (b)(i) and (b)(ii) above, and such failure causes an actual and material impairment or actual and material diminishment of service to the now-existing customers of Zone 7's contractors during times of peak demand, then DSRSD shall suspend the issuance of additional water connections for such phase until such time as adequate facilities have been so constructed as required by subsections (b)(i) and (b)(ii) above.

(iv) *Remedies.* A failure by Zone 7 or DSRSD to provide adequate Zone 7 facilities for any new phase of development within the Dougherty Valley Service Area shall be deemed to have caused an actual and material impairment or actual and material diminishment as described above only if such impairment or diminishment would not have occurred but for DSRSD's or Zone 7's failure to provide adequate Zone 7 facilities for such phase. In the event of any disagreement between the parties as to whether such an impairment or diminishment has been so caused by such a failure to design and construct adequate Zone 7 facilities for such phase of development, DSRSD shall not suspend the issuance of additional water connections, if at all, until completion of the dispute resolution process unless otherwise ordered by the Superior Court in accordance with the provisions of Section 8 (including Section 8(d)(ii)) below. The provisions of Subsections 1(b)(iii) and (iv) are the exclusive remedies available to Citizens and Livermore under this Agreement for a violation by DSRSD or Zone 7 of the provisions of Subsections 1(b)(i) or (ii) above.

(v) *Interruptibility of Additional Water Supplies.* Where, pursuant to section B.5 of Appendix I of the First Amendment, DSRSD has secured additional water supplies to supplement the Dougherty Valley Service Area allotment, the use of Zone 7's capacity in the South Bay Aqueduct and of Zone 7 facilities to treat and deliver said additional water shall be

interruptible and contingent on the availability of facilities adequate to treat and convey such water in light of Zone 7's other needs and commitments; except to the extent (1) DSRSD has contributed to the financing of such capacity or facilities; and (2) such capacity or facilities can handle such additional water supplies without causing an actual and material impairment or actual and material diminishment of service to the now-existing customers of Zone 7's contractors during times of peak demand.

2. ZONE 7 SERVICE EXTENSIONS.

a. **Submission to Zone 7 Electorate.** If Zone 7 receives a request to participate in serving water (regardless of whether Zone 7 owns or leases the entitlements to such water or instead wheels such water through Zone 7 facilities) to any development project that will be located outside the boundaries of Zone 7 during the period of such service (other than development within the Dougherty Valley Service Area or for military uses within the U.S. military facility known as Parks Reserve Forces Training Area that, following an objective evaluation of the military's service request, are found by Zone 7 not to have a significant unmitigated impact on Zone 7 water facilities or supplies), the Zone 7 Board, following the completion of an objective evaluation of the service request, shall hold an election of Zone 7 electors before agreeing to provide any such service.

b. **Effect of Elections.** The Zone 7 Board and ACFCWCD Board agree to be bound by the results of the election if the voters disapprove providing the requested service, and this Agreement shall be specifically enforceable as set forth in Section 8(d)(ii) below. If Zone 7 holds the election under the circumstances described above, and the voters approve the requested service, neither Livermore nor Citizens will challenge Zone 7's approval of the requested service on the basis of a violation of this section 2 or of the District Act (West's Cal. Water Code, App. 55). Livermore and Citizens each specifically and without limitation reserves its rights to challenge approval by Zone 7 of future extra-territorial service extensions if Zone 7 does not hold an election as specified above, or if Zone 7 approves a request notwithstanding a negative vote by the electorate.

c. **Annexations.** The Zone 7 Board and ACFCWCD Board agree that, if the proposed legislation described in Section 7 below is enacted by the State of California, then any

annexation of territory to Zone 7 for the purpose of providing water service, which annexation occurs after the date such proposed legislation becomes law, shall be governed by the provisions of subsections (a) and (b) above. Zone 7 and ACFCWCD each acknowledges that it lacks authority under the District Act to annex to its boundaries any area located outside the current boundaries of ACFCWCD and agrees to act in accordance with such legal limitations as set forth in the District Act.

3. DSRSD SERVICE EXTENSIONS IN GENERAL.

a. Service Area.

(i) *In General.* DSRSD will not, except as otherwise specified in this Section 3, provide water service to any area other than (1) DSRSD's current water service area as established by the Alameda County or Contra Costa County Local Agency Formation Commission ("LAFCO"); (2) the Dougherty Valley Service Area; (3) areas located within the City of Dublin's eastern sphere of influence as shown on Exhibit B attached hereto (the "Eastern Sphere"); or (4) areas located adjacent to DSRSD's then-current LAFCO-approved service area, but outside the then-current boundaries of Zone 7, and with respect to which the proposed water service arrangement has first been submitted to and approved by the electorate of Zone 7 in accordance with Section 2 above (following, in the case of a proposed annexation by Zone 7 of any such area, enactment of the legislation described in Section 2(c) above).

(ii) *Implementation.* Except as otherwise specified below, DSRSD agrees that it will neither support nor initiate the annexation to DSRSD for water service of any territory not described in (1), (2), (3) or (4) above. DSRSD's statement that it cannot support any such annexation, together with a statement that DSRSD is unable at such time to deliver a "will-serve" letter with respect to the territory so proposed for annexation, shall be delivered to LAFCO on or prior to the date that LAFCO conducts a public hearing on such annexation proposal in accordance with the provisions of section 56828 of the Government Code. If DSRSD receives notice under section 56837(b) that LAFCO intends to approve any such annexation without notice or public hearing, then DSRSD shall request in writing that a public hearing be conducted and submit its statement of non-support of the proposed annexation on or prior to the date of such public hearing.

(iii) *Notices to Lead Agency.* Upon DSRSD's receipt from the City of Dublin, Alameda County, Alameda County LAFCO or any other public agency (each a "Lead Agency") of any Notice of Preparation ("NOP") of an environmental impact report (CEQA Guidelines, § 15082) or Notice of Intent ("NOI") to Adopt a Negative Declaration or Mitigated Negative Declaration (CEQA Guidelines, § 15072) for any project proposed be developed within territory not described in (1), (2), (3) or (4) above, which NOP or NOI identifies DSRSD as the likely provider of water service to the Proposed Project, DSRSD will provide written notice to such Lead Agency of its obligations under this Section 3 (including its obligation under Section 3(a)(ii) to deliver to LAFCO statements describing DSRSD's inability to support the annexation of the proposed project or deliver a "will-serve" letter with respect thereto). Such notice shall be delivered prior to the close of public comment on the NOP or NOI and, in the case of the preparation of an EIR, on the draft EIR later circulated by such Lead Agency.

(iv) *Orders of Annexation.* Notwithstanding the provisions of this Section 3 or Section 4 below, DSRSD will be bound to annex any area and will not be prevented by the terms of this Agreement from serving such area if, in the absence of a court-ordered stay of or judgment against the proposed annexation, such area is ordered to be annexed to the boundaries of DSRSD in accordance with the provisions of the Local Government Reorganization Act of 1985, as amended, Cal. Gov. Code §56000 et seq., ("Cortese-Knox"). Moreover, nothing in this Section 3(a) shall be deemed to limit any ability of DSRSD to develop or provide to LAFCO or any other agency information relative to DSRSD's ability to provide service to any area not described in 3(a)(1), (2), (3) or (4) above (including, without limitation, any notice, analysis or other information required to be provided by DSRSD to LAFCO or such other agency under the provisions of Section 4 below).

(v) *Eastern Dublin Future Study Area.* DSRSD shall be released from its obligations under this Section 3(a) with respect to any territory located within the "Future Study Area" described in Figure 2B of the Eastern Dublin General Plan Amendment (dated January 7, 1994), as shown on attached Exhibit C (the "Future Study Area"), if the City of Livermore formally initiates or supports any annexation to its boundaries of, or any proposal to amend its sphere of influence to include, any such territory; provided, however, that DSRSD shall not be so released if, prior to any such formal action by the City of Livermore, the City of Dublin has itself taken formal action to initiate or support an annexation to its own boundaries of, or any proposal to amend its sphere of influence to include, any such territory.

b. Institutional Provisions.

(i) *Contracts with DWR.* Except to the extent permitted under Sections 5(a), (b) or (c) of the Water Supply Agreement (as amended by the First Amendment), DSRSD will not enter into any contract with DWR for water entitlements from the SWP.

(ii) *Exercise of Rights under Section 5(c) of the Water Supply Agreement.* In exercising its rights under Section 5(c) of the Water Supply Agreement, any contract entered into by DSRSD with DWR shall be limited to the quantity of treated water that Zone 7 cannot deliver and the time period for which Zone 7 cannot satisfy DSRSD's requirements. Moreover, in no event shall DSRSD exercise its rights under Section 5(c) of the Water Supply Agreement to serve new customers outside of both DSRSD's current LAFCO-approved service area and the Dougherty Valley Service Area unless such customers first have been included within DSRSD's service area under the Water Supply Agreement (following a determination by Zone 7 and DSRSD that adequate supplies of water will be available to serve such customers) but Zone 7 later determines, due to circumstances that were not reasonably foreseeable at the time such customers were included within DSRSD's service area under the Water Supply Agreement, that it is unable to supply sufficient water for such customers.

(iii) *State Water Contractor Status.* Except and solely to the extent required to exercise its rights under Section 5(c) of the Water Supply Agreement in compliance with the foregoing provisions, DSRSD shall not apply to DWR to become a "State Water Contractor;" provided, however, DSRSD shall not be restricted from becoming a State Water Contractor if any of the City of Livermore, the City of Pleasanton or California Water Service Company (or any successor or assign of any of them) become a State Water Contractor. If DSRSD proposes to become a "State Water Contractor" and that proposal is objected to by Citizens or Livermore as not being in compliance with the terms of this Agreement (including the referenced provisions of the Water Supply Agreement), the dispute shall be addressed in accordance with section 8.b of this Agreement. The term "State Water Contractor" shall mean an entity which has executed, or is an assignee of, a contract of the type published in Department of Water Resources Bulletin No. 141 dated November 1965 with the State of California for a dependable supply of water made available by the Water Resources Development System as defined in section 12934(d) of the Water Code.

c. Term. The obligations of DSRSD and Zone 7 under this section 3 and sections 4 and 5 below shall remain in effect until the later of (i) August 23, 2024; or (ii) so long as the 1994 Water Supply Agreement remains in effect; or (iii) so long as Zone 7 continues deliveries to DSRSD following the expiration of the Water Supply Agreement absent a new or renewed contract as described in Section 33 of the Water Supply Agreement.

4. SERVICE EXTENSIONS TO EAST DUBLIN AND WEST DUBLIN

The following procedure shall govern DSRSD's evaluation of requests for water service to (1) areas located within the "Eastern Sphere" as defined in Section 3 above; (2) any territory located within the Future Study Area; or (3), unless such area will be served by DSRSD with a water supply provided by Zone 7 following a vote of the electorate of Zone 7 under Section 2 above, any area that is located within the "Western Extended Planning Area" described on Figure 1-2 of the Dublin General Plan (as revised July 7, 1992), which is the same area as that shown on Exhibit D attached hereto, and that has not been annexed to Zone 7 and DSRSD as of the date of this Agreement (a "Non-Voting West Dublin Area").

a. In General. Upon DSRSD's receipt from a "Lead Agency" (as defined in Section 3(a)(iii) above) of any NOP or NOI for any project within the Eastern Sphere, the Future Study Area or a Non-Voting West Dublin Area (a "Proposed Project"), which NOP or NOI identifies DSRSD as the likely provider of water service to the Proposed Project, then DSRSD shall, in consultation with Zone 7 and at the times specified below, prepare and submit to the Lead Agency a "Preliminary Water Service Analysis" and "Preliminary Impact Analysis" as described below.

b. Preparation of Water Service Analysis. The Preliminary Water Service Analysis shall include an evaluation by DSRSD of (1) whether the projected water demand associated with the Proposed Project was included as part of DSRSD's most recently adopted urban water management plan; (2) whether the total firm sustainable water supplies that reasonably may be expected to be available to DSRSD ("Projected Supplies") will meet the projected water demand associated with the Proposed Project, together with all other existing uses and uses under build-out of the applicable general plans for all areas lying within DSRSD's water service area, as and when such demand is expected to arise (collectively, "Projected Demand"); and (3) if the

Projected Supplies are insufficient to meet the Projected Demand, what feasible mitigation measures (e.g., offsets, additional supplies, storage) should be imposed by the Lead Agency to provide adequate supplies of water to serve the Projected Demand and thereby ensure that there will be no adverse effects on reliability of service or water quality as described in subsection 4(c) below. If DSRSD cannot identify any such feasible mitigation measures, then it will include with the Preliminary Water Service Analysis a statement that it does not have adequate supplies of water to serve the Proposed Project. For the purposes of section 4(b)(2) above, the term "total firm sustainable water supplies available to DSRSD" shall mean water supplies for which, prior to the time the actual demand for such water supplies is expected to arise, DSRSD (or Zone 7 acting as a wholesaler to DSRSD) will hold a water right, contract, or other entitlement that can be relied upon to provide such supplies for the then foreseeable future and at least until August 23, 2024.

c. **Performance Standards.**

(i) *In General.* In making its preliminary determination under (b)(2) above, DSRSD shall consider its Projected Supplies to be adequate to meet the Projected Demand only if DSRSD would be able to provide water service to the Proposed Project during a "Credible Worst-Case Drought Scenario" (defined below), using the Projected Supplies, without significantly and adversely affecting the reliability of service or quality of water provided to DSRSD's then-existing customers.

(ii) *Definition of Adverse Effects.* The provision of water by DSRSD to a Proposed Project shall be deemed to "adversely affect the quality of water" provided to DSRSD's existing customers only if it would cause a significant ongoing increase in the post-treatment concentration of any contaminant for which a maximum contaminant level is specified under the Safe Drinking Water Act to a level that exceeds the post-treatment concentration of such contaminant in water then being delivered by DSRSD to its customers. The provision of water by DSRSD to a Proposed Project shall be deemed to so "adversely affect the reliability of water" only if it would cause a significant decrease in DSRSD's ability to fully meet customer demand at all times without significantly increasing the likelihood, severity or duration of use by DSRSD of those voluntary or mandatory rationing, conservation, or other demand reduction or water

management measures described in DSRSD's current water use reduction plan (as set forth in Section VI of DSRSD's current Urban Water Management Plan).

(iii) *Definition of Credible Worst-Case Drought Scenario.* As used above, the term "Credible Worst-Case Drought Scenario" shall mean the most severe drought scenario for (i) the hydrologic period of 1922 to 1998, including, without limitation, either a 1976-1977 drought scenario or a 1987-1992 drought scenario; or (ii) any drought occurring subsequent to 1998 for which records are available at the time of preparation of the Water Service Analysis (the "Credible Worst-Case Drought Scenario").

d. **Preparation of Preliminary Impact Analysis.** Concurrently with its preparation of any Preliminary Water Service Analysis, DSRSD shall prepare a preliminary evaluation ("Preliminary Impact Analysis") of the potential significant adverse water-related environmental impacts that fairly may be argued could result from its provision of water service to the Proposed Project, including impacts arising from any mitigation measures identified by DSRSD in the Water Service Analysis. The Preliminary Impact Analysis, and any supporting data, shall be submitted as described below by DSRSD to the Lead Agency concurrently with its delivery of the Preliminary Water Service Analysis, together with a request that the Lead Agency impose feasible measures to mitigate any significant impacts identified by DSRSD in the Preliminary Water Service Analysis or the Preliminary Impact Analysis.

e. **Submittal of Preliminary Analyses.**

(i) *In General.* The Preliminary Water Service Analysis and Preliminary Impact Analysis shall be submitted by DSRSD to the Lead Agency (with a copy to each of Livermore and Citizens) as early as reasonably feasible. Not in limitation of the foregoing, (1) if the Lead Agency is preparing an environmental impact report, DSRSD shall use its best efforts to deliver the Preliminary Water Service Analysis and Preliminary Impact Analysis prior to the close of the public comment period on the NOP; and (2) if the Lead Agency is preparing a negative declaration or a mitigated negative declaration, DSRSD shall (x) use its best efforts to deliver the Preliminary Water Service Analysis and Preliminary Impact Analysis no later than two weeks prior to the last public hearing on the Proposed Project and (y) if DSRSD is unable to complete and delivery such analyses by such dates, shall request the Lead Agency to schedule any such

public hearing so as to allow two weeks of public review of DSRSD's analyses prior to such hearing.

(ii) *Accompanying Statements.* The Preliminary Water Service Analysis and Preliminary Impact Analysis shall be delivered to the Lead Agency together with a statement that DSRSD's determinations in such analyses are preliminary only; delivered to assist the Lead Agency in scoping its environmental review of the Proposed Project; and subject to further review in accordance with the provisions of this Agreement.

(iii) *Timing of Public Hearing.* If the Lead Agency refuses any request by DSRSD under subsection (i) above to schedule any public hearing on a negative declaration or mitigated negative declaration so as to allow DSRSD to complete its analysis at least two weeks prior to such public hearing, then DSRSD shall (1) deliver written notice to the Lead Agency that, due to the insufficient time allowed for DSRSD to conduct its evaluation in light of limitations on its supply, DSRSD cannot determine that it has adequate supplies of water to serve the Proposed Project and is thus unable at that time to deliver a "will-serve" letter with respect to the Proposed Project; and (2) complete the Preliminary Water Analysis and Preliminary Impact Analysis and submit such analyses to the Lead Agency as soon as reasonably feasible.

f. Responses to Negative Declarations.

(i) *In General.* If the Lead Agency is considering approval of the Proposed Project based upon the adoption of a negative declaration or mitigated negative declaration, then the Preliminary Water Service Analysis shall be considered to be a "Final Water Service Analysis" and shall be delivered to the Lead Agency without the accompanying statements described in subsection (e)(ii) above. If such Final Water Service Analysis includes a negative determination under (b)(2) above, then DSRSD shall (1) together with its delivery to the Lead Agency of such Final Water Service Analysis, deliver to the Lead Agency a statement that, unless mitigation measures sufficient to ensure that there will be no adverse effects upon reliability of service or water quality (as identified by DSRSD under (b)(3) above) are imposed upon the Proposed Project, DSRSD does not support the Proposed Project and is unable at such time to deliver a "will-serve" letter with respect to the Proposed Project; and (2), if and when the Proposed Project is proposed to be annexed to the boundaries of DSRSD and unless mitigation measures sufficient to ensure that there will be no adverse effects upon reliability of service or water quality (as

identified by DSRSD under (b)(3) above) have then been imposed upon the Proposed Project, deliver to LAFCO (at the times specified for delivery of notices of non-support under subsection 3(a) above) a statement that DSRSD does not support such annexation and is unable at such time to deliver a "will-serve" letter with respect to the territory so proposed for annexation.

(ii) *Initiation of Dispute Resolution Process.* If Citizens or Livermore initiates the dispute resolution process established under Section 8(c) below with respect to any Preliminary Water Service Analysis or Preliminary Impact Analysis submitted by DSRSD in response to an NOI, then DSRSD promptly shall notify the Lead Agency that a material issue has been raised regarding the adequacy of such analysis and request that the Lead Agency's adoption of the proposed negative declaration or mitigated negative declaration be continued until such time as the Mediator has issued its decision with respect thereto.

(iii) *Compliance with Orders of LAFCO.* Notwithstanding the previous provisions of this subsection (f), DSRSD will be bound to annex a Proposed Project and will not be prevented by the terms of this Agreement from serving such Proposed Project if, in the absence of a court-ordered stay of or judgment against the proposed annexation, the area is ordered to be annexed to the boundaries of DSRSD in accordance with the provisions of Cortese-Knox.

g. **Review of Preliminary Water Service Analysis.**

(i) *In General.* If the Lead Agency is considering approval of the Proposed Project based upon an environmental impact report ("EIR") then, within thirty (30) days following receipt of the Preliminary Water Service Analysis, Citizens or Livermore may deliver in writing to DSRSD (with a copy to the Lead Agency) a statement of any objections it may have as to whether the Preliminary Water Service Analysis complies with the provisions of this Section 4, which statement of objections shall identify with particularity such party's objections and the factual basis for such objections. Unless the objection can informally be resolved by DSRSD and the objecting party as set forth in Subsection 8(c)(i) below, then DSRSD and the party that has submitted such statement of objections (the "Objecting Party") shall thereafter attempt to resolve their dispute through mediation as set forth in Subsection 8(c)(ii) below.

(ii) *Revisions to Preliminary Water Service Analysis.* If DSRSD and the Objecting Party are able to resolve their dispute informally or through mediation under Section 8(c) below,

then DSRSD shall revise the Preliminary Water Service Analysis as agreed and, prior to the close of the public comment period on the draft EIR, submit to the Lead Agency (with copies to Citizens and Livermore) such revised analysis (the "Final Water Service Analysis") together with any other comments it may have on the draft EIR. Citizens and Livermore each agrees that if (x) such party fails to object to a Preliminary Water Service Analysis within the period specified above for such objection; or (y) such party objects to a Preliminary Water Service Analysis and DSRSD revises such analysis to reflect any resolution reached informally or through mediation under Section 8(c) below, then such party may not seek judicial review of the question of whether the Final Water Service Analysis complies with the provisions of this Section 4.

h. Objection to Unmitigated Projects.

(i) *In General.* If either a Final Water Service Analysis or a Preliminary Water Service Analysis that is not revised in accordance with subsection (g)(ii) above includes a negative determination under (b)(2) above, then DSRSD shall (1) on or prior to the close of the public comment period on the draft EIR, deliver to the Lead Agency a statement that, unless mitigation measures sufficient to ensure that there will be no adverse effects upon reliability of service or water quality (as identified by DSRSD under (b)(3) above) are imposed upon the Proposed Project, DSRSD does not support the Proposed Project and is unable at such time to deliver a "will-serve" letter with respect to the Proposed Project and (2) if and when the Proposed Project is proposed to be annexed to the boundaries of DSRSD and unless mitigation measures sufficient to ensure that there will be no adverse effects upon reliability of service or water quality (as identified by DSRSD under (b)(3) above) have then been imposed upon the Proposed Project, deliver to LAFCO (at the times specified for delivery of notices of non-support under subsection 3(a)(ii) above) a statement DSRSD does not support such annexation and is unable at such time to deliver a "will-serve" letter with respect to the territory so proposed for annexation.

(ii) *Compliance with Orders of LAFCO.* Notwithstanding the previous provisions of this subsection (h), DSRSD will be bound to annex a Proposed Project and will not be prevented by the terms of this Agreement from serving such Proposed Project if, in the absence of a court-ordered stay of or judgment against the proposed annexation, the area is ordered to be annexed to its boundaries in accordance with the provisions of Cortese-Knox.

5. CONTROL OF WATER FACILITIES.

a. South Bay Aqueduct. Except to the extent required to exercise its rights under subdivision (c) of section 5 of the Water Supply Agreement, DSRSD will not enter into any agreement with DWR to secure permanent capacity in the South Bay Aqueduct ("SBA") independent of Zone 7, and to the extent additional permanent capacity in the SBA is needed to convey water for use within DSRSD's service area, shall rely upon Zone 7 to contract for and provide any such additional capacity. If DSRSD proposes to secure permanent capacity in the SBA and that proposal is objected to by Citizens or Livermore as not being in compliance with the terms of this Agreement (including the referenced provisions of the Water Supply Agreement), the dispute shall be addressed in accordance with section 8.b of this Agreement.

b. Main Groundwater Basin. DSRSD will continue to abide by the provisions of section 16 of the Water Supply Agreement, which acknowledges explicitly that Zone 7 manages the Main Basin and establishes certain terms and restrictions on the extraction by DSRSD of groundwater from the Main Basin. DSRSD further agrees that it will not deliver to the Dougherty Valley Service Area: (1) any water extracted from the Main Basin as part of DSRSD's 645 acre-foot annual "Groundwater Pumping Quota" (as defined in sections 1(d) and 16 of the Water Supply Agreement); or (2) any water extracted from the Main Basin and for which DSRSD pays Zone 7 a recharge fee pursuant to sections 17 of the Water Supply Agreement. Nothing in this section 5.b shall limit any right of DSRSD to deliver to the Dougherty Valley Service Area water derived from "Other Sources" (as defined in sections 1(h) and 5(a), (b), (c), (e) or (f) of the Water Supply Agreement).

c. Review and Consideration of Groundwater Extraction Proposals. Contingent upon the substantially identical amendment of all water supply agreements between Zone 7 and the other Zone 7 contractors, the contract between Zone 7 and DSRSD shall be amended to add the following provision:

Section C. Groundwater Extraction Provision

22a. In the event that the Contractor proposes to engage in groundwater pumping beyond its Groundwater Pumping Quota in any year, Contractor must first notify Zone 7 of its intent to conduct such additional pumping. Zone 7 shall, within thirty (30) days of receipt of

such notification, provide to Contractor a written evaluation of the potential impact of any such pumping on groundwater levels and quality (taking into account recharge fees to be paid to Zone 7) and Zone 7's ability to provide reliable water service.

6. FUNDING OF CONSERVATION EFFORTS.

a. In General. Windemere or its successors will pay to Livermore a $1,000/residential dwelling unit open space conservation fee, payable at building permit issuance, to be used by Livermore or its designee exclusively for the purchase from willing sellers of permanent easements or fee title for conservation or agricultural preservation purposes.

b. Method of Payment. This fee is to be assessed only against dwelling units actually constructed on property now owned by Windemere in the Dougherty Valley. Of the expected $5,170,000 to be paid to Livermore (which amount is subject to escalation as described below), $200,000 will be paid in advance within ten (10) days following the date that Windemere's obligations under this Agreement commence in accordance with Section 9(o) below. There shall be a full credit against the fee to be paid on the last 200 of the 5,170 units expected to be developed on the Windemere property (i.e., units 4,971 through 5,170).

c. Adjustment. The fee set forth above is to be adjusted annually based upon CPI, with the base year to be the year of construction of the first dwelling unit on Windemere property.

d. Expenditure of Funds.

(i) *In General.* Prior to approving expenditures of funds collected through this fee, the City Council of Livermore will receive recommendations from its staff concerning proposed acquisitions of permanent easements or fee title for conservation or agricultural preservation purposes. City staff will meet and confer with Citizens prior to formulating its recommendations for acquisitions. Should staff recommendations differ from those preferred by Citizens, the staff report to the City Council shall specify and explain the differences. Following receipt of the staff report, the City Council will place the proposed acquisitions(s) on its agenda for public discussion; and only after such discussion render its decision.

(ii) *Priorities for Funding.* Funds collected under this Section 6 shall be used for acquisitions, including permanent trails, open space, or agricultural preservation easements, (1) in areas north of Interstate 580 and east of Collier Canyon Road in Alameda County and/or (2) in the Tassajara Valley area of Contra Costa County. For open space acquisitions, priority shall be given to purchases in areas containing unique vegetation and/or endangered species habitat. Funds shall not be used for acquisitions within areas that are candidates for funding by development fees.

7. ZONE 7 INITIATIVE AND REFERENDUM.

ACFCWCD, Zone 7, DSRSD, Citizens and Livermore agree to support the following proposed legislation that would amend the District Act to provide that Zone 7 voters would vote on initiatives or referenda concerning Zone 7 matters or annexations. Windemere and Shapell agree not to oppose this legislation. Each party's obligation to support or remain neutral on this legislation is removed if provisions are added to or deleted from the proposed legislation without the consent of all parties to this agreement.

a. Proposed Addition to the Alameda County Flood Control and Water Conservation District Act, California Water Code Appendix, section 55-36.

"9. For the purposes of any initiative pursuant to Election Code sections 9300 et seq., or referendum pursuant to Elections Code sections 9340 et seq., that solely and specifically addresses or relates to a zone formed pursuant to this section 36, the electorate for purposes of such initiative or referendum shall be the electorate of the zone created pursuant to this section 36."

b. Proposed Addition to the Alameda County Flood Control and Water Conservation District Act, California Water Code Appendix, section 55-37.

"6. Annexation of territory, for the purposes of providing water service, to a zone formed pursuant to section 36 of this chapter shall not become effective unless approved by a majority vote of the electors of that zone."

8. DISPOSAL OF LITIGATION.

a. Dismissal and Judgment. The terms of this Agreement will be implemented by judgment entered in the Water Litigation (including dismissal of BMWD, SWSD and DWR) pursuant to the application of the Settling Parties and stipulation in the form attached hereto as Exhibit E (the "Stipulation and (Proposed) Judgment"). ACFCWCD and Zone 7 each agrees that it will not use the judgment as precedential legal basis for any purpose, including (except to the extent any such service proposal complies with Sections 2 or 7 above) future proposals for extra-territorial service extensions.

b. Procedure. The Settling Parties agree to execute and file with the Sacramento Superior Court, by and through their respective counsel, one fully-signed original of this Agreement, the Stipulation and (Proposed) Judgment, and a joint application for the filing of this Agreement and entry of the proposed judgment. Such documents shall be so filed no earlier than one (1) calendar day, and no later then five (5) calendar days, following the satisfaction or waiver of any and all conditions to the close of the escrow established under the Water Service Escrow Agreement (the "Water Service Escrow") other than that certain condition requiring the delivery of notice by DSRSD to Zone 7 and BMWD, pursuant to Section 1 of the First Amendment to Water Service Escrow Agreement, that the Water Litigation has been resolved to the satisfaction of DSRSD (the "Escrow Closing Notice"). If for any reason the Court determines not to enter the judgment in accordance with the stipulation, this Settlement Agreement shall be deemed null and void, without recourse to any Settling Party to seek damages or other relief for the failure of any other Settling Party to comply with the provisions hereof in any respect.

c. Dispute Resolution.

(i) *Informal Resolution.* The parties will attempt in good faith to resolve through negotiation any dispute, claim or controversy regarding the interpretation or application of this Agreement. Any party may initiate negotiations by providing written notice in letter form to the party from whom relief is requested, with notice to the other parties, setting forth the subject of the dispute and the relief requested. The recipient of such notice shall (and each of the other parties may) respond within five days with a written statement of its position on, and

recommended solution to, the dispute. If the dispute is not resolved by this exchange of correspondence, then representatives of the disputing parties will meet at a mutually agreeable time and place within ten days of the date of the initial notice in order to exchange relevant information and perspectives, and to attempt to resolve the dispute. If the dispute is not resolved during such meeting, the dispute must be presented, prior to reference to the Superior Court except as specifically permitted below, to Daniel Weinstein at JAMS (or, in the event Judge Weinstein or JAMS has insufficient time promptly available, some other mutually agreeable third-party mediation service) (the "Mediator") for issuance of an advisory decision. The Mediator's decision shall not be binding on the parties, but may be presented in any subsequent proceedings in the Superior Court for such purposes, other than evidentiary purposes, as the court may deem appropriate.

(ii) *Conduct of Mediation.* The mediation proceeding shall be commenced within ten (10) days following the later to occur of referral to the Mediator or, in the event of a dispute arising under Section 1 or with respect to whether any Preliminary Water Service Analysis prepared by DSRSD complies with the provisions of Section 4(b) or 4(c) of this Agreement, selection of a technical advisor under subsection (iii) below; and shall last no more than two days unless further proceedings are agreed to by the disputants. The Mediator shall issue its decision within 15 days of the conclusion of the proceedings. If any party does not agree with the Mediator's decision, such party may treat the decision as advisory only or, in the alternative, refer the decision to the Superior Court. In proceedings before the Mediator or the Superior Court, the party that referred the dispute to such decisionmaker shall bear the burdens of proof and persuasion, based upon a preponderance of the evidence as presented to the Mediator, to show a violation of this Agreement.

(iii) *Use of Technical Advisors.* In any dispute over whether DSRSD or Zone 7 has complied with its obligations under Section 1 above or whether any Preliminary Water Service Analysis prepared by DSRSD complies with the provisions of Section 4(b) and 4(c) above, the Mediator shall be advised by a registered civil engineer with at least fifteen (15) years' experience in municipal water supply planning in California and who is mutually acceptable to the disputing parties. If the disputing parties are unable promptly to agree upon one such person, there shall be appointed (within five (5) days following referral of the dispute to the Mediator) to serve as an advisor to the Mediator a panel of three such registered civil

engineers with such experience: one named jointly by the responding parties (including, in the event of a dispute resolution process initiated by Citizens or Livermore and arising under Section 1, Windemere and Shapell); one named jointly by the Objecting Parties; and a third chosen by the two appointed. If such a panel is so appointed, the panel shall issue a single recommendation to the Mediator approved by at least two of the panelists.

(iv) *Findings and Recommendations Regarding Preliminary Water Service Analyses.* In any dispute over whether DSRSD or Zone 7 has complied with its obligations under Section 1 above or whether any Preliminary Water Service Analysis prepared by DSRSD complies with the provisions of Section 4(b) and 4(c) above, the Mediator (and the court upon any reference) shall sustain the actions of such water agency unless it is shown, by a preponderance of the evidence, that the methodology or conclusions supporting such water agency's actions (or, in the case of a dispute arising under Section 4(b) or 4(c), contained in a Preliminary Water Service Analysis) are contrary to generally-accepted engineering practices within the State of California. If the Mediator finds that any Preliminary Water Service Analysis does not comply with the provisions of Sections 4(b) or 4(c) above, he or she shall specify any practicable modifications needed to cure such noncompliance. Notwithstanding the pendency of any further judicial proceedings, the findings of the Mediator with respect to any dispute arising under Section 4(b) or 4(c) may be submitted by any party to a Lead Agency in connection with such Lead Agency's consideration of a Proposed Project.

d. **Further Legal Actions.**

(i) *Limitations.* The parties agree that any dispute regarding compliance with Section 1(a) of this Agreement shall be brought, if at all, within thirty (30) days following notice of approval by Zone 7 of the "Preliminary Water Delivery Schedule" (as defined in Section 10 of the Water Supply Contract and Section B of Appendix I of the First Amendment) that would result in water being delivered to the Dougherty Valley Service Area in excess of that permitted under Section 1(a). DSRSD agrees to supply to each of Livermore and Citizens, simultaneously with their annual delivery to Zone 7, a copy of the Preliminary Water Delivery Schedule and Annual Water Supply Report. Zone 7 agrees to supply to each of Livermore and Citizens, simultaneously with its delivery to DSRSD, a copy of Zone 7's approval of any Preliminary Water Delivery Schedule. Livermore and Citizens each agrees that, if it fails to initiate the

dispute resolution process with respect to Zone 7's approval of any Preliminary Water Delivery Schedule within the thirty (30) day period specified above, then it shall not be permitted thereafter to initiate the dispute resolution process or judicial review of any water deliveries anticipated by such Preliminary Water Delivery Schedule.

(ii) *Equitable Relief.* In addition to other remedies available at law, this Agreement may be enforced (and any dispute, claim or controversy regarding the interpretation or application of this Agreement may be resolved) by appropriate equitable action, including court-issued injunction, specific performance or declaratory relief. Initial reference to the Mediator shall not be required as described above when a disputing or objecting party seeks immediate injunctive relief from the Superior Court; provided, however, that in the event a party to this Agreement so seeks immediate injunctive relief, the parties shall (concurrently with any further judicial proceedings) commence a mediation proceeding within five (5) days following the court hearing on such relief.

(iii) *Appeals.* For purposes of appellate jurisdiction, the parties agree that any order of the Superior Court issued under subsections (b) or (c)(ii) above may be treated as an ancillary post-judgment order immediately appealable to the Court of Appeal.

(iv) *Further Litigation.* Livermore and Citizens (and each of the officers of Citizens) each agrees that, except to the extent such litigation is permitted to cure a breach of the Settlement Agreement, no further litigation will be filed by such person or entity challenging directly or indirectly the adequacy or propriety of water service by Zone 7 or DSRSD to the Dougherty Valley Service Area. The parties further agree neither to appeal or collaterally attack the Judgment.

(v) *Attorneys' Fees and Costs.* Citizens and Livermore will recover from Windemere and Shapell their reasonable fees and costs in the present matter, including those of mediation as well as litigation, said fees and costs to be paid within thirty (30) days following entry of judgment pursuant to this Section 8 and without further condition. In any legal action to enforce this Agreement as indicated by injunction, specific performance, or otherwise, the prevailing party or parties shall be entitled to recover their reasonable fees and costs (including fees and costs associated with any related mediation proceeding conducted under subsection (c) above) from their adverse parties.

(vi) *Other.* Except as specifically provided in Section 1 of this Agreement and solely to cure violations of such Section 1, in no event shall any relief for a violation of this Agreement include any reduction or elimination of water service to the Dougherty Valley Service Area.

9. GENERAL PROVISIONS

a. Sole and Final Agreement. Except as otherwise specifically provided herein, this Agreement (including the documents attached as exhibits hereto) is intended to be and is the final expression of the agreement between Citizens and Livermore ("Settling Petitioners"), on one hand, and the rest of the Settling Parties ("Settling Respondents"), on the other hand, with respect to the settlement of the Water Litigation, and is intended as and is the complete, exclusive and entire statement of the terms of the settlement between Settling Petitioners and Settling Respondents. As such, this Agreement supersedes and fully and completely extinguishes any prior understandings or agreements between Settling Petitioners and Settling Respondents (other than understandings regarding press communications as set forth in the September 20, 1999 Memorandum of Understanding By and Between Settling Parties) with respect to such settlement, whether oral or written, express or implied.

b. Severability. If any term, provision, or condition of this Agreement becomes invalid, void or unenforceable for any reason or is determined by a court of competent jurisdiction to be invalid, void or unenforceable, then the remainder of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated by such determination, the provisions of this Agreement being severable in such instance; except that if as a result of any such event DSRSD or Zone 7 becomes legally unable to provide service to the Dougherty Valley Service Area as anticipated herein and under the Water Supply Agreement and the First Amendment, then DSRSD, Zone 7, ACFCWCD, Windemere and Shapell shall be relieved of their obligations under this Agreement.

c. Warranty of Authority. By executing this Agreement, each of the undersigned covenants, warrants, and represents that he, she or it is fully authorized to enter into this Agreement.

d. Mutual Cooperation. Each of the Settling Parties agrees that it will not oppose, nor encourage any other person or entity to oppose, entry by the court of the Judgment and that it

will not appeal the Judgment nor seek any reconsideration or modification of same. Each of the Settling Parties shall execute and deliver to the others all such other further instruments and documents as may be reasonably necessary to carry out the terms and provisions of this Agreement and secure to the others the full and complete enjoyment of their respective rights and privileges hereunder.

e. Notices. Except as otherwise specifically set forth herein, all notices or other communications specifically required or permitted to be given under this Agreement shall be in writing and personally delivered or sent by certified mail, return receipt requested and postage prepaid, or sent by reputable overnight courier (such as Federal Express), or by telefacsimile with confirmation by overnight courier or U.S. Postal Service the following day, to the addresses or telefacsimile numbers set forth below. Any Settling Party may at any time change its address or telefacsimile number for the delivery of notice upon five (5) days' written notice to the other Settling Parties.

f. No Third Party Beneficiary. This Agreement is intended solely for the benefit of the Settling Parties and shall not be construed to create any rights in any other person or entity.

g. Execution in Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original and all of which together shall be deemed to be one and the same instrument. Furthermore, this Agreement may be executed and delivered by the exchange of electronic facsimile copies or counterparts of the signed documents, which facsimile copies or counterparts shall be binding upon the Settling Parties; provided, however, that any electronic facsimile counterpart shall be followed by delivery to counsel for Windemere of an original signed counterpart.

h. Time of the Essence. Time is of the essence of this Agreement.

i. Interpretation; Governing Law. This Agreement shall be interpreted, and the rights and the duties of the Settling Parties shall be determined, in accordance with the laws of the State of California, as applied to contracts entered into and performed (or capable of performance) in California by California persons or entities.

j. Denial of Wrongdoing and Liability. Neither the negotiation of this Agreement, nor any action taken to carry out this Agreement, (1) is or may be construed or used as an admission or concession by or against any Settling Party of any fault, wrongdoing or liability whatsoever or (2), except as specifically set forth herein, may be offered or received in evidence in any action

or proceeding against any Settling Party in or before any court, administrative agency or tribunal for any purpose.

k. Headings; Cross-References; Exhibits. The headings and captions used in this Agreement are for convenience and ease of reference only and shall not be used to construe, interpret, expand or limit the terms of this Agreement. All cross-references in this Agreement, unless specifically directed to another agreement or document, shall refer to provisions in this Agreement and shall not be deemed to be references to any other agreements or documents. Each of the exhibits attached to this Agreement is hereby incorporated into this Agreement by this reference.

l. No Duress. This Agreement is executed voluntarily by each of the Settling Parties without any duress or undue influence on the part of, or on behalf of, any of them. Each of the Parties to this Agreement has read and full understands the meaning of each provision of this Agreement and has relied on the independent advice and representation of legal counsel in entering into this Agreement.

m. Successors and Assigns. The terms and conditions of this Agreement shall be binding upon and inure to the benefit of the Settling Parties and, with respect to Windemere and Shapell only, their respective successors and assigns.

n. Construction. This Agreement has been reviewed by legal counsel for all Settling Parties, and no presumption or rule that ambiguities shall be construed against the drafting party shall apply to the interpretation or application of this Agreement.

o. Conditions Precedent. The obligations of the Settling Parties hereunder (other than their obligations under Section 8 above and this Section 9) shall not commence until the later to occur of (1) thirty-one (31) days following notice of entry of the Judgment or, if such Judgment is appealed, the date any and all such appeals have been resolved affirming the Judgment and become final and (2) the escrow established under the Water Service Escrow Agreement (the "Water Service Escrow") has closed.

p. Close of Water Service Escrow. No later than November 2, 1999, Zone 7, DSRSD, Windemere and Shapell each shall (1) deliver into the Water Service Escrow any and all funds,

security instruments and other documents required under the Water Service Escrow Agreement to be delivered by such Settling Party into the Water Service Escrow and (2) satisfy or waive any further conditions to the close of the Water Service Escrow except for (x) the execution and delivery into the Water Service Escrow of the Zone 7/DWR Amendment and the KCWA/DWR Amendment and (y) delivery by DSRSD to Zone 7 and BMWD of the Escrow Closing Notice. The Water Service Escrow shall not be required under this Agreement to close until at least thirty-one (31) days following notice of entry of the Judgment or, if such Judgment is appealed, the date any and all such appeals have been resolved affirming the Judgment and become final. Upon the expiration of such time period, DSRSD immediately shall deliver the Escrow Closing Notice to Zone 7, the other Settling Parties and BMWD; provided, however, that nothing herein shall prevent the Water Service Escrow from closing, in accordance with the terms and provisions of the Water Service Escrow Agreement, prior to the expiration of such time period. Immediately upon close of the Water Service Escrow, DSRSD shall deliver to the Settling Parties notice that the Water Service Escrow has closed.

IN WITNESS WHEREOF, the Settling Parties have caused this Agreement to be duly executed as of the date hereinabove written.

JUDGMENT

IT IS HEREBY ADJUDGED, DECLARED, ORDERED, AND DECREED that:

1. Real Parties in Interest Berrenda Mesa Water District ("BMWD"), Semitropic Water Storage District ("SWSD") and State Of California, Department Of Water Resources ("DWR") are dismissed with prejudice as parties in Case No. 98CS02670.

2. The petitions for writ of mandate and claims for injunctive and declaratory relief in Cases 98CS02671 and 98CS02670 are denied.

3. That certain *Amendment No. 1 to Contract Between Zone 7 of Alameda County Flood Control and Water Conservation District and Dublin San Ramon Services District for a Municipal & Industrial Water Supply* (the "First Amendment") is and shall be construed and implemented to require that in no year shall Zone 7 of the Alameda County Flood Control and Water Conservation District ("Zone 7") provide an amount of water to the Dublin San Ramon Services District ("DSRSD"), for service to the Dougherty Valley Service Area (as defined in section A of Appendix I to the First Amendment and Exhibit A to that certain *Agreement to Settle Water Litigation* entered into as of October 26, 1999 by and between Zone 7, the Alameda County Flood Control and Water Conservation District, DSRSD, the City of Livermore, Citizens for Balanced Growth, Windemere Ranch Partners and Shapell Industries (the "Settlement Agreement")), that is greater than the sum of:

(a) the amount of entitlement, interruptible, and turnback pool water that Zone 7 receives in such year from DWR and which is derived from 6,080 acre-feet of the 7,000 acre-foot annual entitlement that Zone 7 will acquire as a result of the transfer of water entitlements from the Kern County Water Agency pursuant to that certain January 28, 1998 water purchase agreement between Zone 7 Zone 7 and the Berrenda Mesa Water District (the "Dougherty Valley Water Supply")

(b) the amount of water that is returned by DWR or SWSD to Zone 7 in such year that is derived from that portion of the Dougherty Valley Water Supply previously placed in the 43,000 acre feet of storage acquired in accordance with Article 5

of the Water Storage Agreement, dated January 28, 1998 and as amended, between Zone 7 and SWSD; and

(c) the amount of any other water hereafter secured by or through DSRSD and received by Zone 7 in such year, all in a manner consistent with the terms and provisions of the Settlement Agreement applicable to the securing, receipt and delivery of such water for and to the Dougherty Valley Service Area.

As so construed and implemented, the First Amendment is valid pursuant to sections 860 *et seq.* of the Code of Civil Procedure and does not and will not result in a violation of the District Act.

4. This Judgment is a final judgment resolving all claims and causes of action in Cases 98CS02671 and 98CS02670. Pursuant to Code of Civil Procedure section 664.6, this Court retains jurisdiction over the parties who are not dismissed for the sole and limited purpose of enforcing the Settlement Agreement in accordance with its terms (including those provisions of the Settlement Agreement relating to, among other things, available remedies, alternative dispute resolution, severability and burdens of proof and persuasion) and not to disturb, modify or amend such terms in any manner. Any enforcement proceedings will be heard by the Honorable Ronald B. Robie or such other judge in the Sacramento Superior Court as may be assigned if Judge Robie becomes unavailable.

5. This Judgment shall be final and binding regardless of the invalidity or unenforceability of any provision of the Settlement Agreement. This Judgment is specific to the facts and law of this case and is of no precedential effect either within or outside of the ACFCWCD.

6. Citizens for Balanced Growth and the City of Livermore shall recover from Windemere Ranch Partners and Shapell Industries, Inc. their reasonable fees and costs in the present matter, including those of mediation as well as litigation.

Outlook-y50c1l5v.png

Hi Doug and Michael,

Please see my attached letter regarding the urgency for City staff to meet with Citizens for Balanced Growth (CBG) to confer on the use of Dougherty Valley Settlement Agreement open space funds. City staff will confer with CBG on the four properties listed in the letter. We have sent you information on the properties. In addition, all four were presented and discussed at the two Altamont Landfill Open Space Committee (ALOSC) meetings that Doug attended (and recorded) in February and March.

Also, I want to remind you that City staff reached out to both Native American organizations you requested. Sogorea Te' Land Trust responded via e-mail on March 19th and stated: "*Thanks for reaching out about this. With the recent Rematriation of the West Berkeley Shellmound and the ongoing work at all of our other land sites, we currently do not have the capacity to explore these opportunities in Livermore. If there is an opportunity for us to plug in at a later date, please do not hesitate to let us know. Thank you.*"

City staff also met with the Confederation of Ohlone People, and they are interested in further discussing partnerships with the City, but they do not have any funds at this time to buy land in the Livermore area.

Finally, as you heard at the ALOSC meetings, the Garaventa Hills landowners have said three different times in writing they are not willing to sell their land to the City.

Thanks and I look forward to hearing from you.

RE: Dougherty Valley Settlement Fund Recommendation
Acquisition of Open Space Properties
Buyer: City of Livermore

Messrs. Mann and Ferruci on behalf of Citizens for Balances Growth,

This letter is a final request to meet-and-confer with Citizens for Balanced Growth regarding the recommendation being formulated by City staff to the Livermore City Council regarding the expenditure of Dougherty Valley settlements funds for acquisition of the following properties for conservation preservation purposes (collectively known as the "Properties"):

- Garaventa Hills property - 32 acres (APN 099B-53-0-1)
- Hartford Hills Property – 82 acres (APNs: 902-9-3-1 and 902-9-3-2)
- Altamont Hills Property (formerly called the Cross property) – 32 acres (APN: 99B-5680-4)
- Greenville Road Property – 125.5 acres (APN: 99B-5685-12)

As you are aware, the Agreement to Settle Water Litigation dated November 2, 1999, and commonly known as the Dougherty Valley Settlement Agreement, contains the following clause in section 6(d)(i) for the expenditure of funds realized from the settlement:

> "City staff will meet and confer with [Citizens for Balanced Growth] prior to formulating its recommendations for acquisitions."

City staff has made numerous attempts to meet-and-confer with Citizens for Balanced Growth concerning the recommendations being prepared by City staff to the City Council regarding the expenditure of settlement funds for acquisition of the Properties by the City of Livermore for conservation preservation purposes. Those requests were

made in December, January, February, and March, but Citizens for Balanced Growth has not met with City staff.

Even though Citizens for Balanced Growth deviated from past practices and rebuffed requests to meet-and-confer by requesting information not previously requested for prior meet-and-confers and inserting new demands that the City identify the buyer before meeting, City staff provided the requested information and advised that the recommendation is based upon the City being the buyer.

It appears that Citizens for Balanced Growth is reluctant to meet because it does not support the expenditure of Dougherty Valley Settlement funds for the City's acquisition of the Properties for conservation preservation purposes. It may also be that Citizens for Balanced Growth is attempting to delay staff's recommendation concerning the proposed acquisitions.

Mr. Mann has expressed his personal opinion, at both the Livermore City Council meeting on February 26, 2024, and the Altamont Open Space Committee meeting on February 16 and March 15, 2024, that he does not support the City's acquisition of the Properties. However, he has not met-and-conferred with City staff on behalf of Citizens for Balanced Growth.

City staff proposes the following dates and times to meet-and-confer with Citizens for Balanced Growth about the staff recommendation being formulated to the Livermore City Council regarding the expenditure of Dougherty Valley settlements funds for the City's acquisition of the Properties:

Date: Thursday, April 18, 2024
Time: 4-5 pm or later if necessary
Location: Teams call or City Hall

Date: Tuesday, April 23, 2024
Time: 5-6 pm or later if necessary
Location: Teams call or City Hall

Date: Wednesday, April 24,2024
Time: 5-6 pm or later if necessary
Location: Teams call or City Hall

City staff is prepared to meet after hours if needed and can also meet at a publicly accessible location other than City Hall if that works better for both of you.

In the event Citizens for Balanced Growth does not meet-and-confer with City staff by April 24, 2024, staff will then formulate its recommendation to the City Council consistent with the Dougherty Valley Settlement Agreement with the following as the preferred recommendation by Citizens for Balanced Growth:

> "Citizens for Balanced Growth does not support the expenditure of Dougherty Valley settlement funds for the City of Livermore to acquire the following Properties:

- Garaventa Hills property - 32 acres (APN 099B-53-0-1)
- Hartford Hills Property – 82 acres (APNs: 902-9-3-1 and 902-9-3-2)
- Altamont Hills Property (formerly called the Cross property) – 32 acres (APN: 99B-5680-4)
- Greenville Road Property – 125.5 acres (APN: 99B-5685-12)"

I am be reached at (925) 960-4461 or via e-mail at spriley@livermoreca.gov. **Please contact me to accept one of the proposed dates to meet-and-confer or to identify a date-and-time that will occur before April 24, 2024, that works for Citizens for Balanced Growth and City staff.**

Sincerely,

Stephen Riley

RE: Distributions from Dougherty Valley Settlement Fund

Dear Mayor Marchand and Members of the Livermore City Council:

This firm represents Citizens for Balanced Growth, a registered non-profit group representing conservation-minded citizens in the Tri-Valley. Founded in 1982, CBG strives to support activities that enhance the quality of life for the residents of Livermore, Pleasanton, Sunol, and Dublin. I understand you wish to meet with CBG regarding the City's desire to distribute monies from the Dougherty Valley Settlement Fund to potentially fund the purchase of four properties for "conservation preservation purposes," known as the Garaventa Hills, Hartford Hills, Altamont Hills properties.

As you know, CBG is a beneficiary of the Dougherty Valley Settlement Agreement, which constituted the Dougherty Valley Settlement Fund, a fee-funded account to be used "exclusively for the purchase from willing sellers of permanent easements or fee title for conservation or agricultural purposes." Agreement, § 6(a). According to the Agreement, "**Prior to approving expenditures of funds** collected through this fee, the City Council of Livermore will receive recommendations from its staff concerning proposed acquisitions of permanent easements or fee title for conservation or agricultural preservation purposes. City staff **will meet**

and confer with Citizens [for Balanced Growth] **prior to formulating its recommendations** for acquisitions." Agreement, § 6(d)(1). Should staff recommendations differ from those preferred by Citizens, "the staff report to the City Council **shall** specify and explain the differences." *Id.*

Importantly, per Section 9(d) of the Agreement, "Each of the Settling Parties shall execute and deliver to the others all such other further instruments and documents as may be reasonably necessary to carry out the terms and provisions of this Agreement and secure to the others the full and complete enjoyment of their respective rights and privileges hereunder."

On July 8, 2024, City Staff brought recommendations for acquisition of some of the properties to City Council for approval, even though it had not:

- met and conferred with CBG;
- formulated its recommendation based on its meet and confer;
- considered CBG alternative proposals (if any); or
- explained differences in writing (if any).

Staff's provision of recommendations to City Council without first complying with the terms of the Dougherty Valley Settlement Agreement constitutes a breach of the Agreement, and because Section 6 represents the benefit of CBG's bargain, in exchange for which CBG agreed to dismiss its water lawsuit against the City, there can be no doubt that the City's breach is material in nature. Fortunately, the City Council took no action on July 8, instead postponing its decision to approve or deny Staff's recommendations to a later date, ostensibly giving Staff more time to meet and confer with CBG per the Agreement.

Unfortunately, CBG has learned that City Staff placed its recommendations back on Council's agenda for Monday, July 22. On behalf of CBG, please accept this letter as a formal request to comply with the Agreement by meeting and conferring with CBG *before* Staff makes recommendations to Council for expenditure of Settlement Funds and *before* Council acts on those recommendations.

I understand that Staff represented to Council that CBG has refused to meet with Staff for "five months," which Staff accepted as CBG's rejection of Staff's proposal. Neither statement is true.

First, Staff first reached out to CBG on December 11, 2023, proposing two dates in mid-December to discuss unspecified acquisitions of "properties" with Settlement Funds. CBG responded four days later indicating that the end of the year was bad timing for CBG. Staff responding by pushing for a meeting in December because "we're in active negotiations." CBG requested information about the planned acquisitions to study in advance of the meeting with Staff. Staff refused to provide documentation but vaguely identified two properties in North Livermore. The parties decided to put the meeting off until January when Staff was available but reiterated the importance of Staff providing information about the properties in advance of the meeting.

On January 23, 2024, Staff sent a meeting invitation to CBG to take place on January 30. CBG accepted the invitation. Staff cancelled the meeting on January 26, 2024.

In early February, CBG again asked for information about the properties, and Staff allowed that the City intended to purchase the properties, but nothing more. On February 13, CBG learned that Staff had approached the Altamont Landfill Open Space Committee about using Altamont Landfill Open Space Funds to purchase certain properties for conservation, some of which appeared to overlap with properties in "North Livermore." CBG at least now had some sense of what the City was planning.

On March 18, the City responded to CBG request for information, admitting that the projects discussed with the Altamont Open Space Committee mirrored those it hoped to discuss with CBG. The City proposed a meeting time on March 27 and directed CBG to review the agenda packet for the meeting with the Altamont Open Space Committee for more information. CBG immediately responded to explain it would seek additional information and was preparing a list of specific requests. CBG advised that March 27 did not work for CBG.

On April 9, 2024, Staff wrote to CBG, accusing its president of deliberately avoiding a meeting with Staff. The timeline of events related above does not support such an inflammatory accusation. Staff proposed three meeting times in April. CBG responded with a list of specific requests for information, including:

1. Any existing letters of intent for purchase for each of the properties targeted for DVSA funding.
2. Proposed sales contracts for each of the properties targeted for DVSA funding.
3. Purchase agreements and all encumbrance documents for the following properties: Eddies' Flat, Farber Property.
4. Plans, in progress or complete, for environmental stewardship in perpetuity for targeted acquisitions.
5. All contact information in the City's possession for Lisa Quisto.

The City responded with some, but not all, of the information requested and refused to provide certain information and documents altogether later in April. CBG advised Staff that it would need remaining documentation before it could meaningfully meet and confer and fulfill its obligations under the Agreement. Staff did not respond to CBG, and, alongside the public, in advance of the July 8, 2024, CBG reviewed Staff's recommendations to Council for the first time when Staff posted the council agenda.

CBG does not understand why Staff has acted as if CBG is uncooperative, when Staff refuses to set the parties up for success during this meet and confer process. CBG is and remains willing meet with City staff as soon as it receives all reasonable requests for documents and has had time to analyze the various aspects of the purchases in question. CBG takes its responsibilities under the Agreement seriously and remains committed to the excellent stewardship of the Settlement Fund.

With that in mind, in addition to its information and document requests, as re-stated herein, CBG requests an audit of the Settlement Fund. CBG understands this audit may take time, so this is not a pre-condition to meeting over the City's present desire to purchase properties.

Please direct your communication to CBG regarding this meet and confer through me from this point onward. I hope you will avoid the City's continuing breach of the Dougherty Valley Settlement Agreement by taking this matter off the agenda until CBG can meaningfully meet and confer with Staff.

RE: Distributions from Dougherty Valley Settlement Fund

Dear Mayor Marchand and Members of the Livermore City Council:

This firm represents Citizens for Balanced Growth, a registered non-profit group representing conservation-minded citizens in the Tri-Valley. Founded in 1982, CBG strives to support activities that enhance the quality of life for the residents of Livermore, Pleasanton, Sunol, and Dublin. I understand you wish to meet with CBG regarding the City's desire to distribute monies from the Dougherty Valley Settlement Fund to potentially fund the purchase of four properties for "conservation preservation purposes," known as the Garaventa Hills, Hartford Hills, Altamont Hills properties.

As you know, CBG is a beneficiary of the Dougherty Valley Settlement Agreement, which constituted the Dougherty Valley Settlement Fund, a fee-funded account to be used "exclusively for the purchase from willing sellers of permanent easements or fee title for conservation or agricultural purposes." Agreement, § 6(a). According to the Agreement, "**Prior to approving expenditures of funds** collected through this fee, the City Council of Livermore will receive recommendations from its staff concerning proposed acquisitions of permanent easements or fee title for conservation or agricultural preservation purposes. City staff **will meet**

and confer with Citizens [for Balanced Growth] **prior to formulating its recommendations** for acquisitions." Agreement, § 6(d)(1). Should staff recommendations differ from those preferred by Citizens, "the staff report to the City Council **shall** specify and explain the differences." *Id.*

Importantly, per Section 9(d) of the Agreement, "Each of the Settling Parties shall execute and deliver to the others all such other further instruments and documents as may be reasonably necessary to carry out the terms and provisions of this Agreement and secure to the others the full and complete enjoyment of their respective rights and privileges hereunder."

On July 8, 2024, City Staff brought recommendations for acquisition of some of the properties to City Council for approval, even though it had not:

- met and conferred with CBG;
- formulated its recommendation based on its meet and confer;
- considered CBG alternative proposals (if any); or
- explained differences in writing (if any).

Staff's provision of recommendations to City Council without first complying with the terms of the Dougherty Valley Settlement Agreement constitutes a breach of the Agreement, and because Section 6 represents the benefit of CBG's bargain, in exchange for which CBG agreed to dismiss its water lawsuit against the City, there can be no doubt that the City's breach is material in nature. Fortunately, the City Council took no action on July 8, instead postponing its decision to approve or deny Staff's recommendations to a later date, ostensibly giving Staff more time to meet and confer with CBG per the Agreement.

Unfortunately, CBG has learned that City Staff placed its recommendations back on Council's agenda for Monday, July 22. On behalf of CBG, please accept this letter as a formal request to comply with the Agreement by meeting and conferring with CBG *before* Staff makes recommendations to Council for expenditure of Settlement Funds and *before* Council acts on those recommendations.

I understand that Staff represented to Council that CBG has refused to meet with Staff for "five months," which Staff accepted as CBG's rejection of Staff's proposal. Neither statement is true.

First, Staff first reached out to CBG on December 11, 2023, proposing two dates in mid-December to discuss unspecified acquisitions of "properties" with Settlement Funds. CBG responded four days later indicating that the end of the year was bad timing for CBG. Staff responding by pushing for a meeting in December because "we're in active negotiations." CBG requested information about the planned acquisitions to study in advance of the meeting with Staff. Staff refused to provide documentation but vaguely identified two properties in North Livermore. The parties decided to put the meeting off until January when Staff was available but reiterated the importance of Staff providing information about the properties in advance of the meeting.

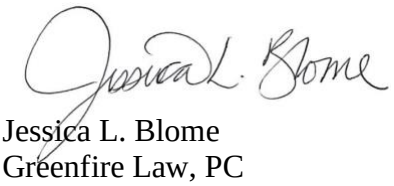
On January 23, 2024, Staff sent a meeting invitation to CBG to take place on January 30. CBG accepted the invitation. Staff cancelled the meeting on January 26, 2024.

CBG at least now had some sense of what the City was planning.

On March 18, the City responded to CBG request for information, admitting that the projects discussed with the Altamont Open Space Committee mirrored those it hoped to discuss with CBG. The City proposed a meeting time on March 27 and directed CBG to review the agenda packet for the meeting with the Altamont Open Space Committee for more information. CBG immediately responded to explain it would seek additional information and was preparing a list of specific requests. CBG advised that March 27 did not work for CBG.

On April 9, 2024, Staff wrote to CBG, accusing its president of deliberately avoiding a meeting with Staff. The timeline of events related above does not support such an inflammatory accusation. Staff proposed three meeting times in April. CBG responded with a list of specific requests for information, including:

1. Any existing letters of intent for purchase for each of the properties targeted for DVSA funding.
2. Proposed sales contracts for each of the properties targeted for DVSA funding.
3. Purchase agreements and all encumbrance documents for the following properties: Eddies' Flat, Farber Property.
4. Plans, in progress or complete, for environmental stewardship in perpetuity for targeted acquisitions.
5. All contact information in the City's possession for Lisa Quisto.



The City responded with some, but not all, of the information requested and refused to provide certain information and documents altogether later in April. CBG advised Staff that it would need remaining documentation before it could meaningfully meet and confer and fulfill its obligations under the Agreement. Staff did not respond to CBG, and, alongside the public, in advance of the July 8, 2024, CBG reviewed Staff's recommendations to Council for the first time when Staff posted the council agenda.

CBG does not understand why Staff has acted as if CBG is uncooperative, when Staff refuses to set the parties up for success during this meet and confer process. CBG is and remains willing meet with City staff as soon as it receives all reasonable requests for documents and has had time to analyze the various aspects of the purchases in question. CBG takes its responsibilities under the Agreement seriously and remains committed to the excellent stewardship of the Settlement Fund.

With that in mind, in addition to its information and document requests, as re-stated herein, CBG requests an audit of the Settlement Fund. CBG understands this audit may take time, so this is not a pre-condition to meeting over the City's present desire to purchase properties.

Please direct your communication to CBG regarding this meet and confer through me from this point onward. I hope you will avoid the City's continuing breach of the Dougherty Valley Settlement Agreement by taking this matter off the agenda until CBG can meaningfully meet and confer with Staff.

Sincerely,

Jessica L. Blome

Assessments for FY 2022 and 2023

July 22, 2024

Presented by Anna Zamboanga, Recycling Specialist

LIVERMORE CALIFORNIA

1

Assessment for Non-Payment of Livermore Sanitation's (LSI) Collection Services

- Of 29,000 accounts served by LSI, 70 accounts are overdue
- The net value is approximately $70,611.12 to be recovered
- All properties must subscribe to service; LSI cannot stop service for delinquent accounts

LIVERMORE CALIFORNIA

2

Assessment for Non-Payment of LSI Collection Services

- LSI and City have sent 6 notifications:
  - LSI sends first notice 30 days after non-payment to account holder and and owner
  - LSI sends second notice to account holder and owner
    - Service is reduced to one 20-gal garbage cart for residential accounts and one 32-gal garbage cart for commercial accounts until payment is made.
  - First notice from City of intent to assess was sent April 3, 2024
  - Second notice from City was sent June 14, 2024
  - Third notice from City was sent June 28, 2024
  - Fourth notice from City was sent July 15, 2024
- LSI has been willing to negotiate payment plans for past-due accounts.

LIVERMORE CALIFORNIA

3

Frequency of Assessment

- 80% of the accounts on this year's list are being assessed for the first time and 20% have been assessed prior years
- The number of accounts assessed are trending downward compared to previous years.

LIVERMORE CALIFORNIA

4

Staff Recommendation

- Consider protests related to the non-payment of solid waste, recycling, and organics services;
- Adopt a resolution overruling protests and confirm the 2022 and 2023 assessments if applicable; and,
- Direct staff to forward a finalized copy of the assessment report to the County Tax Assessor

Attn: Livermore City Clerk

We are writing this email to address the Isabel Crossing Project up for consideration this coming Tuesday. We have lived in Livermore over 50 years and have multiple generations also residing here. We are both still full-time employees of Livermore businesses. It is our hope that Livermore will approve the Isabel Crossing Project so that many, many new homes will be developed, enhancing the ability of our fellow employees and families to live here. While the Downtown is thriving, we need housing to support the employees. This project will add to the overall ambiance and livability of Livermore.

Thank you for your consideration,
Julie and John Howard

Dear Livermore City Clerk:

I am a resident of Livermore and a devotee of the Hindu Temple in Livermore.
I support greater housing opportunities for our children and for employees who can work and live in Livermore.
This project adds a lot value to Livermore community.

I support strongly the Isabel Crossing project and ask that you approve the project.

Thank you.

Hi City Clerk,

I am a livermore resident near the proposed isabel neighborhood. Please approve the plan as is, or with minor changes that will make it the easiest possible way to get approved. The community needs this development.

Sincerely,
Drew Felker

Resolution Adopting180-Day Wait Period Exception to Hire Retired Annuitant Nancy Dias

July 22, 2024

Presented by:

Kristen Hilton, Acting Human Resources Manager

CITY OF LIVERMORE CALIFORNIA

1

Resolution Adopting180-Day Wait Period Exception to Hire Retired Annuitant Nancy Dias

- State law requires City Council approval to hire a retired annuitant before the required 180-day waiting period.
- Ms. Dias will help provide operational support for critical, time-sensitive, projects in progress including:
  - Citywide compensation study,
  - Employee onboarding program,
  - Wellness program, and
  - Multiple key recruitments.
- Staff recommends that the City Council adopt a resolution adopting 180-day wait period exception to hire retired annuitant Nancy Dias in accordance with the Government Code.

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Colin Ponce	I support Livermore Pride! Please continue to support this event and others that celebrate diversity in our community.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Sally Jones	Independence Day celebrations were supposedly cancelled due to a potential crowd of 12,000, yet this event states the crowd is expected to reach 30,000. That indicates the city needs to reevaluate it's priorities. How are you going to guarantee municipal codes will not be broken, including public decency and sexual exploitation of a minor during the planned entertainment? Overall, not an appropriate use of taxpayer dollars.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Tara Boyce	Please approve the grant for Pride! This event, along with Juneteenth, Lunar New Year and others, celebrates the wonderful patchwork of humans that makes Livermore the amazing community it is to live in. Our Pride celebration celebrates the joy within and around the LGBTQ+ community and is looked forward to by our family every year!

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Carol King	Supporting Livermore Pride through this grant is crucial in promoting diversity, and community cohesion. This event not only celebrates and supports the LGBTQ+ community but also showcases our city as a welcoming and vibrant place for all residents and visitors. Approving this grant will enable us to continue this tradition, ensuring that our city remains an example of inclusivity and pride in the future.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Madison Martin	Please approve these grants for these activities and events. Since it's inception, I have looked forward to attending the Livermore Pride festival because it is one of the few pride events accessible to me. Please continue to support such grants that enable community building events for our diverse regional residents.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Trenton Thomsen	I am writing today to urge the Livermore City Council to approve the arts grant to Livermore Pride. People come from all across the Tri-Valley for this amazing event to feel accepted, seen, and uplifted for who they are. That is what Livermore should support. I urge you to approve this grant, thank you.

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Taylor denBroeder	I fully support the use of the art grant funds for the Livermore pride event! Pride events are essential for the LGBTQ+ community and their loved ones to remind them that they are seen, valued and protected here! Hosting events such as this serve as a powerful reminder to the community, year long, that this city is truly a safe and affirming place!
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Steven Drouin	As a Livermore resident, I support inclusive programming such as Livermore Pride. I, my family, and friends love attending events that affirm and celebrate the diversity of our vibrant community. Please approve grant funds for this event. We are stronger together.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Nancy denBroeder	A very big YES to support the LGBTQ+ community in Livermore to receive the grant money for PRIDE events! Everyone deserves to be seen and heard and to feel supported and protected! I stand in support! Thank you!!
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Wade Matthews	Support pride events in Livermore by approving the grant. These kind of events are critical to the inclusiveness of the community. Rejecting the grant proposal only serves as regressive policy.

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Dawn Matthews	Pride events are so vital to our community; Pride gatherings are not just about individuals celebrating their own humanity, but about protesting for the civil rights of our neighbors, friends, and family whose sexual orientation or gender identity are under attack. I strongly encourage the Livermore City Council to support and allocate this grant money to help facilitate Pride events in Livermore. These events and community support of them allow LGBTQ+ indivuals to feel supported and protected by their community.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Rachel Brumley	I'm writing in support of the arts grant for Livermore Pride. The events they put on are important for our LGBTQ+ youth and adults to be seen, accepted, and celebrated. We are happy to be a part of a diverse city like Livermore.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Teresa Gonzalez	I strongly support the Livermore Pride event. Please, consider granting the grant for this type of events!

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	B.J. Reynolds-Koonce	Please approve this grant to support Livermore Pride. Our family looks forward to attending this uplifting event every year. In this day and age, it means a lot to the LGBTQ+ community. Thank you.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Lainie Pascall	I'm writing to urge the City Council to approve the arts commission grant to Livermore Pride. This is the ONLY Pride event in the entire Tri-Valley area, and hundreds of people come to our city to celebrate in October. Events like this make our LGBTQ+ community feel seen, supported, and uplifted. As a Livermore resident, I strongly support the City approving grant funds for this event.

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Steven Paradise	Please approve the grant to support Livermore Pride. This event and the organizations that support it are essential to the well-being of our LGBTQIA+ youth, family members, friends, and neighbors, so they know they are seen, supported, included and loved. These members of our community have a significantly higher risk of attempted suicide and self-harm when they do not feel that they belong. I know that there are queer teenagers and young adults in Livermore and nearby communities who often feel that Livermore is often not safe or accepting of them, and it is imperative that we work to change that perception and make Livermore a safe and welcoming community for all people.

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Merry Heather Welker-Tartar	This event is extremely important to our community. We pride ourselves on being an inclusive, accepting, welcoming city which embraces diversity. This event is important for the LGBT+ community in order to feel seen, safe, and celebrated. And it is also important for the rest of the community in order to understand our neighbors, to learn from them, and to show our LGBT+ citizens that they belong here. Any society will grow ill from pushing the marginalized into the shadows. A chance to shine light should not be thrown away. Let's be the city we say are. Let's be the best Livermore that we can be. I strongly support approving this grant.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Lindsey Kremmel	I strongly support Livermore Pride. This event is an important and meaningful community event for youth, adults, and families. Please approve this grant.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Katherine Kozioziemski	I strongly support a City Grant being used to support Pride. It's a wonderful time to celebrate members of our LGBTQ+ community. Thank you for your continued support of the arts and LGBTQ+ artists and community members.

Item	Name	Comment
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Jennifer Nelson	I support Livermore Pride. It is a wonderful thing for our community. Please approve the grant.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Carrie McNeil	Strong support. Our family really appreciates and enjoys Livermore Pride and glad to know city is providing this support.
5.15) Resolution authorizing the execution of Project and Program Grant Agreements with Livermore Pride, Livermore Valley Opera (LVO) and Thomasin Dewhurst Fine Art consistent with the City's Public Art Policy.	Tonya Gonzales-Clenney	I am commenting in support of the grant from Livermore Pride. Livermore Pride events are so important for our community because they show our LGBTQ+ community members and loved ones how much we support them.

Item	Name	Comment
5.18) Resolution establishing fees for a concealed carry weapons (CCW) permit and appropriating $15,000 of the fee revenue to cover the costs to implement the CCW permit program.	Alan Marling	White-hat cowboys would never carry a concealed weapon. That's something I would expect more from a black-hat villain. Even if the motive were purely self defense, nowadays we have more practical options that are less lethal. And no, carrying around guns won't help white hats protect good people from bad actors; not even armed guards or police have been able to stop school shooters. For that we need healthier environments, more counseling, and fewer automatic rifles. The weapon itself causes violence. Its presence brings to mind violent solutions to problems that could be solved peaceably. Weapons escalate. They lead to bloody accidents that cannot be reversed. Unfortunately, the corrupt SCOTUS cares more about the bottom line of gun-selling corporations than the lives of Americans. I understand those Supreme Injustices have made it difficult for Livermore to protect its citizens from senseless gun violence, but I urge the council to do all it can.

Item	Name	Comment
6.2) Hearing to consider a request for a Vesting Tentative Tract Map, Site Plan Design Review, Development Agreement, Consistency Determination, Conditional Use Permit, Master Sign Program Amendment, and Development Code amendment to develop vacant land located southwest of the Portola Avenue and Isabel Avenue intersection with for-sale residential townhome and condominium units and for-rent apartments with mixed commercial and office uses and a public park and public plazas, known as Isabel Crossing.Â	Sullivan Figurskey	Housing and community are vital necessities, now as ever. Especially when they are built for the people living there, rather than the cars they drive. I appreciate the dedication that must have been required to bring this project to light. I am concerned the changes may have affected the longevity of the neighborhood. Specifically the sequestering of VLI and LI housing and the loss of retail space possibly hindering easy access to basic services sans automobile. However, I trust that the City staff understand development limitations better than I, and this project reassures me that I am living in a city that is looking forward, rather than in the rear view. Thank you all.

July 22,2024

Public Forum
Re: Need to start selling GAMI G100UI/ Support Open Space Buffer between Dublin and Livermore.

Received at the Livermore City Council meeting of:
July 22, 2024

Dear City Council Members:

Thank you to the City Manager and the staff for working with the FBO to offer UL 94 at Livermore Airport. Offering UL 94 at Livermore Airport is a small step towards eliminating the impacts of lead aviation pollution on several residential developments, schools, and preschools close to the airport. Unfortunately, UL 94 cannot be used in all piston engine aircraft.

Clearly, the most important step is for Five Rivers Aviation FBO Pete Sandhu to start selling GAMI G100UL --- an aviation fuel that can be used and or mixed with fuel in any plane or tank. GAMI G100UL is FAA approved, insurable, and can be purchased from a distributor in Fresno by the end of 2024.
Mr. Sandhu says he will offer GAMI G100UL by the end of 2025. Why delay for a year?
We need to reduce the impacts of leaded aviation fuel to our community as soon as possible.

On another issue, the Dublin City Council voted last week to put an advisory measure on the ballot November 5th that would break the Dublin Urban Growth Boundary and significantly reduce the open space buffer between Dublin and Livermore. The City Council has stated repeatedly it will safeguard this buffer between the two cities. I urge you to continue to protect and preserve the current buffer between the two cities.

Thank you for your time and attention to these issues.

Sincerely,
Donna Cabanne

July 22, 2024

Livermore City Council
Livermore City Hall
1052 S. Livermore Ave.
Livermore, CA 94550

Dear Mayor Marchand and Members of the Livermore City Council,

I am writing on behalf of Castro Valley Pride, Alameda County's oldest Pride organization, to express our enthusiastic support for the allocation of $10,000 to Livermore Pride (Item 5.15). This item presents a fantastic opportunity to support both the LGBTQ+ community and the local arts scene at a minimal cost to the city.

With nearly 15 years of advocacy in our region, I understand you may have received numerous emails from right-wing activists urging you to oppose this item. While they may be vocal, it is essential to remember that **your duty as elected officials is to champion and uplift the quieter voices, to advocate for the underrepresented, and to celebrate the most vulnerable members of our community.**

This past weekend, we celebrated the 14th Annual Castro Valley Pride event, which showcased local artists, including performers from Livermore, as well as businesses and organizations from across Alameda County. Events like Castro Valley, Livermore, Dublin, Fremont, and San Leandro Pride play a crucial role in building community, celebrating diversity, and promoting acceptance. Simply put, this work saves lives.

Tonight, you have the opportunity to contribute to this life-saving work by supporting Item 5.15, which authorizes a Project and Program Grant Agreement with Livermore Pride, Livermore Valley Opera, and Thomasin Dewhurst Fine Art. I respectfully request your full support for this Grant Agreement.

Sincerely,

AUSTIN BRUCKNER CARRILLO
President
Castro Valley Pride

Under no circumstances should the City of Livermore be providing funds to “Pride” organizations. They, like all other special interest organizations, can raise money through private funds. DO NOT USE PUBLIC MONEY FOR THIS PURPOSE.

In case you’ve not watched what’s happened in Sunol, do not bring a mess into your town.

Sincerely,

James R. Lowder

Exercise Caution: This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Livermore City Council-

PLEASE VOTE AGAINST THIS ITEM

As your immediate neighbor and one who has seen this played it firsthand I strongly recommend that you vote against this item and refuse to get involved with divisive, private, special interest groups. They can raise funds from on their own from those interested, but should not be funded by the taxpayers as it is impossible to represent all views equally and remain neutral when special interest groups are funded.

If you are not familiar with what has happened in nearby Sunol and other communities you should think twice as this becomes extremely divisive. It is extremely difficult to represent all voices in the community when the public government starts picking and choosing special interest groups to elevate.

Please keep Livermore neutral and stay out of divisive politics and divisive agendas.

Ryan Jergensen

Hi City Councilmembers

I'm writing in support of funding Livermore Pride (Item 5.15). Many other cities have events and they're great showcases for local businesses and community organizations.

Thanks
Alfred

Hello Livermore City Council,

I am writing today to express my support for the allocation of grant to Livermore Pride and urge you to vote to do the same. Show your support for inclusion and not exclusion. Let us celebrate differences and joy and love and art. Please do not allow hate to triumph.

Best,
Yao Saeteurn

No on Drag Adult Cabaret Grant. Protect Livermore Kids from Exposure to Adult Entertainment! I oppose any funding or approval for community drag adult cabaret performances in Livermore. The City of Livermore has strict laws on adult business under Municipal Code Chapter 5.08, including 5.08.480 (B) strictly prohibiting exposure to minors under 18 years of age and (D) Performances restricted upon the stage within licensed closed-door establishments under strict zoning laws for adult sexually oriented businesses. Once these performances occur in public spaces, they violate a slew of laws, including public decency, sexual exploitation of minors, luring minors for sexual exploitation, and more. The city has a responsibility to protect the community, especially minors, from being exposed to sexually oriented adult entertainment spilling out into public spaces and events. It must not engage in funding, organizing, and advertising Drag Adult Cabaret performances. I am calling on you to vote against the "AGREEMENT BETWEEN CITY OF LIVERMORE AND LIVERMORE PRIDE FOR FISCAL YEAR 2024-25 PROJECT AND PROGRAM GRANT AGREEMENT." I am calling on you only to approve grants for this program that would meet family-appropriate standards because your obligation is to protect minors from being exposed to anything inappropriate. The arts should uplift and benefit the entire community and focus on encouraging and inspiring the next generation, not indoctrinating and sexualizing them. Your re-electability will be weighed by your 'No' vote.

No on Drag Adult Cabaret Grant. Protect Livermore Kids from Exposure to Adult Entertainment! I oppose any funding or approval for community drag adult cabaret performances in Livermore. The City of Livermore has strict laws on adult business under Municipal Code Chapter 5.08, including 5.08.480 (B) strictly prohibiting exposure to minors under 18 years of age and (D) Performances restricted upon the stage within licensed closed-door establishments under strict zoning laws for adult sexually oriented businesses. Once these performances occur in public spaces, they violate a slew of laws, including public decency, sexual exploitation of minors, luring minors for sexual exploitation, and more. The city has a responsibility to protect the community, especially minors, from being exposed to sexually oriented adult entertainment spilling out into public spaces and events. It must not engage in funding, organizing, and advertising Drag Adult Cabaret performances. I am calling on you to vote against the "AGREEMENT BETWEEN CITY OF LIVERMORE AND LIVERMORE PRIDE FOR FISCAL YEAR 2024-25 PROJECT AND PROGRAM GRANT AGREEMENT." I am calling on you only to approve grants for this program that would meet family-appropriate standards because your obligation is to protect minors from being exposed to anything inappropriate. The arts should uplift and benefit the entire community and focus on encouraging and inspiring the next generation, not indoctrinating and sexualizing them. Your re-electability will be weighed by your 'No' vote.

No on Drag Adult Cabaret Grant. Protect Livermore Kids from Exposure to Adult Entertainment! I oppose any funding or approval for community drag adult cabaret performances in Livermore. The City of Livermore has strict laws on adult business under Municipal Code Chapter 5.08, including 5.08.480 (B) strictly prohibiting exposure to minors under 18 years of age and (D) Performances restricted upon the stage within licensed closed-door establishments under strict zoning laws for adult sexually oriented businesses. Once these performances occur in public spaces, they violate a slew of laws, including public decency, sexual exploitation of minors, luring minors for sexual exploitation, and more. The city has a responsibility to protect the community, especially minors, from being exposed to sexually oriented adult entertainment spilling out into public spaces and events. It must not engage in funding, organizing, and advertising Drag Adult Cabaret performances. I am calling on you to vote against the "AGREEMENT BETWEEN CITY OF LIVERMORE AND LIVERMORE PRIDE FOR FISCAL YEAR 2024-25 PROJECT AND PROGRAM GRANT AGREEMENT." I am calling on you only to approve grants for this program that would meet family-appropriate standards because your obligation is to protect minors from being exposed to anything inappropriate. The arts should uplift and benefit the entire community and focus on encouraging and inspiring the next generation, not indoctrinating and sexualizing them. Your re-electability will be weighed by your 'No' vote.

Re: Item 6.2 Isabel Crossing---Environmental Impact Report Addendum Inadequate

Received at the Livermore City Council meeting of:
July 22, 2024

Dear City Council Members:

The Environmental Impact Report Addendum prepared by Rincon Consultants concludes that an Environmental Impact Report Addendum is sufficient for this project. However, this conclusion is contradicted by some of the findings in their report. Further, some of the mitigations proposed would be inadequate to address the environmental impacts of the revised project.

First, air quality impacts are significant and unavoidable. The report does not provide enough information to demonstrate its assumption that toxic air contamination (TAC) exposure can be adequately mitigated with the payment of mitigation fees to BAAQMD. Moreover, data on ROG, nitrogen oxide, CO, and particulate matter that can be inhaled into the lungs-- has not been adequately analyzed. The consultants contend that "reduced office space in the proposed Isabel Crossing will lead to a corresponding decrease in emissions sources
such as vehicle trips" but the consultants do not analyze how residential unit occupants may, in fact, increase the number of vehicle trips as compared to occupants of commercial buildings.

The proposed project should not be approved on unproven assumptions lacking sufficient data. CEQA requires adequate data for the public and decision-making bodies to make informed decisions BEFORE project vesting and developer's agreements.

Second, the Environmental Impact Report Addendum does not provide enough data to determine if state and federally protected wildlife, special species, and habitat corridors will be sufficiently protected.

Has the California Department of Fish and Wildlife and the US Fish and Wildlife Service been contacted to comment on the proposed project of over a thousand housing units and ~~90~~ 70,000 sq.ft of commercial space? If not, why not?

Additionally, the Greenhouse Gas Emissions section does not discuss the impacts from adjacent landfills, a Liquid Natural Gas plant, a waste water facility, and Livermore Airport that all contribute to GHG emissions that are now regulated by new and more stringent standards. Similarly, the impacts of wildfire threats during construction must be further analyzed due to climate change patterns that have created wind velocities in excess of 50 to 60 miles per hour and weeks of excessive heat in the summer.

Noise impacts from the airport do not address the recent addition of flights of small luxury jets that are quieter but not quiet. These residential units will be on the flight plans for arrival at LVK. Noise may not be heard at ground level but the 3 story unit occupants will hear the planes. Were noise studies conducted **on site** for indoor and outdoor noise decibels for arriving aircraft, especially small luxury jets ?

Equally important, the consultants did not address the leaded air pollution from LVK, an airport that still sells leaded aviation fuel. Why was that information not included in health related air and emissions impacts?

Finally, the cumulative impacts from other known approved projects citywide and projects that are in the planning stages have not been analyzed or even mentioned. The cumulative impacts from air

pollution, GHG emissions, transportation, traffic must be further analyzed before approving vesting, developer's waivers, developer's agreements and the CEQA documentation.

This is a huge project. I urge the City Council to postpone making a decision tonight and receive outside council on the adequacy of the Environmental Impact Report Addendum.

Sincerely,

Donna Cabanne
member of the Center for Biological Diversity, the Sierra Club, Lead Free Livermore, Unlead LVK.
