1. CLOSED SESSION - NONE.

2. CALL TO ORDER

ROLL CALL

Council Member Ben Barrientos
Council Member Evan Branning
Council Member Brittni Kiick
Vice Mayor Robert W. Carling
Mayor John Marchand

PLEDGE OF ALLEGIANCE

3. PROCLAMATIONS AND PRESENTATIONS

3.1 Confirm Advisory Body appointments to the Airport Commission, the Alameda County Mosquito Abatement District Board of Trustees, Beautification Committee, Commission for the Arts, Historic Preservation Commission, Library Board of Trustees, and City Historian, and direct the City Clerk to administer the oath of office.

Recommendation:
The City Council Subcommittee on Advisory Bodies recommends the City Council confirm the advisory body appointments to the Airport Commission, the Alameda County Mosquito Abatement District Board of Trustees, Beautification Committee, Commission for the Arts, Historic Preservation Commission, and the Library Board of Trustees and direct the City Clerk to administer the oath of office.

The Historic Preservation Commission recommends the City Council appoint Alan Frank as the City Historian.

Staff Report

3.2 Proclamation declaring March 2024 as March for Meals (#SaveLunch) Month, presented to Carrie Oldes, Spectrum's Meals on Wheels program manager.

Recommendation:
Staff recommends City Council declare March 2024 March for Meals (#SaveLunch) Month.

Staff Report
Attachments:
1. Proclamation

4. OPEN FORUM

- In conformance with the Brown Act, no City Council action can occur on items presented during Open Forum.
- To provide public comment in person, please submit a speaker card. When your name is called, walk to the lectern to address City Council.
- Comments are limited to a maximum of 3 minutes per person, per item. The Mayor may

reduce the amount of time based on the number of persons wishing to speak.

- Comments are limited to one comment per person per item regardless of format or time submitted (this includes email and e-comment submissions prior to the meeting as well as live comments during the meeting).
- Open Forum will conclude after 30 minutes; however, if there are additional speakers, Open Forum will reconvene before the meeting adjourns.

5. CONSENT CALENDAR

Consent Calendar items are considered routine and are acted upon by the City Council with a single action. Members of the audience wishing to provide public input must submit a speaker card found at the entrance of the Council Chambers. A speaker is limited to a single comment with a maximum of three minutes for the entire Consent Calendar. If Consent Calendar items are pulled for discussion by the City Council, a speaker will be allowed one comment on the items pulled for discussion and a separate comment for the remaining Consent Calendar. The one comment limit applies regardless of format or time submitted (this includes email and e-comment submissions prior to the meeting as well as live comments during the meeting).

5.1 Approval of draft minutes - March 11, 2024 Regular Meeting.

Recommendation:
Staff recommends the City Council approve the draft minutes.

Staff Report
Attachments:
1. DRAFT 2024-03-11

5.2 Resolution authorizing the execution of an agreement with Roofing Constructors, Inc. dba Western Roofing Services, a subsidiary of TectaAmerica to provide annual and semi-annual roof inspections, preventative maintenance, gutter cleaning and roof repair services for City owned buildings in an amount not-to-exceed $700,000 for a three-year term ending March 31, 2027.

Recommendation:
Staff recommends the City Council adopt a resolution authorizing the execution of a three-year agreement with Roofing Constructors, Inc. dba Western Roofing Services, a subsidiary of TectaAmerica to provide annual and semi-annual roof inspections, preventative maintenance, gutter cleaning and roof repair services for City owned buildings in an amount not-to-exceed $700,000 for a three-year term ending March 31, 2027.

Staff Report
Attachments:
1. TectaAmerica Proposal
2. TectaAmerica Award Letter
3. TectaAmerica 5th Year Renewal Letter 2024
4. Resolution
5. Exhibit A - Agreement

5.3 Resolution authorizing execution of an agreement with the Alameda County Flood Control and

Water Conservation District, Zone 7 for participation in the 2022 Urban Community Drought Relief Local Projects Grant Program.

Recommendation:
Staff recommends the City Council adopt a resolution authorizing the City Manager to execute an agreement with the Alameda Flood Control and Water Conservation District, Zone 7 for participation in the Urban Community Drought Relief Local Project Grant Program.

Staff Report
Attachments:
1. Award Letter
2. Resolution
3. Exhibit A - Agreement

5.4 Resolution authorizing execution of a purchase order with Belkorp Ag. LLC, for two John Deere Track Steer Loaders and associated equipment in the not-to-exceed amount of $203,260.

Recommendation:
Staff recommends the City Council adopt a resolution authorizing the City Manager to execute a purchase order with Belkorp Ag. LLC for two replacement John Deere Track Steer Loaders and associated equipment in the not-to-exceed amount of $203,260.

Staff Report
Attachments:
1. John Deere Construction Sourcewell Contract
2. Belkorp AG. LLC Quotation
3. Resolution

5.5 Resolution authorizing execution of a first amendment to the Airport Restaurant Lease Agreement with SAAB13, LLC.

Recommendation:
Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute the first amendment to the Airport Restaurant Lease Agreement with SAAB13, LLC as agreed upon in the Settlement Agreement and Lease Amendment dated February 29, 2024.

Staff Report
Attachments:
1. Resolution
2. Exhibit A - First Amendment

5.6 Resolution approving the 2024 City of Livermore State and Federal Legislative Platform

Recommendation:
Staff recommends the City Council adopt a resolution approving the 2024 City of Livermore State and Federal Legislative Platform.

Staff Report

Attachments:

1. Draft 2024 Legislative Platform - Redlined
2. 2024 TVC Legislative Framework
3. Resolution
4. Exhibit A - Draft 2024 Legislative Platform

6. PUBLIC HEARINGS

Comments are limited to one comment per person per item regardless of format or time submitted (this includes email and e-comment submissions prior to the meeting as well as live comments during the meeting).

6.1 Hearing to consider the Housing Element Annual Progress Report, which tracks the City's progress towards implementing the Housing Element of the General Plan and meeting its Regional Housing Needs Allocation (RHNA), pursuant to Government Code Section 65400.

Recommendation:

Staff recommends the City Council adopt a resolution accepting the 2023 General Plan Housing Element Annual Progress Report.

Staff Report

Attachments:

1. 2024 Affordable For-Sale Prices and Rental Rates
2. 2023 Building Permit Activity Summary
3. 2023-2031 RHNA Progress
4. Resolution
5. Exhibit A - 2023 Annual Progress Report

6.2 Resolution authorizing, approving, and adopting an amended Permanent Local Housing Allocation (PLHA) program five-year plan to reallocate funds to support the shelter and housing assistance provided at Vineyard 2.0 as well as rental assistance provided by City Serve, and authorizing the City Manager to apply for PLHA funds from the State Department of Housing and Community Development in an amount not-to-exceed $1,251,240 and execute grant agreements consistent with the program activities defined in the amended PLHA 2019-2023 plan.

Recommendation:

Staff recommends that the City Council adopt two resolutions:

1. Authorizing, approving, and adopting an amended PLHA Plan for 2019-2023 allocations, which is attached to the resolution as Exhibit A;
2. Authorizing the City Manager, or her designee, to execute the PLHA program application for the 2023 PLHA NOFA, the PLHA standard agreement, and any subsequent amendments or modifications thereto, as well as any other documents that are related to the PLHA program or the PLHA grant awarded to the City of Livermore;
3. Authorizing the City Manager to accept and appropriate the allocations for the amended PLHA plan if awarded in an amount not-to-exceed $1,251,240, and directing the City Manager or her designee, to sign and submit Fund Requests and all required reporting

forms and other documentation as may be required by the State of California in connection with the grant; and

4. Authorizing the City Manager or her designee to sign all documents related to the execution of grant agreements with subgrantees receiving allocations of funds from the CA State Housing and Community Development PLHA program, including the selection of, and contracting with, service providers in amounts exceeding $100,000, consistent with the allowable activities in the PLHA program.

Staff Report

Attachments:

1. HCD Authorizing Resolution
2. Resolution
3. Exhibit A - Amended 2019-2023 PLHA Plan

6.3 Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City.

Recommendation:

Planning Commission and staff recommend the City Council take the following actions to authorize the future development of light industrial buildings on the SMP 39 and SMP 40 properties:

1. Adopt a resolution certifying the Final Environmental Impact Report for the SMP 39/SMP 40 Project and adopting California Environmental Quality Act Findings, A Statement of Overriding Considerations, and a Mitigation Monitoring and Reporting Program;
2. Adopt a resolution approving General Plan Amendment (GPA) 21-001, Vesting Tentative Parcel Map (SUB) 21-008, Vesting Tentative Tract Map (SUB) 21-009, and Site Plan Design Review (SPDR) 21-008;
3. **Introduce an ordinance** and waive the first reading pre-zoning the SMP 39 and SMP 40 properties to Planned Development - Industrial (PD-I) 22-001 and the Additional Annexation Only Parcels to Open Space - Floodplain (OS-F) consistent with Planned Development - Industrial (PD-I) 22-001, Zoning Map Amendment (ZMA) 21-002, and Development Code Amendment (DCA) 21-005;
4. **Introduce an ordinance** and waive the first reading authorizing execution of Pre-Annexation and Development Agreement (DA) 21-001;
5. **Introduce an ordinance** and waive the first reading authorizing execution of Pre-Annexation and Development Agreement (DA) 23-002; and
6. Adopt a resolution authorizing submittal of an application to LAFCo for a Sphere of Influence and Annexation modification consistent with Annexation and Prezoning (APZ) 21-003.

11. HOW TO PARTICIPATE IN YOUR CITY COUNCIL MEETING

You can participate in the meeting in a number of ways:

Open Forum is an opportunity for the public to speak regarding items not listed on the agenda. Speakers are limited to a maximum of 3 minutes per person. To address the City Council in person, you must submit a speaker card to the City Clerk prior to the start of that item. Please note that the City Council is prohibited by State law from taking action on any items that are not listed on the agenda. However, if your item requires action, the City Council may place it on a future agenda or direct staff to work with you and/or report to the City Council on the issue.

Public Hearings - The topic of the hearing is typically summarized by staff, followed by a presentation by the applicant, and questions from the City Council. The Mayor will then open the hearing to the public and offer an opportunity for public comments. Speakers are limited to a maximum of 3 minutes per person. To address the City Council in person, you must submit a speaker card to the City Clerk prior to the start of the presentation of the item.

Other Agenda Items are also open for public input including Consent Calendar or Matters for Consideration items. These comments are also subject to the 3-minute limit.

Special Meetings, Workshops - The public will have the opportunity to address the City Council regarding the item that is the subject of the special meeting or workshop. Public comments are limited to a maximum of 3 minutes per person.

Platforms to Participate in Meetings:

Submission of Comments Prior to the Meeting:

Email Comments may be submitted by the public to the City Clerk's Office (cityclerk@LivermoreCA.gov). Items received no later than 12:00 pm on the day of the meeting will be provided to the City Council and available on the City website prior to the meeting. These items will NOT be read into the record.

eComments may be submitted by the public using the eComment link here. Comments may

be up to 1000 characters in length and will be accepted up until 4:00 pm the day of the meeting. These items will NOT be read into the record and are viewable by the City Council and the public upon submittal.

Submission of Comments During the Meeting:

Speakers are limited to a maximum of 3 minutes per person. To submit a comment you must complete a speaker card for each item. Speaker cards are available in the Civic Center Meeting Hall lobby. Indicate on the card the item number you wish to comment on and submit the card directly to the City Clerk prior to the start of the item. Please note that the City Council is prohibited by State law from taking action on any items that are not listed on the agenda. However, if your item requires action, the City Council may place it on a future agenda or direct staff to work with you and/or report to the City Council on the issue.

The City will be using YouTube and TV29 as two tools to provide the public access to view City Council meetings. No public comment will be accepted via YouTube.

TV29: tv29live.org Comcast Cable 29

YouTube: http://youtube.com/c/CityofLivermoreCalifornia

If you would like to deliver written materials to the City Council as part of your public comment, please provide 10 copies to the City Clerk with your speaker card.

The **City Council Agenda and Agenda Reports** are prepared by City staff and are available for public review on Tuesday evening, six days prior to the City Council meeting in the Civic Center Library, 1188 South Livermore Avenue, Livermore, and at the City Clerk's Office, 1052 South Livermore Avenue, Livermore. The Agenda is also available on the City's website, http://LivermoreCA.gov/agenda.

Under Government Code §54957.5, any **supplemental material** distributed to the members of the City Council after the posting of this agenda will be available for public review in the City Clerk's Office, 1052 South Livermore Avenue, Livermore, and included in the agenda packet available on the City's web site at http://LivermoreCA.gov/agenda.

PURSUANT TO TITLE II OF THE AMERICANS WITH DISABILITIES ACT (CODIFIED AT 42 UNITED STATES CODE SECTION 12101 AND 28 CODE OF FEDERAL REGULATIONS PART 35), AND SECTION 504 OF THE REHABILITATION ACT OF 1973, THE CITY OF LIVERMORE DOES NOT DISCRIMINATE ON THE BASIS OF RACE, COLOR, RELIGION, NATIONAL ORIGIN, ANCESTRY, SEX, DISABILITY, AGE OR SEXUAL ORIENTATION IN THE PROVISION OF ANY SERVICES, PROGRAMS, OR ACTIVITIES. TO ARRANGE AN ACCOMMODATION IN ORDER TO PARTICIPATE IN THIS PUBLIC MEETING, PLEASE CONTACT THE ADA COORDINATOR AT ADACOORDINATOR@LIVERMORECA.GOV OR CALL (925) 960-4170 (VOICE) OR (925) 960- 4104 (TDD) AT LEAST THREE (3) BUSINESS DAYS IN ADVANCE OF THE MEETING.

CITY COUNCIL STAFF REPORT **ITEM NO. 3.1**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Marianna Marysheva, City Manager

SUBJECT: Confirm Advisory Body appointments to the Airport Commission, the Alameda County Mosquito Abatement District Board of Trustees, Beautification Committee, Commission for the Arts, Historic Preservation Commission, Library Board of Trustees, and City Historian, and direct the City Clerk to administer the oath of office.

RECOMMENDED ACTION

The City Council Subcommittee on Advisory Bodies recommends the City Council confirm the advisory body appointments to the Airport Commission, the Alameda County Mosquito Abatement District Board of Trustees, Beautification Committee, Commission for the Arts, Historic Preservation Commission, and the Library Board of Trustees and direct the City Clerk to administer the oath of office.

The Historic Preservation Commission recommends the City Council appoint Alan Frank as the City Historian.

SUMMARY

On March 6 and 7, 2024, the City Council Subcommittee on Advisory Bodies interviewed applicants for vacancies on the Airport Commission, the Alameda County Mosquito Abatement District Board of Trustees, Beautification Committee, Commission for the Arts, Historic Preservation Commission, Library Board of Trustees, and have submitted their recommendation for City Council consideration and appointment.

On March 7, 2024 the Historic Preservation Commission interviewed applicants for City Historian and recommends Alan Frank for appointment to the position of City Historian.

DISCUSSION

On March 6 and 7, 2024, the City Council Subcommittee on Advisory Bodies interviewed applicants for vacancies on the Airport Commission, the Alameda County Mosquito Abatement District Board of Trustees, Beautification Committee, Commission for the Arts, Historic Preservation Commission, Library Board of Trustees, and recommends confirmation of the following appointments:

Historic Preservation Commission 2 Vacancies

Appointment to a regular term ending May 1, 2028

- Fred Cullum

Appointment to an unexpired and regular term ending May 1, 2028.

- Neal Pann

Alameda County Mosquito Abatement District Board of Trustees 1 Vacancy

Appointment to an unexpired term ending January 1, 2027.

- Maya Manoharan

Commission for the Arts 1 Vacancy

Appointment to an unexpired term ending January 1, 2025

- Thomasin Dewhurst

Livermore Airport Commission 1 Vacancy (Pilot)

Appointment to an unexpired term ending November 1, 2027.

- David Farley

Library Board of Trustees 1 Vacancy

Reappointment to a regular term ending June 1, 2027

- Richard Hunt

Beautification Committee 5 Vacancies

Appointment to regular terms ending June 1, 2028

- Kat Weiss
- Ann Brown

Appointment to an unexpired term ending June 1, 2027

- Andrew Wang

Appointments to unexpired and regular term ending June 1, 2028

- Ron Kraft
- Tom Bradley

On March 7, 2024 the Historic Preservation Commission interviewed applicants for City Historian and recommends confirmation of the following appointment:

City Historian 1 Vacancy

Appointment to an unexpired term ending February 1, 2026

- Alan Frank

Upon the City Council's confirmation of the appointments by motion, the City Clerk will administer the oath of office to new appointees.

FISCAL AND ADMINISTRATIVE IMPACTS

No material fiscal or administrative impacts result from confirmation of these appointments.

Proclamation

of the

City of Livermore

Declaring

MARCH FOR MEALS (#SAVELUNCH) MONTH

March 2024

WHEREAS, *on March 22, 1972, President Richard Nixon amended the Older Americans Act of 1965, establishing a national nutrition program for seniors 60 years and older; and*

WHEREAS, *twenty-two years ago, Meals on Wheels America initiated the March for Meals (#SaveLunch) campaign to recognize and raise awareness about the escalating problem of senior hunger in America; and*

WHEREAS, *in partnership with Stanford Health Care Tri-Valley, the Spectrum Community Services' Meals on Wheels Program in Livermore has served the community admirably for over 30 years, delivering over 34,047 nutritious meals to more than 250 homebound seniors last year. Stanford Health Care Tri-Valley's menu is a model for Meals on Wheels programs nationwide, meeting the specialized dietary requirements of older adults in Livermore; and*

WHEREAS, *the dedicated volunteers of the Spectrum Community Services' Meals on Wheels Program, have served over 1,500 hours each year in Livermore, and are the backbone of the program, providing not only nutritious meals but also caring concern and attention to seniors and individuals with disabilities at significant risk of hunger and isolation; and*

WHEREAS, *the Spectrum Community Services' Meals on Wheels Program helps seniors maintain health and independence, preventing unnecessary falls, hospitalizations, and premature institutionalization; and provides a powerful socialization opportunity for millions of Livermore seniors, combating the negative health effects and economic consequences of loneliness and isolation;*

NOW, THEREFORE, *the City Council of the City of Livermore proclaims March 2024 as the 22nd Annual March for Meals (#SaveLunch) Month and urges residents to take this month to volunteer, donate and honor the Meals on Wheels programs, the seniors they serve and the volunteers who care for them. Furthermore, the City Council thanks staff and volunteers with Spectrum Community Services in their efforts to combat senior hunger and isolation in Livermore and the Tri-Valley community.*

TO: Honorable Mayor and City Council

FROM: Judy Erlandson, Acting Public Works Director

SUBJECT: Resolution authorizing the execution of an agreement with Roofing Constructors, Inc. dba Western Roofing Services, a subsidiary of TectaAmerica to provide annual and semi-annual roof inspections, preventative maintenance, gutter cleaning and roof repair services for City owned buildings in an amount not-to-exceed $700,000 for a three-year term ending March 31, 2027.

RECOMMENDED ACTION

Staff recommends the City Council adopt a resolution authorizing the execution of a three-year agreement with Roofing Constructors, Inc. dba Western Roofing Services, a subsidiary of TectaAmerica to provide annual and semi-annual roof inspections, preventative maintenance, gutter cleaning and roof repair services for City owned buildings in an amount not-to-exceed $700,000 for a three-year term ending March 31, 2027.

SUMMARY

The City currently uses a roofing company to provide inspection and on-call repair services for all City-owned buildings. In order to ensure that the roofs of all City-owned buildings continue to be maintained properly, staff recommends entering into an agreement with Roofing Constructors, Inc. dba Western Roofing Services, a subsidiary of TectaAmerica (Western Roofing) for these services.

DISCUSSION

The current agreement with Western Roofing to perform roofing services has expired. A new agreement is required to provide annual and semi-annual roof inspections, preventative maintenance services, gutter cleaning, roof on-call repair services and emergency leak services for roofs of all City-owned buildings.

Western Roofing holds a National Cooperative Purchasing Alliance (now OMNIA Partners) agreement # 02-75. Livermore Municipal Code Section 2.68.370 permits the formal bidding procedure for supplies, equipment, and general services to be dispensed with when purchased through a cooperative purchasing arrangement.

In such cases, the supplies and services subject to the agreement or program and the underlying purchase must have been made using a quotation or bid procedure at least as restrictive as the City's procedure. The City is a member of OMNIA Partners and this cooperative purchasing process meets the requirements of the Livermore Municipal Code.

FISCAL AND ADMINISTRATIVE IMPACTS

The total not-to-exceed cost for this three-year agreement is $700,000 which is currently budgeted in a variety of operating funds including various short keys in the General Fund, Airport, and Water funds.

COMMUNITY PILLAR

5: A City That Works

GOAL

14: Develop and maintain the City's infrastructure, facilities, and property

Tab 1 – Master Agreement
General Terms and Conditions

- Customer Support
  - The vendor shall provide timely and accurate technical advice and sales support. The vendor shall respond to such requests within one (1) working day after receipt of the request.

- Disclosures
  - Respondent affirms that he/she has not given, offered to give, nor intends to give at any time hereafter any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor or service to a public servant in connection with this contract.
  - The respondent affirms that, to the best of his/her knowledge, the offer has been arrived at independently, and is submitted without collusion with anyone to obtain information or gain any favoritism that would in any way limit competition or give an unfair advantage over other vendors in the award of this contract.

- Renewal of Contract
  - Unless otherwise stated, all contracts are for a period of four (4) years with an option to renew annually for an additional three (3) years if agreed to by Region 14 ESC and the vendor.

- Funding Out Clause
  - Any/all contracts exceeding one (1) year shall include a standard "funding out" clause. A contract for the acquisition, including lease, of real or personal property is a commitment of the entity's current revenue only, provided the contract contains either or both of the following provisions:
  - Retains to the entity the continuing right to terminate the contract at the expiration of each budget period during the term of the contract and is conditioned on a best efforts attempt by the entity to obtain appropriate funds for payment of the contract.

- Shipments (if applicable)
  - The awarded vendor shall ship ordered products within the written estimate of delivery time by the vendor to the entity after the receipt of the order unless modified. If a product cannot be shipped within that time, the awarded vendor shall notify the entity placing the order as to why the product has not shipped and shall provide an estimated shipping date. At this point the participating entity may cancel the order if estimated shipping time is not acceptable. All deliveries shall be freight prepaid, F.O.B. destination.

- Tax Exempt Status
  - Since this is a national contract, knowing the tax laws in each state is the sole responsibility of the vendor.

- Payments
  - The entity using the contract will make payments directly to the awarded vendor or their affiliates as long as written request and approval by NCPA is provided to the awarded vendor.

- Adding authorized distributors/dealers
  - Awarded vendors may submit a list of distributors/partners/resellers to sell under their contract throughout the life of the contract. Vendor must receive written approval from NCPA before such distributors/partners/resellers considered authorized.
  - Purchase orders and payment can only be made to awarded vendor or distributors/business partners/resellers previously approved by NCPA.
  - Pricing provided to members by added distributors or dealers must also be less than or equal to the pricing offered by the awarded contract holder.
  - All distributors/partners/resellers are required to abide by the Terms and Conditions of the vendor's agreement with NCPA.

- Pricing
  - <u>All pricing submitted to shall include, as a cost of sale to the awarded vendor, the administrative fee to be remitted to NCPA by the awarded vendor.</u> It is the awarded vendor's responsibility to keep all pricing up to date and on file with NCPA. For those pricing requiring annual or periodic pricing updates, awarded vendors are expected to provide these changes as submitted.
  - All deliveries shall be freight prepaid, F.O.B. destination and shall be included in all pricing offered unless otherwise clearly stated in writing

- Warranty
  - Proposals should address each of the following:
    - Applicable warranty and/or guarantees of equipment and installations including any conditions and response time for repair and/or replacement of any components during the warranty period.
    - Availability of replacement parts
    - Life expectancy of equipment under normal use
    - Detailed information as to proposed return policy on all equipment
  - All supplies, equipment and services shall include manufacturer's minimum standard warranty and one (1) year labor warranty unless otherwise agreed to in writing.

- Administrative Fee
  - All pricing submitted to Region 14 ESC shall include the administrative fee to be remitted to NCPA by the awarded vendor.
  - The awarded vendor agrees to pay administrative fees to NCPA of **three percent (3%)**.

- Audit rights
  - Vendor shall, at Vendor's sole expense, maintain appropriate due diligence of all purchases made by any entity that utilizes this Agreement. NCPA and Region 14 ESC each reserve the right to audit the accounting for a period of three (3) years from the time such purchases are made. This audit right shall survive termination of this Agreement for a period of one (1) year from the effective date of termination. In the State of New Jersey, this audit right shall survive termination of this Agreement for a period of five (5) years from the date of final payment. Such records shall be made available to the New Jersey Office of the State Comptroller upon request.
  - Region 14 ESC shall have the authority to conduct random audits of Vendor's pricing that is offered to eligible entities at Region 14 ESC's sole cost and expense. Notwithstanding the foregoing, in the event that Region 14 ESC is made aware of any pricing being offered to eligible agencies that is materially inconsistent with the pricing under this agreement, Region 4 ESC shall have the ability to conduct an extensive audit of Vendor's pricing at Vendor's sole cost and expense. Region 14 ESC may conduct the audit internally or may engage a third-party auditing firm. In the event of an audit, the requested materials shall be provided in the format and at the location designated by Region 14 ESC or NCPA.

- Indemnity
  - The awarded vendor shall protect, indemnify, and hold harmless Region 14 ESC and its participants, administrators, employees and agents against all claims, damages, losses and expenses arising out of or resulting from the actions of the vendor, vendor employees or vendor subcontractors in the preparation of the solicitation and the later execution of the contract.

- Licenses and Duty to keep current licenses
  - Vendor shall maintain in current status all federal, state and local licenses, bonds and permits required for the operation of the business conducted by vendor. Vendor shall remain fully informed of and in compliance with all ordinances and regulations pertaining to the lawful provision of services under the contract. Region 14 ESC reserves the right to stop work and/or cancel the contract of any vendor whose license(s) expire, lapse, are suspended or terminated. Vendor is expected to provide all required license(s) with this RFP response.

- Franchise Tax
  - The respondent hereby certifies that he/she is not currently delinquent in the payment of any franchise taxes.

- Supplemental Agreements
  - The entity participating in this contract and awarded vendor may enter into a separate supplemental agreement to further define the level of service requirements over and above the minimum defined in this contract i.e. invoice requirements, ordering requirements, specialized delivery, etc. Any supplemental agreement developed as a result of this contract is exclusively between the participating entity and awarded vendor.

- Certificates of Insurance
  - Certificates of insurance shall be delivered to the Public Agency prior to commencement of work. The insurance company shall be licensed in the applicable state in which work is

being conducted. The awarded vendor shall give the participating entity a minimum of ten (10) days notice prior to any modifications or cancellation of policies. The awarded vendor shall require all subcontractors performing any work to maintain coverage as specified.

- Legal Obligations
  - It is the Respondent's responsibility to be aware of and comply with all local, state, and federal laws governing the sale of products/services identified in this RFP and any awarded contract and shall comply with all while fulfilling the RFP. Applicable laws and regulation must be followed even if not specifically identified herein.
- Protest
  - A protest of an award or proposed award must be filed in writing within ten (10) days from the date of the official award notification and must be received by 5:00 pm CST. No protest shall lie for a claim that the selected Vendor is not a responsible Bidder. Protests shall be filed with Region 14 ESC and shall include the following:
    - Name, address and telephone number of protester
    - Original signature of protester or its representative
    - Identification of the solicitation by RFP number
    - Detailed statement of legal and factual grounds including copies of relevant documents and the form of relief requested
  - Any protest review and action shall be considered final with no further formalities being considered.
- Force Majeure
  - If by reason of Force Majeure, either party hereto shall be rendered unable wholly or in part to carry out its obligations under this Agreement then such party shall give notice and full particulars of Force Majeure in writing to the other party within a reasonable time after occurrence of the event or cause relied upon, and the obligation of the party giving such notice, so far as it is affected by such Force Majeure, shall be suspended during the continuance of the inability then claimed, except as hereinafter provided, but for no longer period, and such party shall endeavor to remove or overcome such inability with all reasonable dispatch.
  - The term Force Majeure as employed herein, shall mean acts of God, strikes, lockouts, or other industrial disturbances, act of public enemy, orders of any kind of government of the United States or any civil or military authority; insurrections; riots; epidemics; landslides; lighting; earthquake; fires; hurricanes; storms; floods; washouts; droughts; arrests; restraint of government and people; civil disturbances; explosions, breakage or accidents to machinery, pipelines or canals, or other causes not reasonably within the control of the party claiming such inability. It is understood and agreed that the settlement of strikes and lockouts shall be entirely within the discretion of the party having the difficulty, and that the above requirement that any Force Majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes and lockouts by acceding to the

demands of the opposing party or parties when such settlement is unfavorable in the judgment of the party having the difficulty

- Prevailing Wage
  - It shall be the responsibility of the Vendor to comply, when applicable, with the prevailing wage legislation in effect in the jurisdiction of the purchaser. It shall further be the responsibility of the Vendor to monitor the prevailing wage rates as established by the appropriate department of labor for any increase in rates during the term of this contract and adjust wage rates accordingly.

- Miscellaneous
  - Either party may cancel this contract in whole or in part by providing written notice. The cancellation will take effect 30 business days after the other party receives the notice of cancellation. After the 30th business day all work will cease following completion of final purchase order.

- Cancellation for Non-Performance or Contractor Deficiency
  - Region 14 ESC may terminate any contract if awarded vendor has not used the contract, or if purchase volume is determined to be low volume in any 12-month period.
  - Region 14 ESC reserves the right to cancel the whole or any part of this contract due to failure by contractor to carry out any obligation, term or condition of the contract.
  - Region 14 ESC may issue a written deficiency notice to contractor for acting or failing to act in any of the following:
    - Providing material that does not meet the specifications of the contract;
    - Providing work and/or material that was not awarded under the contract;
    - Failing to adequately perform the services set forth in the scope of work and specifications;
    - Failing to complete required work or furnish required materials within a reasonable amount of time;
    - Failing to make progress in performance of the contract and/or giving Region 14 ESC reason to believe that contractor will not or cannot perform the requirements of the contract;
  - Upon receipt of a written deficiency notice, contractor shall have ten (10) days to provide a satisfactory response to Region 14 ESC. Failure to adequately address all issues of concern may result in contract cancellation. Upon cancellation under this paragraph, all goods, materials, work, documents, data and reports prepared by contractor under the contract shall become the property of Region 14 ESC on demand.

- Open Records Policy
  - Because Region 14 ESC is a governmental entity responses submitted are subject to release as public information after contracts are executed. If a vendor believes that its response, or parts of its response, may be exempted from disclosure, the vendor must specify page-by-page and line-by-line the parts of the response, which it believes, are exempt. In addition, the respondent must specify which exception(s) are applicable and provide detailed reasons to substantiate the exception(s).
  - The determination of whether information is confidential and not subject to disclosure is the duty of the Office of Attorney General (OAG). Region 14 ESC must provide the OAG sufficient information to render an opinion and therefore, vague and general claims to confidentiality by the respondent are not acceptable. Region 14 ESC must comply with the

opinions of the OAG. Region14 ESC assumes no responsibility for asserting legal arguments on behalf of any vendor. Respondent are advised to consult with their legal counsel concerning disclosure issues resulting from this procurement process and to take precautions to safeguard trade secrets and other proprietary information.

If awarded vendor is going to do business in the State of Arizona, the following terms and conditions shall apply

- Cancellation for Conflict of Interest

  - Per A.R.S. 38-511 a School District/public entity may cancel this Contract within three (3) years after Contract execution without penalty or further obligation if any person significantly involved in initiating, negotiating, securing, drafting, or creating the Contract on behalf of the School District/public entity is, or becomes at any time while the Contract or an extension the Contract is in effect, an employee of or a consultant to any other party to this Contract with respect to the subject matter of the Contract. The cancellation shall be effective when the awarded vendor receives written notice of the cancellation unless the notice specifies a later time.

- Registered Sex Offender Restriction

  - Pursuant to this order, the awarded vendor agrees by acceptance of this order that no employee of the awarded vendor or a subcontractor of the awarded vendor, who has been adjudicated to be a registered sex offender, will perform work on any School District's premises or equipment at any time when District students are, or are reasonably expected to be, present. The awarded vendor further agrees by acceptance of this order that a violation of this condition shall be considered a material breach and may result in a cancellation of the order at the District's discretion.

- Contract's Employment Eligibility

  - By entering the contract, awarded vendor warrants compliance with A.R.S. 41-4401, A.R.S. 23-214, the Federal Immigration and Nationality Act (FINA), and all other federal immigration laws and regulations. A School District/public entity may request verification of compliance from any contractor or subcontractor performing work under this contract. A School District/public entity reserves the right to confirm compliance in accordance with applicable laws. Should the School District/public entity suspect or find that the awarded vendor or any of its subcontractors are not in compliance, the School District/public entity may pursue any and all remedies allowed by law, including, but not limited to: suspension of work, termination of the contract for default, and suspension and/or debarment of the awarded vendor. All costs necessary to verify compliance are the responsibility of the award vendor.

- Terrorism Country Divestments

  - Per A.R.S. 35-392, a School District/public entity is prohibited from purchasing from a company that is in violation of the Export Administration Act.

- Fingerprint Checks

  - If required to provide services on School District/public entity's property, awarded vendor shall comply with A.R.S. 15-511(h).

- Indemnification

  - Notwithstanding all other provisions of this agreement, School District/public entity does not agree to accept responsibility, waive liability, or indemnify the awarded vendor, in whole or in part, for the errors, negligence, hazards, liabilities, contract breach and/or omissions of the awarded vendor, its employees and/or agents.

Process

Region 14 ESC will evaluate proposals in accordance with, and subject to, the relevant statutes, ordinances, rules, and regulations that govern its procurement practices. NCPA will assist Region 14 ESC in evaluating proposals. Award(s) will be made to the prospective vendor(s) whose response is determined to be the most advantageous to Region 14 ESC, NCPA, and its participating agencies. To qualify for evaluation, response must have been submitted on time, and satisfy all mandatory requirements identified in this document.

- Contract Administration
  - The contract will be administered by Region 14 ESC. The National Program will be administered by NCPA on behalf of Region 14 ESC.
- Contract Term
  - The contract term will be for four (4) years starting from the date of the award. The contract may be renewed for up to three (3) additional one-year terms or any combination of time equally not more than 3 years.
  - It should be noted that maintenance/service agreements may be issued for up to (5) years under this contract even if the contract only lasts for the initial term of the contract. NCPA will monitor any maintenance agreements for the term of the agreement provided they are signed prior to the termination or expiration of this contract.
- Contract Waiver
  - Any waiver of any provision of this contract shall be in writing and shall be signed by the duly authorized agent of Region 14 ESC. The waiver by either party of any term or condition of this contract shall not be deemed to constitute waiver thereof nor a waiver of any further or additional right that such party may hold under this contract.
- Products and Services additions
  - Products and Services may be added to the resulting contract during the term of the contract by written amendment, to the extent that those products and services are within the scope of this RFP and has written approval of NCPA and Region 14ESC.
- Competitive Range
  - It may be necessary for Region 14 ESC to establish a competitive range. Responses not in the competitive range are unacceptable and do not receive further award consideration.
- Deviations and Exceptions
  - Deviations or exceptions stipulated in response may result in disqualification. It is the intent of Region 14 ESC to award a vendor's complete line of products and/or services, when possible.
- Estimated Quantities
  - The estimated dollar volume of Products and Services purchased under the proposed Master Agreement is 20 million dollars annually. This estimate is based on the anticipated volume of Region 14 ESC and current sales within the NCPA program. There is no guarantee or commitment of any kind regarding usage of any contracts resulting from this solicitation

- Evaluation
  - Region 14 ESC will review and evaluate all responses in accordance with, and subject to, the relevant statutes, ordinances, rules and regulations that govern its procurement practices. NCPA will assist the lead agency in evaluating proposals. Recommendations for contract awards will be based on multiple factors, each factor being assigned a point value based on its importance.
- Formation of Contract
  - A response to this solicitation is an offer to contract with Region 14 ESC based upon the terms, conditions, scope of work, and specifications contained in this request. A solicitation does not become a contract until it is accepted by Region 14 ESC. The prospective vendor must submit a signed Signature Form with the response thus, eliminating the need for a formal signing process.
- NCPA Administrative Agreement
  - The vendor will be required to enter and execute the National Cooperative Purchasing Alliance Administration Agreement with NCPA upon award with Region 14 ESC. The agreement establishes the requirements of the vendor with respect to a nationwide contract effort.
- Clarifications / Discussions
  - Region 14 ESC may request additional information or clarification from any of the respondents after review of the proposals received for the sole purpose of elimination minor irregularities, informalities, or apparent clerical mistakes in the proposal. Clarification does not give respondent an opportunity to revise or modify its proposal, except to the extent that correction of apparent clerical mistakes results in a revision. After the initial receipt of proposals, Region 14 ESC reserves the right to conduct discussions with those respondent's whose proposals are determined to be reasonably susceptible of being selected for award. Discussions occur when oral or written communications between Region 14 ESC and respondents are conducted for the purpose clarifications involving information essential for determining the acceptability of a proposal or that provides respondent an opportunity to revise or modify its proposal. Region 14 ESC will not assist respondent bring its proposal up to the level of other proposals through discussions. Region 14 ESC will not indicate to respondent a cost or price that it must meet to neither obtain further consideration nor will it provide any information about other respondents' proposals or prices.
- Multiple Awards
  - Multiple Contracts may be awarded as a result of the solicitation. Multiple Awards will ensure that any ensuing contracts fulfill current and future requirements of the diverse and large number of participating public agencies.
- Past Performance
  - Past performance is relevant information regarding a vendor's actions under previously awarded contracts; including the administrative aspects of performance; the vendor's history of reasonable and cooperative behavior and commitment to customer satisfaction; and generally, the vendor's businesslike concern for the interests of the customer.

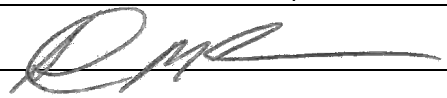
Evaluation Criteria

- Product & Services/Pricing (40 points)
  - Respondent(s)' products and services (e.g.; quality and breadth of product(s)/service(s), description(s) quality, reputation in the marketplace, average on time delivery rate and historical shipping timelines, return and restocking policies and applicable fees, average Fill Rate, shipping charges and other)
  - Competitive Level of Pricing for vendor's available products and services
  - Warranties on Respondent(s)' products and services (e.g.; availability of standard/extended warranties, pricing, detailed descriptions, ease of process and others)
  - Evidence of the ability of Respondent(s)' products and services to save members time and money (e.g.; breadth of service departments, technological advances, personnel experience, product(s) efficiencies, and others)
  - Other factors relevant to this section as submitted by the responder(s)

- Ability to Provide and Perform the Required Services for the Contract (25 points)
  - Response to emergency orders & service (e.g.; response time, breadth of service coverage, strength of meeting service and warranty needs of members)
  - Customer service/problem resolution (e.g.; technical abilities of service personnel; quality of processes,)
  - Invoicing process (e.g.; ease of use; transparency, billing resolutions)
  - Respondent(s)' processes, and quality of organizational structure
  - Contract implementation/Customer transition
  - Financial condition of vendor
  - Offeror's safety record (e.g.; benchmarks, lost hours, reporting)
  - Instructional materials and training (e.g.; administrative documentation, internal technical training, training of agencies)
  - Other factors relevant to this section as submitted by the proposer

- References (10 points)
  - A minimum of ten (10) customer references for product and/or services of similar scope dating within past 3 years

- Qualification and Experience (15 points)
  - Respondent(s)' reputation in the marketplace
  - Past relationship with Region 14 ESC and/or NCPA members
  - Experience with cooperative selling (e.g.; number of other cooperatives, Exhibited understanding of cooperative purchasing)
  - Experience and qualification of key employees
  - Location and number of sales persons who will work on this contract
  - Marketing plan and capability
  - Past experience working with the government sector



- Past litigation, bankruptcy, reorganization, state investigations of entity or current officers and directors
- Completeness of response (e.g.; filled out all sections, answered all questions, provided pricing)
- Other factors relevant to this section as submitted by the proposer

- Value Added Services Description, Products and/or Services (10 points)
  - Marketing and agency Training
  - Customer Service
  - Sales force training (e.g.; internal training plan, corporate officer involvement, orientation commitment)
  - Marketing plan and capability (e.g.; contract rollout plan, benchmarks, goals)
  - Green initiative(s) (e.g.; philosophy, certificates, awards)
  - Quality and breadth of value add(s)
  - Other factors relevant to this section as submitted by the proposer

Signature Form

The undersigned hereby proposes and agrees to furnish goods and/or services in strict compliance with the terms, specifications and conditions at the prices proposed within response unless noted in writing. The undersigned further certifies that he/she is an officer of the company and has authority to negotiate and bind the company named below and has not prepared this bid in collusion with any other Respondent and that the contents of this proposal as to prices, terms or conditions of said bid have not been communicated by the undersigned nor by any employee or agent to any person engaged in this type of business prior to the official opening of this proposal.

Tab 2 – NCPA Administration Agreement

This Administration Agreement is made as of __ December 6, 2019 ____, by and between National Cooperative Purchasing Alliance ("NCPA") and Tecta America Corp _____ ("Vendor").

Recitals

WHEREAS, Region 14 ESC has entered into a certain Master Agreement dated _December 6, 2019, referenced as Contract Number _ 02-75 ___, by and between Region 14 ESC and Vendor, as may be amended from time to time in accordance with the terms thereof (the "Master Agreement"), for the purchase of Roofing Products and Services;

WHEREAS, said Master Agreement provides that any state, city, special district, local government, school district, private K-12 school, technical or vocational school, higher education institution, other government agency or nonprofit organization (hereinafter referred to as "public agency" or collectively, "public agencies") may purchase products and services at the prices indicated in the Master Agreement;

WHEREAS, NCPA has the administrative and legal capacity to administer purchases under the Master Agreement to public agencies;

WHEREAS, NCPA serves as the administrative agent for Region 14 ESC in connection with other master agreements offered by NCPA

WHEREAS, Region 14 ESC desires NCPA to proceed with administration of the Master Agreement;

WHEREAS, NCPA and Vendor desire to enter into this Agreement to make available the Master Agreement to public agencies on a national basis;

NOW, THEREFORE, in consideration of the payments to be made hereunder and the mutual covenants contained in this Agreement, NCPA and Vendor hereby agree as follows:

- General Terms and Conditions
  - The Master Agreement, attached hereto as Tab 1 and incorporated herein by reference as though fully set forth herein, and the terms and conditions contained therein shall apply to this Agreement except as expressly changed or modified by this Agreement.
  - NCPA shall be afforded all of the rights, privileges and indemnifications afforded to Region 14 ESC under the Master Agreement, and such rights, privileges and indemnifications shall accrue and apply with equal effect to NCPA under this Agreement including, but not limited to, the Vendor's obligation to provide appropriate insurance and certain indemnifications to Region 14 ESC.
  - Vendor shall perform all duties, responsibilities and obligations required under the Master Agreement in the time and manner specified by the Master Agreement.
  - NCPA shall perform all of its duties, responsibilities, and obligations as administrator of purchases under the Master Agreement as set forth herein, and Vendor acknowledges that NCPA shall act in the capacity of administrator of purchases under the Master Agreement.
  - With respect to any purchases made by Region 14 ESC or any Public Agency pursuant to the Master Agreement, NCPA (a) shall not be construed as a dealer, re-marketer, representative, partner, or agent of any type of Vendor, Region 14 ESC, or such Public Agency, (b) shall not be obligated, liable or responsible (i) for any orders made by Region

14 ESC, any Public Agency or any employee of Region 14 ESC or Public Agency under the Master Agreement, or (ii) for any payments required to be made with respect to such order, and (c) shall not be obligated, liable or responsible for any failure by the Public Agency to (i) comply with procedures or requirements of applicable law, or (ii) obtain the due authorization and approval necessary to purchase under the Master Agreement. NCPA makes no representations or guaranties with respect to any minimum purchases required to be made by Region 14 ESC, any Public Agency, or any employee of Region 14 ESC or Public Agency under this Agreement or the Master Agreement.

- The Public Agency participating in the NCPA contract and Vendor may enter into a separate supplemental agreement to further define the level of service requirements over and above the minimum defined in this contract i.e. invoice requirements, ordering requirements, specialized delivery, etc. Any supplemental agreement developed as a result of this contract is exclusively between the Public Agency and Vendor. NCPA, its agents, members and employees shall not be made party to any claim for breach of such agreement.

- Term of Agreement
  - This Agreement shall be in effect so long as the Master Agreement remains in effect, provided, however, that the obligation to pay all amounts owed by Vendor to NCPA through the termination of this Agreement and all indemnifications afforded by Vendor to NCPA shall survive the term of this Agreement.

- Fees and Reporting
  - The awarded vendor shall electronically provide NCPA with a detailed monthly or quarterly report showing the dollar volume of all sales under the contract for the previous month or quarter. Reports shall be sent via e-mail to NCPA offices at reporting@ncpa.us. Reports are due on the fifteenth (15th) day after the close of the previous month or quarter. It is the responsibility of the awarded vendor to collect and compile all sales under the contract from participating members and submit one (1) report. The report shall include at least the following information as listed in the example below:

Agency Name	Zip Code	State	RQN Proposal #	Order Date	Internal PO, Job #, FX#, Notes etc.	Sale Amount	Admin Fee (3%)
						Total	_

  - Each month or quarter NCPA will invoice the vendor based on the total of sale amount(s) reported. From the invoice the vendor shall pay to NCPA the administrative fee on the amount of the agency's purchase order less any applicable sales tax and Performance and/or Payment bond cost. Deadline for term of payment will be included in the invoice NCPA provides.
  - Supplier shall maintain an accounting of all purchases made by Public Agencies under the Master Agreement. NCPA and Region 14 ESC reserve the right to audit the accounting for a period of four (4) years from the date NCPA receives the accounting. In the event of such an audit, the requested materials shall be provided at the location designated by Region 14 ESC or NCPA. In the event such audit reveals an underreporting of Contract Sales and a resulting underpayment of administrative fees, Vendor shall promptly pay NCPA the amount of such underpayment, together with interest on such amount and shall be obligated to reimburse NCPA's costs and expenses for such audit.

- General Provisions
  - This Agreement supersedes any and all other agreements, either oral or in writing, between the parties hereto with respect to the subject matter hereof, and no other agreement, statement, or promise relating to the subject matter of this Agreement which is not contained herein shall be valid or binding.
  - Awarded vendor agrees to allow NCPA to use their name and logo within website, marketing materials and advertisement. Any use of NCPA name and logo or any form of publicity regarding this contract by awarded vendor must have prior approval from NCPA.
  - If any action at law or in equity is brought to enforce or interpret the provisions of this Agreement or to recover any administrative fee and accrued interest, the prevailing party shall be entitled to reasonable attorney's fees and costs in addition to any other relief to which such party may be entitled.
  - Neither this Agreement nor any rights or obligations hereunder shall be assignable by Vendor without prior written consent of NCPA, provided, however, that the Vendor may, without such written consent, assign this Agreement and its rights and delegate its obligations hereunder in connection with the transfer or sale of all or substantially all of its assets or business related to this Agreement, or in the event of its merger, consolidation, change in control or similar transaction. Any permitted assignee shall assume all assigned obligations of its assignor under this Agreement.
  - This Agreement and NCPA's rights and obligations hereunder may be assigned at NCPA's sole discretion, to an existing or newly established legal entity that has the authority and capacity to perform NCPA's obligations hereunder
  - All written communications given hereunder shall be delivered to the addresses as set forth below.

NCPA Registered Vendor Quotation Number

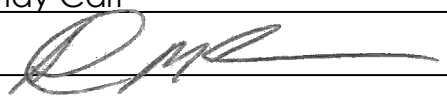
RFP responders are requested to agree to a quotation number registration program to provide consistency and faster service for our facility awarded vendors, agency members and participants. The process will require Facility Contract holders to register and receive a NCPA Vendor Registered Quotation Number that must be prominently displayed on each proposal(s) that you present to the agencies. The system will track Facility transactions from the initial proposal stage to the completion of each project. NCPA has assembled an experienced Facilities Management Team that stands ready and willing to assist its vendors in providing quality services to the awarded vendor's organization. Failure to receive the Vendor Registered Quotation Number can result in potential delays to your services and the only acceptable proposals need to have a NCPA Vendor Registered Quotation Number.

NCPA Registered Vendor Quotation Number Process

Fill out the form on the Facilities page at www.NCPA.us

***Click on RQN Logo at the bottom of the home page and a form will pop up.**
*** Fill out and submit.**

- All registered vendor quotation number requests must be submitted *and* a proposal number received *before* you present it to your potential customer.
- You will have a response with a NCPA Vendor Registered Quotation Number within 5 minutes.
- Include the quotation number on all proposals.



This document acknowledges that you have received and agree to the details, directions and expectations of the NCPA Vendor Registered Quotation Number process.

Date: 11/15/19

RFP Number: 28-19

Tab 3 – Vendor Questionnaire

Please provide responses to the following questions that address your company's operations, organization, structure, and processes for providing products and services.

- States Covered
  - Bidder must indicate any and all states where products and services can be offered.
  - Please indicate the price co-efficient for each state if it varies.

☒ **50 States & District of Columbia** (Selecting this box is equal to checking all boxes below)

☐ Alabama	☐ Maryland	☐ South Carolina
☐ Alaska	☐ Massachusetts	☐ South Dakota
☐ Arizona	☐ Michigan	☐ Tennessee
☐ Arkansas	☐ Minnesota	☐ Texas
☐ California	☐ Mississippi	☐ Utah
☐ Colorado	☐ Missouri	☐ Vermont
☐ Connecticut	☐ Montana	☐ Virginia
☐ Delaware	☐ Nebraska	☐ Washington
☐ District of Columbia	☐ Nevada	☐ West Virginia
☐ Florida	☐ New Hampshire	☐ Wisconsin
☐ Georgia	☐ New Jersey	☐ Wyoming
☐ Hawaii	☐ New Mexico	
☐ Idaho	☐ New York	
☐ Illinois	☐ North Carolina	
☐ Indiana	☐ North Dakota	
☐ Iowa	☐ Ohio	
☐ Kansas	☐ Oklahoma	
☐ Kentucky	☐ Oregon	
☐ Louisiana	☐ Pennsylvania	
☐ Maine	☐ Rhode Island	

☒ **All US Territories and Outlying Areas** (Selecting this box is equal to checking all boxes below)

- ☐ American Samoa
- ☐ Federated States of Micronesia
- ☐ Guam
- ☐ Midway Islands
- ☐ Northern Marina Islands
- ☐ Puerto Rico
- ☐ U.S. Virgin Islands

- Minority and Women Business Enterprise (MWBE) and (HUB) Participation
  - It is the policy of some entities participating in NCPA to involve minority and women business enterprises (MWBE) and historically underutilized businesses (HUB) in the purchase of goods and services. Respondents shall indicate below whether or not they are an M/WBE or HUB certified.
    - Minority / Women Business Enterprise
      - Respondent Certifies that this firm is a M/WBE ☐
    - Historically Underutilized Business
      - Respondent Certifies that this firm is a HUB ☐
- Residency
  - Responding Company's principal place of business is in the city of Rosemont, State of IL
- Felony Conviction Notice
  - Please Check Applicable Box;
    - ☐ A publically held corporation; therefore, this reporting requirement is not applicable.
    - ☒ Is not owned or operated by anyone who has been convicted of a felony.
    - ☐ Is owned or operated by the following individual(s) who has/have been convicted of a felony
  - If the 3rd box is checked, a detailed explanation of the names and convictions must be attached.
- Distribution Channel
  - Which best describes your company's position in the distribution channel:
    - ☐ Manufacturer Direct
    - ☒ Authorized Distributor
    - ☒ Value-added reseller
    - ☐ Certified education/government reseller
    - ☒ Manufacturer marketing through reseller
    - ☒ Other: Service Provider

Tecta's sales programs employ more than 80 people throughout the country who are involved on educating clients in the market place about Cooperative Purchasing.

We are the largest commercial roofing contractor in the U.S. We are certified with all major manufacturers for all major roof system types. We operate in all 50 states and all U.S. territories, and can service 90% of the country's population within 4 hours.

Quality is assured and maintained throughout each project through the implementation of a Quality Control Plan (QCP), which establishes the responsibilities and administrative methods our team will use to ensure client satisfaction. The QCP will outline the desired results (preparation phase), perform work that meets these standards (implementation phase), and regularly monitor work performance to secure results (follow-up phase). Each individual team member is responsible for

checking his or her own work, which is continually monitored by the Quality Control Manager (QCM). We understand that the monetary and scheduling costs involved in "re-work" situations can add up quickly, so we proactively build quality into each step of the design and construction process. In addition, our QCM makes random, unscheduled inspections of project sites. This extra check helps reinforce proper work procedures by enabling our QC staff to view work in progress, without prior notice. The results of these unannounced inspections are recorded and properly attended to. The goal of the QCP is to prevent problems, or at worst to catch problems before they become costly to the bottom line. For Jordon Construction, Quality Control is not simply a check at the end of a project, it is a culture that is maintained throughout the contract.

Tecta America works closely with manufacturers and distributors to identify changes in products and materials that result in reduced costs. Tecta has instituted a rebate program with all major manufacturers to incentivize manufacturers' involvement with Tecta to ensure price changes are followed as they happen.

Tecta's service program is the largest in the nation due to the quality we provide.

Tecta will provide all the necessary marketing material to inform and educate our clients and NCPA members.

Tecta receives a request from the client, an estimate is developed, it is then audited by the NCPA and then issued to the client for approval. Once the client accepts the the proposal and issues a PO, Then the material is ordered and scheduled for delivery to the client.

Tecta offers a 2 year guarantee on installation and honors all manufacturer warranties.

Tecta employs Quality Assurance personnel who work with all operating units and project managers to ensure that all workmanship and material meet the requirements of the client's specified order.

Tecta offers can offer an extension to the 2 year guarantee on installation depending on the work required and the material ordered. This can be reviewed on a case by case basis.

Tecta's proprietary systems and programs in place track more than 60,000 service and installations a year.

We offer services in all 50 states, US territories and Canada.

Tecta provides 24 hour emergency service with the ability to service 90% of the US population within 4 hours of initial request. No other roofing company comes close.

Tecta's service technicians are always amongst our most experienced employees. They are experts in all the necessary processes and procedures to assist in any client's needs.

It is mandatory that all service work is followed by a supervisor's evaluation with the customer and the service team.

Tecta's service program is the largest in the nation due to the quality we provide

Tecta utilizes all the industry standard project tracking tools and software available to the industry, i.e. Primavera, Microsoft Projects, etc.

Tecta has provided the necessary logos and will update the NCPA with all new marketing material regularly.

Tecta will continue to be diligent about monthly sales reporting as required.

CULTURE & PROCESS

Today's roofing systems are advanced and complex; yet despite this complexity, many common roofing issues can arise. Typical concerns include leaking, premature failure, and unexpected expenses. As well, potential downtime related to roof problems, and lost inventory or interior damage, can negatively influence the building's occupants. It is important for you to partner with a professional roofing contractor that understands your specific business needs. Tecta America Corp has worked with many organizations like the National Cooperative Purchasing Alliance and we empathize with the roofing challenges that affect your operation. Below are several of the issues that you said are most important to the NCPA entities.

Correcting Existing Problems
Whatever the original cause, it is important to address existing problems before the same mistakes are made again and contribute to the failure of the new roofing system. Some of the more typical existing roofing problems include:

- Condensation
- Ponding
- Structural Defects
- Membrane Failure
- Improper Detailing
- Improper Insulation Values
- Inappropriate Material Selection

Handling Complex Logistical Solutions
The National Cooperative Purchasing Alliance knows that good value is a negotiated solution that provides the optimum results at the best available price and that the process of negotiation requires working with established and trustworthy partners. The key to obtaining cost-effective results is:

- Contractors who are able to provide full technical services
- A broad range of possible roofing systems
- Organizational strength, knowledge and experience to perform the work
- Backed up with warranties and on-going maintenance programs
- National network of Tecta contractors.

TECTA AMERICA

Plans for a Roofing Management Program

Lengthening the service life of your physical assets is crucial to your bottom line results. Proper management is the key to success. Whether a roofing management program is initiated from day one or at some later point in the life of a facility, it requires:

- Planning
- Prevention
- Communication

Preventing Disruption of Business

A leaking or damaged roof can have a serious impact on operations, ranging from bad public relations to financial losses, including:

- Tenant Complaints and Legal Actions
- Customer Dissatisfaction
- Line Shutdown
- Product Contamination - Inventory Damage
- Just-in-Time Breakdown
- Equipment Damage
- Employee Work Stoppage

Avoiding Safety Problems

Protecting customers, employees, tenants and visitors can complicate a roofing system project.

- Accident & Injury Prevention
- Customers/Clients and Personnel
- Building and Products
- Records and Insurance
- Publicity and Public Relations
- Security Issues
- Costs of Not Being Safe

GOALS AND OBJECTIVES FOR YOUR ROOFING PROGRAM

Your roofing program is an investment; and Tecta America Corp's primary responsibility is to help you maximize that investment. The first step in that process is to understand your core objectives. Different customers, at different times, have changing objectives related to their roofing system. These goals range from budgeting and expense control—to leak prevention, interior protection, and extending the life of the roof. Below are several of the key goals we believe the NCPA wants to achieve with your roofing program.

24/7/365

The roof over your head is our main concern. We express that concern by structuring our service and support to be available 24 hours a day, 7 days a week, 365 days a year, just the same way your roofing systems must support and protect your operations. The requirements of roofing never take a day off and neither do we. We are here to serve you, so we can be there when you need us.

TECTA AMERICA

Ensure Confidence in Your Roofing Documentation
With a portfolio of roofing assets to manage and track, it is important that you have confidence in the timeliness and accuracy of your repair documentation. By working with Tecta America, you will know exactly what repair and maintenance services you receive and will be able to clearly understand your invoice and allocate costs appropriately.

Total Roofing Management Solutions
You want a formalized set of time-tested procedures, customized to the requirements of your own roofing systems, combined with preventative programs, emergency response and patch-and-repair programs… plus inspection and analysis, budgeting, planning and forecasting, energy surveys, and life-cycle costing. In other words, you want it all.
And that is what we deliver. These procedures combined with the history of Tecta, our financial stability, our extensive insurance coverage and our success in focusing on establishing and maintaining long-term relationships, make our Tecta Care and Tecta Plan Roofing Management® programs more than a symbol of excellence in roofing management. You can take it to the bank.

Fast Response, Full Service
We maintain rapid-response teams to handle problems related to weather, accidents or other emergencies. As part of Tecta, we can call upon the resources of the all the other Tecta roofing organizations nation-wide should the need arise.

Workers with Security Clearance
Because most government buildings are secure sites, it is important for contractors doing business with the GSA to have a proven process for clearing employees for access to federal facilities. You need a contractor who understands the screening requirements and knows how to properly complete and process all required background and clearance documentation.

RECOMMENDATIONS FOR THE NCPA

TECTA AMERICA'S SOLUTIONS DESIGNED TO ADDRESS YOUR NEEDS

Every day, the entities served by the NCPA deal with the challenges and concerns directly associated with its core business. Dealing with their roof is not, and should not be one of them. To ensure a successful roofing program, you need to rely on your trusted business partner to provide a combination of products and services that best suit your needs. You expect them to lend experience, give advice, and offer guidance on the best approaches to meet your needs. You also require a partner that will be there if something goes wrong; and that has the experience and sense of urgency to resolve issues that arise.

TECTA AMERICA

Production Roofing

Our roofing solutions are designed to ensure you get the right roof system for your facility and business needs; installed on time and on budget. Your roof is one of the largest facility expenses you must budget for—and it affects the success your operation. Tecta America's roofing solutions give you the peace-of-mind knowing that your roof system is installed with quality workmanship and safety at the forefront. Because we work with all manufacturers and all roof systems, we can help the NCPA understand the alternatives and make the best decisions for your ownership goals. In addition, our years of experience and financial stability give you the assurance that we will do the job right, and be around for the long-term to provide ongoing support and maintenance and honor your roof system warranties.

Roof Asset Management

Our roof asset management solution will give the NCPA access to accurate and real-time information in order to properly manage, maintain, and budget the roofing systems at your multiple facilities. Unique tracking and monitoring tools, combined with relevant metrics and costing information, allow you to better forecast your roofing expenses and extend roof life through proper maintenance.
Beginning with a comprehensive audit of your roof assets, we collect and analyze pertinent data. We rate the current condition of each roof in your portfolio and estimate remaining service life. All your important roofing information will be readily accessible: capital and expense forecasts, warranty documents, roof drawings, photos, and more. Armed with this complete collection of interdependent information, your roof planning and budgeting will be accurate—and easy.

TectaPlan – Computerized Maintenance Management for Your Roofing Portfolio

When managing multiple roofs, you need to be confident that your roofing program will perform and deliver. TectaPlan is the best resource for managing all your long-term roofing needs easily, consistently, accurately and securely. Powered by TectaTracker, this roof asset management program provides the roof condition reports and forecast data you need to avoid potential problems, helping you manage your roof assets efficiently and cost-effectively. We estimate the remaining service life of your roof through an inspection of ten critical benchmarks including membrane condition, flashing, leakage, drainage condition, roof age, present repair status, insulation condition, rooftop traffic, interior occupancy and an overall assessment.

TectaTracker includes:
Detailed Documentation
All of your critical information in one place, including drawings, photos, warranties, proposals, historical information and other documents for quick, secure access. An invaluable resource for large portfolio managers.

TECTA AMERICA

Roof Assessor
Roof Assessor provides you with an objective assessment of the roof condition and estimated remaining service life. TectaTracker's consistent rating systems help you evaluate overall roof performance.

Reports
Create customized reports on one or multiple properties in your online portfolio to meet your specific needs, and get detailed information on your roof system and roof condition.

Financial Planner
Get a better handle on budgeting. Financial Planner provides a 10-year forecast and condition-based estimate of anticipated maintenance and repair costs. In addition to budgeting operating costs, track capital expenses and perform a deferred analysis on any or all roofs in your portfolio.

How TectaTracker works:
Tecta America trained technicians gather any roof history you may have, as well as warrantee documents. They evaluate current roof conditions and develop repair recommendations based on a thorough inspection. Photos are taken of any areas of concern and to document any repair work accomplished. Information is then uploaded to the TectaTracker website for you to review and use as needed. On a predetermined schedule, repeat TectaCare Planned Maintenance inspections will be performed. Updates to your roof conditions and repair recommendations will be made and documented in TectaTracker, accessible to you for review. Over the long view, TectaTracker will provide a positive return on investment by helping you make maintenance decisions that will prolong the life of your roof, ensuring that your roof remains free of deficiencies and your budget is free of surprises.

TectaTracker Roof Audit and Report
You will have access to TectaTracker, a proprietary web-based platform that stores information on roof systems across a portfolio of buildings. Developed in conjunction with a leading Roof Consultant, it includes information such as roof system, warranties, age of roof, photos, repair history and, critically, includes a financial forecast of expected repair costs. It is invaluable for budgeting roof repair and maintenance as well as long-term capital planning and is designed to give real estate managers at all levels the critical roofing information needed to make decisions, prepare budgets and identify problems before they happen.

A Roof Audit will be performed as the first inspection for each location. It will include:
- Roof Inspection: a visual survey of the exterior condition of each building's roof and roof related sheet metal. The visual survey also includes deterioration or damage we may observe to metal wall panels, brick wall dividers, and parapets. These items will be brought to the owner's attention for further action. The Roof Inspection does not include items such as structural damage or deterioration occurring below the observable roof membrane.
- The initial audit of a facility also includes the gathering and data input of the following detailed information:

o CAD drawing with projections obtained from initial roof inspection
o Photos of the exterior of the building, roof, defects, and roof related details
o Roof system information including deck, insulation, membrane, surfacing, past history, and other information
o Core cuts as needed to obtain or verify roof system information
o Warranty Information and confirmation
o Roof Assessor –a proprietary tool which estimates a roof's remaining useful life based on critical factors and offers a consistent analysis from roof to roof
o Prioritized roof repairs and maintenance items
o Long term budget

Tecta will provide you and your designated staff a password and access to the Tecta Tracker website so that you can review the details on each of your Projects or designated portfolio of Projects on demand. During the term of this agreement and any subsequent amendments or extensions, Tecta America will update and maintain all roof related data in the Tecta Tracker system.

Report
A detailed Tecta Tracker report can be prepared on-demand by you for each facility covering, among other things, roof condition, defect photos, Roof Assessor Points and a summary of all recommended service repairs required to bring the roofing system to a maintainable condition including cost associated with such repairs. Finally a Five Year Forecast will be provided, updated and reviewed annually to anticipate and budget capital and expense items. This report will be available in the on-line TectaTracker program.

Some key features of the report are:
- Building and Roof Information: Includes information such as roof system, warranties, drawings and more
- Defect and Repair History: Includes defect photos and recommended repairs
- Roof Assessor: a quantitative assessment of the roof system and its expected remaining useful life. Factors such as membrane condition, flashings, penetrations, and roof traffic impact the calculations
- Five Year Forecast: the detailed forecast of the cost and timing of service repairs needed, the annual preventive maintenance and the timing of roof replacements

Tecta Response

Many Types of Extreme Weather Events
Every year, extreme weather events attack buildings, and especially roofs, in a variety of ways. From, hurricane force storms that hit our coast lines to tornado and straight line wind events, hail storms, snow storms, and severe weather storms with high levels of rainfall. These extreme weather events cause havoc for facility managers, with loss of power, deck deflection, collapse, and building damage, water intrusion, interior contents damage and more.

TECTA AMERICA

Local roofing contractors are frequently overwhelmed serving their customer base, requiring days and weeks just to get a contractor to look at a property. A pre-storm plan that relies on a strong national provider with strong resources relationships and the ability to prevent further damage and return your facility to normal as quickly as possible.
Tecta Response is the most comprehensive disaster response program in the industry, able to handle any disaster, any roof, anywhere. We're experienced in disaster work, with the resources, communication and stability you need in your roofing company.

The calm before the storm.
If a facility is at risk of potential damage, we offer pre-storm agreements to establish advance authorization and collaborate on a plan so our crews can be ready to go.

Hit the ground running.
Our repair crews arrive within 48-72 hours to inspect the roof, assess the condition and begin making temporary or permanent repairs.

Nimble, flexible and reliable.
How we get you back in business—fast:
Resources: over 3,500 expertly trained roofing professionals nationwide
Experience: Andrew, Katrina, Rita and more; we know what it takes to work in hurricane zones
Materials: we have contracts with all major manufacturers to guarantee supply
Licensing: fully licensed to work ANYWHERE in the U.S.
Planning: easily accessible repair materials; crews have pre-arranged housing with mobile office capabilities, and are on-site with materials, equipment and resources as soon as the storm has passed.

How Could You Be Impacted?
Extreme Weather events can have devastating impact on your facility, including:

- Complete loss of roofing system, exposing facility to elements
- Severe damage leading to water intrusion
- Costly interior damage
- Facility downtime due to safety and equipment issues
- Inventory loss
- Inability to have to get a contractor on a timely basis
- Issues with your insurance company covering your damages

Protection and Response You Can Count On For All Types of Extreme Weather
Our unique Tecta Response program provides you with the security of having a qualified, heavily-resourced national roofing contractor perform an immediate response to your facilities' needs. Because this is a preplanned program: planning, execution, and pricing can be put into place far in advance of the actual storm events. Depending on the level of service you sign up for, this response can range from simple inspection and reporting, to immediate mitigation, temporary protection, and full solution. Regardless of the extreme weather event type, our goal remains the

same: to quickly and attend to your facility's needs, minimize damage expenses, and reduce your cost of downtime.
A Tecta Response Master Storm Agreement has a specific rider for each major type of extreme weather event. Each is uniquely designed to your specific needs in each type of event, to quickly mitigate damages and to get your facility back to normal operations as quickly as possible.

Hail: In the enrollment process for Hail Response we will discuss:
* Roofing types * Emergency contact information * Warranty information
Tecta America subscribes to several third-party storm monitoring agencies and can very quickly communicate to Tecta exact zip codes where hail activity occurs while it is happening. We will cross reference these reports with facilities that have enrollment in our program and immediately engage Phase One damage assessment inspections if hail size reports exceed the thresholds agreed upon in the enrollment process. If we arrive on site for Phase One damage assessments and find damage, we will immediately dispatch Phase Two temporary roofing and repair crews to mitigate damages and get the roof into a watertight state. Phase Three, for hurricane response, if needed, is working hand in hand with you and your Risk Management group to develop and implement a long-term solution.

ABOUT TECTA AMERICA CORP

RELEVANT EXPERIENCE AND CORPORATE OVERVIEW

Sterile facts and figures do not tell the true story of an organization's strength, stability, and commitment to client satisfaction. This section of our proposal highlights relevant information that will help the National Cooperative Purchasing Alliance understand the nature of our company. More important, we want you to understand why these things should be important to the NCPA, and how they will help you achieve your
business goals.

OUR DIFFERENTIATORS
BUSINESS STRENGTHS THAT MAKE A DIFFERENCE

Selecting the right roofing contractor can be challenging. How do you know you will get the results you want? Does the contractor have the right type of background and experience? How do you compare one contractor against another—beyond the color of their trucks, or the weight of their proposals? This section of the proposal discusses several important business strengths that differentiate Tecta America from other roofing contractors. Though there are many reputable and knowledgeable contractors in the market, the following differentiators will help define why Tecta America is the right partner for the National Cooperative Purchasing Alliance. We encourage you to check out the facts—and compare.

Dedicated Professional Service Departments
The ongoing service you receive from your roofing contractor is just as important as the quality of installation—perhaps more so. Even the best roofing system requires maintenance and professional

support. Tecta America has dedicated service departments to troubleshoot problems that might arise and recommend the best solutions. Roof leaks can be difficult to assess and fix; a challenging task for contractors who simply pull workers off production crews to handle warranty issues or roof leaks. Our service departments offer the most responsive, knowledgeable service in the industry. This means that the NCPA will have any future roofing issues handled effectively and promptly. In addition, our service techs are uniformed and professional, providing a better image while on your property.

Experience and Tenure: Meeting Your Current and Long-Term Needs

The average tenure of our operating locations exceeds 60 years. Our staff of over 3,500 professionals has seen virtually every type of roofing issue and has the collective experience to solve problems—fast. In contrast, the typical roofing contractor is a sole proprietorship that has been in business less than ten years; and employs fewer than 35 workers. Tecta America will be around for the long haul to service your ongoing roofing needs. Given that most roofing systems are designed to last an average of 15-20 years, it's comforting to know that your contractor will be in business as long as the roof they install.

Flexibility and Local Presence

Because of our adaptability and local presence, Tecta America has the resources to support the National Cooperative Purchasing Alliance's project, regardless of size or scope. We have the methods and processes in place to integrate with your organization and remain focused on your needs.

Roof Management Program for Facility Managers

Managing a roofing system, and preparing associated budgets, is outside the realm of experience for many facility managers. To fill this knowledge-gap, Tecta America offers the only Roof Asset Management program designed specifically for facility managers. The program provides a common platform for all your roofing information. Inspections and information gathering are done in a consistent format and allow you to compile comprehensive data on your roofing assets. This helps you avoid budget surprises by giving you the ability to make plans based on current and accurate data.

Safety Practices that Translate into Quality Installation and Service

The nature of roofing work has many inherent safety risks. Contractors with good safety records not only protect their workers, they also help avoid possible liability claims due to falls and accidents. But beyond these obvious advantages, a good safety record also reflects on the quality of work performed. This is because the same processes that comprise a good safety program—training, pre-job planning, and job-site communication—are also critical factors in quality installation and repair.

Tecta America has the most comprehensive safety program in the roofing industry. Testament to this fact is that we have an Experience Modification Ratio (EMR) of only .53, half that of the industry average. (A lower EMR indicates fewer accidents.) With this prominent focus on creating

TECTA AMERICA

a safe work environment, the NCPA has the assurance that we have an equally strong focus on quality installation and maintenance.
The best indicator of future success— is past success. The National Cooperative Purchasing Alliance has many choices to assist with your roofing program; and you can't afford to select a contractor that doesn't have your best interests at heart. We know that the most important testimonials about our commitment to client satisfaction come not from Tecta America, but rather from our customers.

GREEN ROOFING INITIATIVES

TectaGreen is the total green roof solution. As the nation's leading green roof contractor, we've installed and maintained more green roofs than anyone else. From start to finish—and beyond—our roof experts will ensure that your green roof is the healthiest it can be.

Vegetative Roofing or "Green Roofs" are composed of several layers including soil media and vegetation. These roofs are growing in popularity, especially as the concern with global warming has reached all levels of government and business. Many municipalities provide tax benefits for builders that construct or retrofit their buildings with vegetative roofs.

These systems offer a variety of benefits:
They reduce the amount of storm water discharged into municipal sewer systems, thus helping reduce the dangers of flooding.
The vegetation that is an essential part of these systems helps absorb pollutants, including greenhouse gases such as carbon dioxide.
These roofs help reduce the "heat island" effect in urban areas, where the concentration of concrete and other heat-absorbing materials can increase the temperature by several degrees in relation to less built-up areas.
Vegetative roofs provide increased insulation. Buildings on which these green roofs have been installed invariably experience lower heating and cooling costs.
These roofs provide increased plant and animal habitat. In many places where such roofs are becoming popular, there has been a notable increase in bird populations.
Green roofs often provide aesthetic benefits and serve as a major amenity for building occupants as these "roof gardens" gain in prevalence and popularity.

A TectaGreen roof offers a variety of benefits from economic to environmental to aesthetic. No matter what your facility's goals may be, our experts will design a green roof that accomplishes your objectives.

Reduced storm run-off - A green roof can retain up to 96% of storm water, allowing it to evaporate rather than drain into retention pond and lead to financial incentives.
Energy savings - On a 90 degree day, a green roof keeps the roof temperature a cool 95 degrees while a dark roof bakes to 160 degrees or more. Result: interiors stay cooler and energy costs go down.

TECTA AMERICA

Extended roof life - Installing a green roof system has the potential to double the lifespan of a conventional roof. For example, 2011 Executive Report determined the Target Center in Minneapolis payback at 7.6 years, which mostly comes from saving the replacement costs.
Reduced carbon footprint - Green roof systems allow for plants to absorb CO2 and work to reduce the carbon footprint of your building.
Reduced Urban Heat Island effect - The surface of a green roof absorbs solar radiation and provides natural evaporative cooling.
Earn LEED points - A green roof provides more points than any other technology to achieve certification.

LEED - The Leadership in Energy and Environmental Design (LEED) program was created to provide a national standard for environmental construction in the building industry. When a building earns LEED points through environmental construction like a green roof, many states will reward the facility with tax credits and other financial incentives.

A Tecta Green roof can contribute up to 3-9 LEED points based on the USGBC rating system:
Sustainable Sites
Storm water Design: Quality Control – SS Credit 6.1 (1 pt.)
Heat Island Effect: Roof – SS Credit 7.2 (1 pt.)
Water Efficiency
Water Efficient Landscaping – WE Credit 1.1 (1-2 pts.)
Energy & Atmosphere
Optimize Energy Performance – EA Credit 1 (1-8 pts.)
Materials & Resources
Recycled Content – MR Credit 4.1 (1-2 pts.)
Regional Materials – MR Credit 5.1 (1-2 pts.)

Roofing Plus Solar Plus
Unlike most solar companies, Tecta has the ability to internally facilitate each stage of a solar project. Tecta works closely with each of our customers from initial assessment to project completion. Tecta's full service approach provides project feasibility analysis, system design, financing, development, installation and maintenance of roof and solar installations. Each aspect is specific to our customer's needs, tax situation, and the physical and regulatory conditions and incentives of the location of the system. Tecta's approach provides a single source for developing and delivering an integrated solution and achieving our customer's expectations and returns.

TECTA AMERICA

Tecta has the experience and understanding to deliver solar solutions that complement rather than compromise roof-tops. We design our systems to account for the structural and design restrictions of the roof and apply thin-film or crystalline solutions with minimal to no penetrations. If the roof needs to be repaired or replaced prior to solar installation, Tecta has the expertise to perform these services in house. No other turnkey Solar Developer can provide both roofing and solar installation.

Determine Site Capacity | Physical area considered for solar

- Roof
- Roof age / conditions
- Roof warranty and insurer requirements
- Ground
- Soil conditions
- Drainage considerations
- Parking
- Zoning and permitted use, FAR, permeability
- Shading, setbacks, easements, ROWs, access
- Permitting
- Building & electrical
- Interconnection
- Environmental
- Special (FERC, FAA, etc.)
- Incentive Availability
- Solar production based incentives
- Solar renewable energy credits
- Grants
- Tax abatements
- Others

Feasibility Analysis and Customer Considerations
How much should it cost & when do we pay?
How much benefit comes out and when?
Constraints and limits

Public Sector - Tecta provides the solution for governmental entities looking to initiate sustainable energy projects: large, locally-sited solar power plants. These do not increase budget or consume scarce capital resources. Private ownership of solar equipment allows for Federal tax incentives to flow through to you as lower power costs. We will also work with you to ensure that our solar solutions meet the criteria for federal life-cycle cost requirements.

TECTA AMERICA

Tecta‘s customers include:

State / Federal Governments. Tecta transforms empty rooftops or open space into renewable resources. By hosting a solar power system, government entities can secure long-term clean electricity supply without any upfront cost or maintenance expenses.

Municipal Agencies. A power purchase agreement with Tecta is an effective way for municipal agencies to accelerate renewable energy goals and provide their communities with locally produced, clean, reliable, long-term renewable power. Municipal buildings, landfills, and water & sewer treatment plants are excellent locations for such systems.

Schools and Universities. Tecta provides schools, school districts and universities with a cost-effective way to meet increased sustainability goals and mitigate volatile energy costs. By hosting a solar power system, administrators can reduce operating expenses and transform empty campus rooftops, parking lots, or vacant land into productive assets which support sustainable long term goals.

Tecta America has thoroughly reviewed the Contract Terms and Conditions for this solicitation. We understand your needs and are confident in our operational and procedural foundation, which meets or exceeds the specific requirements for the operations and management of the contract.

Tecta's management approach to successful execution will emphasize the following priorities:

- Development of value-based solutions and detailed scopes of work
- Procedural compliance with Member requirements for task order approval
- Safety
- Quality Control
- Subcontractor and HR Management
- Cost Control
- Schedule Control

TECTA AMERICA

Operations & Maintenance Overview

Ice damage, high winds, rain and snow will take their toll on any roof. And while you can't know when these weather events will take place, you should know that you're prepared for them. Otherwise you run the risk of unexpected roof problems interrupting your business, causing unhappy tenants, disappointed customers and severe financial loses for your business. The good news is a small investment in a regular program of roof inspections and maintenance can help you avoid and minimize unexpected and costly repairs. In fact, independent analysis shows that dollars spent on preventive maintenance programs have a positive NPV and deliver 300% ROI over time.

Planned Maintenance: The best way to prepare for the worst

Tecta America's Planned Maintenance program is designed to take the worry out of roof asset management, while protecting and prolonging the life of your roof by:

- Providing predictable roofing expenses and lower overall costs.
- Helping you budget maintenance dollars and allocate capital replacements.
- Keeping your warranties valid and your roofs performing at their best.
- Tailoring a program to specifically fit your roof and your business.

The plan for planned maintenance:

Inspect - Our trained technicians examine the exterior roof system, while noting the conditions of wall panels, area dividers, parapets and roof penetrations and documenting conditions to monitor in the future.

Clean - All debris is removed from roof surface, gutters, interior drains and through-wall scuppers to prevent ponding water that may cause premature roof aging and damage.

Maintain - As needed, we replace deteriorated sealant on metal flashings, top-off pitch pans, re-seal suspect flashing at equipment curbs and perimeters. We also secure drain clamps and rain collars at pipe penetrations.

Report - We provide an annual summation of work performed, assessment of roof conditions, including updated roof drawings and photographs.

Restore your roof and your confidence - Harsh weather, installation of equipment, traffic on the roof or neglect can cause some roofs to show considerable wear, to the extent they fail before reaching their predicted usable life. But these roofs can be restored to a maintainable condition so they will reach their expected useful life, which in turn, delays the capital cost of major roof replacement.

TECTA AMERICA

As part of TectaCare Planned Maintenance, **Tecta** will make all the necessary repairs to bring your roof to maintainable condition. And all repairs made for roof restoration are backed by Tecta's one-year, leak-free renewable guarantee.

Key Features of TectaCare

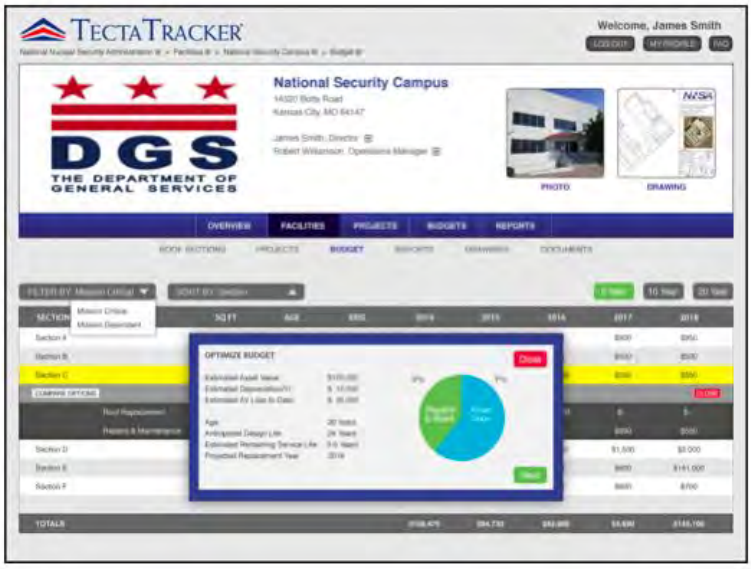
Roof Asset Management Overview

Tecta Plan, Tecta's Roof Asset Management Program, gives you all the information you need to manage a portfolio of roofs and the tools to optimize your roof maintenance and capital budgets.

Tecta Plan is powered by Tecta Tracker, a proprietary information platform designed to provide more effective management of your roofing portfolio. It starts with Tecta Tracker Qualified Technicians performing a rigorous assessment and gathering relevant data that drives informed roofing decisions. All of our Tecta Tracker Certified Technicians must undergo extensive training and testing to qualify them for this distinction.

The Tecta Plan Roof Asset Management program evaluates roof conditions, repair costs and forecasts the remaining useful life of each of your roofs. The proprietary Roof Assessor scores your roof system on key criteria leading to an objective, quantitative score. This allows you to compare different roof sections and facilities in order to prioritize roof spending. Consequently, Tecta Plan helps you avoid unexpected budget and roofing issues, facility downtime and premature roof failure or replacement.

Data Acquisition & Entry Process



- Tecta Certified Inspectors perform field inspections assessments.
- Photos will taken by site personnel & processed
- Field data will be securely delivered to Tecta's secure site for data entry, processing, and drawings
- Secure Site Set-Up
- Reports Delivered according to NNSA Guidelines

TECTA AMERICA

TectaTracker®

- Launched in 2001, TectaTracker is the premier roof asset management software in the roofing industry.
- Developed exclusively by Tecta America
- 4,000 facilities/14,000 roof sections & 200M SF under management
- On-demand 24/7 access via web portal

Tecta Tracker Database

- As-built data organized & stored for easy reference
- Warranty status & documents cataloged
- Snap-shot view captures age, pending repairs, roof condition & photos

Powered by TectaTracker:

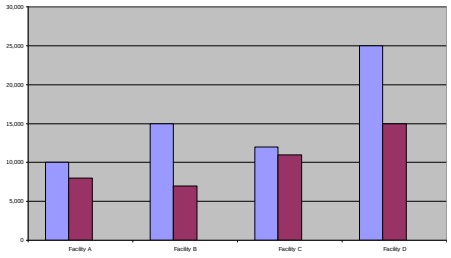
Detailed Documentation

- All your critical information in one place, including drawings, photos, warranties, proposals, historical information and other documents for quick, secure access. An invaluable resource for large portfolio managers.

Roof Assessor

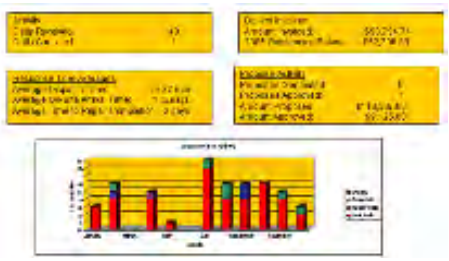
- Provides you with an objective assessment of the roof condition and estimated remaining service life. TectaTracker's consistent rating systems help you evaluate overall roof performance.

Reports



- Create customized reports on one or multiple properties in your online portfolio to meet your specific needs, and get detailed information on your roof system and roof condition.

Financial Planner



- Get a better handle on budgeting. Provides a 10-year forecast and condition-based estimate of anticipated maintenance and repair costs. In addition to budgeting operating costs, track capital expenses and perform a deferred analysis on any or all roofs in your portfolio.

- Immediate and Long-Term Savings
- Quality, safety, industry strength
- One point of contact
- Transparent process locally
- Warranty protection and documentation
- Service and response
- Ability to better track and predict future expenditures

TectaTracker is a key element in delivering a strong preventive maintenance program

- The Roof Assessor Tool provides an objective quantitative assessment of the roof condition
- The 5-year forecast provides data to use in budgeting operating costs
- The remaining estimated life provides information for capital expense budgeting
- Fact based analysis of roof condition
- Allow owner to prioritize between multiple buildings, roof sections

TECTA AMERICA

PROJECT TECHNICAL APPROACH & MANAGEMENT PLAN

This section of the proposal covers Key Personnel Roles & Responsibilities, Subcontractor Management, Safety, Quality Control, Contract Administration, Scheduling/Cost Control, Waste/Debris Management, and Contract Close-Out:

TECTA's management approach to successful management will emphasize the following priorities:

- Safety
- Quality Control
- Subcontractor and HR Management
- Cost Control
- Schedule Control

In our response, we have provided for your evaluation a summary of our capability to meet these critical priorities to successful management of this project.

Preconstruction – Our estimating and preconstruction ("Pre-Con") department supports the efforts of our group in developing cost estimates for the SOW under this contract. Our Pre-Con department is uniquely qualified to provide hard dollar lump sum bids via drawing take off efforts, etc. as well as conceptual design build cost proposals.

Logistics – TECTA operates multiple crews, in every Operating Unit to serve our projects. In addition, we have space to store fabricated materials, purchased materials, and equipment. This allows us to deliver fabricated materials and equipment directly to the jobsite on a schedule basis. This makes logistics on the jobsite cleaner and easier for the owner and prevents unplanned deliveries and coordination issues with the owner's facility.

Accounting – We track labor, material, and subcontractor costs on every project by work activity on the project. We use MS Project or Primavera to develop our schedules. Schedules can be cost loaded if required but we typically use an agreed upon schedule of values to back up our monthly billings on lump sum project. We routinely perform cost plus projects in the commercial sector and our accounting system is capable of tracking and reporting costs that directly back up our billings on these projects. Our experience in accounting on government projects is the backbone of our ability to control job cost. TECTA accounting systems and practices will allow our project manager to know and manage the costs of all components of a project as it is being performed.

Outline of SOW Response and Process

PRECONSTRUCTION
Step 1. TECTA Corporate Construction Executive will review the SOW to develop resource plan to achieve the best value. The Operating Unit President assigns a Project Manager (PM). The PM will attend site visit and clarify any ambiguities related to the SOW and client's project objectives.
Step 2. Led by TECTA's PM, planning is developed for the project approach, implementation, crew selection, subcontractor qualification/selection, identification of cost saving methods, prepare work/cost schedule, develop preliminary quality control and safety plans.
Step 3. The PM will submit a cost effective low-risk technical plan for review and approval to the Corporate Construction Executive and the client.

TECTA AMERICA

Issuance of Notice-to-Proceed (NTP)
Step 1. PM will coordinate project plans by conducting a "kick-off" meeting with the assigned Quality Control Manager (QCM), Safety Manager and Superintendent.
Step 2. PM will coordinate the project specific plan for technical execution in order to institute work controls, product material submission and permit requests, manage productivity, direct resources, prepare closure reports, prepare weekly reviews, monitor cost/schedule progress, respond to modifications, track subcontractor performance and enforce corrective actions. The project plan will include an environmental protection and site security plan.
Step 3. Quality Control and Safety Plan will be submitted within *2 days*. The plan will include enforcement of the initial team orientation meeting, safety/quality controls, project objectives, schedule milestones, inspections and preparation of reports.
Step 4. PM will establish the appropriate site security, environmental protection measures, and begin mobilization of personnel and equipment to complete the project accident free, on–time and within budget.
Step 5. Demolition and reinstallation of roofing system per project scope.
Step 6. Final inspections and punch list completion.
Step 7. PM, QCM and Superintendent conduct project closeout.

Project Manager – Our PM will be responsible along with the project management team for all estimating, scheduling, budgeting, purchase orders and subcontracts. The PM will have signatory authority, will be able to negotiate work orders, and will have the full authority to bind TECTA. The PM will be a source of contact for the duration of the project. This approach will eliminate all communication confusion. The PM will generate monthly invoices, update CPM schedules, manage subcontractors, write purchase orders and monitor project budgets.

Quality Control Manager – The Quality Control Manager (QCM) assigned to the project will manage the performance of our QCM functions. The QCM oversees the thorough inspection of the project every day and ensures that proper QC instruction is given and followed. The QCM answers to the PM only in matters of daily logistics, but the QC program has its ultimate source of authority at the Office. In this way, QC remains the highest priority and will not suffer as a result of other project concerns. It also provides the QCM with the ultimate autonomy to make decisions solely with regard to quality.

The responsibilities of our QC inspection personnel also include scheduling their efforts to ensure that inspections are completed and documented in a timely manner. The QCM will ensure that the contracting office is always notified in advance of our inspections and will invite your inspectors to observe, participate, or advise in those inspections. QC is one of our highest priorities and it is the responsibility of the QCM to ensure that quality control inspections are implemented on every delivery order and that QC education is provided to each of our employees and subcontractors. The QCM will also respond to engineering and contracting issues as well as perform trend analysis and whenever necessary, initiate corrective action. In addition to the daily inspection of work sites, the QCM will insist that certain pre-set milestones (definable features of work) have quality control approval before the project can advance. These milestones are defined as structural, mechanical, electrical, or otherwise complex or critical project elements.

The client will be notified by the QCM when milestone quality inspections are to take place. When necessary, all quality control sampling and testing will be performed by subcontracted sources and outside laboratories. Certificates of accreditation will be required of all testing laboratories or specialists used under this contract. We will provide copies of the certificates and any other verification of compliance to the client. Our QC plan is designed to prevent problems and/or catch problems prior to project completion. This has virtually eliminated punch list items at our contract sites. However, if any items are found upon final inspection, we will take immediate action to correct all punch list items as soon as possible. A report will then be submitted to the client, detailing the correction of each item.

Superintendent – The on-site Superintendent reports directly to the PM and is responsible for supervising the work of craftsmen and subcontractors, maintaining project schedules, and verifying that work is completed in accordance with the plans, scope of work, and specifications. He will also ensure that proper safety and housekeeping procedures are followed, and that progress reporting is performed in a timely manner. The Superintendent will maintain constant communication with the subcontractors as well as the PM in order to ensure that the project proceeds in accordance with our high standards of quality, timeliness, and safety. The Superintendents are authorized to initiate change orders, if necessary, to expedite work.

The Superintendent will also work with the QCM and Safety Manager to ensure that all the TECTA Team personnel and subcontractors are aware of quality and safety issues and are provided educational opportunities and safety training when necessary. The Superintendent will ensure that any new addition to the on-site workforce attends a safety orientation and receives any necessary individual instruction with regard to safe work procedures. The project Superintendent will be held responsible for accident prevention and will issue safety instructions when work assignments are made, verifying that all crews have, as well as use, the proper protective equipment. He will also check for unsafe practices and conditions, and assist the QCM in checking for unsafe practices and investigating any accidents to determine cause and corrective action.

Safety Approach to Field Implementation and Enforcement – "Safety First" is the priority at TECTA. Our Safety Manager assigned to this project will have completed a minimum of 30-Hour OSHA training. The role of our Safety Manager on the contract will be to develop and coordinate the site-specific Safety Plan, to include implementing the safety, environmental protection and security plan for all on-site personnel. Field Safety Managers will report to the TECTA Corporate Safety Director.

"Safety First" is practiced at all times. Safety will always maintain a prominent role in all of TECTA's work plans submitted to the client. Our safety leadership will be comprised of a Safety Manager who will report to the PM. The Safety Manager will establish, manage and maintain a safe working environment, which allows construction personnel to build in accordance with design specifications with quality workmanship. Our assigned Safety professionals will lead meetings with all sub-contractors and ensure that all contractors are properly briefed on safety rules, regulations and considerations.

Responsibility for achieving our safety goals is held primarily by our Superintendent/Safety Manager but a priority for key personnel and subcontractors. Safety will receive full involvement of company management. Individual responsibilities are identified for field management. Every field management employee on our construction site may shut down a particular work operation that poses 'imminent danger' or if a situation arises which is immediately dangerous to life or health.

When such action has been taken, the Primary POC and/or PM shall be immediately notified and actions to remedy the situation shall be implemented. Managers and Supervisors from trade subcontractors shall also ensure that employees placed under their direction are trained and informed of safe methods and shall conduct their responsibilities in a safe and professional manner. The PM will schedule a meeting to communicate safety orientation.

The Safety Manager will ensure safety concerns are addressed to enforce safety awareness. The Safety Manager will develop a site-specific safety plan that will incorporate security concerns as well. The Safety Manager will brief the on-site construction team to include subcontractors. Safety will be the responsibility of everyone on the job site. Safety and quality principles are inseparable. Our priority for each project is to perform quality work in the most efficient, and safe manner possible.

Sustainability and Waste Management Approach – TECTA will implement reuse and recycling procedures to reduce disposal. TECTA will ensure that debris management is incorporated into the scope of work for the contract. TECTA will develop and implement procedures to keep solid waste from being contaminated and in a condition required for acceptance by a designated reuse, recycling, or disposal facility. Solid waste, rubbish, debris, and other discarded solid materials will be placed in containers that are emptied on a regular schedule. Handling and disposal will be conducted to prevent contamination. Segregation measures will be employed so that no hazardous or toxic waste will become co-mingled with solid waste. The solid waste will be transported off of public property, and disposed of in compliance with Federal, State and local laws and regulations pertaining to the use of landfill areas.

Problem Prevention and Minimization – Weekly training will be conducted by the Superintendent in an effort to prevent and/or minimize any adverse environmental problems. The training will be completed before work begins and when conditions change. This training shall include methods of detecting and avoiding pollution; familiarization with pollution standards, both statutory and contractual; and installation and care of devices, and instruments required for monitoring purpose to ensure adequate and continuous environmental pollution control. Listed below are the project specific learning objectives of this training:

- Provide an overview of environmental and sustainability issues.
- Ensure compliance with federal, state, and local environmental laws.
- Review of site-specific procedures and management plans to establish expectations.
- Methods of detecting and avoiding pollution
- Familiarization with statutory and contractual pollution standards.
- Anticipated hazardous or toxic chemicals or wastes, and other regulated contaminants
- Spill containment exercise will occur monthly as part of weekly toolbox meetings establishing a familiarity with a plan in case a spill occurs.

Proposed Processes for Requests For Information (RFI) – RFI's may be initiated by anyone providing services to the project. The RFI may be prepared in electronic format and/or hard copy. An RFI will be funneled through Foreman, Superintendent and/or the PM. Each RFI will be reviewed by the next level of management with final review by the QCM. Upon final formation, the RFI will be submitted to the client by the QCM or PM. Upon receipt of the client response to an RFI, it will be delivered to the Project Engineer for copying, filing and distribution to the PM. The PM will process the RFI according to the required action with the Superintendent, Foreman, etc. Should the RFI response impact the management plan or schedule, changes will be made according to the required action.

Submittal Reviews and Approval – Submittal information will be provided by and prepared by the TECTA QCM responsible for the action being documented/ reported. The submittal information will be validated and submittal documents prepared by the QCM. Each submittal package will be approved for submittal to the client by the PM/Submittal Reviewer and QCM. A transmittal form will be generated for numbering and tracking on the submittal register.

Testing Laboratories and Procedures – When necessary, all QC sampling and testing will be performed by subcontracted sources and outside laboratories. Certificates of accreditation will be required of all testing laboratories or specialists used for any testing done under this contract. We will provide copies of these certificates, chain-of-custody and any other verification of compliance to the client. The testing company used might vary from project to project, but each testing subcontractor will be required to produce the necessary qualifications and credentials to perform laboratory testing.

Project Closeout Procedures – The QCM will perform the final building turnover, close-out and commissioning in accordance with the following:

- Manage and implement a Commissioning Plan for all systems associated with the SOW for this contract through coordination with each discipline
- Develop & maintain a punch list of all construction deficiencies at end of construction period. QCM will ensure all deficiency items have been completed and/or corrected prior to Owner turnover. The Owners Representative will participate in preparation of the Final Punch List
- Develop and organize equipment and system training involving installing contractors and suppliers. All training will be coordinated and scheduled with end user upon completion; startup and commissioning of each equipment item and/or system.

TECTA's Completion Package – Once the project is complete, any changes or modifications to the construction drawings must be incorporated into accurate as-built drawings, submitted to the client in the package listed below. As-built drawings will show changes and revisions to the construction drawings including structural details, foundation layouts, subsurface utility lines, equipment, sizes, etc. If the completed construction reflects no modifications to the construction drawings, then copies of the original construction drawings may be stamped "as-built drawings."

TECTA Completion Package:

- Book of Warranties
- Product User Information Binder:
- Safety Precautions
- Normal Operations and Service Requirements with Maintenance/Repair Procedures
- Environmental Conditions
- Material Safety Data Sheets
- Personnel Training Requirements and Briefing from TECTA Superintendent
- TECTA Contact Information
- As-Built Drawings
- Property Records

Tab 5 – Products and Services

- It is the intention of NCPA to establish an annual contract with highly qualified vendor(s) for Roofing Products and Services on a national basis. Vendor(s) shall, at the request of NCPA member, provide these covered services under the terms of this RFP and the Contract Terms and Conditions. Vendor shall assist the NCPA member with making a determination of its individual needs, as stated below.

- The Contractor shall furnish all necessary labor, materials, tools, supplies, equipment, transportation, supervision, management and shall perform all operations necessary and required for construction work. All work shall be performed in accordance with the requirements set forth in the resulting contract and each mutually agreed upon work request or purchase order issued by the NCPA member.

INFORMATION TO OFFERORS

- NCPA intends to enter into Roofing Products and Services Contract(s) for the construction, maintenance, repair and alteration services related to roofing systems. These contracts will be available for use by all public entities such as ESC's, ISD/USD's, universities, city and county governments, community colleges, state and federal agencies in these United States and other jurisdictions. It may also be used by certain private non-taxed entities. Each entity signs an inter-local agreement approved by their board or designated agent with NCPA when required by state statute.

- Offerors are encouraged to offer turn-key solutions to address the full range of roofing services being sought in this solicitation, however offering a turn-key solution is **not** a requirement that must be met in order to be considered for award.

OFFERORS ARE REMINDED THAT NO WORK IS OR HAS BEEN GUARANTEED UNDER THIS CONTRACT.

- Those companies seeking multiple state awards should provide contractor license to work in the requested states and propose a separate coefficient for each.

- If a respondent is awarded a contract for the requested states and later decides to request additional states to work in under the contract, then a written request must be made to NCPA requesting the additional state(s). In addition, the contractor must provide proof of license and bonding capability to work in the requested new state(s) along with proof of insurance and other relevant documents. It is the intent of NCPA in this document to meet each state's statutory requirements for performing Roofing Services in that jurisdiction.

- If a respondent is awarded a contract for the requested states and later decides to request that additional affiliates be allowed to work on this contract, then a written request must be made to NCPA regarding the addition of the affiliate(s). Successful Respondents must also submit a written request to NCPA if they wish to discontinue an affiliate from doing work on this contract. All work done under this contract by affiliates, subcontractors or other parties will be the responsibility of the primary contract holder.

- Upon award, the contractor may be designated as the NCPA roofing contractor by a client via an approved inter-local agreement. Clients may not compete Roofing Services jobs between contractors

or designated hard bids in violation of Texas State law. The inter-local or interstate agreement (members in other states may conform to their state and local statutes in using NCPA contracts) must be signed between each member and NCPA.

- The contractor should describe in its business plan how it will include and work with local subcontractors and how it will work with local architects and engineers, especially those A&E firms already working with client members.

- NCPA will receive 3% of the total revenue from each PO executed under this contract less any sales tax or performance or payment bond. This fee will be included in the contractor's pricing proposal and will not be issued as a separate line item in any job proposals issued to client members.

- NCPA encourages the use of HUBs, MWBEs and SBEs both as prime and subcontractors. However they must meet the same minimum standards and requirements as the prime contractor. It will be the responsibility of the prime contractor to pre-qualify their subcontractors. Some client members will have a set goal for subcontracting requirements and will require that a plan be attached as an addendum to the PO outlining how the contractor will endeavor to meet their goal. Specific plans as part of the contractors' business plan to meet these goals will be part of the overall contractors evaluation process as well as selection process for certain client members as a requirement for their delivery orders.

- NCPA will provide some oversight in assisting both the client members and the contractors in the marketing to the client members, training (education), and provide at a minimum an annual audit and review of each of the contractor's programs.

- The contractor at his expense and included as part of overhead will provide adequate insurance coverage meeting at a minimum the requirements of the State of Texas or the state where the job is located. The contractor, if awarded a contract, will provide within 14 days but prior to the commencement of work, a certificate of insurance showing that NCPA has been named as additional insured. If the member has higher insurance requirements, than those requirements may be added as an addendum to the purchase order.

- Recognized holidays include: Presidents Day, Easter, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day and New Year's Day.

- Regular work hours will be considered to be 7am to 5pm local time unless otherwise agreed by NCPA member. A schedule for performance of work that can be met without planned overtime is the responsibility of the Contractor, unless otherwise requested by the owner.

CONTRACT AND DOCUMENTS

- The contract shall include the contract, its terms and conditions, any agreed upon amendments, as well as all of the sections of the solicitation and the contractor's proposal. Once signed, if the contractor's proposal varies or is unclear in any way from the NCPA contract, NCPA, at its sole discretion, will decide which provision will prevail.

- Other documents to be included are the contractor's proposals, task orders, purchase orders and any attachments which have been issued.

PERFORMANCE BOND PLAN

- The contractor shall submit a detailed performance bond plan that will meet the member's local and state statutory requirements. The vendor is required to be knowledgeable and current on all statutory requirements for bonding. This should include, but is not limited to, a letter from a surety company that is licensed to do business in the states being proposed on in the submittal. Respondents shall also provide a written statement acknowledging that they can provide surety letters for any affiliates to NCPA or its members upon request. Contractors may need to provide additional capacity as work orders increase. Bonds will not require that a fee be paid to NCPA. The actual cost of the bond will be a pass through expense to the client and added to the purchase order.

SAFETY/ENVIRONMENTAL PLAN

- The contractor shall submit a detailed safety plan with their submittal. It should specifically address how the contractor will implement this plan with the subcontractors. The safety plan will need to address OSHA compliance, environmental compliance, drug testing, trend analysis and noncompliance corrective action. It should also state whether a safety officer will interact with the client member's staff and management of safety and environmental issues while working in occupied areas.

QUALITY ASSURANCE/QUALITY CONTROL PROGRAM

- The contractor shall submit a QA/QC plan within with their submittal. This plan shall detail the day to day surveillance of work and provide documentation of deficiencies and corrective actions. It should note subcontractor compliance issues and trend analysis and how inspectors will interface and work with both the subcontractors and the client members staff.

SUBCONTRACTING PLAN AND/OR EXPLANATION OF APPLICABLE AFFILIATE RELATIONSHIPS

- The contractor shall submit a subcontracting plan with their submittal. This plan will explain the subcontracting procedures providing assurances that the subcontractors meet the same high standards as the contractor. This will include a subcontractors log, subcontractor qualification form, felony conviction notice and child and sex offender notice. This plan will also address how the contractor will implement his safety plan with subcontractors (may reference the contractors safety plan). The subcontractors will be held to the same standards as the primary roofing contractor.

- A distinct portion of the subcontracting plan needs to deal with attracting, utilizing and mentoring small and disadvantaged businesses including how your company will attract these firms. Describe how your company will institute a prompt payment plan upon completion and acceptance of their work and how your company will make progress payments to subcontractors on long term job orders.

- The contractor shall submit a plan detailing the relationship with any applicable affiliates that may do work under this contract. This submittal should include, but is not limited to, work history, credentials, PO processes and process to maintain upstanding workmanship and service.

PRODUCT PERFORMANCE MINIMUM REQUIREMENTS

- All roof systems must meet the regulatory requirements of the International Building Code, all applicable state and local codes for public buildings, including, but not limited to, UL 790, Class A, and FM Class 1-90 Fastening Standards. The prime contractor awarded a contract will comply with the latest, most stringent industry-standard construction details published by the National Roofing Contractors Association's The NRCA Roofing and Waterproofing Manual, 4th edition. (NRCA, 10255 W. Higgins road, Suite 600, Rosemont, IL 60018 || 847-299-9070 || Fax 847-299-1183). Any deviations, such as the use of proprietary designs of the prime contractor or special construction for regional climatic conditions, must be identified and explicitly agreed to by the NCPA member.

ASSOCIATED PROJECT SUPPORT REQUIREMENTS

- This will consist of the following points. (1) The contractor shall remove movable furniture in the work area and place it back in the required location upon completion. (2) The purchase, delivery and storage of project construction materials should not interfere with the clients operations. (3) Damages that occur to the client's facilities or equipment must be repaired or purchased to like or better condition by the contractor at no charge. (4) All permits will be acquired by the contractor and invoiced at cost as part of the purchase order, unless they are provided by the client member.

- If there is a dispute between the contractor and client, NCPA or its representatives will assist in conflict resolution or third party (mandatory mediation), if requested by either party.

- NCPA or its representative reserves the right to inspect any project and audit the contractor's NCPA project files, documentation and correspondence.

- Utilities at the job sites will be furnished free of charge to the contractor by the client member. Water will be furnished free, with all of the taps, connections and associated equipment supplied free of charge to the contractor or supplied by the contractor and charged to the client. Upon project completion, the connections will be removed at the direction of the client.

- It is the contractor's responsibility to analyze his electrical needs and the ability of the client's facility to accommodate his request. The electricity at the job site will be free to the contractor. It will be the responsibility of the contractor to coordinate his requests and needs with the client. If additional capacity is required, the contractor is responsible for arranging for the equipment, the installation and removal at his own expense. If possible, toilet facilities will be made available by the client or the contractor will make arrangements for portable toilets.

- The Member Agency reserves the right to require the contractor's employees, representatives and consultants to wear identification and stay in designated work areas at all times while on the Member Agency's property. The Member Agency shall have the right to effect the immediate removal of any person associated with the contractor from the member's property for failure to wear identification, for being outside a designated work area, or for engaging in any behavior that the member deems inappropriate directed toward or in the vicinity of students, employees, officials, or guests of the NCPA member.

- Contractor shall perform the appropriate background checks of any personnel that will be performing the services within the proximity of minors. Contractor shall notify the Member Agency of any proposed employee who has been convicted, pled guilty or pled "no contest" to a criminal

offense, and the Member Agency reserves the right to reject the proposed employee with a criminal background. No person employed by Contractor who has been found guilty of any criminal offenses shall be allowed into the work site without prior approval of the NCPA member.

Description of Products and Services Offered

(Note: Pricing is to be provided separately in the TAB 7-Pricing)

- A listing of products and services that should be offered under this contract is provided in TAB 7-Pricing, but the offering need not be limited by this listing. Contractor may provide additional products and services either in this section or the value-add section. Pricing on these non-line items products and services can be addressed through a margin, RS Means or any other auditable pricing mechanism. Any product or service offered must have pricing that can be audited as outlined in the Pricing section in this solicitation (TAB 7). RS Means or any other approved benchmarking service can be used as an alternate pricing mechanism for special situations. Provide the coefficient(s) for all applicable regions for RS Means on the final page provided in the TAB 7-Pricing.

ATTACHMENT 1

Clean Air and Water Act & Debarment Notice

I, the Vendor, am in compliance with all applicable standards, orders or regulations issued pursuant to the Clean Air Act of 1970, as Amended (42 U.S. C. 1857 (h), Section 508 of the Clean Water Act, as amended (33 U.S.C. 1368), Executive Order 117389 and Environmental Protection Agency Regulation, 40 CFR Part 15 as required under OMB Circular A-102, Attachment O, Paragraph 14 (1) regarding reporting violations to the grantor agency and to the United States Environment Protection Agency Assistant Administrator for the Enforcement.

I hereby further certify that my company has not been debarred, suspended or otherwise ineligible for participation in Federal Assistance programs under Executive Order 12549, "Debarment and Suspension", as described in the Federal Register and Rules and Regulations

Potential Vendor	Tecta America Corp
Print Name	Andy Carr
Address	9450 W. Bryn Mawr, Suite 500
City, Sate, Zip	Rosemont, IL 60018
Authorized signature	
Date	11/15/19

Contractor Requirements

Contractor Certification
Contractor's Employment Eligibility

By entering the contract, Contractor warrants compliance with the Federal Immigration and Nationality Act (FINA), and all other federal and state immigration laws and regulations. The Contractor further warrants that it is in compliance with the various state statues of the states it is will operate this contract in.

Participating Government Entities including School Districts may request verification of compliance from any Contractor or subcontractor performing work under this Contract. These Entities reserve the right to confirm compliance in accordance with applicable laws.

Should the Participating Entities suspect or find that the Contractor or any of its subcontractors are not in compliance, they may pursue any and all remedies allowed by law, including, but not limited to: suspension of work, termination of the Contract for default, and suspension and/or debarment of the Contractor. All costs necessary to verify compliance are the responsibility of the Contractor.

The offeror complies and maintains compliance with the appropriate statutes which requires compliance with federal immigration laws by State employers, State contractors and State subcontractors in accordance with the E-Verify Employee Eligibility Verification Program.

Contractor shall comply with governing board policy of the NCPA Participating entities in which work is being performed

Fingerprint & Background Checks

If required to provide services on school district property at least five (5) times during a month, contractor shall submit a full set of fingerprints to the school district if requested of each person or employee who may provide such service. Alternately, the school district may fingerprint those persons or employees. An exception to this requirement may be made as authorized in Governing Board policy. The district shall conduct a fingerprint check in accordance with the appropriate state and federal laws of all contractors, subcontractors or vendors and their employees for which fingerprints are submitted to the district. Contractor, subcontractors, vendors and their employees shall not provide services on school district properties until authorized by the District.

The offeror shall comply with fingerprinting requirements in accordance with appropriate statutes in the state in which the work is being performed unless otherwise exempted.

Contractor shall comply with governing board policy in the school district or Participating Entity in which work is being performed

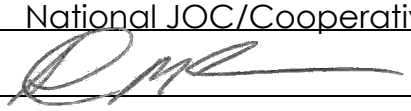
Business Operations in Sudan, Iran

In accordance with A.R.S. 35-391 and A.R.S. 35-393, the Contractor hereby certifies that the contractor does not have scrutinized business operations in Sudan and/or Iran.

Authorized signature 

Date 11/15/19

Antitrust Certification Statements (Tex. Government Code § 2155.005)



I affirm under penalty of perjury of the laws of the State of Texas that:

(1) I am duly authorized to execute this contract on my own behalf or on behalf of the company, corporation, firm, partnership or individual (Company) listed below;

(2) In connection with this bid, neither I nor any representative of the Company has violated any provision of the Texas Free Enterprise and Antitrust Act, Tex. Bus. & Comm. Code Chapter 15;

(3) In connection with this bid, neither I nor any representative of the Company has violated any federal antitrust law; and

(4) Neither I nor any representative of the Company has directly or indirectly communicated any of the contents of this bid to a competitor of the Company or any other company, corporation, firm, partnership or individual engaged in the same line of business as the Company.

ATTACHMENT 1

FEMA Standard Terms and Conditions Addendum for Contracts and Grants

If any purchase made under the Master Agreement is funded in whole or in part by Federal Emergency Management Agency ("FEMA") grants, Contractor shall comply with all federal laws and regulations applicable to the receipt of FEMA grants, including, but not limited to the contractual procedures set forth in Title 44 of the Code of Federal Regulations, Part 13 ("44 CFR 13").

In addition, Contractor agrees to the following specific provisions:

1) Pursuant to 44 CFR 13.36(i)(1), University is entitled to exercise all administrative, contractual, or other remedies permitted by law to enforce Contractor's compliance with the terms of this Master Agreement, including but not limited to those remedies set forth at 44 CFR 13.43.
2) Pursuant to 44 CFR 13.36(i)(2), University may terminate the Master Agreement for cause or convenience in accordance with the procedures set forth in the Master Agreement and those provided by 44 CFR 13.44.
3) Pursuant to 44 CFR 13.36(i)(3)-(6)(12), and (13), Contractor shall comply with the following federal laws:
    a. Executive Order 11246 of September 24, 1965, entitled "Equal Employment Opportunity," as amended by Executive Order 11375 of October 13, 1967, and as supplemented in Department of Labor ("DOL") regulations (41 CFR Ch. 60);
    b. Copeland "Anti-Kickback" Act (18 U.S.C. 874), as supplemented in DOL regulations (29 CFR Part 3);
    c. Davis-Bacon Act (40 U.S.C. 276a-276a-7) as supplemented by DOL regulations (29 CFR Part 5);
    d. Section 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-30) as supplemented by DOL regulations (29 CFR Part 5);
    e. Section 306 of the Clean Air Act (42 U.S.C. 1857(h), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR part 15); and
    f. Mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation play issued in compliance with the Energy Policy and Conservation Act (Pub. L.94-163, 89 Stat. 871).
4) Pursuant to 44 CFR 13.36(i)(7), Contractor shall comply with FEMA requirements and regulations pertaining to reporting, including but not limited to those set forth at 44 CFR 40 and 41.
5) Pursuant to 44 CFR 13.36(i)(8), Contractor agrees to the following provisions 72 regarding patents:
    a. All rights to inventions and/or discoveries that arise or are developed, in the course of or under this Agreement, shall belong to the participating agency and be disposed of in accordance with the participating agencies policy. The participating agency, at its own discretion, may file for patents in connection with all rights to any such inventions and/or discoveries.
6) Pursuant to 44 CFR 13.36(i)(9), Contractor agrees to the following provisions, regarding copyrights:
    a. If this Agreement results in any copyrightable material or inventions, in accordance with 44 CFR 13.34, FEMA reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish or otherwise use, for Federal Government purposes:
        1) The copyright in any work developed under a grant or contract; and
        2) Any rights of copyright to which a grantee or a contactor purchases ownership with grant support.
7) Pursuant to 44 CFR 13.36(i)(10), Contractor shall maintain any books, documents, papers, and records of the Contractor which are directly pertinent to this Master Agreement. At any time during normal business hours and as often as the participating agency deems necessary, Contractor shall permit participating agency, FEMA, the Comptroller General of United States, or any of their duly authorized representatives to inspect and photocopy such records for the purpose of making audit, examination, excerpts, and transcriptions.
8) Pursuant to 44 CFR 13.36(i)(11), Contractor shall retain all required records for three years after FEMA or participating agency makes final payments and all other pending matters are closed. In addition, Contractor shall comply with record retention requirements set forth in 44 CFR 13.42.

Required Clauses for Federal Assistance provided by FTA

ACCESS TO RECORDS AND REPORTS

Contractor agrees to:

a) Maintain all books, records, accounts and reports required under this Contract for a period of not less than three (3) years after the date of termination or expiration of this Contract or any extensions thereof except in the event of litigation or settlement of claims arising from the performance of this Contract, in which case Contractor agrees to maintain same until Public Agency, the FTA Administrator, the Comptroller General, or any of their duly authorized representatives, have disposed of all such litigation, appeals, claims or exceptions related thereto.

b) Permit any of the foregoing parties to inspect all work, materials, payrolls, and other data and records with regard to the Project, and to audit the books, records, and accounts with regard to the Project and to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed for the purpose of audit and examination.

FTA does not require the inclusion of these requirements of Article 1.01 in subcontracts. Reference 49 CFR 18.39 (i)(11).

CIVIL RIGHTS / TITLE VI REQUIREMENTS

1) Non-discrimination. In accordance with Title VI of the Civil Rights Act of 1964, as amended, 42 U.S.C. § 2000d, Section 303 of the Age Discrimination Act of 1975, as amended, 42 U.S.C. § 6102, Section 202 of the Americans with Disabilities Act of 1990, as amended, 42 U.S.C. § 12132, and Federal Transit Law at 49 U.S.C. § 5332, Contractor or subcontractor agrees that it will not discriminate against any employee or applicant for employment because of race, color, creed, national origin, sex, marital status age, or disability. In addition, Contractor agrees to comply with applicable Federal implementing regulations and other implementing requirements FTA may issue.

2) Equal Employment Opportunity. The following Equal Employment Opportunity requirements apply to this Contract:

   a. Race, Color, Creed, National Origin, Sex. In accordance with Title VII of the Civil Rights Act, as amended, 42 U.S.C. § 2000e, and Federal Transit Law at 49 U.S.C. § 5332, the Contractor agrees to comply with all applicable Equal Employment Opportunity requirements of U.S. Dept. of Labor regulations, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor, 41 CFR, Parts 60 et seq., and with any applicable Federal statutes, executive orders, regulations, and Federal policies that may in the future affect construction activities undertaken in the course of this Project. Contractor agrees to take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, creed, national origin, sex, marital status, or age. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation; and selection for training, including apprenticeship. In addition, Contractor agrees to comply with any implementing requirements FTA may issue.

   b. Age. In accordance with the Age Discrimination in Employment Act (ADEA) of 1967, as amended, 29 U.S.C. Sections 621 through 634, and Equal Employment Opportunity Commission (EEOC) implementing regulations, "Age Discrimination in Employment Act", 29 CFR Part 1625, prohibit employment discrimination by Contractor against individuals on the basis of age, including present and prospective

employees. In addition, Contractor agrees to comply with any implementing requirements FTA may issue.

c. Disabilities. In accordance with Section 102 of the Americans with Disabilities Act of 1990, as amended (ADA), 42 U.S.C. Sections 12101 *et seq.*, prohibits discrimination against qualified individuals with disabilities in programs, activities, and services, and imposes specific requirements on public and private entities. Contractor agrees that it will comply with the requirements of the Equal Employment Opportunity Commission (EEOC), "Regulations to Implement the Equal Employment Provisions of the Americans with Disabilities Act," 29 CFR, Part 1630, pertaining to employment of persons with disabilities and with their responsibilities under Titles I through V of the ADA in employment, public services, public accommodations, telecommunications, and other provisions.

d. Segregated Facilities. Contractor certifies that their company does not and will not maintain or provide for their employees any segregated facilities at any of their establishments, and that they do not and will not permit their employees to perform their services at any location under the Contractor's control where segregated facilities are maintained. As used in this certification the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion or national origin because of habit, local custom, or otherwise. Contractor agrees that a breach of this certification will be a violation of this Civil Rights clause.

3) Solicitations for Subcontracts, Including Procurements of Materials and Equipment. In all solicitations, either by competitive bidding or negotiation, made by Contractor for work to be performed under a subcontract, including procurements of materials or leases of equipment, each potential subcontractor or supplier shall be notified by Contractor of Contractor's obligations under this Contract and the regulations relative to non-discrimination on the grounds of race, color, creed, sex, disability, age or national origin.

4) Sanctions of Non-Compliance. In the event of Contractor's non-compliance with the non-discrimination provisions of this Contract, Public Agency shall impose such Contract sanctions as it or the FTA may determine to be appropriate, including, but not limited to: 1) Withholding of payments to Contractor under the Contract until Contractor complies, and/or; 2) Cancellation, termination or suspension of the Contract, in whole or in part.

Contractor agrees to include the requirements of this clause in each subcontract financed in whole or in part with Federal assistance provided by FTA, modified only if necessary to identify the affected parties.

DISADVANTAGED BUSINESS PARTICIPATION

This Contract is subject to the requirements of Title 49, Code of Federal Regulations, Part 26, "*Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs"*, therefore, it is the policy of the Department of Transportation (DOT) to ensure that Disadvantaged Business Enterprises (DBEs), as defined in 49 CFR Part 26, have an equal opportunity to receive and participate in the performance of DOT-assisted contracts.

1) Non-Discrimination Assurances. Contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this Contract. Contractor shall carry out all applicablerequirements of 49 CFR Part 26 in the award and administration of DOT-assisted contracts. Failure by Contractor to carry out these requirements is a material breach of this Contract, which may result in the termination of this Contract or other such remedy as public agency deems appropriate. Each subcontract Contractor signs with a subcontractor must include the assurance in this paragraph. (See 49 CFR 26.13(b)).

2) Prompt Payment. Contractor is required to pay each subcontractor performing Work under this prime Contract for satisfactory performance of that work no later than thirty (30) days after Contractor's receipt of

payment for that Work from public agency. In addition, Contractor is required to return any retainage payments to those subcontractors within thirty (30) days after the subcontractor's work related to this Contract is satisfactorily completed and any liens have been secured. Any delay or postponement of payment from the above time frames may occur only for good cause following written approval of public agency. This clause applies to both DBE and non-DBE subcontractors. Contractor must promptly notify public agency whenever a DBE subcontractor performing Work related to this Contract is terminated or fails to complete its Work, and must make good faith efforts to engage another DBE subcontractor to perform at least the same amount of work. Contractor may not terminate any DBE subcontractor and perform that Work through its own forces, or those of an affiliate, without prior written consent of public agency.

3) DBE Program. In connection with the performance of this Contract, Contractor will cooperate with public agency in meeting its commitments and goals to ensure that DBEs shall have the maximum practicable opportunity to compete for subcontract work, regardless of whether a contract goal is set for this Contract. Contractor agrees to use good faith efforts to carry out a policy in the award of its subcontracts, agent agreements, and procurement contracts which will, to the fullest extent, utilize DBEs consistent with the efficient performance of the Contract.

ENERGY CONSERVATION REQUIREMENTS

Contractor agrees to comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plans issued under the Energy Policy and Conservation Act, as amended, 42 U.S.C. Sections 6321 *et seq.* and 41 CFR Part 301-10.

FEDERAL CHANGES

Contractor shall at all times comply with all applicable FTA regulations, policies, procedures and directives, including without limitation those listed directly or by reference in the Contract between public agency and the FTA, as they may be amended or promulgated from time to time during the term of this contract. Contractor's failure to so comply shall constitute a material breach of this Contract.

INCORPORATION OF FEDERAL TRANSIT ADMINISTRATION (FTA) TERMS

The provisions include, in part, certain Standard Terms and Conditions required by the U.S. Department of Transportation (DOT), whether or not expressly set forth in the preceding Contract provisions. All contractual provisions required by the DOT, as set forth in the most current FTA Circular 4220.1F, dated November 1, 2008, are hereby incorporated by reference. Anything to the contrary herein notwithstanding, all FTA mandated terms shall be deemed to control in the event of a conflict with other provisions contained in this Contract. Contractor agrees not to perform any act, fail to perform any act, or refuse to comply with any public agency requests that would cause public agency to be in violation of the FTA terms and conditions.

NO FEDERAL GOVERNMENT OBLIGATIONS TO THIRD PARTIES

Agency and Contractor acknowledge and agree that, absent the Federal Government's express written consent and notwithstanding any concurrence by the Federal Government in or approval of the solicitation or award of the underlying Contract, the Federal Government is not a party to this Contract and shall not be subject to any obligations or liabilities to agency, Contractor, or any other party (whether or not a party to that contract) pertaining to any matter resulting from the underlying Contract.

Contractor agrees to include the above clause in each subcontract financed in whole or in part with federal assistance provided by the FTA. It is further agreed that the clause shall not be modified, except to identify the subcontractor who will be subject to its provisions.

PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS

Contractor acknowledges that the provisions of the Program Fraud Civil Remedies Act of 1986, as amended, 31 U.S.C. §§ 3801 et seq. and U.S. DOT regulations, "Program Fraud Civil Remedies," 49 CFR Part 31, apply to its actions pertaining to this Contract. Upon execution of the underlying Contract, Contractor certifies or affirms the truthfulness and accuracy of any statement it has made, it makes, it may make, or causes to me made, pertaining to the underlying Contract or the FTA assisted project for which this Contract Work is being performed.

In addition to other penalties that may be applicable, Contractor further acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification, the Federal Government reserves the right to impose the penalties of the Program Fraud Civil Remedies Act of 1986 on Contractor to the extent the Federal Government deems appropriate.

Contractor also acknowledges that if it makes, or causes to me made, a false, fictitious, or fraudulent claim, statement, submission, or certification to the Federal Government under a contract connected with a project that is financed in whole or in part with Federal assistance originally awarded by FTA under the authority of 49 U.S.C. § 5307, the Government reserves the right to impose the penalties of 18 U.S.C. § 1001 and 49 U.S.C. § 5307 (n)(1) on the Contractor, to the extent the Federal Government deems appropriate.

Contractor agrees to include the above clauses in each subcontract financed in whole or in part with Federal assistance provided by FTA. It is further agreed that the clauses shall not be modified, except to identify the subcontractor who will be subject to the provisions.

State Notice Addendum

The National Cooperative Purchasing Alliance (NCPA), on behalf of NCPA and its current and potential participants to include all county, city, special district, local government, school district, private K-12 school, higher education institution, state, tribal government, other government agency, healthcare organization, nonprofit organization and all other Public Agencies located nationally in all fifty states, issues this Request for Proposal (RFP) to result in a national contract.

Dear Andy:

Region XIV Education Service Center is happy to announce that Tecta America Corp has been awarded an annual contract for Roofing Products and Services based on the proposal submitted to Region XIV ESC.

The contract is effective immediately and will expire on November 30th, 2023. The contract can then be renewed annually for an additional three years, if mutually agreed on by Region XIV ESC and Tecta America Corp.

We look forward to a long and successful partnership underneath this contract.

If you have any questions or concerns, feel free to contact me at 325-675-8600.

Sincerely,

Shane Fields

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION AUTHORIZING EXECUTION OF AN AGREEMENT WITH ROOFING CONSTRUCTORS, INC. DBA WESTERN ROOFING SERVICE FOR ROOF INSPECTION, MAINTENANCE, AND ON-CALL REPAIR SERVICES IN AN AMOUNT NOT-TO-EXCEED $700,000 FOR A THREE-YEAR TERM

The City of Livermore ("City") owns more than eighty buildings. As a result, the City requires services to inspect and maintain City roofs.

Livermore Municipal Code section 2.68.370 permits the formal bidding procedure for supplies, equipment, and general services to be dispensed with when purchased through a cooperative purchasing arrangement. Livermore Municipal Code section 2.68.390 permits the City to participate in cooperative purchasing programs if the underlying purchase was made using a quotation or bid procedure at least as restrictive as the City's.

Tecta America Corporation holds a competitively bid cooperative purchasing agreement for roofing products and services through the National Cooperative Purchasing Alliance (now OMNIA Partners). Roofing Constructors, Inc. dba Western Roofing Service is a subsidiary of the Tecta America Corporation. The City is a member of OMNIA Partners, and the underlying purchase at issue was made using a quotation or bid procedure at least as restrictive as the City's.

The proposed agreement with Roofing Constructors, Inc. dba Western Roofing Service provides for annual and semi-annual roof inspection, preventative maintenance, and general rooftop housekeeping services, and on-call roof repair services in an amount not to exceed $700,000. The term of the proposed agreement will commence on April 1, 2024 and terminate on March 31, 2027.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby authorizes the City Manager, or her designee, to execute a general services agreement with Roofing Constructors, Inc. dba Western Roofing Service, attached hereto as Exhibit A, for annual and semi-annual roof inspection, preventative maintenance, and general rooftop housekeeping services and on-call roof repair services, in an amount not-to-exceed $700,000 for a three-year term.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024, by the following vote:

AYES: COUNCIL MEMBERS:
NOES: COUNCIL MEMBERS:
ABSENT: COUNCIL MEMBERS:
ABSTAIN: COUNCIL MEMBERS:

Exhibit A – General Services Agreement with Roofing Constructors, Inc. dba Western Roofing Service

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

AGREEMENT FOR SERVICES

THIS AGREEMENT is made and entered into this day of March, 2024, by and between the City of Livermore ("City"), a municipal corporation, and Roofing Constructors, Inc. dba Western Roofing Service ("Contractor"), a California corporation.

RECITALS

City requires services to provide annual and semi-annual roof inspection, preventative maintenance, and general rooftop housekeeping services, and on-call roof repair services for City facilities as needed.

Contractor warrants it possesses the distinct skills, qualifications, experience, and resources necessary to timely perform the services described in this Agreement. Contractor acknowledges City has relied upon these warranties to retain Contractor.

AGREEMENT

NOW, THEREFORE, City and Contractor hereby agree that the aforementioned recitals are true and correct and further agree as follows:

1. Retention as Contractor. City hereby retains Contractor, and Contractor hereby accepts such engagement, to perform the services described in Section 3 below subject to the terms and conditions in this Agreement.

2. Relationship of Parties – Independent Contractors. The relationship of the parties shall be that of independent contractors. Contractor and its employees are not City officers or employees. Contractor is responsible for the supervision and management of its employees, including any workers compensation insurance, withholding taxes, unemployment insurance, and any other employer obligations associated with the delivery of the services contemplated by this Agreement.

3. Description of Services. Contractor shall provide services to provide annual and semi-annual roof inspection, preventative maintenance, and general rooftop housekeeping services, and on-call roof repair services for City facilities as needed as more particularly set forth in Exhibit "A" (collectively "the Services").

4. Contractor's Responsibilities. Contractor shall:

(a) Diligently perform the Services in a manner commensurate with industry, professional, and community standards;

(b) Provide the resources necessary to complete the Services in a timely manner;

(c) Obtain a business license from the City of Livermore, and keep it in effect for the term of this Agreement;

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

(d) Obtain and keep in effect all necessary licenses, permits, qualifications, insurance, and approvals legally and professionally required for Contractor to practice its profession and to provide the Services;

(e) Comply with all laws in effect that are related to Contractor and the Services;

(f) Coordinate the Services with Jason Calkins, Public Works Supervisor Facilities ("Project Manager"), or such other person designated as the Project Manager by City;

(g) Be available to the Project Manager, and other parties referred to Contractor by the Project Manager, to answer questions or inquiries related to the Services;

(h) Only invoice City for the Services rendered. Contractor's invoice shall be in writing and describe the Services performed for the payment requested. Contractor shall not submit an invoice to City more frequently than once a calendar month;

(i) Keep and maintain invoices and records related to the Services in an organized manner. At a minimum, the records must be kept for at least 3 years from the date of final payment to Contractor and must include time sheets, work progress reports, and other documentation to adequately explain all the Services invoiced for payment. Contractor shall make the invoices and records immediately available to City upon delivery of a written request to examine, audit, or copy them at City's place of business during normal business hours. Contractor shall give City 30 calendar-days' written notice prior to destroying the invoices and records and allow City an opportunity to take possession. If City wants them, Contractor and City shall coordinate their delivery to City in the most efficient manner possible;

(j) Prepare and submit a written report to the Project Manager, within 3 business-days of the Project Manager's written request, that identifies the Services completed and in progress, the charges incurred to date, and the anticipated cost to complete the remaining Services;

(k) Contractor shall correct, at its own expense, all errors in the Services. Should Contractor fail to make such correction in a timely manner, City may make the correction and charge the cost thereof to Contractor;

(l) If applicable, Contractor shall ensure that all work for compensation is taken in compliance with the requirements of the California Labor Code including but not limited to hours of labor, nondiscrimination, payroll records, apprentices, worker's compensation and prevailing wages. If applicable, Contractor shall comply with all prevailing wage laws, such as sections 1773, 1773.8, 1775, 1776, 1777.5, 1777.6, and 1813 of the California Labor Code and any other applicable wage and hour law. If any violation of prevailing wage law associated with this Agreement is deemed to have occurred by any court or administrative authority, Contractor shall forfeit to the City, as a penalty, the sum of fifty dollars ($50.00) for each calendar day, or portion thereof, for each laborer, worker, or mechanic employed, paid less than the applicable prevailing rates for any work done to accomplish the purposes of this Agreement; and,

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

(m) Contractor's services provided pursuant to this Agreement shall comply with the Americans with Disabilities Act (ADA) of 1990, and all amendments thereto, as well as applicable regulations and guidelines issued pursuant to the ADA.

5. Compensation and Payment.

(a) The total compensation payable by City to Contractor for the Services **SHALL NOT EXCEED** the sum of $700,000 ("not-to-exceed amount"). City shall compensate Contractor for the Services rendered at the hourly rates or task amounts set forth in Exhibit "A" up to the not-to-exceed amount. Except as provided in the body of this Agreement, the hourly rates or task amounts are intended to be Contractor's only compensation for the Services and is inclusive of all costs of labor, licensing, permitting, travel expenses, overhead and administrative costs, and any-and-all other costs, expenses, and charges incurred by Contractor, its agents, and employees to provide the Services.

(b) City shall pay Contractor no later than 30 days after City receives a written invoice from Contractor and verifies the Services were performed for the payment requested.

6. Term. The term of this Agreement commences on April 1, 2024, and terminates upon the completion of the Services or March 31, 2027, whichever occurs first.

7. Termination by City. City may terminate any portion or all of the Services by giving Contractor at least 30 calendar-days written notice. Upon receipt of a termination notice, Contractor shall immediately stop all work in progress on the Services except where necessary to preserve the benefit of the work, and assemble the work on the Services for delivery to City on the termination date. All compensation for Services performed prior to the termination date shall be payable to Contractor in accordance with Section 5.

8. Ownership of Documents. All drawings, designs, data, photographs, reports and other items prepared or obtained by Contractor in the performance of the Services are City's property and Contractor shall deliver them to City upon demand.

9. Copyright and Right of Use. All items created by Contractor for City under this Agreement are works made for hire, and Contractor shall give City the copyright and all intellectual property rights to all items developed, prepared, and delivered as part of the Services. Contractor agrees that all aspects of the Services and items created thereby will be original works of creation and will not use, in whole or in part, any work created by any other party, except when expressly disclosed by Contractor to City and Contractor obtains a license to such items for the benefit of City. All licenses must be perpetual, world-wide, non-exclusive, and royalty free sufficient in scope to permit City's full use and enjoyment of its ownership rights in the items created by the Services.

10. Confidentiality. Contractor shall not disclose any confidential or proprietary information received from City to anyone except Contractor's employees who require access to the information to perform the Services. This obligation shall survive

termination and remain in full force and effect until the information, and any copies thereof, are destroyed or returned to City.

11. Defense, Indemnity, and Hold Harmless. To the fullest extent permitted by law, Contractor shall hold harmless, indemnify, and defend with counsel selected by the City or otherwise acceptable to the City, the City and its elected and appointed officials, officers, directors, employees, agents and designated volunteers from and against any and all liability, loss, damage, claims, expenses, and costs (including without limitation, attorney's fees and costs and fees of litigation) (collectively, "Liability") of every nature arising out of or in connection with Contractor's performance of the services contemplated by this Agreement, or in connection with Contractor's failure to comply with any of its obligations contained in this Agreement, except for such Liability caused by the sole active negligence or willful misconduct of City. Contractor's obligations to hold harmless, indemnify, and defend shall not be excused because of Contractor's inability to evaluate Liability or because Contractor evaluates Liability and determines that Contractor is not liable to the claimant. These obligations are independent of, and shall not in any way be limited by, the minimum insurance obligations contained in this Agreement. These obligations shall survive the completion or termination of this Agreement. Contractor must respond within 30 days to the tender of any claim for defense and indemnity by the City.

(a) Modification for Construction Contracts. To the extent this Agreement is a "construction contract" covered by California Civil Code section 2782, then Contractor's duty to indemnify shall not apply in a manner prohibited by California Civil Code section 2782.

(b) Modification for Design Professional Services. To the extent this Agreement is for "design professional services" defined in California Civil Code section 2782.8, then Contractor's duties to defend and indemnify shall only apply to the extent provided for in California Civil Code section 2782.8(a), unless section 2782.8(a) is not applicable for one of the reasons set forth in 2782.8(e).

12. Insurance. Contractor shall procure and maintain insurance during the term of this Agreement in the amounts and under the terms set forth in Exhibit "B" against claims that may arise from or in connection with this Agreement and performance of the Services. Upon reasonable written notice, Contractor shall comply with any changes in the amounts and terms of insurance as may be required from time-to-time by City's Risk Manager.

13. Acceptance of Final Payment. Contractor's acceptance of final payment will release City from any and all claims and liabilities for compensation under this Agreement.

14. Acceptance of Work. City's acceptance of, or payment to Contractor for, the Services does not release Contractor from its responsibility for the accuracy, completeness, or competency of the Services, nor do the actions constitute an assumption of Contractor's responsibility or liability by City for any defect or error in the Services.

15. Conflict of Interest. Contractor represents that no City employee or official has a financial interest in Contractor. Contractor shall not offer, encourage, or accept any

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

financial interest in any part of Contractor's business by or from a City employee or official during the term of this Agreement or as a result of being awarded this Agreement. If any of the Services are paid by reimbursement from an agreement between City and a private party, Contractor represents that it has not performed any work for that private party during the 12-month period prior to the execution of this Agreement, and that it shall not negotiate, offer or accept any contract for services from that party during the term of this Agreement.

16. Economic Disclosure. Contractor shall comply with City's local conflict of interest code and the Political Reform Act, and prepare and file an economic disclosure statement if the Services involve making, or participation in making, decisions which may have a material effect on the Contractors' financial interest. While it is Contractor's sole responsibility to evaluate its conflicts of interest, the Contractor nevertheless agrees to prepare and file an economic disclosure statement if requested by City.

17. Non-Exclusive Agreement. This is a non-exclusive agreement. City reserves the right to provide, and to retain other Contractors to provide, services that are the same or similar to the Services described in this Agreement.

18. No Assignment. Contractor shall not assign or subcontract any of the Services without City's prior written consent. For the purposes of this section, a change of fifty percent or more in the ownership or control of Contractor constitutes an assignment.

19. Remedies. All remedies permitted or available under this Agreement, or at law or in equity, are cumulative and alternative, and the invocation of a right or remedy will not be construed to waive or elect a remedy with respect to any other available right or remedy. As a condition precedent to commencing legal action involving a claim or dispute against City arising from this Agreement, the Contractor must present a written claim to City in accordance with Chapter 3.42 of the Livermore Municipal Code.

20. Construction of Language. The terms and conditions in this Agreement have been arrived at through negotiation and each party had a full and fair opportunity to review and revise this Agreement with legal counsel. Any ambiguity in this Agreement will not be resolved against either party as the drafting party. In the event of an inconsistency or conflict between the language in the body of the Agreement and an attachment hereto, the language in the body of the Agreement controls.

21. Entire Agreement; Modification. This Agreement supersedes all other agreements, whether oral or written, between the parties with respect to the Services. Any modification to this Agreement must be in writing and signed by both parties. In the event the original of this Agreement is lost or destroyed, an archival copy maintained by City can be used in place of the original for all purposes with the same effect as if it was the original.

22. Notice. Notices under this Agreement must be delivered to the addresses below by deposit in the United States mail or by overnight delivery service, with postage prepaid and delivery confirmation:

24. Waiver. Failure to insist upon the strict performance of any term or conditions in this Agreement, no matter how long the failure continues, is not a waiver of the term or condition and does not bar the right to subsequently demand strict performance. To be effective, a waiver must be in writing and signed by the non-breaching party.

25. Severability. If a court of competent jurisdiction determines a provision in this Agreement is invalid, void, or unenforceable, the remaining provisions will nevertheless continue in full force and effect without being impaired in any way.

26. Survival. The terms, conditions, and obligations in Sections 8, 9, 10, and 11 shall survive the completion or termination of this Agreement.

27. Electronic Signatures. By signing this document, you are agreeing that you have reviewed this disclosure information and consent to transact business using electronic communications, to receive notices and disclosures electronically, and to utilize electronic signatures in lieu of using paper documents. You are not required to receive notices and disclosures or sign documents electronically. If you prefer not to do so, you may request to receive paper copies and withdraw your consent at any time.

28. Counterparts. This Agreement may be executed and delivered in one or more counterparts, each of which will be deemed to be an original copy of this Agreement, and all of which, when taken together, will be deemed to constitute one and the same agreement. The facsimile, email, or other electronically delivered signatures of the Parties shall be deemed to constitute original signatures, and facsimile or electronic copies hereof shall be deemed to constitute duplicate originals and shall be valid and effective for all purposes.

Exhibit A
Scope of Services

Roofing Constructors, Inc. dba Western Roofing Service ("Contractor") shall provide all necessary labor, materials, vehicles, equipment, and supplies to perform the following services:

1. Roof Inspection Services ("Task One")

    a. Contractor shall perform the following roof inspection services:
        i. Visually inspect roof membranes and roof surface conditions; and
        ii. Visually inspect the flashing systems including, but not limited to:
            - The metal edge system;
            - Base flashings on equipment and adjoining walls;
            - Counterflashing and termination details;
            - Soil stacks and vents; and
            - Roofing details for rooftop projections and equipment, such as pitch pans, HVAC equipment, skylights and access hatches.

    b. Visual inspections do not include inspections for internal or latent water damage or mold growth or detection or identification of mold or other latent conditions.

    c. Contractor shall perform visual inspections once per year at all sites specified in the "Service Locations and Pricing" chart contained in this Exhibit A ("General City Sites") and twice per year at all sites specified in the "Service Locations and Pricing – Water Resources Division" chart contained in this Exhibit A ("WRD Sites").

2. Preventative Maintenance Services ("Task Two")

    a. Contractor shall perform certain preventative maintenance services on:

        i. Flashing components and details, including, without limitation:
            - Patching minor flashing defects and kick holes;
            - Reinforcing open flashing laps;
            - Sealing open metal edge laps and open flanges within reason;
            - Sealing open coping joints;
            - Sealing expansion joint laps and re-securing and/or sealing intermittent fasteners that have backed out;
            - Topping off pitch pans;
            - Caulking storm collars;
            - Resealing intermittent voids in termination bar and counterflashing; and
            - Informing City if Contractor observes that any extensive repairs to flashing components and details are required.

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

ii. Roof membranes, including, without limitation:
- Repairing intermittent splits, tears, open laps and breaks in the membrane;
- Patching any fractured blisters or those in danger of fracture due to traffic; and
- Informing City if Contractor observes that extensive repairs to the roof membranes are required.

iii. Drains, gutters and scuppers, including, without limitation:
- Removing and cleaning debris from drains, gutter systems, and downspouts;
- Tightening drain bolts and clamping rings (if possible);
- Repairing strip-in around drains and scuppers;
- Re-securing gutters and seal open gutter joints; and
- Informing City if Contractor observes missing drain strainers.

b. Preventative maintenance does not include:
   i. Repairs or maintenance of any building component other that the roofing system;
   ii. Remediation, detection or abatement of mold; or
   iii. Recoating or other significant repair to, or replacement of, the roof membrane.

c. Contractor shall perform these preventative maintenance services once per year at all General City Sites and twice per year at all WRD Sites.

d. Contractor shall schedule annual and biannual preventative maintenance services with the Project Manager a minimum of seven (7) business days in advance of performing said services.

3. General Rooftop Housekeeping Services ("Task Three")

a. Contractor shall:
   i. Remove debris (e.g. leaves, branches, paper and similar items) from the roof membrane and drainage areas; and
   ii. Dispose of debris at City-approved locations.

b. General rooftop housekeeping does not include removal of obsolete HVAC components, any construction materials left by other trades, and other equipment left on the roof.

c. Contractor shall perform these rooftop housekeeping services once per year at all General City Sites and twice per year at all WRD Sites.

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

4. Roof Repair Services ("Task Four")
   a. Contractor shall, upon the prior direction of the Project Manager, repair roof surfaces that develop leaks or have become damaged due to natural disasters or normal wear and tear.
   b. Contractor shall not perform roof repair services without the prior authorization and direction of the Project Manager.
5. The above-mentioned roof inspection, preventative maintenance, general rooftop housekeeping services, and roof repair services do not include extensive repairs, restoration or replacement of a deteriorated roof, such as recoating or resurfacing of the flood coat or the reflective coat of the roofing system. If such steps are necessary, Contractor shall notify the Project Manager and provide recommendations to replace or bring the roof to a maintainable condition, as appropriate.

Compensation

1. City shall compensate Contractor for Roof Inspections, Preventative Maintenance, and General Rooftop Housecleaning Services according to the tables below entitled "Service Locations and Pricing" and "Service Locations and Pricing – Water Resources Division." Compensation shall be granted after satisfactory completion of the work.

2. Roof Repair Services (Task Four) shall be compensated at the following rates:

Standard Labor Rates (Mon. Friday 7am – 3:30pm)	$140.00 per hour per worker
Saturday and Off Hours	$170.00 per hour per worker
Sunday / Holiday	$200.00 per hour per worker
Material	Invoice plus shipping/handling + 25% markup
Equipment Rental	Invoice plus shipping/handling + 25% markup
Truck/Van Fuel Surcharge	$20 per hour per crew

3. Beginning during the second year of the term (i.e., April 1, 2025), the hourly rates specified in the table for Task Four above may be increased once annually, provided that the hourly rates are not increased by more than the percentage increase in the Consumer Price Index for All Urban Consumers ("CPI-U") in the San Francisco-Oakland-Hayward, California area from the prior calendar year's CPI-U rate in December.

    a. For example, if Contractor elects to increase the hourly rates for the period April 1, 2025 through March 31, 2026, the rates shall increase no more than the applicable CPI-U rate as of December 2024.

EXHIBIT B

INSURANCE REQUIREMENTS

Minimum Scope and Limits of Insurance

Consultant/Contractor shall maintain limits no less than:

1. Commercial General Liability, including operations, products and completed operations, as applicable:
   $3,000,000 per occurrence/**$6,000,000** aggregate for bodily injury, personal injury, and property damage. If Commercial General Liability or other form of insurance with a general aggregate limit is used, either the general aggregate limit shall apply separately to this project/location or the general aggregate limit shall be twice the required occurrence limit.
2. Automobile Liability:
   $1,000,000 per accident for bodily injury and property damage.
3. Workers' Compensation and Employer's Liability:
   Statutory limits as required by the State of California including **$1,000,000** Employers' Liability per accident, per employee for bodily injury or disease. A waiver of subrogation is required for Workers' Compensation insurance. If Consultant/Contractor is a sole proprietor, then they must sign "Contractor Release of Liability."

Deductibles and Self-Insured Retention

All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any self-insured retention (SIR) provision shall provide, or be endorsed to provide, that the SIR may be satisfied by either the named insured or the City of Livermore. The City of Livermore reserves the right to obtain a full certified copy of any insurance policy and endorsements. Failure to exercise this right shall not constitute a waiver of right to exercise later.

Acceptability of Insurers

Insurance is to be placed with insurers with a current A.M. Best rating of no less than A: VII and accepted to do business in the State of California, unless otherwise acceptable to the City of Livermore.

Other Insurance Provisions

The general liability and automobile liability policies are to contain, or be endorsed to contain, the following provisions:

1. The City of Livermore, its officers, officials, employees, and designated volunteers are to be covered as additional insureds as respects: liability arising out of activities performed by or on behalf of the Consultant/Contractor; or automobiles owned, leased, hired or borrowed by the Consultant/Contractor. The coverage shall contain no special limitations on the scope of protection afforded to the City of Livermore, its officers, officials, employees, or volunteers.
2. The limits of insurance required in this agreement may be satisfied by a

DocuSign Envelope ID: F21CF6F2-8C75-400E-B004-7C6884C9693E

combination of primary and umbrella or excess insurance. The additional insured coverage under the Consultant's/Contractor's policy shall be primary and non-contributory and will not seek contribution from the City's insurance or self-insurance and shall be at least as broad as ISO Form CG 20 10 04 13. Any umbrella or excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and non-contributory basis for the benefit of the City of Livermore before the City's own insurance or self-insurance shall be called upon to protect it as a named insured.

3. Any failure to comply with reporting or other provisions of the policy, including breaches of warranties, shall not affect coverage provided to the City of Livermore, its officers, officials, employees, or volunteers.
4. The Consultant's/Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.
5. Each insurance policy required by this clause shall be endorsed to state that coverage shall not be canceled by either party before expiration of the policy unless notice is delivered in accordance with policy provisions.
6. It shall be a requirement under this agreement that any available insurance proceeds broader than, or in excess of, the specified minimum insurance coverage requirements and/or limits shall be available to the additional insured. Furthermore, the requirements for coverage and limits shall be (1) the minimum coverage and limits specified in this agreement; or (2) the broader coverage and maximum limits of coverage of any insurance policy or proceeds available to the named insured; whichever is greater.
7. Certificate Holder section of the insurance certificate should read: City of Livermore, 1052 S. Livermore Avenue, Livermore, CA 94550.

Verification of Coverage

Consultant/Contractor shall furnish certificates of insurance and endorsement(s) effecting coverage to the City of Livermore for approval. The endorsements shall be on forms acceptable to the City of Livermore. All certificates and endorsements are to be received and approved by the City of Livermore before work commences. The City of Livermore reserves the right to require complete and certified copies of all insurance policies required by this Agreement.

CITY OF LIVERMORE

DEPARTMENT OF INDUSTRIAL RELATIONS COMPLIANCE CERTIFICATION
Senate Bill 854

• No contractor or subcontractor may be listed on a bid proposal for a public works project (submitted on or after March 1, 2015) unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5 [with limited exceptions from this requirement for bid purposes only under Labor Code section 1771.1(a)].

• No contractor or subcontractor may be awarded a contract for public work on a public works project (awarded on or after April 1, 2015) unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5.

• This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

In accordance with California Labor Code as amended through Senate Bill SB 854, prior to commencement of the Contract, all Contractors are required to register, and maintain active registration throughout the duration of the contract with the California Department of Industrial Relations (DIR). For information regarding registration, please go to: http://www.dir.ca.gov/

I, the Bidder, certify that:

> "I am aware of the provisions of Senate Bill SB 854 and subsequent DIR regulations, which require Contractors/Vendors to comply with all labor compliance requirements including but not limited to prevailing wage requirements, Labor Code sections 1725.5, 1771.1(a), 1774-1776, 1777.5, 1813, 1815, Public Works Contractor Registration Program, Electronic Certified Payroll Records to Labor Commissioner, and other requirements described in the DIR website. I will comply with such provisions before commencing the performance of the work of this contract, and maintain compliance throughout the completion of said contract."

CALIFORNIA

CITY COUNCIL STAFF REPORT **ITEM NO. 5.3**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Judy Erlandson, Acting Public Works Director

SUBJECT: Resolution authorizing execution of an agreement with the Alameda County Flood Control and Water Conservation District, Zone 7 for participation in the 2022 Urban Community Drought Relief Local Projects Grant Program.

RECOMMENDED ACTION

Staff recommends the City Council adopt a resolution authorizing the City Manager to execute an agreement with the Alameda Flood Control and Water Conservation District, Zone 7 for participation in the Urban Community Drought Relief Local Project Grant Program.

SUMMARY

In June 2022 Zone 7 applied for the 2022 Urban Community Drought Relief Program through the California Department of Water Resources (DWR) on behalf of the City of Livermore and other water service agencies located within the Zone 7 service area.

In June 2023, Zone 7 notified the City that the Citywide Turf Reduction project and Recycled Water Fill Station project were approved for funding. Pursuant to the guidelines of the grant, these projects are required to be completed by December 31, 2026. Commencement of both City projects will begin in Fiscal Year 2024-25.

Staff recommends the City Council adopt a resolution authorizing the City Manager to execute an Agreement with the Alameda Flood Control and Water Conservation District, Zone 7 for participation in the Urban Community Drought Relief Local Project Grant Program. The Agreement is scheduled for the Zone 7 Board's April 17, 2024 consent agenda. Full execution of the Agreement will occur after Zone 7 Board approval.

DISCUSSION

The Urban Community Drought Relief Program is intended to support drought resilience planning, water conservation, and other activities that provide reductions in water consumption or improvements to water supply reliability. Grant application acceptance required a minimum request of $3 million in a single

application. Smaller projects were allowed to be bundled together to meet the $3 million minimum. A bundled application required a single primary Grantee to enter into a grant agreement with DWR. Zone 7 is acting as the primary Grantee on behalf of the City of Dublin, Alameda County, and the City of Livermore.

In June 2023, Zone 7 notified the City that the Citywide Turf Reduction project and Recycled Water Fill Station project were approved for funding. Pursuant to the guidelines of the grant, these projects are required to be completed by December 31, 2026. Commencement of both City projects will begin in FY 2024-25.

The Citywide Turf Reduction Project will help the City reduce non-functional turf at various City properties, thereby reducing the demand for potable water. Approximately 109,000 square feet of turf at City owned sites will be replaced. The turf will be replaced with a drought tolerant landscape and incorporate drip irrigation at multiple locations to be determined. This project will reduce water demand by approximately 21 acre-feet per year.

The Recycled Water Fill Station project will consist of an automated self-service recycled water fill station that will allow residential customers access to recycled water for irrigation and other non-potable uses. The automated fill station will provide a permanent year-round water source for residents. This project is expected to increase recycled water use locally by approximately 18 acre-feet per year.

FISCAL AND ADMINISTRATIVE IMPACTS

The Urban Community Drought Relief Program requires a minimum non-state cost share of 25% of the total application cost for each local project. The cost of the Citywide Turf Reduction project is $350,000. The grant award is $262,500 with a required cost share of $87,000. Funding for the local cost share is in the General Fund Landscape Maintenance account 7102-43130.

The cost of the Recycled Water Fill Station project is $400,000. The grant award is $300,000, with a required cost share of $100,000. Funding for the local cost share is in the 230 Sewer Fund account 43130. There will be no additional impact to the General Fund or other city funds.

COMMUNITY PILLAR

2: Environmental Stewardship

GOAL

1: Lead efforts to implement the updated Climate Action Plan in collaboration with internal and external partners.

Award Notification for Urban Community Drought Relief Grant Program

Dear Kevin Padway:

Congratulations! We are pleased to inform you that the following projects, filed by Zone 7 Water Agency, have been awarded **$2,242,500** by the Department of Water Resources (DWR) for the Urban Community Drought Relief Grant Program:

- **$262,500** was awarded to the Citywide Turf Reduction Projects
- **$300,000** was awarded to the Recycled Water Fill Station
- **$1,380,000** was awarded to the Dublin Irrigation System Upgrades
- **$300,000** was awarded to the Fire Dept. Training Water Recirculation System

Costs incurred after June 30, 2022 will be eligible for grant reimbursement. This award is conditioned upon the execution of a Grant Agreement between DWR and your agency. Please see the Agreement Template for your reference.

Your timely attention is directed to the following requirements:

Within 14 calendar days of the date of this award letter:

Award Acceptance - Please submit a letter or e-mail signed by the authorized representative (agreement signatory) confirming your agency as the Grantee to accept the grant award in the amount of **$2,242,500**. This letter/e-mail should also confirm the proper billing address for your organization (where reimbursement checks will be sent).

Electronic Signatures - DWR uses DocuSign to process signatures electronically to expedite all grant-related documents requiring a signature. In order for DWR to send documents to you via DocuSign, we need your permission and consent. If you consent to the use of DocuSign, please send DWR a letter on official letterhead signed by the authorized representative, consenting to the use of DocuSign for all transactions related to this award (see attached sample). If you prefer not to use electronic signatures, DWR can send documents for original (wet) signatures via email or mail, but this can delay the process significantly, especially during situations such as the COVID-19 public health emergency.

Following receipt of the award acceptance, DWR will provide you with a draft agreement and work with you to finalize and execute the agreement. Your timely attention to these requirements is critical to execute the Grant Agreement; failure to do so may result in DWR revoking the grant award. Please submit the required information in the time periods specified to urbandrought@water.ca.gov. The subject line of the email should include “Zone 7 Water Agency

ANL Items".

Please contact Ashley Gilreath at Ashley.Gilreath@water.ca.gov or (916) 902-6717 or Stephanie Hara at Stephanie.Hara@water.ca.gov or (916) 902-6992 for any questions regarding the required materials.

Again, congratulations to you and your Local Project Sponsors on this well-deserved grant award. Our team appreciates your time and effort to respond to this grant solicitation process and we will be reaching out in coming months to get your feedback. We look forward to working with you to complete these drought relief projects to build water resilience in your communities.

Sincerely,

Carmel Brown

Division of Regional Assistance

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION AUTHORIZING EXECUTION OF AN AGREEMENT WITH ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, ZONE 7 FOR PARTICIPATION IN THE 2022 URBAN COMMUNITY DROUGHT RELIEF LOCAL PROJECT GRANT PROGRAM

In June 2022, Alameda County Flood Control and Water Conservation District, Zone 7 (Zone 7) applied for the 2022 Urban Community Drought Relief Grant Program through the California Department of Water Resources (DWR) that included projects from and on behalf of the City of Livermore. The program supports drought resilience planning, water conservation and other activities that provide reductions in water consumption or improvements to water supply reliability. The program requires a minimum non-state cost share of 25% of the total application cost for each local project.

In June 2023, DWR awarded Zone 7 funding for the City of Livermore Citywide Turf Reduction project in the amount of $262,500 with a cost sharing requirement of $87,500; and the Recycled Water Fill Station project in the amount of $300,000, with a cost sharing requirement of $100,000.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby:

1. Authorizes the City Manager to execute an agreement with Alameda County Flood Control and Water Conservation District, Zone 7 for the 2022 Urban Community Drought Relief Local Project Grant Program, in substantially the same form as the attached Exhibit A, which is incorporated by this reference.

2. Authorizes the City Manager to take whatever actions are necessary and appropriate to carry out the purpose and intent of this Resolution.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024, by the following vote:

Exhibit A – Agreement with Alameda County Flood Control and Water Conservation District, Zone 7

AGREEMENT BETWEEN ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, ZONE 7 AND CITY OF LIVERMORE - 2022 URBAN COMMUNITY DROUGHT RELIEF LOCAL PROJECT SPONSOR AGREEMENT

This Local Project Sponsor Agreement ("Agreement") is entered into on this _____ day of _____, 2024, between Alameda County Flood Control and Water Conservation District, Zone 7 ("Zone 7") and the City of Livermore (hereinafter referred to as Local Project Sponsor Grantee "LPS"). Zone 7 and LPS are collectively referred to as the "Parties," and each individually as a "Party."

Recitals

WHEREAS, in 2022 Zone 7 applied for the 2022 Urban Community Drought Relief Grant Program through the California Department of Water Resources ("State Grant"); and

WHEREAS, said application included projects from multiple local project sponsors in the Livermore-Amador Valley and was submitted on their behalf; and

WHEREAS, California Department of Water Resources ("DWR") awarded Zone 7, $562,500 in funding for LPS's drought relief project along with cost sharing requirement of $187,500; and

WHEREAS, on November 27, 2023, Zone 7 executed a grant agreement between DWR and Zone 7 titled "GRANT AGREEMENT BETWEEN THE STATE OF CALIFORNIA (DEPARTMENT OF WATER RESOURCES) AND ZONE 7 WATER AGENCY AGREEMENT NUMBER 4600015378 URBAN COMMUNITY DROUGHT RELIEF GRANT" (the "State Agreement"), which is attached hereto and incorporated herein as Attachment 1; and

WHEREAS, two of the projects funded with the State Agreement are the "Recycled Water Fill Station Project" and the "Citywide Turf Reduction Project" (hereinafter collectively referred to as "Project") proposed by the LPS, with an estimated total project costs of $750,000 collectively; and

Agreement

NOW, THEREFORE, IT IS HEREBY AGREED BETWEEN THE PARTIES AS FOLLOWS:

The recitals hereto are true and correct and are incorporated into the body of this Agreement as though set forth in full.

1. Term

This Agreement will be in effect from the date of execution until the State Agreement between the DWR and Zone 7 is terminated, or when all the Parties' obligations under this Agreement are fully satisfied, whichever occurs later.

Notwithstanding the date on which this Agreement is executed, Project costs incurred by the LPS after June 30, 2022, to the extent they are eligible for funding under and otherwise compliant with the State Grant and State Agreement, are eligible for reimbursement under this Agreement. All activities to implement the Project must be completed by December 31, 2026 to be eligible for State Grant funding.

2. Project, Subaward and Cost Share

a) Under the terms of this Agreement, the LPS will implement the Project as more particularly described in Attachment 1, and Zone 7 will disburse up to $562,500 of the State Grant to the LPS in accordance with the Grant Agreement. Said disbursements will only be made after Zone 7 receives such funds from DWR. The LPS will provide and document the cost share expenditures as required in the State Agreement.

b) Local Project Grantee Cost Share is required to fulfill a local cost share (non-State funds) in the amount of $187,500 of the total estimated total project costs of $750,000, as set forth in Exhibit B to the State Agreement (Budget). Required Cost Share must be for Eligible Project Costs directly related to the Project as set forth in Exhibit A to the State Agreement (Work Plan), incurred after June 30, 2022.

3. Zone 7 Obligations

a. Zone 7 will undertake and complete administrative and management responsibilities relating solely to Grant Administration, in accordance with the State Agreement attached hereto as Attachment 1, under "Exhibit A – Workplan – Grant Administration," that are not related solely to Local Projects.

b. Zone 7 shall disburse grant funds as required or permitted by the State Agreement. Notwithstanding the foregoing, Zone 7 is not obligated to disburse any funds to the LPS until such grant funds are authorized and disbursed from DWR to Zone 7.

c. Zone 7 will promptly notify the LPS of any notices given or actions taken by DWR if such notices or actions are likely to affect LPS's performance, duties, obligations or funding under this Agreement, including but not limited to notices from DWR regarding LPS's invoices under Section 8 of the State Agreement or alleged default related to the Project under Section 11 of the State Agreement.

4. LPS Obligations

a. The LPS is, and at all times will continue to be, in full compliance with the terms and conditions of the State Agreement as a recipient of the State Grant for its particular project. LPS shall be responsible for all of Grantee's responsibilities pursuant to the State Agreement as if LPS were Grantee, including but not limited to those specific responsibilities discussed in this Agreement, except otherwise expressly stated in this

Agreement. LPS understands and agrees that for the terms and conditions of the State Agreement which pertain to the Project, are hereby passed through to, and adopted by LPS as obligations of LPS, excepting only Zone 7's obligations as defined in paragraph 3 of this Agreement.

b. The LPS is solely responsible for all Project costs, including any amount exceeding the project budget of $750,000, and submitting eligible costs for reimbursements as per the terms of the State Agreement. The LPS is required to maintain all financial records associated with the total project cost for inclusion in the final project report.

c. In accordance with the State Agreement, the LPS may submit invoices for expenses incurred after July 1, 2022 for grant reimbursement and to meet cost share requirements.

d. The LPS hereby assumes responsibility for submitting Post-Performance Reports as required under Section 13.D of the State Agreement. Reports will be sent by LPS to Zone 7 within sixty calendar days after the first operational year of the Project and annually for a total of 3 years following Project completion, for submittal to DWR .

e. The LPS hereby assumes responsibility for the following as required under Section 14 of the State Agreement; (a) Operating and maintaining facilities and structures of the Project, (b) all costs for the operation and maintenance of the facilities and structures of the Project, and (c) performing as required under (a) and (b) for the period required by the State Agreement.

f. The obligations of Paragraph 4d and Paragraph 6 of this Agreement shall survive the termination of this Agreement.

g. The LPS shall not cause Zone 7 to be in violation of the State Agreement, whether by act or omission.

h. In the event of an audit from DWR, LPS shall provide all information Zone 7 requests to fulfill the audit. If the audit finds any compliance deficiency related to the LPS's Project, reporting, or obligations of this agreement, the LPS shall make all remedies necessary to correct said deficiency. LPS will be responsible for any such deficiency and all results therefrom.

5. Breach of State Agreement

If DWR determines there is a breach of the State Agreement, and Zone 7 determines the breach is a result of the LPS not performing their obligations contained herein, or LPS otherwise being in breach of this Agreement, then the LPS agrees to return to Zone 7 any reimbursement which DWR declares needs to be repaid and Zone 7's costs associated with resolving the breach of State Agreement.

6. Inspection of Records; Pass-Through Provisions

Pursuant to the State Agreement, DWR is entitled to inspect and make copies of any records pertaining to the Project and the Parties are required to make available for such inspection accurate

records of all costs, disbursements, and documentation as necessary to comply with the requirements of the State Agreement. LPS shall be subject to this requirement.

7. Indemnification

a. To the fullest extent permitted by law, the LPS will immediately defend, indemnify and hold harmless Zone 7, its directors, officers, employees, or authorized agents, and each of them from and against:

i. All claims, demands, liabilities and losses arising out of the performance (or actual or alleged non-performance) of the Project by the LPS, including its agents and employees for damages to persons or property arising, pertaining to or relating to the LPS's negligent acts or omissions or willful misconduct or the failure of LPS to comply with any professional standard of care applicable to the Project.

ii. Any and all actions, proceedings, damages, costs, expenses, penalties or liabilities, in law or equity, of every kind or nature whatsoever, arising out of, resulting from, or on account of the intentional or negligent violation of any governmental law or regulation, compliance with which is the responsibility of LPS.

iii. Any and all reasonable losses, expenses, damages, attorneys' fees, and other costs, including all costs of defense, including but not only costs of counsel acceptable to Zone 7, which Zone 7 may incur with respect to the failure, neglect, or refusal of LPS to perform the Project or its obligations under the Agreement. LPS shall further defend itself against any and all liabilities, claims, losses, damages, and costs arising out of or alleged to arise out of performance or non- performance of the work hereunder, and shall not tender such claims to Zone 7 nor to its directors, officers, employees, or authorized volunteers, for defense or indemnity.

iv. Any liability including, but not limited to, arising from any funding disallowance, audits, demands, claims, actions, liabilities, damages, fines, fees, costs, and expenses brought forth by DWR.

v. Any liability, claims, or damages, Zone 7 is required to indemnify DWR from pursuant to Section D.20 of Exhibit D of the State Agreement, to the extent that they relate to the Project.

8. Termination

Upon termination of the State Agreement, this Agreement shall terminate effective the same date as the State Agreement and in accordance with the terms and conditions for the termination of the State Agreement.

9. Notice

All notices or notifications to Zone 7 shall be in writing addressed to the persons set forth as follows:

Project Representative:
Valerie Pryor
General Manager
100 North Canyons Parkway
Livermore, CA 94551
vpryor@zone7water.com

Project Manager:
Kevin Padway
Assistant Water Resources Planner
100 North Canyons Parkway
Livermore, CA 94551
kpadway@Zone7water.com

All notices or notifications to the LPS shall be in writing addressed to the persons set forth as follows:

Project Representatives:
Joe Prime
Maintenance and Golf Operations Manager
3500 Robertson Park Road
Livermore, CA 94550
jgprime@livermoreca.gov

Anthony Smith
Water Resources Division Manager
101 West Jack London Blvd.
Livermore, CA 94551

Livermore, CA 94551
lamayate-deandreis@livermoreca.gov

10. Amendments

This Agreement may be changed only by a written amendment duly signed by Zone 7 and the LPS.

11. Assignment

The LPS shall not assign its rights or delegate its duties under this Agreement.

12. Dispute Resolution

In the event of a dispute between the parties arising from this Agreement, both parties shall meet and confer to try to resolve the issue. If the parties are not able to resolve the issue, both parties shall agree to arbitration or mediation.

13. California Law

This Agreement shall be governed by and construed in accordance with the laws of the State of California.

14. Validity and Severability

If any provision of this Agreement or the application thereof to any circumstance is held invalid, the remainder of this Agreement and the application of such provision to other circumstances shall not be affected thereby.

15. No Waiver

No wavier by either party of any event of breach and/or breach of any provisions of this Agreement shall constitute a waiver of any other event of breach and/or breach. Either Party's non-enforcement at any time, or from time to time, of any provisions of this Agreement shall not be construed as a waiver thereof.

16. Authorities

The individual signing this agreement on behalf of the LPS declare that they have the authority to enter into this agreement on behalf of the LPS. Documentation of said authority is attached hereto as Attachment 2.

17. Payment

Zone 7 is not receiving any compensation from the State Grant for grant administration, which is a burden on Zone 7, nor is Zone 7 receiving any grant funds for a project included in the State Agreement. Rather, Zone 7 is performing the grant administration to support regional water conservation. Zone 7 is willing to do this at no cost to the LPS, contingent upon timely, thorough, and substantive responses, submittals, reports, and other items needed for Zone 7 to effectively administer the State Agreement. In the event that the LPS fails to do so as determined

by Zone 7 at its sole discretion, Zone 7 may decide to invoice LPS for, and LPS agrees to pay Zone 7 for, all costs of grant administration associated with the Project. Said costs may include labor (including fringe benefits), financial, and actual costs incurred in performance of grant administration.

18. Entire Agreement

This Agreement, together with the attachments hereto, constitutes the complete agreement between the Parties.

19. Intent

Any ambiguities within this agreement shall not be construed in a manner which places Zone 7 in a worse position than Zone 7 would have otherwise been in without the State Agreement.

20. DocuSign
All parties consent to using DocuSign for this agreement.

IN WITNESS WHEREOF, this Agreement has been executed by the parties hereto:

GRANT AGREEMENT BETWEEN THE STATE OF CALIFORNIA (DEPARTMENT OF WATER RESOURCES) AND ZONE 7 WATER AGENCY AGREEMENT NUMBER 4600015378 URBAN COMMUNITY DROUGHT RELIEF GRANT

THIS GRANT AGREEMENT is entered into by and between the Department of Water Resources of the State of California, herein referred to as the "State" or “DWR,” and the Zone 7 Water Agency, a special district in the State of California, duly organized, existing, and acting pursuant to the laws thereof, herein referred to as the "Grantee," which parties do hereby agree as follows:

1) PURPOSE. The State shall provide funding from the Budget Act of 2021, as amended (Stats. 2022, ch. 44, § 25) to the Grantee to assist in financing the Project. By executing this Agreement, the Grantee certifies that the purpose of the Project is in response to a drought scenario, as defined by Water Code section 13198(a) and is intended to: (1) address immediate impacts on human health and safety; (2) address immediate impacts on fish and wildlife resources; or, (3) provide water to persons or communities that lose or are threatened with the loss or contamination of water supplies.

2) TERM OF GRANT AGREEMENT. The term of this Grant Agreement begins on July 1, 2022, and ends three (3) years following the final payment unless otherwise terminated or amended as provided in this Grant Agreement. However, all work shall be completed by December 31, 2026, in accordance with the Schedule as set forth in Exhibit C and no funds may be requested after March 31, 2027.

3) GRANT AMOUNT. The maximum amount payable by the State under this Grant Agreement shall not exceed $2,242,500. Any additional costs are the responsibility of the Grantee.

4) GRANTEE REQUIRED COST SHARE. The Grantee is required to provide a local cost share (non-State funds) in the amount of $768,049, as set forth in Exhibit B (Budget). Required Cost Share must be for Eligible Project Costs directly related to the Project as set forth in Exhibit A (Work Plan), incurred after June 30, 2022.

5) BASIC CONDITIONS.

   A. The State shall have no obligation to disburse money for the Project(s) under this Grant Agreement until the Grantee has satisfied the following conditions (if applicable):

      i. The Grantee shall demonstrate compliance with all eligibility criteria as set forth in the 2022 Urban Community Drought Relief Grant Program Guidelines and Proposal Solicitation Package (2022 Guidelines).

      ii. For the term of this Agreement, the Grantee shall submit Quarterly Progress Reports which must accompany an invoice and all invoice backup documentation. The Quarterly Progress Report shall be submitted within 60 days following the end of the calendar quarter (i.e., reports due May 30, August 29, November 29, and March 1) and all other deliverables as required by Paragraph 13, “Submission of Reports” and Exhibit A, “Work Plan”.

      iii. Prior to the commencement of construction or implementation activities, if applicable, the Grantee shall submit the following to the State.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

1. Final plans and specifications certified, signed and stamped by a California Registered Civil Engineer (or equivalent registered professional as appropriate) to certify compliance for each approved project as listed in Exhibit A of this Grant Agreement.
2. Work that is subject to the California Environmental Quality Act (CEQA) (including final land purchases) shall not proceed under this Grant Agreement until the following actions are performed:

   a) The Grantee submits to the State all applicable environmental permits, as indicated on the Environmental Information Form to the State,

   b) Documents that satisfy the CEQA process are received by the State, and

   c) The Grantee receives written notification from the State of concurrence with the Lead Agency's CEQA documents (s) and State's notice of verification of environmental permit submittal.

   The State's concurrence of Lead Agency's CEQA documents is fully discretionary and shall constitute a condition precedent to any work (i.e., construction or implementation activities) for which it is required. Once CEQA documentation has been completed, the State will consider the environmental documents and decide whether to continue to fund the project, or to require changes, alterations, or other mitigation. Proceeding with work subject to CEQA prior to the State's concurrence shall constitute a material breach of this Agreement. The Grantee or Local Project Sponsor (LPS) shall also demonstrate that it has complied with all applicable requirements of the National Environmental Policy Act (NEPA) by submitting copies of any environmental documents, including Environmental Impact Statements, Finding of No Significant Impact, mitigation monitoring programs, and environmental permits as may be required prior to beginning construction/ implementation.

iv. A monitoring plan as required by Paragraph 15, "Monitoring Plan Requirements," if applicable.

6) DISBURSEMENT OF FUNDS. The State will disburse to the Grantee the amount approved, subject to the availability of funds through normal State processes. Notwithstanding any other provision of this Grant Agreement, no disbursement shall be required at any time or in any manner which is in violation of, or in conflict with, federal or state laws, rules, or regulations. Any and all money disbursed to the Grantee under this Grant Agreement shall be deposited in a non-interest-bearing account and shall be used solely to pay Eligible Project Costs.

7) ELIGIBLE PROJECT COST. The Grantee shall apply State funds received only to Eligible Project Costs in accordance with applicable provisions of the law and Exhibit B, "Budget". Eligible Project Costs include the reasonable costs of studies, engineering, design, land and easement acquisition and associated legal fees, preparation of environmental documentation, environmental mitigations, monitoring, and project construction. Reimbursable administrative expenses are the necessary costs incidental but directly related to the Project included in this Agreement. Costs incurred after June 30, 2022, may be eligible for reimbursement.

   Costs that are not eligible for reimbursement include, but are not limited to, the following items:

   A. Costs, other than those noted above, incurred prior to July 1, 2022.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

B. Costs for preparing and filing a grant application.

C. Purchase of equipment that is not an integral part of a project.

D. Establishing a reserve fund.

E. Purchase of water supply.

F. Replacement of existing funding sources (e.g., bridge loans).

G. Meals, food items, or refreshments.

H. Payment of any punitive regulatory agency requirement, federal or state taxes.

I. Purchase of land in excess of the minimum required acreage necessary to operate as an integral part of a project, as set forth and detailed by engineering and feasibility studies, or acquisition of land by eminent domain.

J. Overhead and Indirect Costs. “Indirect Costs” means those costs that are incurred for a common or joint purpose benefiting more than one cost objective and are not readily assignable to the funded project (i.e., costs that are not directly related to the funded project). Examples of Indirect Costs include, but are not limited to: central service costs; general administration of the Grantee or LPSs; non-project-specific accounting and personnel services performed within the Grantee’s or LPS’ organization; depreciation or use allowances on buildings and equipment; the costs of operating and maintaining non-project-specific facilities; tuition and conference fees; forums, trainings, and seminars; and, generic overhead or markup. This prohibition applies to the Grantee, LPSs, and any subcontract or sub-agreement for work on the Project that will be reimbursed pursuant to this Agreement.

K. Mitigation for environmental impacts not resulting from implementation of a project funded by this Agreement. Costs incurred as part of any necessary response and cleanup activities required under the Comprehensive Environmental Response, Compensation, and Liability Act; Resource Conservation and Recovery Act; Hazardous Substances Account Act; or other applicable law.

8) METHOD OF PAYMENT. After the disbursement requirements in Paragraph 5, “Basic Conditions” are met, the State will disburse the whole or portions of State funding to the Grantee, following receipt from the Grantee of an electronic invoice certified and transmitted via electronic/digital signature system (e.g., DocuSign) or via US mail or Express mail delivery of a “wet signature” for costs incurred, including Local Cost Share, and timely Quarterly Progress Reports as required by Paragraph 13, “Submission of Reports.” Payment will be made no more frequently than quarterly, in arrears, upon receipt of an invoice bearing the Grant Agreement number. Quarterly Progress Report must accompany an invoice and shall be submitted within 60 days following the end of the calendar quarter (i.e., invoices due May 30, August 29, November 29, and March 1). The State will notify the Grantee, in a timely manner, whenever, upon review of an invoice, the State determines that any portion or portions of the costs claimed are not eligible costs or is not supported by documentation or receipts acceptable to the State. The Grantee may, within thirty (30) calendar days of the date of receipt of such notice, submit additional documentation to the State to cure such deficiency(ies). If the Grantee fails to submit adequate documentation curing the deficiency(ies), the State will adjust the pending invoice by the amount of ineligible or unapproved costs.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Invoices submitted by the Grantee shall include the following information:

A. Costs incurred for work performed in implementing the Project during the period identified in the particular invoice.

B. Costs incurred for any interests in real property (land or easements) that have been necessarily acquired for a project during the period identified in the particular invoice for the implementation of a project.

C. Invoices shall be submitted on forms provided by the State and shall meet the following format requirements:

   i. Invoices shall contain the date of the invoice, either the time period covered by the invoice or the invoice date received within the time period covered, and the total amount due.

   ii. Invoices shall be itemized based on the categories (i.e., tasks) specified in Exhibit B, "Budget." The amount claimed for salaries/wages/consultant fees shall include a calculation formula (i.e., hours or days worked times the hourly or daily rate = the total amount claimed).

   iii. One set of sufficient evidence (i.e., receipts, copies of checks, personnel hours' summary table, time sheets) shall be provided for all costs included in the invoice.

   iv. Each invoice shall clearly delineate those costs claimed for reimbursement from the State's funding amount, as depicted in Paragraph 3, "Grant Amount".

   v. Original signature and date of the Grantee's Project Representative. Submit an electronic invoice, certified and transmitted via electronic/digital signature system (e.g., DocuSign), from authorized representative to the Project Manager or the original "wet signature" copy of the invoice form to the Project Manager at the following address: Financial Assistance Branch, DWR, P.O. Box 942836, Sacramento, CA 94236.

All invoices submitted shall be accurate and signed under penalty of law. Any and all costs submitted pursuant to this Agreement shall only be for the tasks set forth herein. The Grantee shall not submit any invoice containing costs that are ineligible or have been reimbursed from other funding sources unless required and specifically noted as such (i.e., cost share). Any eligible costs for which the Grantee is seeking reimbursement shall not be reimbursed from any other source. Double or multiple billing for time, services, or any other eligible cost is illegal and constitutes fraud. Any suspected occurrences of fraud, forgery, embezzlement, theft, or any other misuse of public funds may result in suspension of disbursements of grant funds and/or termination of this Agreement requiring the repayment of all funds disbursed hereunder plus interest. Additionally, the State may request an audit pursuant to Standard Condition Paragraph D.5 and refer the matter to the Attorney General's Office or the appropriate district attorney's office for criminal prosecution or the imposition of civil liability. (Civ. Code, §§ 1572-1573; Pen. Code, §§ 470, 487-489.)

9) ADVANCED PAYMENT. Water Code section 13198.4(c) authorizes advanced payment by the State for grantees that demonstrate cash flow issues. A project may receive an advanced payment of twenty-five (25) percent of its grant award; the remaining seventy-five (75) percent of the grant award will be reimbursed in arrears after the advanced funds have been fully expended. Within ninety (90) calendar days of execution of the Grant Agreement, the Grantee may provide

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

the State an Advanced Payment Request. Advanced Payment Requests received ninety-one (91) calendar days after the execution of this Agreement will not be eligible to receive an advanced payment. The Advanced Payment Request shall contain the following:

A. Documentation demonstrating that each LPS (if different from the Grantee, as listed in Exhibit I) was notified about their eligibility to receive an advanced payment and a response from the LPS stating whether it wishes to receive the advanced payment or not.

B. If the Grantee is requesting the advanced payment, the request(s) shall include:

   i. Descriptive information of each project with an update on project status.
   ii. Description and documentation of the cash flow issues the LPS has that requires funds to be advanced.
   iii. The names of the entities that will receive the funding for each project.
   iv. A detailed Funding Plan which includes how the advanced payment will be expended (in terms of workplan, budget, and schedule) within the timeframe agreed upon by DWR and the Grantee. The Funding Plan must clearly identify the total budget (at Budget Category Level) for each project clearly showing the portion of advanced payment and reimbursement funds.

   v. Any other information that DWR may deem necessary.

C. Upon review and approval of the Advanced Payment Request, DWR may authorize payment of the requested amount or a lesser amount for those entities that have requested advanced funds. Based on the project's Funding Plan and other considerations, DWR may develop a "Disbursement Schedule," to disburse funds in installments. This Disbursement Schedule may change based on the project's ongoing compliance with the Advanced Payment requirements and the project's cash flow needs.

D. Once DWR authorizes the Advanced Payment Request, the Grantee shall submit Advanced Payment Invoice(s) for the initial amount based on the "Disbursement Schedule" on behalf of the LPS(s), containing the request for each project requesting advanced funds, to the State with signature and date of the Grantee's Project Representative, as indicated in Paragraph 19, "Project Representative." The Grantee shall be responsible for the timely distribution of the advanced funds to the respective LPS(s). The Advanced Payment Invoice(s) shall be submitted on forms provided by the State and shall meet the following format requirements:

   i. Invoice shall contain the date of the invoice, the time period covered by the invoice, and the total amount due.

   ii. Invoice shall be itemized based on the budget categories specified in Exhibit B, "Budget."

   iii. The State Project Manager will notify the Grantee, in a timely manner, when, upon review of an Advance Payment Invoice, the State determines that any portion or portions of the costs claimed are not eligible costs. The Grantee may, within thirty (30) calendar days of the date of receipt of such notice, submit additional documentation to cure such deficiency(ies). The Grantee may, within thirty (30) calendar days of the date of receipt of such notice, submit additional documentation to cure such deficiency(ies). If costs are not consistent with the tasks in Exhibit A, the State will reject the claim and remove them from the Accountability Report.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

iv. On a quarterly basis, the Grantee will submit an Accountability Report to the State that demonstrates how actual expenditures compare with the scheduled budget. The Accountability Report shall include the following information:

1. An itemization of how advanced funds have been spent to-date (Expenditure Report), including documentation that supports the disbursements (e.g., contractor invoices, receipts, personnel hours, etc.). Accountability Reports shall be itemized based on the budget categories (i.e., tasks) specified in Exhibit B.
2. An updated Accountability Report including an updated Funding Plan that depicts how the remaining advanced funds will be expended and the activities and deliverables associated with the advanced funds within the timeframe agreed upon by DWR and the Grantee when the advanced payment request was approved.
3. Documentation that the funds were placed in a non-interest bearing account, including the dates of deposits and withdrawals from that account.
4. Proof of distribution of advanced funds to LPS(s), if applicable.

E. Once the Grantee has spent all advanced funds in a budget category, then the method of payment will revert to the reimbursement process for that budget category specified in Paragraph 8, “Method of Payment.”

10) WITHHOLDING OF DISBURSEMENTS BY THE STATE. If the State determines that a project is not being implemented in accordance with the provisions of this Grant Agreement, or that the Grantee has failed in any other respect to comply with the provisions of this Grant Agreement, and if the Grantee does not remedy any such failure to the State’s satisfaction, the State may withhold from the Grantee all or any portion of the State funding and take any other action that it deems necessary to protect its interests. Where a portion of the State funding has been disbursed to the Grantee and the State notifies the Grantee of its decision not to release funds that have been withheld pursuant to Paragraph 11, “Default Provisions,” the portion that has been disbursed shall thereafter be repaid immediately at the time the State notifies the Grantee, as directed by the State. The State may consider the Grantee’s refusal to repay the requested disbursed amount a material breach subject to the default provisions in Paragraph 11, “Default Provisions.” If the State notifies the Grantee of its decision to withhold the entire funding amount from the Grantee pursuant to this Paragraph, this Grant Agreement shall terminate upon receipt of such notice by the Grantee and the State shall no longer be required to provide funds under this Grant Agreement and the Grant Agreement shall no longer be binding on either party.

11) DEFAULT PROVISIONS. The Grantee shall be in default under this Grant Agreement if any of the following occur:

A. Substantial breaches of this Grant Agreement, or any supplement or amendment to it, or any other agreement between the Grantee and the State evidencing or securing the Grantee’s obligations;

B. Making any false warranty, representation, or statement with respect to this Grant Agreement or the application filed to obtain this Grant Agreement;

C. Failure to operate or maintain the Project in accordance with this Grant Agreement.

D. Failure to make any remittance required by this Grant Agreement, including any remittance recommended as the result of an audit conducted pursuant to Standard Condition Paragraph D.5.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

E. Failure to submit quarterly progress reports pursuant to Paragraph 5.

F. Failure to routinely invoice the State pursuant to Paragraph 8.

G. Failure to meet any of the requirements set forth in Paragraph 12, “Continuing Eligibility.”

Should an event of default occur, the State shall provide a notice of default to the Grantee and shall give the Grantee at least ten (10) calendar days to cure the default from the date the notice is sent via first-class mail to the Grantee. If the Grantee fails to cure the default within the time prescribed by the State, the State may do any of the following:

A. Declare the funding be immediately repaid.

B. Terminate any obligation to make future payments to the Grantee.

C. Terminate the Grant Agreement.

D. Take any other action that it deems necessary to protect its interests.

In the event the State finds it necessary to enforce this provision of this Grant Agreement in the manner provided by law, the Grantee agrees to pay all costs incurred by the State including, but not limited to, reasonable attorneys' fees, legal expenses, and costs.

12) CONTINUING ELIGIBILITY. The Grantee shall meet the following ongoing requirement(s) and all eligibility criteria outlined in the 2022 Guidelines to remain eligible to receive State funds:

A. An urban water supplier that receives grant funds pursuant to this Agreement shall maintain compliance with the Urban Water Management Planning Act (UWMP; Wat. Code, § 10610 et seq.) and Sustainable Water Use and Demand Reduction (Wat. Code, § 10608 et seq.) as set forth on page 21 of the 2022 Guidelines and Proposal Solicitation Package.

B. An agricultural water supplier receiving grant funds shall comply with Sustainable Water Use and Demand Reduction requirements outlined in Water Code section 10608, et seq. and have their Agricultural Water Management Plan (AWMP) deemed consistent by DWR. To maintain eligibility and continue funding disbursements, an agricultural water supply shall have their 2021 AWMP identified on the State’s website. For more information, visit the website listed in the 2022 Guidelines and Proposal Solicitation Package.

C. A surface water diverter receiving grant funds shall maintain compliance with diversion reporting requirements as outlined in Water Code section 5100 et. seq.

D. If applicable, the Grantee shall demonstrate compliance with the Sustainable Groundwater Management Act (SGMA) as set forth in the 2022 Guidelines and Proposal Solicitation Package.

E. If the Grantee has been designated as a monitoring entity under the California Statewide Groundwater Elevation Monitoring (CASGEM) Program, the Grantee shall maintain reporting compliance, as required by Water Code section 10932 and the CASGEM Program. Alternatively, if the Grantee has submitted a Groundwater Sustainability Plan (GSP) or Alternative Plan pursuant to the GSP Regulations (Cal. Code Regs., tit. 23, § 350 et seq.), groundwater level data must be submitted through the SGMA Portal at: https://sgma.water.ca.gov/portal/.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

F. The Grantee shall adhere to the protocols developed pursuant to The Open and Transparent Water Data Act (Wat. Code, § 12406, et seq.) for data sharing, transparency, documentation, and quality control.

G. On March 4, 2022, the Governor issued Executive Order N-6-22 (the EO) regarding Economic Sanctions against Russia and Russian entities and individuals. The EO may be found at: https://www.gov.ca.gov/wp-content/uploads/2022/03/3.4.22-Russia-Ukraine-Executive-Order.pdf. "Economic Sanctions" refers to sanctions imposed by the U.S. government in response to Russia's actions in Ukraine, as well as any sanctions imposed under State law. The EO directs DWR to terminate funding agreements with, and to refrain from entering any new agreements with, individuals or entities that are determined to be a target of Economic Sanctions. Accordingly, should the State determine that the Grantee is a target of Economic Sanctions or is conducting prohibited transactions with sanctioned individuals or entities, that shall be grounds for termination of this Agreement. The State shall provide the Grantee advance written notice of such termination, allowing the Grantee at least 30 calendar days to provide a written response. Termination shall be at the sole discretion of the State.

13) SUBMISSION OF REPORTS. The submittal and approval of all reports is a requirement for the successful completion of this Grant Agreement. Reports shall meet generally accepted professional standards for technical reporting and shall be proofread for content, numerical accuracy, spelling, and grammar prior to submittal to the State. All reports shall be submitted to the State's Project Manager and shall be submitted via the DWR "Grant Review and Tracking System" (GRanTS). If requested, the Grantee shall promptly provide any additional information deemed necessary by the State for the approval of reports. Reports shall be presented in the formats described in the applicable portion of Exhibit F, "Report Formats and Requirements." The timely submittal of reports is a requirement for initial and continued disbursement of State funds. Submittal and subsequent approval by the State of a Project Completion Report is a requirement for the release of any funds retained for such project.

A. Quarterly Progress Reports: The Grantee shall submit quarterly Progress Reports to meet the State's requirement for disbursement of funds. Progress Reports shall be uploaded via GRanTS, and the State's Project Manager notified of upload. Progress Reports shall, in part, provide a brief description of the work performed, the Grantee's activities, milestones achieved, any accomplishments and any problems encountered in the performance of the work under this Grant Agreement during the reporting period. The first Progress Report must accompany an invoice and shall be submitted within 60 days following the end of the calendar quarter (i.e., invoices due May 30, August 29, November 29, and March 1).

B. Project Completion Report: The Grantee shall prepare and submit to the State a separate Project Completion Report for each project included in Exhibit A. The Grantee shall submit a Project Completion Report (or a Component Completion Report, if a Project has multiple Components) within ninety (90) calendar days of Project/Component completion as outlined in Exhibit F.

C. Grant Completion Report: Upon completion of all the Projects included in Exhibit A, the Grantee shall submit to the State a Grant Completion Report. The Grant Completion Report shall be submitted within ninety (90) calendar days of submitting the Completion Report for the final project to be completed under this Grant Agreement, as outlined in Exhibits A and F.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Retention for any grant administration line items in the Budget of this Grant Agreement will not be disbursed until the Grant Completion Report is approved by the State.

D. Post-Performance Reports: The Grantee shall prepare and submit to the State Post-Performance Reports for the applicable project(s). Post-Performance Reports shall be submitted to the State within ninety (90) calendar days after the first operational year of a project has elapsed. This record keeping and reporting process shall be repeated annually for a total of three (3) years after the project begins operation.

14) OPERATION AND MAINTENANCE OF PROJECT. For the useful life of construction and implementation projects and in consideration of the funding made by the State, the Grantee agrees to ensure or cause to be performed the commencement and continued operation of the project, and shall ensure or cause the project to be operated in an efficient and economical manner; shall ensure all repairs, renewals, and replacements necessary to the efficient operation of the same are provided; and shall ensure or cause the same to be maintained in as good and efficient condition as upon its construction, ordinary and reasonable wear and depreciation excepted. The State shall not be liable for any cost of such maintenance, management, or operation. The Grantee or their successors may, with the written approval of the State, transfer this responsibility to use, manage, and maintain the property. For purposes of this Grant Agreement, “useful life” means period during which an asset, property, or activity is expected to be usable for the purpose it was acquired or implemented; “operation costs” include direct costs incurred for material and labor needed for operations, utilities, insurance, and similar expenses, and “maintenance costs” include ordinary repairs and replacements of a recurring nature necessary for capital assets and basic structures and the expenditure of funds necessary to replace or reconstruct capital assets or basic structures. Refusal by the Grantee to ensure operation and maintenance of the projects in accordance with this provision may, at the option of the State, be considered a breach of this Grant Agreement and may be treated as default under Paragraph 11, “Default Provisions.”

15) MONITORING PLAN REQUIREMENTS. A Monitoring Plan shall be submitted to the State prior to disbursement of State funds for construction or monitoring activities. The Monitoring Plan should incorporate Post-Performance Monitoring Report requirements as defined and listed in Exhibit F, and follow the guidance provided in Exhibit L, “Project Monitoring Plan Guidance.”

16) NOTIFICATION OF STATE. The Grantee shall promptly notify the State, in writing, of the following items:

A. Events or proposed changes that could affect the scope, budget, or work performed under this Grant Agreement. The Grantee agrees that no substantial change in the scope of a project will be undertaken until written notice of the proposed change has been provided to the State and the State has given written approval for such change. Substantial changes generally include changes to the scope of work, schedule or term, and budget.

B. Any public or media event publicizing the accomplishments and/or results of this Grant Agreement and provide the opportunity for attendance and participation by the State’s representatives. The Grantee shall make such notification at least fourteen (14) calendar days prior to the event.

C. Discovery of any potential archaeological or historical resource. Should a potential archaeological or historical resource be discovered during construction, the Grantee agrees

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

that all work in the area of the find shall cease until a qualified archaeologist has evaluated the situation and made recommendations regarding preservation of the resource, and the State has determined what actions should be taken to protect and preserve the resource. The Grantee agrees to implement appropriate actions as directed by the State.

D. The initiation of any litigation or the threat of litigation against the Grantee or an LPS regarding the Project or which may affect the Project in any way.

E. Applicable to construction projects only: Final inspection of the completed work on a project by a Registered Professional (Civil Engineer, Engineering Geologist, or other State approved certified/licensed Professional), in accordance with Exhibit D. The Grantee shall notify the State's Project Manager of the inspection date at least fourteen (14) calendar days prior to the inspection in order to provide the State the opportunity to participate in the inspection.

17) NOTICES. Any notice, demand, request, consent, or approval that either party desires or is required to give to the other party under this Grant Agreement shall be in writing. Notices may be transmitted by any of the following means:

A. By delivery in person.

B. By certified U.S. mail, return receipt requested, postage prepaid.

C. By "overnight" delivery service; provided that next-business-day delivery is requested by the sender.

D. By electronic means.

E. Notices delivered in person will be deemed effective immediately on receipt (or refusal of delivery or receipt). Notices sent by certified mail will be deemed effective given ten (10) calendar days after the date deposited with the U.S. Postal Service. Notices sent by overnight delivery service will be deemed effective one business day after the date deposited with the delivery service. Notices sent electronically will be effective on the date of transmission, which is documented in writing. Notices shall be sent to the addresses listed below. Either party may, by written notice to the other, designate a different address that shall be substituted for the one below.

18) PERFORMANCE EVALUATION. Upon completion of this Grant Agreement, the Grantee's performance will be evaluated by the State and a copy of the evaluation will be placed in the State file and a copy sent to the Grantee.

19) PROJECT REPRESENTATIVES. The Project Representatives during the term of this Grant Agreement are as follows:

Department of Water Resources

Arthur Hinojosa
Manager, Division of Regional Assistance
P.O. Box 942836
Sacramento, CA 94236
Phone: (916) 902-6713
Email: Arthur.Hinojosa@water.ca.gov

Zone 7 Water Agency

Valerie Pryor
General Manager
100 North Canyons Parkway
Livermore, CA 94551
Phone: (925) 454-5000
Email:vpryor@zone7water.com

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Direct all inquiries to the Project Manager:

Department of Water Resources	Zone 7 Water Agency
Amenda Blackwell Environmental Scientist P.O. Box 942836 Sacramento, CA 94236 Phone: 916-326-9026 Email: Amanda.Blackwell@water.ca.gov	Kevin Padway Assistant Water Resources Planner 100 North Canyons Parkway Livermore, CA 94550 Phone: (925) 454-5020 Email: kpadway@zone7water.com

Either party may change its Project Representative or Project Manager upon written notice to the other party.

20) STANDARD PROVISIONS. This Grant Agreement is complete and is the final Agreement between the parties. The following Exhibits are attached and made a part of this Grant Agreement by this reference:

Exhibit A – Work Plan

Exhibit B – Budget

Exhibit C – Schedule

Exhibit D – Standard Conditions

Exhibit E – Authorizing Resolution

Exhibit F – Report Formats and Requirements

Exhibit G – Requirements for Data Submittal

Exhibit H – State Audit Document Requirements and Cost Share Guidelines for the Grantee

Exhibit I – Local Project Sponsors and Project Locations

Exhibit J – Appraisal Specifications

Exhibit K – Information Needed for Escrow Processing and Closure

Exhibit L – Project Monitoring Plan Guidance

Exhibit M – Invoice Guidance for Administrative and Overhead Charges

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

IN WITNESS WHEREOF, the parties hereto have executed this Grant Agreement.

WORK PLAN

Grant Administration

IMPLEMENTING AGENCY: Zone 7 Water Agency (Grantee)

PROJECT DESCRIPTION: The Grantee will administer these funds and respond to DWR's reporting and compliance requirements associated with the grant administration. This Grantee will act in a coordination role: disseminating grant compliance information to the project managers responsible for implementing the projects contained in this Agreement, obtaining and retaining evidence of compliance (e.g., CEQA/NEPA documents, reports, monitoring compliance documents, labor requirements, etc.), obtaining data for progress reports from individual project managers, assembling and submitting progress reports to the State, and coordinating all invoicing and payment of invoices.

Budget Category (a): Project Administration

Task 1: Agreement Administration

The Grantee will respond to DWR's reporting and compliance requirements associated with the grant administration and will coordinate with the project managers responsible for implementing the projects contained in this Agreement.

Task 2: Invoicing

The Grantee will be responsible for compiling invoices for submittal to DWR. This includes collecting invoice documentation from each of the Local Project Sponsors and compiling the information into a DWR Invoice Packet.

Deliverables:

- Quarterly Invoices and associated backup documentation

Task 3: Reporting

The Grantee will be responsible for compiling progress reports for submittal to DWR. The Grantee will coordinate with Local Project Sponsor staff to retain consultants as needed to prepare and submit progress reports and final project completion reports for each project, as well as the grant completion report.

Reports will meet generally accepted professional standards for technical reporting and the requirements terms of the contract with DWR outlined in Exhibit F of this Agreement.

Deliverables:

- Quarterly Progress Reports
- Grant Completion Report

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

PROJECT 1: Dublin Irrigation System Upgrades

IMPLEMENTING AGENCY: City of Dublin (City)

PROJECT DESCRIPTION: The project will achieve four improvements to the City's Central Irrigation System: 1) Communications – Provide necessary improvements to existing system to ensure adequate communication between the central system and irrigation controllers throughout all City maintained landscapes; 2) System Optimization and Operations – For 25 of the City's large landscapes provide advanced site-specific scheduling to improve overall water efficiency and landscape quality based on the following factors: soil, plant type, slope, sun, shade, etc. Additionally, provide operational and training support for City Staff to maintain and continue system operations; 3) System Upgrades – Install up to 40 new controllers with cellular communication capable of communicating with the Central Irrigation System along street medians west of Dougherty Road in Dublin; and 4) The work will also include up to forty master valve and flow systems that can shut off in the event of an unscheduled flow. It is anticipated that by completing all three measures the City of Dublin park system will reduce water usage by approximately 28 acre-feet per year based on acreage of City maintained landscapes as of July 1, 2023.

Budget Category (a): Project Administration

Task 1: Project Management

Manage Grant Agreement including compliance with grant requirements, and preparation and submission of supporting grant documents. Prepare invoices including relevant supporting documentation for submittal to DWR via the Grantee. This task also includes administrative responsibilities associated with the project such as coordinating with partnering agencies and managing consultants/contractors.

Deliverables:

- Invoices and associated backup documentation

Task 2: Reporting

Prepare progress reports detailing work completed during reporting period as outlined in Exhibit F of this Agreement. Submit reports to DWR.

Prepare Project Completion Report and submit to DWR no later than 90 days after project completion for DWR Project Manager's comment and review. The report shall be prepared and presented in accordance with guidance as outlined in Exhibit F.

Deliverables:

- Quarterly Project Progress Reports
- Project Completion Report
- Documentation (e.g., photo) of "Acknowledgment of Credit & Signage" per Standard Condition D.2

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Budget Category (b): Land Purchase/Easement

Task 3: Land Purchase

Not applicable.

Budget Category (c): Planning/Design/Engineering/Environmental Documentation

Task 4: Feasibility Studies

Not applicable.

Task 5: CEQA Documentation

Complete environmental review pursuant to CEQA. Prepare all necessary environmental documentation. Prepare letter stating no legal challenges (or addressing legal challenges).

Deliverables:

- All completed CEQA documents as required
- Legal Challenges Letter

Task 6: Permitting

The following permits are anticipated to be acquired for this project: Encroachment Permit from the City of Dublin

Deliverables:

- Permits as required

Task 7: Design

Design will require: 1) Complete communication connections 2) Complete system programming and optimization 3) Complete plans and specifications for the replacement of irrigation controllers and installation of master-valve/flow sensors.

Deliverables:

- 100% Design Plans and Specifications

Task 8: Project Monitoring Plan

Develop and submit a Project Monitoring Plan per Paragraph 15 for DWR's review and approval.

Deliverables:

- Project Monitoring Plan

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Budget Category (d): Construction/Implementation

Task 9: Contract Services

This task must comply with the Standard Condition D.10 – Competitive Bidding and Procurements. Activities necessary (as applicable) to secure a contractor and award the contract, including: develop bid documents, prepare advertisement and contract documents for construction contract bidding, conduct pre-bid meeting, bid opening and evaluation, selection of the contractor, award of contract, and issuance of notice to proceed.

Deliverables:

- Bid Documents
- Proof of Advertisement
- Award of Contract
- Notice to Proceed

Task 10: Construction Administration

This task includes managing contractor submittal review, answering requests for information, and issuing work directives. An engineering construction observer will be on site for the duration of the project. Construction observer duties include documenting of pre-construction conditions, daily construction diary, preparing change orders, addressing questions of contractors on site, reviewing/ updating project schedule, reviewing contractor log submittals and pay requests, notifying contractor if work is not acceptable. Upon completing the project, the DWR Certificate of Project Completion will be provided to DWR.

Deliverables:

- DWR Certificate of Project Completion
-

Task 11: Construction

Construction activities are outlined below.

11(a): Mobilization and Demobilization: Contractor will establish systems, personnel, procure equipment and materials in preparation to complete work. At the end of the project the contractor will complete punchlist and scale down operations to closeout the work.

11(b): Site preparation will include removal of up to 40 existing controllers, excavation and demolition of existing improvements.

11(c): Install, construct, excavate Up to 40 new controllers and up to 40 master valve and flow systems will be installed.

11(d): Improve: The improvements will result in up to 40 new controllers and up to 40 master valve and flow systems being installed.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Program activities are outlined below:

11(e): Communication Upgrades: Working with the City's Central System vendor and irrigation consultant identify the issues with communications between the Central System and irrigation controllers. Take corrective measures to ensure operational effectiveness of the system.

11(f): System Optimization and Operations: The City's irrigation consultant will evaluate twenty-five of the City's large landscapes and will provide advanced sites-specific scheduling based on soil, plant type, slope, sun, shade et cetera to improve overall water efficiency.

11(g): System Optimization and Operations: The City's irrigation consultant along with the Central System vendor will provide operation and training support for City Staff to maintain and operate the system on-going.

Deliverables:

- Photographic Documentation of Progress

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

PROJECT 2: Citywide Turf Reduction

IMPLEMENTING AGENCY: City of Livermore (City)

PROJECT DESCRIPTION: This project will help the City reduce non-functional turf at various City properties, thereby reducing the demand for potable water. The City anticipates replacing approximately 109,000 square feet of turf in at least five City owned sites. This turf would be replaced with a drought tolerant landscape and incorporate drip irrigation. The project would reduce water demand by approximately 21 acre-feet per year.

Budget Category (a): Project Administration

Task 1: Project Management

Manage Grant Agreement including compliance with grant requirements, and preparation and submission of supporting grant documents. Prepare invoices including relevant supporting documentation for submittal to DWR via the Grantee. This task also includes administrative responsibilities associated with the project such as coordinating with partnering agencies and managing consultants/contractors.

Deliverables:

- Invoices and associated backup documentation

Task 2: Reporting

Prepare progress reports detailing work completed during reporting period as outlined in Exhibit F of this Agreement. Submit reports to DWR.

Prepare Project Completion Report and submit to DWR no later than 90 days after project completion for DWR Project Manager's comment and review. The report shall be prepared and presented in accordance with guidance as outlined in Exhibit F.

Deliverables:

- Quarterly Project Progress Reports
- Project Completion Report
- Documentation (e.g., photo) of "Acknowledgment of Credit & Signage" per Standard Condition D.2

Budget Category (b): Land Purchase/Easement

Task 3: Land Purchase

Not Applicable.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Budget Category (c): Planning/Design/Engineering/Environmental Documentation

Task 4: Feasibility Studies

Initial planning has been completed on this project. Five sites have been identified and City staff will work with a consultant to draft initial designs. Conceptual planting designs will be available as part of the Project Monitoring Plan.

Deliverables:

- Site plans

Task 5: CEQA Documentation

Complete environmental review pursuant to CEQA. Prepare all necessary environmental documentation. Prepare letter stating no legal challenges (or addressing legal challenges).

Deliverables:

- All completed CEQA documents as required
- Legal Challenges Letter

Task 6: Permitting

Not applicable

Task 7: Design

The City currently maintains approximately 18.25 acres of turf, with 15.5 acres irrigated with potable water. The remainder is irrigated with reclaimed water.

The landscape designs for the five proposed turf reduction areas (1) City Center Campus, (2) Arroyo Road, (3) East Avenue, (4) Crater Way, and (5) Maintenance Service Center place a specific emphasis on replacing turf with low water use plantings while maintaining aesthetics. In addition, planting strategies such as minimizing clustering, proper tree spacing, and considering full maturity of plants will reduce maintenance requirements and increase plant health.

The landscape design renovations will include updating the irrigation systems from overhead sprays to individual plant bubblers. Irrigation strategies will include isolated lateral lines, drip irrigation and timings. Individual circuits to certain trees or tree clusters will help sustain trees when mandatory water restrictions are required, including further reductions.

Competitive bid contractors would be utilized for the renovations.

Deliverables:

- Final designs

Task 8: Project Monitoring Plan

Develop and submit a Project Monitoring Plan per Paragraph 15 for DWR’s review and approval.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Deliverables:

- Project Monitoring Plan

Budget Category (d): Construction/Implementation

Task 9: Contract Services

This task must comply with the Standard Condition D.10 – Competitive Bidding and Procurements. Activities necessary (as applicable) to secure a contractor and award the contract, including: develop bid documents, prepare advertisement and contract documents for construction contract bidding, conduct pre-bid meeting, bid opening and evaluation, selection of the contractor, award of contract, and issuance of notice to proceed.

Deliverables:

- Bid Documents
- Proof of Advertisement
- Award of Contract
- Notice to Proceed

Task 10: Construction Administration

This task includes managing contractor submittal review, answering requests for information, and issuing work directives. Upon completing the project, the DWR Certificate of Project Completion will be provided to DWR.

Deliverables:

- DWR Certificate of Project Completion

Task 11: Construction

Construction activities are outlined below.

11(a): Mobilization and demobilization is not required for the turf reduction projects.

11(b): Site preparation is minimal and includes turf removal and/or sheet mulching.

11(c): Low water use landscaping and/or ground cover such as mulch will be installed. Drip irrigation will also be installed where necessary at the five identified sites. Excavation will not be required since each site will sheet mulch over existing turf.

Deliverables:

- Photographic Documentation of Progress

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

PROJECT 3: Recycled Water Fill Station

IMPLEMENTING AGENCY: City of Livermore

PROJECT DESCRIPTION: This project will construct an automated self-service recycled water fill station that will allow residential customers access to recycled water for irrigation and other non-potable uses. The automated fill station would provide a permanent year-round recycled water source for many residents. This project will increase recycled water use locally by approximately 18 acre-feet per year.

Budget Category (a): Project Administration

Task 1: Project Management

Manage Grant Agreement including compliance with grant requirements, and preparation and submission of supporting grant documents. Prepare invoices including relevant supporting documentation for submittal to DWR via the Grantee. This task also includes administrative responsibilities associated with the project such as coordinating with partnering agencies and managing consultants/contractors.

Deliverables:

- Invoices and associated backup documentation

Task 2: Reporting

Prepare progress reports detailing work completed during reporting period as outlined in Exhibit F of this Agreement. Submit reports to DWR.

Prepare Project Completion Report and submit to DWR no later than 90 days after project completion for DWR Project Manager's comment and review. The report shall be prepared and presented in accordance with guidance as outlined in Exhibit F.

Deliverables:

- Quarterly Project Progress Reports
- Project Completion Report
- Documentation (e.g., photo) of "Acknowledgment of Credit & Signage" per Standard Condition D.2

Budget Category (b): Land Purchase/Easement

Task 3: Land Purchase

Not applicable.

Budget Category (c): Planning/Design/Engineering/Environmental Documentation

Task 4: Feasibility Studies

Preliminary planning has been completed for this project. A site located at the Water Resources Plant has been identified. A site plan will be available as part of the Project Monitoring Plan.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Deliverables:

- Site Plan

Task 5: CEQA Documentation

Complete environmental review pursuant to CEQA. Prepare all necessary environmental documentation. Prepare letter stating no legal challenges (or addressing legal challenges).

Deliverables:

- All completed CEQA documents as required
- Legal Challenges Letter

Task 6: Permitting

The project will require connection to existing electrical service that may be subject to permits. No other permits will be required to complete this project.

Deliverables:

- Permits as required

Task 7: Design

The fill station location is adjacent to existing roadway at the entrance of the plant. Two fill station machines will be installed. The fill stations will be unmanned with automated access control. The installation will include a trenched connection to existing water supply and electrical service.

Deliverables:

- 100% Design Plans and Specifications

Task 8: Project Monitoring Plan

Develop and submit a Project Monitoring Plan per Paragraph 15 for DWR's review and approval.

Deliverables:

- Project Monitoring Plan

Budget Category (d): Construction/Implementation

Task 9: Contract Services

This task must comply with the Standard Condition D.10 – Competitive Bidding and Procurements. Activities necessary (as applicable) to secure a contractor and award the contract, including: develop bid documents, prepare advertisement and contract documents for construction contract bidding, conduct pre-bid meeting, bid opening and evaluation, selection of the contractor, award of contract, and issuance of notice to proceed.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Deliverables:

- Bid Documents
- Proof of Advertisement
- Award of Contract
- Notice to Proceed

Task 10: Construction Administration

This task includes managing contractor submittal review, answering requests for information, and issuing work directives. A full-time engineering construction observer will be on site for the duration of the project. Construction observer duties include documenting of pre-construction conditions, daily construction diary, preparing change orders, addressing questions of contractors on site, reviewing/ updating project schedule, reviewing contractor log submittals and pay requests, forecasting cash flow, notifying contractor if work is not acceptable. Upon completing the project, the DWR Certificate of Project Completion and record drawings will be provided to DWR.

Deliverables:

- DWR Certificate of Project Completion
- Record Drawings

Task 11: Construction

Construction activities are outlined below.

11(a): Mobilization and Demobilization including preparation of submittals and layout in city provided space near construction site.

11(b): Site preparation will include signage, barricades segregating public from construction site, traffic control, and clearing and grubbing.

11(c): Utility trenching including connecting to existing point of electrical service and water supply, installation of water supply piping, related valves, and meter; conduits and conductors for access control; and backfill compaction and surface restoration.

11(d): Fill station construction including forming and pouring concrete service pads, bollards, signage, and installation of pre-packaged fill station equipment (nozzle, stand, etc.).

11(e): Installation of access control and connection to existing electrical supply.

This project is located at the existing Water Reclamation Facility, so construction impacts will be minimal.

Deliverables:

- Photographic Documentation of Progress

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

PROJECT 4: Fire Department Training Water Recirculation System

IMPLEMENTING AGENCY: Alameda County Fire Department (ACFD)

PROJECT DESCRIPTION: ACFD will purchase four portable training water recirculation systems to incorporate into trainings. These systems will allow the department to train at the required National Fire Protection Association (NFPA) and the fire department standards without excess water loss. The portable water recirculation systems will allow ACFD to continue to train to the required NFPA standards (flowing at full operational capacity), while recapturing water and recirculating it. Through the training implementation component, the recirculation equipment is estimated to conserve approximately 140 acre-feet per year and improve the readiness of the region's first responders. Standard operational guidelines would be developed to modify the training procedures to utilize the portable water recirculating systems.

Budget Category (a): Project Administration

Task 1: Project Management

Manage Grant Agreement including compliance with grant requirements, and preparation and submission of supporting grant documents. Prepare invoices including relevant supporting documentation for submittal to DWR via the Grantee. This task also includes administrative responsibilities associated with the project such as coordinating with partnering agencies and managing consultants/contractors.

Deliverables:

- Invoices and associated backup documentation

Task 2: Reporting

Prepare progress reports detailing work completed during reporting period as outlined in Exhibit F of this Agreement. Submit reports to DWR.

Prepare Project Completion Report and submit to DWR no later than 90 days after project completion for DWR Project Manager's comment and review. The report shall be prepared and presented in accordance with guidance as outlined in Exhibit F.

Deliverables:

- Quarterly Project Progress Reports
- Project Completion Report
- Documentation (e.g., photo) of "Acknowledgment of Credit & Signage" per Standard Condition D.2

Budget Category (b): Land Purchase/Easement

Task 3: Land Purchase

Not applicable.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Budget Category (c): Planning/Design/Engineering/Environmental Documentation

Task 4: Feasibility Studies

Not applicable.

Task 5: CEQA Documentation

Not applicable.

Task 6: Permitting

Not applicable.

Task 7: Operating Documentation

This project requires modifying ACFD Standard Operating Guidelines for our firefighter and engineer water flow and hydraulics operations. These changes will memorialize the operational use and require how actual water flow, for training purposes, is addressed utilizing these new systems.

Deliverables:

- Updated Operating Guidelines, if requested

Task 8: Project Monitoring Plan

Develop and submit a Project Monitoring Plan per Paragraph 15 for DWR's review and approval.

Deliverables:

- Project Monitoring Plan

Budget Category (d): Construction/Implementation

Task 9: Contract Services

This task must comply with the Standard Condition D.10 – Competitive Bidding and Procurements.

Grantee's contracts with other entities for the acquisition of goods and services and construction of public works with funds provided by State under this Funding Agreement must be in writing and shall comply with all applicable laws and regulations regarding the securing of competitive bids and undertaking competitive negotiations. This task must comply with Alameda County's Procurement Policies and Procedures.

Deliverables:

- Required procurement documentation per Alameda County's Procurement Policies and Procedures.

Task 10: Construction

The implementing agency will perform the following tasks:

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

- Purchase and insert four portable training water recirculation systems into service and incorporate into regular trainings (as feasible) for all battalions
    - Units will primarily be based at the ACFD regional training center, their portability allows for them to be moved around the regional training center and offsite for different training scenarios and evolutions
- Provide digital project photos pre/post addition of the systems
- Collect site-specific data on recirculation equipment savings for program evaluation

Deliverables:

- Photographic Documentation of Progress
- DWR Certificate of Project Completion

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

EXHIBIT B

BUDGET

AGREEMENT BUDGET SUMMARY

Required Minimum Cost Share: $768,049

	PROJECTS	Grant Amount	Required Cost Share	All Other Cost	Total Cost	Cost Share Waiver
1	Dublin Irrigation System Upgrades	$1,380,000	$460,000	$0	$1,840,000	No
2	Citywide Turf Reduction	$262,500	$87,500	$0	$350,000	No
3	Recycled Water Fill Station	$300,000	$100,000	$0	$400,000	No
4	Fire Department Training Water Recirculation System	$300,000	$120,549	$61,647	$482,196	No
	GRAND TOTAL	**$2,242,500**	**$768,049**	**$61,647**	**$3,072,196**

EXHIBIT D

STANDARD CONDITIONS

D.1. ACCOUNTING AND DEPOSIT OF FUNDING DISBURSEMENT:

A. Separate Accounting of Funding Disbursements: Grantee shall account for the money disbursed pursuant to this Funding Agreement separately from all other Grantee funds. Grantee shall maintain audit and accounting procedures that are in accordance with generally accepted accounting principles and practices, consistently applied. Grantee shall keep complete and accurate records of all receipts and disbursements on expenditures of such funds. Grantee shall require its contractors or subcontractors to maintain books, records, and other documents pertinent to their work in accordance with generally accepted accounting principles and practices. Records are subject to inspection by State at any and all reasonable times.

B. Disposition of Money Disbursed: All money disbursed pursuant to this Funding Agreement shall be deposited in a non-interest-bearing account, administered, and accounted for pursuant to the provisions of applicable law.

C. Remittance of Unexpended Funds: Grantee shall remit to State any unexpended funds that were disbursed to Grantee under this Funding Agreement and were not used to pay Eligible Project Costs within a period of sixty (60) calendar days from the final disbursement from State to Grantee of funds or, within thirty (30) calendar days of the expiration of the Funding Agreement, whichever comes first.

D.2. ACKNOWLEDGEMENT OF CREDIT AND SIGNAGE: Grantee shall include appropriate acknowledgement of credit to the State for its support when promoting the Project or using any data and/or information developed under this Funding Agreement. Signage shall be posted in a prominent location at Project site(s) (if applicable) or at the Grantee's headquarters and shall include the Department of Water Resources color logo and the following disclosure statement: "Funding for this project has been provided in full or in part from the Budget Act of 2021 and through an agreement with the State Department of Water Resources." The Grantee shall also include in each of its contracts for work under this Agreement a provision that incorporates the requirements stated within this Paragraph.

D.3. AMENDMENT: This Funding Agreement may be amended at any time by mutual agreement of the Parties, except insofar as any proposed amendments are in any way contrary to applicable law. Requests by the Grantee for amendments must be in writing stating the amendment request and the reason for the request. Requests solely for a time extension must be submitted at least 90 days prior to the work completion date set forth in Paragraph 2. Any other request for an amendment must be submitted at least 180 days prior to the work completion date set forth in Paragraph 2. State shall have no obligation to agree to an amendment.

D.4. AMERICANS WITH DISABILITIES ACT: By signing this Funding Agreement, Grantee assures State that it complies with the Americans with Disabilities Act (ADA) of 1990, (42 U.S.C. § 12101 et seq.), which prohibits discrimination on the basis of disability, as well as all applicable regulations and guidelines issued pursuant to the ADA.

D.5. AUDITS: State reserves the right to conduct an audit at any time between the execution of this Funding Agreement and the completion of the Project, with the costs of such audit borne

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

by State. After completion of the Project, State may require Grantee to conduct a final audit to State's specifications, at Grantee's expense, such audit to be conducted by and a report prepared by an independent Certified Public Accountant. Failure or refusal by Grantee to comply with this provision shall be considered a breach of this Funding Agreement, and State may elect to pursue any remedies provided in Paragraph 11 or take any other action it deems necessary to protect its interests. The Grantee agrees it shall return any audit disallowances to the State.

Pursuant to Government Code section 8546.7, the Grantee shall be subject to the examination and audit by the State for a period of three (3) years after final payment under this Funding Agreement with respect of all matters connected with this Funding Agreement, including but not limited to, the cost of administering this Funding Agreement. All records of Grantee or its contractor or subcontractors shall be preserved for this purpose for at least three (3) years after receipt of the final disbursement under this Agreement.

D.6. BUDGET CONTINGENCY: If the Budget Act of the current year covered under this Funding Agreement does not appropriate sufficient funds for this program, this Funding Agreement shall be of no force and effect. This provision shall be construed as a condition precedent to the obligation of State to make any payments under this Funding Agreement. In this event, State shall have no liability to pay any funds whatsoever to Grantee or to furnish any other considerations under this Funding Agreement and Grantee shall not be obligated to perform any provisions of this Funding Agreement. Nothing in this Funding Agreement shall be construed to provide Grantee with a right of priority for payment over any other Grantee. If funding for any fiscal year after the current year covered by this Funding Agreement is reduced or deleted by the Budget Act, by Executive Order, or by order of the Department of Finance, the State shall have the option to either cancel this Funding Agreement with no liability occurring to State, or offer a Funding Agreement amendment to Grantee to reflect the reduced amount.

D.7. CEQA: Activities funded under this Funding Agreement, regardless of funding source, must be in compliance with the California Environmental Quality Act (CEQA). (Pub. Resources Code, § 21000 et seq.) Any work that is subject to CEQA and funded under this Agreement shall not proceed until documents that satisfy the CEQA process are received by the State's Project Manager and the State has completed its CEQA compliance. Work funded under this Agreement that is subject to a CEQA document shall not proceed until and unless approved by the Department of Water Resources. Such approval is fully discretionary and shall constitute a condition precedent to any work for which it is required. If CEQA compliance by the Grantee is not complete at the time the State signs this Agreement, once State has considered the environmental documents, it may decide to require changes, alterations, or other mitigation to the Project; or to not fund the Project. Should the State decide to not fund the Project, this Agreement shall be terminated in accordance with Paragraph 10.

D.8. CHILD SUPPORT COMPLIANCE ACT: The Grantee acknowledges in accordance with Public Contract Code section 7110, that:

A. The Grantee recognizes the importance of child and family support obligations and shall fully comply with all applicable state and federal laws relating to child and family support enforcement, including, but not limited to, disclosure of information and compliance with earnings assignment orders, as provided in Family Code section 5200 et seq.; and

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

B. The Grantee, to the best of its knowledge is fully complying with the earnings assignment orders of all employees and is providing the names of all new employees to the New Hire Registry maintained by the California Employment Development Department.

D.9. CLAIMS DISPUTE: Any claim that the Grantee may have regarding performance of this Agreement including, but not limited to, claims for additional compensation or extension of time, shall be submitted to the DWR Project Representative, within thirty (30) days of the Grantee's knowledge of the claim. State and Grantee shall then attempt to negotiate a resolution of such claim and process an amendment to this Agreement to implement the terms of any such resolution.

D.10. COMPETITIVE BIDDING AND PROCUREMENTS: Grantee's contracts with other entities for the acquisition of goods and services and construction of public works with funds provided by State under this Funding Agreement must be in writing and shall comply with all applicable laws and regulations regarding the securing of competitive bids and undertaking competitive negotiations. If the Grantee does not have a written policy to award contracts through a competitive bidding or sole source process, the Department of General Services' *State Contracting Manual* rules must be followed and are available at: https://www.dgs.ca.gov/OLS/Resources/Page-Content/Office-of-Legal-Services-Resources-List-Folder/State-Contracting.

D.11. COMPUTER SOFTWARE: Grantee certifies that it has appropriate systems and controls in place to ensure that state funds will not be used in the performance of this Funding Agreement for the acquisition, operation, or maintenance of computer software in violation of copyright laws.

D.12. CONFLICT OF INTEREST: All participants are subject to State and Federal conflict of interest laws. Failure to comply with these laws, including business and financial disclosure provisions, will result in the application being rejected and any subsequent contract being declared void. Other legal action may also be taken. Applicable statutes include, but are not limited to, Government Code section 1090 and Public Contract Code sections 10410 and 10411, for State conflict of interest requirements.

A. Current State Employees: No State officer or employee shall engage in any employment, activity, or enterprise from which the officer or employee receives compensation or has a financial interest and which is sponsored or funded by any State agency, unless the employment, activity, or enterprise is required as a condition of regular State employment. No State officer or employee shall contract on his or her own behalf as an independent contractor with any State agency to provide goods or services.

B. Former State Employees: For the two-year period from the date he or she left State employment, no former State officer or employee may enter into a contract in which he or she engaged in any of the negotiations, transactions, planning, arrangements, or any part of the decision-making process relevant to the contract while employed in any capacity by any State agency. For the twelve-month period from the date he or she left State employment, no former State officer or employee may enter into a contract with any State agency if he or she was employed by that State agency in a policy-making position in the same general subject area as the proposed contract within the twelve-month period prior to his or her leaving State service.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

C. Employees of the Grantee: Employees of the Grantee shall comply with all applicable provisions of law pertaining to conflicts of interest, including but not limited to any applicable conflict of interest provisions of the California Political Reform Act. (Gov. Code, § 87100 et seq.)

D. Employees and Consultants to the Grantee: Individuals working on behalf of a Grantee may be required by the Department to file a Statement of Economic Interests (Fair Political Practices Commission Form 700) if it is determined that an individual is a consultant for Political Reform Act purposes.

D.13. DELIVERY OF INFORMATION, REPORTS, AND DATA: Grantee agrees to expeditiously provide throughout the term of this Funding Agreement, such reports, data, information, and certifications as may be reasonably required by State.

D.14. DISPOSITION OF EQUIPMENT: Grantee shall provide to State, not less than 30 calendar days prior to submission of the final invoice, an itemized inventory of equipment purchased with funds provided by State. The inventory shall include all items with a current estimated fair market value of more than $5,000.00 per item. Within 60 calendar days of receipt of such inventory State shall provide Grantee with a list of the items on the inventory that State will take title to. All other items shall become the property of Grantee. State shall arrange for delivery from Grantee of items that it takes title to. Cost of transportation, if any, shall be borne by State.

D.15. DRUG-FREE WORKPLACE CERTIFICATION: Certification of Compliance: By signing this Funding Agreement, Grantee, its contractors or subcontractors hereby certify, under penalty of perjury under the laws of State of California, compliance with the requirements of the Drug-Free Workplace Act of 1990 (Gov. Code, § 8350 et seq.) and have or will provide a drug-free workplace by taking the following actions:

A. Publish a statement notifying employees, contractors, and subcontractors that unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited and specifying actions to be taken against employees, contractors, or subcontractors for violations, as required by Government Code section 8355.

B. Establish a Drug-Free Awareness Program, as required by Government Code section 8355 to inform employees, contractors, or subcontractors about all of the following:

i. The dangers of drug abuse in the workplace,

ii. Grantee’s policy of maintaining a drug-free workplace,

iii. Any available counseling, rehabilitation, and employee assistance programs, and

iv. Penalties that may be imposed upon employees, contractors, and subcontractors for drug abuse violations.

C. Provide, as required by Government Code section 8355, that every employee, contractor, and/or subcontractor who works under this Funding Agreement:

i. Will receive a copy of Grantee’s drug-free policy statement, and

ii. Will agree to abide by terms of Grantee’s condition of employment, contract or subcontract.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

D.16. EASEMENTS: Where the Grantee acquires property in fee title or funds improvements to real property using State funds provided through this Funding Agreement, an appropriate easement or other title restriction providing for floodplain preservation and/or wildlife habitat conservation for the subject property in perpetuity, approved by the State, shall be conveyed to a regulatory or trustee agency or conservation group acceptable to the State. The easement or other title restriction must be in first position ahead of any recorded mortgage or lien on the property unless this requirement is waived by the State.

Where the Grantee acquires an easement under this Agreement, the Grantee agrees to monitor and enforce the terms of the easement, unless the easement is subsequently transferred to another land management or conservation organization or entity with State permission, at which time monitoring and enforcement responsibilities will transfer to the new easement owner.

Failure to provide an easement or other title restriction acceptable to the State may result in termination of this Agreement.

D.17. FINAL INSPECTIONS AND CERTIFICATION OF REGISTERED CIVIL ENGINEER: Upon completion of the Project, Grantee shall provide for a final inspection and certification by a California Registered Civil Engineer that the Project has been completed in accordance with submitted final plans and specifications and any modifications thereto and in accordance with this Funding Agreement.

D.18. GRANTEE'S RESPONSIBILITIES: Grantee and its representatives shall:

A. Faithfully and expeditiously perform or cause to be performed all project work as described in Exhibit A (Work Plan) and in accordance with Project Exhibit B (Budget) and Exhibit C (Schedule).

B. Accept and agree to comply with all terms, provisions, conditions, and written commitments of this Funding Agreement, including all incorporated documents, and to fulfill all assurances, declarations, representations, and statements made by Grantee in the application, documents, amendments, and communications filed in support of its request for funding.

C. Comply with all applicable California, federal, and local laws and regulations.

D. Implement the Project in accordance with applicable provisions of the law.

E. Fulfill its obligations under the Funding Agreement and be responsible for the performance of the Project.

F. Obtain any and all permits, licenses, and approvals required for performing any work under this Funding Agreement, including those necessary to perform design, construction, or operation and maintenance of the Project. Grantee shall provide copies of permits and approvals to State.

G. Be solely responsible for design, construction, and operation and maintenance of projects within the work plan. Review or approval of plans, specifications, bid documents, or other construction documents by State is solely for the purpose of proper administration of funds by State and shall not be deemed to relieve or restrict responsibilities of Grantee under this Agreement.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

H. Be solely responsible for all work and for persons or entities engaged in work performed pursuant to this Agreement, including, but not limited to, contractors, subcontractors, suppliers, and providers of services. The Grantee shall be responsible for any and all disputes arising out of its contracts for work on the Project, including but not limited to payment disputes with contractors and subcontractors. The State will not mediate disputes between the Grantee and any other entity concerning responsibility for performance of work.

D.19. GOVERNING LAW: This Funding Agreement is governed by and shall be interpreted in accordance with the laws of the State of California.

D.20. INDEMNIFICATION: Grantee shall indemnify and hold and save the State, its officers, agents, and employees, free and harmless from any and all liabilities for any claims and damages (including inverse condemnation) that may arise out of the Project and this Agreement, including, but not limited to any claims or damages arising from planning, design, construction, maintenance and/or operation of levee rehabilitation measures for this Project and any breach of this Agreement. Grantee shall require its contractors or subcontractors to name the State, its officers, agents and employees as additional insureds on their liability insurance for activities undertaken pursuant to this Agreement.

D.21. INDEPENDENT CAPACITY: Grantee, and the agents and employees of Grantees, in the performance of the Funding Agreement, shall act in an independent capacity and not as officers, employees, or agents of the State.

D.22. INSPECTION OF BOOKS, RECORDS, AND REPORTS: During regular office hours, each of the parties hereto and their duly authorized representatives shall have the right to inspect and to make copies of any books, records, or reports of either party pertaining to this Funding Agreement or matters related hereto. Each of the parties hereto shall maintain and shall make available at all times for such inspection accurate records of all its costs, disbursements, and receipts with respect to its activities under this Funding Agreement. Failure or refusal by Grantee to comply with this provision shall be considered a breach of this Funding Agreement, and State may withhold disbursements to Grantee or take any other action it deems necessary to protect its interests.

D.23. INSPECTIONS OF PROJECT BY STATE: State shall have the right to inspect the work being performed at any and all reasonable times during the term of the Funding Agreement. This right shall extend to any subcontracts, and Grantee shall include provisions ensuring such access in all its contracts or subcontracts entered into pursuant to its Funding Agreement with State.

D.24. LABOR CODE COMPLIANCE: The Grantee agrees to be bound by all the provisions of the Labor Code regarding prevailing wages and shall monitor all contracts subject to reimbursement from this Agreement to assure that the prevailing wage provisions of the Labor Code are being met. Current Department of Industrial Relations (DIR) requirements may be found at: http://www.dir.ca.gov/ lcp.asp. For more information, please refer to DIR's *Public Works Manual* at: http://www.dir.ca.gov/ dlse/PWManualCombined.pdf. The Grantee affirms that it is aware of the provisions of section 3700 of the Labor Code, which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance, and the Grantee affirms that it will comply with such provisions before commencing

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

the performance of the work under this Agreement and will make its contractors and subcontractors aware of this provision.

D.25. MODIFICATION OF OVERALL WORK PLAN: At the request of the Grantee, the State may at its sole discretion approve non-material changes to the portions of Exhibits A, B, and C which concern the budget and schedule without formally amending this Funding Agreement. Non-material changes with respect to the budget are changes that only result in reallocation of the budget and will not result in an increase in the amount of the State Funding Agreement. Non-material changes with respect to the Project schedule are changes that will not extend the term of this Funding Agreement. Requests for non-material changes to the budget and schedule must be submitted by the Grantee to the State in writing and are not effective unless and until specifically approved by the State's Program Manager in writing.

D.26. NONDISCRIMINATION: During the performance of this Funding Agreement, Grantee and its contractors or subcontractors shall not unlawfully discriminate, harass, or allow harassment against any employee or applicant for employment because of sex (gender), sexual orientation, race, color, ancestry, religion, creed, national origin (including language use restriction), pregnancy, physical disability (including HIV and AIDS), mental disability, medical condition (cancer/genetic characteristics), age (over 40), marital/domestic partner status, gender identity, and denial of medial and family care leave or pregnancy disability leave. Grantee and its contractors or subcontractors shall ensure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment. Grantee and its contractors or subcontractors shall comply with the provisions of the California Fair Employment and Housing Act (Gov. Code, § 12990.) and the applicable regulations promulgated there under (Cal. Code Regs., tit. 2, § 11000 et seq.). The applicable regulations of the Fair Employment and Housing Commission are incorporated into this Agreement by reference. Grantee and its contractors or subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

Grantee shall include the nondiscrimination and compliance provisions of this clause in all subcontracts to perform work under the Funding Agreement.

D.27. OPINIONS AND DETERMINATIONS: Where the terms of this Funding Agreement provide for action to be based upon, judgment, approval, review, or determination of either party hereto, such terms are not intended to be and shall never be construed as permitting such opinion, judgment, approval, review, or determination to be arbitrary, capricious, or unreasonable.

D.28. PERFORMANCE BOND: Where contractors are used, the Grantee shall not authorize construction to begin until each contractor has furnished a performance bond in favor of the Grantee in the following amounts: faithful performance (100%) of contract value, and labor and materials (100%) of contract value. This requirement shall not apply to any contract for less than $25,000.00. Any bond issued pursuant to this paragraph must be issued by a California-admitted surety. (Civ. Code, § 9550, et seq.; Pub. Contract Code, § 7103; Code Civ. Proc., § 995.311.)

D.29. PRIORITY HIRING CONSIDERATIONS: If this Funding Agreement includes services in excess of $200,000, the Grantee shall give priority consideration in filling vacancies in positions funded by the Funding Agreement to qualified recipients of aid under Welfare and Institutions Code section 11200 in accordance with Public Contract Code section 10353.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

D.30. PROHIBITION AGAINST DISPOSAL OF PROJECT WITHOUT STATE PERMISSION: The Grantee shall not sell, abandon, lease, transfer, exchange, mortgage, hypothecate, or encumber in any manner whatsoever all or any portion of any real or other property necessarily connected or used in conjunction with the Project, or with Grantee's service of water, without prior permission of State. Grantee shall not take any action, including but not limited to actions relating to user fees, charges, and assessments that could adversely affect the ability of Grantee meet its obligations under this Funding Agreement, without prior written permission of State. State may require that the proceeds from the disposition of any real or personal property be remitted to State.

D.31. PROJECT ACCESS: The Grantee shall ensure that the State, the Governor of the State, or any authorized representative of the foregoing, will have safe and suitable access to the Project site at all reasonable times during Project construction and thereafter for the term of this Agreement.

D.32. REMAINING BALANCE: In the event the Grantee does not submit invoices requesting all of the funds encumbered under this Grant Agreement, any remaining funds revert to the State. The State will notify the Grantee stating that the Project file is closed and any remaining balance will be disencumbered and unavailable for further use under this Grant Agreement.

D.33. REMEDIES NOT EXCLUSIVE: The use by either party of any remedy specified herein for the enforcement of this Funding Agreement is not exclusive and shall not deprive the party using such remedy of, or limit the application of, any other remedy provided by law.

D.34. RETENTION: The State shall withhold ten percent (10%) of the funds requested by the Grantee for reimbursement of Eligible Project Costs until the Project is completed and Final Report is approved. Any retained amounts due to the Grantee will be promptly disbursed to the Grantee, without interest, upon completion of the Project.

D.35. RIGHTS IN DATA: Grantee agrees that all data, plans, drawings, specifications, reports, computer programs, operating manuals, notes and other written or graphic work produced in the performance of this Funding Agreement shall be made available to the State and shall be in the public domain to the extent to which release of such materials is required under the California Public Records Act. (Gov. Code, § 6250 et seq.) Grantee may disclose, disseminate and use in whole or in part, any final form data and information received, collected and developed under this Funding Agreement, subject to appropriate acknowledgement of credit to State for financial support. Grantee shall not utilize the materials for any profit-making venture or sell or grant rights to a third party who intends to do so. The State shall have the right to use any data described in this paragraph for any public purpose.

D.36. SEVERABILITY: Should any portion of this Funding Agreement be determined to be void or unenforceable, such shall be severed from the whole and the Funding Agreement shall continue as modified.

D.37. SUSPENSION OF PAYMENTS: This Funding Agreement may be subject to suspension of payments or termination, or both if the State determines that:

A. Grantee, its contractors, or subcontractors have made a false certification, or

B. Grantee, its contractors, or subcontractors violates the certification by failing to carry out the requirements noted in this Funding Agreement.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

D.38. SUCCESSORS AND ASSIGNS: This Funding Agreement and all of its provisions shall apply to and bind the successors and assigns of the parties. No assignment or transfer of this Funding Agreement or any part thereof, rights hereunder, or interest herein by the Grantee shall be valid unless and until it is approved by State and made subject to such reasonable terms and conditions as State may impose.

D.39. TERMINATION BY GRANTEE: Subject to State approval which may be reasonably withheld, Grantee may terminate this Agreement and be relieved of contractual obligations. In doing so, Grantee must provide a reason(s) for termination. Grantee must submit all progress reports summarizing accomplishments up until termination date.

D.40. TERMINATION FOR CAUSE: Subject to the right to cure under Paragraph 11, the State may terminate this Funding Agreement and be relieved of any payments should Grantee fail to perform the requirements of this Funding Agreement at the time and in the manner herein, provided including but not limited to reasons of default under Paragraph 11.

D.41. TERMINATION WITHOUT CAUSE: The State may terminate this Agreement without cause on 30 days' advance written notice. The Grantee shall be reimbursed for all reasonable expenses incurred up to the date of termination.

D.42. TRAVEL: Travel includes the reasonable and necessary costs of transportation, subsistence, and other associated costs incurred by personnel during the term of this Funding Agreement. Any reimbursement for necessary travel and per diem shall be at rates not to exceed those set by the California Department of Human Resources for excluded employees. These rates may be found at: https://www.calhr.ca.gov/employees/pages/travel-reimbursements.aspx. Reimbursement will be at the State travel and per diem amounts that are current as of the date costs are incurred. No travel outside the State of California shall be reimbursed unless prior written authorization is obtained from the State.

D.43. THIRD PARTY BENEFICIARIES: The parties to this Agreement do not intend to create rights in, or grant remedies to, any third party as a beneficiary of this Agreement, or any duty, covenant, obligation or understanding established herein.

D.44. TIMELINESS: Time is of the essence in this Funding Agreement.

D.45. UNION ORGANIZING: Grantee, by signing this Funding Agreement, hereby acknowledges the applicability of Government Code sections 16645 through 16649 to this Funding Agreement. Furthermore, Grantee, by signing this Funding Agreement, hereby certifies that:

A. No State funds disbursed by this Funding Agreement will be used to assist, promote, or deter union organizing.

B. Grantee shall account for State funds disbursed for a specific expenditure by this Funding Agreement to show those funds were allocated to that expenditure.

C. Grantee shall, where State funds are not designated as described in (b) above, allocate, on a pro rata basis, all disbursements that support the program.

D. If Grantee makes expenditures to assist, promote, or deter union organizing, Grantee will maintain records sufficient to show that no State funds were used for those expenditures and that Grantee shall provide those records to the Attorney General upon request.

D.46. VENUE: The State and the Grantee hereby agree that any action arising out of this Agreement shall be filed and maintained in the Superior Court in and for the County of

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Sacramento, California, or in the United States District Court in and for the Eastern District of California. The Grantee hereby waives any existing sovereign immunity for the purposes of this Agreement.

D.47. WAIVER OF RIGHTS: None of the provisions of this Funding Agreement shall be deemed waived unless expressly waived in writing. It is the intention of the parties here to that from time to time either party may waive any of its rights under this Funding Agreement unless contrary to law. Any waiver by either party of rights arising in connection with the Funding Agreement shall not be deemed to be a waiver with respect to any other rights or matters, and such provisions shall continue in full force and effect.

AUTHORIZING RESOLUTION

DocuSign Envelope ID: 05C910C2-4AC4-409F-BA82-9DF1724AB847

ZONE 7
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT

BOARD OF DIRECTORS

RESOLUTION NO. 22-90

A Resolution of the Board of Directors of the Alameda County Flood Control and Water Conservation District, Zone 7 Authorizing the Grant Application, Acceptance, and Execution for the Tri-Valley Water Conservation and Resilience Project

WHEREAS, Alameda County Flood Control and Water Conservation District, Zone 7 proposes to implement the Tri-Valley Water Conservation and Resilience Project with local project sponsors;

WHEREAS, Alameda County Flood Control and Water Conservation District, Zone 7 has the legal authority and is authorized to enter into a funding agreement with the State of California; and

WHEREAS, Alameda County Flood Control and Water Conservation District, Zone 7 intends to apply for grant funding from the California Department of Water Resources for the Tri-Valley Water Conservation and Resilience Project;

THEREFORE, BE IT RESOLVED by the Board of Directors of the Alameda County Flood Control and Water Conservation District, Zone 7 as follows:

1. That pursuant and subject to all of the terms and provisions of Budget Act of 2021 (Stats. 2021, ch. 240, § 80) as amended (Stats. 2022, ch. 44, § 25), the Alameda County Flood Control and Water Conservation District, Zone 7, General Manager, or designee is hereby authorized and directed to prepare and file an application for funding with the Department of Water Resources, and take such other actions necessary or appropriate to obtain grant funding.

2. The Alameda County Flood Control and Water Conservation District, Zone 7, General Manager, or designee is hereby authorized and directed to execute the funding agreement with the Department of Water Resources and any amendments thereto.

3. The Alameda County Flood Control and Water Conservation District, Zone 7, General Manager, or designee is hereby authorized and directed to submit any required documents, invoices, and reports required to obtain grant funding.

4. The Alameda County Flood Control and Water Conservation District, Zone 7, General Manager, or designee is hereby authorized and directed to enter into any agreements with local project sponsors necessary to facilitate a regional grant application, project, and administration, including disbursement of funds of funds it receives from DWR to local project sponsors as appropriate and consistent with any grant agreements and amendments with DWR.

EXHIBIT F

REPORT FORMATS AND REQUIREMENTS

The following reporting formats should be utilized. Please obtain State approval prior to submitting a report in an alternative format.

PROGRESS REPORTS

Progress reports shall generally use the following format. This format may be modified as necessary to effectively communicate information. For each project, discuss the following at the task level, as organized in Exhibit A:

- Percent complete (by work)
- Discussion of work accomplished during the reporting period.
- Milestones or deliverables completed/submitted during the reporting period.
- Meetings held or attended.
- Scheduling concerns and issues encountered that may delay completion of the task.

For each project, discuss the following at the project level, as organized in Exhibit A:

- Work anticipated for the next reporting period.
- Photo documentation, as appropriate.
- Any schedule or budget modifications approved by DWR during the reporting period.

PROJECT COMPLETION REPORT

The Project Completion Report (or a Component Completion Report, if a Project has multiple Components) shall generally use the following format provided below for each project after completion.

Executive Summary

The Executive Summary should include a brief summary of project information and include the following items:

- Brief description of work proposed to be done in the original Grant application.
- List any official amendments to this Grant Agreement, with a short description of the amendment.

Reports and/or Products

The following items should be provided, unless already submitted as a deliverable:

- A copy of any final technical report or study, produced for or utilized in this Project as described in the Exhibit A
- Electronic copies of any data collected, not previously submitted
- Discussion of problems that occurred during the work and how those problems were resolved

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

- Final project schedule showing actual progress versus planned progress as shown in Exhibit C

Additional information that may be applicable for implementation projects includes the following:

- Record drawings
- Final geodetic survey information
- Project photos

Cost & Disposition of Funds

A list showing:

- Summary of Project costs including the following items:
  - Accounting of the cost of project expenditure;
  - Include all internal and external costs not previously disclosed (i.e., additional cost share); and
  - A discussion of factors that positively or negatively affected the project cost and any deviation from the original Project cost estimate.

Additional Information

- Benefits derived from the Project, with quantification of such benefits provided.
- If applicable, Certification from a California Registered Professional (Civil Engineer or Geologist, as appropriate), consistent with Exhibit D, that the project was conducted in accordance with the approved Work Plan in Exhibit A and any approved amendments thereto.
- Submittal schedule for the Post-Performance Report.

GRANT COMPLETION REPORT

The Grant Completion Report shall generally use the following format. This format may be modified as necessary to effectively communicate information on the various projects funded by this Grant Agreement, and includes the following:

- Executive Summary: consisting of a maximum of ten (10) pages summarizing information for the grant as well as the individual projects.
- Brief discussion whether the level, type, or magnitude of benefits of each project are comparable to the original project proposal; any remaining work to be completed and mechanism for their implementation; and a summary of final funds disbursement for each project.

Additional Information: Summary of the submittal schedule for the Post-Performance Reports applicable for the projects in this Grant Agreement.

POST-PERFORMANCE REPORT

The Post-Performance Report (PPR) should be concise and focus on how each project is performing compared to its expected performance; whether the project is being operated and maintained and providing intended benefits as proposed. A PPR template may be provided by the assigned DWR

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

Grant Manager upon request. The PPR should follow the general format of the template and provide requested information as applicable. The following information, at a minimum, shall be provided:

Reports and/or products

- Header including the following:
  - Grantee Name
  - Implementing Agency (if different from Grantee)
  - Grant Agreement Number
  - Project Name
  - Funding grant source
  - Report number

- Post-Performance Report schedule
- Time period of the annual report (e.g., January 2018 through December 2018)
- Project Description Summary
- Discussion of the project benefits
- An assessment of any differences between the expected versus actual project benefits as stated in the original application. Where applicable, the reporting should include quantitative metrics (e.g., new acre-feet of water produced that year, etc.).
- Summary of any additional costs and/or benefits deriving from the project since its completion, if applicable.
- Any additional information relevant to or generated by the continued operation of the project.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

EXHIBIT G

REQUIREMENTS FOR DATA SUBMITTAL

Surface and Groundwater Quality Data:

If applicable, groundwater quality and ambient surface water quality monitoring data that include chemical, physical, or biological data shall be submitted to the State as described below, with a narrative description of data submittal activities included in project reports.

Surface water quality monitoring data shall be prepared for submission to the California Environmental Data Exchange Network (CEDEN). The CEDEN data templates are available on the CEDEN website. Inclusion of additional data elements described on the data templates is desirable. Data ready for submission should be uploaded to your CEDEN Regional Data Center via the CEDEN website. CEDEN website: http://www.ceden.org.

If a project's Work Plan contains a groundwater ambient monitoring element, groundwater quality monitoring data shall be submitted to the State for inclusion in the State Water Resources Control Board's Groundwater Ambient Monitoring and Assessment (GAMA) Program Information on the GAMA Program can be obtained at: https://www.waterboards.ca.gov/water_issues/programs/gama/. If further information is required, the Grantee can contact the State Water Resources Control Board (SWRCB) GAMA Program. A listing of SWRCB staff involved in the GAMA program can be found at: https://www.waterboards.ca.gov/water_issues/programs/gama/contact.shtml.

Groundwater Level Data

For each project that collects groundwater level data, the Grantee will need to submit this data to DWR's Water Data Library (WDL), with a narrative description of data submittal activities included in project reports, as described in Exhibit F, "Report Formats and Requirements." Information regarding the WDL and in what format to submit data in can be found at: http://www.water.ca.gov/waterdatalibrary/.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

EXHIBIT H

STATE AUDIT DOCUMENT REQUIREMENTS AND COST SHARE REQUIREMENTS FOR THE GRANTEE

The following provides a list of documents typically required by State Auditors and general guidelines for the Grantee. List of documents pertains to both State funding and the Grantee's Local Cost Share and details the documents/records that State Auditors would need to review in the event of this Grant Agreement is audited. The Grantee should ensure that such records are maintained for each funded project.

State Audit Document Requirements

Internal Controls

1. Organization chart (e.g., Agency's overall organization chart and organization chart for the State funded Program/Project).
2. Written internal procedures and flowcharts for the following:
   a) Receipts and deposits
   b) Disbursements
   c) State reimbursement requests
   d) Expenditure tracking of State funds
   e) Guidelines, policy, and procedures on State funded Program/Project
3. Audit reports of the Agency internal control structure and/or financial statements within the last two years.
4. Prior audit reports on the State funded Program/Project.

State Funding:

1. Original Grant Agreement, any amendment(s) and budget modification documents.
2. A listing of all bond-funded grants, loans, or subventions received from the State.
3. A listing of all other funding sources for each Program/Project.

Contracts:

1. All subcontractor and consultant contracts and related or partners' documents, if applicable.
2. Contracts between the Agency and member agencies as related to the State funded Program/Project.

Invoices:

1. Invoices from vendors and subcontractors for expenditures submitted to the State for payments under the Grant Agreement.
2. Documentation linking subcontractor invoices to State reimbursement, requests and related Grant Agreement budget line items.
3. Reimbursement requests submitted to the State for the Grant Agreement.

Cash Documents:

1. Receipts (copies of warrants) showing payments received from the State.
2. Deposit slips (or bank statements) showing deposit of the payments received from the State.
3. Cancelled checks or disbursement documents showing payments made to vendors, subcontractors, consultants, and/or agents under the grants or loans.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

4. Bank statements showing the deposit of the receipts.

Accounting Records:

1. Ledgers showing entries for funding receipts and cash disbursements.
2. Ledgers showing receipts and cash disbursement entries of other funding sources.
3. Bridging documents that tie the general ledger to requests for Grant Agreement reimbursement.

Administration Costs:

1. Supporting documents showing the calculation of administration costs.

Personnel:

1. List of all contractors and Agency staff that worked on the State funded Program/Project.
2. Payroll records including timesheets for contractor staff and the Agency personnel who provided services charged to the program

Project Files:

1. All supporting documentation maintained in the project files.
2. All Grant Agreement related correspondence.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

EXHIBIT I

LOCAL PROJECT SPONSORS AND PROJECT LOCATIONS

The Grantee has assigned, for each project, a Local Project Sponsor (LPS). LPSs may act on behalf of the Grantee for the purposes of individual project management, oversight, compliance, and operations and maintenance. LPSs are identified for each sponsored Project below:

Local Project Sponsor Agency Designation

Sponsored Project: Project 1: Dublin Irrigation System Upgrades

Sponsor Agency: City of Dublin

Agency Address: 100 Civic Plaza, Dublin CA 94568

Project Location: Dublin, CA 94568

Local Project Sponsor Agency Designation

Sponsored Project: Project 2: Citywide Turf Reduction

Sponsor Agency: City of Livermore

Agency Address: 3500 Robertson Park Road

Project Location: Livermore, CA 94550

Local Project Sponsor Agency Designation

Sponsored Project: Project 3: Recycled Water Fill Station

Sponsor Agency: City of Livermore

Agency Address: 101 West Jack London Blvd.

Project Location: Livermore, CA 94551

Local Project Sponsor Agency Designation

Sponsored Project: Project 4: Fire Department Training Water Recirculation System

Sponsor Agency: Alameda County Fire Department

Agency Address: 6363 Clark Ave., Dublin, CA 94568

Project Location: Castro Valley, Dublin, Newark, San Leandro, and Union City, CA.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

EXHIBIT J

APPRAISAL SPECIFICATIONS

For property acquisitions funded by this Grant Agreement, the Grantee shall submit an appraisal for review and approval by the Department of General Services or DWR's Real Estate Branch prior to reimbursement or depositing State funds into an escrow account. This information should be submitted at least 90 days prior to a reimbursement request to account for review time. All appraisal reports, regardless of report format, shall include all applicable Appraisal Specifications below. Appraisals for a total compensation of $150,000 or more shall be reported as a Self-Contained Appraisal Report. Appraisals for a total compensation of less than $150,000 may be reported as a Summary Appraisal Report, which includes all information necessary to arrive at the appraiser's conclusion. Appraisal Specifications 14, 16, 21, 23-25, and 28 shall be a narrative analysis regardless of the reporting format.

1. Title page with sufficient identification of appraisal assignment.
2. Letter of transmittal summarizing important assumptions and conclusions, value estimate, date of value and date of report.
3. Table of contents.
4. Assumptions and Limiting Conditions, Extraordinary Assumptions, and Hypothetical Conditions as needed.
5. Description of the scope of work, including the extent of data collection and limitations, if any, in obtaining relevant data.
6. Definition of Fair Market Value, as defined by California Code of Civil Procedure, § 1263.320.
7. Photographs of subject property and comparable data, including significant physical features and the interior of structural improvements, if applicable.
8. Copies of Tax Assessor's plat map with the subject marked along with all contiguous assessor's parcels that depict the ownership.
9. A legal description of the subject property, if available.
10. For large, remote or inaccessible parcels, provide aerial photographs or topographical maps depicting the subject boundaries.
11. Three (3) year subject property history, including sales, listings, leases, options, zoning, applications for permits, or other documents or facts that might indicate or affect use or value.
12. Discussion of any current Agreement of Sale, option, or listing of subject property. This issue required increased diligence since state agencies often utilize non-profit organizations to quickly acquire sensitive habitat parcels using Option Agreements. However, due to confidentiality clauses, the terms of the Option are often not disclosed to the State. If the appraiser discovers evidence of an Option or the possible existence of an Option, and the terms cannot be disclosed due to a confidentiality clause, then the appraiser is to cease work and contact the client.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

13. Regional, area, and neighborhood analyses. This information may be presented in a summary format.
14. Market conditions and trends including identification of the relevant market area, a discussion of supply and demand within the relevant market area, and a discussion of the relevant market factors impacting demand for site acquisition and leasing within the relevant market area. This information may be presented in a summary format.
15. Discussion of subject land/site characteristics (size, topography, current use, elevations, zoning and land use issues, development entitlements, General Plan designation, utilities, offsite improvements, access, land features such as levees and creeks, offsite improvements, easements and encumbrances, covenants, conditions and restrictions, flood and earthquake information, toxic hazards, water rights, mineral rights, toxic hazards, taxes and assessments, etc.).
16. Description of subject improvements including all structures, square footage, physical age, type of construction, quality of construction, condition of improvements and/or identification of any permanent plantings. Discussion of construction cost methodology, costs included and excluded, accrued depreciation from all causes, remaining economic life, items of deferred maintenance and cost to cure, and incurable items. Construction cost data shall include cost data source, date of estimate or date of publication of cost manual, section and page reference of cost manual, copies of cost estimate if provided from another source, replacement or reproduction cost method used, and supporting calculations including worksheets or spreadsheets.
17. Subject property leasing and operating cost history, including all items of income and expense.
18. Analysis and conclusion of the larger parcel for partial taking appraisals. For partial taking appraisals, Appraisal Specifications generally apply to the larger parcel rather than an ownership where the larger parcel is not the entire ownership.
19. Include a copy of a recent preliminary title report (within the past year) as an appraisal exhibit. Discuss the title exceptions and analyze the effect of title exceptions on fair market value.
20. For appraisals of partial takings or easements, a detailed description of the taking or easement area including surface features and topography, easements, encumbrances or improvements including levees within the subject partial take or easement, and whether the take area is characteristic of the larger parcel. Any characteristics of the taking area, including existing pre-project levees that render the take area different from the larger parcel shall be addressed in the valuation.
21. Opinion of highest and best use for the subject property, based on an in-depth analysis supporting the concluded use which includes the detail required by the complexity of the analysis. Such support typically requires a discussion of the four criteria of tests utilized to determine the highest and best use of a property. If alternative feasible uses exist, explain and support market, development, cash flow, and risk factors leading to an ultimate highest and best use decision.
22. All approaches to market value applicable to the property type and in the subject market. Explain and support the exclusion of any usual approaches to value.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

23. Map(s) showing all comparable properties in relation to the subject property.
24. Photographs and plat maps of comparable properties.
25. In-depth discussion of comparable properties, similarities and differences compared to the subject property, adjustments to the comparable data, and discussion of the reliability and credibility of the data as it relates to the indicated subject property value. Improved comparable sales which are used to compare to vacant land subject properties shall include an allocation between land and improvements, using methodology similar to methodology used in item 16 above to estimate improvement value when possible, with an explanation of the methodology used.
26. Comparable data sheets.
    a. For sales, include information on grantor/Grantee, sale/recordation dates, listed or asking price as of the date of sale, highest and best use, financing, conditions of sale, buyer motivation, sufficient location information (street address, post mile, and/or distance from local landmarks such as bridges, road intersections, structures, etc.), land/site characteristics, improvements, source of any allocation of sale price between land and improvements, and confirming source.
    b. For listings, also include marketing time from list date to effective date of the appraisal, original list price, changes in list price, broker feedback, if available.
    c. For leases, include significant information such as lessor/lessee, lease date and term, type of lease, rent and escalation, expenses, size of space leased, tenant improvement allowance, concessions, use restrictions, options, and confirming source. When comparing improved sales to a vacant land subject, the contributory value of the improvements shall be segregated from the land value.
27. For appraisals of easements, a before and after analysis of the burden of the easement on the fee, with attention to how the easement affects highest and best use in the after condition. An Easement Valuation Matrix or generalized easement valuation references may be used ONLY as a reference for a secondary basis of value.
28. For partial taking and easement appraisals, valuation of the remainder in the after condition and analysis and identification of any change in highest and best use or other characteristics in the after condition, to establish severance damages to the remainder in the after condition, and a discussion of special and general benefits, and cost to cure damages or construction contract work.
29. There are occasions where properties involve water rights, minerals, or salable timber that require separate valuations. If an appraisal assignment includes water rights, minerals, or merchantable timber that requires separate valuation, the valuation of the water rights, minerals, or merchantable timber shall be completed by a credentialed subject matter specialist.
30. For partial taking and easement appraisals, presentation of the valuation in California partial taking acquisition required format.
31. Implied dedication statement.

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

32. Reconciliation and final value estimate. Include analysis and comparison of the comparable sales to the subject, and explain and support conclusions reached.
33. Discussion of any departures taken in the development of the appraisal.
34. Signed Certification consistent with the language found in Uniform Standards of Professional Appraisal Practice.
35. If applicable, in addition to the above, appraisals of telecommunication sites shall also provide:
    a. A discussion of market conditions and trends including identification of the relevant market, a discussion of supply and demand within the relevant market area and a discussion of the relevant market factors impacting demand for site acquisition and leasing within the relevant market area.
    b. An analysis of other leases comparable to subject property. Factors to be discussed in the analysis include the latitude, longitude, type of tower, tower height, number of rack spaces, number of racks occupied, placement of racks, power source and adequacy, back-up power, vault and site improvements description and location on site, other utilities; access, and road maintenance costs.

EXHIBIT K

INFORMATION NEEDED FOR ESCROW PROCESSING AND CLOSURE

The Grantee shall provide the following documents to the State Project Representative during the escrow process. Property acquisition escrow documents shall be submitted within the term of this Grant Agreement and after a qualified appraisal has been approved.

- Name and Address of Title Company Handling the Escrow
- Escrow Number
- Name of Escrow Officer
- Escrow Officer's Phone Number
- Dollar Amount Needed to Close Escrow
- Legal Description of Property Being Acquired
- Assessor's Parcel Number(s) of Property Being Acquired
- Copy of Title Insurance Report
- Entity Taking Title as Named Insured on Title Insurance Policy
- Copy of Escrow Instructions in Draft Form Prior to Recording for Review Purposes
- Copy of Final Escrow Instructions
- Verification that all Encumbrances (i.e., Liens, Back Taxes, and Similar Obligations) have been Cleared Prior to Recording the Deed to Transfer Title
- Copy of Deed for Review Purposes Prior to Recording
- Copy of Deed as Recorded in County Recorder's Office
- Copy of Escrow Closure Notice

EXHIBIT L

PROJECT MONITORING PLAN GUIDANCE

Introduction

For each project contained in Exhibit A, please include a brief description of the project (maximum ~150 words) including project location, implementation elements, need for the project (what problem will the project address) and responds to the requirements listed below.

Project Monitoring Plan Requirements

The Project Monitoring Plan shall contain responses to the following questions:

- What are the anticipated project physical benefits?
- What are the corresponding numeric targets for each project benefit?
- How will proposed numeric targets be measured?
- What are baseline conditions?
- When will the targets be met (e.g., upon project completion, five years after completion)?
- How often will monitoring be undertaken (e.g., monthly, yearly).
- Where are monitoring point locations (e.g., meter located at…, at stream mile…)? Include relevant maps.
- How will the project be maintained (e.g., irrigation, pest management, weed abatement)?
- What will be the frequency and duration of maintenance proposed activities?
- Are there any special environmental considerations (e.g., resource agency requirements, permit requirements, CEQA/NEPA mitigation measures)?
- Who is responsible for collecting the samples (i.e., who is conducting monitoring and/or maintenance)?
- How, and to whom, will monitoring results be reported (e.g., paper reports, online databases, public meetings)?
- What adaptive management strategies will be employed if problems are encountered during routine monitoring or maintenance?
- What is the anticipated life of the project?

DocuSign Envelope ID: 4D960CEA-1940-4EBD-91FA-2C792D84322B

EXHIBIT M

INVOICE GUIDANCE FOR ADMINISTRATIVE AND OVERHEAD CHARGES

The funds provided pursuant to this Agreement may only be used for costs that are directly related to the funded Project. The following provides a list of typical requirements for invoicing, specifically providing guidance on the appropriate methods for invoicing administrative and direct overhead charges.

Administration Charges

Indirect and General Overhead (i.e., indirect overhead) charges are not an allowable expense for reimbursement. However, administrative expenses that are apportioned directly to the project are eligible for reimbursement. Cost such as rent, office supplies, fringe benefits, etc. can be “Direct Costs” and are eligible expenses as long as:

- There is a consistent, articulated method for how the costs are allocated that is submitted and approved by the Grant Manager. The allocation method must be fully documented for auditors.
- A “fully-burdened labor rate” can be used to capture allowable administrative costs.
- The administrative/overhead costs can never include:
    - Non-project specific personnel and accounting services performed within the Grantee or an LPS’ organization
    - Generic markup
    - Tuition
    - Conference fees
    - Building and equipment depreciation or use allowances
- Using a general overhead percentage is never allowed

Labor Rates

The Grantee must provide DWR with supporting documentation for personnel hours (see personnel billing rates letter in example invoice packet). The personnel rate letter should be submitted to the DWR Grant Manager prior to submittal of the first invoice. The supporting documentation must include, at a minimum, employee classifications that will reimbursed by grant funds and the corresponding hourly rate range. These rates should be “burdened”; the burdened rate must be consistent with the Grantee’s/Local Project Sponsors standardized allocation methodology. The supporting documentation should also provide an explanation of what costs make up the burdened rate and how those costs were determined. This information will be used to compare against personnel hours summary table invoice back up documentation. Periodic updates may be needed during the life of the grant which would be handled through a revised billing rate letter.

Attachment 2: LPS Resolution

Placeholder for LPS's Board Resolution authorizing execution of this agreement

LIVERMORE
CALIFORNIA

CITY COUNCIL STAFF REPORT **ITEM NO. 5.4**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Judy Erlandson, Acting Public Works Director

SUBJECT: Resolution authorizing execution of a purchase order with Belkorp Ag. LLC, for two John Deere Track Steer Loaders and associated equipment in the not-to-exceed amount of $203,260.

RECOMMENDED ACTION

Staff recommends the City Council adopt a resolution authorizing the City Manager to execute a purchase order with Belkorp Ag. LLC for two replacement John Deere Track Steer Loaders and associated equipment in the not-to-exceed amount of $203,260.

SUMMARY

Based on the City of Livermore's Fleet Policy and the 25-year Fleet Replacement Plan, it is time to replace two existing tractors. Staff has determined that the units that best meet the needs of both the Maintenance Division and the Water Resources Division are the John Deere 325G Track Loader with mower and concrete planer attachments for the Maintenance Division, and the John Deere 317G Track Loader for Water Resources Division. Belkorp AG LLC is the local Sourcewell contractor for John Deere Company in Stockton, California.

DISCUSSION

The City of Livermore's Fleet Policy guideline recommends replacement of large tractors at 10 years or 6,000 hours. Staff will be replacing two 1993 Bobcat 853 skid steer loaders, Vehicle 1223 from the Maintenance Division and Vehicle 6328 from Water Resources. The replacement of these two tractors will lower the operating costs and reduce downtime for preventive maintenance when kept in compliance with the manufacturers' recommendation. The replacement tractors will also increase efficiencies in the mowing/weed abatement program, street repairs and storm water channel maintenance. These two new tractors will decrease downtime due to breakdowns on the existing aging units. The purchase of these tractors through a cooperative purchasing agreement will expedite the delivery of the equipment. This equipment meets the operational needs and fits the criteria specified by the City of Livermore Water Resources and Maintenance Divisions.

Livermore Municipal Code (LMC) Section 2.68.370 requires competitive bidding for services and supplies exceeding $50,000. LMC Section 2.68.390, however, allows for procurement to be completed without individual bidding when done so through a cooperative purchasing arrangement. This alternate procedure is allowed regardless of whether the City is a named party to the agreement or an actual participant in such a program. The proposed procurement of this replacement John Deere track steer loaders with attachments uses the Sourcewell public procurement collective agreement.

Both the John Deere 325G and the John Deere 317G track steer loaders will be utilized by both Divisions for a wide variety of uses. They both have the capability of operating with many different types of attachments. The Maintenance Division will utilize the John Deere 325G model for weed abatement, street grinding, broom sweeper cleanup, and material handling throughout the City. The Water Resources Division will utilize the John Deere 317G model for material handling, broom sweeper cleanup at the Water Reclamation Plant and storm water channel cleanup as needed.

Staff recommends purchasing these replacement John Deere tractors utilizing Sourcewell Acceptance and Award contract #011723-JDC. The Sourcewell bid procedure for the replacement tractors meets the City's municipal code requirement, and therefore, can be awarded to Belkorp Ag. LLC, the local dealer for Deere and Company. Belkorp Ag. LLC in Stockton, California is the local government dealer for Deere and Company tractor sales, warranty and service in Northern California. Section 2.B. in Sourcewell' s agreement with Deere and Company allows the City to use a qualified dealer like Belkorp Ag. LLC for a direct purchase.

FISCAL AND ADMINISTRATIVE IMPACTS

The replacement purchase of the two John Deere track loaders is budgeted in the Fleet Internal Service Fund for FY 2023-24 and is identified in the Fleet Master 25-year Replacement plan.

COMMUNITY PILLAR

1: A City That Works

GOAL

14: Develop, operate, and maintain the City's infrastructure.

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and John Deere Construction Retail Sales a division of John Deere Shared Services LLC, DBA John Deere Construction Retail Sales, 1300 River Drive, Moline, IL 61265 (Supplier).

Sourcewell is a State of Minnesota local government unit and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to eligible federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada. Sourcewell issued a public solicitation for Heavy Construction Equipment with Related Attachments and Technology from which Supplier was awarded a contract.

Supplier desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires April 14, 2027, unless it is cancelled sooner pursuant to Article 22. This Contract may be extended one additional year upon the request of Sourcewell and written agreement by Supplier.

C. SURVIVAL OF TERMS. Notwithstanding any expiration or termination of this Contract, all payment obligations incurred prior to expiration or termination will survive, as will the following: Articles 11 through 14 survive the expiration or cancellation of this Contract. All other rights will cease upon expiration or termination of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Supplier will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

Supplier's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new and the current model. Supplier may offer close-out or refurbished Equipment or Products if they are clearly indicated in Supplier's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Supplier warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Supplier warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Supplier's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that extends beyond the expiration of the Supplier's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution and throughout the Contract term, Supplier must provide to Sourcewell a current means to validate or authenticate Supplier's authorized dealers, distributors, or resellers relative to the Equipment, Products, and Services offered under this Contract, which will be incorporated into this Contract by reference. It is the Supplier's responsibility to ensure Sourcewell receives the most current information.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. The John Deere Warranty Statement describes covered items and services when returning Damaged Equipment and

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

Products. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity. Sourcewell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers substandard or inferior Equipment or Products.

B. SALES TAX. Each Participating Entity is responsible for supplying the Supplier with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Supplier may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Supplier determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Supplier Development Administrator. This approved form is available from the assigned Sourcewell Supplier Development Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

A fully executed Sourcewell Price and Product Request Form will become an amendment to this Contract and will be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Supplier understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Supplier is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Supplier's employees may be required to perform work at government-owned facilities, including schools. Supplier's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Supplier that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Supplier. Typically, a Participating Entity will issue an order directly to Supplier or its authorized subsidiary, distributor, dealer, or reseller. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Supplier, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entities may require the use of a Participating Addendum, the terms of which will be negotiated directly between the Participating Entity and the Supplier or its authorized dealers, distributors, or resellers, as applicable. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

D. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Supplier in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the equipment, products, or services to be purchased; or
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements.

E. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Supplier will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

B. BUSINESS REVIEWS. Supplier must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, sales data reports, performance issues, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Supplier must provide a contract sales activity report (Report) to the Sourcewell Supplier Development Administrator assigned to this Contract. Reports are due no later than 45 days after the end of each calendar quarter. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Supplier must submit a report indicating no sales were made).

The Report must contain the following fields:

- Participating Entity Name (e.g., City of Staples Highway Department);
- Participating Entity Physical Street Address;
- Participating Entity City;
- Participating Entity State/Province;
- Participating Entity Zip/Postal Code;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Supplier.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Supplier will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Supplier may not charge Participating Entities more than the contracted price to offset the Administrative Fee. Any state that requires a Sourcewell participating addendum with an additional admin fee, we reserve the right to reduce the list price discount to accommodate this additional fee.

The Supplier will submit payment to Sourcewell for the percentage of administrative fee stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Supplier's name and Sourcewell-assigned contract number in the memo; and must be mailed to the address above "Attn: Accounts Receivable" or remitted electronically to Sourcewell's banking institution per Sourcewell's Finance department instructions. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

Supplier agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Supplier is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Supplier in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Supplier's Authorized Representative is the person named in the Supplier's Proposal. If Supplier's Authorized Representative changes at any time during this Contract, Supplier must promptly notify Sourcewell in writing.

10. AUDIT, ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. AUDIT. Pursuant to Minnesota Statutes Section 16C.05, subdivision 5, the books, records, documents, and accounting procedures and practices relevant to this Contract are subject to examination by Sourcewell or the Minnesota State Auditor for a minimum of six years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

B. ASSIGNMENT. Neither party may assign or otherwise transfer its rights or obligations under this Contract without the prior written consent of the other party and a fully executed assignment agreement. Such consent will not be unreasonably withheld. Any prohibited assignment will be invalid.

C. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been duly executed by the parties.

D. WAIVER. Failure by either party to take action or assert any right under this Contract will not be deemed a waiver of such right in the event of the continuation or repetition of the circumstances giving rise to such right. Any such waiver must be in writing and signed by the parties.

E. CONTRACT COMPLETE. This Contract represents the complete agreement between the parties. No other understanding regarding this Contract, whether written or oral, may be used to bind either party. For any conflict between the attached Proposal and the terms set out in Articles 1-22 of this Contract, the terms of Articles 1-22 will govern.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

F. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. INDEMNITY AND HOLD HARMLESS

Supplier must indemnify, defend, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees incurred by Sourcewell or its Participating Entities, arising out of any act or omission in the performance of this Contract by the Supplier or its agents or employees; this indemnification includes injury or death to person(s) or property alleged to have been caused by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications. Sourcewell's responsibility will be governed by the State of Minnesota's Tort Liability Act (Minnesota Statutes Chapter 466) and other applicable law.

12. GOVERNMENT DATA PRACTICES

Supplier and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell under this Contract and as it applies to all data created, collected, received, maintained, or disseminated by the Supplier under this Contract.

13. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:
   a. Sourcewell grants to Supplier a royalty-free, worldwide, non-exclusive right and license to use the trademark(s) provided to Supplier by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Supplier.
   b. Supplier grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Supplier's trademarks in advertising and promotional materials for the purpose of marketing Supplier's relationship with Sourcewell.
2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to their respective subsidiaries, distributors, dealers, resellers, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and promotional materials for the purpose of marketing the Parties' relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.
3. *Use; Quality Control.*

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

a. Neither party may alter the other party's trademarks from the form provided and must comply with removal requests as to specific uses of its trademarks or logos.

b. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's trademarks only in good faith and in a dignified manner consistent with such party's use of the trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

4. *Termination*. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of suppliers which may be used until the next printing). Supplier must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Supplier individually or jointly with others, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Send all approval requests to the Sourcewell Supplier Development Administrator assigned to this Contract.

D. ENDORSEMENT. The Supplier must not claim that Sourcewell endorses its Equipment, Products, or Services.

14. GOVERNING LAW, JURISDICTION, AND VENUE

The substantive and procedural laws of the State of Minnesota will govern this Contract. Venue for all legal proceedings arising out of this Contract, or its breach, must be in the appropriate state court in Todd County, Minnesota or federal court in Fergus Falls, Minnesota.

15. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

16. SEVERABILITY

If any provision of this Contract is found by a court of competent jurisdiction to be illegal, unenforceable, or void then both parties will be relieved from all obligations arising from that provision. If the remainder of this Contract is capable of being performed, it will not be affected by such determination or finding and must be fully performed.

17. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Supplier will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Supplier may escalate the resolution of the issue to a higher level of management. The Supplier will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Supplier must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Supplier fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, the Supplier will bear any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

The party claiming default must provide written notice of the default, with 30 calendar days to cure the default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

18. INSURANCE

A. REQUIREMENTS. At its own expense, Supplier must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*
Workers' Compensation: As required by any applicable law or regulation.
Employer's Liability Insurance: must be provided in amounts not less than listed below:
Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Supplier will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.
Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for products liability-completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Supplier will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.
Minimum Limits:
$1,000,000 each accident, combined single limit

4. *Umbrella Insurance*. During the term of this Contract, Supplier will maintain umbrella coverage over Employer's Liability, Commercial General Liability, and Commercial Automobile.
Minimum Limits:
$2,000,000

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

5. *Network Security and Privacy Liability Insurance*. During the term of this Contract, Supplier will maintain coverage for network security and privacy liability. The coverage may be endorsed on another form of liability coverage or written on a standalone policy. The insurance must cover claims which may arise from failure of Supplier's security resulting in, but not limited to, computer attacks, unauthorized access, disclosure of not public data – including but not limited to, confidential or private information, transmission of a computer virus, or denial of service.

Minimum limits:
$2,000,000 per occurrence
$2,000,000 annual aggregate

Failure of Supplier to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Supplier must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Supplier Development Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf.

Failure to request certificates of insurance by Sourcewell, or failure of Supplier to provide certificates of insurance, in no way limits or relieves Supplier of its duties and responsibilities in this Contract.

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Supplier agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Supplier's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Supplier, and products and completed operations of Supplier. The policy provision(s) or endorsement(s) must further provide that coverage is primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds.

D. WAIVER OF SUBROGATION. Supplier waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other insurance applicable to the Supplier. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Supplier.

DocuSign Envelope ID: 54FC24D3-8A5A-4541-98A2-44B284ACDC8E

E. UMBRELLA/EXCESS LIABILITY/SELF-INSURED RETENTION. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies), or self-insured retention.

19. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Supplier must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Supplier conducts with Sourcewell and Participating Entities.

20. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Supplier certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Supplier declares bankruptcy, Supplier must immediately notify Sourcewell in writing.

Supplier certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Supplier certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Supplier further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

21. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Intentionally Omitted.

22. CANCELLATION

Sourcewell or Supplier may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Supplier's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Specifications

Table 1: Proposer Identity & Authorized Representatives

General Instructions (applies to all Tables) Sourcewell prefers a brief but thorough response to each question. Do not merely attach additional documents to your response without also providing a substantive response. Do not leave answers blank; respond "N/A" if the question does not apply to you (preferably with an explanation).

Line Item	Question	Response *	
1	Proposer Legal Name (one legal entity only): (In the event of award, will execute the resulting contract as "Supplier")	John Deere Construction Retail Sales a division of John Deere Shared Services LLC	*
2	Identify all subsidiary entities of the Proposer whose equipment, products, or services are included in the Proposal.	Not Applicable	*
3	Identify all applicable assumed names or DBA names of the Proposer or Proposer's subsidiaries in Line 1 or Line 2 above.	John Deere Construction Retail Sales JDCRS John Deere Construction & Forestry	*
4	Provide your CAGE code or Unique Entity Identifier (SAM):	Cage Code: 3PSD7 UEI: ED9BLXH3Hg21	*
5	Proposer Physical Address:	1300 River Drive Moline, IL 61265	*
6	Proposer website address (or addresses):	www.deere.com	*
7	Proposer's Authorized Representative (name, title, address, email address & phone) (The representative must have authority to sign the "Proposer's Assurance of Compliance" on behalf of the Proposer and, in the event of award, will be expected to execute the resulting contract):	Mark Oliver, Manager Contract Sales 1300 River Drive Moline, IL 61265 OliverMarkR@JohnDeere.com 309-748-3418	*
8	Proposer's primary contact for this proposal (name, title, address, email address & phone):	Brooke DeVol, Contract Administrator 1300 River Drive Moline, IL 61265 ForsbergBrookeL@JohnDeere.com 309-207-0431	*
9	Proposer's other contacts for this proposal, if any (name, title, address, email address & phone):	Mark Oliver, Manager Contract Sales 1300 River Drive Moline, IL 61265 OliverMarkR@JohnDeere.com 309-748-3418	

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	
10	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	We Run Like No Other. We conduct business essential to life. Running for the people who trust us and the planet that sustains us, we create intelligent connected machines that enable lives to leap forward. See our higher purpose: https://www.deere.com/en/our-company/higher-purpose/ John Deere customers are at the center of everything we do. We rely on more than 180 years of experience and terabytes of precision data to know them and their businesses better than anyone else. Our easy-to-use technology helps deliver results they see in the field, on the job site, and on the balance sheet. We ensure seamless access to parts, services, and performance upgrades from take home to trade-in by providing world-class support throughout the lifecycle of their equipment, with productivity and sustainability always in mind. We never forget that we're here to help life leap forward. Deere & Company at a glance: https://www.deere.com/assets/pdfs/common/our-company/deere-&-company-at-a-glance.pdf	*

11	What are your company's expectations in the event of an award?	Our expectation, if we are awarded, is to continue working with Sourcewell to provide governmental customers the best option for acquiring our Construction and Compact Construction products. The John Deere Governmental Sales Team will continue to train our dealers on how to present Sourcewell and the benefits the contract offers to continue growing our sales. Since our training plan was rolled out in late 2016, our sales on this contract have had significant growth and our expectation is to continue that trend in the market place.	*
12	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	John Deere has a long history and attached in supplemental documents is our most recent annual report from 2021. Our 2022 fiscal year just concluded on October 31, 2022 and the annual report is not published at this time.	*
13	What is your US market share for the solutions that you are proposing?	While we do not publicly state market share position, John Deere Construction & Forestry holds a top level market share position across our entire product portfolio in the US.	*
14	What is your Canadian market share for the solutions that you are proposing?	While we do not publicly state market share position, John Deere Construction & Forestry holds a top level market share position across our entire product portfolio in Canada.	*
15	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No bankruptcy proceedings have taken place.	*
16	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	John Deere Construction Retail Sales (JDCRS) is based in Moline, IL and is responsible for growing sales in the governmental segment for the Construction & Forestry Division of John Deere. All employees of JDCRS are full time John Deere employees. This sales team is responsible for training our dealers on governmental business, contracts and sales processes. Specific to supporting the Sourcewell contract, the account managers, contract manager and sales support team are responsible for educating the dealers on the quoting, ordering and delivery process of products sold on the Sourcewell contract. All dealers are required to go through a contract training program either in person or virtually via Microsoft Teams to become an authorized seller on our contract. This process has been the main driver of our growth since it was launched in 2016. We do retain the right to sell direct if required or the dealer has not completed our training program. Upon award of this new contract, we are revamping our training process to leverage our John Deere University online training system to make it easier and more efficient for the dealer field staff to become trained and certified on the Sourcewell contract.	*
17	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	John Deere maintains all licenses and certifications necessary to conduct its business around the world. This is supported by our Supply Management, Engineering, Safety, Accounting, Human Resources and Tax and Legal Departments. John Deere self-audits and has regular outside audits performed by Deloitte & Touche for compliance with all required licenses, certifications and regulations.	*
18	Provide all "Suspension or Debarment" information that has applied to your organization during the past ten years.	There are no suspensions or disbarments to note.	*

ATTACHMENT 1

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *	
19	Describe any relevant industry awards or recognition that your company has received in the past five years	John Deere has received numerous levels of recognition and awards worldwide for quality production standards, environmental responsibility, ethics, diversity, safety and corporate citizenship. Page 12 of the 2021 Annual Report (attached in the documents section of the response) showcases some of our business highlights and the list of 2021 Awards and Recognitions. Also, attached within the documents section is our 2021 Sustainability Report for John Deere.	*
20	What percentage of your sales are to the governmental sector in the past three years	Customer and segment specifics for John Deere sales are not shared publicly. For the industry as a whole that we participate in, approximately 10-15% of sales for Construction and Compact Construction Equipment are sold to governmental agencies across North American each year.	*
21	What percentage of your sales are to the education sector in the past three years	Our education sector sales is a low percentage of our total governmental business but education entities have utilized the Sourcewell contract previously. For construction and compact construction equipment it is generally reported as a local or state level sale.	*
22	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	NASPO, as well as state participating addendums through this contract H-GAC TASB BuyBoard We also hold on average 5-10 individual state contracts outside of cooperative purchasing contracts. Sales figures are not publicly shared on any of these contracts.	*
23	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	GSA DLA US Fish & Wildlife, IDIQ Sales figures are not publicly shared on any of these contracts.	*

Table 4: References/Testimonials

Line Item 24. Supply reference information from three customers who are eligible to be Sourcewell participating entities.

Entity Name *	Contact Name *	Phone Number *	
Murphy Tractor & Equipment; an authorized dealer with a vast customer base with Sourcewell purchases.	Cole Iverson VP of Sales	507-320-8826	*
Brandt Tractor Ltd.; an authorized dealer with a vast customer baes with Sourcewell purchases.	Lloyd Norminton Government Sales Manager	780-486-6786	*
RDO Construction Equipment MW; an authorized dealer with a vast customer base with Sourcewell purchases.	Jesse Miller Government Sales Manager	952-882-2752	*

ATTACHMENT 1

Table 5: Top Five Government or Education Customers

Line Item 25. Provide a list of your top five government, education, or non-profit customers (entity name is optional), including entity type, the state or province the entity is located in, scope of the project(s), size of transaction(s), and dollar volumes from the past three years.

Entity Name	Entity Type *	State / Province *	Scope of Work *	Size of Transactions *	Dollar Volume Past Three Years *	
New York State	Government	New York - NY	Sourcewell and Sourcewell participating addendum sales.	We averaged 172 sales per year over the last 3 years within the state of New York.	We averaged 19 million dollars per year over the last 3 years within the state of New York.	*
State of Ohio	Government	Ohio - OH	Sourcewell sales. Ohio STS contract was also held and is now expired. These sales are not publicly shared from our office. 2022 Q4 is our first full quarter of our Sourcewell PA contract being rolled out in Ohio.	Previous contracts in Ohio averaged 38-50 transactions per year.	Previous contracts in Ohio averaged 3-5 million dollars per year.	*
United States Air Force	Government	Pennsylvania - PA	DLA Military Sales	Not publicly shared from our office.	Not publicly shared from our office.	*
Florida Forest Service	Government	Florida - FL	Florida Forest Service contract	Not publicly shared from our office.	Not publicly shared from our office.	*
Louisiana DOT	Government	Louisiana - LA	State DOT contract	Not publicly shared from our office.	Not publicly shared from our office.	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	
26	Sales force.	Sales is covered by our independent dealer network that has been trained and certified on the Sourcewell sales processes. We have dealer standards that require a minimum sales person to customer ratio to ensure proper sales coverage and response time.	*
27	Dealer network or other distribution methods.	There are nearly 400 dealer locations in the U.S., authorized to sell John Deere construction equipment products and another 60 covering Canada. There are roughly 1400 dealer locations in the U.S. authorized to sell compact construction equipment another 500 across Canada. These John Deere dealers sign contracts to sell and service John Deere products in their assigned areas. We have dealer standards that require a minimum sales person to customer ratio to ensure proper sales coverage and response time.	*
28	Service force.	This is covered fully by our dealers. Our dealers standard policy also has a minimum service technician to machine base ratio to ensure the best service and response time.	*
29	Describe the ordering process. If orders will be handled by distributors, dealers or others, explain the respective roles of the Proposer and others.	We have two processes for ordering products on our Sourcewell contract. The majority of our sales are ordered by authorized selling dealers that have been trained and certified by our John Deere Government Sales office. Upon delivery of an order we have a sales reporting automated process to capture the sales for reporting to Sourcewell. For dealers that may not be certified yet, our John Deere Government Sales office reserves the right to order direct.	*

30	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	A professional, capable, well-trained, well-capitalized dealer network is one of John Deere's competitive advantages. Our dealers, backed by John Deere, provide local customer support, repairs, maintenance and parts. John Deere has authorized dealers in all 50 U.S. states and all across Canada. There are nearly 400 dealer locations in the U.S., authorized to sell John Deere construction equipment products and another 60 covering Canada. There are roughly 1400 dealer locations in the U.S. authorized to sell compact construction equipment and another 500 across Canada. These John Deere dealers sign contracts to sell and service John Deere products in their assigned areas. We also have a certified technician training program to ensure quality service for our customers. There are also multiple regional parts depots across North America for the best parts availability in the industry. Dealers must submit an annual business plan that contains their commitment to effectively selling and supporting all potential customer in their area, including but not limited to commercial accounts, national accounts, and state, county, and local governmental agencies. Customer can count on John Deere construction dealers to support our products and customers.	*
31	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	All areas of the U.S. will be served.	*
32	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	All areas of Canada that Sourcewell has a defined partner (such as Canoe) will also be served.	*
33	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	All areas of the U.S. will be served. All areas of Canada that Sourcewell has a defined partner (such as Canoe) will also be served.	*
34	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	Any agency that John Deere defines as a governmental customer and is also eligible to be a Sourcewell member will qualify for the discounts on our contract. John Deere Construction & Forestry defines a governmental customer as the following: 1. Federal, state/provincial, county, municipal and local governmental agencies 2. Hospitals and state/provincially accredited schools (both public and private) 3. Special government and/or taxing districts that have authority to levy taxes and/or issue tax free municipal bonds (ex. airports) 4. Governmental facilities run by independent management groups qualify only if a governmental agency issues the purchase order and retains ownership. Ownership by the management group voids discount eligibility. 5. Non-governmental utilities or departments or divisions of them that provide has, water, electrical, or telephone service directly to commercial or home users 6. Governmental agencies or departments or divisions of them that provide recycling or waste service directly to commercial or home users. Companies or departments or divisions of these utilities that do not provide service directly to commercial or home users do not qualify 7. North American Indian Tribal Councils 8. Non-profit agencies exempt from state/provincial and federal taxes 9. All Municipal Railroads	*
35	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	The John Deere Construction & Forestry Division has assigned dealers in both Alaska and Hawaii. As is the case for the continental U.S. (CONUS), factory to dealer freight as well as local delivery by dealer to end-user will be quoted and invoiced for any applicable areas outside of the continental U.S. (CONUS). Location specific factors related to moves by ocean, barge, inland, etc. will affect final delivery date.	*

Table 7: Marketing Plan

Line Item	Question	Response *	
36	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	Since our "authorized selling dealer" initiative that was rolled out in late 2016, our marketing plan has focused on getting our dealer network to understand the power of cooperative purchasing, specially the Sourcewell contract. Our dealers are closer to the end use customers and understand their business and product needs better than our small team here in Moline, IL. Once we got the dealers fully bought in on the power, ease of use and importance of the contract, the sales numbers took off year over year. Our plan for the new contract is to continue this with our dealer network.	*
37	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	John Deere has a great public website with information about our entire product line. We also have a link to a variety of governmental contracts that are available. In addition to those site, we also allow the customer to build their own machine online so they can see the options that are available before they contact their local dealer. https://www.deere.com/en/ https://www.deere.com/en/construction/ https://www.deere.com/en/government-and-military-sales/ https://www.deere.com/en/government-and-military-sales/state-and-local-purchasing/ https://configure.deere.com/cbyo/#/en_us/products Our marketing communications group runs a variety of social media promotions including a YouTube channel (https://www.youtube.com/user/JohnDeere) and Facebook page (https://www.facebook.com/JohnDeereUSCA/). The message on these sites changes periodically but it is primarily focused on the benefits of the John Deere relationship and how we are close to our customer.	*
38	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	From the John Deere perspective, there are three key components to promoting the Sourcewell contract: Sourcewell, John Deere Construction Retail Sales (JDCRS), and our dealer network across the US and Canada. Each has a key role to the success of the continued and incremental sales increases each year. Sourcewell's job is to continue to promote the brand to eligible members so they understand the basics of cooperative purchasing and the benefits of membership. JDCRS has the responsibility to train the dealers on sales processes (ceiling price, discount structure, ordering and delivering of products), how to determine if a customer is already a member and how to assist a customer that is not a member how to become a member. Our dealer's responsibility is to help identify the right product for the job and how to find the easiest, most cost effective way to source that product/solution. We believe that Sourcewell provides one of the best tools available to eligible customer and we will continue to promote that in our annual training. We work with our dealers and support them at any regional conference or training opportunity that helps promote the brand of all three entities. Open communication between all three parties is the key for future success and incremental sales gains on the next contract.	*
39	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	We are investigating e-procurement options for certain product families in the future but those are not available at this time. Due to the customizable nature of products and services, there are many possible configurations for each model. Many build-code dependencies must be taken into consideration for a properly functioning machine to be built. For that reason, we feel it is best to contact the local dealer for machine configuration guidance prior to requesting a contract quote.	*

Table 8: Value-Added Attributes

Line Item	Question	Response *	
40	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Training on equipment operation and safety is provided through the local dealer. At time of delivery, the dealer provides an introductory walk-around of the unit, explaining general operation and maintenance procedures, free of charge as part of the purchase. Additional product or specific system training is optional and quoted by the local dealer.	*

41	Describe any technological advances that your proposed products or services offer.	John Deere C&F products offer a variety of technology solutions that work to eliminate rework, improve jobsite safety, counteract labor shortages and increase efficiency. Information on those initiatives is public and can be found at the following link: https://www.deere.com/en/technology-products/precision-construction-technology/ There was also a magazine published in the Fall of 2021 that focused on technology and its place in our industry. A link to that publication is below. THE DIRT publication, Fall 2021. https://www.deere.com/assets/pdfs/common/industries/construction/publications/the-dirt-fall-2021-dkmag265c-cv.pdf John Deere has also published what is known as our "Leap Ambitions" and that is also public. Our strategy for the Construction & Forestry Division is by 2026, we will deliver: • 20+ electric and hybrid-electric product models. • Earthmoving: Increase SmartGradeTM grade control adoption to 50%. • Forestry: Boost Intelligent Boom Control adoption to 100%. • Roadbuilding: Increase Precision Roadbuilding Solution adoption to 85%. More information on our Leap Ambitions can be found at: https://www.deere.com/en/our-company/sustainability/sustainability-report/leap-ambitions/ Technology advances in our products is vitally important and was on display at CES 2023 where our CEO was the keynote speaker on day 1. Information can be found at CES2023.deere.com	*
42	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	John Deere has been very public with these initiatives and more can be found on our website in our most recently published Sustainability Report. https://www.deere.com/en/our-company/sustainability/sustainability-report/ "Our next leap is ELECTRIC" is another informative piece discussing the future of electrification at John Deere. https://www.deere.com/en/our-company/electrification/	*
43	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	In October 2022, John Deere received an award for the SBTi Validation of Greenhouse Gas Emission Reduction. https://www.deere.com/en/news/all-news/john-deere-receives-sbti-validation-of-greenhouse-gas-emission-reduction-targets/ In 2021 John Deere acquired majority ownership of Kreisel Electric. https://www.kreiselelectric.com/johndeere/	*
44	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	John Deere is committed to Supplier Diversity. Each year we submit to GSA a commercial plan that outlines our commitment to use WMBE's, SBE's, and other MBE's suppliers in support of our business. We also have signed on with two small business partners to learn about small business and partner with them to meet demand for products with a small business designation in the Federal market as well as help grow their businesses. Our partners are The Akana Group (Native American owned small business, small business, HUBZone certified) and Bravo (Service Disabled Veteran-Owned Business). If opportunities arise in the cooperative world for small business designation, we are prepared to grow that segment as well.	*
45	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	John Deere has a very strong presence as a construction equipment and compact construction equipment provider. John Deere is also the world's leading manufacturer of agricultural equipment. Additionally, John Deere Financial is one of the largest equipment finance companies. Valuable Extras: 1) Genuine John Deere Parts - highest quality parts for the highest quality equipment. -Regional parts depots strategically placed around North America for the best parts delivery response. 2) John Deere Connected Support – Allows customers to: - Monitor alerts for the machine remotely. - Monitor engine hours and utilization. - View machine location and get driving directions to the jobsite. - Monitor fuel level and idle time. 3) John Deere Connected Support – Allows dealers to: - Monitor alerts coming from the customers machine. - Remotely connect to a customers machine for real-time diagnostics. - Leverage Expert Alerts from John Deere to address potential future downtime. - Perform software updates from the dealership.	*

Table 9: Warranty

ATTACHMENT 1

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
46	Do your warranties cover all products, parts, and labor?	Construction equipment has basic warranty of 12 months/unlimited hours. The standard warranty general provisions including parts and labor is attached to this RFP submission. Compact construction equipment has a basic warranty of 24 months or 2,000hrs whichever occurs first.	*
47	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	Extended warranty is available as a separate purchase, not on this RFP, through our local dealers. Extended warranty has a year and hour limitation with each purchase. An example is 3 year 5,000hr power train/hydraulics extended warranty option.	*
48	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	No, TTM is not covered within our warranty.	*
49	Are there any geographic regions of the United States or Canada (as applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	No, we can cover the entire U.S. and Canada with our dealer network.	*
50	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	Third party warranties are handled by the original OEM of that attachment.	*
51	What are your proposed exchange and return programs and policies?	As noted in the standard warranty document, "John Deere will repair or replace, at its option, any parts… of a new John Deere product that, as delivered to the original retail purchaser(s), are defective in material or workmanship." See attached standard warranty document for full text explanation.	*
52	Describe any service contract options for the items included in your proposal.	John Deere does not offer any service contracts within this RFP. Service contracts and extended warranty options are available for customers from their local dealer and can be quoted to them at time of purchase.	*

Table 10: Payment Terms and Financing Options

ATTACHMENT 1

Line Item	Question	Response *	
53	Describe your payment terms and accepted payment methods.	JDCRS' only option for payment terms is Net 30 Days for direct sales. Since the majority of our deals are purchased through one of our authorized dealers, there are financing options available (JD Financial) that can be negotiated before finalizing the deal.	*
54	Describe any leasing or financing options available for use by educational or governmental entities.	JDCRS (contract vendor) does not play a role in leasing, financing or payment terms other than Net 30 Days. John Deere Financial offers leasing/financing options. The John Deere Municipal Lease Purchase Plan is a special low-rate financing plan that is designed to provide flexibility of leasing while building equity toward ownership of the John Deere equipment. Any state or local government body, or their political subdivisions, having the power to tax may be eligible for the John Deere Municipal Lease Purchase Plan, subject to approval. John Deere Financial also offers other leasing and financing options for governmental, educational and non-profit entities, subject to approval. All leasing and financing options are handled through the local dealer and John Deere Financial. The lease/finance provider funds the contract sales invoice within 30 days.	*
55	Describe any standard transaction documents that you propose to use in connection with an awarded contract (order forms, terms and conditions, service level agreements, etc.). Upload a sample of each (as applicable) in the document upload section of your response.	Our John Deere dealers use approved applications in their business system to provide quotes to customers stating the approved contract discount rate. The quote contains terms and conditions for the quote and terms for payment when a PO is issued. For direct sales through our office similar documentation is used and is available in the document upload section.	*
56	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	P-card payments are accepted with a 3% processing fee added to the contract quote. P-card usage is to be made known at time of quote request. Customer PO must cover the added fee.	*

Table 11: Pricing and Delivery

ATTACHMENT 1

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as described in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	
57	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	Each model will have a discount associated to it which applies to all options of that model fully configured, base coded attachments will have a separate discount schedule. Third party attachments (AT and BYT kits) are not part of this RFP proposal and are available for separate purchase by our dealer. The model and discount schedule is attached. Full current price pages will be submitted upon successful award. Any price changes or model updates will be submitted through the PnP process.	*
58	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Quotes are provided to the customer with a discount off of current list price. Quotes are price protected for a period of 30 days as long as a PO is received within that 30 day period. See attached pricing & discount schedule as well as the example quote for our proposal on this RFP.	*
59	Describe any quantity or volume discounts or rebate programs that you offer.	We offer two different volume discounts between our construction equipment (CE) portfolio and our compact construction equipment (CCE) portfolio due to the difference in acquisition costs of the larger construction equipment verses the smaller compact construction equipment. CE: 5-7 machines = 1%, 8-14 machines = 2%, 15+ machines = 3% CCE: 8-14 machines = 1%, 15+ machines = 3%	*
60	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	Sourced or open market items are not part of our RFP response but we do allow dealers to quote these as dealer provided items as a separate line item on the quote. Discounts will not be applied to these open market items. Quotes for these products are negotiated directly through the customer and our dealer network.	*
61	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	The following will not be included: 1. Dealer provided goods and services: Non-factory goods and services (third party items) will be quoted by dealer at the customers request. 2. Set-up and installation fees: These charges will be quoted by the dealer and are not part of this RFP. 3. Pre-Delivery Inspection (PDI): A PDI is performed on all new machine purchases to ensure proper fluid levels, check system pressures, verify accurate system operation, and cleaning of the unit prior to delivery. The cost of the PDI is quoted by the dealer and will vary by machine model and complexity. Taxes: Local taxes, if applicable, will be assessed.	*
62	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Freight, delivery and shipping are charged to the customer and added to the quote as separate line items.	*
63	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	Freight, delivery and shipping are charged to the customer and added to the quote as separate line items just as they are for all participating entities. Travel that occurs by ocean, barge or inland may affect the delivery time of the machine.	*
64	Describe any unique distribution and/or delivery methods or options offered in your proposal.	If a customer has a unique request, we can review at that time, otherwise there are no unique methods offered in this RFP.	*

ATTACHMENT 1

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments
65	c. better than the Proposer typically offers to GPOs, cooperative procurement organizations, or state purchasing departments.	Sourcewell has become our most valued contract to our dealer network for governmental business. We will continue to use our best available discount schedule to support this contract.

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
66	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell. Provide sufficient detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template.	Our dealers are required to participate in a contract sales training class to ensure they are promoting the contract per the Terms and Conditions of our RFP response. Dealers are made aware of how to obtain the effective price date of the contract, so the customer is being quoted accurately. Whenever there is a price change approved by Sourcewell, we communicate that information via our dealer bulletin process and post on our dealer microsite. We also use an automated settlement process where a dealer utilizes a program ID code so that we can accurately capture the sales each quarter for our internal review and submit to Sourcewell for the payment of our admin fee. We will also be launching a new quoting process to simplify the quoting process for many of our dealers to ensure accurate pricing per the terms and conditions of our contract.	*
67	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Upon award of this contract, we track the sales performance of each dealer group across the US and Canada to achieve our market share goals for construction equipment and compact construction equipment in the governmental segments. This has worked well for this contract to date, and we will continue to use this market share metric to keep our dealers accountable for performance.	*
68	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	We have had great success growing and expanding the utilization of this contract for all our dealers in the US and Canada and will continue this growth by providing a 0.5% admin fee to Sourcewell on all contract items. Third party attachments or non-contract items (dealer provided items) are not subject to the admin fee. The total calculated admin fee is payable each calendar quarter to Sourcewell.	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *	
69	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	We will be offering our complete line of construction equipment and compact construction equipment, as well as base coded attachments. Product families include Articulated Dump Trucks, Backhoes, Compact Track Loaders, Crawler Dozers, Crawler Loaders, Excavators, Compact Excavators, Tractor Loaders, Motor Graders, Skid Steer Loaders, Wheel Loaders and Compact Wheel Loaders. All services including product support, part support, and warranty work will be provided by our authorized dealers and not part of this contract.	*
70	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	N/A	*

ATTACHMENT 1

Table 148: Depth and 8readth of Offered Equipment Products and Services

Indicate below if the listed types or classes of equipment, products, and services are offered within your proposal. Provide additional comments in the text box provided, as necessary.

Line Item	Categor\ or T\pe	Offered	Comments
71	Wheeled, tracked, and backhoe loaders	(•) Yes ( ) No	
72	Motor Graders	(•) Yes ( ) No	
73	Wheeled and tracked excavators	(•) Yes ( ) No	
74	Bulldozers, compactors, scapers, articulated and rigid haulers	(•) Yes ( ) No	We do not offer rigid haulers. Compactors are offered on the separate Wirtgen contract.
75	Cranes	( ) Yes (•) No	
76	Accessories or attachments for the offering in #71-75 above	(•) Yes ( ) No	We will be offering base coded attachments at time of whole goods purchase or separately if needed. AT kits and BYT kits (third party attachments) are not part of this contract.
77	Technology or services for the offering in #71-75 above	(•) Yes ( ) No	-' /ink Telematics, Grade Control, and Slope Control are examples of these technology services that are available as options on certain products.

Table 14C: Required Offering of Equipment

Indicate below if the proposer's proposal includes at least one (1) of the following listed types or classes of equipment. Provide additional comments in the text box provided, as necessary.

Line Item	Categor\ or T\pe	Offered	Comments
78	Wheel loader with published net horsepower (HP) of at least 300 HP	(•) Yes ( ) No	We offer 4 wheel loaders that meet this spec requirement.
79	Wheeled or tracked excavator with a published net horsepower (HP) of at least 150 HP	(•) Yes ( ) No	We offer 10 excavators that meet this spec requirement.
80	Motor Grader with a published maximum operating weight of at least 30,000 lbs.	(•) Yes ( ) No	We offer 8 motor graders that meet this spec requirement.
81	Rough terrain, all terrain, crawler, floating, lattice, or telescopic crane with a published maximum lifting capacity of at least 300 tons and a published maximum boom length of at least 150 feet	( ) Yes (•) No	

Exceptions to Terms, Conditions, or Specifications Form

Only those Proposer Exceptions to Terms, Conditions, or Specifications that have been accepted by Sourcewell have been incorporated into the contract text.

ATTACHMENT 1

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as "Marketing Plan."

Addenda, Terms and Conditions

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor's objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:
    1. Included on the "Specially Designated Nationals and Blocked Persons" list maintained by the Office of Foreign Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

    2. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://sam.gov/SAM/; or

    3. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated

by the State of Minnesota; the United States federal government or the Canadian government, as applicable, or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Mark Oliver, Manager, Contract Sales, John Deere Construction Retail Sales

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION AUTHORIZING ISSUANCE OF A PURCHASE ORDER TO BELKORP AG, LLC FOR TWO REPLACEMENT JOHN DEERE TRACK STEER LOADERS AND ASSOCIATED ATTACHMENTS IN AN AMOUNT NOT-TO-EXCEED $203,260

The City of Livermore ("City") Maintenance and Water Resources Divisions utilize tractors to assist in performing various services, including weed abatement, street grinding, broom sweeper cleanup, material handling, and storm water channel cleanup. The City's Fleet Policy currently recommends the replacement of two City-owned tractors.

Livermore Municipal Code section 2.68.370 allows for the purchase of equipment with a value higher than $50,000 through a cooperative purchasing arrangement. Livermore Municipal Code section 2.68.390 identifies specific cooperative purchasing agencies and counties that are pre-approved.

John Deere Construction Retail Sales a Division of John Deere Shared Services, LLC ("Supplier") holds the Sourcewell (formerly National Joint Powers Alliance) competitively bid cooperative purchasing contract for the procurement of heavy construction equipment with related attachments and technology. Livermore Municipal Code section 2.68.390 identifies the National Joint Powers Alliance as an approved cooperative purchasing arrangement.

The City received a quote from Belkorp Ag, LLC for two John Deere track steer loaders and associated attachments in the amount of $203,260. Belkorp Ag, LLC is an authorized dealer of construction equipment and related attachments manufactured by Supplier.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby:

1. Authorizes the City Manager, or her designee, to execute a purchase order, on behalf of the City of Livermore, with Belkorp Ag, LLC in an amount not-to-exceed $203,260 for the purchase and delivery of a John Deere 325G Compact Track Loader, a John Deere 317G Compact Track Loader, and associated attachments, in accordance with the terms, specifications and general provisions specified in Sourcewell Contract #011723-JDC and sections 2.68.370 and 2.68.390 of the Livermore Municipal Code.

2. Authorizes the City Manager, or her designee, to take whatever actions are necessary and appropriate to carry out the purpose and intent of this resolution.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024, by the following vote:

CITY COUNCIL STAFF REPORT **ITEM NO. 5.5**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Judy Erlandson, Acting Public Works Director

SUBJECT: Resolution authorizing execution of a first amendment to the Airport Restaurant Lease Agreement with SAAB13, LLC.

RECOMMENDED ACTION

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute the first amendment to the Airport Restaurant Lease Agreement with SAAB13, LLC as agreed upon in the Settlement Agreement and Lease Amendment dated February 29, 2024.

SUMMARY

Due to non-payment of rents owed and lack of appropriate insurance, the City pursued SAAB13, LLC, the owner and operator of Elevation LVK restaurant at Livermore Airport for collection as well as recommended changes to the lease agreement to allow for a continued partnership.

Staff recommends that the City Council adopt a resolution authorizing the execution of the amendments to the Airport Restaurant Lease Agreement with SAAB13, LLC and authorizing the City Manager to sign the lease amendment.

DISCUSSION

SAAB13, LLC, owner and operator of Elevation LVK at the Livermore Airport, was behind on rent payments and lacked appropriate insurance.

City staff notified SAAB13, LLC of the non-payment of amounts owed to the Airport pertaining to their tenancy in addition to other matters requiring resolution, such as maintaining required insurance coverages. City staff sent a number of letters requesting action by SAAB13, LLC to meet the terms of their lease.

Ultimately, the issue culminated with both parties entering into a dispute resolution process to achieve resolution. The outcome resulted in a settlement agreement where SAAB13, LLC agreed to remit payment of rental amounts owed in addition to obtaining appropriate insurance. Additionally, the

settlement agreement incorporated City and counter party requested amendments to the Lease in order for the partnership to continue. These amendments are a reflection of the settlement agreement and are included in the amended lease language.

Adoption of the resolution and approval of the lease amendment finalizes the actions taken by both parties to achieve resolution of this matter. Staff recommends that the City Council adopt a resolution authorizing the execution of the amendment to the Airport Restaurant Lease Agreement with SAAB13, LLC and authorizing the City Manager to sign the lease amendment.

FISCAL AND ADMINISTRATIVE IMPACTS

The City will receive $200,291 from SAAB13, LLC for back rent, bringing their account up to date.

COMMUNITY PILLAR

5: A City that Works

GOAL

14: Develop, operate and maintain the City's infrastructure.

Administrative Services Director

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION AUTHORIZING EXECUTION OF A FIRST AMENDMENT TO THE AIRPORT RESTAURANT LEASE AGREEMENT WITH SAAB13 LLC

The City of Livermore ("City") entered into an Airport Restaurant Lease Agreement ("Agreement") for construction and operation of a restaurant, Elevation LVK, at the Livermore Municipal Airport with SAAB13 LLC on May 15, 2017.

Due to non-payment of rents owed and lack of appropriate insurance, the City and SAAB13 LLC have subsequently entered into a Settlement Agreement and Lease Amendment dated February 29, 2024 ("Settlement Agreement"), that requires the parties to execute a separate, standalone Lease Amendment, which must be fully executed by April 1, 2024.

This First Amendment to the Agreement with SAAB 13 LLC includes revisions to the Agreement that are required pursuant to the Settlement Agreement.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby:

1. Approves the First Amendment to Lease between the City and SAAB13 LLC as agreed upon between the parties in the Settlement Agreement and Lease Amendment dated February 29, 2024.

2. Authorizes the City Manager to sign the First Amendment to Lease, a copy of which is attached as Exhibit A and incorporated by this reference.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024 by the following vote:

The City of Livermore and SAAB13, LLC

Recorded Document 2018075761 (04/16/2018)

THIS PAGE ADDED TO PROVIDE ADEQUATE SPACE FOR RECORDING INFORMATION (Govt. Code 27361.6)
(additional recording fee applies)

FIRST AMENDMENT TO LEASE

SAAB13 LLC

THIS FIRST AMENDMENT TO LEASE is entered into by and between the City of Livermore ("Lessor"), a municipal corporation, and SAAB13 LLC ("Lessee"), a California limited liability company. Lessor and Lessee are referred to collectively as the "Parties."

RECITALS

Lessor owns real property located at 680 Terminal Circle, Livermore, California 94551 and commonly referred to as the Livermore Municipal Airport Administration Building (the "Property").

On or about April 10, 2018, the Parties entered into an Airport Restaurant Lease Agreement ("Lease") for a portion of the Property (the "Premises"). The Lease required Lessee to design, construct, and operate a restaurant and concession space on the Premises.

On February 29, 2024, the Parties executed a Settlement Agreement and Lease Amendment ("Settlement Agreement"). Pursuant to the Settlement Agreement, the Parties agreed to amend the Lease within thirty days of the last signature to the Settlement Agreement.

The Parties now wish to amend the Lease as agreed and specified in the terms of the Settlement Agreement.

AGREEMENT

NOW, THEREFORE, Lessor and Lessee hereby agree that the aforementioned recitals are true and correct and further agree as follows:

1. The Lease is amended as follows:

   A. Section 2.5 of the Lease is removed in its entirety.

   B. Section 3.4 of the Lease is amended to read as follows:

      Days of Operation. Lessee agrees to ensure that, with the exception of certain holidays including, without limitation, New Year's Day, Thanksgiving, and Christmas Day, the restaurant and café/concession retail sales operations are open during the following days and hours:

      a. Wednesdays, Thursdays, and Fridays: 11:00 AM to 8:00 PM;
      b. Saturdays: 10:00 AM to 8:00 PM; and
      c. Sundays: 10:00 AM to 3:00 PM.

No change to the days and hours of operation shall be made without the prior written approval of the Airport Manager, which change may be made without the approval of the Livermore City Council.

C. Section 6.1 of the Lease is amended to read as follows:

Options to Extend. The Lease may be extended for three successive terms ("Renewal Options") upon mutual written agreement(s) signed by both Lessee and Lessor. Each Renewal Option shall be for a seven (7) year period (the "Option Term").

D. Section 6.1.2 of the Lease is removed in its entirety.

E. Section 6.1.3 of the Lease is amended to read as follows:

Lessor and Lessee hereby agree to extend the Term of the Lease for the first of the three Renewal Options. The Term of the Lease shall now expire on August 31, 2032. The second and third Renewal Options are exercisable only by a mutual written agreement ("Option Notice") signed by both Lessee and Lessor at least six (6) months, but not more than one (1) year, before the expiration of the first Renewal Option or the second Renewal Option. A separate written agreement is required to exercise each Renewal Option. Lessor may withhold its consent to the second and third Renewal Options for any reason. If Lessor withholds consent, the Lease shall terminate as of the end of the first Renewal Option or the Second Renewal Option, as applicable. The third Renewal Option is extinguished if the Lease is not extended for a second Renewal Option by mutual written agreement of Lessee and Lessor.

F. Section 13.1 of the Lease is removed in its entirety.

2. These amendments are prospective and apply after the execution of the Settlement Agreement. Unless otherwise stated herein, these amendments to the Lease and the Settlement Agreement do not relieve the Parties of the terms and conditions of the Lease as currently written and in effect.

3. Except as amended in the Settlement Agreement, the Lease remains in full force and effect.

****Signatures on Next Page****

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year last below written.

LIVERMORE
CALIFORNIA

CITY COUNCIL STAFF REPORT **ITEM NO. 5.6**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Marie Weber, Deputy City Manager/City Clerk

SUBJECT: Resolution approving the 2024 City of Livermore State and Federal Legislative Platform

RECOMMENDED ACTION

Staff recommends the City Council adopt a resolution approving the 2024 City of Livermore State and Federal Legislative Platform.

SUMMARY

The City of Livermore's State and Federal Legislative Platform allows the City to respond quickly in support of or opposition to legislative issues for the benefit of the Livermore community.

DISCUSSION

The City of Livermore State and Federal Legislative Platform (Platform) documents the City's position in several legislative categories. The proposed positions and categories are based on community priorities and values, and policy documents. The Platform provides a framework to respond quickly to legislative bills and communicate with legislators on issues affecting Livermore.

The City Council adopted its first state platform in 2013. In 2015, the City Council directed staff to also use the Platform as a guide for federal bill tracking and action. Annual updates to the Platform reflect adjustments based on changing City needs, interests and conditions at the regional, state and federal levels.

The 2024 Platform categories are:

- Community-Focused Governance
- Fiscal Stability
- Affordable Housing and Homelessness
- Planning and Sustainability
- Building Safety
- Infrastructure
- Job Creation and Economic Development

- Libraries
- Public Safety and Emergency Management
- Science, Technology, and Innovation
- Transportation and Parking
- Water

The proposed 2024 City of Livermore State and Federal Legislative Platform is included as Exhibit A to the Resolution for this report and once approved will be accessible on the City's website at www.LivermoreCA.gov/Legislation. Attachment 1 to this report is a redlined version of the updates made to this year's Platform.

Further, when appropriate, the City of Livermore joins its Tri-Valley neighbors to advocate for issues and funding at the regional, state and federal levels. The cities of Livermore, Dublin, Pleasanton, San Ramon, and the town of Danville developed a Tri-Valley Cities Legislative Framework. The Tri-Valley Framework overlaps many of the items in the City’s Platform and provides another opportunity for advocacy progress and success. The 2024 Tri-Valley Cities Legislative Framework is included as Attachment 2 to this report.

FISCAL AND ADMINISTRATIVE IMPACTS

There are no fiscal or administrative impacts associated with City Council adoption of the 2023 City of Livermore State and Federal Legislative Platform.

COMMUNITY PILLAR

5: A City That Works

GOAL CATEGORY

3: Oversee the City's legislative advocacy efforts

City of Livermore
2024~~3~~ State and Federal Legislative Platform

(DRAFT)

CITY OF
LIVERMORE
CALIFORNIA

The City of Livermore ("City") 2024~~3~~ State and Federal Legislative Platform ("Platform") highlights the position of the City Council on important issues that align with community goals and policy documents such as the General Plan. City staff monitor bills introduced into the California Legislature and United States Congress. The Platform provides staff direction and allows the City, on the City Council's behalf, to respond quickly in support of or opposition to bills and other legislative or administrative actions in time-sensitive situations. The City Council delegates its authority to the mayor to sign support or opposition letters, consistent with the Platform. Additionally, the Platform enables staff to communicate on behalf of the City to state legislators and federal elected officials.

The Platform is developed through review of City needs and issues, staff input, and review of League of California Cities priorities and strategies. City Council adopted the first Platform in 2013. At its April 13, 2015, meeting, City Council directed staff to use the Platform as a guide for federal bill tracking and action, too. Typically, the City Council reviews and updates the Platform annually.

The 2024~~3~~ City of Livermore Platform categories are:

- Community-Focused Governance
- Fiscal Stability
- Affordable Housing and Homelessness
- Planning and Sustainability
- Building Safety
- Infrastructure
- Job Creation and Economic Development
- Libraries
- Public Safety and Emergency Management
- Science, Technology, and Innovation
- Transportation and Parking
- Water

The State and Federal Legislative Platform evolves as City needs adjust, new issues arise, and conditions at the regional, state, and federal level change. Platform adjustments, whether due to federal policy changes or state policy reactions, may be considered at a future City Council meeting or at the next annual review in 2025~~4~~.

Once approved by the City Council, the 2024~~3~~ State and Federal Legislative Platform will be posted on the City's website at www.LivermoreCA.gov/Legislation. Staff also provides the City Council with periodic updates on letters sent, bill progress, and legislative developments.

When appropriate, the City of Livermore joins its Tri-Valley neighbors to advocate for issues and funding at the regional, state, and federal levels. The cities of Livermore, Dublin, Pleasanton, San Ramon, and the town of Danville develop a Tri-Valley Cities Legislative Framework. The Tri-Valley Framework overlaps many of the items in the City's Platform and provides another opportunity for advocacy progress and success.

The Tri-Valley Cities Legislative Framework is available to view at www.LivermoreCA.gov/Legislation.

Community-Focused Governance

The City values its ability to create policies that best fit the needs of the Livermore community. It is important to advocate for state legislation the provides framework guidance and allows local implementation.

1. **Support** legislation that enhances or streamlines local governance and allows cities to address the needs of local constituents within a framework of regional cooperation.

2. **Monitor** legislation that affects the ability of City Council to effectively govern.

3. **Monitor** cannabis-related legislation.

4. **Oppose** legislation that would prohibit or limit local governments' ability to contract out for services.

5. **Support** legislation that updates both the Brown Act and Public Records Act regarding electronic records and activities that support local decision-making without significant fiscal impact and new regulations that require staff resources.

6. **Oppose** legislation that requires or expands state involvement in City financial audits, fiscal monitoring, general oversight, or assistance by the State Treasurer, State Controller, or other state agencies.

7. **Support** a wording change in the Communications Act of 1934 that removes the distinction between "capital" and "operating" funds in order to provide more local control for community television stations in the use of their public, educational and government (PEG) channel fees with no rise in taxes or a reduction in revenue to the cable industry.

Fiscal Stability

Fiscal stability and financial independence are necessary to provide desired services and programs for residents and local businesses. City Council policy decisions direct staff to ensure the City's long-term financial stability. Unexpected diversion of local funds by the state or federal government erodes the ability of a city to plan and budget for short-and-long term service needs.

1. **Oppose** legislation that imposes unfunded or inadequate state or federal mandates.

2. **Support** legislation that updates the tax structure to enhance local government revenues that have declined due to the expansion of e-commerce, increased

consumption of services rather than durable goods, and innovations in technology.

3. **Oppose** legislation that reduces local government's ability to levy fees

4. **Monitor** legislation regarding new fees or other revenue-enhancements.

5. **Oppose** legislation that reduces or eliminates payments to cities for use of property and rights-of-way for telecommunications.

6. **Support** legislation that provides sustainable and secure public pensions and other post-retirement benefits to ensure responsive and affordable public services.

7. **Support** legislation that streamlines the Workers' Compensation system.

8. **Oppose** legislation that would remove the federal tax exemption for municipal bonds.

Affordable Housing and Homelessness

The availability of a suitable living environment is essential to quality-of-life. It is important to support adequate and affordable housing opportunities and housing-related service needs.

1. **Support** regional solutions that balance housing, transportation/transit, and jobs together. Building housing without adequate transportation infrastructure may exacerbate, not alleviate, the affordable housing crisis.

2. **Support** legislation that protects existing affordable housing stock, including rental apartments, deed-restricted units, and mobile homes, and promotes affordable housing that includes long-term affordability agreements.

3. **Support** legislation that ensures incentives and density bonus provisions are directly linked to the level and percentage of affordable units provided for each project.

4. **Support** legislation that enables cities to develop locally appropriate plans that meet state objectives in a manner that is compatible with existing community character.

5. **Support** legislation that facilitates accessory dwelling units and encourages development of "missing-middle" housing that is compatible with suburban community character.

6. **Oppose** housing legislation that is not accompanied by funding that can support expanded transportation, transit, and infrastructure, including planning, and capital improvement programs and funding to support new school facilities.

7. **Oppose** housing legislation that results in a net loss of local funding.

8. **Support** housing legislation that promotes the development and enhancement of a diverse workforce, as long as the legislation does not create an unfunded mandate or conflict with local land use authority and financial stability.

9. **Oppose** housing legislation that unduly impacts local taxation capacity or diverts financial resources from essential local public services and infrastructure programs.

10. **Support** legislation that increases financial assistance to cities, non-profit organizations, and local partnerships to provide affordable, transitional, special needs, and emergency housing to the homeless, seniors, veterans, and people with special needs.

11. **Support** legislation that increases financial assistance to cities, non-profit organizations, and local partnerships to provide and promote self-empowerment for homeless individuals or families through counseling, job training, and other related services.

12. **Support** legislation that provides financial assistance, improved access to, and expansion of health care, mental health, and drug addiction services for low income and homeless individuals.

13. **Support** legislation that removes fair housing barriers and prevents displacement.

Planning and Sustainability

The City prioritizes comprehensive land use planning that creates complete neighborhoods, promotes a jobs/housing match, strengthens Livermore's economic and fiscal base, provides housing choice, promotes local control with public input, streamlines the permitting process, conserves wildlands, promotes environmental stewardship while reducing the City's environmental footprint, and generally improves the community's quality of life. ~~Comprehensive land use planning coupled with environmental stewardship, such as mandatory reductions in greenhouse gases, emissions, solid waste generation, and energy consumption are vital to a community's quality of life.~~

1. **Oppose** legislation that diminishes cities' decision-making authority over land use decisions, ~~or~~ zoning, or permit process and timelines.

2. **Support** legislation preserving or enhancing the federal Community Development Block Grant (CDBG) program.

3. **Support** land use patterns that maintain safe ~~residential~~ neighborhoods, bolster

economic prosperity, provide local jobs, preserve open space, protect the environment, and enhance overall quality of life.

4. **Oppose** state or federal efforts to further erode local government authority regarding the location or permit review of small cell wireless equipment, cellular towers, transmission sites, or other devices on public infrastructure or in the public right of way.

5. **Support** funding and incentives for smart growth and sustainable development.

6. **Support** CEQA-reform legislation that improves the cost-effective and timely delivery of projects and decreases the ability for spurious lawsuits.

7. **Support** RHNA- and APR-reform legislation that adequately provides necessary housing while reducing municipal administrative burden.

8. Support tax rebate programs, like the Williamson Act or Mills Act, to promote agriculture, open space preservation, historic preservation, and good design.

9. **Support** legislation or grant opportunities for cities that provide funding for developing or enhancing alternative vehicle fueling stations.

10. **Support** rebate programs, tax credits, and other financial incentives that encourage property owners to invest in energy efficiency and renewable energy systems, greenhouse gas-reducing technology, and alternative vehicle fueling stations in parking areas.

11. **Monitor** state and federal legislation related to climate adaptation.

12. **Support** measures that increase funding to local governments for landfill diversion programs such as food recovery, composting, and recycling.

13. **Support** Extended Producer Responsibility (EPR) legislation to encourage manufacturers to design environmentally friendly products by holding producers responsible for the costs of managing their products at end of life.

Building Safety

The City prioritizes protection of public health, safety and welfare by proper building design and construction practices.

1. **Support** legislation that increases the safety of buildings, reduces potential hazards and protects against fire and structure collapse.

2. **Support** legislation for seismic earthquake retrofits to protect individuals and structures.

3. **Support** legislation that contributes to the quality and durability of construction methods and materials

4. ~~**Monitor**~~ **Oppose** legislation to restrict number of inspections needed to verify safety of the built environment and other components.

5. **Support** measures to streamline photovoltaic and electrical vehicle charging permitting and installation.

6. **Support** legislation that contributes to the wellbeing of a community, preservation of life safety, and property maintenance.

7. **Support** legislation that promotes barrier removal and sustainable practices in the built environment.

8. **Oppose** legislation that establishes unrealistic timeliness for building project review that will potentially create an unsafe built environment.

Infrastructure

The condition of a city's infrastructure affects the community's quality-of-life. Sewer and water systems, sidewalks, and roads are subject to a wide number of regulations and must be maintained or replaced to ensure the health of the community.

1. **Support** state and federal legislation that would expand connectivity and access to digital resources.

2. **Oppose** legislation regarding infrastructure such as sidewalk repair that increases a city's unfunded infrastructure liability.

3. **Support** state and federal legislation that provides additional funding and/or preferred financing for local critical unmet infrastructure needs.

4. **Support** legislation that reduces or streamlines state and federal permitting requirements.

5. **Support** legislation that enhances the reliability of water transmission and storage through the Delta to the Tri-Valley.

6. **Support** legislation that provides new funding methods for flood control and stormwater management.

7. **Support** legislation that would acknowledge an adopted California Environmental Quality Act (CEQA) document can be substituted for a federal National Environmental Protection Agency (NEPA) document for infrastructure projects.

8. **Monitor** legislation that alters the state's agency permitting requirements and how they impact the timeliness and viability of natural resource projects planned by government agencies and special districts at the local and regional level including Fish and Game endowments.

Job Creation and Economic Development

The City encourages and supports business through strategic economic development initiatives. Fostering a strong business environment requires job creation, educational opportunities, and workforce development programs.

1. **Support** legislation that enhances or expands community and economic development tools and funding to address development and revitalization needs.

2. **Support** legislation or grants that focus on downtown development.

3. **Support** legislation that promotes and funds workforce development and re-training efforts focused on high-skilled jobs required by emerging industries.

4. **Support** legislation that encourages entrepreneurship, facilitates resource-sharing models, or otherwise reduces barriers to entry for small business.

5. **Support** legislation that provides insurance or loan guarantees for small business loans during recessionary periods.

6. **Support** legislation or grants that focus on walkable, transit oriented, and complete districts with access to jobs and services.

Libraries

The Livermore Public Library connects people with information and education, and inspires experiences that support lifelong learning, personal growth, and enhanced quality of life. With strong community support, the Library offers programs, materials, materials, and services most valued by residents.

1. **Support** legislation that increases financial assistance to cities to ~~provide~~ fund and promote local library programs and literacy services.

2. **Support** legislation that seeks to close the digital divide through funding local library~~ies~~ efforts to ~~such a way they~~ provide broadband internet and ~~devices~~ technology through devices such as hotspots, computers, and tablets, for community members to access.

3. **Support** legislation and funding efforts relating to early literacy, school readiness, adult literacy, career development, vocational support, and assistance to vulnerable and under-served populations.

4. **Oppose** censorship and efforts to limit the public's intellectual freedom and access to information and resources.

5. **Support** the enhancement of inclusivity, efforts to offer open and unfettered access to information, ~~and~~ the exchange of ideas, and the welcoming of all people to express themselves regardless of their politics or beliefs.

6. **Support** legislation that fosters growth during the transformation of libraries and library services in a dynamic and increasingly global digital information environment.

7. **Support** legislation that protects the privacy of patrons and their associated library records and data.

8. **Support** legislation that enhances equitable, diverse, and inclusive initiatives and opportunities.

Public Safety and Emergency Management

Effective public safety significantly enhances a community's quality-of-life. Maintaining a strong safety presence requires ongoing local, regional, state, and federal support.

1. **Support** legislation and grants that fund police and fire equipment upgrades, training, and capital improvements.

2. **Support** legislation that promotes and funds emergency management and recovery efforts.

3. **Support** legislation that maintains and increases grant funding for the Community Oriented Police Services (COPS) hiring program.

4. **Monitor** legislation pertaining to unmanned aircrafts (drones) and Federal Aviation Administration regulations.

5. **Support** legislation to increase penalty for prohibited persons in possession of firearms and use of firearms in the commission of a crime.

6. **Support** legislation that penalizes individuals who engage in drug and/or distracted driving activities.

7. **Support** legislative efforts to address the negative impacts of Proposition 47 (Reduced Penalties for Some Crimes, 2014) and Proposition 57 (Parole for Non-Violent Criminals and Juvenile Court Trial Requirements Initiative, 2016) and provide local law enforcement with tools to reduce criminal activity.

8. **Support** legislation that would provide funding and increase access to mental health care, response to mental health related calls for service, and drug/ alcohol treatment programs.

Science, Technology, and Innovation

As the only City in the United States with two national laboratories, science, technology, and innovation play an important role in the Livermore economy, workforce, and community values. Additionally, the City partnership with the labs and i-GATE fosters innovation, job creation, and economic development opportunities.

1. **Support** legislation that advances or encourages innovation, entrepreneurship, start-ups, small business opportunities, and/or workforce development.

2. **Support** legislation that encourages the expansion of STEM (Science, Technology, Engineering, and Mathematics) programs in K-12, higher education, libraries, and community-based organizations.

3. **Support** legislation that encourages and supports the transfer of technology from the national laboratories.

4. **Support** legislation that provides competitive grants, state partnerships, or other resources to encourage innovation and the science, technology, and innovation economies.

5. **Support** legislation that improves the abilities of the federal laboratories to update or expand their infrastructure.

Transportation and Parking

Regional and local transportation play a key role in a community's economic vitality and quality-of-life.

1. **Support** legislation that reduces congestion along Tri-Valley area freeways or reduces truck traffic along I-580 through roadway or rail improvements.

2. **Support** legislation that enhances the ability of local agencies to finance local transportation programs and facilities.

3. **Support** legislation that facilitates connectivity between major regional rail/transit systems.

4. **Support** legislation that provides incentives for rail and multimodal transit stations and transit-oriented development projects.

5. **Oppose** legislation mandating "one-size-fits-all" parking space requirements for future housing, entertainment, or retail developments or impinging on how parking spaces can be used.

6. **Support** legislation that provides incentives for shared public/private partnerships.

7. **Monitor** legislation that defines "high quality transit" for purposes of transit-oriented development as anything with service headways above hourly. Review on case-by-case basis to determine any impacts and/or benefits.

8. **Support** legislation to encourage the sale of unleaded fuel and assistance to pilots for Supplemental Type Certificate acquisition for non- American Society for Testing and Materials unleaded fuels at airports nationwide.

Water

Water, both quantity and quality, is essential to residential quality-of-life as well as agricultural and economic vitality and growth.

1. **Oppose** legislation that imposes a state tax or fee on customers of a public water system for drinking water.

2. **Monitor** legislation developing new water conveyance systems such as peripheral canals or tunnels (as mentioned in the proposed Bay Delta

Conservation Plan) to deliver adequate water to the Tri-Valley and the Silicon Valley.

3. **Support** legislation that expands the production and use of recycled water or increases local control of water supplies.

4. **Oppose** legislation that expands statewide mandatory water conservation and/or rationing unless the conservation measures are triggered in response to specific local water supply conditions.

5. **Support** legislation that allows direct and indirect potable water reuse.

6. **Oppose** legislation that allows the State Water Resources Control Board or Regional Water Quality Control Board to establish more stringent, clean water objectives unless the legislation provides a demonstrated water quality benefit as well as the means for jurisdictions to achieve the objectives.

7. **Support** regulations to protect drinking water from the impacts of hydrological fracturing (hydro-fracking) related to oil and gas exploration and extraction.

8. **Support** legislation and programs that make water, sewer, and/or storm services more affordable for customers.

TRI-VALLEY CITIES
Legislative Framework

TRI-VALLEY CITIES VALUES STATEMENT

The Tri-Valley Cities of Dublin, Livermore, Pleasanton, San Ramon, and the Town of Danville value regional leadership, innovation, collaboration, and problem solving to maintain and improve the quality of life for Tri-Valley residents, provide a vibrant climate for businesses, and enable continued opportunities for public and private investment within the region.

Each City and Town provides a unique perspective on how to meet the needs of their residents and businesses. The Cities and Town agree to respect the individuality of each community and are committed to open and honest communication with a goal of building consensus and a united approach to advocacy for solutions that will serve the residents and businesses of the Tri-Valley.

TRI-VALLEY CITIES LEGISLATIVE FRAMEWORK

The Tri-Valley Cities Legislative Framework seeks to inform all levels of governmental interaction (e.g., federal, state, regional, local) regarding legislation, policies, and programs that have a direct impact on the region. The TVC has defined Legislative Focus Areas which have an overarching objective to retain and promote local control and decision-making as it relates to the implementation of laws and regulations and to have the ability to integrate them in a manner that meets the unique needs of each community. The TVC will advocate together to achieve outcomes benefiting the region in each of these Focus Areas.

Transportation and Infrastructure

Residents of the Tri-Valley region are subject to some of the heaviest commutes in the Bay Area and are impacted by the heavy flow of traffic along the region's freeways, which often spills over onto the local surface streets as commuters pursue alternatives to their commute through the Tri-Valley. A key objective of the region is to reduce congestion on the region's freeways, and to increase mobility of goods and people through the Tri-Valley with continued financial investment in transportation infrastructure: developing alternative modes of transportation, modernization of transportation corridors, and creation, modernization, and expansion of rail systems. The TVC also seeks to partner on other significant non-transportation infrastructure projects, especially those with regional and multi-regional benefits.

Climate, Environment, and Health

The TVC seeks to work collaboratively with federal, state, and regional partners to address the new landscape of year-round wildfires, air quality, public safety power shutoffs, water quality (including PFAS/PFOS contaminants) and supply issues, as well as waste and recycling mandates. The TVC will advocate for increasing financial and technical support in these areas, as well as for investment in key infrastructure at all levels of government.

Public Safety
The TVC prides itself on providing the highest quality of life for its residents, businesses, workers, and visitors alike – a critical part of which is ensuring the basic right to safety, without fear of harm to oneself or one's property. As such, the coalition will advocate for reasonable public safety reforms, especially with regard to retail theft, burglary, and assault, all while maintaining a lens of equity.

Economic Development
The Tri-Valley region is an innovation hub that spurs job growth, sustains a healthy economy, and provides a high quality of life for residents and business. Key objectives are developing a healthy workforce; and supporting innovation, capacity building, economic stimulus, and growth in the region.

Affordable Housing and Homelessness
The TVC supports balanced solutions which consider housing, jobs, and transportation together and seeks to support, promote, protect, and increase affordability in the region's housing stock. Key objectives are to work with federal, state, and regional partners to provide funding for affordable housing through a variety of programs and options and to work to address barriers to building housing at Very Low, Low, and Moderate income levels. TVC also remains committed to mitigating and eliminating homelessness, including working with partners at all levels of government to address the root causes of housing insecurity and homelessness.

Mental Health
The TVC recognizes that social services are vital to supporting residents and providing crucial safety net services in our region. While the TVC cities do not provide direct delivery of social services, the Cities seek to work together to support local non-profits and organizations that do provide these services, and advocate together for these vital resources and services from all levels of government. Mental health support is a growing need in our region, and the TVC seeks to advocate for the resources to meet the needs of all our residents.

Fiscal Sustainability
Fiscal Sustainability is an important role for all levels of government. The TVC seeks to advocate against the imposition of unfunded mandates and the removal of funding streams from local governments.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION ADOPTING THE 2024 STATE AND FEDERAL LEGISLATIVE PLATFORM FOR THE CITY OF LIVERMORE

The proposed 2024 City of Livermore State and Federal Legislative Platform ("2024 Platform") will allow the City of Livermore ("City") to quickly respond in support of or in opposition to legislative issues by establishing positions that guide staff's response to legislative bills and their communications with legislators. This is especially important when responding to time-sensitive situations affecting the Livermore community.

The City Council first adopted a formal legislative platform in 2013, and it has adopted an update each year since then. In 2015, the City Council expanded the platform to also provide a guide for federal bill tracking and action.

The 2024 Platform proposes City positions in several legislative categories. The proposed positions and categories align with community priorities, values, and policy documents. The 2024 Platform also reflects adjustments based on evolving City needs, interests, and conditions at the regional, state, and federal levels.

The 2024 Platform legislative categories are:

1. Community-Focused Governance
2. Fiscal Stability
3. Affordable Housing and Homelessness
4. Planning and Sustainability
5. Building Safety
6. Infrastructure
7. Job Creation and Economic Development
8. Libraries
9. Public Safety and Emergency Management
10. Science, Technology, and Innovation
11. Transportation and Parking
12. Water

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby adopts the 2024 City of Livermore State and Federal Legislative Platform, attached hereto as Exhibit A.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024, by the following vote:

AYES: COUNCIL MEMBERS:
NOES: COUNCIL MEMBERS:
ABSENT: COUNCIL MEMBERS:
ABSTAIN: COUNCIL MEMBERS:

ATTEST:

Jason R. Alcala
City Attorney

Exhibit A – City of Livermore 2024 State and Federal Legislative Platform

City of Livermore
2024 State and Federal Legislative Platform

(DRAFT)

CITY OF
LIVERMORE
CALIFORNIA

The City of Livermore ("City") 2024 State and Federal Legislative Platform ("Platform") highlights the position of the City Council on important issues that align with community goals and policy documents such as the General Plan. City staff monitor bills introduced into the California Legislature and United States Congress. The Platform provides staff direction and allows the City, on the City Council's behalf, to respond quickly in support of or opposition to bills and other legislative or administrative actions in time-sensitive situations. The City Council delegates its authority to the mayor to sign support or opposition letters, consistent with the Platform. Additionally, the Platform enables staff to communicate on behalf of the City to state legislators and federal elected officials.

The Platform is developed through review of City needs and issues, staff input, and review of League of California Cities priorities and strategies. City Council adopted the first Platform in 2013. At its April 13, 2015, meeting, City Council directed staff to use the Platform as a guide for federal bill tracking and action, too. Typically, the City Council reviews and updates the Platform annually.

The 2024 City of Livermore Platform categories are:

- Community-Focused Governance
- Fiscal Stability
- Affordable Housing and Homelessness
- Planning and Sustainability
- Building Safety
- Infrastructure
- Job Creation and Economic Development
- Libraries
- Public Safety and Emergency Management
- Science, Technology, and Innovation
- Transportation and Parking
- Water

The State and Federal Legislative Platform evolves as City needs adjust, new issues arise, and conditions at the regional, state, and federal level change. Platform adjustments, whether due to federal policy changes or state policy reactions, may be considered at a future City Council meeting or at the next annual review in 2025.

Once approved by the City Council, the 2024. State and Federal Legislative Platform will be posted on the City's website at www.LivermoreCA.gov/Legislation. Staff also provides the City Council with periodic updates on letters sent, bill progress, and legislative developments.

When appropriate, the City of Livermore joins its Tri-Valley neighbors to advocate for issues and funding at the regional, state, and federal levels. The cities of Livermore, Dublin, Pleasanton, San Ramon, and the town of Danville develop a Tri-Valley Cities Legislative Framework. The Tri-Valley Framework overlaps many of the items in the City's Platform and provides another opportunity for advocacy progress and success.

The Tri-Valley Cities Legislative Framework is available to view at www.LivermoreCA.gov/Legislation.

Community-Focused Governance

The City values its ability to create policies that best fit the needs of the Livermore community. It is important to advocate for state legislation the provides framework guidance and allows local implementation.

1. **Support** legislation that enhances or streamlines local governance and allows cities to address the needs of local constituents within a framework of regional cooperation.

2. **Monitor** legislation that affects the ability of City Council to effectively govern.

3. **Monitor** cannabis-related legislation.

4. **Oppose** legislation that would prohibit or limit local governments' ability to contract out for services.

5. **Support** legislation that updates both the Brown Act and Public Records Act regarding electronic records and activities that support local decision-making without significant fiscal impact and new regulations that require staff resources.

6. **Oppose** legislation that requires or expands state involvement in City financial audits, fiscal monitoring, general oversight, or assistance by the State Treasurer, State Controller, or other state agencies.

7. **Support** a wording change in the Communications Act of 1934 that removes the distinction between "capital" and "operating" funds in order to provide more local control for community television stations in the use of their public, educational and government (PEG) channel fees with no rise in taxes or a reduction in revenue to the cable industry.

Fiscal Stability

Fiscal stability and financial independence are necessary to provide desired services and programs for residents and local businesses. City Council policy decisions direct staff to ensure the City's long-term financial stability. Unexpected diversion of local funds by the state or federal government erodes the ability of a city to plan and budget for short-and-long term service needs.

1. **Oppose** legislation that imposes unfunded or inadequate state or federal mandates.

2. **Support** legislation that updates the tax structure to enhance local government revenues that have declined due to the expansion of e-commerce, increased

consumption of services rather than durable goods, and innovations in technology.

3. **Oppose** legislation that reduces local government's ability to levy fees.

4. **Monitor** legislation regarding new fees or other revenue-enhancements.

5. **Oppose** legislation that reduces or eliminates payments to cities for use of property and rights-of-way for telecommunications.

6. **Support** legislation that provides sustainable and secure public pensions and other post-retirement benefits to ensure responsive and affordable public services.

7. **Support** legislation that streamlines the Workers' Compensation system.

8. **Oppose** legislation that would remove the federal tax exemption for municipal bonds.

Affordable Housing and Homelessness

The availability of a suitable living environment is essential to quality-of-life. It is important to support adequate and affordable housing opportunities and housing-related service needs.

1. **Support** regional solutions that balance housing, transportation/transit, and jobs together. Building housing without adequate transportation infrastructure may exacerbate, not alleviate, the affordable housing crisis.

2. **Support** legislation that protects existing affordable housing stock, including rental apartments, deed-restricted units, and mobile homes, and promotes affordable housing that includes long-term affordability agreements.

3. **Support** legislation that ensures incentives and density bonus provisions are directly linked to the level and percentage of affordable units provided for each project.

4. **Support** legislation that enables cities to develop locally appropriate plans that meet state objectives in a manner that is compatible with existing community character.

5. **Support** legislation that facilitates accessory dwelling units and encourages development of "missing-middle" housing that is compatible with suburban community character.

6. **Oppose** housing legislation that is not accompanied by funding that can support expanded transportation, transit, and infrastructure, including planning, and capital improvement programs and funding to support new school facilities.

7. **Oppose** housing legislation that results in a net loss of local funding.

8. **Support** housing legislation that promotes the development and enhancement of a diverse workforce, as long as the legislation does not create an unfunded mandate or conflict with local land use authority and financial stability.

9. **Oppose** housing legislation that unduly impacts local taxation capacity or diverts financial resources from essential local public services and infrastructure programs.

10. **Support** legislation that increases financial assistance to cities, non-profit organizations, and local partnerships to provide affordable, transitional, special needs, and emergency housing to the homeless, seniors, veterans, and people with special needs.

11. **Support** legislation that increases financial assistance to cities, non-profit organizations, and local partnerships to provide and promote self-empowerment for homeless individuals or families through counseling, job training, and other related services.

12. **Support** legislation that provides financial assistance, improved access to, and expansion of health care, mental health, and drug addiction services for low income and homeless individuals.

13. **Support** legislation that removes fair housing barriers and prevents displacement.

Planning and Sustainability

The City prioritizes comprehensive land use planning that creates complete neighborhoods, promotes a jobs/housing match, strengthens Livermore's economic and fiscal base, provides housing choice, promotes local control with public input, streamlines the permitting process, conserves wildlands, promotes environmental stewardship while reducing the City's environmental footprint, and generally improves the community's quality of life.

1. **Oppose** legislation that diminishes cities' decision-making authority over land use decisions, zoning, or permit process and timelines.

2. **Support** legislation preserving or enhancing the federal Community Development Block Grant (CDBG) program.

3. **Support** land use patterns that maintain safe neighborhoods, bolster economic prosperity, provide local jobs, preserve open space, protect the environment, and enhance overall quality of life.

4. **Oppose** state or federal efforts to further erode local government authority regarding the location or permit review of small cell wireless equipment, cellular towers, transmission sites, or other devices on public infrastructure or in the public right of way.

5. **Support** funding and incentives for smart growth and sustainable development.

6. **Support** CEQA-reform legislation that improves the cost-effective and timely delivery of projects and decreases the ability for spurious lawsuits.

7. **Support** RHNA- and APR-reform legislation that adequately provides necessary housing while reducing municipal administrative burden.

8. Support tax rebate programs, like the Williamson Act or Mills Act, to promote agriculture, open space preservation, historic preservation, and good design.

9. **Support** legislation or grant opportunities for cities that provide funding for developing or enhancing alternative vehicle fueling stations.

10. **Support** rebate programs, tax credits, and other financial incentives that encourage property owners to invest in energy efficiency and renewable energy systems, greenhouse gas-reducing technology, and alternative vehicle fueling stations in parking areas.

11. **Monitor** state and federal legislation related to climate adaptation.

12. **Support** measures that increase funding to local governments for landfill diversion programs such as food recovery, composting, and recycling.

13. **Support** Extended Producer Responsibility (EPR) legislation to encourage manufacturers to design environmentally friendly products by holding producers responsible for the costs of managing their products at end of life.

Building Safety

The City prioritizes protection of public health, safety and welfare by proper building design and construction practices.

1. **Support** legislation that increases the safety of buildings, reduces potential hazards and protects against fire and structure collapse.

2. **Support** legislation for seismic earthquake retrofits to protect individuals and structures.

3. **Support** legislation that contributes to the quality and durability of construction methods and materials

4. **Oppose** legislation to restrict number of inspections needed to verify safety of the built environment and other components.

5. **Support** measures to streamline photovoltaic and electrical vehicle charging permitting and installation.

6. **Support** legislation that contributes to the wellbeing of a community, preservation of life safety, and property maintenance.

7. **Support** legislation that promotes barrier removal and sustainable practices in the built environment.

8. **Oppose** legislation that establishes unrealistic timeliness for building project review that will potentially create an unsafe built environment.

Infrastructure

The condition of a city's infrastructure affects the community's quality-of-life. Sewer and water systems, sidewalks, and roads are subject to a wide number of regulations and must be maintained or replaced to ensure the health of the community.

1. **Support** state and federal legislation that would expand connectivity and access to digital resources.

2. **Oppose** legislation regarding infrastructure such as sidewalk repair that increases a city's unfunded infrastructure liability.

3. **Support** state and federal legislation that provides additional funding and/or preferred financing for local critical unmet infrastructure needs.

4. **Support** legislation that reduces or streamlines state and federal permitting requirements.

5. **Support** legislation that enhances the reliability of water transmission and storage through the Delta to the Tri-Valley.

6. **Support** legislation that provides new funding methods for flood control and stormwater management.

7. **Support** legislation that would acknowledge an adopted California Environmental Quality Act (CEQA) document can be substituted for a federal National Environmental Protection Agency (NEPA) document for infrastructure projects.

8. **Monitor** legislation that alters the state's agency permitting requirements and how they impact the timeliness and viability of natural resource projects planned by government agencies and special districts at the local and regional level including Fish and Game endowments.

Job Creation and Economic Development

The City encourages and supports business through strategic economic development initiatives. Fostering a strong business environment requires job creation, educational opportunities, and workforce development programs.

1. **Support** legislation that enhances or expands community and economic development tools and funding to address development and revitalization needs.

2. **Support** legislation or grants that focus on downtown development.

3. **Support** legislation that promotes and funds workforce development and re-training efforts focused on high-skilled jobs required by emerging industries.

4. **Support** legislation that encourages entrepreneurship, facilitates resource-sharing models, or otherwise reduces barriers to entry for small business.

5. **Support** legislation that provides insurance or loan guarantees for small business loans during recessionary periods.

6. **Support** legislation or grants that focus on walkable, transit oriented, and complete districts with access to jobs and services.

Libraries

The Livermore Public Library connects people with information and education, and inspires experiences that support lifelong learning, personal growth, and enhanced quality of life. With strong community support, the Library offers programs, materials, materials, and services most valued by residents.

1. **Support** legislation that increases financial assistance to cities to fund and promote local library programs and literacy services.

2. **Support** legislation that seeks to close the digital divide through funding local library efforts to provide broadband internet and technology through devices such as hotspots, computers, and tablets, for community members to access.

3. **Support** legislation and funding efforts relating to early literacy, school readiness, adult literacy, career development, vocational support, and assistance to vulnerable and under-served populations.

4. **Oppose** censorship and efforts to limit the public's intellectual freedom and access to information and resources.

5. **Support** the enhancement of inclusivity, efforts to offer open and unfettered access to information, the exchange of ideas, and the welcoming of all people to express themselves regardless of their politics or beliefs.

6. **Support** legislation that fosters growth during the transformation of libraries and library services in a dynamic and increasingly global digital information environment.

7. **Support** legislation that protects the privacy of patrons and their associated library records and data.

8. **Support** legislation that enhances equitable, diverse, and inclusive initiatives and opportunities.

Public Safety and Emergency Management

Effective public safety significantly enhances a community's quality-of-life. Maintaining a strong safety presence requires ongoing local, regional, state, and federal support.

1. **Support** legislation and grants that fund police and fire equipment upgrades, training, and capital improvements.

2. **Support** legislation that promotes and funds emergency management and recovery efforts.

3. **Support** legislation that maintains and increases grant funding for the Community Oriented Police Services (COPS) hiring program.

4. **Monitor** legislation pertaining to unmanned aircrafts (drones) and Federal Aviation Administration regulations.

5. **Support** legislation to increase penalty for prohibited persons in possession of firearms and use of firearms in the commission of a crime.

6. **Support** legislation that penalizes individuals who engage in drug and/or distracted driving activities.

7. **Support** legislative efforts to address the negative impacts of Proposition 47 (Reduced Penalties for Some Crimes, 2014) and Proposition 57 (Parole for Non-Violent Criminals and Juvenile Court Trial Requirements Initiative, 2016) and provide local law enforcement with tools to reduce criminal activity.

8. **Support** legislation that would provide funding and increase access to mental health care, response to mental health related calls for service, and drug/ alcohol treatment programs.

Science, Technology, and Innovation

As the only City in the United States with two national laboratories, science, technology, and innovation play an important role in the Livermore economy, workforce, and community values. Additionally, the City partnership with the labs and i-GATE fosters innovation, job creation, and economic development opportunities.

1. **Support** legislation that advances or encourages innovation, entrepreneurship, start-ups, small business opportunities, and/or workforce development.

2. **Support** legislation that encourages the expansion of STEM (Science, Technology, Engineering, and Mathematics) programs in K-12, higher education, libraries, and community-based organizations.

3. **Support** legislation that encourages and supports the transfer of technology from the national laboratories.

4. **Support** legislation that provides competitive grants, state partnerships, or other resources to encourage innovation and the science, technology, and innovation economies.

5. **Support** legislation that improves the abilities of the federal laboratories to update or expand their infrastructure.

Transportation and Parking

Regional and local transportation play a key role in a community's economic vitality and quality-of-life.

1. **Support** legislation that reduces congestion along Tri-Valley area freeways or reduces truck traffic along I-580 through roadway or rail improvements.

2. **Support** legislation that enhances the ability of local agencies to finance local transportation programs and facilities.

3. **Support** legislation that facilitates connectivity between major regional rail/transit systems.

4. **Support** legislation that provides incentives for rail and multimodal transit stations and transit-oriented development projects.

5. **Oppose** legislation mandating "one-size-fits-all" parking space requirements for future housing, entertainment, or retail developments or impinging on how parking spaces can be used.

6. **Support** legislation that provides incentives for shared public/private partnerships.

7. **Monitor** legislation that defines "high quality transit" for purposes of transit-oriented development as anything with service headways above hourly. Review on case-by-case basis to determine any impacts and/or benefits.

8. **Support** legislation to encourage the sale of unleaded fuel and assistance to pilots for Supplemental Type Certificate acquisition for non- American Society for Testing and Materials unleaded fuels at airports nationwide.

Water

Water, both quantity and quality, is essential to residential quality-of-life as well as agricultural and economic vitality and growth.

1. **Oppose** legislation that imposes a state tax or fee on customers of a public water system for drinking water.

2. **Monitor** legislation developing new water conveyance systems such as peripheral canals or tunnels (as mentioned in the proposed Bay Delta

Conservation Plan) to deliver adequate water to the Tri-Valley and the Silicon Valley.

3. **Support** legislation that expands the production and use of recycled water or increases local control of water supplies.

4. **Oppose** legislation that expands statewide mandatory water conservation and/or rationing unless the conservation measures are triggered in response to specific local water supply conditions.

5. **Support** legislation that allows direct and indirect potable water reuse.

6. **Oppose** legislation that allows the State Water Resources Control Board or Regional Water Quality Control Board to establish more stringent, clean water objectives unless the legislation provides a demonstrated water quality benefit as well as the means for jurisdictions to achieve the objectives.

7. **Support** regulations to protect drinking water from the impacts of hydrological fracturing (hydro-fracking) related to oil and gas exploration and extraction.

8. **Support** legislation and programs that make water, sewer, and/or storm services more affordable for customers.

LIVERMORE
CALIFORNIA

CITY COUNCIL STAFF REPORT **ITEM NO. 6.1**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Paul Spence, Assistant City Manager

SUBJECT: Hearing to consider the Housing Element Annual Progress Report, which tracks the City's progress towards implementing the Housing Element of the General Plan and meeting its Regional Housing Needs Allocation (RHNA), pursuant to Government Code Section 65400.

RECOMMENDED ACTION

Staff recommends the City Council adopt a resolution accepting the 2023 General Plan Housing Element Annual Progress Report.

SUMMARY

On March 13, 2023, the City Council adopted the updated 2023-2031 General Plan Housing Element, and it was certified by the California Housing and Community Development Department on March 24, 2023. The purpose of a Housing Element is to identify the current and projected housing needs for the City of Livermore and establish goals, policies, and programs to address those needs. The Annual Progress Report describes the City's progress completing the programs in the Housing Element and meeting its Regional Housing Needs Allocation (RHNA).

Overall permitting for residential development was lower in 2023 than previous years, likely reflecting ongoing supply chain constraints, increasing construction costs, higher mortgage rates during this period, and continued litigation preventing construction of approved projects. Residential permitting activity is likely to increase over the next few years with the construction of approved projects in the Isabel Neighborhood Specific Plan, Arroyo Vista Neighborhood Plan, and additional residential projects currently in the entitlement process.

In 2023, Livermore made progress towards its RHNA targets for the above moderate- and moderate-income categories but did not make contributions to its targets for low and very low-income categories. However, the City continues to make progress toward implementing housing programs and securing funding to increase housing opportunities for community members across the lower income levels.

Government Code Section 65400 requires the City to submit the Annual Progress Report to both the State Housing and Community Development Department and the Governor's Office of Planning and Research by April 1, 2024. Government Code Section 65400 also requires that City Council consider the report and allow public comment. If City Council accepts the report, staff will file it with the State prior to the April 1, 2024, deadline.

DISCUSSION

Background

In March 2010, the California Department of Housing and Community Development (HCD) adopted Housing Element regulations that specify for cities and counties how to complete annual reports on Housing Element progress. Since 2010, the State has passed extensive housing legislation due to concerns about the lack of housing production and housing affordability. Included in that legislation are expanded reporting requirements for Annual Progress Reports (APRs). APRs require local jurisdictions to report the following information:

- Building permits issued for housing units by income level to show progress meeting RHNA targets.
- Progress implementing Housing Element programs to maintain, improve, and develop housing opportunities for all income levels.
- Housing development applications submitted.
- Housing units receiving a planning entitlement.
- Housing units receiving a certificate of occupancy or other form of readiness (such as a final building permit inspection).
- Housing units proposed, approved, or constructed pursuant to the streamlining provisions in Senate Bill 6, Senate Bill 35 or Assembly Bill 2011.
- Housing units constructed, and lot splits approved pursuant to Senate Bill 9.
- Housing units constructed in conjunction with a commercial development bonus.
- Housing units rehabilitated, preserved, or acquired for alternative adequate sites.
- Above moderate-income units converted to moderate income units.
- List of locally owned lands included in the Housing Element Sites Inventory that have been sold, leased, or otherwise disposed of.
- List of sites identified as surplus publicly owned land.
- Student housing units approved for lower income students for which a density bonus was granted.
- Disclosure of local tenant preference policy, if established.
- Status of projects that received Local Early Action Planning (LEAP) funding.

In addition to being required by State law, compliance with the filing requirement is a criterion of eligibility for several regional and State grants. For example, the One Bay Area Grant (OBAG) competitive grant program administered by the Alameda County Transportation Commission using regional funds requires on-time filing of the APR (by April 1) for eligibility. In the past, the City has received other grants from HCD for first-time homebuyer assistance (Cal Home), affordable housing development (Local Housing Trust), and other park and public amenity projects predicated on timely submittal of the APR. Filing the APR will sustain the City's eligibility for these grant programs and others in the future.

City Council is required to review and accept the APR before staff files it with the State Housing and Community Development Department and the Governor's Office of Planning and Research by the April 1 deadline. The 2023 APR is included as Exhibit A to the Resolution and includes tables that show all the

required information listed above, consistent with State legislation.

2023-2031 Housing Element Update

To comply with State law, the City's General Plan Housing Element must be updated every eight years to ensure the City's policies and programs can accommodate estimated housing growth needs identified in the Association of Bay Area Government's (ABAG) Regional Housing Needs Allocation (RHNA). On March 13, 2023, the City Council adopted the 2023-2031 General Plan Housing Element to demonstrate its ability to accommodate housing needs in Livermore and it was certified by the California Housing and Community Development Department on March 24, 2023.

Regional Housing Needs Allocation

The RHNA refers to the fair share of regional housing that the City needs to accommodate during the Housing Element planning period. The City is not required to construct housing to meet the RHNA. Rather, Housing Element legislation requires cities to demonstrate the availability of land with zoning appropriate to accommodate future additional residential units. In addition to a residential land inventory, the Housing Element also includes programs to develop, preserve, and improve the housing stock.

The City's RHNA for the 2023-2031 Housing Element cycle is 4,570 dwelling units, distributed among four income categories (1,317 very low, 758 low, 696 moderate, and 1,799 above moderate). The affordable housing income limits that define above moderate, moderate, low and very low-income are established for each county and adopted annually by Council resolution (Attachment 1).

Consistent with the RHNA for most Bay Area cities, Livermore's overall housing need is greatest in the very low-income (29 percent of RHNA) and above moderate-income (39 percent of RHNA) categories of the RHNA. Livermore's RHNA also reflects a need for workforce and senior housing in the low- and moderate- income categories, which represents 17 percent and 15 percent of the RHNA, respectively.

Building Affordable Housing in Livermore

State Housing Element Law allows jurisdictions to use density as a proxy for affordability when demonstrating the availability of residentially zoned land for low-income RHNA categories; however, HCD issued guidance starting with the 2017 APR noting that affordability of built units may not rely on density and must be based on actual sales/rental prices. As such, higher density product types no longer qualify as affordable based on density alone.

The City's inclusionary housing ordinance requires new residential projects to include affordable units by contract (i.e., deed-restricted) with the City as follows:

- For-sale units: 15 percent of all for-sale housing units built in the City must be affordable to low and moderate-income households. Of the 15 percent, a minimum of 7.5 percent of the units must be for low-income households.

- Rental units: 15 percent of all rental housing units built in the City must be affordable to very low and low-income households. Of the 15 percent, a minimum of 7.5 percent of the units must be for very-low-income households.

- 10 percent of for-sale housing units built in the Downtown Specific Plan shall be affordable to low-income households.

- 20 percent of both for-sale and rental units built in the Isabel Neighborhood Specific Plan shall be affordable housing as follows:
    - For-sale units: The affordable housing units for for-sale residential developments must be sold to median- and moderate-income households. Of the total number of dwelling units (20 percent) set aside, at least five percent shall be reserved for sale to median-income households with the balance set aside for moderate-income households.
    - Rental units: The affordable housing units for rental residential developments must be designated or reserved for rental to very-low-income, and low-income, median-income, and moderate-income households. Of the total number of dwelling units (20 percent) set aside, at least six percent shall be reserved for rental to very-low-income households, at least seven percent shall be reserved for low-income households, and at least four percent shall be reserved for median-income households, with the balance set aside for moderate-income households.

- Inclusionary units are required to be the same quality as market rate units and evenly distributed throughout each residential project.

The City Council can approve alternative means of meeting the inclusionary housing requirements above (e.g., in-lieu fees, donation of land, etc.). The City uses in-lieu fees for the construction of affordable housing, such as the Vineyard 2.0 and Avance projects. Due to high sales and rental costs, all low and very low- income units produced in the city require a subsidy. The City does not have sufficient affordable housing funds to subsidize enough units to reach the RHNA goals in these categories. Therefore, the inclusionary housing requirement on market-rate development is critical to meeting the city's affordable housing targets.

State and local policies aside, attached unit types tend to cost less than single-family detached units and are more attainable to first-time homebuyers and other households with less ability to afford large down payments. Rental units and accessory dwelling units offer options for households that cannot afford to buy. These housing types are important for diversifying housing choices in Livermore.

2023 Housing Permit Activity

Attachment 2 includes summary tables from the Annual Progress Report showing housing permit activity in 2023. The City issued building permits for 70 units, which is lower than previous years. The reduced activity likely reflects the current market conditions, ongoing supply chain constraints, increasing construction costs, higher mortgage rates during this period, and continued litigation preventing construction of approved projects like Eden Housing and Garaventa Hills. Most of the permits issued in 2023 were for accessory dwelling units (approximately 70 percent). Multi-family units and single-family detached units were approximately 17 and 13 percent of the total, respectively.

Staff anticipates building permit activity to increase over the next several years due to construction of recently approved projects in the Arroyo Vista Neighborhood Plan and Isabel Neighborhood Specific Plan, which allows for over 435 and 4,000 new residential units at build-out, respectively. Grading activities commenced for two of the approved projects in the Isabel Neighborhood Specific Plan in 2023, with the projects yielding over 400 units upon completion. In addition, several new development

applications submitted in 2023 are currently under entitlement review and collectively propose over 1,800 new housing units at a range of densities and affordability levels.

Progress Meeting RHNA for the 2023-2031 Cycle

Table B of the Annual Progress Report (Attachment 3) shows the City's progress meeting its RHNA numbers in 2023, which is the first year of the planning period for the sixth RHNA cycle. RHNA progress is determined through building permits issued by income level. The City made progress towards its RHNA targets for the above moderate and moderate-income categories. The City did not permit any residential units for the low and very low-income categories during 2023 and, therefore, did not contribute to RHNA targets in those categories.

Progress Implementing Housing Programs

In addition to planning for and entitling housing at a range of densities and affordability levels, the City implements a variety of housing programs to address affordability challenges in Livermore. Table D of the Annual Progress Report lists the goals, policies, and programs in the Housing Element and the status towards implementing and completing these programs. Many of the Housing Element programs outlined in Table D are ongoing as the updated Housing Element was adopted in early 2023. Below are accomplishments in 2023 that highlight implementation of the City’s 2023-2031 Housing Element.

- The City continued to make progress on the General Plan Update, including a comprehensive evaluation and community engagement campaign around the land use alternatives previously approved by the City Council. City staff presented to, and met with, over 1,100 people from October to December 2023 to evaluate and compare the alternatives. The feedback received from these efforts will inform the selection of a Preferred Land Use Scenario for further study.

- The City initiated the first phase of a comprehensive Development Code Update, last updated in 2010. The comprehensive Development Code Update will incorporate amendments to respond to new state housing laws and create objective design standards to streamline design review and facilitate development for a variety of housing types, densities, and income levels.

- In December 2023, construction was completed for the Vineyard 2.0. The project provides 24 units, including 23 supportive housing units for extremely low, very low-income, and formerly homeless households. In addition, the project offers approximately 10,000 square feet of commercial space for a resource center serving persons who are homeless and a commercial food kitchen benefiting food insecure people in Livermore.

- In 2023, the City executed Low Income Housing Agreements with developers of three new residential for-sale projects, securing 92 affordable units for low and moderate-income buyers in the future.

- The City provided grants and supported programs that expand the supply of housing units for individuals with disabilities through partnerships with MidPen, Tri-Valley REACH, and various community non-profit organizations. In May 2023, MidPen welcomed new residents at the official opening for Avance, consisting of 43 affordable units of services-enriched housing for persons with developmental disabilities.

- With grant funds awarded to the City from the State of California's Family Homelessness Challenge Grant program, two homeless or at-risk of homelessness families in the Livermore Unified School District have been placed in units and are receiving Intensive Case Management Services.

CEQA DETERMINATION

Accepting the 2023 Annual Progress Report is not a project as defined by the California Environmental Quality Action (CEQA) Guidelines Section 15378 because it will not cause a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment.

FISCAL AND ADMINISTRATIVE IMPACTS

There are no direct fiscal impacts resulting from preparation of the 2023 Annual Progress Report. City Council acceptance of the report and staff submittal of the report to the State will retain the City's eligibility for competitive grant funding for transportation projects and other grants that may be available from HCD in 2024.

COMMUNITY PILLAR

1: A Safe Community that Thrives

GOAL CATEGORY

7: Expand and preserve the supply of affordable housing opportunities

Effective January 8, 2024

NOTES: These limits are based on income data from the California Department of Housing and Community Development (HCD) for 2023. The Affordable Sales Prices are effective for the 2024 Affordable Homeownership Program year and thereafter until updated by City Council. The 2023 Area Median Income for a 4-person household of $147,900 published by State HCD is derived from the U.S. Department of Housing and Urban Development for Alameda County (Oakland-Fremont Metro Region) for the Section 8 Program.

(*) Low Income Housing Tax Credit (LIHTC) Household size

Sales Prices: assume a 6.75% interest rate, 30-year mortgage, and housing payments (PITI) which do not exceed 30% of the household's monthly income.

The Rental Housing limits are effective upon adoption by City Council and thereafter until updated by City Council. Rental affordability based on 30% of the household's monthly income and do not include tenant utility allowances. Utility allowances should be deducted from the maximum rents based on the Livermore Housing Authority's utility allowance schedule for the Section 8 Program.

*Extremely low-income houisng need determined pursuant to Government Code 65583(a)(1). Value in Section 5 is default value, assumed to be half of the very low-income RHNA. May be overwritten.

Note: units serving extremely low-income households are included in the very low-income RHNA progress and must be reported as very low-income units in section 7 of Table A2. They must also be reported in the extremely low-income category (section 13) in Table A2 to be counted as progress toward meeting the extremely low-income housing need determined pursuant to Government Code 65583(a)(1).

Please note: For the last year of the 5th cycle, Table B will only include units that were permitted during the portion of the year that was in the 5th cycle. For the first year of the 6th cycle, Table B will only include units that were permitted since the start of the planning period. Projection Period units are in a separate column.

Please note: The APR form can only display data for one planning period. To view progress for a different planning period, you may login to HCD's online APR system, or contact HCD staff at apr@hcd.ca.gov.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION ACCEPTING THE 2023 GENERAL PLAN HOUSING ELEMENT ANNUAL PROGRESS REPORT

The California Department of Housing and Community Development's ("HCD") Housing Element regulations require cities and counties to complete annual reports on housing element progress pursuant to Government Code Section 65400.

Housing Element Annual Progress Reports must include the following information: (1) annual building permits issued by income level to show progress meeting Regional Housing Need Allocation ("RHNA") targets; (2) progress implementing Housing Element programs to maintain, improve, and develop housing opportunities for all income levels; (3) annual housing development applications submitted; (4) annual housing units receiving a planning entitlement; (5) annual housing units receiving a certificate of occupancy or other form of readiness; (6) annual housing units proposed, approved, or constructed pursuant to Senate Bill 6, Senate Bill B 35, or Assembly Bill 2011; (7) housing units constructed and lot splits approved pursuant to Senate Bill 9; (8) housing units constructed in conjunction with a commercial development bonus; (9) housing units rehabilitated, preserved, or acquired for alternative adequate sites; (10) above moderate-income units converted to moderate income units; (11) list of locally owned lands included in the Housing Element sites inventory that have been sold, leased, or otherwise disposed of; (12) list of sites identified as surplus publicly owned land; (13) student housing units approved for lower income students for which a density bonus was granted; (14) disclosure of local tenant preference policy, if established; and (15) status of projects that received Local Early Action Planning funding.

In addition to being required by State law, the City of Livermore ("City") must file Annual Progress Reports to maintain eligibility for regional and State grants. On-time filing of these reports ensures eligibility for competitive grant programs, such as the One Bay Area Grant competitive grant program administered by the Alameda County Transportation Commission. In the past, the City has received other grants from HCD for first-time homebuyer assistance such as Cal Home and the Local Housing Trust, as well as other park and public amenity projects predicated on timely submittal of the Annual Progress Report.

Accepting the 2023 Annual Progress Report is not a project as defined by the California Environmental Quality Action Guidelines Section 15378 because it will not cause a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment.

On March 25, 2024, the City Council held a duly noticed public hearing to consider the 2023 Housing Element Annual Progress Report, staff recommendations, and all public comments and testimony.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore, that it hereby accepts the 2023 Housing Element Annual Progress Report, attached hereto as Exhibit A.

BE IT FURTHER RESOLVED by the City Council of the City of Livermore that it hereby directs staff to file the Annual Progress Report with California Department of Housing and Community Development and the Governor's Office of Planning and Research by April 1, 2024, per Government Code Section 65400.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024, by the following vote:

AYES: COUNCIL MEMBERS:
NOES: COUNCIL MEMBERS:
ABSENT: COUNCIL MEMBERS:
ABSTAIN: COUNCIL MEMBERS:

Progress toward extremely low-income housing need, as determined pursuant to Government Code 65583(a)(1).

		5		2									6	7
		Extremely low-Income Need		**2023**	**2024**	**2025**	**2026**	**2027**	**2028**	**2029**	**2030**	**2031**	**Total Units to Date**	**Total Units Remaining**
Extremely Low-Income Units*		659		-	-	-	-	-	-	-	-	-	-	659

*Extremely low-income houisng need determined pursuant to Government Code 65583(a)(1). Value in Section 5 is default value, assumed to be half of the very low-income RHNA. May be overwritten.

Note: units serving extremely low-income households are included in the very low-income RHNA progress and must be reported as very low-income units in section 7 of Table A2. They must also be reported in the extremely low-income category (section 13) in Table A2 to be counted as progress toward meeting the extremely low-income housing need determined pursuant to Government Code 65583(a)(1).

Please note: For the last year of the 5th cycle, Table B will only include units that were permitted during the portion of the year that was in the 5th cycle. For the first year of the 6th cycle, Table B will only include units that were permitted since the start of the planning period. Projection Period units are in a separate column.

Please note: The APR form can only display data for one planning period. To view progress for a different planning period, you may login to HCD's online APR system, or contact HCD staff at apr@hcd.ca.gov.

Housing Programs Progress Report
Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.

1 Name of Program	2 Objective	3 Timeframe in H.E	4 Status of Program Implementation
Program 1.1.1: Residential Sites Inventory A) If a site included in the residential sites inventory is developed with nonresidential uses or with fewer units than identified, verify that the sites inventory maintains sufficient capacity to meet the City's RHNA. If it does not, identify additional sites/units to satisfy the RHNA, that will prevent displacement in low resource areas or facilitate access to moderate and high resource areas. This is an ongoing program that the City has already been implementing.	Maintain adequate sites to meet the City's RHNA	When development of Housing Element sites occurs	Complete. In 2023, the City did not develop any residential sites with non-residential units or with fewer units than required by the zoning designation.
Program 1.1.1: Residential Sites Inventory B) Maintain an online map on the City's website of vacant residential acreage to assist developers with identifying land suitable for residential development throughout the city. The map could indicate current zoning and public facilities and services to these sites. The map could also include land suitable for affordable development, based on the allowed density, in moderate and high resource areas to facilitate new opportunities and expanded housing mobility opportunities.	Assist at least 3 interested developers annually to identify suitable land for residential development.	Create map at the time of new Housing Element adoption. Update annually thereafter throughout the planning period.	Complete. Residential site inventory maps were created as part of the Housing Element Update for the 2023-2031 cycle, adopted by City Council on March 13, 2023. To assist developers, the Housing Element and the site inventory maps identify vacant and underutilized sites in the Downtown Specific Plan Area, Arroyo Vista Neighborhood Plan, and Isabel Neighborhood Specific Plan, as well as sites in other areas of the city outside of specific plan areas.
Program 1.1.1: Residential Sites Inventory C) Proactively identify areas to meet future RHNA allocations as part of the comprehensive General Plan Update.	Ensure General Plan and zoning consistency to accommodate development of 1,317 very low-, 758 low-, 696 moderate- and 1,799 above moderate-income housing units.	By 2025 with the adoption of the General Plan Update	Ongoing. The City is preparing a comprehensive General Plan Update that has identified several Focus Areas where land use changes could occur, including those areas that can accommodate development (or redevelopment) of residential uses to help meet RNHA allocations.
Program 1.1.1: Residential Sites Inventory D) Following future amendments to the General Plan's Safety Element, ensure consistency with the Housing Element, including the sites inventory.	n/a	As needed	Ongoing. The Safety Element was updated in 2018 to include a new goal, objectives and policies relating to and supporting the Tri-Valley Hazard Mitigation Plan, which will be approved by City Council in spring 2024. The goal, objectives and policies address natural hazard mitigation and protecting people, property and the environmental from natural hazards. In 2023, the City continued its comprehensive General Plan Update which will include updates to the Safety Element. All updates will be reviewed for consistency with the adopted Housing Element.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.2.1: General Plan and Specific Plans A) Continue to update and amend the General Plan as needed and appropriate to provide a range of housing types (including missing middle housing), densities, and affordability levels.	n/a	As projects are proposed; reviewed annually	Ongoing. The City is preparing a comprehensive General Plan Update that will update policies and programs to streamline and facilitate housing development for a variety of housing types, densities, and income levels. In 2023, the City studied a variety land use alternatives within identified focus areas that could support residential land use designations in a range of densities.
Program 1.2.1: General Plan and Specific Plans B) Continue to update and amend the Downtown Specific Plan as needed and appropriate to facilitate downtown revitalization, the provision of affordable housing, and mixed-use development to facilitate income integration, housing mobility opportunities and access to transit, resources, and amenities**.**	Approve or maintain the potential for 37 moderate and 141 lower-income housing units in the DSP area.	As projects are proposed; reviewed annually	Ongoing. Downtown Specific Plan amendments to facilitate the redevelopment plan were adopted City Council in 2020. The City Council approved the entitlements for the affordable workforce housing in 2021. In 2023, the Legacy apartment project began leasing its units, which inlcude a total of 222 moderate to above moderate units across two buildings. In addition, the City continued efforts to move the approved Eden Afforable housing project through litigation in 2023. The Eden Housing project would provide 130 affordable units Downtown.
Program 1.2.1: General Plan and Specific Plans C) Continue to update and amend the Isabel Neighborhood Specific Plan as needed and appropriate to facilitate a complete, income-integrated, transit- oriented community that promotes housing mobility opportunities.	Approve or maintain the potential for 1,570 lower-income and 1,753 above moderate-income units in the INSP area.	As projects are proposed; reviewed annually	Ongoing. City Council adopted the Isabel Neighborhood Specific Plan in 2020. The City approved entitlements for 172 units in the INSP in 2023, and accepted applications for an additional three projects that are proposing a collective total of over 1,600 residential units.
Program 1.2.1: General Plan and Specific Plans D) Continue area planning efforts for the Southfront Priority Development Area (PDA) surrounding the future Southfront Valley Link station. Revise the General Plan designations and zoning accordingly to allow for mixed-income residential transit-oriented development.	Up to 7,500 housing units to facilitate income integration and housing mobility opportunities.	This area is a Focus Area in the General Plan Update, which will be completed by 2025. Complete any subsequent planning efforts by 2030.	Ongoing. As part of the comprehensive General Plan Update, this area has been renamed and is referred to as the Midtown Focus Area. In 2023, the City made progress on the preparing a land use alternative scenario for this area which has the highest concentration of housing and mix of housing types and densities of the General Plan Focus Areas.
Program 1.3.1: Development Code Amendments A) Continue to facilitate development of Accessory Dwelling Units (ADUs) by maintaining standards that are consistent with State law. This includes allowing ADUs in all zoning districts where single-family and multifamily residential dwellings are allowed and creating a resource center on the City's website that connects community members to materials and programs like the CalHFA ADU grant program.	325 ADUs during the 6th Cycle Projection Period; encouraging at least half of these to be in neighborhoods dominated by single- family development to promote housing mobility opportunities.	The City will begin a comprehensive Development Code Update in January 2023. Year one of the three-year program includes updates for consistency with State legislation. The City will update the ADU ordinance by December 2023, then every two years as needed to comply with current state law.	Ongoing. The City waives certain development fees for ADUs consistent with State ADU law. In 2023, the City issued new building permits for 49 ADUs and issued 44 certificates of occupancy (completed) ADUs; the majority of which are located within existing single family neighborhoods.

Table D

Program Implementation Status pursuant to GC Section 65583

Housing Programs Progress Report

Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.

1	2	3	4
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.3.1: Development Code Amendments B) Monitor ADU construction and affordability levels to determine whether the rate is on track to meet target numbers anticipated in this Housing Element. Implement additional actions, such as additional outreach, resources, or incentives, if targets are not met. See Program 1.4.1.D.	58 ADU building permits between June 30th, 2022, and the end of 2024, with at least 30 in predominantly single-family neighborhoods.	Annually, starting in January 2024 as part of the 2023 Housing Annual Progress Report	Ongoing. The City waives certain development fees for ADUs consistent with State ADU law. In 2023, the City issued new building permits for 49 ADUs and issued 44 certificates of occupancy (completed) ADUs; the majority of which are located within existing single family neighborhoods.
Program 1.3.1: Development Code Amendments C) Continue to allow mobile and manufactured homes that meet State and City codes, as well as the City's design review requirements, in all residential districts.	40 new mobile or manufactured homes over the next 8 years, encouraging at least 15 in high resource areas.	Ongoing as the City assists applicants at the Permit Center	Ongoing. The City issues permits for several manufactured units each year, typically for Accessory Dwelling Units.
Program 1.3.1: Development Code Amendments D) Establish standards for smaller unit types, such as tiny homes and single room occupancies to meet the housing needs of lower-income households and other populations at risk of displacement.	20 small unit types over the next 8 years, encouraging at least 10 in high resource and single-family housing dominated areas, to prevent displacement and facilitate housing mobility opportunities.	By December 2024 as part of the comprehensive Development Code Update.	Ongoing. The City began a comprehensive Development Code Update in 2023 which will consider additional policies for expanding opportunities for these housing types as code amendments and new objective design standards are drafted. The Development Code Update is expected to be completed in phases, with the first phase addressing amendments necessary to comply with new state housing laws by December 2024. The remainder of the comprehensive Development Code Update, including objective design standards, is anticipated to be completed by summer 2026.
Program 1.3.1: Development Code Amendments E) Establish standards consistent with Senate Bill 9 to allow ministerial two-unit residential developments and lot splits in single-family zones. The City currently allows development of residential units and lot splits in compliance with Senate Bill 9. The City will encourage homeowners on large lots in predominantly single-family neighborhoods to consider SB 9 as an opportunity to introduce middle-density housing and the associated benefits.	10 units through SB 9 infill development, encouraging construction in large- lot, single-family neighborhoods to promote housing mobility opportunities through increased density.	By December 2023 as part of the comprehensive Development Code Update; Provide informational materials on the City's website on the SB 9 process within 2 months of establishing standards	In progress. The City began a comprehensive Development Code Update in 2023, and has prepared draft code amendments to respond to all updates to State housing laws, including SB 9. In addition, the City established an informational handout to accompany the general application for applicants applying for development and/or lot splits pursuant to SB 9. This informational handout is posted to the City's website and updated as needed in response to changing State law. The Development Code Update is expected to be completed in phases, with the first phase addressing amendments necessary to comply with new state housing laws by December 2024. The remainder of the comprehensive Development Code Update, including objective design standards, is anticipated to be completed by summer 2026.
Program 1.3.1: Development Code Amendments F) Establish Objective Design Standards to facilitate streamlined project permitting.	n/a	By December 2023 as part of the comprehensive Development Code Update	In progress. The City began preparation of a comprehensive Development Code Update in 2023, which will establish objective design standards to streamline project permitting. The Development Code Update is expected to be completed in phases, with the first phase addressing amendments necessary to comply with new state housing laws by December 2024. The remainder of the comprehensive Development Code Update, including objective design standards, is anticipated to be completed by summer 2026.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.3.1: Development Code Amendments G) Remove barriers to residential development of small properties. The specifics of these changes will be discussed when the Development Code Update gets underway in 2023 but could include adjustments to fees and requirements for setbacks, open space, parking, etc. As part of this work, the City will consider a more streamlined review process for smaller projects (see Program 1.4.1).	n/a	By December 2023 as part of the comprehensive Development Code Update	In progress. The City continues to explore options to remove barriers to the development of small properties as part of the General Plan and Development Code Updates in progress.
Program 1.4.1: Reduce Governmental Constraints A) Identify opportunities to streamline permitting processes, including ministerial approvals and electronic application submittals and review. See also Program 1.3.1.G. The City is currently BETA testing electronic submittal in its Accela software permit tracking system with plans to accept electronic submittals. The new electronic public portal should be ready for electronic submittal of all projects in early 2023.	n/a	Electronic submittal system should be operational by early 2023. Additional opportunities for ministerial approval will be completed by December 2024 as part of the Development Code Update. See also Program 1.3.1.G.	In progress. The City began a comprehensive Development Code Update in 2023, and will establish pathways for ministerial approvals. Also in 2023, the City began testing and training staff on DigEplan software for electronic submittal of applications, which will facilitate digital project intake and further streamline the review process.
Program 1.4.1: Reduce Governmental Constraints B) Establish standards to specify SB 35 and SB 330 streamlining approval processes and standards for eligible projects to promote provision of affordable housing.	n/a	By December 2023 as part of the comprehensive Development Code Update.	In progress. The City began a comprehensive Development Code Update in 2023, which includes amendments to codify all updates to State housing laws, including SB 35 and SB 330, as well as develop local procedures for their implementation. Informational handouts will be developed to accompany these applications. In addition, the City's website includes a dedicated page called, "How to Submit an Application" with application materials and detailed instructions, including SB 35 and SB330).

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.4.1: Reduce Governmental Constraints C) Monitor development fees to ensure they are reasonable and do not unduly constrain development while protecting the quality, health, and public safety of the community. Analyze the design review fee and all other fees required for multifamily development and reduce them if found to be a constraint. This would include adjusting fees for smaller unit types like ADUs/JADUs, tiny homes, and other missing middle housing. The analysis process will include meeting with multifamily developers/applicants to get their input regarding constraints associated with fees.	n/a	Following completion of the General Plan Update and year two of the Livermore Development Code Update in December 2024, the Community Development Department will engage the community and stakeholders and conduct a comprehensive development impact and entitlement fee update by September 2025. Specific steps for the first analysis and update during the planning period are outlined below. As part of this process, the City will examine development fees as they relate to housing to ensure they are not a barrier to new housing. • The General Plan update process explores and evaluates different land use patterns and types. • The land use evaluation will identify necessary infrastructure needs: transportation improvements, water, sewer, stormwater, parks, schools, and library services, etc. • As part of General Plan implementation, the City will identify total costs to construct new and upgrade existing systems. • Following adoption, the City will conduct fee studies to determine new infrastructure costs per land uses type necessary to cover costs over the 20-year time horizon of the General Plan, 2045. Timeline: • Meet with developers/applicants by December 2024. • Complete analysis of the design review fee and other multifamily fees by June 2025. The analysis will include a nexus study conducted by an outside consultant. • City Council review and adoption by September 2025. This timeline makes sense for Livermore because the City is comprehensively updating its General Plan, which is anticipated to be adopted in 2024/2025. Subsequently, the City will do the analysis and development fee update described above to reflect the new General Plan land use map and corresponding infrastructure needs.	Ongoing. The City continues to use various practices to offset potential negative effects of development impact fees on housing development and cost. The City updated its development fees in 2023 to reflect cost of living changes, in accordance with local ordinance. In addition, the City has begun a comprehensive General Plan and Development Code Update that explores the different land use scenarios and will evaluate infrastructure needs to facilitate further economic analysis.
Program 1.4.1: Reduce Governmental Constraints D) Continue to encourage the development of accessory dwelling units by waiving certain development impact fees. Promote the availability of these incentives in high resource areas to expand housing mobility opportunities for lower-income households**.**	Promote the development of 325 ADUs over the planning period, targeting at least 10 percent of those in high resource areas. (See Program 1.3.1.A)	Ongoing; add information on incentives to the City's website by December 2023, updating as needed, and mailing information to homeowners in high resource areas in January 2024 and every other year thereafter.	Ongoing. The City waives certain development fees for ADUs consistent with State ADU law. In 2023, the City issued new building permits for 49 ADUs and issued 44 certificates of occupancy (completed) ADUs.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.4.1: Reduce Governmental Constraints E) Create user-friendly, accessible, and multi-lingual information guides about standards and review processes for residential projects (ADUs, SB 9 projects, SB 35 and SB 330 streamlining, etc.) to improve housing mobility. Make this information available on the City's website, at the Permit Center, and in local gathering places in areas of need such as the Rincon Branch library.	n/a	Make guides available on the City's website by December 2023. Update on an ongoing basis as needed.	Ongoing. Informational handouts for streamlining ADUs and SB9 are available on the City's website to help assist applicants during the application process. The City is developing additional informational guidance for SB 35 and SB 330 and will continue to update the materials as necessary to comply with State housing laws. In addition, the City's website includes a dedicated page called, "How to Submit an Application" with application materials and detailed instructions, including SB 35 and SB330).
Program 1.4.1: Reduce Governmental Constraints F) Improve internal systems for collecting, tracking, and analyzing housing project data to better understand housing development trends in Livermore and streamline annual State reporting requirements.	n/a	By December 2024	Ongoing. The City continues to use Accela permit tracking software to record and monitor development applications. In addition, in 2023, the City also began testing a new software platform, DigEplan, to streamline document management and facilaite digital review of development applications.
Program 1.5.1: Universal Design A) Update the City's residential design guidelines and standards to encourage "visitability" and universal design features in new homes and accessory dwelling units.	10 universal design housing units to facilitate accessibility for persons with disabilities and seniors; encouraging at least 5 of these units to be located near transit stations and services.	Update the City's Design Standards and Guidelines after completion of the General Plan Update and Development Code Update in December 2025.	Ongoing. The City intends to update the residential design guidelines and standards as part of the comprehensive Development Code update.
Program 1.5.1: Universal Design B) Expand consumer awareness by providing information on universal design features at the City's Permit Center and develop resource information for the City's Permit Center website.	n/a	Make information available on the City's website by December 2024.	Ongoing. The City has not yet developed Livermore-specific resources on universal design features, but provides information and guidance upon request at the Permit Center.
Program 1.5.1: Universal Design C) Continue to implement Building Code accessibility requirements that apply to projects that incorporate universal design features to promote integrated housing accessible to seniors and persons with disabilities.	See Program 1.5.1A	Ongoing as the City assists applicants at the Permit Center and through plan checks.	Ongoing. The City has not yet developed Livermore-specific resources on universal design features, but provides information and guidance upon request at the Permit Center.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.5.2: Licensed Community Residential Care Facilities A) Consistent with State law, continue to allow Residential Care Facilities serving 6 or fewer persons in all residential districts as a means of providing housing for special needs groups. Update the Development Code to allow this size of facility in additional zoning districts where required by State law.	n/a	By December 2023 as part of the comprehensive Development Code Update.	Ongoing. The Livermore Development Code continues to allow licensed community residential care facilities in the residential zoning districts.
Program 1.5.2: Licensed Community Residential Care Facilities B) To affirmatively promote more inclusive communities, the City will update the Development Code requirements for Residential Care Facilities serving 7 or more persons to permit them as a residential use subject to the same standards that apply to other residential uses of the same type in the same zone.	n/a	By December 2023 as part of the comprehensive Development Code Update.	In progress. The City intends to update the requirements for Residential Care Facilities upon completion of the comprehensive Development Code Update.
Program 1.5.3: Special Housing Needs A) Work with housing providers to ensure that special housing needs are addressed to reduce displacement risk for large families, female-headed households, college students, and single-parent households with children, through a combination of regulatory incentives, zoning standards, affordable housing programs described in Goal 3, rehabilitation and neighborhood improvement efforts described in Goal 4, and supportive services programs. The City will also continue to encourage the production of units with three or more bedrooms for large families in moderate- and high-resource areas to facilitate housing mobility opportunities for lower- income households and households with special needs.	Support the creation or rehabilitation of at least 100 units of housing for people and families with special housing needs over the planning period through development agreements with Eden Housing and the Livermore Housing Authority to develop projects such as Downtown Livermore Apartments.	Ongoing and evaluate opportunities annually including meeting with housing providers.	Ongoing. In FY 2022-2023, the City has supported programs that expand the supply of housing units for families with special needs through partnerships with Eden Housing and Livermore Housing Authority on projects such as Downtown Livermore Apartments. The Downtown Livermore Apartments is currently in the financing stage. The City has also provided anti-displacement support through partnerships with Centro Legal for eviction moratorium trainings, and workshops. The City has partnered with ECHO Housing to provide fair housing and tenant protection services to Livermore residents.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.5.3: Special Housing Needs B) Work with housing providers to ensure that special housing needs are addressed to reduce displacement risk for persons with physical, behavioral, and developmental disabilities through a combination of regulatory incentives, zoning standards, affordable housing programs described in Goal 3, rehabilitation and neighborhood improvement efforts described in Goal 4, and supportive services programs. The City will also continue to encourage the production of units with special adaptations for people with disabilities, per California Title 24 standards.	Support the creation or rehabilitation of at least 20 units of permanent supportive housing for people with disabilities over the planning period on sites throughout the City by providing funding.	Ongoing and evaluate opportunities annually including meeting with housing providers.	Ongoing. In FY 2022-2023, the City has provided grants and supported programs that expand the supply of housing units for individuals with disabilities through partnerships with MidPen, Tri-Valley REACH, and various community non-profit organizations. In May 2023, MidPen welcomed new residents at the official opening for Avance, 43-units of affordable, services-enriched housing for persons with developmental disabilities. The City also assisted Tri-Valley REACH with the acquisition and expansion of a four bedroom home, and the rehabilitation of a 6-bedroom group home for extremely low-income persons with developmental disabilities.
Program 1.5.3: Special Housing Needs C) Work with housing providers to ensure that special housing needs are addressed to reduce displacement risk for seniors through regulatory incentives, zoning standards, affordable housing programs described in Goal 3, rehabilitation and neighborhood improvement efforts described in Goal 4, and supportive services programs. The City will also continue to encourage the production of senior housing, including assisted living facilities and application of universal design standards in new housing units.	Support the creation or rehabilitation of at least 100 units of housing for seniors over the planning period through development agreements with Satellite Affordable Housing Associates and Interfaith Housing for projects such as Pacific Avenue Senior Apartments.	Ongoing and evaluate opportunities annually.	In FY 2022-2023, the City continuously supported grants and programs that expand the supply of housing units for seniors, such as the Senior Support Program of the Tri-Valley and Community Resources for Independent Living (CRIL), and encourage seniors and disabled persons to age in place and to facilitate independent living. The Pacific Avenue Senior Apartments project, which will provide 140 units for seniors, secured additional capital and operating resources in preparation for a tax credit financing application in 2024. The project will set aside 24 units for seniors experiencing homelessness who need mental health services, as well as funding supportive services to help residents stabilize and age in place.
Program 1.5.3: Special Housing Needs D) Support “aging in place” through community design, partnering with organizations that provide support services, and encouraging accessibility improvements to rental housing.	Support the creation of at least 15 accessible rental units through production of new units that meet ADA guidelines or modification of existing units that do not currently meet ADA guidelines.	Ongoing and evaluate opportunities annually.	Ongoing. The City continuously seeks partnerships with non profit services agencies to identify opportunities to make housing units for seniors and persons with disabilities more accessible such as the Senior Support Program of the Tri-Valley and Community Resources for Independent Living (CRIL), and encourage seniors and disabled persons to age in place and to facilitate independent living.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.5.3: Special Housing Needs E) Work with housing providers to ensure that special housing needs are addressed to reduce displacement risk for extremely low-income unhoused individuals and families through a combination of regulatory incentives, zoning standards, affordable housing production and preservation programs described in Goal 3, and supportive services programs. The City will also continue to encourage the production of smaller units to address the shortage of affordable units for single adults experiencing homelessness, including single-room occupancy units in areas accessible to support services and transit opportunities.	See Program 1.3.1. D Support the creation of at least 30 new units of permanent supportive housing for people experiencing homelessness over the planning period through funding agreements with developers like Housing Consortium of the East Bay for projects such as Vineyard 2.0 and supportive shared housing expansion.	Ongoing and evaluate opportunities annually.	Ongoing. In December 2023, the Vineyard project opened its doors to 24 extremely and very low-income, formerly homeless households in need of permanent supportive housing. The project also offers a food pantry, and a homeless shelter that will operate 7 days a week in winter conditions. The homeless Shelter will be staffed with the Housing Navigator, which will assist people at risk or experiencing homelessness. The units are a combination of studios and one-bedroom units.
Program 1.5.3: Special Housing Needs F) Increase the supply of housing affordable to farmworkers, many of whom are lower income. Review the Development Code for compliance with the state Employee Housing Act (Health & Safety Code Sections 17021.5, 17021.6, and 17021.8). If needed to comply with the Act, make amendments to allow housing for 6 persons or less in residential zones in the same way residential structures are allowed (Section 17021.5). Also, if needed, allow for employee housing of no more than 12 units or 36 beds as an agricultural use, and permit in the same manner as other agricultural uses in the same zone (Section 17021.6). Finally, make amendments if needed to address the requirements of Section 17021.8 which requires ministerial approval of certain farmworker housing projects that meet the criteria in that section.	Facilitate construction of farmworker housing through development code amendments (see Program 1.3.1).	By 2024	In progress. The City will ensure compliance with the State Employee Housing Act upon completion of the comprehensive Development Code Update.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 1.5.3: Special Housing Needs G) Incorporate the needs of farmworkers and their families into City affordable housing programs. The City may also support providers of farmworker housing in accessing state and federal funds.	Prepare a brief on farmworker housing solutions that is developed with direct input from farmworkers, community organizations like La Familia, and employers like Wente Vineyards and implement brief recommendations by December 2026. The brief will also identify opportunities in the South Livermore Valley Specific Plan and other rural residential and agricultural areas.	By December 2026	To be implemented before the end of the 2026 program period.
Program 1.5.3: Special Housing Needs H) Require affordable housing developers to partner with trusted community partners to coordinate outreach about affordable housing opportunities and to assist farmworkers and their families in applying for affordable housing.	Adopt affordable rental development guidelines that include outreach requirements for farmworkers.	Within 1 year of Housing Element adoption	Ongoing, The City is developing affordable rental standards and requirements which will include farmworker outreach. Implementation of the adopted guidelines is expected in 2024.
Program 1.5.3: Special Housing Needs I) Conduct targeted and multilingual outreach strategies described in Program 3.3.1 for groups with special housing needs to increase access to City housing programs	See Program 3.3.1	Ongoing; conduct outreach at least every other year, beginning in 2024	Ongoing. The housing outreach plan has started in 2023 targeting various groups within the City to access housing programs.
Program 1.5.3: Special Housing Needs J) Update the City's findings for Reasonable Accommodation to remove the following findings: 1) Whether there are alternatives to the requested waiver or exception that could provide similar benefits to the applicant with less potential detriment to surrounding owners and occupants or to the general public and 2) Physical attributes of the property and structures to ensure the findings are objective and consistent with fair housing laws.	n/a	Update the Reasonable Accommodation findings in the City's Development Code by 2024.	Ongoing. The Livermore Development Code outlines procedures to address reasonable accommodation (Chapter 9.06).
Program 2.1.1: Monitor Infrastructure Needs A) Continue to analyze infrastructure needs and capacity to balance residential growth with the provision of adequate infrastructure and services.	n/a	As part of the General Plan Update, anticipated to be completed in December 2025, then every three years	Ongoing. The City has begun a comprehensive update to the General Plan which will evaluate infrastructure needs based on the approved land use scenario. In addition, the 2023-2028 CIP includes public infrastructure projects necessary to support the General Plan, Specific Plans, and Neighborhood Plan areas.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 2.1.1: Monitor Infrastructure Needs B) Review infrastructure needs to support intensified development on infill sites within city limits and in the Downtown area; program improvements and upgrades into the City's CIP.	n/a	Bi-annually, as part of CIP updates	Ongoing. The City annually reviews and amends its CIP as needed to accommodate upgrades to support intensified development. The 2023-2028 CIP includes Downtown revitalization projects such as the Livermore Village Parking Garage, Flagpole Plaza and Downtown Streetscape Improvements, Downtown Sidewalk and Miscellaneous ADA Improvements, Downtown Landscape Rehabilitation, and Veterans Park.
Program 2.1.1: Monitor Infrastructure Needs C) Work with the City's water and sewer providers to ensure the availability and adequate capacity of water and wastewater systems to accommodate the housing needs during the planning period.	n/a	As part of the General Plan Update, anticipated to be completed in December 2025, and ongoing as projects are proposed	Ongoing. The City's 2023-2028 CIP includes improvements/upgrades to water and wastewater systems. The City continues to work with Cal Water Service Company during the review of projects within their service area.
Program 2.1.1: Monitor Infrastructure Needs D) Provide a copy of the Housing Element and any future amendments to the utility providers immediately after adoption.	n/a	After adoption of the Housing Element and as needed	Completed for the 2023-2031 Housing Element. In addition, the Housing Element is available on the City's website at: https://www.livermoreca.gov/departments/community-development/planning/housing-element.
Program 2.1.2: Support Mixed-Use, Transit-Oriented, and Equitable Development A) Promote lot consolidation to increase opportunities for mixed-use development.	n/a	Ongoing as the City assists applicants at the Permit Center, and as part of the Development Code Update	Ongoing. The City continues to explore funding sources to assist with lot consolidation and increase opportunities for mixed use development in, especially in the General Plan Focus Areas.
Program 2.1.2: Support Mixed-Use, Transit-Oriented, and Equitable Development B) Continue to require minimum residential densities in areas designated for transit- oriented, mixed-use development to ensure higher density in these areas and promote mixed-income neighborhoods. The City is already implementing trail connections as shown in the City's adopted Active Transportation Plan and frontage sidewalk and mobility curb cuts as a condition of approval on development projects. The City is planning to build some key trail connections as a city CIP project (e.g. Arroyo Road trail, Arroyo Las Positas Trail). Finally, the City is midway through an intensive public outreach process to design and implement improvements to the East Avenue corridor to improve safety and usability for pedestrians and bicyclists.	n/a	Ongoing as projects are reviewed. New residential zones adjacent to transit will be identified as part of the General Plan Update and Development Code Update, anticipated to be completed in December 2025	Ongoing. There are minimum residential densities in the Downtown area to support higher density housing in this mixed use, transit-oriented neighborhood. The City also adopted the Isabel Neighborhood Specific Plan to guide development around the proposed Valley Link station. The Plan calls for a mix of higher density housing types to take advantage of regional transit access and support Housing Element goals. In addition, the City's Development Code includes form-based zoning for two mixed-use sites that requires a minimum percentage of residential development.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 2.1.2: Support Mixed-Use, Transit-Oriented, and Equitable Development C) Continue to use existing density incentives and develop additional incentives to promote mixed-use and more intense residential development near transit to facilitate income integration.	n/a	Ongoing; identify additional incentives by December 2025 as part of the Development Code Update, advertise to the development community by May 2027 and annually thereafter	Ongoing. The City continues to explore opportunities for promoting high density residential development. For example, the City adopted the Isabel Neighborhood Specific Plan (INSP), which established a goal for 25 percent of the approximately 4,095 new housing units to be offered at affordable prices/rents, with a project-level minimum of 20 percent. The INSP provides flexible development standards and parking requirements, allows for master planning across adjacent blocks, and facilitates environmental streamlining, as incentives to encourage mixed-use, transit-oriented development. In 2023, the City entitled a project in the INSP that would include 172 residential units within 0.25 miles of the planned Valley Link Transit Station.
Program 2.1.2: Support Mixed-Use, Transit-Oriented, and Equitable Development D) Update existing community benefit and/or other land value recapture strategies such as the Human Services Facility Fee to increase proximity to services and other opportunities throughout the city to improve place- based strategies toward community revitalization.	Update at least one community benefit strategy within 5 years of Housing Element adoption.	Within 5 years of Housing Element adoption	Ongoing. In 2023, the City identified a consultant to complete an update of the Human Services Facility Fee.
Program 3.1.1: Inclusionary Housing Ordinance A) Continue to implement the inclusionary housing ordinance and continue to require developers to identify the location of inclusionary units. Work to approve inclusionary units in moderate- and high-resource areas to facilitate housing mobility opportunities for lower- and moderate-income households and encourage partnerships between supportive housing providers and developers to implement inclusionary housing requirements.	Produce at least 100 affordable units for low- and moderate- income households through the inclusionary housing ordinance, encouraging at least half of these units to be integrated into low-density and single-family dominated neighborhoods, or in high resource areas.	Commence immediately and engage developers as new projects are submitted at least annually	Ongoing. In 2023, the City executed Low Income Housing Agreements with developers of three new residential, for-sale projects securing 92 affordable units for low, median and moderate income buyers in the future. These developments include the DeNova Homes Triad West (22 units); Shea Homes at Portola (18 units); and Trumark Homes Arroyo Vista (52 units).
Program 3.1.1: Inclusionary Housing Ordinance B) Implement accessible and multilingual communication and outreach strategies for potential tenants and owners of inclusionary units.	Adopt policies and procedures with inclusive outreach and marketing standards.	Within 1 year of Housing Element Adoption	Ongoing, The City is developing affordable rental standards and requirements which will include accessible and multilingual outreach strategies and will update existing affordable homeownership guidelines. Implementation of the adopted and revised guidelines is expected in 2024.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.1.2: Density Bonuses and Incentives A) Continue to ensure new residential projects are consistent with current State Density Bonus regulations and continue to encourage the use of both the State Density Bonus Program and the City's density incentives for affordable and senior housing. In addition, update the local density bonus regulations as needed during the planning period for consistency with State Density Bonus law. The City reviews Density Bonus applications in compliance with state law even if an update to the local ordinance is pending.	125 lower income units, encouraging at least 50 in high resource areas to facilitate housing mobility, and 30 in low resource areas to reduce potential for displacement.	Ongoing as projects are reviewed. Update local density bonus regulations by December 2023 as part of the Development Code Update. Continue to update local density bonus regulations within 1 year of substantive updates to State Density Bonus Law throughout the planning period so in the fall after the governor's signature deadline starting in Fall 2023.	Ongoing. The City updated Chapter 6.02.030 of the Livermore Development Code to be consistent with State Density Bonus regulations in December 2020. The City reviews requests for Density Bonuses during the development review process and will incorporate updates as needed as part of the comprehensive Development Code Update.
Program 3.2.1: Affordable Housing Fund A) Continue to administer the Low-Income Housing Impact and In-Lieu fees and use the Affordable Housing Fund to provide affordable and permanent supportive housing opportunities for extremely, very, and low income households and people with special housing needs, encouraging the use of these programs for projects in high resource areas, or in areas which reduce potential for displacement of residents in their existing neighborhoods.	Provide funding to at least three affordable housing projects that create homes for lower income households (20 percent to 80 percent of Area Median Income) and people with special housing needs in moderate or high resource areas.	Biannually through budget process	Ongoing. In 2023, the City continued to issue construction/permanent financing to HCEB for the Vineyard residential using Low Income Housing Funds, Human Services Facilities Fees and other pass-through sources. The City is working with other developers to secure financing to leverage City housing funds for the future affordable housing pipeline.
Program 3.2.1: Affordable Housing Fund B) Pursue additional funding sources and opportunities to leverage existing funding to increase resources for affordable housing programs.	Apply to an average of 1 funding source annually to support affordable housing programs	Ongoing. Submit applications for funding annually.	Ongoing. Applied to State HCD for Permanent Local Housing Allocation (PLHA) funding in December of 2022, and applying to the next available 2023 NOFA.
Program 3.2.1: Affordable Housing Fund C) Continue waiving applicable fees and provide funding to offset development fee costs for affordable units, prioritizing those that provide the greatest level of affordability and serve special needs households, to facilitate new affordable housing opportunities in moderate and high resource areas.	Waive fees or provide funding for the creation of 50 affordable units that create homes for lower income households and people with special housing needs in moderate or high resource areas.	By 2031	Ongoing. Eligible projects anticipated in 2024.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.2.2: Support Acquisition and Development of New Sites for Affordable Housing A) In an effort to facilitate new affordable housing opportunities, utilize a variety of methods to increase the inventory of properties for future development of affordable and permanent supportive housing, including land dedication and acquisition of properties for conversion or construction of affordable units in opportunity-rich locations near transit, services, and key amenities.	Support a nonprofit partner's acquisition of at least one new affordable housing site during the planning period	Ongoing	Ongoing. In 2023, the City provided funding and supported programs that expand the supply of housing units for individuals with disabilities through partnerships with Tri-Valley REACH. Tri-Valley REACH acquired a townhouse property using a loan from the City's HOME funds, and expanded the unit to a 4-bedroom for shared, supportive housing for extremely low-income persons with disabilities, using a loan from the City's PLHA funding.
Program 3.2.2: Support Acquisition and Development of New Sites for Affordable Housing B) Continue to provide financial resources to nonprofit organizations like Housing Consortium of the East Bay (HCEB) and Bay Area Community Services to increase the existing affordable housing stock through market rate conversions and adaptive reuse, prioritizing units that both prevent displacement in low resource areas and facilitate access to moderate and high resource areas.	Support the acquisition and conversion of at least one market rate property to affordable housing within 2 years of Housing Element adoption.	Ongoing; coordination with nonprofit development partners to identify potential properties and facilitate development. Target one property within two years of Housing Element adoption	Ongoing. The City continues to coordinate with non-profit developers to try and identify market rate opportunities for conversion to affordable housing.
Program 3.2.2: Support Acquisition and Development of New Sites for Affordable Housing C) Evaluate and support alternative financing models to assist the acquisition or development of affordable middle- income housing, potentially in partnership with regional agencies.	As opportunities arise	Ongoing	Ongoing. The City continues to coordinate with affordable housing developers to identify market rate opportunities for conversion to affordable housing.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.2.2: Support Acquisition and Development of New Sites for Affordable Housing D) Develop affordable housing on City- owned sites in opportunity-rich locations in compliance with the Surplus Land Act. Development support for housing on City- owned sites shall include site preparation (e.g. environmental testing and community outreach), project funding via affordable housing loans, and land dedication. Projects on City-owned sites will provide housing affordable to persons and families of low- or moderate-income, at least 80% of the area of each property will be used for development of housing, and at least 40% of the housing units developed on each property will be affordable to households whose income is not greater than 60% area median income, of which at least one-half will be affordable to households of very low- income (50% AMI). Affordable housing developers for all City-owned sites will be selected through a competitive process that complies with the Surplus Land Act.	Support development of affordable housing on at least three City- owned sites, including Pacific Avenue, North M Street, and 2047 First Street.	Declare three City- owned sites exempt surplus land under Government Code Section 54221(f)(1)(A) by Spring 2023 and enter into agreements with nonprofit developers for all three sites by 2025. Prepare North M Street and 2047 First Street for development and select a nonprofit developer by 2024. Issue building permits by 2028 if all necessary financing is secured.	Ongoing. Staff will work to identify a developer for these sites by the end of 2024.
Program 3.2.3: Partner with Affordable Housing and Service Providers A) Coordinate and foster partnerships with nonprofit housing developers, community-based organizations, the Livermore Housing Authority, school district, and applicable federal, state, and regional agencies to facilitate the development of quality affordable and permanent supportive housing through projects such as the Leahy Square Supportive Housing program.	Launch the Leahy Square Supportive Services Program within 1 year of Housing Element adoption and create 12 units of supportive bridge housing for unhoused students and their families	Ongoing; as projects are proposed and opportunities arise.* Meet quarterly with the Livermore Housing Authority, school district, and nonprofit providers	Ongoing. The Family Homelessness Challenge Grant program, assisting homeless or at-risk of homelessness families of Livermore Unified School District kicked off in January 2023. Two families have been placed in units and are receiving Intensive Case Management Services (LifeSteps). The City holds quarterly meetings with the LHA, school district, and non-profit providers on an ongoing basis to develop the program further and extend the timeline of participation and supportive services to the unhoused families.
Program 3.2.3: Partner with Affordable Housing and Service Providers B) Continue to allow developers of affordable units to pay applicable development impact fees over time or delay payment until occupancy to help meet affordable housing targets.	n/a	Ongoing; as projects are proposed	Ongoing. As project applications are submitted, the City continues to encourage developers to meet inclusionary requirements and explore opportunties for affordable development incentives for very low and low income units.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.2.3: Partner with Affordable Housing and Service Providers C) Continue to meet regularly with developers to discuss incentive opportunities and provide technical assistance to promote affordable housing opportunities to prevent displacement in low resource areas and facilitate access to moderate and high resource areas	Target assistance and incentive efforts to accommodate RHNA of up to 1,317 very low- and 758 low-income units.	Ongoing and evaluate opportunities annually; reach out to developers by June 2024 then annually thereafter.	Ongoing. In 2022-2023 the City participated in Chamber of Commerce events that encourage the production of three or more bedroom units for families. Additionally, City staff met with several developers to discuss Inclusionary requirements and affordable development incentives for very low and low income units.
Program 3.2.3: Partner with Affordable Housing and Service Providers D) Support efforts to redevelop and create additional extremely low- and very low- income affordable units at existing affordable housing sites, such as Leahy Square, Vandenburgh Villa, Arbor Vista, Arroyo Mocho, as well as through producing accessory dwelling units at supportive shared housing sites such as Crane Avenue and others described in Section 2.4.	Facilitate production through funding and technical assistance of additional units on at least two existing affordable housing sites	2023-2030	Ongoing. As previously described, in 2023 the City assisted Tri-Valley REACH with the acquisition and rehabilitation of a supportive shared housing site for 4 extremely low-income individuals with disabilities. The project is to be completed in January of 2024 and will welcome it's new residents starting February 2024.The City has also continued to work with Livermore Housing authority on the California Family Homelessness Challenge Grant program that will provide supportive transitional housing for unhoused LVUSD students and their families with 3 families moved into the Leahy Square units.
Program 3.3.1:Public Outreach A) Implement multilingual communication and outreach strategies for City-funded affordable housing developments	Incorporate multilingual outreach standards into the City's guidelines for affordable rental projects	By December 2023	Ongoing. The City is working to develop rental guidelines and standards for developers to conduct multi-lingual outreach with various distribution avenues and anti-displacement policies. In 2023, the City reached out to small local businesses, larger employers, and School districts and increased affordable housing program participation and awareness. The City has also partnered with community providers such as Centro Legal to provide anti-displacement communications in Spanish, Simplified Chinese, Mandarin, and Tagalog.
Program 3.3.1:Public Outreach B) Provide translation services for Spanish, and other languages such as Farsi, Mandarin, and Cantonese as needed, at all public meetings and ensure all public materials are translated and made available.	n/a	By December 2023	Ongoing. As needed, Spanish, Cantonese, Mandarin, Tagalog, and Vietnamese languages are available for translation at public meetings. The written languages available are Chinese, Spanish, Tagalog, and Vietnamese.
Program 3.3.1:Public Outreach C) Participate in efforts to design a regional application system and housing search tools	Requirements for developers to list affordable units in a regional application system once the system is launched.	As regional opportunities arise and reach out to Alameda County and Bay Area Housing Finance Authority at least once a year	Ongoing. The City coordinates monthly with Alameda County and its other constituent cities to discuss regional housing issues, including the expansion of a centralized affordable housing application system.
Program 3.3.1:Public Outreach D) Affirmatively market affordable housing opportunities to members of protected classes outside of Livermore.	Adopt affordable rental development guidelines that include outreach requirements for protected classes outside of Livermore.	By December 2023	Ongoing, The City is developing affordable rental standards and requirements which will include outreach strategies that extend to protected classes outside Livermore. Implementation of the guidelines is expected in 2024.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.4.1: Support for Low and Moderate Income Homeowners A) To facilitate housing mobility opportunities, continue to provide mortgage assistance for down payment, closing costs, and secondary financing to low- and moderate-income first-time homebuyers.	Continue to provide First-Time Homebuyer Down Payment Assistance to an average of three low- and moderate-income households annually.	Ongoing; make assistance information available on the City's website and in printed materials at City buildings by December 2023.	Ongoing. Materials (English and Spanish) are posted on the City's website and and distributed at City libraries, City Hall and the Multi-Service Center. The City conducted 5 workshops in 2023-early 2024 for First-time Homebuyers. The City developed a communication outreach plan that educates the community about the available programs and posts news once a month to raise awareness and participation.
Program 3.4.1: Support for Low and Moderate Income Homeowners B) To facilitate housing mobility opportunities, continue to target persons with disabilities, non-English speakers, affordable rental housing tenants, immigrants, and low-income households for participation in homeownership programs. Distribute materials at service centers or community gathering places for target populations.	Execute at least two targeted outreach methods when marketing available BMR homeownership units.	Translate program information to Spanish by December 2023. Distribute materials annually.	Ongoing. Program information was distributed via e-blasts to City housing interest list subscribers, via social media outlets, and Spanish translated materials were delivered to local businesses and multi-family developments with predominantly non-English speaking clientele/residents. Materials were also distributed to LVJUSD teachers and the Chamber of Commerce. Two outreach workshops/events were conducted targeting lower-income and predominantly non-English speaking (Spanish) residents in the City. The printed brochures and other supported information was also distributed between three library branches.
Program 3.4.1: Support for Low and Moderate Income Homeowners C) To facilitate housing mobility opportunities, align documentation and eligibility requirements with County programs, including the use of individual taxpayer identification numbers.	Update program requirements to remove access barriers.	By 2024	Ongoing. The City will update existing affordable homeownership guidelines to better align with other funder requirements that remove access barriers. Implementation of the revised guidelines is expected in 2024.
Program 3.4.1: Support for Low and Moderate Income Homeowners D) Continue to promote and provide information about the program on the City's website, newsletter, through email distribution, local advertising, and with brochures and handouts at the City's permit center counter, libraries, and community events.	Disseminate resources at least one community event annually	Ongoing on the City's website, as the City assists residents at the Permit Center, and at annual City events	Ongoing. The City's website is updated regularly with upcoming events, workshop announcements, and program announcements. In 2023, housing information was distributed at community events including the Farmer's Markets, community/faith-hosted outreach events targeting low income residents, and the Dia de los Muertos celebration hosted by the library. Information was distributed at a total of 7 community events, 5 first-time homebuyer workshops, and 6 counseling workshops.
Program 3.4.1: Support for Low and Moderate Income Homeowners E) Work with community-based organizations and institutions to provide homebuyer education, financial counseling, and foreclosure prevention.	60 low- and moderate-income households receive homebuyer support services over the course of the planning period.	Ongoing	Ongoing. The City provides grants to non-profit housing education and advocacy organizations (ECHO Housing and Centro Legal) to conduct fair housing education, financial education, first-time homebuyer education, and tenant protection counseling. In FY 2023 there were 12 workshops conducted for fair housing, homebuyer education, and tenant protection programs in person and online.

Table D

Program Implementation Status pursuant to GC Section 65583

Housing Programs Progress Report

Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.

1	2	3	4
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.4.1: Support for Low and Moderate Income Homeowners F) Pursue funding for programs that help participants of affordable rental programs access homeownership opportunities.	Submit or support a community partner's submission of at least one funding application	By 2024	Ongoing. In 2023, the City supported the Livermore Housing Authority's application to receive a Move to Work designation and started conversations with LHA to better coordinate affordable City homeownership programs with HUD's Family Self Sufficiency program to promote resident access to opportunities.
Program 3.4.2: Rental Assistance and Tenant Support Services A) Pursue additional funding to maintain and/or increase the amount of rental housing available through the Housing Choice Voucher (Section 8) Program and enhance support for other rental assistance programs.	Support at least eight funding requests or advocacy efforts to increase the number of vouchers in Livermore.	Annually	Ongoing. City worked with the Livermore Housing Authority and non-profit developers to apply Project Based Vouchers on City-sponsored affordable housing projects.
Program 3.4.2: Rental Assistance and Tenant Support Services B) Partner with the Livermore Housing Authority (LHA) to increase promotion of the Housing Choice Voucher program to the development community, property owners, homeowners with accessory dwelling units, and possible participants; support partners that provide outreach to landlords about voucher programs with the aim of increasing housing opportunities for recipients of rental assistance. Prioritize promotion in high resource areas.	Engage at least 50 landlords of properties in high resource areas.	Biennially	Ongoing. The City continues to coordinate with the Livermore Housing Authority on opportunities to promote HUD's Section 8 Program with the development community. The City will work with LHA and other non-profits providing rental assistance programs to support landlord engagement in 2024.
Program 3.4.2: Rental Assistance and Tenant Support Services C) To facilitate housing mobility opportunities, work with trusted community partners to provide linguistically and digitally accessible and culturally relevant rental housing search assistance to lower-income households and groups with special housing needs through service contracts and programming offered at the Vineyard Housing Resource Center.	Provide assistance to at least 50 lower□income households annually to identify housing opportunities	Launch Vineyard Housing Resource Center within 1 year of housing adoption and support ongoing operations	Ongoing. Vineyard Resource Center is set to launch in January 2024. Regional support includes $401,660 in Homeless Housing, Assistance, and Prevention (HHAP) for the ongoing operations of the Resource Center and City PLHA funds for the housing navigation component attached to the emergency shelter.
Program 3.4.2: Rental Assistance and Tenant Support Services D) Provide support for low-income renters, including multilingual tenant counseling, rental assistance, financial counseling, crisis stabilization services, and legal support to reduce displacement risk.	Provide assistance to at least 10 lower□income renters annually	Ongoing	Ongoing. The City provided assistance to 32 low-income renters through the Tenant Based Rental Assistance program in 2023.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.4.3: Homelessness Intervention A) Update the Development Code to reduce barriers to transitional housing, supportive housing, low-barrier navigation centers, and emergency shelters consistent with State law (e.g., SB 2, AB 101).	n/a	By December 2023 as part of the Development Code Update	In progress. The City began a comprehensive Development Code Update in 2023, which includes amendments to codify all updates to State housing laws, including SB 2 and AB 101.
Program 3.4.3: Homelessness Intervention B) Proactively connect unhoused individuals to resources through support of outreach, housing navigation, behavioral health and supportive services programs. Continue the City Serve, biohazard cleanup, and emergency shelter, and laundry and shower services programs.	Assistance to at least 50 unhoused individuals annually.	Launch the Vineyard low barrier navigation center by 2025 and support ongoing operations	Ongoing. Vineyard Resource Center completed construction a t the end of 2023 and includes 20 shelter beds, community meals, shower and laundry services, and housing navigation.
Program 3.4.3: Homelessness Intervention C) Facilitate coordination between the faith□based community and nonprofit providers of homeless services in the development and ongoing operations of solutions such as tiny home villages, safe parking, and outreach programs.	Support at least one project or program annually for persons experiencing homelessness.	Ongoing; reach out to organizations at least twice during the planning period to facilitate meetings or other forms of coordination as needed.	Ongoing. The City continues to fund homeless outreach programs through the annual grants process.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.5.1: Preservation of Subsidized Housing at Risk of Conversion to Market Rate A) As of 2022, 90 units are at risk of conversion to market-rate housing by 2033. The City will monitor the list of all dwellings that are subsidized by government funding or low-income housing developed through local regulations or incentives. The list will include, at least, the number of units, the type of government program, and the date on which the units are at risk to convert to market-rate dwellings. The City will work to reduce the potential conversion of any units to market rate through the following actions: a. Monitor the status of affordable projects, rental projects, and mobile homes in Livermore. Should the property owners indicate the desire to convert properties, provide technical and financial assistance, when possible, to ensure long-term affordability. b. If conversion of units is likely, work with local service providers as appropriate to seek funding to subsidize the at-risk units in a way that mirrors the U.S. Department of Housing and Urban Development (HUD) Housing Choice Voucher (Section 8) program. Funding sources may include state or local funding sources. c. Negotiate extensions of City financing and affordability restrictions for all three at risk properties as described in Section 2.8.	Monitor the 90 at-risk units as detailed in the program.	Ongoing communication with owners, service providers, and eligible potential purchasers; work with owners of deed-restricted units on an ongoing basis—particularly at the time of change of ownership.	Ongoing. The City continues to monitor the at-risk units list. In 2023, none of these units were converted.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.5.1: Preservation of Subsidized Housing at Risk of Conversion to Market Rate B) Pursuant to State law (Government Code Sections 65853.10, 65863.11, and 65863.13), owners of deed-restricted affordable projects are required to provide notice of restrictions that are expiring to all prospective tenants, existing tenants, and the City within 3 years, 12 months, and 6 months before the scheduled expiration of rental restrictions. In addition, the City or owner will provide notice to HUD, the California Department of Housing and Community Development (HCD), the Livermore Housing Authority, and the local legal aid organization. Owners shall also refer tenants of at-risk units to educational resources regarding: a. Tenant rights b. Conversion procedures c. Information regarding Section 8 rent subsidies d. Any other affordable housing opportunities in the city. e. In addition, notice shall be required prior to conversion of any units to market rate for any additional deed□restricted lower-income units that were constructed with the aid of government funding, that were required by inclusionary zoning requirements, that were part of a project granted a density bonus, or that were part of a project that received other incentives.	Monitor the 90 at-risk units as detailed in the program.	Ongoing communication with owners, service providers, and eligible potential purchasers; work with owners of deed-restricted units on an ongoing basis—particularly at the time of change of ownership.	Ongoing. The City continues to monitor the at-risk units list.
Program 3.5.1: Preservation of Subsidized Housing at Risk of Conversion to Market Rate C) If a development is offered for sale, HCD must certify persons or entities that are eligible to purchase the development and to receive notice of the pending sale. Placement on the eligibility list will be based on experience with affordable housing.	Monitor the 90 at-risk units as detailed in the program.	Ongoing communication with owners, service providers, and eligible potential purchasers; work with owners of deed-restricted units on an ongoing basis—particularly at the time of change of ownership.	Ongoing. The City continues to monitor the at-risk units list.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.5.1: Preservation of Subsidized Housing at Risk of Conversion to Market Rate D) When necessary, the City shall continue to work with property owners of deed□restricted affordable units who need to sell within 45 years of initial sale. When the seller is unable to sell to an eligible buyer within a specified time period, equity□sharing provisions are established (pursuant to the affordable housing agreement for the property), whereby the difference between the affordable and market value is paid to the City to eliminate any incentive to sell the converted unit at market rate. Funds generated would then be used to develop additional affordable housing in the city. The City shall continue tracking all residential projects that include affordable housing to ensure that the affordability is maintained for at least 45 years for owner-occupied units and 55 years for rental units, and that any sale or change of ownership of these affordable units prior to satisfying the 45- or 55-year restriction shall be "rolled over" for another 45 or 55 years to protect "at-risk"" units.	Monitor the 90 at-risk units as detailed in the program.	Ongoing communication with owners, service providers, and eligible potential purchasers; work with owners of deed-restricted units on an ongoing basis—particularly at the time of change of ownership.	Ongoing. The City continues to monitor the at-risk units list.
Program 3.5.1: Preservation of Subsidized Housing at Risk of Conversion to Market Rate E) Communicate with tenants and respond to notices of intent filed by property owners in a timely manner.	n/a	Ongoing, as needed	Ongoing. The City continues to monitor the at-risk units list.
Program 3.5.1: Preservation of Subsidized Housing at Risk of Conversion to Market Rate F) Pursue funding for the preservation of at□risk housing and provide financial incentives to landlords who agree to continue to provide affordable units.	Preservation of 90 units at risk of conversion to market rate	Ongoing	Ongoing. The City continues to monitor the at-risk units list.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 3.5.2: Housing Replacement Program A) In accordance with California Government Code Section 65583.2(g), the City will require replacement housing units subject to the requirements of California Government Code Section 65915(c)(3) on sites identified in the sites inventory when any new development (residential, mixed-use, or nonresidential) occurs on a site that has been occupied by or restricted for the use of lower□income households at any time during the previous five years. This requirement applies to nonvacant sites and vacant sites with previous residential uses that have been vacated or demolished.	n/a	Ongoing, as applications on identified sites are received and processed.	Ongoing. In 2023, the City did not receive any development applications proposing a project on a site that has been occupied by or restricted for the use of lower income households at any time during the previous five years. The City will continue to monitor this requirement as development applications are received.
Program 4.1.1: Residential Development Codes and Design Standards A) Continue to enforce State Energy Code and California Green Building Standards Code (CALGreen) regulations for energy efficiency, water conservation, environmental quality, etc., in residential development applications.	n/a	Ongoing as projects are reviewed	Ongoing. Compliance with State Energy Code and CALGreen regulations is a requirement all residential building applications and is reviewed by the Building Division as applications are processed. Building Division staff are available to meet with project applicants to discuss green building measures over the counter at the Permit Center, or by appointment.
Program 4.1.1: Residential Development Codes and Design Standards B) Encourage developers to exceed the minimum State Energy Code and CALGreen requirements by maintaining information on the City's website and providing assistance at the Permit Center.	n/a	Update the website with new 2022 CALGreen requirements by March 2023, then ongoing as the City assists applicants in the Permit Center	Complete. The City of Livermore adopted amendments to the 2022 CALGreen code that were effective January 1, 2023 (LMC Chapter 15.26 - Green Building Standards Code).
Program 4.1.1: Residential Development Codes and Design Standards C) Develop cost-effective local energy reach codes for all-electric buildings and electric vehicle charging for new housing, consistent with the City's Climate Action Plan. Establish exceptions for projects such as accessory dwelling units, affordable housing, and non-profit organizations serving low-income and underserved communities.	n/a	By December 2023	Complete. The City requires most new buildings in Livermore to be constructed all-electric and to install more EV chargers than required by the State code. The standards do not apply to remodels or additions to existing buildings. The City's all-electric and EV charging codes are part of its Climate Action Plan efforts.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 4.1.1: Residential Development Codes and Design Standards D) Require new developments to incorporate onsite drought tolerant landscaping, water conservation features, open space, park space, and/or shade-providing features to reduce urban heat effects, reduce water-use, and help sequester carbon. Consider establishing exceptions for projects such as accessory dwelling units, affordable housing, and non-profit organizations serving low□income and underserved communities.	n/a	Ongoing as projects are reviewed. Study and evaluate opportunities for new standards by December 2026. Update relevant codes by December 2027.	Ongoing. The City will continue to explore opportunities to create new design standards as they relate to landscaping and water conservation features. In addition, the City ensures all development applications are consistent with the landscaping requirements set forth in the Citywide Design Standards and Guidelines.
Program 4.1.2: Residential Retrofits A) Partner with regional stakeholders, such as East Bay Community Energy (EBCE) and BayREN, to offer incentives for energy efficiency, electrification, weatherization, energy storage, and resilience retrofits in existing housing, consistent with the Climate Action Plan. Focus efforts in low□income and vulnerable communities with a geographic emphasis on the Rincon neighborhood and other neighborhoods north of Downtown as well as supportive shared housing and licensed care facilities described in Section 2.4.	100 retrofitted housing units during the planning period.	Meet with partner organizations quarterly	Ongoing. The City launched the Livermore Resilient Hub, an online resource center that provides information about incentives and rebates available to residents to implement sustainability and resilience retrofits. The City also promoted resources on social media and e-newsletters, and participated in monthly meetings with regional partners to stay informed of existing and future resources.
Program 4.1.2: Residential Retrofits B) Provide information in multiple languages on the City's website on safe and healthy housing conditions and tools to address unhealthy housing conditions. Share information about available incentives, regulations, contractors, and considerations. Focus efforts in Springtown, neighborhoods north of Downtown, and supportive shared housing and licensed care facilities described in Section 2.4 to facilitate place-based revitalization and reduce displacement risk.	n/a	By December 2024	Ongoing. The City launched the Livermore Resilient Hub, an online resource center that provides information about incentives and rebates available to residents to implement sustainability and resilience retrofits. The City also promoted resources on social media and e-newsletters, and participated in monthly meetings with regional partners to stay informed of existing and future resources.
Program 4.1.3: Neighborhood Preservation Program A) Continue to implement the City's Neighborhood Preservation Program to correct building code violations. Focus efforts on defects that threaten health and safety of occupants and the community.	Target assistance to at least 10 units annually	Ongoing; update information about the program on the City's website annually, or as needed, and distribute information through City newsletters, social media, and other platforms annually.	Complete and Ongoing. In 2023, Neighborhood Preservation responded to over 900 violations and resolved over 90% of all cases involving graffiti, abandoned shopping carts, overgrown vegetation, illegal dumping, and illegal structures.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 4.1.3: Neighborhood Preservation Program B) Pursue funding to provide low-income homeowners and renters with financial assistance to correct building code violations and make accessibility improvements. Coordinate these efforts with the Climate Action Plan retrofit efforts (Program 4.1.2.A) to maximize resources and benefit, including prioritization of investments in neighborhoods north of Downtown like Rincon.	See Program 4.1.2.A	Ongoing; apply for funding at least annually as available.	The City launched the Livermore Resilient Hub, an online resource center that provides information about incentives and rebates available to residents to implement sustainability and resilience retrofits. Additionally, the City completed a new Vulnerability Analysis as part of the General Plan Update, which will support future applications for funding to implement retrofit programs in low-income and vulnerable communities.
Program 4.1.3: Neighborhood Preservation Program C) Monitor multifamily complexes that have received City funding for housing quality, resident services, customer service, and linguistic and physical accessibility	Conduct annual monitoring assessments	Ongoing	Ongoing. The City continues to monitor property regulatory agreements annually.
Program 4.1.3: Neighborhood Preservation Program D) Continue to promote Neighborhood Preservation programs and cleanup events through the City's website to support community-oriented place□based revitalization	See Program 4.1.3.A	Ongoing	Ongoing. The City's website contains information on upcoming events related to neighborhood nuisance and cleanup, including clutter support groups.
Program 4.1.3: Neighborhood Preservation Program E) Use volunteer assistance cleanup teams, specifically to assist frail elderly and disabled homeowners who have received code complaints for property upkeep.	n/a	Ongoing; coordinate volunteer cleanups annually, or as needed	Ongoing. The City's website contains information on upcoming events related to neighborhood nuisance and cleanup, including clutter support groups.
Program 4.2.1:Neighborhood Improvement A) Improve the quality of older neighborhoods, particularly in low□resource areas, affordable housing developments, and neighborhoods north of Downtown, by upgrading sidewalks, parks, lighting, tree canopy, bike lanes, and other public facilities.	At least 8 infrastructure investments in high need communities, such as rehabilitation of Doolan Park, the installation of electric car chargers at Rincon Library, or bike lines along Rincon Avenue, during the Planning period.	Biennially as part of the capital improvement planning process	Ongoing. The City's CIP includes ongoing/annual improvements for street resurfacing, sidewalk repair, and ADA access ramps.
Program 4.2.1:Neighborhood Improvement B) Pursue funding available for acquisition and rehabilitation of foreclosed, vacant, and/or blighted properties.	See Program 3.2.4	Annually	Ongoing. The City continues to work with non-profit housing agencies to identify prospective acquisition and rehabilitation opportunities that could rehabilitate blighted and distressed properties within the City and provide safe, clean and affordable rental housing opportunities.
Program 4.2.1:Neighborhood Improvement C) Pursue funding to acquire land and/or facilitate development of urban parks on infill sites, particularly in low-resource areas and affordable housing developments, to promote place-based revitalization through air pollution mitigation and improved access to outdoor recreational opportunities.	Provide at least one□third acre of parkland or open space within one mile of all residences.	Meet annually with LARPD	Ongoing. The City continues to coordiante with regional partners and developers regarding funding for parkland and open space in low0resource areas.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 4.2.1:Neighborhood Improvement D) Continue to identify funding and provide technical assistance to upgrade and enhance programming and community and recreational spaces in rental housing properties owned and managed by the Livermore Housing Authority (LHA).	Support at least three service or infrastructure enhancements at Leahy Square, Bluebell, Chestnut, or Las Posadas apartments over the planning period.	Ongoing	Ongoing. The City continues to seek opportunities to enhance programming and community and recreational spaces in rental housing properties owned and managed by the Livermore Housing Authority (LHA).
Program 5.1.1: Support Nonprofit Organizations Specializing in Fair Housing Services A) Provide financial assistance and administrative support to local nonprofit organizations that specialize in reducing discriminatory housing practices through fair housing counseling, tenant/landlord mediation, education, outreach, and rental assistance to reduce displacement risk resulting from discrimination and facilitate housing mobility opportunities.	Assist at least 20 households annually through the programs offered by fair housing providers.	Annually through grants and contracts	Ongoing. The City provides annual financial assistance and operating support to ECHO Housing, to assist residents with fair housing complaints, tenant landlord disputes, accessing housing and fair housing education. The City also contracts annually with Centro Legal de la Raza to provide legal services and conduct public outreach regarding tenant rights. Centro conducts monthly educational workshops for tenants at risk of displacement and legal proceedings.
Program 5.1.1: Support Nonprofit Organizations Specializing in Fair Housing Services B) Continue to refer complaints of discriminatory housing practices to fair housing providers.	Provide references to at least 3 residents experiencing fair housing issues, or as complaints are received.	Ongoing	Ongoing. In FY 2022-2023 the City referred 100+ individuals to fair housing and anti-displacement providers.
Program 5.1.1: Support Nonprofit Organizations Specializing in Fair Housing Services C) Refer complaints and requests for housing for the disabled to partner organizations.	Provide references to at least 3 residents, or as complaints are received.	Ongoing	Ongoing. The City maintains a list of partner organizations on the website and provides referrals as inquiries are received from the public. The City provided referrals to 28 disabled individuals or their families in 2023.
Program 5.1.1: Support Nonprofit Organizations Specializing in Fair Housing Services D) Distribute fair housing brochures at public locations, such as city counters, public libraries, community/senior centers, and service providers. Expand outreach and access to information for limited English□speaking residents by providing all materials in dominant non-English languages, including Spanish, Farsi, and Simplified Chinese, by January 2023.	Update and distribute fair housing materials at least annually, and disburse materials at at least one community event annually with an emphasis on areas with a high number of renters.	Annually	Ongoing. Fair Housing materials were distributed through the City's contract with ECHO Housing. Over 500 flyers were distributed every quarter of the year, and on-site consultations are provided in English, and Spanish. the Fair Housing information is available in Simplified Chinese, Spanish, Mandarin, and Tagalog. ECHO also conducts monthly fair housing workshops. ECHO provided consultations to over 200 individuals in 2023.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 5.1.1: Support Nonprofit Organizations Specializing in Fair Housing Services E) Provide financial support for fair housing audits and the dissemination of audit results and information on fair housing laws to landlords, rental housing organizations, and the public. Hold biannual trainings for landlords and property managers to review findings and provide education on fair housing rights and responsibilities to reduce displacement risk resulting from discrimination and facilitate housing mobility opportunities.	Engage at least 30 landlords and property owners every 2 years with an emphasis on high resource areas. Support annual audits of 10 or more landlords. Conduct fair housing testing and/or advertising audits annually.	Annually, through annual grants and contracts	Ongoing. The City contracted with ECHO Housing to complete fair housing property audits in Livermore and investigate fair housing cases. Every month ECHO conducts a regional fair housing training inviting property managers and landlords in Livermore to learn about fair housing laws. These trainings are open to tenants as well. ECHO also conducts an annual systemic audit of at least 10 landlords for possible discrimination. ECHO's Fair Housing staff continues to monitor sites like Craigslist for advertising violations and provide education and/or testing on these sites.
Program 5.1.2: Reasonable Accomodations A) Consistent with state and federal laws, continue to provide individuals with disabilities reasonable accommodation in rules, policies, practices, and procedures through the building permit and development review processes.	n/a	Ongoing	Ongoing. The Livermore Development Code outlines procedures to address reasonable accommodation (Chapter 9.06).
Program 5.1.2: Reasonable Accomodations B) Continue to partner with fair housing organizations to conduct trainings, test, and audits that help ensure reasonable accommodations are provided conduct in multifamily rental properties. Provide regular training to landlords.	See Program 5.1.1	Ongoing	Ongoing. As described in Program 5.1.1, the City partners with ECHO to conduct a fair housing audit of 10 rental properties each year. ECHO provided the landlords of these properties with training and information regarding disability laws and tenant/landlord rights and responsibilities. In addition, ECHO offered free fair housing training to the owners and managers of rental properties in Livermore.
Program 5.1.2: Reasonable Accomodations C) Work with Livermore Housing Authority and partner organizations to identify landlords in need of assistance with making modifications for persons with disabilities in the Section 8 program.	n/a	Meet with the Housing Authority within 2 years of Housing Element adoption; identify landlords biannually, as feasible	Ongoing. Targeted for 2024/2025 implementation.
Program 5.2.1: Fair Housing Policies and Programs A) Conduct racial equity impact assessments of City policies for potential unintended fair housing impacts on people of color and work with stakeholders to address those impacts	Racial equity assessments of at least three City housing policies.	Within 3 years of Housing Element adoption	Ongoing. Targeted for 2024/2025 implementation.
Program 5.2.1: Fair Housing Policies and Programs B) Strengthen requirements for City-funded affordable housing and service providers to offer linguistically accessible services, particularly in Spanish, to increase housing mobility opportunities through increased accessibility	Incorporate language access requirements into at least five Housing and Human Services grant agreement or service contracts.	Within 3 years of Housing Element adoption	Ongoing. Targeted for 2024/2025 implementation.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	**2**	**3**	**4**
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 5.2.1: Fair Housing Policies and Programs C) To facilitate housing mobility opportunities, pursue funding for culturally relevant financial empowerment services to help community members with protected characteristics remove economic barriers to accessing housing like credit scores and income documentation	Submit at least one funding application to support the program.	Within 2 years of Housing Element adoption	Ongoing. Targeted for 2024/2025 implementation.
Program 5.2.1: Fair Housing Policies and Programs D) Present new policies to City Council that prevent displacement for low- and moderate-income community members and protect families with children, essential workers, seniors, and people with disabilities, such as an anti□harassment ordinance, just cause eviction ordinance, Ellis Act protections, or a tenant opportunity to purchase policy.	Present at least one tenant protection ordinance to City Council to consider for adoption.	Within 3 years of Housing Element adoption	Ongoing. Targeted for 2024/2025 implementation.
Program 5.2.1: Fair Housing Policies and Programs E) Work with trusted community partners to provide linguistically and digitally accessible and culturally relevant housing search assistance to address racial housing disparities experienced by Latinx, Black, Asian, and Pacific Islander community members and increase housing mobility.	Provide resources and guidance to at least three community partners to address local racial housing disparities.	Engage community partners and provide guidance and/or resources within 2 years of Housing Element adoption	Ongoing. Targeted for 2024/2025 implementation.
Program 5.2.1: Fair Housing Policies and Programs F) Conduct a feasibility assessment for a Citywide rental registry to reduce displacement risk.	Complete Citywide rental registry feasibility assessment	Within 2 years of Housing Element adoption	Ongoing. Targeted for 2025 implementation.
Program 5.2.1: Fair Housing Policies and Programs G) Prioritize public improvements and residential retrofits described in Actions 4.1.2.A, 4.2.1.A, and 4.2.1.C (such as streets and drainage, sidewalks and alleys, green spaces and parks, street trees, and other public facilities, amenities and infrastructure) in neighborhoods with the greatest need, including neighborhoods with high concentrations of poverty and limited existing resources and amenities.	Adopt a Climate Action Plan that includes commitments to prioritizing microgrid, water efficiency, urban canopy, stormwater, and electric vehicle investments in high need communities.	Within 2 years of Housing Element adoption	Complete. The City adopted the 2022 Climate Action Plan (CAP) on November 28, 2022. The 2022 CAP is a roadmap to reduce greenhouse gas (GHG) emissions, adapt to extreme weather, deploy reliable and renewable energy, conserve habitat and biodiversity, and ensure equitable access to the benefits of a sustainable city.
Program 5.2.1: Fair Housing Policies and Programs H) Identify opportunities in the General Plan Circulation Element and/or Active Transportation Plan to strengthen biking, pedestrian, and public transit connections from lower resource to higher-resource areas	Adopt an updated Circulation Element of the General Plan and/or updated Active Transportation Plan.	Within 3 years of Housing Element adoption	Ongoing. The City is preparing a comprehensive General Plan Update which will include and updated Circulation Element.

Table D Program Implementation Status pursuant to GC Section 65583 **Housing Programs Progress Report** Describe progress of all programs including local efforts to remove governmental constraints to the maintenance, improvement, and development of housing as identified in the housing element.			
1	2	3	4
Name of Program	**Objective**	**Timeframe in H.E**	**Status of Program Implementation**
Program 5.2.1: Fair Housing Policies and Programs I) Implement strategies in partnership with the school district, Livermore Amador Valley Transit Authority, and community based organizations that increase biking, pedestrian, and public transit access for low-income and special needs households, such as free transit pass programs.	Distribute 5,000 free bus passes over the planning period to low-income families, unhoused individuals, and people with disabilities through partnerships with organizations such as the Livermore Valley Unified School District, Cityserve, La Familia, and Communities for Resource Independent Living (CRIL).	Commence immediately and engage partners on annual basis about new strategies	Ongoing. In 2023 the City distributed 3,325 24 hour bus passes to non-profits, LVUSD, and Livermore Police Departments Homeless Liaison Officers.
Program 5.2.1: Fair Housing Policies and Programs J) Utilize Community Development Block Grant and Human Services Facility funds to support place-based strategies to improve conditions, resources, and amenities in lower-income communities such as neighborhoods north of Downtown	At least 5 investments in projects that create or improve facilities and infrastructure benefiting low-income community members over the planning period.	Ongoing through annual Housing & Human Services Grant allocation process.	In FY 2022-23, funded Axis Community Health with $184,210 of Human Services Facility Fee funds for the acquisition of a new Medical and Dental site in Livermore. In 2023 Open Heart Kitchen completed construction of their new community kitchen and dining facility in the Vineyard Resource Center. This project provides permanent infrastructure for the free community meal program within walking distance to the Rincon and North I Street neighborhoods near downtown.
Program 5.2.1: Fair Housing Policies and Programs K) Address racial homeownership gaps and produce more missing middle housing through the City's inclusionary housing program	See Program 3.1.1. Adopt policies and procedures with inclusive outreach and marketing standards within 1 year of Housing Element adoption and encourage at least half of the moderate income units produced by the inclusionary housing ordinance over the planning period to be integrated into low□density and single□family dominated neighborhoods or in high resource areas.	Commence immediately and engage developers as new projects are submitted at least annually	Ongoing. The City will update existing affordable homeownership guidelines to reflect inclusive marketing efforts and remove access barriers. Implementation of the revised guidelines is expected in 2024. In 2023 the City engaged with three residential developers in the Isabel Neighborhood Plan Area to execute Low Income For Sale Housing Agreements that will provide future moderate and median income homebuyer opportunities.
Program 6.1.1: Tri-Valley Affordable Housing Committee A) Continue to participate in Tri-Valley Affordable Housing Committee to identify regional housing issues and to develop multi-jurisdictional approaches to solving affordable housing problems with focus on income integration and housing mobility opportunities.	n/a	Ongoing, quarterly. Attend at least 30 Tri- Valley Affordable Housing Committee meetings over the planning period	Ongoing. In 2023 the Tri-Valley Affordable Housing Committee was disbanded. Housing staff of the Tri-Valley Cities continues to coordinate on a quarterly basis.

Program 6.1.2: Regional Responses to Homelessness A) Continue to coordinate with other local jurisdictions to in the provision of outreach, social services, and referrals to people with disabilities, survivors of domestic violence, and homeless or those at risk of becoming homeless. Continue joint support of local homeless shelters and the Vineyard 2.0 navigation center.	Jointly fund at least three homeless services projects each year. See Program 3.4.3 for service objectives.	Ongoing; through annual Housing & Human Services Grant allocation process.	The Cities of Livermore, Pleasanton, and Dublin provided funding to the rebuild of the Tri-Valley Haven's shelter, operational funding for CityServe of the Tri-Valley's homeless services, and the Goodness Village homeless housing project.
Program 6.1.2: Regional Responses to Homelessness B) Pursue opportunities to secure joint funding with neighboring and local jurisdictions to aid homeless and at-risk households, such as the Project Reclamation supportive shared housing program.	Submit a multijurisdictional Homekey application in Round 3 to support permanent supportive housing production objectives identified in Program 1.5.3.D.	In 2023, and annually as opportunities arise	Ongoing. The Cities of Livermore, Pleasanton, and Dublin collaborated to provide grant
Program 6.1.2: Regional Responses to Homelessness C) Implement local and regional plans to address homelessness, such as the Alameda County Home Together plan.	n/a	Ongoing	Ongoing. The Tri-Valley Region received $862,436 in Homeless Housing, Assistance, and Prevention (HHAP) funds to address homelessness in the Tri-Valley Region. The projects funded are in accordance with the Alameda County Home Together Plan for the Continuum of Care.
Program 6.1.2: Regional Responses to Homelessness D) Continue participating in local and regional partnerships to address homelessness, such as Everyone Home.	Participate in at least one regional partnership annually to address homelessness	Ongoing; meet annually with partners	Ongoing. Human Services staff are part of the EveryoneHome Leadership Board and Homeless Information Management System (HMIS) Committee that meets monthly.

CITY COUNCIL STAFF REPORT **ITEM NO. 6.2**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Paul Spence, Assistant City Manager

SUBJECT: Resolution authorizing, approving, and adopting an amended Permanent Local Housing Allocation (PLHA) program five-year plan to reallocate funds to support the shelter and housing assistance provided at Vineyard 2.0 as well as rental assistance provided by City Serve, and authorizing the City Manager to apply for PLHA funds from the State Department of Housing and Community Development in an amount not-to-exceed $1,251,240 and execute grant agreements consistent with the program activities defined in the amended PLHA 2019-2023 plan.

RECOMMENDED ACTION

Staff recommends that the City Council adopt two resolutions:

1. Authorizing, approving, and adopting an amended PLHA Plan for 2019-2023 allocations, which is attached to the resolution as Exhibit A;
2. Authorizing the City Manager, or her designee, to execute the PLHA program application for the 2023 PLHA NOFA, the PLHA standard agreement, and any subsequent amendments or modifications thereto, as well as any other documents that are related to the PLHA program or the PLHA grant awarded to the City of Livermore;
3. Authorizing the City Manager to accept and appropriate the allocations for the amended PLHA plan if awarded in an amount not-to-exceed $1,251,240, and directing the City Manager or her designee, to sign and submit Fund Requests and all required reporting forms and other documentation as may be required by the State of California in connection with the grant; and
4. Authorizing the City Manager or her designee to sign all documents related to the execution of grant agreements with subgrantees receiving allocations of funds from the CA State Housing and Community Development PLHA program, including the selection of, and contracting with, service providers in amounts exceeding $100,000, consistent with the allowable activities in the PLHA program.

SUMMARY

The Permanent Local Housing Allocation (PLHA) program is a non-competitive block grant program designed to provide direct assistance to communities to increase the local housing stock through a wide

range of eligible activities, including the development of rental housing that is affordable to extremely low-income households and assistance to persons who are experiencing homelessness. On November 14, 2022, the City Council approved an application to State HCD for new funding under the PLHA program and approved a five-year plan (the “Plan”) for the use of an estimated total of $1,251,240 in grant funds.

Staff recommends the City Council approve an amended 2019-2023 PLHA Plan to reallocate funds to more activities that support the shelter and housing assistance provided at Vineyard 2.0 as well as rental assistance to be provided by City Serve to prevent or address homelessness. Staff also recommends City Council authorize the City Manager or her designee to execute the grant agreements with subgrantees receiving allocations consistent with the allowable activities defined in the amended PLHA 2019-2023 plan.

DISCUSSION

In 2017, Governor Brown signed the Building Homes and Jobs Act, which established a $75 recording fee on real estate documents to increase the supply of affordable homes in California and designated 70% of the revenue collected for the Permanent Local Housing Allocation (PLHA) program. On December 29, 2023, the State of California Department of Housing and Community Development (State HCD) issued a Notice of Funding Availability (NOFA) for the PLHA program utilizing these funds.

PLHA funding is a non-competitive block grant program designed to provide direct assistance to communities to increase the local housing stock through a wide range of eligible activities, including the development of affordable rental housing for extremely low-income households and assistance to persons experiencing homelessness. Because the number of real estate transactions recorded in each county will vary yearly, the revenues collected and funds available to local jurisdictions will fluctuate. Each year, State HCD releases a NOFA for the revenue collected in the prior calendar year, and jurisdictions like the City of Livermore, entitled to a formula allocation, submit a streamlined application to access the funds.

On November 14, 2022, the City Council approved an application to State HCD for funding under the PLHA program and approved a five-year plan to use an estimated total of $1,251,240 in grant funds. This PLHA plan serves as a guide for the City to plan for activities and submit annual applications to the CA Department of Housing and Community Development. The activities in the adopted PLHA plan included funds for operating subsidies and housing navigation for the Vineyard 2.0 project as well as funding for the rehabilitation and expansion of shared housing units serving extremely low-income and special needs populations.

Following plan approval, the City partnered with the Tri-Valley REACH (REACH) to assist with funding for two rehabilitation projects that supply supportive, affordable shared homes for extremely low-income tenants with intellectual and/or developmental disabilities. Both shared homes provide options for residents to live independently, work, and volunteer in the community. The scope of rehabilitations included expansion of the bedroom spaces to accommodate additional tenants, structural improvements, interior renovation, landscaping design, and accessibility improvements. The latest rehabilitation project located on Camden Common opened its doors to the residents on February 14, 2024. No additional projects for this activity have been identified.

Construction of the Vineyard 2.0 project was finished in December of 2023, and the Vineyard Resource

Center opened its doors on January 22, 2024. In addition to 24 units of permanent housing for extremely low-income households, the Vineyard Resource Center provides a multitude of services to address the homelessness crises, such as housing navigation assistance, shower and laundry services, and an overnight refuge shelter operated by Open Heart Kitchen through their Open Heart Refuge program. All funding needed for operation of the residential units has been secured from other (non-PLHA) sources and therefore operating subsidies for the project are no longer needed.

The additional PLHA funding will allow the 20-bed shelter to sustain operations seven days a week providing overnight refuge for persons from inclement weather along with breakfast and dinner through Open Heart Kitchen, daily showers, laundry services, and access to housing navigation. Staff recommends amending the five-year PLHA plan to reallocate funds to additional activities that assist persons who are experiencing or at risk of homelessness per the PLHA guidelines. These activities include but are not limited to providing rapid rehousing, rental assistance, and supportive case management services that allow people to obtain and retain housing and operating and capital costs for navigation centers and emergency shelters.

The proposed Plan amendment will also allow the City to allocate flexible-use funds to Housing Consortium of the East Bay (HCEB) through the Vineyard Resource Center housing navigator, and to CityServe, or other providers for rental assistance. It reflects the feedback received from the community-based organizations about the needs of the unhoused community members. If approved, The City of Livermore will contract with HCEB, Open Heart Kitchen, and City Serve of the Tri-Valley to support operating costs for the Vineyard Resource Center, Open Heart Refuge shelter, and CityServe to address the acute homeless crisis and provide services to residents in the Tri-Valley at risk for homelessness.

The following table contains activity estimates for the proposed PLHA Plan allocations:

PLHA Activity / Funding Year	2020	2021	2022*	2023**	2020-2023**
Shelter Operations/Housing Navigation/Rental Assistance (HCEB & Open Heart Refuge)	$243,103	$267,527	$134,085*	$137,311**	$782,025**
Rental Assistance (City Serve)	$64,827	$71,340	$35,756*	$36,616**	$208,540**
Total	**$307,930**	**$338,867**	**$169,841***	**$173,927****	**$990,565****

*Pending 2023 PLHA NOFA application and award.
**Pending 2024 PLHA NOFA funding release.

The City has received approval from HCD for PLHA allocations for years 2020 and 2021, therefore once approved by City Council, staff will move forward with the proposed agencies to contract for those funds. To access PLHA funds, the City Council must adopt the State-approved Resolution approving the amended plan, attached as Exhibit A, authorize the City Manager, or her designee to apply for the 2023 PLHA NOFA funding, and adopt the resolution authorizing the City Manager, or her designee, to execute all documents related to the execution of grant agreements, with subgrantees receiving allocations of funds from the CA State Housing and Community Development PLHA program.

FISCAL IMPACTS

Amending the plan will redistribute annual funds between the approved projects. The City was awarded $859,619 in PLHA funds for the first three years of the grant term and estimates that a total of

$1,251,240 will be allocated over the five-year planning period. The PLHA program does not require local matching funds.

City Council of the City of Livermore

AUTHORIZING RESOLUTION OF City Council of the City of Livermore

AUTHORIZING THE APPLICATION AND AMENDING THE PLHA PLAN FOR THE PERMANENT LOCAL HOUSING ALLOCATION PROGRAM

Resolution of the City Council of the City of Livermore.

City Council of the City of Livermore hereby consents to, adopts, and ratifies the following resolution:

A. WHEREAS, the Department is authorized to provide up to $296 million under the SB 2 Permanent Local Housing Allocation Program Formula Component from the Building Homes and Jobs Trust Fund for assistance to Cities and Counties (as described in Health and Safety Code section 50470 et seq. (Chapter 364, Statutes of 2017 (SB 2)).

B. WHEREAS, the State of California (the "State"), Department of Housing and Community Development ("Department") issued a Notice of Funding Availability ("NOFA") dated 12/29/2023 under the Permanent Local Housing Allocation (PLHA) Program;

C. WHEREAS, City Council of the City of Livermore is an eligible Local government who has applied for program funds to administer one or more eligible activities, or a Local or Regional Housing Trust Fund to whom an eligible Local government delegated its PLHA formula allocation.

D. WHEREAS, the Department may approve funding allocations for PLHA Program, subject to the terms and conditions of the Guidelines, NOFA, Program requirements, the Standard Agreement, and other contracts between the Department and PLHA grant recipients;

NOW THEREFORE BE IT RESOLVED THAT:

1. If Applicant receives a grant of PLHA funds from the Department pursuant to the above referenced PLHA NOFA, it represents and certifies that it will use all such funds in a manner consistent and in compliance with all applicable state and federal statutes, rules, regulations, and laws, including without limitation all rules and laws regarding the PLHA Program, as well as any and all contracts Applicant may have with the Department.

2. Applicant is hereby authorized and directed to receive a PLHA grant, in an amount not to exceed the five-year estimate of the PLHA formula allocations, as stated in Appendix B of the current NOFA $1,251,240 in accordance with all applicable rules and laws.

3. Applicant hereby agrees to use the PLHA funds for eligible activities as approved by the Department and in accordance with all Program requirements, Guidelines, other rules, and laws, as well as in a manner consistent and in compliance with the Standard Agreement and other contracts between the Applicant and the Department.

4. **Pursuant to Sections 302(c)(4) and 302(c)(5) of the Guidelines, Applicant's PLHA Plan Amendment for the 2020-2023 Allocations is attached to this resolution, and Applicant hereby adopts this PLHA Plan Amendment and certifies compliance with all public notice, public comment, and public hearing requirements in accordance with the Guidelines.**

5. **If applicable**: Applicant certifies that it was delegated by N/A to submit an application on its behalf and administer the PLHA grant award for the formula allocation of PLHA funds, pursuant to Guidelines Section 300(c) and 300(d), and the legally binding agreement between the recipient of the PLHA funds and the Applicant is submitted with the PLHA application.

6. **If applicable:** Applicant certifies that it has or will subgrant some or all of its PLHA funds to another entity or entities. Pursuant to Guidelines Section 302(c)(3), "entity" means a housing developer or program operator, but does not mean an administering Local government to whom a Local government may delegate its PLHA allocation.

7. **If applicable:** Applicant certifies that its selection process of these subgrantees was or will be accessible to the public and avoided or shall avoid any conflicts of interest.

8. **If applicable:** Pursuant to Applicant's certification in this resolution, the PLHA funds will be expended only for eligible Activities and consistent with all program requirements.

9. **If applicable:** Applicant certifies that, if funds are used for the acquisition, construction or rehabilitation of for-sale housing projects or units within for-sale housing projects, the grantee shall record a deed restriction against the property that will ensure compliance with one of the requirements stated in Guidelines Section 302(c)(6)(A), (B) and (C).

10. **If applicable:** Applicant certifies that, if funds are used for the development of an Affordable Rental Housing Development, the Local government shall make PLHA assistance in the form of a low-interest, deferred loan to the Sponsor of the Project, and such loan shall be evidenced through a Promissory Note secured by a Deed of Trust and a Regulatory Agreement shall restrict occupancy and rents in accordance with a Local government-approved underwriting of the Project for a term of at least 55 years.

11. Applicant shall be subject to the terms and conditions as specified in the Standard Agreement, the PLHA Program Guidelines and any other applicable SB 2 Guidelines published by the Department.

12. City Manager or her designee is/are authorized to execute the PLHA Program Application, the PLHA Standard Agreement and any subsequent amendments or modifications thereto, as well as any other documents which are related to the Program or the PLHA grant awarded to Applicant, as the Department may deem appropriate.

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION ADOPTING THE PERMANENT LOCAL HOUSING ALLOCATION PROGRAM (PLHA) PLAN AMENDMENT AND AUTHORIZING EXECUTION OF AN AGREEMENT TO RECEIVE FUNDING FROM PLHA IN AN AMOUNT NOT-TO-EXCEED $1,251,240 AND AUTHORIZING THE EXECUTION OF GRANT AGREEMENTS BETWEEN THE CITY OF LIVERMORE AND SUBGRANTEES TO APPROPRIATE THESE FUNDS

One of the Goals and Objectives of the City of Livermore Strategic Plan is to expand and improve access to human services and to seek additional funding for housing and human services needs in Livermore.

The State of California Department of Housing and Community Development is authorized to provide up to $296 million under the SB 2 Permanent Local Housing Allocation Program Formula Component from the Building Homes and Jobs Trust Fund for assistance to cities and counties (as described in Health and Safety Code section 50470 et seq. (Chapter 364, Statutes of 2017 (SB 2)).

On December 29, 2023, the State of California (the “State”), Department of Housing and Community Development (“Department”) issued a Notice of Funding Availability (“NOFA”) under the Permanent Local Housing Allocation (PLHA) Program.

The Permanent Local Housing Allocation (PLHA) Program allows cities and counties to apply for financial assistance for eligible housing and homeless prevention projects and programs to assist in addressing the unmet housing needs of the local community. The City of Livermore is eligible to apply for the 2023 PLHA formula allocation.

On November 14, 2022, the City Council approved an application to State Department for funding under the PLHA program and approved a five-year plan for the use of an estimated total of $1,251,240 in grant funds through City Resolution No. 2022-187. The activities in the PLHA plan included the Vineyard 2.0 project and the rehabilitation and expansion of shared housing units serving extremely low-income and special needs populations.

The Proposed PLHA Plan amendment intends to reallocate years 2-5 of PLHA funds to activities consistent with the PLHA program guidelines for assisting persons who are experiencing or at risk of homelessness, including, but not limited to providing rapid rehousing, rental assistance, supportive case management services that allow people to obtain and retain housing, and operating and capital costs for navigation centers and emergency shelters.

The City of Livermore ("City") intends to apply for the 2023 PLHA Plan allocation and provide an application along with the amended five-year plan for the activities consistent with the program guidelines for an estimated total of $1,042,700 of remaining PLHA funds.

If awarded, the City intends to contract with Housing Consortium of the East Bay (HCEB), Open Heart Kitchen ("Open Heart Kitchen"), and City Serve of the Tri-Valley ("City Serve") to provide housing navigation, shelter operations, and rental assistance programs in the scope of homeless prevention services to Tri-Valley residents at risk of homelessness.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that it hereby:

1. Adopts the Permanent Local Housing Allocation (PLHA) Plan amendment, attached hereto as Exhibit A, and authorizes the City Manager, or her designee, to sign all documents and execute any agreements, including any amendments thereto, necessary for the City to receive PLHA program funds, if said funds are awarded to the City, in an amount not-to-exceed $1,251,240.

2. Authorizes the City Manager, or her designee, to execute grant agreements, including any amendments thereto, with subgrantees that will receive allocations of PLHA funds from the City, including contracts with subgrantees exceeding $100,000, consistent with the allowable activities specified in the PLHA Program Notice of Funding Availability, if said funds are awarded to the City.

.

On motion of Council Member _____, seconded by Council Member _____, the foregoing resolution was passed and adopted on March 25, 2024, by the following vote:

Exhibit A – PLHA Plan Amendment

EXHIBIT A

§302(c)(4) Plan

Rev. 02/01/24

§302(c)(4)(A) Describe the manner in which allocated funds will be used for eligible activities.

The proposed amended plan designates 2020-2023 funding allocations to be used for the services provided through programs assisting the homeless population with rapid rehousing, rental assistance, overnight shelter operations, intensive case management, and other supportive services. These are examples of the services that are provided at the Vineyard Resource Center (VRC) by HCEB, Open Heart Kitchen Overnight Refuge, and CityServe.
Vineyard Resource Center (Vineyard RC) is a mixed-use development, that addresses key homeless crisis areas. The Vineyard RC opened its doors on January 22, 2024. Overnight Shelter Refuge at the Vineyard RC is operated by Open Heart Kitchen and is open seven days a week providing meals through Open Heart Kitchen; Overnight Refuge Shelter for 20 beds including breakfast and dinner daily; showers and laundry services. During the first month of operation, the Vineyard Resource Center and Open Heart Kitchen facility served 447 unduplicated clients and provided 346 showers, 93 hygiene services, and 133 laundry services. The acute need in the community is to maintain the shelter open 7 days a week. Staff proposes to allocate year 2,3,4,5 of the PLHA funding to expand operations of the Center for the shelter to remain open 7 days a week to provide continuous care for persons experiencing homelessness, and provide housing navigation and rental assistance.

§302(c)(4)(B) Provide a description of the way the Local government will prioritize investments that increase the supply of housing for households with incomes at or below 60 percent of Area Median Income (AMI).

The Vineyard Housing Resource Center serves the homeless population of Tri-Valley, the services are targeted to households at or below 30% AMI. All grant agreements will contain provisions in conformance with federal rules contained in 24 CFR Section 576.104. Funds will be used to operate the shelter and provide housing navigation services in conjunction with the shelter and homeless resource center. Rental assistance will be offered through the housing navigator program and other services providers as necessary to help a person experiencing or at risk of homelessness to move as quickly as possible into permanent housing and achieve stability. Rental assistance will be offered in a manner consistent with Housing First practices and PLHA program regulations.

§302(c)(4)(C) Provide a description of how the Plan is consistent with the programs set forth in the Local Government's Housing Element.

The proposed plan amendment aligns itself with the current Housing Element, adopted by the City Council in March of 2023. The implementing actions address multiple goals and build upon each other, creating a comprehensive approach to meeting the community's housing needs. The following goals of the adopted Housing Element are aligned with the proposed plan amendment:
Goal 1. Diverse Housing Choices. - Policy 1.5: Facilitate the development of housing for individuals with special needs, including those with disabilities, large families, seniors, and people experiencing homelessness. Program 1.5.3: Special Housing Needs: The Rental Assistance program targets unhoused families, and individuals by providing long-term rental assistance.
Goal 3. Affordable Housing Production and Preservation; Policy 3.2: Pursue and utilize a variety of funding resources and partnerships to develop housing that is affordable to lower- and moderate-income households, families, and seniors. Program 3.2.2: Support Acquisition and Development of New Sites for Affordable Housing. The plan amendment will provide acutely needed funding for nonprofit organizations like the Housing Consortium of the East Bay (HCEB) which currently operates the HRC. Program 3.2.3: Partner with Affordable Housing and Service Providers; and Program 3.4.2: Rental Assistance and Tenant Support Services. The Rental Assistance program will be administered by both HCEB and CityServe, providers of crisis stabilization for homeless families and individuals in the Tri-Valley area. Open Heart Kitchen operates the Overnight Refuge Shelter as part of the Vineyard Resource Center.

Activities Detail (Activities Detail (Must make a selection on Formula Allocation Application worksheet under Eligible Activities, §301))

§301(a)(6) Assisting persons who are experiencing or At risk of homelessness, including, but not limited to, providing rapid rehousing, rental assistance, supportive/case management services that allow people to obtain and retain housing, operating and capital costs for navigation centers and emergency shelters, and the new construction, rehabilitation, and preservation of permanent and transitional housing.

§302(c)(4)(E)(i) Provide a detailed and complete description of how allocated funds will be used for the proposed Activity.

For years 2, 3, 4, and 5 of the proposed amended 5-year PLHA plan, the allocated funds will be used to support the activities consistent with the PLHA guidelines assisting persons experiencing or at risk of homelessness. The funding will support operations of the Vineyard Resource Center project. The scope of services provided includes the full-time position of Housing Navigator,operations of the seven-day per week shelter for persons experiencing homelessness, and rental assistance for persons experience or at risk of homelessness. The Housing Navigator position will provide necessary housing guidance and supportive case management to assist homeless individuals and households in finding permanent housing, housing applications, and housing counseling. The rental assistance programs will provide homeless individuals and households of the Tri-Valley with deposit assistance and termed rental assistance as needed to prevent or eliminate homelessness.

Complete the table below for each proposed Activity to be funded with 2020-2023 PLHA allocations. If a single Activity will be assisting households at more than one level of Area Median Income, please list the Activity as many times as needed to capture all of the AMI levels that will be assisted, but only show the percentage of annual funding allocated to the Activity one time (to avoid double counting).

Funding Allocation Year	2020	2021	2022	2023											
Type of Activity for Persons Experiencing or At Risk of Homelessness	Shelter Operations, Housing Navigation, Rental	Shelter Operations, Housing Navigation, Rental	Shelter Operations, Housing Navigation, Rental	Shelter Operations, Housing Navigation, Rental											
§302(c)(4)(E)(i) Percentage of Funds Allocated for the Proposed Activity	100%	95%	95%	95%											
§302(c)(4)(E)(ii) Area Median Income Level Served	30%	30%	30%	30%											**TOTAL**
§302(c)(4)(E)(ii) Unmet share of the RHNA at AMI Level **Note: complete for years 2020, 2021, 2022 only**	758	648	537	433											2376
§302(c)(4)(E)(ii) Projected Number of Households Served	110	111	104	104											429
§302(c)(4)(E)(iv) Period of Affordability for the Proposed Activity **(55 years required for rental housing projects)**	55 years	55 years	55 years	55 years											

§302(c)(4)(E)(iii) A description of major steps/actions and a proposed schedule for the implementation and completion of the Activity.

The construction of the Vineyard 2.0 Resource Center project was completed in December of 2023 and the Housing Resource Center opened its doors on January 22, 2024. The City will contract with the property manager, HCEB, that operates the Vineyard Housing Resource Center to expand the operations, fill the new Housing Navigator position, and provide housing guidance and case management to homeless individuals and households. The Open Heart Kitchen is currently operating the Overnight Refuge Shelter in the Vineyard Resource Center, showers, laundry, and meals. The Rental Assistance Program will be administered by both HCEB at the Vineyard Resource Center and CityServe. The City will enter into grant agreements with HCEB, Open Heart Kitchen, and CityServe. HCEB, at the Vineyard HRC, and the CityServe of Tri-Valley will be the entities to receive the funds from the grantee for rental assistance.

LIVERMORE
CALIFORNIA

CITY COUNCIL STAFF REPORT **ITEM NO. 6.3**

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Paul Spence, Assistant City Manager

SUBJECT: Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City.

RECOMMENDED ACTION

Planning Commission and staff recommend the City Council take the following actions to authorize the future development of light industrial buildings on the SMP 39 and SMP 40 properties:

1. Adopt a resolution certifying the Final Environmental Impact Report for the SMP 39/SMP 40 Project and adopting California Environmental Quality Act Findings, A Statement of Overriding Considerations, and a Mitigation Monitoring and Reporting Program;
2. Adopt a resolution approving General Plan Amendment (GPA) 21-001, Vesting Tentative Parcel Map (SUB) 21-008, Vesting Tentative Tract Map (SUB) 21-009, and Site Plan Design Review (SPDR) 21-008;
3. **Introduce an ordinance** and waive the first reading pre-zoning the SMP 39 and SMP 40 properties to Planned Development - Industrial (PD-I) 22-001 and the Additional Annexation Only Parcels to Open Space - Floodplain (OS-F) consistent with Planned Development - Industrial (PD-I) 22-001, Zoning Map Amendment (ZMA) 21-002, and Development Code Amendment (DCA) 21-005;
4. **Introduce an ordinance** and waive the first reading authorizing execution of Pre-Annexation and Development Agreement (DA) 21-001;
5. **Introduce an ordinance** and waive the first reading authorizing execution of Pre-Annexation and Development Agreement (DA) 23-002; and
6. Adopt a resolution authorizing submittal of an application to LAFCo for a Sphere of Influence and Annexation modification consistent with Annexation and Prezoning (APZ) 21-003.

SUMMARY

In September 2021, Overton Moore Properties applied to the City of Livermore for several land use entitlements for the properties known as SMP 39 and SMP 40 (Project). The Project includes annexation and development of SMP 39 (Assessor Parcel Number [APN] 904-3-1-4) and SMP 40 (APN 904-10-2-2) with approximately 1.51 million square feet of light industrial uses. In addition, the Project includes annexation of four additional parcels (APNs 904-10-2-3, -5, -7, and -8) located east of SMP 40 (Additional Annexation Only Parcels). Development is not proposed on the Additional Annexation Only Parcels because they are proposed to remain as open space.

SMP 39 is vacant grassland and approximately 52 acres, located west of the Oaks Business Park and south of West Jack London Boulevard and the Livermore Municipal Airport. SMP 40 is also vacant grassland and approximately 41 acres, located south of the Oaks Business Park and west of Isabel Avenue/State Route (SR) 84. The Additional Annexation Only Parcels are also vacant grassland (except for Zone 7 flood control facilities and PG&E infrastructure) and consist of four parcels ranging from 0.2 acre to 5.76 acres, located immediately east of SMP 40. See Attachment 5, Approximate Project Site Boundaries Map for the Project location.

The Project includes off-site roadway, bicycle lane, and other public improvements along West Jack London Boulevard adjacent to SMP 39 and on- and off-site trail improvements adjacent to and east of SMP 40. The proposed Planned Development zoning for both SMP 39 and SMP 40 will allow some typical light industrial uses such as warehouse and distribution (although limited to a maximum of 20% of floor space in SMP 39) but other even more economically desirable and higher job generating uses such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses.

The Project requires several land use entitlements including an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Planned Development, Development Code Amendment, Vesting Tentative Subdivision Maps, and Site Plan Design Review for SMP 40. A Site Plan Design Review entitlement is required for the actual development of SMP 39 and SMP 40 but is only currently proposed for SMP 40 at this time. A Site Plan Design Review entitlement will be required at a later date for the future development of SMP 39 and will be subject to Planning Commission review and approval. See Attachment 1, Staff Analysis, for more details on the project.

According to the applicant, they plan to construct the two SMP 40 buildings in the very near future. The applicant has entered into a lease agreement with Lam Research, a company currently located in Livermore at 1 Portola Avenue, to expand their business and occupy the larger of the two buildings on the SMP 40 property.

The Planning Commission (PC) voted unanimously to recommend the City Council approve the Project on March 5, 2024, as described in more detail in the Discussion section below. See Attachments 2, 3 and 4 below for the PC staff report, supplemental materials and minutes.

DISCUSSION

BACKGROUND

On September 22, 2021, Overton Moore Properties (Applicant) applied to the City of Livermore for several land use entitlements to bring SMP 39 into the City's Sphere of Influence (SOI), annex SMP 39 and SMP 40, and develop SMP 39 and SMP 40 with approximately 1.51 million square feet (sf) of light

industrial land uses. The original Project proposal included bringing SMP 38 (west of and adjacent to SMP 39) into the City of Livermore's SOI and annexing four additional parcels (Additional Annexation Only Parcels) east of SMP 40. City staff requested including SMP 38 and the Additional Annexation Only Parcels to create logical city boundaries that align with the City's South Livermore Urban Growth Boundary (UGB). Collectively, these elements constituted the SMP 39/SMP 40 Project (Project). Refer to Attachment 5 for the Approximate Project Site Boundaries Map.

The SMP numbers are Surface Mining Permit (SMP) numbers applicable to each site. The Surface Mining Permits for each of the sites were approved in 2004 by Alameda County to allow for the extraction of sand and gravel (i.e., aggregate) within the sites; however, aggregate mining has not occurred within any of the sites, and they are currently vacant grassland. Staff is recommending the actual SMP Surface Mining Permit rights be forfeited by the applicant through the Development Agreement and conditions of approval, to guarantee mining does not occur on SMP 39 and 40 in the future.

The Project originally included an SOI amendment to move SMP 38 from the City of Pleasanton's SOI to the City of Livermore's SOI. Approval of the SOI amendment would not have altered the existing land use or zoning designation of SMP 38. Annexation of SMP 38 into the City of Livermore was not proposed as part of the Project, nor was development of SMP 38. However, during the entitlement review process, the City of Pleasanton expressed concerns related to potential impacts to their city from the future SMP 38 development. Following discussion with the City of Pleasanton, SMP 38 was removed from the Project. SMP 38 is not shown on the project maps since it is no longer part of the project.

The City of Pleasanton staff has agreed to participate in a future discussion related to the SOI amendment for SMP 38 when a development proposal is brought forth for the property. Furthermore, City of Pleasanton staff is proposing a resolution of support to move SMP 39 into Livermore's SOI for consideration by their City Council on March 19, 2024.

On November 8, 2021, the City Council authorized staff to proceed with concurrent review of the requested Project entitlements and negotiating terms for a Pre-Annexation/Development Agreement with the Applicant. On March 28, 2022, the City entered into a Professional Services Agreement with Rincon Consultants, Incorporated to provide planning assistance on the entitlement and environmental review.

The Project was reviewed by the City Airport Commission and Alameda County Airport Land Use Commission (ALUC) on October 2, 2023, and October 9, 2023, respectively and determined the project to be compatible with the Livermore Airport Land Use Compatibility Plan (ALUCP), with the condition that avigation easements be required for each of the Project properties.

PROJECT DESCRIPTION

The Project covers approximately +/-105 acres near the northwest portion of the City in unincorporated Alameda County. SMP 39, SMP 40, and the Additional Annexation Only Parcels are within the City of Livermore South Livermore UGB; however, SMP 39 is within the City of Pleasanton's SOI. Accordingly, an SOI amendment is proposed to bring SMP 39 into City of Livermore's SOI (Attachment 6).

SMP 39 is vacant grassland and approximately 52 acres, located west of the Oaks Business Park and south of West Jack London Boulevard and the Livermore Municipal Airport. SMP 40 is also vacant grassland and approximately 41 acres, located south of the Oaks Business Park and west of Isabel Avenue/State Route (SR) 84. The Additional Annexation Only Parcels are also vacant grassland (except

for Zone 7 flood control facilities and PG&E infrastructure) and consist of four parcels ranging from 0.2 acre to 5.76 acres, located immediately east of SMP 40. These four parcels are separately owned by four different agencies including the City of Livermore, Zone 7 Water Agency, PG&E, and Caltrans.

In addition to the SOI amendment for SMP 39, the Project includes annexation of SMP 39 into the City of Livermore. The Project also includes annexation of SMP 40 and the Additional Annexation Only Parcels, which are currently within the City of Livermore's SOI, into the City of Livermore (Attachment 7). The Project includes development of SMP 39 and SMP 40 with approximately 1.51 million sf of light industrial uses. Development is not proposed on the Additional Annexation Only Parcels.

The proposed PD zoning for both SMP 39 and 40 will allow some typical light industrial uses such as warehouse and distribution (although limited to a maximum of 20% of floor space in SMP 39) as well as other more economically desirable and higher job generating uses such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses (Attachment 25). In addition, SMP 40 will be subdivided into two parcels to accommodate two industrial tilt-up buildings: one totaling 470,530 sf and the other 288,750 sf. SMP 39 is only being subdivided at this time into six parcels for future light industrial buildings projected to range in size from approximately 89,400 to 183,600 sf of building floor area.

The Project includes construction of all necessary public improvements including street and utility connections and pedestrian, bicycle, and landscaping improvements. Specifically, for SMP 39, the Project includes right-of-way dedication for the ultimate build out of West Jack London Boulevard, as described in the City's General Plan. Ultimate buildout of West Jack London Boulevard is anticipated to consist of four through lanes, including two through lanes on each side, a landscaped median in the center of the roadway, as well as an eight-foot bicycle lane on each side of the roadway, separated from the through lanes by a two-foot buffer. The applicant will be required to build part of these improvements along their frontage on the south side of West Jack London Boulevard, including the median, when the applicant develops the SMP 39 site.

The Project also includes re-construction of an at-grade, paved multi-use trail within a 38.5-foot trail easement along the SMP 39 frontage on the south side of West Jack London Boulevard, consistent with the City's Active Transportation Plan (ATP). This would provide a connection to the existing trail along the western boundary of the Oaks Business Park and eventually to the Arroyo Mocho Trail on the east side of Isabel Avenue/SR 84.

The Project includes a paved at-grade, on-site trail along the boundaries of the SMP 40 property, consistent with the ATP. Specifically, the on-site trail would extend from the northeastern corner of the SMP 40 property, along the property's eastern, southern, and western boundaries, before connecting to an existing off-site paved at-grade trail north of the SMP 40 property, which extends along the west side of the Oaks Business Park to the north and connects to the trail on West Jack London Boulevard. These on-site trail alignments for SMP 39 and 40 are shown in Attachments 8 and 9, respectively.

In addition, the Project includes a new off-site trail connection from the Project site to the existing Arroyo Mocho Trail consistent with the ATP, located on the east side of Isabel Avenue/ SR 84. Three options for the off-site trail connection were considered and evaluated in the EIR, including the following, and shown in Attachment 10:

- Trail Connection Option 1 – At-Grade Crossing at Discovery Drive;

- Trail Connection Option 2 – Undercrossing at Isabel Bridge; and
- Trail Connection Option 3 – Overcrossing of Isabel Avenue/SR 84.

Following evaluation of each of the trail connection options, including pedestrian and bicyclist safety, ease of use, and storm maintenance-related considerations, Planning Commission and staff are recommending Trail Connection Option 3 – Overcrossing of Isabel Avenue/SR 84.

If the City Council approves Trail Connection Option 3, the applicant will prepare design and construction documents and submit necessary permits in coordination with the City, Caltrans, and other responsible agencies. The applicant will also pay a portion of bridge costs and construct the bridge as explained in the Development Agreement section in Attachment 1, Staff Analysis.

The Project includes the following entitlements:

- General Plan Amendment (GPA) 21-001 to designate SMP 39 and SMP 40 as Low Intensity Industrial (LII) and the Additional Annexation Only Parcels as Parks, Trailways, and Recreation Areas (OSP), consistent with their respective adjacent land uses.
- Annexation/Prezoning (APZ) 21-003 to prezone SMP 39 and SMP 40 to Planned Development – Industrial (PD-I) 22-001 to allow for a mixture of industrial and related uses and prezoning the Additional Annexation Only Parcels to Open Space-Floodplain (OS-F). In addition, the entitlement would authorize an application to the Alameda County Local Agency Formation Commission (LAFCo) for a SOI change and annexation into the City of Livermore. LAFCo is the final approval authority for the annexation and SOI change. The City Council is the final review authority on the remainder of the listed land use entitlements.
- Zoning Map Amendment (ZMA) 21-002, Planned Development Zoning (PD-I) 22-001, and Development Code Amendment (DCA) 21-005 to rezone SMP 39, SMP 40, and the Additional Annexation Only Parcels. SMP 39, SMP 40, and the Additional Annexation Only Parcels are currently zoned Agricultural (A) in Alameda County with an overlay permitting quarry operations on SMP 39 and SMP40 only. These entitlements would rezone SMP 39 and SMP 40 to PD-I 22-001 that will allow a mixture of Industrial and related uses and the Additional Annexation Only Parcels to OS-F for continued open space protection near the Arroyo Mocho.
- Subdivision (SUB) 21-008 and (SUB) 21-009 to approve a Vesting Tentative Tract Map for SMP 39 (Attachment 8) and a Vesting Tentative Parcel Map for SMP 40 (Attachment 9). SMP 39 will be subdivided into six lots, ranging in size from approximately 5.75 acres to 11.76 acres along with associated improvements. SMP 40 will be subdivided into two lots, approximately 24.1 acres and 16.5 acres, respectively, along with associated improvements.
- Site Plan Design Review (SPDR) 21-008 to ensure the architecture and landscape design of the project complies with City standards. This entitlement is for SMP 40 only. A Site Plan Design Review entitlement will be required at a later date for the future development of SMP 39 and will be subject to review and approval by Planning Commission.
- Development Agreement (DA) 21-001 and DA 23-002 to secure the Applicant's entitlements until the Project properties are annexed into the City. Further, the DAs establish terms and obligations for public benefits, including the Applicant’s financial contribution toward and construction of the off-site trail improvements and financial contribution to the City’s Office of Innovation and Economic Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

DESCRIPTION, CONTEXT, AND ANALYSIS

For additional project description detail and site context, and a summary of the proposed Environmental Impact Report (EIR) required per CEQA, please review the attached Staff Analysis memo (Attachment 1).

PLANNING COMMISSION AND PUBLIC COMMENT

On March 5, 2024, the Planning Commission considered the Project at a public hearing and unanimously voted to recommend the City Council approve the Project subject to minor modifications to the design of on-site trail connection, the Transportation Demand Management (TDM) Program reporting requirements, and tree species located near the proposed employee break areas. The Draft Planning Commission meeting minutes summarize the discussion (Attachment 4), which included public comments supporting and opposing the project, the use of local labor, and the environmental analysis. Refer to Attachment 2 for the Planning Commission staff report.

Prior to the public hearing, staff received 10 public comments (Attachment 3) regarding the use of local labor and the environmental analysis. In addition, the Planning Commission discussed the proposed zoning, environmental analysis, site plan, the proposed transportation demand management program, stormwater facilities, agricultural impacts, LAFCo process, the proposed development agreements, and anticipated community benefits.

ENVIRONMENTAL DETERMINATION

As described in the California Environmental Quality Act (CEQA) Resolution, an Environmental Impact Report was prepared for the Project. Planning Commission and staff recommend the City Council certify the Final Environmental Impact Report (see Attachment 11). A summary of the findings and conclusions in the Final EIR are described in Attachment 1, Staff Analysis.

FISCAL AND ADMINISTRATIVE IMPACTS

Upon annexation, the City would receive a portion of Project area's property taxes and sales taxes. These would be collected and deposited into the City's General Fund, which the City would use to fund essential City services. These taxes and fees would offset costs the City would incur associated with providing urban services such as maintaining street and sidewalk improvements, police and fire, parks, library services and other community amenities. In addition, the City would receive annual sewer service fees used to maintain the wastewater treatment and conveyance system. The Project will also create an undetermined amount of temporary construction jobs and permanent jobs to serve the future businesses that will have positive economic spin-off benefits for the local economy.

The Applicant will pay the costs associated with the annexation process including the preparation of all necessary LAFCo application materials and City staff time through the City's Annexation/Prezoning application fee.

The Applicant will also pay all the design and construction costs of public improvements, with the exception of a portion of the off-site trail improvement construction costs. As described in the Staff Analysis (Attachment 1), the estimated cost of these improvements are approximately $2.5 million. The Development Agreement for SMP 40 requires the Applicant to contribute $750,000 towards these improvements. The City and Applicant will diligently pursue grant funding opportunities to fund the remaining cost. In the event that a grant funding opportunity is not successful, the City will credit the Applicant for constructing the off-site trail improvements using Traffic Impact Fees, less the $750,000 Applicant contribution.

Finally, the applicant will contribute $100,000 to the City's Office of Innovation and Economic Development Department to help market the SMP 39 site to permitted and desirable businesses such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses that support an innovation-driven economy, generate high wage jobs, or generate substantial sales tax revenues.

STAFF ANALYSIS

DATE: March 25, 2024

TO: Honorable Mayor and City Council

FROM: Paul Spence, Assistant City Manager

SUBJECT: Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City.

PROJECT SITE CONTEXT

SMP 39 is vacant grassland and approximately 52 acres, located west of the Oaks Business Park and south of West Jack London Boulevard and the Livermore Municipal Airport. SMP 40 is also vacant grassland and approximately 41 acres, located south of the Oaks Business Park and west of Isabel Avenue/State Route (SR) 84. The Additional Annexation Only Parcels are also vacant grassland (except for Zone 7 flood control facilities and PG&E infrastructure) and consist of four parcels ranging from 0.2 acre to 5.76 acres, located immediately east of SMP 40. These four parcels are separately owned by four different agencies including the City of Livermore, Zone 7 Water Agency, PG&E, and Caltrans. Tables 1 through 3, below, summarize the General Plan land use designation, zoning classification, and existing land use on the SMP 39, SMP 40, and Additional Annexation Only Parcels properties and surrounding properties.

Table 1: SMP 39 Property and Surrounding Land Uses

	General Plan Designation	Zoning Designation	Existing Land Use
North	City of Livermore: Community Facilities – Airport (CF-AIR)	City of Livermore: Airport – Service (AIR-SE)	Livermore Municipal Airport
South	Alameda County: Water Management City of Livermore: Open Space/Sand and Gravel (OSP/S&G)	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Gravel quarries and industrial ponds associated with mining
East	City of Livermore: Low Intensity Industrial (LII)	City of Livermore: Planned Development Industrial (PD-I) 01-003	Oaks Business Park

West	Alameda County: Industrial/Water Management City of Livermore: Open Space/Sand and Gravel (OSP/S&G)/Limited Agriculture (LDAG)	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Primarily vacant, with several structures in the northwest corner of the site related to a former horse ranch. Property includes Alameda County permit for surface mining under Surface Mining Permit 38
Subject Site	Alameda County: Industrial City of Livermore: Open Space/Sand and Gravel (OSP/S&G)	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Vacant

Table 2: SMP 40 Property and Surrounding Land Uses

	General Plan Designation	Zoning Designation	Existing Land Use
North	City of Livermore: Low Intensity Industrial (LII)	City of Livermore: Planned Development Industrial (PD-I) 01-003	Oaks Business Park
South	Alameda County: Industrial City of Livermore: Open Space/Sand and Gravel (OSP/S&G)	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Arroyo Mocho, open fields, railroad tracks, and gravel quarries associated with mining operations
East	Alameda County: Industrial City of Livermore: Open Space/Sand and Gravel (OSP/S&G), Open Space (OSP), and Urban Medium Residential (UM)	Alameda County: Agriculture (A) City of Livermore: Planned Unit Development (PUD) 79-88	Vacant land, PG&E substation, Isabel Avenue/SR 84, and Single-Family Residences
West	Alameda County: Water Management City of Livermore: Open Space/Sand and Gravel	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Vacant land, gravel quarries, and industrial ponds associated with mining
Subject Site	Alameda County: Industrial City of Livermore: Open Space/Sand and Gravel (OSP/S&G)	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Vacant

Table 3: Additional Annexation Only Parcels Property and Surrounding Land Uses

	General Plan Designation	Zoning Designation	Existing Land Use
North	City of Livermore: Low Intensity Industrial (LII)	City of Livermore: Planned Development Industrial (PD-I) 01-003	Oaks Business Park

South	Alameda County: Industrial/Water Management City of Livermore: Open Space/Sand and Gravel (OSP/S&G)	Alameda County: Agriculture (A) with an overlay permitting quarry operations	Arroyo Mocho, open fields, railroad tracks, and gravel quarries associated with mining operations
East	City of Livermore: Open Space (OSP) and Urban Medium Residential (UM)	City of Livermore: Planned Unit Development (PUD) 79-88	Isabel Avenue/SR 84 and Single-Family Residences
West	Alameda County: Water Management City of Livermore: Open Space/Sand and Gravel	Alameda County: Agriculture (A) with an overlay permitting quarry operations on SMP 40	Vacant land, gravel quarries, and industrial ponds associated with mining
Subject Site	Alameda County: Industrial City of Livermore: Open Space/Sand and Gravel (OSP/S&G)	Alameda County: Agriculture (A)	Vacant land, PG&E substation on a portion of the Additional Annexation Only Parcels

STAFF ANALYSIS

General Plan

The Livermore General Plan currently designates SMP 39, SMP 40, and the Additional Annexation Only Parcels as Open Space/Sand and Gravel (OSP/S&G). The OSP/S&G designation is applied to areas of Statewide concern due to their demonstrated level of quality aggregate. This designation primarily allows for open space, with sand and gravel extraction, processing and related activities as a secondary use.

The Project proposes to amend the existing OSP/S&G designation to Low Intensity Industrial (LII) for the SMP 39 and SMP 40 properties to allow for light industrial development. In addition, the Project proposes to change the existing OSP/S&G designation for the Additional Annexation Only Parcels to Parks, Trailways, and Recreation Areas (OSP). Development is not proposed on the Additional Annexation Only Parcels.

The LII designation includes manufacturing, warehousing, research and development facilities, fully-enclosed recycling facilities, and administrative and professional offices. Low-intensity industrial uses are focused around the Livermore Municipal Airport. The OSP designation is applied to areas to be maintained as permanent or semi permanent open space because they have valuable natural or scenic resources, or because they are unsuitable for development due to environmental hazards. This designation includes parks and trails, creeks and arroyos, and areas of scenic value.

The proposed General Plan Amendment to change the land use designation for SMP 39 and SMP 40 from OSP/S&G to LII would is consistent with the following General Plan policies:

- Objective LU-1.1 Locate new development so as to create a consolidated pattern of urbanization, maximizing the use of existing public services and facilities.
    - Response: The project supports light industrial development in proximity to existing light industrial development and includes the use of existing public streets, services, and facilities.
- Policy LU-1.1.P1. The City shall annex all lands currently under County jurisdiction and within the

UGB prior to development in areas designated for urban uses.
    - Response: The project includes the annexation of land currently under Alameda County jurisdiction and within the South Livermore UGB.
- Objective LU-4.2 Ensure that new development complements its local context and minimizes impacts on the environment
    - Response: The light industrial development is compatible with and complements the existing light industrial context, including the Livermore Municipal Airport and the Oaks Business Park. The Project will minimize impacts on the environment by locating development adjacent to these existing industrial uses, limiting residents and other sensitive receptors to impacts such as noise.
- Objective LU-4.3 Designate appropriate areas for industrial uses in order to prevent negative impacts on the health, safety, and welfare of residents.
    - Response: The project proposes industrial development similar to the industrial uses located at the existing Oaks Business Park. SMP 39 is located approximately 2,745 feet from the nearest single-family residences and SMP 40 is located approximately 884 feet from the nearest single-family residences, with State Hwy. 84 located in between. Therefore, these properties are appropriately designated as light industrial use.
- Policy LU-4.3.P1. Industrial development shall be subject to design principles and consistent with General Plan policies.
    - Response: The project's site plan and architectural design is consistent with the Livermore Design Standards and Guidelines.
- Objective LU-4.4 Protect the Municipal Airport from encroachment by incompatible uses.
    - Response: SMP 39 and SMP 40 include light industrial development, which is a compatible land use regarding noise, height/flight clearance, public safety, etc. per the Alameda County Airport Land Use Compatibility Plan (ALUCP), which was confirmed by the Alameda County Airport Land Use Commission on October 9, 2023. In addition, the Livermore Airport Commission on October 2, 2023, found the Project compatible with the Livermore Airport Protection Area and the ALUCP with the condition that avigation easements be required for each of the Project properties. This condition is included in the conditions of approval for the Project (Attachment 21).
- Policy LU-4.4.P1. The City shall encourage development of property within the immediate vicinity of the Airport for light industrial and transportation uses to the extent that noise standards and flight clearance requirements are maintained, and environmental impacts are adequately mitigated.
    - Response: See response above.
- Objective CIR-2.3 Provide a bicycle, pedestrian, and trails network.
    - Response: The project supports this objective by adding to the bicycle, pedestrian and trails network along West Jack London Boulevard, along the SMP 40 property, and an off-site trail connection over Isabel Avenue/SR 84 creating a connection to the Arroyo Bike Trail.
- Objective ED-1.1 Implement policies and actions that will encourage existing businesses to remain and grow in Livermore, and attract a range of new businesses to locate in Livermore.
    - Response: The Project provides new opportunities for job creation by allowing existing businesses to grow in Livermore and attracting new businesses to locate in Livermore, including desired uses in SMP 39 and SMP 40 such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses. Furthermore, the proposed Development Agreements require the Applicant to provide a financial contribution to the City's Office of Innovation and Economic

Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

Annexation/Prezoning

SMP 39, SMP 40, and the Additional Annexation Only Parcels are within the City of Livermore South Livermore UGB; however, SMP 39 is within the City of Pleasanton's SOI. Accordingly, an SOI Amendment SMP 39 is proposed in order to move SMP 39 into the City of Livermore's SOI.

SOI areas are used to plan for the probable physical boundaries and service area of a local agency. Annexation is the process by which unincorporated land is made a part of (incorporated into) the City of Livermore. The Alameda County LAFCo is the local agency that oversees boundary changes, including SOI amendments and annexations, to cities and special districts. Generally, LAFCo's purpose is to ensure the orderly formation of local government agencies to preserve agricultural and open space lands, discourage urban sprawl, and ensure efficient provision of urban services. The SOI change and annexation will require final approval by LAFCo if the City Council endorses an application to LAFCo.

It should be noted that annexation of these properties requires landowner consent as part of the application to LAFCo. This includes consent from Zone 7, PG&E, and Caltrans for annexation of the Additional Annexation Only Parcels. At the time of writing this report, landowner consent has been provided by Zone 7 only. Staff is continuing to pursue landowner consent from PG&E and Caltrans. Staff recommends the Additional Annexation Only Parcels remain part of the project since altogether, these parcels create a logical city boundary. If the landowner consent from these two agencies is not provided by the time of LAFCo application submittal, LAFCo staff will prepare a notice to these agencies regarding annexation and their right to protest the annexation in advance of the LAFCo public hearing.

Upon the SOI amendment and annexation, the City municipal boundary would change to include the entire Project site including SMP 39, SMP 40, and the Additional Annexation Only Parcels. The Project's subdivision and development entitlements will be secured through a Development Agreement until the SOI amendment is complete for SMP 39 and SMP 39, SMP 40, and the Additional Annexation Only Parcels are annexed into the City.

Prezoning is required before annexing a property to ensure the property's zoning classification is consistent with the City's General Plan (Government Code Section 56375). Prezoning designations then become formal zoning designations upon annexation into the City. The Project proposes to rezone SMP 39 and SMP 40 to PD-I 22-001. The proposed use, building form, lot size, layout, and overall character is compatible with the surrounding industrial uses. The proposed PD-I 22-001 zoning for the SMP 39 and SMP 40 properties will provide consistency and compatibility with the surrounding development.

In addition, the Additional Annexation Only Parcels will be annexed into the city, and also require a prezoning designation upon annexation. The proposed Open Space – Floodplain (OS-F) zoning for the Additional Annexation Only Parcels is consistent with the parcel's natural features and attributes, including their proximity to Arroyo Mocho.

Vesting Tentative Subdivision Maps

The Project entitlements include a Vesting Tentative Tract Map for SMP 39 and a Vesting Tentative Parcel Map for SMP 40 in conformance with Part 10 of the Livermore Development Code (and Government Code and the Subdivision Map Act, by reference).

The Vesting Tentative Tract Map for SMP 39 would subdivide the single existing parcel into six lots, ranging in size from approximately 5.75 acres to approximately 11.76 acres (Attachment 8). These six lots would facilitate development of light industrial buildings ranging in size from 89,400 sf to 183,600 sf. Access to these new lots would be via three new 40-foot-wide driveways from West Jack London Boulevard to the north.

The Vesting Tentative Parcel Map for SMP 40 would subdivide the single existing parcel into two parcels, creating an approximately 24.1-acre western lot and an approximately 16.5-acre eastern lot (Attachment 9). These two lots would facilitate development of light industrial buildings. The western parcel, referred to as Building 1, will have an approximately 470,530-sf building and the eastern parcel, referred to as Building 2, will have an approximately 288,750-sf building. Access to SMP 40 would be provided through new internal roadway connections to Atlantis Street and Challenger Street to the north, which currently serve the existing Oaks Business Park.

Site Plan Design Review

The Site Plan Design Review (SPDR) 21-008 entitlement is to review SMP 40's site layout, landscape design, and building architecture and evaluate consistency with the City's Design Standards and Guidelines.

A SPDR entitlement will be required later for the future development of SMP 39 and will be subject to Planning Commission review and approval. There is a conceptual site plan for SMP 39 in the attached development plans (Attachment 8) to show what could be built, but that will not be analyzed below since an SPDR is not being approved at this time. The conceptual SMP 39 site plan does show the potential square footage that was necessary for the Draft EIR to analyze potential traffic, noise, and other environmental impacts.

Parking

A total of 633 vehicle parking stalls would be provided at the SMP 40 site, which exceeds the parking requirement. The 633 parking stalls would be located throughout the site, including along the northern and southern sides of Building 1, and northeast of Building 2. The 164 truck/trailer parking stalls would be located opposite the internal drive aisles from each loading dock area. The loading docks are located on the east and west side of Building 1 and the north and south side on Building 2. All parking will be screened with landscaping consistent with the Livermore Development Code and Industrial Design Standards and Guidelines. In addition, the project would provide 41 bicycle parking spaces, which exceeds the requirement of 30 spaces. The bicycle parking is located near the entrances on all sides of the buildings, including the main office entrances to Building 1 and Building 2.

Landscape Design

The site plan for SMP 40 includes landscape design to support and complement the building architecture and the surrounding industrial area. The proposed planting plan for SMP 40 includes a variety of trees, shrubs, and groundcovers that are distributed throughout the site and around the proposed buildings. Tree species include a mixture of evergreen and deciduous trees including Italian Cypress, Sycamore, Chinese Pistache, Swan Hill Olive, Brisbane Box, Crape Myrtle, Holly Live Oak, and Fruitless Olive. All the proposed planting would be low water usage consistent with the Water Efficient Landscape Ordinance, Livermore Municipal Code 13.25.

The project provides screening for the SMP 40 loading docks with trees and a wall as viewed from Isabel Avenue/SR 84 and trees that will screen loading docks from Stanley Boulevard to the south. This is consistent with the screening provisions for service areas per the Livermore Design Standard and Guidelines.

Development Code Table 4.12, Required Interior Parking Lot Landscaping describes the minimum parking lot landscaping required based on the number of parking spaces. SMP 40 meets this standard by providing at or above 16 percent of the parking area in landscaped area. Development Code Table 4.13, Required Shade Trees, requires 16 trees per gross site area acre, minus building coverage. The western parcel includes 108 trees on the parcel, which does not meet the minimum requirement of 212 trees. Therefore, a condition is included in the conditions of approval for the Project (Attachment 21) to meet this requirement. The eastern parcel includes 176 trees, which exceeds the minimum requirement of 165 trees. The Livermore Development Code requires that 20 percent of the trees be planted at 24-inch box size. The western parcel includes 22 24-inch box trees, meeting this requirement, while the eastern parcel incudes 137 24-inch box trees, exceeding this requirement.

Therefore, the landscape design for SMP 40 is also consistent with the Industrial Design Standards and Guidelines including providing a hierarchy of plantings and minimum planting size requirements.

Public Art

The applicant has requested to pay the public art fee in compliance with Livermore Municipal Code Chapter 12.50. The public art fee will be paid prior to Building Permit issuance.

Architecture

Architecture for the two buildings on SMP 40 is primarily concrete tilt-up panels with smooth finishes, with aluminum storefront framing and tempered glass at building entrances and office areas. The buildings would be up to approximately 47 feet in height. Vertical parapets extend periodically above the primary roof line, as do a series of horizontal and vertical score lines. Together, these details break up the building wall planes. The roof parapets are designed to screen future roof-mounted equipment from public view. The building's roofline and wall plane design are also consistent with the Livermore Design Standards and Guidelines for Building Design, which require changes in wall planes or varying height and changes in building materials and colors.

Building colors proposed for the SMP 40 building are primarily off-white with contrasting gray along the horizontal bands and the vertical wall sections encompassing the parapets are a darker blue. Proposed window glazing is blue. These design details are consistent with the surrounding buildings at the Oaks Business Park.

Development Agreement

A Development Agreement functions as a Pre-Annexation Agreement and is necessary to secure the applicant's requested entitlements, until such time as LAFCo approves the annexation of SMP 39, SMP 40, and the Additional Annexation Only Parcels. In addition, off-site improvements are secured through the proposed Development Agreement between the property owner, Developer, and the City. The Development Agreements for SMP 39 and SMP 40 establishes terms, timing, and a performance schedule for offsite improvements and other public benefits (Attachments 8 and 9).

The Development Agreement would require the developer to pay $50,000 a year for a two-year period to

the City's Innovation and Economic Development Department towards marketing SMP 39 for the desired land uses identified in PD-I 22-001. Such uses include research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses that support an innovation-driven economy, generate high wage jobs, or generate substantial sales tax revenues.

In addition, the Development Agreement requires the Developer to design, construct, secure permits and contribute to an off-site grade-separated overcrossing (bridge) of Isabel Avenue/State Route 84 north of the existing railroad tracks and Stanley Boulevard as a required public benefit ("the Trail Overcrossing"). This off-site trail improvement includes trail connections from the terminus of the bridge to the existing off-site Arroyo Mocho trail east of Isabel Avenue and to the future on-site trail along the SMP 40 property frontage to the west of Isabel Avenue ("the Trail Connections").

The anticipated bridge span will be approximately 190-210 feet, running parallel with the existing railroad tracks to the south. The materials may consist of a fabricated truss and a weathered steel span bridge with concrete flooring. The final design may include lighting, cameras, and/or other safety and security measures as required by the City's Chief of Police and City Engineer.

It should be noted that beyond the details presented in this report, the final Trail Overcrossing and Trail Connection design is not intended for future review and approval by the Planning Commission.

The total cost for the Trail Overcrossing and Trail Connections is approximately $2.5 million. As a requirement of the Development Agreement, the Developer is required to contribute $750,000 towards the off-site trail improvements. The City and Developer will diligently pursue grant funding opportunities to fund the remaining Trail Overcrossing and Trail Connections, less the Developer Obligation. In the event that a grant funding opportunity is not successful, the City will credit the Developer using Traffic Impact Fees, less the $750,000 Developer's contribution. Once completed, the trail segment would connect the existing Arroyo Bike Trail to the existing trail on the west side of the Oaks Business Park and further west to the San Francisco Premium Outlets.

CEQA - Draft Environmental Impact Report

An Environmental Impact Report (EIR) has been prepared for the project in accordance with the California Environmental Quality Act (CEQA) (available online at http://www.cityoflivermore.net/citygov/cdd/planning/environ.htm).

The City of Livermore contracted with Raney Planning and Management (Consultant) to prepare an Environmental Impact Report (EIR) for the Project. A Notice of Preparation (NOP) to prepare an EIR for the Project in accordance with the California Environmental Quality Act (CEQA) was prepared and released for a 30-day public review period from January 6, 2023, through February 6, 2023. On January 17, 2023, the Planning Commission held a public hearing to receive public comments on the NOP. Four comment letters were received during the review period and two public comments were made at the public comment hearing. Public comments received during the NOP review period have been included as part of Appendix A of the Draft EIR in accordance with CEQA.

A Draft EIR was subsequently prepared to the analyze the Project's impacts to the environment. The Draft EIR identified the project's potential environmental impacts and the mitigation measures that would be required to be implemented. The following items were identified as being potentially significant:

- Agricultural Resources;
- Air Quality, Greenhouse Gas Emissions, and Energy;
- Biological Resources;
- Cultural and Tribal Cultural Resources;
- Hydrology and Water Quality;
- Noise;
- Public Services and Utilities; and
- Transportation

The Draft EIR concluded all impacts to be less than significant with mitigation, except for one impact related to Agricultural Resources which was determined to be significant and unavoidable. This impact is related to converting farmland to non-agricultural use. While the California Department of Conservation's Farmland Mapping and Monitoring Program does not classify the project properties as Farmland, LAFCo's criteria for Farmland classification differs from the State's criteria. Based on LAFCo's criteria, SMP 39 and SMP 40 have on-site soils that meet the criteria to be classified as Prime Farmland by LAFCo. Therefore, it was determined that the project would have a significant and unavoidable impact related to the conversion of farmland to non-agricultural use.

The Draft EIR was released for a 45-day public review period from August 30, 2023, through October 13, 2023. On October 3, 2023, the Planning Commission held a public hearing to receive public comments on the Draft EIR. Six comment letters were received during the Draft EIR public review period and three public comments were made at the public comment hearing. Public comments received during the Draft EIR review period have been included as part of the Final EIR in accordance with CEQA.

On January 16, 2024, a Final EIR for the Project was released including responses to all comments received during the Draft EIR public review period and associated revisions to the Draft EIR. The Final EIR also includes a Mitigation Monitoring and Reporting Program to ensure implementation of the mitigation measures identified within the EIR and Initial Study for the Project (Attachment 11). The City received seven comment letters related to the environmental analysis following the release of the Final EIR. Public comments received after the release of the Final EIR and associated responses to the comment letters are included in the Response to Comments Memorandum (Attachment 17).

LIVERMORE
CALIFORNIA

PLANNING COMMISSION STAFF REPORT **ITEM NO. 5.1**

DATE: March 5, 2024

TO: Chairperson and Members of the Planning Commission

FROM: Steve Riley, Acting Planning Manager

SUBJECT: Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City.

RECOMMENDED ACTION

Staff recommends the Planning Commission recommend the City Council take the following actions to authorize the future development of light industrial buildings on the SMP 39 and SMP 40 properties:

1. Adopt a resolution certifying the Final Environmental Impact Report pursuant to the California Environmental Quality Act (CEQA); and
2. Adopt a resolution approving Annexation/Prezoning (APZ) 21-003, Pre-Annexation and Development Agreement (DA) 21-001, Pre-Annexation and Development Agreement (DA) 23-002, General Plan Amendment (GPA) 21-001, Zoning Map Amendment (ZMA) 21-002, Development Code Amendment (DCA) 21-005, Planned Development-Industrial (PD-I) 22-001, Vesting Tentative Parcel Map (SUB) 21-008, Vesting Tentative Tract Map (SUB) 21-009, and Site Plan Design Review (SPDR) 21-008.

The Planning Commission's action is a recommendation to the City Council.

SUMMARY

In September 2021, Overton Moore Properties applied to the City of Livermore for several land use entitlements for the properties known as SMP 39 and SMP 40 (Project). The Project includes annexation and development of SMP 39 (Assessor Parcel Number [APN] 904-3-1-4) and SMP 40 (APN 904-10-2-2) with approximately 1.51 million square feet of light industrial uses. In addition, the Project includes annexation of four additional parcels (APNs 904-10-2-3, -5, -7, and -8) located east of SMP 40 (Additional Annexation Only Parcels). Development is not proposed on the Additional Annexation Only Parcels and they are proposed to remain as open space.

SMP 39 is vacant grassland and approximately 52 acres, located west of the Oaks Business Park and south of West Jack London Boulevard and the Livermore Municipal Airport. SMP 40 is also vacant grassland and approximately 41 acres, located south of the Oaks Business Park and west of Isabel Avenue/State Route (SR) 84. The Additional Annexation Only Parcels are also vacant grassland (except for Zone 7 flood control facilities and PG&E infrastructure) and consist of four parcels ranging from 0.2 acre to 5.76 acres, located immediately east of SMP 40. See Attachment 1, Approximate Project Site Boundaries Map for the Project location.

The Project includes off-site roadway, bicycle lane, and other public improvements along West Jack London Boulevard adjacent to SMP 39 and on- and off-site trail improvements adjacent to and east of SMP 40. The proposed Planned Development zoning for both SMP 39 and SMP 40 will allow some typical light industrial uses such as warehouse and distribution (although limited to a maximum of 20% of floor space in SMP 39) but other even more economically desirable and higher job generating uses such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses.

The Project requires several land use entitlements including an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Planned Development, Development Code Amendment, Vesting Tentative Subdivision Maps, and Site Plan Design Review for SMP 40. A Site Plan Design Review entitlement is required for the actual development of SMP 39 and SMP 40 but is only currently proposed for SMP 40 at this time. A Site Plan Design Review entitlement will be required at a later date for the future development of SMP 39 and will be subject to Planning Commission review and approval.

According to the applicant, they plan to construct the two SMP 40 buildings in the very near future, and there is an unnamed tenant to occupy at least one of the two buildings.

The Planning Commission's action is a recommendation to the City Council.

DISCUSSION

BACKGROUND

On September 22, 2021, Overton Moore Properties (Applicant) applied to the City of Livermore for several land use entitlements to bring SMP 39 into the City's Sphere of Influence (SOI), annex SMP 39 and SMP 40, and develop SMP 39 and SMP 40 with approximately 1.51 million square feet (sf) of light industrial land uses. At the request of City staff, the original Project proposal included bringing SMP 38 into the City of Livermore's SOI and annexing four additional parcels (Additional Annexation Only Parcels) west of SMP 40. City staff requested including SMP 38 and the Additional Annexation Only Parcels to create logical city boundaries that align with the City's Urban Growth Boundary (UGB). Collectively, these elements constituted the SMP 39/SMP 40 Project (Project). Refer to Attachment 1 for the Approximate Project Site Boundaries Map.

The SMP numbers are Surface Mining Permit (SMP) numbers applicable to each site. The Surface Mining Permits for each of the sites were approved in 2004 by Alameda County to allow for the extraction of sand and gravel (i.e., aggregate) within the sites; however, aggregate mining has not occurred within any of the sites, and they are currently vacant grassland. Staff is recommending the actual SMP County rights be forfeited by the applicant through the Development Agreement and

conditions of approval, to guarantee mining does not occur on these in the future.

The Project originally included an SOI amendment to move SMP 38 from the City of Pleasanton's SOI to the City of Livermore's SOI. Approval of the SOI amendment would not have altered the existing land use or zoning designation of SMP 38. Annexation of SMP 38 into the City of Livermore was not proposed as part of the Project, nor was development of SMP 38. However, during the entitlement review process, the City of Pleasanton expressed concerns related to potential impacts to their city from the future SMP 38 development. Following discussion with the City of Pleasanton, the City of Livermore staff decided to remove SMP 38 from the Project. SMP 38 is not shown on the project maps since it is no longer part of the project, but it is located directly west of SMP 39 along West Jack London Boulevard.

The City of Pleasanton has agreed to participate in a future discussion related to the SOI amendment for SMP 38 when a development proposal is brought forth for the property. Furthermore, City of Pleasanton staff is bringing a resolution of support to move SMP 39 into Livermore's SOI at their March 5, 2024 City Council meeting.

On November 8, 2021, the City Council authorized staff to proceed with concurrent review of the requested Project entitlements and negotiating terms for a Pre-Annexation/Development Agreement with the Applicant. On March 28, 2022, the City entered into a Professional Services Agreement with Rincon Consultants, Incorporated to provide planning assistance on the entitlement and environmental review.

The Project was reviewed by the City Airport Commission and Alameda County Airport Land Use Commission (ALUC) on October 2, 2023 and October 9, 2023, respectively and determined the project to be compatible with the Livermore Airport Land Use Compatibility Plan (ALUCP), with the condition that avigation easements be required for each of the Project properties.

PROJECT DESCRIPTION

The Project covers approximately +/-105 acres near the northwest portion of the City in unincorporated Alameda County. SMP 39, SMP 40, and the Additional Annexation Only Parcels are within the City of Livermore South Livermore UGB; however, SMP 39 is within the City of Pleasanton's SOI. Accordingly, an SOI amendment for SMP 39 is proposed in order to modify the SOI (Attachment 2).

SMP 39 is vacant grassland and approximately 52 acres, located west of the Oaks Business Park and south of West Jack London Boulevard and the Livermore Municipal Airport. SMP 40 is also vacant grassland and approximately 41 acres, located south of the Oaks Business Park and west of Isabel Avenue/State Route (SR) 84. The Additional Annexation Only Parcels are also vacant grassland (except for Zone 7 flood control facilities and PG&E infrastructure) and consist of four parcels ranging from 0.2 acre to 5.76 acres, located immediately east of SMP 40. These four parcels are separately owned by four different agencies including the City of Livermore, Zone 7 Water Agency, PG&E, and Caltrans.

In addition to the SOI amendment for SMP 39, the Project includes annexation of SMP 39 into the City of Livermore. The Project also includes annexation of SMP 40 and the Additional Annexation Only Parcels, which are currently within the City of Livermore's SOI, into the City of Livermore (Attachment 3). The Project includes development of SMP 39 and SMP 40 with approximately 1.51 million sf of light industrial uses. Development is not proposed on the Additional Annexation Only Parcels.

The proposed PD zoning for both SMP 39 and 40 will allow some typical light industrial uses such as

warehouse and distribution (although limited to a maximum of 20% of floor space in SMP 39) but other even more economically desirable and higher job generating uses such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses (Attachment 18). In addition, SMP 40 will be subdivided into two parcels to accommodate two industrial tilt-up buildings: one totaling 470,530 sf and the other 288,750 sf. SMP 39 is only being subdivided at this time into six parcels for future light industrial buildings projected to range in size from approximately 89,400 to 183,600 sf of building floor area.

The Project includes construction of all necessary public improvements including street and utility connections and pedestrian, bicycle, and landscaping improvements. Specifically, for SMP 39, the Project includes right-of-way dedication for the ultimate build out of West Jack London Boulevard, as described in the City's General Plan. Ultimate buildout of the roadway is anticipated to consist of four through lanes, including two 12-foot through lanes on each side, a 16-foot raised and landscaped buffer in the center of the roadway, as well as a eight-foot bicycle lane on each side of the roadway, separated from the through lanes by a two-foot buffer. The applicant will be required to build part of these improvements along their frontage on the south side of West Jack London Boulevard, including the median, when the applicant develops the SMP 39 site.

The Project also includes re-construction of an at-grade, paved multi-use trail within a 38.5-foot trail easement along the SMP 39 frontage on the south side of West Jack London Boulevard, consistent with the City's Active Transportation Plan (ATP). This would provide a connection to the existing trail along the western boundary of the Oaks Business Park and eventually to the Arroyo Mocho Trail on the east side of Isabel Avenue/SR 84.

The Project includes a paved at-grade, on-site trail along the boundaries of the SMP 40 property, consistent with the ATP. Specifically, the on-site trail would extend from the northeastern corner of the SMP 40 property, along the property's eastern, southern, and western boundaries, before connecting to an existing off-site paved at-grade trail north of the SMP 40 property, which extends along the west side of the Oaks Business Park to the north and connects to the trail on West Jack London Boulevard. These on-site trail alignments for SMP 39 and 40 are shown in Attachments 4 and 5, respectively.

In addition, the Project includes a new off-site trail connection from the Project site to the existing Arroyo Mocho Trail consistent with the ATP, located on the east side of Isabel Avenue/ SR 84. Three options for the off-site trail connection were considered and evaluated in the EIR, including the following, and shown in Attachment 6:

- Trail Connection Option 1 – At-Grade Crossing at Discovery Drive;
- Trail Connection Option 2 – Undercrossing at Isabel Bridge; and
- Trail Connection Option 3 – Overcrossing of Isabel Avenue/SR 84.

Following evaluation of each of the trail connection options, including pedestrian and bicyclist safety, ease of use, and storm maintenance-related considerations, staff is recommending Trail Connection Option 3 – Overcrossing of Isabel Avenue/SR 84.

If the City Council approves Trail Connection Option 3, the applicant will prepare design and construction documents and submit necessary permits in coordination with the City, Caltrans, and other responsible agencies. The applicant will also pay a portion of bridge costs and construct the bridge as explained below in the Development Agreement section.

The Project includes the following entitlements:

- General Plan Amendment (GPA) 21-001 to designate SMP 39 and SMP 40 as Low Intensity Industrial (LII) and the Additional Annexation Only Parcels as Parks, Trailways, and Recreation Areas (OSP), consistent with their respective adjacent land uses.
- Annexation/Prezoning (APZ) 21-003 to prezone SMP 39 and SMP 40 to Planned Development – Industrial (PD-I) 22-001 to allow for a mixture of industrial and related uses and prezoning the Additional Annexation Only Parcels to Open Space-Floodplain (OS-F). In addition, the entitlement would authorize an application to the Alameda County Local Agency Formation Commission (LAFCo) for a SOI change and annexation into the City of Livermore.
- Zoning Map Amendment (ZMA) 21-002, Planned Development Zoning (PD-I) 22-001, and Development Code Amendment (DCA) 21-005 to rezone SMP 39, SMP 40, and the Additional Annexation Only Parcels. SMP 39, SMP 40, and the Additional Annexation Only Parcels are currently zoned Agricultural (A) in Alameda County with an overlay permitting quarry operations. These entitlements would rezone SMP 39 and SMP 40 to PD-I 22-001 that will allow a mixture of Industrial and related uses and the Additional Annexation Only Parcels to OS-F for continued open space protection near the Arroyo Mocho.
- Subdivision (SUB) 21-008 and (SUB) 21-009 to approve a Vesting Tentative Tract Map for SMP 39 (Attachment 4) and a Vesting Tentative Parcel Map for SMP 40 (Attachment 5). SMP 39 will be subdivided into six lots, ranging in size from approximately 5.75 acres to 11.76 acres along with associated improvements. SMP 40 will be subdivided into two lots, approximately 24.1 acres and 16.5 acres, respectively, along with associated improvements.
- Site Plan Design Review (SPDR) 21-008 to ensure the architecture and landscape design of the project complies with City standards. This entitlement is for SMP 40 only. A Site Plan Design Review entitlement will be required at a later date for the future development of SMP 39 and will be subject to review and approval by Planning Commission.
- Development Agreement (DA) 21-001 and DA 23-002 to secure the Applicant's entitlements until the Project properties are annexed into the City. Further, the DAs establish terms and obligations for public benefits, including the Applicant’s financial contribution toward and construction of the off-site trail improvements and financial contribution to the City’s Office of Innovation and Economic Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

PROJECT SITE CONTEXT

Tables 1 and 2 (Attachment 7) summarize the General Plan land use designation, zoning classification, and existing land use on the SMP 39, SMP 40, and Additional Annexation Only Parcels properties and surrounding properties.

STAFF ANALYSIS

General Plan

The Livermore General Plan currently designates SMP 39, SMP 40, and the Additional Annexation Only Parcels as Open Space/Sand and Gravel (OSP/S&G). The OSP/S&G designation is applied to areas of Statewide concern due to their demonstrated level of quality aggregate. This designation primarily allows for open space, with sand and gravel extraction, processing and related activities as a secondary use.

The Project proposes to amend the existing OSP/S&G designation to Low Intensity Industrial (LII) for the SMP 39 and SMP 40 properties to allow for light industrial development. In addition, the Project proposes to change the existing OSP/S&G designation for the Additional Annexation Only Parcels to Parks, Trailways, and Recreation Areas (OSP). Development is not proposed on the Additional Annexation Only Parcels.

The LII designation includes manufacturing, warehousing, research and development facilities, fully-enclosed recycling facilities, and administrative and professional offices. Low-intensity industrial uses are focused around the Livermore Municipal Airport. The OSP designation is applied to areas to be maintained as permanent or semi permanent open space because they have valuable natural or scenic resources, or because they are unsuitable for development due to environmental hazards. This designation includes parks and trails, creeks and arroyos, and areas of scenic value.

The proposed General Plan Amendment to change the land use designation for SMP 39 and SMP 40 from OSP/S&G to LII would is consistent with the following General Plan policies:

- Objective LU-1.1 Locate new development so as to create a consolidated pattern of urbanization, maximizing the use of existing public services and facilities.
    - Response: The project supports light industrial development in proximity to existing light industrial development and includes the use of existing public streets, services, and facilities.
- Policy LU-1.1.P1. The City shall annex all lands currently under County jurisdiction and within the UGB prior to development in areas designated for urban uses.
    - Response: The project includes the annexation of land currently under Alameda County jurisdiction and within the South Livermore UGB.
- Objective LU-4.2 Ensure that new development complements its local context and minimizes impacts on the environment
    - Response: The light industrial development is compatible with and complements the existing light industrial context, including the Livermore Municipal Airport and the Oaks Business Park. The Project will minimize impacts on the environment by locating development adjacent to these existing industrial uses, limiting residents and other sensitive receptors to impacts such as noise.
- Objective LU-4.3 Designate appropriate areas for industrial uses in order to prevent negative impacts on the health, safety, and welfare of residents.
    - Response: The project proposes industrial development similar to the industrial uses located at the existing Oaks Business Park. SMP 39 is located approximately 2,745 feet from the nearest single-family residences and SMP 40 is located approximately 884 feet from the nearest single-family residences, with State Hwy. 84 located in between. Therefore, these properties are appropriately designated as light industrial use.
- Policy LU-4.3.P1. Industrial development shall be subject to design principles and consistent with General Plan policies.
    - Response: The project's site plan and architectural design is consistent with the Livermore Design Standards and Guidelines.
- Objective LU-4.4 Protect the Municipal Airport from encroachment by incompatible uses.
    - Response: SMP 39 and SMP 40 include light industrial development, which is a compatible land use regarding noise, height/flight clearance, public safety, etc. per the Alameda County Airport Land Use Compatibility Plan (ALUCP), which was confirmed by the Alameda County Airport Land Use Commission on October 9, 2023. In addition, the Livermore Airport

Commission on October 2, 2023, found the Project compatible with the Livermore Airport Protection Area and the ALUCP with the condition that avigation easements be required for each of the Project properties. This condition is included in the conditions of approval for the Project (Attachment 21).

- Policy LU-4.4.P1. The City shall encourage development of property within the immediate vicinity of the Airport for light industrial and transportation uses to the extent that noise standards and flight clearance requirements are maintained, and environmental impacts are adequately mitigated.
    - Response: See response above.
- Objective CIR-2.3 Provide a bicycle, pedestrian, and trails network.
    - Response: The project supports this objective by adding to the bicycle, pedestrian and trails network along West Jack London Boulevard, along the SMP 40 property, and an off-site trail connection over Isabel Avenue/SR 84 creating a connection to the Arroyo Bike Trail.
- Objective ED-1.1 Implement policies and actions that will encourage existing businesses to remain and grow in Livermore, and attract a range of new businesses to locate in Livermore.
    - Response: The Project provides new opportunities for job creation by allowing existing businesses to grow in Livermore and attracting new businesses to locate in Livermore, including desired uses in SMP 39 and SMP 40 such as research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses. Furthermore, the proposed Development Agreements require the Applicant to provide a financial contribution to the City's Office of Innovation and Economic Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

Annexation/Prezoning

SMP 39, SMP 40, and the Additional Annexation Only Parcels are within the City of Livermore South Livermore UGB; however, SMP 39 is within the City of Pleasanton's SOI. Accordingly, an SOI Amendment SMP 39 is proposed in order to move SMP 39 into the City of Livermore's SOI.

SOI areas are used to plan for the probable physical boundaries and service area of a local agency. Annexation is the process by which unincorporated land is made a part of (incorporated into) the City of Livermore. The Alameda County LAFCo is the local agency that oversees boundary changes, including SOI amendments and annexations, to cities and special districts. Generally, LAFCo's purpose is to ensure the orderly formation of local government agencies to preserve agricultural and open space lands, discourage urban sprawl, and ensure efficient provision of urban services. The SOI change and annexation will require final approval by LAFCo if the City Council endorses an application to LAFCo.

It should be noted that annexation of these properties requires landowner consent as part of the application to LAFCo. This includes consent from Zone 7, PG&E, and Caltrans for annexation of the Additional Annexation Only Parcels. At the time of writing this report, landowner consent has been provided by Zone 7 only. Staff is continuing to purse landowner consent from PG&E and Caltrans. Staff recommends the Additional Annexation Only Parcels remain part of the project since altogether, these parcels create a logical city boundary. If the landowner consent from these two agencies is not provided by the time of LAFCo application submittal, LAFCo staff will prepare a notice to these agencies regarding annexation and their right to protest the annexation in advance of the LAFCo public hearing.

Upon the SOI amendment and annexation, the City municipal boundary would change to include entire Project site including SMP 39, SMP 40, and the Additional Annexation Only Parcels. The Project's

subdivision and development entitlements will be secured through a Development Agreement until the SOI amendment is complete for SMP 39 and SMP 39, SMP 40, and the Additional Annexation Only Parcels are annexed into the City.

Prezoning is required before annexing a property to ensure the property's zoning classification is consistent with the City's General Plan (Government Code Section 56375). Prezoning designations then become formal zoning designations upon annexation into the City. The Project proposes to rezone SMP 39 and SMP 40 to PD-I 22-001. The proposed use, building form, lot size, layout, and overall character is compatible with the surrounding industrial uses. The proposed PD-I 22-001 zoning for the SMP 39 and SMP 40 properties will provide consistency and compatibility with the surrounding development.

In addition, the Additional Annexation Only Parcels will be annexed into the city, and also require a prezoning designation upon annexation. The proposed OS-F zoning for the Additional Annexation Only Parcels is consistent with the parcel's natural features and attributes, including their proximity to Arroyo Mocho.

Vesting Tentative Subdivision Maps

The Project entitlements include a Vesting Tentative Tract Map for SMP 39 and a Vesting Tentative Parcel Map for SMP 40 in conformance with Part 10 of the Livermore Development Code (and Government Code and the Subdivision Map Act, by reference).

The Vesting Tentative Tract Map for SMP 39 would subdivide the single existing parcel into six lots, ranging in size from approximately 5.75 acres to approximately 11.76 acres (Attachment 4). These six lots would facilitate development of light industrial buildings ranging in size from 89,400 sf to 183,600 sf. Access to these new lots would be via three new 40-foot-wide driveways from West Jack London Boulevard to the north.

The Vesting Tentative Parcel Map for SMP 40 would subdivide the single existing parcel into two parcels, creating an approximately 24.1-acre western lot and an approximately 16.5-acre eastern lot (Attachment 5). These two lots would facilitate development of light industrial buildings. The western parcel, referred to as Building 1, will have an approximately 470,530-sf building and the eastern parcel, referred to as Building 2, will have an approximately 288,750-sf building. Access to SMP 40 would be provided through new internal roadway connections to Atlantis Street and Challenger Street to the north, which currently serve the existing Oaks Business Park.

Site Plan Design Review

The Site Plan Design Review (SPDR) 21-008 entitlement is to review SMP 40's site layout, landscape design, and building architecture and evaluate consistency with the City's Design Standards and Guidelines.

A SPDR entitlement will be required at a later date for the future development of SMP 39 and will be subject to Planning Commission review and approval. There is a conceptual site plan for SMP 39 in the attached development plans to show what could be built, but that will not be analyzed below since an SPDR is not being approved at this time. The conceptual SMP 39 site plan does show the potential square footage that was necessary for the Draft EIR to analyze potential traffic, noise, and other environmental impacts.

Parking

A total of 633 vehicle parking stalls would be provided at the SMP 40 site, which exceeds the parking requirement. The 633 parking stalls would be located throughout the site, including along the northern and southern sides of Building 1, and northeast of Building 2. The 164 truck/trailer parking stalls would be located opposite the internal drive aisles from each loading dock area. The loading docks are located on the east and west side of Building 1 and the north and south side on Building 2. All parking will be screened with landscaping consistent with the Livermore Development Code and Industrial Design Standards and Guidelines. In addition, the project would provide 41 bicycle parking spaces, which exceeds the requirement of 30 spaces. The bicycle parking is located near the main entrances on the northeastern side of Building 1 and the northwestern side of Building 2.

Landscape Design

The site plan for SMP 40 includes landscape design to support and complement the building architecture and the surrounding industrial area. The proposed planting plan for SMP 40 includes a variety of trees, shrubs, and groundcovers that are distributed throughout the site and around the proposed buildings. Tree species include a mixture of evergreen and deciduous trees including Italian Cypress, Sycamore, Chinese Pistache, Swan Hill Olive, Brisbane Box, Crape Myrtle, Holly Live Oak, and Fruitless Olive. All the proposed planting would be low water usage consistent with the Water Efficient Landscape Ordinance, Livermore Municipal Code 13.25.

The project provides screening for the SMP 40 loading docks with trees and a wall as viewed from Isabel Avenue/SR 84 and trees that will screen loading docks from Stanley Boulevard to the south. This is consistent with the screening provisions for service areas per the Livermore Design Standard and Guidelines.

Development Code Table 4.12, Required Interior Parking Lot Landscaping describes the minimum parking lot landscaping required based on the number of parking spaces. SMP 40 meets this standard by providing at or above 16 percent of the parking area in landscaped area. Development Code Table 4.13, Required Shade Trees, requires 16 trees per gross site area acre, minus building coverage. The western parcel includes 284 trees on the parcel, which exceeds the minimum requirement of 212 trees. The eastern parcel includes 176 trees, which exceeds the minimum requirement of 165 trees. The Livermore Development Code requires that 20 percent of the trees be planted at 24-inch box size. The western parcel includes 108 24-inch box trees, exceeding this requirement, while the eastern parcel incudes 137 24-inch box trees, also exceeding this requirement.

Therefore, the landscape design for SMP 40 is also consistent with the Industrial Design Standards and Guidelines including providing a hierarchy of plantings and minimum planting size requirements.

Public Art

The applicant has requested to pay the public art fee in compliance with Livermore Municipal Code Chapter 12.50. The public art fee will be paid prior to Building Permit issuance.

Architecture

Architecture for the two buildings on SMP 40 is primarily concrete tilt-up panels with smooth finishes, with aluminum storefront framing and tempered glass at building entrances and office areas. The buildings would be up to approximately 47 feet in height. Vertical parapets extend periodically above the primary roof line, as do a series of horizontal and vertical score lines. Together, these details break up the building wall planes. The roof parapets are designed to screen future roof-mounted equipment from

public view. The building's roofline and wall plane design is also consistent with the Livermore Design Standards and Guidelines for Building Design, which require changes in wall planes or varying height and changes in building materials and colors.

Building colors proposed for the SMP 40 building are primarily off-white with contrasting gray along the horizontal bands and the vertical wall sections encompassing the parapets are a darker blue. Proposed window glazing is blue. These design details are consistent with the surrounding buildings at the Oaks Business Park.

Development Agreement

A Development Agreement functions as a Pre-Annexation Agreement and is necessary to secure the applicant's requested entitlements, until such time as LAFCo approves the annexation of SMP 39, SMP 40, and the Additional Annexation Only Parcels. In addition, off-site improvements are secured through the proposed Development Agreement between the property owner, Developer, and the City. The Development Agreements for SMP 39 and SMP 40 establishes terms, timing, and a performance schedule for offsite improvements and other public benefits (Attachments 19 and 20).

The Development Agreement would require the developer to pay $50,000 a year for a two-year period to the City's Innovation and Economic Development Department towards marketing SMP 39 for the desired land uses identified in PD-I 22-001. Such uses include research and development facilities, professional and administrative offices, experimental and testing laboratories, and manufacturing uses that support an innovation-driven economy, generate high wage jobs, or generate substantial sales tax revenues.

In addition, the Development Agreement requires the Developer to design, construct, secure permits and contribute to an off-site grade-separated overcrossing (bridge) of Isabel Avenue/State Route 84 north of the existing railroad tracks and Stanley Boulevard as a required public benefit (“the Trail Overcrossing”). This off-site trail improvement includes trail connections from the terminus of the bridge to the existing off-site Arroyo Mocho trail east of Isabel Avenue and to the future on-site trail along the SMP 40 property frontage to the west of Isabel Avenue (“the Trail Connections”).

The anticipated bridge span will be approximately 190-210 feet, running parallel with the existing railroad tracks to the south. The materials will consist of a fabricated truss and a weathered steel span bridge with concrete flooring. The final design may include lighting, cameras, and/or other safety and security measures as required by the City’s Chief of Police and City Engineer.

It should be noted that beyond the details presented in this report, the final Trail Overcrossing and Trail Connection design is not intended for future review and approval by the Planning Commission.

The total cost for the Trail Overcrossing and Trail Connections is approximately $2.5 million. As a requirement of the Development Agreement, the Developer is required to contribute $750,000 towards the off-site trail improvements. The City and Developer will diligently pursue grant funding opportunities to fund the remaining Trail Overcrossing and Trail Connections, less the Developer Obligation. In the event that a grant funding opportunity is not successful, the City will credit the Developer using Traffic Impact Fee, less the $750,000 Developer’s contribution. Once completed, the trail segment would connect the existing Arroyo Bike Trail to the existing trail on the west side of the Oaks Business Park and further west to the San Francisco Premium Outlets.

CEQA - Draft Environmental Impact Report

An Environmental Impact Report (EIR) has been prepared for the project in accordance with the California Environmental Quality Act (CEQA) (available online at http://www.cityoflivermore.net/citygov/cdd/planning/environ.htm).

The City of Livermore contracted with Raney Planning and Management (Consultant) to prepare an Environmental Impact Report (EIR) for the Project. A Notice of Preparation (NOP) to prepare an EIR for the Project in accordance with the California Environmental Quality Act (CEQA) was prepared and released for a 30-day public review period from January 6, 2023, through February 6, 2023. On January 17, 2023, the Planning Commission held a public hearing to receive public comments on the NOP. Four comment letters were received during the review period and two public comments were made at the public comment hearing. Public comments received during the NOP review period have been included as part of Appendix A of the Draft EIR in accordance with CEQA.

A Draft EIR was subsequently prepared to the analyze the Project's impacts to the environment. The Draft EIR identified the project's potential environmental impacts and the mitigation measures that would be required to be implemented. The following items were identified as being potentially significant:

- Agricultural Resources;
- Air Quality, Greenhouse Gas Emissions, and Energy;
- Biological Resources;
- Cultural and Tribal Cultural Resources;
- Hydrology and Water Quality;
- Noise;
- Public Services and Utilities; and
- Transportation

The Draft EIR concluded all impacts to be less than significant with mitigation, with the exception of one impact related to Agricultural Resources which was determined to be significant and unavoidable. This impact is related to converting farmland to non-agricultural use. While the California Department of Conservation's Farmland Mapping and Monitoring Program does not classify the project properties as Farmland, LAFCo's criteria for Farmland classification differs from the State's criteria. Based on LAFCo's criteria, SMP 39 and SMP 40 have on-site soils that meet the criteria to be classified as Prime Farmland by LAFCo. Therefore, it was determined that the project would have a significant and unavoidable impact related to the conversion of farmland to non-agricultural use.

The Draft EIR was released for a 45-day public review period from August 30, 2023, through October 13, 2023. On October 3, 2023, the Planning Commission held a public hearing to receive public comments on the Draft EIR. Six comment letters were received during the Draft EIR public review period and three public comments were made at the public comment hearing. Public comments received during the Draft EIR review period have been included as part of the Final EIR in accordance with CEQA.

On January 16, 2024, a Final EIR for the Project was released including responses to all comments received during the Draft EIR public review period and associated revisions to the Draft EIR. The Final EIR also includes a Mitigation Monitoring and Reporting Program to ensure implementation of the mitigation measures identified within the EIR and Initial Study for the Project (Attachment 13). The City received three comment letters following the release of the Final EIR. Public comments received after the release of the Final EIR and associated responses to two of the comment letters are included in the

Response to Comments Memorandum (Attachment 14). The third comment letter was received over four weeks after the release of the Final EIR. Responses to this third comment letter will be provided in a supplemental packet in advance of the Planning Commission public hearing.

SUMMARY

Based on the analyses provided above, staff concludes that the Project, subject to conditions, provides a well-designed industrial development and complies with appropriate development standards, public improvements, and amenities that are adequate to support the community, consistent with the General Plan, Development Code, and Design Standards and Guidelines. The Project would be compatible with the surrounding development, create opportunities for new jobs and increased revenue for the City, and increase pedestrian and bicyclist connectivity that would serve the broader community.

RECOMMENDATION

Staff recommends the Planning Commission recommend the City Council take the following actions to authorize the future development of light industrial buildings on the SMP 39 and SMP 40 properties:

1. Adopt of resolution certifying the Final Environmental Impact Report pursuant to the California Environmental Quality Act (CEQA); and
2. Adopt a resolution approving Annexation/Prezoning (APZ) 21-003, Pre-Annexation and Development Agreement (DA) 21-001, Pre-Annexation and Development Agreement (DA) 23-002, General Plan Amendment (GPA) 21-001, Zoning Map Amendment (ZMA) 21-002, Development Code Amendment (DCA) 21-005, Planned Development-Industrial (PD-I) 22-001, Vesting Tentative Parcel Map (SUB) 21-008, Vesting Tentative Tract Map (SUB) 21-009, and Site Plan Design Review (SPDR) 21-008.

The Planning Commission's action is a recommendation to the City Council.

PLANNING COMMISSION STAFF REPORT **ITEM NO. 10.1**

DATE: March 5, 2024

TO: Chairperson and Members of the Planning Commission

FROM: Steve Riley, Acting Planning Manager

SUBJECT: Supplemental Materials received prior to the meeting.

RECOMMENDED ACTION

SUMMARY

These materials were posted online and made available to the public at the same time that they were distributed to the Planning Commission.

5.1 - Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City.

Materials: Response to comments memorandum and errata, Conceptual site plan for SMP 39, Revised engineering consideration, Letters received in advance of the meeting, and Development agreements signed by the applicant.

DISCUSSION

ATTACHMENTS

1. Supplemental Materials

Prepared by: Michele Donley
Division Clerk

SMP 39/SMP 40 Project
Supplemental Responses to Comments Received After the Close of the Draft Environmental Impact Report Public Review Period and Erratum

As mentioned in the memorandum entitled, "Responses to Comments Received After the Close of the Draft Environmental Impact Report Public Review Period and Erratum", the City would be following up with a supplemental memorandum to provide responses to the "Attorneys for Carpenters Local 713" letter, dated February 14, 2024, which was received after the release of the Final Environmental Impact Report (EIR) for the SMP 39/SMP 40 Project (proposed project). This supplemental memorandum provides the responses to the above-referenced letter.

While CEQA does not require that written responses be provided for letters received after the close of the public review period, the comments are acknowledged by the City, and the City has chosen to prepare written responses to the comments for the decision-makers consideration in making an informed decision. Responses to the "Attorneys for Carpenters Local 713" comment letter, which is included as Attachment 1, are provided below. Where revisions to the EIR text are required in response to a comment, new text is double underlined and deleted text is ~~struck through~~.

The comments received did not identify any new significant impact, substantial increase in severity of a significant impact identified in the EIR, or any significant new information. Therefore, recirculation of the EIR is not required.

Response to Stephanie Papayanis, Attorneys for Carpenters Local 713
The majority of the comment letter, including the entirety of Comment I and Comment II(A) of the comment letter, is identical to the comment letter submitted by Attorneys for Carpenters Local 713 during the Draft EIR comment period. As such, with regard to Comment I and Comment II(A) included in the comment letter, please see Responses to Comments 5-3 and 5-5 included in the Final EIR.

The new concerns brought forth in the comment letter are limited to Comment II(B) and Comment II(C) related to biological resources and construction noise. Thus, responses to Comment II(B) and Comment II(C) are provided below.

Comment II(B) Related to Biological Resources
Responses to the commenter's concerns regarding biological resources are provided below, as informed by Monk & Associates (M&A), who prepared the project-specific Biological Resources Assessments (BRAs) used within the Draft EIR analysis. It should be noted that Comment II(B) is a summary of the comments provided in Exhibit D to the Attorneys for Carpenters Local 713 comment letter, which is a letter authored by Shawn Smallwood, PhD. As such, the following responses are organized based on the comments presented in Exhibit D of the Attorneys for Carpenters Local 713 comment letter.

Environmental Setting Informed by Field Surveys
Page 16 of the Exhibit D comment letter states: "The results of the Monk and Associates (2021, 2023) surveys have been misinterpreted in the reports, resulting in inaccurate characterizations of the existing environmental settings of SMP 39 and SMP 40." The commenter is referring to the fact that M&A biologists recorded fewer bird species on-site and flying overhead than the commenter did during a reconnaissance visit. The environmental setting or environmental

baseline of a project site is informed by much more than the number of birds and mammals one sees in a certain amount of time.

The CEQA Guidelines Section 15125(a) requires that the CEQA document prepared for a project discuss the "baseline" environmental conditions at and in the vicinity of the project sites. CEQA Guidelines Section 15125 (see also Section 15126.6(e)(2)) states the following regarding the environmental setting as it relates to baseline:

> (a) [the CEQA review document] must include a description of the physical environmental conditions in the vicinity of the project, as they exist at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced, from both a local and regional perspective. This environmental setting will normally constitute the baseline physical conditions by which a lead agency determines whether an impact is significant. The description of the environmental setting shall be no longer than is necessary to understanding the significant effects of the proposed project.

M&A conducted several surveys on each of the project sites. As explained in the SMP 39 BRA included as Appendix D to the Draft EIR, M&A survey work in the project area dates to the year 2000. However, because CEQA requires current baseline conditions, none of the plants or wildlife observed in the early 2000s were reported in the BRAs. The 2021 surveys are the baseline surveys that were conducted to record existing biological resources and to assess the likelihood of resource agency regulated areas on the project sites. The surveys involved searching all habitats on the sites and recording all plant and wildlife species observed. M&A cross-referenced the habitats found on the project sites against the habitat requirements of local or regionally known special-status species to determine if the proposed project could directly or indirectly impact such species and if additional protocol level surveys would be necessary to assess potential impacts to special status species.

CEQA does not require an exhaustive list of all bird species that could occur on a project site, nor does CEQA require a discussion of what each species is doing at the time the species is observed. Rather, CEQA requires an analysis of potential impacts to special-status birds and/or nesting habitat for common birds that rise to the level of significance pursuant to CEQA as determined by an expert, based on database searches, field surveys, etc. M&A's BRAs provide that analysis and recommend pre-construction surveys to address potentially significant impacts. Overall, the BRAs meet the standards of care warranted under CEQA.

Habitat Loss

The commenter's estimate on the number of birds "denied to California" is primarily based on two studies. The commenter states that the two study sites have grassland/wetland/woodland complexes within agricultural matrices, and found total bird nesting densities of 32.8 and 35.8 nests per acre. The commenter uses one-third of such estimates for the project sites' calculation due to the annual discing that occurs on the project sites. However, the estimation is likely still an overestimate, as one study was conducted in a five-acre, undisturbed, unfragmented and preserved area within the over-500-acre University of Wisconsin Arboretum dedicated in 1934, adjacent to a 321-acre lake (Lake Wingra). The SMP 39 and SMP 40 project sites are not surrounded by hundreds of acres of preserved natural lands but rather the relatively small project sites are fragmented from natural areas by surrounding, existing development (busy roads, an airport, and active industrial uses).

The other study mentioned by the commenter was conducted within farmstead shelterbelts, or "man-made habitats consisting of parallel rows of trees and shrubs designed to protect farmsteads from damaging winds, drifting snow and blowing soil…" referred to as "wooded

islands." The study determined that the wooded islands are important for avifauna in regions of intensive agriculture and found many nests within the wooded region. The SMP 40 project site has a similar "wooded island," in that the wooded area that is a riparian corridor along Arroyo Mocho is being preserved within a riparian set back and will provide high-quality habitat for many nesting birds post-development. The preservation of Arroyo Mocho's riparian habitat was not considered in the commenter's calculations.

Further, the commenter's comparison of development of the proposed project to the high avian mortality rate by wind turbine collision in the Altamont Pass Wind Resource Area is not an appropriate comparison. The commenter is comparing 50-foot-tall buildings on the project sites to 430-foot-tall wind turbines with active, moving blades in a known avian migration zone; an area that supports the highest number of nesting Golden Eagles in the world.[1]

Regardless of the commenter's inappropriate comparison and overestimate of the number of birds "denied to California" due the loss of nesting habitat by the proposed projects, CEQA requires an analysis of potential impacts to special-status birds and/or nesting habitat for common birds that raise to the level of significance. Therefore, impacts to nesting birds were regarded as significant pursuant to CEQA in the Draft EIR. However, mitigation measures to protect special-status birds and all nesting birds have been prescribed in the Draft EIR (see Mitigation Measures 4.3-2[a] through 4.3-2[d] in the Draft EIR). The mitigation measures included therein reduce impacts to nesting birds to a less-than-significant level pursuant to the CEQA. Thus, the commenter's concerns about the projects' impacts to nesting birds have been sufficiently addressed.

Interference with Wildlife Movement
The commenter is correct that the Essential Habitat Connectivity Area mapped by the California Department of Fish and Wildlife (CDFW) is focused on connecting very large blocks of mostly protected natural lands. While the Draft EIR does state that the project sites are not located in this mapped area, that is only one sentence of the three-paragraph description under the Wildlife Movement Corridor section of the Draft EIR (see pages 4.3-14 to 4.3-15 of the Draft EIR). The comment implies that sufficient research and in-person assessments were not conducted accordingly, and that the determination that the project sites will not impact significant wildlife corridors was solely based on using the CDFW's Essential Habitat Connectivity Area map, which simply is not true.

For example, M&A conducted online research and project-specific field surveys to become informed about the project sites' habitats and the potential for any impacts to regional wildlife corridors based on development of the proposed projects. M&A recorded wildlife observed during site visits, in addition to extensively noting the habitat types and surrounding land uses during their visits and how the surrounding land uses would affect wildlife movement. As such, the commenter's statement that the conclusions of the Draft EIR regarding wildlife movement on the project site are speculative and conclusory is untrue.

Wildlife corridors are linear and/or regional habitats that provide connectivity to other natural vegetation communities within a landscape fractured by urbanization and other development. Wildlife corridors are extremely important habitats to preserve and are valuable for wildlife. While local wildlife may use the undeveloped sites in their current state, neither of the project sites currently provide a significant regional wildlife corridor that may be impacted by the proposed project. The project sites are regularly disced or disturbed for agriculture. For SMP 40, an

[1] National Audubon Society. *National Audubon Society Sues California County to Improve Bird Protections in Controversial Wind Energy Project.* Available at: https://www.audubon.org/news/national-audubon-society-sues-california-county-improve-bird-protections#:~:text=17%2C%202021)%2D%2DThe%20National,turbine%20facility%20at%20Altamont%20Pass%2C. Accessed February 2024.

industrial development, Oaks Business Park, is located to the north of the project site, east of the project site is Isabel Avenue, a heavily-trafficked road, south is an active railroad track and Stanley Boulevard, another heavily-trafficked road, and west of the project site are quarry ponds. SMP 39 is bordered by West Jack London Boulevard, a well-trafficked road, the Livermore Municipal Airport, the Oaks Business Park, and quarry ponds. The quarry ponds were excavated in uplands and, thus, are not associated with a creek or drainage, and have nearly vertical slopes, preventing wildlife from traversing the ponds easily or using the quarry area as a corridor. As mentioned in M&A's BRAs, both SMP 39 and SMP 40 are isolated from regional open spaces, and, as such, do not have regional wildlife corridor value for terrestrial mammals and contain minimal habitat that could be used by some migrating avian species.

The commenter states: "On the other hand, the coyote I saw on site got there somehow, and so did the ground squirrels and pocket gophers, and so did all of the birds I saw on and over SMP 39." One might infer from this statement that M&A's reports and the Draft EIR implied that wildlife do not use, or could not be found on the project sites, which is incorrect. Each of M&A's BRAs included a table of wildlife species observed on the project sites during site visits, which, as described in the BRAs, is not intended to be exhaustive or to describe the only species that could be found on the project sites. Rather, the focus was, as required by CEQA and as appropriate, on the assessment of biological resources with regard to suitable habitat and potential for the occurrence of any special-status species, as determined by a qualified biologist for the purposes of an impact analysis. Movement of a species through an area or an area's incidental use does not necessarily imply importance to the species, the characteristics of the habitat are more relevant.

For example, Figure 3 of the commenter's report shows the fly over and resting locations of Golden Eagles, which provides an example of how local wildlife may use the project sites as well as all surrounding areas, including properties completely developed with warehouses and surrounded by busy roads. However, while species such as the Golden Eagle may use the project site for foraging or resting on occasion, or may flyover, it is clear that the project sites are not the main sites that are relied upon by these large raptors for any of the above functions, or for nesting, as the existing trees are too small and in close proximity to disturbance.

The SMP 40 riparian area may provide significantly more suitable rest, foraging and nesting habitat for many bird species than the open and disturbed grassland does. However, as previously described, the riparian area on SMP 40 will be completely preserved within a riparian setback and will continue to connect local wildlife within the riparian corridor along the Arroyo Mocho.

The commenter also mentions that 19 special-status species so far have been documented on the project site, as further detailed in Table 1 of the commenter's report. However, the commenter's list includes species that do not meet the definition of "rare" pursuant to the CEQA. For example, Table 1 includes Red-tailed Hawk (*Buteo jamaicensis*), California Gull (*Laus californicus*), Double-crested Cormorant (*Phalacrocorax auritus*), Nuttall's Woodpecker (*Picoides nuttallii*), and Oak Titmouse (*Baeolophus inornatus*), which are designated as Birds of Prey (BOP), Birds of Conservation Concern (BCC) by U.S. Fish and Wildlife Service, and Taxa to Watch List. However, the aforementioned listings are not considered special-status under the California or Federal Endangered Species Acts (CESA and FESA), by other regulations, or by the scientific community pursuant to the CEQA. Nonetheless, it should be noted that these species, their nests, eggs and/or young are provided protection pursuant to other resource agency regulations such as the Migratory Bird Treaty Act (MTBA) and the California Fish and Game Code Sections 3503, 3503.5, 3511, and 3513C, which are both fully accounted for and discussed in M&A's BRAs and the Draft EIR.

In addition, the commenter does not specify which of the 19 species were observed during his site visit, or which were taken as observations from eBird. While many experienced birders may use eBird, anyone can report incidental bird sightings to eBird without any way to confirm the qualifications of the observer. As such, relying only on eBird data to say confidently that a special-status species is present on a property is not sufficient and would need to be confirmed by a qualified biologist. As mentioned by the commenter, several of the species sightings are birds flying over the project sites. As discussed in sections above, observing sensitive birds flying over a property, foraging over the site, or using the habitat on the sites during the non-nesting season does not warrant reporting to the California Natural Diversity Database (CNDDB), as such sightings are not of permanent breeding/nesting/larval development habitat (dependent on what type of animal it is) that warrant protection. The types of "incidental" sightings of common bird species do not necessarily translate into a "potentially significant biological impact" pursuant to CEQA Guidelines and regulations.

Further, while the project sites in their current state may be used by local wildlife, they provide very low value for foraging, resting or nesting, as the project sites are mainly comprised of non-native ruderal herbaceous habitats and are highly disturbed due to agricultural practices. The project sites are not one of the last remaining stopover and staging opportunities in the region, as stated by the commenter, as acres of undeveloped land similar to the project sites is located within the very immediate area, as well as dozens of local parks. The 80-acre Shadow Cliffs Regional Recreation Area is less than two miles from the project sites and the 160-acre Doolan Canyon Regional Preserve beyond provides more undeveloped land to the north. All of the aforementioned habitats in the region provide habitat for the species listed in the table of wildlife observed included in Exhibit D of the comment letter, and have far greater wildlife corridor habitat value than the project sites. The commenter's concerns about the loss of the ruderal habitats on-site should be assuaged by the fact that more trees and shrubs will be planted on the project sites post-development than are currently on site, which will provide additional stopover opportunities for birds.

Finally, as previously mentioned, the Arroyo Mocho runs along the southern project site boundary of SMP 40. Arroyo Mocho may serve as a local movement corridor for mammals, amphibians, and reptiles to move unobtrusively through the general geographic area. Animals moving along Arroyo Mocho could leave the Arroyo and enter the project site to move across the landscape. Such animals expected to migrate along the Arroyo and possibly enter the upland areas of the project site are common species such as coyote, raccoons, skunks, deer, and rodents, and would be able to navigate their way around SMP 40 even after the site was developed. The Arroyo Mocho would remain unchanged by the proposed project and as such, the wildlife corridor values of the channel would remain intact. Under all circumstances, any disruption to the very localized use of the project sites by common wildlife species would not be regarded as a potentially significant impact pursuant to CEQA.

Traffic Impacts to Wildlife

Common wildlife associated with humans and urban development such as Virginia opossum (*Didelphis virginiana*), striped skunk (*Mephitis mephitis*) and raccoon (*Procyon lotor*) are often involved in vehicle collisions. However, the aforementioned species and other common wildlife species, including Mourning Dove (*Zenaida macroura*) and northern pacific rattlesnake (*Crotalus oreganus*), are not considered special-status or rare. In addition, while roadkill is present in the vicinity of the project sites, as is the case at any area with road traffic, the approximation included in Exhibit D of the comment letter is likely an overestimate, as the numbers are based on another study that is not directly comparable to the project area. Vasco Road is the principal north-south route between eastern Alameda and Contra Costa Counties, traveled by approximately 22,000 vehicles per day. Increased traffic to the project sites on local roadways, Isabel Avenue and West

Jack London Boulevard, is not comparable to the heavily trafficked Vasco Road, which is a corridor in the middle of hundreds of acres of protected open space lands and significant wildlife habitat. By contrast, Stanley Boulevard and I-580, near the project sites, are already heavily trafficked roads in a developed region and the increase in vehicles associated with the project sites would not contribute significantly to the existing traffic volumes on these roads daily. Moreover, regulations that protect common wildlife species that could be killed by vehicular traffic do not exist. As such, vehicle collisions that result in the mortality of wildlife do not constitute a significant impact pursuant to CEQA.

Western Burrowing Owl Mitigation

The CDFW has not released an official statement that the avian breeding season has changed. In M&A's experience, when permits are acquired from the CDFW, the nesting season window can vary slightly. Some permits say February 1 through August 31, while others say February 15 through September 1. The variation in start and end dates could be based on geography, as different geographic regions have slightly different nesting windows. In fact, the CDFW acknowledges a certain amount of variation in the 2012 CDFW Staff Report on Burrowing Owl Mitigation, which states, "In California, the burrowing owl breeding season extends from 1 February to 31 August (Haug et al. 1993, Thompsen 1971) with some variances by geographic location and climatic conditions." Nonetheless, in response to the comment, Mitigation Measure 4.3-2(a) included in the Draft EIR is hereby revised as follows:

Western Burrowing Owl

4.3-2(a) *If project construction begins during the western burrowing owl nesting season (February 1~~5~~ to August 31), a qualified biologist shall conduct targeted burrowing owl nest surveys within 14 days prior to construction activities using seven- to 20-foot transects. A separate preconstruction survey shall be conducted for SMP 39 and SMP 40 (including the off-site trail connection area) if the components of the project are not constructed concurrently. The survey shall include the project site and all accessible areas within 500 feet of the project impact zone, and shall follow CDFW guidelines outlined in the 2012 Staff Report on Burrowing Owl Mitigation. The results of the survey shall be submitted to the City of Livermore Community Development Department within 30 days of the completed survey. The survey report shall be valid for one construction season.*

If western burrowing owls are not detected on-site during the survey, further mitigation shall not be required. If any western burrowing owls are detected on-site, pursuant to the CDFW's 2012 Staff Report on Burrowing Owl Mitigation, the following restricted activity dates and setback distances shall be implemented:

- *From April 1 through October 15, low disturbance activities shall have a 200-meter buffer while high disturbance activities shall have a 500-meter buffer from occupied nests.*
- *From April 1 through August 15, medium disturbance activities shall have a 500-meter buffer from occupied nests. Medium disturbance activities can have a reduced buffer of 200 meters starting August 16 through October 15.*
- *From October 16 through March 31, low disturbance activities shall have a 50-meter buffer, medium disturbance activities shall have a 100-meter buffer, and high disturbance activities shall have a 500-meter buffer from occupied nests.*
- *Earth-moving activities or other disturbance shall not occur within the aforementioned buffer zones of occupied burrows*

unless monitoring of the nest site by a qualified biologist determines that the owls are acclimated to the disturbance and would not be disturbed by a smaller buffer. The buffer zones shall be fenced.

- *A qualified biologist shall delineate the extent of burrowing owl habitat on the site.*
- *Owls may be passively relocated from the project site between October 1 and February 1. Passive removal shall be conducted by a qualified biologist with demonstrated experience with passive relocation.*
- *Credits shall be purchased from a mitigation bank in coordination with CDFW and the City of Livermore to offset the project's habitat loss on the burrowing owl.*

A report detailing compliance with the provisions set forth herein shall be prepared by the qualified biologist and submitted for review and approval to the City of Livermore Community Development Department.

Further, M&A biologists have conducted several surveys, some of which are dated October 2000; March 11, 2002; May 11 and 20, 2002; June 14 and 25, 2002; September 2003, November 2013, June 10, 2019, November 2019, September 10, 2021, November 13, 2021, and June 15, 2022. The aforementioned surveys conducted in May and June were focused Burrowing Owl breeding season surveys conducted in accordance with the CDFW 1995 Staff Report protocol. Burrowing owl, or signs of burrowing owl, were not observed during any of the M&A surveys. Thus, based upon M&A's multiple surveys of the project site spanning multiple years, evidence suggests that burrowing owls have not nested on-site for the following reasons: (1) the grass grows very tall on SMP 40 in between discing activities, which does not allow ground nesting birds, such as the burrowing owl, an opportunity to detect aerial predators, which likely discourages them from nesting; (2) discing activities may disrupt nesting attempts.

Based on habitat assessments and past negative survey results, M&A believes that burrowing owls are unlikely to nest on-site. However, given that the burrowing owl is a mobile species, a mitigation measure for preconstruction surveys was provided in the Draft EIR to ensure that "take" of burrowing owls does not occur. The prescribed preconstruction surveys, consistent with "take avoidance surveys" outlined in the CDFW's Staff Report 2012, are sufficient and appropriate to detect nesting owls should the species be present on-site in light of the prior surveys' negative results, including a year of protocol-level breeding season surveys. Burrowing owls residing in topographically flat areas are typically easy to detect if surveys consist of walking transects using high-powered binoculars. As such, the mitigation measure included in the Draft EIR is sufficient to reduce any potential project impacts on burrowing owl to a less-than-significant level.

Tricolored Blackbird Mitigation

As stated above, M&A biologists have been on both project sites multiple times over the last 20 years. Tricolored blackbirds have not been observed on-site and on-site habitat for the species is marginal, as the sites are routinely disturbed, water is not present on SMP 39, and Arroyo Mocho at SMP 40 is typically dry during the middle to end of the nesting season. The tricolored blackbird prefers nesting near water. The preconstruction surveys proposed in the Draft EIR to determine if tricolored blackbird is nesting on-site are sufficient to detect the species' presence. The species can also be looked for during the burrowing owl surveys, which will take place at the same time as tricolored blackbird nesting season.

Nesting Bird and Raptor Mitigation
As discussed above, the CDFW has not released an official statement that the avian breeding season has changed. In M&A's experience when permits are acquired from the CDFW, the nesting season window can vary slightly, as different geographic regions have slightly different nesting windows.

In addition, with regard to nest detection, while grassland nesting birds are difficult to detect, M&A biologists are experienced in surveying for ground-nesting and short grass nesting birds and have had success finding nests in the past. Typically, if pedestrian walking transect surveys are conducted by two or more people walking closely together, nests will be found. Further, if experienced consulting biologists are hired to conduct the nesting bird surveys, the biologists will know the appropriate methods to survey for nesting passerine birds, including the Loggerhead Shrike, and raptors. The most suitable habitat for Loggerhead Shrike on the project sites is along SMP 40's riparian corridor, which will be preserved by the project. Many trees along the riparian corridor and south of the project site could serve as a blind for the observer to hide behind and watch bird behavior to determine if birds are nesting. Finally, the qualified biologist making the nesting buffer determination would provide a report to the City of Livermore and communication between the City of Livermore, the applicant's biologist, and the construction team would be ongoing throughout the construction period. The biologist will ensure that the buffer is maintained throughout construction to ensure that the nesting attempt is protected.

While development does remove potential bird nesting habitat, the project applicant is avoiding the riparian corridor on the SMP 40 project site, which is the most valuable nesting habitat on-site. Additionally, in accordance with City of Livermore General Plan Policy OSC-1.3 P1, as presented on page 4.3-21 of the Draft EIR, the proposed project is required to landscape with native vegetation.

Based on the above, changes to the Draft EIR mitigation for nesting birds and raptors are not warranted.

<u>Comment II(C) Related to Construction Noise</u>
As discussed on page 4.6-21 of the Draft EIR, due to the substantial distance between SMP 39 and the sensitive noise receptors, it was anticipated, based on the professional judgment of the project noise consultant, that construction noise associated with SMP 39 would be below the City of Livermore's exterior noise level threshold at the nearest sensitive receptor locations. In response to the comments regarding construction noise impacts associated with SMP 39, Salter, the project noise consultant who prepared the project-specific Environmental Noise Studies used in the Draft EIR analysis, estimated the construction noise levels associated with SMP 39 at the nearest noise sensitive receptor to the site (see Attachment 2). In addition, in response to the comments regarding construction noise impacts associated with SMP 40, Salter provided an updated analysis of construction noise associated with SMP 40 (see Attachment 3). Because construction is not permitted during nighttime hours (pursuant to Section 9.36.080 of the Livermore Municipal Code), the applicable noise level threshold for construction noise levels associated with SMP 39 and SMP 40 would be 70 dBA L_{max}, as established by the City of Livermore (see Draft EIR page 4.6-14 and General Plan Policy N-1.5 P3).

The commenter alleges that Table 9-7, Land Use Compatibility Guidelines for Exterior Noise, of the General Plan applies to construction noise; this is not correct. As stated in General Plan Policy N-1.1 P4, presented on page 4.6-8 of the Draft EIR, the City shall use the Land Use Compatibility Guidelines for Exterior Noise (measured in dBA CNEL or L_{dn}) contained in Table 9-7 (i.e., the DNL 60 dBA exterior noise level standard referenced in the comment letter) to direct the siting, design, and insulation of new development to reduce exposure to excessive noise. Construction

noise standards are established in General Plan Policies N-1.5 P2, P3, and P4, as presented on page 4.6-12 of the Draft EIR, which do not include a DNL standard. In particular, General Plan Policy N-1.5 P3 states that in order to allow for temporary construction, demolition or maintenance noise and other necessary short-term noise events, the stationary noise standards in Policy N-1.5.P1 shall not be exceeded within the receiving land use by more than 15 dBA for any period of time. General Plan Policy N-1.5.P1 requires that industrial and commercial uses be designed and operated so as to avoid the generation of noise effects on surrounding sensitive land uses from exceeding 55 dBA L_{50} during the hours of 7:00 AM to 10:00 PM and 45 dBA L_{50} during the hours of 10:00 PM to 7:00 AM. Thus, for analysis purposes of project construction noise within the Draft EIR, the threshold of significance for the maximum allowable construction noise level at a sensitive receptor is 70 dB L_{max} during daytime hours and 60 dB L_{max} during nighttime hours (i.e., 15 dB above the numerical criteria listed in P1). Consequently, the DNL 60 dBA exterior noise level standard included in the comment letter would not apply to the temporary, intermittent construction noise associated with either SMP 39 or SMP 40.

Based on the comments regarding construction noise impacts associated with SMP 39 and SMP 40, pages 4.6-21 through 4.6-24 of the Draft EIR are hereby revised as follows. Such revisions are also reflected in the Revised Environmental Noise Studies for SMP 39 and SMP 40, included as Attachment 2 and Attachment 3 to this memo. It should be noted that all revisions to pages 4.6-22 through 4.6-24 of the Draft EIR previously included in the Final EIR are also shown in ~~strikethrough~~ and <u>double underlined</u> text below.

> ~~Due to the substantial distance between SMP 39 and the sensitive noise receptors, it was anticipated that~~ <u>The noise levels generated by construction equipment would vary greatly depending upon factors such as the type and specific model of the equipment, the operation being performed, the condition of the equipment and the prevailing wind direction. Table 4.6-6 shows maximum noise levels associated with each piece of construction equipment anticipated to be used during construction of SMP 39 at a reference level of 50 feet, as well as at 2,640 feet, which is the distance from Building 1 on the SMP 39 site to the nearest sensitive receptors (the residences located across Isabel Avenue to the east). Based on the project-specific construction schedule assumed in the air quality analysis conducted for SMP 39, Table 4.6-7 summarizes the anticipated construction equipment associated with each phase of project construction, and the relative sound levels at the nearest residential property (approximately 2,640 feet away), assuming that equipment is running simultaneously during each phase of construction. As shown in Table 4.6-7,</u> construction noise associated with SMP 39 <u>would range between 59 and 61 dBA L_{max},</u> ~~be~~ <u>which would be</u> below the City of Livermore's exterior noise level threshold of ~~60~~ <u>70</u> dBA ~~DNL~~ <u>L_{max}</u> at the nearest sensitive receptor locations. ~~Thus, construction noise levels for SMP 39 were not evaluated as part of the Environmental Noise Study prepared for SMP 39. Therefore, the following discussion focuses on SMP 40 and the off-site trail connections.~~

Source: Salter, 2024.

As shown in ~~the table~~ Table 4.6-7, construction of SMP 40 is predicted to generate noise levels ranging between ~~16~~ 70 to ~~32~~ 73 dBA L_{max} at the nearest noise-sensitive receptors. As discussed in detail above, for analysis purposes of project construction noise within this EIR, a threshold of significance for the maximum allowable construction noise level at a sensitive receptor has been assumed to be 70 dB L_{max} during daytime hours ~~and 60 dB L_{max} during nighttime hours~~. Because construction is not permitted during nighttime hours (pursuant to Section 9.36.080 of the Livermore Municipal Code), the 60 dB L_{max} noise level standard for nighttime hours would not apply to the proposed project. ~~Accordingly~~ Nonetheless, the maximum predicted construction noise level of ~~32~~ 73 dBA L_{max} associated with SMP 40 would be ~~below~~ above the threshold~~s~~ of significance being applied.

The three potential off-site trail connection options would be located approximately 160 feet, 150 feet, and 200 feet, respectively, west of the nearest single-family residences. The anticipated construction activities required for the trail connection options would use construction equipment anticipated to generate maximum noise levels of up to 85 dB at a distance of 50 feet. As previously noted, stationary noise sources lessen at a rate of approximately six dB per doubling of distance from the source. Therefore, at a distance of 160 feet, construction equipment associated with Trail Connection Option 1 would generate maximum noise levels of up to 75 dB L_{max}; at a distance of 150 feet, construction equipment associated with Trail Connection Option 2 would generate maximum noise levels of up to 76 dB L_{max}; and at a distance of 200 feet, construction equipment associated with Trail Connection Option 3 would generate maximum noise levels of up to 73 dB L_{max}. Thus, construction activities associated with development of the off-site trail connection options would exceed the thresholds of significance being applied of 70 dB L_{max} during daytime hours ~~and 60 dB L_{max} during nighttime hours~~.

Based on the above, construction-related noise associated with SMP 39 ~~and SMP 40~~ would not result in the generation of a substantial temporary increase in ambient noise levels in the vicinity of the project in excess of standards established in the local

general plan or noise ordinance, or applicable standards of other agencies. However, while construction activities are temporary in nature and would be exempt during the hours of 7:00 AM to 8:00 PM, construction-related noise associated with SMP 40 and the off-site trail connection could result in disturbance to existing noise-sensitive land uses in the project vicinity.

Therefore, construction-related noise associated with the proposed project could be considered to result in generation of a substantial temporary increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies, and impacts would be considered ***significant***.

Mitigation Measure(s)

Implementation of the following mitigation measures would reduce the above potential impact to a *less-than-significant* level.

4.6-1(a) *Prior to issuance of a grading permit for SMP 40, the project applicant shall prepare a construction noise management plan that identifies measures to be taken to minimize construction noise on surrounding sensitive land uses and include specific noise management measures to be included within the plans and specifications for SMP 40, subject to review and approval by the City of Livermore Community Development Department. The project applicant shall demonstrate, to the satisfaction of the City that the project complies with the following:*

- *Consistent with the Livermore Municipal Code, construction shall be limited to weekdays between the hours of 7:00 AM and 8:00 PM and Saturdays through Sunday between the hours of 9:00 AM and 6:00 PM.*
- *Either a temporary noise barrier shall be built prior to development of the planned berm on the east side of the project site, or the berm shall be built prior to construction activities. The barrier/berm shall be a minimum of 10 feet tall. The barrier can be field-built provided it meets the following criteria:*
    - *The barrier shall be constructed to have a minimum surface density of four pounds per square foot (psf). For example, a stud wall with exterior-grade plywood sheathing and a stucco finish (or two layers of 5/8-inch thick plywood).*
    - *The barrier shall be free of cracks, and drainage holes/slots along the bottom of the barrier shall be kept to a minimum. Where needed, drainage holes/slots shall be covered by one psf mass-loaded vinyl flaps (e.g., Kinetics KNM-100) so water can flow around the vinyl and still drain.*
    - *Joints between sheathing layers shall be offset by 16 inches minimum.*
- *Contractors shall use "quiet" models of air compressors and other stationary noise sources, where technology exists.*
- *Internal combustion engine-driven equipment shall be equipped with mufflers which are in good condition and appropriate for the equipment.*
- *Stationary noise-generating equipment, such as air compressors and portable power generators, shall be located as far away as possible from adjacent property lines.*

- *Staging areas and construction material areas shall be located as far away as feasible from adjacent residences.*
- *All unnecessary idling of internal combustion engines should be prohibited.*
- *The contractor shall designate a "noise disturbance construction superintendent" who will be responsible for tracking and responding to any complaints about construction noise. The noise disturbance construction superintendent shall determine the cause of the noise complaint (e.g., starting too early, bad muffler, etc.) and shall require that reasonable measures are implemented to correct the problem. The telephone number for the noise disturbance construction superintendent shall be posted at the construction site and included in any construction notices sent to neighbors.*

4.6-1(b) *Prior to issuance of a grading permit for the chosen off-site trail connection option, the project applicant shall prepare a construction noise management plan that identifies measures to be taken to minimize construction noise on surrounding sensitive land uses and include specific noise management measures to be included within the plans and specifications for the trail connection option, subject to review and approval by the City of Livermore Community Development Department. The project applicant shall demonstrate, to the satisfaction of the City that the project complies with the following:*

- *All heavy construction equipment used on the proposed project shall be maintained in good operating condition, with all internal combustion, engine-driven equipment fitted with intake and exhaust mufflers that are in good condition.*
- *All mobile or fixed noise producing equipment used on the proposed project that is regulated for noise output by a local, state, or federal agency shall comply with such regulations while ~~in the source of~~ involved with a project activity.*
- *Where feasible, electrically-powered equipment shall be used instead of pneumatic or internal combustion powered equipment.*
- *All stationary noise-generating equipment shall be located as far away as possible from the nearest residential uses.*
- *Signs prohibiting unnecessary idling of internal combustion engines shall be posted at entrances to construction sites and at construction equipment staging areas.*
- *The use of noise-producing signals, including horns, whistles, alarms and bells shall be for safety warning purposes only.*
- *The use of temporary sound barriers shall be incorporated along the outer work area of the construction site, east of Isabel Avenue/SR 84. Barrier height and location(s) shall be determined by a qualified acoustical engineer to ensure that the resultant construction noise levels at the nearest residence would meet the applicable standard. The sound barrier fencing shall consist of 0.5-inch plywood or minimum STC 27 sound curtains placed to shield nearby sensitive receptors. The plywood barrier shall be free from gaps, openings, or penetrations to ensure maximum performance.*

Due to the addition of Table 4.6-7, all subsequent tables included in Chapter 4.6, Noise, of the Draft EIR are hereby renumbered accordingly.

While a new mitigation measure (Mitigation Measure 4.6-1[a]) has been added as part of the text revisions above, under *Laurel Heights Improvement Ass'n v Regents of Univ. of Cal.* (1993) 6 C4th 1112 (*Laurel Heights II*) and Section 15088.5 of the State CEQA Guidelines,[2] a lead agency is only required to recirculate a draft EIR when "significant new information" is added to the document after public notice is given of the availability of the Draft EIR for public review under Section 15087 but before certification. Pursuant to CEQA Guidelines Section 15088.5, the term "information" can include changes in the project or environmental setting, as well as additional data or other information. New information added to an EIR is not considered "significant" unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the City has decided not to implement. "Significant new information" requiring recirculation includes any of the following:

1. A new significant environmental impact would result from the project or for a new mitigation measure proposed to be implemented.
2. A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the impact to a level of insignificance.
3. A feasible project alternative or mitigation measure considerably different from other previously analyzed would clearly lessen the environmental impacts of the project, but the project's proponents decline to adopt it.
4. The Draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded.

In the case of the proposed project, the Draft EIR already determined that the proposed project would result in a significant temporary construction noise impact (see page 4.6-23 of the Draft EIR). Thus, a new noise impact has not been identified in response to public comments. Rather, in response to public comments, a new construction noise mitigation measure (Mitigation Measure 4.6-1[a]) has been added that would clearly lessen the potential environmental impact to a less-than-significant level, and the applicant has agreed to adopt Mitigation Measure 4.6-1(a). In addition, the requirements of Mitigation Measure 4.6-1(a) are similar to the requirements already included in Mitigation Measure 4.6-1 of the Draft EIR. Thus, according to Section 15188.5(a)(3), recirculation is not required.

The Mitigation Monitoring and Reporting Program, as well as the Findings, Facts in Support Of Findings, and Statement Of Overriding Considerations, will be updated in accordance with the changes shown above and included in the staff report packet for the City Council hearing on the proposed project.

Attorneys for Carpenters Local 713 Comment Letter

VIA E-MAIL

February 14, 2024

Ashley Vera, Associate Planner
City of Livermore
1052 S. Livermore Avenue
Livermore, CA 94550
Em: Asvera@livermoreca.gov

RE: City of Livermore's SMP 39 and 40 Planning Commission Meeting

Dear Ashley Vera,

On behalf of "**Carpenters Local 713**", my Office is submitting these comments for the City of Livermore's ("**City**") Draft Environmental Impact Report ("**Draft EIR**" or "**DEIR**") and Final Environmental Impact Report ("**Final EIR**" or "**FEIR**") for the **February 20, 2024 Planning Commission Meeting** for the SMP 39 and 40 Project ("**Project**").

According to the Project's Notice of Availability ("**NOA**") of a Draft EIR Project Description:

> "On **SMP 38**, the proposed project includes a Sphere of Influence (SOI) Amendment to **include** SMP 38 within the **City of Livermore** SOI and **remove** it from the **City of Pleasanton's** SOI. The City of Livermore General Plan land use designation for SMP 38 would remain Limited Agriculture and Open Space/Sand and Gravel and the Alameda County zoning designation would remain Agriculture. **Development of SMP 38** is **not proposed**.
>
> For **SMP 39**, the proposed project would include development of a total of **up to six light industrial buildings**, consisting of **up to approximately 755,500 square feet** (sf) of new building space, and associated **internal roadways** and **other** improvements. **For SMP 40**, the proposed project would include development of **two industrial**

buildings containing up to **759,275 sf of new building space** with related **internal roadways** and **other** improvements. A number of approvals would be required for development of SMP 39 and SMP 40, including a **SOI Amendment for SMP 39**, **General Plan Amendment**, **Pre-zoning** and **Annexation**, **Zoning Map Amendment**/Planned Development, Vesting Tentative Subdivision **Maps**, a **Pre-Annexation Agreement**, and **Development Agreement**. A **Site Plan Design Review** entitlement is required for SMP 39 and SMP 40, which would include a review of the site plan, building, and landscape design; however, the entitlement is **only proposed for SMP 40 at this time**. A Site Plan Design Review entitlement will be required **at a later date** for the future development of **SMP 39**. In addition, the proposed project would include **annexation of four additional parcels** (APNs 904-10-2-3, -5, -7, and -8) located **east of SMP 40**. Development is **not proposed** on the additional parcels **as part** of the proposed project.

The project would include a **paved at-grade, on-site trail along the boundaries** of the SMP 40 site, consistent with the City's Active Transportation Plan. Specifically, the on-site trail would extend from the northeastern corner of the site, along the project site's eastern, southern, and western boundaries, before connecting to an existing off-site paved shared-use path at the northwestern corner of site, which extends along the west side of the Oaks Business Park to the north and connects to West Jack London Boulevard.

In addition, the project would include a **new off-site connection to the existing Arroyo Mocho Trail**, located on the east side of Isabel Avenue/SR 84. For the purposes of the Draft EIR analysis, three alternatives for the proposed off-site Isabel Avenue/SR 84 crossing to the existing Arroyo Mocho Trail are considered and evaluated in the Draft EIR, including the following, and described in more detail in the Draft EIR:

- Trail Connection Option 1 – **At-Grade** Crossing at **Discovery Drive**;
- Trail Connection Option 2 – **Undercrossing** at **Isabel** Bridge; and

- Trail Connection Option 3 – **Overcrossing** of **Isabel** Avenue/SR 84."

NOA of Draft EIR, pp. 1-2, emph. added.

The concurrently circulated Draft EIR contains the same project description. DEIR, pp. 1-2—1-4.

Carpenters Local 713 is a labor union representing union carpenters in Alameda County , and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Local 713 members live, work, and recreate in the City and surrounding communities and would be directly affected by the Project's environmental impacts.

Carpenters Local 713 expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

Carpenters Local 713 incorporates by reference all comments related to the Project or its CEQA review, including the Environmental Impact Report. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

Moreover, Carpenters Local 713 requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using local workers who have graduated from a Joint Labor-Management Apprenticeship Program and make a commitment to hiring a local workforce.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

> [A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

> [L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California's workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.[1]

[1] California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf.

Furthermore, workforce policies have significant environmental benefits given that they improve an area's jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the "[u]se of a local state-certified apprenticeship program" can result in air pollutant reductions.[2]

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

> People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.[3]

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.[4] Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

> In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is

[3] California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf

[4] Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, *available at* http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf.

> voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 ("**AB2011**"). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE PROJECT WOULD BE APPROVED IN VIOLATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT

A. Background Concerning the California Environmental Quality Act

The California Environmental Quality Act is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations ("**CEQA Guidelines**"), § 15002, subd. (a)(1).[5] At its core, its purpose is to "inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made." *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.

1. Background Concerning Environmental Impact Reports

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Comes* (2001) 91 Cal.App.4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; *Laurel Heights Improvement Assn.*, 47 Cal.3d at p. 400. The EIR

[5] The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Cal. Pub. Res. Code, § 21083. The CEQA Guidelines are given "great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous." *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to "identify ways that environmental damage can be avoided or significantly reduced." CEQA Guidelines, § 15002, subd. (a)(2). If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has "eliminated or substantially lessened all significant effects on the environment where feasible" and that any unavoidable significant effects on the environment are "acceptable due to overriding concerns" specified in Public Resources Code section 21081. See CEQA Guidelines, § 15092, subds. (b)(2)(A)-(B).

While the courts review an EIR using an 'abuse of discretion' standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Jets*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights Improvement Assn.*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Id.* Drawing this line and determining whether the EIR complies with CEQA's information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the court stated in *Berkeley Jets*, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. 91 Cal.App.4th at p. 1355 (internal quotations omitted).

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR's function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the "fair argument" standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602; *Friends of "B" St.* v. *City of Hayward* (1980) 106 Cal.3d 988, 1002.

The fair argument test stems from the statutory mandate that an EIR be prepared for any project that "may have a significant effect on the environment." PRC, § 21151; see *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.App.3d 68, 75; accord *Jensen v. City of Santa Rosa* (2018) 23 Cal.App.5th 877, 884. Under this test, if a proposed project is not exempt and may cause a significant effect on the environment, the lead agency must prepare an EIR. PRC, §§ 21100 (a), 21151; CEQA Guidelines, § 15064 (a)(1), (f)(1). An EIR may be dispensed with only if the lead agency finds no substantial evidence in the initial study or elsewhere in the record that the project may have a significant effect on the environment. *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal.App.4th 768, 785. In such a situation, the agency must adopt a negative declaration. PRC, § 21080, subd. (c)(1); CEQA Guidelines, §§ 15063 (b)(2), 15064(f)(3).

"Significant effect upon the environment" is defined as "a substantial or potentially substantial adverse change in the environment." PRC, § 21068; CEQA Guidelines, § 15382. A project may have a significant effect on the environment if there is a reasonable probability that it will result in a significant impact. *No Oil, Inc.*, 13 Cal.3d at p. 83 fn. 16; see *Sundstrom v. County of Mendocino* (1988) 202 Cal.App.3d 296, 309. If any aspect of the project may result in a significant impact on the environment, an EIR must be prepared even if the overall effect of the project is beneficial. CEQA Guidelines, § 15063(b)(1); see *County Sanitation Dist. No. 2 v. County of Kern* (2005) 127 Cal.App.4th 1544, 1580.

This standard sets a "low threshold" for preparation of an EIR. *Consolidated Irrigation Dist. v. City of Selma* (2012) 204 Cal.App.4th 187, 207; *Nelson v. County of Kern* (2010) 190 Cal.App.4th 252; *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928; *Bowman v. City of Berkeley* (2004) 122 Cal.App.4th 572, 580; *Citizen Action to Serve All Students v. Thornley* (1990) 222 Cal.App.3d 748, 754; *Sundstrom*, 202 Cal.App.3d at p. 310. If substantial evidence in the record supports a fair argument that the project may have a significant environmental effect, the lead agency must prepare an EIR

even if other substantial evidence before it indicates the project will have no significant effect. See *Jensen,* 23 Cal.App.5th at p. 886; *Clews Land & Livestock v. City of San Diego* (2017) 19 Cal.App.5th 161, 183; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 150; *Brentwood Assn. for No Drilling, Inc. v. City of Los Angeles* (1982) 134 Cal.App.3d 491; *Friends of "B" St.*, 106 Cal.App.3d 988; CEQA Guidelines, § 15064(f)(1).

B. The Project May Have a Significant Impact on Biological Resources

There is substantial evidence the Project will have a significant impact on biological resources. As discussed in further detail in a comment letter from biological resources expert Shawn Smallwood, PhD with regards to the proposed Project, incorporated by reference herein, "the existing environmental setting has not been accurately characterized, and several important types of potential project impacts have been inadequately analyzed. These types of impacts include habitat loss, interference with wildlife movement, and wildlife-automobile collision mortality." (See **Exhibit D** [December 12, 2023 comment letter from Shawn Smallwood, PhD regarding SMP 38, SMP 39, and SMP 40 biological resources analysis].)

First, for example, with regards to the potential for habitat loss, Dr. Smallwood predicts:

> SMP 38 (111.7 acres), SMP 39 (51.9 acres) and SMP 40 (41 acres) support 11.4 bird nests/acre/year. Based on this assumption, the combined projects, SMP 39 and SMP 40, on 92.9 acres would eliminate 1,059 nest sites, and assuming SMP 38 is also later developed, then the combined projects, SMP 38, SMP 39, ad SMP 40, on 204.6 would eliminate 2,332 nest sites.

(**Exhibit D**, p. 28.)

Accordingly, Dr. Smallwood points out that this loss in nest sites would constitute a significant impact from the Project that was not quantitatively addressed in the Draft EIR. (**Exhibit D**, p. 28.) Further, Dr. Smallwood notes that the loss in nests would lead to a loss in the reproductive capacity of the site, thus decreasing the number of birds at the Site over time. (*Id.*)

Second, Dr. Smallwood discusses the Projects impacts on interference with wildlife movement, highlighting that the DEIR's analysis of whether the Project will interfere with wildlife movement in the Project Site area is "flawed and misleading." (**Exhibit D**, p. 29.) Specifically, Dr. Smallwood states that:

> According to the DEIR, "The project area does not fall within an Essential Habitat Connectivity area mapped by the CDFW." However, at https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=18486, the California Essential Habitat Connectivity Project specifically points out that it is not: "A California Department of Fish and Game or US Fish and Wildlife Service response to potential impacts to a habitat or species from a project subject to the California Environmental Quality Act (CEQA)," nor "Fine scale, with every important piece of habitat identified" nor ""Essential", meaning the only places of importance" nor "A solution by itself for how to provide necessary linkages for any given species of plant or animal... Linkage designs will vary depending on focal species chosen and the goal of providing connected habitat for a chosen species might be met several different ways" nor "The final word on connectivity for California." With analytical grid cells of 2,000 acres, the spatial grain of the California Essential Habitat Connectivity Project is much too coarse for the conclusion the DEIR draws from it.

(**Exhibit D**, p. 29.)

Moreover, Dr. Smallwood points out that the DEIR contains a flawed "argument that SMP 39 is cut off from open areas by well-trafficked roads, the airport, the gravel quarries, and therefore cannot function as a wildlife movement corridor" and notes that the same argument is used for SMP 40. (*Id.*) However, as Dr. Smallwood notes, the DEIR simply uses speculation here and provides no supporting evidence to this assertion. (*Id.*)

Third, Dr. Smallwood discusses the Project's traffic impacts to wildlife, noting that traffic generated from the Project will endanger wildlife that must cross roads used by traffic getting to and from the Project Site. (**Exhibit D**, p. 30.) Dr. Smallwood discusses traffic-caused wildlife mortality and highlights various traffic mortality numbers collected from a wildlife mortality study performed only eleven (11) miles from the Project Site in the County of Contra Costa. (*Id.*) Dr. Smallwood concludes an analysis should be done on "whether increased traffic generated by the project site would similarly result in local impacts on wildlife." (*Id.* at p. 31.)

In addition, the biological impact analysis of the EIR is legally flawed for the following reasons.

First, the DEIR's biological resources impact analysis relies on multiple inadequate biological field surveys outlined in Appendices D and E of the DEIR prepared by Monk & Associates that are described in insufficient detail.

For example, with regards to the field surveys, the DEIR states that:

> "SMP 39 and SMP 40 were both first surveyed in 2000, with follow-up surveys over the years, including in November 2013, for various development proposals. In addition, a **project-specific field survey** was conducted on SMP 39 on **October 14, 2021**, and on SMP 40 on **June 10, 2019** to record biological resources within the sites, and to assess the likelihood of resource agency regulated areas to be located within the sites. An **additional survey** was conducted for SMP 40 on **June 21, 2019** to flag the Arroyo Mocho's riparian drip line to allow for the project engineers to survey the limits of the riparian vegetation and overlay the area on the project site plan, and **another general survey** of SMP 40 was conducted on **September 10, 2021.**"

DEIR, p. 4.3-24. [Emphasis added.']

However, the DEIR's reliance on these biological resources field surveys is improper for several reasons.

First, the DEIR and its accompanying Appendices D and E leave out crucial information about the site surveys.

In summarizing the various site surveys that occurred in 2013, 2019, and 2021, DEIR Appendix D's Biological Resources Analysis ("**SMP-39 BRA**") states that "[e]ach site survey involved searching all habitats on the site and recording all plant and wildlife species observed. . . ." and that the "evaluation included an examination of the site to determine if there could be potential areas within the project site that would be regulated as waters of the United States and/or State . . ." DEIR Appendix D, p. 2. Thus, the SMP-39 BRA field surveys seem to indicate that visual inspections were done during these site visits. However, SMP-39 BRA is insufficient for numerous reasons as it leaves out crucial information about the site surveys while relying on the surveys to form conclusions about the Project's potential biological resources impacts.

As a preliminary matter, *one* (1) single field survey alone for just the SMP-39 Project Site is insufficient to adequately identify all of the potential habitats and plant and wildlife species occurring within the Project Site, as the site surveys purport to have

looked for. In the City's Final EIR Responses to Comments, Response No. 5-12, the City counters our office's prior comment that "[o]ne single field survey is sufficient to get a baseline description of a project site's pant communities and wildlife habitats and to determine if additional surveys for special-status species are necessary." (FEIR Response to Comments, p. 2-75.) However, as Dr. Smallwood notes in his comment letter on the Project, "[m]ore surveys are needed than my two surveys [sic] to inventory use of the project site by wildlife" (**Exhibit D**, pp. 14-15), that the appropriate detection surveys have not been completed at SMP 39 and SMP 40," (*id.* at p. 17), that "[r]econnaissance surveys for wildlife are not designed to detect special-status species" indicating that protocol-level detection surveys are appropriate but that Monk & Associates did not perform such detection surveys here, thus rendering the Draft EIR's "characterization of the existing environmental setting . . . therefore incomplete and inaccurate." (*Id.* at p. 19.) Therefore, it is clear that the single survey conducted for SMP-39 is inadequate.

Moreover, the SMP-39 BRA does not specify what time of the day the surveys were conducted during, (DEIR Appendix D, p. 2) which, again, leaves open the possibility that certain species, for example, nocturnal species, could present themselves at different times of the day. This is further highlighted in Dr. Smallwood's comment letter, where he notes that:

> For none of the above surveys was there reporting of what time the surveys began, or how long the surveys lasted. No checklist is shared of habitat elements that the biologists might have used during their survey to later crosscheck against documented habitats of each special-status species. No explanation is provided of whether or how animal behavior data or other evidence contributed to the biologist's assessment of the site for its importance to animal movement. It is therefore difficult to assess survey outcomes relative to survey effort and methods.

(**Exhibit D**, p. 16.)

Even further, in one (1) single survey, the surveyor may fail to identify species that would only present themselves during certain times of the *year*. According to the SMP-39 BRA in Appendix D, for example, the most recent surveys were conducted in June 2019 (a summer month) and October 2021 (a fall month), while failing to account for the spring and winter months. DEIR Appendix D, p. 2. However, there may be certain plant or animal species that would not be identifiable to an observer during the summer or fall months but that could nevertheless be present at the

Project Site and be identifiable during other seasons of the year. For example, and as noted by Dr. Smallwood, in response to the DEIR's assertion that no special-status plants were observed during some of the surveys at the Project Sites during various months over the years, Dr. Smallwood responds that this reporting is misleading "because only one of the several surveys was conducted during the plant blooming season. Monk and Associates (2021, 2023) did not meet the minimum standards of [California Department of Fish and Wildlife's ("**CDFW**")] (2018) plant survey guidelines. While the FEIR's Responses to Comments counters our office's prior comments, asserting that the CDFW's survey guidelines cited are guidelines for conducting floristic surveys for rare and endangered or other special-status species, the site surveys still failed to meet the CDFW's minimum plant survey guidelines standards. Thus, new surveys must be conducted that meet these standards.

Therefore, the DEIR's reliance on surveys not in compliance with California Department of Fish and Wildlife's survey guidelines[6] and its misuse of the California Natural Diversity Database ("**CNDD**") resulted in potentially inaccurate determinations. For example, with regards to botanical field surveys, the CDFW's survey guidelines state that such field surveys should be conducted in a way that will maximize the likelihood of identifying special status plants and sensitive natural communities that may be present at a site.[7] Specifically, the guidelines state that "[m]ore than one field visit is usually necessary to adequately capture the floristic diversity of a project area."[8]

For each of the foregoing reasons, the Project may have a significant impact on biological resources. Accordingly, the DEIR's findings as to the Project's biological impacts are not supported with substantial evidence that is of verifiable or credible value and the DEIR must be revised and recirculated to reassess those impacts, including on the wildlife species with potential to occur on the Project Site using protocol-level detection surveys and describing those surveys with sufficient detail.

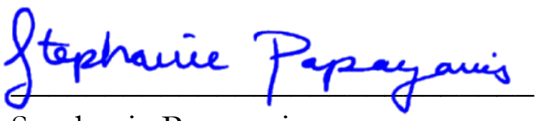
C. The Project May Have Significant Noise Impacts.

There is substantial evidence that the Project will have significant traffic impacts. As discussed by Principal Steve Rogers of Steve Rogers Acoustics, "the evaluation of noise impacts during the construction phases is incomplete and contains a significant calculation error." (**Exhibit E**, p. 3 [December 12, 2023 comment letter re City of Livermore SMP 38/SMP 39/SMP 40 Project Review of DEIR Noise Section & Appendices]), fully incorporated herein.

First, as noted by Mr. Rogers for the DEIR's construction noise impacts, the DEIR concludes there will be a less than significant impact for on-site construction, but per the DEIR's analysis, the DEIR fails to adequately support this conclusion for multiple reasons. (**Exhibit E**, p. 2.) For example, the DEIR fails to include SMP 39's construction noise impacts in its section 4.6 analysis. (*Id.*) Second, Mr. Rogers notes that the noise analysis for SMP 40 is incomplete. Specifically,

> The noise impact analysis for construction on the SMP 40 site compares Salter's noise level predictions with instantaneous maximum noise level (Lmax) limits of 70 dBA during the day and 60 dBA at night, which are taken from Policy N-1.5.P3 of the City of Livermore General Plan.
>
> However, these Lmax noise limits are not the only local regulations that would apply to construction noise on the SMP 40 site.
>
> . . .
>
> Similarly, the DEIR does not include an DNL analysis for construction noise from SMP 40 to show that it will be below the 60 dBA exterior noise standard taken from land-use compatibility table (Table 9-7) in the General Plan. This will be particularly important if any construction work is to occur at night.

(**Exhibit E**, pp. 2-3.)



Third, Mr. Rogers highlights that there was an error in the calculations for SMP 40 with regards to various construction equipment pieces at a 50-foot distance. (*Id.*) Lastly, Mr. Rogers states that the construction noise analysis on the east side of the SMP 40 site is overlooked, as it assumes receivers 884 feet away from the equipment, while during other phases of construction, the noisy equipment may be operating closer than 884-feet from nearby residential uses. (*Id.*)

For each of the foregoing reasons, the Project may have a significant noise impact and the EIR should therefore be revised and recirculated.

III. CONCLUSION

Based on the foregoing, the City should deny the Project's proposed entitlements and require that the Environmental Impact Report be revised and recirculated pursuant to CEQA, consistent with the comments and issues identified in this comment letter.

Sincerely,

Stephanie Papayanis

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."[1] CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.[2]

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[3]

[1] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[2] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[3] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled ("VMT") associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.[4]

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

> "$VMT_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$
>
> Where:
>
> n = Number of land uses being modeled."[5]

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

> "$\text{Emissions}_{pollutant} = VMT * EF_{running,pollutant}$
>
> Where:
>
> $\text{Emissions}_{pollutant}$ = emissions from vehicle running for each pollutant
>
> VMT = vehicle miles traveled
>
> $EF_{running,pollutant}$ = emission factor for running emissions."[6]

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[7] In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act ("CEQA") requires that such changes be justified by substantial evidence.[8] The default number of construction-related worker trips is calculated by multiplying the

[5] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.
[6] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.
[7] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.
[8] CalEEMod User Guide, *available at:* http://www.caleemod.com/, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.[9] Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively."[10] Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.[11] The operational home-to-work vehicle trip lengths are:

> "[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings" (emphasis added). [12]

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).[13]

Worker Trip Length by Air Basin		
Air Basin	**Rural (miles)**	**Urban (miles)**
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	**16.47**	**11.17**
Minimum	**10.80**	**10.80**
Maximum	**19.80**	**14.70**
Range	**9.00**	**3.90**

[9] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

[11] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.
[12] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.
[13] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan ("Project") located in the City of Claremont ("City"). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.[14] In an effort to evaluate the potential for a local hire provision to reduce the Project's construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO_2e)	3,623
Amortized Construction GHG Emissions (MT CO_2e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO2e)	3,024
Amortized Construction GHG Emissions (MT CO_2e/year)	100.80
% Decrease in Construction-related GHG Emissions	***17%***

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project's urbanization level and location.

[14] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H_2O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. $41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: $10,000 grant awarded to San Diego State University.
Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. $100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. $20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: $10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: $15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. $500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey
Duarte et al, *Plaintiffs,* vs. United States Metals Refining Company et. al. *Defendant.*
Case No.: 2:17-cv-01624-ES-SCM
Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division
M/T Carla Maersk, *Plaintiffs,* vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS "Conti Perdido" *Defendant.*
Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237
Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants
Case No.: No. BC615636
Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants
Case No.: No. BC646857
Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado
Bells et al. Plaintiff vs. The 3M Company et al., Defendants
Case: No 1:16-cv-02531-RBJ
Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District
Phillip Bales et al., Plaintiff vs. Dow Agrosciences, LLC, et al., Defendants
Cause No 1923
Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa
Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants
Cause No C12-01481
Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois
Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants
Case No.: No. 0i9-L-2295
Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles
Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC
Case No.: LC102019 (c/w BC582154)
Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division
Brenda J. Cooper, et al., *Plaintiffs,* vs. Meritor Inc., et al., *Defendants*
Case Number: 4:16-cv-52-DMB-JVM
Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al.,, et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action N0. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant.*
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs,* vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs,* vs. BP Products North America, Inc., *Defendant.*
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal repesentatives, Parker, AZ.

Hagemann, M.F., 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

Hagemann, M.F., 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

Hagemann, M.F., 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

Hagemann, M.F., 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. A Chronology of MTBE in Groundwater and an Estimate of Costs to Address Impacts to Groundwater. Presentation to the annual meeting of the Society of Environmental Journalists.

Hagemann, M.F., 2002. An Estimate of the Cost to Address MTBE Contamination in Groundwater (and Who Will Pay). Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to a meeting of the U.S. EPA and State Underground Storage Tank Program managers.

Hagemann, M.F., 2001. From Tank to Tap: A Chronology of MTBE in Groundwater. Unpublished report.

Hagemann, M.F., 2001. Estimated Cleanup Cost for MTBE in Groundwater Used as Drinking Water. Unpublished report.

Hagemann, M.F., 2001. Estimated Costs to Address MTBE Releases from Leaking Underground Storage Tanks. Unpublished report.

12 December 2023

RE: SMP 38, SMP 39. SMP 40

Dear Ms. Vera,

I write to comment on potential impacts to biological resources that could result from the proposed SMP 38, SMP 39. SMP 40 Project, which I understand would add 1,514,275 square feet of floor space in eight speculative industrial buildings up to 55 feet tall on 217.04 acres located on APNs) 904-1-7-21; 904-1-2-12; 904-1-7-32; 904-3-1-4; 904-10-2-2, -3, -5, -7, and -8 west of Isabel Avenue, north of Stanley Boulevard, south of West Jack London Boulevard, and east of El Charro Road. I comment on the analyses of impacts to biological resources in the DEIR and in Monk & Associates (2021).

My qualifications for preparing expert comments are the following. I hold a Ph.D. degree in Ecology from University of California at Davis, where I also worked as a post-graduate researcher in the Department of Agronomy and Range Sciences. My research has been on animal density and distribution, habitat selection, wildlife interactions with the anthrosphere, and conservation of rare and endangered species. I authored many papers on these and other topics. I served as Chair of the Conservation Affairs Committee for The Wildlife Society – Western Section. I am a member of The Wildlife Society and Raptor Research Foundation, and I've lectured part-time at California State University, Sacramento. I was Associate Editor of wildlife biology's premier scientific journal, The Journal of Wildlife Management, as well as of Biological Conservation, and I was on the Editorial Board of Environmental Management. I have performed wildlife surveys in California for thirty-seven years. My CV is attached.

SITE VISIT

I visited the SMP 40 for 2.22 hours from 14:43 to 16:35 hours on 28 November 2023, and SMP 38 and SMP 39 for 2.83 hours from 06:45 to 09:35 hours on 29 November 2023. At SMP 40, I surveyed from a cul-du-sac on the north edge of the site. At SMP 38 and SMP 39, I walked the northern perimeters, stopping to scan for wildlife with use of binoculars. I recorded all species of vertebrate wildlife I detected, including those whose members flew over the sites or were seen nearby, off the sites. Animals of uncertain species identity were either omitted or, if possible, recorded to the Genus or higher taxonomic level.

Conditions were mostly cloudy still with temperatures of 62-55° F on the 28th and 46-50° F on the 29th. The sites have been previously disked, and at the time of the surveys they were covered by annual grasses and ruderal vegetation (Photos 1–2).

Photos 1–2. *Views of SMP 40 (top) and SMP 39 with a flock of Canada goose (bottom), 28-29 November 2023.*

I detected 46 species of vertebrate wildlife at or adjacent to the project site, including 10 species with special status (Table 1). I saw Botta's pocket gopher (Photo 3) and California ground squirrel (Photo 4), both species of which are ecological keystone species. I saw loggerhead shrike (Photo 5), Cooper's hawk and American kestrel (Photos 6 and 7), western meadowlark (Photo 8), house finch and killdeer (Photos 9 and 10), black phoebe and white-crowned sparrow (Photos 11 and 12), mourning dove (Photo 13), Say's phoebe and yellow-rumped warbler (Photos 14 and 15), savannah sparrow (Photo 16), and lesser goldfinch and bushtit (Photos 17 and 18), among the other species listed in Table 1. Many of the species actively foraged on the site, including coyote, Cooper's hawk, red-tailed hawk, horned lark, Canada goose and Aleutian cackling goose, killdeer, western meadowlark, house finch and others. I observed Some species in high abundance, including western meadowlark and mourning dove. California ground squirrels occupied all three sites, but were particularly abundant on SMP 40.

Table 1. *Species of wildlife I observed during 5.05 hours of survey on 28-29 November 2023.*

I fit nonlinear regression models to the cumulative numbers of vertebrate species I detected with time into my surveys to predict the number of species that I would have detected with a longer survey or perhaps with additional biologists available to assist. The models are logistic growth models which reach asymptotes that correspond with the maximum numbers of vertebrate wildlife species that could have been detected during each survey. In this case, the models predict 46 and 118 species of vertebrate wildlife were available to be detected on the evening of the 28th and the morning of the 29th, respectively, the difference likely due to the onset of darkness during the evening survey of the 28th. Compared to models fit to data I collected from 18 other sites in the region between 2019 and 2023, the data from this project site exceeds the upper bound of the 95% confidence interval of the rate of accumulated species detections with time into the survey (Figure 1). Importantly, however, the species I detected on November 28-29 composed only a fraction of the species that would occur at the project site over the period of a year or longer. This is because many species are seasonal in their occurrence.

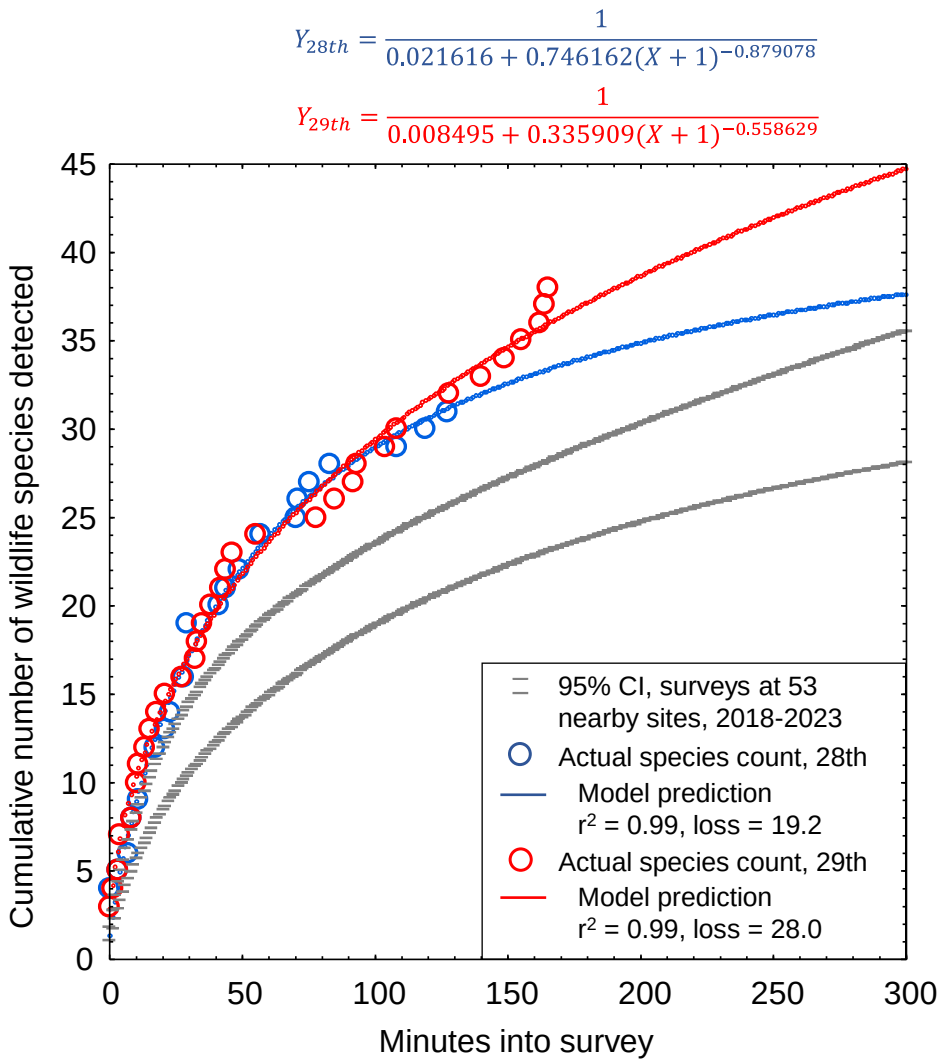

Figure 1. *Actual and predicted relationships between the number of vertebrate wildlife species detected and the elapsed survey time based on visual-scan surveys on 28-29 November 2023. Note that the relationships would differ if the surveys were based on another method or during another season.*

At least a year's worth of surveys would be needed to more accurately report the number of vertebrate species that occur at the project site, but I only have Noriko's one survey. However, by use of an analytical bridge, a modeling effort applied to a large, robust data set from a research site can predict the number of vertebrate wildlife species that likely make use of the site over the longer term. As part of my research, I completed a much larger survey effort across 167 km² of annual grasslands of the Altamont Pass Wind Resource Area, where from 2015 through 2019 I performed 721 1-hour visual-scan surveys, or 721 hours of surveys, at 46 stations. I used binoculars and otherwise the methods were the same as the methods I and other consulting biologists use for surveys at proposed project sites. At each of the 46 survey stations, I tallied new species detected with each sequential survey at that station, and then related the cumulative species detected to the hours (number of surveys, as each survey lasted 1 hour) used to accumulate my counts of species detected. I used combined quadratic and simplex methods of estimation in Statistica to estimate least-squares, best-fit nonlinear models of the number of cumulative species detected regressed on hours of survey (number of surveys) at the station: $\hat{R} = \frac{1}{1/a+b\times(Hours)^c}$, where $\hat{R}$ represented cumulative species

richness detected. The coefficients of determination, r^2, of the models ranged 0.88 to 1.00, with a mean of 0.97 (95% CI: 0.96, 0.98); or in other words, the models were excellent fits to the data.

I projected the predictions of each model to thousands of hours to find predicted asymptotes of wildlife species richness. The mean model-predicted asymptote of species richness was 57 after 11,857 hours of visual-scan surveys among the 46 stations of my research site. I also averaged model predictions of species richness at each incremental increase of number of surveys, i.e., number of hours (Figure 2). On average I would have detected 17.5 species over my first 5.05 hours of surveys at my research site in the Altamont Pass (5.05 hours to match the 5.05 hours I surveyed at the project site), which composed 30.7% of the predicted total number of species I would detect with a much larger survey effort at the research site. Given the example illustrated in Figure 2, the 46 species I detected after my 5.05 hours of survey at the project site likely represented 30.7% of the species to be detected after many more visual-scan surveys over another year or longer. With many more repeat surveys through the year, I would likely detect $^{46}/_{0.307} = 150$ species of vertebrate wildlife at the site. Assuming my ratio of special-status to non-special-status species was to hold through the detections of all 150 predicted species, then continued surveys would eventually detect 33 special-status species of vertebrate wildlife.

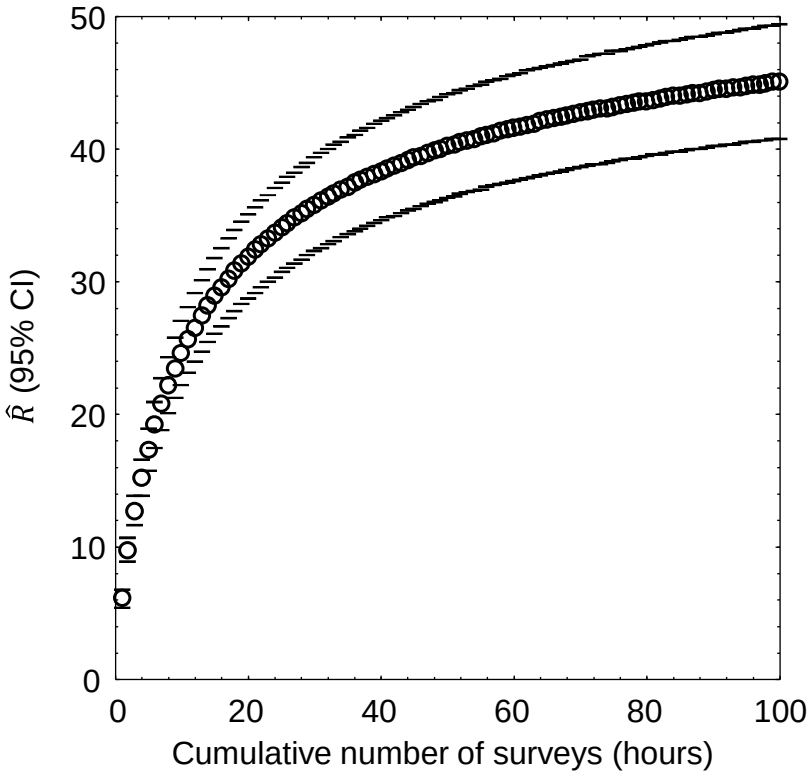

Figure 2. *Mean (95% CI) predicted wildlife species richness, $\hat{R}$, as a nonlinear function of hour-long survey increments across 46 visual-scan survey stations across the Altamont Pass Wind Resource Area, Alameda and Contra Costa Counties, 2015–2019. Note that the location of the study is largely irrelevant to the utility of the graph to the interpretation of survey outcomes at the project site. It is the pattern in the data that is relevant, because the pattern is typical of the pattern seen elsewhere.*

Because my prediction of 150 species of vertebrate wildlife, including 33 special-status species of vertebrate wildlife, is derived from daytime visual-scan surveys, and would detect few nocturnal mammals such as bats, the true number of species composing the wildlife community of the site must be larger. My reconnaissance surveys should serve

only as a starting point toward characterization of the site's wildlife community, but they certainly cannot alone inform of the inventory of species that use the site. More surveys are needed than my two survey to inventory use of the project site by wildlife. Nevertheless, the large number of species I predict at the project site is indicative of a relatively species-rich wildlife community that warrants a serious survey effort.

EXISTING ENVIRNMENTAL SETTING

The first step in analysis of potential project impacts to biological resources is to accurately characterize the existing environmental setting, including the biological species that use the site, their relative abundances, how they use the site, key ecological relationships, and known and ongoing threats to those species with special status. A reasonably accurate characterization of the environmental setting can provide the basis for determining whether the site holds habitat value to wildlife, as well as a baseline against which to analyze potential project impacts. For these reasons, characterization of the environmental setting, including the project site's regional setting, is one of CEQA's essential analytical steps. Methods to achieve this first step typically include (1) surveys of the site for biological resources, and (2) reviews of literature, databases and local experts for documented occurrences of special-status species. In the case of the proposed project, these needed steps have been inadequate.

Environmental Setting informed by Field Surveys

To CEQA's primary objective to disclose potential environmental impacts of a proposed project, the analysis should be informed of which biological species are known to occur at the proposed project site, which special-status species are likely to occur, as well as the limitations of the survey effort directed to the site. Analysts need this information to characterize the environmental setting as a basis for opining on, or predicting, potential project impacts to biological resources.

Herein I discuss several types of surveys, which are common to environmental review, but which are often misunderstood and misapplied. A ***reconnaissance survey***, also often referred to as a general biological survey, is intended to (1) detect as many of the species as feasible during the time of the survey, (2) search for and map the locations of approximate boundaries of wetlands and coarse representations of vegetation cover, and (3) assess the likelihood of occurrences of special-status species. The latter objective is often referred to as habitat assessment. CDFW (2018) provides guidelines for reconnaissance surveys directed toward plant species, but there are no guidelines for reconnaissance-level wildlife surveys, other than the expected use of sound scientific methodology. A ***protocol-level survey*** is a survey guided by a written protocol, usually by a resource agency or professional group of biologists. Such surveys can be for various objectives, but in environmental review they are usually intended for detection surveys. ***Detection surveys*** are formulated by experts on a particular species to, at reasonable cost, give survey personnel the best chance at detecting members of a species if the species is indeed present. The additional purpose of detection surveys is to support absence determinations when the protocol was followed but the species was nevertheless not detected. Absence determinations made for special-status species are

supportable only if the results of detection surveys were negative, or when the site is outside the species' geographic range or clearly does not provide habitat.

Preconstruction surveys are take-avoidance surveys intended to be completed after reconnaissance surveys and detection surveys and just prior to construction ground-disturbance activities such as clearing and grubbing or grading. For some species, protocols for preconstruction surveys are included in mitigation guidelines. The preconstruction survey is a mitigation measure, and therefore not to be confused with other types of surveys. This type of survey will be discussed in the Mitigation section near the end of my comments.

Monk & Associates (2021) performed a reconnaissance survey of the SMP 39 project site on 5 November 2021 "to record biological resources and to assess the likelihood of resource agency regulated areas occurring on the project site," and "searching all habitats on the site and recording all plant and wildlife species observed," and "examination of the site to determine if there could be potential areas within the project site that would be regulated as waters of the United States and/or State." Monk & Associates (2023) performed two reconnaissance surveys of the SMP 40 project site on 10 June 2019 and 10 September 2021. The objectives of the surveys at SMP 40 were essentially the same as those for the survey of SMP 39. In all three of these surveys, Monk & Associates recorded all the species observed. A wetland delineation was alco completed at SMP 40.

For none of the above surveys was there reporting of what time the surveys began, or how long the surveys lasted. No checklist is shared of habitat elements that the biologists might have used during their survey to later crosscheck against documented habitats of each special-status species. No explanation is provided of whether or how animal behavior data or other evidence contributed to the biologist's assessment of the site for its importance to animal movement. It is therefore difficult to assess survey outcomes relative to survey effort and methods.

Monk & Associates (2021) detected 14 species of vertebrate wildlife on SMP 39, and Monk & Associates (2023) detected 22 species of vertebrate wildlife on SMP 40. In comparison, and even though I was unable to access either of the project sites, I detected 34 species in only 1.83 hours at SMP 39, and 29 species in only 2.22 hours at SMP 40. I also detected twice the number of special-status species at SMP 39 and 1.5 times the number of special-status species at SMP 40. Based on my surveys of the project sites, the existing environmental setting of each appears substantially different from the setting characterized by Monk & Associates (2021, 2023). Considering the differences between what Monk & Associates and what I found, I suggest that Monk & Associates must have either been distracted by other too many survey objectives, or lacked the skill needed to perform the surveys. The results of the Monk and Associates (2021, 2023) surveys have been misinterpreted in the reports, resulting in inaccurate characterizations of the existing environmental settings of SMP 39 and SMP 40.

Combining my survey results with those of Monk & Associates (2021, 2023), 38 species of vertebrate wildlife have been detected at SMP 39, and 44 species have been detected

at SMP 40. These combined results increase the documented number of species at SMP 39 by nearly 3-fold and they double the number of species at SMP 40. In other words, the combined survey outcomes support my modeling predictions of much larger numbers of species of wildlife making use of the project sites than can be demonstrated by one or two reconnaissance surveys. My modeling predicts at least 150 species of vertebrate wildlife make use of the two sites, and this prediction was based solely on diurnal visual-scan surveys, and not on live-trapping for small mammals and nocturnal surveys for nocturnally active animals. The wildlife communities of SMP 39 and SMP 40 are much richer than portrayed in the DEIR.

The DEIR (page 4.3-25) reports that "western burrowing owls have not been observed within SMP 39 or SMP 40." This is factually incorrect, as CNDDB includes a record of burrowing owl occurrence on SMP 39 (Monk & Associates 2023: Figure 4). Even if this reporting was correct, it would still qualify as pseudoscientific. The appropriate surveys for detecting burrowing owls are detailed in the survey guidelines of CDFW (2012). Lack of detections of burrowing owls during reconnaissance surveys would be meaningful only after completion of many reconnaissance surveys at the appropriate time of year and by qualified biologists. Considering that ground squirrels occur in abundance on SMP 39 and SMP 40, and considering that one of California's most significant populations of burrowing owls occurs within the nearby Altamont Pass (Smallwood et al. 2013), and considering that the appropriate detection surveys have not been completed at SMP 39 and SMP 40, it would be prudent to assume that burrowing owls occur on the project sites.

Regarding tricolored blackbird, the DEIR (page 4.3-26) reports that "the species has not been observed near SMP 39 in nearly 40 years." This is factually incorrect, as eBird includes a 2003 record of tricolored blackbird occurrence only 300 m north of SMP 39. The DEIR also reports that tricolored blackbird would not occur on SMP 9 because "aquatic habitat does not exist within SMP 39." But this is also factually incorrect. I have many times recorded tricolored blackbird occurrences on grasslands of the Altamont Pass far from bodies of water (Photos 19 and 20). Grassland environments is where tricolored blackbirds do most of their foraging in Alameda County, and it is where they sometimes nest within the Altamont Pass (Photo 20).

The DEIR reports that loggerhead shrikes do not occur on SMP 39. But again, the DEIR is factually inaccurate. I observed a loggerhead shrike on SMP 39 (Photo 21), which as it turned out, was near where a loggerhead shrike sighting was also reported to eBird in 2018. Loggerhead shrike does occur on SMP 39, as well as on SMP 40.

The DEIR reports that SMP 39 and SMP 40 contains potential habitat of raptors. However, the word "potential" insinuates uncertainty remains on the question of whether the sites provide raptor habitat. Of course, they do. Those portions of the environment used by raptors are considered raptor habitat. Between my surveys and those of Monk & Associates, and including CNDDB and eBird records, the following raptors have been seen on SMP 39 and SMP 40: turkey vulture, northern harrier, white-tailed kite, red-tailed hawk, ferruginous hawk, Cooper's hawk, American kestrel, merlin,

and burrowing owl. There should be no ambiguity around the question of whether raptor habitat occurs on SMP 39 and SMP 40; raptor habitat is present.

Photos 19 and 20. *Top, tricolored blackbirds forage on grassland far from aquatic environments, and bottom, they breed on rapeseed and thistle in the Altamont Pass Wind Resource Area.*

Photo 21. *Loggerhead shrike on the SMP 39 portion of the project site, 29 November 2023.*

Reconnaissance surveys for wildlife are not designed to detect special-status species. Special-status species can be detected during such surveys, as has been the case for 10 special-status species at the project site, but these surveys are not formulated to detect them, nor are there minimum standards to be met in these surveys to support absence determinations. For the latter purpose, protocol-level detection surveys have been formulated by species experts. Monk & Associates (2021, 2023) did not perform any detection surveys. Based on Monk & Associates (2021, 2023), the DEIR's characterization of the existing environmental setting is therefore incomplete and inaccurate.

The same is true for special-status species of plants. According to the DEIR (page 4.3-25), "special-status plants have not been observed during several surveys of the project sites conducted during various months over the years." However, this reporting is misleading, because only one of the several surveys was conducted during the plant blooming season. Monk and Associates (2021, 2023) did not meet the minimum standards of CDFW's (2018) plant survey guidelines.

Environmental Setting informed by Desktop Review

The purpose of literature and database review and of consulting with local experts is to inform the field survey, and to augment interpretation of its outcome. Analysts need this information to identify which species are known to have occurred at or near the project site, and to identify which other special-status species could conceivably occur at the site due to geographic range overlap and migration flight paths.

Monk & Associates (2021) did not reportedly review eBird (https://eBird.org) or iNaturalist (https://www.inaturalist.org) for documented occurrence records at or near the project site. Instead, Monk & Associates (2021, 2023) queried the California Natural Diversity Data Base (CNDDB) for documented occurrences of special-status species within the three miles of the project sites. By taking this approach, Monk & Associates (2021, 2023) and the DEIR screen out many special-status species from further consideration in the characterization of the wildlife community as part of the existing environmental setting. CNDDB is not designed to support absence determinations or to screen out species from characterization of a site's wildlife community. As noted by CNDDB, "*The CNDDB is a positive sighting database. It does not predict where something may be found. We map occurrences only where we have documentation that the species was found at the site. There are many areas of the state where no surveys have been conducted and therefore there is nothing on the map. That does not mean that there are no special status species present*." Monk & Associates (2021, 2023) and the DEIR misuse CNDDB.

According to Monk & Associates (2021:6), "No special-status animal records have ever been mapped on the project site." The word "ever" adds emphasis to the finding. However, by implication, Monk & Associates (2021) misrepresents CNDDB as a database with uniform representation of California properties, which is far from the case. CNDDB relies entirely on volunteer reporting from biologists who were allowed access to whatever properties they report from. Many properties have never been surveyed by biologists. Many properties have been surveyed, but the survey outcomes never reported to CNDDB. Many properties have been surveyed multiple times, but not all survey outcomes reported to CNDDB. Furthermore, CNDDB is interested only in the findings of special-status species, which means that species more recently assigned special status will have been reported many fewer times to CNDDB than were species assigned special status since the inception of CNDDB. The lack of many CNDDB records for species recently assigned special status had nothing to do with whether the species' geographic ranges overlapped the project site, but rather more to do with the brief time for records to have accumulated since the species were assigned special status. And because negative findings are not reported to CNDDB, CNDDB cannot provide the basis for estimating occurrence likelihoods, either.

In my assessment based on database reviews and site visits, 128 special-status species of wildlife are known to occur near enough to the site (SMP 38, SMP 39, SMP 40) to warrant analysis of occurrence potential (Table 2). Of these 128 species, 19 (15%) were recorded on the project site, and another 35 (27%) species have been documented within 1.5 miles of the site ('Very close'), another 13 (10%) within 1.5 and 4 miles

('Nearby'), and another 57 (45%) within 4 to 30 miles ('In region'). More than half (52%) of the species in Table 2 have been reportedly seen within 4 miles of the project site. The site therefore supports multiple special-status species of wildlife and carries the potential for supporting many more special-status species of wildlife based on proximity of recorded occurrences. The site is far richer in special-status species than is characterized in the DEIR.

Whereas Monk & Associates (2021, 2023) reportedly queried CNDDB for occurrence records within three miles of the project sites, the DEIR analyzes the occurrence likelihoods of only 6 (<5%) of the species in Table 2. That only 6 special-status species were identified from occurrence records within 3 miles strains credulity. As noted above, using eBird and iNaturalist, I found records of 54 special-status species of wildlife within only 1.5 miles of the project sites, and 67 within 4 miles of the sites.

Of the 6 species included in Monk & Associates (2021, 2023) analyses of occurrence likelihoods, the DEIR concludes that 4 have no chance of occurrence, 1 has low to no chance, and 1 has low to moderate chance of occurrence. Except for species whose habitat is compellingly absent from the site, absence determinations are inappropriate based on the evidence gathered by Monk & Associates (2021, 2023). Absence determinations are supportable only after species-specific protocol-level detection surveys have been completed to the standards of the protocols, and the species were nevertheless not detected. No such surveys have been completed. It is inappropriate to conclude that a species is absent simply by looking at a site, and it is especially inappropriate to do so for 125 species of wildlife. Important findings of Monk & Associates (2021, 2023) and the DEIR are not supportable.

Of the special-status species that Monk & Associates (2021, 2023)) claims to be absent from one or both of the project sites, two – burrowing owl and loggerhead shrike – have been seen where they were reported to be absent. Occurrence records of another 2 supposedly absent special-status species have been reported within only 1.5 miles of the site, and another has been reported within 1.5 and 4 miles of the project site. Important findings of Monk & Associates (2021, 2023) and the DEIR are not supportable.

Of the 122 special-status species in Table 2, but which the DEIR does not analyze for occurrence potential, some are unlikely to occur, whereas many *are* likely to occur. With ground squirrels known to be present on SMP 39 and SMP 40, there is reason to expect the occurrences of American badger, ferruginous hawk, bald eagle and golden eagle. I regularly observed these species in the Altamont Pass Wind Resource Areas while I performed various studies there from 1999 through 2019. Golden eagles, I continue to record both in the Altamont Pass and over and on the project sites (Figure 3). Of the 45 golden eagles that Douglas Bell captured and fit with GPS telemetry backpacks since 2013, 11 have flown to or perched in the areas of the project sites (Figure 3).

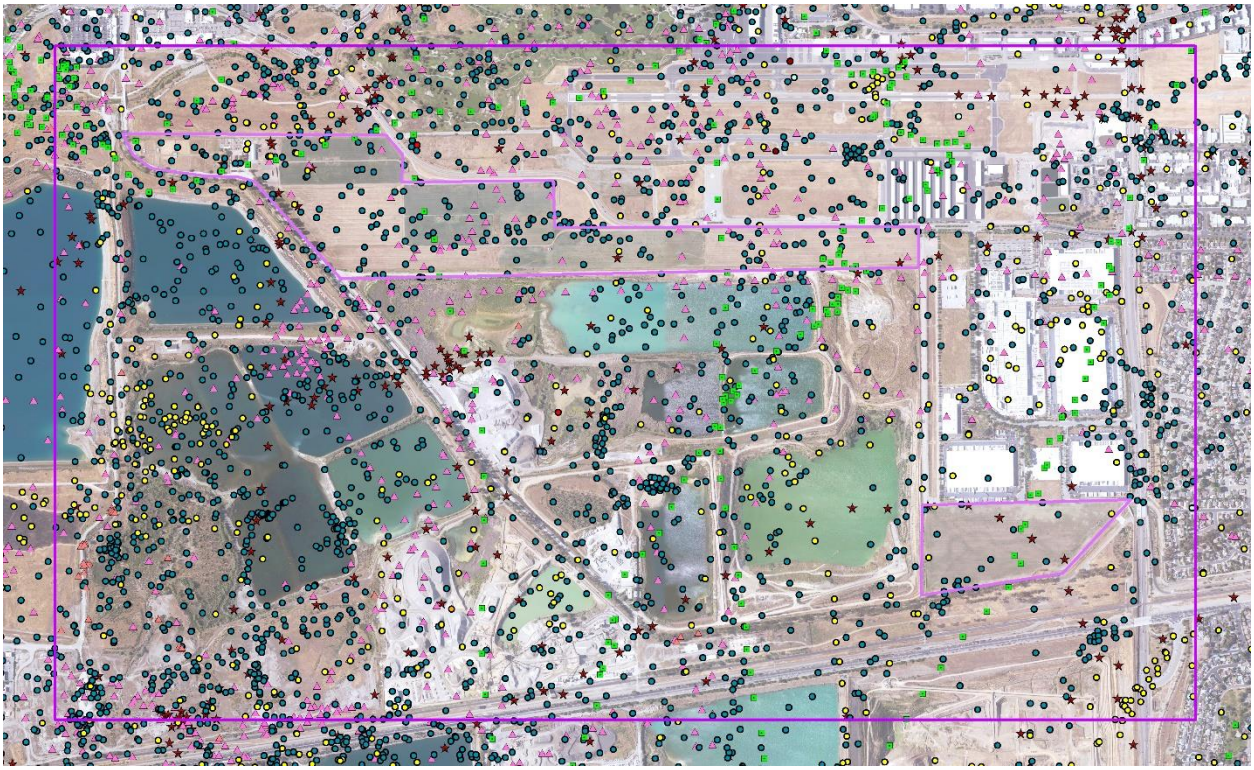

Figure 3. *GPS telemetry positions (N = 3,478) of 11 golden eagles from 2014 through 2023, each distinct color-symbol combination representative of one golden eagle. Many of the positions are on SMP 38, SMP 39, and SMP 40. Many of the positions are of flying golden eagles, and some are of perched golden eagles.*

Considering the inaccuracies of the DEIR's characterization of the existing environmental setting, the reasonable course of action would be to withdraw the current draft EUIR and prepare a new one to appropriately characterize the existing environmental setting. The public needs to understand the nature of the sensitive biological assets that exist on the project sites.

Table 2. *Occurrence likelihoods of special-status bird species at or near the proposed project site, according to eBird/iNaturalist records (https://eBird.org, https://www.inaturalist.org) and on-site survey findings, where 'Very close' indicates within 1.5 miles of the site, "nearby" indicates within 1.5 and 4 miles, and "in region" indicates within 4 and 30 miles, and 'in range' means the species' geographic range overlaps the site. Entries in bold font indicate those species I detected during my reconnaissance surveys.*

POTENTIAL BIOLOGICAL IMPACTS

An impacts analysis should consider whether and how a proposed project would affect members of a species, larger demographic units of the species, the whole of a species, and ecological communities. The accuracy of this analysis depends on an accurate characterization of the existing environmental setting. In the case of the proposed project, the existing environmental setting has not been accurately characterized, and several important types of potential project impacts have been inadequately analyzed. These types of impacts include habitat loss, interference with wildlife movement, and wildlife-automobile collision mortality.

HABITAT LOSS

Habitat loss results in a reduced productive capacity of affected wildlife species, but the DEIR offers no prediction of this lost capacity for any of the wildlife species potentially affected. In the case of birds, two methods exist for estimating the loss of productive capacity that would be caused by the project. One method would involve surveys to count the number of bird nests and chicks produced. The alternative method would be to infer productive capacity from estimates of total nest density elsewhere.

Because the project is located within an area that has undergone severe habitat fragmentation, the habitat that remains in fragmented patches probably no longer supports its original productive capacity of wildlife (Smallwood 2015, Smallwood and Smallwood 2023). However, several studies have estimated total avian nest density at locations that had likewise been highly fragmented. Two study sites in grassland/wetland/woodland complexes within agricultural matrices had total bird nesting densities of 32.8 and 35.8 nests per acre (Young 1948, Yahner 1982) for an average 34.3 nests per acre. Assuming total nest density at the project site is about a third of that of the above-cited study sites due to the annual disking of the project site's interior areas, I predict SMP 38 (111.7 acres), SMP 39 (51.9 acres) and SMP 40 (41 acres) support 11.4 bird nests/acre/year. Based on this assumption, the combined projects, SMP 39 and SMP 40, on 92.9 acres would eliminate 1,059 nest sites, and assuming SMP 38 is also later developed, then the combined projects, SMP 38, SMP 39, and SMP 40, on 204.6 would eliminate 2,332 nest sites.

The loss of 1059 to 2,332 nest sites would easily qualify as a significant project impact that has not been quantitatively addressed in the DEIR. But the impact would not end with the immediate loss of nest sites as nest substrate is removed and foraging grounds graded in preparation for impervious surfaces. The reproductive capacity of the site would be lost. The average number of fledglings per nest in Young's (1948) study was 2.9. Assuming Young's (1948) study site typifies bird productivity, the project would prevent the production of 3,071 to 6,763 fledglings per year, depending on whether SMP 38 is developed. Assuming an average bird generation time of 5 years, the lost capacity of both breeders and annual fledgling production can be estimated from an equation in Smallwood (2022): {(nests/year × chicks/nest × number of years) + (2 adults/nest × nests/year) × (number of years ÷ years/generation)} ÷ (number of years) = 3,495 to 7,696 birds per year denied to California, depending on whether SMP 38 is developed.

These losses of birds from California would be substantial, nearly equal to the annual loss of birds caused by wind turbine collision mortality in the nearby Altamont Pass Wind Resource Area (Adams Broadwell Joseph & Cardozo 8 January 2021 letter to Alameda County Planning Department regarding Comments on the Draft Subsequent Environmental Impact Report for the Mulqueeney Ranch Wind Repowering Project (SCH No. 2010082063), CUP Application No. PLN2019-00226). These losses would be highly significant.

INTERFERENCE WITH WILDLIFE MOVEMENT

One of CEQA's principal concerns regarding potential project impacts is whether a proposed project would interfere with wildlife movement in the region. Unfortunately, the DEIR's analysis of whether the project would interfere with wildlife movement in the region is flawed and misleading. According to the DEIR, "The project area does not fall within an Essential Habitat Connectivity area mapped by the CDFW." However, at https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=18486, the California Essential Habitat Connectivity Project specifically points out that it is not: "A California Department of Fish and Game or US Fish and Wildlife Service response to potential impacts to a habitat or species from a project subject to the California Environmental Quality Act (CEQA)," nor "Fine scale, with every important piece of habitat identified" nor ""Essential", meaning the only places of importance" nor "A solution by itself for how to provide necessary linkages for any given species of plant or animal… Linkage designs will vary depending on focal species chosen and the goal of providing connected habitat for a chosen species might be met several different ways" nor "The final word on connectivity for California." With analytical grid cells of 2,000 acres, the spatial grain of the California Essential Habitat Connectivity Project is much too coarse for the conclusion the DEIR draws from it.

The next flaw in the DEIR is in the argument that SMP 39 is cut off from open areas by well-trafficked roads, the airport, the gravel quarries, and therefore cannot function as a wildlife movement corridor. The same argument is made for SMP 40. On this point, the DEIR merely speculates, and offers no supporting evidence to its assertion. Monk & Associates (2021, 2023) report no survey methodology designed to determine whether wildlife rely on the site for movement in the region. They implemented no sampling regime nor a program of observation to record wildlife movement patterns. They failed to quantitatively or qualitatively analyze movement patterns of observed wildlife. Based on what is reported, Monk & Associates (2021, 2023) did not record or measure wildlife movement in any way. The conclusions of the DEIR regarding wildlife movement on the project site are speculative and conclusory.

On the other hand, the coyote I saw on site got there somehow, and so did the ground squirrels and pocket gophers, and so did all of the birds I saw on and over SMP 39. I observed hundreds if not thousands of gulls of multiple species flying in both easterly and westerly directions across SMP 38, SMP 39, and SMP 40. I observed Canada geese and Aleutian cackling geese flying to and from the quarry ponds and the project sites to forage. I saw a Cooper's hawk fly from the airport to SMP 39 to forage, crossing the well-trafficked road in about 2 seconds of flight time. Figure 3 illustrates that our telemetered

golden eagles from the Altamont Pass make frequent visits to the project site. That thousands of our golden eagle telemetry positions appear in the project area is consistent with the pattern that my co-investigators and I have noticed about golden eagle movement across California and beyond to other states and border nations, and that is that golden eagles carefully select open spaces as parts of their travel routes. The project area is important to golden eagle movement in the region, just as it is important to the 10 special-status species I observed on the project site, and to the 19 special-status species so far documented on the project site. Th evidence is overwhelming that the project site is important to wildlife movement in the region. Losing the open space of this site would be devastating to many species of wildlife, including to golden eagle.

Furthermore, whether the site includes or is within a wildlife movement corridor is not the only consideration when it comes to the standard CEQA Checklist question of whether the project would interfere with wildlife movement in the region. The primary phrase of the CEQA standard goes to wildlife movement regardless of whether the movement is channeled by a corridor. In fact, a site such as the project site is critically important for wildlife movement because it composes an increasingly diminishing area of open space within a growing expanse of anthropogenic uses, forcing more species of volant wildlife to use the site for stopover and staging during migration, dispersal, and home range patrol (Warnock 2010, Taylor et al. 2011, Runge et al. 2014). The project, due to its elimination of at least 92.9 acres of open space, and more realistically 204.6 acres of open space, and due to its insertion of multiple new buildings into the aerospace currently used by birds, bats and butterflies. would cut wildlife off from one of the last remaining stopover and staging opportunities in the region, forcing volant wildlife to travel even farther between remaining stopover sites. This impact would be significant, and as the project is currently proposed, it would be unmitigated.

TRAFFIC IMPACTS TO WILDLIFE

Project-generated traffic would endanger wildlife that must, for various reasons, cross roads used by the project's traffic to get to and from the project site (Photos 22—26), including along roads far from the project footprint. Vehicle collisions have accounted for the deaths of many thousands of amphibian, reptile, mammal, bird, and arthropod fauna, and the impacts have often been found to be significant at the population level (Forman et al. 2003). Across North America traffic impacts have taken devastating tolls on wildlife (Forman et al. 2003). In Canada, 3,562 birds were estimated killed per 100 km of road per year (Bishop and Brogan 2013), and the US estimate of avian mortality on roads is 2,200 to 8,405 deaths per 100 km per year, or 89 million to 340 million total per year (Loss et al. 2014). Local impacts can be more intense than nationally.

The nearest study of traffic-caused wildlife mortality was performed only 11 miles away, along a 2.5-mile stretch of Vasco Road in Contra Costa County, California. Fatality searches in this study found 1,275 carcasses of 49 species of mammals, birds, amphibians and reptiles over 15 months of searches (Mendelsohn et al. 2009). This fatality number needs to be adjusted for the proportion of fatalities that were not found due to scavenger removal and searcher error. This adjustment is typically made by placing carcasses for searchers to find (or not find) during their routine periodic fatality

searches. This step was not taken at Vasco Road (Mendelsohn et al. 2009), but it was taken as part of another study I completed next to Vasco Road concurrent to the Mendelsohn et al. study (Brown et al. 2016). Brown et al.'s (2016) adjustment factors for carcass persistence resembled those of Santos et al. (2011), which were derived from carcasses placed along roads. Applying searcher detection rates from Brown et al. (2016), the adjusted total number of fatalities was estimated at 12,187 animals killed by traffic on the reach of road that was studied. This fatality number over 1.25 years and 2.5 miles of road translates to 3,900 wild animals per mile per year. In terms comparable to the national estimates, the estimates from the Mendelsohn et al. (2009) study would translate to 243,740 animals killed per 100 km of road per year, or 29 times that of Loss et al.'s (2014) upper bound estimate and 68 times the Canadian estimate. An analysis is needed of whether increased traffic generated by the project site would similarly result in local impacts on wildlife.

Photo 22. *A Gambel's quail dashes across a road* on *3 April 2021. Such road crossings are usually successful, but too often prove fatal to the animal. Photo by Noriko Smallwood.*

Photo 23. *California ground squirrel in the middle of an eastern Alameda County road on 13 March 2014.*

Photo 24. *Western Pacific rattlesnake on an eastern Alameda County road, 23 August 2011. Photo by Shawn Smallwood.*

Photo 25. *Mourning dove killed by vehicle on a California road. Photo by Noriko Smallwood, 21 June 2020.*

Photo 26 *Raccoon killed on Road 31 just east of Highway 505 in Solano County. Photo taken on 10 November 2018.*

For wildlife vulnerable to front-end collisions and crushing under tires, road mortality can be predicted from the study of Mendelsohn et al. (2009) as a basis, although it would be helpful to have the availability of more studies like that of Mendelsohn et al. (2009) at additional locations. My analysis of the Mendelsohn et al. (2009) data resulted in an estimated 3,900 animals killed per mile along a county road in Contra Costa County. Two percent of the estimated number of fatalities were birds, and the balance was composed of 34% mammals (many mice and pocket mice, but also ground squirrels, desert cottontails, striped skunks, American badgers, raccoons, and others), 52.3% amphibians (large numbers of California tiger salamanders and California red-legged frogs, but also Sierran treefrogs, western toads, arboreal salamanders, slender salamanders and others), and 11.7% reptiles (many western fence lizards, but also skinks, alligator lizards, and snakes of various species). VMT is useful for predicting wildlife mortality because I was able to quantify miles traveled along the studied reach of Vasco Road during the time period of the Mendelsohn et al. (2009), hence enabling a

rate of fatalities per VMT that can be projected to other sites, assuming similar collision fatality rates.

From October 2016 through December 2019, I maintained my own database of wildlife mortality I encountered on Vasco Road between Marsh Creek Road and Livermore, which encompassed the wildlife mortality study site of Mendelsohn et al. (2009). Table 3 includes the wildlife I found as fatalities, and it compares my crudely calculated ratio of observed fatalities per mile. From Table 3, it is apparent that mortality along the reach of road studied by Mendelsohn et al. (2009) was relatively low compared to the rest of Vasco Road: $^{19.178}/_{13.200}$ = 5,667 fatalities per mile predicted for the 14.1 miles of Vasco Road that were not studies by Mendelsohn et al. (2009).

Table 3. *Fatalities I found along Vasco Road from October 2016 though December 2019, and along 14.1 miles of road that was not studied by Mendelsohn et al. (2009) and 2.5 miles that were studied.*

Predicting project-generated traffic impacts to wildlife

The DEIR predicts the project would generate 8,622,395 annual VMT. During the Mendelsohn et al. (2009) study, 19,500 cars traveled Vasco Road daily, so the vehicle miles that contributed to my estimate of non-volant fatalities was 19,500 cars and trucks × 2.5 miles × 365 days/year × 1.25 years = 22,242,187.5 vehicle miles per 12,187 wildlife fatalities, or 1,825 vehicle miles per fatality. This rate divided into the predicted annual VMT, above, would predict 4,725 vertebrate wildlife fatalities per year. My analysis of data in Table 3 suggests that the project-caused mortality along local roadways would be even higher.

Based on my analysis, the project-generated traffic would cause substantial, significant impacts to wildlife. The DEIR does not address this potential impact, let alone propose to mitigate it. Mitigation measures to improve wildlife safety along roads are available and are feasible, and they need exploration for their suitability with the proposed project. Given the predicted level of project-generated, traffic-caused mortality, and the lack of any proposed mitigation, it is my opinion that the proposed project would result in potentially significant adverse biological impacts. The DEIR should be withdrawn

from circulation and revised to appropriately analyze the potential impacts of project-generated automobile traffic on wildlife.

CUMULATIVE IMPACTS

The DEIR attempts to minimalize the project's contributions to cumulative impacts to biological resources by asserting that "ruderal herbaceous land is not considered sensitive wildlife habitat." However, CEQA does not require that the habitat that would be lost to a project be labeled as sensitive; no such standard exists.

The DEIR presents a flawed analysis of cumulative impacts, including to biological resources. The DEIR asserts that it "sets forth mitigation measures to ensure all potential project-specific impacts that would occur to biological resources are reduced to a less-than-significant level." And therefore, "the proposed project would not result in substantial adverse effects to biological resources protected by CEQA." The DEIR contrives the false standard that a given project impact is cumulatively considerable only when it has not been fully mitigated at the project level. The DEIR implies that cumulative impacts are really residual impacts left over by inadequate mitigation of project impacts. This notion of residual impacts being the source of cumulative impacts is inconsistent with CEQA's definition of cumulative effects. Individually mitigated projects do not negate the significance of cumulative impacts. If they did, then CEQA would not require a cumulative effects analysis. To summarize, the DEIR presents no cumulative effects analysis as defined in two ways by CEQA.

MITIGATION

Western Burrowing Owl

4.3-2(a) If project construction begins during the western burrowing owl nesting season (February 15 to August 31), a qualified biologist shall conduct targeted burrowing owl nest surveys within 14 days prior to construction activities using seven- to 20-foot transects. … The survey shall … follow CDFW guidelines outlined in the 2012 Staff Report on Burrowing Owl Mitigation.

The avian breeding season recognized by the CDFW is now 1 February through 15 September. The DEIR should be revised accordingly.

Whereas I concur that preconstruction, take-avoidance surveys should be completed, the DEIR falsely characterizes preconstruction surveys as detection surveys by insinuating that conducting preconstruction surveys without first having completed detection surveys would follow CDFW guidelines. Detection surveys are entirely different than preconstruction surveys, and are implemented to achieve a different set of objectives. Contrary to the DEIR's implication, preconstruction surveys are not designed to detect burrowing owls with anywhere close to the same likelihood as are protocol-level detection surveys that are designed for this purpose. It would be very easy for a preconstruction survey to fail to detect burrowing owls that are in fact present. Therefore, implementing a preconstruction survey as a surrogate for detection surveys would be reckless and would fail to meet the minimum standard of care for wildlife

protection. In any case, preconstruction surveys need to be implemented after completion of detection surveys per CDFW (2012).

Tricolored Blackbird

4.3-2(c) Prior to any ground disturbance on SMP 40, a qualified biologist shall conduct a preconstruction survey in all accessible areas identified as supporting potential tricolored blackbird nesting habitat. The survey shall document the current, and to the extent possible, historical presence or absence of nesting colonies of tricolored blackbird. …

Whereas I concur that preconstruction, take-avoidance surveys should be completed, a detection survey is needed first to inform the readers of the DEIR of whether and where tricolored blackbirds occur on or near the project sites. A detection survey would likely also improve the efficacy of the preconstruction survey.

Nesting Birds and Raptors (Including Loggerhead Shrike)

4.3-2(d) If project construction begins during the nesting season (February 1 to August 31), a qualified biologist shall conduct a nesting bird survey within 7 days prior to construction activities. … If migratory birds are identified nesting on or within the zone of influence, … A qualified biologist shall establish a temporary protective nest buffer around the nest(s). The nest buffer shall be staked with orange construction fencing. The buffer must be of sufficient size to protect the nesting site from construction-related disturbance and shall be established by a qualified ornithologist or biologist with extensive experience working with nesting birds near and on construction sites.

Typically, adequate nesting buffers are 75 feet from the nest site or nest tree dripline for small birds and up to 300 feet for sensitive nesting birds that include several raptor species known in the region of the project site but that are not expected to occur on the project site. Upon completion of nesting surveys, if nesting birds are identified on or within a zone of influence of the project site, a qualified ornithologist/biologist that frequently works with nesting birds shall prescribe adequate nesting buffers to protect the nesting birds from harm while the project is constructed.

First, the avian breeding season recognized by the CDFW is now 1 February through 15 September. The DEIR should be revised accordingly.

Second, whereas I concur that preconstruction, take-avoidance surveys should be completed, in my experience the majority of bird nests would not be found by biologists assigned to the survey. For instance, I surveyed for grassland nesters as part of an intensive survey effort that I performed from March through mid-August 2023 on a Central Valley site. I surveyed the site 30 times. I found that the nests of grassland birds are the most difficult to locate. Cavity nesters can more effectively defend their nests against predators, whereas ground nesters are highly vulnerable to predation, and thus the most cryptic of nesters. Ground nesters, which include bird species that occur at the project site, are highly adept at concealing their nests both physically and behaviorally. Based on my experience, it is highly likely that preconstruction survey would fail to find

any of the nests of ground-nesting birds that truly occur on the project site. The DEIR's implication that preconstruction survey would reduce potential impacts to nesting birds to less-than-significant is unsubstantiated by evidence in the DEIR.

The mitigation measure appears to be specifically directed toward loggerhead shrike, presumably because this special-status species was detected during a reconnaissance survey of SMP 40. Finding the nests of loggerhead shrikes is particularly difficult, as this species is expert at deceiving observers as to the whereabouts of their nests (Smallwood and Smallwood 2021). To adequately survey for nest sites of loggerhead shrike, many surveys are needed, and the survey methods need to include long sessions of visual-scans, preferably from blinds such as automobiles. Observers would need to be experienced in bird behavior, and capable of tracking the movements of individual loggerhead shrikes. A preconstruction survey for loggerhead shrike nest would be ineffective by having inexperienced biologists walk back and forth along transects.

Third, the mitigation language (second italicized paragraph above) allows a single individual to make a subjective decision, outside the public's view, to determine the buffer area for any given species. This measure lacks objective criteria, and is unenforceable.

Even assuming some or even all of the nests would be found and salvaged, this benefit to birds nesting on site would apply only to a single breeding season of nesters. The project would nevertheless eliminate the site's productive capacity to birds.

SMP 40 and Trail Connection Option 2
4.3-3(c) Prior to the commencement of ground-disturbing activities for SMP 40 or Trail Connection Option 2, … [Six minimization and mitigation measures follow, one of which is] *… the riparian corridor of Arroyo Mocho, disturbed areas shall be revegetated with native riparian plant species. Replacement of riparian trees to be removed shall be planted near the creek as feasible and/or adjacent to the existing limits of the riparian corridor to contribute to the existing riparian canopy. Riparian plantings shall be maintained for a minimum of 5 years to ensure that the canopy is enhanced and the understory restored.*

Trail Connection Option 2 – Undercrossing at Isabel Bridge
4.3-3(d) Prior to initiation of any groundbreaking activity associated with Trail Connection Option 2, … The project applicant shall ensure that the proposed project replaces, restores, or enhances on a "no net loss" basis (in accordance with the RWQCB) the acreage of all riparian habitat and waters of the State that would be removed, lost, and/or degraded due to project implementation by methods agreeable to the RWQCB and the City, as appropriate, depending on agency jurisdiction, and as determined during the Section 401 permitting processes. Methods include, but are not limited to implementation of a riparian enhancement planting plan and/or tree planting mitigation at a 1:1 ratio, or as otherwise prescribed by the RWQCB.

Trail Connection Option 2 – Undercrossing at Isabel Bridge

4.3-3(e) If it is determined that work below the OHWM cannot be avoided for Trail Connection Option 2, … Waters that would be lost or disturbed shall be restored, replaced, or rehabilitated on a "no-net-loss" basis. Habitat restoration, rehabilitation, and/or replacement, including the purchase of credits from a USACE approved mitigation bank at a 1:1 ratio, shall be at a location and by methods acceptable to the USACE.

I concur that all of the measures described above should be implemented if the project goes forward. However, these measure alone would be inadequate. Also needed is monitoring of wildlife that is integrated with thresholds of success and failure. If thresholds of failure are exceeded, then the City should be required to take additional steps to achieve success. To this end, an adequate performance bond should be provided by the applicant to the City.

RECOMMENDED MEASURES

Road Mortality: Compensatory mitigation is needed for the increased wildlife mortality that would be caused by bird-window collisions and the project-generated road traffic in the region. I suggest that this mitigation can be directed toward funding research to identify fatality patterns and effective impact reduction measures such as reduced speed limits and wildlife under-crossings or overcrossings of particularly dangerous road segments. Compensatory mitigation can also be provided in the form of donations to wildlife rehabilitation facilities (see below).

Fund Wildlife Rehabilitation Facilities: Compensatory mitigation ought also to include funding contributions to wildlife rehabilitation facilities to cover the costs of injured animals that will be delivered to these facilities for care. Many animals would likely be injured by collisions with automobiles traveling to and from the project's buildings.

Landscaping: If the project goes forward, California native plant landscaping (i.e., chaparral, grassland, and locally appropriate scrub plants) should be considered to be used as opposed to landscaping with lawn and exotic shrubs. Native plants offer more structure, cover, food resources, and nesting substrate for wildlife than landscaping with lawn. Native plant landscaping has been shown to increase the abundance of arthropods which act as importance sources of food for wildlife and are crucial for pollination and plant reproduction (Narango et al. 2017, Adams et al. 2020, Smallwood and Wood 2022.). Further, many endangered and threated insects require native host plants for reproduction and migration, e.g., monarch butterfly. Around the world, landscaping with native plants over exotic plants increases the abundance and diversity of birds, and is particularly valuable to native birds (Lerman and Warren 2011, Burghardt et al. 2008, Berthon et al. 2021, Smallwood and Wood 2022). Landscaping with native plants is a way to maintain or to bring back some of the natural habitat and lessen the footprint of urbanization by acting as interconnected patches of habitat for wildlife (Goddard et al. 2009, Tallamy 2020). Lastly, not only does native plant landscaping benefit wildlife, it requires less water and maintenance than traditional landscaping with lawn and hedges.

Thank you for your consideration,

Shawn Smallwood, Ph.D.

Subject: **City of Livermore SMP 38/SMP 39/SMP 40 Project**
Review of DEIR Noise Section & Appendices

Dear Stephanie:

We have completed a review of Section 4.6 (Noise), as well as Appendices J and K (Environmental Noise Assessments) of the Draft Environmental Impact Report for the City of Livermore SMP 38/SMP 39/SMP 40 Project, focusing on the adequacy of the noise impact analyses. Here are our findings:

OVERVIEW

Section 4.6 of the DEIR is based on environmental noise assessments prepared by Salter.

- Significance Standards

  The DEIR significance standards for noise and vibration impacts are based directly on Section XIII of the Environmental Checklist in Appendix G of the current CEQA Guidelines, which reads as follows:

  XIII. NOISE - Would the project result in:

  a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of the local general plan or noise ordinance, or applicable standards of other agencies?

  b) Generation of excessive groundborne vibration or groundborne noise levels?

  c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the area to excessive noise levels?

  Salter has proposed a 3 dBA increase in ambient noise levels as the threshold for a "substantial increase". We concur that this is a reasonable value for CEQA evaluation of this project.

- Operational Noise & Construction Vibration

  The analysis in Section 4.6 shows that noise impacts from operational noise (loading dock activity, HVAC, on-site vehicle movements) as well as vibration during on-site construction are less-than-significant. Generally, the analysis supporting this finding appears to be methodical and well done, consistent with current CEQA Guidelines, and we take no exception to it.

- Construction Noise Impacts

  Section 4.6 also includes an analysis of construction noise impacts on the nearest sensitive uses – i.e.: the single-family residential neighborhood to the east of the project sites. This analysis covers on-site construction activity for SMP 40 as well as the construction of off-site trail connections at three potential locations (each within 200-feet of the nearest residential use).

The impact of construction noise on the SMP 39 site is not covered in the DEIR.

For the off-site trail connection construction, the DEIR states that noise impacts are significant without mitigation and provides a list of mitigation measures (4.6-1) to reduce this impact to less-than-significant level. Generally, we agree with this finding and the proposed mitigation measures.

For on-site construction, the DEIR states that noise impacts will be less-than-significant. However, the analysis presented in the DEIR does not – in our opinion – adequately support this conclusion, for the reasons outlined below.

PROBLEMS WITH THE ON-SITE CONSTRUCTION NOISE IMPACT ANALYSIS

- <u>SMP 39 is Excluded</u>

  Construction noise from the SMP 39 site is not included in the analysis in Section 4.6 of the DEIR. An explanation for this omission is provided in the final paragraph on page 4.6-21, which reads in part:

  "Due to the substantial distance between SMP 39 and the sensitive noise receptors, it was anticipated that construction noise associated SMP 39 would be below the City of Livermore's exterior noise level threshold of 60 dBA DNL at the nearest sensitive receptor locations. Thus, construction noise levels for SMP 39 were not evaluated as part of the Environmental Noise Study for SMP 39."

  There are two problems with this explanation:

  First, CEQA requires an actual analysis to show whether a project impact is significant or less-than-significant. Simply "anticipating" that there will be no significant impact falls short of the standard required for a CEQA study.

  Second, the 60 dBA DNL exterior noise standard (which comes from the land-use compatibility table in the Noise Element of the City of Livermore General Plan) is only one of the applicable local regulations. The DEIR analysis should address all applicable regulations in both the General Plan and Municipal Code.

- <u>Analysis for SMP 40 is Incomplete</u>

  The noise impact analysis for construction on the SMP 40 site compares Salter's noise level predictions with instantaneous maximum noise level (Lmax) limits of 70 dBA during the day and 60 dBA at night, which are taken from Policy N-1.5.P3 of the City of Livermore General Plan.

  However, these Lmax noise limits are not the only local regulations that would apply to construction noise on the SMP 40 site.

  For example, the DEIR does not show how construction noise from SMP 40 would compare to Policy N-1.5.P2 of the General Plan, which prescribes the following noise limits, depending on the cumulative duration of the noise:

Daytime Noise Limit (7AM – 10PM)	Nighttime Noise Limit (10PM – 7AM)	Cumulative Duration
60 dBA	50 dBA	No more than 15-minutes in any hour.
65 dBA	55 dBA	No more than 5-minutes in any hour.
70 dBA	60 dBA	No more than 1-minute in any hour.

Similarly, the DEIR does not include an DNL analysis for construction noise from SMP 40 to show that it will be below the 60 dBA exterior noise standard taken from land-use compatibility table (Table 9-7) in the General Plan. This will be particularly important if any construction work is to occur at night.

- <u>There is an Error in the Calculations for SMP 40</u>

  Table 4.6-6 of the DEIR lists estimated Lmax noise levels for various pieces of construction equipment at a distance of 50-feet (these are standard reference values, taken from the FHWA Construction Noise Handbook) and extrapolates them to a distance of 884 feet.

  According to Table 4.6-6, the equipment noise levels received at a distance of 884 are 57 dBA lower than lower than those received at a distance of 50-feet. This is incorrect. According to the radiation equation for point sources (such as individual pieces of construction equipment) the reduction in noise level from 50-feet to 884 feet is:

  $10 \times LOG_{10}(884/50) = 25$ dBA

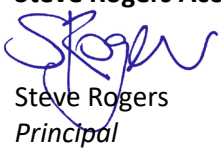
  So, the estimated Lmax noise levels provided in Table 4.6-6 are 32 dBA lower than they should be. Which means that noise from several of the pieces of equipment listed should be expected to produce a maximum level of noise at the nearest residences that is either right at the 60 dBA nighttime limit or, in the case of paving equipment, 4 dBA above it.

- <u>Construction on the East Side of the SMP 40 Site is Overlooked</u>

  The construction noise analysis in the DEIR for SMP 40 considers assumes receivers 884-feet away from the equipment – which is the distance between the location proposed for Building 2 and the nearest residences. However, there will be certain phases of construction – such as site preparation and paving/landscaping/site concrete – when noisy equipment could be operating closer than 884-feet from nearby residential uses.

  For example, the eastern corner of the SMP 40 site is within 600-feet of the nearest residential use. Received noise levels at a distance of 600-feet from the equipment would be 3 dBA higher than those received at 884-feet, which means that the expected noise level at the nearest residences when paving equipment is in use in the eastern corner of the site would be 67 dBA, Lmax and not 32 dBA, Lmax as reported in Table 4.6-6.

SUMMARY & RECOMMENDATIONS



We find that, while much of the noise analysis in the DEIR has been done to the standard expected of a CEQA study, the evaluation of noise impacts during the construction phases is incomplete and contains a significant calculation error. We therefore recommend that the preparers be requested to revise/correct the Noise Section (4.6) of the DEIR as follows:

- Include SMP 39 in the on-site construction noise impact analysis. The analysis should take account of the anticipated number of pieces of equipment in use at any one time during each phase as well as estimated usage factors, so that construction noise impacts can be evaluated in the in the context of the City of Livermore General Plan DNL 60 dBA exterior noise standard (from Table 9-7) and the time-dependent noise limits in Policy N-1.5.P2, as well as the Lmax noise limits in Policy N-1.5.P3.
- For on-site construction on the SMP 40 site, the noise impact analysis should be expanded to take account of the anticipated number of pieces of equipment in use at any one time during each phase as well as estimated usage factors, so that construction noise impacts can be evaluated in the in the

context of the City of Livermore General Plan DNL 60 dBA exterior noise standard (from Table 9-7) and the time-dependent noise limits in Policy N-1.5.P2, as well as the Lmax noise limits in Policy N-1.5.P3.

- Table 4.6-6 should be revised to show the correct (25 dBA) reduction in point-source noise levels from 50-feet to 884-feet.
- Provide additional analysis for any construction activity on the SMP 40 site (such as site preparation, paving/landscaping) that could occur closer than 884-feet from the nearest residential use.

Yours sincerely,
Steve Rogers Acoustics, LLC

Steve Rogers

Salter Project 23-0142

INTRODUCTION

This report summarizes our environmental noise study of future traffic and loading dock activities from the proposed 6-building warehouse facility along Jack London Boulevard, south of Livermore Airport and west of Discovery Drive in Livermore, California. The purpose of the study was to determine the estimated growth in traffic noise levels resulting in the loading dock trucking activity and if traffic noise impacts from the proposed facility will meet the relevant requirements of the City General Plan Noise Element and Noise Ordinance.

EXECUTIVE SUMMARY

- Noise from the project's loading docks, future intra-project vehicle traffic, and likely HVAC equipment will increase CNEL[1] or DNL[2] noise levels at noise-sensitive receiver locations by 1 dB. An increase of 3 dB or less DNL is not expected to be noticeable and is not considered significant.
- Noise from project-created traffic would not result in a significant increase in noise levels on Jack London Boulevard or Isabel Avenue at adjacent properties.
- Temporary construction noise will be consistent with the City's Noise Ordinance and will not exceed the criteria established by General Plan Noise Objectives N-1.1 and N-1.5.

REPORT ORGANIZATION

This report contains the following sections:

- Project Site
- Acoustical Criteria
- Existing Noise Environment
- Noise Impact Assessment
  - Construction Noise
  - Loading Dock and Intra-Project Traffic Noise (Parking Lot)
  - Tenant HVAC Equipment Noise

[1] Community Noise Equivalent Level (CNEL) – A descriptor for the 24-hour A-weighted average noise level. The CNEL concept accounts for the increased acoustical sensitivity of people to noise during the evening and nighttime hours. Sound levels during the hours from 7 pm to 10 pm are penalized 5 dB; sound levels during the hours from 10 pm to 7 am are penalized 10 dB. A 10-dB increase in sound level is perceived by people to be a doubling of loudness.

[2] Day-Night Average Sound Level (DNL) – A descriptor established by the U.S. Environmental Protection Agency to describe the average day-night level with a penalty applied to noise occurring during the nighttime hours (10 pm - 7 am) to account for the increased sensitivity of people during sleeping hours. Also noted as Ldn. The difference between CNEL and DNL is often less than 1 dB.

PROJECT SITE

The proposed project will have a total lot area of approximately 47.86 acres, located south of West Jack London Boulevard. It is bounded by the Livermore Airport to the north, and Discovery Drive to the east, in the City of Livermore.

There will be six warehouse buildings totaling 2,084,953 square feet with 104 total loading docks. The site is adjacent to existing office and warehouse facilities to the east, approximately 850 feet away. An industrial quarry is located to the south. There are no noise-sensitive residential properties within 2,300 feet of the project site.

ACOUSTICAL CRITERIA

The following are project criteria and/or guidelines for the City of Livermore and State of California.

City of Livermore 2003-2025 General Plan Noise Element

Policy P4, Objective N-1.1

The Noise Element of the Livermore General Plan (Chapter 9, Policy P4 of Objective N-1.1) contains land use compatibility guidelines for environmental noise in the community. Table 1, below, summarizes these guidelines for residential and industrial land uses[3] in terms of CNEL or DNL. The definitions of each land use category follow below the table.

Table 1: Summary of Table 9-7 – Land Use Compatibility Guidelines for Community Noise CNEL or DNL, dB

Land Use Category	Normally Acceptable	Conditionally Acceptable	Normally Unacceptable	Clearly Unacceptable
Residential Low-Density[4], Single-family, Duplex, Mobile Homes	≤60	55-70	70-75	>75
Industrial, Manufacturing, Utilities, Agricultural	≤75	70-80	>75	--

[3] Table 9-7 of the Noise Element, page 9-27.

[4] Per General Plan Noise Ordinance Objective N-1.4, Policy P4, the criterion for single-family residential back yards is 60 dB CNEL/DNL.

Normally Acceptable: *If the noise level is within the "normally acceptable" level, noise exposure would be acceptable for the intended land use. Development may occur without requiring an evaluation of the noise environment unless the use could generate noise impacts on adjacent uses.*

Conditionally Acceptable: *If the noise level is within the "conditionally acceptable" level, noise exposure would be conditionally acceptable; a specified land use may be permitted only after detailed analysis of the noise environment and the project characteristics to determine whether noise insulation or protection features are required. Such noise insulation features may include measures to protect noise-sensitive outdoor activity areas (e.g., at residences, schools, or parks) or may include building sound insulation treatments such as sound-rated windows to protect interior spaces in sensitive receptors.*

Normally Unacceptable: *If the noise level is within the "normally unacceptable" level, analysis and mitigation are required. Development should generally not be undertaken unless adequate noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce the exposure of people to unacceptable noise levels.*

Clearly Unacceptable: *New construction should not be undertaken unless all feasible noise mitigation options have been analyzed and appropriate mitigation incorporated into the project to adequately reduce exposure of people to unacceptable noise levels.*

Noise Element Objective N-1.5

Objective N-1.5 seeks to reduce the level of noise generated by "stationary mechanical and other noise-generating equipment". Policy P1 states that "the City shall require that industrial and commercial uses be designed and operated to avoid the generation of noise effects on surrounding land uses from exceeding the following noise levels for exterior environments, operating longer than half an hour per hour:

- 55 dBA[5] L50[6] (7:00am to 10:00pm)
- 45 dBA L50 (10:00pm to 7:00am)

Policy P2 allows short-term events to have levels louder than those cited above. For events that occur less than 15 minutes per hour, levels can be increased by 5 dBA; events no more than 5 minutes per hour are allowed an additional 10 dBA, and those taking place one minute or less per hour are allowed an additional 15 dBA. Policy P4 allows an exemption from Policy P1 for motor vehicles on public streets between the hours of 7:00am and 8:00pm. We understand that Policies P1, P2, and P4 could apply to the noise from backup alarms (aka "beepers" or "squawkers").

[5] A-Weighted Sound Level – The A-weighted sound pressure level, expressed in decibels (dB). Sometimes the unit of sound level is written as dB(A). A weighting is a standard weighting that accounts for the sensitivity of human hearing to the range of audible frequencies. People perceive a 10 dB increase in sound level to be twice as loud.

[6] L50 – The noise level exceeded 50% of the time. For a discussion of environmental acoustics, please refer to Appendix A.

Objective N-1.5 specifically describes "stationary source noises", so when referring to L_{50} noise levels we analyzed the noise of trucks that are expected to sit in the loading dock area, estimated to be at least 2,395 feet from the nearest residence.

Policy P3 establishes instantaneous maximum noise levels allowed (Lmax[7]) of 70 dBA during the day and 60 dBA during the night.

California Department of Transportation (CalTrans) Construction Vibration Criteria

The California Department of Transportation[8] (DOT) provides vibration guidelines for two scenarios: human perception and construction damage. These tables are included below as guidelines for potential project vibration levels. "Transient" vibrations are classified as impulsive events that are short in duration (e.g., debris falling, blasting). "Continuous" vibrations are more sustained vibration events over longer periods of time (e.g., jackhammering, drilling). Table 2 describes the human response to different levels of ground-borne vibration for transient and continuous events.

Table 2: Guideline Vibration Annoyance Potential Threshold Criteria[9]

Human Response	Maximum PPV[10] (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Barely perceptible	0.04	0.01
Distinctly perceptible	0.25	0.04
Strongly perceptible	0.90	0.10
Severe	2.00	0.40

Table 3 provides a guideline for vibration criteria to assess the damage potential from ground vibration induced by construction equipment. Thresholds for continuous vibrations are lower than those for transient vibrations and are therefore considered more "conservative". These are standard significance thresholds used in the industry to determine impacts of ground borne vibrations on structures.

7 L_{max} (Maximum Sound Level) – The maximum sound level for a specified measurement period of time as defined in ASTM E1686.

8 Transportation and Construction Vibration Guidance Manual September 2013 (DOT Document).

9 This is Table 20 from the DOT document.

10 (PPV): Peak Particle Velocity.

Table 3: Guideline Vibration Damage Potential Threshold Criteria[11]

Structure and Condition	Maximum PPV (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.20	0.10
Historic and some old buildings	0.50	0.25
Older residential structures	0.50	0.30
New residential structures	1.00	0.50
Modern industrial/commercial buildings	2.00	0.50

The immediate adjacent properties are all modern industrial or commercial buildings. Across Isabel Avenue/Highway 84 to the east are existing single-family residences. Based on Table 3, we have applied the more stringent residential criteria of 1.0 PPV for transient events and 0.50 PPV for continuous events.

State of California CEQA Guidelines and Impact Criteria

The California Environmental Quality Act (CEQA) contains guidelines that evaluate the significance of noise attributable to a proposed project. This would include (but is not limited to) added traffic noise, mechanical equipment noise, and construction noise. CEQA asks the following applicable questions. Would the project result in:

1. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
2. Generation of excessive ground borne vibration or ground borne noise levels?
3. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public-use airport, would the project expose people residing or working in the project area to excessive noise levels?

CEQA does not define the noise level increase that is considered "substantial". Typically, the local general plan would establish limits with respect to allowable noise and vibration increases. However, the City of Livermore General Plan does not contain numerical standards of significance for noise increases. For the items above, noise level increases of 3 dBA or less are generally considered less-than-significant. Substantial adverse community response would be expected only for increases of 5 dBA or more.

11 This is Table 19 of the DOT document.

EXISTING NOISE ENVIRONMENT

Project Site Description

To quantify the existing site noise environment, a monitor continuously measured noise levels along Jack London Boulevard on 5 and 10 April 2023. **Table 4** shows a summary of the measured data. **Figure 1**, attached, shows the approximate measurement location.

Table 4: Measured Environmental Noise Levels

Site	Location	DNL (dB)	Leq(h) (dB)
LT-1	Jack London Boulevard, approximately 12-feet above grade	75	76

Site Noise Context

Noise measurements at the project site (see **Figure 1**), collected data from vehicle pass-bys on Jack London Boulevard. The measured on-site noise level was DNL 75 dB (see **Figure 1**). LT-1 was placed on the closest access utility pole across from the future site on Jack London Boulevard. Adjustments were made, as appropriate, to estimate the change in noise levels from the long-term monitor location to the locations of the nearest residences east of Isabel Avenue.

We have combined cumulative existing and future noise sources that would result from the project's completion. Future project sources include the proposed loading dock noise, rooftop HVAC equipment, parking areas, and estimated traffic contribution, while the existing noise sources are the existing traffic. Adding expected noise contribution to the existing noise environment logarithmically would result in a noise level of approximately **DNL 75 dB** from all contributing noise sources upon the project's completion.

DNL **30**[a] dB [HVAC] + DNL **32**[b] dB [employee lot] + DNL **50**[c] dB [trucks] = DNL **50**[d] dB [future noise level at receivers]

a = cumulative building rooftop HVAC noise
b = employee parking lot noise
c = loading dock truck noise

d = cumulative future project sources

DNL **67**[e] dB [existing traffic] + DNL **50**[e] dB [combined future sources] **=** DNL **67**[f] dB [future noise level at receivers]

e = measured at project site, see **Figure 1**
e = determined from loading docks + HVAC noise + parking lots
f = calculated

See **Appendix A** for additional information on decibel mathematics.

NOISE IMPACT ASSESSMENT ANALYSIS

We evaluated the following noise sources from the proposed project on the surrounding environment:

- Potential rooftop mechanical equipment noise
- Short-term construction noise and vibration
- Project-related traffic increases

We have drawn the following conclusions from the analysis:

The following summarizes the portion of the CEQA checklist pertaining to noise.

Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project exceeding standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

A: Permanent Increase in Noise Levels due to Project-Generated Noise

It is anticipated that the potential office spaces located on northern facades of the six buildings will be mechanically ventilated. Based on previous projects of similar design, we have assumed the use of up to four typical 5-ton package rooftop units located above each office (a total of 56 units). No outdoor mechanical equipment has been specified at this time. Specific equipment will be confirmed during the design phase.

Preliminary sound power level data provided from a similarly sized project with similar 5-ton outdoor package fan units indicates that combined noise from these units sums to approximately DNL 30 dB at the nearest property lines, assuming the units operate continuously for 24-hour operation. The rooftop parapet is assumed to provide acoustical shielding to nearby neighbors because they would break line-of-sight to the nearest receivers.

Depending on the final equipment placement, as well as any specific parapets, barriers, and shielding provided by buildings (which would reduce noise levels at the property lines), noise levels may vary. We do not expect the noise contribution to be significant in these aspects.

B: Predicted Permanent Increase in Noise Levels due Project Traffic Volumes

It has been communicated by the team that the projected truck trips per day will be approximately as shown below in Table 5.

Table 5: SMP-39 Truck Trips

Hour	Percent	ITE Trips
7 – 9 AM	10.8%	78
9 AM – 4 PM	61.0%	439
4 – 6 PM	10.8%	78
6 – 10 PM	3.9%	28
10 PM – 7 AM	13.4%	96
Total	100 %	719

Overall, the project would result in a net increase in daily trips by 719, amounting to an overall traffic noise DNL increase of <1 dB. Therefore, this would not result in a significant increase in noise levels at existing adjacent properties.

C: Temporary Increase in Noise Levels due to Construction

Construction activities will likely include the use of heavy equipment for grading and other activities, through completion of buildings and landscaping. Heavy trucks would travel to, from, and within the site hauling soil, equipment, and building materials. Smaller equipment, such as jackhammers, pneumatic tools, and saws could also be used throughout the demolition and construction phases in various areas. The noise and vibration associated with these activities would be generated within the entire project area.

Based on our experience with similar projects' construction methods and phasing, our preliminary understanding and assumptions of expected equipment is shown in Table 6. Reference levels for construction equipment are listed in Table 7, both at the reference distance of 50-feet and at 2,640-feet, which is the distance from eastern edge of the SMP 39 property to the residences across Isabel Avenue.

Table 6: List of Typical Construction Equipment and Phasing

Phase	Equipment
Demolition	Concrete/Industrial Saws, Excavators, Rubber-Tired Dozers, Tractors/Loaders/Backhoes
Site Preparation	Graders, Rubber-Tired Dozers, Tractors/Loaders/Backhoes
Grading/Excavation	Excavators, Drill Rig for Shoring Beams (Caisson Drilling), Rubber-Tired Dozers, Tractors/Loaders/Backhoes
Trenching	Tractor/Loader/Backhoe, Excavators
Building Exterior	Cranes, Forklifts, Generator Sets, Tractors/Loaders/Backhoes, Welders
Building Interior/ Architectural Coating	Air Compressors, Aerial Lift
Paving/Landscaping/ Site Concrete	Cement and Mortar Mixers, Paving Equipment, Rollers, Tractors/Loaders/Backhoes

Table 7: Construction Equipment Reference Noise Levels[12]

Typical Equipment	Estimated Maximum Instantaneous L_{max} Noise Level (dBA at 50 feet)	Estimated Maximum Instantaneous L_{max} Noise Level (dBA at 2,640 feet)
Aerial Lift	83	49
Air Compressors	81	47
Cement and Mortar Mixers	85	51
Concrete/Industrial Saws	76	42
Cranes	83	49
Drill Rig for Shoring Beams (Caisson Drilling)	85	51
Excavators	85	51
Forklifts	83	49
Generator Sets	81	47
Graders	85	51
Paving Equipment	89	55
Rollers	74	40
Rubber-Tired Dozers	85	51
Tractors/Loaders/Backhoes	84	50
Welders	73	39

Actual construction noise levels will vary based on distance to each piece of equipment or work area from the receiver and shielding from adjacent buildings and construction elements. It should be noted that construction activities are prohibited during the specific time period outlined in Section 9.36.080 of the City's Municipal Code, and our calculations do not take shielding from adjacent buildings into consideration. Section 9.36.080 is as follows:

12 Equipment noise levels at 50-feet are from Section 9, Federal Highway Administration Highway Traffic Noise Construction Noise Handbook (August 2006) and Table 12-2, Transit Noise and Vibration Impact Assessment, United States Department of Transportation, Office of Planning and Environment, Federal Transit Administration, May 2006.

Section 9.36.080 Hammers, pile drivers, pneumatic tools and similar equipment

The operation between the hours of 6:00 p.m. Saturday to 7:00 a.m. Monday; 8:00 p.m. to 7:00 a.m. on Monday, Tuesday, Wednesday and Thursdays; 8:00 p.m. Friday to 9:00 a.m. on Saturday or at all on city-observed holidays of any pile driver, pneumatic tools, derrick, electric hoist, sandblaster or other equipment used in construction, demolition or other repair work, the use of which is attended by loud or unusual noise, is prohibited. (Ord. 1672 § 2, 2002; Ord. 1128 § 2, 1983; 1960 code § 13B.3(f))

Construction Equipment Schedule

We received the following equipment schedule that CalEEMod utilized for their model for air quality emissions. **Table 8** below summarizes the equipment and associated sound levels at the nearest residential property (approximately 2,640 feet away).

Table 8: Construction Equipment Schedule

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Resulting DNL	Resulting Lmax
Grading	Excavators	2	8	66	54
Grading	Graders	1	8	66	51
Grading	Rubber Tired Dozers	1	8	66	51
Grading	Scrapers	2	8	66	54
Grading	Tractors/Loaders/Backhoes	2	8	66	53
Total Grading Phase	**All Equipment Running Simultaneously**			**67**	**60**
Paving	Pavers	2	8	67	58
Paving	Paving Equipment	2	8	67	58
Paving	Rollers	2	8	66	43
Total Paving Phase	**All Equipment Running Simultaneously**			**67**	**61**
Building Construction	Cranes	1	7	66	49
Building Construction	Forklift	3	8	66	54
Building Construction	Generator Sets	1	8	66	47
Building Construction	Tractors/Loaders/Backhoes	3	7	66	56
Building Construction	Welders	1	8	66	39
Total Building Construction	**All Equipment Running Simultaneously**			**67**	**59**
Architectural Coating	Air Compressors	1	8	66	47

It should be noted that the DNL was calculated using daytime construction noise levels for daytime hours for the listed hours of operation and measured nighttime hours from existing traffic. Despite restrictions of nighttime construction activities, from the noise levels shown above in Table 8, it could be possible to exceed the General Plan Objectives as follows:

Objective N-1.5 P3

- As shown above in Table 8, with all the phases running construction equipment as intended, the resulting Lmax would range between 59 and 61 dBA. Since construction is not permitted during nighttime hours, the Lmax criterion of 70 dBA would be met and not be considered a significant increase.

Due to these results, it will not be necessary to incorporate any mitigation measures for construction noise.

Would the project result in generation of excessive ground-borne vibration or ground-borne noise levels?

A: Permanent Increase in Vibration Levels due to Project-Generated Vibration

The planned use for the site, as warehouse buildings, is not expected to generate significant amounts of ground-borne noise or vibration.

B: Temporary Increase in Vibration Levels due to Construction

The nearest and most sensitive adjacent receivers include residences to the east approximately 500 feet from the closest area of construction on the project site. Industrial-zoned parcels to the north are assumed to be less sensitive.

Project construction may include activities such as the use of concrete saws, excavation and grading, and the use of rolling stock equipment (tracked vehicles, compactors, etc.). Typical construction vibration levels at 50-feet are listed in Table 9, below. Most of the construction will occur set back from the property line. As indicated in the criteria section above, the risk of damage to nearby structures may begin to occur at a limit of 1.0 in/sec PPV for transient vibration events and 0.50 PPV for continuous events.

Table 9: Example Construction Vibration Levels[13]

Equipment	PPV at 50 ft. (in/sec)[14]
Vibratory Roller	0.049
Hydraulic Breaker	0.03 to 0.08
Large Bulldozer	0.03
Loaded Trucks	0.03
Excavator	0.03
Caisson/pier drilling	0.03
Jackhammer	0.01
Small Bulldozer	0.001
Crane, Forklift, Bobcat	No significant vibration

Based on the vibration levels shown in Table 8, construction equipment is not expected to cause structural damage to adjacent properties because project construction is not expected to exceed the thresholds for new residential buildings or commercial/industrial structures as shown above in Table 3. Ground-borne noise would also not be expected to be significant at these vibration levels.

FUTURE LOADING DOCK AND INTRA-PROJECT TRAFFIC NOISE ESTIMATES

Future Loading Dock Calculation Methodology

Operational noise from the proposed facility is expected to consist primarily of tractor-trailers accessing loading dock areas. To estimate truck noise at the proposed facility, we referenced recently measured noise levels at a distribution facility elsewhere in California which involved semi-trucks similar in size to those that are expected to access the proposed project's facility.

Calculations for resulting noise levels due to on-site truck and car trip generation durations and activities were based on the measurements at this local distribution facility with ancillary information provided to us for that reference project in 2018.

Based on the assumptions described below, estimated noise levels were then compared to applicable criteria to determine if noise from the proposed facility would exceed the City's noise goals (described above) at the nearest receivers.

Traffic volumes for the proposed project were referenced from the provided Traffic Impact Analysis document (dated 4 April 2023) by TJKM, which describes the total daily truck trips and the partial

13 Table 12-2, Transit Noise and Vibration Impact Assessment, United States Department of Transportation, Office of Planning and Environment, Federal Transit Administration, May 2006.

14 Using a value of n = 1.5 per FTA recommendation, where n is the attenuation rate through the ground

distribution over the peak AM and PM hours and the relative expected proportion of project-generated trips using Jack London Boulevard and Isabel Avenue.

Intra-Project Traffic Methodology

Intra-project traffic noise will consist of traffic noise associated with future warehouse employee vehicles within the designated parking lots. To estimate vehicle noise at the employee parking lots, we also reference the Traffic Impact Analysis document for the expected traffic volume of warehouse employees.

Noise Source Analysis and Assumptions

Future Loading Docks

Our analysis estimated future noise from the facility based on the following assumptions discussed with the client via email, and per the overall site plan:

1. Trucks will enter and exit the site from three driveways off West Jackson Boulevard, from the north.
2. Non-truck noises associated with loading/unloading activity (i.e., forklifts, rolling doors, carts, pallet crushing, items dropping), are assumed to be located near the dock doors and are included in our analysis.
3. An average truck trip (not including unloading/loading) is estimated to last for a cumulative period of about 2 minutes and be at least 930 feet from the nearest commercial property line.
4. Trucks occupy the loading dock in their loading area that is nearest to noise-sensitive receiver (Commercial buildings east of Discovery Drive, to the east of the building).
5. Total number of loading docks: 104
6. Number and distribution of truck trips is based on the traffic impact analysis, with approximately 719 total truck trips per 24-hour period (continuous 24/7 operation) distributed as follows:
    - AM Peak is 7-9 AM- 10.8%
    - 9-4 PM -61%
    - PM Peak is 4 PM - 6 PM -10.8%
    - 6 PM - 10 PM 3.9%
    - 10 PM -7 AM 13.4%
7. The proposed warehouse buildings have south-facing loading docks which are recessed approximately 60 feet from the easternmost building's façade, providing substantial shielding for truck operation noise. This feature is expected to obstruct the direct line of sight of the project's loading docks from the commercial neighbors to the east, especially in buildings closer to Discovery Drive.
8. Having measured operations at a local representative loading dock site, a typical truck "trip" consists of the following events (estimated sound levels based on measurements at similar facilities):

a. Truck passby (arrival, departure): 69 dBA at 30 feet
b. Truck airbrakes: 72 dBA at 25 feet
c. Truck backup alarm: 79 dBA at 30 feet
d. Brief idle before engine shutoff: 70 dBA at 25 feet
e. Truck engine ignition and airbrakes: 71 dBA at 25 feet
f. Truck accelerating from stop: 74 dBA at 25 feet
g. Truck trip reference heights[15] (above grade)
    i. Passby, brief idle, acceleration, and ignition: 8 feet
    ii. Back-up beeper and airbrake: 2.5 feet

Intra-Project Traffic Noise

Our analysis estimated future noise from the facility parking lots is based on the following assumptions:

1. Employees will enter and exit the site from the three driveways from the north (via Jack London Boulevard).
2. Vehicle trips will be split between Jack London Boulevard and Isabel Avenue per the TJKM report's traffic projections. Our traffic analysis calculations tell us the following:

- 80% of project generated trips will be along Jack London Boulevard
- 20% of project generated trips will be along Isabel Avenue
- There will be an average noise level increase of approximately 3dB on both roadways due to traffic increases. This increase is not considered to be significant.

3. Once on site, vehicles will travel an average of 15 miles per hour or less.
4. Vehicles will be spread out evenly amongst the parking areas.
5. An average vehicle trip is estimated to last for a cumulative period of about 2 minutes and be at least 900 feet from the nearest commercial property line.
6. Similar percentages were assumed for intra-project vehicle trips in the project parking lots as were truck trips, as shown in the distribution below.

- AM Peak is 7-9 AM- 10.8%
- 9-4 PM -61%
- PM Peak is 4 PM - 6 PM -10.8%
- 6 PM - 10 PM 3.9%
- 10 PM -7 AM 13.4%

[15] Truck source heights excerpted from Caltrans Technical Noise Supplement document (TeNS) document dated October 1998.

Estimated Future Noise Levels

Loading Dock Future Noise Levels (CNEL/DNL)

We estimated noise levels at local receptors from the sources described in the previous section. To account for future increases in local traffic noise levels, we added 1 dB DNL to the measured levels[16] (see Table 4 above).

Table 10 below summarizes the estimated DNL levels at the closest property plane to the east of the building, under the assumption that the facility would receive its trucking activities 24 hours per day.

Table 10: Calculated Future Facility Noise at Noise-Sensitive Land Uses: CNEL/DNL, dBA

Scenario	Nearby Receiving Locations	Existing Noise at Receiver	Loading Docks at Receiver	Intra-Project Traffic Noise Levels at Receiver	Combined Existing plus Project	Change (dB)
24-hour Operations	East Property Line (Residences across Isabel Avenue)	67	61	32	68	+1 dB

The data shows that loading dock-generated noise is not expected to impact adjacent receivers to the north and the residences to the east. The calculated increase in DNL at the nearest property line with the project and future traffic noise levels (near term 2025) will be approximately 1 dB. A change of 3 dB or less is not expected to be noticeable and is not considered significant.

Future L_{50} Noise Levels

The following assumptions were made about the 24-hour operation of the project in our estimated L_{50} calculations:

- The volume of expected truck trips is consistent with the truck trip distribution established in item 6 of the Noise Source Analysis and Assumptions section (i.e., a maximum of 10 truck per hour at nighttime, or 13.4% of trucks between 10:00 pm and 7:00 am).
- The 6- and 10-foot berms will be incorporated into the project.
- Backup alarms are expected to be at a height of approximately 2.5 feet.
- Trucks do not move great distances when their backup alarm is engaged.

[16] The California Department of Transportation assumes a traffic volume increase of three-percent per year, which corresponds to a 1 dB increase in DNL over a ten-year period.

Table 11 summarizes the estimated daytime and nighttime L_{50} for the proposed project. Since backup alarms for nighttime are predicted to occur less than 15 minutes per hour, the criterion can increase by 5 dBA per Policy P2. However, since back up alarms would be more than 15 minutes per hour during the daytime, no additional increases are accounted for in our analysis.

Table 11: Calculated 24-Hour Future Facility L_{50} Value: L_{50}, dBA

Time of Day	Estimated L_{50} Value	Criterion L_{50} Value
Daytime (7am-10pm)	40 dBA	55 dBA
Nighttime (10pm-7am)	35 dBA	50 dBA

Our calculations of overall operational L_{50} noise levels do not exceed the allowable values stated by the City (i.e., Policy P1, Objective N-1.5), it is our understanding that other current similar projects in the vicinity have caused local neighbor complaints due to trucks' back-up alarms at those locations in the past.

Back-up alarms were assumed to be 79 dB at a reference distance of 30 feet. The distance attenuation between the loading dock to the façade of the nearest residence provides a 31 dB reduction. Although backup alarms would be audible from the residences, the L_{50} threshold of 50 dBA will not be exceeded due to the limited number of trips during this timeframe (estimated at 40 trips in 9-hour time frame).

Calculations assumed the source height of these backup alarms to be approximately 2.5 feet from grade. The current buildings would adequately obstruct the direct line-of-sight of these backup alarms to the residential receivers. The dimensions of the proposed berms are calculated to reduce intermittent noise levels (such as those produced by backup alarms) by up to 6 dB at the closest residents.

Quieter backup alarms (aka "squawkers"), which are becoming more prevalent in delivery vehicles for various large e-commerce websites, and other vendors, may be used by trucking operators visiting this site in the future, therefore beeper noise has the potential to be reduced. A best practice for consideration would be to implement these alternative devices in other truck populations in the future.

CONCLUSIONS AND COMMENTS

1. Future loading dock-generated noise (due to on-site trucks and vehicles) over a 24-hour operation period is not expected to impact receivers to the east. The calculated increase in CNEL/DNL at the nearest noise-sensitive residential receivers with the project and future traffic noise levels will be <1 dB. A change of 2 dB or less is not considered significant nor is it expected to be noticeable to residents east of the project site.
2. Temporary construction noise will be consistent with the City's Noise Ordinance and will not exceed the criteria established by General Plan Noise Objectives N-1.1 and N-1.5.

3. Considering the 2,395-foot distance between the nearest loading dock and the closest residents, and the trucks being a stationary source rather than a moving vehicle once the leaving the loading dock area of the project site, the city's L_{50} criterion is not applicable once a truck begins moving closer to the residential area. Given the minority of expected project truck trips conducted in the nighttime hours (10 trips per hour on average from 10 PM to 7 AM), noise from stationary trucks at the nearest loading dock are expected to comply with the City's L_{50} nighttime requirement assuming backup alarms are not continuously operating for more than 30 minutes per hour.

APPENDIX A: FUNDAMENTAL CONCEPTS OF ENVIRONMENTAL NOISE

This section provides background information to aid in understanding the technical aspects of this report.

Three dimensions of environmental noise are important in determining subjective response. These are:

- The intensity or level of the sound
- The frequency spectrum of the sound
- The time-varying character of the sound

Airborne sound is a rapid fluctuation of air pressure above and below atmospheric pressure. Sound levels are usually measured and expressed in decibels (dBA), with 0 dBA corresponding roughly to the threshold of hearing.

The "frequency" of a sound refers to the number of complete pressure fluctuations per second in the sound. The unit of measurement is the cycle per second (cps) or hertz (Hz). Most of the sounds, which we hear in the environment, do not consist of a single frequency, but of a broad band of frequencies, differing in level. The name of the frequency and level content of a sound is its sound spectrum. A sound spectrum for engineering purposes is typically described in terms of octave bands, which separate the audible frequency range (for human beings, from about 20 to 20,000 Hz) into ten segments.

Many rating methods have been devised to permit comparisons of sounds having quite different spectra. Surprisingly, the simplest method correlates with human response practically as well as the more complex methods. This method consists of evaluating all of the frequencies of a sound in accordance with a weighting that progressively de-emphasizes the importance of frequency components below 1000 Hz and above 5000 Hz. This frequency weighting reflects the fact that human hearing is less sensitive at low frequencies and at extreme high frequencies relative to the mid-range.

The weighting system described above is called "A"-weighting, and the level so measured is called the "A-weighted sound level" or "A-weighted noise level." The unit of A-weighted sound level is sometimes abbreviated "dBA." In practice, the sound level is conveniently measured using a sound level meter that includes an electrical filter corresponding to the A-weighting characteristic. All U.S. and international standard sound level meters include such a filter. Typical sound levels found in the environment and in industry are shown in Figure A-1.

Although a single sound level value may adequately describe environmental noise at any instant in time, community noise levels vary continuously. Most environmental noise is a conglomeration of distant noise sources, which results in a relatively steady background noise having no identifiable source. These distant sources may include traffic, wind in trees, industrial activities, etc. and are relatively constant from moment to moment. As natural forces change or as human activity follows its daily cycle, the sound level may vary slowly from hour to hour. Superimposed on this slowly varying background is a succession of identifiable noisy events of brief duration. These may include nearby activities such as single vehicle pass-bys, aircraft flyovers, etc. which cause the environmental noise level to vary from instant to instant.

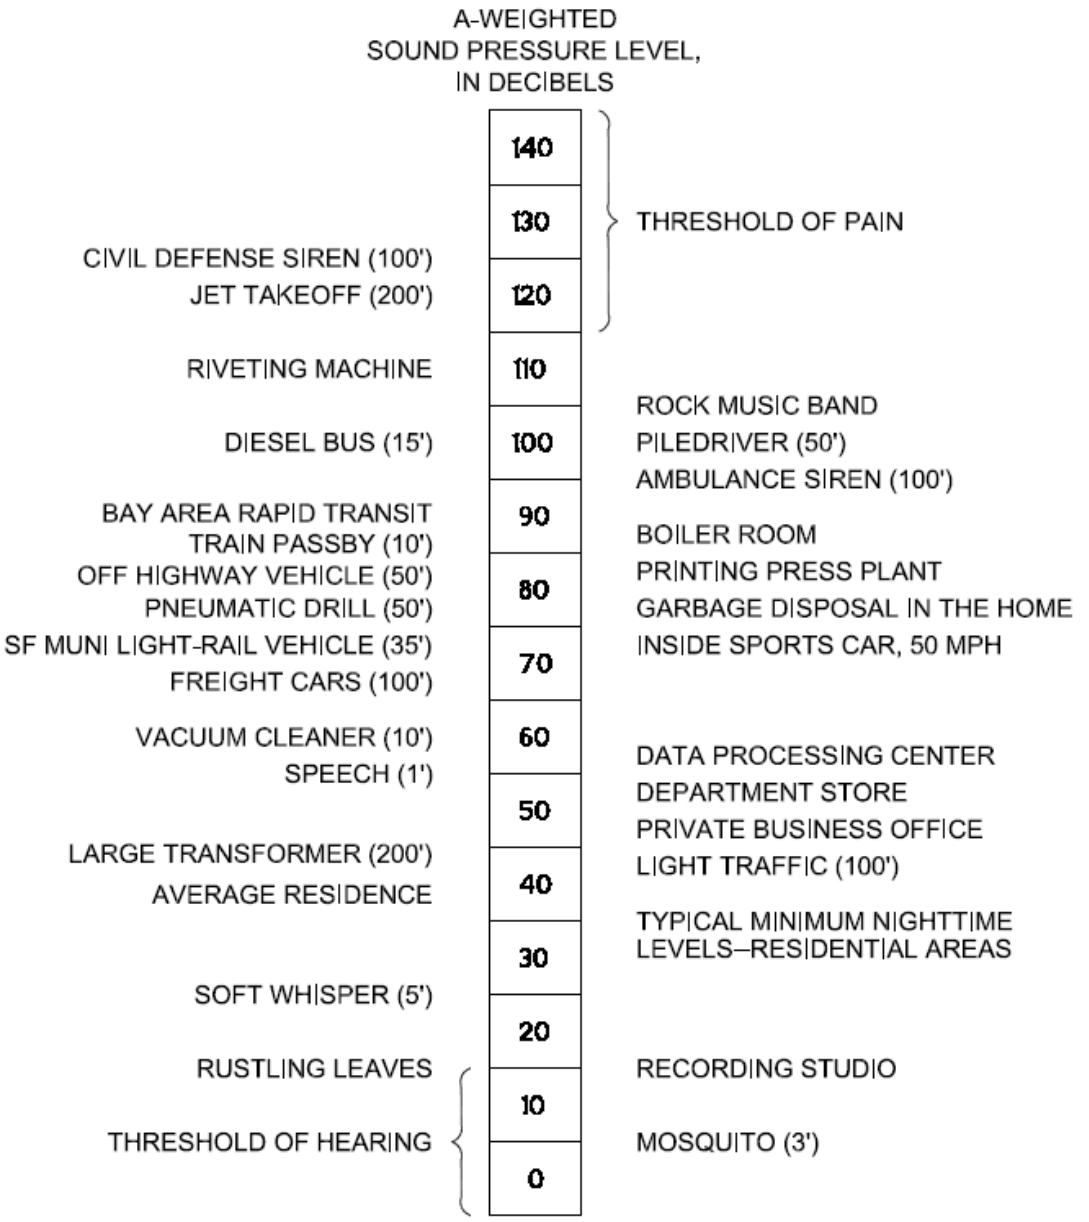
To describe the time-varying character of environmental noise, statistical noise descriptors were developed. "L10" is the A-weighted sound level equaled or exceeded during 10 percent of a stated time period. The L10 is considered a good measure of the maximum sound levels caused by discrete noise events. "L50" is the A-weighted sound level that equals or exceeded 50 percent of a stated time period; it represents the median sound level. The "L90" is the A-weighted sound level equaled or exceeded during 90 percent of a stated time period and is used to describe the background noise.

As it is often cumbersome to quantify the noise environment with a set of statistical descriptors, a single number called the average sound level or "L_{eq}" is now widely used. The term "L_{eq}" originated from the concept of a so-called equivalent sound level which contains the same acoustical energy as a varying sound level during the same time period. In simple but accurate technical language, the L_{eq} is the average A-weighted sound level in a stated time period. The L_{eq} is particularly useful in describing the subjective change in an environment where the source of noise remains the same but there is change in the level of activity. Widening roads and/or increasing traffic are examples of this kind of situation.

In determining the daily measure of environmental noise, it is important to account for the different response of people to daytime and nighttime noise. During the nighttime, exterior background noise levels are generally lower than in the daytime; however, most household noise also decreases at night, thus exterior noise intrusions again become noticeable. Further, most people trying to sleep at night are more sensitive to noise. To account for human sensitivity to nighttime noise levels, a special descriptor was developed. The descriptor is called the L_{dn} (Day/Night Average Sound Level), which represents the 24-hour average sound level with a penalty for noise occurring at night. The L_{dn} computation divides the 24-hour day into two periods: daytime (7:00 am to 10:00 pm); and nighttime (10:00 pm to 7:00 am). The nighttime sound levels are assigned a 10 dBA penalty prior to averaging with daytime hourly sound levels.

For highway noise environments, the average noise level during the peak hour traffic volume is approximately equal to the L_{dn}.

The effects of noise on people can be listed in three general categories:



- Subjective effects of annoyance, nuisance, dissatisfaction
- Interference with activities such as speech, sleep, and learning
- Physiological effects such as startle, hearing loss

The sound levels associated with environmental noise usually produce effects only in the first two categories. Unfortunately, there has never been a completely predictable measure for the subjective effects of noise nor of the corresponding reactions of annoyance and dissatisfaction. This is primarily because of the wide variation in individual thresholds of annoyance and habituation to noise over time.

Thus, an important factor in assessing a person's subjective reaction is to compare the new noise environment to the existing noise environment. In general, the more a new noise exceeds the existing, the less acceptable the new noise will be judged.

Regarding increases in noise level, knowledge of the following relationships will be helpful in understanding the quantitative sections of this report:

Except in carefully controlled laboratory experiments, a change of only 1 dBA in sound level cannot be perceived. Outside of the laboratory, a 3 dBA change is considered a just-noticeable difference. A change in level of at least 5 dBA is required before any noticeable change in community response would be expected. A 10 dBA change is subjectively heard as approximately a doubling in loudness and would almost certainly cause an adverse community response.

Salter Project 21-0471

INTRODUCTION

This report summarizes our study of environmental noise of the proposed project (Livermore Oaks Business Park SMP-40) on nearby land uses. The project site is west of Isabel Avenue (State Highway 84), north of Stanley Boulevard, and south of Discovery Drive in Livermore, California. The purpose of the study was to determine whether estimated activity noise and construction noise from the proposed facility will meet the relevant requirements of the City General Plan Noise Element and Noise Ordinance at adjacent land uses.

EXECUTIVE SUMMARY

- Noise from the project's loading docks, future intra-project vehicle traffic, and likely HVAC equipment will increase CNEL[1] or DNL[2] noise levels at noise-sensitive receiver locations at most by 3 dB. An increase of 3 dB or less DNL is not expected to be noticeable and is not considered significant.
- Noise from project-created traffic would not result in a significant increase in noise levels on Isabel Avenue at adjacent properties.
- Temporary construction noise will exceed the City's Noise Ordinance and will need mitigation measures not to exceed the criteria established by General Plan Noise Objectives N-1.1 and N-1.5.

REPORT ORGANIZATION

This report is organized into the following sections:

- Project Site
- Acoustical Criteria
- Existing Noise Environment
- Noise Impact Assessment
  - Construction Noise
  - Loading Dock and Intra-Project Traffic Noise (Parking Lot)
  - Tenant HVAC Equipment Noise

[1] Community Noise Equivalent Level (CNEL) – A descriptor for the 24-hour A-weighted average noise level. The CNEL concept accounts for the increased acoustical sensitivity of people to noise during the evening and nighttime hours. Sound levels during the hours from 7 pm to 10 pm are penalized 5 dB; sound levels during the hours from 10 pm to 7 am are penalized 10 dB. A 10-dB increase in sound level is perceived by people to be a doubling of loudness.

[2] Day-Night Average Sound Level (DNL) – A descriptor established by the U.S. Environmental Protection Agency to describe the average day-night level with a penalty applied to noise occurring during the nighttime hours (10 pm - 7 am) to account for the increased sensitivity of people during sleeping hours. Also noted as Ldn. The difference between CNEL and DNL is often less than 1 dB.

PROJECT SITE

The proposed project will have a total area of approximately 40 acres, west of Isabel Avenue (State Highway 84) and between Stanley Boulevard and Discovery Drive in the City of Livermore. Warehouse Building 1 will be about 470,350 square feet with 68 loading docks, while Building 2 will be 288,750 square feet with 62 loading docks. The site is adjacent to existing industrially zoned warehouse facilities with loading docks to the north. Noise-sensitive residential receivers are located across Isabel Avenue to the east about 1,785-feet away from Building 1, and 600-feet away the northeast corner of the SMP-40 site. Two berms have been incorporated on the project site: a 6-foot by 125-foot landscape berm on the Northeast corner of the project property line, and a 10-foot by 60-foot screening wall east of Building 2's southern loading docks.

ACOUSTICAL CRITERIA

The following are project criteria and/or guidelines per the City of Livermore and State of California.

City of Livermore 2003-2025 General Plan Noise Element

Policy P4, Objective N-1.1

The Noise Element of the Livermore General Plan (Chapter 9, Policy P4 of Objective N-1.1) contains land use compatibility guidelines for environmental noise in the community. Table 1, below, summarizes these guidelines for residential and industrial land uses[3] in terms of CNEL or DNL. The definitions of each land use category follow below the table.

Table 1: Summary of Table 9-7 – Land Use Compatibility Guidelines for Community Noise CNEL or DNL, dB

Land Use Category	Normally Acceptable	Conditionally Acceptable	Normally Unacceptable	Clearly Unacceptable
Residential Low-Density[4], Single-family, Duplex, Mobile Homes	≤60	55-70	70-75	>75
Industrial, Manufacturing, Utilities, Agricultural	≤75	70-80	>75	--

[3] Table 9-7 of the Noise Element, page 9-27.

[4] Per General Plan Noise Ordinance Objective N-1.4, Policy P4, the criterion for single-family residential back yards is 60 dB CNEL/DNL.

Normally Acceptable: *If the noise level is within the "normally acceptable" level, noise exposure would be acceptable for the intended land use. Development may occur without requiring an evaluation of the noise environment unless the use could generate noise impacts on adjacent uses.*

Conditionally Acceptable: *If the noise level is within the "conditionally acceptable" level, noise exposure would be conditionally acceptable; a specified land use may be permitted only after detailed analysis of the noise environment and the project characteristics to determine whether noise insulation or protection features are required. Such noise insulation features may include measures to protect noise-sensitive outdoor activity areas (e.g., at residences, schools, or parks) or may include building sound insulation treatments such as sound-rated windows to protect interior spaces in sensitive receptors.*

Normally Unacceptable: *If the noise level is within the "normally unacceptable" level, analysis and mitigation are required. Development should generally not be undertaken unless adequate noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce the exposure of people to unacceptable noise levels.*

Clearly Unacceptable: *New construction should not be undertaken unless all feasible noise mitigation options have been analyzed and appropriate mitigation incorporated into the project to adequately reduce exposure of people to unacceptable noise levels.*

Noise Element Objective N-1.5

Objective N-1.5 seeks to reduce the level of noise generated by "stationary mechanical and other noise-generating equipment". Policy P1 states that "the City shall require that industrial and commercial uses be designed and operated to avoid the generation of noise effects on surrounding land uses from exceeding the following noise levels for exterior environments, operating longer than half an hour per hour:

- 55 dBA[5] L50[6] (7:00am to 10:00pm)
- 45 dBA L50 (10:00pm to 7:00am)

Policy P2 allows short-term events to have levels louder than those cited above. For events that occur less than 15 minutes per hour, levels can be increased by 5 dBA; events no more than 5 minutes per hour are allowed an additional 10 dBA, and those taking place one minute or less per hour are allowed an additional 15 dBA.

[5] A-Weighted Sound Level – The A-weighted sound pressure level, expressed in decibels (dB). Sometimes the unit of sound level is written as dB(A). A weighting is a standard weighting that accounts for the sensitivity of human hearing to the range of audible frequencies. People perceive a 10 dB increase in sound level to be twice as loud.

[6] L50 – The noise level exceeded 50% of the time. For a discussion of environmental acoustics, please refer to Appendix A.

Policy P4 allows an exemption from Policy P1 for motor vehicles on public streets between the hours of 7:00am and 8:00pm. We understand that Policies P1, P2, and P4 could apply to the noise from backup alarms (aka "beepers" or "squawkers").

Objective N-1.5 specifically describes "stationary source noises", so when referring to L_{50} noise levels we analyzed the noise of trucks that are expected to sit in the loading dock area, estimated to be at least 1,025 feet from the nearest residence.

Policy P3 establishes instantaneous maximum noise levels allowed (Lmax[7]) of 70 dBA during the day and 60 dBA during the night.

California Department of Transportation (CalTrans) Construction Vibration Criteria

The California Department of Transportation[8] (DOT) provides vibration guidelines for two scenarios: human perception and construction damage. These tables are included below as guidelines for potential project vibration levels. "Transient" vibrations are classified as impulsive events that are short in duration (e.g., debris falling, blasting). "Continuous" vibrations are more sustained vibration events over longer periods of time (e.g., jackhammering, drilling). Table 2 describes the human response to different levels of ground-borne vibration for transient and continuous events.

Table 2: Guideline Vibration Annoyance Potential Threshold Criteria[9]

Human Response	Maximum PPV[10] (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Barely perceptible	0.04	0.01
Distinctly perceptible	0.25	0.04
Strongly perceptible	0.90	0.10
Severe	2.00	0.40

7 L_{max} (Maximum Sound Level) – The maximum sound level for a specified measurement period of time as defined in ASTM E1686.

8 Transportation and Construction Vibration Guidance Manual September 2013 (DOT Document).

9 This is Table 20 from the DOT document.

10 (PPV): Peak Particle Velocity.

Table 3 provides a guideline for vibration criteria to assess the damage potential from ground vibration induced by construction equipment. Thresholds for continuous vibrations are lower than those for transient vibrations and are therefore considered more "conservative". These are standard significance thresholds used in the industry to determine impacts of ground borne vibrations on structures.

Table 3: Guideline Vibration Damage Potential Threshold Criteria[11]

Structure and Condition	Maximum PPV (in/sec)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.20	0.10
Historic and some old buildings	0.50	0.25
Older residential structures	0.50	0.30
New residential structures	1.00	0.50
Modern industrial/commercial buildings	2.00	0.50

The immediate adjacent properties are all modern industrial or commercial buildings. Across Isabel Avenue/Highway 84 to the east are existing single-family residences. Based on Table 3, we have applied the more stringent residential criteria of 1.0 PPV for transient events and 0.50 PPV for continuous events.

State of California CEQA Guidelines and Impact Criteria

The California Environmental Quality Act (CEQA) contains guidelines that evaluate the significance of noise attributable to a proposed project. This would include (but is not limited to) added traffic noise, mechanical equipment noise, and construction noise. CEQA asks the following applicable questions. Would the project result in:

1. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
2. Generation of excessive ground borne vibration or ground borne noise levels?
3. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public-use airport, would the project expose people residing or working in the project area to excessive noise levels?

11 This is Table 19 of the DOT document.

CEQA does not define the noise level increase that is considered "substantial". Typically, the local general plan would establish limits with respect to allowable noise and vibration increases. However, the City of Livermore General Plan does not contain numerical standards of significance for noise increases. For the items above, noise level increases of 3 dBA or less are generally considered less-than-significant. Substantial adverse community response would be expected only for increases of 5 dBA or more.

EXISTING NOISE ENVIRONMENT

Project Site Description

To quantify the existing site noise environment, two monitors continuously measured noise levels along the project property lines to the north and east between 2 and 4 November 2021. Table 4 summarizes measured data and Figure 1, attached, shows the approximate measurement locations. Locations were selected based not only on project setbacks but also on what nearby locations were accessible via public rights-of-way.

Table 4: Measured Environmental Noise Levels

Site	Location	Measured DNL (dBA)
LT-1	Business Park, approximately 10-feet above grade	65
LT-2	Arroyo Bike Trail, approximately 10-feet above grade	67

Site Noise Context

Noise measurements at the project site (see Figure 1), collected data from vehicle pass-bys on nearby roads. Measured on-site noise levels were DNL 65 dB and 67 dB at the project site (see Figure 1). LT-1 was placed near the nearest existing warehouse across from residences, and LT-2 was placed on the closest accessible utility pole across from residences. Adjustments were made, as appropriate, to estimate the change in noise levels from the long-term monitor location to the locations of the nearest residences east of Isabel Avenue.

We have combined cumulative existing and future noise sources that would result from the project's completion. Future project sources include the proposed loading dock noise, rooftop HVAC equipment, parking areas, and estimated traffic contribution, while the existing noise sources are the existing traffic. Adding expected noise contribution to the existing noise environment logarithmically would result in a noise level of approximately DNL 67 dB from all contributing noise sources upon the project's completion.

DNL 29[a] dB [Future HVAC] + DNL 29[b] dB [employee lot] + DNL 52 [c] dB [trucks] = DNL 52 [d] dB [future noise level at receivers]

a = cumulative building rooftop HVAC noise
b = employee parking lot noise
c = truck noise at loading docks

d = cumulative future project sources

DNL 67[e] dB [existing traffic] + DNL 52[e] dB [combined future sources] = DNL 67[f] dB [future noise level at receivers]

e = measured at project site, see **Figure 1**
e = determined from loading docks + HVAC noise + parking lots
f = calculated

See Appendix A for additional information on decibel mathematics.

NOISE IMPACT ASSESSMENT ANALYSIS

We evaluated the following noise sources from the proposed project on the surrounding environment:

- Potential rooftop mechanical equipment noise
- Short-term construction noise and vibration
- Project-related traffic increases

We have drawn the following conclusions from the analysis:

The following summarizes the portion of the CEQA checklist pertaining to noise.

Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

A: Permanent Increase in Noise Levels due to Project-Generated Noise

The owner anticipates that tenant office spaces located on the corners of each building will be mechanically ventilated with typical 5-ton package units located above the offices in each corner of each building. No other outdoor mechanical equipment has been specified at this time. Specific equipment will be confirmed during the design phase.

Preliminary sound power level data has been provided for these 5-ton outdoor package fan units indicating that combined noise from these units sums to approximately DNL 29 dB at the nearest property lines. This assumes 24-hour operation of this equipment (in line with the operation hours of the building). The rooftop parapet is assumed to provide acoustical shielding to nearby neighbors because they would break line-of-sight to the nearest receivers.

Depending on the final equipment placement, as well as any specific parapets, barriers, and shielding provided by buildings (which would reduce noise levels at the property lines), noise levels may vary. We do not expect the noise contribution to be significant in these aspects.

B: Predicted Permanent Increase in Noise Levels due Project Traffic Volumes

It has been communicated by the team that the projected truck trips per day will be approximately as shown below in Table 5.

Table 5: SMP-40 Truck Trips

Hour	Percent	ITE Trips
7 – 9 AM	9.4%	20
9 AM – 4 PM	42.7%	91
4 – 6 PM	12.7%	27
6 – 10 PM	16.4%	35
10 PM – 7 AM	18.8%	40
Total	100 %	213

Overall, the project would result in a net increase in daily trips by 213, amounting to an overall traffic noise DNL increase of approximately 2 dB. Therefore, this would not result in a significant increase in noise levels at existing adjacent properties.

C: Temporary Increase in Noise Levels due to Construction

Construction activities will likely include the use of heavy equipment for grading and other activities, through completion of buildings and landscaping. Heavy trucks would travel to, from, and within the site hauling soil, equipment, and building materials. Smaller equipment, such as jackhammers, pneumatic tools, and saws could also be used throughout the demolition and construction phases in various areas. The noise and vibration associated with these activities would be generated within the entire project area.

Based on our experience with similar projects' construction methods and phasing, our preliminary understanding and assumptions of expected equipment is shown in Table 6. Reference levels for construction equipment are listed in Table 7, both at the reference distance of 50-feet and at 600-feet, which is the closest distance between the project and the residences across Isabel Avenue.

Table 6: List of Typical Construction Equipment and Phasing

Phase	Equipment
Demolition	Concrete/Industrial Saws, Excavators, Rubber-Tired Dozers, Tractors/Loaders/Backhoes
Site Preparation	Graders, Rubber-Tired Dozers, Tractors/Loaders/Backhoes
Grading/Excavation	Excavators, Drill Rig for Shoring Beams (Caisson Drilling), Rubber-Tired Dozers, Tractors/Loaders/Backhoes
Trenching	Tractor/Loader/Backhoe, Excavators
Building Exterior	Cranes, Forklifts, Generator Sets, Tractors/Loaders/Backhoes, Welders
Building Interior/ Architectural Coating	Air Compressors, Aerial Lift
Paving/Landscaping/ Site Concrete	Cement and Mortar Mixers, Paving Equipment, Rollers, Tractors/Loaders/Backhoes

Table 7: Construction Equipment Reference Noise Levels[12]

Typical Equipment	Estimated Maximum Instantaneous L_{max}[13] Noise Level (dBA at 50 feet)	Estimated Maximum Instantaneous L_{max} Noise Level (dBA at 600 feet)
Aerial Lift	83	61
Air Compressors	81	59
Cement and Mortar Mixers	85	63
Concrete/Industrial Saws	76	54
Cranes	83	61
Drill Rig for Shoring Beams (Caisson Drilling)	85	63
Excavators	85	63
Forklifts	83	61
Generator Sets	81	59
Graders	85	63
Paving Equipment	89	67
Rollers	74	52
Rubber-Tired Dozers	85	63
Tractors/Loaders/Backhoes	84	62
Welders	73	51

Actual construction noise levels will vary based on distance to each piece of equipment or work area from the receiver and shielding from adjacent buildings and construction elements. It should be noted that construction activities are prohibited during the specific time period outlined in Section 9.36.080 of the City's Municipal Code. Section 9.36.080 is as follows:

12 Equipment noise levels at 50-feet are from Section 9, Federal Highway Administration Highway Traffic Noise Construction Noise Handbook (August 2006) and Table 12-2, Transit Noise and Vibration Impact Assessment, United States Department of Transportation, Office of Planning and Environment, Federal Transit Administration, May 2006.

13 L_{max} (Maximum Sound Level) – The maximum sound level for a specified measurement period of time as defined in ASTM E1686.

Section 9.36.080 Hammers, pile drivers, pneumatic tools and similar equipment

The operation between the hours of 6:00 p.m. Saturday to 7:00 a.m. Monday; 8:00 p.m. to 7:00 a.m. on Monday, Tuesday, Wednesday and Thursdays; 8:00 p.m. Friday to 9:00 a.m. on Saturday or at all on city-observed holidays of any pile driver, pneumatic tools, derrick, electric hoist, sandblaster or other equipment used in construction, demolition or other repair work, the use of which is attended by loud or unusual noise, is prohibited. (Ord. 1672 § 2, 2002; Ord. 1128 § 2, 1983; 1960 code § 13B.3(f))

Construction Equipment Schedule

We received the following equipment schedule that CalEEMod utilized for their model for air quality emissions. Table 8 below summarizes the equipment and associated sound levels at the nearest residential property (approximately 600 feet away).

Table 8: Construction Equipment Schedule

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Resulting DNL	Resulting Lmax
Grading	Excavators	2	8	67	66
Grading	Graders	1	8	67	63
Grading	Rubber Tired Dozers	1	8	67	63
Grading	Scrapers	2	8	67	66
Grading	Tractors/Loaders/Backhoes	2	8	67	65
Total Grading Phase	**All Equipment Running Simultaneously**			**70**	**72**
Paving	Pavers	2	8	69	70
Paving	Paving Equipment	2	8	69	70
Paving	Rollers	2	8	66	55
Total Paving Phase	**All Equipment Running Simultaneously**			**70**	**73**
Building Construction	Cranes	1	7	67	61
Building Construction	Forklift	3	8	67	66
Building Construction	Generator Sets	1	8	67	59
Building Construction	Tractors/Loaders/Backhoes	3	7	68	67
Building Construction	Welders	1	8	66	51
Total Building Construction	**All Equipment Running Simultaneously**			**69**	**70**
Architectural Coating	Air Compressors	1	8	67	59

It should be noted that the DNL was calculated using daytime construction noise levels for daytime hours for the listed hours of operation and measured nighttime hours from existing traffic. Despite restrictions of nighttime construction activities, from the noise levels shown above in Table 8, it could be possible to exceed the General Plan Objectives as follows:

Objective N-1.5 P3

- As shown above in Table 8, with all the phases running construction equipment as intended, the resulting Lmax would range between 70 and 73 dBA. Since construction is not permitted during nighttime hours, only the daytime Lmax criterion of 70 dBA would be applicable and would not be met. Therefore, it will be necessary to implement the mitigation measures shown below.

Due to these possibilities, the following is a list of measures that are required to be adopted by the contractor to reduce the impact of construction noise on neighbors:

1. Consistent with the Livermore Municipal Code, construction will be limited to weekdays between the hours of 7:00 a.m. and 8:00 p.m. and Saturdays through Sunday between the hours of 9:00 a.m. and 6:00 p.m.
2. There are residences located approximately 600 feet from the project site. Thus, to help reduce the impact of noise construction, it will be necessary that a barrier be built prior to the planned permanent 10-foot tall berm on the east side of the project. If this is not feasible, we recommend building the planned permanent 10-foot tall berm before construction activities. This will be necessary to reduce construction noise impacts on the residences. The barrier/berm should be 10 feet tall. This would help reduce the construction noise impacts on the residences by approximately 10 dB.
3. The barrier can be field-built provided they meet the following criteria:
    a. Minimum surface density of 4 psf.

       Many constructions could meet the surface density requirement. For example, a stud wall with exterior-grade plywood sheathing and a stucco finish (or two layers of 5/8-inch thick plywood) would meet this requirement.

    b. The barrier should be free of cracks and drainage holes/slots along the bottom of the barrier be kept to a minimum. Where needed, they should be covered by 1 psf mass-loaded vinyl flaps (e.g., Kinetics KNM-100) so water can flow around the vinyl and still drain.

    c. Joints between sheathing layers be offset by 16 inches minimum.
4. Contractors shall utilize “quiet” models of air compressors and other stationary noise sources where technology exists.
5. Internal combustion engine-driven equipment shall be equipped with mufflers which are in good condition and appropriate for the equipment.

6. Stationary noise-generating equipment, such as air compressors and portable power generators, shall be located as far away as possible from adjacent property lines.
7. Staging areas and construction material areas shall be located as far away as feasible from adjacent residences.
8. All unnecessary idling of internal combustion engines should be prohibited.
9. The contractor should designate a "noise disturbance construction superintendent" who will be responsible for tracking and responding to any complaints about construction noise. The noise disturbance construction superintendent will determine the cause of the noise complaint (e.g., starting too early, bad muffler, etc.) and will require that reasonable measures are implemented to correct the problem. The telephone number for the noise disturbance construction superintendent will be posted at the construction site and included in any construction notices sent to neighbors.

Would the project result in generation of excessive ground-borne vibration or ground-borne noise levels?

A: Permanent Increase in Vibration Levels due to Project-Generated Vibration

The planned use for the site, as warehouse buildings, is not expected to generate significant amounts of ground-borne noise or vibration.

B: Temporary Increase in Vibration Levels due to Construction

The nearest and most sensitive adjacent receivers include residences to the east approximately 500 feet from the closest area of construction on the project site. Industrial-zoned parcels to the north are assumed to be less sensitive.

Project construction may include activities such as the use of concrete saws, excavation and grading, and the use of rolling stock equipment (tracked vehicles, compactors, etc.). Typical construction vibration levels at 50-feet are listed in Table 9, below. Most of the construction will occur set back from the property line. As indicated in the criteria section above, the risk of damage to nearby structures may begin to occur at a limit of 1.0 in/sec PPV for transient vibration events and 0.50 PPV for continuous events.

Table 9: Example Construction Vibration Levels[14]

Equipment	PPV at 50 ft. (in/sec)[15]
Vibratory Roller	0.049
Hydraulic Breaker	0.03 to 0.08
Large Bulldozer	0.03
Loaded Trucks	0.03
Excavator	0.03
Caisson/pier drilling	0.03
Jackhammer	0.01
Small Bulldozer	0.001
Crane, Forklift, Bobcat	No significant vibration

Based on the vibration levels shown in Table 9, construction equipment is not expected to cause structural damage to adjacent properties because project construction is not expected to exceed the thresholds for new residential buildings or commercial/industrial structures as shown above in Table 3. Ground-borne noise would also not be expected to be significant at these vibration levels.

FUTURE LOADING DOCK AND INTRA-PROJECT TRAFFIC NOISE

Future Loading Dock Calculation Methodology

Operational noise from the proposed facility is expected to consist primarily of tractor-trailers accessing loading dock areas. To estimate truck noise at the proposed facility, we referenced recently measured noise levels at a local distribution facility which involved semi-trucks similar in size to those that are expected to access the proposed project's facility.

Calculations for resulting noise levels due to on-site truck and car trip generation durations and activities were based on the measurements at this local distribution facility with ancillary information provided to us for that project on 15 February 2018 and 20 December 2023.

Based on the assumptions described below, estimated noise levels were then compared to applicable criteria to determine if noise from the proposed facility would exceed the City's noise goals (described above) at adjacent residences.

14 Table 12-2, Transit Noise and Vibration Impact Assessment, United States Department of Transportation, Office of Planning and Environment, Federal Transit Administration, May 2006.

15 Using a value of n = 1.5 per FTA recommendation, where n is the attenuation rate through the ground

Traffic volumes produced by the proposed project were provided by TJKM in December 2023. Their study estimated that a total of 213 truck trips[16] would occur at the facilities throughout the 24 hours of operation. Overton Moore Properties provided further details about the potentially likely distribution of those trucks each hour throughout the 24-hour operation period.

Intra-Project Traffic Analysis Methodology

Intra-project traffic noise will consist of traffic noise associated with future warehouse employee vehicles within the designated parking lots. To estimate vehicle noise at the employee parking lots, we referenced the TJKM provided traffic volumes for the proposed project.

Noise Source Analysis and Assumptions

Future Loading Docks

Our analysis estimated future noise from the facility based on the following assumptions discussed with the client via email, and per the overall site plan:

1. Trucks will enter and exit the site from Atlantis Court and Challenger Street, from the north (via Discovery Drive).
2. Non-truck noises associated with loading/unloading activity (i.e., forklifts, rolling doors, carts, pallet crushing, items dropping), are assumed to be located near the dock doors and are included in our analysis.
3. An average truck trip (not including unloading/loading) is estimated to last for a cumulative period of about 2 minutes and be at least 1025 feet from the nearest residential property line.
4. Trucks occupy the loading dock in their loading area that is nearest to noise-sensitive receiver (Residents across Isabel Avenue, to the east of the building).
5. Total number of loading docks: 130 (68 in Building 1 and 62 in Building 2)
6. Number and distribution of truck trips is based on TJKM's traffic study estimate, with approximately 213 total truck trips per 24-hour period (continuous 24/7 operation) distributed as follows:
    - AM Peak is 7-9 AM – 9.4%
    - 9-4 PM – 42.7%
    - PM Peak is 4 PM - 6 PM – 12.7%
    - 6 PM - 10 PM – 16.4%
    - 10 PM - 7 AM – 18.8%

[16] Email correspondence provided on 12/20/23 confirmed the 213 daily truck trips as 20% of total vehicle trips based in ITE data (TJKM Study)

7. Building 2 provides substantial acoustical shielding for most of Building 1 and its operations to the eastern residents. Because of this, Building 1 is not expected to have a meaningful impact on the residential receivers' sound environment to the east.
8. Loading docks in Building 2 are located on the north and south facades, configured to maintain the maximum possible distance away from the residential area to the east.
9. North-facing docks of Building 2 will have a direct line-of-sight to the warehouse to the north. We assume that some shielding is provided by the perpendicular orientation of the docks of Building 1, which would slightly reduce our overall calculated noise contribution of the loading docks to the northern warehouse receivers because of the partial line-of-sight.
10. 24-hour operation assumed.
11. Loading docks not in use on each building have closed doors.
12. A typical truck "trip" consists of the following events (estimated sound levels based on aforementioned measurements at similar facilities):
    a. Truck passby (arrival, departure at slow speed): 69 dBA at 30 feet
    b. Truck airbrakes: 72 dBA at 25 feet
    c. Truck backup alarm: 79 dBA at 30 feet
    d. Brief idle before engine shutoff: 70 dBA at 25 feet
    e. Truck engine ignition and airbrakes: 71 dBA at 25 feet
    f. Truck accelerating from stop: 74 dBA at 25 feet
    g. Truck noise source reference heights[17] (above grade)
        i. Passby, brief idle, acceleration, and ignition: 8 feet
        ii. Back-up beeper and airbrake: 2.5 feet
        iii. Topographical site analysis included in Section C3.1 of the Grading and Drainage Plan show potential terrain shielding of about three feet between the dock elevation and receivers to the east of Isabel Avenue

Intra-Project Traffic Noise

Our analysis estimated future noise from the facility parking lots is based on the following assumptions:

1. Employees will enter and exit the site from Atlantis Court and Challenger Street, from the north (via Discovery Drive).
2. Once on site, vehicles will move at 15 miles per hour or less.
3. Vehicles will be spread out evenly amongst the seven parking areas.

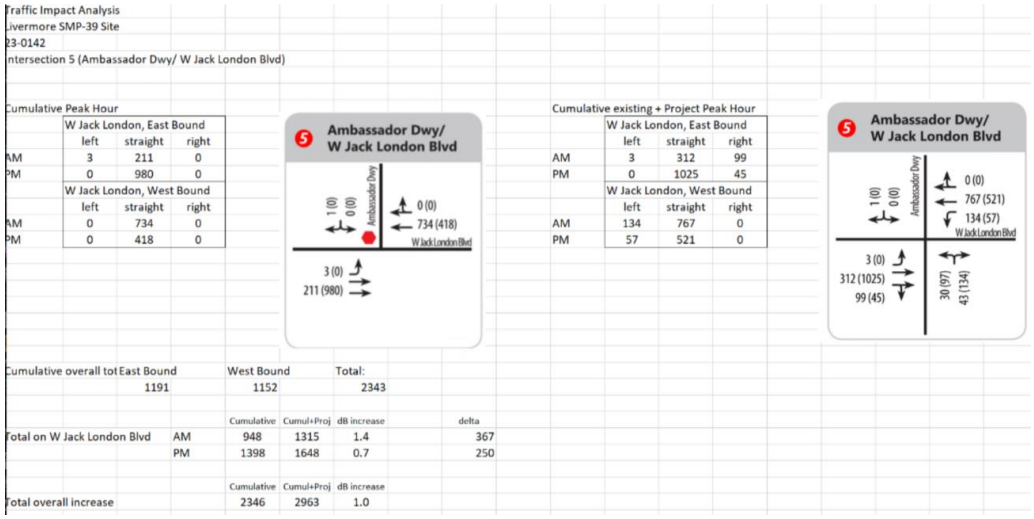
[17] Truck source heights excerpted from Caltrans Technical Noise Supplement document (TeNS) document dated October 1998.

4. An average vehicle trip is estimated to last for a cumulative period of about 2 minutes and be at least 550 feet from the nearest residential property line.
5. Similar proportional percentages were assumed for vehicle trips in the project parking lots as were the truck trips, as shown in the distribution below.
    - AM Peak is 7 AM - 9 AM- 9.4%
    - 9 AM – 4 PM -42.7%
    - PM Peak is 4 PM -6 PM -12.7%
    - 7 PM - 10 PM 16.4%
    - 10 PM - 7 AM 18.8%

Estimated Future Noise Levels

Future Average Noise Levels (CNEL/DNL)

We estimated noise levels at local receptors from the sources described in the previous section. To account for future increases in local traffic noise levels (growth in traffic on Isabel Avenue and other local roadways), we added 1 dB DNL to the measured levels[18] (see **Table 4** above).



We calculated the acoustical impact of project traffic increase due to both projects SMP-39 and SMP-40 with the provided peak hour traffic volumes for the cumulative without project and cumulative with project scenarios. The analysis used the FHWA-RD-77-108 traffic noise calculation model. The figures below show the various calculations for the intersections of interest (i.e., 5, 9, 10, and 11) as provided to us via the traffic volume study developed for both SMP-39 and SMP-40.

Figure A: Intersection Map Legend

[18] The California Department of Transportation assumes a traffic volume increase of three-percent per year, which corresponds to a 1 dBA increase in DNL over a ten-year period.

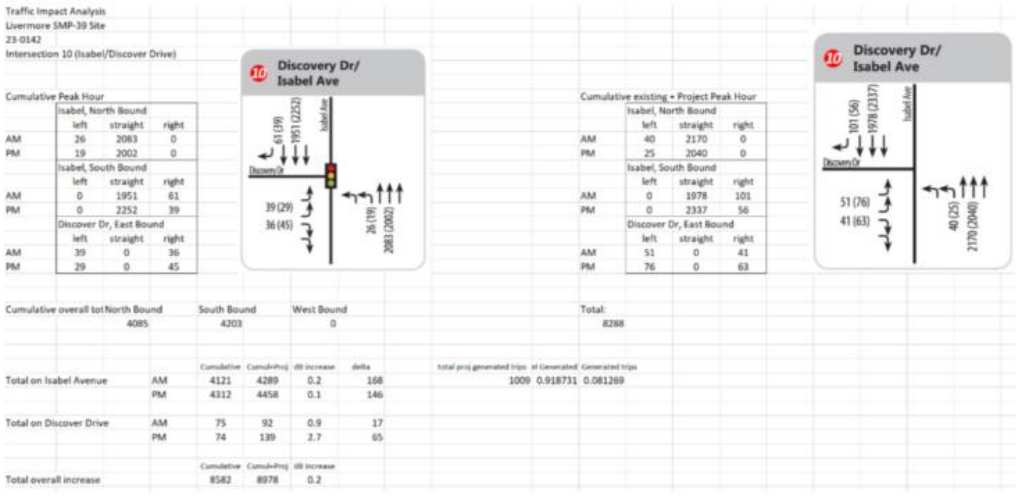
Figure D: Traffic Volume Analysis for Intersection 10



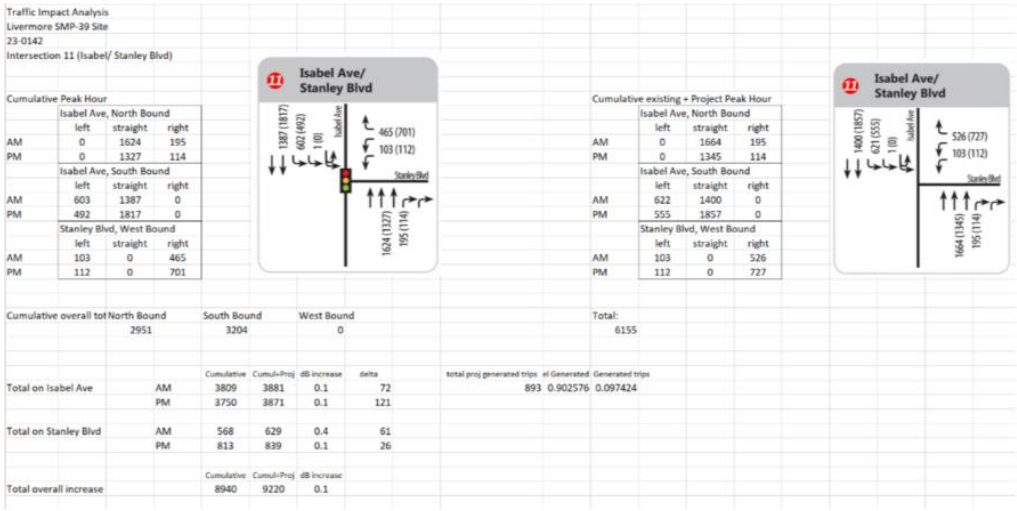


Figure E: Traffic Volume Analysis for Intersection 11

As shown above, the increase in traffic due to the project would be approximately 1 to 2 dBA to the DNL when combined.

Table 10 below summarizes the estimated DNL levels at the closest property plane to the east of the building, under the assumption that the facility would receive its trucking and commuting employee activities during the 24 hours of operation.

Table 10: Calculated 24-Hour Future Facility Noise at Nearest Noise-Sensitive Land Uses: CNEL/DNL, dBA

Nearby Receiving Locations	Existing Noise at Receiver (Residences)	Loading Docks at Receiver	Intra-Project Traffic Noise Levels at Receiver	Combined Existing plus Project	Change (dBA)
East Property Line (Residences across Isabel)	67	60	32	69	+2
North Property Line (Neighboring Warehouse)	65	65	36	68	+3

The calculated increase in DNL at the residential property line with the project and future traffic noise levels (near term 2025) will be approximately 2 dB. At the northern industrial uses, a DNL 3 dB change is predicted. A change of 3 dB or less is not expected to be noticeable and is not considered significant.

Our calculations of maximum noise levels assume that the trucks operating at the closest docks to the residences will be active at the same proportion as stated above. The noise analysis also assessed the increase in traffic noise levels resulting from project traffic in combination with future traffic noise level increases on the surrounding roadway network resulting from other anticipated development in the region. The resultant cumulative increase is 3 dB. This would not be considered a significant increase to the predicted project operation noise environment.

Future L_{50} Noise Levels

The following assumptions were made about the 24-hour operation of the project in our estimated L_{50} calculations:

- The volume of expected truck trips is consistent with the truck trip distribution established in item 6 of the Noise Source Analysis and Assumptions section (i.e., a maximum of 5 trucks per hour at nighttime, or 18.8% of trucks between 10:00 pm and 7:00 am).
- The 6- and 10-foot berms will be incorporated into the project.
- Backup alarms are expected to be at a height of approximately 2.5 feet.
- Trucks do not move great distances when their backup alarm is engaged.

Table 11 summarizes the estimated daytime and nighttime L_{50} for the proposed project. Since backup alarms for nighttime are predicted to occur less than 15 minutes per hour, the criterion can increase by 5 dBA per Policy P2. However, since back up alarms would be more than 15 minutes per hour during the daytime, no additional increases are accounted for in our analysis.

Table 11: Calculated 24-Hour Future Facility L_{50} Value: L_{50}, dBA

Time of Day	Estimated L_{50} Value	Criterion L_{50} Value
Daytime (7am-10pm)	50 dBA	55 dBA
Nighttime (10pm-7am)	45 dBA	50 dBA

Although our calculations of overall operational L_{50} noise levels do not exceed the allowable values stated by the City (i.e., Policy P1, Objective N-1.5), backup alarm noise may be audible at residences to the east during quieter nighttime hours. It is our understanding that other current similar projects in the vicinity have caused local neighbor complaints due to trucks' back-up alarms at those locations in the past.

Back-up alarms were assumed to be 79 dB at a reference distance of 30 feet. The distance attenuation between the loading dock to the façade of the nearest residence provides a 31 dB reduction. Although backup alarms would be audible from the residences, the L_{50} threshold of 50 dBA will not be exceeded due to the limited number of trips during this timeframe (estimated at 40 trips in 9-hour time frame).

Calculations assumed the source height of these backup alarms to be approximately 2.5 feet from grade. The incorporation of the proposed 6- and 10-foot-tall berms would adequately obstruct the direct line-of-sight of these backup alarms to the residential receivers. The dimensions of the proposed berms are calculated to reduce intermittent noise levels (such as those produced by backup alarms) by up to 6 dB at the closest residents.

Quieter backup alarms (aka "squawkers"), which are becoming more prevalent in delivery vehicles for various large e-commerce websites, and other vendors, may be used by trucking operators visiting this site in the future, therefore beeper noise has the potential to be reduced. A best practice for consideration would be to implement these alternative devices in other truck populations in the future.

CONCLUSIONS AND COMMENTS

1. Future cumulative project site noise from rooftop HVAC equipment, loading dock-generated noise, stationary trucks, and employee vehicles, is not expected to significantly impact receivers to the east or to the north. The calculated increase in CNEL/DNL for the warehouse receivers to the north will be 3 dB, while the closest residential receivers across Isabel Avenue will have a 2dB increase from the existing environment under the expected 24-hour operations.

   A change of 3 dB or less is not considered significant for residents to the east or the commercial neighbors to the north of the project site. A cumulative DNL of 69 dB for the receivers does not exceed the industrial 75 dB DNL threshold defined in Table 9-7 of the Livermore Noise Element as well as the L_{50} level from Objective N-1.5 of the General Plan.

   Considering the 1,025-foot distance between the nearest loading dock and the closest residents, and the trucks being a stationary source rather than a moving vehicle once the leaving the loading dock area of the project site, the city's L_{50} criterion is not applicable once a truck begins moving closer to the residential area. Given the minority of expected project truck trips conducted in the nighttime

hours (less than 5 trips per hour on average from 10 PM to 7 AM), noise from stationary trucks at the nearest loading dock are expected to comply with the City's L_{50} nighttime requirement assuming backup alarms are not continuously operating for more than 30 minutes per hour.

2. Temporary construction noise will impact the residences, and thus, it will be necessary to incorporate mitigation measures such as a 10-foot-tall berm or barrier on the east side of the project to reduce the noise by 10 dB.

3. It is our understanding that there are no State or Federal requirements for noise levels of backup alarms except for OSHA, which only requires them to be "significantly louder" than the surrounding environment. Because the background noise levels around most facilities are not known, manufacturers typically increase the alarm volume to compensate.

   Best practices to reduce alarm audibility at the facility to be evaluated would be to require users to limit alarm volume levels, employ signal personnel, lights, and other means to notify people about ongoing truck activities within the facility.

APPENDIX A: FUNDAMENTAL CONCEPTS OF ENVIRONMENTAL NOISE

This section provides background information to aid in understanding the technical aspects of this report.

Three dimensions of environmental noise are important in determining subjective response. These are:

- The intensity or level of the sound
- The frequency spectrum of the sound
- The time-varying character of the sound

Airborne sound is a rapid fluctuation of air pressure above and below atmospheric pressure. Sound levels are usually measured and expressed in decibels (dBA), with 0 dBA corresponding roughly to the threshold of hearing.

The "frequency" of a sound refers to the number of complete pressure fluctuations per second in the sound. The unit of measurement is the cycle per second (cps) or hertz (Hz). Most of the sounds, which we hear in the environment, do not consist of a single frequency, but of a broad band of frequencies, differing in level. The name of the frequency and level content of a sound is its sound spectrum. A sound spectrum for engineering purposes is typically described in terms of octave bands, which separate the audible frequency range (for human beings, from about 20 to 20,000 Hz) into ten segments.

Many rating methods have been devised to permit comparisons of sounds having quite different spectra. Surprisingly, the simplest method correlates with human response practically as well as the more complex methods. This method consists of evaluating all of the frequencies of a sound in accordance with a weighting that progressively de-emphasizes the importance of frequency components below 1000 Hz and above 5000 Hz. This frequency weighting reflects the fact that human hearing is less sensitive at low frequencies and at extreme high frequencies relative to the mid-range.

The weighting system described above is called "A"-weighting, and the level so measured is called the "A-weighted sound level" or "A-weighted noise level." The unit of A-weighted sound level is sometimes abbreviated "dBA." In practice, the sound level is conveniently measured using a sound level meter that includes an electrical filter corresponding to the A-weighting characteristic. All U.S. and international standard sound level meters include such a filter. Typical sound levels found in the environment and in industry are shown in Figure A-1.

Although a single sound level value may adequately describe environmental noise at any instant in time, community noise levels vary continuously. Most environmental noise is a conglomeration of distant noise sources, which results in a relatively steady background noise having no identifiable source. These distant sources may include traffic, wind in trees, industrial activities, etc. and are relatively constant from moment to moment. As natural forces change or as human activity follows its daily cycle, the sound level may vary slowly from hour to hour. Superimposed on this slowly varying background is a succession of

identifiable noisy events of brief duration. These may include nearby activities such as single vehicle pass-bys, aircraft flyovers, etc. which cause the environmental noise level to vary from instant to instant.

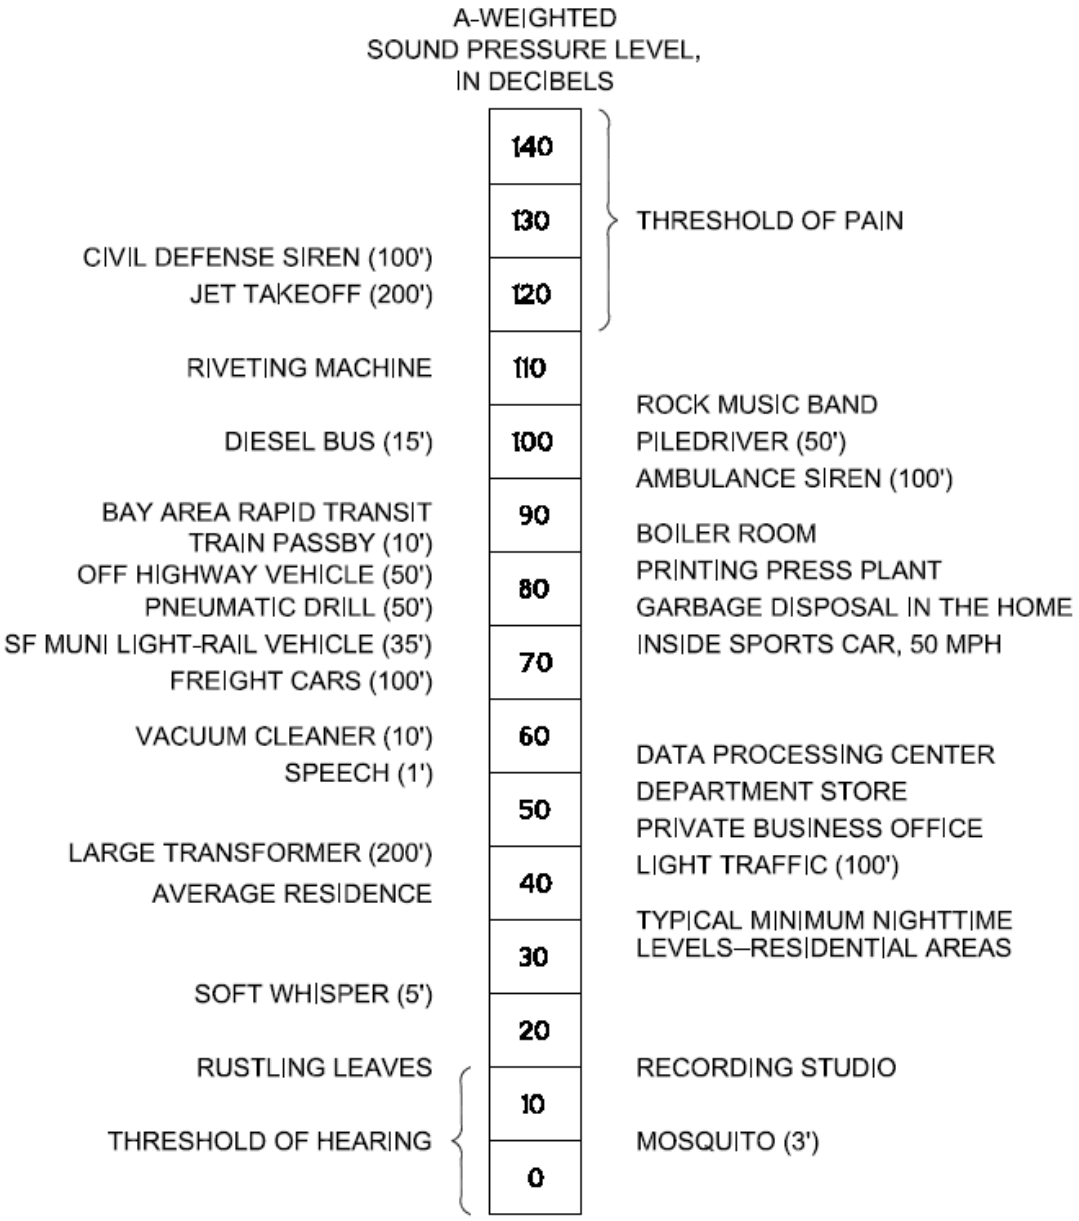
To describe the time-varying character of environmental noise, statistical noise descriptors were developed. "L10" is the A-weighted sound level equaled or exceeded during 10 percent of a stated time period. The L10 is considered a good measure of the maximum sound levels caused by discrete noise events. "L50" is the A-weighted sound level that is equaled or exceeded 50 percent of a stated time period; it represents the median sound level. The "L90" is the A-weighted sound level equaled or exceeded during 90 percent of a stated time period and is used to describe the background noise.

As it is often cumbersome to quantify the noise environment with a set of statistical descriptors, a single number called the average sound level or "L_{eq}" is now widely used. The term "L_{eq}" originated from the concept of a so-called equivalent sound level which contains the same acoustical energy as a varying sound level during the same time period. In simple but accurate technical language, the L_{eq} is the average A-weighted sound level in a stated time period. The L_{eq} is particularly useful in describing the subjective change in an environment where the source of noise remains the same but there is change in the level of activity. Widening roads and/or increasing traffic are examples of this kind of situation.

In determining the daily measure of environmental noise, it is important to account for the different response of people to daytime and nighttime noise. During the nighttime, exterior background noise levels are generally lower than in the daytime; however, most household noise also decreases at night, thus exterior noise intrusions again become noticeable. Further, most people trying to sleep at night are more sensitive to noise. To account for human sensitivity to nighttime noise levels, a special descriptor was developed. The descriptor is called the L_{dn} (Day/Night Average Sound Level), which represents the 24-hour average sound level with a penalty for noise occurring at night. The L_{dn} computation divides the 24-hour day into two periods: daytime (7:00 am to 10:00 pm); and nighttime (10:00 pm to 7:00 am). The nighttime sound levels are assigned a 10 dBA penalty prior to averaging with daytime hourly sound levels.

For highway noise environments, the average noise level during the peak hour traffic volume is approximately equal to the L_{dn}.

The effects of noise on people can be listed in three general categories:

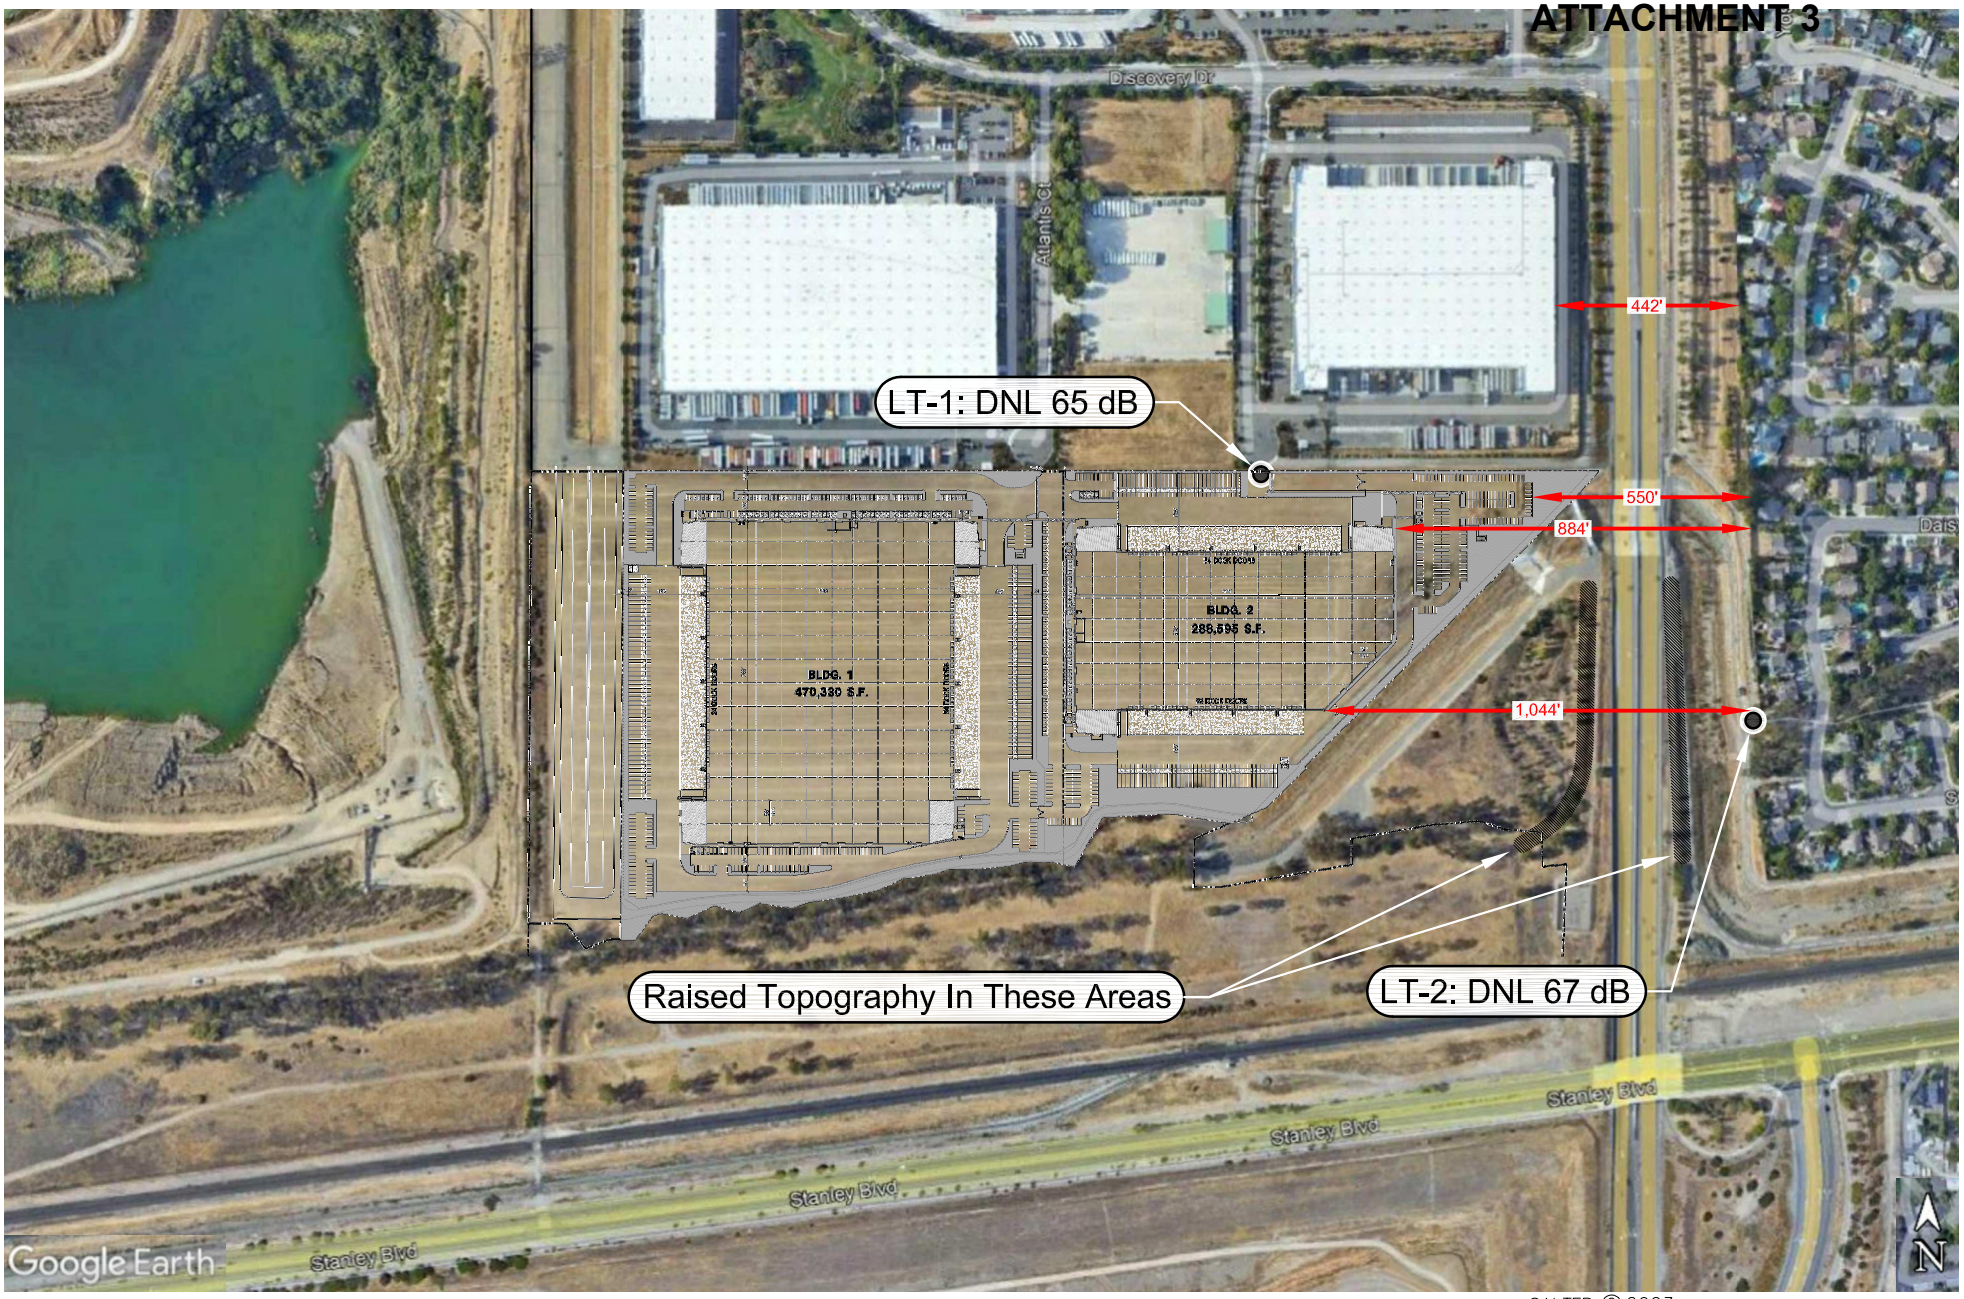


- Subjective effects of annoyance, nuisance, dissatisfaction
- Interference with activities such as speech, sleep, and learning
- Physiological effects such as startle, hearing loss

The sound levels associated with environmental noise usually produce effects only in the first two categories. Unfortunately, there has never been a completely predictable measure for the subjective effects of noise nor of the corresponding reactions of annoyance and dissatisfaction. This is primarily because of the wide variation in individual thresholds of annoyance and habituation to noise over time.

Thus, an important factor in assessing a person's subjective reaction is to compare the new noise environment to the existing noise environment. In general, the more a new noise exceeds the existing, the less acceptable the new noise will be judged.

With regard to increases in noise level, knowledge of the following relationships will be helpful in understanding the quantitative sections of this report:



Except in carefully controlled laboratory experiments, a change of only 1 dBA in sound level cannot be perceived. Outside of the laboratory, a 3 dBA change is considered a just-noticeable difference. A change in level of at least 5 dBA is required before any noticeable change in community response would be expected. A 10 dBA change is subjectively heard as approximately a doubling in loudness, and would almost certainly cause an adverse community response.

Subject: **SMP 39/40 Project**

Section 4 of the Engineering Considerations under West Jack London Boulevard is revised to include the following Engineering Consideration:

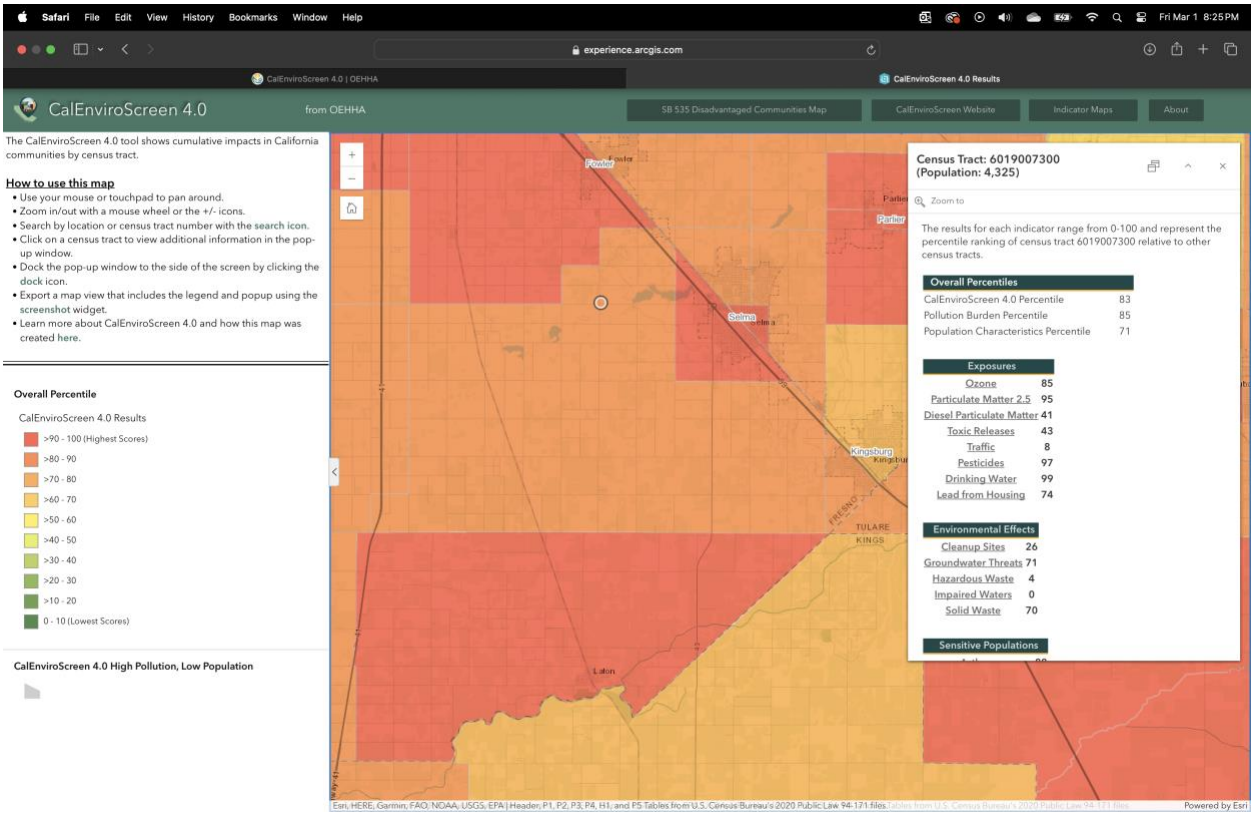
The widening of West Jack London Boulevard shall include the installation of streetlights. The final layout of the streetlights will be determined by the City Engineer during the development of improvement plans for the street widening.

P.O. Box 79222
Corona, CA 92877

To: City of Livermore Planning Commission

From: Golden State Environmental Justice Alliance

Subject: SMP 38/39/40 Project EIR



This letter is to serve as further comment in addition to all previously submitted comments and documents by Golden State Environmental Justice Alliance.

CalEnviroScreen Information

CalEnviroScreen is a mapping tool that helps identify California communities that are most affected by many sources of pollution, and where people are often especially vulnerable to pollution's effects. CalEnviroScreen uses environmental, health, and socioeconomic information to produce scores for every census tract in the state. The scores are mapped so that different communities can be compared. An area with a high score is one that experiences a much higher pollution burden than areas with low scores. CalEnviroScreen ranks communities based on data that are available from state and federal government sources. CalEnviroScreen is updated and maintained by The Office of Environmental Health Hazard Assessment, on behalf of the California Environmental Protection Agency.

CalEnviroScreen Data on : SMP 38/39/40 EIR Project Location/Area

The above listed project is in census tract **(6001451300)**. Overall, when compared to other census tracts, the project site census tract is in the 83rd percentile regarding pollution. As far as pollution burden is concerned, this census tract is in the 85th percentile. In terms of Ozone, this census tract is in the 85th percentile, Particulate Matter 2.5 98th percentile, Diesel Particulate Matter 41st percentile, Toxic Releases 43rd percentile and Traffic 8th percentile to name a few.

Conclusion

Consider the above referenced information when making this important decision. Realize that you and the citizens of this area face some of the WORST POLLUTION in the entire state of California.

It is the responsibility of the City's elected and appointed officials to make environmentally responsible development decisions. Based on the CalEnviroScreen data, this is more than sufficient evidence of the further air quality impacts that the citizenry of Livermore will continue to encounter with further development of another warehouse. We are not against development, as we believe it is necessary for further economic growth in our current society. Development needs to be conducted with the highest of expectations to ensure the local population does not suffer further air quality burdens.

We stand by our comments and believe the EIR is flawed and should be redrafted and recirculated for public review.

Respectfully Submitted,

Pete Sheehan

Glossary of Terms

Ozone - Amount of daily maximum 8-hour Ozone concentration

Particulate Matter 2.5 - Annual mean PM 2.5 concentrations

Diesel Particulate Matter - Diesel PM emissions from on-road and non-road sources

Toxic Releases - Toxicity-weighted concentrations of modeled chemical releases to air from
facility emissions and off-site incineration.

Traffic -Traffic density, in vehicle-kilometers per hour per road length, within 150 meters of the census tract boundary.

Ashely

Hope this email finds you well.

My name is Ajay Changaran (Sr Director, GWS at Lam Research). I am responsible for Lam's Global Real Estate portfolio and responsible for all space/land leasing and acquisitions. I had worked with Overton Moore Properties on the leasing of the warehouse (SMP 40 project). I had come and met with the city manager in early 2023 when the landlord was getting ready to submit the applications. I know Tim Cooper who is responsible for the current Lam site in Livermore has been in touch with Brandon Cardwell on this topic as well.

This is a "key" project for Lam and our plans require move in by **1H 2025**. I know the landlord is working with the city for approvals and ultimately to start construction so that Lam can hold these move in dates (please see below the dates we were given as critical dates for this project).

We have been in touch with the Economic Development Manager and City Manager on this key project over the last few months. Tim and I had planned to attend the planning committee meeting tomorrow but due to some last minute conflicts that have come up for us we are unable to attend. We wanted to ensure we request the committee's support of this project and to ensure that we get your support to keep the timelines below so that we can ensure our project doesn't get impacted.

CEQA Process

- Planning Commission 3/6/24
- City Council Meeting 3/26/24
- City Council Meeting 4/8/24 – Second reading and adoptions are fully approved.
- Resolutions available to submit to LAFCO for the application 3/28/24
- City to submit LAFco application on 3/29/24. OMP is preparing all of the documents and exhibits for the City.
- LAFco meeting end of April (This depends on whether PG&E and Cal Trans consents to the LAFCO application). To date, PG&E and Caltrans have not provided their consent letters.
- Final Map goes to City Council for approval in June. Need final map to be approved before we can pull a building permit.

Plan Approvals/Construction Docs

- Received 1st plan check comments from City of Livermore two weeks back.
- After Planning Commission approval, OMP will select fire sprinkler contractor for design build

as well as electrical contractor to order the switch gear (40-50 week lead time).

- OMP re-submits on-site and offsite plans by 3/26/24
- 2nd plan check comments received by City 4/26/24
- OMP submits final plan check comments 5/8/24
- City issues grading permit 6/15/24- After appeal of LAFCO period expires. Grading will take 30 days.
- City issues building permit in July.

Please don't hesitate to reach out if you have any questions. Tim and I will be happy to come and meet with your team next week or based on your availability. We appreciate your help and support of this project for Lam.

Thanks
Ajay Changaran

Ashley and Planning commission,

I have been a commercial real estate broker in Livermore for over 35 years and an owner of commercial real estate Industrial buildings and retail buildings in Livermore. I am in favor of OMP Oaks Business Park SMP 39 & 40 which will hopefully have Lam Research as their tenant in a 471,496 SF building. A lot of my Advanced Manufacturing clients that are located in Livermore have business relationships with Lam Research like FM Industries (Owner of two buildings and have over 150 employees) and Teco Technology (Owner of one building) .

Appreciate your support and please reach out to me if you have any questions.

Dear Ashley,

I am writing you tonight to ask for your support of the OMP Oaks Business Park projects at SMP, 39 and 40. I have been a broker for the past 35 years working in the East Bay and specifically the City of Livermore. Over the last 25 years, I have represented Lam Research. Lam purchased the KLA Tencor facility at 1 and 101 Portola Ave(2005) for their growth out of Silicon Valley. Building One at Oaks Business Park will again support their growth for current manufacturing operations and other facilities throughout the United States. Lam's search for a facility was both in and out of the Bay Area and if Building One at Oaks Businees Park was not available Lam would have had to potentially relocate all the existing and new jobs outside of Livermore.

As a broker, growth of the existing Industrial Base of Product is imperative for Companies planning to locate in any Market and especially in Livermore which provide such a diverse City for new employees.

Once completed both SMP 39 and 40 will add nearly 1.5 million ft. of warehouse distribution office light industrial and advanced manufacturing buildings to the market. This was instrumental in the decision for Lam Research to expand in Livermore.

The project is also providing a contribution for access of $750,000 for the Arroyo, Mucho Trail connection and $100,000 over two years towards the Marketing and Branding for the City of Livermore and working in collaboration of the office of innovation and economic development to promote advanced manufacturing in high job generating employment.

Again, I asked that you support this project and recommend moving forward with the City Council. Thank you.

Chris

Re: Public Comment on SMP-39 and SMP-40 Project
Planning Commission Meeting March 5, 2024

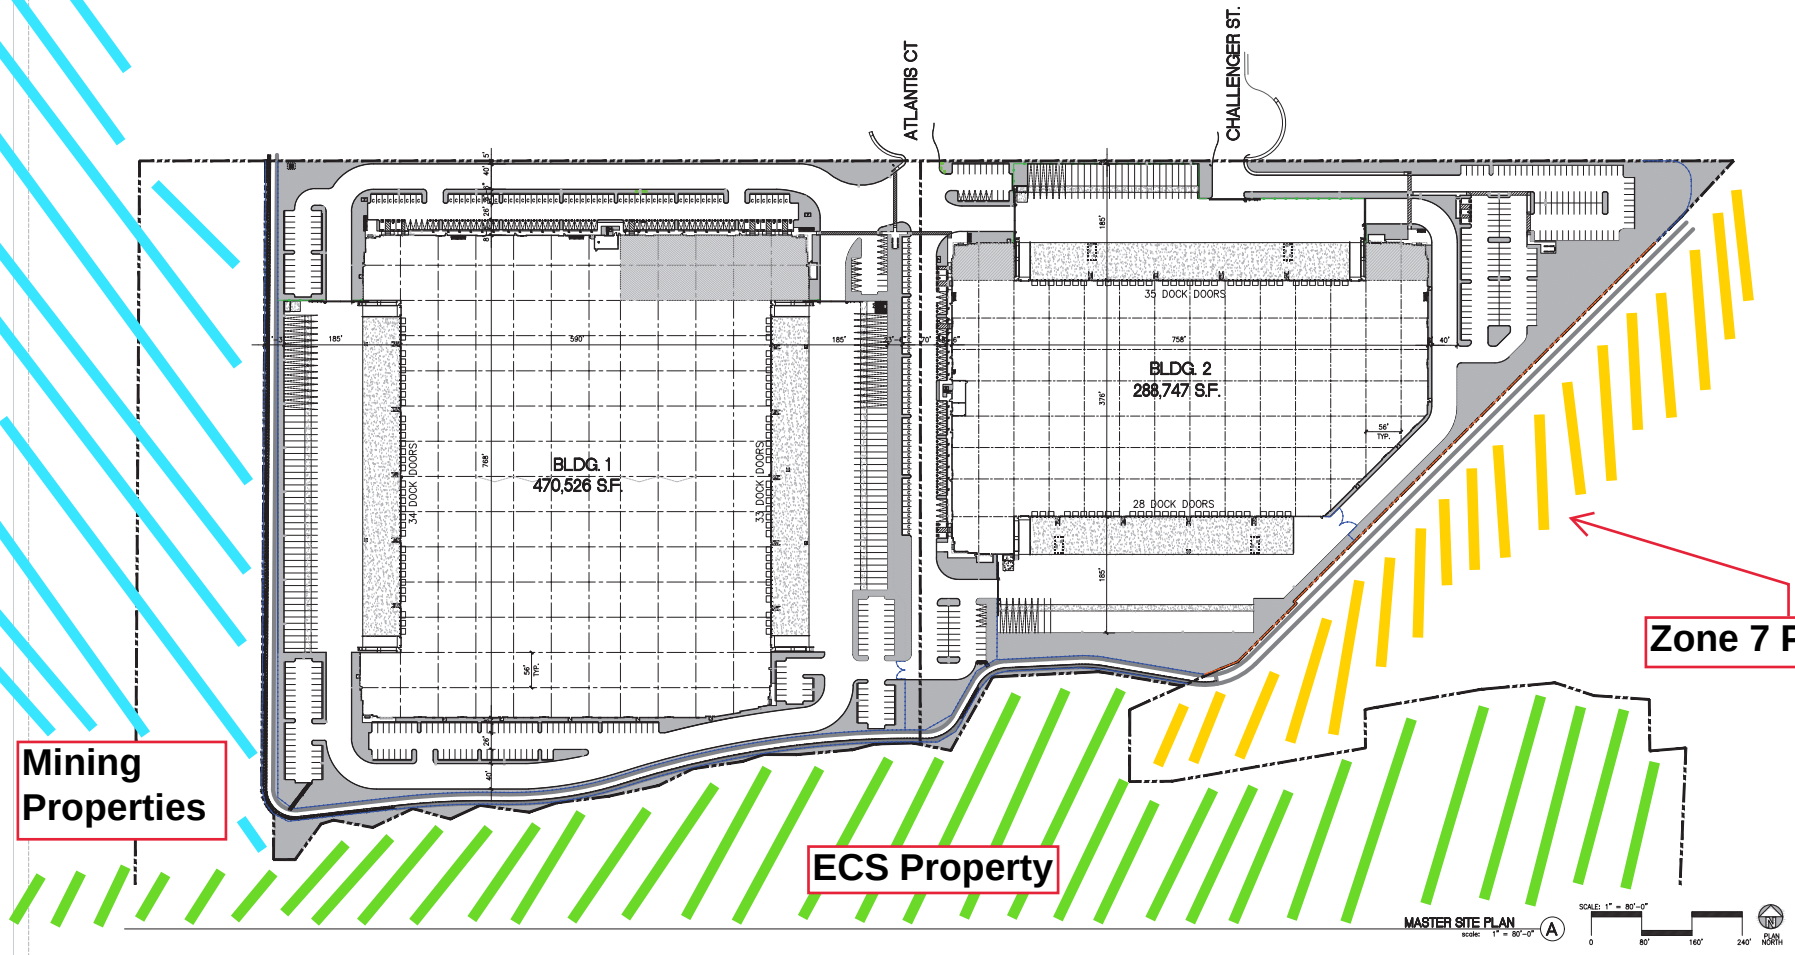
Planning Commission of the City of Livermore:

We represent El Charro Spur LLC, which owns the approximately 69-acre parcel ("**ECS Property**") directly south of and abutting the SMP-40 property, which is the subject of the proposed SMP-39 and SMP-40 project before the Planning Commission on March 5, 2024. On behalf of El Charro Spur LLC, we submit this public comment regarding the SMP-39/SMP-40 project. As explained in more detail below, the SMP-39/SMP-40 project proposes in part to construct a public trail along the Arroyo Mocho that will create a significant health and safety hazard that was not acknowledged or studied in the project's Environmental Impact Report (SCH# 2023010091) ("**EIR**") nor addressed in the project's conditions of approval.

Enclosed with this letter is a copy of Exhibit C to the proposed Development Agreement for SMP-40, which we have annotated for illustrative purposes. Exhibit C depicts that the SMP-39/SMP-40 project will include construction of a public trail running along the southern and western property lines of the SMP-40 property. This proposed public trail on the SMP-40 property proposes to continue at the southeast corner of the SMP-40 property onto the Alameda County Flood Control and Water Conservation District (Zone 7) property abutting the SMP-40 property's eastern property line, proceeding northeasterly, along the course of Zone 7's present maintenance road, which is not currently accessible to the public. Evidently, the proposal entails opening the Zone 7 maintenance road for the public's use as a trail. The proposed public trail would follow the course of the Arroyo Mocho, which passes through the Zone 7 property and along the northern edge of the ECS Property.

Exhibit C indicates that a chain link fence will be constructed along the northern and southern edges of the trail segment on the SMP-40 property. When the trail reaches the Zone 7 property, the northerly fence will connect to an existing Zone 7 fence that lies north of the

maintenance road. However, Exhibit C shows that the southerly fence will simply end at the Zone 7 property. This means that, if the path is constructed as shown in Exhibit C, members of the public using the trail would be able to simply leave the Zone 7 portion of the proposed path and enter the Arroyo Mocho which is immediately adjacent south of the path, without restriction. This in turn would permit members of the public to head west through the Arroyo Mocho onto El Charro Spur's private property without restriction, and further west, access the active mining operations of Vulcan Materials on the properties north and west of the ECS Property. The public cannot currently access these areas because the Zone 7 property, and maintenance road, are fenced off. The annotations on Exhibit C that we have added are intended to show the locations of the ECS Property, Zone 7 property, and mining properties.



Providing the public unfettered direct access to the Arroyo Mocho, private property and an active mining operation, both in the dry months and in the rainy season when it regularly carries high water volumes, are health and safety hazards that must be considered as part of the SMP-39/SMP-40 project. However, the EIR does not address the fact that the proposed trail may be creating this dangerous public safety hazard. The EIR discusses the potential routes for the trail (see, e.g., EIR p. 3-22), but it does not analyze the risk posed by providing public access to the Arroyo Mocho and mining properties to the west nor what safety features the trail would have, such as fencing, to protect members of the public using it. The SMP-40 Development Agreement and the SMP-39/SMP-40 project conditions of approval also do not address how this safety issue will be mitigated. At minimum, the conditions of approval should require the project applicant to work with Zone 7 to ensure that a fence is constructed on the Zone 7 property south of the trail so that the fence south of the path on the SMP-40 property can connect to it. The ECS Property owner and the owner of the mining properties cannot themselves block access to their properties from the proposed public path because they cannot construct obstructions within the Arroyo Mocho. That is why public access must be contained continuously along the path on the Zone 7 property.

We ask that the Planning Commission consider the safety issues raised by this letter when evaluating the SMP-39/SMP-40 project and recommend appropriate conditions and mitigation measures to address them.

Regards,

Margaret R. Akerblom

Revision:

Sheet: A1.0

From: Karl Anderson
To: Ashley Vera; Planning Web Email
Subject: OMP Oaks business Park projects at S&P, 39 and 40
Date: Tuesday, March 5, 2024 11:24:34 AM

You don't often get email from karl.anderson@tecotechnology.com. Learn why this is important

Exercise Caution: This message is from outside the City email system. Do not open links or attachments from untrusted sources.

As a local small business owner, I am writing this email in support of OMP Oaks business Park projects at S&P, 39 and 40. TECO Technology moved to our 6500 National Drive location in Livermore just over 2 years ago and as a current Lam Research supplier, we would like for this project to go forward as it provides convenient logistical proximity to this global manufacturing entity. With the trend in high technology manufacturing going the way of global outsourcing, it is important to keep companies like Lam local so small businesses like TECO can continue to grow and expand.

Thank you in advance for your consideration.

Cordially,
Karl Anderson
President
TECO Technology

PRE-ANNEXATION AND DEVELOPMENT AGREEMENT

BY AND BETWEEN

THE CITY OF LIVERMORE

AND

LIVERMORE INDUSTRIAL PARTNERS 39, LLC; AND SMP-39, LLC

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

PRE-ANNEXATION AND DEVELOPMENT AGREEMENT (DA 21-001)
[SURFACE MINING PERMIT (SMP) 39/40 PROJECT – SMP 39 PROPERTY]

This Pre-annexation and Development Agreement ("Agreement") is entered into on _____, 2024 between the City of Livermore, a municipal corporation ("City"), Livermore Industrial Partners 39, LLC ("Developer") and SMP-39, LLC ("Seller"). The City, Developer, and Seller are sometimes referred to below each individually as a "Party" and collectively as the "Parties."

RECITALS

This Agreement is based on the following facts:

A. The City has the authority to enter into a development agreement under Government Code section 65864 *et seq.* ("Development Agreement Statutes") and Chapter 9.04 of the Livermore Development Code to vest certain rights to the Developer and to meet certain public purposes of the local government.

B. Seller owns approximately +/- 51.9 acres located on Jack London Boulevard, west of Oaks Business Park and south of Livermore Municipal Airport (commonly referred to as "SMP 39" or, for purposes of this Agreement, "SMP 39 Property"), which is the subject of this Agreement. SMP-40, LLC, an affiliate of Seller owns approximately +/- 41 acres (commonly referred to as "SMP 40". The aforementioned SMP numbers reference the Surface Mining Permit (SMP) numbers applicable to each site. The Surface Mining Permits for each of the sites were approved by Alameda County in 2004 to allow for the extraction of sand and gravel (i.e., aggregate) within the sites; however, aggregate mining has not occurred within either of the sites.

C. Four additional parcels that total approximately +/- 12.9 acres are located east of SMP 40 and are included in the overall project area (as set forth in more detail in Recital F and referred to as the "Additional Annexation Only Parcels"). The City has chosen to include the parcels in the proposed annexation area for purposes of efficiency and to create logical boundaries.

D. Seller owns certain real property consisting of one parcel (Assessor Parcel Number (APN) 904-0003-001-04) and is situated in Alameda County, within the City of Pleasanton's Sphere of Influence ("SOI") and the City of Livermore's South Livermore Urban Growth Boundary ("UGB"). The SMP 39 Property is zoned Agricultural by Alameda County and has a County General Plan designation of Industrial. SMP 39 has a City of Livermore General Plan designation of Open Space/Sand and Gravel. The Developer is required to change the SOI for SMP 39 from the City of Pleasanton to the City of Livermore and to annex SMP 39 into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

The SMP 39 Property is described more specifically in the attached **Exhibit A**. The SMP 39 Property does not include property located within SMP 40 or the Additional Annexation Only Parcels, as described in Recitals D (above) and F (below). Development of the SMP 39 Property is described in Recitals G and H, below, and set forth in more detail in **Exhibit B** (SMP 39 Development Description) and **Exhibit C** (Conceptual Site Plan for the SMP 39 Property). Developer is in contract to purchase SMP 39 Property from Seller, and under that contract has the primary rights and obligations regarding application for and funding the Entitlements, described below in Recital I, for the SMP 39 Property as set forth in this Agreement. Developer is required to annex the SMP 39 Property into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

E. SMP-40 LLC, an affiliate of Seller, owns certain real property consisting of one parcel (APN 904-0010-002-02) and is generally located south of Oaks Business Park, at the south end of Atlantis Street and Challenger Street ("SMP 40" or "SMP 40 Property"). It is situated in Alameda County and is within the City of Livermore's SOI and the City of Livermore's South Livermore UGB. SMP 40 is zoned Agricultural by Alameda County with a County General Plan designation of Industrial. SMP 40 has a City of Livermore General Plan designation of Open Space/Sand and Gravel.

F. Four additional parcels (APNs 904-0010-002-03, -5, -7, and -8) are within unincorporated Alameda County, the City of Livermore SOI, and the City of Livermore South Livermore UGB ("Additional Annexation Only Parcels"). APN 904-0010-002-03 is an approximately 0.20-acre parcel owned by the Pacific Gas and Electric Company (PG&E) and is developed with existing PG&E infrastructure. APN 904-0010-002-05 is an approximately 5.76-acre parcel owned by the Zone 7 Water Agency and serves as a flood control channel. APN 904-0010-002-07 is an approximately 1.57-acre parcel owned by the California Department of Transportation (Caltrans) and is currently undeveloped. APN 904-0010-002-08 is an approximately 5.46-acre parcel owned by the City of Livermore and is currently undeveloped with scattered trees throughout the parcel. The City of Livermore General Plan designates the Additional Annexation Only Parcels as Open Space/Sand and Gravel. The Additional Annexation Only Parcels are also within the East County Area Plan of the Alameda County General Plan, which designates the parcels as Industrial. The parcels are zoned Agriculture by Alameda County. The Developer is required to annex the Additional Annexation Only Parcels into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

G. Due to their interrelated nature, activities involving SMP 39, SMP 40, and the Additional Annexation Only Parcels (together, the "SMP 39/SMP 40 Project") are considered in a single Environmental Impact Report ("EIR") (SCH #2023010091) for purposes of the City's environmental review under the California Environmental Quality Act ("CEQA"). The SMP 39/SMP 40 Project evaluated in the EIR includes a SOI amendment for SMP 39 and a General Plan Amendment, Pre-zoning and Annexation, Zoning Map Amendment/ Planned Development, Vesting Tentative Subdivision Maps, Pre-Annexation Agreements, and Development Agreements for SMP 39 and SMP 40. A Site Plan Design Review entitlement is also included for SMP 40. The SMP 39/SMP 40 Project evaluated in the EIR also includes annexation of the Additional Annexation Only Parcels.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

H. SMP 39 and SMP 40 shall be developed with light industrial development uses consistent with the City's *Low-Intensity Industrial* General Plan designation, including research and development, professional and administrative offices, experimental and testing laboratories, manufacturing of electronic and other high-end complex products, a limited amount of warehouse and distribution, and similar uses as stated in PD-I 22-001, the zoning for the property (**Exhibit D**). The SMP 39/SMP 40 Project includes (i) on SMP 39, approximately six light industrial buildings consisting of up to 755,500 square feet (sf) of development and, (ii) on SMP 40, two light industrial buildings consisting of up to 759,275 sf of development. **Exhibit C** shows the conceptual site plan for the SMP 39 Development. Developer and City intend that separate Pre-annexation and Development Agreements will be entered into for SMP 39 and SMP 40, respectively, in order to segregate the rights and obligations related to each property. This Agreement, as reflected herein, addresses the SMP 39 Property and no other property.

I. The Developer has applied for the following entitlements ("Entitlements") for the SMP 39 Property from the City of Livermore as required under the Livermore Development Code, to be vested in accordance with this Agreement pending a SOI change and annexation of the SMP 39 Property into the City of Livermore:

- General Plan Amendment (GPA 21-001) to change the City of Livermore designation of SMP 39 and SMP 40 from *Open Space/Sand and Gravel* (OSP/S&G) to *Low-Intensity Industrial* (LII) and to change the City of Livermore designation of the Additional Annexation Only Parcels from *Open Space/Sand and Gravel* (OSP/S&G) to *Parks, Trailways, Recreation Areas* (OSP) (the "General Plan Amendment" or "GPA");

- Pre-zoning of SMP 39 and SMP 40 (DCA 21-005, ZMA 21-002 and PD-I 22-001) by (i) amending the City's zoning map to rezone SMP 39 and SMP 40 to the *Planned Development - Industrial* (PD-I) 22-001 zoning district, which includes the "Planned Development Standards" described more fully in attached **Exhibit D**; and (ii) pre-zoning the Additional Annexation Only Parcels to *Open Space Flood Plain* (the "Prezoning"). The Prezoning shall become effective with respect to SMP 39, SMP 40, and the Additional Annexation Only Parcels upon their annexation to the City in accordance with California Government Code section 65859;

- SOI Amendment and Annexation (APZ 21-003) authorizing submittal of an application to the Alameda County Local Agency Formation Commission ("LAFCo") to (i) include SMP 39 within the City of Livermore's SOI (and remove SMP 39 from the City of Pleasanton's SOI); and (ii) annex SMP 39, SMP 40, and the Additional Annexation Only Parcels from Alameda County into the City;

- Vesting Tentative Tract Map 8656 (SUB 21-008) authorizing the creation of six development parcels for the SMP 39 Property, (the "Tentative Map"); and

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

- This Pre-annexation and Development Agreement (DA 21-001) to vest certain rights to the Developer and to provide specific public benefits that meet certain public purposes of the local government.

In addition to the above listed Entitlements, an EIR (SCH #2023010091) for the SMP 39/SMP 40 Project has been prepared in accordance with CEQA to evaluate potential impacts to the environment of the SMP 39/SMP 40 Project, including the Entitlements.

J. The City Council finds that the SMP 39/SMP 40 Project is in the public interest; will establish land uses compatible with the physical nature of the SMP 39 Property and the surrounding area; will generate light industrial development and activity to meet local and regional goals; and will provide certain substantial public benefits and help attain certain other public objectives including, without limitation: (i) including construction of and a $750,000 financial contribution toward off-site trail improvements, creating connections to the City's existing trail networks as identified in the *Active Transportation Plan* ("ATP"); and (ii) a commitment to the funding of $100,000, payable over a two-year term in increments of $50,000 per year, to facilitate uses that support an innovation-driven economy, generate high wage jobs, or generate substantial sales tax revenues as determined by the Director of Innovation and Economic Development. Items (i) through (ii) above, and as described more fully in Section 4, are collectively referred to as the "Public Benefits").

K. This Agreement will promote and encourage the SMP 39 Development by providing the Developer and its creditors with a greater degree of certainty of the Developer's ability to expeditiously and economically complete the development effort for the SMP 39 Property, and the Parties agree that the consideration to be received by the City pursuant to this Agreement and the rights secured to the Developer hereunder constitute sufficient consideration to support the covenants and agreements of the City and the Developer. By entering into this Agreement, the City desires to allow the Developer to design, apply for, and if approved to develop the SMP 39 Property pursuant to this Agreement, the land use ordinances, rules, regulations, and policies applicable on the "Effective Date," as defined in Section 2, and to vest in Developer, upon annexation, to the fullest extent possible under the law, development entitlements in order to complete the SMP 39 Development, consistent with Section 5(c) of this Agreement.

L. The SMP 39 Development has been extensively reviewed and considered by the City and its officers, agencies, and departments. The proposed uses have been found to accommodate the City's recommendations and suggestions in order to protect the public's interest and to enhance the desirability, from the public's perspective, of the SMP 39 Development.

M. The City conducted duly noticed public hearings on this Agreement pursuant to Government Code section 65867 and Livermore Development Code sections 9.04.040 and 9.04.050 and found that the provisions of this Agreement and its purposes are consistent with the objectives, policies, general land uses, and programs specified in the City's General Plan and Livermore Development Code.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

N. This Agreement was adopted by ordinance of the City Council on _____, 2024 and approved upon a second reading on _____, 2024 after notice and public hearings before the Planning Commission and City Council, and after City Council certification of an EIR in accordance with CEQA, Public Resources Code section 21000 *et seq*.

NOW, THEREFORE, the City and Developer hereby agree that the aforementioned recitals are true and correct and incorporated by reference as fully set forth below, and further agree as follows:

1. The Property. The SMP 39 Property is described in **Exhibit A**, attached hereto. The SMP 39 Development includes six light industrial buildings consisting of up to 755,500 sf of development. A comprehensive description of the SMP 39 Development is in attached **Exhibit B** (SMP 39 Development Description) and **Exhibit C** (Conceptual Site Plan for the SMP 39 Property). A future Site Plan Design Review land use entitlement will be required to be approved prior to the development of SMP 39.

2. Effective Date. The effective date of this Agreement (the "Effective Date") is the later of (a) thirty (30) days after the date the Ordinance approving this Agreement is adopted by the City Council and attested by the City Clerk, or (b) if a referendum petition is timely and duly circulated, filed and qualified by the Elections Official, the date the election results on the ballot measure by City voters approving this Agreement are certified by the City Council in the manner provided by the Elections Code. This Agreement shall be executed by the City within ten (10) days after the Effective Date and recorded as provided in Government Code Section 65868.5.

3. Term. The term of this Agreement is ten (10) years ("Term"), beginning on the date annexation proceedings for SMP 39, SMP 40, and the Additional Annexation Only Parcels are complete ("Annexation Date"). The Agreement may be extended as provided for in the Development Agreement Statutes and the Livermore Development Code, subject to the written consent of the City and Developer. The terms of the Entitlements shall be automatically extended such that the Entitlements remain in effect for any extended Term.

   Following the expiration of the Term, or the earlier completion of development of the SMP 39/SMP 40 Project and all of Developer's obligations in connection therewith, or the failure of SMP 39, SMP 40, or the Additional Annexation Only Parcels to be annexed into the City of Livermore in accordance with Section 5(g) of this Agreement, this Agreement shall be terminated and of no further force and effect, subject, however to the provisions of Section 10 and Section 16.

4. Developer Obligations; Schedule of Performance. The Developer shall comply with the requirements set forth in the Schedule of Performance and tasks listed below. The Schedule of Performance is subject to revision from time-to-time as mutually agreed upon in writing between the City and the Developer, which shall be accomplished through a separate document and without the need to amend this Agreement. The City Manager shall have the authority to approve on behalf of the City any revision to a date in the Schedule of Performance that he or she deems appropriate, provided that the

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

revision extends the performance deadline for a time period no longer than one year. Developer shall comply with the following Schedule of Performance:

a. Developer shall initiate and pay all costs associated with timely applications for the SOI amendment for SMP 39 and the annexation for SMP 39, SMP 40, and the Additional Annexation Only Parcels, which shall be reviewed by the appropriate decision-making bodies for each parcel, which may include the City of Pleasanton, Livermore City Council and Alameda County LAFCo.

b. The SMP 39 Development includes installation of an Emergency Vehicle Access and Storm Drain main on City owned land subject to FAA regulations and requirements. The use of the City owned land shall be subject to additional requirements including but not limited to FAA approval, Consistency Determination, compensation for use of City land, appraisals, and additional mapping. All actions necessary for the project's use of City owned land shall be processed prior to the filing of the Final Map for SMP 39.

c. Developer shall pay a $100,000 cash contribution to the City of Livermore Office of Innovation and Economic Development Department for marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    i. Prior to issuance of the first building permit for the SMP 40 Property, the Developer shall pay an initial $50,000 cash contribution to the City of Livermore Office of Innovation and Economic Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    ii. Developer shall pay a second $50,000 contribution to the City of Livermore Office of Innovation and Economic Development Department no later than one (1) year following the receipt of the initial $50,000 contribution, to be used toward further marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    iii. The SMP 40 Development Agreement contains the same contribution requirements in Section 4(b) of that agreement. For avoidance of doubt, there is a total $100,000 obligation between the two Development Agreements and a payment under one Development Agreement shall automatically satisfy this obligation under the other Development Agreement.

    iv. The Development Agreement for the SMP 40 property (DA 23-002) describes the Developers requirements related to the off-site trail improvements. In the event that the development of SMP 39 proceeds in advance of the development of SMP 40, the Developer is required to amend this Development Agreement and DA 23-002 prior to issuance of any building permit for SMP 39, in accordance with Livermore Development Code Chapter 9.04.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

5. Vested Development Rights. Subject to annexation into the City and the terms of this Agreement, SMP 39 Development shall vest in accordance with this Agreement, and the Developer has the right to develop and use the SMP 39 Property in accordance with:

    a. The City's General Plan and the Livermore Development Code in effect on the Effective Date and the Entitlements in effect on the Annexation Date;

    b. All other City policies, ordinances, resolutions, rules, regulations, and standards applicable to development or use of the SMP 39 Property on the Effective Date, except that Developer shall:

        (1) Pay the processing and development impact fees applicable City-wide that are in effect at the time the fees are paid. Payment for said fees shall be made prior to issuance of any building permits.

        (2) Comply with Building Code requirements in effect on a City-wide basis at time of Building permit submittal;

        (3) Comply with construction and technical design standards or specifications for public improvements that are applicable City-wide at time of Building permit submittal;

        (4) Comply with changes in City laws, regulations, plans, or policies applicable City-wide, the terms of which are found by the City Council, based on substantial evidence, to be necessary to protect members of the public from a condition dangerous to public health or safety;

        (5) Comply with a change in City law, regulations, plans, or policies that is:

            i. Specifically mandated by state or federal law, or by any regional governmental agency that has legal authority over the City under state law or a joint powers agreement; or

            ii. A result of or in response to state or federal law, or regional agency action, made necessary in order for the City to avoid losing or not receiving substantial funding or other substantial public benefits or facilities that would be available to the City only if it makes such a change; or

            iii. Specifically mandated by, or necessary for compliance with or implementation of, the terms of any permit, entitlement, or other authorization necessary for the development of the Property that is issued or granted to the City, County, and/or Developer by any federal, state or regional agency;

        (6) Following any subsequent environmental review, comply with required mitigation measures; and

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

d. In the event that Developer applies for any subsequent entitlements, including but not limited to a Site Plan Design Review for the SMP 39 Property, subsequent entitlements shall be subject to the City's ordinances, rules, regulations and policies in effect on the date of submittal of the subsequent entitlements.

e. If there is any inconsistency between this Development Agreement and a permit or entitlement issued for the SMP 39 Property, this Development Agreement shall control.

f. Developer acknowledges that execution of this Agreement by the City does not constitute approval of any required permits, applications, or allocations, and in no way limits the discretion of the City in the permit, allocation, and approval process in accordance with the limitations set forth herein.

g. Upon annexation of SMP 39 and 40, Developer agrees that all mining permits previously granted by Alameda County on the SMP 39 and SMP 40 properties shall be forfeited, and no mining operations shall occur on the SMP 39 Property or the SMP 40 Property. No later than 60 days from the date LAFCo approves annexation of the SMP 40 Property, subject to any extension granted by the City, Developer shall coordinate with Alameda County to complete any final actions required to remove the mining permits and all associated permissions related to mining operations from the SMP 39 and SMP 40 properties.

h. The Parties agree that the obligations set forth in this Agreement are conditioned upon the passing of a City Council Resolution authorizing submittal of an application to LAFCo for SOI and Annexation, the filing of an application with LAFCo to modify the SOI for SMP 39, annex SMP 39, SMP 40 and the Additional Annexation Only Parcels, requesting waiver of notice, hearing and protest from LAFCo, subject to LAFCo approval. Furthermore, the Parties also agree that the obligations set forth in this Agreement are conditioned upon the approved and finalized SOI modification and annexation of the SMP 39 and SMP 40 Properties and the Additional Annexation Only Parcels into the City of Livermore. Upon approval of the SMP 39/SMP 40 Project by the City, the City agrees to act in good faith, in collaboration with the Developer, to support and timely process the annexation application with LAFCo. The Developer shall be responsible for all costs associated with annexation, including but not limited to preparation of the LAFCo application, LAFCo application submittal fees, and any other City-related annexation fees. Annexation of SMP 39, SMP 40, and the Additional Annexation Only Parcels shall be completed no later than 18 months from the Effective Date of this Agreement, unless extended by written agreement of the Parties. If the annexation is not completed within this time period, subject to any agreed upon extension, the Agreement is null and void.

i. Developer shall not dispute or challenge the validity of the Pre-annexation and Development Agreement for SMP 40. Any legal challenge to the validity or enforceability of the Pre-annexation and Development Agreement for SMP 40 shall constitute a legal challenge to the Pre-annexation and Development Agreement for SMP 39 and the SMP 39/SMP 40 Project. In the event of a valid legal challenge, this

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Agreement shall be terminated after all appeals have been exhausted before a final court of judgment, or issuance of a final court order directed to the City to set aside, withdraw or abrogate the City's approval of this Agreement or the Pre-annexation and Development Agreement for SMP 40.

7. Periodic Review. Review of this Agreement shall be made annually, consistent with Government Code section 65865.1 and Livermore Development Code Chapter 9.04.

8. Amendments. The Agreement may be amended in writing by the Parties, by mutual agreement, consistent with the procedures set forth in the Development Agreement Statutes and the Livermore Development Code, as they are amended from time-to-time.

9. Force Majeure. The Term of this Agreement shall be extended by, and the performance by any Parties of their obligations hereunder (other than for payment of money) shall be excused during, any period of "Force Majeure" as hereinafter defined. "Force Majeure" means a delay caused by any labor disputes or strikes, labor or material shortages or embargoes, pandemic, fire, unusual delay in transportation, earthquakes, floods, tornadoes or extreme wind or other adverse weather conditions not reasonably foreseeable by Developer, or material adverse underground conditions not reasonably foreseeable by Developer.

10. Remedies for Default. If a Party is in default under this Agreement, another Party may pursue one or more of the following courses of action after providing 30 days' written notice to the purportedly defaulting Party (or such longer period as may be required to cure the default, so long as such Party commences the cure within such 30-day period and diligently pursues the cure to completion): (a) waive the default; (b) in the City's case, pursue administrative remedies, including denial or otherwise withholding issuance of building permits, certificates of occupancy, or other approvals; (c) pursue judicial remedies; or (d) terminate this Agreement. Any purported default by a Party hereunder shall be subject to, and tolled by, any event of Force Majeure that prevents such Party from performing the act necessary to avoid or cure such purported default. Any such tolling shall end at the termination of the event of Force Majeure.

11. Termination. This Agreement shall terminate upon the earlier of (i) expiration of the Term, or (ii) in the event that SMP 39, SMP 40, and the Additional Annexation Only Parcels are not annexed into the City in accordance with Section 5(g) of this Agreement (iii) when the SMP 39/SMP 40 Project has been completed and all of Developer's obligations have been fully satisfied as reasonably determined by the City, or (iv) after all appeals have been exhausted before a final court of judgment, or issuance of a final court order directed to the City to set aside, withdraw or abrogate the City's approval of this Agreement or any material part thereof, or the Pre-annexation and Development Agreement for SMP 39 or any material part thereof. Upon termination of this Agreement as to the SMP 39/SMP 40 Project, at the request of Developer, the City shall record a Notice of Termination for each affected parcel in a form satisfactory to the City Attorney in the Office of the Alameda County

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Recorder. In the event this Agreement is terminated, neither party shall have any further rights or obligations hereunder except for those obligations of Developer set forth in Section 12 (No Damages Relief) and Section 16 (Legal Action; Attorneys' Fees).

12. Mortgagee Protection.

i. This Agreement shall not prevent or limit Developer in any manner, at Developer's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust, or other security device securing financing with respect to the Property ("Mortgage"). This Agreement shall be superior and senior to any lien placed upon the Property or any portion thereof after the date of recording this Agreement, including the lien of any Mortgage. Notwithstanding the foregoing, no breach hereof shall defeat, render invalid, diminish, or impair the lien of any Mortgage made in good faith and for value, but all of the terms and conditions contained in this Agreement shall be binding upon and effective against and inure to the benefit of any person or entity, including any deed of trust beneficiary or mortgagee ("Mortgagee") who acquires title to the Property, or any portion thereof, by foreclosure, trustee's sale, deed in lieu of foreclosure, or otherwise.

ii. *Liability for Past Defaults*. Any Mortgagee, including the successful bidder at a foreclosure sale, who takes title and possession of the Property, or any portion thereof, pursuant to such foreclosure, shall take the Property, or portion thereof, subject to the provisions of this Agreement; provided, however, in no event shall such Mortgagee be liable for any defaults or monetary obligations of Developer arising prior to acquisition of title to the Property by such Mortgagee. Notwithstanding the preceding sentence, in no event shall any such Mortgagee or its successors or assigns be entitled to a building permit, final inspection, or occupancy certificate until all fees and other monetary obligations due under this Agreement have been paid to the City and any other existing defaults under this Agreement that are reasonably subject to cure are cured.

iii. *Notice of Default to Mortgagee; Right of Mortgagee to Cure*. If City receives a notice from a Mortgagee requesting a copy of any Notice of Default given to Developer hereunder and specifying the address for service thereof, then City shall deliver to such Mortgagee, concurrently with service thereon to Developer, any notice given to Developer with respect to any claim by City that Developer has committed a default. If the City makes a determination of noncompliance hereunder, City shall likewise serve notice of such noncompliance on such Mortgagee concurrently with service thereof on Developer. Each Mortgagee shall have the right (but not the obligation) during the same period available to Developer to cure or remedy, or to commence to cure or remedy, the event of default claimed or the areas of noncompliance set forth in City's notice.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

13. No Damages Relief. The Parties acknowledge that the City would not have entered into this Agreement were it exposed to damages claims from Developer for any breach thereof. As such, the Parties agree that in no event shall Developer be entitled to recover damages against City for breach of this Agreement. To the extent permitted by law, specific enforcement of this Agreement, including specific performance of Developer's payment obligations set forth in Sections 4(b) and 4(c), is the proper and desirable remedy.

14. Recordation: Binding Effect. This Agreement shall be recorded in the office of the Alameda County Recorder and shall be binding upon and inure to the benefit of any successors in interest to the Parties. The Parties acknowledge that, as of the date of preparing this Agreement, the Property is owned in fee by Seller and that Seller shall have all rights and obligations of "Developer" under this Agreement.

15. Release Upon Transfer. Upon the sale, transfer, or assignment, in whole or in part, of Developer's right and interest to all or any portion of the Property, Developer shall be released from its obligations hereunder with respect to the portion so conveyed, provided: (i) Developer (or transferee) was not in default of this Agreement at the time of conveyance, (ii) Developer provided to City prior written notice of such transfer, and (iii) with respect to sale or transfer of any lot that has not been fully improved, the transferee executes and delivers to City a written assumption agreement in which: (a) the name and address of the transferee is set forth, and (b) the transferee expressly assumes the obligations of Developer under this Agreement as to the portion of the Property conveyed. Failure to deliver a written assumption agreement hereunder shall not negate, modify, or otherwise affect the liability of any transferee pursuant to the provisions of this Agreement.

16. Timing of Development.

    a. Because the California Supreme Court held in *Pardee Construction Co. v. City of Camarillo*, 37 Cal.3d 465 (1984), that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over the parties' agreement, it is the Parties' intent to avoid that result by acknowledging, that unless provided for in this Agreement, Developer shall have the right (without obligation) to develop the Property in such order and at such rate and at such times as Developer deems appropriate within the exercise of its subjective business judgment, subject to the terms, requirements and conditions of the Entitlements and this Agreement.

    b. Developer will use its best efforts, in accordance with its own business judgment and taking into consideration market conditions and other economic factors influencing Developer's business decision, to commence or to continue development, and to develop the Project in a regular, progressive, and timely manner in accordance with the terms, requirements and conditions of the Entitlements and this Agreement.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

17. Legal Action; Attorneys' Fees. If the City chooses to defend any third party claim or suit challenging any action taken by the City with regard to this Agreement or any procedure or aspect of the City's approval of the development of the SMP 39 Development, including the environmental review process, the Developer in its capacity as either Developer or owner of the Property agrees to reimburse the City for the City's reasonable attorneys' fees, expert witness fees, and related costs as the City may incur in connection with its retention of outside counsel, and for any award of court costs or fees against the City. The City has the right to choose and retain such legal counsel as the City deems appropriate. After expenses reach $100,000, and each $100,000 thereafter, the Parties will confer to review the status of the litigation and their options for proceeding or settling, and they will negotiate in good faith about how the expenses will be allocated. The Developer, in its capacity as the Developer or owner of the Property, shall have no obligation to reimburse the City for costs incurred after the date on which the Developer or owner of the Property give the City written notice of their decision to settle a case, even if the City does not agree to the settlement. If legal action is brought by one of the Parties to enforce a provision of this Agreement, the prevailing party is entitled to reasonable attorneys' fees, expert witness fees, and court costs.

18. Notices. The address of each party for the purpose of all notices permitted or required by this Agreement is as follows:

To City:	City of Livermore 1052 South Livermore Avenue Livermore, CA 94550 Attention: Community Development Director and Ashley Vera, Senior Planner
With a copy to:	City Attorney City of Livermore 1052 South Livermore Avenue Livermore, CA 94550
To Developer:	Overton Moore Properties 19700 South Vermont Avenue, Suite 101 Torrance, CA 90502 Attention: Timur Tecimer

Three Embarcadero Center
12th Floor
San Francisco, CA 94111
Attention: Marshall Wallace

The written address of each Party set forth above may be changed by written notice given not less than five (5) days prior to the date such change is to be in effect. All notices under this Agreement shall be in writing, shall be properly addressed, and shall be sent by personal delivery, United States mail (registered, certified, or Express Mail, return receipt requested and postage prepaid), or by overnight courier delivery service. All such notices shall be considered delivered: (i) if personally delivered, on the date of delivery; (ii) if sent by United States mail in the manner prescribed above, on the date shown on the return receipt for acceptance or rejection; or (iii) if sent by overnight courier delivery service, on the date of delivery or attempted delivery as shown by the written delivery record of such service.

19. Severability; Choice of Law. If any term, provision, condition, or covenant of this Agreement, or the application thereof to any Party or circumstances, shall to any extent be held invalid or unenforceable, the remainder of the instrument, or the application of such term, provision, condition, or covenant, or the application of such term, provision, condition, or covenant to persons or circumstances other than those as to whom or which it is held invalid or unenforceable, shall not be affected thereby and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law. This Agreement shall be governed by the laws of the State of California.

20. Covenants Run with the Land. All of the terms, provisions, covenants, conditions, rights, powers, duties and obligations contained in this Agreement shall be binding upon the parties and their respective heirs, successors and assigns acquiring any portion of the Property and shall inure to the benefit of the parties and their respective heirs, successors and assigns.

21. No Third Party Beneficiaries. This Agreement is entered only for the benefit of the Parties executing this Agreement, their successors in interest. This Agreement is not for the benefit of any other individual, entity or person. Nothing herein shall be construed to create any right of any third party to enforce this Agreement or to seek any benefit therefrom.

22. Time Is of the Essence. Time is of the essence for each provision of this Agreement for which time is an element.

23. Certificate of Compliance. Any Party may, at any time, request that the City indicate in writing: (i) whether this Agreement is in full force and effect; (ii) whether this Agreement has been amended or modified, and if so amended, the nature of any such

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

amendments; or (iii) whether to the best of City's knowledge the requesting Party is in default in the performance of any of its obligations under this Agreement, and if in default, the nature of any such default. City shall endeavor in good faith to respond to any such request within thirty (30) days following the receipt thereof. The Parties shall be entitled to one certificate of compliance per year without any fee being assessed by the City. For any additional certificates of compliance requested in a single year, the City may charge the requesting party a reasonable fee related to the actual cost to prepare the certificate.

24. Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which constitute one and the same instrument.

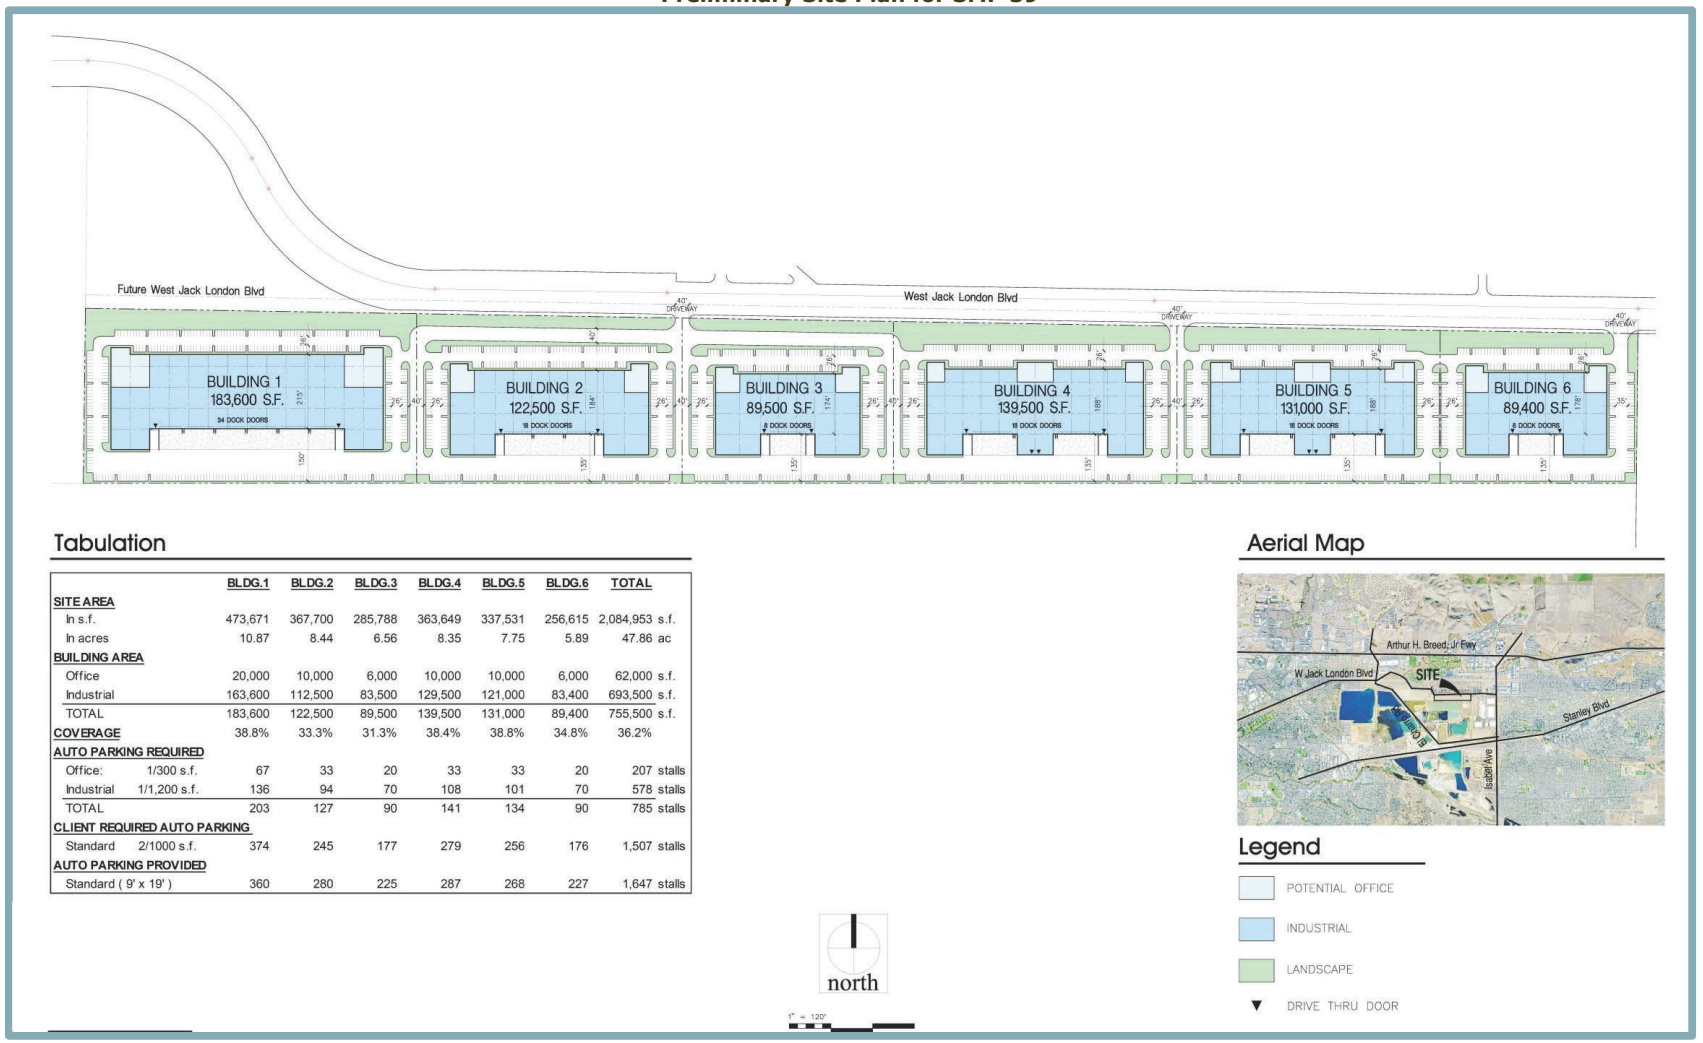
SMP 39 Development Description

Assessor Parcel Number 904-3-1-4 is also known as SMP 39 ("SMP 39 Property"). The aforementioned SMP number references the Surface Mining Permit (SMP) numbers applicable to the site. The Surface Mining Permit for the SMP 39 Property was approved by Alameda County in 2004 to allow for the extraction of sand and gravel (i.e., aggregate) within the site; however, aggregate mining has not occurred within the SMP 39 Property. The SMP 39 Property is approximately 51.9 acres and is located within unincorporated Alameda County, the City of Pleasanton (SOI), and the City of Livermore South Livermore Urban Growth Boundary (UGB). The Property is zoned Agricultural by Alameda County with a County General Plan designation of Industrial. The SMP 39 Property has a City of Livermore General Plan designation of Open Space/Sand and Gravel.

Surrounding existing uses include a paved shared-use path and the Livermore Municipal Airport to the north, the Oaks Business Park to the east; and the Arroyo Mocho Trail and single-family residences further east, across Isabel Avenue/SR 84; gravel quarries and industrial ponds associated with mining operations to the south and SMP 38, Arroyo Mocho and industrial ponds to the west.



Developer desires to construct six light industrial buildings on the SMP 39 Property totaling up to 755,500 square feet (sf) of new building area and associated internal roadways, parking, landscaping, utilities and other improvements ("SMP 39 Development").

The SMP 39 Development shall comply with the development requirements including land use, building and landscape setbacks, height, lot coverage, parking, and other required standards as set forth in the Planned Development-Industrial 22-001 (PD-I 22-001) zone. The loading docks would be located on the south side of each building, opposite from West Jack London Boulevard, accessible through a larger drive aisle along the southern portion of the site.

The SMP 39 Development shall include frontage improvements to and right-of-way dedication for the ultimate buildout of West Jack London Boulevard. Ultimate buildout of the roadway is anticipated to consist of four through lanes, including two 12-foot through lanes on each side, a 16-foot raised and landscaped median in the center of the roadway, as well as an eight-foot bike line on each side of the roadway, separated from the through lanes by a two-foot buffer. As part of the proposed frontage improvements, the SMP 39 Development shall include an at-grade, paved shared-use path within a 38.5-foot trail easement along the project frontage, consistent with the City's Active Transportation Plan (ATP), which shall provide a connection to the existing path along the western boundary of the Oaks Business Park and eventually to the Arroyo Mocho Trail. The proposed path would be similar to the existing path along the Oaks Business Park site.

PLANNED DEVELOPMENT STANDARDS SMP 39 & SMP 40

Planned Development – Industrial (PD-I) 22-001

Reviewed by Planning Commission: March 5, 2024
Approved by City Council: March 25, 2024

Purpose: The purpose of establishing this Planned Development-Industrial (PD-I 22-001) District (District) is to regulate the development of ± 51.9 acres of land located on Jack London Boulevard, west of Oaks Business Park and south of Livermore Municipal Airport (commonly referred to as "SMP 39") and ± 41 acres of land located south of Oaks Business Park, at the south end of Atlantis Street and Challenger Street (commonly referred to as "SMP 40"), as shown in the attached figure (Figure 1). The intent of this District is to accomplish the following:

1. PD-I 22-001 is intended to provide an environment exclusively for and conducive to the development and protection of modern professional and administrative facilities, research institutions, manufacturing operations, experimental and testing laboratory and related uses, any similar employment generating high-end industrial users, all of a non-nuisance type.
2. The District is intended to provide for an aesthetically attractive working environment with park- and/or campus-like grounds, attractive buildings, employee parking, and other amenities appropriate to a mix of office and industrial uses.
3. The District is intended to establish development standards and regulations consistent with the intent of the Low Intensity Industrial General Plan designation.
4. Any land use that utilizes hazardous materials shall be subject to the regulations of Section 6.02.040, Hazardous Materials, of the Livermore Development Code, as it exists now or is amended in the future.
5. Development shall be in conformance with the requirements of the Livermore Development Code as it exists now or is amended in the future, except as modified by the following regulations.
6. Development is subject to the Citywide Design Standards and Guidelines as they exist now or may be amended in the future unless otherwise modified by the following regulations.

A. Principal Permitted Uses:

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

The following are the principal permitted uses for SMP 39[1] and SMP 40:

1. Research and development facilities
2. Professional and administrative offices
3. Experimental and testing laboratories
4. Manufacture of electric and electronic circuits, instruments, and devices
5. Manufacture of pharmaceutical products or life science facility, not exceeding Biosafety Level 2[2]
6. Medical diagnostic and manufacturing facilities
7. Manufacturing and assembly of motor vehicle parts, including but not limited to dashboards, parts, component systems, electrical connectors, sensors, panels, airbags, seats, tires, windows etc. for all vehicles and similar equipment (e.g. automobiles, motorcycle, construction equipment, farm equipment, buses).
8. Similar uses as determined by the Community Development Director to be of the same general character as the listed uses.

Additional Permitted Uses for SMP 39 only:

1. Restaurants, except fast food

Additional Permitted Uses for SMP 40 only:

1. Warehousing and distribution facilities, dry or refrigerated
2. Warehousing and distribution facility – E-commerce/Third Party Logistics (3PL)
3. Manufacturing, assembly, processing, storage, or packaging of products from previously prepared materials such as, but not limited to, cloth, plastic, paper, leather, and precious or semi-precious metals or stones, <u>but not including the following</u>:
    A. Operations such as saw and planing mills, any manufacturing uses involving primary production of wood, metal, or chemical products from raw materials, and similar uses
    B. Vehicle dismantling yards, scrap and waste yards
    C. Manufacturing, processing, storing, or packaging chemicals, petroleum, heavy agricultural products or other hazardous materials.

[1] SMP 39 and SMP 40 are located with the Airport Influence Area and the Livermore Airport Protection Area. Per the Alameda County Airport Land Use Compatibility Plan, the majority of SMP 39 is located in Safety Zone 6, with a portion of the site located in Safey Zone 3. The principal permitted land uses are intended to be located in buildings that are only within the portion of SMP 39 that is located in Safety Zone 6.

[2] Per the Centers for Disease Control and Prevention, Biosafety Level 2 laboratories involve work that poses moderate hazards to laboratory workers and the environment. Biosafety Level 2 laboratories require safety protocols to contain microbes and biological agents.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

4. Sale of heavy equipment and construction related vehicles and equipment, including associated repair, service, and parts distribution facilities. Showrooms related to this use may be a conditionally permitted ancillary use.
5. Similar uses as determined by the Community Development Director to be of the same general character as the listed uses.

B. Conditional Uses for SMP 39 and 40:

1. Public and quasi-public uses.
2. Manufacture of pharmaceutical products or life science facility, not exceeding Biosafety Level 3[3]
3. Similar uses as determined by the Planning Commission to be of the same general character as the listed uses.

Conditional Uses for SMP 39 only:

1. Fast-food businesses, banks, personal services, or goods required for the convenience and support of occupants of uses in the surrounding district(s).
2. Warehouse and distribution facilities, including E-commerce/Third Party Logistics (3PL) uses, with the condition that these uses may only occupy up to 20 percent of the total buildable site area.
3. Sale of heavy equipment and construction related vehicles and equipment, including associated repair, service, and parts distribution facilities, provided they are manufactured and/or sold on-site. Showrooms related to this use may be a conditionally permitted ancillary use.
4. Similar uses as determined by the Planning Commission to be of the same general character as the listed uses.

C. Accessory Uses Permitted on SMP 39 and 40:

1. Signs subject to the requirements established by the Livermore Development Code, as well as the Citywide Design Standards and Guidelines, as it exists now or is amended in the future.
2. Accessory uses and buildings customarily appurtenant to a permitted use.
3. Living quarters determined by the Community Development Director to be necessary for surveillance purposes.
4. Fuel stations subject to the requirements of Section 6.03.160, Vehicle Services, of the Livermore Development Code, as it exists now or is amended in the future.

[3] Per the Centers for Disease Control and Prevention, laboratories designated Biosafety Level 3 involve work that poses a safety hazard greater than Biosafety Level 2 laboratories, defined above. Biosafety Level 3 laboratories require additional safety protocols beyond those required for Biosafety Level 2 laboratories to contain microbes and biological agents.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

D. Special Development Requirements for SMP 39 and 40:

1. Uses shall be designed and integrated into the site in a manner that maintains and is complementary to the corporate and professional character of the nearby Oaks Business Park.
2. Outdoor service and storage yards shall be screened from public view consistent with Livermore Development Code Section 6.03.100, Outdoor Storage, as it exists today or is amended in the future.
3. For SMP 40 only: Commercial/Industrial buildings shall be located a distance of at least 500 feet from Isabel Avenue.

E. Site Development Regulations for SMP 39 and 40:

The following minimum requirements shall be observed, except where increased for conditional uses:

1. Lot Area: Twenty thousand square feet
2. Lot Width: One hundred feet
3. Setbacks: Setback requirements are established below. Buildings shall not be permitted within required setbacks.

A. SMP 39

1) Front or Street Side: 40-feet on West Jack London Boulevard, and 30-feet on frontage roads and interior streets, except as required by subsection E.4. All required setbacks adjacent to streets shall be landscaped, except for driveways, sidewalks, and trails that are found to be necessary for the efficient use of the property. Where a building front is visible from the street, a minimum five-foot wide landscaped strip abutting the foundation shall be included, allowing for necessary entrances.
2) Rear and Side: None.

B. SMP 40

1) Front or Street Side: 500-feet from Isabel Avenue, and 30-feet on frontage roads and interior streets, except as required by subsection E.4. All required setbacks adjacent to streets shall be landscaped, except for driveways and sidewalks that are found to be necessary for the efficient use of the property. Where a building front is visible from the street, a minimum five-foot wide landscaped strip abutting the foundation shall be included, allowing for necessary entrances
2) Rear and Side: None, except for a 20-foot setback from the top of the Arroyo Mocho bank on SMP 40 which should be determined from a 2.5:1 slope projection from the toe of

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

channel/mining pit to the top, as required in the Environmental Impact Report for the project.

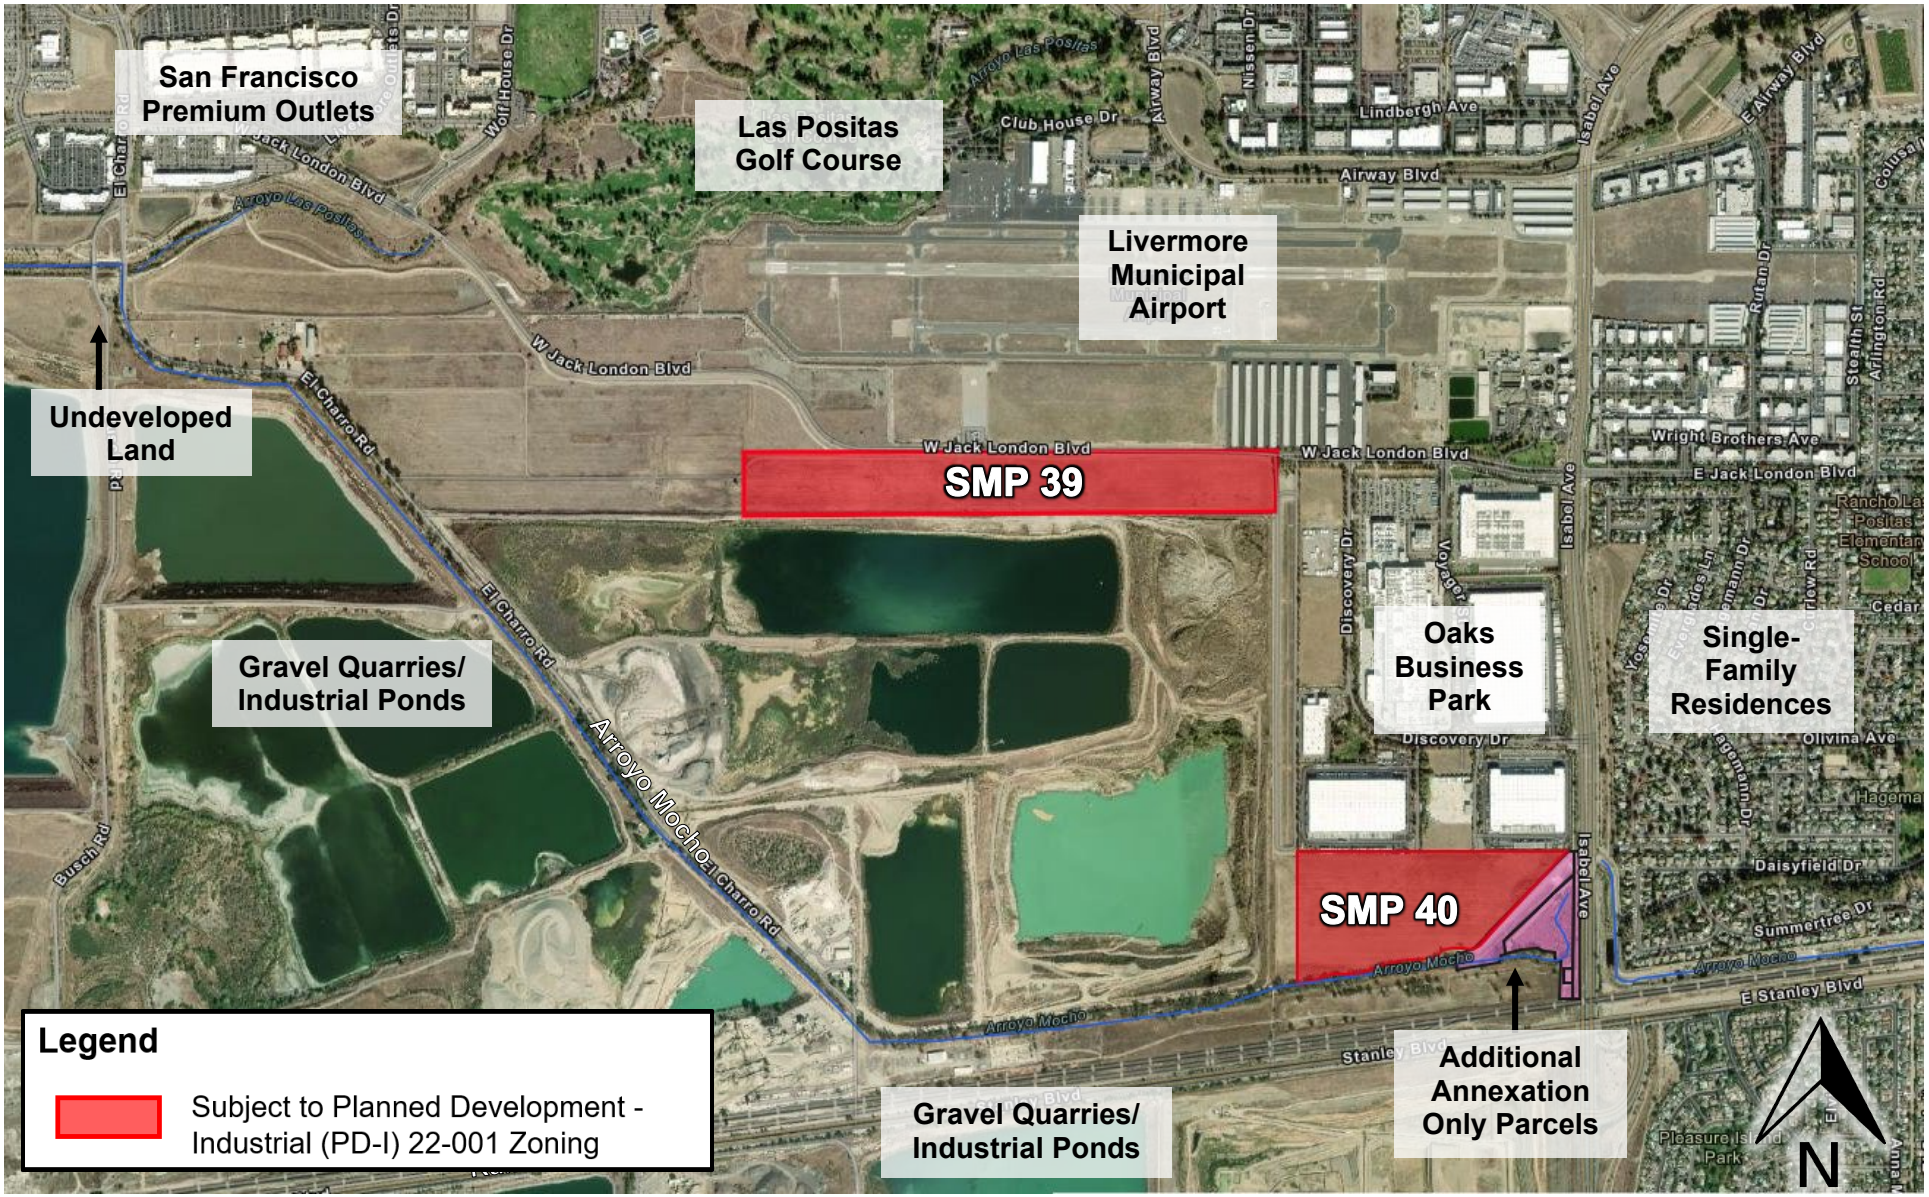
4. Height Regulations: The height of all on-site structures, including roof-top mechanical equipment, is limited to 50 feet or the height permitted by the Federal Aviation Administration (FAA) review under FAA regulations – Part 77, whichever is more restrictive. Upon providing a minimum 40-foot setback from street rights-of-way, a Conditional Use Permit may be requested to increase height to a maximum of 55 feet, or the height permitted under FAA regulations – Part 77, whichever is more restrictive. The height of pole-and building-mounted lights may be approved up to 28 feet by an administrative site plan and design review, if found necessary for the health and safety of a site designed for truck or other large vehicle maneuvering and documented by a light study to not cause glare off-site.
5. Lot Coverage: The building coverage maximum shall be 45 percent.

F. Signs

1. Industrial Uses. Signs for industrial uses shall be subject to the sign regulations contained in Livermore Development Code section 4.06.230 (sign standards for I-1, I-2 and I-3) and the Citywide Design Standards Guidelines as it exists now or is amended in the future.
2. Commercial Uses. Signs for commercial uses shall be subject to the sign regulations contained in Livermore Development Code section 4.06.170 (sign standards for CNB) and the Citywide Design Standards Guidelines as it exists now or is amended in the future.

G. Other Required Standards for SMP 39 and 40:

1. Noise. No use shall be permitted which creates an ambient noise level greater than 75 decibels (dBA) beyond the boundaries of the site, nor greater than 60 decibels at the boundary of a Residential District.
   A. On SMP 39, semi-truck access to the site (arrivals and departures) shall be limited to 96 trips between the hours of 10:00 PM and 7:00 AM.
   B. On SMP 40, semi-truck access to the site (arrivals and departures) shall be limited to 40 trips between the hours of 10:00 PM and 7:00 AM
   C. Between the hours of 10:00 PM and 7:00 AM single-event noise levels (e.g., backup alarm, truck brakes, etc.) shall not exceed 55 dBA, measured at the property line of the nearest residential use.
2. Air Pollution. All uses shall comply with regulations of the San Francisco Bay Area Air Pollution Control District.
3. Vibration, Heat, Glare, Electrical Disturbance. No use shall be permitted which creates noise, odors, vibrations, heat, glare, or electrical disturbances beyond the



DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

boundaries of the site. Lighting used to illuminate buildings, structures, uses, or parking and loading areas shall not be directed toward any public right-of-way.

4. Fire, Explosion. All uses shall provide adequate safety devices and adequate firefighting and fire suppression equipment to protect against fire, explosion, and other hazards.
5. Solid and Liquid Wastes. No solid or liquid waste discharges, other than permitted discharges into a public sewage disposal system, shall be permitted. The chemical composition and volume of industrial effluent discharged shall be subject to the wastewater permit requirements established by LMC Title 13, Division II. (Ord. 442 § 14.80).

PRE-ANNEXATION AND DEVELOPMENT AGREEMENT

BY AND BETWEEN

THE CITY OF LIVERMORE

AND

LIVERMORE INDUSTRIAL PARTNERS 40, LLC; AND SMP-40, LLC

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

PRE-ANNEXATION AND DEVELOPMENT AGREEMENT (DA 23-002)
[SURFACE MINING PERMIT (SMP) 39/40 PROJECT – SMP 40 PROPERTY]

This Pre-annexation and Development Agreement ("Agreement") is entered into on _____, 2024 between the City of Livermore, a municipal corporation ("City"), Livermore Industrial Partners 40, LLC ("Developer") and SMP-40, LLC ("Seller"). The City, Developer, and Seller are sometimes referred to below each individually as a "Party" and collectively as the "Parties."

RECITALS

This Agreement is based on the following facts:

A. The City has the authority to enter into a development agreement under Government Code section 65864 *et seq.* ("Development Agreement Statutes") and Chapter 9.04 of the Livermore Development Code to vest certain rights to the Developer and to meet certain public purposes of the local government.

B. SMP-39, LLC, an affiliate of Seller, owns approximately +/- 51.9 acres located on Jack London Boulevard, west of Oaks Business Park and south of Livermore Municipal Airport (commonly referred to as "SMP 39"). Seller owns approximately +/- 41 acres (commonly referred to as "SMP 40" or, for purposes of this Agreement, "SMP 40 Property"), which is the subject of this Agreement. The aforementioned SMP numbers reference the Surface Mining Permit (SMP) numbers applicable to each site. The Surface Mining Permits for each of the sites were approved by Alameda County in 2004 to allow for the extraction of sand and gravel (i.e., aggregate) within the sites; however, aggregate mining has not occurred within either of the sites.

C. Four additional parcels that total approximately +/- 12.9 acres are located east of SMP 40 and are included in the overall project area (as set forth in more detail in Recital F and referred to as the "Additional Annexation Only Parcels"). The City has chosen to include the parcels in the proposed annexation area for purposes of efficiency and to create logical boundaries.

D. The SMP 40 Property consists of one parcel Assessor Parcel Number (APN) 904-0010-002-02 and is generally located south of Oaks Business Park, at the south end of Atlantis Street and Challenger Street. It is situated in Alameda County and is within the City of Livermore's Sphere of Influence ("SOI") and the City of Livermore's South Livermore Urban Growth Boundary ("UGB"). The SMP 40 Property is zoned Agricultural by Alameda County with a County General Plan designation of Industrial. The SMP 40 Property has a City of Livermore General Plan designation of Open Space/Sand and Gravel.

The SMP 40 Property is described more specifically in the attached **Exhibit A**. The SMP 40 Property does not include property located within SMP 39 or the Additional Annexation Only

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Parcels, as described in Recitals E and F below. Development of the SMP 40 Property is described in Recitals G and H, below, and set forth in more detail in **Exhibit B** (SMP 40 Development Description) and **Exhibit C** (Site Plan for the SMP 40 Property). Developer is in contract to purchase SMP 40 Property from Seller, and under that contract has the primary rights and obligations regarding application for and funding the Entitlements, described below in Recital I, for the SMP 40 Property as set forth in this Agreement. Developer is required to annex the SMP 40 Property into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

E. SMP-39, LLC, an affiliate of Seller, owns certain real property consisting of one parcel (APN 904-0003-001-04) and is situated in Alameda County, within the City of Pleasanton's SOI and the City of Livermore's South Livermore UGB ("SMP 39"). SMP 39 is zoned Agricultural by Alameda County and has a County General Plan designation of Industrial. SMP 39 has a City of Livermore General Plan designation of Open Space/Sand and Gravel. The Developer is required to change the SOI for SMP 39 from the City of Pleasanton to the City of Livermore and to annex SMP 39 into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

F. Four additional parcels (APNs 904-0010-002-03, -5, -7, and -8) located immediately east of SMP 40 are within unincorporated Alameda County, the City of Livermore SOI, and the City of Livermore South Livermore UGB ("Additional Annexation Only Parcels"). APN 904-0010-002-03 is an approximately 0.20-acre parcel owned by the Pacific Gas and Electric Company (PG&E) and is developed with existing PG&E infrastructure. APN 904-0010-002-05 is an approximately 5.76-acre parcel owned by the Zone 7 Water Agency and serves as a flood control channel. APN 904-0010-002-07 is an approximately 1.57-acre parcel owned by the California Department of Transportation (Caltrans) and is currently undeveloped. APN 904-0010-002-08 is an approximately 5.46-acre parcel owned by the City of Livermore and is currently undeveloped with scattered trees throughout the parcel. The City of Livermore General Plan designates the Additional Annexation Only Parcels as Open Space/Sand and Gravel. The Additional Annexation Only Parcels are also within the East County Area Plan of the Alameda County General Plan, which designates the parcels as Industrial. The parcels are zoned Agriculture by Alameda County. The Developer is required to annex the Additional Annexation Only Parcels into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

G. Due to their interrelated nature, activities involving SMP 39, SMP 40, and the Additional Annexation Only Parcels (together, the "SMP 39/SMP 40 Project") are considered in a single Environmental Impact Report ("EIR") (SCH #2023010091) for purposes of the City's environmental review under the California Environmental Quality Act ("CEQA"). The SMP 39/SMP 40 Project evaluated in the EIR includes a SOI amendment for SMP 39 and a General Plan Amendment, Pre-zoning and Annexation, Zoning Map Amendment/ Planned Development, Vesting Tentative Subdivision Maps, Pre-Annexation Agreements, and Development Agreements for SMP 39 and SMP 40. A Site Plan Design Review entitlement is also included for SMP 40. The SMP 39/SMP 40 Project evaluated in the EIR also includes annexation of the Additional Annexation Only Parcels.

H. SMP 39 and SMP 40 shall be developed with light industrial development uses consistent with the City's *Low-Intensity Industrial* General Plan designation, including research

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

and development, professional and administrative offices, experimental and testing laboratories, manufacturing of electronic and other high-end complex products, a limited amount of warehouse and distribution, and similar uses as stated in PD-I 22-001, the zoning for the property (**Exhibit D**). The SMP 39/SMP 40 Project includes (i) on SMP 39, approximately six light industrial buildings consisting of up to 755,500 square feet (sf) of development and, (ii) on SMP 40, two light industrial buildings consisting of up to 759,275 sf of development. **Exhibit C** shows the proposed site plan for the SMP 40 Development. Developer and City intend that separate Pre-annexation and Development Agreements will be entered into for SMP 39 and SMP 40, respectively, in order to segregate the rights and obligations related to each property. This Agreement, as reflected herein, addresses the SMP 40 Property and no other property.

I. The Developer has applied for the following entitlements ("Entitlements") for the SMP 40 Property from the City of Livermore as required under the Livermore Development Code, to be vested in accordance with this Agreement pending annexation of the SMP 40 Property into the City of Livermore:

- General Plan Amendment (GPA 21-001) to change the City of Livermore designation of SMP 39 and SMP 40 from *Open Space/Sand and Gravel* (OSP/S&G) to *Low-Intensity Industrial* (LII) and to change the City of Livermore designation of the Additional Annexation Only Parcels from *Open Space/Sand and Gravel* (OSP/S&G) to *Parks, Trailways, Recreation Areas* (OSP) (the "General Plan Amendment" or "GPA");

- Pre-zoning of SMP 39 and SMP 40 (DCA 21-005, ZMA 21-002 and PD-I 22-001) by (i) amending the City's zoning map to rezone SMP 39 and SMP 40 to the *Planned Development - Industrial* (PD-I) 22-001 zoning district, which includes the "Planned Development-Industrial 22-001 Zoning Standards" described more fully in attached **Exhibit D**; and (ii) pre-zoning the Additional Annexation Only Parcels to *Open Space Flood Plain* (the "Prezoning"). The Prezoning shall become effective with respect to SMP 39, SMP 40, and the Additional Annexation Only Parcels upon their annexation to the City in accordance with California Government Code section 65859;

- SOI Amendment and Annexation (APZ 21-003) authorizing submittal of an application to the Alameda County Local Agency Formation Commission ("LAFCo") to (i) include SMP 39 within the City of Livermore's SOI (and remove SMP 39 from the City of Pleasanton's SOI); and (ii) annex SMP 39, SMP 40, and the Additional Annexation Only Parcels from Alameda County into the City;

- Vesting Tentative Parcel Map 11219 (SUB 21-009) authorizing the creation of two development parcels for the SMP 40 Property, (the "Tentative Map");

- Site Plan Design Review (SPDR 21-008) certifying compliance with the "Applicable Rules" (meaning the rules, regulations, and official policies of the City, including but not limited to the City's General Plan and Livermore

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Development Code, as they existed on the Effective Date, except as otherwise amended by the approved Entitlements or this Agreement) and the Planned Development Standards with respect to the development proposed on the SMP 40 Property (the "SPDR Approval"); and

- This Pre-annexation and Development Agreement (DA 23-002) to vest certain rights to the Developer and to provide specific public benefits that meet certain public purposes of the local government.

In addition to the above listed Entitlements, an EIR (SCH #2023010091) for the SMP 39/SMP 40 Project has been prepared in accordance with CEQA to evaluate potential impacts to the environment of the SMP 39/SMP 40 Project, including the Entitlements.

J. The City Council finds that the SMP 39/SMP 40 Project is in the public interest; will establish land uses compatible with the physical nature of the SMP 40 Property and the surrounding area; will generate light industrial development and activity to meet local and regional goals; and will provide certain substantial public benefits and help attain certain other public objectives including, without limitation: (i) including construction of and a $750,000 financial contribution toward off-site trail improvements, creating connections to the City's existing trail networks as identified in the *Active Transportation Plan* ("ATP"); and (ii) a commitment to the funding of $100,000, payable over a two-year term in increments of $50,000 per year, to facilitate uses that support an innovation-driven economy, generate high wage jobs, or generate substantial sales tax revenues as determined by the Director of Innovation and Economic Development. Items (i) through (ii) above, and as described more fully in Section 4, are collectively referred to as the "Public Benefits").

K. This Agreement will promote and encourage the SMP 40 Development by providing the Developer and its creditors with a greater degree of certainty of the Developer's ability to expeditiously and economically complete the development effort for the SMP 40 Property, and the Parties agree that the consideration to be received by the City pursuant to this Agreement and the rights secured to the Developer hereunder constitute sufficient consideration to support the covenants and agreements of the City and the Developer. By entering into this Agreement, the City desires to allow the Developer to design, apply for, and if approved to develop the SMP 40 Property pursuant to this Agreement, the land use ordinances, rules, regulations, and policies applicable on the "Effective Date," as defined in Section 2, and to vest in Developer, upon annexation, to the fullest extent possible under the law, development entitlements in order to complete the SMP 40 Development, consistent with Section 5(c) of this Agreement.

L. The SMP 40 Development has been extensively reviewed and considered by the City and its officers, agencies, and departments. The proposed uses have been found to accommodate the City's recommendations and suggestions in order to protect the public's interest and to enhance the desirability, from the public's perspective, of the SMP 40 Development.

M. The City conducted duly noticed public hearings on this Agreement pursuant to Government Code section 65867 and Livermore Development Code sections 9.04.040 and

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

9.04.050 and found that the provisions of this Agreement and its purposes are consistent with the objectives, policies, general land uses, and programs specified in the City's General Plan and Livermore Development Code.

N. This Agreement was adopted by ordinance of the City Council on _____, 2024 and approved upon a second reading on _____, 2024 after notice and public hearings before the Planning Commission and City Council, and after City Council certification of an EIR in accordance with CEQA, Public Resources Code section 21000 *et seq*.

NOW, THEREFORE, the City and Developer hereby agree that the aforementioned recitals are true and correct and incorporated by reference as fully set forth below, and further agree as follows:

1. The Property. The SMP 40 Property is described in **Exhibit A**, attached hereto. The SMP 40 Development includes two light industrial buildings consisting of up to 759,275 sf of development. A comprehensive description of the SMP 40 Development and a proposed site plan is in attached **Exhibit B** (SMP 40 Development Description) and **Exhibit C** (Site Plan for the SMP 40 Property).

2. Effective Date. The effective date of this Agreement (the "Effective Date") is the later of (a) thirty (30) days after the date the Ordinance approving this Agreement is adopted by the City Council and attested by the City Clerk, or (b) if a referendum petition is timely and duly circulated, filed and qualified by the Elections Official, the date the election results on the ballot measure by City voters approving this Agreement are certified by the City Council in the manner provided by the Elections Code. This Agreement shall be executed by the City within ten (10) days after the Effective Date and recorded as provided in Government Code Section 65868.5.

3. Term. The term of this Agreement is ten (10) years ("Term"), beginning on the date annexation proceedings for SMP 39, SMP 40, and the Additional Annexation Only Parcels are complete ("Annexation Date"). The Agreement may be extended as provided for in the Development Agreement Statutes and the Livermore Development Code, subject to the written consent of the City and Developer. The terms of the Entitlements shall be automatically extended such that the Entitlements remain in effect for any extended Term.

   Following the expiration of the Term, or the earlier completion of development of the SMP 39/SMP 40 Project and all of Developer's obligations in connection therewith, or the failure of SMP 39 or SMP 40 to be annexed into the City of Livermore in accordance with Section 5(g) of this Agreement, this Agreement shall be terminated and of no further force and effect, subject, however to the provisions of Section 10 and Section 16.

4. Developer Obligations; Schedule of Performance. The Developer shall comply with the requirements set forth in the Schedule of Performance and tasks listed below. The Schedule of Performance is subject to revision from time-to-time as mutually agreed upon in writing between the City and the Developer, which shall be accomplished through a separate document and without the need to amend this Agreement. The City

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Manager shall have the authority to approve on behalf of the City any revision to a date in the Schedule of Performance that he or she deems appropriate, provided that the revision extends the performance deadline for a time period no longer than one year. Developer shall comply with the following Schedule of Performance:

a. Developer shall initiate timely applications for the SOI amendment for SMP 39 and the annexation for SMP 39, SMP 40, and the Additional Annexation Only Parcels, which shall be reviewed by the appropriate decision-making bodies for each parcel, which may include the City of Pleasanton, Livermore City Council and LAFCo.

b. Developer shall pay a $100,000 cash contribution to the City of Livermore Office of Innovation and Economic Development Department for marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    i. Prior to issuance of the first building permit for the SMP 40 Property, the Developer shall pay an initial $50,000 cash contribution to the City of Livermore Office of Innovation and Economic Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    ii. Developer shall pay a second $50,000 contribution to the City of Livermore Office of Innovation and Economic Development Department no later than one (1) year following the receipt of the initial $50,000 contribution, to be used toward further marketing SMP 39 for the desired land uses identified in PD-I 22-001.

c. In addition to the on-site trail required by the Project, as set forth in the Conditions of Approval, Developer shall construct an off-site grade-separated overcrossing (bridge) of Isabel Avenue/State Route 84 north of the existing railroad tracks and Stanley Boulevard as a required public benefit ("the Trail Overcrossing"). Developer shall also construct trail connections from the terminus of the bridge to the existing off-site Arroyo Mocho trail east of Isabel Avenue and from the terminus of the bridge west of Isabel Avenue, north to the existing trail along the Zone 7 property (north of the Arroyo Mocho Channel) ("the Trail Connections"). The Trail Overcrossing shall have a span of approximately 190-210 feet and shall run parallel with the existing railroad tracks. The materials shall consist of a fabricated truss and a weathered steel span bridge with concrete flooring. The Trail Overcrossing shall be supported by two cast-in-place concrete abutments which are supported by cast-in-drilled-hole concrete piles. An approach retaining wall shall be required on the east end. The Trail Overcrossing shall be cambered so it will drain from the middle to each end and then drain to the edges and connect to Caltrans storm drains. A site plan and preliminary design details are provided in **Exhibit E**. Final designs shall be conditioned to meet the requirements of applicable permitting agencies. Permits shall be required from the City of Livermore and Caltrans. In addition, an encroachment permit will be required from Caltrans. The Trail Overcrossing and Trail Connections shall be designed as described above or with similar design features as approved by the Community Development Director. The Trail Overcrossing and Trail Connection design shall

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

include lighting, cameras, and/or other safety and security measures as required by the City's Chief of Police and City Engineer.

i. As part of Final Map submittal for the SMP 40 Property, the Developer shall pay for and submit design plans, cost estimates, and project bids to the City for review and approval for the Trail Overcrossing and the Trail Connections. Developer shall work to secure and provide a competitive cost for the bridge, consistent with commercially reasonable costs and construction practices. The Trail Overcrossing and Trail Connection design shall be approved by the City before the Developer can apply for any permits related to the Trail Overcrossing and Trail Connection. Developer may submit the Final Map to the City without the Trail Overcrossing and Trail Connections details if the City Engineer determines, in his or her discretion, that the delay in the preparation of said details was due solely to delay by a public agency other than the City.

ii. The Developer's monetary contribution towards the costs of the Trail Overcrossing and Trail Connections shall equal Seven-Hundred-Fifty-Thousand Dollars ($750,000.00) (the "Developer Obligation"). The $750,000 Developer Obligation is in addition to the design and permitting costs the Developer is responsible as set forth in the Agreement. As part of Final Map approval, Developer shall enter into a Subdivision Improvement Agreement which will reference the Developer Obligation.

iii. Prior to Final Map approval, the Developer shall enter into a Community Facilities District to fund long-term maintenance and replacement of the on-site trail improvements and associated landscaping and retaining walls and the off-site trail improvements located within the Zone 7 trail easement associated landscaping and retaining walls.

iv. Prior to issuance of Certificate of Occupancy for Building 2 on the SMP 40 Property, the Developer shall pay for and obtain all necessary permits and approvals from all applicable government agencies, including but not limited to the City and Caltrans and complete all on- and off-site trail improvements including the Trail Overcrossing and the Trail Connections, subject to acceptance of the public improvements by the Livermore City Council.

v. If Developer fails to complete the Trail Overcrossing and Trail Connections prior to the issuance of the Certificate of Occupancy of Building 2 on the SMP 40 Property, Developer shall provide an irrevocable letter of credit from J.P. Morgan Chase, Wells Fargo Bank, or Bank of America in the amount of the remaining estimated cost of construction of the Trail Overcrossing and the Trail Connections, plus a 25 percent contingency added to the remaining estimated cost. The irrevocable letter of credit shall provide the City with sole and unilateral release of funds and shall be in a form approved by the City Attorney. The remaining estimated cost shall be determined by an updated Engineer's cost estimated provided and approved by the City Engineer prior to the issuance of Certificate of Occupancy for Building 2. Unless the City

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Engineer determines in his or her discretion that a delay by a public agency other than the City was the sole reason for Developer's failure to complete to the Trail Overcrossing or Trail Connection, the Developer Obligation to the Trail Overcrossing and Trail Connections shall increase every six months following issuance of the Certificate of Occupancy of Building 2 on the SMP 40 Property until the Trail Overcrossing and the Trail Connections have been completed, including acceptance of the public improvements by the Livermore City Council as follows: $25,000 every six months during year one, $50,000 every six months during year two, and $75,000 every six months during year three. The Developer shall remain responsible for paying for and obtain all necessary permits and approvals from all applicable government agencies as noted in Section 4(c)v and completing all on- and off-site trail improvements including the Trail Overcrossing and the Trail Connections, subject to acceptance of the public improvements by the Livermore City Council. The obligation to provide an irrevocable letter of credit shall be independent of, and in addition to, the City's standard bond requirements under the Subdivision Improvement Agreement.

vi. In accordance with Chapter 12.30, Traffic Impact Fee on Development Section 12.30.080, Credit and Reimbursement, the Developer shall be eligible for Traffic Impact Fee (TIF) credits to construct the Trail Overcrossing and Trail Connection costs, less the $750,000 Developer Obligation. As described further in attached **Exhibit F**, City shall provide Developer a TIF credit of the SMP 40 Project's Traffic Impact Fees (the "Impact Fee Credit") for the identified Engineer's cost estimate (or up to 10 percent over this estimate as specified above). If the construction cost estimate exceeds 10 percent of the Engineer's cost estimate, the Developer shall pay the remaining Trail Overcrossing and Trail Connections cost over the Engineers estimate. The Impact Fee Credit shall be credited against the TIF that are collected at the time each building permit is paid, and on a permit-by-permit basis as Developer's obligations to pay such impact fees accrue until the last SMP 40 Project building permit is issued. Notwithstanding anything to the contrary in this Agreement, if the Engineer's cost estimate has not been prepared and/or approved prior to when payment of TIF is due, Developer shall pay the applicable TIF when due and City shall provide Developer a cash reimbursement in the dollar amount of TIF Credit within thirty (30) business days after City Engineer's review and approval of the Engineer's cost estimate, such approval not being unreasonably withheld, conditioned, or delayed.

5. Vested Development Rights. Subject to annexation into the City and the terms of this Agreement, the SMP 40 Development shall vest in accordance with this Agreement, and the Developer has the right to develop and use the SMP 40 Property in accordance with:

   a. The City's General Plan and the Livermore Development Code in effect on the Effective Date and the Entitlements in effect on the Annexation Date;

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

b. All other City policies, ordinances, resolutions, rules, regulations, and standards applicable to development or use of the SMP 40 Property on the Effective Date, except that Developer shall:

(1) Pay the processing and development impact fees applicable City-wide that are in effect at the time the fees are paid. Payment for said fees shall be made prior to issuance of any building permits.

(2) Comply with Building Code requirements in effect on a City-wide basis at time of Building permit submittal;

(3) Comply with construction and technical design standards or specifications for public improvements that are applicable City-wide at time of Building permit submittal;

(4) Comply with changes in City laws, regulations, plans, or policies applicable City-wide, the terms of which are found by the City Council, based on substantial evidence, to be necessary to protect members of the public from a condition dangerous to public health or safety;

(5) Comply with a change in City law, regulations, plans, or policies that is:

i. Specifically mandated by state or federal law, or by any regional governmental agency that has legal authority over the City under state law or a joint powers agreement; or

ii. A result of or in response to state or federal law, or regional agency action, made necessary in order for the City to avoid losing or not receiving substantial funding or other substantial public benefits or facilities that would be available to the City only if it makes such a change; or

iii. Specifically mandated by, or necessary for compliance with or implementation of, the terms of any permit, entitlement, or other authorization necessary for the development of the Property that is issued or granted to the City, County, and/or Developer by any federal, state or regional agency;

(6) Following any subsequent environmental review, comply with required mitigation measures; and

c. In the event that Developer applies for any subsequent entitlements, subsequent entitlements shall be subject to the City's ordinances, rules, regulations and policies in effect on the date of submittal of the subsequent entitlements.

d. If there is any inconsistency between this Development Agreement and a permit or entitlement issued for the SMP 40 Property, this Development Agreement shall control.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

e. Developer acknowledges that execution of this Agreement by the City does not constitute approval of any required permits, applications, or allocations, and in no way limits the discretion of the City in the permit, allocation, and approval process in accordance with the limitations set forth herein.

f. Upon annexation of SMP 39 and 40, Developer agrees that all mining permits previously granted by Alameda County on the SMP 39 and SMP 40 properties shall be forfeited, and no mining operations shall occur on the SMP 39 Property or the SMP 40 Property. No later than 60 days from the date LAFCo approves annexation of the SMP 40 Property, subject to any extension granted by the City, Developer shall coordinate with Alameda County to complete any final actions required to remove the mining permits and all associated permissions related to mining operations from the SMP 39 and SMP 40 properties.

g. The Parties agree that the obligations set forth in this Agreement are conditioned upon the passing of a City Council Resolution authorizing submittal of an application to LAFCo for SOI and Annexation, the filing of an application with LAFCo to modify the SOI for SMP 39, annex SMP 39, SMP 40 and the Additional Annexation Only Parcels, requesting waiver of notice, hearing and protest from LAFCo, subject to LAFCo approval. Furthermore, the Parties also agree that the obligations set forth in this Agreement are conditioned upon the approved and finalized SOI modification and annexation of the SMP 39 and SMP 40 Properties and the Additional Annexation Only Parcels into the City of Livermore. Upon approval of the SMP 39/SMP 40 Project by the City, the City agrees to act in good faith, in collaboration with the Developer, to support and timely process the annexation application with LAFCo. The Developer shall be responsible for all costs associated with annexation, including but not limited to preparation of the LAFCo application, LAFCo application submittal fees, and any other City-related annexation fees. Annexation of SMP 39, SMP 40, and the Additional Annexation Only Parcels shall be completed no later than 18 months from the Effective Date of this Agreement, unless extended by written agreement of the Parties. If the annexation is not completed within this time period, subject to any agreed upon extension, the Agreement is null and void.

h. Developer shall not dispute or challenge the validity of the Pre-annexation and Development Agreement for SMP 39. Any legal challenge to the validity or enforceability of the Pre-annexation and Development Agreement for SMP 39 shall constitute a legal challenge to the Pre-annexation and Development Agreement for SMP 40 and the SMP 39/SMP 40 Project. In the event of a valid legal challenge, this Agreement shall be terminated after all appeals have been exhausted before a final court of judgment, or issuance of a final court order directed to the City to set aside, withdraw or abrogate the City's approval of this Agreement or the Pre-annexation and Development Agreement for SMP 39.

7. Periodic Review. Review of this Agreement shall be made annually, consistent with Government Code section 65865.1 and Livermore Development Code Chapter 9.04.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

8. Amendments. The Agreement may be amended in writing by the Parties, by mutual agreement, consistent with the procedures set forth in the Development Agreement Statutes and the Livermore Development Code, as they are amended from time-to-time.

9. Force Majeure. The Term of this Agreement shall be extended by, and the performance by any Parties of their obligations hereunder (other than for payment of money) shall be excused during, any period of "Force Majeure" as hereinafter defined. "Force Majeure" means a delay caused by any labor disputes or strikes, labor or material shortages or embargoes, pandemic, fire, unusual delay in transportation, earthquakes, floods, tornadoes or extreme wind or other adverse weather conditions not reasonably foreseeable by Developer, or material adverse underground conditions not reasonably foreseeable by Developer.

10. Remedies for Default. If a Party is in default under this Agreement, another Party may pursue one or more of the following courses of action after providing 30 days' written notice to the purportedly defaulting Party (or such longer period as may be required to cure the default, so long as such Party commences the cure within such 30-day period and diligently pursues the cure to completion): (a) waive the default; (b) in the City's case, pursue administrative remedies, including denial or otherwise withholding issuance of building permits, certificates of occupancy, or other approvals; (c) pursue judicial remedies; or (d) terminate this Agreement. Any purported default by a Party hereunder shall be subject to, and tolled by, any event of Force Majeure that prevents such Party from performing the act necessary to avoid or cure such purported default. Any such tolling shall end at the termination of the event of Force Majeure.

11. Termination. This Agreement shall terminate upon the earlier of (i) expiration of the Term, or (ii) in the event that SMP 39, SMP 40, and the Additional Annexation Only Parcels are not annexed into the City in accordance with Section 5(g) of this Agreement (iii) when the SMP 39/SMP 40 Project has been completed and all of Developer's obligations have been fully satisfied as reasonably determined by the City, or (iv) after all appeals have been exhausted before a final court of judgment, or issuance of a final court order directed to the City to set aside, withdraw or abrogate the City's approval of this Agreement or any material part thereof, or the Pre-annexation and Development Agreement for SMP 39 or any material part thereof. Upon termination of this Agreement as to the SMP 39/SMP 40 Project, at the request of Developer, the City shall record a Notice of Termination for each affected parcel in a form satisfactory to the City Attorney in the Office of the Alameda County Recorder. In the event this Agreement is terminated, neither party shall have any further rights or obligations hereunder except for those obligations of Developer set forth in Section 12 (No Damages Relief) and Section 16 (Legal Action; Attorneys' Fees).

12. Mortgagee Protection.

    a. This Agreement shall not prevent or limit Developer in any manner, at Developer's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust, or other security device securing financing with respect to the Property ("Mortgage"). This

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Agreement shall be superior and senior to any lien placed upon the Property or any portion thereof after the date of recording this Agreement, including the lien of any Mortgage. Notwithstanding the foregoing, no breach hereof shall defeat, render invalid, diminish, or impair the lien of any Mortgage made in good faith and for value, but all of the terms and conditions contained in this Agreement shall be binding upon and effective against and inure to the benefit of any person or entity, including any deed of trust beneficiary or mortgagee ("Mortgagee") who acquires title to the Property, or any portion thereof, by foreclosure, trustee's sale, deed in lieu of foreclosure, or otherwise.

b. *Liability for Past Defaults*. Any Mortgagee, including the successful bidder at a foreclosure sale, who takes title and possession of the Property, or any portion thereof, pursuant to such foreclosure, shall take the Property, or portion thereof, subject to the provisions of this Agreement; provided, however, in no event shall such Mortgagee be liable for any defaults or monetary obligations of Developer arising prior to acquisition of title to the Property by such Mortgagee. Notwithstanding the preceding sentence, in no event shall any such Mortgagee or its successors or assigns be entitled to a building permit, final inspection, or occupancy certificate until all fees and other monetary obligations due under this Agreement have been paid to the City and any other existing defaults under this Agreement that are reasonably subject to cure are cured.

c. *Notice of Default to Mortgagee; Right of Mortgagee to Cure*. If City receives a notice from a Mortgagee requesting a copy of any Notice of Default given to Developer hereunder and specifying the address for service thereof, then City shall deliver to such Mortgagee, concurrently with service thereon to Developer, any notice given to Developer with respect to any claim by City that Developer has committed a default. If the City makes a determination of noncompliance hereunder, City shall likewise serve notice of such noncompliance on such Mortgagee concurrently with service thereof on Developer. Each Mortgagee shall have the right (but not the obligation) during the same period available to Developer to cure or remedy, or to commence to cure or remedy, the event of default claimed or the areas of noncompliance set forth in City's notice.

13. No Damages Relief. The Parties acknowledge that the City would not have entered into this Agreement were it exposed to damages claims from Developer for any breach thereof. As such, the Parties agree that in no event shall Developer be entitled to recover damages against City for breach of this Agreement. To the extent permitted by law, specific enforcement of this Agreement, including specific performance of Developer's payment obligations set forth in Sections 4(b) and 4(c) and the City's TIF credit obligations set forth in Exhibit F, is the proper and desirable remedy.

14. Recordation: Binding Effect. This Agreement shall be recorded in the office of the Alameda County Recorder and shall be binding upon and inure to the benefit of any successors in interest to the Parties. The Parties acknowledge that, as of the date of preparing this Agreement, the Property is owned in fee by Seller and that Seller shall have all rights and obligations of "Developer" under this Agreement.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

15. Release Upon Transfer. Upon the sale, transfer, or assignment, in whole or in part, of Developer's right and interest to all or any portion of the Property, Developer shall be released from its obligations hereunder with respect to the portion so conveyed, provided: (i) Developer (or transferee) was not in default of this Agreement at the time of conveyance, (ii) Developer provided to City prior written notice of such transfer, and (iii) with respect to sale or transfer of any lot that has not been fully improved, the transferee executes and delivers to City a written assumption agreement in which: (a) the name and address of the transferee is set forth, and (b) the transferee expressly assumes the obligations of Developer under this Agreement as to the portion of the Property conveyed. Failure to deliver a written assumption agreement hereunder shall not negate, modify, or otherwise affect the liability of any transferee pursuant to the provisions of this Agreement.

16. Timing of Development.

    a. Because the California Supreme Court held in *Pardee Construction Co. v. City of Camarillo*, 37 Cal.3d 465 (1984), that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over the parties' agreement, it is the Parties' intent to avoid that result by acknowledging, that unless provided for in this Agreement, Developer shall have the right (without obligation) to develop the Property in such order and at such rate and at such times as Developer deems appropriate within the exercise of its subjective business judgment, subject to the terms, requirements and conditions of the Entitlements and this Agreement.

    b. Developer will use its best efforts, in accordance with its own business judgment and taking into consideration market conditions and other economic factors influencing Developer's business decision, to commence or to continue development, and to develop the Project in a regular, progressive, and timely manner in accordance with the terms, requirements and conditions of the Entitlements and this Agreement.

17. Legal Action; Attorneys' Fees. If the City chooses to defend any third party claim or suit challenging any action taken by the City with regard to this Agreement or any procedure or aspect of the City's approval of the development of the SMP 40 Development, including the environmental review process, the Developer in its capacity as either Developer or owner of the Property agrees to reimburse the City for the City's reasonable attorneys' fees, expert witness fees, and related costs as the City may incur in connection with its retention of outside counsel, and for any award of court costs or fees against the City. The City has the right to choose and retain such legal counsel as the City deems appropriate. After expenses reach $100,000, and each $100,000 thereafter, the Parties will confer to review the status of the litigation and their options for proceeding or settling, and they will negotiate in good faith about how the expenses will be allocated. The Developer, in its capacity as the Developer or owner of the Property, shall have no obligation to reimburse the City for costs incurred after the date on which the Developer or owner of the Property give the City written notice of their decision to settle a case, even if the City does not agree to the settlement. If legal action is brought by one of the

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Parties to enforce a provision of this Agreement, the prevailing party is entitled to reasonable attorneys' fees, expert witness fees, and court costs.

18. Notices. The address of each party for the purpose of all notices permitted or required by this Agreement is as follows:

To City:	City of Livermore 1052 South Livermore Avenue Livermore, CA 94550 Attention: Community Development Director and Ashley Vera, Senior Planner
With a copy to:	City Attorney City of Livermore 1052 South Livermore Avenue Livermore, CA 94550
To Developer:	Overton Moore Properties 19700 South Vermont Avenue, Suite 101 Torrance, CA 90502 Attention: Timur Tecimer
With a copy to:	Cox, Castle & Nicholson LLP 50 California Street, Suite 3200 San Francisco, CA 94111 Attention: Christian Cebrian
To Seller:	SMP-40, LLC 1459 18th St #317 San Francisco, CA 94107 Attention: Jennifer Jimenez-Cruz
With a copy to:	Allen Matkins Three Embarcadero Center 12th Floor San Francisco, CA 94111 Attention: Marshall Wallace

The written address of each Party set forth above may be changed by written notice given not less than five (5) days prior to the date such change is to be in effect. All notices under this Agreement shall be in writing, shall be properly addressed, and shall be sent by personal delivery, United States mail (registered, certified, or Express Mail, return receipt requested and postage prepaid), or by overnight courier delivery service. All such notices shall be considered delivered: (i) if personally delivered, on the date of delivery; (ii) if sent by United States mail in the manner prescribed above, on the date shown on the return receipt for acceptance or rejection; or (iii) if sent by overnight courier delivery

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

service, on the date of delivery or attempted delivery as shown by the written delivery record of such service.

19. Severability; Choice of Law If any term, provision, condition, or covenant of this Agreement, or the application thereof to any Party or circumstances, shall to any extent be held invalid or unenforceable, the remainder of the instrument, or the application of such term, provision, condition, or covenant, or the application of such term, provision, condition, or covenant to persons or circumstances other than those as to whom or which it is held invalid or unenforceable, shall not be affected thereby and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law. This Agreement shall be governed by the laws of the State of California.

20. Covenants Run with the Land. All of the terms, provisions, covenants, conditions, rights, powers, duties and obligations contained in this Agreement shall be binding upon the parties and their respective heirs, successors and assigns acquiring any portion of the Property and shall inure to the benefit of the parties and their respective heirs, successors and assigns.

21. No Third Party Beneficiaries. This Agreement is entered only for the benefit of the Parties executing this Agreement, their successors in interest. This Agreement is not for the benefit of any other individual, entity or person. Nothing herein shall be construed to create any right of any third party to enforce this Agreement or to seek any benefit therefrom.

22. Time Is of the Essence. Time is of the essence for each provision of this Agreement for which time is an element.

23. Certificate of Compliance. Any Party may, at any time, request that the City indicate in writing: (i) whether this Agreement is in full force and effect; (ii) whether this Agreement has been amended or modified, and if so amended, the nature of any such amendments; or (iii) whether to the best of City's knowledge the requesting Party is in default in the performance of any of its obligations under this Agreement, and if in default, the nature of any such default. City shall endeavor in good faith to respond to any such request within thirty (30) days following the receipt thereof. The Parties shall be entitled to one certificate of compliance per year without any fee being assessed by the City. For any additional certificates of compliance requested in a single year, the City may charge the requesting party a reasonable fee related to the actual cost to prepare the certificate.

24. Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which constitute one and the same instrument.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

SMP 40 Development Description

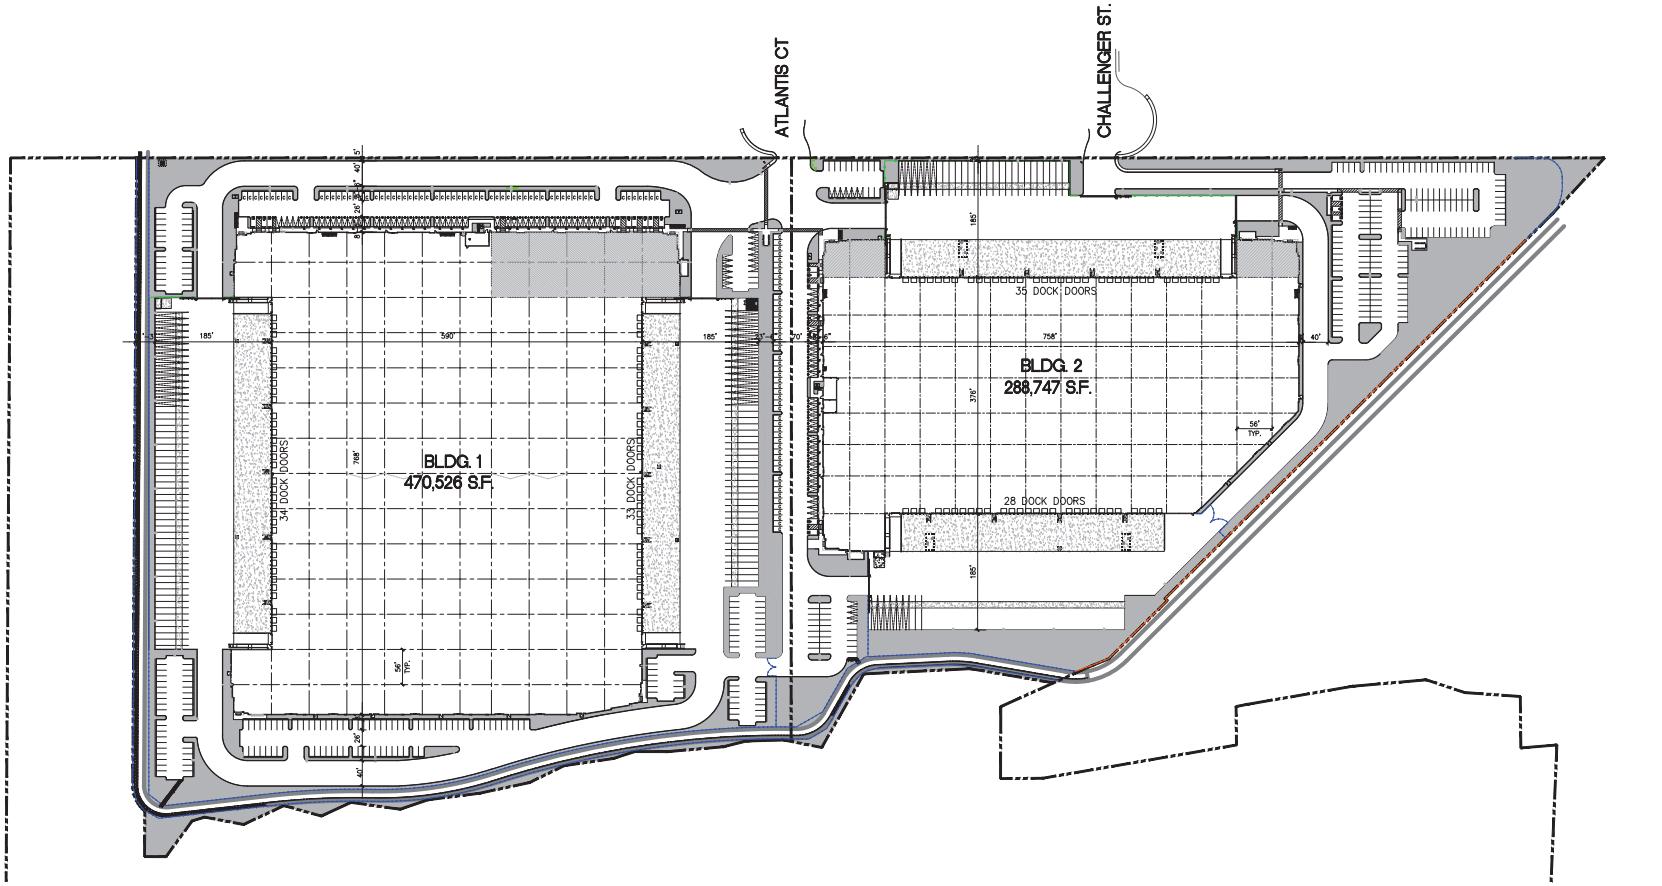
Assessor Parcel Number 904-10-2-2 is also known as SMP 40 ("SMP 40 Property"). The aforementioned SMP number references the Surface Mining Permit (SMP) numbers applicable to the site. The Surface Mining Permit for the SMP 40 Property was approved by Alameda County in 2004 to allow for the extraction of sand and gravel (i.e., aggregate) within the site; however, aggregate mining has not occurred within the SMP 40 Property. The SMP 40 Property is approximately 41 acres and is located within unincorporated Alameda County, the City of Livermore Sphere of Influence (SOI), and the City of Livermore South Livermore Urban Growth Boundary (UGB). The Property is zoned Agricultural by Alameda County with a County General Plan designation of Industrial. The SMP 40 Property has a City of Livermore General Plan designation of Open Space/Sand and Gravel.

Surrounding existing uses include the Oaks Business Park to the north; single-family residences to the east, across Isabel Avenue/SR 84; the Arroyo Mocho, open fields, railroad tracks, and gravel quarries associated with mining operations to the south, across Stanley Boulevard; and vacant land, gravel quarries, and industrial ponds associated with mining operations to the west.

Developer shall construct two light industrial buildings on the SMP 40 Property totaling up to 759,275 square feet (sf) of new building area and associated internal roadways, parking, landscaping, utilities, on- and off-site trail improvements, and other improvements ("SMP 40 Development"). The approximately 470,530-sf Building 1 shall be located on the western portion of the SMP 40 Property and include a total of 68 loading dock doors along the western and eastern sides of the building (34 on each side). The approximately 288,750-sf Building 2 would be located on the eastern portion of the SMP 40 Property and include a total of 62 loading dock doors along the northern and southern sides of the building (34 on the north and 28 on the south). A total of 742 vehicle parking stalls and 90 trailer parking stalls shall be provided at the SMP 40 Property. Each building shall have a maximum height of 50 feet or 55 feet with a Conditional Use Permit.

The SMP 40 Development shall comply with the development requirements including land use, building and landscape setbacks, height, lot coverage, parking, and other required standards as set forth in the Planned Development - Industrial 22-001 (PD-I 22-001) zone. Access to the SMP 40 Property shall be provided through new internal roadway connections to Atlantis Street and Challenger Street to the north, which currently serve the existing Oaks Business Park. The new roadway connections shall be located between Buildings 1 and 2 and shall provide access to the internal drive aisles around each building.

The SMP 40 Development includes a paved at-grade, on-site trail along the boundaries of the SMP 40 Property, consistent with the City's Active Transportation Plan. Specifically, the on-site trail shall extend from the northeastern corner of the site, along the SMP 40 Property's eastern, southern, and western boundaries, before connecting to the existing off-site trail at the northwestern corner of SMP 40 Property, which extends along the west side of the Oaks Business Park to the north and connects to West Jack London Boulevard. The portion of the on-



DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

site trail located along the SMP 40 Property's eastern and southern boundaries shall be located within a Zone 7 easement north of the Arroyo Mocho.

In addition to the on-site trail required on the SMP 40 Property, an off-site grade-separated overcrossing (bridge) of Isabel Avenue/State Route 84 north of the existing railroad tracks and Stanley Boulevard is a required public benefit ("the Trail Overcrossing"). The SMP 40 Development includes construction of trail connections from the terminus of the bridge to the existing off-site Arroyo Mocho trail east of Isabel Avenue and to the future on-site trail along the SMP 40 Property frontage to the west of Isabel Avenue ("the Trail Connections"). The Trail Overcrossing shall have a span of approximately 190-210 feet and shall run parallel with the existing railroad tracks. The materials shall consist of a fabricated truss and a weathered steel span bridge with concrete flooring. The Trail Overcrossing shall be supported by two cast-in-place concrete abutments which are supported by cast-in-drilled-hole concrete piles. An approach retaining wall shall be required on the east end. The Trail Overcrossing shall be cambered so it will drain from the middle to each end and then will drain to the edges and connect to Caltrans storm drains. A site plan and preliminary design details are provided in **Exhibit E**. Final designs shall be conditioned to meet the requirements of applicable permitting agencies. Permits shall be required from the City of Livermore and Caltrans. In addition, an encroachment permit will be required from Caltrans. The Trail Overcrossing and Trail Connections shall be designed as described above or with similar design features as approved by the Community Development Director. The Trail Overcrossing and Trail Connection design shall include lighting, cameras, and/or other safety and security measures as required by the City's Chief of Police and City Engineer.

PLANNED DEVELOPMENT STANDARDS SMP 39 & SMP 40

Planned Development – Industrial (PD-I) 22-001

Reviewed by Planning Commission: March 5, 2024
Approved by City Council: March 25, 2024

Purpose: The purpose of establishing this Planned Development-Industrial (PD-I 22-001) District (District) is to regulate the development of ± 51.9 acres of land located on Jack London Boulevard, west of Oaks Business Park and south of Livermore Municipal Airport (commonly referred to as "SMP 39") and ± 41 acres of land located south of Oaks Business Park, at the south end of Atlantis Street and Challenger Street (commonly referred to as "SMP 40"), as shown in the attached figure (Figure 1). The intent of this District is to accomplish the following:

1. PD-I 22-001 is intended to provide an environment exclusively for and conducive to the development and protection of modern professional and administrative facilities, research institutions, manufacturing operations, experimental and testing laboratory and related uses, any similar employment generating high-end industrial users, all of a non-nuisance type.
2. The District is intended to provide for an aesthetically attractive working environment with park- and/or campus-like grounds, attractive buildings, employee parking, and other amenities appropriate to a mix of office and industrial uses.
3. The District is intended to establish development standards and regulations consistent with the intent of the Low Intensity Industrial General Plan designation.
4. Any land use that utilizes hazardous materials shall be subject to the regulations of Section 6.02.040, Hazardous Materials, of the Livermore Development Code, as it exists now or is amended in the future.
5. Development shall be in conformance with the requirements of the Livermore Development Code as it exists now or is amended in the future, except as modified by the following regulations.
6. Development is subject to the Citywide Design Standards and Guidelines as they exist now or may be amended in the future unless otherwise modified by the following regulations.

A. Principal Permitted Uses:

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

The following are the principal permitted uses for SMP 39[1] and SMP 40:

1. Research and development facilities
2. Professional and administrative offices
3. Experimental and testing laboratories
4. Manufacture of electric and electronic circuits, instruments, and devices
5. Manufacture of pharmaceutical products or life science facility, not exceeding Biosafety Level 2[2]
6. Medical diagnostic and manufacturing facilities
7. Manufacturing and assembly of motor vehicle parts, including but not limited to dashboards, parts, component systems, electrical connectors, sensors, panels, airbags, seats, tires, windows etc. for all vehicles and similar equipment (e.g. automobiles, motorcycle, construction equipment, farm equipment, buses).
8. Similar uses as determined by the Community Development Director to be of the same general character as the listed uses.

Additional Permitted Uses for SMP 39 only:

1. Restaurants, except fast food

Additional Permitted Uses for SMP 40 only:

1. Warehousing and distribution facilities, dry or refrigerated
2. Warehousing and distribution facility – E-commerce/Third Party Logistics (3PL)
3. Manufacturing, assembly, processing, storage, or packaging of products from previously prepared materials such as, but not limited to, cloth, plastic, paper, leather, and precious or semi-precious metals or stones, <u>but not including the following</u>:
   A. Operations such as saw and planing mills, any manufacturing uses involving primary production of wood, metal, or chemical products from raw materials, and similar uses
   B. Vehicle dismantling yards, scrap and waste yards
   C. Manufacturing, processing, storing, or packaging chemicals, petroleum, heavy agricultural products or other hazardous materials.

[1] SMP 39 and SMP 40 are located with the Airport Influence Area and the Livermore Airport Protection Area. Per the Alameda County Airport Land Use Compatibility Plan, the majority of SMP 39 is located in Safety Zone 6, with a portion of the site located in Safey Zone 3. The principal permitted land uses are intended to be located in buildings that are only within the portion of SMP 39 that is located in Safety Zone 6.

[2] Per the Centers for Disease Control and Prevention, Biosafety Level 2 laboratories involve work that poses moderate hazards to laboratory workers and the environment. Biosafety Level 2 laboratories require safety protocols to contain microbes and biological agents.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

4. Sale of heavy equipment and construction related vehicles and equipment, including associated repair, service, and parts distribution facilities. Showrooms related to this use may be a conditionally permitted ancillary use.
5. Similar uses as determined by the Community Development Director to be of the same general character as the listed uses.

B. Conditional Uses for SMP 39 and 40:

1. Public and quasi-public uses.
2. Manufacture of pharmaceutical products or life science facility, not exceeding Biosafety Level 3[3]
3. Similar uses as determined by the Planning Commission to be of the same general character as the listed uses.

Conditional Uses for SMP 39 only:

1. Fast-food businesses, banks, personal services, or goods required for the convenience and support of occupants of uses in the surrounding district(s).
2. Warehouse and distribution facilities, including E-commerce/Third Party Logistics (3PL) uses, with the condition that these uses may only occupy up to 20 percent of the total buildable site area.
3. Sale of heavy equipment and construction related vehicles and equipment, including associated repair, service, and parts distribution facilities, provided they are manufactured and/or sold on-site. Showrooms related to this use may be a conditionally permitted ancillary use.
4. Similar uses as determined by the Planning Commission to be of the same general character as the listed uses.

C. Accessory Uses Permitted on SMP 39 and 40:

1. Signs subject to the requirements established by the Livermore Development Code, as well as the Citywide Design Standards and Guidelines, as it exists now or is amended in the future.
2. Accessory uses and buildings customarily appurtenant to a permitted use.
3. Living quarters determined by the Community Development Director to be necessary for surveillance purposes.
4. Fuel stations subject to the requirements of Section 6.03.160, Vehicle Services, of the Livermore Development Code, as it exists now or is amended in the future.

[3] Per the Centers for Disease Control and Prevention, laboratories designated Biosafety Level 3 involve work that poses a safety hazard greater than Biosafety Level 2 laboratories, defined above. Biosafety Level 3 laboratories require additional safety protocols beyond those required for Biosafety Level 2 laboratories to contain microbes and biological agents.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

D. Special Development Requirements for SMP 39 and 40:

1. Uses shall be designed and integrated into the site in a manner that maintains and is complementary to the corporate and professional character of the nearby Oaks Business Park.
2. Outdoor service and storage yards shall be screened from public view consistent with Livermore Development Code Section 6.03.100, Outdoor Storage, as it exists today or is amended in the future.
3. For SMP 40 only: Commercial/Industrial buildings shall be located a distance of at least 500 feet from Isabel Avenue.

E. Site Development Regulations for SMP 39 and 40:

The following minimum requirements shall be observed, except where increased for conditional uses:

1. Lot Area: Twenty thousand square feet
2. Lot Width: One hundred feet
3. Setbacks: Setback requirements are established below. Buildings shall not be permitted within required setbacks.

A. SMP 39

1) Front or Street Side: 40-feet on West Jack London Boulevard, and 30-feet on frontage roads and interior streets, except as required by subsection E.4. All required setbacks adjacent to streets shall be landscaped, except for driveways, sidewalks, and trails that are found to be necessary for the efficient use of the property. Where a building front is visible from the street, a minimum five-foot wide landscaped strip abutting the foundation shall be included, allowing for necessary entrances.
2) Rear and Side: None.

B. SMP 40

1) Front or Street Side: 500-feet from Isabel Avenue, and 30-feet on frontage roads and interior streets, except as required by subsection E.4. All required setbacks adjacent to streets shall be landscaped, except for driveways and sidewalks that are found to be necessary for the efficient use of the property. Where a building front is visible from the street, a minimum five-foot wide landscaped strip abutting the foundation shall be included, allowing for necessary entrances
2) Rear and Side: None, except for a 20-foot setback from the top of the Arroyo Mocho bank on SMP 40 which should be determined from a 2.5:1 slope projection from the toe of

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

channel/mining pit to the top, as required in the Environmental Impact Report for the project.

4. Height Regulations: The height of all on-site structures, including roof-top mechanical equipment, is limited to 50 feet or the height permitted by the Federal Aviation Administration (FAA) review under FAA regulations – Part 77, whichever is more restrictive. Upon providing a minimum 40-foot setback from street rights-of-way, a Conditional Use Permit may be requested to increase height to a maximum of 55 feet, or the height permitted under FAA regulations – Part 77, whichever is more restrictive. The height of pole-and building-mounted lights may be approved up to 28 feet by an administrative site plan and design review, if found necessary for the health and safety of a site designed for truck or other large vehicle maneuvering and documented by a light study to not cause glare off-site.
5. Lot Coverage: The building coverage maximum shall be 45 percent.

F. Signs

1. Industrial Uses. Signs for industrial uses shall be subject to the sign regulations contained in Livermore Development Code section 4.06.230 (sign standards for I-1, I-2 and I-3) and the Citywide Design Standards Guidelines as it exists now or is amended in the future.
2. Commercial Uses. Signs for commercial uses shall be subject to the sign regulations contained in Livermore Development Code section 4.06.170 (sign standards for CNB) and the Citywide Design Standards Guidelines as it exists now or is amended in the future.

G. Other Required Standards for SMP 39 and 40:

1. Noise. No use shall be permitted which creates an ambient noise level greater than 75 decibels (dBA) beyond the boundaries of the site, nor greater than 60 decibels at the boundary of a Residential District.
   A. On SMP 39, semi-truck access to the site (arrivals and departures) shall be limited to 96 trips between the hours of 10:00 PM and 7:00 AM.
   B. On SMP 40, semi-truck access to the site (arrivals and departures) shall be limited to 40 trips between the hours of 10:00 PM and 7:00 AM
   C. Between the hours of 10:00 PM and 7:00 AM single-event noise levels (e.g., backup alarm, truck brakes, etc.) shall not exceed 55 dBA, measured at the property line of the nearest residential use.
2. Air Pollution. All uses shall comply with regulations of the San Francisco Bay Area Air Pollution Control District.
3. Vibration, Heat, Glare, Electrical Disturbance. No use shall be permitted which creates noise, odors, vibrations, heat, glare, or electrical disturbances beyond the

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

boundaries of the site. Lighting used to illuminate buildings, structures, uses, or parking and loading areas shall not be directed toward any public right-of-way.

4. Fire, Explosion. All uses shall provide adequate safety devices and adequate firefighting and fire suppression equipment to protect against fire, explosion, and other hazards.
5. Solid and Liquid Wastes. No solid or liquid waste discharges, other than permitted discharges into a public sewage disposal system, shall be permitted. The chemical composition and volume of industrial effluent discharged shall be subject to the wastewater permit requirements established by LMC Title 13, Division II. (Ord. 442 § 14.80).

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Trail Overcrossing and Trail Connections Credits

The Developer's monetary contribution towards the costs of the Trail Overcrossing and Trail Connections shall equal Seven-Hundred-Fifty-Thousand Dollars ($750,000.00) (the "Developer Obligation"). The $750,000 Developer Obligation is in addition to the design and permitting costs the Developer is responsible as set forth in the Agreement. City and Developer shall diligently pursue grant funding opportunities to fund the remaining Trail Overcrossing and Trail Connections, less the Developer Obligation. In the event that a grant funding opportunity is not successful, City shall credit Developer using Traffic Impact Fees (TIF) less the Developer Obligation, in accordance with Livermore Municipal Code Section 12.30.080, Credit and Reimbursement, and as set forth below in exchange for Developer constructing the Trail Overcrossing and Trail Connections.

The Developer shall provide, at its own cost, an Engineer's cost estimate for the Trail Overcrossing and Trail Connections, subject to the City Engineer's review and approval.

The Engineer's cost estimate shall include all hard costs (including, without limitation, contractor time, materials), management costs (equaling 5% of the hard costs), City plan check and inspection, third party inspections, ten percent contingency (10%) applied to construction costs only, City building permit fees (if any), all other permitting and regulatory fees/costs, costs (including consultant costs) for environmental and regulatory approval of the Trail Overcrossing and Trail Connections, and construction bonds and insurance. The City's TIF credits shall equal up to a maximum of 10 percent over the Engineer's cost estimate; if the final cost estimate exceeds the Engineer's cost estimate by more than 10 percent, the Developer shall pay the remaining Trail Overcrossing and Trail Connections cost over the Engineer's estimate. For avoidance of doubt, Developer shall have no right of credits or reimbursements for the design costs of the Trail Overcrossing or Trail Connections. City shall credit Developer for the Trail Overcrossing and Trail Connections as follows:

City shall provide Developer a TIF credit of the SMP 40 Project's Traffic Impact Fees (the "Impact Fee Credit") for the identified Engineer's cost estimate for the Trail Overcrossing and Trail Connections (or up to a maximum of 10 percent over this estimate as specified above). The Impact Fee Credit shall be credited against the TIF that are collected at the time each building permit is paid, and on a permit-by-permit basis as Developer's obligations to pay such impact fees accrue until the last SMP 40 Project building permit is issued.

PRE-ANNEXATION AND DEVELOPMENT AGREEMENT

BY AND BETWEEN

THE CITY OF LIVERMORE

AND

LIVERMORE INDUSTRIAL PARTNERS 40, LLC; AND SMP-40, LLC

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

PRE-ANNEXATION AND DEVELOPMENT AGREEMENT (DA 23-002) [SURFACE MINING PERMIT (SMP) 39/40 PROJECT – SMP 40 PROPERTY]

This Pre-annexation and Development Agreement ("Agreement") is entered into on _____, 2024 between the City of Livermore, a municipal corporation ("City"), Livermore Industrial Partners 40, LLC ("Developer") and SMP-40, LLC ("Seller"). The City, Developer, and Seller are sometimes referred to below each individually as a "Party" and collectively as the "Parties."

RECITALS

This Agreement is based on the following facts:

A. The City has the authority to enter into a development agreement under Government Code section 65864 *et seq.* ("Development Agreement Statutes") and Chapter 9.04 of the Livermore Development Code to vest certain rights to the Developer and to meet certain public purposes of the local government.

B. SMP-39, LLC, an affiliate of Seller, owns approximately +/- 51.9 acres located on Jack London Boulevard, west of Oaks Business Park and south of Livermore Municipal Airport (commonly referred to as "SMP 39"). Seller owns approximately +/- 41 acres (commonly referred to as "SMP 40" or, for purposes of this Agreement, "SMP 40 Property"), which is the subject of this Agreement. The aforementioned SMP numbers reference the Surface Mining Permit (SMP) numbers applicable to each site. The Surface Mining Permits for each of the sites were approved by Alameda County in 2004 to allow for the extraction of sand and gravel (i.e., aggregate) within the sites; however, aggregate mining has not occurred within either of the sites.

C. Four additional parcels that total approximately +/- 12.9 acres are located east of SMP 40 and are included in the overall project area (as set forth in more detail in Recital F and referred to as the "Additional Annexation Only Parcels"). The City has chosen to include the parcels in the proposed annexation area for purposes of efficiency and to create logical boundaries.

D. The SMP 40 Property consists of one parcel Assessor Parcel Number (APN) 904-0010-002-02 and is generally located south of Oaks Business Park, at the south end of Atlantis Street and Challenger Street. It is situated in Alameda County and is within the City of Livermore's Sphere of Influence ("SOI") and the City of Livermore's South Livermore Urban Growth Boundary ("UGB"). The SMP 40 Property is zoned Agricultural by Alameda County with a County General Plan designation of Industrial. The SMP 40 Property has a City of Livermore General Plan designation of Open Space/Sand and Gravel.

The SMP 40 Property is described more specifically in the attached **Exhibit A**. The SMP 40 Property does not include property located within SMP 39 or the Additional Annexation Only

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Parcels, as described in Recitals E and F below. Development of the SMP 40 Property is described in Recitals G and H, below, and set forth in more detail in **Exhibit B** (SMP 40 Development Description) and **Exhibit C** (Site Plan for the SMP 40 Property). Developer is in contract to purchase SMP 40 Property from Seller, and under that contract has the primary rights and obligations regarding application for and funding the Entitlements, described below in Recital I, for the SMP 40 Property as set forth in this Agreement. Developer is required to annex the SMP 40 Property into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

E. SMP-39, LLC, an affiliate of Seller, owns certain real property consisting of one parcel (APN 904-0003-001-04) and is situated in Alameda County, within the City of Pleasanton's SOI and the City of Livermore's South Livermore UGB ("SMP 39"). SMP 39 is zoned Agricultural by Alameda County and has a County General Plan designation of Industrial. SMP 39 has a City of Livermore General Plan designation of Open Space/Sand and Gravel. The Developer is required to change the SOI for SMP 39 from the City of Pleasanton to the City of Livermore and to annex SMP 39 into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

F. Four additional parcels (APNs 904-0010-002-03, -5, -7, and -8) located immediately east of SMP 40 are within unincorporated Alameda County, the City of Livermore SOI, and the City of Livermore South Livermore UGB ("Additional Annexation Only Parcels"). APN 904-0010-002-03 is an approximately 0.20-acre parcel owned by the Pacific Gas and Electric Company (PG&E) and is developed with existing PG&E infrastructure. APN 904-0010-002-05 is an approximately 5.76-acre parcel owned by the Zone 7 Water Agency and serves as a flood control channel. APN 904-0010-002-07 is an approximately 1.57-acre parcel owned by the California Department of Transportation (Caltrans) and is currently undeveloped. APN 904-0010-002-08 is an approximately 5.46-acre parcel owned by the City of Livermore and is currently undeveloped with scattered trees throughout the parcel. The City of Livermore General Plan designates the Additional Annexation Only Parcels as Open Space/Sand and Gravel. The Additional Annexation Only Parcels are also within the East County Area Plan of the Alameda County General Plan, which designates the parcels as Industrial. The parcels are zoned Agriculture by Alameda County. The Developer is required to annex the Additional Annexation Only Parcels into the City to facilitate the SMP 39/SMP 40 Project, defined below in Recital G.

G. Due to their interrelated nature, activities involving SMP 39, SMP 40, and the Additional Annexation Only Parcels (together, the "SMP 39/SMP 40 Project") are considered in a single Environmental Impact Report ("EIR") (SCH #2023010091) for purposes of the City's environmental review under the California Environmental Quality Act ("CEQA"). The SMP 39/SMP 40 Project evaluated in the EIR includes a SOI amendment for SMP 39 and a General Plan Amendment, Pre-zoning and Annexation, Zoning Map Amendment/ Planned Development, Vesting Tentative Subdivision Maps, Pre-Annexation Agreements, and Development Agreements for SMP 39 and SMP 40. A Site Plan Design Review entitlement is also included for SMP 40. The SMP 39/SMP 40 Project evaluated in the EIR also includes annexation of the Additional Annexation Only Parcels.

H. SMP 39 and SMP 40 shall be developed with light industrial development uses consistent with the City's *Low-Intensity Industrial* General Plan designation, including research

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

and development, professional and administrative offices, experimental and testing laboratories, manufacturing of electronic and other high-end complex products, a limited amount of warehouse and distribution, and similar uses as stated in PD-I 22-001, the zoning for the property (**Exhibit D**). The SMP 39/SMP 40 Project includes (i) on SMP 39, approximately six light industrial buildings consisting of up to 755,500 square feet (sf) of development and, (ii) on SMP 40, two light industrial buildings consisting of up to 759,275 sf of development. **Exhibit C** shows the proposed site plan for the SMP 40 Development. Developer and City intend that separate Pre-annexation and Development Agreements will be entered into for SMP 39 and SMP 40, respectively, in order to segregate the rights and obligations related to each property. This Agreement, as reflected herein, addresses the SMP 40 Property and no other property.

I. The Developer has applied for the following entitlements ("Entitlements") for the SMP 40 Property from the City of Livermore as required under the Livermore Development Code, to be vested in accordance with this Agreement pending annexation of the SMP 40 Property into the City of Livermore:

- General Plan Amendment (GPA 21-001) to change the City of Livermore designation of SMP 39 and SMP 40 from *Open Space/Sand and Gravel* (OSP/S&G) to *Low-Intensity Industrial* (LII) and to change the City of Livermore designation of the Additional Annexation Only Parcels from *Open Space/Sand and Gravel* (OSP/S&G) to *Parks, Trailways, Recreation Areas* (OSP) (the "General Plan Amendment" or "GPA");

- Pre-zoning of SMP 39 and SMP 40 (DCA 21-005, ZMA 21-002 and PD-I 22-001) by (i) amending the City's zoning map to rezone SMP 39 and SMP 40 to the *Planned Development - Industrial* (PD-I) 22-001 zoning district, which includes the "Planned Development-Industrial 22-001 Zoning Standards" described more fully in attached **Exhibit D**; and (ii) pre-zoning the Additional Annexation Only Parcels to *Open Space Flood Plain* (the "Prezoning"). The Prezoning shall become effective with respect to SMP 39, SMP 40, and the Additional Annexation Only Parcels upon their annexation to the City in accordance with California Government Code section 65859;

- SOI Amendment and Annexation (APZ 21-003) authorizing submittal of an application to the Alameda County Local Agency Formation Commission ("LAFCo") to (i) include SMP 39 within the City of Livermore's SOI (and remove SMP 39 from the City of Pleasanton's SOI); and (ii) annex SMP 39, SMP 40, and the Additional Annexation Only Parcels from Alameda County into the City;

- Vesting Tentative Parcel Map 11219 (SUB 21-009) authorizing the creation of two development parcels for the SMP 40 Property, (the "Tentative Map");

- Site Plan Design Review (SPDR 21-008) certifying compliance with the "Applicable Rules" (meaning the rules, regulations, and official policies of the City, including but not limited to the City's General Plan and Livermore

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Development Code, as they existed on the Effective Date, except as otherwise amended by the approved Entitlements or this Agreement) and the Planned Development Standards with respect to the development proposed on the SMP 40 Property (the "SPDR Approval"); and

- This Pre-annexation and Development Agreement (DA 23-002) to vest certain rights to the Developer and to provide specific public benefits that meet certain public purposes of the local government.

In addition to the above listed Entitlements, an EIR (SCH #2023010091) for the SMP 39/SMP 40 Project has been prepared in accordance with CEQA to evaluate potential impacts to the environment of the SMP 39/SMP 40 Project, including the Entitlements.

J. The City Council finds that the SMP 39/SMP 40 Project is in the public interest; will establish land uses compatible with the physical nature of the SMP 40 Property and the surrounding area; will generate light industrial development and activity to meet local and regional goals; and will provide certain substantial public benefits and help attain certain other public objectives including, without limitation: (i) including construction of and a $750,000 financial contribution toward off-site trail improvements, creating connections to the City's existing trail networks as identified in the *Active Transportation Plan* ("ATP"); and (ii) a commitment to the funding of $100,000, payable over a two-year term in increments of $50,000 per year, to facilitate uses that support an innovation-driven economy, generate high wage jobs, or generate substantial sales tax revenues as determined by the Director of Innovation and Economic Development. Items (i) through (ii) above, and as described more fully in Section 4, are collectively referred to as the "Public Benefits").

K. This Agreement will promote and encourage the SMP 40 Development by providing the Developer and its creditors with a greater degree of certainty of the Developer's ability to expeditiously and economically complete the development effort for the SMP 40 Property, and the Parties agree that the consideration to be received by the City pursuant to this Agreement and the rights secured to the Developer hereunder constitute sufficient consideration to support the covenants and agreements of the City and the Developer. By entering into this Agreement, the City desires to allow the Developer to design, apply for, and if approved to develop the SMP 40 Property pursuant to this Agreement, the land use ordinances, rules, regulations, and policies applicable on the "Effective Date," as defined in Section 2, and to vest in Developer, upon annexation, to the fullest extent possible under the law, development entitlements in order to complete the SMP 40 Development, consistent with Section 5(c) of this Agreement.

L. The SMP 40 Development has been extensively reviewed and considered by the City and its officers, agencies, and departments. The proposed uses have been found to accommodate the City's recommendations and suggestions in order to protect the public's interest and to enhance the desirability, from the public's perspective, of the SMP 40 Development.

M. The City conducted duly noticed public hearings on this Agreement pursuant to Government Code section 65867 and Livermore Development Code sections 9.04.040 and

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

9.04.050 and found that the provisions of this Agreement and its purposes are consistent with the objectives, policies, general land uses, and programs specified in the City's General Plan and Livermore Development Code.

N. This Agreement was adopted by ordinance of the City Council on _____, 2024 and approved upon a second reading on _____, 2024 after notice and public hearings before the Planning Commission and City Council, and after City Council certification of an EIR in accordance with CEQA, Public Resources Code section 21000 *et seq*.

NOW, THEREFORE, the City and Developer hereby agree that the aforementioned recitals are true and correct and incorporated by reference as fully set forth below, and further agree as follows:

1. The Property. The SMP 40 Property is described in **Exhibit A**, attached hereto. The SMP 40 Development includes two light industrial buildings consisting of up to 759,275 sf of development. A comprehensive description of the SMP 40 Development and a proposed site plan is in attached **Exhibit B** (SMP 40 Development Description) and **Exhibit C** (Site Plan for the SMP 40 Property).

2. Effective Date. The effective date of this Agreement (the "Effective Date") is the later of (a) thirty (30) days after the date the Ordinance approving this Agreement is adopted by the City Council and attested by the City Clerk, or (b) if a referendum petition is timely and duly circulated, filed and qualified by the Elections Official, the date the election results on the ballot measure by City voters approving this Agreement are certified by the City Council in the manner provided by the Elections Code. This Agreement shall be executed by the City within ten (10) days after the Effective Date and recorded as provided in Government Code Section 65868.5.

3. Term. The term of this Agreement is ten (10) years ("Term"), beginning on the date annexation proceedings for SMP 39, SMP 40, and the Additional Annexation Only Parcels are complete ("Annexation Date"). The Agreement may be extended as provided for in the Development Agreement Statutes and the Livermore Development Code, subject to the written consent of the City and Developer. The terms of the Entitlements shall be automatically extended such that the Entitlements remain in effect for any extended Term.

   Following the expiration of the Term, or the earlier completion of development of the SMP 39/SMP 40 Project and all of Developer's obligations in connection therewith, or the failure of SMP 39 or SMP 40 to be annexed into the City of Livermore in accordance with Section 5(g) of this Agreement, this Agreement shall be terminated and of no further force and effect, subject, however to the provisions of Section 10 and Section 16.

4. Developer Obligations; Schedule of Performance. The Developer shall comply with the requirements set forth in the Schedule of Performance and tasks listed below. The Schedule of Performance is subject to revision from time-to-time as mutually agreed upon in writing between the City and the Developer, which shall be accomplished through a separate document and without the need to amend this Agreement. The City

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Manager shall have the authority to approve on behalf of the City any revision to a date in the Schedule of Performance that he or she deems appropriate, provided that the revision extends the performance deadline for a time period no longer than one year. Developer shall comply with the following Schedule of Performance:

a. Developer shall initiate timely applications for the SOI amendment for SMP 39 and the annexation for SMP 39, SMP 40, and the Additional Annexation Only Parcels, which shall be reviewed by the appropriate decision-making bodies for each parcel, which may include the City of Pleasanton, Livermore City Council and LAFCo.

b. Developer shall pay a $100,000 cash contribution to the City of Livermore Office of Innovation and Economic Development Department for marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    i. Prior to issuance of the first building permit for the SMP 40 Property, the Developer shall pay an initial $50,000 cash contribution to the City of Livermore Office of Innovation and Economic Development Department, which is to be used towards marketing SMP 39 for the desired land uses identified in PD-I 22-001.

    ii. Developer shall pay a second $50,000 contribution to the City of Livermore Office of Innovation and Economic Development Department no later than one (1) year following the receipt of the initial $50,000 contribution, to be used toward further marketing SMP 39 for the desired land uses identified in PD-I 22-001.

c. In addition to the on-site trail required by the Project, as set forth in the Conditions of Approval, Developer shall construct an off-site grade-separated overcrossing (bridge) of Isabel Avenue/State Route 84 north of the existing railroad tracks and Stanley Boulevard as a required public benefit ("the Trail Overcrossing"). Developer shall also construct trail connections from the terminus of the bridge to the existing off-site Arroyo Mocho trail east of Isabel Avenue and from the terminus of the bridge west of Isabel Avenue, north to the existing trail along the Zone 7 property (north of the Arroyo Mocho Channel) ("the Trail Connections"). The Trail Overcrossing shall have a span of approximately 190-210 feet and shall run parallel with the existing railroad tracks. The materials shall consist of a fabricated truss and a weathered steel span bridge with concrete flooring. The Trail Overcrossing shall be supported by two cast-in-place concrete abutments which are supported by cast-in-drilled-hole concrete piles. An approach retaining wall shall be required on the east end. The Trail Overcrossing shall be cambered so it will drain from the middle to each end and then drain to the edges and connect to Caltrans storm drains. A site plan and preliminary design details are provided in **Exhibit E**. Final designs shall be conditioned to meet the requirements of applicable permitting agencies. Permits shall be required from the City of Livermore and Caltrans. In addition, an encroachment permit will be required from Caltrans. The Trail Overcrossing and Trail Connections shall be designed as described above or with similar design features as approved by the Community Development Director. The Trail Overcrossing and Trail Connection design shall

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

include lighting, cameras, and/or other safety and security measures as required by the City's Chief of Police and City Engineer.

i. As part of Final Map submittal for the SMP 40 Property, the Developer shall pay for and submit design plans, cost estimates, and project bids to the City for review and approval for the Trail Overcrossing and the Trail Connections. Developer shall work to secure and provide a competitive cost for the bridge, consistent with commercially reasonable costs and construction practices. The Trail Overcrossing and Trail Connection design shall be approved by the City before the Developer can apply for any permits related to the Trail Overcrossing and Trail Connection. Developer may submit the Final Map to the City without the Trail Overcrossing and Trail Connections details if the City Engineer determines, in his or her discretion, that the delay in the preparation of said details was due solely to delay by a public agency other than the City.

ii. The Developer's monetary contribution towards the costs of the Trail Overcrossing and Trail Connections shall equal Seven-Hundred-Fifty-Thousand Dollars ($750,000.00) (the "Developer Obligation"). The $750,000 Developer Obligation is in addition to the design and permitting costs the Developer is responsible as set forth in the Agreement. As part of Final Map approval, Developer shall enter into a Subdivision Improvement Agreement which will reference the Developer Obligation.

iii. Prior to Final Map approval, the Developer shall enter into a Community Facilities District to fund long-term maintenance and replacement of the on-site trail improvements and associated landscaping and retaining walls and the off-site trail improvements located within the Zone 7 trail easement associated landscaping and retaining walls.

iv. Prior to issuance of Certificate of Occupancy for Building 2 on the SMP 40 Property, the Developer shall pay for and obtain all necessary permits and approvals from all applicable government agencies, including but not limited to the City and Caltrans and complete all on- and off-site trail improvements including the Trail Overcrossing and the Trail Connections, subject to acceptance of the public improvements by the Livermore City Council.

v. If Developer fails to complete the Trail Overcrossing and Trail Connections prior to the issuance of the Certificate of Occupancy of Building 2 on the SMP 40 Property, Developer shall provide an irrevocable letter of credit from J.P. Morgan Chase, Wells Fargo Bank, or Bank of America in the amount of the remaining estimated cost of construction of the Trail Overcrossing and the Trail Connections, plus a 25 percent contingency added to the remaining estimated cost. The irrevocable letter of credit shall provide the City with sole and unilateral release of funds and shall be in a form approved by the City Attorney. The remaining estimated cost shall be determined by an updated Engineer's cost estimated provided and approved by the City Engineer prior to the issuance of Certificate of Occupancy for Building 2. Unless the City

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Engineer determines in his or her discretion that a delay by a public agency other than the City was the sole reason for Developer's failure to complete to the Trail Overcrossing or Trail Connection, the Developer Obligation to the Trail Overcrossing and Trail Connections shall increase every six months following issuance of the Certificate of Occupancy of Building 2 on the SMP 40 Property until the Trail Overcrossing and the Trail Connections have been completed, including acceptance of the public improvements by the Livermore City Council as follows: $25,000 every six months during year one, $50,000 every six months during year two, and $75,000 every six months during year three. The Developer shall remain responsible for paying for and obtain all necessary permits and approvals from all applicable government agencies as noted in Section 4(c)v and completing all on- and off-site trail improvements including the Trail Overcrossing and the Trail Connections, subject to acceptance of the public improvements by the Livermore City Council. The obligation to provide an irrevocable letter of credit shall be independent of, and in addition to, the City's standard bond requirements under the Subdivision Improvement Agreement.

vi. In accordance with Chapter 12.30, Traffic Impact Fee on Development Section 12.30.080, Credit and Reimbursement, the Developer shall be eligible for Traffic Impact Fee (TIF) credits to construct the Trail Overcrossing and Trail Connection costs, less the $750,000 Developer Obligation. As described further in attached **Exhibit F**, City shall provide Developer a TIF credit of the SMP 40 Project's Traffic Impact Fees (the "Impact Fee Credit") for the identified Engineer's cost estimate (or up to 10 percent over this estimate as specified above). If the construction cost estimate exceeds 10 percent of the Engineer's cost estimate, the Developer shall pay the remaining Trail Overcrossing and Trail Connections cost over the Engineers estimate. The Impact Fee Credit shall be credited against the TIF that are collected at the time each building permit is paid, and on a permit-by-permit basis as Developer's obligations to pay such impact fees accrue until the last SMP 40 Project building permit is issued. Notwithstanding anything to the contrary in this Agreement, if the Engineer's cost estimate has not been prepared and/or approved prior to when payment of TIF is due, Developer shall pay the applicable TIF when due and City shall provide Developer a cash reimbursement in the dollar amount of TIF Credit within thirty (30) business days after City Engineer's review and approval of the Engineer's cost estimate, such approval not being unreasonably withheld, conditioned, or delayed.

5. Vested Development Rights. Subject to annexation into the City and the terms of this Agreement, the SMP 40 Development shall vest in accordance with this Agreement, and the Developer has the right to develop and use the SMP 40 Property in accordance with:

   a. The City's General Plan and the Livermore Development Code in effect on the Effective Date and the Entitlements in effect on the Annexation Date;

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

b. All other City policies, ordinances, resolutions, rules, regulations, and standards applicable to development or use of the SMP 40 Property on the Effective Date, except that Developer shall:

(1) Pay the processing and development impact fees applicable City-wide that are in effect at the time the fees are paid. Payment for said fees shall be made prior to issuance of any building permits.

(2) Comply with Building Code requirements in effect on a City-wide basis at time of Building permit submittal;

(3) Comply with construction and technical design standards or specifications for public improvements that are applicable City-wide at time of Building permit submittal;

(4) Comply with changes in City laws, regulations, plans, or policies applicable City-wide, the terms of which are found by the City Council, based on substantial evidence, to be necessary to protect members of the public from a condition dangerous to public health or safety;

(5) Comply with a change in City law, regulations, plans, or policies that is:

i. Specifically mandated by state or federal law, or by any regional governmental agency that has legal authority over the City under state law or a joint powers agreement; or

ii. A result of or in response to state or federal law, or regional agency action, made necessary in order for the City to avoid losing or not receiving substantial funding or other substantial public benefits or facilities that would be available to the City only if it makes such a change; or

iii. Specifically mandated by, or necessary for compliance with or implementation of, the terms of any permit, entitlement, or other authorization necessary for the development of the Property that is issued or granted to the City, County, and/or Developer by any federal, state or regional agency;

(6) Following any subsequent environmental review, comply with required mitigation measures; and

c. In the event that Developer applies for any subsequent entitlements, subsequent entitlements shall be subject to the City's ordinances, rules, regulations and policies in effect on the date of submittal of the subsequent entitlements.

d. If there is any inconsistency between this Development Agreement and a permit or entitlement issued for the SMP 40 Property, this Development Agreement shall control.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

e. Developer acknowledges that execution of this Agreement by the City does not constitute approval of any required permits, applications, or allocations, and in no way limits the discretion of the City in the permit, allocation, and approval process in accordance with the limitations set forth herein.

f. Upon annexation of SMP 39 and 40, Developer agrees that all mining permits previously granted by Alameda County on the SMP 39 and SMP 40 properties shall be forfeited, and no mining operations shall occur on the SMP 39 Property or the SMP 40 Property. No later than 60 days from the date LAFCo approves annexation of the SMP 40 Property, subject to any extension granted by the City, Developer shall coordinate with Alameda County to complete any final actions required to remove the mining permits and all associated permissions related to mining operations from the SMP 39 and SMP 40 properties.

g. The Parties agree that the obligations set forth in this Agreement are conditioned upon the passing of a City Council Resolution authorizing submittal of an application to LAFCo for SOI and Annexation, the filing of an application with LAFCo to modify the SOI for SMP 39, annex SMP 39, SMP 40 and the Additional Annexation Only Parcels, requesting waiver of notice, hearing and protest from LAFCo, subject to LAFCo approval. Furthermore, the Parties also agree that the obligations set forth in this Agreement are conditioned upon the approved and finalized SOI modification and annexation of the SMP 39 and SMP 40 Properties and the Additional Annexation Only Parcels into the City of Livermore. Upon approval of the SMP 39/SMP 40 Project by the City, the City agrees to act in good faith, in collaboration with the Developer, to support and timely process the annexation application with LAFCo. The Developer shall be responsible for all costs associated with annexation, including but not limited to preparation of the LAFCo application, LAFCo application submittal fees, and any other City-related annexation fees. Annexation of SMP 39, SMP 40, and the Additional Annexation Only Parcels shall be completed no later than 18 months from the Effective Date of this Agreement, unless extended by written agreement of the Parties. If the annexation is not completed within this time period, subject to any agreed upon extension, the Agreement is null and void.

h. Developer shall not dispute or challenge the validity of the Pre-annexation and Development Agreement for SMP 39. Any legal challenge to the validity or enforceability of the Pre-annexation and Development Agreement for SMP 39 shall constitute a legal challenge to the Pre-annexation and Development Agreement for SMP 40 and the SMP 39/SMP 40 Project. In the event of a valid legal challenge, this Agreement shall be terminated after all appeals have been exhausted before a final court of judgment, or issuance of a final court order directed to the City to set aside, withdraw or abrogate the City's approval of this Agreement or the Pre-annexation and Development Agreement for SMP 39.

7. Periodic Review. Review of this Agreement shall be made annually, consistent with Government Code section 65865.1 and Livermore Development Code Chapter 9.04.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

8. Amendments. The Agreement may be amended in writing by the Parties, by mutual agreement, consistent with the procedures set forth in the Development Agreement Statutes and the Livermore Development Code, as they are amended from time-to-time.

9. Force Majeure. The Term of this Agreement shall be extended by, and the performance by any Parties of their obligations hereunder (other than for payment of money) shall be excused during, any period of "Force Majeure" as hereinafter defined. "Force Majeure" means a delay caused by any labor disputes or strikes, labor or material shortages or embargoes, pandemic, fire, unusual delay in transportation, earthquakes, floods, tornadoes or extreme wind or other adverse weather conditions not reasonably foreseeable by Developer, or material adverse underground conditions not reasonably foreseeable by Developer.

10. Remedies for Default. If a Party is in default under this Agreement, another Party may pursue one or more of the following courses of action after providing 30 days' written notice to the purportedly defaulting Party (or such longer period as may be required to cure the default, so long as such Party commences the cure within such 30-day period and diligently pursues the cure to completion): (a) waive the default; (b) in the City's case, pursue administrative remedies, including denial or otherwise withholding issuance of building permits, certificates of occupancy, or other approvals; (c) pursue judicial remedies; or (d) terminate this Agreement. Any purported default by a Party hereunder shall be subject to, and tolled by, any event of Force Majeure that prevents such Party from performing the act necessary to avoid or cure such purported default. Any such tolling shall end at the termination of the event of Force Majeure.

11. Termination. This Agreement shall terminate upon the earlier of (i) expiration of the Term, or (ii) in the event that SMP 39, SMP 40, and the Additional Annexation Only Parcels are not annexed into the City in accordance with Section 5(g) of this Agreement (iii) when the SMP 39/SMP 40 Project has been completed and all of Developer's obligations have been fully satisfied as reasonably determined by the City, or (iv) after all appeals have been exhausted before a final court of judgment, or issuance of a final court order directed to the City to set aside, withdraw or abrogate the City's approval of this Agreement or any material part thereof, or the Pre-annexation and Development Agreement for SMP 39 or any material part thereof. Upon termination of this Agreement as to the SMP 39/SMP 40 Project, at the request of Developer, the City shall record a Notice of Termination for each affected parcel in a form satisfactory to the City Attorney in the Office of the Alameda County Recorder. In the event this Agreement is terminated, neither party shall have any further rights or obligations hereunder except for those obligations of Developer set forth in Section 12 (No Damages Relief) and Section 16 (Legal Action; Attorneys' Fees).

12. Mortgagee Protection.

    a. This Agreement shall not prevent or limit Developer in any manner, at Developer's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust, or other security device securing financing with respect to the Property ("Mortgage"). This

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Agreement shall be superior and senior to any lien placed upon the Property or any portion thereof after the date of recording this Agreement, including the lien of any Mortgage. Notwithstanding the foregoing, no breach hereof shall defeat, render invalid, diminish, or impair the lien of any Mortgage made in good faith and for value, but all of the terms and conditions contained in this Agreement shall be binding upon and effective against and inure to the benefit of any person or entity, including any deed of trust beneficiary or mortgagee ("Mortgagee") who acquires title to the Property, or any portion thereof, by foreclosure, trustee's sale, deed in lieu of foreclosure, or otherwise.

b. *Liability for Past Defaults*. Any Mortgagee, including the successful bidder at a foreclosure sale, who takes title and possession of the Property, or any portion thereof, pursuant to such foreclosure, shall take the Property, or portion thereof, subject to the provisions of this Agreement; provided, however, in no event shall such Mortgagee be liable for any defaults or monetary obligations of Developer arising prior to acquisition of title to the Property by such Mortgagee. Notwithstanding the preceding sentence, in no event shall any such Mortgagee or its successors or assigns be entitled to a building permit, final inspection, or occupancy certificate until all fees and other monetary obligations due under this Agreement have been paid to the City and any other existing defaults under this Agreement that are reasonably subject to cure are cured.

c. *Notice of Default to Mortgagee; Right of Mortgagee to Cure*. If City receives a notice from a Mortgagee requesting a copy of any Notice of Default given to Developer hereunder and specifying the address for service thereof, then City shall deliver to such Mortgagee, concurrently with service thereon to Developer, any notice given to Developer with respect to any claim by City that Developer has committed a default. If the City makes a determination of noncompliance hereunder, City shall likewise serve notice of such noncompliance on such Mortgagee concurrently with service thereof on Developer. Each Mortgagee shall have the right (but not the obligation) during the same period available to Developer to cure or remedy, or to commence to cure or remedy, the event of default claimed or the areas of noncompliance set forth in City's notice.

13. No Damages Relief. The Parties acknowledge that the City would not have entered into this Agreement were it exposed to damages claims from Developer for any breach thereof. As such, the Parties agree that in no event shall Developer be entitled to recover damages against City for breach of this Agreement. To the extent permitted by law, specific enforcement of this Agreement, including specific performance of Developer's payment obligations set forth in Sections 4(b) and 4(c) and the City's TIF credit obligations set forth in Exhibit F, is the proper and desirable remedy.

14. Recordation: Binding Effect. This Agreement shall be recorded in the office of the Alameda County Recorder and shall be binding upon and inure to the benefit of any successors in interest to the Parties. The Parties acknowledge that, as of the date of preparing this Agreement, the Property is owned in fee by Seller and that Seller shall have all rights and obligations of "Developer" under this Agreement.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

15. Release Upon Transfer. Upon the sale, transfer, or assignment, in whole or in part, of Developer's right and interest to all or any portion of the Property, Developer shall be released from its obligations hereunder with respect to the portion so conveyed, provided: (i) Developer (or transferee) was not in default of this Agreement at the time of conveyance, (ii) Developer provided to City prior written notice of such transfer, and (iii) with respect to sale or transfer of any lot that has not been fully improved, the transferee executes and delivers to City a written assumption agreement in which: (a) the name and address of the transferee is set forth, and (b) the transferee expressly assumes the obligations of Developer under this Agreement as to the portion of the Property conveyed. Failure to deliver a written assumption agreement hereunder shall not negate, modify, or otherwise affect the liability of any transferee pursuant to the provisions of this Agreement.

16. Timing of Development.

    a. Because the California Supreme Court held in *Pardee Construction Co. v. City of Camarillo*, 37 Cal.3d 465 (1984), that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over the parties' agreement, it is the Parties' intent to avoid that result by acknowledging, that unless provided for in this Agreement, Developer shall have the right (without obligation) to develop the Property in such order and at such rate and at such times as Developer deems appropriate within the exercise of its subjective business judgment, subject to the terms, requirements and conditions of the Entitlements and this Agreement.

    b. Developer will use its best efforts, in accordance with its own business judgment and taking into consideration market conditions and other economic factors influencing Developer's business decision, to commence or to continue development, and to develop the Project in a regular, progressive, and timely manner in accordance with the terms, requirements and conditions of the Entitlements and this Agreement.

17. Legal Action; Attorneys' Fees. If the City chooses to defend any third party claim or suit challenging any action taken by the City with regard to this Agreement or any procedure or aspect of the City's approval of the development of the SMP 40 Development, including the environmental review process, the Developer in its capacity as either Developer or owner of the Property agrees to reimburse the City for the City's reasonable attorneys' fees, expert witness fees, and related costs as the City may incur in connection with its retention of outside counsel, and for any award of court costs or fees against the City. The City has the right to choose and retain such legal counsel as the City deems appropriate. After expenses reach $100,000, and each $100,000 thereafter, the Parties will confer to review the status of the litigation and their options for proceeding or settling, and they will negotiate in good faith about how the expenses will be allocated. The Developer, in its capacity as the Developer or owner of the Property, shall have no obligation to reimburse the City for costs incurred after the date on which the Developer or owner of the Property give the City written notice of their decision to settle a case, even if the City does not agree to the settlement. If legal action is brought by one of the

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

Parties to enforce a provision of this Agreement, the prevailing party is entitled to reasonable attorneys' fees, expert witness fees, and court costs.

18. Notices. The address of each party for the purpose of all notices permitted or required by this Agreement is as follows:

To City:	City of Livermore 1052 South Livermore Avenue Livermore, CA 94550 Attention: Community Development Director and Ashley Vera, Senior Planner
With a copy to:	City Attorney City of Livermore 1052 South Livermore Avenue Livermore, CA 94550
To Developer:	Overton Moore Properties 19700 South Vermont Avenue, Suite 101 Torrance, CA 90502 Attention: Timur Tecimer
With a copy to:	Cox, Castle & Nicholson LLP 50 California Street, Suite 3200 San Francisco, CA 94111 Attention: Christian Cebrian
To Seller:	SMP-40, LLC 1459 18th St #317 San Francisco, CA 94107 Attention: Jennifer Jimenez-Cruz
With a copy to:	Allen Matkins Three Embarcadero Center 12th Floor San Francisco, CA 94111 Attention: Marshall Wallace

The written address of each Party set forth above may be changed by written notice given not less than five (5) days prior to the date such change is to be in effect. All notices under this Agreement shall be in writing, shall be properly addressed, and shall be sent by personal delivery, United States mail (registered, certified, or Express Mail, return receipt requested and postage prepaid), or by overnight courier delivery service. All such notices shall be considered delivered: (i) if personally delivered, on the date of delivery; (ii) if sent by United States mail in the manner prescribed above, on the date shown on the return receipt for acceptance or rejection; or (iii) if sent by overnight courier delivery

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

service, on the date of delivery or attempted delivery as shown by the written delivery record of such service.

19. Severability; Choice of Law If any term, provision, condition, or covenant of this Agreement, or the application thereof to any Party or circumstances, shall to any extent be held invalid or unenforceable, the remainder of the instrument, or the application of such term, provision, condition, or covenant, or the application of such term, provision, condition, or covenant to persons or circumstances other than those as to whom or which it is held invalid or unenforceable, shall not be affected thereby and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law. This Agreement shall be governed by the laws of the State of California.

20. Covenants Run with the Land. All of the terms, provisions, covenants, conditions, rights, powers, duties and obligations contained in this Agreement shall be binding upon the parties and their respective heirs, successors and assigns acquiring any portion of the Property and shall inure to the benefit of the parties and their respective heirs, successors and assigns.

21. No Third Party Beneficiaries. This Agreement is entered only for the benefit of the Parties executing this Agreement, their successors in interest. This Agreement is not for the benefit of any other individual, entity or person. Nothing herein shall be construed to create any right of any third party to enforce this Agreement or to seek any benefit therefrom.

22. Time Is of the Essence. Time is of the essence for each provision of this Agreement for which time is an element.

23. Certificate of Compliance. Any Party may, at any time, request that the City indicate in writing: (i) whether this Agreement is in full force and effect; (ii) whether this Agreement has been amended or modified, and if so amended, the nature of any such amendments; or (iii) whether to the best of City's knowledge the requesting Party is in default in the performance of any of its obligations under this Agreement, and if in default, the nature of any such default. City shall endeavor in good faith to respond to any such request within thirty (30) days following the receipt thereof. The Parties shall be entitled to one certificate of compliance per year without any fee being assessed by the City. For any additional certificates of compliance requested in a single year, the City may charge the requesting party a reasonable fee related to the actual cost to prepare the certificate.

24. Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which constitute one and the same instrument.

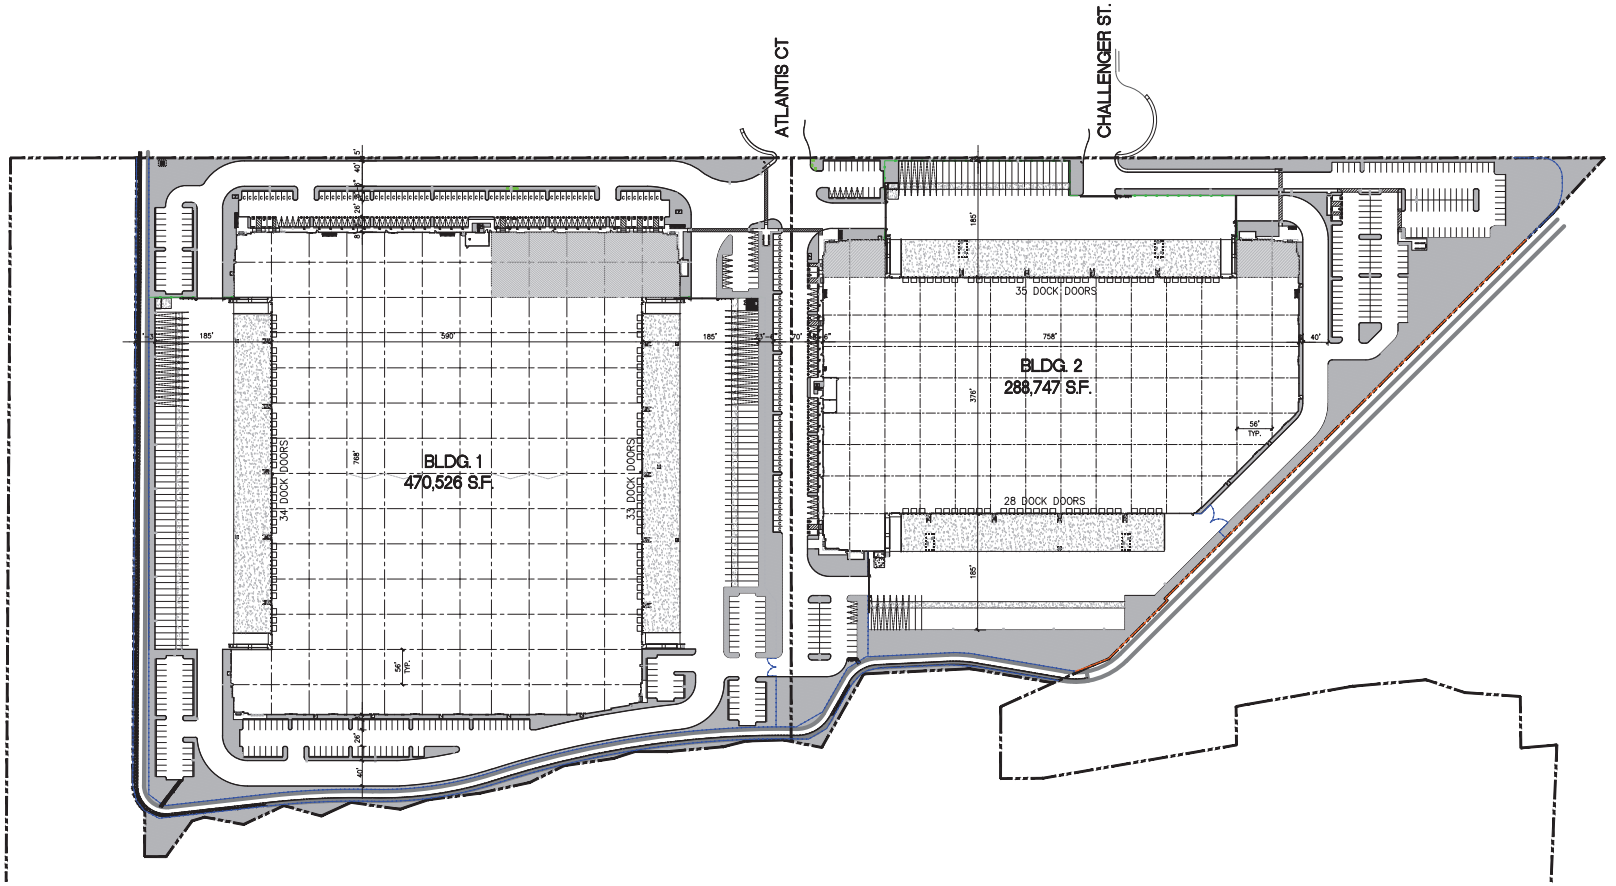
SMP 40 Development Description

Assessor Parcel Number 904-10-2-2 is also known as SMP 40 ("SMP 40 Property"). The aforementioned SMP number references the Surface Mining Permit (SMP) numbers applicable to the site. The Surface Mining Permit for the SMP 40 Property was approved by Alameda County in 2004 to allow for the extraction of sand and gravel (i.e., aggregate) within the site; however, aggregate mining has not occurred within the SMP 40 Property. The SMP 40 Property is approximately 41 acres and is located within unincorporated Alameda County, the City of Livermore Sphere of Influence (SOI), and the City of Livermore South Livermore Urban Growth Boundary (UGB). The Property is zoned Agricultural by Alameda County with a County General Plan designation of Industrial. The SMP 40 Property has a City of Livermore General Plan designation of Open Space/Sand and Gravel.

Surrounding existing uses include the Oaks Business Park to the north; single-family residences to the east, across Isabel Avenue/SR 84; the Arroyo Mocho, open fields, railroad tracks, and gravel quarries associated with mining operations to the south, across Stanley Boulevard; and vacant land, gravel quarries, and industrial ponds associated with mining operations to the west.

Developer shall construct two light industrial buildings on the SMP 40 Property totaling up to 759,275 square feet (sf) of new building area and associated internal roadways, parking, landscaping, utilities, on- and off-site trail improvements, and other improvements ("SMP 40 Development"). The approximately 470,530-sf Building 1 shall be located on the western portion of the SMP 40 Property and include a total of 68 loading dock doors along the western and eastern sides of the building (34 on each side). The approximately 288,750-sf Building 2 would be located on the eastern portion of the SMP 40 Property and include a total of 62 loading dock doors along the northern and southern sides of the building (34 on the north and 28 on the south). A total of 742 vehicle parking stalls and 90 trailer parking stalls shall be provided at the SMP 40 Property. Each building shall have a maximum height of 50 feet or 55 feet with a Conditional Use Permit.

The SMP 40 Development shall comply with the development requirements including land use, building and landscape setbacks, height, lot coverage, parking, and other required standards as set forth in the Planned Development - Industrial 22-001 (PD-I 22-001) zone. Access to the SMP 40 Property shall be provided through new internal roadway connections to Atlantis Street and Challenger Street to the north, which currently serve the existing Oaks Business Park. The new roadway connections shall be located between Buildings 1 and 2 and shall provide access to the internal drive aisles around each building.



The SMP 40 Development includes a paved at-grade, on-site trail along the boundaries of the SMP 40 Property, consistent with the City's Active Transportation Plan. Specifically, the on-site trail shall extend from the northeastern corner of the site, along the SMP 40 Property's eastern, southern, and western boundaries, before connecting to the existing off-site trail at the northwestern corner of SMP 40 Property, which extends along the west side of the Oaks Business Park to the north and connects to West Jack London Boulevard. The portion of the on-

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

site trail located along the SMP 40 Property's eastern and southern boundaries shall be located within a Zone 7 easement north of the Arroyo Mocho.

In addition to the on-site trail required on the SMP 40 Property, an off-site grade-separated overcrossing (bridge) of Isabel Avenue/State Route 84 north of the existing railroad tracks and Stanley Boulevard is a required public benefit ("the Trail Overcrossing"). The SMP 40 Development includes construction of trail connections from the terminus of the bridge to the existing off-site Arroyo Mocho trail east of Isabel Avenue and to the future on-site trail along the SMP 40 Property frontage to the west of Isabel Avenue ("the Trail Connections"). The Trail Overcrossing shall have a span of approximately 190-210 feet and shall run parallel with the existing railroad tracks. The materials shall consist of a fabricated truss and a weathered steel span bridge with concrete flooring. The Trail Overcrossing shall be supported by two cast-in-place concrete abutments which are supported by cast-in-drilled-hole concrete piles. An approach retaining wall shall be required on the east end. The Trail Overcrossing shall be cambered so it will drain from the middle to each end and then will drain to the edges and connect to Caltrans storm drains. A site plan and preliminary design details are provided in **Exhibit E**. Final designs shall be conditioned to meet the requirements of applicable permitting agencies. Permits shall be required from the City of Livermore and Caltrans. In addition, an encroachment permit will be required from Caltrans. The Trail Overcrossing and Trail Connections shall be designed as described above or with similar design features as approved by the Community Development Director. The Trail Overcrossing and Trail Connection design shall include lighting, cameras, and/or other safety and security measures as required by the City's Chief of Police and City Engineer.

SMP 39 & SMP 40

Planned Development – Industrial (PD-I) 22-001

Reviewed by Planning Commission: March 5, 2024
Approved by City Council: March 25, 2024

Purpose: The purpose of establishing this Planned Development-Industrial (PD-I 22-001) District (District) is to regulate the development of ± 51.9 acres of land located on Jack London Boulevard, west of Oaks Business Park and south of Livermore Municipal Airport (commonly referred to as "SMP 39") and ± 41 acres of land located south of Oaks Business Park, at the south end of Atlantis Street and Challenger Street (commonly referred to as "SMP 40"), as shown in the attached figure (Figure 1). The intent of this District is to accomplish the following:

1. PD-I 22-001 is intended to provide an environment exclusively for and conducive to the development and protection of modern professional and administrative facilities, research institutions, manufacturing operations, experimental and testing laboratory and related uses, any similar employment generating high-end industrial users, all of a non-nuisance type.
2. The District is intended to provide for an aesthetically attractive working environment with park- and/or campus-like grounds, attractive buildings, employee parking, and other amenities appropriate to a mix of office and industrial uses.
3. The District is intended to establish development standards and regulations consistent with the intent of the Low Intensity Industrial General Plan designation.
4. Any land use that utilizes hazardous materials shall be subject to the regulations of Section 6.02.040, Hazardous Materials, of the Livermore Development Code, as it exists now or is amended in the future.
5. Development shall be in conformance with the requirements of the Livermore Development Code as it exists now or is amended in the future, except as modified by the following regulations.
6. Development is subject to the Citywide Design Standards and Guidelines as they exist now or may be amended in the future unless otherwise modified by the following regulations.

A. Principal Permitted Uses:

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

The following are the principal permitted uses for SMP 39[1] and SMP 40:

1. Research and development facilities
2. Professional and administrative offices
3. Experimental and testing laboratories
4. Manufacture of electric and electronic circuits, instruments, and devices
5. Manufacture of pharmaceutical products or life science facility, not exceeding Biosafety Level 2[2]
6. Medical diagnostic and manufacturing facilities
7. Manufacturing and assembly of motor vehicle parts, including but not limited to dashboards, parts, component systems, electrical connectors, sensors, panels, airbags, seats, tires, windows etc. for all vehicles and similar equipment (e.g. automobiles, motorcycle, construction equipment, farm equipment, buses).
8. Similar uses as determined by the Community Development Director to be of the same general character as the listed uses.

Additional Permitted Uses for SMP 39 only:

1. Restaurants, except fast food

Additional Permitted Uses for SMP 40 only:

1. Warehousing and distribution facilities, dry or refrigerated
2. Warehousing and distribution facility – E-commerce/Third Party Logistics (3PL)
3. Manufacturing, assembly, processing, storage, or packaging of products from previously prepared materials such as, but not limited to, cloth, plastic, paper, leather, and precious or semi-precious metals or stones, <u>but not including the following</u>:
   A. Operations such as saw and planing mills, any manufacturing uses involving primary production of wood, metal, or chemical products from raw materials, and similar uses
   B. Vehicle dismantling yards, scrap and waste yards
   C. Manufacturing, processing, storing, or packaging chemicals, petroleum, heavy agricultural products or other hazardous materials.

[1] SMP 39 and SMP 40 are located with the Airport Influence Area and the Livermore Airport Protection Area. Per the Alameda County Airport Land Use Compatibility Plan, the majority of SMP 39 is located in Safety Zone 6, with a portion of the site located in Safey Zone 3. The principal permitted land uses are intended to be located in buildings that are only within the portion of SMP 39 that is located in Safety Zone 6.

[2] Per the Centers for Disease Control and Prevention, Biosafety Level 2 laboratories involve work that poses moderate hazards to laboratory workers and the environment. Biosafety Level 2 laboratories require safety protocols to contain microbes and biological agents.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

4. Sale of heavy equipment and construction related vehicles and equipment, including associated repair, service, and parts distribution facilities. Showrooms related to this use may be a conditionally permitted ancillary use.
5. Similar uses as determined by the Community Development Director to be of the same general character as the listed uses.

B. Conditional Uses for SMP 39 and 40:

1. Public and quasi-public uses.
2. Manufacture of pharmaceutical products or life science facility, not exceeding Biosafety Level 3[3]
3. Similar uses as determined by the Planning Commission to be of the same general character as the listed uses.

Conditional Uses for SMP 39 only:

1. Fast-food businesses, banks, personal services, or goods required for the convenience and support of occupants of uses in the surrounding district(s).
2. Warehouse and distribution facilities, including E-commerce/Third Party Logistics (3PL) uses, with the condition that these uses may only occupy up to 20 percent of the total buildable site area.
3. Sale of heavy equipment and construction related vehicles and equipment, including associated repair, service, and parts distribution facilities, provided they are manufactured and/or sold on-site. Showrooms related to this use may be a conditionally permitted ancillary use.
4. Similar uses as determined by the Planning Commission to be of the same general character as the listed uses.

C. Accessory Uses Permitted on SMP 39 and 40:

1. Signs subject to the requirements established by the Livermore Development Code, as well as the Citywide Design Standards and Guidelines, as it exists now or is amended in the future.
2. Accessory uses and buildings customarily appurtenant to a permitted use.
3. Living quarters determined by the Community Development Director to be necessary for surveillance purposes.
4. Fuel stations subject to the requirements of Section 6.03.160, Vehicle Services, of the Livermore Development Code, as it exists now or is amended in the future.

[3] Per the Centers for Disease Control and Prevention, laboratories designated Biosafety Level 3 involve work that poses a safety hazard greater than Biosafety Level 2 laboratories, defined above. Biosafety Level 3 laboratories require additional safety protocols beyond those required for Biosafety Level 2 laboratories to contain microbes and biological agents.

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

D. Special Development Requirements for SMP 39 and 40:

1. Uses shall be designed and integrated into the site in a manner that maintains and is complementary to the corporate and professional character of the nearby Oaks Business Park.
2. Outdoor service and storage yards shall be screened from public view consistent with Livermore Development Code Section 6.03.100, Outdoor Storage, as it exists today or is amended in the future.
3. For SMP 40 only: Commercial/Industrial buildings shall be located a distance of at least 500 feet from Isabel Avenue.

E. Site Development Regulations for SMP 39 and 40:

The following minimum requirements shall be observed, except where increased for conditional uses:

1. Lot Area: Twenty thousand square feet
2. Lot Width: One hundred feet
3. Setbacks: Setback requirements are established below. Buildings shall not be permitted within required setbacks.

A. SMP 39

1) Front or Street Side: 40-feet on West Jack London Boulevard, and 30-feet on frontage roads and interior streets, except as required by subsection E.4. All required setbacks adjacent to streets shall be landscaped, except for driveways, sidewalks, and trails that are found to be necessary for the efficient use of the property. Where a building front is visible from the street, a minimum five-foot wide landscaped strip abutting the foundation shall be included, allowing for necessary entrances.
2) Rear and Side: None.

B. SMP 40

1) Front or Street Side: 500-feet from Isabel Avenue, and 30-feet on frontage roads and interior streets, except as required by subsection E.4. All required setbacks adjacent to streets shall be landscaped, except for driveways and sidewalks that are found to be necessary for the efficient use of the property. Where a building front is visible from the street, a minimum five-foot wide landscaped strip abutting the foundation shall be included, allowing for necessary entrances
2) Rear and Side: None, except for a 20-foot setback from the top of the Arroyo Mocho bank on SMP 40 which should be determined from a 2.5:1 slope projection from the toe of

DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

channel/mining pit to the top, as required in the Environmental Impact Report for the project.

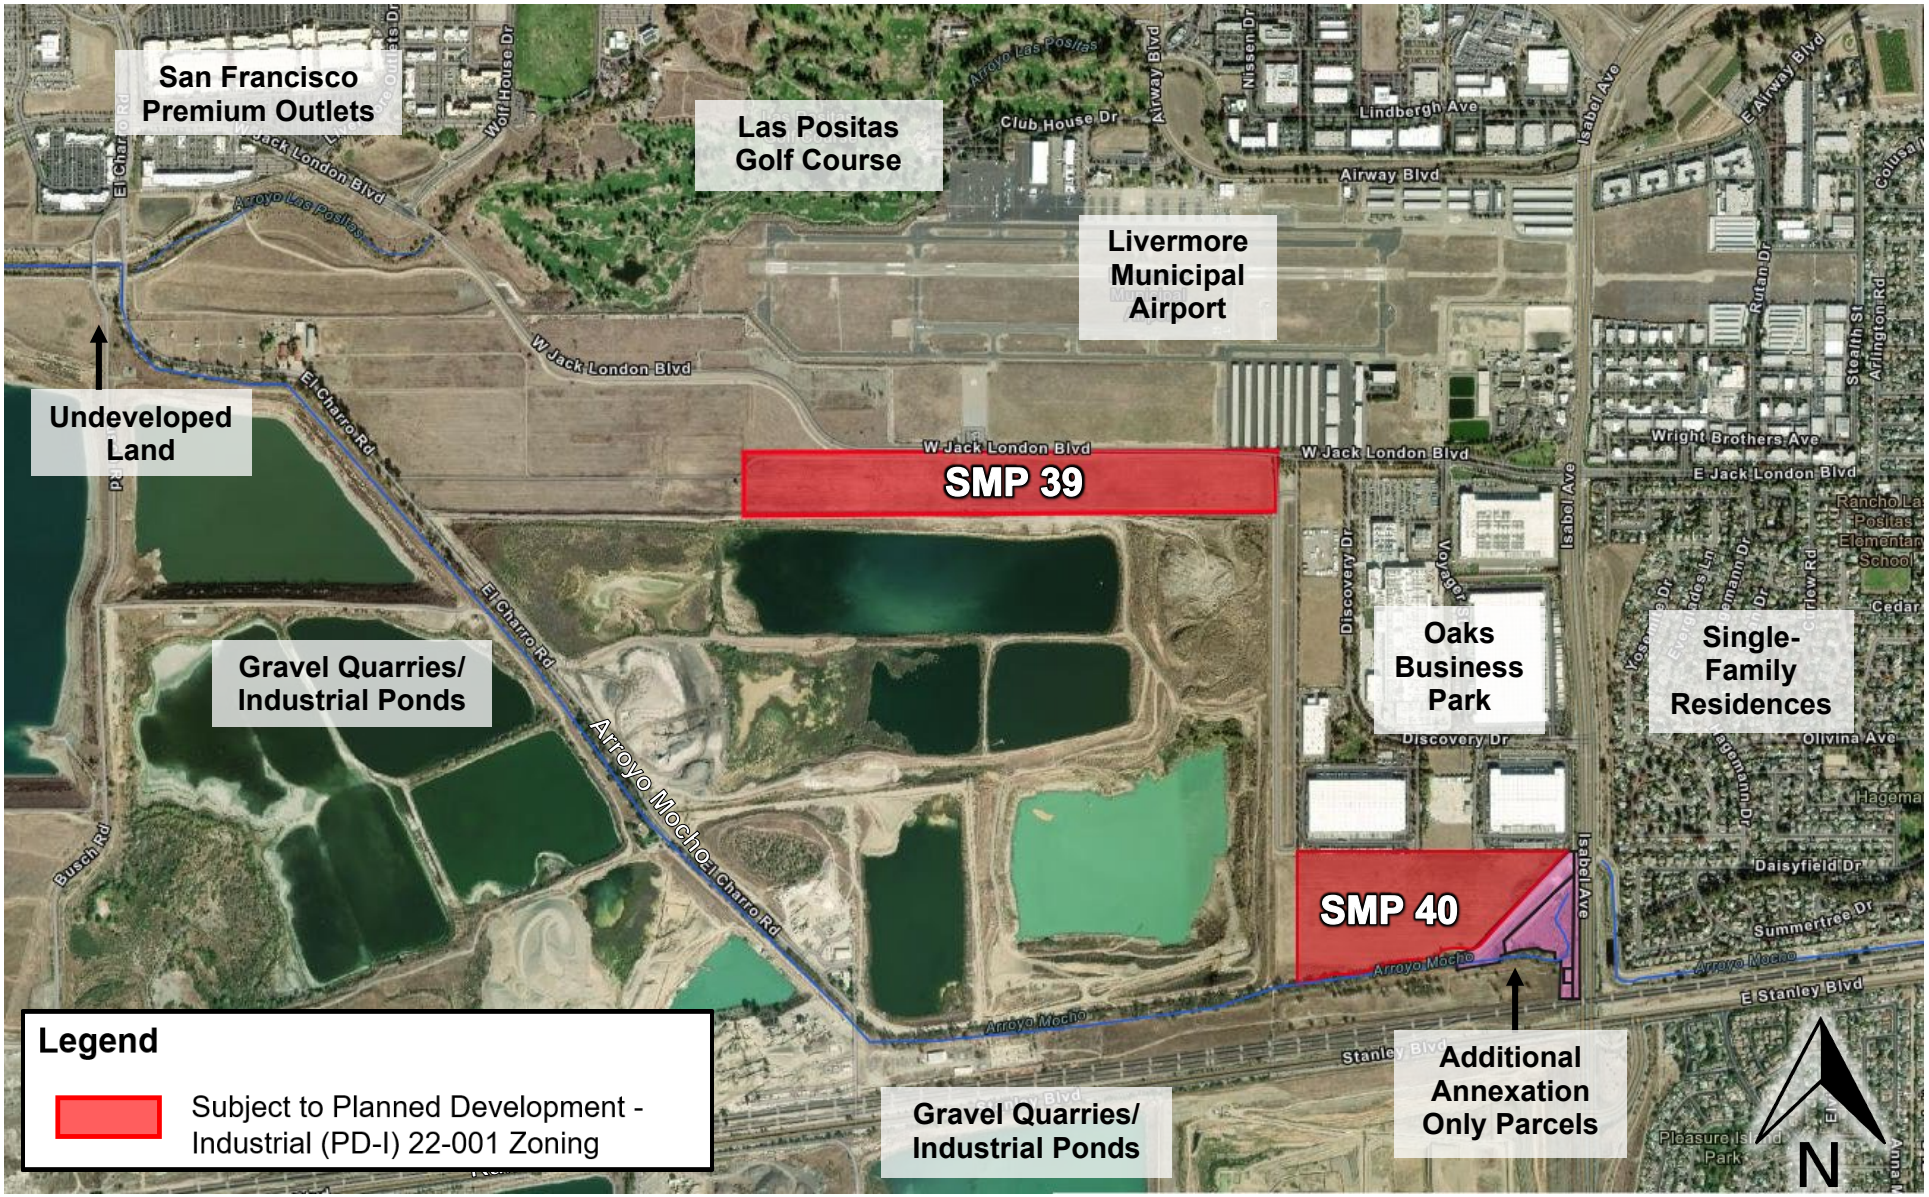
4. Height Regulations: The height of all on-site structures, including roof-top mechanical equipment, is limited to 50 feet or the height permitted by the Federal Aviation Administration (FAA) review under FAA regulations – Part 77, whichever is more restrictive. Upon providing a minimum 40-foot setback from street rights-of-way, a Conditional Use Permit may be requested to increase height to a maximum of 55 feet, or the height permitted under FAA regulations – Part 77, whichever is more restrictive. The height of pole-and building-mounted lights may be approved up to 28 feet by an administrative site plan and design review, if found necessary for the health and safety of a site designed for truck or other large vehicle maneuvering and documented by a light study to not cause glare off-site.
5. Lot Coverage: The building coverage maximum shall be 45 percent.

F. Signs

1. Industrial Uses. Signs for industrial uses shall be subject to the sign regulations contained in Livermore Development Code section 4.06.230 (sign standards for I-1, I-2 and I-3) and the Citywide Design Standards Guidelines as it exists now or is amended in the future.
2. Commercial Uses. Signs for commercial uses shall be subject to the sign regulations contained in Livermore Development Code section 4.06.170 (sign standards for CNB) and the Citywide Design Standards Guidelines as it exists now or is amended in the future.

G. Other Required Standards for SMP 39 and 40:

1. Noise. No use shall be permitted which creates an ambient noise level greater than 75 decibels (dBA) beyond the boundaries of the site, nor greater than 60 decibels at the boundary of a Residential District.
   A. On SMP 39, semi-truck access to the site (arrivals and departures) shall be limited to 96 trips between the hours of 10:00 PM and 7:00 AM.
   B. On SMP 40, semi-truck access to the site (arrivals and departures) shall be limited to 40 trips between the hours of 10:00 PM and 7:00 AM
   C. Between the hours of 10:00 PM and 7:00 AM single-event noise levels (e.g., backup alarm, truck brakes, etc.) shall not exceed 55 dBA, measured at the property line of the nearest residential use.
2. Air Pollution. All uses shall comply with regulations of the San Francisco Bay Area Air Pollution Control District.
3. Vibration, Heat, Glare, Electrical Disturbance. No use shall be permitted which creates noise, odors, vibrations, heat, glare, or electrical disturbances beyond the



DocuSign Envelope ID: FA4B4EDF-EA7E-412C-BB1A-6D66AD13828C

boundaries of the site. Lighting used to illuminate buildings, structures, uses, or parking and loading areas shall not be directed toward any public right-of-way.

4. Fire, Explosion. All uses shall provide adequate safety devices and adequate firefighting and fire suppression equipment to protect against fire, explosion, and other hazards.
5. Solid and Liquid Wastes. No solid or liquid waste discharges, other than permitted discharges into a public sewage disposal system, shall be permitted. The chemical composition and volume of industrial effluent discharged shall be subject to the wastewater permit requirements established by LMC Title 13, Division II. (Ord. 442 § 14.80).

Trail Overcrossing and Trail Connections Credits

The Developer's monetary contribution towards the costs of the Trail Overcrossing and Trail Connections shall equal Seven-Hundred-Fifty-Thousand Dollars ($750,000.00) (the "Developer Obligation"). The $750,000 Developer Obligation is in addition to the design and permitting costs the Developer is responsible as set forth in the Agreement. City and Developer shall diligently pursue grant funding opportunities to fund the remaining Trail Overcrossing and Trail Connections, less the Developer Obligation. In the event that a grant funding opportunity is not successful, City shall credit Developer using Traffic Impact Fees (TIF) less the Developer Obligation, in accordance with Livermore Municipal Code Section 12.30.080, Credit and Reimbursement, and as set forth below in exchange for Developer constructing the Trail Overcrossing and Trail Connections.

The Developer shall provide, at its own cost, an Engineer's cost estimate for the Trail Overcrossing and Trail Connections, subject to the City Engineer's review and approval.

The Engineer's cost estimate shall include all hard costs (including, without limitation, contractor time, materials), management costs (equaling 5% of the hard costs), City plan check and inspection, third party inspections, ten percent contingency (10%) applied to construction costs only, City building permit fees (if any), all other permitting and regulatory fees/costs, costs (including consultant costs) for environmental and regulatory approval of the Trail Overcrossing and Trail Connections, and construction bonds and insurance. The City's TIF credits shall equal up to a maximum of 10 percent over the Engineer's cost estimate; if the final cost estimate exceeds the Engineer's cost estimate by more than 10 percent, the Developer shall pay the remaining Trail Overcrossing and Trail Connections cost over the Engineer's estimate. For avoidance of doubt, Developer shall have no right of credits or reimbursements for the design costs of the Trail Overcrossing or Trail Connections. City shall credit Developer for the Trail Overcrossing and Trail Connections as follows:

City shall provide Developer a TIF credit of the SMP 40 Project's Traffic Impact Fees (the "Impact Fee Credit") for the identified Engineer's cost estimate for the Trail Overcrossing and Trail Connections (or up to a maximum of 10 percent over this estimate as specified above). The Impact Fee Credit shall be credited against the TIF that are collected at the time each building permit is paid, and on a permit-by-permit basis as Developer's obligations to pay such impact fees accrue until the last SMP 40 Project building permit is issued.

PLANNING COMMISSION STAFF REPORT **ITEM NO. 10.2**

DATE: March 5, 2024

TO: Chairperson and Members of the Planning Commission

FROM: Steve Riley, Acting Planning Manager

SUBJECT: Supplemental items received after the meeting.

RECOMMENDED ACTION

SUMMARY

These materials were posted online and made available to the public at the same time that they were distributed to the Planning Commission.

5.1 - Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City. Materials Received: Public Comment, Staff Presentation, Developer Presentation

New eComment for Planning Commission

Katie Marcel submitted a new eComment.

Meeting: Planning Commission

Item: 5.1) Hearing to consider a request for an Annexation/Prezoning, Pre-Annexation and Development Agreements, General Plan Amendment, Zoning Map Amendment, Development Code Amendment, Vesting Tentative Parcel Map, Vesting Tentative Tract Map, Planned Development, and Site Plan Design Review for the SMP 39 and 40 Project to zone for and develop light industrial uses near the northwest part of the City.

eComment: Thank you for the opportunity to support the development of light industrial uses in the Tri-Valley region. Innovation Tri-Valley Leadership Group (ITV) is dedicated to fostering collaboration among businesses, educational institutions, and civic leaders. We endorse the City of Livermore's effort to zone and develop light industrial areas as it aligns with our Vision 2040 goal of ensuring that industrial-zoned lands maximize the job-creation and innovation potential of the area. ITV encourages the Planning Commission to keep the 2040 Vision for the region in mind as the priorities identified represent over 1,000 regional stakeholders who participated in the Vision planning. The vision specifically cites the planning of light industrial parks and innovation “zones” as a key driver of the region’s innovation ecosystem and future economic development. Thank you for your consideration, Katie Marcel, CEO, Innovation Tri-Valley Leadership Group

Livermore Valley
CHAMBER of COMMERCE

March 5, 2024

City of Livermore Planning Commission

1052 S Livermore Ave.

Livermore, CA 94550

RE: OMP Oaks Business Park

Dear Members of the Planning Commission,

I am writing to advocate for the Livermore Business Community representing the Livermore Valley Chamber of Commerce on consideration currently underway for SMP 39 & 40 projects, presented by Overton Moore Properties. We support the proposed project brought forth by OMP to create additional business interest in Livermore and assist with expansions needed by many successful businesses already located in our city.

Lam Research is in need of expansion opportunity and OMP has already signed a lease agreement with them for expansion. This is only one example of the needs in Livermore for business expansion. The possibility of business expansion is critical to their success and that of our community. From the perspective of economic vitality for our city, it is when we can be flexible and consider the future for business that we all win long term. The business parks proposed will be valuable assets to our community and the development of viable businesses in the near future. OMP has proven their engagement in the community and have a good reputation for envisioning the needs of a community.

The Livermore Valley Chamber of Commerce supports the efforts of OMP and encourages the Planning Commission to consider their proposal as part of our preparation for future business. Please consider approving their proposal and retaining the economic vitality that we have established for Livermore by providing the necessary accommodations for business in our city. This will provide meaningful employment opportunities for residents and prosperity for our community.

OMP is committed to excellence and community enrichment. We support their efforts and projects for Livermore.

Thank you for your consideration,

Sherri Souza

RE: City of Livermore's SMP 39 and 40 Planning Commission Meeting

Dear Ashley Vera,

On behalf of "**Carpenters Local 713**", my Office is submitting these comments for the City of Livermore's ("**City**") Draft Environmental Impact Report ("**Draft EIR**" or "**DEIR**") and Final Environmental Impact Report ("**Final EIR**" or "**FEIR**") for the **March 5, 2024 Planning Commission Meeting** for the SMP 39 and 40 Project ("**Project**").

According to the Project's Notice of Availability ("**NOA**") of a Draft EIR Project Description:

> "On **SMP 38**, the proposed project includes a Sphere of Influence (SOI) Amendment to **include** SMP 38 within the **City of Livermore** SOI and **remove** it from the **City of Pleasanton's** SOI. The City of Livermore General Plan land use designation for SMP 38 would remain Limited Agriculture and Open Space/Sand and Gravel and the Alameda County zoning designation would remain Agriculture. **Development of SMP 38** is **not proposed**.
>
> For **SMP 39**, the proposed project would include development of a total of **up to six light industrial buildings**, consisting of **up to approximately 755,500 square feet** (sf) of new building space, and associated **internal roadways** and **other** improvements. **For SMP 40**, the proposed project would include development of **two industrial buildings** containing up to **759,275 sf of new building space** with

related **internal roadways** and **other** improvements. A number of approvals would be required for development of SMP 39 and SMP 40, including a **SOI Amendment for SMP 39**, **General Plan Amendment**, **Pre-zoning** and **Annexation**, **Zoning Map Amendment**/Planned Development, Vesting Tentative Subdivision **Maps**, a **Pre-Annexation Agreement**, and **Development Agreement**. A **Site Plan Design Review** entitlement is required for SMP 39 and SMP 40, which would include a review of the site plan, building, and landscape design; however, the entitlement is **only proposed for SMP 40 at this time**. A Site Plan Design Review entitlement will be required **at a later date** for the future development of **SMP 39**. In addition, the proposed project would include **annexation of four additional parcels** (APNs 904-10-2-3, -5, -7, and -8) located **east of SMP 40**. Development is **not proposed** on the additional parcels **as part** of the proposed project.

The project would include a **paved at-grade, on-site trail along the boundaries** of the SMP 40 site, consistent with the City's Active Transportation Plan. Specifically, the on-site trail would extend from the northeastern corner of the site, along the project site's eastern, southern, and western boundaries, before connecting to an existing off-site paved shared-use path at the northwestern corner of site, which extends along the west side of the Oaks Business Park to the north and connects to West Jack London Boulevard.

In addition, the project would include a **new off-site connection to the existing Arroyo Mocho Trail**, located on the east side of Isabel Avenue/SR 84. For the purposes of the Draft EIR analysis, three alternatives for the proposed off-site Isabel Avenue/SR 84 crossing to the existing Arroyo Mocho Trail are considered and evaluated in the Draft EIR, including the following, and described in more detail in the Draft EIR:

- Trail Connection Option 1 – **At-Grade** Crossing at **Discovery Drive**;
- Trail Connection Option 2 – **Undercrossing** at **Isabel** Bridge; and
- Trail Connection Option 3 – **Overcrossing** of **Isabel** Avenue/SR 84."

NOA of Draft EIR, pp. 1-2, emph. added.

The concurrently circulated Draft EIR contains the same project description. DEIR, pp. 1-2—1-4.

Carpenters Local 713 is a labor union representing union carpenters in Alameda County , and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Local 713 members live, work, and recreate in the City and surrounding communities and would be directly affected by the Project's environmental impacts.

Carpenters Local 713 expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

Carpenters Local 713 incorporates by reference all comments related to the Project or its CEQA review, including the Environmental Impact Report. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

Moreover, Carpenters Local 713 requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using local workers who have graduated from a Joint Labor-Management Apprenticeship Program and make a commitment to hiring a local workforce.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

> [A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

> [L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California's workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.[1]

Furthermore, workforce policies have significant environmental benefits given that they improve an area's jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7,

[1] California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf.

2021, the South Coast Air Quality Management District found that that the "[u]se of a local state-certified apprenticeship program" can result in air pollutant reductions.[2]

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

> People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.[3]

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.[4] Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

> In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about

[2] South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10.

[3] California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf

[4] Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, *available at* http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf.

negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 ("**AB2011**"). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE PROJECT WOULD BE APPROVED IN VIOLATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT

A. Background Concerning the California Environmental Quality Act

The California Environmental Quality Act is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations ("**CEQA Guidelines**"), § 15002, subd. (a)(1).[5] At its core, its purpose is to "inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made." *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.

1. Background Concerning Environmental Impact Reports

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Comes* (2001) 91 Cal.App.4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; *Laurel Heights Improvement Assn.*, 47 Cal.3d at p. 400. The EIR serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to "identify ways that environmental damage can be avoided or significantly reduced." CEQA

[5] The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Cal. Pub. Res. Code, § 21083. The CEQA Guidelines are given "great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous." *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

Guidelines, § 15002, subd. (a)(2). If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has "eliminated or substantially lessened all significant effects on the environment where feasible" and that any unavoidable significant effects on the environment are "acceptable due to overriding concerns" specified in Public Resources Code section 21081. See CEQA Guidelines, § 15092, subds. (b)(2)(A)-(B).

While the courts review an EIR using an 'abuse of discretion' standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Jets*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights Improvement Assn.*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Id.* Drawing this line and determining whether the EIR complies with CEQA's information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the court stated in *Berkeley Jets*, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. 91 Cal.App.4th at p. 1355 (internal quotations omitted).

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR's function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the "fair argument" standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail*

Botanical Gardens Found., Inc. v. City of Encinitas (1994) 29 Cal.App.4th 1597, 1602; *Friends of "B" St.* v. *City of Hayward* (1980) 106 Cal.3d 988, 1002.

The fair argument test stems from the statutory mandate that an EIR be prepared for any project that "may have a significant effect on the environment." PRC, § 21151; see *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.App.3d 68, 75; accord *Jensen v. City of Santa Rosa* (2018) 23 Cal.App.5th 877, 884. Under this test, if a proposed project is not exempt and may cause a significant effect on the environment, the lead agency must prepare an EIR. PRC, §§ 21100 (a), 21151; CEQA Guidelines, § 15064 (a)(1), (f)(1). An EIR may be dispensed with only if the lead agency finds no substantial evidence in the initial study or elsewhere in the record that the project may have a significant effect on the environment. *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal.App.4th 768, 785. In such a situation, the agency must adopt a negative declaration. PRC, § 21080, subd. (c)(1); CEQA Guidelines, §§ 15063 (b)(2), 15064(f)(3).

"Significant effect upon the environment" is defined as "a substantial or potentially substantial adverse change in the environment." PRC, § 21068; CEQA Guidelines, § 15382. A project may have a significant effect on the environment if there is a reasonable probability that it will result in a significant impact. *No Oil, Inc.*, 13 Cal.3d at p. 83 fn. 16; see *Sundstrom v. County of Mendocino* (1988) 202 Cal.App.3d 296, 309. If any aspect of the project may result in a significant impact on the environment, an EIR must be prepared even if the overall effect of the project is beneficial. CEQA Guidelines, § 15063(b)(1); see *County Sanitation Dist. No. 2 v. County of Kern* (2005) 127 Cal.App.4th 1544, 1580.

This standard sets a "low threshold" for preparation of an EIR. *Consolidated Irrigation Dist. v. City of Selma* (2012) 204 Cal.App.4th 187, 207; *Nelson v. County of Kern* (2010) 190 Cal.App.4th 252; *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928; *Bowman v. City of Berkeley* (2004) 122 Cal.App.4th 572, 580; *Citizen Action to Serve All Students v. Thornley* (1990) 222 Cal.App.3d 748, 754; *Sundstrom*, 202 Cal.App.3d at p. 310. If substantial evidence in the record supports a fair argument that the project may have a significant environmental effect, the lead agency must prepare an EIR even if other substantial evidence before it indicates the project will have no significant effect. See *Jensen,* 23 Cal.App.5th at p. 886; *Clews Land & Livestock v. City of San Diego* (2017) 19 Cal.App.5th 161, 183; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 150; *Brentwood Assn. for No Drilling, Inc. v. City of*

Los Angeles (1982) 134 Cal.App.3d 491; *Friends of "B" St.*, 106 Cal.App.3d 988; CEQA Guidelines, § 15064(f)(1).

B. The Project May Have a Significant Impact on Biological Resources

There is substantial evidence the Project will have a significant impact on biological resources. As discussed in further detail in a comment letter from biological resources expert Shawn Smallwood, PhD with regards to the proposed Project, incorporated by reference herein, "the existing environmental setting has not been accurately characterized, and several important types of potential project impacts have been inadequately analyzed. These types of impacts include habitat loss, interference with wildlife movement, and wildlife-automobile collision mortality." (See **Exhibit D** [December 12, 2023 comment letter from Shawn Smallwood, PhD regarding SMP 38, SMP 39, and SMP 40 biological resources analysis].)

First, for example, with regards to the potential for habitat loss, Dr. Smallwood predicts:

> SMP 38 (111.7 acres), SMP 39 (51.9 acres) and SMP 40 (41 acres) support 11.4 bird nests/acre/year. Based on this assumption, the combined projects, SMP 39 and SMP 40, on 92.9 acres would eliminate 1,059 nest sites, and assuming SMP 38 is also later developed, then the combined projects, SMP 38, SMP 39, ad SMP 40, on 204.6 would eliminate 2,332 nest sites.

(**Exhibit D**, p. 28.)

Accordingly, Dr. Smallwood points out that this loss in nest sites would constitute a significant impact from the Project that was not quantitatively addressed in the Draft EIR. (**Exhibit D**, p. 28.) Further, Dr. Smallwood notes that the loss in nests would lead to a loss in the reproductive capacity of the site, thus decreasing the number of birds at the Site over time. (*Id.*)

Second, Dr. Smallwood discusses the Projects impacts on interference with wildlife movement, highlighting that the DEIR's analysis of whether the Project will interfere with wildlife movement in the Project Site area is "flawed and misleading." (**Exhibit D**, p. 29.) Specifically, Dr. Smallwood states that:

> According to the DEIR, "The project area does not fall within an Essential Habitat Connectivity area mapped by the CDFW." However, at https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=18486, the California Essential Habitat Connectivity Project specifically points out

> that it is not: "A California Department of Fish and Game or US Fish and Wildlife Service response to potential impacts to a habitat or species from a project subject to the California Environmental Quality Act (CEQA)," nor "Fine scale, with every important piece of habitat identified" nor ""Essential", meaning the only places of importance" nor "A solution by itself for how to provide necessary linkages for any given species of plant or animal... Linkage designs will vary depending on focal species chosen and the goal of providing connected habitat for a chosen species might be met several different ways" nor "The final word on connectivity for California." With analytical grid cells of 2,000 acres, the spatial grain of the California Essential Habitat Connectivity Project is much too coarse for the conclusion the DEIR draws from it.

(**Exhibit D**, p. 29.)

Moreover, Dr. Smallwood points out that the DEIR contains a flawed "argument that SMP 39 is cut off from open areas by well-trafficked roads, the airport, the gravel quarries, and therefore cannot function as a wildlife movement corridor" and notes that the same argument is used for SMP 40. (*Id.*) However, as Dr. Smallwood notes, the DEIR simply uses speculation here and provides no supporting evidence to this assertion. (*Id.*)

Third, Dr. Smallwood discusses the Project's traffic impacts to wildlife, noting that traffic generated from the Project will endanger wildlife that must cross roads used by traffic getting to and from the Project Site. (**Exhibit D**, p. 30.) Dr. Smallwood discusses traffic-caused wildlife mortality and highlights various traffic mortality numbers collected from a wildlife mortality study performed only eleven (11) miles from the Project Site in the County of Contra Costa. (*Id.*) Dr. Smallwood concludes an analysis should be done on "whether increased traffic generated by the project site would similarly result in local impacts on wildlife." (*Id.* at p. 31.)

In addition, the biological impact analysis of the EIR is legally flawed for the following reasons.

First, the DEIR's biological resources impact analysis relies on multiple inadequate biological field surveys outlined in Appendices D and E of the DEIR prepared by Monk & Associates that are described in insufficient detail.

For example, with regards to the field surveys, the DEIR states that:

> "SMP 39 and SMP 40 were both first surveyed in 2000, with follow-up surveys over the years, including in November 2013, for various development proposals. In addition, a **project-specific field survey** was conducted on SMP 39 on **October 14, 2021**, and on SMP 40 on **June 10, 2019** to record biological resources within the sites, and to assess the likelihood of resource agency regulated areas to be located within the sites. An **additional survey** was conducted for SMP 40 on **June 21, 2019** to flag the Arroyo Mocho's riparian drip line to allow for the project engineers to survey the limits of the riparian vegetation and overlay the area on the project site plan, and **another general survey** of SMP 40 was conducted on **September 10, 2021.**"

DEIR, p. 4.3-24. [Emphasis added.']

However, the DEIR's reliance on these biological resources field surveys is improper for several reasons.

First, the DEIR and its accompanying Appendices D and E leave out crucial information about the site surveys.

In summarizing the various site surveys that occurred in 2013, 2019, and 2021, DEIR Appendix D's Biological Resources Analysis ("**SMP-39 BRA**") states that "[e]ach site survey involved searching all habitats on the site and recording all plant and wildlife species observed. . . ." and that the "evaluation included an examination of the site to determine if there could be potential areas within the project site that would be regulated as waters of the United States and/or State . . ." DEIR Appendix D, p. 2. Thus, the SMP-39 BRA field surveys seem to indicate that visual inspections were done during these site visits. However, SMP-39 BRA is insufficient for numerous reasons as it leaves out crucial information about the site surveys while relying on the surveys to form conclusions about the Project's potential biological resources impacts.

As a preliminary matter, *one* (1) single field survey alone for just the SMP-39 Project Site is insufficient to adequately identify all of the potential habitats and plant and wildlife species occurring within the Project Site, as the site surveys purport to have looked for. In the City's Final EIR Responses to Comments, Response No. 5-12, the City counters our office's prior comment that "[o]ne single field survey is sufficient to get a baseline description of a project site's pant communities and wildlife habitats and to determine if additional surveys for special-status species are necessary." (FEIR

Response to Comments, p. 2-75.) However, as Dr. Smallwood notes in his comment letter on the Project, "[m]ore surveys are needed than my two surveys [sic] to inventory use of the project site by wildlife" (**Exhibit D**, pp. 14-15), that the appropriate detection surveys have not been completed at SMP 39 and SMP 40," (*id.* at p. 17), that "[r]econnaissance surveys for wildlife are not designed to detect special-status species" indicating that protocol-level detection surveys are appropriate but that Monk & Associates did not perform such detection surveys here, thus rendering the Draft EIR's "characterization of the existing environmental setting . . . therefore incomplete and inaccurate." (*Id.* at p. 19.) Therefore, it is clear that the single survey conducted for SMP-39 is inadequate.

Moreover, the SMP-39 BRA does not specify what time of the day the surveys were conducted during, (DEIR Appendix D, p. 2) which, again, leaves open the possibility that certain species, for example, nocturnal species, could present themselves at different times of the day. This is further highlighted in Dr. Smallwood's comment letter, where he notes that:

> For none of the above surveys was there reporting of what time the surveys began, or how long the surveys lasted. No checklist is shared of habitat elements that the biologists might have used during their survey to later crosscheck against documented habitats of each special-status species. No explanation is provided of whether or how animal behavior data or other evidence contributed to the biologist's assessment of the site for its importance to animal movement. It is therefore difficult to assess survey outcomes relative to survey effort and methods.

(**Exhibit D**, p. 16.)

Even further, in one (1) single survey, the surveyor may fail to identify species that would only present themselves during certain times of the *year*. According to the SMP-39 BRA in Appendix D, for example, the most recent surveys were conducted in June 2019 (a summer month) and October 2021 (a fall month), while failing to account for the spring and winter months. DEIR Appendix D, p. 2. However, there may be certain plant or animal species that would not be identifiable to an observer during the summer or fall months but that could nevertheless be present at the Project Site and be identifiable during other seasons of the year. For example, and as noted by Dr. Smallwood, in response to the DEIR's assertion that no special-status plants were observed during some of the surveys at the Project Sites during various months over the years, Dr. Smallwood responds that this reporting is misleading

"because only one of the several surveys was conducted during the plant blooming season. Monk and Associates (2021, 2023) did not meet the minimum standards of [California Department of Fish and Wildlife's ("**CDFW**")] (2018) plant survey guidelines. While the FEIR's Responses to Comments counters our office's prior comments, asserting that the CDFW's survey guidelines cited are guidelines for conducting floristic surveys for rare and endangered or other special-status species, the site surveys still failed to meet the CDFW's minimum plant survey guidelines standards. Thus, new surveys must be conducted that meet these standards.

Therefore, the DEIR's reliance on surveys not in compliance with California Department of Fish and Wildlife's survey guidelines[6] and its misuse of the California Natural Diversity Database ("**CNDD**") resulted in potentially inaccurate determinations. For example, with regards to botanical field surveys, the CDFW's survey guidelines state that such field surveys should be conducted in a way that will maximize the likelihood of identifying special status plants and sensitive natural communities that may be present at a site.[7] Specifically, the guidelines state that "[m]ore than one field visit is usually necessary to adequately capture the floristic diversity of a project area."[8]

For each of the foregoing reasons, the Project may have a significant impact on biological resources. Accordingly, the DEIR's findings as to the Project's biological impacts are not supported with substantial evidence that is of verifiable or credible value and the DEIR must be revised and recirculated to reassess those impacts, including on the wildlife species with potential to occur on the Project Site using protocol-level detection surveys and describing those surveys with sufficient detail.

C. The Project May Have Significant Noise Impacts.

There is substantial evidence that the Project will have significant traffic impacts. As discussed by Principal Steve Rogers of Steve Rogers Acoustics, "the evaluation of noise impacts during the construction phases is incomplete and contains a significant

[6] *See*, California Natural Resources Agency, *Department of Fish and Wildlife Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities, available at* https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=18959&inline, pp. 4, 5-6, accessed on Oct. 9, 2023), updated on Feb. 3, 2023; *see generally* California Department of Fish and Wildlife California Natural Diversity Database, *available at* https://wildlife.ca.gov/Data/CNDDB/Plants-and-Animals (last visited on Oct. 9, 2023.)

[7] California Natural Resources Agency, *supra*, at p. 4.

[8] *Id.*

calculation error." (**Exhibit E**, p. 3 [December 12, 2023 comment letter re City of Livermore SMP 38/SMP 39/SMP 40 Project Review of DEIR Noise Section & Appendices]), fully incorporated herein.

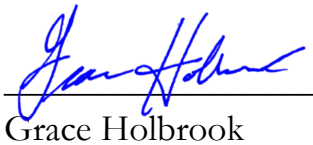
First, as noted by Mr. Rogers for the DEIR's construction noise impacts, the DEIR concludes there will be a less than significant impact for on-site construction, but per the DEIR's analysis, the DEIR fails to adequately support this conclusion for multiple reasons. (**Exhibit E**, p. 2.) For example, the DEIR fails to include SMP 39's construction noise impacts in its section 4.6 analysis. (*Id.*) Second, Mr. Rogers notes that the noise analysis for SMP 40 is incomplete. Specifically,

> The noise impact analysis for construction on the SMP 40 site compares Salter's noise level predictions with instantaneous maximum noise level (Lmax) limits of 70 dBA during the day and 60 dBA at night, which are taken from Policy N-1.5.P3 of the City of Livermore General Plan.
>
> However, these Lmax noise limits are not the only local regulations that would apply to construction noise on the SMP 40 site.
>
> . . .
>
> Similarly, the DEIR does not include an DNL analysis for construction noise from SMP 40 to show that it will be below the 60 dBA exterior noise standard taken from land-use compatibility table (Table 9-7) in the General Plan. This will be particularly important if any construction work is to occur at night.

(**Exhibit E**, pp. 2-3.)

Third, Mr. Rogers highlights that there was an error in the calculations for SMP 40 with regards to various construction equipment pieces at a 50-foot distance. (*Id.*) Lastly, Mr. Rogers states that the construction noise analysis on the east side of the SMP 40 site is overlooked, as it assumes receivers 884 feet away from the equipment, while during other phases of construction, the noisy equipment may be operating closer than 884-feet from nearby residential uses. (*Id.*)

For each of the foregoing reasons, the Project may have a significant noise impact and the EIR should therefore be revised and recirculated.



III. THE FEIR CANNOT BE CERTIFIED AS THE CITY HAS FAILED TO RESPOND TO THE ISSUES RAISED BY CARPENTERS LOCAL 713

The City's argues that recirculation of the EIR is not required as the comments submitted on the FEIR "did not identify any new significant effect, substantial increase in severity of an impact identified in the EIR, or any significant new information." (Staff Report **Exhibit D** at 1). However, as reiterated above, numerous substantial issues with the EIR were identified by Carpenters Local 713 in its two prior comment letters. (DEIR Comment Letter, **Exhibit F**; FEIR Comment Letter, **Exhibit G**). The City provided inadequate responses to the issues addressed in the DEIR Comment Letter. Further, despite the City stating that it would provide a response to the FEIR Comment Letter, no such memorandum has been provided prior to the comment deadline for this Planning Commission Hearing. (See Staff Report **Exhibit D** at 1). As the City has failed to provide responded to the significant issues raised by Carpenters Local 713, the FEIR cannot be certified under CEQA.

IV. CONCLUSION

Based on the foregoing, the City should deny the FEIR's certification, and the Environmental Impact Report should be revised and recirculated pursuant to CEQA, consistent with the comments and issues identified in this and previous comment letters.

Sincerely,

Grace Holbrook
Attorneys for Carpenters Local 713

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."[1] CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.[2]

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[3]

[1] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[2] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[3] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled ("VMT") associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.[4]

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

> "$VMT_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$
>
> Where:
>
> n = Number of land uses being modeled."[5]

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

> "$\text{Emissions}_{pollutant} = VMT * EF_{running,pollutant}$
>
> Where:
>
> $\text{Emissions}_{pollutant}$ = emissions from vehicle running for each pollutant
>
> VMT = vehicle miles traveled
>
> $EF_{running,pollutant}$ = emission factor for running emissions."[6]

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[7] In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act ("CEQA") requires that such changes be justified by substantial evidence.[8] The default number of construction-related worker trips is calculated by multiplying the

[4] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14-15.
[5] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.
[6] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.
[7] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.
[8] CalEEMod User Guide, *available at:* http://www.caleemod.com/, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.[9] Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively."[10] Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.[11] The operational home-to-work vehicle trip lengths are:

> "[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings" (emphasis added). [12]

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).[13]

Worker Trip Length by Air Basin		
Air Basin	**Rural (miles)**	**Urban (miles)**
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	**16.47**	**11.17**
Minimum	**10.80**	**10.80**
Maximum	**19.80**	**14.70**
Range	**9.00**	**3.90**

[9] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.
[10] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.
[11] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.
[12] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.
[13] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan ("Project") located in the City of Claremont ("City"). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.[14] In an effort to evaluate the potential for a local hire provision to reduce the Project's construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO_2e)	3,623
Amortized Construction GHG Emissions (MT CO_2e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO2e)	3,024
Amortized Construction GHG Emissions (MT CO_2e/year)	100.80
% Decrease in Construction-related GHG Emissions	***17%***

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project's urbanization level and location.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

3.0 Construction Detail

Construction Phase

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days	Phase Description
1	Demolition	Demolition	9/1/2021	10/12/2021	5	30	
2	Site Preparation	Site Preparation	10/13/2021	11/9/2021	5	20	
3	Grading	Grading	11/10/2021	1/11/2022	5	45	
4	Building Construction	Building Construction	1/12/2022	12/12/2023	5	500	
5	Paving	Paving	12/13/2023	1/30/2024	5	35	
6	Architectural Coating	Architectural Coating	1/31/2024	3/19/2024	5	35	

Acres of Grading (Site Preparation Phase): 0

Acres of Grading (Grading Phase): 112.5

Acres of Paving: 0

Residential Indoor: 2,025,000; Residential Outdoor: 675,000; Non-Residential Indoor: 326,400; Non-Residential Outdoor: 108,800; Striped Parking Area: 0 (Architectural Coating – sqft)

OffRoad Equipment

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Horse Power	Load Factor
Demolition	Concrete/Industrial Saws	1	8.00	81	0.73
Demolition	Excavators	3	8.00	158	0.38
Demolition	Rubber Tired Dozers	2	8.00	247	0.40
Site Preparation	Rubber Tired Dozers	3	8.00	247	0.40
Site Preparation	Tractors/Loaders/Backhoes	4	8.00	97	0.37

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision
