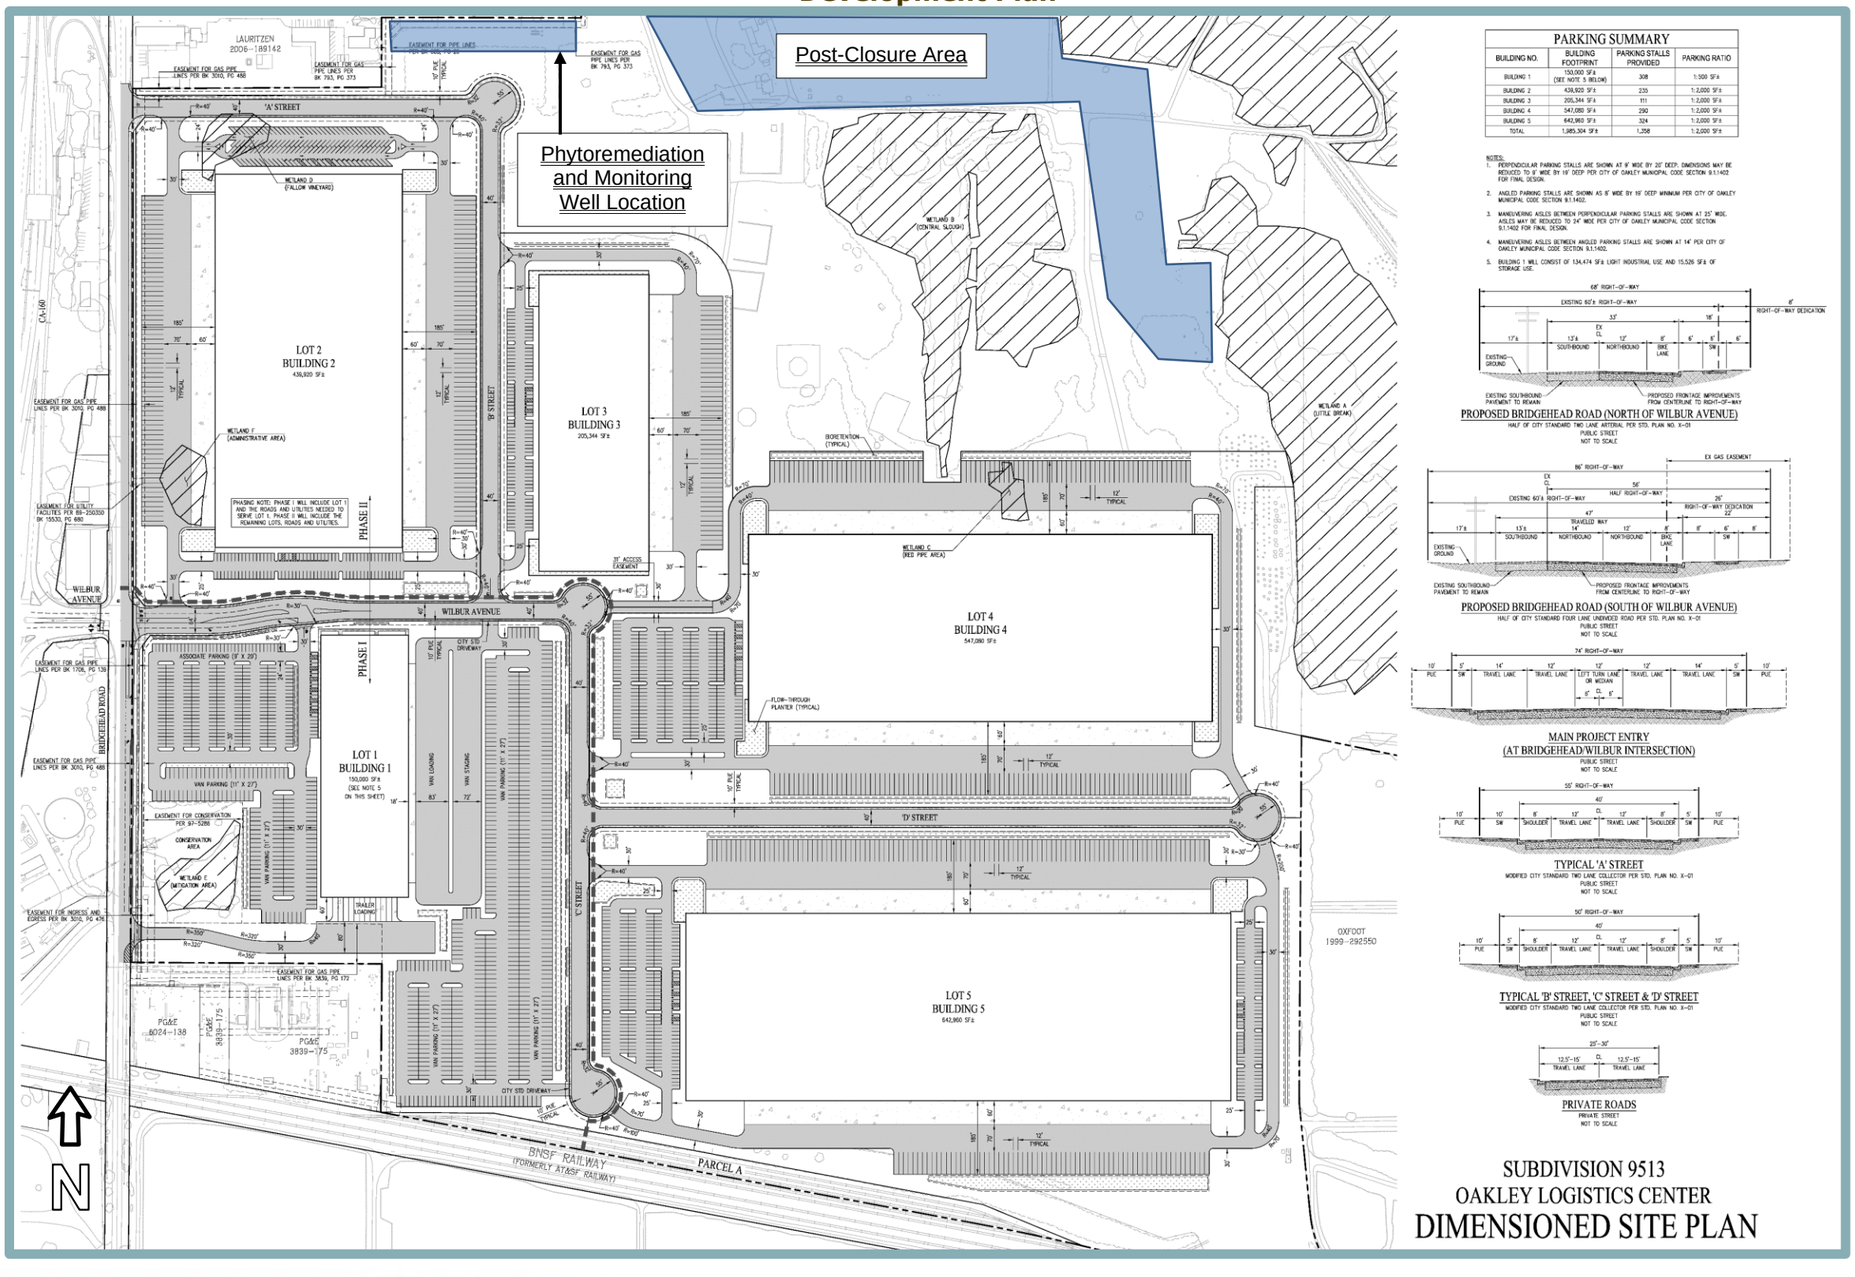
Figure 3-6 on page 3-9 of the Draft EIR is hereby revised in order to delineate the monitoring well and phyto-remediation locations (see figure below). The revision is for clarification purposes and does not change the analysis or conclusions of the Draft EIR. It should be noted that the requested revisions to Figure 3-6 confirm that the locations of the monitoring well and phyto-remediation locations are outside of the proposed development area.

Response to Comment 3-5

As discussed above, remediation efforts have been analyzed in a separate Mitigated Negative Declaration certified by the DTSC. Evaluation of volatile organic compound (VOC) soil gas concentrations have been included in the Final Soils and Materials Management Plan. As stated on page 4.0-3 of the Draft EIR, all future operators at the project site are required to comply with the Soil and Materials Management Plan for the project site. As stated on page 7 of the Oakley Logistics Center Initial Study (Appendix A of the Draft EIR), construction would occur within areas that have been fully remediated. However, should remediation activities still be occurring on the subject property, redevelopment of the site would only occur pursuant to the development procedures and limitations within the LUC as approved by DTSC. Additionally, construction would occur in phases which would allow for accommodation of any potential remediation activities. Thus, VOC soil concentrations within the proposed development area would be remediated fully prior to construction of new buildings. Remediation would occur in accordance with the LUC and Soil and Materials Management Plan, with which the proposed project would not conflict.

In order to provide further clarity, the following revision is hereby made to page 1-1 of the Draft EIR:



> The site has been undergoing remedial and cleanup work for soil and groundwater contamination. The site is highly disturbed from its pre~~e~~vious use as a chemical plant and as a result of the remediation efforts. Construction of the proposed structures on the project site would occur in accordance with the procedures set forth by the Department of Toxic Substances Control (DTSC).

The above revision is for clarification purposes and does not change the analysis or conclusions of the Draft EIR.

Response to Comment 3-6

Please see Response to Comment 3-5. As stated on page 4.0-3 of the Draft EIR, all future operators at the project site are required to comply with the Soil and Materials Management Plan for the project site. The remediation efforts will adhere to all soil requirements set forth by the DTSC. Pursuant to the LUC, activities that will disturb the soil (e.g., excavation, grading, or trenching) will not occur within the project site without approval of a Soil and Materials Management Plan.

Figure 3-1
Development Plan

Response to Comment 3-7

The following revision to text is hereby made to page 3-4 of the Draft EIR, in response to the comment:

> This remediation work is being performed in two field seasons. The first field season started in August/September 2018, and the anticipated completion date for this work is mid-2019. The anticipated start date for the second field season is August or September 2019, and the anticipated completion date is January or February 2020. Following remediation, the project site is subject to post closure care pursuant to the Hazardous Waste Facility Post-Closure Permit (PCP), issued by DTSC on December 7, 2011. The PCP requires the closure and decommission of the East Basin, West Basin, Emergency Basin, and Ponds A, B, and C located within the northeastern portion of the project site.

The above revision is for informational purposes and does not change the analysis or conclusions of the Draft EIR.

In addition, the post-closure area has been indicated on Figure 3-6 of the Draft EIR, as shown in the revised figure above. The development of the proposed project would not interfere with the post-closure area, and thus, would not conflict with the PCP. Maintenance of the post-closure area would be performed pursuant to the requirements of the LUC and PCP, which would be performed by Chemours and overseen by the DTSC.

Response to Comment 3-8

See Response to Comment 3-7 and 3-9. Additionally, the proposed project's development as an industrial site would not conflict with the prohibited uses set forth in Article IV of the LUC. Furthermore, the long-term maintenance of the post-closure area is not a component of nor the responsibility of the proposed project.

Response to Comment 3-9

For disclosure purposes, page 3-4 of the Draft EIR is hereby revised as follows:

> The site has been highly disturbed and altered over the years by the DuPont operations and remediation efforts. The remediation efforts will allow areas of the site to develop with industrial and commercial uses (in the 143.3-acre project site) and recreational uses (on the 232.4-acre remainder area). Development within the remediated areas would adhere to the requirements set forth in Article IV of the LUC. As stated in the document, prohibited uses on the site include residences, hospitals, schools, day cares, and recreational land uses within the Central Slough Wetland. Furthermore, the development of the project would not occur until the Soil and Materials Management Plan has been pre-approved by the DTSC in writing.
>
> Additional information on the cleanup efforts for the site can be found at https://dtsc.ca.gov.

The above revision to text does not change the analysis or conclusions of the Draft EIR.

Additionally, the proposed project would adhere to any requirements set forth in the LUC, Soil and Materials Management Plan, and Prospective Purchase Agreement which require any continual efforts by the project applicant.

Response to Comment 3-10

The comment does not directly address the adequacy of the Draft EIR.

Letter 4

IRONHOUSE SANITARY DISTRICT

December 2, 2019

Joshua McMurray, Planning Manager
City of Oakley
3231 Main St, Oakley, CA 94561

Subject: Ironhouse Sanitary District Comments on Oakley Logistics Center Draft EIR dated October 2019

Dear Mr. McMurray,

We are providing this letter in response to the Oakley Logistics Center Draft EIR dated October 2019 (Sch# 2019029113). As you are aware, the District provided comments to Coleman Engineering, consultant to the Oakley Logistics Center (OLC) team, on the OLC Lift Recommendations Memo (Coleman Memo) that is referenced in and included in Appendix I of the Draft EIR. The Coleman Memo was not accepted by the District; comments were conveyed on October 28, 2019 by email, and are attached for reference.

4-1

The District, City, and OLC spoke by phone on November 25, 2019 to discuss these comments. The discussion focused on an alternative wastewater configuration that is not included in the Coleman Memo. However, the conference call was not conclusive, and as of the date of this letter, the outstanding lift station issues have not been fully resolved. Therefore, the wastewater infrastructure concepts that are discussed in the Draft EIR remain preliminary and are expected to change prior to final design. New wastewater infrastructure must be designed to the District's satisfaction, including meeting the District's engineering standards, addressing operating and maintenance concerns, and the other items related to system capacity and conveyance as outlined in the November 25, 2019 email.

Sincerely,

Chad Davisson

Chad Davisson
General Manager

Subject: RE: Oakley Logistic Center

Megan,

Thank you for providing the Oakley Logistics report. The report recommends an option that conveys flows from the Lauritzen lift station to a new Oakley Logistics Center pump station, and demolishes the existing Lauritzen station and associated forcemain. Can you please provide the pipe profile for this option to confirm that there is sufficient grade to implement this option.

The design flows listed do not appear to include projected buildout flows from the Marina area. Can you confirm that you have included these flows, or alternatively, adjust the projected flow to account for the buildout flows.

If the existing Lauritzen forcemain is to be decommissioned, the private connections to the existing Lauritzen forcemain must be confirmed by the developer in advance. For example, East Bay Regional Parks District and Driftwood Marina may pump into the forcemain and thereby require some level of infrastructure to remain in operation.

Confirming the condition of the existing lift stations, and identifying any improvements that are required to accommodate the new flows and also meet current safety or code requirements is the responsibility of the developer. The opinions of District staff are provided as background information only, and do not replace the analyses that are required to confirm the current needs at existing lift stations.

It is not clear whether the Oakley Logistics pump station is intended to stay private or be transferred to the District. Please provide more information on how the proposed station will be accessed and operated in the future.

Thank you,
Vivian

2

LETTER 4: IRONHOUSE SANITARY DISTRICT, CHAD DAVISSON

Response to Comment 4-1

As discussed on page 4.5-16, the sanitary sewer memo prepared by Coleman Engineering calculated peak flows associated with the proposed project as well as developed a proposed design for sanitary sewer flows. While the wastewater infrastructure design plan has not yet been finalized, the design evaluated in the Draft EIR provides a conservative analysis, as the proposed improvements would include construction of a new lift station on the project site as well as construction of a new pipeline within Bridgehead Road and upgrades to the existing Bridgehead pump station. While the final flow rates would be reviewed in the final plans, the improvements to the surrounding sewer infrastructure have been conservatively analyzed in the Draft EIR. The final wastewater infrastructure design plan would likely result in similar impacts to the project site and surrounding area as was analyzed in the Draft EIR.

Pursuant to Section 6.7.204 of the City of Oakley Municipal Code, any project proposing to discharge sewage into the City system must apply for a permit from the City. Prior to approval of the permit, the final wastewater infrastructure plans and specifications will be reviewed by the City Engineer to ensure that the proposed work meets acceptable sanitary engineering standards and that the final design satisfies the requirements of the Ironhouse Sanitary District.

The email attachments to the letter above were included for background information and do not specifically address the adequacy of the Draft EIR.

RE: Draft Environmental Impact Report for the Proposed Oakley Logistics Center Project

Dear Mr. McMurray:

The East Bay Regional Park District (Park District) appreciates the opportunity to provide comments on the proposed Oakley Logistics Center Project (project) Draft Environmental Impact Report (DEIR). The Park District previously commented on the project's Initial Study as well as the Notice of Preparation for this DEIR (see attached).

As encouraged in the Park District's previous comments, this project provides the opportunity for a future Big Break Regional Trail to Antioch Pier Trail connection, partially through the Oakley Logistics Center site, using a public access easement. This potential trail connection is included in the Oakley 2020 General Plan where it is identified as a potential regional trail, and in Oakley's *Parks, Trails, and Recreation Master Plan 2020*, and also in the Park District's 2013 Master Plan. This future trail connection is also designated by the Delta Protection Commission as the "Great California Delta Trail," a hiking and biking trail connecting all five counties in the Delta region. An on site trail connection would provide a safe commuting option for future employees of the Logistics Center, and a public amenity for passive recreation with views of the Delta.

5-1 The current Big Break Regional Trail ends a half mile east of the project, at Big Break Road. The future trail connection through the Logistics Center site which is suggested by the Park District should be designed to Caltrans standards to provide a safe recreational and transportation corridor that meets ADA requirements, and built at the time of Phase I project construction by the developer, as has been done elsewhere in Contra Costa County. The future trail on site alignment should traverse the entire project site east to west to intersect with Bridgehead Road, where the Caltrans District 4 Bike Plan proposes development of Class II bike lanes on State Highway 160 across the Antioch Bridge to Sacramento County.

The future trail connection would eventually provide a critical link west to the San Francisco Bay Trail in Martinez, offering shoreline access at strategic locations, and south to the Marsh Creek Regional Trail. The project offers an opportunity to construct this trail segment near a severely disadvantaged community, identified by the California Department of Water Resources. As proposed without a trail connection, the project will prevent local and regional efforts to complete this important regional trail link for the residents of Oakley and surrounding communities, unless a public trail access easement is included in the conditions of approval and made an allowable use in the Planned Development zoning designation of this site. With the opportunity for development on 143 acres of the former DuPont chemical manufacturing facility, the Park District requested in previous comments that the DEIR project description include this trail connection through the project site. **5-2** The trail connection was not included in the project description, and so the potential impacts of the proposed Logistics Center on the users of a future trail connection through the site were not studied in the DEIR.

5-3 The Park District notes the DEIR includes two mentions of this proposed on-site trail connection, both in relation to greenhouse gas emissions (GHG) reductions:

Board of Directors

Ayn Wieskamp	Ellen Corbett	Dee Rosario	Colin Coffey	Whitney Dotson	Dennis Waespi	Beverly Lane	Robert E. Doyle
President	Vice-President	Treasurer	Secretary	Ward 1	Ward 3	Ward 6	General Manager
Ward 5	Ward 4	Ward 2	Ward 7				

Letter 5 Cont'd

5-3 Cont'd

1. Mitigation measure 4.1-5(c) suggests one potential mitigation measure for GHG reduction is to "Dedicate land on-site to facilitate future connections with the Big Break Regional Trail." (pg. 4.1-50). The Park District notes this measure is the same as the Park District's recommendation in this letter and in previous communications.

2. Table 4.1-14, "Project Consistency with the (CARB) 2017 Scoping Plan." for the suggested measure, "Require the design of bike lanes to connect to the regional bicycle network," the DEIR says:

   > The project applicant has not committed to accommodating a proposed extension of the Big Break Regional Trail through the project site. Although the project would include the provision of bicycle lanes along Bridgehead Road, because the project would not include provision of connections to Big Break Regional Trail, which is a regional bicycle network, the project compliance with this suggested measure is uncertain at this time. (pg. 4.1-46).

5-4 While the project applicant has not "committed" to a trail connection through the project site, the Park District recognizes the project's request for both a General Plan Amendment and a rezoning, which are two of a number of discretionary actions that are being requested of the City of Oakley, and suggests the City require an on-site trail connection as a condition of project approval, if not as a stand-alone Mitigation Measure for GHG reduction.

5-5 As roadway infrastructure improvements are planned for Bridgehead Road, to meet the project's needs and the specifications of the Oakley 2020 General Plan, the Park District would like the opportunity to work with the City to improve access to the Antioch-Oakley Shoreline, which will likely be used as an amenity by future employees of the new Logistics Center, given its proximity to the project, less than a half mile from the Wilbur Avenue entrance.

5-6 The DEIR identifies the project at full buildout and operation as generating over 4,000 average daily trips (Table 4.4-4). Because a future on-site connection between Big Break Regional Trail and the Antioch Pier Trail was not included in the Draft EIR Project Description, the traffic analysis in the EIR does not fully analyze the project's potential impacts to future commuters on bicycles using such a trail connection. The Park District suggests the Final EIR revisit the analysis of Section 4.12, "Pedestrians, Bicycles and Non-Motorized Vehicular Travel," with the assumption that a Big Break Regional Trail to Antioch Pier Trail connection is made to and through the project site, and consider whether such an off-road commuter trail connection would be safer for bicyclists than on-road bicycle facilities such as bike lanes on Bridgehead Road.

5-7 The Park District sees the benefit of a public access easement for a future trail connection through the project site, to allow the regional trail network to continue along the Delta Recreation area of the future Logistics Center, because it gives the public a recreational amenity and a new transportation connection, as envisioned in Oakley's *Parks, Trails, and Recreation Master Plan 2020*.

Thank you for the opportunity to provide comments on the DEIR for this project. The Park District looks forward to continuing to participate in the planning of this project. If you have any questions or concerns, please contact me at (510) 544-2325, or by e-mail at DReiff@ebparks.org.

Respectfully,

Devan Reiff, AICP
Principal Planner

Brian Holt, Chief of Planning/GIS

attachments

LETTER 5: EAST BAY REGIONAL PARK DISTRICT, DEVAN REIFF

Response to Comment 5-1
The comment is a summary of planning efforts associated with a multi-use trail (Big Break Regional Trail) in the project vicinity. The comment does not address the adequacy of the Draft EIR.

Response to Comment 5-2
Page 4.4-6 of the Draft EIR states the following regarding the Big Break Regional Trail system:

> The CCTA's Countywide Bicycle and Pedestrian Plan includes a wide variety of goals and policies supportive of bicycle and pedestrian infrastructure planning and identifies future pedestrian and bicycle facilities throughout the County. The Countywide Bicycle and Pedestrian Plan identifies a future bicycle route extending east to west through the northern portion of the project site.[5]

As noted on page 4.1-46 of the Draft EIR, the project applicant has not committed to accommodating a proposed extension of the Big Break Regional Trail through the project site. Thus, construction of such an extension was not included in the Project Description chapter of the Draft EIR.

Response to Comment 5-3
The comment quotes the Draft EIR, but does not address the adequacy.

Response to Comment 5-4
The comment does not address the adequacy of the Draft EIR. However, the commenter's suggestion has been forwarded to the decision-makers for their consideration.

Response to Comment 5-5
The comment does not address the adequacy of the Draft EIR. However, the commenter's suggestion has been forwarded to the decision-makers for their consideration.

Response to Comment 5-6
Given that construction of a Big Break Regional Trail extension is not included as a component of the proposed project, and future construction of such an extension through the site is uncertain, analysis of potential bicycle and pedestrian impacts on such an extension within the EIR is not warranted. In addition, the EIR is not required to include a comparison of differences in safety concerns between a potential bicycle trail extension and the proposed bicycle lanes along Bridgehead Road. The proposed Bridgehead Road bicycle lanes would be designed to meet applicable City of Oakley standards, and would not result in any substantial safety hazards for bicyclists.

Response to Comment 5-7
The comment does not address the adequacy of the Draft EIR. However, the commenter's suggestion has been forwarded to the decision-makers for their consideration.

Re: Extension of the Comment and Review Period and Request for Documents Referenced in the Draft EIR, Oakley Logistics Center Project (SCH No. 2019029113), DA 01-18, DR 12-18, GP 04-18, RZ 08-18, TM 05-18

Dear Mr. Cole, Mr. McMurray and Ms. Vreonis:

6-1

We are writing on behalf of the Oakley Residents for Responsible Development ("Oakley Residents") concerning the Oakley Logistics Center Project (SCH No. 2019029113), DA 01-18, DR 12-18, GP 04-18, RZ 08-18, TM 05-18 ("Project") to respectfully request:

1. that the City provide the below-listed documents, as well any other documents referenced in the Draft Environmental Impact Report ("Draft

4567-007j

printed on recycled paper

EIR") prepared for the Project, as required by Section 21092(b)(1) of the California Environmental Quality Act ("CEQA");[1]

2. that the City extend the public review and comment period on the Draft EIR **by at least 45 additional days** from the date that it makes the documents available; and

3. that the City postpone the December 17, 2019 joint City Council / Planning Commission hearing on the Project, until the City complies with CEQA.

6-1 Cont'd

Oakley Residents is an unincorporated association of individuals and labor organizations that may be adversely affected by the potential public impacts associated with Project development. Oakley Residents includes: the International Brotherhood of Electrical Workers Local 302; Plumbers & Steamfitters Local 159; Sheet Metal Workers Local 104; Sprinkler Fitters Local 483, their individual members and families, and other individuals that live and/or work in Oakley and the surrounding area.

Our requests are based on the City's failure to make available to the public all the documents referenced in the Draft EIR prepared for the Project for the entire duration of the public comment period, as required by CEQA.

It is well-settled that a CEQA document may not rely on hidden studies or documents that are not provided to the public.[2] Thus, CEQA affords the public a right of access to the documents and supporting evidence that the lead agency relies upon to reach its conclusions and findings in a CEQA document.[3] These documents must be made available to the public for the entire comment period.[4]

---

[3] Pub. Resources Code, § 21092(b)(1); CEQA Guidelines, § 15087(c)(5).
[4] Pub. Resources Code, § 21092(b)(1); *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359, 1385, fn. 12.

4567-007j

Letter 6
Cont'd

6-1
Cont'd

The courts have held that the failure to provide even a few pages of a CEQA document for even a portion of the CEQA review period invalidates the entire CEQA process, and that such a failure must be remedied by permitting additional time for public review and comment on the CEQA document.[5] "In light of case law emphasizing the importance of ensuring that the public can obtain and review documents on which agencies rely for the environmental conclusions ... agencies should ensure that they literally comply with this requirement."[6]

In other words, the City was obligated to provide not just those documents specifically listed and numbered in the "list of references" section of the Draft EIR, but to provide all documents which the City referenced in its analysis and mitigation of impacts in the Draft EIR, and to make those documents available to the public for the *entire comment period*.

Here, the comment period began on October 16, 2019.[7] On November 19, 2019, we submitted a request for immediate access to all documents referenced in the Draft EIR.[8] On November 21, 2019, the City responded to our request by providing the documents listed in the Draft EIR's Chapter 8, "References." By limiting its response to just those documents listed in Chapter 8, the City failed to comply with CEQA, as this response did not include many documents which were referenced and cited in the Draft EIR, but were not listed in Chapter 8.

Based on our review, documents which were not provided include, *but are not limited to*, the following:

1. Department of Toxic Substances Control, Initial Study Chemours Oakley Site Sediment, Soil and Groundwater Corrective Studies (June 29, 2018);
2. 2010 Highway Capacity Manual;

[5] *Ultramar v. South Coast Air Quality Management Dist.* (1993) 17 Cal.App.4th 689, 699.
[6] Remy, Thomas, Moose & Manley, *Guide to the California Environmental Quality Act*, pp. 342-343 (Solano Press, 2007).
[7] Notice of Availability for the Oakley Logistics Center Project Draft EIR (Oct. 16, 2019).
[8] Letter from Janet Laurain to Libby Vreonis and Joshua McMurray *Request for Immediate Access to Documents Referenced in the DEIR and Separate Request for Public Records – Oakley Logistics Center Project (SCH #2019029113, DA 01-18, DR 12-18, GP 04-18, RZ 08-18)* (Nov. 19, 2019) attached hereto at **Exhibit A**.

4567-007j

Letter 6
Cont'd

3. Caltrans, Guide for the Preparation of Traffic Impact Studies (Dec. 2002);
4. 2017 Countywide Comprehensive Transportation Plan (Sept. 2017);
5. East County Action Plan Routes for Routes of Regional Significance (Sept. 2017);
6. East County Action Plan, Final 2000 Update;
7. The City of Oakley's 2017 Traffic Impact Fee Update;
8. CARB Methods to Assess Co-Benefits of California Climate Investments, Vehicle Miles Traveled;
9. Contra Costa Transportation Authority, Contra Costa Countywide Bicycle and Pedestrian Plan; and
10. East Contra Costa County Habitat Conservation Plan / Natural Communities Conservation Plan (ECCC HCP/NCCP).

6-1
Cont'd

While we appreciate the City's efforts to provide access to the documents listed in Chapter 8, the City has otherwise failed to provide all documents referenced in the Draft EIR in its analysis and mitigation of impacts for the Project for the entire comment period, which began on October 16, 2019. This failure directly violates CEQA's procedural mandates.

To remedy this deficiency, the City must:

1. immediately provide access to all of the above-referenced documents, as well as any other documents not produced in response to our request;

2. extend the public review and comment period by at least **45 additional days** from the date that the City releases those documents; and

3. postpone the December 17, 2019 joint City Council / Planning Commission hearing on the Project, until the City complies with CEQA.

VIA REGULAR & ELECTRONIC MAIL (mcmurray@ci.oakley.ca.us)

Subject: Draft Environmental Impact Report (Draft EIR) for the Oakley Logistics Center Project, Contra Costa County

Dear Mr. McMurray:

7-1 The California State Lands Commission (Commission) staff has reviewed the subject Environmental Impact Report (EIR) for the Oakley Logistics Center Project (Project), which is being prepared by the City of Oakley (City). The City, as the public agency developing the area of the former DuPont Chemical Manufacturing Plant and is proposing to approve the Project is the lead agency under the California Environmental Quality Act (CEQA) (Pub. Resources Code, § 21000 et seq.). The Commission is a trustee agency for projects that could directly or indirectly affect sovereign land and their accompanying Public Trust resources or uses.

Commission Jurisdiction and Public Trust Lands

7-2 The Commission has jurisdiction and management authority over all ungranted tidelands, submerged lands, and the beds of navigable lakes and waterways. The Commission also has certain residual and review authority for tidelands and submerged lands legislatively granted in trust to local jurisdictions (Pub. Resources Code, §§ 6009, subd. (c); 6009.1; 6301; 6306). All tidelands and submerged lands, granted or ungranted, as well as navigable lakes and waterways, are subject to the protections of the common law Public Trust Doctrine.

As general background, the State of California acquired sovereign ownership of all tidelands and submerged lands and beds of navigable lakes and waterways upon its

Letter 7
Cont'd

7-2 Cont'd

admission to the United States in 1850. The state holds these lands for the benefit of all people of the state for statewide Public Trust purposes, which include but are not limited to waterborne commerce, navigation, fisheries, water-related recreation, habitat preservation, and open space. On tidal waterways, the State's sovereign fee ownership extends landward to the mean high tide line, except for areas of fill or artificial accretion or where the boundary has been fixed by agreement or a court. On navigable non-tidal waterways, including lakes, the state holds fee ownership of the bed of the waterway landward to the ordinary low-water mark and a Public Trust easement landward to the ordinary high-water mark, except where the boundary has been fixed by agreement or a court. Such boundaries may not be readily apparent from present day site inspections.

7-3

Commission staff is presently analyzing the extent of its jurisdiction and interest in the subject property and negotiating with the Project developer to settle all issues surrounding title to the subject property.

This letter is not intended, nor should it be construed as, a waiver or limitation of any right, title, or interest of the State of California in any lands under its jurisdiction.

Project Description

The Project proponent (North Point Development) proposes to develop the former DuPont manufacturing plant encompassing a 143.3-acre Project site. The entire subject property consists of approximately 375.7 acres; however, the logistics center would only develop on approximately 143.3 acres within the southwest portion of the property. The remaining 232.4 acres of the subject property would remain natural, less some potential soil borrowing on areas that are both immediately adjacent to the 143.3-acre Project site and outside of any wetland or marsh areas.

7-4

The Project proponent's objectives and needs are as follows:

- Project Objective 1: Develop a logistics center with approximately 2,000,000 sf of Class A industrial light warehousing, e-commerce fulfillment, distribution, and light manufacturing space consisting of five buildings.
- Project Objective 2: Redevelop the former DuPont site with a robust logistics center that provides nearly 2,000 jobs for the region.
- Project Objective 3: Implement a key focus in the Oakley General Plan to develop industrial and like distribution uses on the site.
- Project Objective 4: Implement the City's vision in the General Plan to develop this site as a primary employment center.
- Project Objective 5: Allow the sensitive area designated "Delta Recreation" on the property to remain in its natural state.

The proposed Project would include construction of five buildings across the Project site ranging in size from 150,000 square feet (sf) to 642,960 sf for a total of approximately 1,985,304 sf. The proposed Project would include demolition of the existing structure and utility remnants and construction of the proposed buildings over two phases. Specific uses for the proposed buildings would be subject to site-specific development standards in the proposed Planned Unit Development.

Letter 7
Cont'd

7-4 Cont'd The Draft EIR identifies the No Project (No Build) Alternative as the Environmentally Superior Alternative. The Project site is assumed to remain undeveloped under the Alternative and this alternative would not be preferred for the development of the logistics center project. Consequently, the impacts resulting from the proposed Project would not occur under the Alternative. However, leaving the site vacant with a dilapidated building and remnants of utility infrastructure could be considered urban blight.

Environmental Review

7-5 Commission staff requests that the City consider the following comments on the Project's Draft EIR, to ensure that impacts to State sovereign land are adequately analyzed for the Commission's use of the EIR to support any future Commission action related to the proposed Project.

General Comments

7-6 1. Project Description: A CEQA environmental document should be reviewed and edited by the lead agency to ensure accuracy and professionalism. This document does not appear to have an editor assigned to review for accuracy or professionalism. On pages 13, 21 and 76, the document refers to the "city of Davis". Also, on page 12 of the Project Summary, it identifies the past use of the site as "precious".

7-7 The Draft EIR must also identify the Commission as a potential owner of lands within the subject property. Commission staff requests submitting all copies of federal and State agency permits to ensure any future actions by the Commission are consistent with other permits.

7-8 2. Public Agency Approvals: The Commission, a public agency, has jurisdiction over sovereign waterways and identified filled lands of the State. There is a potential that portions of the proposed Project will encroach onto Public Trust lands and the Commission will require the Project proponent to address any impact or issue which will require an action from the Commission. Commission staff is presently negotiating with the Project proponent to resolve such concerns. The Commission will utilize the certified Final EIR from the City for any discretionary action.

Climate Change

7-9 3. Greenhouse Gas (GHG): A GHG emissions analysis consistent with the California Global Warming Solutions Act (Assembly Bill [AB] 32) and required by the State CEQA Guidelines should be included in the Draft EIR. This analysis should identify a threshold for significance for GHG emissions, calculate the level of GHGs that will be emitted as a result of construction and ultimate build-out of the Project, determine the significance of the impacts of those emissions, and, if impacts are significant, identify mitigation measures that would reduce them to the extent feasible. For the proposed Project, it appears that the proposed Project construction emissions will

Letter 7
Cont'd

7-9 Cont'd exceed identified thresholds. These thresholds will be amortized over a 25-year span to reduce the construction and operational emissions to a level below the 1,100 metric tons per year (CO_2e). A more extensive description and mitigation schedule for the impacts identified in the EIR should be provided in the certified EIR Mitigation Monitoring Program (MMP).

Biological Resources

7-10 4. Invasive Species: One of the major stressors in California waterways is introduced species. Therefore, the Draft EIR should consider the Project's potential to encourage the establishment or proliferation of aquatic invasive species (AIS) such as the quagga mussel, or other nonindigenous, invasive species including aquatic and terrestrial plants. For example, construction equipment brought in from long stays at distant projects may transport new species to the Project area via hull biofouling, or new species may be transported by soil in or on work and hauling vehicles. Marine and aquatic organisms attach to and accumulate on the hull and other submerged parts of a vessel. Plant invaders may disperse seeds from one area to another via dried mud and soils attached to vehicles from previous work areas. If the analysis in the Draft EIR finds potentially significant AIS and plant impacts, possible mitigation could include contracting vessels from nearby, or requiring contractors to perform a certain degree of hull and vehicle cleaning. The CDFW's Invasive Species Program could assist with this analysis as well as with the development of appropriate mitigation (information at https://www.wildlife.ca.gov/Conservation/Invasives).

Cultural Resources

7-11 5. Title to Resources: The Draft EIR should also mention that the title to all abandoned shipwrecks, archaeological sites, and historic or cultural resources on or in the tide and submerged lands of California is vested in the State and under the jurisdiction of the Commission (Pub. Resources Code, § 6313). Commission staff requests that the City consult with Staff Attorney Jamie Garrett should any cultural resources on state lands be discovered during construction of the proposed Project. In addition, Commission staff requests that the following statement be included in the EIR's MMP: "The final disposition of archaeological, historical, and paleontological resources recovered on state lands under the jurisdiction of the California State Lands Commission must be approved by the Commission."

Hazards and Hazardous Materials

7-12 6. The Site has supported a mix of industrial uses since the mid-1950s and agricultural uses prior to then. From 1956 to 1999, DuPont/Chemours operated a chemical manufacturing facility at the Site that commenced with the manufacture of chlorofluorocarbon (CFC) products under the trade name Freon®. Tetra-alkyl lead anti-knock gasoline additive compounds (AKCs) were manufactured at the Site beginning in 1957, and titanium dioxide (TiO2) production began in 1963. All three product lines have been closed and the manufacturing area has been demolished.

7-12 Cont'd

Consultants acting on behalf of DuPont/Chemours have remediated the Site under direction of the appropriate agencies. The remediation is scheduled to be completed by January 2020. DTSC issued a restrictive land use covenant for the manufacturing area only.

The Draft EIR should include a brief history of all the past activities that have occurred on the Site and describe the direction the City and the Project proponent are proposing to continue monitoring on the Site and how the development will impact the future monitoring and Site activities. The Draft EIR should also include a schedule and description of continued oversight on the proposed development and state which entity would be responsible for the monitoring and reporting on the Site.

7. Hydrology/Water Quality:

7-13

Sea-Level Rise: Climate change impacts, including sea-level rise, more frequent and intense storm events, and increased flooding and erosion, affect both open coastal areas and inland waterways in California. The subject facilities are located on the San Joaquin River in a tidally influenced site vulnerable to flooding at current sea levels and at a higher risk of flood exposure given projected scenarios of sea-level rise. The Site is identified by the Federal Emergency Management Agency as Zone AE. This Zone falls within the 100-year floodplain, which is considered an area at high risk for flooding. Commission staff recommends greater effort and mitigation measures be included in the development plan of the proposed Project to account for the potential impacts to future flooding events.

Mitigation and Monitoring

8. To avoid the improper deferral of mitigation, please ensure that mitigation measures included in the draft EIR avoid or reduce the identified impacts (especially those incorporating future plans) are presented as specific, feasible, enforceable obligations, or are presented as formulas containing "performance standards which would mitigate the significant effect of the project and which may be accomplished in more than one specified way" (State CEQA Guidelines, § 15126.4, subd. (b)).

7-14

Prior to final action on the EIR, the City should provide an MMP pursuant to State CEQA Guidelines section 15074, subdivision (d). The MMP should include methods for coordination, timing for implementation of mitigation measures and list all parties and/or agencies, in addition to the City, responsible for ensuring compliance and enforcement through permit conditions, agreements or other measures during each phase of the Project.

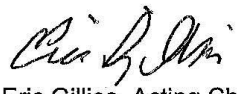
Other Section(s)

9. Environmental Justice: The Draft EIR does not state whether the City intends to discuss and analyze potential environmental justice related issues, including an assessment of public access and equity implications and who would bear the burdens or benefits from the proposed Project. Commission staff believes the Draft EIR, as an informational public document, is an appropriate vehicle to disclose and

7-15

Letter 7
Cont'd

7-15 Cont'd



discuss how the proposed Project would attain or be consistent with the City's equity goals and statewide policy direction.

Thank you for the opportunity to comment on the Draft EIR for the Project. We request that you consider our comments prior to certification of the Final EIR.

7-16

Please send copies of future Project-related documents, including electronic copies of the Final EIR, Mitigation Monitoring and Reporting Program, Notice of Determination, CEQA Findings and, if applicable, Statement of Overriding Considerations when they become available. Please refer questions concerning environmental review to Christopher Huitt, Senior Environmental Scientist, at (916) 574-2080 or christopher.huitt@slc.ca.gov. For questions concerning archaeological or historic resources under Commission jurisdiction, please contact Staff Attorney Jamie Garrett, at (916) 574-0398 or jamie.garrett@slc.ca.gov.

Sincerely,

Eric Gillies, Acting Chief
Division of Environmental Planning
and Management

J. Garrett, Commission

LETTER 7: CALIFORNIA STATE LANDS COMMISSION, ERIC GILLIES

Response to Comment 7-1
The comment is introductory, and does not directly address the adequacy of the Draft EIR.

Response to Comment 7-2
The comment provides background information about the role of the California State Land's Commission, but does not address the adequacy of the Draft EIR.

Response to Comment 7-3
The comment does not address the adequacy of the Draft EIR.

Response to Comment 7-4
The comment summarizes the proposed project, but does not address the adequacy of the Draft EIR.

Response to Comment 7-5
The comment does not address the adequacy of the Draft EIR, but has been noted by the project decision-makers.

Response to Comment 7-6
In response to the comment, the following excerpt from Pages 1-2, 2-2 and 3-16 of the Draft EIR is hereby revised:

> Certification of the Environmental Impact Report, including adoption of Findings of Fact and a Statement of Overriding Considerations. Before the City can approve the proposed project, the City must certify that the EIR was completed in compliance with the requirements of CEQA, that the decision-making body has reviewed and considered the information in the EIR, and that the EIR reflects the independent judgment of the City of Oakley ~~Davis~~. The City would also be required to adopt Findings of Fact, and for any impacts determined to be significant and unavoidable, a Statement of Overriding Considerations, as part of project approval.

In addition, page 1-1 is revised as follows:

> The subject property is site of the former DuPont Chemical Plant that produced chlorofluorocarbons, fuel additive anti-knock compounds (AKCs) and titanium dioxide between 1956 to 1997. The facility was demolished in 1999, less two dilapidated buildings and some remnant utility infrastructure. The site has been undergoing remedial and cleanup work for soil and groundwater contamination. The site is highly disturbed from its pre~~c~~vious use as a chemical plant and as a result of the remediation efforts.

The foregoing revisions correct minor typographical errors and do not affect the analysis or conclusions presented in the Draft EIR.

Response to Comment 7-7
The identification of potential future owners of adjacent lands is not a requirement under CEQA; however, the commenter's suggestion has been forwarded to the decision-makers for their consideration.

Response to Comment 7-8

The comment has been noted and will be forwarded to decision-makers for their consideration.

Response to Comment 7-9

The comment does not provide specifics as to what level additional detail and schedule is being requested. Page 4.1-43 of the Draft EIR states the following regarding GHG emissions:

> *Compliance with AB 32*
> As shown in the table above, the project's total unmitigated annual GHG emissions in the first year of project operation, 2023, including amortized construction-related emissions, were estimated to be approximately 10,988.70 $MTCO_2e$/yr, which results in emissions of 4.32 $MTCO_2e$/SP/yr. Thus, implementation of the proposed project would result in emissions below the BAAQMD's 4.6 $MTCO_2e$/SP/yr threshold of significance for GHG emissions, and the proposed project would be considered to comply with the emissions reductions targets of AB 32.

Based on the above, the Draft EIR does address the project's associated GHG emissions and AB 32 compliance. Mitigation Measures 4.1-5(a)-(c) provide recommendations to reduce GHG impacts, but the overall impact is assumed to remain cumulatively considerable and significant and unavoidable. Mitigation Measures 4.1-5(a) and (b) provide a specific and implementable schedule ("Prior to issuance of a grading permit" and "Prior to issuance of building permits for each phase of development," respectively). Mitigation Measure 4.1-5(c) requires that improvement plans and building plans for the proposed project include all feasible mitigation measures as determined by the City. Therefore, the GHG mitigation measures include sufficient mitigation scheduling.

Response to Comment 7-10

The proposed project would not include the use of any aquatic vessels during construction or operations. Therefore, transport of aquatic invasive species would not occur as a result of the proposed project.

Page 4.1-30 of the Draft EIR states the following regarding BAAQMD's recommended Basic Construction Mitigation Measures:

> 1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
> 2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
> 3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

Measure 3 requires that construction tires be washed regularly to prevent dust. This mitigation measure helps to prevent the spread of invasive plant species seeds region-wide. In addition, on-going remediation activities include the use of heavy equipment throughout the site as well as ground disturbance and vegetation removal. As a result, the habitat is already highly disturbed.

Response to Comment 7-11

The proposed project location is upland and construction would not occur within a tidal area. Thus, the potential to discover shipwrecks is limited. Further, the ongoing on-site remediation has

thoroughly disturbed the land of interest. Prior to approval, the ongoing remediation project underwent project-specific CEQA analysis whereby the cultural impacts of the remediation project were considered.[7]

Even though the likelihood is low, in response to the comment, Mitigation Measure V-I in the IS/MND is hereby revised as follows:

> *V-1. If buried archaeological, paleontological, and/or cultural resources are encountered during site grading or other site work, all such work shall be halted immediately within 100 feet of the discovery and the developer shall immediately notify the Planning Division of the discovery. In such case, the developer shall be required, at their own expense, to retain the services of a qualified archaeologist for the purpose of recording, protecting, or curating the discovery, as appropriate. The archaeologist shall be required to submit to the City of Oakley Planning Division for review and approval a report of the findings and method of curation or protection of the resources. Further grading or site work within the area of discovery would not be allowed until the preceding work has occurred.*
>
> *The final disposition of archaeological, historical, and paleontological resources recovered on state lands under the jurisdiction of the California State Lands Commission must be approved by the Commission.*

The foregoing revision is for informational purposes and does not affect the analysis or conclusion of the EIR.

Response to Comment 7-12

Please see Response to Comment 3-1.

Response to Comment 7-13

Pages 4.3-8 and 4.3-9 of the Draft EIR quotes the City of Oakley General Plan requirements regarding flood protection:

Policy 4.10.1	Work cooperatively with Contra Costa County Flood Control and Water Conservation District (CFCWCD) to ensure and enhance flood protection in the City of Oakley.
Policy 8.2.3	Buildings in urban development near the shoreline of the Delta and in flood-prone areas shall be protected from flood dangers, including consideration of rising sea levels.
Policy 8.2.4	Habitable areas of structures near the shoreline of the Delta and in flood-prone areas shall be sited above the highest water level expected during the life of the project, or shall be protected for the expected life of the project by levees of an adequate design.

The proposed project would be required to comply to the General Plan Policies above. In addition, page 4.3-20 states the following regarding exposure to flooding:

> Development of the proposed project would include water detention facilities which would regulate and improve the current water flow on the project site. The detention

[7] Department of Toxic Substances Control. California Environmental Quality Act Initial study: Chemours Oakley Site Sediment, Soil, and Groundwater Corrective Measures Studies. April 13, 2017.

> basin would include an outfall to the marsh area and would be equipped with a flap gate to prevent inflows from the Delta during high tide events, thus reducing risk of flooding on the project site.

Based on the above, flood risk is addressed in the Draft EIR, and Mitigation Measure 4.3-5 responds to the aforementioned risk.

Response to Comment 7-14

Pursuant to CEQA guidelines, a Mitigation Monitoring and Reporting Program will be released in conjunction with the Final EIR (see Chapter 4 of this Final EIR). The mitigation included in the Draft EIR has not been deferred; instead, the mitigation measures included in the Draft EIR are specific, feasible, and enforceable.

Response to Comment 7-15

The comment addresses the topic of environmental justice. As the Commenter noted, the Project would rid this area of urban blight which would assist in furthering environmental justice. The City is currently updating their General Plan to address Environmental Justice per State Law and it would be premature to analyze any Environmental Justice issues without any policy direction from the General Plan. Moreover, analysis of environmental justice is not required under CEQA; however, the commenter's suggestion has been forwarded to the decision-makers for their consideration.

Response to Comment 7-16

The comment is a concluding statement, and does not discuss the adequacy of the Draft EIR.

3. Revisions to the Draft EIR Text

3. REVISIONS TO THE DRAFT EIR TEXT

3.1 INTRODUCTION

The Revisions to the Draft EIR Text chapter provides all corrections, additions, and revisions made to the Draft EIR. The changes represent minor clarifications and amplifications of the analysis contained in the Draft EIR and do not constitute significant new information that, in accordance with CEQA Guidelines Section 15088.5, would trigger the need to recirculate portions or all of the Draft EIR. Please refer to the discussion of this topic provided in Section 1.6 of Chapter 1, Introduction and List of Commenters.

It should be noted that in addition to the text revisions presented in Chapter 2 of this Final EIR in response to public comments, this chapter provides other text revisions to the Draft EIR initiated by the City of Oakley based upon further review of the document since its release to the public.

3.2 DESCRIPTION OF CHANGES

New text is double underlined and deleted text is ~~struck through~~. Text changes are presented in the page order in which they appear in the Draft EIR.

1 Introduction

Page 1-1 of the Draft EIR is hereby revised as follows:

> The site has been undergoing remedial and cleanup work for soil and groundwater contamination. The site is highly disturbed from its pre~~e~~vious use as a chemical plant and as a result of the remediation efforts. Construction of the proposed structures on the project site would occur in accordance with the procedures set forth by the Department of Toxic Substances Control (DTSC).

In addition, page 1-1 of the Draft EIR is hereby further revised as follows:

> The subject property is site of the former DuPont Chemical Plant that produced chlorofluorocarbons, fuel additive anti-knock compounds (AKCs) and titanium dioxide between 1956 to 1997. The facility was demolished in 1999, less two dilapidated buildings and some remnant utility infrastructure. The site has been undergoing remedial and cleanup work for soil and groundwater contamination. The site is highly disturbed from its pre~~e~~vious use as a chemical plant and as a result of the remediation efforts.

The above revision is for clarification purposes and does not change the analysis or conclusions of the Draft EIR.

The following excerpt from Pages 1-2, 2-2 and 3-16 of the Draft EIR is hereby revised as follows:

> Certification of the Environmental Impact Report, including adoption of Findings of Fact and a Statement of Overriding Considerations. Before the City can approve the proposed project, the City must certify that the EIR was completed in compliance with the requirements of CEQA, that the decision-making body has reviewed and considered the information in the EIR, and that the EIR reflects the independent judgment of the City of

> Oakley ~~Davis~~. The City would also be required to adopt Findings of Fact, and for any impacts determined to be significant and unavoidable, a Statement of Overriding Considerations, as part of project approval.

The foregoing revisions correct minor typographical errors and do not affect the analysis or conclusions presented in the Draft EIR.

2 Executive Summary

For clarification purposes, Table 2-1 beginning on page 2-6 in Chapter 2, Executive Summary, of the Draft EIR is hereby revised to reflect revisions made to mitigation measures as part of this Final EIR in the relevant chapters, as presented throughout this chapter. In addition, revisions to Mitigation Measure 4.2-2(d) and Mitigation Measure 4.2-8 are staff-initiated. Rather than include the entirety of Table 2-1 with revisions shown where appropriate, only the impacts for which mitigation has been revised or added are presented below. The revisions to the Executive Summary table are for clarification purposes only and do not change the conclusions of the Draft EIR. Please refer to the end of this chapter for Table 2-1.

3 Project Description

Page 3-4 of the Draft EIR is hereby revised as follows:

> In 2013, DuPont separated its chemical segment from its other businesses and remedial obligations for the site were transferred to Chemours who is working with DTSC on the remediation efforts. Most recent, on June 29, 2018, DTSC certified a Mitigated Negative Declaration (MND) for the remaining remediation work. In addition, a Land Use Covenant (LUC) was developed on May 31, 2019 and agreed upon by the DTSC and Chemours Company FC, LLC. The purpose of the LUC is to control exposure to contamination through specifically defined restrictions, as well as ensure remediation for environmental contamination is performed as necessary based on the site conditions.

The above revision is for informational purposes and does not alter the analysis or conclusions within the Draft EIR.

Page 3-4 of the Draft EIR is hereby revised as follows:

> This remediation work is being performed in two field seasons. The first field season started in August/September 2018, and the anticipated completion date for this work is mid-2019. The anticipated start date for the second field season is August or September 2019, and the anticipated completion date is January or February 2020. Following remediation, the project site is subject to post closure care pursuant to the Hazardous Waste Facility Post-Closure Permit (PCP), issued by DTSC on December 7, 2011. The PCP requires the closure and decommission of the East Basin, West Basin, Emergency Basin, and Ponds A, B, and C located within the northeastern portion of the project site.

The above revision is for informational purposes and does not change the analysis or conclusions of the Draft EIR.

Page 3-4 of the Draft EIR is hereby revised as follows:

> The site has been highly disturbed and altered over the years by the DuPont operations and remediation efforts. The remediation efforts will allow areas of the site to develop with industrial and commercial uses (in the 143.3-acre project site) and recreational uses (on the 232.4-acre remainder area). Development within the remediated areas would adhere

to the requirements set forth in Article IV of the LUC. As stated in the document, prohibited uses on the site include residences, hospitals, schools, day cares, and recreational land uses within the Central Slough Wetland. Furthermore, the development of the project would not occur until the Soil and Materials Management Plan has been pre-approved by the DTSC in writing.

Additional information on the cleanup efforts for the site can be found at https://dtsc.ca.gov.

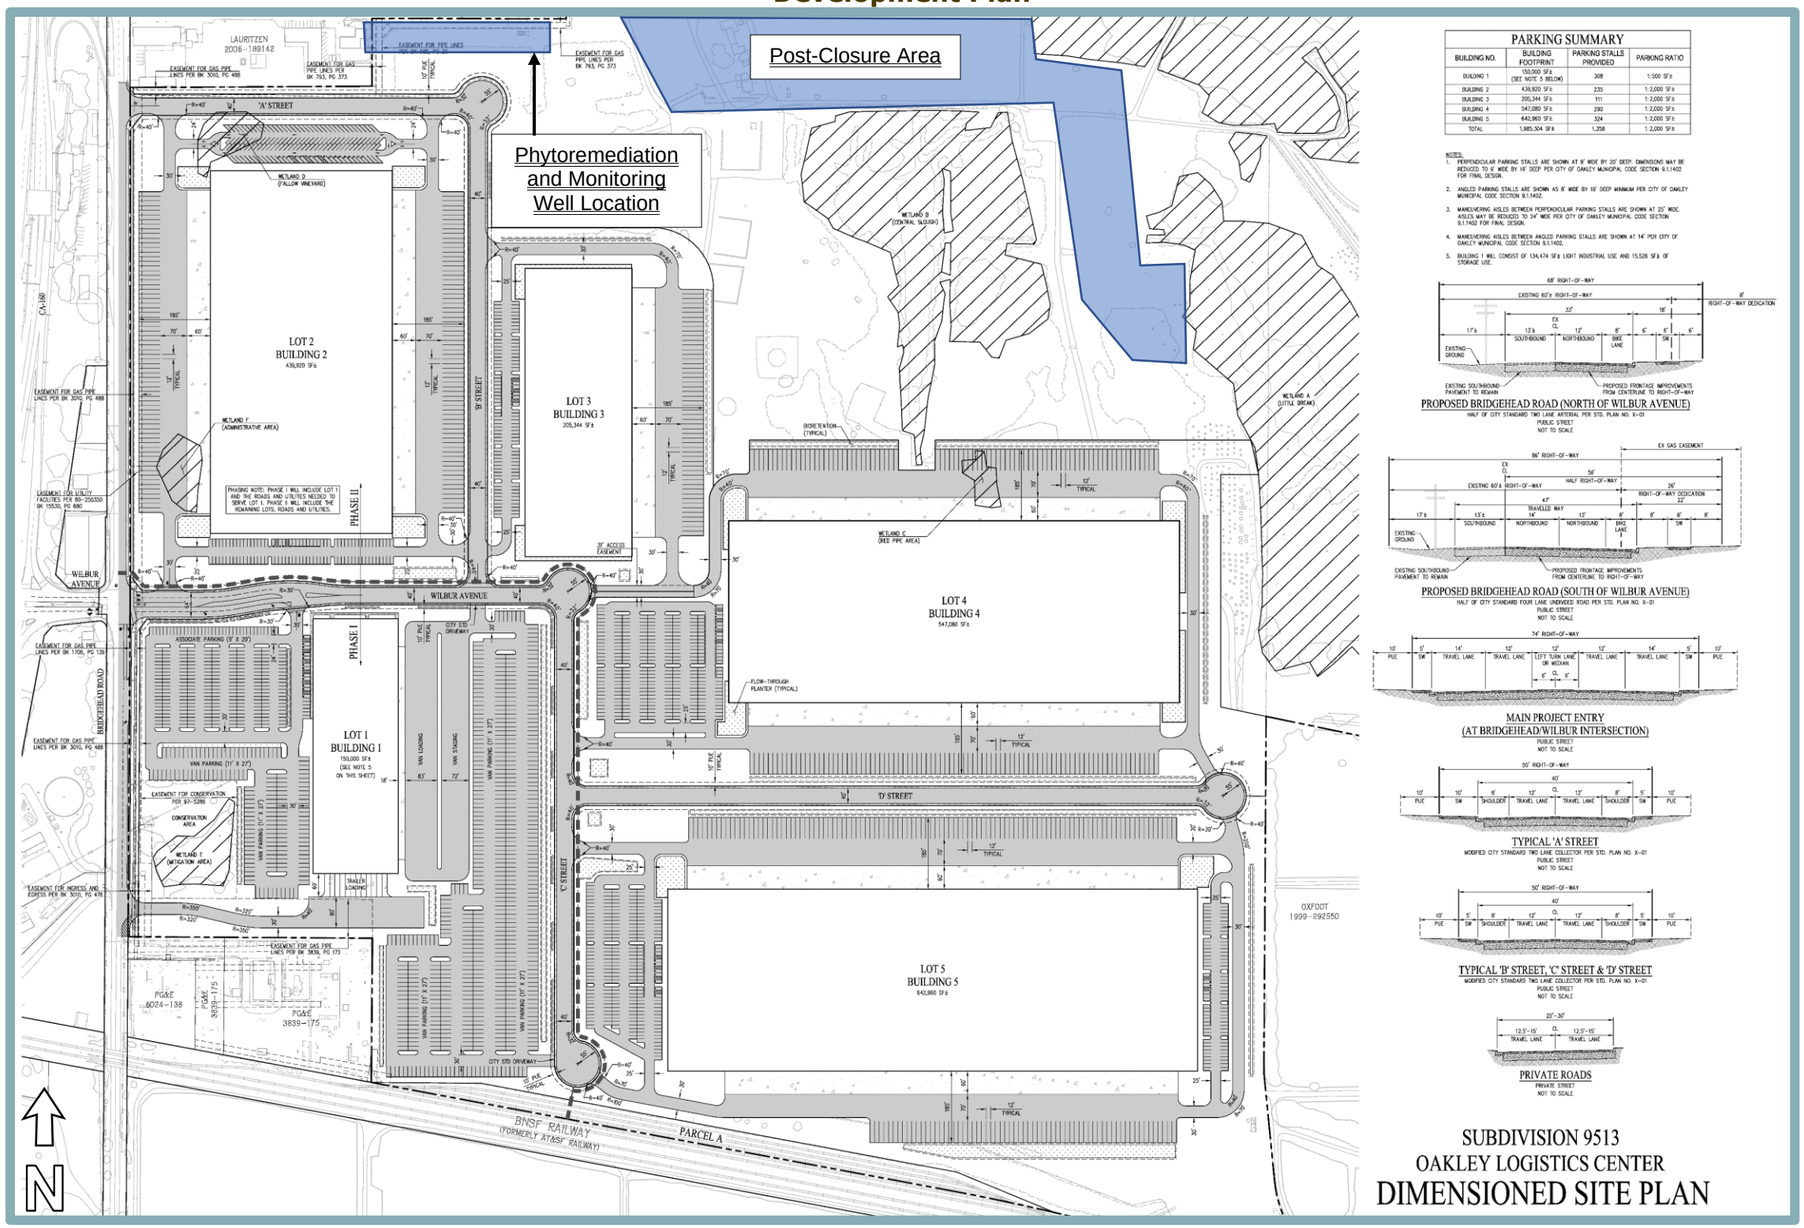
The above revision to text is for disclosure purposes and does not change the analysis or conclusions of the Draft EIR.

Figure 3-6 on page 3-9 of the Draft EIR is hereby revised in order to delineate the monitoring well and phyto-remediation locations (see figure on following page). The revision is for clarification purposes and does not change the analysis or conclusions of the Draft EIR.

4.1 Air Quality

Page 4.1-1 of Chapter 4.1, Air Quality and Greenhouse Gas Emissions, is hereby revised as follows:

BREEZE ~~ENVIRON~~ International Corporation and the California Air Districts. *California Emissions Estimator Model User's Guide Version 2016.3.2*. November 2017.



The forgoing staff-initiated revision is for informational purposes, and does not affect the analysis or conclusions in the Draft EIR.

Page 4.1-31 of Chapter 4.1 is hereby revised as follows:

4.1-1(a) *Prior to issuance of a grading permit, the project applicant shall show on the grading plans via notation that the contractor shall ensure that all off-road heavy-duty diesel-powered equipment (e.g., rubber tired dozers, excavators, graders, scrapers, pavers, paving equipment, and cranes) to be used for each phase of construction of the project (i.e., owned, leased, and subcontractor vehicles) shall meet California Air Resources Board (CARB) Tier 4 Final emissions standards or cleaner. The grading plans shall be submitted for review and approval by the Public Works and Engineering Department. In addition, all off-road equipment operating at the construction site must be maintained in proper working condition according to manufacturer's specifications. Idling shall be limited to 5 minutes or less in accordance with the Off-Road Diesel Fueled Fleet Regulation as required by CARB.*

Idling shall be limited to five minutes or less for all on-road related and/or delivery trucks in accordance with CARB's On-Road Heavy-Duty Diesel Vehicles (In-Use) Regulation. Clear Signage regarding idling restrictions should be placed at the entrances to the construction site.

Figure 3-1
Development Plan

Page 4.1-34 of Chapter 4.1 hereby revised as follows:

~~California Department of Transportation. *Transportation Project-Level Carbon Monoxide Protocol*. Revised December, 1997.~~

The foregoing citation is no longer required, and the revision does not affect the analysis or conclusions in the Draft EIR.

Page 4.1-50 of Chapter 4.1 is hereby revised as follows:

4.1-5(c) Improvement Plans and building plans for the proposed project shall identify all feasible mitigation measures developed in coordination with the BAAQMD and as determined by the City of Oakley Planning Division to reduce significant impacts to the extent feasible. Mitigation Measures may include, but would not be limited to, BAAQMD's recommended mitigation measures such as the following:

- *Orient buildings to maximize passive solar heating;*
- *Install programmable thermostat timers;*
- *Limit outdoor lighting requirements;*
- *Reduce unnecessary outdoor lighting by utilizing design features such as limiting the hours of operation of outdoor lighting;*
- *Provide education on energy efficiency to tenants. Provide information on energy management services for large energy users;*
- *Meet "reach" goals for building energy efficiency and renewable energy use;*
- *Limit the use of outdoor lighting to only that needed for safety and security purposes;*
- *Require use of electric or alternatively fueled sweepers with HEPA filters;*
- *Include energy storage where appropriate to optimize renewable energy generation systems and avoid peak energy use;*
- *Prohibit gas powered landscape equipment and implement electric yard equipment compatibility;*
- *Provide local shuttles;*
- *Implement area or cordon pricing;*
- *Install an infiltration basin to provide an opportunity for 100% of the storm water to infiltrate on-site;*
- *Install a system to reutilize gray water;*
- *Use locally-sourced water supply;*
- *Use of minimal amounts of concrete and asphalt;*
- *Use of groundcovers rather than pavement to reduce heat reflection;*
- *Shade HVAC equipment from direct sunlight;*
- *Install high-albedo white thermoplastic polyolefin roof membrane;*
- *Use recycled-content gypsum board;*
- *Require all buildings to become "LEED" and "WELL" certified;*
- *Increase in insulation such that heat transfer and thermal bridging is minimized in proposed structures;*

- *Limit air leakage through the structure and/or within the heating and cooling distribution system;*
- *Installation of dual-paned or other energy efficient windows;*
- *Installation of automotive devices to turn off lights where they are not needed;*
- *Improve bike and pedestrian network (complete sidewalks, connection to adjacent areas, connection to bike network, etc.);*
- *Implement bicycle and pedestrian facilities such as bike lanes, routes, and paths, bike parking, sidewalks, and benches;*
- *Dedicate land on-site to facilitate future connections with the Big Break Regional Trail;*
- *Promote ridesharing, transit, bicycling, and walking for work trips through dedication of preferential parking spaces, provision of on-site bicycle parking, provision of end-of-trip facilities such as bicycle lockers and on-site showers;*
- *Subsidize employee transit passes;*
- *Install electric vehicle charging infrastructure in excess of existing CBSC requirements;*
- *Provide charging stations and preferential parking spots for electric vehicles;*
- *Install energy star appliances;*
- *Install solar water heating;*
- *Install on-site renewable energy systems;*
- *Use water efficient landscapes and native/drought-tolerant vegetation;*
- *Provide outdoor electrical outlets to allow for use of electrically powered landscaping equipment;*
- *Construct on-site or fund off-site carbon sequestration projects (such as tree plantings or reforestation projects); and*
- *Purchase carbon credits to offset project annual emissions. Carbon offset credits shall be verified and registered with The Climate Registry, the Climate Action Reserve, or another source approved by CARB, BAAQMD, or the City of Oakley.*

If off-site mitigation measures are proposed, the applicant must be able to show that the emission reductions from identified projects are real, permanent through the duration of the project, enforceable, and are equal to the pollutant type and amount of the project impact being offset. In addition, any off-site measures shall be subject to review and approval by to City of Oakley Planning Division. BAAQMD recommends that off-site mitigation projects occur within the nine-county Bay Area in order to reduce localized impacts and capture potential co-benefits. If BAAQMD has established an off-site mitigation program at the time a development application is submitted, as an off-site mitigation measure, the applicant may choose to enter into an agreement with BAAQMD and pay into the established off-site mitigation program fund, where BAAQMD would commit to reducing the type and amount of emissions identified in the agreement.

The foregoing revisions serve to increase the specificity of Mitigation Measure 4.1-5(c); however, even with implementation of the foregoing revisions, project-related operational GHG emissions are anticipated to continue to conflict with relevant statewide goals and targets, and the project

would continue to result in a significant and unavoidable impact. Therefore, the analysis and conclusions presented in the Draft EIR remain adequate.

Initial Study

Page 26 of the IS/MND is hereby revised as follows:

> *V-1. If buried archaeological, paleontological, and/or cultural resources are encountered during site grading or other site work, all such work shall be halted immediately within 100 feet of the discovery and the developer shall immediately notify the Planning Division of the discovery. In such case, the developer shall be required, at their own expense, to retain the services of a qualified archaeologist for the purpose of recording, protecting, or curating the discovery, as appropriate. The archaeologist shall be required to submit to the City of Oakley Planning Division for review and approval a report of the findings and method of curation or protection of the resources. Further grading or site work within the area of discovery would not be allowed until the preceding work has occurred.*
>
> *The final disposition of archaeological, historical, and paleontological resources recovered on state lands under the jurisdiction of the California State Lands Commission must be approved by the Commission.*

The foregoing revision is reflected in Chapter 4, Mitigation, Monitoring, and Reporting Program, of this Final EIR. The revision does not affect the analysis or conclusions presented in the IS/MND or Draft EIR.

Table 2-1
Summary of Impacts and Mitigation Measures

S	*Entire Project Site and Off-Site Improvement Areas* *4.2-8 Prior to project-related tree removal, the project applicant shall ~~submit a tree removal permit application to the City. The permit application shall be prepared in accordance with Section 9.1.1112 and shall include the payment of tree removal or protection fees as required per the City's Municipal Code. The project applicant shall~~ be required to comply with the standards included in Section 9.1.1112 <u>of the City's Municipal Code by</u> implementing one of the options provided in Section 9.1.1112(g)(11)(a), <u>to the satisfaction of the</u> ~~prior to initiation of construction activities. The permit application shall be submitted to Community Development Department and approved by~~ the Director of the Community Development Department or the Planning Commission, as applicable.*	LTS

4. Mitigation Monitoring and Reporting Program

4. MITIGATION MONITORING AND REPORTING PROGRAM

4.1 INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires all State and local agencies to establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of either a "mitigated negative declaration" or specified environmental findings related to environmental impact reports.

The following is the Mitigation Monitoring and Reporting Program (MMRP) for the Oakley Logistics Center Project (proposed project). The intent of the MMRP is to ensure implementation of the mitigation measures identified within the Environmental Impact Report (EIR) for the proposed project. Unless otherwise noted, the cost of implementing the mitigation measures as prescribed by this MMRP shall be funded by the applicant.

4.2 COMPLIANCE CHECKLIST

The MMRP contained herein is intended to satisfy the requirements of CEQA as they relate to the EIR prepared for the proposed project. This MMRP is intended to be used by City staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Mitigation measures identified in this MMRP were developed in the EIR.

The EIR presents a detailed set of mitigation measures that will be implemented throughout the lifetime of the project. Mitigation is defined by CEQA Guidelines, Section 15370, as a measure that:

- Avoids the impact altogether by not taking a certain action or parts of an action;
- Minimizes impacts by limiting the degree or magnitude of the action and its implementation;
- Rectifies the impact by repairing, rehabilitating, or restoring the impacted environment;
- Reduces or eliminates the impact over time by preservation and maintenance operations during the life of the project; or
- Compensates for the impact by replacing or providing substitute resources or environments.

The intent of the MMRP is to ensure the implementation of adopted mitigation measures. The MMRP will provide for monitoring of construction activities as necessary and in-the-field identification and resolution of environmental concerns.

Monitoring and documenting the implementation of mitigation measures will be coordinated by the City of Oakley. The table attached to this report identifies the mitigation measures, the monitoring action for each mitigation measure, the responsible party for the monitoring action, and timing of the monitoring action. The applicant will be responsible for fully understanding and effectively implementing the mitigation measures contained within the MMRP. The City will be responsible for monitoring compliance.

4.3 MITIGATION MONITORING AND REPORTING PROGRAM

The following table indicates the mitigation measure number, the impact the measure is designed to address, the measure text, the monitoring agency, implementation schedule, and an area for sign-off indicating compliance.

		potential co-benefits. If BAAQMD has established an off-site mitigation program at the time a development application is submitted, as an off-site mitigation measure, the applicant may choose to enter into an agreement with BAAQMD and pay into the established off-site mitigation program fund, where BAAQMD would commit to reducing the type and amount of emissions identified in the agreement.			
Chapter 4.2 – Biological Resources					
4.2-1	Have a substantial adverse effect, either directly or through habitat modifications, on burrowing owl.	***Areas of the Project Site Within the ECCC HCP/NCCP Permit Area and Off-Site Improvement Areas*** *4.2-1(a) Prior to the issuance of grading or construction permits for each phase of development of the project, the applicant shall pay the applicable ECCC HCP/NCCP per-acre Development Fee in effect for Zone I in compliance with Article 7, Habitat Conservation Plan/Natural Community Conservation Plan Implementing Program, of the Oakley Municipal Code. The Development Fee will cover the development of habitat that primarily includes annual grassland. Payment of the Development Fee would address the loss of potential habitat of special-status plant species associated with grasslands. The fees would be used in part to protect these affected special-status plant species by bringing existing populations of the species under protection.*	City of Oakley Planning Division Contra Costa County Conservancy	Prior to issuance of grading or construction permits for each phase of development within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		Alternately, the project applicant may, in accordance with the terms of Oakley Municipal Code Article 7, offer to dedicate land in lieu of some or all of the mitigation fees. All applicable mitigation fees shall be paid, or an "in-lieu-of fee" agreement executed, prior to the issuance of a grading permit for the project. *The Oakley Planning Division and the Contra Costa County Conservancy shall approve the final method of compliance with the ECCC HCP/NCCP provisions.*			
		4.2-1(b) Preconstruction Survey *Prior to any ground disturbance related to covered activities, a USFWS/CDFW- approved biologist will conduct a preconstruction survey in areas identified in the planning surveys as having potential burrowing owl habitat. The surveys will establish the presence or absence of western burrowing owl and/or habitat features and evaluate use by owls in accordance with CDFW survey guidelines (California Department of Fish and Game 1995).* *On the parcel where the activity is proposed, the biologist will survey the proposed disturbance footprint and a 500-foot radius from the perimeter of the proposed footprint to identify burrows and owls. Adjacent parcels under different land ownership will not be surveyed. Surveys should take place near*	City of Oakley Planning Division CDFW	Prior to any ground disturbance related to covered activities within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		sunrise or sunset in accordance with CDFW guidelines. All burrows or burrowing owls will be identified and mapped. Surveys will take place no more than 30 days prior to construction. During the breeding season (February 1 to August 31), surveys will document whether burrowing owls are nesting in or directly adjacent to disturbance areas. During the nonbreeding season (September 1 to January 31), surveys will document whether burrowing owls are using habitat in or directly adjacent to any disturbance area. Survey results will be valid only for the season (breeding or nonbreeding) during which the survey is conducted. ***Areas of the Project Site Outside the ECCC HCP/NCCP Permit Area*** *4.2-1(c) Preconstruction Survey* *Prior to any ground disturbance related to covered activities, a USFWS/CDFW-approved biologist will conduct a preconstruction survey in of potential burrowing owl habitat. The surveys will establish the presence or absence of western burrowing owl and/or habitat features and evaluate use by owls in accordance with CDFW survey guidelines (California Department of Fish and Game 2012).* *Compensatory Habitat Mitigation*	City of Oakley Planning Division CDFW	Prior to any ground disturbance related to covered activities outside the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		If active owl burrows are identified during pre-construction surveys in areas of the project site outside of the ECCC HCP/NCCP Permit Area and the project would impact active burrows, the project applicant shall provide compensatory mitigation for the permanent loss of burrowing owl habitat at a ratio of 2.5 acres of higher quality owl habitat for every one acre of suitable owl habitat disturbed. The calculation of habitat loss may exclude acres currently occupied by hardscape or structures. Such mitigation may include the permanent protection of land that is deemed to be suitable burrowing owl habitat through a conservation easement deeded to a non-profit conservation organization or public agency with a conservation mission, or the purchase of burrowing owl conservation bank credits from a CDFW-approved burrowing owl conservation bank. A record of the compensatory mitigation provided by the project applicant shall be submitted to the City of Oakley Planning Division prior to initiation of ground disturbing activities. ***Entire Project Site and Off-Site Improvement Areas*** *4.2-1(d) Avoidance, Minimization, and Construction Monitoring* *If burrowing owls are found during the breeding season (February 1 to August 31), the project proponent shall avoid all nest sites that could be disturbed by project construction during the*	City of Oakley Planning Division CDFW	If burrowing owls are found during the breeding season (February 1 to August 31)	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		remainder of the breeding season or while the nest is occupied by adults or young. Avoidance will include establishment of a non-disturbance buffer zone (described below). Construction may occur during the breeding season if a qualified biologist monitors the nest and determines that the birds have not begun egg-laying and incubation or that the juveniles from the occupied burrows have fledged. During the nonbreeding season (September 1 to January 31), the project proponent should avoid the owls and the burrows they are using, if possible. Avoidance will include the establishment of a buffer zone (described below). *During the breeding season, buffer zones of at least 250 feet in which no construction activities can occur will be established around each occupied burrow (nest site). Buffer zones of 160 feet will be established around each burrow being used during the nonbreeding season. The buffers will be delineated by highly visible, temporary construction fencing.* *If occupied burrows for burrowing owls are not avoided, passive relocation shall be implemented. Owls should be excluded from burrows in the immediate impact zone and within a 160-foot buffer zone by installing one-way doors in burrow entrances. These doors should be in place for 48 hours prior to excavation. The project area should be monitored daily for 1 week to confirm that the*			

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		owl has abandoned the burrow. Whenever possible, burrows should be excavated using hand tools and refilled to prevent reoccupation (California Department of Fish and Game 1995). Plastic tubing or a similar structure should be inserted in the tunnels during excavation to maintain an escape route for any owls inside the burrow.			
4.2-2	Have a substantial adverse effect, either directly or through habitat modifications, on Swainson's hawk.	***Areas of the Project Site Within the ECCC HCP/NCCP Permit Area and Off-Site Improvement Areas*** *4.2-2(a) Implement Mitigation Measure 4.2-1(a).* *4.2-2(b) Preconstruction Survey* *Prior to any ground disturbance related to covered activities that occurs during the nesting season (March 15 to September 15), a qualified biologist will conduct a preconstruction survey no more than 1 month prior to construction to establish whether Swainson's hawk nests within 1,000 feet of the project site are occupied. If potentially occupied nests within 1,000 feet are off the project site, then their occupancy will be determined by observation from public roads or by observations of Swainson's hawk activity (e.g., foraging) near the project site. If nests are occupied, minimization measures and construction monitoring are required (see below).*	See Mitigation Measure 4.2-1(a) City of Oakley Planning Division CDFW USFWS	See Mitigation Measure 4.2-1(a) Prior to any ground disturbance related to covered activities during nesting season (March 15 to September 15) within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		Avoidance, Minimization, and Construction Monitoring *During the nesting season (March 15 to September 15), covered activities within 1,000 feet of occupied nests or nests under construction will be prohibited to prevent nest abandonment. If site-specific conditions or the nature of the covered activity (e.g., steep topography, dense vegetation, limited activities) indicate that a smaller buffer could be used, the Implementing Entity will coordinate with CDFW/USFWS to determine the appropriate buffer size. If young fledge prior to September 15, covered activities can proceed normally. If the active nest site is shielded from view and noise from the project site by other development, topography, or other features, the project applicant can apply to the Implementing Entity for a waiver of this avoidance measure. Any waiver must also be approved by USFWS and CDFW. While the nest is occupied, activities outside the buffer can take place.* *All active nest trees will be preserved on site, if feasible. Nest trees, including non-native trees, lost to covered activities will be mitigated by the project proponent according to the requirements of Mitigation Measure 4.2-2(c).*			

MITIGATION MONITORING AND REPORTING PROGRAM
Oakley Logistics Center Project

Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		4.2-2(c) Should the proposed project result in the loss of non-riparian Swainson's hawk nest trees, the project applicant shall implement the following measures: • *If determined to be feasible by the City of Oakley Planning Division, the project applicant shall provide for the planting of 15 saplings for every nest tree removed, with the objective of having at least five mature trees established for every tree lost, according to the requirements listed further below; and either of the following:* 1. *Pay the Implementing Entity an additional fee to purchase, plant, maintain, and monitor 15 saplings on the ECCC HCP/NCCP Preserve System for every tree lost according to the requirements listed below; OR* 2. *The project proponent will plant, maintain, and monitor 15 saplings for every tree lost at a site to be approved by the Implementing Entity (e.g., within an ECCC HCP/NCCP Preserve or existing open space linked to ECCC HCP/NCCP preserves),*	City of Oakley Planning Division Contra Costa County Conservancy	Prior to issuance of tree removal permits for trees within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		according to the requirements listed below. *The following requirements shall be met for all planting options:* • *Tree survival shall be monitored at least annually for five years, then every other year until year 12. All trees lost during the first five years will be replaced. Success will be reached at the end of 12 years if at least five trees per tree lost survive without supplemental irrigation or protection from herbivory. Trees must also survive for at least three years without irrigation.* • *Irrigation and fencing to protect from deer and other herbivores may be needed for the first several years to ensure maximum tree survival.* • *Native trees suitable for this site should be planted. When site conditions permit, a variety of native trees will be planted for each tree lost to provide trees with different growth rates, maturation, and life span, and to provide a variety of tree canopy structures for Swainson's hawk. This variety will help to ensure that nest trees will be available in the short term (five-10 years for cottonwoods and willows) and in the long term (e.g., Valley oak, sycamore). This will also*			

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		minimize the temporal loss of nest trees. • *Riparian woodland restoration conducted as a result of covered activities (i.e., loss of riparian woodland) can be used to offset the nest tree planting requirement above, if the nest trees are riparian species.* • *Whenever feasible and when site conditions permit, trees should be planted in clumps together or with existing trees to provide larger areas of suitable nesting habitat and to create a natural buffer between nest trees and adjacent development (if plantings occur on the development site).* • *Whenever feasible, plantings on the site should occur closest to suitable foraging habitat outside the urban development area.* • *Trees planted in the HCP/NCCP preserves or other approved offsite location will occur within the known range of Swainson's hawk in the inventory area and as close as possible to high-quality foraging habitat.* *Prior to issuance of tree removal permits for the project site, the City of Oakley Planning Division shall be notified whether the proposed project would include removal of nesting trees. Should such removal be required for*

Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		implementation of the proposed project, the Contra Costa County Conservancy shall be notified and the foregoing measures shall be implemented as applicable, through the tree removal permit granted by the City of Oakley. ***Areas of the Project Site Outside the ECCC HCP/NCCP Permit Area*** *4.2-2(d) Prior to initiation of ground disturbing activity for the project, the project applicant shall mitigate for the loss of suitable Swainson's hawk foraging habitat by implementing the following measure:* • *One acre of suitable foraging habitat shall be protected for each acre of suitable foraging habitat developed outside of the ECCC HCP/NCCP Permit Area. Protection shall be via purchase of mitigation bank credits or other land protection mechanism acceptable to CDFW.* *Proof of purchase of mitigation credits as required per the above mitigation options, shall be provided to the Oakley Planning Division for review and approval prior to initiation of ground disturbance for any portion of the project site.* *4.2-2(e) The project applicant shall implement the following avoidance measures for potential effects on Swainson's hawk nests during construction:*	City of Oakley Planning Division CDFW City of Oakley Planning Division	Prior to initiation of ground disturbing activity outside the ECCC HCP/NCCP Permit Area Prior to ground disturbing activities during the nesting season (March 15	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		• *Prior to ground disturbing activities during the nesting season (March 15 through September 15), a qualified biologist shall conduct a pre-construction survey no more than one month prior to construction to establish whether occupied Swainson's hawk nests occur on or within 1,000 feet of the area of proposed construction. The results of the survey shall be submitted to the City of Oakley Planning Division. If occupied nests are not found, then further mitigation is not required.* • *If occupied nests are found, project construction activity shall not occur within a 1,000-foot buffer zone distance from the nest unless a lesser buffer zone is approved by the City in consultation with CDFW. During the nesting season, construction activities shall be avoided within the established buffer zone to prevent nest abandonment. Construction monitoring shall be required to ensure that the established buffer zone is adhered to. If young fledge prior to September 15, construction activities can proceed normally without a buffer zone. If an active nest site is present but shielded from view and noise by other development or other features, the City may waive this avoidance*	CDFW	to September 15) outside the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		measure (establishment of a buffer zone) if approved by the CDFW. • *All nest trees shall be preserved on site, if feasible. Nest trees that cannot be preserved may only be removed outside of the nesting season (i.e. nest trees may only be removed September 16 through March 14), and subject to the requirements of Mitigation Measure 4.2-2(b).*			
4.2-3	Have a substantial adverse effect, either directly or through habitat modifications, on Golden Eagle.	***Areas of the Project Site Within the ECCC HCP/NCCP Permit Area and Off-Site Improvement Areas*** *4.2-3(a) Implement Mitigation Measure 4.2-1(a).* *4.2-3(b) Preconstruction Survey* *Prior to implementation of covered activities, a qualified biologist shall conduct a preconstruction survey to establish whether nests of golden eagles are occupied (see Section 6.3.1, Planning Surveys of the ECCC HCP/NCCP). If nests are occupied, the following minimization requirements and construction monitoring shall be required.* *Avoidance and Minimization* *Covered activities shall be prohibited within 0.5 mile of active nests. Nests can be built and active at almost any time of the year, although*	See Mitigation Measure 4.2-1(a) City of Oakley Planning Division CDFW USFWS	See Mitigation Measure 4.2-1(a) Prior to implementation of covered activities within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project

Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		If active nests are found in areas that could be directly affected or are within 500 feet of construction and would be subject to prolonged construction-related noise, an initial no-disturbance buffer zone shall be created around active nests during the breeding season or until a qualified biologist determines that all young have fledged. The initial sizes of the buffer zones and types of construction activities restricted within them shall be a minimum of 500 feet for raptors, and a minimum of 50 feet for other species, and in consultation with CDFW may be reduced or enlarged by taking into account factors such as the following: • *Noise and human disturbance levels at the construction site at the time of the survey and the noise and disturbance expected during the construction activity;* • *Distance and amount of vegetation or other screening between the construction site and the nest; and* • *Sensitivity of individual nesting species and behaviors of the nesting birds.*			
4.2-5	Have a substantial adverse effect on riparian habitat or other sensitive natural community, or State or Federally protected wetlands (including, but	***Areas of the Project Site Within the ECCC HCP/NCCP Permit Area*** *4.2-5(a) Prior to the issuance of grading or construction permits for each phase of development of the project, the applicant shall pay the applicable ECCC HCP/NCCP per-acre Wetland*	City of Oakley Planning Division	Prior to the issuance of grading or construction permits for areas	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
	not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means.	*Mitigation Fee in compliance with Article 7, Habitat Conservation Plan/Natural Community Conservation Plan Implementing Program, of the Oakley Municipal Code. Payment of the Wetland Mitigation Fee would address the loss of wetland habitat within the portions of the project site covered by the ECCC HCP/NCCP. The fees would be used in part to restore or create compensatory wetlands.* *Alternately, the project applicant may, in accordance with the terms of Oakley Municipal Code Article 7, create and restore wetlands in lieu of some or all of the mitigation fees. All applicable mitigation fees shall be paid, or an "in-lieu-of fee" agreement executed, prior to the issuance of a grading permit for the project.* *The Oakley Planning Division and the Contra Costa County Conservancy will need to approve the final method of compliance with the ECCC HCP/NCCP provisions.*	Contra Costa County Conservancy	within the ECCC HCP/NCCP Permit Area	
		4.2-5(b) The following measures from pages 6-33 through 6-35 of the ECCC HCP/NCCP shall be implemented avoid and minimize impacts of covered activities on wetlands: • *The project shall comply with the guidelines in Conservation Measure 1.10 of the ECCC HCP/NCCP to minimize the effects of urban development on downstream hydrology, streams, and wetlands.*	City of Oakley Planning Division	Throughout construction within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		• *All wetlands to be avoided by covered activities shall be temporarily staked in the field by a qualified biologist.* • *Personnel conducting ground-disturbing activities within or adjacent to wetlands will be trained by a qualified biologist in these avoidance and minimization measures and the permit obligations of project proponents working under the ECCC HCP/NCCP.* • *Trash generated during project construction shall be promptly and properly removed from the site.* • *Construction or maintenance vehicles shall not be refueled within 200 feet of wetlands unless a bermed and lined refueling area is constructed and hazardous material absorbent pads are available in the event of a spill.* • *Appropriate erosion-control measures (e.g., fiber rolls, filter fences, vegetative buffer strips) shall be used on site to reduce siltation and runoff of contaminants into the wetlands. Filter fences and mesh shall be of material that will not entrap reptiles and amphibians. Erosion control blankets shall be used as a last resort because of their tendency to biodegrade slowly and trap reptiles and amphibians.*			

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	**Impact**	**Mitigation Measures**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		• *Fiber rolls used for erosion control shall be certified as free of noxious weed seed.* • *Seed mixtures applied for erosion control shall not contain invasive non-native species, and shall be composed of native species or sterile non-native species.* • *Herbicides shall not be applied within or adjacent to on-site wetlands unless needed to control serious invasive plants. In this case, herbicides that have been approved for use by EPA in or adjacent to aquatic habitats may be used as long as label instructions are followed and applications avoid or minimize impacts on covered species and their habitats. Appropriate herbicides may be applied to the ruderal grassland within the buffer area during the dry season to control nonnative invasive species such as yellow star-thistle. Herbicide drift shall be minimized by applying the herbicide as close to the target area as possible.* ***Areas of the Project Site Outside the ECCC HCP/NCCP Permit Area*** *4.2-5(d) To the extent feasible, the project shall be designed to avoid and minimize adverse effects to waters of the U.S. or jurisdictional waters of the State of California within the*	City of Oakley Planning Division	Prior to approval of Improvement Plans for areas outside the ECCC

RE: Oakley Logistics Center

Mr. McMurray,

I write to comment on the biological resources portion of the Draft EIR prepared for the proposed Oakley Logistics Center (City of Oakley 2019), which I understand is to be 5 warehouses totaling 2 million square feet on a 375.7-acre site. I understand City of Oakley (2019) asserts that the project site composes only 143.3 acres, but the soil borrowing from the other 232.4 acres qualifies the entire 375.7 acres as the project site.

My qualifications for preparing expert comments are the following. I hold a Ph.D. degree in Ecology from University of California at Davis, where I subsequently worked for four years as a post-graduate researcher in the Department of Agronomy and Range Sciences. My research has been on animal density and distribution, habitat selection, habitat restoration, interactions between wildlife and human infrastructure and activities, conservation of rare and endangered species, and on the ecology of invading species. I perform research on wildlife mortality caused by wind turbines, electric distribution lines, agricultural practices, and road traffic. I authored numerous papers on special-status species issues, including "Using the best scientific data for endangered species conservation" (Smallwood et al. 1999), and "Suggested standards for science applied to conservation issues" (Smallwood et al. 2001). I served as Chair of the Conservation Affairs Committee for The Wildlife Society – Western Section. I am a member of The Wildlife Society and the Raptor Research Foundation, and I've been a part-time lecturer at California State University, Sacramento. I was Associate Editor of wildlife biology's premier scientific journal, The Journal of Wildlife Management, as well as of Biological Conservation, and I was on the Editorial Board of Environmental Management. I have performed wildlife surveys in California for thirty-three years, including at many proposed project sites. My CV is attached.

SITE VISITS

I visited the proposed project site 09:49 hours to 11:04 hours on 4 November 2019, 16:12 to 16:53 hours on 15 November 2019, and 08:04 to 09:15 hours and 16:26 to 16:54 hours on 22 November 2019. The sky was clear and temperature was mild during all visits. Using 10-15x binoculars, I detected 47 species of vertebrate wildlife (Table 1). I have no doubt that had I stayed longer, or had I visited during additional seasons of the

year or times of day, I would have seen many more species of wildlife. This is a very species-rich site. Eleven of the species I saw are special-status species.

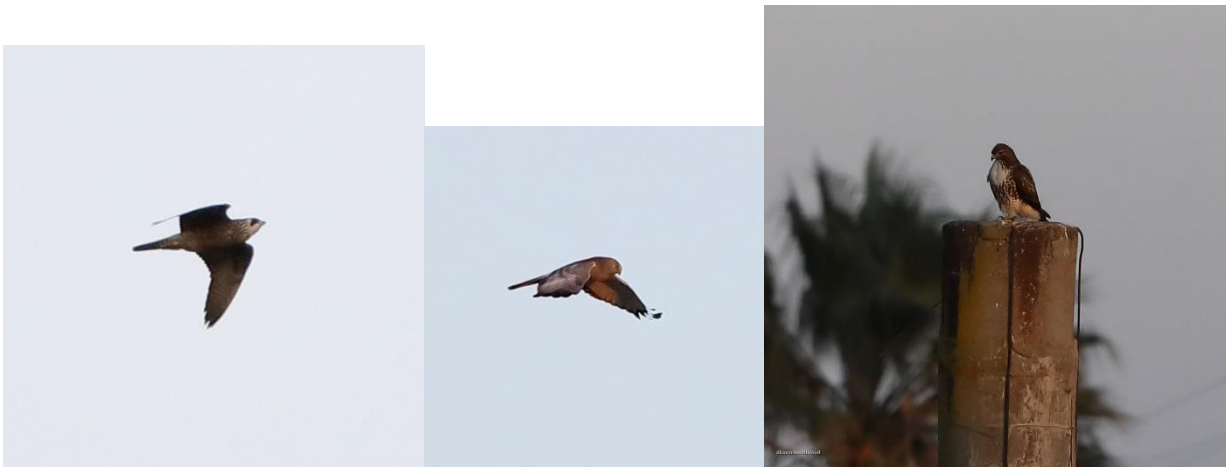

Table 1. *Species of wildlife I observed during my visits to the western edge of the proposed Oakley Logistics Center 09:49 to 11:04 hours on 4 November 2019, 16:12 to 16:53 hours on 15 November 2019, and 08:04 to 09:15 hours and 16:26 to 16:54 hours on 22 November 2019.*

Species	***Scientific name***	**Status[1]**	**Note**
California quail	*Callipepla californica*		
Double-crested cormorant	*Phalacrocorax auritus*	TWL	Flyovers
Turkey vulture	*Cathartes aura*	FGC 3503.5	
Northern harrier	*Circus cyaneus*	SSC3, FGC 3503.5	Foraging
Red-tailed hawk	*Buteo jamaicensis*	FGC 3503.5	Multiple
American kestrel	*Falco sparverius*	FGC 3503.5	
Peregrine falcon	*Falco peregrinus*	CE, CFP, FGC 3503.5

European starling	*Sturnus vulgaris*	Non-native	
Ruby-crowned kinglet	*Regulus calendula*		
MacGillivray's warbler	*Oporonis tolmiei*		
Yellow-rumped warbler	*Dendroica coronata*		
Suisun song sparrow	*Melospiza melodia maxillaris*	SSC3	
Grasshopper sparrow	*Ammodramus savannarum*	SSC2	
Golden-crowned sparrow	*Zonotrichia atricapilla*		
Savannah sparrow	*Passerculus sandwichensis*		
Rufous-crowned sparrow	*Aimophila ruficeps*		
Lincoln's sparrow	*Melospiza lincolnii*		
White-crowned sparrow	*Zonotrichia leucophrys*		Many
Bullock's oriole	*Icterus galbula*		

Species	*Scientific name*	Status[1]	Note
Western meadowlark	*Sturnella neglecta*		
Brewer's blackbird	*Euphagus cyanocephalus*		
Tricolored blackbird	*Agelaius tricolor*	CT	Flyover
Red-winged blackbird	*Agelaius phoeniceus*		Flyover
Yellow-headed blackbird	*X. xanthocephalus*	SSC3	Flyover
House finch	*Carpodacus mexicanus*		
American goldfinch	*Carduelis tristis*		
Lesser goldfinch	*Carduelis psaltria*		
House sparrow	*Passer domesticus*	Non-native	
California ground squirrel	*Otospermophilus beecheyi*		
Eastern gray squirrel	*Sciurus carolinensis*	Non-native	

[1] Listed as BCC = federal Bird Species of Conservation Concern, CE and CT = California endangered and threatened, CFP = California Fully Protected (CDFG Code 3511), FGC 3503.5 = California Department of Fish and Game Code 3503.5 (Birds of prey), SSC1, 2, 3 = California Bird Species of Special Concern priorities 1, 2, and 3, respectively (Shuford and Gardali 2008), TWL = Taxa to Watch List (Shuford and Gardali 2008).

During my brief visits, I saw a peregrine falcon (Photo 1), northern harrier (photo 2), and multiple red-tailed hawks (Photo 3). During my evening visits I observed thousands of blackbirds flying over the site, including yellow-headed blackbirds mixed with red-winged blackbirds (Photo 4) and with tricolored blackbirds (Photo 5). California scrub-jays (Photo 6) were abundant, and were always busy collecting and caching acorns, which are pirated by many other species of birds, including golden-crowned sparrows (Photo 7). I saw Anna's hummingbirds (Photo 8) and American goldfinches (Photo 9), northern mockingbirds (Photo 10), white-throated swifts (Photo 11), savannah sparrows, (Photo 12), white-crowned sparrows (Photo 13), and yellow-rumped warblers (Photo 14). I also noticed many cavities in on-site trees constructed by woodpeckers (Photo 15), serving as granaries and nest sites for multiple species of birds for many years to come. I saw ample evidence of an intact, healthy wildlife community.

BIOLOGICAL IMPACTS ASSESSMENT

The project would diminish and destroy 375.7 acres of intensively-used wildlife habitat, while also adversely affecting wildlife using the adjacent Antioch/Oakley Shoreline and Big Break Regional Shoreline, both owned and managed by East Bay Regional Park District. It would do so shortly after Rosenberg et al. (2019) documented a 29% decline in overall bird abundance across North America over the last 48 years – a decline driven by multiple factors including habitat loss and habitat fragmentation.

Habitat loss not only results in the immediate numerical decline of wildlife, but also in permanent loss of productive capacity. Given that the project site supports 662 trees, the capacity of the project site for producing birds is enormous. For example, a wooded area at one study site in 1948 had a total bird nesting density of 32.8 nests per acre (Young 1948). This density multiplied against the project area would predict 12, 323 bird nests per year. In another study, the average annual nest density was 35.8 nests per acre (Yahner 1982), which would predict 13,450 nests on the project site. The average number of fledglings per nest in Young's (1948) study was 2.9. Assuming Young's (1948) study site was typical of bird productivity, the project site generates 35,737 to 39,005 new birds per year, depending on whether I rely on Young's (1948) or Yahner's (1982) nest density. This loss of capacity would total 3.6 million to 3.9 million birds after 100 years, and it would continue for as long as habitat remains displaced by impervious surfaces and borrow pits.

According to City of Oakley (2019:4.2-35), 10 special-status species of wildlife "*are considered to have a low or moderate potential to occur within the subject property*." However, I detected 11 special-status species on site after only very cursory surveys restricted to the western edge of the project site, and City of Oakley (2019:4.2-35) reports that during a remediation effort in 2017, 4 more special-status species were detected on site, including California black rail, white-tailed kite, loggerhead shrike, and common yellowthroat. Whereas City of Oakley (2019) concludes that only 10 special-status species of wildlife have low to moderate occurrence potential, 15 special-status species have been detected on site by professional biologists, and another 31 special-status species of birds have been detected near the project site, according to eBird records (Table 2).

Based on my review of available habitat descriptions, range maps, and sighting records, 60 special-status species of vertebrate wildlife have potential to occur on site (Tables 2 and 3). Fifteen of these 60 species have recently been seen on site by professionals. Along with these 60 special-status species of wildlife that would suffer significant impacts due to the project, several hundred bird species protected by the federal Migratory Bird Treaty Act and California Fish and Game Code section 3513, which was recently amended to protect migratory birds after Governor Newsom signed AB 454 into law on 27 September 2019. Hence, the ca. 12,000 to 13,000 bird nests predicted to be on the project site (see earlier comment) are protected by both federal and state laws.

Without the benefit of any appropriate surveys, City of Oakley (2019) dismisses potential impacts on special-status species of bats. No acoustic detectors were deployed, nor were any surveys performed at night using a thermal-imaging camera or eyes on the sky. Without being informed by appropriate surveys, none of the bat species in Table 3 can be ruled out as dependent on the site for foraging or stopover roosting habitat.

Burrowing owls

City of Oakley (2019:4.2-35) provides a flawed analysis of potential burrowing owl impacts, starting with pigeon-holing burrowing owls into an unrealistically narrow portion of the environment, "*Burrowing owls inhabit dry open rolling hills, grasslands, desert floors, and open bare ground with gullies and arroyos*." In fact, burrowing owls inhabit a variety of environments, so long as tall structures such as trees occur in low density (as is the case over large portions of the project site). For example, on a nearby site dominated by perennial grassland and wetlands in Solano County, I recorded the highest density of breeding burrowing owls so far appearing in the scientific literature, after accounting for the effect of study area size on density estimates (Smallwood and Morrison 2018). The deciding factor over whether burrowing owls breed on site is the availability of nest sites, such as artificial cavities or ground squirrel burrows.

Whether ground squirrels occur on site is another fallacy of City of Oakland's (2019) analysis, because on page 4.2-35 City of Oakley implies that ground squirrels do not occur on site, although on page 4.2-50 City of Oakley says ground squirrels do occur on site. Just to clear things up, I observed ground squirrel burrows on site each time I visited the site. Even if the site was devoid of ground squirrels, burrowing owls could still find nesting opportunities under overhangs of impervious surfaces, within exposed pipelines, and within culverts – nest sites that I have recorded many times. Additionally, the site is likely used as stopover habitat during long-range movements by burrowing owls.

A third fallacy is the notion that burrowing owls are discouraged from the site because "*the grassland areas are routinely mowed*" (City of Oakley 2019:4.2-50). That the grasslands were routinely mowed at the Dixon National Radio Transmission Facility was a key reason why burrowing owls there nested in the highest density yet recorded (Smallwood and Morrison 2018). In an experiment performed at Naval Air Station Lemoore, Smallwood and Morrison (unpublished data) also found that mowing increased the number of burrowing owl breeding pairs. Mowed grasslands are no impediment to burrowing owl nesting.

A fourth fallacy of the City of Oakley's analysis is its conclusions over burrowing owl occurrence likelihoods without having performed detection surveys consistent with CDFW (2012) guidelines. Concluding a low likelihood of occurrence is unfounded in the absence of detection surveys. Nor does it matter if some cursory survey reported no burrowing owl sign at ground squirrel burrows (City of Oakley 2019:4.2-50). City of Oakley (2019) claims that Moore Biological "inspected" the site for burrowing owls, but

this characterization is misleading because the surveys did not come anywhere close to meeting the standards of CDFW (2012).

Not discussed in City of Oakley (2019) is the widespread decline of burrowing owls across North America (James and Espie 1997) and within California (Wilkerson and Siegel 2010). Following up on studies begun in 2006 (Smallwood et al. 2009a,b) and 2011 (Smallwood et al. 2013) and continuing through this year, I have also documented a steep decline of burrowing owls within the Altamont Pass Wind Resource Area (APWRA), most substantially within the Contra Costa County portion of the APWRA (Smallwood, unpublished data). Not only has the number of breeding pairs declined, but so has productivity. Among my sampling plots in Contra Costa County, where I had earlier counted up to 33 breeding pairs, I counted a single pair in 2019. These trends do not bode well for conserving burrowing owls in Contra Costa County, regardless of the best of intentions of those implementing the ECCC HCP/NCCP.

Wind turbines certainly took a major toll on burrowing owls (Smallwood et al. 2007), but loss of breeding habitat and wintering habitat is also taking a toll. My year-round surveys for burrowing owls in 2011-2012 revealed that, following the breeding season, adults relocate to areas where breeding pair densities were lowest or non-existent. Open space that many people might not associate with burrowing owls are actually of great importance to burrowing owls over the non-breeding seasons. Over the last several years I have observed hundreds of acres of wintering burrowing owl habitat within Contra Costa County converted to vineyards and residential developments. At the same time, I have noticed an increased assault on ground squirrels across large areas of range. As ground squirrels are abated, burrowing owls lose access to burrows as well as to the mutual predator alarm-calling that burrowing owls depend upon for winter survival and breeding season nest success. In short, the conservation benefits implemented in the ECCC HCP/NCCP are not keeping up with the impacts, so burrowing owls are rapidly declining.

The EIR's conclusion regarding occurrence likelihood of burrowing owls should be founded on appropriate detection surveys (CDFW 2012). Detection surveys have not yet been performed at the project site.

Golden Eagle

I concur with City of Oakley (2019:4-26) that the golden eagle "*demonstrates preference for less urbanized settings*," and that the species probably no longer nests on the project site. That CNDDB does not include golden eagle records on the project site is irrelevant, however, as CNDDB is based on volunteer reporting without the benefit of census or sampling. I have been studying golden eagles in various ways for 20 years in the APWRA. Since 2013 my colleagues and I have tracked about 35 golden eagles using GPS telemetry, and some of those eagles are still flying; I get daily reports of eagle travel paths. All eagles, whether young or old, make long-range trips outside their normal territories for reasons that are important to them but unknown to us. These long-range trips minimize flyover of urbanized and industrialized landscapes, increasingly having

to “thread the needle” over open space to avoid urban sprawl. Some of our long-range trips are northward from the APWRA, traveling right over the project site. Flying over open space likely provides golden eagles foraging opportunities, as well as stopover opportunities, both of which are just as important to breeding success as are finding and defending nest sites. After all, golden eagles cannot successfully breed without surviving the non-breeding season.

Not only is habitat loss adversely affecting golden eagles, but wind turbine collisions (Smallwood and Karas 2009, Smallwood et al. 2017) and the expansion of Los Vaqueros Reservoir (Smallwood et al. 2017) are adversely affecting local golden eagles composing the highest-recorded breeding-pair density in the world. Wind turbines have been killing about 55 golden eagles per year, and now it is estimated that this level of take is unsustainable (Wiens, Pers. Comm.). These specific impacts – wind turbine collisions and the Reservoir expansion -- are recognized in the ECCC HCP/NCCP (Jones & Stokes 2006), but are specifically called out as not covered by the ECCC HCP/NCCP. The EIR needs to be revised in light of these additional impacts and how they bear cumulatively on the loss of stopover and flyover habitat due to the project.

Swanson's hawk

City of Oakley (2019:4-36) concludes that Swanson's hawks will not nest on the project site because the “*Del Antico Basin is surrounded by subdivisions and a vineyard*.” This conclusion is reached right after summarizing Swanson's hawk nest attempts on the project site in 2011, 2012, and 2018, and were seen on site in 2019. In reality, Swanson's hawks will nest in urban environments, so long as they are within one mile of foraging habitat (England et al. 1995). Swanson's hawks disproportionately forage in environments just like those on the project site (Smallwood 1995). The project would permanently remove at least one nest site, and would cause a significant impact on Swanson's hawks’ access to forage. The EIR needs to be revised to appropriately address these impacts, and how they would contribute cumulatively to ongoing wind turbine impacts for which the ECCC HCP/NCCP does not cover.

The EIR needs to be revised so that it is informed by detection surveys that meet the standards of CDFW (1994).

Wildlife Movement

According to City of Oakley (2019:4.2-41), “*…significant wildlife movement corridors do not exist within the land area adjacent to the project site, including the off-site utility improvement areas*.” City of Oakley relies on a false CEQA standard, however. The CEQA standard is whether a project will “*Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors…*” The primary phrase of the CEQA standard goes to wildlife movement regardless of whether the movement is channeled by a corridor. In fact, a corridor is a human construct more than it is a natural channelization of wildlife movement (Smallwood 2015). Humans construct

corridors to mitigate the impacts of habitat fragmentation, so corridors are mischaracterized in the DEIR.

I concur with City of Oakley that wildlife on the move tend to avoid urbanized areas, but in my experience volant wildlife target open spaces for travel paths, even if they have to fly over some urbanized areas to do so. Having co-investigated an ongoing golden eagle telemetry study, I have observed millions of recorded positions of 35 golden eagles captured near the project site, and which have flown all over the place from Canada to Mexico. My colleagues and I have many times noticed eagle flight paths minimizing flights over anthropogenic environments while targeting open spaces such as the project site. While at the project site, I also noticed (and photographed) many thousands of blackbirds of multiple species flying over the project site; they did not fly over housing developments or power plants, but rather over the available open spaces including the project site. Among these thousands of blackbirds flying over the project site were special-status species including yellow-headed blackbirds (California Bird Species of Special Concern priority 3) and tricolored blackbirds (California Endangered).

The project site needs to be analyzed for potential impacts on wildlife movement in the region. Wildlife moving across a region often must traverse urban or industrial environments to complete their migrations or their dispersal from natal territories. When crossing anthropogenic environments, wildlife stopover on available open spaces and trees. Because industrialization and urban and commercial sprawl has eliminated natural surfaces from most of the landscape around the site of the proposed project, the project site likely has emerged as critically important stopover habitat for migratory wildlife (Runge et al. 2014, Taylor et al. 2011), and as staging habitat (Warnock 2010). Many species of wildlife likely use the proposed project site for movement across the area, including those species I saw flying over it and residing on it (Table 1), and those many special-status species of birds seen in the area of the project and reported on eBird (Table 2). The special-status species of bats listed in Table 3 likely also use the project site as stopover and roosting habitat. The project would further cut wildlife off from stopover and staging habitat, and would therefore interfere with wildlife movement in the region. The DEIR should be revised to adequately address the project's potential impacts on habitat fragmentation and wildlife movement.

Traffic Impacts on Wildlife

According to City of Oakley (2019), the project as proposed would generate about 4,292 daily trips. These trips will kill wildlife. A fundamental shortfall of City of Oakley (2019) is its failure to analyze the impacts of the project's added road traffic on special-status species of wildlife, including species such as western pond turtle (*Actinemys pallida*) and American badger (*Taxidea taxus*). Many animals that would be killed by the traffic generated from this project would be located far from the project's construction footprint; they would be crossing roads traversed from cars and trucks originating from or headed toward the project site. The project's impacts on wildlife will reach as far from the project as cars and trucks travel to or from the project site.

According to City of Oakley, 7% of the trips, or about 300 new trips per day, would head north on Highway 160, a route along which I have been recording wildlife fatalities for longer than three years. I have yet to process all of my hundreds of fatality records, but during the first 10 months of my counts, I counted 5 gopher snakes, 6 opossums, 1 river otter, 13 striped skunks, 10 raccoons, 2 muskrats, 2 ground squirrels, 3 desert cottontails, 1 great egret, 1 ring-necked pheasant, 5 red-tailed hawks, 8 barn owls, 1 western screech-owl, 1 American crow, and 2 red-winged blackbirds. City of Oakley (2019) estimates that 17% of the trips, or about 730 new trips per day, would head south along Highway 4. My traffic mortality counts along Highway 4 and Vasco Road to Livermore include 6 gopher snakes, 2 opossums, 17 raccoons, 6 American badgers, 19 striped skunks, 3 coyotes, 1 gray fox, 1 bobcat, 1 pocket gopher, 7 ground squirrels, 22 desert cottontails, 1 black-tailed deer, 1 common poorwill, 1 gull, 1 osprey, 4 red-tailed hawks, 1 northern harrier, 7 barn owls, 2 rock pigeons, 2 American crows, and 1 red-winged blackbird. Not only will these fatality counts increase substantially when I process the last 27 months of surveys, but their adjustments for the fatalities I did not detect will result in very high estimated fatality rates based on existing road traffic. (Adjustments will be larger for the smaller-bodied species, which are easier for scavengers to remove without leaving a trace of evidence, and which are easier for me to miss while driving along the road.) Adding 1,030 new trips per day north-south along Highways 4 and 160, and considering that many of these new trips will be made by trucks, the fatality rates will increase substantially.

An example of how the fatality rates are estimated from counts of fatalities includes the following, based on a study along the truck route from the proposed project. A recent study of traffic-caused wildlife mortality along a 2.5 mile stretch of Vasco Road in Contra Costa County, California, revealed 1,275 carcasses of 49 species of mammals, birds, amphibians and reptiles over 15 months of searches (Mendelsohn et al. 2009). This fatality number needed to be adjusted for the proportion of fatalities that were not found due to scavenger removal and searcher error. This adjustment is typically made by placing carcasses for searchers to find (or not find) during their routine periodic fatality searches. This step was not taken at Vasco Road (Mendelsohn et al. 2009), but it was taken as part of another study right next to Vasco Road (Brown et al. 2016). The Brown et al. (2016) adjustment factors were similar to those for carcass persistence of road fatalities (Santos et al. 2011). Applying searcher detection rates estimated from carcass detection trials performed at a wind energy project immediately adjacent to this same stretch of road (Brown et al. 2016), the adjusted total number of fatalities was estimated at 12,187 animals killed by traffic on the road. This fatality number translates to a rate of 3,900 wild animals per mile per year killed along 2.5 miles of road in 1.25 years. In terms comparable to national estimates, the estimates from the Mendelsohn et al. (2009) study would translate to 243,740 animals killed per 100 km of road per year, or 29 times that of Loss et al.'s (2014) upper bound estimate and 68 times the Canadian estimate. An analysis is needed of whether increased traffic generated by project would similarly result in intense local impacts on wildlife.

Vehicle collisions have accounted for the deaths of many thousands of reptile, amphibian, mammal, bird, and arthropod fauna, and the impacts have often been found

to be significant at the population level (Forman et al. 2003). Increased use of existing roads will increase wildlife fatalities (see Figure 7 in Kobylarz 2001). It is possible that project-related traffic impacts will far exceed the impacts of land conversion to commercial use. But not one word of traffic-related impacts appears in SWAIM (2018) or City of Fairfield (2019) – a gross shortfall of the CEQA review.Across North America, traffic impacts have taken devastating tolls on wildlife (Forman et al. 2003). In Canada, 3,562 birds were estimated killed per 100 km of road per year (Bishop and Brogan 2013), and the US estimate of avian mortality on roads is 2,200 to 8,405 deaths per 100 km per year, or 89 million to 340 million total per year (Loss et al. 2014). Local impacts can be more intense than nationally.

Many thousands of roadkill wildlife incidents have been reported to the UC Davis Road Ecology Center (Shilling et al. 2017). In 2017, one of the major hotspots of road-killed wildlife overlaps the project site (Shilling et al. 2017). In fact, the wildlife roadkill hotspot in the project area was found to be statistically highly significant (see Figure 5 of Shilling et al. 2017). The costs to drivers is also high (Shilling et al. 2017). The EIR needs to be revised to appropriately assess wildlife mortality that will be caused by increased traffic on existing roadways, and it should provide mitigation measures.

Wildlife roadkill is not randomly distributed, so can be predicted. Causal factors include types of roadway, human population density, and temperature (Chen and Wu 2014), as well as time of day and adjacency and extent of vegetation cover (Chen and Wu 2014, Bartonička et al. 2018), and intersections with streams and riparian vegetation (Bartonička et al. 2018). For example, species of mammalian Carnivora are killed by vehicle traffic within 0.1 miles of stream crossings >40 times other than expected (K. S. Smallwood, 1989-2018 unpublished data). These factors also point the way toward mitigation measures, which should be formulated in a revised EIR.

Increased road mortality of wildlife from project-generated vehicle trips is specifically not covered by the ECCC HCP/NCCP (Jones & Stokes 2006:4-25). The EIR needs to be revised to address this significant impact.

CUMULATIVE IMPACTS

According to Jones & Stokes (2006:4-25), "*Continued use of existing rural roads (i.e., those not covered by the Plan) will contribute to a cumulative impact on these species through continued mortality and injury. The magnitude of this cumulative impact is unknown*." The project would contribute directly to traffic impacts on wildlife on local roads, and would therefore contribute cumulatively to these impacts. The EIR needs to be revised to address these impacts.

Earlier I provided preliminary counts of wildlife killed by existing traffic on Highways 4 and 160. Along the anticipated trucking route from the project site, Mendelsohn et al. (2009) over a brief survey time also recorded traffic-caused mortality of 120 California red-legged frogs, 50 California tiger salamanders, 2 burrowing owls, 5 American badgers, and a prairie falcon. Three of these special-status species were not considered

by City of Oakley to be potentially affected by the project, but that was only because City of Oakley only considered impacts within the building footprints and not along the truck traffic routes. The cumulative effects analysis related to biological resources needs to be extended to the project's traffic routes, and it needs to consider that the ECCC HCP/NCCP does not cover these impacts.

MITIGATION MEASURES

Mitigation Measure 4.2-1(a): Burrowing Owl Mitigation Fee

According to City of Oakley (2019:4.2-512), "*The proposed project's participation in the ECCC HCP/NCCP would provide a mechanism to adequately mitigate impacts to special-status species within the off-site improvement areas and the portion of the project site included in the ECCC HCP/NCCP Permit Area*." Based on what I have observed over the past decade in east Contra Costa County, and despite my admiration for those implementing the ECCC HCP/NCCP, I assert that City of Oakley needs to prove its above-quoted conclusion. I have observed burrowing owls declining rapidly in number and productivity despite best efforts of the ECCC HCP/NCCP. The same trend is underway in Santa Clara Valley despite best efforts of the Santa Clara Valley HCP. And the same trend is reaching its undesired conclusion in Yolo County, where owls are supposed to be conserved by the Yolo County HCP. Conservation measures in these HCPs are obviously failing to conserve burrowing owls.

It is insufficient to simply pay the ECCC HCP/NCCP mitigation fee. I recommend that City of Oakley also follows the guidelines of CDFW (2012).

Mitigation Measure 4.2-1(b, c): Burrowing Owl Preconstruction Surveys

Preconstruction survey are not detection surveys. Preconstruction surveys would detect only the most readily detectable nest sites, and the rest would be destroyed by the project. Detection surveys are needed to either detect burrowing owls or support a determination of absence; preconstruction surveys cannot do this. Detection surveys are needed to estimate project impacts, and to inform the formulation of appropriate mitigation. They are also needed to inform biologists about where preconstruction surveys would be most effective. Performing preconstruction surveys without having first performed detection surveys would be inconsistent with CDFW (2012).

Mitigation Measure 4.2-1(d) Avoidance, Minimization, and Construction Monitoring

Passive relocation would be inconsistent with CDFW (2012), which regards this practice as potential harm to burrowing owls.

Mitigation Measure 4.2-2(a): Swanson's hawk Mitigation Fee

As with burrowing owls, City of Oakley should prove its assertion that payment of the ECCC HCP/NCCP mitigation fee would adequately conserve Swanson's hawks. Where is the evidence that the ECCC HCP/NCCP is indeed conserving Swanson's hawks?

Mitigation Measure 4.2-3(a): Golden Eagle Mitigation Fee

As above, City of Oakley ought to provide evidence that the ECCC HCP/NCCP is succeeding at conserving golden eagles. I know that those implementing the ECCC HCP/NCCP are trying to conserve eagles, as I have performed some of the research to that end, but I also feel that golden eagles are losing ground in Contra Costa County as habitat diminishes, squirrels are disappearing from large areas, and wind turbines are annually killing too many local eagles.

Mitigation Measure 4.2-4(a, b): Preconstruction Surveys for Nesting Birds

Preconstruction surveys are proposed for nesting birds, as they ought to be. However, a revised EIR also ought to put these surveys into perspective. With thousands of bird nests on site during the breeding season, and with the majority of these nests having been constructed for concealment from predators, preconstruction surveys are assured to detect a tiny fraction of bird nests. Such surveys would save very few of the nesting birds in peril.

Furthermore, preconstruction surveys cannot estimate nor offset the permanent loss of breeding habitat and all of the productive capacity lost with that habitat (see earlier comment on this impact).

Mitigation Measure 4.2-7: Wildlife Movement

Due to its flawed interpretation of both the CEQA standard and the scientific definition of “corridor,” City of Oakley erroneously concludes no mitigation is necessary for project impacts on wildlife movement in the region. Many special-status species of wildlife use the project site as stopover, staging, and flyover habitat. Losing access to this site will increase the distances between remaining open spaces and will increase the energetic costs of wildlife movement in the region. The EIR needs to be revised to address this type of impact and how it should be mitigated.

Mitigation Measure 4.2-8: Cumulative Impacts

City of Oakley (2019) concludes that payment of the ECCC HCP/NCCP mitigation fee will adequately mitigate the project’s contributions of cumulative impacts, based on the flawed assumption that the ECCC HCP/NCCP was designed to cover cumulative impacts. In fact, the ECCC HCP/NCCP specifically identified ongoing cumulative impacts that it does not cover, including road mortality, wind turbine collisions, and Vaquero Reservoir expansion. Road mortality is one of the two principal types of

impact that will be caused by the project, the other consisting of habitat loss. It is therefore essential that the EIR be revised to address how its traffic-generated road mortality will be mitigated.

Additional Comments on Mitigation

Only 6 (10%) of the special-status species in Tables 2 and 3 are covered by the ECCC HCP/NCCP, meaning that payment of ECCC HCP/NCCP mitigation fees would fail to mitigate project impacts to 90% of the potentially occurring special-status species of vertebrate wildlife listed in the Tables. I saw a peregrine falcon on site, as well as a northern harrier and grasshopper sparrows among others. Records on eBird include detections of numerous special-status species on and nearby the project site, and yet none of these have any mitigation under the plan put forth by City of Oakley (2019). And as commented earlier, down-road special-status species not listed in Tables 2 and 3, such as California red-legged frog and California tiger salamander, would also lack any form of mitigation under the proposed plan. Compensatory mitigation above and beyond the ECCC HCP/NCCP needs to be formulated and committed for all these other species.

Compensatory mitigation is needed for the increased wildlife mortality that will be caused by the project's contribution to increased road traffic in the region. I suggest that this mitigation can partly be directed toward funding of research to identify fatality patterns and effective impact reduction measures. Certain impact reduction measures are known already, and those should be implemented where they would be most effective. One such measure would be reduced speed limits along strategic reaches of road, and another would be construction of wildlife overcrossings or undercrossings.

Compensatory mitigation ought also to include funding contributions to wildlife rehabilitation facilities to cover the costs of injured animals that will be delivered to these facilities for care. Most of the injuries will likely be caused by the increased trip generation of cars and trucks. Many animals need treatment caused by collision injuries and an increasing number appear to be injured by the turbulence of passing trucks.

Thank you for your attention,

Shawn Smallwood, Ph.D.

Ecologist

Expertise

- Finding solutions to controversial problems related to wildlife interactions with human industry, infrastructure, and activities;
- Wildlife monitoring and field study using GPS, thermal imaging, behavior surveys;
- Using systems analysis and experimental design principles to identify meaningful ecological patterns that inform management decisions.

Education

Ph.D. Ecology, University of California, Davis. September 1990.
M.S. Ecology, University of California, Davis. June 1987.
B.S. Anthropology, University of California, Davis. June 1985.
Corcoran High School, Corcoran, California. June 1981.

Experience

- 477 professional publications, including:
- 81 peer reviewed publications
- 24 in non-reviewed proceedings
- 370 reports, declarations, posters and book reviews
- 8 in mass media outlets
- 87 public presentations of research results at meetings
- Reviewed many professional papers and reports
- Testified in 4 court cases.

Editing for scientific journals: Guest Editor, *Wildlife Society Bulletin*, 2012-2013, of invited papers representing international views on the impacts of wind energy on wildlife and how to mitigate the impacts. Associate Editor, *Journal of Wildlife Management*, March 2004 to 30 June 2007. Editorial Board Member, *Environmental Management*, 10/1999 to 8/2004. Associate Editor, *Biological Conservation*, 9/1994 to 9/1995.

Member, Alameda County Scientific Review Committee (SRC), August 2006 to April 2011. The

five-member committee investigated causes of bird and bat collisions in the Altamont Pass Wind Resource Area, and recommended mitigation and monitoring measures. The SRC reviewed the science underlying the Alameda County Avian Protection Program, and advised the County on how to reduce wildlife fatalities.

Consulting Ecologist, 2004-2007, California Energy Commission (CEC). Provided consulting services as needed to the CEC on renewable energy impacts, monitoring and research, and produced several reports. Also collaborated with Lawrence-Livermore National Lab on research to understand and reduce wind turbine impacts on wildlife.

Consulting Ecologist, 1999-2013, U.S. Navy. Performed endangered species surveys, hazardous waste site monitoring, and habitat restoration for the endangered San Joaquin kangaroo rat, California tiger salamander, California red-legged frog, California clapper rail, western burrowing owl, salt marsh harvest mouse, and other species at Naval Air Station Lemoore; Naval Weapons Station, Seal Beach, Detachment Concord; Naval Security Group Activity, Skaggs Island; National Radio Transmitter Facility, Dixon; and, Naval Outlying Landing Field Imperial Beach.

Fulbright Research Fellow, Indonesia, 1988. Tested use of new sampling methods for numerical monitoring of Sumatran tiger and six other species of endemic felids, and evaluated methods used by other researchers.

Subject: Comments on the Oakley Logistics Center Project (SCH No. 2019029113)

Dear Ms. Fennie,

We have reviewed the October 2019 ("DEIR") for the Oakley Logistics Center Project ("Project") located in the City of Oakley ("City"). The Project proposes to construct 1,985,304 square feet of light industrial space and 1,358 parking spaces on the 143.3-acre site.

Our review concludes that the DEIR fails to adequately evaluate the Project's Air Quality, Health Risk, and Greenhouse Gas impacts. As a result, emissions and health risk impacts associated with construction and operation of the proposed Project are underestimated and inadequately addressed. An updated DEIR should be prepared to adequately assess and mitigate the potential air quality and health risk impacts that the project may have on the surrounding environment.

Air Quality

Unsubstantiated Input Parameters Used to Estimate Project Emissions

The DEIR's air quality analysis relies on emissions calculated with CalEEMod.2016.3.2.[1] CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (CEQA) requires that such changes be justified by substantial evidence.[2] Once all of the values are inputted into the model, the Project's

[1] CAPCOA (November 2017) CalEEMod User's Guide, http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4.
[2] CAPCOA (November 2017) CalEEMod User's Guide, http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 1, 9.

construction and operational emissions are calculated, and "output files" are generated. These output files disclose to the reader what parameters were utilized in calculating the Project's air pollutant emissions and make known which default values were changed as well as provide justification for the values selected.[3]

Review of the Project's air modeling demonstrates that the DEIR underestimates emissions associated with Project activities. As previously stated, the DEIR's air quality analysis relies on air pollutant emissions calculated using CalEEMod. When reviewing the Project's CalEEMod output files, provided as Appendix D to the DEIR, we found that several of the values inputted into the model were not consistent with information disclosed in the DEIR. As a result, the Project's construction and operational emissions are underestimated. An updated EIR should be prepared to include an updated air quality analysis that adequately evaluates the impacts that construction and operation of the Project will have on local and regional air quality.

Unsubstantiated Reduction in Carbon Intensity Factor

Review of the Project's CalEEMod output files demonstrates that the default value for the CO_2 intensity factor was manually changed without justification. As a result, the Project's operational emissions may be underestimated.

Review of the Project's CalEEMod output files demonstrates that the model's CO_2 intensity factor was artificially reduced from 641.35 to 245.88 lb/MWhr (see excerpt below) (Appendix D, pp. 458, 511, 559, 620, 674, 723, 961, 1012, 1058, 1116, 1158, 1195).

Table Name	Column Name	Default Value	New Value
tblProjectCharacteristics	CO2IntensityFactor	641.35	245.88

As previously mentioned, the CalEEMod User's Guide requires any changes to model defaults be justified.[4] According to the "User Entered Comments & Non-Default Data" table, the justification provided for this change is "PG&E calculator" (Appendix D, pp. 457, 510, 558, 618, 672, 721, 782, 958, 1009, 1055, 1113, 1155, 1192). Furthermore, the DEIR states that the change is justified based on "PG&E's ***anticipated progress*** towards the State RPS ***goal*** by 2030" (emphasis) (p. 4.1-29). Furthermore, just because the state *has* this goal does not mean that it will actually be achieved, and the proposed Project cannot claim that the RPS ***goal*** will result in a reduction of the Project's emissions. Rather, the DEIR should provide substantial justification that this goal will be reached. As a result, we cannot verify the model's use of the reduced CO_2 intensity factor and emissions may be underestimated.

[3] CAPCOA (November 2017) CalEEMod User's Guide, http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, fn 1, p. 11, 12 – 13. A key feature of the CalEEMod program is the "remarks" feature, where the user explains why a default setting was replaced by a "user defined" value. These remarks are included in the report.

[4] CalEEMod User Guide, *available at:* http://www.caleemod.com/, p. 2, 9

Failure to Account for Total Amount of Material Import/Export

Review of the Project's CalEEMod output files demonstrates that the DEIR's model failed to include the total amount of material export expected to occur during the grading phase of construction. As a result, the Project's construction-related emissions are underestimated.

According to the DEIR, "If import/export is necessary it will likely be less than 25,000 cubic yards of material" (p. 3-16). Despite the DEIR's statement that import/export "will likely be less than" 25,000 cubic yards of material, 25,000 cubic yards of import or export should have been modeled in order to provide the most conservative analysis, as is required by CEQA. However, review of the Project's CalEEMod output files demonstrates that only 20 cubic yards of material export were modeled in the CalEEMod for off-site improvements (see excerpt below) (Appendix D, pp. 847, 865, 878, 900, 919, 934).

Table Name	Column Name	Default Value	New Value
tblGrading	MaterialExported	0.00	20.00

As you can see in the excerpt above, the model underestimates the amount of material export by 20,000 cubic yards of material. This underestimation presents a significant issue, as the inclusion of the entire amount of material export within the model is necessary to calculate emissions produced from material movement, including truck loading and unloading, and additional hauling truck trips.[5] As a result, emissions generated during Project construction may be underestimated by the model.

Incorrectly Assumes Tier 4 Final Equipment

According to the DEIR, the Project will implement Mitigation Measure 4.1-1(a), which states,

> "Prior to issuance of a grading permit, the project applicant shall show on the grading plans via notation that the contractor shall ensure that all off-road heavy-duty diesel-powered equipment (e.g., rubber tired dozers, excavators, graders, scrapers, pavers, paving equipment, and cranes) to be used for each phase of construction of the project (i.e., owned, leased, and subcontractor vehicles) shall meet California Air Resources Board (CARB) Tier 4 emissions standards or cleaner" (Table 2-1, p. 2-6).

As the above excerpt demonstrates, Mitigation Measure 4.1-1(a) does not specify whether the Project would implement Tier 4 Interim or Tier 4 Final engines. However, review of the Project's CalEEMod output files demonstrates that the model assumed that equipment would include the more efficient Tier 4 *Final* engines (see excerpt below) (Appendix D, pp. 619, 673, 722, 900, 919, 934, 959, 1010, 1056, 1114, 1156, 1193).

tblConstEquipMitigation	Tier	No Change	Tier 4 Final
tblConstEquipMitigation	Tier	No Change	Tier 4 Final
tblConstEquipMitigation	Tier	No Change	Tier 4 Final

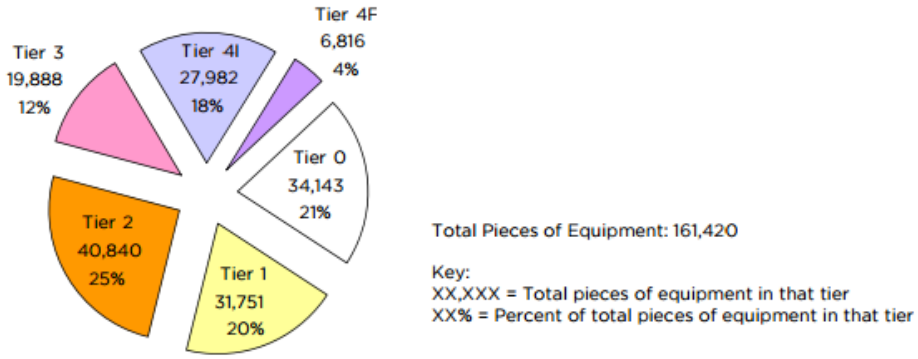
As can be seen in the excerpt above, the CalEEMod model assumes that the Project's construction equipment would be equipped with Tier 4 *Final* engines. This presents a significant issue, as the DEIR does not commit to the use of the more efficient Tier 4 Final equipment.

The United States Environmental Protection Agency (U.S. EPA) has slowly adopted more stringent standards to lower the emissions from off-road construction equipment since 1994. Since that time, Tier 1, Tier 2, Tier 3, Tier 4 Interim, and Tier 4 Final construction equipment has been phased in over time. Tier 4 Final represents the cleanest burning equipment and therefore has the lowest emissions compared to other tiers, including Tier 4 Interim equipment (see excerpt below):[6]

[6] "San Francisco Clean Construction Ordinance Implementation Guide for San Francisco Public Projects." August 2015, *available at:* https://www.sfdph.org/dph/files/EHSdocs/AirQuality/San_Francisco_Clean_Construction_Ordinance_2015.pdf, p. 6

Source: derived from California Air Resources Board, http://www.arb.ca.gov/msprog/ordiesel/documents/Off-Road_Diesel_Stds.xls.



a) When ARB and USEPA standards differ, the standards shown here represent the more stringent of the two.
b) Standards given for all sizes of Tier 1 engines are hydrocarbons/oxides of nitrogen (NOx)/carbon monoxide (CO)/particulate matter (PM) in grams per brakehorspower per hour (g/bhp-hr).
c) Standards given for all sizes of Tier 2 and Tier 3 engines, and Tier 4 engines below 75 horsepower are non-methane hydrocarbons (NMHC)+NOx/CO/PM in g/bhp-hr.
d) Standards given for Tier 4 engines above 75 horsepower are NMHC/NOx/CO/PM in g/bhp-hr.
e) Engine families in this power category may alternately meet Tier 3 PM standards (0.30 g/bhp-hr) from 2008-2011 in exchange for introducing final PM standards in 2012.
f) The implementation schedule shown is the three-year alternate NOx approach. Other schedules are available.
g) Certain manufacturers have agreed to comply with these standards by 2005.

As demonstrated in the figure above, Tier 4 Interim and Tier 3 equipment have greater emission levels than Tier 4 Final equipment. Therefore, by modeling construction emissions assuming nearly a full Tier 4 Final equipment fleet, the DEIR failed to account for higher emissions that may occur as a result of the use of Tier 3 or Tier 4 Interim equipment. Since Mitigation Measure 4.1-1(a) fails to specify whether the Project will use Tier 4 Interim or Tier 4 Final equipment, it is incorrect to model emissions assuming that the more efficient Tier 4 Final equipment will be used. Until the DEIR specifies that the Project will actually use Tier 4 Final engines during all phases of construction, and not Tier 4 Interim equipment, the Project's potential impacts should not be evaluated assuming the use of this cleaner burning equipment.

Furthermore, review of the DEIR demonstrates that the DEIR failed to evaluate the feasibility in obtaining Tier 4 equipment. Due to the limited amount of Tier 4, especially Tier 4 Final, equipment available, the DEIR should have assessed the feasibility in obtaining equipment with Tier 4 engines (see excerpt below).[7]

[7] *Ibid*.

Figure 4: 2014 Statewide All Fleet Sizes (Pieces of Equipment)

As demonstrated in the figure above, the Tier 4 Final and Interim equipment only account for 4% and 18%, respectively, of all off-road equipment currently available in California. Thus, emissions are modeled assuming that the Project will be able to obtain Tier 4 Final equipment even though this equipment only accounts for 4% of available off-road equipment currently available in California. As a result, the model represents the best-case scenario even though obtaining these types of equipment may not be feasible.

Due to the limited availability of Tier 4 Interim and Final equipment, the DEIR should have evaluated the feasibility of obtaining Tier 4 equipment. As a result, construction emissions may be underestimated.

Failure to Include All Demolition

Review of the Project's CalEEMod output files demonstrates that the air model failed to consider the total amount of demolition required for Project construction. As a result, the Project's construction emissions are underestimated.

According to the DEIR,

> "The first phase of construction would be the only one to include demolition and would result in approximately 10,000 sf of building material being demolished" (p. 4.1-28).

However, this amount of demolition is incorrect. Further review of the DEIR demonstrates the Project would "include demolition of the existing structure" (p. 2-1). The two existing buildings on the Project site are approximately 11,778 square feet and 2,640 square feet, totaling approximately 14,418 square feet (p. 3-4). Thus, the model should have included 14,418 square feet of demolition. According to the CalEEMod User's Guide, "Haul trips are based on the amount of material that is demolished, imported or exported assuming a truck can handle 16 cubic yards of material."[8] Therefore, the air model calculates a default number of hauling trips based upon the amount of demolition material inputted into the model. If the correct value of 14,481 square feet of demolition had been inputted into the model, the default number of hauling trips for demolition would have been 66. However, review of the Project's CalEEMod output files demonstrates that the model calculated a default number of hauling trips for

[8] http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14

demolition of 45 (see excerpt below) (Appendix D, pp. 465, 517, 565, 627, 680, 729, 790, 968, 1018, 1064, 1122, 1163).

Paving 2	6	15.00	0.00	0.00	10.80	7.30	20.00	LD_Mix	HDT_Mix	HHDT
Construction 2	9	1,062.00	414.00	0.00	10.80	7.30	20.00	LD_Mix	HDT_Mix	HHDT
Architectural Coating 2	1	212.00	0.00	0.00	10.80	7.30	20.00	LD_Mix	HDT_Mix	HHDT

As you can see in the excerpt above, the model calculated a default number of 45 demolition hauling trips, which demonstrates that the model failed to include the correct amount of demolition required for Project construction. The total amount of demolition material is used by CalEEMod to determine emissions associated with this phase of construction. The three primary operations that generate dust emission during the demolition phase are mechanical or explosive dismemberment, site removal of debris, and on-site truck traffic on paved and unpaved road.[9] Therefore, by failing to account for the demolition of the existing structures, fugitive dust emissions, emissions from site removal, and exhaust emissions from hauling trucks traveling to and from the site are underestimated. As a result, we find the DEIR's CalEEMod model to be inaccurate and thus, should not be relied upon to determine Project significance.

Unsubstantiated Mobile Mitigation Measures

Review of the Project's CalEEMod output files demonstrates that two mobile mitigation measures were included in the model without proper justification.

The Project's CalEEMod output files reveal that the model includes unsubstantiated mitigation measures, including Increase Transit Accessibility and Improve Pedestrian Network (see excerpt below) (Appendix D, pp. 497, 550, 598, 713, 659, 762, 822, 996, 1047, 1093, 1142, 1184, 1221).

4.1 Mitigation Measures Mobile

Increase Transit Accessibility

Improve Pedestrian Network

As you can see in the above excerpt, the air model assumed that the Project would increase transit accessibility and improve pedestrian network. As previously mentioned, the CalEEMod User's Guide requires any changes to model defaults be justified.[10] According to the "User Entered Comments & Non-

[9] CalEEMod User Guide, Appendix A, p. 11, *available at:* http://www.caleemod.com/

[10] CalEEMod User Guide, *available at:* http://www.caleemod.com/, p. 2, 9

Default Data" table the justification provided for these mitigation measures is "applicant provided." (Appendix D, pp. 457, 510, 558, 618, 672, 721, 782, 958, 1009, 1055, 1113, 1155). The DEIR address these measures in Mitigation Measure 4.1-5(c), stating:

> "Mitigation Measures may include, but would not be limited to, BAAQMD's recommended mitigation measures such as the following:
>
> - Orient buildings to maximize passive solar heating;
> - Improve bike and pedestrian network (complete sidewalks, connection to adjacent areas, connection to bike network, etc.);
> - Implement bicycle and pedestrian facilities such as bike lanes, routes, and paths, bike parking, sidewalks, and benches;
> - Dedicate land on-site to facilitate future connections with the Big Break Regional Trail;
> - Promote ridesharing, transit, bicycling, and walking for work trips through dedication of preferential parking spaces, provision of onsite bicycle parking, provision of end-of-trip facilities such as bicycle lockers and on-site showers" (p. 4.1-50).

However, the above excerpt demonstrates that the Project does not actually commit to the implementation of these measures. Mitigation Measure 4.1-5(c) simply states that "Mitigation Measures *may* include, but would not be limited to, BAAQMD's recommended mitigation measures such as the following" (emphasis added). Thus, the Project may include increasing transit accessibility and improving pedestrian network, but the implementation of these measures is not guaranteed. As a result, the implementation of these mitigation measures cannot be verified, and the model should not be relied upon to determine Project significance.

Unsubstantiated Energy Mitigation Measure

Review of the Project's CalEEMod output files reveals that the model included an energy mitigation measure without sufficient justification, and as a result, the Project's operational emissions may be underestimated.

The Project's CalEEMod output files demonstrate that the Project's emissions were modeled with an unsubstantiated energy mitigation measure (see excerpt below) (Appendix D, pp. 499, 551, 599, 661, 714, 763, 824, 998, 1048, 1094, 1144, 1185, 1222).

5.1 Mitigation Measures Energy

Exceed Title 24

As you can see in the excerpt above, the Project's operational emissions were modeled assuming the Project would exceed Title 24 Standards. As previously stated, the CalEEMod User's Guide requires that any non-default values inputted must be justified.[11] However, the "User Entered Comments & Non-Default Data" table fails to substantiate or address the use of this mitigation measure. Review of the

[11] CAPCOA (November 2017) CalEEMod User's Guide, http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 7, 13.

DEIR also demonstrates that the Project fails to demonstrate any sort of explanation or justification for the implementation of this mitigation measure in the model. As a result, the application of this mitigation measure is unsubstantiated and the model may underestimate the Project's operational emissions.

Failure to Implement All Feasible Mitigation to Reduce Emissions

The DEIR determines that the Project's VOC and NOx emissions would exceed thresholds set forth by the BAAQMD (p. 4.1-31, Table 4.1-8). As a result, the Project proposes a few mitigation measures to reduce the Project's VOC and NOx emissions (p. 4.1-31). However, even after implementing mitigation, the DEIR concludes that the Project's construction NOx emissions would still be significant (see table below) (p. 4.1-31).

Table 4.1-8
Maximum Mitigated Construction Emissions (lbs/day)

Pollutant	On-Site Project Emissions	Off-Site Project Emissions	Total Project Emissions	Threshold of Significance	Exceeds Threshold?
ROG	7.53	0.62	8.15	54	NO
NO_X	56.74	2.45	59.19	54	YES
PM_{10} (exhaust)	0.45	0.07	0.52	82	NO
PM_{10} (fugitive)	20.53	12.52	33.05	None	N/A
$PM_{2.5}$ (exhaust)	0.43	0.07	0.50	54	NO
$PM_{2.5}$ (fugitive)	7.05	6.70	13.75	None	N/A

Source: CalEEMod, September and October 2019 (see Appendix D).

Thus, the DEIR concludes that even with mitigation, the Project's NOx emissions would still be significant. Specifically, the DEIR states,

> "Implementation of the following mitigation measures would reduce the construction related emissions of ROG and NOX to the maximum extent practicable. The reductions in ROG resulting from the following mitigation measures would be sufficient to reduce ROG below the BAAQMD's thresholds. However, as shown in Table 4.1-8 NOX would remain in excess of the applicable threshold of significance of 54 lbs/day. Additional feasible mitigation does not exist to reduce the NOX emissions to below the applicable threshold of significance. Thus, despite implementation of the following mitigation measure, the impact would remain *significant and unavoidable*" (p. 4.1-31).

However, while we agree that the Project would result in a significant construction NOx impact, the DEIR's conclusion that these impacts are "significant and unavoidable" is incorrect. According to the California Environmental Quality Act (CEQA),

> "CEQA requires Lead Agencies to mitigate or avoid significant environmental impacts associated with discretionary projects. Environmental documents for projects that have any significant environmental impacts must identify all feasible mitigation measures or alternatives to reduce the impacts below a level of significance. If after the identification of all feasible mitigation

measures, a project is still deemed to have significant environmental impacts, the Lead Agency can approve a project, but must adopt a Statement of Overriding Consideration to explain why further mitigation measures are not feasible and why approval of a project with significant unavoidable impacts is warranted." [12]

As you can see, an impact can only be labeled as significant and unavoidable after all available, feasible mitigation is considered. Review of the Project's proposed mitigation measures, however, demonstrates that not all feasible mitigation measures are being implemented. Therefore, the DEIR's conclusion that impacts are significant and unavoidable is unsubstantiated. As a result, additional mitigation measures should be identified and incorporated, such as those suggested in the section of this letter titled "Feasible Mitigation Measures Available to Reduce Construction Emissions,"[13] in order to reduce the Project's air quality impacts to the maximum extent possible. Until all feasible mitigation is reviewed and incorporated into the Project's design, impacts from operational NOx cannot be considered significant and unavoidable.

Diesel Particulate Matter Health Risk Emissions Inadequately Evaluated

The DEIR concludes that the Project's health risk impacts would be less than significant without conducting a quantified health risk assessment (HRA) for the Project's construction and operational emissions to nearby, existing sensitive receptors. Specifically, the DEIR states,

> "Construction-related emissions would be temporary, intermittent throughout the day, spread over the project site, and regulated. In addition, DPM emitted from heavy-duty diesel vehicles during project operations would be spread over the project site and would occur outside of the CARB's recommended separation distance from the nearest sensitive receptor. However, should operations of Building 1 involve the use of more than 40 trucks equipped with TRUs each day, idling TRUs could result in substantial emissions of DPM, which could affect the nearest sensitive receptors. Thus, the proposed project would result in a ***potentially significant*** impact associated with exposure of sensitive receptors to substantial levels of pollutant concentrations" (p. 4.1-40).

The DEIR goes on to state,

> "Implementation of the following mitigation measures would reduce the need for TRUs to be operated within the project site. Reducing the operation of TRUs would result in a reduction in the amount of DPM emitted at loading docks within the project site, which would reduce the likelihood of any nearby sensitive receptors being exposed to substantial concentrations of pollutants. Accordingly, with implementation of the following mitigation measure, the impact would be less than significant" (p. 4.1-40).

In regards to an operational HRA, the DEIR states,

[12] http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf, p. 115 of 125

[13] See section titled "Feasible Mitigation Measures Available to Reduce Construction Emissions" on p. 21 of this comment letter. These measures would effectively reduce construction-related NOx, PM10, and PM2.5 emissions.

> "Consequently, emissions from the majority of on-site drive aisles and loading docks would be sufficiently separated from nearby sensitive receptors to ensure that nearby receptors would not be exposed to excess concentrations of DPM" (p. 4.1-37).

The DEIR goes on to state,

> "[T]he 1,100 daily trips associated with Building 1 would likely be split between all of the available access points, and, thus, the majority of trips related to operations at Building 1 would likely occur at distances in excess of 1,000 feet from the nearest receptor" (p. 4.1-38).

However, these justifications and subsequent less than significant impact finding are incorrect.

First, the DEIR's conclusion that impacts would be less than significant as a result of mitigation measures is unsubstantiated. Without any sort of quantified analysis of the mitigation measures and their associated reductions, the DEIR cannot claim less than significant impacts simply based on mitigation measures. Until the DEIR adequately evaluates and quantifies the Project's health risk impacts including the implementation of these mitigation measures, the less than significant health risk conclusion is unsubstantiated and cannot be relied upon.

Furthermore, stating that "emissions would be temporary, intermittent throughout the day, spread over the project site, and regulated" does not justify the omission of a quantified construction HRA. Similarly, stating that loading docks would be "sufficiently separated from nearby sensitive receptors" does not justify the omission of a quantified operational HRA. By failing to prepare a construction or an operational HRA for existing sensitive receptors, the DEIR is inconsistent with recommendations set forth by the Office of Environmental Health Hazard Assessment (OEHHA), the organization responsible for providing recommendations for health risk assessments in California. In February of 2015, OEHHA released its most recent *Risk Assessment Guidelines: Guidance Manual for Preparation of Health Risk Assessments*, which was formally adopted in March of 2015.[14] This guidance document describes the types of projects that warrant the preparation of a health risk assessment. Construction of the Project will produce emissions of DPM, a human carcinogen, through the exhaust stacks of construction equipment over an approximately 50-month construction period (p. 4.2-17). The OEHHA document recommends that all short-term projects lasting at least two months be evaluated for cancer risks to nearby sensitive receptors.[15] Therefore, per OEHHA guidelines, health risk impacts from Project construction should have been evaluated by the DEIR. Furthermore, once construction of the Project is complete, the Project will operate for a long period of time. During operation, the Project will generate approximately 4,292 daily vehicle trips, which will generate additional exhaust emissions, thus continuing to expose nearby sensitive receptors to emissions (p. 4.4-20, Table 4.4-4). The OEHHA document recommends that exposure from projects lasting more than 6 months should be evaluated for the duration of the project, and recommends that an exposure duration of 30 years be used to

[14] "Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* http://oehha.ca.gov/air/hot_spots/hotspots2015.html

[15] "Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* http://oehha.ca.gov/air/hot_spots/2015/2015GuidanceManual.pdf, p. 8-18

estimate individual cancer risk for the maximally exposed individual resident (MEIR).[16] Even though we were not provided with the expected lifetime of the Project, we can reasonably assume that the Project will operate for at least 30 years, if not more. Therefore, health risks from Project operation should have also been evaluated by the DEIR, as a 30-year exposure duration vastly exceeds the 2-month and 6-month requirements set forth by OEHHA. These recommendations reflect the most recent health risk policy, and as such, an assessment of health risks posed to nearby sensitive receptors as a result of construction and operation should be included in a revised CEQA evaluation for the Project.

Screening-Level Assessment Indicates Significant Impact

In an effort to demonstrate the potential risk posed by Project construction and operation to nearby sensitive receptors, we prepared a simple screening-level HRA. The results of our assessment, as described below, provide substantial evidence that the Project's construction and operational DPM emissions may result in a potentially significant health risk impact not previously identified by the DEIR.

In order to conduct our screening level risk assessment, we relied upon AERSCREEN, which is a screening level air quality dispersion model. [17] The model replaced SCREEN3, and AERSCREEN is included in the OEHHA[18] and the California Air Pollution Control Officers Associated (CAPCOA)[19] guidance as the appropriate air dispersion model for Level 2 health risk screening assessments ("HRSAs"). A Level 2 HRSA utilizes a limited amount of site-specific information to generate maximum reasonable downwind concentrations of air contaminants to which nearby sensitive receptors may be exposed. If an unacceptable air quality hazard is determined to be possible using AERSCREEN, a more refined modeling approach is required prior to approval of the Project.

We prepared a preliminary HRA of the Project's construction and operational health-related impact to residential sensitive receptors using the annual PM_{10} exhaust estimates from the SWAPE annual CalEEMod output files. Review of the Project site on Google Earth demonstrates that the closest sensitive receptor is a residence approximately 400 meters south of the Project site. Consistent with recommendations set forth by OEHHA, we assumed residential exposure begins during the third trimester stage of life. The Project's construction CalEEMod output files indicate that construction activities will generate approximately 543 pounds of diesel particulate matter (DPM) over the 1,289-day construction period. The AERSCREEN model relies on a continuous average emission rate to simulate maximum downward concentrations from point, area, and volume emission sources. To account for the variability in equipment usage and truck trips over Project construction, we calculated an average DPM emission rate by the following equation:

[16] "Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* http://oehha.ca.gov/air/hot_spots/2015/2015GuidanceManual.pdf, p. 8-6, 8-15
[17] "AERSCREEN Released as the EPA Recommended Screening Model," USEPA, April 11, 2011, *available at:* http://www.epa.gov/ttn/scram/guidance/clarification/20110411_AERSCREEN_Release_Memo.pdf
[18] "Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* https://oehha.ca.gov/media/downloads/crnr/2015guidancemanual.pdf
[19] "Health Risk Assessments for Proposed Land Use Projects," CAPCOA, July 2009, *available at:* http://www.capcoa.org/wp-content/uploads/2012/03/CAPCOA_HRA_LU_Guidelines_8-6-09.pdf

$$Emission\ Rate\ \left(\frac{grams}{second}\right) = \frac{543.4\ lbs}{1{,}289\ days} \times \frac{453.6\ grams}{lbs} \times \frac{1\ day}{24\ hours} \times \frac{1\ hour}{3{,}600\ seconds} = \mathbf{0.002213\ g/s}$$

Using this equation, we estimated a construction emission rate of 0.002213 grams per second (g/s). Subtracting the 1,289-day construction duration from the total residential duration of 30 years, we assumed that after Project construction, the MEIR would be exposed to the Project's operational DPM for an additional 26.47 years, approximately. The Project's operational CalEEMod emissions indicate that operational activities will generate approximately 303 pounds of DPM per year throughout operation. Applying the same equation used to estimate the construction DPM rate, we estimated the following emission rate for Project operation:

$$Emission\ Rate\ \left(\frac{grams}{second}\right) = \frac{302.6\ lbs}{365\ days} \times \frac{453.6\ grams}{lbs} \times \frac{1\ day}{24\ hours} \times \frac{1\ hour}{3{,}600\ seconds} = \mathbf{0.004353\ g/s}$$

Using this equation, we estimated an operational emission rate of 0.004353 g/s. Construction and operational activity was simulated as a 143.3-acre rectangular area source in AERSCREEN with dimensions of 853 meters by 680 meters. A release height of three meters was selected to represent the height of exhaust stacks on operational equipment and other heavy-duty vehicles, and an initial vertical dimension of one and a half meters was used to simulate instantaneous plume dispersion upon release. An urban meteorological setting was selected with model-default inputs for wind speed and direction distribution.

The AERSCREEN model generates maximum reasonable estimates of single-hour DPM concentrations from the Project site. EPA guidance suggests that in screening procedures, the annualized average concentration of an air pollutant be estimated by multiplying the single-hour concentration by 10%.[20] AS previously stated, there are residential sensitive receptors located approximately 400 meters from the Project site. The single-hour concentration estimated by AERSCREEN for Project construction is approximately 0.2564 µg/m^3 DPM at approximately 400 meters downwind. Multiplying this single-hour concentration by 10%, we get an annualized average concentration 0.02564 µg/m^3 for Project construction at the nearest sensitive receptor. For Project operation, the single-hour concentration is estimated by AERSCREEN is approximately 0.5043 µg/m^3 at approximately 400 meters downwind. Multiplying this single- hour concentration by 10%, we get an annualized average concentration of 0.05043 µg/m^3 for Project operation at the nearest sensitive receptor.

We calculated the excess cancer risk to the residential receptors located closest to the Project site using applicable HRA methodologies prescribed by OEHHA and the BAAQMD. Consistent with the construction schedule proposed by the DEIR, the annualized average concentration for construction was used for the entire third trimester of pregnancy (0.25 years) entire infantile stage of life (0 – 2 years), and first 1.28 years of the child stage of life (2 – 16 years). The annualized average concentration for operation was

[20] "Screening Procedures for Estimating the Air Quality Impact of Stationary Sources Revised." EPA, 1992, *available at*: http://www.epa.gov/ttn/scram/guidance/guide/EPA-454R-92-019_OCR.pdf; *see also* "Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* https://oehha.ca.gov/media/downloads/crnr/2015guidancemanual.pdf, p. 4-36

used for the remainder of the 30-year exposure period, which makes up the remainder of the child stages of life (2 – 16 years) and adult stages of life (16 – 30 years). Consistent with OEHHA and BAAQMD guidance, we used Age Sensitivity Factors (ASFs) to account for the heightened susceptibility of young children to the carcinogenic toxicity of air pollution. [21, 22] According to the most updated guidance, quantified cancer risk should be multiplied by a factor of ten during the third trimester of pregnancy and during the first two years of life (infant) and should be multiplied by a factor of three during the child stage of life (2 to 16 years). Furthermore, in accordance with guidance set forth by OEHHA, we used the 95th percentile breathing rates for infants.[23] Finally, according to BAAQMD guidance, we used a Fraction of Time At Home (FAH) value of 0.85 for the 3rd trimester and infant receptors, 0.72 for child receptors, and 0.73 for the adult receptors.[24] We used a cancer potency factor of 1.1 (mg/kg-day)$^{-1}$ and an averaging time of 25,550 days. Consistent with OEHHA guidance, exposure to the sensitive receptor was assumed to begin in the third trimester to provide the most conservative estimate of air quality hazards. The results of our calculations are shown below.

The Closest Exposed Individual at an Existing Residential Receptor					
Activity	**Duration (years)**	**Concentration (ug/m3)**	**Breathing Rate (L/kg-day)**	**ASF**	**Cancer Risk**
Construction	0.25	0.02564	361	10	3.0E-07
3rd Trimester Duration	***0.25***			***3rd Trimester Exposure***	***3.0E-07***

Adult Exposure Duration	***14.00***	***Adult Exposure***	***2.0E-06***
Lifetime Exposure Duration	**30.00**	**Lifetime Exposure**	**2.1E-05**

As indicated in the table above, the excess cancer risk posed to adults, children, infants, and during the third trimester of pregnancy at the closest receptor, located approximately 400 meters away, over the course of Project construction and operation are approximately 2, 12, 7.2, and 0.3 in one million, respectively. The excess cancer risk over the course of a residential lifetime (30 years) at the closest receptor is approximately 21 in one million. The lifetime cancer risk exceeds the BAAQMD threshold of 10 in one million, thus resulting in a significant impact not previously identified or addressed by the DEIR.

An agency must include an analysis of health risks that connects the Project's air emissions with the health risk posed by those emissions. Our analysis represents a screening-level HRA, which is known to be conservative and tends to err on the side of health protection. [25] The purpose of the screening-level construction HRA shown above is to demonstrate the link between the proposed Project's emissions and the potential health risk. Our screening-level HRA demonstrates that construction of the Project could result in a potentially significant health risk impact, when correct exposure assumptions and up-to-date, applicable guidance are used. Therefore, since our screening-level construction HRA indicates a potentially significant impact, the City should prepare an EIR with a revised HRA which makes a reasonable effort to connect the Project's air quality emissions and the potential health risks posed to nearby receptors. Thus, the City should prepare an updated, quantified air pollution model as well as an updated, quantified refined health risk assessment which adequately and accurately evaluates health risk impacts associated with both Project construction and operation.

[25] "Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* https://oehha.ca.gov/media/downloads/crnr/2015guidancemanual.pdf, p. 1-5

Greenhouse Gas

Failure to Adequately Assess Greenhouse Gas Impacts

The DEIR evaluates the Project's GHG impact based on the Project's consistency with a BAAQMD threshold, AB 32, SB 32, and the CARB Scoping Plan. Regarding the Project's consistency with the BAAQMD threshold and AB 32, the DEIR states,

> "Thus, implementation of the proposed project would result in emissions below the BAAQMD's 4.6 MTCO2e/SP/yr threshold of significance for GHG emissions, and the proposed project would be considered to comply with the emissions reductions targets of AB 32" (p. 4.1-43).

Regarding SB 32, the DEIR states,

> "Thus, implementation of the proposed would result in emissions above the 660 MTCO2*e*/yr and 2.76 MTCO2*e*/SP/yr thresholds of significance being used for GHG emissions in the year 2030, and, thus, the proposed project would be considered to conflict with SB 32" (p. 4.1-44).

Regarding the Project's consistency with the CARB Scoping Plan, the DEIR states,

> "However, the project would not comply with the majority of the applicable measures, and, as a result, the proposed project would not be considered to be consistent with the 2017 Scoping Plan" (p. 4.1-49)

Finally, the DEIR concludes that the Project would result in a significant and unavoidable GHG impact. The DEIR states,

> "Implementation of the following mitigation measures would reduce GHG emissions from operation of the proposed project. However, unless subsequent GHG emissions analysis can be performed to show otherwise, the impact is assumed to remain cumulatively considerable and significant and unavoidable" (p. 4.1-50).

Thus, the DEIR concludes that the Project would be inconsistent with the SB 32 and the 2017 CARB Scoping Plan and consistent with AB 32. Furthermore, the DEIR concludes that after the implementation of mitigation measures, the Project's GHG impact will be significant and unavoidable. However, the DEIR's analysis is incorrect for several reasons:

(1) AB 32, SB 32, and the 2017 CARB Scoping Plan cannot be relied upon to determine Project significance;
(2) Incorrect and unsubstantiated analysis demonstrates significant GHG impact;
(3) Updated analysis indicates significant impact; and
(4) The DEIR fails to implement all feasible mitigation.

(1) AB 32, SB 32, and the CARB Scoping Plan Cannot be Relied Upon to Determine Project Significance

The DEIR evaluates the Project's consistency with AB 32, SB 32, and the CARB Scoping Plan. However, these policies do not qualify as Climate Action Plans (CAPs) and thus, the DEIR cannot rely on them to determine the Project's GHG impact significance. CEQA Guidelines § 15064.4(b)(3) allows a lead agency

to consider "[t]he extent to which the project complies with regulations or requirements adopted to implement a statewide, regional, or local plan for the reduction or mitigation of greenhouse gas emissions (*see, e.g., section 15183.5(b)*)." (Emph. added). When adopting this language, the California Natural Resources Agency ("Resources Agency") explained in its 2018 Final Statement of Reasons for Regulatory Action ("2018 Statement of Reason")[26] that it explicitly added referenced to section 15183.5(b) because it was "needed to clarify that lead agencies may rely on plans *prepared pursuant to section 15183.5* in evaluating a project's [GHG] emissions … [and] consistent with the Agency's Final Statement of Reasons for the addition of section 15064.4, which states that 'proposed section 15064.4 is intended to be *read in conjunction with . . . proposed section 15183.5*. Those sections each indicate that local and regional plans may be developed to reduce GHG emissions.'" 2018 Final Statement of Reason, p. 19 (emph. added); *see also* 2009 Final Statement of Reasons for Regulatory Action, p. 27.[27] When read in conjunction, CEQA Guidelines §§ 15064.4(b)(3) and 15183.5(b)(1) make clear qualified GHG reduction plans (also commonly referred to as a Climate Action Plan ["CAP"]) should include the following features:

(1) **Inventory**: Quantify GHG emissions, both existing and projected over a specified time period, resulting from activities (e.g., projects) within a defined geographic area (e.g., lead agency jurisdiction);
(2) **Establish GHG Reduction Goal**: Establish a level, based on substantial evidence, below which the contribution to GHG emissions from activities covered by the plan would not be cumulatively considerable;
(3) **Analyze Project Types**: Identify and analyze the GHG emissions resulting from specific actions or categories of actions anticipated within the geographic area;
(4) **Craft Performance Based Mitigation Measures**: Specify measures or a group of measures, including performance standards, that substantial evidence demonstrates, if implemented on a project-by-project basis, would collectively achieve the specified emissions level;
(5) **Monitoring**: Establish a mechanism to monitor the CAP progress toward achieving said level and to require amendment if the plan is not achieving specified levels;

The above-listed CAP features provide the necessary *substantial evidence demonstrating a project's incremental contribution is not cumulative considerable*, as required under CEQA Guidelines § 15064.4(b)(3).[28] Here, however, the DEIR fails to demonstrate that the plans and policies include the

[26] Resources Agency (Nov. 2018) Final Statement of Reasons For Regulatory Action: Amendments To The State CEQA Guidelines, http://resources.ca.gov/ceqa/docs/2018_CEQA_Final_Statement_of%20Reasons_111218.pdf.
[27] Resources Agency (Dec. 2009) Final Statement of Reasons for Regulatory Action, p. 27 ("Those sections each indicate that local and regional plans may be developed to reduce GHG emissions. If such plans reduce community-wide emissions to a level that is less than significant, a later project that complies with the requirements in such a plan may be found to have a less than significant impact."), http://resources.ca.gov/ceqa/docs/Final_Statement_of_Reasons.pdf.
[28] *See Mission Bay Alliance v. Office of Community Investment & Infrastructure* (2016) 6 Cal.App.5th 160, 200-201 (Upheld qualitative GHG analysis when based on city's adopted its greenhouse gas strategy that contained "multiple elements" of CEQA Guidelines § 15183.5(b), "quantification of [city's] baseline levels of [GHG] emissions and planned reductions[,]" approved by the regional air district, and "[a]t the heart" of the city's greenhouse gas

above-listed requirements to be considered a qualified CAP for the City. As such, the DEIR leaves an analytical gap showing that compliance with said plans can be used for a project-level significance determination. Thus, the DEIR's GHG analysis regarding AB 32, SB 32, and the CARB Scoping Plan should not be relied upon to determine Project significance.

(2) Incorrect and Unsubstantiated Analysis Demonstrates Significant GHG Impact

While we agree that the Project would be inconsistent with SB 32 and the 2017 CARB Scoping Plan, the DEIR's assertion that the Project would comply with AB 32, because the Project's emissions would be below the BAAQMD's service population efficiency threshold of 4.6 MT CO_2e/Service Population/Year (MT CO_2e/SP/year) is incorrect for several reasons. First, as discussed above, the DEIR relies upon a flawed CalEEMod model to estimate Project GHG emissions. This is incorrect, as the DEIR's CalEEMod model underestimates emissions. Second, the BAAQMD's 2020 service population efficiency threshold is not appropriate for evaluating the Project's significance, which is not anticipated to complete construction until 2023. The BAAQMD regularly utilizes a substantial progress Tier 4 service population efficiency target goal of 2.6 MT CO2e/SP/year for target year 2030.[29] Thus, the DEIR should have compared the Project's emissions to the 2.6 MT CO2e/SP/year for the target year of 2030.

Notwithstanding the flawed GHG evaluation discussed above, applicable thresholds demonstrate that the Project would have a significant GHG impact. If the correct threshold had been used to adequately evaluate the Project's emissions, a significant impact would have been revealed that was not previously identified or addressed in the DEIR. The DEIR concludes that the Project's service population efficiency would be 4.32 MT CO_2e/SP/year stating,

> "[T]he project's total unmitigated annual GHG emissions in the first year of project operation, 2023, including amortized construction-related emissions, were estimated to be approximately 10,988.70 MTCO2e/yr, which results in emissions of 4.32 MTCO2e/SP/yr" (p. 4.1-43).

When we compare the service population efficiency of 4.32 MT CO_2e/SP/year had been compared to the BAAQMD's 2030 substantiated progress service population efficiency target of 2.6 MT CO2e/SP/year, we find that the Project's GHG emissions exceed the threshold. Thus, we find a potentially significant GHG impact not previously identified in the DEIR. According to CEQA Guidelines § 15064.4(b), if there is substantial evidence that the possible effects of a particular project are still cumulatively considerable notwithstanding compliance with the adopted regulations or requirements, a full CEQA analysis must be prepared for the project. The DEIR may not ignore this analysis and application of routinely used GHG thresholds by claiming discretion in deciding which thresholds it wishes to employ. As one court explained when setting aside an EIR where commenters questioned the city's use of a particular threshold, the discretion granted to lead agencies are not "unbounded" and (emphasis added):

---

strategy was "specific regulations" and measures to be implemented on a "project-by-project basis … designed to achieve the specified citywide emission level.").

[29] "Final White Paper Beyond 2020 and Newhall." Association of Environmental Professionals (AEP), October 2016, *available at:* https://califaep.org/docs/AEP-2016_Final_White_Paper.pdf, p. 40;

> "[T]he fact that a particular environmental effect *meets a particular threshold cannot be used as an automatic determinant that the effect is or is not significant* … a threshold of significance *cannot be applied in a way that would foreclose the consideration of other substantial evidence tending to show the environmental effect to which the threshold relates might be significant*." *East Sacramento Partnership for a Livable City v. City of Sacramento* (2016) 5 Cal.App.5th 281, 300, 303-304 (internal citations omitted).

Thus, the results of the above analysis provide substantial evidence that the proposed Project's GHG emissions are still cumulatively considerable notwithstanding its purported compliance with AB 32. Therefore, an updated CEQA analysis must be prepared for the Project, and mitigation should be implemented where necessary, per CEQA guidelines.

(3) Updated Analysis Indicates Significant Impact

Applicable thresholds and site-specific modeling demonstrate that the Project will result in a potentially significant GHG impact. The updated CalEEMod output files, modeled by SWAPE with Project-specific information, disclose the Project's mitigated emissions, which include approximately 8,960.3 MT CO_2e of total construction emissions (sum of emissions from 2019, 2020, and 2021 for both on-site and off-site construction) and approximately 18,224.6 MT CO_2e/year of annual operational emissions (sum of area, energy, mobile, stationary, waste, and water-related emissions from both on-site and off-site operations). When we compare the total Project's GHG emissions to the BAAQMD bright-line threshold of 1,100 MT CO_2e/year,[30] we find that the Project's GHG emissions exceed the threshold (see table below).

SWAPE Annual Greenhouse Gas Emissions	
Project Phase	**Proposed Project (MT CO_2e/year)**
Construction (amortized over 30 years)	298.68
Area	0.07
Energy	11,407.83
Mobile	4,250.91
Waste	1,215.38
Water	1,350.42
Total	**18,523.28**
Threshold	1,100.00
Exceed?	***Yes***

As demonstrated in the table above, the proposed Project would generate a total of approximately 18,523.3 MT CO_2e/year when modeled correctly, which exceeds the BAAQMD's 1,100 MT CO_2e/year

[30] "California Environmental Quality Act Air Quality Guidelines." BAAQMD, May 2017, *available at:* http://www.baaqmd.gov/~/media/files/planning-and-research/ceqa/ceqa_guidelines_may2017-pdf.pdf?la=en, p. 2-4.

threshold. Hence, a Tier 4 analysis is warranted. When dividing the Project's GHG emissions by a service population value of 2,542 people, as indicated in the DEIR, we find that the Project would emit approximately 7.3 MT CO_2e/SP/year (p. 4.1-43).[31] This exceeds the BAAQMD substantial progress threshold of 2.6 MT CO_2e/SP/year (see table below).

SWAPE Greenhouse Gas Emissions	
Project Phase	**Proposed Project (MT CO_2e/year)**
Annual Emissions	**18523.28**
Service Population	2542.00
Service Population Efficiency	**7.29**
Threshold	2.60
Exceed?	***Yes***

As the table above demonstrates, when correct input parameters are used to model Project emissions, the Project's total GHG emissions exceed the "Substantial Progress" efficiency threshold for 2030 of 2.6 MT CO_2e/SP/year, thus resulting in a significant impact not previously assessed or identified in the DEIR. As a result, an updated GHG analysis should be prepared in a Project-specific EIR and additional mitigation should be incorporated into the Project.

(4) Failure to Implement All Feasible Mitigation

Furthermore, while we agree that the Project's GHG impact would be significant, the DEIR's assertion that the Project's GHG impact would be unavoidable and cannot be mitigated further is incorrect. According to the California Environmental Quality Act (CEQA),

> "CEQA requires Lead Agencies to mitigate or avoid significant environmental impacts associated with discretionary projects. Environmental documents for projects that have any significant environmental impacts must identify all feasible mitigation measures or alternatives to reduce the impacts below a level of significance. If after the identification of all feasible mitigation measures, a project is still deemed to have significant environmental impacts, the Lead Agency can approve a project, but must adopt a Statement of Overriding Consideration to explain why further mitigation measures are not feasible and why approval of a project with significant unavoidable impacts is warranted."[32]

As you can see, an impact can only be labeled as significant and unavoidable after all available, feasible mitigation is considered. Review of the Project's proposed mitigation measures, however, demonstrates that the DEIR fails to implement all feasible mitigation. Therefore, the DEIR's conclusion that impacts are significant and unavoidable is unsubstantiated. As a result, additional mitigation measures should be identified and incorporated in an updated EIR in order to reduce the Project's air quality impacts to the

[31] Calculated: (18,523.3 MT CO_2e/year) / (2,542 service population) = (7.29 MT CO_2e/SP/year).
[32] http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf, p. 115 of 125

maximum extent possible. Until all feasible mitigation is reviewed and incorporated into the Project's design, impacts from GHG emissions cannot be considered significant and unavoidable.

Feasible Mitigation Measures Available to Reduce Construction Emissions

Our analysis demonstrates that, when Project activities are modeled correctly, construction emissions would result in potentially significant impacts. Therefore, additional mitigation measures must be identified and incorporated in a DEIR to reduce these emissions to a less than significant level.

Additional mitigation measures can be found in CAPCOA's *Quantifying Greenhouse Gas Mitigation Measures,* which attempt to reduce GHG levels, as well as reduce criteria air pollutants such as particulate matter and NOx.[33] DPM and NOx are a byproduct of diesel fuel combustion and are emitted by on-road vehicles and by off-road construction equipment. Mitigation for criteria pollutant emissions should include consideration of the following measures in an effort to reduce construction emissions.[34]

Require Implementation of Diesel Control Measures

The Northeast Diesel Collaborative (NEDC) is a regionally coordinated initiative to reduce diesel emissions, improve public health, and promote clean diesel technology. The NEDC recommends that contracts for all construction projects require the following diesel control measures: [35]

- All diesel generators on site for more than 10 total days must be equipped with emission control technology verified by EPA or CARB to reduce PM emissions by a minimum of 85 percent.
- All diesel vehicles, construction equipment, and generators on site shall be fueled with ultra-low sulfur diesel fuel (ULSD) or a biodiesel blend[36] approved by the original engine manufacturer with sulfur content of 15 parts per million (ppm) or less.

Repower or Replace Older Construction Equipment Engines

The NEDC recognizes that availability of equipment that meets the EPA's newer standards is limited.[37] Due to this limitation, the NEDC proposes actions that can be taken to reduce emissions from existing equipment in the *Best Practices for Clean Diesel Construction* report.[38] These actions include but are not limited to:

- Repowering equipment (i.e. replacing older engines with newer, cleaner engines and leaving the body of the equipment intact).

---

[33] http://www.capcoa.org/wp-content/uploads/2010/11/CAPCOA-Quantification-Report-9-14-Final.pdf

[34] For measures to reduce operational DPM emissions, see section titled "Additional Feasible Mitigation Measures Available to Reduce Operational Emissions" on p. 25 of this letter. These measures would effectively reduce operational VOC and NOx emissions, DPM emissions, as well as GHG emissions.

[35] Diesel Emission Controls in Construction Projects, *available at:* http://www2.epa.gov/sites/production/files/2015-09/documents/nedc-model-contract-sepcification.pdf

[36] Biodiesel lends are only to be used in conjunction with the technologies which have been verified for use with biodiesel blends and are subject to the following requirements: http://www.arb.ca.gov/diesel/verdev/reg/biodieselcompliance.pdf

[37] http://northeastdiesel.org/pdf/BestPractices4CleanDieselConstructionAug2012.pdf

[38] http://northeastdiesel.org/pdf/BestPractices4CleanDieselConstructionAug2012.pdf

Engine repower may be a cost-effective emissions reduction strategy when a vehicle or machine has a long useful life and the cost of the engine does not approach the cost of the entire vehicle or machine. Examples of good potential replacement candidates include marine vessels, locomotives, and large construction machines.[39] Older diesel vehicles or machines can be repowered with newer diesel engines or in some cases with engines that operate on alternative fuels. The original engine is taken out of service and a new engine with reduced emission characteristics is installed. Significant emission reductions can be achieved, depending on the newer engine and the vehicle or machine's ability to accept a more modern engine and emission control system. It should be noted, however, that newer engines or higher tier engines are not necessarily cleaner engines, so it is important that the Project Applicant check the actual emission standard level of the current (existing) and new engines to ensure the repower product is reducing emissions for DPM.[40]

- Replacement of older equipment with equipment meeting the latest emission standards.

Engine replacement can include substituting a cleaner highway engine for a nonroad engine. Diesel equipment may also be replaced with other technologies or fuels. Examples include hybrid switcher locomotives, electric cranes, LNG, CNG, LPG or propane yard tractors, forklifts or loaders. Replacements using natural gas may require changes to fueling infrastructure.[41] Replacements often require some re-engineering work due to differences in size and configuration. Typically, there are benefits in fuel efficiency, reliability, warranty, and maintenance costs.[42]

Install Retrofit Devices on Existing Construction Equipment

PM emissions from alternatively-fueled construction equipment can be further reduced by installing retrofit devices on existing and/or new equipment. The most common retrofit technologies are retrofit devices for engine exhaust after-treatment. These devices are installed in the exhaust system to reduce emissions and should not impact engine or vehicle operation. [43] It should be noted that actual emissions reductions and costs will depend on specific manufacturers, technologies and applications.

Use Electric and Hybrid Construction Equipment

CAPCOA's *Quantifying Greenhouse Gas Mitigation Measures*[44] report also proposes the use of electric and/or hybrid construction equipment as a way to mitigate DPM emissions. When construction equipment is powered by grid electricity rather than fossil fuel, direct emissions from fuel combustion are replaced with indirect emissions associated with the electricity used to power the equipment.

[44]http://www.capcoa.org/wp-content/uploads/2010/11/CAPCOA-Quantification-Report-9-14-Final.pdf

Furthermore, when construction equipment is powered by hybrid-electric drives, emissions from fuel combustion are also greatly reduced. Electric construction equipment is available commercially from companies such as Peterson Pacific Corporation,[45] which specialize in the mechanical processing equipment like grinders and shredders. Construction equipment powered by hybrid-electric drives is also commercially available from companies such as Caterpillar.[46] For example, Caterpillar reports that during an 8-hour shift, its D7E hybrid dozer burns 19.5 percent fewer gallons of fuel than a conventional dozer while achieving a 10.3 percent increase in productivity. The D7E model burns 6.2 gallons per hour compared to a conventional dozer which burns 7.7 gallons per hour.[47] Fuel usage and savings are dependent on the make and model of the construction equipment used. The Project Applicant should calculate project-specific savings and provide manufacturer specifications indicating fuel burned per hour.

Implement a Construction Vehicle Inventory Tracking System

CAPCOA's *Quantifying Greenhouse Gas Mitigation Measures*[48] report recommends that the Project Applicant provide a detailed plan that discusses a construction vehicle inventory tracking system to ensure compliances with construction mitigation measures. The system should include strategies such as requiring engine run time meters on equipment, documenting the serial number, horsepower, manufacture age, fuel, etc. of all onsite equipment and daily logging of the operating hours of the equipment. Specifically, for each onroad construction vehicle, nonroad construction equipment, or generator, the contractor should submit to the developer's representative a report prior to bringing said equipment on site that includes:[49]

- Equipment type, equipment manufacturer, equipment serial number, engine manufacturer, engine model year, engine certification (Tier rating), horsepower, and engine serial number.
- The type of emission control technology installed, serial number, make, model, manufacturer, and EPA/CARB verification number/level.
- The Certification Statement[50] signed and printed on the contractor's letterhead.

Furthermore, the contractor should submit to the developer's representative a monthly report that, for each on-road construction vehicle, nonroad construction equipment, or generator onsite, includes: [51]

- Hour-meter readings on arrival on-site, the first and last day of every month, and on off-site date.

[51] Diesel Emission Controls in Construction Projects, *available at:*http://www2.epa.gov/sites/production/files/2015-09/documents/nedc-model-contract-sepcification.pdf

- Any problems with the equipment or emission controls.
- Certified copies of fuel deliveries for the time period that identify:
    - Source of supply
    - Quantity of fuel
    - Quality of fuel, including sulfur content (percent by weight)

In addition to these measures, we also recommend that the Project implement the following mitigation measures, called "Enhanced Exhaust Control Practices,"[52] that are recommended by the Sacramento Metropolitan Air Quality Management District (SMAQMD):

1. The project representative shall submit to the lead agency a comprehensive inventory of all off-road construction equipment, equal to or greater than 50 horsepower, that will be used an aggregate of 40 or more hours during any portion of the construction project.
    - The inventory shall include the horsepower rating, engine model year, and projected hours of use for each piece of equipment.
    - The project representative shall provide the anticipated construction timeline including start date, and name and phone number of the project manager and on-site foreman.
    - This information shall be submitted at least 4 business days prior to the use of subject heavy-duty off-road equipment.
    - The inventory shall be updated and submitted monthly throughout the duration of the project, except that an inventory shall not be required for any 30-day period in which no construction activity occurs.
2. The project representative shall provide a plan for approval by the lead agency demonstrating that the heavy-duty off-road vehicles (50 horsepower or more) to be used in the construction project, including owned, leased, and subcontractor vehicles, will achieve a project wide fleet-average 20% NOX reduction and 45% particulate reduction compared to the most recent California Air Resources Board (ARB) fleet average.
    - This plan shall be submitted in conjunction with the equipment inventory.
    - Acceptable options for reducing emissions may include use of late model engines, low-emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available.
    - The District's Construction Mitigation Calculator can be used to identify an equipment fleet that achieves this reduction.
3. The project representative shall ensure that emissions from all off-road diesel-powered equipment used on the project site do not exceed 40% opacity for more than three minutes in any one hour.
    - Any equipment found to exceed 40 percent opacity (or Ringelmann 2.0) shall be repaired immediately. Non-compliant equipment will be documented and a summary provided to the lead agency monthly.
    - A visual survey of all in-operation equipment shall be made at least weekly.

[52] http://www.airquality.org/ceqa/Ch3EnhancedExhaustControl_10-2013.pdf

- A monthly summary of the visual survey results shall be submitted throughout the duration of the project, except that the monthly summary shall not be required for any 30-day period in which no construction activity occurs. The monthly summary shall include the quantity and type of vehicles surveyed as well as the dates of each survey.

4. The District and/or other officials may conduct periodic site inspections to determine compliance. Nothing in this mitigation shall supersede other District, state or federal rules or regulations.

Use of Spray Equipment with Greater Transfer Efficiencies

Various coatings and adhesives are required to be applied by specified methods such as electrostatic spray, high-volume, low-pressure (HVLP) spray, roll coater, flow coater, dip coater, etc. in order to maximize the transfer efficiency. Transfer efficiency is typically defined as the ratio of the weight of coating solids adhering to an object to the total weight of coating solids used in the application process, expressed as a percentage. When it comes to spray applications, the rules typically require the use of either electrostatic spray equipment or HVLP spray equipment. The SCAQMD is now able to certify HVLP spray applicators and other application technologies at efficiency rates of 65 percent or greater.[53]

These measures offer a cost-effective, feasible way to incorporate lower-emitting equipment into the Project's construction fleet, which subsequently reduces construction emissions. A revised EIR must be prepared to include additional mitigation measures, as well as include an updated air quality assessment to ensure that the necessary mitigation measures are implemented to reduce construction emissions. Furthermore, the updated EIR needs to demonstrate commitment to the implementation of these measures prior to Project approval to ensure that the Project's construction-related emissions are reduced to the maximum extent possible.

Additional Feasible Mitigation Measures Available to Reduce Operational Emissions

Our analysis demonstrates that the Project's air quality and GHG emissions may result in a potentially significant impact. In an effort to reduce the Project's emissions, we identified several mitigation measures that are applicable to the Project. Feasible mitigation measures can be found in CAPCOA's *Quantifying Greenhouse Gas Mitigation Measures,* which attempt to reduce GHG levels, as well as reduce criteria air pollutants such as particulate matter emissions.[54] Therefore, to reduce the Project's GHG emissions, consideration of the following measures should be made.

- Integrate affordable and below market rate housing
- Energy-related mitigation:
    - Install programmable thermostat timers
    - Establish onsite renewable energy systems, including solar power and wind power
    - Limit outdoor lighting requirements
    - Reduce unnecessary outdoor lighting by utilizing design features such as limiting the hours of operation of outdoor lighting.

[53] http://www.aqmd.gov/home/permits/spray-equipment-transfer-efficiency
[54] http://www.capcoa.org/wp-content/uploads/2010/11/CAPCOA-Quantification-Report-9-14-Final.pdf

    - Provide education on energy efficiency to residents, customers, and/or tenants. Provide information on energy management services for large energy users.
    - Meet "reach" goals for building energy efficiency and renewable energy use.
    - Limit the use of outdoor lighting to only that needed for safety and security purposes.
    - Require use of electric or alternatively fueled sweepers with HEPA filters.
    - Include energy storage where appropriate to optimize renewable energy generation systems and avoid peak energy use.
    - Prohibit gas powered landscape equipment and implement electric yard equipment compatibility
- Transportation-related mitigation:
    - Provide EV parking
    - Require residential area parking permits
    - Implement ride-sharing, vanpool, shuttle, bike-sharing programs
    - Provide bike parking near transit
    - Provide local shuttles
    - Implement area or cordon pricing
    - Install a park-and-ride lot
- Water-related mitigation:
    - Install an infiltration basin to provide an opportunity for 100% of the storm water to infiltrate on-site.
    - Install a system to reutilize gray water
    - Use locally-sourced water supply
    - Plant native and drought-resistant trees and vegetation

- Develop and follow a "green streets guide" that requires:
    - Use of minimal amounts of concrete and asphalt;
    - Use of groundcovers rather than pavement to reduce heat reflection.[55]
- Implement Project design features such as:
    - Shade HVAC equipment from direct sunlight;
    - Install high-albedo white thermoplastic polyolefin roof membrane;
    - Install formaldehyde-free insulation; and
    - Use recycled-content gypsum board.
    - Require all buildings to become "LEED" and "WELL" certified.
- Plant low-VOC emitting shade trees, e.g., in parking lots to reduce evaporative emissions from parked vehicles.

[55] Cool Houston Plan; http://www.harcresearch.org/sites/default/files/documents/projects/CoolHoustonPlan_0.pdf

Finally, the Kimball Business Park Project Final Environmental Impact Report includes various feasible mitigation measures that would reduce on-site area emissions that are applicable to the proposed Project's retail land use, and include, but are not limited to:[56]

- Increase in insulation such that heat transfer and thermal bridging is minimized.
- Limit air leakage through the structure and/or within the heating and cooling distribution system.
- Installation of dual-paned or other energy efficient windows.
- Installation of automatic devices to turn off lights where they are not needed.

When combined, these measures offer a cost-effective, feasible way to incorporate lower-emitting design features into the proposed Project, which subsequently, reduces emissions released during Project operation. An updated EIR should be prepared to include additional mitigation measures, as well as include an updated air quality analysis to ensure that the necessary mitigation measures are implemented to reduce emissions to below thresholds. The EIR also needs to demonstrate commitment to the implementation of these measures prior to Project approval, to ensure that the Project's significant emissions are reduced to the maximum extent possible.

SWAPE has received limited discovery regarding this project. Additional information may become available in the future; thus, we retain the right to revise or amend this report when additional information becomes available. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental consultants practicing in this or similar localities at the time of service. No other warranty, expressed or implied, is made as to the scope of work, work methodologies and protocols, site conditions, analytical testing results, and findings presented. This report reflects efforts which were limited to information that was reasonably accessible at the time of the work, and may contain informational gaps, inconsistencies, or otherwise be incomplete due to the unavailability or uncertainty of information obtained or provided by third parties.

Sincerely,

Matt Hagemann, P.G., C.Hg.

Paul E. Rosenfeld, Ph.D.

AERSCREEN 16216

Oakley_Operational

Oakley_Operational

---------- DATA ENTRY VALIDATION ----------

	METRIC	ENGLISH
** AREADATA **	----------	----------
Emission Rate:	0.435E-02 g/s	0.345E-01 lb/hr
Area Height:	3.00 meters	9.84 feet
Area Source Length:	853.00 meters	2798.56 feet
Area Source Width:	680.00 meters	2230.97 feet
Vertical Dimension:	1.50 meters	4.92 feet
Model Mode:	URBAN	
Population:	41714	
Dist to Ambient Air:	1.0 meters	3. feet

** BUILDING DATA **

No Building Downwash Parameters

** TERRAIN DATA **

No Terrain Elevations

Source Base Elevation: 0.0 meters 0.0 feet

Probe distance: 5000. meters 16404. feet

No flagpole receptors

No discrete receptors used

** FUMIGATION DATA **

No fumigation requested

** METEOROLOGY DATA **

Min/Max Temperature: 250.0 / 310.0 K -9.7 / 98.3 Deg F

Minimum Wind Speed: 0.5 m/s

```
 Anemometer Height:   10.000 meters

 Dominant Surface Profile: Urban

 Dominant Climate Type:    Average Moisture

 Surface friction velocity (u*): not adjusted

DEBUG OPTION ON

 AERSCREEN output file:

 Oakley_Operational.out

 *** AERSCREEN Run is Ready to Begin

 No terrain used, AERMAP will not be run

SWAPE Technical Consultation, Data Analysis and Litigation Support for the Environment

1640 5th St.., Suite 204 Santa
Santa Monica, California 90401
Tel: (949) 887-9013
Email: mhagemann@swape.com

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education:

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on VOC filtration.
M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.
B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience:

Dr. Rosenfeld is the Co-Founder and Principal Environmental Chemist at Soil Water Air Protection Enterprise (SWAPE). His focus is the fate and transport of environmental contaminants, risk assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling, oil spills, boilers, incinerators and other industrial and agricultural sources relating to nuisance and personal injury. His project experience ranges from monitoring and modeling of pollution sources as they relate to human and ecological health. Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing petroleum, chlorinated solvents, pesticides, radioactive waste, PCBs, PAHs, dioxins, furans, volatile organics, semi-volatile organics, perchlorate, heavy metals, asbestos, PFOA, unusual polymers, MtBE, fuel oxygenates and odor. Dr. Rosenfeld has evaluated greenhouse gas emissions using various modeling programs recommended by California Air Quality Management Districts.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H_2O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist
Bureau of Land Management, Kremmling Colorado 1990; Scientist

Presentations:

Rosenfeld, P.E., Sutherland, A; Hesse, R.; Zapata, A. (October 3-6, 2013). Air dispersion modeling of volatile organic emissions from multiple natural gas wells in Decatur, TX. *44th Western Regional Meeting, American Chemical Society.* Lecture conducted from Santa Clara, CA.

Sok, H.L.; Waller, C.C.; Feng, L.; Gonzalez, J.; Sutherland, A.J.; Wisdom-Stack, T.; Sahai, R.K.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Atrazine: A Persistent Pesticide in Urban Drinking Water. *Urban Environmental Pollution*. Lecture conducted from Boston, MA.

Feng, L.; Gonzalez, J.; Sok, H.L.; Sutherland, A.J.; Waller, C.C.; Wisdom-Stack, T.; Sahai, R.K.; La, M.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Bringing Environmental Justice to East St. Louis, Illinois. *Urban Environmental Pollution.* Lecture conducted from Boston, MA.

Rosenfeld, P.E. (April 19-23, 2009). Perfluoroctanoic Acid (PFOA) and Perfluoroactane Sulfonate (PFOS) Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*, Lecture conducted from Tuscon, AZ.

Rosenfeld, P.E. (April 19-23, 2009). Cost to Filter Atrazine Contamination from Drinking Water in the United States" Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*. Lecture conducted from Tuscon, AZ.

Wu, C., Tam, L., Clark, J., **Rosenfeld, P**. (20-22 July, 2009). Dioxin and furan blood lipid concentrations in populations living near four wood treatment facilities in the United States. Brebbia, C.A. and Popov, V., eds., *Air Pollution XVII: Proceedings of the Seventeenth International Conference on Modeling, Monitoring and Management of Air Pollution*. Lecture conducted from Tallinn, Estonia.

Rosenfeld, P. E. (October 15-18, 2007). Moss Point Community Exposure To Contaminants From A Releasing Facility. *The 23rd Annual International Conferences on Soils Sediment and Water.* Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). The Repeated Trespass of Tritium-Contaminated Water Into A Surrounding Community Form Repeated Waste Spills From A Nuclear Power Plant*. The 23rd Annual International Conferences on Soils Sediment and Water*. Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). Somerville Community Exposure To Contaminants From Wood Treatment Facility Emissions. The *23rd Annual International Conferences on Soils Sediment and Water*. Lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld P. E. (March 2007). Production, Chemical Properties, Toxicology, & Treatment Case Studies of 1,2,3-Trichloropropane (TCP). *The Association for Environmental Health and Sciences (AEHS) Annual Meeting*. Lecture conducted from San Diego, CA.

Rosenfeld P. E. (March 2007). Blood and Attic Sampling for Dioxin/Furan, PAH, and Metal Exposure in Florala, Alabama. *The AEHS Annual Meeting.* Lecture conducted from San Diego, CA.

Hensley A.R., Scott, A., **Rosenfeld P.E.,** Clark, J.J.J. (August 21 – 25, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *The 26th International Symposium on Halogenated Persistent Organic Pollutants – DIOXIN2006*. Lecture conducted from Radisson SAS Scandinavia Hotel in Oslo Norway.

Hensley A.R., Scott, A., **Rosenfeld P.E.,** Clark, J.J.J. (November 4-8, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *APHA 134 Annual Meeting & Exposition.* Lecture conducted from Boston Massachusetts.

Paul Rosenfeld Ph.D. (October 24-25, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. Mealey's C8/PFOA. *Science, Risk & Litigation Conference.* Lecture conducted from The Rittenhouse Hotel, Philadelphia, PA.

Paul Rosenfeld Ph.D. (September 19, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, *Toxicology and Remediation PEMA Emerging Contaminant Conference*. Lecture conducted from Hilton Hotel, Irvine California.

Paul Rosenfeld Ph.D. (September 19, 2005). Fate, Transport, Toxicity, And Persistence of 1,2,3-TCP. *PEMA Emerging Contaminant Conference.* Lecture conducted from Hilton Hotel in Irvine, California.

Paul Rosenfeld Ph.D. (September 26-27, 2005). Fate, Transport and Persistence of PDBEs. *Mealey's Groundwater Conference.* Lecture conducted from Ritz Carlton Hotel, Marina Del Ray, California.

Paul Rosenfeld Ph.D. (June 7-8, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. *International Society of Environmental Forensics: Focus On Emerging Contaminants*. Lecture conducted from Sheraton Oceanfront Hotel, Virginia Beach, Virginia.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Fate Transport, Persistence and Toxicology of PFOA and Related Perfluorochemicals. *2005 National Groundwater Association Ground Water And Environmental Law Conference*. Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, Toxicology and Remediation. *2005 National Groundwater Association Ground Water and Environmental Law Conference.* Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. and Rob Hesse R.G. (May 5-6, 2004). Tert-butyl Alcohol Liability and Toxicology, A National Problem and Unquantified Liability. *National Groundwater Association. Environmental Law Conference*. Lecture conducted from Congress Plaza Hotel, Chicago Illinois.

Paul Rosenfeld, Ph.D. (March 2004). Perchlorate Toxicology. *Meeting of the American Groundwater Trust*. Lecture conducted from Phoenix Arizona.

Hagemann, M.F., **Paul Rosenfeld, Ph.D.** and Rob Hesse (2004). Perchlorate Contamination of the Colorado River. *Meeting of tribal representatives*. Lecture conducted from Parker, AZ.

Paul Rosenfeld, Ph.D. (April 7, 2004). A National Damage Assessment Model For PCE and Dry Cleaners. *Drycleaner Symposium. California Ground Water Association*. Lecture conducted from Radison Hotel, Sacramento, California.

Rosenfeld, P. E., Grey, M., (June 2003) Two stage biofilter for biosolids composting odor control. *Seventh International In Situ And On Site Bioremediation Symposium Battelle Conference* Orlando, FL.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. (February 20-21, 2003) Understanding Historical Use, Chemical Properties, Toxicity and Regulatory Guidance of 1,4 Dioxane. *National Groundwater Association. Southwest Focus Conference. Water Supply and Emerging Contaminants*.. Lecture conducted from Hyatt Regency Phoenix Arizona.

Paul Rosenfeld, Ph.D. (February 6-7, 2003). Underground Storage Tank Litigation and Remediation. *California CUPA Forum*. Lecture conducted from Marriott Hotel, Anaheim California.

Paul Rosenfeld, Ph.D. (October 23, 2002) Underground Storage Tank Litigation and Remediation. *EPA Underground Storage Tank Roundtable*. Lecture conducted from Sacramento California.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Understanding Odor from Compost, *Wastewater and Industrial Processes. Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Comparison of Microbial Activity and Odor Emissions from Three Different Biosolids Applied to Forest Soil. *Brown and Caldwell.* Lecture conducted from Seattle Washington.

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest.* Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E, C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. $41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: $10,000 grant awarded to San Diego State University.
Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. $100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. $20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: $10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: $15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. $500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993.

Deposition and/or Trial Testimony:

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September, 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al.,, et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action N0. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant.*
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio

John Michael Abicht, et al., *Plaintiffs,* vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the Court of Common Pleas for the Second Judicial Circuit, State of South Carolina, County of Aiken
David Anderson, et al., *Plaintiffs*, vs. Norfolk Southern Corporation, et al., *Defendants*.
Case Number: 2007-CP-02-1584

SMITH ENGINEERING & MANAGEMENT

November 19, 2019

Mr. Michael Lozeau
Lozeau Drury
1939 Harrison Street, Suite 150
Oakland, CA 94612

Subject: Oakley Logistics Center Project DEIR (SCH-2019029113)
P19047

Dear Mr. Lozeau:

At your request, I have reviewed traffic matters associated with the Oakley Logistics Center Project (the "Project") Draft Environmental Impact Report (the "DEIR") in the City of Oakley (the "City"). My review is specific to the Transportation section of the DEIR.

My qualifications to perform this review include registration as a Civil and Traffic Engineer in California and over 50 years professional consulting engineering practice in the traffic and transportation industry. I have both prepared and performed adequacy reviews of numerous transportation and circulation sections of environmental impact reports prepared under the California Environmental Quality Act (CEQA) including those for warehouse and industrial facilities. My professional resume is attached. Findings of my review are summarized below.

The fundamental problem is that transportation section of the DEIR is that it analyzes the vast majority of the 1,985,304 square foot development as general warehouse use, the lowest traffic generating use among the potential uses developable under the PUD zoning proposed for the Project. Consequently, the DEIR fails to comply with CEQA's requirement of a good faith effort to disclose impact. This issue is discussed in detail in the paragraphs that follow.

The Project Includes a Rezone of the Project Site to Planned Unit Development (PD-1) Designation That Permits Different Uses Than Analyzed in the Transportation and Circulation Analysis Section of the DEIR

TRAFFIC • TRANSPORTATION • MANAGEMENT
5311 Lowry Road, Union City, CA 94587 tel: 510.489.9477 fax: 510.489.9478

DEIR page 1-2 states that the proposed Project would require a rezone to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to
Planned Unit Development (P-1). DEIR page 3-7 states as follows: "For the purpose of this EIR, the buildings are assumed to be capable of accommodating a range of light industrial, warehousing, distribution, e-commerce fulfillment, and light manufacturing uses as set forth in the Planned Unit Development." However, the DEIR Transportation and Circulation Analysis Section actually evaluates all but 150,000 square feet[1] (all but 7.56 percent) of the almost 1,985,304 square foot Project as general warehouse use.

General Warehouse Use Is a Considerably Lower Traffic Generating Use than Many of the Uses Permissable in the P-1 Zoning

As noted above, the DEIR states at page 3-7 that the buildings are assumed to be capable of accommodating a range of light industrial, warehousing, distribution, e-commerce fulfillment, and light manufacturing uses as set forth in the Planned Unit Development. The DEIR analyzed 1,835,304 square feet of the Project as warehousing use. However, most of the permissible uses generate traffic at rates considerably higher than the trip generation for warehouse use applied to the vast majority of the Project in the DEIR Transportation and Circulation Analysis Section. The tables below compare the trip generation for uses permissible in the P-1 zoning to those for warehouse use per the Institute of Traffic Engineers ("ITE") authoritative publication *Trip Generation, 10th Edition* relied upon in the DEIR analysis.

TRIP GENERATION RATE COMPARISON

Land Use	Units	Daily Rate	AM Pk Rate	PM Pk Rate
150 Warehousing	1,000 Sq. Ft.	1.74	0.17	0.19
110 Light Industrial	1,000 Sq. Ft	4.96	0.70	0.63
140 Manufacturing	1,000 Sq. Ft	3.93	0.62	0.67
155 E-Commerce Fulfill	1,000 Sq. Ft	8.18	0.59	1.37
156 Hi Cube Parcel Hub	1,000 Sq. Ft	7.75	0.7	0.64

Source: *Trip Generation, 10th Edition.*

As evident in the table, all of these other potential uses in the P-1 zoning generate trips at considerably higher trip rates on daily, AM Peak Hour and PM Peak Hour bases than the warehousing rate employed in the DEIR.

The Trip Generation of Project Uses Permissible in the P-1 Zoning Is Significantly Greater Than That Estimated in the DEIR Analysis

[1] The traffic analysis assumes 150,000 square feet of building area would be an e-commerce fulfillment center but treats only 134,404 square feet of the building as such, assuming that 15,526 square feet within the building is storage that generates no traffic. Whether any area within an e-commerce fulfillment building can be considered non-traffic-generating dead storage is debatable, but relative to the major issues of concern here, this is a minor distraction.

TRAFFIC • TRANSPORTATION • MANAGEMENT
5311 Lowry Road, Union City, CA 94587 tel: 510.489.9477 fax: 510.489.9478

To give clear dimension to the disparity of total and peak period trips between the remaining 1,835,304 square feet of uses assumed in the DEIR as warehouse uses and trips if considered at other use types permissible in the P-1 zoning, the table below compiles the totals at trip generation rates for those other uses as detailed in the table above.

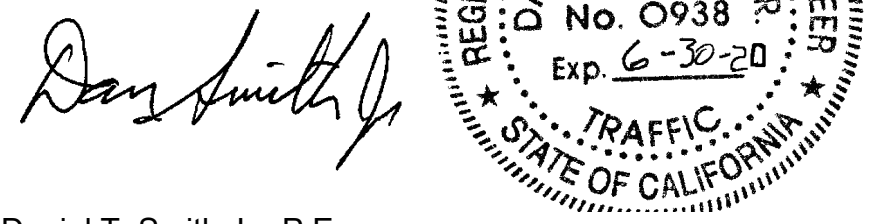
DAILY AND PEAK HOUR TRIP GENERATION COMPARISON

Land Use	Quantity	Daily Total	AM Pk Tot.[2]	PM Pk Tot.
150 Warehousing	1,835.404	3,193	312	349
110 Light Industrial	1,835.404	9,104	1,285	1,156
140 Manufacturing	1,835.404	7,213	1,138	1,230
155 E-Commerce Fulfill	1,835.404	15,014	1.083	2,515
156 Hi Cube Parcel Hub	1,835.404	14,224	1,285	1,175

The table shows that the alternate permissible uses would generate from 4,020 to 11,821 more daily trips than the assumed warehouse use, 771 to 973 more trips in the AM peak hour and 8807 to 2166 more trips in the PM peak hour than the warehouse use assumed in the analysis. While no one of the permissible uses is likely to fill the total 1,845,404 square feet of the Project that is not specified as e-commerce fulfillment in a 150,000 square foot part of the Project, the disparity in trip totals makes clear that:

a) Had a reasonable mix of uses been considered in the analysis, the number of traffic impacts disclosed and/or the severity of impacts would be greater.
b) The DEIR's decision to consider the entire 1,835,404 square feet at the lowest trip generating use permissible in the P-1 zoning is inconsistent with CEQA's demand of a good faith effort to disclose impact.
c) Had the traffic from a more likely mix of uses in the proposed Project been considered, this would have cast the Reduced Footprint Alternative in an even more favorable light.

Conclusion



This concludes my current comments on the Oakley Logistic Center DEIR. I am convinced, for the reasons stated above, that the analysis in the Transportation and Circulation section does not meet the requirements of CEQA and that a revised Transportation and Circulation analysis that considers a logical mix of permissible uses must be performed and the DEIR recirculated in draft status.

[2] We note that the column headings for the AM and PM peak hour trip totals in DEIR Table 4.4-4 are mislabeled. The AM and PM trip totals are actually presented in the columns labeled "Out".

PROFESSIONAL EXPERIENCE

Smith Engineering & Management, 1993 to present. President.
DKS Associates, 1979 to 1993. Founder, Vice President, Principal Transportation Engineer.
De Leuw, Cather & Company, 1968 to 1979. Senior Transportation Planner.
Personal specialties and project experience include:

Litigation Consulting. Provides consultation, investigations and expert witness testimony in highway design, transit design and traffic engineering matters including condemnations involving transportation access issues; traffic accidents involving highway design or traffic engineering factors; land use and development matters involving access and transportation impacts; parking and other traffic and transportation matters.

Urban Corridor Studies/Alternatives Analysis. Principal-in-charge for State Route (SR) 102 Feasibility Study, a 35-mile freeway alignment study north of Sacramento. Consultant on I-280 Interstate Transfer Concept Program, San Francisco, an AA/EIS for completion of I-280, demolition of Embarcadero freeway, substitute light rail and commuter rail projects. Principal-in-charge, SR 238 corridor freeway/expressway design/environmental study, Hayward (Calif.). Project manager, Sacramento Northeast Area multi-modal transportation corridor study. Transportation planner for I-80N West Terminal Study, and Harbor Drive Traffic Study, Portland, Oregon. Project manager for design of surface segment of Woodward Corridor LRT, Detroit, Michigan. Directed staff on I-80 National Strategic Corridor Study (Sacramento-San Francisco), US 101-Sonoma freeway operations study, SR 92 freeway operations study, I-880 freeway operations study, SR 152 alignment studies, Sacramento RTD light rail systems study, Tasman Corridor LRT AA/EIS, Fremont-Warm Springs BART extension plan/EIR, SRs 70/99 freeway alternatives study, and Richmond Parkway (SR 93) design study.

Area Transportation Plans. Principal-in charge for transportation element of City of Los Angeles General Plan Framework, shaping nations largest city two decades into 21'st century. Project manager for the transportation element of 300-acre Mission Bay development in downtown San Francisco. Mission Bay involves 7 million gsf office/commercial space, 8,500 dwelling units, and community facilities. Transportation features include relocation of commuter rail station; extension of MUNI-Metro LRT; a multi-modal terminal for LRT, commuter rail and local bus; removal of a quarter mile elevated freeway; replacement by new ramps and a boulevard; an internal roadway network overcoming constraints imposed by an internal tidal basin; freeway structures and rail facilities; and concept plans for 20,000 structured parking spaces. Principal-in-charge for circulation plan to accommodate 9 million gsf of office/commercial growth in downtown Bellevue (Wash.). Principal-in-charge for 64 acre, 2 million gsf multi-use complex for FMC adjacent to San Jose International Airport. Project manager for transportation element of Sacramento Capitol Area Plan for the state governmental complex, and for Downtown Sacramento Redevelopment Plan. Project manager for Napa (Calif.) General Plan Circulation Element and Downtown Riverfront Redevelopment Plan, on parking program for downtown Walnut Creek, on downtown transportation plan for San Mateo and redevelopment plan for downtown Mountain View (Calif.), for traffic circulation and safety plans for California cities of Davis, Pleasant Hill and Hayward, and for Salem, Oregon.

Transportation Centers. Project manager for Daly City Intermodal Study which developed a $7 million surface bus terminal, traffic access, parking and pedestrian circulation improvements at the Daly City BART station plus

TRAFFIC • TRANSPORTATION • MANAGEMENT
5311 Lowry Road, Union City, CA 94587 tel: 510.489.9477 fax: 510.489.9478

development of functional plans for a new BART station at Colma. Project manager for design of multi-modal terminal (commuter rail, light rail, bus) at Mission Bay, San Francisco. In Santa Clarita Long Range Transit Development Program, responsible for plan to relocate system's existing timed-transfer hub and development of three satellite transfer hubs. Performed airport ground transportation system evaluations for San Francisco International, Oakland International, Sea-Tac International, Oakland International, Los Angeles International, and San Diego Lindberg.

Campus Transportation. Campus transportation planning assignments for UC Davis, UC Berkeley, UC Santa Cruz and UC San Francisco Medical Center campuses; San Francisco State University; University of San Francisco; and the University of Alaska and others. Also developed master plans for institutional campuses including medical centers, headquarters complexes and research & development facilities.

Special Event Facilities. Evaluations and design studies for football/baseball stadiums, indoor sports arenas, horse and motor racing facilities, theme parks, fairgrounds and convention centers, ski complexes and destination resorts throughout western United States.

Parking. Parking programs and facilities for large area plans and individual sites including downtowns, special event facilities, university and institutional campuses and other large site developments; numerous parking feasibility and operations studies for parking structures and surface facilities; also, resident preferential parking .

Transportation System Management & Traffic Restraint. Project manager on FHWA program to develop techniques and guidelines for neighborhood street traffic limitation. Project manager for Berkeley, (Calif.), Neighborhood Traffic Study, pioneered application of traffic restraint techniques in the U.S. Developed residential traffic plans for Menlo Park, Santa Monica, Santa Cruz, Mill Valley, Oakland, Palo Alto, Piedmont, San Mateo County, Pasadena, Santa Ana and others. Participated in development of photo/radar speed enforcement device and experimented with speed humps. Co-author of Institute of Transportation Engineers reference publication on neighborhood traffic control.

Bicycle Facilities. Project manager to develop an FHWA manual for bicycle facility design and planning, on bikeway plans for Del Mar, (Calif.), the UC Davis and the City of Davis. Consultant to bikeway plans for Eugene, Oregon, Washington, D.C., Buffalo, New York, and Skokie, Illinois. Consultant to U.S. Bureau of Reclamation for development of hydraulically efficient, bicycle safe drainage inlets. Consultant on FHWA research on effective retrofits of undercrossing and overcrossing structures for bicyclists, pedestrians, and handicapped.

Re: Response to Comments on the Oakley Logistics Center Project DEIR

Dear Mr. McMurray,

This letter was prepared to summarize my response to the comments on transportation received on the Oakley Logistics Center Project Draft Environmental Impact Report (DEIR). The comments on transportation were received in a letter dated December 4, 2019 from Alex Morris, planning manager for the City of Antioch. The following are responses to the comments.

Response to Comment #1 – This comment mischaracterizes the applicable standards and guidelines while also providing comments that appear to indicate the DEIR and its appendices were not fully reviewed. The comment provides a list of figures and then claims it is "*impossible to check on the reasonableness of the analyses*" without all the figures that are listed. This is simply not true as all of the traffic volumes, lane configurations, and intersection level-of-service calculations that were used in the analysis are presented in the DEIR and its associated technical appendices.

It is important to note that there is no requirement that all of the figures requested in the comment be provided in every traffic study. The Contra Costa Transportation Authority's (CCTA) Technical Procedures and Caltrans Guide to the Preparation of Traffic Impact Studies specify the figures that "*should*" be provided in a TIA. However, in addition to mischaracterizing the list of graphics as critical to the review, the comment is actually also mistaken in claiming that various important graphics were not included in the report. The following evidence proves the comment concludes these figures were not included in the report when, in fact, they actually are included in Appendix G of the DEIR:

1) A detailed figure (Figure A-1) presenting the project trip distribution is actually included as Item #5 of the technical appendices to the transportation impact analysis, which are included in Appendix G of the DEIR.

2) A detailed three-page figure presenting the project trip assignment is actually included as Figure 7 of the transportation impact analysis for the project, which is included in Appendix G of the DEIR.

1875 Olympic Boulevard, Suite 210 • Walnut Creek, CA 94596 • 925.945.0201 • Fax: 925.945.7966

3) Detailed three page figures presenting the "*plus project*" volumes for each scenario (Existing, Baseline, and Cumulative) are actually included as Figures 8, 10, md 11 of the transportation impact analysis, which is included in Appendix G of the DEIR.

4) A complete list of pending and approved projects in the City of Oakley is available on the City of Oakley's website. These projects are all accounted for in the DEIR but there were only 25 of the projects identified that could potentially have a significant effect on the traffic volumes at the project study intersections. In response to this and other comments on this subject, the list of approved projects in Oakley is attached to this letter.

5) A detailed three-page figure presenting the existing plus approved traffic volumes is actually included as Figure 9 of the transportation impact analysis for the project, which is included in Appendix G of the DEIR. There was no difference in the traffic controls or lane configurations between the existing and baseline scenarios so there were no changes that needed to be shown.

6) A detailed three-page figure presenting the cumulative traffic volumes is actually included as Figure 12 of the transportation impact analysis, which is included in Appendix G of the DEIR. The only substantive difference in cumulative conditions was the addition of the City's planned expansion to Main Street from Bridgehead Road to Big Break Road. The resulting cumulative lane configuration assumptions for Main Street are clearly presented in Appendix G of the DEIR in the level-of-service calculations for the intersections along this segment.

Response to Comment #2 –This comment refers to Figure 4.4-7 of the DEIR, which only presents the existing plus project volumes. In this case it must be acknowledged this figure was mistakenly titled as "*Traffic Volumes and Lane Configurations*" when, in fact, this figure was only intended to present the traffic volumes. However, a detailed three-page figure presenting the lane configurations and traffic controls is actually included as Figure 3 of the transportation impact analysis, which is included in Appendix G of the DEIR. This figure correctly shows the existing four westbound approach lanes that were assumed in the analysis for the intersection in question. There are right and left turn lanes but there is currently only two through lanes in the westbound direction. Please note that there used to be three westbound through lanes at this intersection but about three years ago the City restriped this approach to have only two westbound lanes at the time the landscaped median on Main Street was installed.

Response to Comment #3 – The comment mistakenly concludes that truck trips were either not accounted for and/or that documentation was not provided in the EIR. This is not at all true as the Synchro software that implements the Highway Capacity Manual (HCM) methodology allows the user to account for truck traffic in the level of service (LOS) calculations. In fact, at the direction of the City the analysis was ultimately

updated to include very conservative assumptions for this project's truck traffic based data available from ITE on peak hour truck traffic from industrial uses. This can be readily verified in Appendix G of the DEIR in the level-of-service calculations. All of the project access intersections and the adjacent freeway ramp intersections conservatively assumed that 9% of the total traffic volumes would be heavy trucks at these intersections. This is how the analysis ensured that project truck traffic was fully accounted for in the HCM level of service calculations prepared for the DEIR.

Response to Comment #4 – A list showing the projects that were included in the baseline analysis is attached to this letter. Please note the only other significant development accounted for in the cumulative scenario was the River Oaks Crossing Specific Plan, which is adjacent to the project site and is referenced in the TIA in Appendix G of the DEIR. Approved projects in Antioch were reviewed based on the current projects list posted on the City of Antioch's website. Based on a review of the current projects in Antioch and their proximity to the study intersection it was determined that after adding traffic for all the approved projects in Oakley, the effects of nearby approved projects in Antioch could then be sufficiently accounted for with the 1 percent increase in background traffic assumed (for five years compounded, a 5.1% increase). Again, in addition to including traffic from approved and reasonably foreseeable projects, this 5.1% increase was also conservatively applied to all the existing intersection turning movements to develop the volumes for the baseline scenario.

Response to Comment #5 – This comment does not apply the correct Caltrans standards and fails to mention various allowances in the standards for transitions in urban areas. It is important to note that the design details for the improvements to the intersection of Bridgehead Road and Main Street have not been finalized and this improvement is only in the conceptual planning stage. The final details for this improvement will require that all truck turning movements be accommodated, as per City standards. Please note the final design for this improvement could also include reductions to the existing 45 mph speed limit in the vicinity of this intersection. In addition, the possibility of shifting the westbound lanes to the north as part of this improvement (to minimize this westbound transition) is also being evaluated.

Response to Comment #6 – The fact that some of the study intersections are located within the City of Antioch will be noted in the Final EIR.

Response to Comment #7 – It is incorrect to suggest that the City's exacerbation criteria is outdated and cannot continue to be based on an increase to the volume to capacity (V/C) ratio at an intersection. While various standards and LOS calculations may now be based on delay, there are still various versions of the HCM methodology, as well as other software packages, that yield overall volume to capacity ratios. With or without this software, traffic engineers can still readily calculate the overall V/C ratios for the purposes of evaluated the City's established LOS exacerbation criteria. Please note that if there is no change to the capacity of an intersection (i.e. if the lane configuration and traffic controls are unchanged between scenarios) then the resulting change in the

V/C ratio is actually calculated as just the percent increase to the total intersection traffic volumes.

The effective result is that at most of the study intersections in Oakley (except a few under cumulative conditions) the addition of traffic to an intersection that already exceeds the standards is then considered a significant impact if the project would increase the traffic volumes by more than one percent. These types of exacerbation criteria are very common in jurisdictions throughout the Bay Area. The City of Antioch is one of very few jurisdictions that assumes the addition of any traffic to an over capacity intersection is a significant impact. Please note while the comment suggests that Oakley's exacerbation threshold should be based seconds of delay, it is my understanding the City of Antioch itself has no exacerbation criteria based on seconds of delay. Conversely, Page 3-35 of the DEIR for Oakley's General Plan clearly specifies the established exacerbation criteria within the City of Oakley is an increase to the V/C ratio of more than 0.01. This has been agreed upon between the City of Oakley and various consultants on many different traffic studies throughout the City.

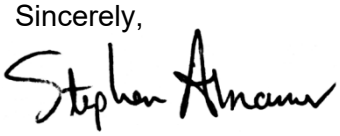
Response to Comment #8 – As noted in the response to comment #7, simply because the analysis methodology is based on a certain metric does not at all mean the City must use that same metric (in this case, the average speed) as the basis for the City's exacerbation criteria. As with intersections, if a roadway segment being analyzed has the same number of lanes before and after the addition of project traffic then the City has agreed with various consultants that a significant impact shall be considered to occur if the project increases the segment volumes by more than one percent (a V/C ratio increase of 0.01). Please refer to response to comment #7 for additional discussion on this issue.

Response to Comment #9 – The proposed traffic impact fee update would need to be approved by City Council but there are conditions being required of the project that indicate the Council's approval of the project would actually help ensure the traffic impact fee update will be completed in a timely manner. Please note the applicant is being required to fund the traffic impact fee update and the City has already selected a consultant for the work and is in the process of finalizing a contract for the update.

Response to Comment #10 – This comment includes several incorrect statements about the TIA's cumulative scenario. Please note the cumulative scenario was developed by increasing the existing traffic volumes (from 2018) by one percent per year to the year 2040. This equates to an increase of 1% percent compounded for 22 years, or an increase of 24.5%. Please note the traffic from approved projects in the baseline scenario was also added into the volumes to develop the cumulative scenario, and this can be readily verified using the figures and LOS calculations provided in Appendix G of the DEIR.

The comment then states: "*One percent per year is very low for a developing area.*" The one percent growth assumption is entirely consistent with the latest Contra Costa County

Travel Demand Model. No evidence has been provided that would indicate the assumptions in the County model should be superseded. While there may be some rural developing areas that have higher growth rates, there is no reason to believe that more than one percent per year should be assumed for this part of eastern Contra Costa County. This is especially true since this growth would be in addition to all the traffic added from the various approved and reasonably foreseeable projects. When evaluated over longer periods of time a one percent per year growth rate can be shown to be reasonable and conservative for the study area. It should also be noted that other jurisdictions in the area often allow the use of a 0.5% growth rate to develop the cumulative base volumes.



The comment also states: "*Why would it be based on existing counts plus incremental growth and ignore the projects that were used to determine the baseline conditions?*" This comment is incorrect. Again, please note that, as per standard practice, the traffic volumes from the baseline projects were indeed included and fully accounted for in the cumulative scenario. The comment also states that the cumulative scenario should be "*either based on existing plus incremental growth or it is based on the County Traffic Model, it can't be based on both*." Again, this is entirely untrue as the volumes can, in fact, be based on both an incremental growth rate *and* the County Traffic Model, as long as the growth rate was developed based on the segment volumes from the model.

It is standard practice to use the segment volumes in the County's model to develop growth rates that can be applied to intersection turning movements to develop more accurate cumulative intersection volumes. The CCTA Technical Procedures are clear about this and state that "*To obtain reasonable intersection turning movements from the model, adjustment of the raw model is required*". In summary, it is common practice to develop a yearly incremental traffic increase from the 2040 model segment volumes for application to intersection turning movements. After this was applied to the existing turning movements (and the traffic from approved projects is included) the resulting segment volumes in the cumulative scenario were then compared to the 2040 segment volumes to verify the TIA volumes were consistent with the County's model. It is important to note that the City of Oakley also has its own detailed Citywide Traffic Model and the City's consultant in charge of the model peer reviewed the TIA's cumulative traffic forecasts and found them to be in conformance to the City's model.

Lastly, the comment also claims that there is no figure presenting the cumulative no project volumes. This is not true and, in fact, a detailed three-page figure presenting the cumulative (without project) traffic volumes is actually included as Figure 11 of the transportation impact analysis for the project, which is included in Appendix G of the DEIR.

Please don't hesitate to contact me if you have any questions about this information.

Sincerely,

Stephen C. Abrams

LEGEND

- DRAINAGE MANAGEMENT AREA (DMA) BOUNDARY
- DMA 1 — DRAINAGE MANAGEMENT AREA (DMA) DESIGNATION
- IMP 1 — INTEGRATED MANAGEMENT PRACTICE (IMP) DESIGNATION
- LOW IMPACT DEVELOPMENT (LID) TREATMENT AREA (BIORETENTION OR FLOW-THROUGH PLANTER)

NOTES:

1. THE PROJECT IS DESIGNED TO COMPLY WITH THE REQUIREMENTS OUTLINED IN THE CONTRA COSTA CLEAN WATER PROGRAM'S (CCCWP) STORMWATER C.3 GUIDEBOOK, 7TH EDITION.
2. THE PROJECT IS EXEMPT FROM HYDROMODIFICATION REQUIREMENTS DUE TO TIDAL INFLUENCE.
3. LID TREATMENT SHALL BE SIZED USING THE CCCWP IMP SIZING CALCULATOR.
4. THE SITE SOIL IS CLASSIFIED AS HYDROLOGIC SOIL GROUP A PER THE USDA WEB SOIL SURVEY.
5. OFFSITE COMPLIANCE: AS DISCUSSED WITH CITY STAFF, THIS PROJECT WILL RECEIVE LID TREATMENT CREDIT FOR THE RETROFIT OF DEL ANTICO BASIN. THE RETROFIT WILL INSTALL 1 ACRE OF BIOTREATMENT AT THE BOTTOM OF THE EXISTING BASIN, EQUIVALENT TO TREATING 25 ACRES OF IMPERVIOUS AREA. THE 25-ACRE CREDIT WILL BE APPLIED TO OAKLEY LOGISTICS CENTER FOR AREAS NOT TREATED ONSITE.
6. DMA'S 1, 42 AND 46 WILL UTILIZE A PORTION OF THE 25-ACRE OFFSITE COMPLIANCE CREDIT FROM THE RETROFIT OF DEL ANTICO BASIN.

PERMITTED USES WITHIN LOGISTICS CENTER AREA

THE FOLLOWING USES, OR USES DETERMINED TO BE SIMILAR BY THE COMMUNITY DEVELOPMENT DIRECTOR, ARE PERMITTED IN THE LOGISTICS CENTER AREA OF THE P–1 LOGISTICS CENTER DISTRICT:

1. ALL USES PERMITTED IN THE LIGHT INDUSTRIAL DISTRICT (L–1) (SEE SECTION 9.1.602.B);
2. FULFILLMENT AND DELIVERY CENTERS;
3. DISTRIBUTION AND LOGISTICS SERVICES WHICH ALLOWS THE PURCHASE, ASSEMBLY, STORAGE, SELLING AND TRANSPORTING OF PRODUCTS;
4. E–COMMERCE USES WHICH SUPPORT THE BUYING AND SELLING OF GOODS OR SERVICES USING THE INTERNET;
5. OUTDOOR LOADING;
6. FLEET VEHICLE STORAGE, CLEANING AND MAINTENANCE;
7. USE OF RAIL TO SUPPORT THE LOGISTICS CENTER AREA; AND
8. ACCESSORY FUELING STATIONS FOR ANY PERMITTED USE.

USES REQUIRING A CONDITIONAL USE PERMIT WITHIN LOGISTICS CENTER AREA

THE FOLLOWING USES ARE PERMITTED IN THE LOGISTICS CENTER AREA OF THE P–1 LOGISTICS CENTER DISTRICT AFTER THE ISSUANCE OF A CONDITIONAL USE PERMIT:

1. ALL USES REQUIRING A CONDITIONAL USE PERMIT IN L–I DISTRICT (SEE SECTION 9.1.602.C).

PERMITTED USES FOR OPEN SPACE AREA

THE FOLLOWING USES, OR USES DETERMINED TO BE SIMILAR BY THE COMMUNITY DEVELOPMENT DIRECTOR, ARE PERMITTED IN THE OPEN SPACE AREA OF THE P–1 LOGISTICS CENTER DISTRICT:

1. ALL USES PERMITTED IN THE DELTA RECREATION DISTRICT (DR) (SEE SECTION 9.1.804.B).
2. STORM DRAIN IMPROVEMENTS AND OTHER SIMILAR IMPROVEMENTS ASSOCIATED WITH DEVELOPMENT OF THE LOGISTICS CENTER AREA.

USES REQUIRING A CONDITIONAL USE PERMIT WITHIN OPEN SPACE AREA

THE FOLLOWING USES ARE PERMITTED ARE PERMITTED IN THE OPEN SPACE AREA OF THE P–1 LOGISTICS CENTER DISTRICT AFTER THE ISSUANCE OF A CONDITIONAL USE PERMIT:

1. ALL USES REQUIRING A CONDITIONAL USE PERMIT IN DR DISTRICT (SEE SECTION 9.1.804.C).

BUILDING HEIGHT

NO BUILDING OR STRUCTURE OR PART OF IT SHALL BE MORE THAN SIXTY FEET (60') HIGH ABOVE THE HIGHEST POINT OF GROUND ELEVATION ON THE LOT ON WHICH THE BUILDING IS ERECTED.

BULK REGULATIONS INCLUDING FRONT, REAR AND SIDE YARD SETBACKS

MAY BE VARIED FOR A SPECIFIC USE OR BUILDING AS PROPOSED BY THE APPLICANT WHEN SO APPROVED.

PARKING

OFF–STREET PARKING AND LOADING AREAS SHALL BE PROVIDED FOR ALL USES WITHIN THE P–1 LOGISTICS CENTER DISTRICT IN ACCORDANCE WITH THE REQUIREMENTS OF THESE REGULATIONS, UNLESS IT IS DETERMINED BY THE CITY THAT OTHER PARKING RATIOS ARE MORE APPROPRIATE FOR A SPECIFIC USE. PARKING SHALL BE PROVIDED ON THE SAME LOT OR PREMISE AS THE MAIN USE IT SERVES UNLESS A PARKING AGREEMENT IS OBTAINED ALLOWING PARKING TO BE SHARED ON THE ADJACENT OR NEAR PARCELS.

Citizen Planning Advisors
Consolidated Comments

Oakley Logistics Center – Development Agreement (DA 01-18), General Plan Amendment (GPA 04-18), Rezone (RZ 08-18), Tentative Map (TM 05-18) and Design Review (DR 12-18)

Several of the five Citizen Planning Advisors (CPA) members submitted comments to Staff by email. Per the CPA guidelines, Staff has consolidated the comments and made them part of the project meeting packet. Comments are verbatim with the exception of formatting and corrected typos. Some comments and questions are similar in nature. Staff has included a section in the project staff report that addresses some of the comments. The staff report does not directly respond to each comment and question.

- I have looked at the plans again. It looks like a good fit for the DuPont site. The concern I have is the impact it may have on traffic, but since the location is near 2 highways (160 and 4), there shouldn't be a problem. It will also bring much needed jobs to the area.

- Can you tell me what streets are facing the access points, I am trying to see how I can draft my comments so the frontage improvements and loading docks don't end up being eyesores from the freeway or incoming Oakley traffic. I am also curious on how the fencing will work in the logistics center parking lots so if the company can surround it by grass in order to detract from such large size industrial buildings.

1. Executive Summary

Overview and Purpose

In September 2019, The City of Oakley (City) contracted with Economic & Planning Systems, Inc. (EPS) to provide a fiscal and economic impact analysis for the proposed Oakley Logistics Center Project (Project). The Project is located on approximately 143 acres in the northwestern portion of the City, adjacent to the City boundary shared with the City of Antioch. The Project is located adjacent to State Route 160, on Bridgehead Road, north of Main Street and the Burlington Northern Santa Fe Railroad. The Project is anticipated to be developed as a logistics center containing a combination of warehousing and trade, truck transportation, wholesale trade, and manufacturing uses in nearly 2 million building square feet. **Map 1** illustrates the preliminary Project development plan in the local context. As the Project is in the process of obtaining entitlements through the City, the purpose of this analysis is to provide the City with information to assist with ongoing Project discussions and negotiations.

The Fiscal Impact Analysis (Fiscal Analysis) examines the Project's estimated, annual net fiscal impact on the City's General Fund budget. Specifically, the Fiscal Analysis estimates whether projected General Fund revenues from the Project, at buildout, will adequately cover the cost of delivering General Fund municipal services (e.g., police protection) to the Project's employees. The Fiscal Analysis is based on the assumption the City will provide all General Fund-funded municipal services to the Project. The Fiscal Analysis is based on existing City conditions as described in the City's Fiscal Year (FY) 2019-20 Annual Budget. In addition, the Fiscal Analysis includes a preliminary estimate of the potential property tax revenues resulting from the Project to the East Contra Costa Fire Protection District (Fire District).

The purpose of the Economic Impact Analysis (Economic Analysis) is to estimate the quantifiable one-time construction and ongoing operational impacts of the proposed Project on the local economy with respect to jobs, income, and total economic output. The economic stimulus generated by the Project will have a multiplying effect throughout the economy as local businesses, consumers, and employees associated with the Project make local expenditures. This Economic Analysis quantifies these impacts using an input/output (I/O) economic modeling system, which measures the change in regional economic activity resulting from a specific economic stimulus. In this Economic Analysis, the local economy is defined as Contra Costa County (County), and the economic impacts measured include the direct contributions of the Project, as well as indirect and induced impacts resulting from Project construction and operations.

The City's Public Works department has also identified a number of project-specific annual costs that are planned to be funded through a new land-secured financing district (a Mello-Roos Community Facilities District (CFD)) to pay for annual maintenance and other services costs that would be incurred by the City. Specifically, the annual special taxes in a new CFD would fund the following annual costs (in 2019 $):

- Street and street lighting, median and corridor landscaping, and stormwater maintenance services ($120,000).
- Regional and Community Parks maintenance services ($164,000).
- Public Safety—law enforcement ($250,000).

Each of these specific cost elements and the results of the Fiscal Analysis and Economic Analysis are summarized in **Table 1**. As shown, and described in more detail in the Summary of Findings below, the Project is anticipated to generate revenues in excess of costs of approximately $388,400 annually at buildout (in 2019 $).

This report describes the results of the Analyses, summarized in this Executive Summary, as well as the methodologies and assumptions used to calculate the fiscal and economic impacts of the Project. The technical analysis, including data, assumptions, and detailed calculations underlying the Analyses, are provided in **Appendices A** through **F**.

Summary of Findings

The results of the Fiscal Analysis and Economic Analysis are summarized below. **Table 2** provides a summary of the surplus or deficit to the City General Fund and Fire District resulting from buildout of the Project as calculated in the Fiscal Analysis. **Table 3** provides a detailed listing of all revenues and expenditures attributed to the Project at buildout. **Table 4** is a summary of one-time and ongoing economic impacts generated by the Project, as estimated in the Economic Analysis.

All results are expressed in constant 2019 dollars and represent the impacts of the Project annually at buildout, with the exception of one-time construction impacts, which occur only during the period of Project development. Additional results and discussions of methodology and assumptions for each analysis are detailed in the Fiscal Analysis and Economic Analysis Methodology and Assumptions chapters, which follow this Executive Summary.

1. ***Buildout of the Project is estimated to yield a net fiscal surplus for the City's General Fund.***

   The Project is estimated to generate a net General Fund surplus of approximately $388,400 annually at buildout. This annual net fiscal impact is based on several assumptions, described further in this report, including the Project's estimated total assessed value at buildout. The Project is anticipated to generate approximately $516,000 in revenue to the City's General Fund plus an additional $250,000 in annual CFD special taxes for law enforcement services. At buildout, the Project is anticipated to will require $377,600 annually to fund ongoing municipal service provisions required to serve the Project. Combined revenue exceeds annual costs by approximately $388,400 annually (in 2019 $).

2. ***Buildout of the Project has the potential to generate significant revenues for the Fire District.***

   Primarily based on estimated property tax revenues to be generated by the Project, the Fire District is anticipated to receive nearly $420,000 in revenues annually resulting from Project development, indicating the potential for the Project to fund ongoing Fire District needs. The Fire District is completing an independent assessment of the costs required to serve the Project, which is not reflected in this analysis.

   Construction of the Project is anticipated to create 725 job years throughout the Projects development period.

   One-time economic impacts are generated by construction and as such are limited to the development period of the construction. Construction impacts are based on the estimated hard construction costs for the proposed Project of $110 million. One-time economic impacts stemming from construction of the Project are estimated to generate total output of $125.5 million (measured in 2019 dollars). It is anticipated that construction of the Project will generate 725 job years over the anticipated construction timeline, including 655 direct and 70 indirect job years.[1]

4. ***At buildout, the Project is anticipated to generate approximately $475.4 million in total economic activity in the County.***

   Ongoing economic impacts are measured on a gross annual impact basis, not accounting for shifts in consumer expenditures from other local alternatives. Based on the anticipated employment in the Project at buildout, approximately $475.4 million in total economic activity (measured in 2019 dollars) is estimated to be generated in the County annually. This level of economic output represents direct, indirect, and induced impacts. The Project is estimated to result in nearly 2,850 full- and part-time jobs in the

[1] Note that the employment figures reported for construction impacts represent total job years lasting over the duration of the Project and could reflect the same job that extends over multiple years. For instance, a general laborer employed for 2 years during construction activity would represent 2 job years.

County as a result of ongoing, annual Project operations, including 1,890 direct (on-site) Project jobs, 490 indirect, and 470 induced jobs. These full- and part-time jobs are estimated to generate approximately $194.2 million in earned employee compensation (wages and benefits).

[1] Includes direct and indirect impacts.
[2] Employment includes both full-time and part-time workers. Job years refer to the number of jobs in each year summed over the entire construction period of the Project.
[3] Includes direct, indirect, and induced impacts of the anticipated land uses within the Project.
[4] Reflects Stabilized Operational employment for the Project assuming a frictional vacancy rate. Refer to Table E-1 for details. Employment includes both full-time and part-time workers.

THIS PAGE INTENTIONALLY LEFT BLANK

2. Fiscal Analysis Methodology and Assumptions

This Fiscal Analysis examines the Project's estimated, annual net fiscal impact on the City's General Fund budget. Specifically, the analysis estimates whether projected General Fund revenues from the Project, at buildout, will adequately cover the cost of delivering General Fund municipal services to the Project's residents and employees. The Fiscal Analysis is based on the assumption the City will provide all General Fund-funded municipal services to the Project.

In addition, the analysis considered the fiscal impact of the Project on the operating budget of the Fire District, and the following section provides a calculation of expected property tax revenues to the Fire District generated by the Project. However, EPS did not complete a full fiscal impact analysis for the Fire District because they are undergoing a districtwide study of fire protection revenues and expenditures, which would impact the assumptions used in this analysis.

The following section describes the methodologies and assumptions used to calculate the fiscal impacts of the Project. The technical analysis, including data, assumptions, and detailed calculations underlying the Fiscal Analysis, are provided in **Appendices A** through **D**.

Fiscal Analysis Results

1. ***Buildout of the Project is estimated to yield a net fiscal surplus for the City's General Fund.***

   The Project is estimated to generate a net General Fund surplus of approximately $388,400 annually at buildout. This annual net fiscal impact is based on several assumptions, described further in this section, including the Project's estimated total assessed value at buildout.

   The Fiscal Analysis estimates the Project will generate about $516,000 in net new annual City General Fund revenues plus an additional $250,000 in annual CFD special tax revenues, and will require about $377,600 in annual City General Fund service costs, as summarized in **Table 1**. **Table 2** provides a detailed line-item listing of City General Fund revenues and expenditures resulting from buildout of the Project. These net fiscal impacts are based on a total Project occupancy level of about 96 percent, representing an average annual frictional vacancy rate of 4 percent.

2. ***Buildout of the Project is estimated to generate significant revenues to the Fire District.***

   Primarily based on property tax revenues generated, the Project is anticipated to generate $420,000 in revenues annually to the Fire District.

Methodology and Assumptions

This section details the underlying methodology and assumptions used to estimate the fiscal impact of the Project on the City. It describes assumptions concerning municipal service delivery, land development, and General Fund budgeting. In addition, it details the methodology used to forecast the Project's General Fund revenues and municipal service expenditures at buildout. The municipal services analyzed in this Fiscal Analysis comprise General Fund services only. The Fiscal Analysis excludes any services that may be funded privately, such as common area maintenance costs. Further, this Fiscal Analysis does not address activities budgeted in other City Governmental Funds or Proprietary Funds (e.g., enterprise funds), nor does it include an evaluation of capital facilities or the funding of capital facilities needed to serve new development.

General Assumptions

The Fiscal Analysis is based on the City's Adopted Budget for FY 2019–20, estimated citywide residential and employment populations as of 2019, tax regulations and statutes current as of December 2019, and other general assumptions discussed herein. Each revenue item is estimated based on current State of California (State) legislation and current City practices. Future changes by either State or City legislation or practices may affect the revenues and expenditures estimated in this Fiscal Analysis. All costs and revenues are shown in constant 2019 dollars. General fiscal and demographic assumptions are detailed in **Table A-1** in **Appendix A**.

EPS consulted the City's budget documents to develop forecasting methodologies for specific revenues and expenditures affected by new development in the proposed Project. In addition, EPS consulted with City staff to clarify budget data and review assumptions. This Fiscal Analysis also uses information from the following sources: Project Applicant, Toyer Strategic Consulting, County Assessor and Auditor-Controller, State Department of Finance (DOF), State Board of Equalization (BOE), the U.S. Bureau of Labor Statistics (BLS), and subscription-based data sources (e.g., CoStar).

The actual fiscal impacts of new development in the Project will vary from those presented in this Fiscal Analysis if development plans or other assumptions (e.g., assessed valuations, sales tax revenue assumptions) differ from those presented in this Fiscal Analysis.

Development Assumptions

Listed below are summaries of land use and other development-related assumptions used in this Fiscal Analysis:

- **Land Use:** The Project is proposed to accommodate warehousing, distribution, and light industrial uses, based on information provided by the City and Toyer Strategic Consulting. Gross and occupied land uses and nonresidential square feet are shown in **Table A-3** in **Appendix A**.
- **Estimated Population:** As the Project is completely made up of commercial uses, there is no new residential population that will be generated. Employment estimates are based on an assumed employment density for each nonresidential land use. Toyer Strategic Consulting provided an average employment density assumption for the Project of 1,040 square feet per employee, which is in line with industry standard assumptions for industrial employment density. In estimating certain annual revenues and expenditures (service demands) related to the Project, EPS developed a "persons-served" population estimate to approximate the impacts of an employee in the Project relative to a Project resident. EPS uses a factor of 0.5 employees plus all residents to derive the Project's persons-served population. **Table A-3** in **Appendix A** shows the estimated residents, employees, and persons served generated by the Project.
- **Assessed Value:** This Fiscal Analysis relies on the Project's estimated assessed value to calculate property tax revenue to the City's General Fund. The Project's assessed value is based on the parcel's estimated land value and the value of vertical construction (secured property), as well as the value of business equipment in the buildings that would be subject to personal property tax (unsecured property). The Project's estimated secured and unsecured property values are based on estimates from Toyer Strategic Consulting, as well as EPS analysis of comparable developments in Contra Costa, Sacramento, San Joaquin, and Stanislaus Counties. The assessed values for Project land uses are assumed to remain static in 2019 dollars—real growth in assessed value is not estimated. The estimated assessed values are presented in **Table A-2** in **Appendix A**.
- **Property Turnover Rates:** Typically, fiscal impact analyses are based on an assumed average annual turnover rate of land uses at rates specific to each land use. As properties transfer ownership, a real property transfer tax is levied, generating Real Property Transfer Tax revenue for a city's General Fund. This Fiscal Analysis is based on an assumed 5 percent turnover rate for the Project, which is standard for industrial land uses. The estimated Transfer Tax revenue is presented in **Table B-4** in **Appendix B**.

General Fund Assumptions

This Fiscal Analysis considers only discretionary General Fund revenues that will be generated by the Project. Offsetting revenues, based on the City's Adopted Budget and vetted by City Finance Department staff, are General Fund revenues dedicated to offset the costs of specific General Fund department functions and are excluded from this Fiscal Analysis for both revenue and cost estimates. Offsetting revenues are shown in **Table C-3** in **Appendix C**, and indicated in **Table B-1** in **Appendix B** and **Table C-1** in **Appendix C**. These revenues include grants and assessments used to supplement General Fund expenditures on the Police Department and fees charged to new development that offsets costs in the Planning, Building, and Public Works departments related to those development projects. The City was not able to provide an exact allocation of developer fees to each department; as an alternative, EPS allocated the fee revenues proportionally to each department relative to their total expenditures.

In addition, this Fiscal Analysis excluded revenue sources that are not expected to increase because of new development. Similarly, departmental costs not expected to increase because of new development are excluded from this Fiscal Analysis.

General Fund Revenue-Estimating Methodology

EPS used either an average-revenue approach or a marginal-revenue case-study approach to estimate Project-related General Fund revenues:

- The **average-revenue approach** uses the City's FY 2019-20 budgeted revenue amounts on a citywide per capita or per-persons-served basis to forecast revenues derived from estimated Project persons served.[2]
- The **marginal-revenue case-study approach** simulates actual revenue generation resulting from new development. The case-study approach for estimating sales and use tax revenues, for instance, forecasts market demand and taxable spending from the Project's new residents and employees. Case studies used in this Fiscal Analysis are discussed in greater detail later in this section.

Revenue sources *not* expected to increase as a result of development are excluded from this Fiscal Analysis. These sources of revenue are not affected by development because they are either one-time revenue sources not guaranteed to be available in the future or there is no direct relation between Project development and increased revenue.

[2] A *per capita* basis of estimating revenues is based on the assumption only residents have a fiscal impact on City revenues, which would therefore not be impacted by the Project. A *per-persons-served* basis of estimating revenues is used to take into account that businesses (and their employees) have a fiscal impact on many City revenues but at a lower level than residential development's impact.

A listing of all City General Fund revenue sources and the corresponding estimating procedure used to forecast future Project revenues is shown in **Table B-1** in **Appendix B**. A summary of estimated annual General Fund revenues generated by the Project is provided in **Table B-2**. As shown, the Project is estimated to generate nearly $516,000 in annual General Fund revenues at buildout. Property tax revenue, estimated at $199,000 (38.5 percent of total estimated revenue), is the largest source of revenue. Property tax in lieu of vehicle license fees, estimated at approximately $198,000, is the second largest source of Project-generated revenue, accounting for 38.4 percent of total estimated Project revenues.

This Fiscal Analysis also calculated property tax revenues generated by the Project that would be collected by the Fire District. These revenues are estimated to be approximately $419,000 annually.

Average-Revenue Categories

An average revenue multiplier was used to estimate business license taxes and franchise fees. These sources were estimated using a per-persons-served revenue multiplier. Use of this methodology is based on EPS's previous experience in forecasting these revenue sources.

Marginal-Revenue Categories

Property Tax

Estimated annual property tax revenue resulting from development in the Project is presented in **Table B-3** in **Appendix B**. The property taxes the City will receive are derived from the estimated assessed secured and unsecured property values of the Project, shown in **Table A-2** in **Appendix A**, and the City General Fund's post-Educational Revenue Augmentation Fund (ERAF) share of the 1 percent ad valorem property tax rate, shown in **Table D-1** in **Appendix D**. The total assessed value represents the Project's estimated land value, estimated value of Project improvements at buildout, and estimated value of the Project's business equipment, or unsecured property, that would be subject to personal property tax. The entire Project is assumed to be subject to property tax. In this analysis, the estimated assessed values for Project land uses are assumed to remain static in 2019 dollar values; real growth is not estimated.

Property Tax in Lieu of Vehicle License Fee

The Fiscal Analysis uses a formula provided by the State Controller's Office to forecast Property Tax in Lieu of Vehicle License Fees (PTIL VLF). PTIL VLF is calculated by taking the percentage increase in the City's assessed value resulting from the Project's assessed value and applying that percentage increase to the City's current State allocation of PTIL VLF revenue, as shown in the City's FY 2019-20 budget. This calculation of PTIL VLF based on the Project's estimated assessed values is shown in **Table B-3** in **Appendix B**.

4611

Real Property Transfer Tax

Real property transfer tax is based on the assessed value of the Project's land uses and the anticipated turnover of properties over time. This Fiscal Analysis is based on the assumption the property will turn over approximately every 20 years, which is a standard assumption for industrial uses. The calculation of real property transfer tax generated by the Project is shown on **Table B-4** in **Appendix B**.

Sales Tax

Sales tax revenue is based on estimated taxable sales and the Bradley-Burns local 1 percent Uniform Local Sales Tax rate as summarized in **Table B-5** in **Appendix B**. EPS uses a combination of methodologies to account for taxable sales generated by the Project:

1. **Market Support Method**—This methodology measures taxable sales generated from new Project employees spending money within the City's boundaries.
2. **Business-to-Business Taxable Sales Method**—This approach measures direct taxable sales from new nonretail nonresidential uses in the Project.

Annual Taxable Sales from New Market Support

Based on estimates gleaned from the 2012 International Council of Shopping Centers' Office-Worker Spending in a Digital Age report, Project employees are estimated to spend an average of $10 in taxable retail expenditures per day for each of the 240 work days annually. This Fiscal Analysis estimates the City will capture approximately 50 percent of taxable expenditures from the Project's employees. EPS estimated this capture rate based on a qualitative appraisal of existing shopping opportunities near the Project.

Refer to **Table B-5A** in **Appendix B** for estimated annual taxable sales from market support at buildout of the Project.

Direct Annual Taxable Sales from Nonretail Uses (Business-to-Business Taxable Sales)

EPS estimates that approximately half of the uses at the Project—specifically, those involved in manufacturing and wholesale trade—would generate annual sales tax revenue from the point-of-sale transactions of taxable goods and services. EPS assumed an annual taxable sales-per-square-foot assumption of $5 per square foot of industrial space, based on research and previous analysis of industrial developments, and applied that assumption to 50 percent of the Project square footage. The estimated annual business-to-business taxable sales from Project development at buildout are shown in **Table B-5B**.

Expenditure-Estimating Methodology

Expenditure estimates are based on the City's FY 2019-20 budget and supplemental information from City staff. This Fiscal Analysis shows estimates of General Fund expenditures to the Project. General Fund department expenditures that are expected to be affected by the Project are forecasted using either an average-cost approach or a marginal-cost case-study approach:

- The **average-cost approach** uses the City's FY 2019-20 budgeted expenditures on a citywide per capita or per-persons-served basis to forecast expenditures required to serve new development.
- The **marginal-cost case-study approach** simulates estimated expenditures required to serve new development. For this Fiscal Analysis, police department expenditures are estimated using a case-study approach and are described later in this section.

A listing of all City General Fund expenditures and the corresponding estimating procedure used to forecast future Project expenditures is shown in **Table C-1** in **Appendix C**. A summary of estimated annual General Fund expenditures required to serve the Project at buildout is provided in **Table C-2**. As shown, the Project is estimated to result in about $377,600 in annual General Fund costs at buildout. Police is the largest expenditure category, with estimated annual expenditures of $250,000, about 66 percent of the expenditures generated by the Project.

Average-Cost Expenditures

Animal Control, Community Outreach, and Recreation expenditures are estimated using a per capita average cost multiplier because these services are generally demanded by residential development only. The Project is not estimated to have an impact on expenditures by these departments.

Expenditures that are affected by residents and employees are projected using a per-persons-served average cost multiplier. These expenditures include General Government (including City Council, City Clerk, City Attorney, City Manager, Finance, Human Resources, Building Maintenance, and IT), Economic Development, Building and Code Enforcement, Planning, and Public Works expenditures.

An adjustment factor is applied to the average-cost multipliers for all categories to reflect the percentage of expenditures subject to increases, based on new development of singular projects. This adjustment factor was based on EPS's experience working in other cities and vetted by City staff. The adjustment factor for most General Government expenditures is 75 percent, with the exception of Building Maintenance and Non-Departmental expenditures, for which EPS used an adjustment factor of 25 percent. The adjustment factor for Economic Development expenditures is also 75 percent. No adjustment factors were applied to the remaining departments.

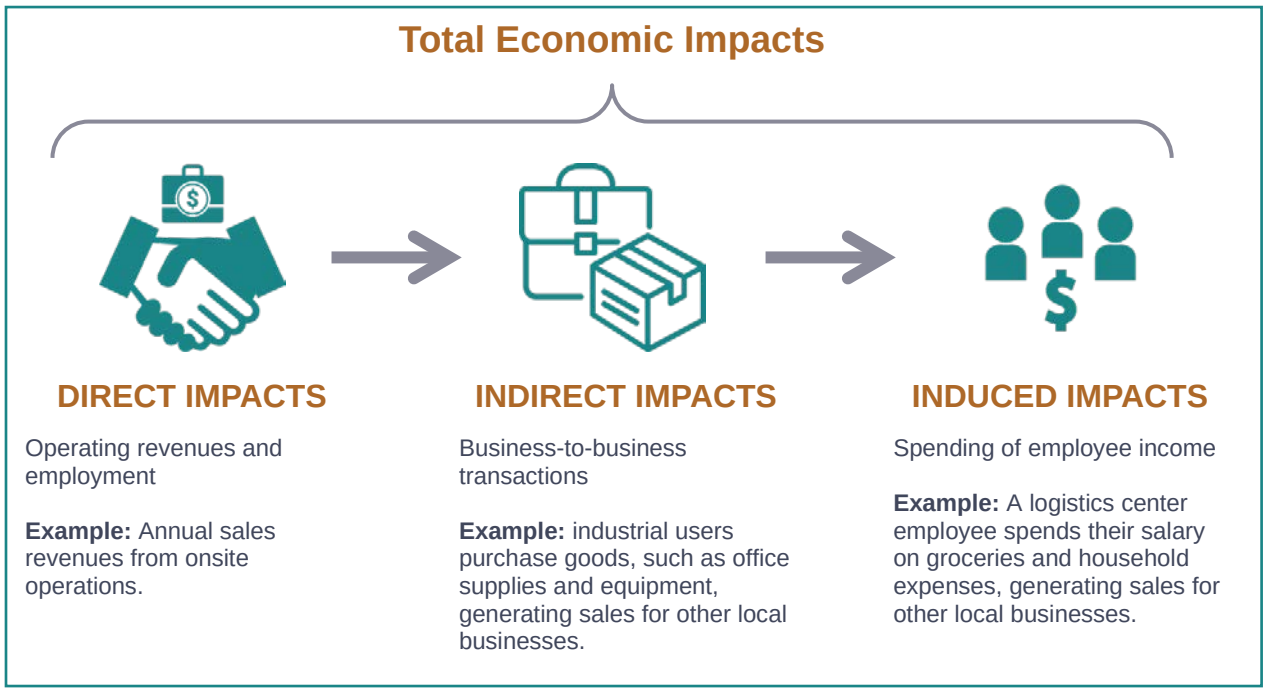
4613

Marginal-Cost Case-Study Expenditures

Expenditures for the police department were estimated based on information provided by the Oakley Police Department. The department anticipates the need to hire an additional police officer to adequately serve the Project, and the expenditure of $250,000 represents the annual cost of the additional officer.

Technical Appendices

The technical calculations used in this Fiscal Analysis are shown in **Appendices A** through **D** (**Tables A-1** through **D-1**):



- **Appendix A** indicates the general assumptions used in this Fiscal Analysis, proposed land uses and densities for the Project, and projected assessed value of the Project.
- **Appendix B** identifies the projected revenues that will be generated by the Project for the City's General Fund and the projected property taxes that will be generated by the Project for the Fire District.
- **Appendix C** details the estimated expenditures for the City to provide General Fund services to the Project. It also shows the offsetting revenue analysis, which allocates dedicated General Fund revenues to General Fund department functions.
- **Appendix D** shows the distribution of the Project's property tax among taxing agencies, which serves as the basis for calculating property tax revenues allocated to the City and the Fire District.

3. Economic Analysis Methodology and Assumptions

In addition to the Fiscal Analysis described previously, EPS prepared an Economic Analysis of the Project. The purpose of this Economic Analysis is to estimate the quantifiable one-time construction and ongoing operational impacts of the proposed Project on the local economy with respect to jobs, income, and total economic output. The economic stimulus generated by the Project will have a multiplying effect throughout the economy as local businesses, consumers, and employees associated with the Project make local expenditures. This Economic Analysis quantifies these impacts using an I/O economic modeling system, which measures the change in regional economic activity resulting from a specific economic stimulus.

In this Economic Analysis, the local economy is defined as the County, and the economic impacts measured include the direct contributions of the Project, as well as indirect and induced impacts resulting from Project construction and operations. **Figure 1** illustrates the activities captured by this Economic Analysis.

Figure 1 Economic Impact Analysis

Source: EPS.

4615

Economic Analysis Results

Table 4 summarizes the estimated one-time construction impacts and ongoing annual direct, indirect, and induced impacts generated by the Project in the County.[3] As shown, construction of the Project is anticipated to generate $125.5 million in one-time economic impacts, supporting 725 jobs. On an annual ongoing basis, Project operations are anticipated to generate $475.4 million annually in total economic impacts, supporting 2,846 new jobs in the County.

Detailed Economic Analysis Findings and Assumptions

The following section provides the detailed results of the Economic Analysis, as well as the assumptions used to calculate each impact.

One-Time Construction Impacts

Impacts associated with construction of the Project through buildout are measured on a one-time basis. Construction activity generates a short-term burst of economic activity that dissipates once construction is complete. One-time impacts include the value of new construction, improvements to existing infrastructure, employment created, and income earned during Project construction. Duration of one-time impacts is limited to the development period of the Project. One-time economic impacts are calculated based on the anticipated Project hard construction costs, excluding soft costs. Soft costs are excluded because these costs are considered to be indirect costs and as such are included in the indirect one-time impacts of the Project. Based on information provided by the Project Applicant in the report titled "Economic Impacts Review of the Oakley Logistics Center" completed by Toyer Strategic Consulting, LLC, dated November 9, 2019, it is estimated that construction of the Project will incur approximately $110 million in hard construction costs.

The section below details the one-time economic impacts results for construction of the Project.

[3] This Economic Analysis estimates the economic impacts of the proposed Project in the County, although all direct impacts, and a portion of indirect and induced impacts, are estimated to occur in the City.

One-Time Project Construction

Table 5 details the estimated one-time economic impacts associated with construction of the Project. The resulting impacts are described below:

- **Annual Output:** Construction operations are estimated to generate approximately $110.0 million in direct one-time industry output in the County. Local spending will result in $15.5 million in indirect one-time impacts for a total one-time industry output impact of $125.5 million.
- **Employee Compensation:** Of the $110.0 million in direct industry output reported above, approximately $54.3 million will be received by construction employees in the form of salary, wages, and benefits. Indirect employee compensation impacts total approximately $5.5 million, for a total annual employee compensation impact of approximately $59.7 million.
- **Annual Employment:** The 655 direct job years support approximately 70 indirect job years for a total employment impact of approximately 725 job years. Employment includes both full-time and part-time workers. Job years refers to the number of jobs in each year summed over the entire estimated period of construction of the Project. For example, a single worker employed for 2 years would equate to 2 job years.

Ongoing Operations

This report estimates the ongoing economic impacts occurring annually as a result of Project operations in the County. Ongoing economic impacts capture the direct, indirect, and induced impacts generated by the combination of businesses located in the Project. Impacts associated with these economic activities are estimated based on employment estimates. Total employment estimates are based on information provided by the City and the Project Applicant. Using provided employment data and average employment densities for logistics center land uses, EPS assumes that of the 2014 estimated Project employees, 500 employees would be in the trucking industry. Because of the transient nature of the trucking industry, EPS has made a conservative assumption that 25 percent of all trucking employees will be coming from outside the County. Because the I/O modeling calculates annual impacts assuming all employees are located within the County, EPS has excluded the estimated out-of-County employment from this analysis. **Table E-2** in **Appendix E** estimates total Full-Time Equivalents (FTEs) generated by the Project.

Ongoing Project Operations

Table 6 summarizes the total estimated annual ongoing impacts associated with Project operations, including both logistics centers and trucking employment. The resulting impacts are described below:

- **Annual Output:** Project operations are estimated to generate approximately $307.5 million in direct industry output annually. Local spending will result in approximately $91.0 million in indirect industry output impacts and $76.8 million in induced impacts annually for a total industry output impact of $475.4 million on an annual basis.
- **Employee Compensation:** Of the $307.5 million in direct industry output reported above, approximately $134.3 million will be received by employees employed in the Project in the form of salary, wages, and benefits. Indirect and induced employee compensation impacts total approximately $59.9 million for a total annual employee compensation impact of approximately $194.2 million.
- **Annual Employment:** The 1,889 direct County jobs will generate approximately 488 indirect and 469 induced jobs annually for a total employment impact of approximately 2,846 jobs on an annual basis.

Tables F-1 and **F-2** in **Appendix F** show the detailed annual economic impacts of the logistics center uses and trucking employment, respectively.

[3] Includes employee compensation, proprietors income, and other income (profits, rents, and royalties).
[4] Reflects stabilized operational employment Project. Employment includes both full-time and part-time workers.

Economic Impact Modeling Framework

The Economic Analysis uses an I/O modeling framework to quantify the Project's one-time and ongoing contributions to countywide output, employment, and labor income. The I/O modeling framework is premised on the concept that industries in a geographic region are interdependent in the sense that they purchase output from and supply input to other industries. This regional economic analysis relies on IMPLAN (Impact Analysis for Planning) software, an I/O model that draws on data collected by the IMPLAN Group, LLC, from several state and federal sources, including the Bureau of Economic Analysis, the BLS, and the Census Bureau. The model is used widely for estimating economic impacts across a wide array of industries and economic settings.

Regional economic impact analysis and I/O models in particular provide a means to estimate total regional effects stemming from a particular industry. Specifically, I/O models produce quantitative estimates of the magnitude of regional economic activity resulting from some initial activity (e.g., business operations or building construction). I/O models rely on economic "multipliers" that mathematically represent the relation between the initial change in one sector of the economy and the effect of that change on economic output, income, or employment in other local industries. These economic data provide a quantitative estimate of the magnitude of shifts in jobs and revenues in the regional economy.

Economic impacts using an I/O model are based on an initial change in output or employment in a specific industry sector. The model then translates the initial change into changes in demand for output from other interdependent sectors, corresponding changes in demand for inputs to those sectors, and so on. These effects commonly are described as direct, indirect, or induced and generally are defined as follows:

- The **direct** effect represents the change in output or employment attributable to a certain economic activity. In this case, the business located in the logistics center, including logistics center and trucking uses and the entities directly receiving spending related to the building construction project (e.g., construction contractors, equipment vendors, and consultants).
- The **indirect** effect results from industry-to-industry transactions required to satisfy the direct effect. This effect is a measure of the change in the output of suppliers linked to the industry that is directly affected. For example, a light manufacturer purchases numerous goods from County suppliers, including office supplies, equipment, and other services.
- The **induced** effect consists of impacts from employee spending in the local economy. Specifically, the employees of directly and indirectly affected businesses generate this effect by purchasing goods and services in the local economy. For instance, employees of these businesses spend their paychecks

on household needs such as groceries, retail purchases, health care, or mortgage or rent payments, all of which are considered to be induced effects.

The total impact is the sum of the direct, indirect, and induced effects. The total effect measures the impact of an activity as it "ripples" throughout the regional economy. For this Economic Analysis, the regional economy is defined as the County. IMPLAN generates a model of the industrial structure and household profile for the County economy, which in turn determines the extent to which spending is captured and recirculated in the local economy rather than being allowed to leak outside the County. In the following sections, the regional economic effects described above are reported in three categories:

- **Annual Output:** Annual output measures the value of goods and services produced in the County as a result of business operations. Projected employment estimates were used to estimate ongoing annual output of the various uses in the Project. Construction hard costs were used to estimate one-time construction impacts.
- **Employment:** Employment estimates the total number of jobs, both full-time and part-time, created as a result of project operations. Employment is reported in job years. Construction employment represents total job years over the life of the project (1 job lasting 2 years would be reported as an employment impact of "2").
- **Labor Income:** Labor income reflects the estimated amount of direct, indirect, and induced annual employment income (salaries, wages, and benefits) resulting from the associated employment. It is important to note that labor income is a component of industry output and is not an additive economic impact.

I/O Modeling Considerations

The current IMPLAN dataset relies on I/O relations derived from 2017 (the latest available data from IMPLAN). As no significant structural changes have occurred in the regional economy since 2017, EPS believes this provides an accurate and reasonable approximation of current conditions.

All economic impacts depicted in this Economic Analysis reflect gross impacts. As such, the economic impacts do not account for potential shifts in resources or shifts in consumer expenditures from other local alternatives. The I/O methodology is based on the assumption that an industry's demand for goods and services results in a corresponding increase in supply and therefore employment. This implies that key industry suppliers can increase output rather than shift output from one set of consumers or products to another. This assumption may not hold in areas with tight labor or capital markets because companies may find it difficult to obtain these inputs or other resources necessary to expand production. In these cases, accommodating an establishment's demand for labor

and other inputs may come at the expense of other establishments in the same or related sectors or may need to be satisfied by increased imports from outside the study area. This phenomenon often is referred to as "crowding out" because the stimulated sector tends to crowd out other sectors, which can reduce the net economic gain.

Technical Appendices

The technical calculations used in this Economic Analysis are shown in **Appendices E** through **F** (**Tables E-1** through **F-3**):

- **Appendix E** includes the proposed land use and employment assumptions used in this Economic Analysis.
- **Appendix F** identifies the detailed annual economic impacts of the logistics center uses and trucking employment, respectively.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF OAKLEY CERTIFYING THE OAKLEY LOGISTICS CENTER PROJECT ENVIRONMENTAL IMPACT REPORT (SCH. NO. 2019029113), MAKING CERTAIN FINDINGS CONCERNING MITIGATION MEASURES, ADOPTING A MITIGATION MONITORING AND REPORTING PROGRAM, MAKING FINDINGS CONCERNING ALTERNATIVES, AND ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS

Section 1. Background

WHEREAS, the City of Oakley (the "City") prepared a Draft Environmental Impact Report for the Oakley Logistics Center Project (collectively, the "EIR"), which involves the development of five buildings ranging in size from 150,000 square feet (sf) to 642,960 sf for a total of approximately 2.0 million sf.

The subject property is site of the former DuPont Chemical Plant that produced chlorofluorocarbons, fuel additive anti-knock compounds (AKCs) and titanium dioxide between 1956 to 1997. The facility was demolished in 1999, less two dilapidated buildings and some remnant utility infrastructure. The site has been undergoing remediation and cleanup work for soil and groundwater contamination. The site is highly disturbed from its previous use as a chemical plant and as a result of the remediation efforts.

The Project would include demolition of the existing structure and utility remnants and construction of the proposed buildings over two phases. Specific uses for the proposed buildings would be subject to site-specific development standards in the proposed Planned Unit Development. Access to the project site would be provided by a main entrance located at the intersection of Wilbur Avenue and Bridgehead Road and two secondary access points on Bridgehead Road. The Project would include the widening of Bridgehead Road from the site boundary with the PG&E property to the south, north to the site boundary with the Lauritzen Yacht Harbor storage property. Furthermore, Wilbur Avenue would be extended eastward by approximately 1,170 feet into the project site. Both the widened portion of Bridgehead Road as well as the extension of Wilbur Avenue would be dedicated to the City as public roadways, along with A Street, B Street, C Street, and D Street within the project site. Additional off-site improvements associated with the Project would include construction of a new sewage pump station at Wilbur Avenue, a new six-inch force main within Bridgehead Road, and improvements at the existing Bridgehead Pump Station and Bridgehead Force Main.

The Project requires the following discretionary approvals from the City: General Plan Amendment, Rezone, Vesting Tentative Map, Final Development Plan, Design Review, Development Agreement, and Tree Removal Permit.

WHEREAS, the EIR addresses the potential environmental effects associated with the Project.

WHEREAS, the findings, recommendations, and a statement of overriding considerations set forth below (the "Findings") are adopted by this City of Oakley City Council as the City's findings under the California Environmental Quality Act ("CEQA") (California Public Resources Code sections 21000-21177.) and the CEQA Guidelines (California Code of Regulations, title 14, sections 15000-15387) relating to the Project. The Findings provide the written analysis and conclusions of this City Council regarding the Project's environmental impacts, mitigation measures, alternatives to the Project, and the overriding considerations, which, in this City Council's view, justify approval of the Project, despite its environmental effects.

WHEREAS, on February 20, 2019, the City published a Notice of Preparation for the Project, which identified potentially significant environmental impacts attributable to the Project, on which basis the City determined that an EIR was required; and

WHEREAS, the Notice of Preparation provided notice of the City's determination, and solicited public input on the proposed scope and content of the EIR for the Project; and

WHEREAS, on March 6, 2019, the City held a public scoping meeting to receive public comments on the scope and content of the EIR; and

WHEREAS, a Draft EIR with Technical Appendices, and Notice of Availability, was prepared by the City of Oakley and released for public review on October 16, 2019; and

WHEREAS, the Draft EIR was available for public comment for a period of at least 45 days as required by Section 21091 of CEQA, the close of the public comment period being December 3, 2019; and

WHEREAS, during the public comment period the City received six letters commenting on the Draft EIR; and

WHEREAS, the City prepared the Final EIR, which included written responses to the comments received on the Draft EIR, pursuant to Section 15089 of the CEQA Guidelines; and

WHEREAS, the Final EIR and Draft EIR make up the Oakley Logistics Center Project EIR; and

WHEREAS, the Final EIR was distributed and made available to the public at City Hall and on the City website on December 12, 2019, and consists of the Draft EIR, a list of commenters, copies of all written comments received, responses to those comments that raise environmental issues, and any revisions to the text of the Draft EIR made in response to the comments, as required by Section 15132 of the CEQA Guidelines; and

WHEREAS, the project under consideration would include approval of the following:

- General Plan Amendment (GP 04-18) to amend the land use designation of the 143.3-acre project site from Light Industrial(LI)/Business Park (BP)/Utility Energy (UE) to Light Industrial (LI) with the remainder of the subject property being Delta Recreation (DR), and to remove the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the General Plan;

- Rezone (RZ 08-18) to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to Planned Unit Development (P-1);

- Vesting Tentative Map (TM 05-18) to create eight parcels within the 375.7-acre subject property;

- Final Development Plan pursuant to Section 9.1.1002 of the City of Oakley Municipal Code establishing standards and conditions, including permitted and conditional uses, for the site and remainder area;

- Design Review (DR 12-18) to review and analyze the project's design, including site plans, architectural elevations, conceptual landscape plans, and other physical development;

- Development Agreement (DA 01-18) between the City of Oakley and the project applicant; and

- Tree Removal Permit accordance with Section 9.1.1112 of the City of Oakley Municipal Code.

WHEREAS, CEQA requires that, in connection with the approval of a project for which an EIR has been prepared which identifies one or more significant environmental effects, the decision-making agency make certain findings regarding those effects; and

WHEREAS, the EIR identifies potentially significant environmental impacts and related mitigation measures and a Mitigation and Monitoring Plan has been prepared; and

WHEREAS, the EIR also identifies potentially significant environmental impacts that cannot be avoided by mitigation and for which the City must adopt a Statement of Overriding Considerations pursuant to CEQA; and

WHEREAS, the EIR reflects the City's independent judgment and analysis on the potential for environmental impacts; and

WHEREAS, the Draft EIR and Final EIR are separately bound documents, incorporated herein by reference, and are available for review in the City's Planning Division; and

WHEREAS, the City Council has received and considered the Project EIR, made up of the Draft EIR and Final EIR, for the Oakley Logistics Center Project (SCH No. 2019029113), that analyzed the potential environmental effects of the Project; and

WHEREAS, on December 17, 2019 the City Council held a duly noticed public hearing on the Project, including the Draft EIR and Final EIR (Project EIR), and the Project's requested entitlements (GP Amendment, Rezone, Vesting Tentative Map, Final Development Plan, Design Review, Development Agreement, and Tree Removal Permit), at which time all interested persons and parties had the opportunity to be heard; and

WHEREAS, if any term, provision, or portion of these Findings or the application of these Findings to a particular situation is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions of these Findings, or their application to other actions related to the Project, shall continue in full force and effect unless amended or modified by the City.

Section 2. Findings

NOW, THEREFORE, BE IT FURTHER RESOLVED that the City of Oakley City Council make the following findings:

***Changes to Mitigation Measures*.** As described in Chapter 3 of the Final EIR (Revisions to the Draft EIR Text) and in the responses to comments, Mitigation Measures 4.1-1(a), 4.1-5(c) and V-1 have been modified. The modification to Measure 4.1-1(a) corrects a typographical error by adding a word for clarification. Mitigation Measure 4.1-5(c) was modified to add more specific recommendations. Lastly, Mitigation Measure V-1, as seen in the MMRP of the Final EIR, has been edited to include more information regarding the protocol to follow if buried cultural resources are encountered. The aforementioned additions to these measures will not result in a new significant impact or a substantial increase in the severity of a previously disclosed environmental impact. Therefore, in accordance with CEQA and the CEQA Guidelines, no recirculation of the EIR is necessary based on changes or additions to the mitigation measures in the Final EIR.

***Other Changes*.** Various minor changes and edits have been made to the text and tables of the Draft EIR, as described in the Final EIR. These changes are generally of an administrative nature such as correcting typographical errors, making minor adjustments to the data, and adding or changing certain phrases to improve readability. The City Council finds that these changes are of a minor, non-substantive nature and do not require recirculation of the EIR. In addition to the changes and corrections described above, the Final EIR provides additional information in response to comments and questions from agencies and the public. The City Council finds that this additional

information does not constitute significant new information requiring recirculation, but rather that the additional information clarifies or amplifies an adequate EIR.

Differences of Opinion Regarding the Impacts of the Project: In making its determination to certify the Final EIR and to approve the Project, the City Council recognizes that a range of technical and scientific opinion exists with respect to certain environmental issues. The City Council acknowledges that it has acquired an understanding of the range of this technical and scientific opinion by its review of the Draft EIR, the comments received on the Draft EIR and the responses to those comments in the Final EIR, as well as testimony, letters, and reports regarding the Final EIR and its own experience and expertise in these environmental issues. The City Council acknowledges that it has reviewed and considered, as a whole, the evidence and analysis presented in the Draft EIR, the evidence and analysis presented in the comments on the Draft EIR, the evidence and analysis presented in the Final EIR, the information submitted on the Final EIR, and the reports prepared by the experts who prepared the EIR, by the City's consultants, and by staff, addressing those comments. The City Council acknowledges that it has gained a comprehensive and well-rounded understanding of the environmental issues presented by the Project. The City Council acknowledges that in turn, this understanding has enabled the City Council to make its decisions after weighing and considering the various viewpoints on these important issues. The City Council accordingly certifies that its findings are based on full appraisal of all of the evidence contained in the Final EIR, as well as the evidence and other information in the record addressing the Final EIR.

1) That, based on review and analysis of the EIR and other information in the record and has considered the information contained therein, including the written and oral comments received at the public hearings on the EIR, prior to acting upon or approving the Project, the EIR has been completed in compliance with CEQA; and that the EIR represents the independent judgment of the City of Oakley; and

2) That the EIR contains discussion of the potential impacts, level of significance of each impact, proposed mitigation for any impact found to be potentially significant, and factual findings relating to potential environmental impacts that could result from implementation of the Project. The City Council hereby refers to the EIR as support for findings and recommendations made by the Council as the City's findings under CEQA (Pub. Resources Code § 21000 et seq.) and the CEQA Guidelines (Cal. Code Regs., Title 14, §15000 et seq.) relating to the Project; and

3) That the EIR provides the written analysis and conclusions of the City Council regarding the Project's environmental impacts, mitigation measures and alternatives to the Project, and shall be referenced as findings for all impacts found to have no impact, be less than significant without mitigation incorporated, or be less than significant with mitigation incorporated.

4) That pursuant to Public Resources Code Section 21081 and CEQA Guidelines Sections 15091 *et seq*., the City Council of the City of Oakley adopts and makes the following statement of overriding considerations regarding the remaining unavoidable impacts of the Project and the anticipated economic, social and other benefits of the Project.

a) <u>Significant Unavoidable Impacts</u>

With respect to the foregoing findings, and in recognition of those facts which are included in the record, the City has determined the following:

- The Project could result in significant and unavoidable impacts related to implementation of the applicable air quality plan during construction (Air Quality and Greenhouse Gas Emissions Impact 4.1-1 of Draft EIR); and

- The Project could cumulatively cause significant and unavoidable impacts related to the generation of greenhouse gas emissions (Air Quality and Greenhouse Gas Emissions Impact 4.1-5 of Draft EIR); and

- The Project could result in cumulatively significant and unavoidable impacts to freeway operations along SR 4 (Transportation and Circulation Impact 4.4-10 of Draft EIR); and

- The Project could result in significant cumulative impacts related to traffic safety (Transportation and Circulation Impact 4.4-11 of Draft EIR).

These impacts cannot be avoided or substantially reduced by feasible changes or alterations to the Project, other than the changes or alterations already adopted.

b) <u>Alternatives</u>

Summary of Discussion of Alternatives in the Final EIR

Pursuant to Section 15126.6 of the CEQA Guidelines, the EIR evaluated three potential alternatives to the Project. The EIR examined the environmental impacts of each alternative in comparison with the Project and the relative ability of each alternative to satisfy project objectives.

Findings Relating to Alternatives

In making these findings, the City Council certifies that it has independently reviewed and considered the information on alternatives provided in the EIR, including the information provided in comments on the Draft EIR and the responses to those comments in the Final EIR. The Draft EIR describes and evaluates in detail three alternatives to the Project. A summary of each alternative, its relative characteristics, and documentation of the City Council's findings in support of rejecting the alternatives as infeasible are presented below.

The City Council finds that the alternatives are unable to satisfy the project objectives to the same degree as the Project. The City Council further finds that, on balance, none of the remaining alternatives has environmental advantages over the Project that are sufficiently great to justify approval of such an alternative instead of the Project, in light of each such alternative's inability to satisfy the project objectives to the same degree as the Project. Accordingly, based on impacts identified in the EIR, the City Council determines to approve the Project instead of approving one of the remaining alternatives.

Description of Project Objectives

The project objectives are:

- To develop a logistics center with approximately 2,000,000 sf of Class A industrial light warehousing, e-commerce fulfillment, distribution, and light manufacturing space consisting of five buildings.
- To redevelop the former DuPont site with a robust logistics center that provides nearly 2,000 jobs for the region.
- To implement a key focus in the Oakley General Plan to develop industrial and like distribution uses on the site.
- To implement the City's vision in the General Plan to develop this site as a primary employment center.
- To allow the sensitive area designated "Delta Recreation" on the property to remain in its natural state.

Discussion and Findings Relating to the Alternatives Evaluated in the Draft EIR

Chapter 6 of the Draft EIR evaluates the following three alternatives, which are summarized below:

1) No Project (No Build) Alternative;

2) Reduced Intensity Alternative; and

3) Reduced Footprint Alternative.

1) No Project (No Build) Alternative.

Under CEQA, a "No-Project Alternative" compares the impacts of proceeding with a Project with the impacts of not proceeding with the Project. A No-Project Alternative describes the environmental conditions in existence at the time the Notice of Preparation was published, along with a discussion of what would be reasonably expected to occur at the site in the foreseeable future, based on current plans and consistent with available infrastructure and community services.

The No Project (No Build) Alternative is defined in the Draft EIR as the continuation of the existing conditions of the Project site, which currently consists of remnants left from the operation of the DuPont Chemical Plant. The No Project (No Build) Alternative would not require the demolition of the remaining on-site structures. Because development of the site would not occur, potential impacts from the Project would not occur as a result of the No Project (No Build) Alternative. However, leaving the site in its barren and highly disturbed condition could cause negative aesthetic impacts and result in blighted conditions. Moreover, the City's General Plan identifies the site as an area suitable for development and envisions the project site and surrounding area acting as the primary employment center for the City. However, the No Project (No Build) Alternative would not meet any of the project objectives nor fulfill the stated aims of the City's General Plan.

On balance, the environmental benefits that might be achieved with this alternative are outweighed by its failure to achieve any of the project objectives, and the City Council rejects this alternative.

2) Reduced Intensity Alternative.

The Reduced Intensity Alternative would include the development of the Project with a reduced total amount of proposed building square footage. For the Project, the Draft EIR assumes the total square footage of the project would be approximately 2.0 million sf. Under the Reduced Intensity Alternative, the total building space would be reduced by 50 percent and total approximately 1.0 million sf. All other aspects of the proposed project would be similar under the Reduced Intensity Alternative. The reduced size of the structures included in the Reduced Intensity Alternative would curtail the ability of the Reduced Intensity Alternative to meet the objectives of the proposed project, but would also avoid any disturbance to biological resources and wetlands.

The Draft EIR determined that the Reduced Intensity Alternative would only partially achieve two of the Project's objectives. The Alternative would not be capable of reducing the Project's significant and unavoidable impacts related to transportation and circulation and associated cumulative impacts.

On balance, the environmental benefits that might be achieved with this alternative are outweighed by its failure to fully meet the project objectives, and the City Council rejects this alternative.

3) Reduced Footprint Alternative.

The Reduced Footprint Alternative would involve buildout of the site with a reduced development footprint. The Alternative would reduce the footprint of the project by 50 percent while the proposed square footage would be reduced by 75 percent. While the Reduced Footprint Alternative would generally involve similar operations as the proposed project, the Alternative would result in fewer

employees and output operations as a result of the reduction in the overall footprint and proposed building area. While the conceptual design of this alternative would eliminate the proposed project's potentially significant impact to wetland resources, the Reduced Footprint Alternative would not be capable of reducing the project's significant and unavoidable impacts related to transportation and circulation and associated cumulative impacts.

The Draft EIR determined that the Reduced Footprint Alternative would result in fewer impacts than the Project in several resource areas but would only partially achieve two of the Project's objectives. On balance, the environmental benefits that might be achieved with this alternative are outweighed by its failure to achieve all of the project objectives. The City Council rejects this alternative.

Findings Regarding Reasonable Range of Alternatives

The City Council finds that the range of alternatives evaluated in the EIR reflects a reasonable attempt to identify and evaluate various types of alternatives that would potentially be capable of reducing the Project's environmental effects, while accomplishing most but not all of the project objectives. The City Council finds that the alternatives analysis is sufficient to inform the City Council and the public regarding the tradeoffs between the degree to which alternatives to the Project could reduce environmental impacts and the corresponding degree to which the alternatives would hinder the City's ability to achieve the project objectives.

c) Statement of Overriding Considerations

The City Council specifically adopts and makes this Statement of Overriding Considerations that this Project includes all feasible measures that would eliminate or substantially lessen the significant impacts of the Project on the environment, and that the remaining significant, unavoidable impacts of the Project are acceptable in light of the environmental, economic, social and other considerations set forth herein because the benefits of the Project outweigh the significant and adverse impacts of the Project. The City Council finds that each of the overriding considerations set forth below constitutes a separate and independent ground for finding that the benefits of the Project outweigh its significant adverse environmental impacts and sets forth an overriding consideration warranting approval of the Project. These matters are supported by evidence in the record.

d) Benefits of Proposed Project

The City Council has considered the EIR, the public record of proceedings on the proposed Project and other written materials presented to the City as well as oral and written testimony at all public hearings related to the proposed Project, and does hereby determine that implementation of the Project would result in the substantial public benefits set forth below.

i) **Economic Growth:** The Project would induce local economic growth by developing a Class A industrial light warehousing, e-commerce fulfillment, distribution, and light manufacturing space. The Project would create nearly 2,000 jobs for the region.

ii) **Furtherance of the City's General Plan:** The Project would implement a key focus of the City's General Plan to develop industrial and like distribution uses to meet the future needs of the City. The development pursuant to the General Plan and associated expansion of the City's backbone infrastructure furthers the orderly growth of the City in accordance with the City's previous plans and policies, including the plans and policies set forth in the City's General Plan. In addition, the Project would implement the City's vision in the General Plan to develop the site as a primary employment center.

iii) **Preservation of "Delta Recreation":** The "Delta Recreation" sensitive area on the property would remain preserved in its natural state.

iv) **Redevelop the former DuPont site:** The project site was home to the DuPont chemical manufacturing facility from 1956-1997, and requires soil and groundwater remediation to remove traces of hazardous materials. The Project includes plans to redevelop the former DuPont site, which has been undergoing extensive clean-up and remediation efforts since 2003. Implementation of the Project would complete the remediation process, resulting in a cleaner area.

5) The Mitigation and Monitoring Plan for the Oakley Logistics Center Project is incorporated and adopted as part of this resolution and attached herein as Exhibit "A". The Program identifies impacts of the Project, corresponding mitigation, designation of responsibility for mitigation implementation and the agency responsible for the monitoring action.

6) The City Council hereby finds and recognizes that the Final EIR contain additions, clarifications, modifications and other information in their responses to comments on the Draft EIR. This Council hereby finds and determines that such changes and additional information are not significant new information as that term is defined under the provisions of CEQA, because such changes and additional information do not indicate that any new significant environmental impacts not already evaluated would result from the Project and do not reflect any substantial increase in the severity of any environmental impact; that no feasible mitigation measures considerably different from those previously analyzed in the Draft EIR have been proposed that would lessen significant environmental impacts of the Project; and that no feasible alternatives considerably different from those analyzed in the Draft EIR have been proposed that would lessen significant environmental impacts of the Project. Accordingly, this Council hereby finds and determines that recirculation of the Final EIR for further public review and comment is not warranted; and

7) The City Council does hereby designate the Community Development Director of the City of Oakley, located at 3231 Main Street, Oakley, California 94651, as the custodian of documents and record of proceedings on which the decision is based; and

8) The City Council does hereby make the foregoing findings with respect to the significant effects on the environment of such Project, as identified in the Project EIR, with the stipulations that all information in these findings is intended as a summary of the full administrative record supporting the Project EIR, which full administrative record should be consulted for the full details supporting these findings, and that any mitigation measures and/or alternatives that were suggested by commenters to the Draft EIR and were not adopted as part of the Project EIR are hereby expressly rejected for the reasons stated in the responses to the comments set forth in the Final EIR, and elsewhere in the record.

Section 3. Approval

PASSED AND ADOPTED by the City Council at a meeting held on the 17th day of December, 2019, by the following vote:

Exhibit A – Oakley Logistics Center Project EIR – Mitigation and Monitoring Plan

4. MITIGATION MONITORING AND REPORTING PROGRAM

4.1 INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires all State and local agencies to establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of either a "mitigated negative declaration" or specified environmental findings related to environmental impact reports.

The following is the Mitigation Monitoring and Reporting Program (MMRP) for the Oakley Logistics Center Project (proposed project). The intent of the MMRP is to ensure implementation of the mitigation measures identified within the Environmental Impact Report (EIR) for the proposed project. Unless otherwise noted, the cost of implementing the mitigation measures as prescribed by this MMRP shall be funded by the applicant.

4.2 COMPLIANCE CHECKLIST

The MMRP contained herein is intended to satisfy the requirements of CEQA as they relate to the EIR prepared for the proposed project. This MMRP is intended to be used by City staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Mitigation measures identified in this MMRP were developed in the EIR.

The EIR presents a detailed set of mitigation measures that will be implemented throughout the lifetime of the project. Mitigation is defined by CEQA Guidelines, Section 15370, as a measure that:

- Avoids the impact altogether by not taking a certain action or parts of an action;
- Minimizes impacts by limiting the degree or magnitude of the action and its implementation;
- Rectifies the impact by repairing, rehabilitating, or restoring the impacted environment;
- Reduces or eliminates the impact over time by preservation and maintenance operations during the life of the project; or
- Compensates for the impact by replacing or providing substitute resources or environments.

The intent of the MMRP is to ensure the implementation of adopted mitigation measures. The MMRP will provide for monitoring of construction activities as necessary and in-the-field identification and resolution of environmental concerns.

Monitoring and documenting the implementation of mitigation measures will be coordinated by the City of Oakley. The table attached to this report identifies the mitigation measures, the monitoring action for each mitigation measure, the responsible party for the monitoring action, and timing of the monitoring action. The applicant will be responsible for fully understanding and effectively implementing the mitigation measures contained within the MMRP. The City will be responsible for monitoring compliance.

4.3 MITIGATION MONITORING AND REPORTING PROGRAM

The following table indicates the mitigation measure number, the impact the measure is designed to address, the measure text, the monitoring agency, implementation schedule, and an area for sign-off indicating compliance.

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project

Chapter 4.1 – Air Quality and Greenhouse Gas Emissions					
4.1-1	Conflict with or obstruct implementation of the applicable air quality plan during project construction.	*4.1-1(a) Prior to issuance of a grading permit, the project applicant shall show on the grading plans via notation that the contractor shall ensure that all off-road heavy-duty diesel-powered equipment (e.g., rubber tired dozers, excavators, graders, scrapers, pavers, paving equipment, and cranes) to be used for each phase of construction of the project (i.e., owned, leased, and subcontractor vehicles) shall meet California Air Resources Board (CARB) Tier 4 Final emissions standards or cleaner. The grading plans shall be submitted for review and approval by the Public Works and Engineering Department. In addition, all off-road equipment operating at the construction site must be maintained in proper working condition according to manufacturer's specifications. Idling shall be limited to 5 minutes or less in accordance with the Off-Road Diesel Fueled Fleet Regulation as required by CARB.* *Idling shall be limited to five minutes or less for all on-road related and/or delivery trucks in accordance with CARB's On-Road Heavy-Duty Diesel Vehicles (In-Use) Regulation. Clear Signage regarding idling restrictions should be placed at the entrances to the construction site.*	City of Oakley Public Works and Engineering Department	Prior to issuance of a grading permit	
		4.1-1(b) All Improvement Plans for the proposed project shall identify, via notation, that all architectural	City of Oakley Planning	Prior to approval of Improvement Plans

		potential co-benefits. If BAAQMD has established an off-site mitigation program at the time a development application is submitted, as an off-site mitigation measure, the applicant may choose to enter into an agreement with BAAQMD and pay into the established off-site mitigation program fund, where BAAQMD would commit to reducing the type and amount of emissions identified in the agreement.			
Chapter 4.2 – Biological Resources					
4.2-1	Have a substantial adverse effect, either directly or through habitat modifications, on burrowing owl.	***Areas of the Project Site Within the ECCC HCP/NCCP Permit Area and Off-Site Improvement Areas*** *4.2-1(a) Prior to the issuance of grading or construction permits for each phase of development of the project, the applicant shall pay the applicable ECCC HCP/NCCP per-acre Development Fee in effect for Zone I in compliance with Article 7, Habitat Conservation Plan/Natural Community Conservation Plan Implementing Program, of the Oakley Municipal Code. The Development Fee will cover the development of habitat that primarily includes annual grassland. Payment of the Development Fee would address the loss of potential habitat of special-status plant species associated with grasslands. The fees would be used in part to protect these affected special-status plant species by bringing existing populations of the species under protection.*	City of Oakley Planning Division Contra Costa County Conservancy	Prior to issuance of grading or construction permits for each phase of development within the ECCC HCP/NCCP Permit Area

		sunrise or sunset in accordance with CDFW guidelines. All burrows or burrowing owls will be identified and mapped. Surveys will take place no more than 30 days prior to construction. During the breeding season (February 1 to August 31), surveys will document whether burrowing owls are nesting in or directly adjacent to disturbance areas. During the nonbreeding season (September 1 to January 31), surveys will document whether burrowing owls are using habitat in or directly adjacent to any disturbance area. Survey results will be valid only for the season (breeding or nonbreeding) during which the survey is conducted. ***Areas of the Project Site Outside the ECCC HCP/NCCP Permit Area*** *4.2-1(c) Preconstruction Survey* *Prior to any ground disturbance related to covered activities, a USFWS/CDFW-approved biologist will conduct a preconstruction survey in of potential burrowing owl habitat. The surveys will establish the presence or absence of western burrowing owl and/or habitat features and evaluate use by owls in accordance with CDFW survey guidelines (California Department of Fish and Game 2012).* *Compensatory Habitat Mitigation*	City of Oakley Planning Division CDFW	Prior to any ground disturbance related to covered activities outside the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		If active owl burrows are identified during pre-construction surveys in areas of the project site outside of the ECCC HCP/NCCP Permit Area and the project would impact active burrows, the project applicant shall provide compensatory mitigation for the permanent loss of burrowing owl habitat at a ratio of 2.5 acres of higher quality owl habitat for every one acre of suitable owl habitat disturbed. The calculation of habitat loss may exclude acres currently occupied by hardscape or structures. Such mitigation may include the permanent protection of land that is deemed to be suitable burrowing owl habitat through a conservation easement deeded to a non-profit conservation organization or public agency with a conservation mission, or the purchase of burrowing owl conservation bank credits from a CDFW-approved burrowing owl conservation bank. A record of the compensatory mitigation provided by the project applicant shall be submitted to the City of Oakley Planning Division prior to initiation of ground disturbing activities. ***Entire Project Site and Off-Site Improvement Areas*** *4.2-1(d) Avoidance, Minimization, and Construction Monitoring* *If burrowing owls are found during the breeding season (February 1 to August 31), the project proponent shall avoid all nest sites that could be disturbed by project construction during the*	City of Oakley Planning Division CDFW	If burrowing owls are found during the breeding season (February 1 to August 31)

		remainder of the breeding season or while the nest is occupied by adults or young. Avoidance will include establishment of a non-disturbance buffer zone (described below). Construction may occur during the breeding season if a qualified biologist monitors the nest and determines that the birds have not begun egg-laying and incubation or that the juveniles from the occupied burrows have fledged. During the nonbreeding season (September 1 to January 31), the project proponent should avoid the owls and the burrows they are using, if possible. Avoidance will include the establishment of a buffer zone (described below). *During the breeding season, buffer zones of at least 250 feet in which no construction activities can occur will be established around each occupied burrow (nest site). Buffer zones of 160 feet will be established around each burrow being used during the nonbreeding season. The buffers will be delineated by highly visible, temporary construction fencing.* *If occupied burrows for burrowing owls are not avoided, passive relocation shall be implemented. Owls should be excluded from burrows in the immediate impact zone and within a 160-foot buffer zone by installing one-way doors in burrow entrances. These doors should be in place for 48 hours prior to excavation. The project area should be monitored daily for 1 week to confirm that the*

		owl has abandoned the burrow. Whenever possible, burrows should be excavated using hand tools and refilled to prevent reoccupation (California Department of Fish and Game 1995). Plastic tubing or a similar structure should be inserted in the tunnels during excavation to maintain an escape route for any owls inside the burrow.			
4.2-2	Have a substantial adverse effect, either directly or through habitat modifications, on Swainson's hawk.	***Areas of the Project Site Within the ECCC HCP/NCCP Permit Area and Off-Site Improvement Areas*** *4.2-2(a) Implement Mitigation Measure 4.2-1(a).* *4.2-2(b) Preconstruction Survey* *Prior to any ground disturbance related to covered activities that occurs during the nesting season (March 15 to September 15), a qualified biologist will conduct a preconstruction survey no more than 1 month prior to construction to establish whether Swainson's hawk nests within 1,000 feet of the project site are occupied. If potentially occupied nests within 1,000 feet are off the project site, then their occupancy will be determined by observation from public roads or by observations of Swainson's hawk activity (e.g., foraging) near the project site. If nests are occupied, minimization measures and construction monitoring are required (see below).*	See Mitigation Measure 4.2-1(a) City of Oakley Planning Division CDFW USFWS	See Mitigation Measure 4.2-1(a) Prior to any ground disturbance related to covered activities during nesting season (March 15 to September 15) within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		Avoidance, Minimization, and Construction Monitoring *During the nesting season (March 15 to September 15), covered activities within 1,000 feet of occupied nests or nests under construction will be prohibited to prevent nest abandonment. If site-specific conditions or the nature of the covered activity (e.g., steep topography, dense vegetation, limited activities) indicate that a smaller buffer could be used, the Implementing Entity will coordinate with CDFW/USFWS to determine the appropriate buffer size. If young fledge prior to September 15, covered activities can proceed normally. If the active nest site is shielded from view and noise from the project site by other development, topography, or other features, the project applicant can apply to the Implementing Entity for a waiver of this avoidance measure. Any waiver must also be approved by USFWS and CDFW. While the nest is occupied, activities outside the buffer can take place.* *All active nest trees will be preserved on site, if feasible. Nest trees, including non-native trees, lost to covered activities will be mitigated by the project proponent according to the requirements of Mitigation Measure 4.2-2(c).*			

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		4.2-2(c) Should the proposed project result in the loss of non-riparian Swainson's hawk nest trees, the project applicant shall implement the following measures: • *If determined to be feasible by the City of Oakley Planning Division, the project applicant shall provide for the planting of 15 saplings for every nest tree removed, with the objective of having at least five mature trees established for every tree lost, according to the requirements listed further below; and either of the following:* 1. *Pay the Implementing Entity an additional fee to purchase, plant, maintain, and monitor 15 saplings on the ECCC HCP/NCCP Preserve System for every tree lost according to the requirements listed below; OR* 2. *The project proponent will plant, maintain, and monitor 15 saplings for every tree lost at a site to be approved by the Implementing Entity (e.g., within an ECCC HCP/NCCP Preserve or existing open space linked to ECCC HCP/NCCP preserves),*	City of Oakley Planning Division Contra Costa County Conservancy	Prior to issuance of tree removal permits for trees within the ECCC HCP/NCCP Permit Area	

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		according to the requirements listed below. *The following requirements shall be met for all planting options:* • *Tree survival shall be monitored at least annually for five years, then every other year until year 12. All trees lost during the first five years will be replaced. Success will be reached at the end of 12 years if at least five trees per tree lost survive without supplemental irrigation or protection from herbivory. Trees must also survive for at least three years without irrigation.* • *Irrigation and fencing to protect from deer and other herbivores may be needed for the first several years to ensure maximum tree survival.* • *Native trees suitable for this site should be planted. When site conditions permit, a variety of native trees will be planted for each tree lost to provide trees with different growth rates, maturation, and life span, and to provide a variety of tree canopy structures for Swainson's hawk. This variety will help to ensure that nest trees will be available in the short term (five-10 years for cottonwoods and willows) and in the long term (e.g., Valley oak, sycamore). This will also*			

MITIGATION MONITORING AND REPORTING PROGRAM Oakley Logistics Center Project

CITY OF OAKLEY

RESOLUTION NO. XX-19

A RESOLUTION OF THE CITY OF OAKLEY CITY COUNCIL MAKING FINDINGS AND APPROVING THE GENERAL PLAN AMENDMENT TO AMEND THE LAND USE DESIGNATION OF THE 143.3-ACRE PROJECT SITE FROM LIGHT INDUSTRIAL (LI) /BUSINESS PARK (BP) /UTILITY ENERGY (UE) TO LIGHT INDUSTRIAL (LI) WITH THE REMAINDER OF THE SUBJECT PROPERTY BEING DELTA RECREATION (DR), AND TO REMOVE THE PROPOSED EXTENSION OF LIVE OAK AVENUE FROM FIGURE 3-1, CIRCULATION DIAGRAM, OF THE OAKLEY 2020 GENERAL PLAN FOR THE PROJECT TITLED "OAKLEY LOGISTICS CENTER" LOCATED AT 6000 BRIDGEHEAD ROAD (APN'S: 037-020-008, -009, -010, AND -014 THROUGH -022)

FINDINGS

WHEREAS, on July 1, 1999, the incorporation of the City of Oakley took effect; and

WHEREAS, after incorporation, the City adopted the Contra Costa County General Plan for the Oakley Area as its general plan, the County's subdivision ordinance as its subdivision ordinance, and the County's zoning ordinance as its zoning ordinance (Ordinance Nos. 1-99, 17-99, 22-99). Since that time, the City has prepared its own general plan, as required by Government Code Section 65360; and

WHEREAS, in December 2002, the Oakley City Council adopted the Oakley 2020 General Plan; and

WHEREAS, on December 17, 2018, NP Oakley, LLC., ("Applicant") submitted an application requesting 1) Certification of the Environmental Impact Report, including adoption of Findings of Fact and a Statement of Overriding Considerations; 2) Adoption of the Mitigation Monitoring and Reporting Program; and approval of 3) a General Plan Amendment (GPA 04-18) to amend the land use designation of the 143.3-acre project site from Light Industrial (LI) /Business Park (BP) /Utility Energy (UE) to Light Industrial (LI)) with the remainder of the subject property being Delta Recreation (DR), and to remove the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the General Plan; 4) a Rezone (RZ 08-18) to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to Planned Unit Development (P-1); 5) a Vesting Tentative Map (TM 05-18) to create eight parcels within the 375.7-acre subject property; 6) Design Review (DR 12-18), including the Final Development Plan, for the project's design, including site plans, architectural elevations, conceptual landscape plans, and other physical development; and 7) Development Agreement (DA 01-18) for the proposed development between the City of Oakley and the project applicant. The project site is located at 6000 Bridgehead Road (APN's: 037-020-008, -009, -010, and -014 through -022). ("Project"); and

4708

WHEREAS, the Applicant has initiated a project to amend the land use designation of the 143.3-acre project site from Light Industrial (LI) /Business Park (BP) /Utility Energy (UE) to Light Industrial (LI), and to remove the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the Oakley 2020 General Plan; and

WHEREAS, the "Project" was analyzed under the Oakley Logistics Center Project EIR (SCH # 2019029113); and

WHEREAS, on December 5, 2019, the Notice of Public Hearing for the Project was duly noticed in the Contra Costa Times, a newspaper of general distribution. On December 5, 2019, the Notice of Public Hearing was posted at Oakley City Hall located at 3231 Main Street, outside the gym at Delta Vista Middle School located at 4901 Frank Hengel Way and outside the library at Freedom High School located at 1050 Neroly Road. The notice was also mailed out to all owners of property within a 500-foot radius of the subject property's boundaries, to parties requesting such notice, and to outside agencies; and

WHEREAS, on December 17, 2019, the City Council certified the Oakley Logistics Center Project EIR (SCH # 2019029113) and adopted a Mitigation Monitoring and Reporting Program for the project; and

WHEREAS, on December 17, 2019, the City Council opened the public hearing at which it received a report from City Staff, oral and written testimony from the public, and deliberated on the project. At the conclusion of its deliberations, the City Council took a vote and adopted this resolution to approve the project, as revised by the City Council during its deliberations; and

WHEREAS, these Findings are based on the City's General Plan and the City's Zoning Ordinance, and the information submitted to the City Council at its December 17, 2019 meeting, both written and oral, as reflected in the minutes of such meetings, together with the documents contained in the file for the Project (hereafter the "Record").

NOW, THEREFORE, on the basis of the above findings of fact and the entire Record, the City Council makes the following findings regarding the General Plan Amendment as shown in "Exhibit A" of this resolution in support of the recommended approvals:

A. The project is within the scope of the Certified Environmental Impact Report for the Oakley Logistics Center project.

B. The change in Land Use Designation will provide for the orderly, well planned and balanced growth within the City in that:

   1. The site would be designated for industrial development, and that land use designation still envisions and allows for light industrial, warehousing, distribution, e-commerce fulfillment, and light manufacturing space, such as the proposed Oakley Logistics Center project; and

4709

2. Re-designating this site to allow for light industrial land uses, such as the proposed project, will serve to implement several General Plan policies as follows:

- 2.1.1 Promote a combination of employment and residential uses that provide both jobs and housing for Oakley's residents.

- 2.1.4 Promote the placement of the most intensive non-residential development (Commercial, Business Park and Light Industrial) in the Northwest Oakley Planning Area as defined in Figure 2-3.

- 2.1.10 When considering large scale development projects, the City may, at its discretion, authorize a Specific Plan (SP) or Planned Unit Development (PUD) approach that allows flexibility within a project area. Under this approach, the distribution of land uses may vary from the land uses as designated on the Land Use Diagram. The SP/PUD approach shall not allow either an overall greater development density than allowed under the Land Use Diagram, or a combination of uses that undermines the overall intent of the project area as established under the General Plan policies and Land Use Diagram.

- 2.4.1 The City of Oakley does not support or accommodate general Heavy Industrial uses. The City does allow and encourage Light Industrial and Utility Energy uses in appropriate locations.

- 2.4.3 Ensure there is adequate land available to accommodate industrial development.

- 5.1.3 - Actively recruit businesses and industries that are compatible with the General Plan's land use and implementation goals and policies and with the EDP; and

3. It would serve to result in a development that will redevelop, enhance and activate a mostly vacant piece of land that has been underutilized for over a decade, which will result in a more balanced and attractive use in the Northwest Oakley Planning Area.

C. The removal of the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the General Plan is justified per the Live Oak Extension "Memo" prepared by Abrams Associates Traffic Engineering, Inc. dated September 20, 2019.

BE IT FURTHER RESOLVED THAT, on the basis of the foregoing Findings and the entire Record, the City Council hereby approves the amendment to the General Plan as shown in "Exhibit A" of this resolution.

CITY OF OAKLEY

ORDINANCE NO. XX-19

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF OAKLEY REZONING 375.7-ACRES LOCATED AT 6000 BRIDGEHEAD ROAD (APN'S: 037-020-008, -009, -010, AND -014 THROUGH -022) FROM SPECIFIC PLAN (SP-3) TO PLANNED UNIT DEVELOPMENT (P-1)

WHEREAS, on December 17, 2018, NP Oakley, LLC., ("Applicant") submitted an application requesting 1) Certification of the Environmental Impact Report, including adoption of Findings of Fact and a Statement of Overriding Considerations; 2) Adoption of the Mitigation Monitoring and Reporting Program; and approval of 3) a General Plan Amendment (GPA 04-18) to amend the land use designation of the 143.3-acre project site from Light Industrial (LI) /Business Park (BP) /Utility Energy (UE) to Light Industrial (LI)) with the remainder of the subject property being Delta Recreation (DR), and to remove the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the General Plan; 4) a Rezone (RZ 08-18) to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to Planned Unit Development (P-1); 5) a Vesting Tentative Map (TM 05-18) to create eight parcels within the 375.7-acre subject property; 6) Design Review (DR 12-18), including the Final Development Plan, for the project's design, including site plans, architectural elevations, conceptual landscape plans, and other physical development; and 7) Development Agreement (DA 01-18) for the proposed development between the City of Oakley and the project applicant. The project site is located at 6000 Bridgehead Road (APN's: 037-020-008, -009, -010, and -014 through -022). ("Project"); and

WHEREAS, the proposal complies with the requirements of the rezoning application requirements of Section 2.4.012 (a) of the Oakley Municipal Code; and

WHEREAS, the "Project" was analyzed under the Oakley Logistics Center Project EIR (SCH # 2019029113); and

WHEREAS, the Applicant has initiated a project to change the zoning for the property from Specific Plan (SP-3) to Planned Unit Development (P-1); and

WHEREAS, on December 5, 2019, the Notice of Public Hearing for the Project was duly noticed in the Contra Costa Times, a newspaper of general distribution. On December 5, 2019, the Notice of Public Hearing was posted at Oakley City Hall located at 3231 Main Street, outside the gym at Delta Vista Middle School located at 4901 Frank Hengel Way and outside the library at Freedom High School located at 1050 Neroly Road. The notice was also mailed out to all owners of property within a 500-foot radius of the subject property's boundaries, to parties requesting such notice, and to outside agencies; and

WHEREAS, on December 17, 2019, the City Council certified the Oakley Logistics Center Project EIR (SCH # 2019029113) and adopted a Mitigation and Monitoring Plan for the project; and

WHEREAS, on December 17, 2019, the City Council adopted Resolution XX-19 adopting the General Plan Amendment; and

The City Council of the City of Oakley does ordain as follows:

SECTION 1. FINDINGS. Pursuant to Chapter 2.4.012 of the Oakley Municipal Code, the City Council of the City of Oakley hereby finds and determines as follows:

a. The change proposed will substantially comply with the general plan:

The proposed rezone to the Planned Development (P-1) District in conjunction with the proposed Light Industrial (LI) and Delta Recreation (DR) land use designations will provide for a well-planned Light Industrial development that has been contemplated within the City of Oakley 2020 General Plan since 2002. The proposed rezone to the Planned Development (P-1) District will comply with or implement the following General Plan policies:

- *2.1.1 Promote a combination of employment and residential uses that provide both jobs and housing for Oakley's residents.*

- *2.1.4 Promote the placement of the most intensive non-residential development (Commercial, Business Park and Light Industrial) in the Northwest Oakley Planning Area as defined in Figure 2-3.*

- *2.1.10 When considering large scale development projects, the City may, at its discretion, authorize a Specific Plan (SP) or Planned Unit Development (PUD) approach that allows flexibility within a project area. Under this approach, the distribution of land uses may vary from the land uses as designated on the Land Use Diagram. The SP/PUD approach shall not allow either an overall greater development density than allowed under the Land Use Diagram, or a combination of uses that undermines the overall intent of the project area as established under the General Plan policies and Land Use Diagram.*

- *2.4.1 The City of Oakley does not support or accommodate general Heavy Industrial uses. The City does allow and encourage Light Industrial and Utility Energy uses in appropriate locations.*

- *2.4.3 Ensure there is adequate land available to accommodate industrial development.*

- 5.1.3 - Actively recruit businesses and industries that are compatible with the General Plan's land use and implementation goals and policies and with the Economic Development Plan (EDP).

b. The uses authorized or proposed in the land use district are compatible within the district and to uses authorized in adjacent districts:

The proposed change to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to Planned Unit Development (P-1) District will clean up a zoning classification that currently doesn't have any text or regulations to support the classification. The proposed P-1 District would allow for uses that would be consistent with the Light Industrial land use designation and uses that would be considered compatible with Light Industrial zoning within the City. The proposed land use will be compatible with the surrounding land uses.

c. Community need, but not necessarily future financial success, has been demonstrated for the use proposed:

A community need has been demonstrated for the proposed use. The City, and the East Contra Costa County region, has long strived to have a jobs-housing balance. The proposed project will serve as a catalyst project to further that balance. This subject property has been long slated for development consistent with the Oakley 2020 General Plan in that Goal 5.1 - Retain existing businesses and expand Oakley's economic base is being implemented. Furthermore, Policy 5.1.3 - Actively recruit businesses and industries that are compatible with the General Plan's land use and implementation goals and policies and with the EDP, is being implemented. Finally, Program 5.1.L - Continue to recognize the importance of making an adequate supply of land available for economic development. Specific properties and targeted land uses include:

> *• DuPont Property, north of Main Street between Bridgehead Road and Big Break Road: Economic development land uses designated within this area include Business Park, Commercial and Light Industrial. Anticipated uses include professional and medical offices, research and development, hotel/motel, general commercial, service retail and light industrial activities. Where feasible, development of the DuPont property may be pursued through a comprehensive business park master plan or Planned Unit Development zone. Infrastructure improvements are required to fully utilize this property.*

SECTION 2. Property Defined and Rezoned.

Pursuant to Section 2.4.012 of the Oakley Municipal Code, the Oakley Zoning Map is amended to rezone the following property from Specific Plan (SP-3) to Planned Unit Development (P-1):

A. Approximately 375.7-acres of real property located at 6000 Bridgehead Road (APN's: 037-020-008, -009, -010, and -014 through -022), as shown on the "Exhibit A" attached to this ordinance.

SECTION 3. Applicable Regulations and Standards.

A. Planned Unit Development (P-1) District – The P-1 District shall allow for development consistent with the attached Planned Unit Development regulations as defined in "Exhibit B" attached to this Ordinance.

SECTION 4. California Environmental Quality Act (CEQA) Finding.

The projects Environmental Impact Report and Mitigation Monitoring and Reporting Program, and all the mitigation measures contained therein, has been certified, and fully analyzed environmental impacts associated with the proposed P-1 District and the Final Development Plan.

SECTION 5. Severability.

If any provision of this ordinance or the application thereof to any person or circumstance is held invalid, the remainder of the ordinance, including the application of such part or provision to other persons or circumstances shall not be affected thereby and shall continue in full force and effect. To this end, the provisions of this ordinance are severable. The City Council hereby declares that it would have passed each section, subsection, subdivision, paragraph, sentence, clause, or phrase thereof, irrespective of the fact that any one or more sections, subsections, subdivisions, paragraphs, sentences, clauses or phrases may be held unconstitutional, invalid or unenforceable.

SECTION 6. Effective Date and Posting.

This ordinance shall take effect and be in force thirty (30) days from and after the date of its passage. The City Clerk shall cause the ordinance to be published within fifteen (15) days after its passage in a newspaper of general circulation, or by publishing a summary of the proposed ordinance, posting a certified copy of the proposed office in the City Clerk's Office at least five (5) days prior to the City Council meeting at which the ordinance is to be adopted, and within fifteen (15) days after its adoption, publishing a summary of the ordinance with the names of the Council Members voting for and against the ordinance.

The foregoing ordinance was adopted with the reading waived at a regular meeting of the Oakley City Council on _____, 2019 by the following vote:

PLANNED UNIT DEVELOPMENT LOGISTICS CENTER DISTRICT AT 6000 BRIDGEHEAD ROAD

SECTION 1. PURPOSE AND INTENT

1.101 The purpose of the Planned Unit Development Logistics Center District (P-1 Logistics Center District) is to allow the logistics, transport, and distribution of goods to be carried out by various operators on a commercial basis. It is the intent of this P-1 Logistics Center District to allow flexibility in type, design and layout of buildings; to encourage a more efficient use of land reflecting changes in land development; to encourage the expansion of urban areas incorporating the best features of modern design while conserving the value of the land; and to provide a procedure which relates the type, design and layout of development to the particular site and the particular demand at the time of development. No residential structures are permitted or conditionally permitted in the P-1 Logistics Center District.

SECTION 2. SPECIFIC STANDARDS AND CONDITIONS

2.201. The P-1 Logistics Center District is 345 acres. Approximately 150 acres are to be developed with logistics supporting uses ("Logistics Center Area") and the remaining 195 acres will remain or be improved as open space ("Open Space Area") as generally shown on the attached map.

(a) Permitted Uses Within Logistics Center Area. The following uses, or uses determined to be similar by the Community Development Director, are permitted in the Logistics Center Area of the P-1 Logistics Center District:

1. All uses permitted in the Light Industrial District (L-1) (See Section 9.1.602.b);

2. Fulfillment and delivery centers;

3. Distribution and logistics services which allows the purchase, assembly, storage, selling and transporting of products;

4, E-commerce uses which support the buying and selling of goods or services using the internet;

5. Outdoor loading and storage;

6. Fleet vehicle storage, cleaning and maintenance;

7. Use of rail to support the Logistics Center Area; and

8. Accessory fueling stations for any permitted use.

(b) Uses Requiring a Conditional Use Permit Within Logistics Center Area. The following uses are permitted in the Logistics Center Area of the P-1 Logistics Center District after the issuance of a condtional use permit:

1. All uses requiring a conditional use permit in L-I District (See Section 9.1.602.c).

(c) Permitted Uses for Open Space Area. The following uses, or uses determined to be similar by the Community Development Director, are permitted in the Open Space Area of the P-1 Logistics Center District:

1. All uses permitted in the Delta Recreation District (DR) (See Section 9.1.804.b).

2. Storm drain improvements and other similar improvements associated with development of the Logistics Center Area.

(d) Uses Requiring a Conditional Use Permit Within Open Space Area. The following uses are permitted are permitted in the Open Space Area of the P-1 Logistics Center District after the issuance of a conditional use permit:

1. All uses requiring a conditional use permit in DR District (See Section 9.1.804.c).

(e) Building Height. No building or structure or part of it shall be more than sixty feet (60') high above the highest point of ground elevation on the lot on which the building is erected.

(f) Bulk Regulations Including Front, Rear and Side Yard Setbacks. May be varied for a specific use or building as proposed by the applicant when so approved.

(g) Parking. Off-street parking and loading areas shall be provided for all uses within the P-1 Logistics Center District in accordance with the requirements of these regulations, unless it is determined by the City that other parking ratios are more appropriate for a specific use. Parking shall be provided on the same lot or premise as the main use it serves unless a parking agreement is obtained allowing parking to be shared on the adjacent or near parcels.

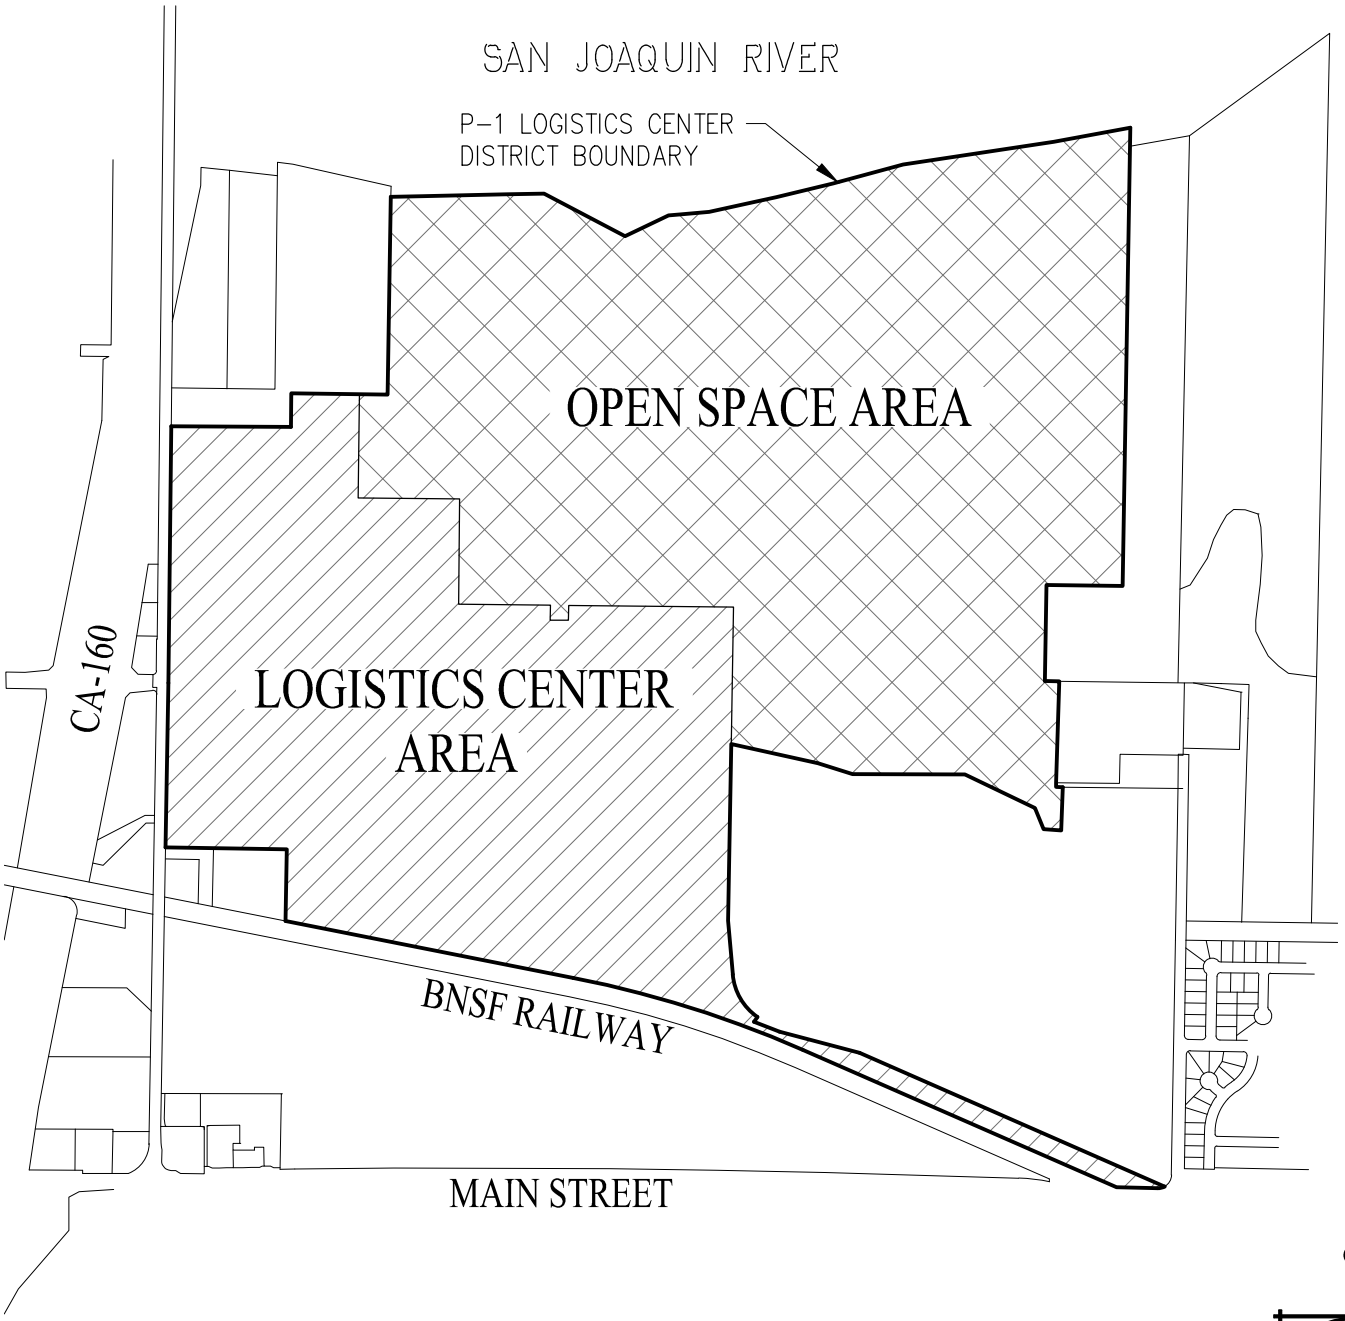
SECTION 3. SUBSEQUENT PLANS AND APPROVAL PROCESS

3.301 Required Information. Plans for development of a specific building, use or a request for a conditional use permit shall be submitted to the Zoning Administrator for review. The plan drawn to scale must include:

(a) The metes and bounds of the boundary of the subject property together with dimensions of lands to be divided, if any;

(b) The location, grades, widths and types of improvements proposed for all streets, driveways, pedestrian ways and utilities;

(c) The location and height for each proposed building, structure or use and elevations of all buildings and structures;



(d) The location and design of vehicle parking areas;

(e) The location and design of proposed landscaping;

(f) The location and design of all storm drainage and sewage disposal facilities; and

(g) Provide an engineer's statement of the proposed grading.

3.302 Approval. The Zoning Administrator shall approve a specific development plan if the Zoning Administrator determines that the plan is substantially consistent with, or is less intensive than, the plan already approved with this P-1 Logistics Center District. If the ZA determines that a specific development plan is not substantially consistent with, or includes a more intensive development than, the plan previously approved, this P-1 District can be amended to accommodate the changes.

RESOLUTION NO. XX-19

A RESOLUTION OF THE CITY OF OAKLEY CITY COUNCIL MAKING FINDINGS AND APPROVING VESTING TENTATIVE MAP (TM 05-18) AND DESIGN REVIEW (DR 12-18) ON A PROPERTY LOCATED AT 6000 BRIDGEHEAD ROAD (APN'S: 037-020-008, -009, -010, AND -014 THROUGH -022) FOR THE PROJECT KNOWN AS THE "OAKLEY LOGISTICS CENTER"

WHEREAS, on December 17, 2018, NP Oakley, LLC., ("Applicant") submitted an application requesting 1) Certification of the Environmental Impact Report, including adoption of Findings of Fact and a Statement of Overriding Considerations; 2) Adoption of the Mitigation Monitoring and Reporting Program; and approval of 3) a General Plan Amendment (GPA 04-18) to amend the land use designation of the 143.3-acre project site from Light Industrial (LI) /Business Park (BP) /Utility Energy (UE) to Light Industrial (LI)) with the remainder of the subject property being Delta Recreation (DR), and to remove the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the General Plan; 4) a Rezone (RZ 08-18) to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to Planned Unit Development (P-1); 5) a Vesting Tentative Map (TM 05-18) to create eight parcels within the 375.7-acre subject property; 6) Design Review (DR 12-18), including the Final Development Plan, for the project's design, including site plans, architectural elevations, conceptual landscape plans, and other physical development; and 7) Development Agreement (DA 01-18) for the proposed development between the City of Oakley and the project applicant. The project site is located at 6000 Bridgehead Road (APN's: 037-020-008, -009, -010, and -014 through -022). ("Project"); and

WHEREAS, the project site is designated as *Light Industrial (LI) and Delta Recreation (DR)* in the Oakley 2020 General Plan per City Council Resolution No. ____ and zoned Planned Development (P-1) District per Ordinance No. ____; and

WHEREAS, the "Project" was analyzed under the Oakley Logistics Center Project EIR (SCH # 2019029113); and

WHEREAS, on December 5, 2019, the Notice of Public Hearing for the Project was duly noticed in the Contra Costa Times, a newspaper of general distribution. On December 5, 2019, the Notice of Public Hearing was posted at Oakley City Hall located at 3231 Main Street, outside the gym at Delta Vista Middle School located at 4901 Frank Hengel Way and outside the library at Freedom High School located at 1050 Neroly Road. The notice was also mailed out to all owners of property within a 500-foot radius of the subject property's boundaries, to parties requesting such notice, and to outside agencies; and

WHEREAS, on December 17, 2019, the City Council opened the public hearing at which it received a report from City Staff, oral and written testimony from the public, and deliberated on the project. At the conclusion of its deliberations, the City Council took a

vote and adopted this resolution to approve the project, as revised by the City Council during its deliberations; and

WHEREAS, if any term, provision, or portion of these Findings or the application of these Findings to a particular situation is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions of these Findings, or their application to other actions related to the Project, shall continue in full force and effect unless amended or modified by the City; and

WHEREAS, these Findings are based upon the City's General Plan, the City's Zoning Ordinance, the City's Commercial and Industrial Design Guidelines, and the information submitted to the City Council at its December 17, 2019 meeting, both written and oral, including oral information provided by the applicant, as reflected in the minutes of such meetings, together with the documents contained in the file for the project (hereinafter the "Record"); and

NOW, THEREFORE, BE IT RESOLVED THAT, on the basis of the above findings of fact and the entire Record, the City Council makes the following additional findings in support of the approvals:

A. Regarding the application requesting approval of Vesting Tentative Map (TM 05-18) to create eight parcels within the 375.7-acre subject property, the City Council finds that:

1. The proposed Vesting Tentative Map, together with the provisions of its design and improvements, is consistent with the Zoning Ordinance, the P-1 District, and applicable portions of the Light Industrial (LI) and Delta Recreation (DR) General Plan Land Use Designation, as approved by City Council for the Project, in that it allows for light industrial, warehousing, distribution, e-commerce fulfillment, and light manufacturing space, such as the proposed Oakley Logistics Center project and complies with the minimum lot size, lot width, and lot depth and all other applicable regulations set forth in the project's Planned Development (P-1) District;

2. The site is physically suitable for the type of development in that the proposed Vesting Tentative Map meets all of the applicable development standards in the project's Planned Development (P-1) District and is compatible with surrounding commercial and industrial land uses;

3. The site is physically suitable for the proposed light industrial project;

4. The Project was analyzed under the Oakley Logistics Center Project EIR (SCH # 2019029113);

5. The design of the subdivision and type of improvements are not likely to cause serious public health problems in that the proposed subdivision

consists of 8 parcels. Construction and grading of the project are subject to building or grading permits, and violations of any such permits are subject to appropriate enforcement;

6. The design of the subdivision includes the construction of improvements within public right-of-way that are consistent with major subdivisions and the City's design standards. The improvements consist of widening Bridgehead Road, with additional roadway, sidewalks, curbs and gutters, and landscaping adjacent to the projects frontage. The remainder of the subdivision will be accessed through new roads with landscaping and lighting; and

7. The design of the subdivision and the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision. In this connection, the governing body may approve a map if it finds that alternate easements, for access or for use, will be provided, and that these will be substantially equivalent to ones previously acquired by the public. This subsection shall apply only to easements of record or to easements established by judgment of a court of competent jurisdiction and no authority is hereby granted to a legislative body to determine that the public at large has acquired easements for access through or use of property within the proposed subdivision. The Vesting Tentative Map does not conflict with easements acquired by the public for access and utilities.

B. In regards to the application requesting Design Review approval for (DR 12-18) for the project, the City Council finds that:

1. The proposed Design Review plans are substantially consistent with the applicable General Plan designation and approved Vesting Tentative Map. The proposed use is allowed for by the approval of the projects General Plan Amendment and Rezone applications; and

2. The proposed Design Review plans comply with all applicable Planned Development (P-1) District regulations as set forth in the approval of the projects Rezone application; and

3. The proposed design and materials of the Oakley Logistics Center buildings are compatible with the applicable adopted City of Oakley Commercial and Industrial Design Guideline standards, subject to the approved Final Development Plan.

C. The project complies with Measure J Growth Management requirements.

D. The Environmental Impact Report (EIR) for the Oakley Logistics Center project was certified by the City of Oakley City Council on December 17, 2019. The

Vesting Tentative Map and Design Review applications were analyzed under the Oakley Logistics Center Project EIR (SCH # 2019029113).

BE IT FURTHER RESOLVED THAT, on the basis of the above Findings and the Record, the City Council approves of the Applicant's request for **Vesting Tentative Map (TM 05-18) and Design Review (DR 12-18)** subject to the following Conditions of Approval:

CONDITIONS OF APPROVAL

Applicant shall comply with the requirements of the Oakley Municipal Code. Any exceptions must be stipulated in these Conditions of Approval. Conditions of Approval are based on the application received by the Planning Division, dated **December 17, 2018**, as well as additional information acquired since that time and made part of the project file.

THE FOLLOWING CONDITIONS OF APPROVAL SHALL BE SATISFIED PRIOR TO THE CONSTRUCTION OF THE BUILDING'S UNLESS OTHERWISE NOTED:

PLANNING DIVISION CONDITIONS

General:

1. This **Vesting Tentative Map (TM 05-18) and Design Review (DR 12-18)** is approved, as shown on the plans, date stamped by the Planning Division on **October 9, 2019**, and as modified by the following conditions of approval, subject to final review and approval by the Community Development Director.

2. This approval for **Vesting Tentative Map (TM 05-18) and Design Review (DR 12-18)** shall be effectuated within a period of three (3) years from the effective date of this resolution by pulling a building permit and if not effectuated shall expire on **December 17, 2022**. Prior to said expiration date, the applicant may apply for an extension of time pursuant to the provisions of the Zoning Code.

3. All construction drawings submitted for plan check shall be in substantial compliance with the plans presented to and approved by the City Council on **December 17, 2019**.

4. All conditions of approval shall be satisfied by the owner/developer. All costs associated with compliance with the conditions shall be at the owner/developer's expense.

5. Noise generating construction activities, including such things as power generators, shall be limited to the hours of 7:30 a.m. to 5:30 p.m. Monday through Friday, and shall be prohibited on City, State and Federal Holidays. The

restrictions on allowed working days and times may be modified on prior written approval by the Community Development Director.

6. Should archaeological materials be uncovered during grading, trenching or other on- site excavation(s), earthwork within 30 yards of these materials shall be stopped until a professional archaeologist who is certified by the Society of Professional Archaeology (SOPA) has had an opportunity to evaluate the significance of the find and suggest appropriate mitigation(s), if deemed necessary. If the remains are determined to be that of Native American origin, procedures will be guided by California PRC 5097 through California's Native American Heritage Commission.

7. The applicant shall defend, indemnify, and hold harmless the city or any of its boards, commissions, agents, officers, and employees from any claim, action or proceeding against the city, its boards, commissions, agents, officers, or employees to attack, set aside, void, or annul, the approval of the project. The city shall promptly notify the applicant of any such claim, action or proceeding. The city shall have the option of coordinating the defense. Nothing contained in this condition shall prohibit the city from participating in a defense of any claim, action, or proceeding if the city bears its own attorney's fees and costs, and the city defends the action in good faith.

Site Plan:

8. Parking stalls shall be 9 feet wide by 19 feet deep and all drive aisles shall be a minimum 24 feet in width as reviewed and approved by the Community Development Director.

9. A lighting and photometric plan shall be submitted prior to the issuance of building permits. The minimum requirement shall be one foot of candle light within public parking areas and pedestrian pathways.

10. Light poles shall be a maximum height of 30 feet within employee or public parking areas and shall provide glare shields where adjacent to existing residences per the review and approval of the Community Development Director. Light Poles within truck courts and outside storage areas may be taller depending on user needs and shall be approved by the Community Development Director.

11. Trash enclosures shall match Oakley Disposal and City standards and shall provide adequate space to accommodate both trash and recycling. Also, trash enclosures shall be constructed with a roof to match the building design and materials, have metal gates, and when appropriate be surrounded by landscaping with climbing vines on three sides per the review and approval of the Community Development Director.

12. Tenants may utilize trash receptacles such as compactors, trash containers, or recycling containers at their dock positions so long as they are completely enclosed and protected from the elements.

13. Any outdoor storage shall be kept neat and orderly at all times, per the review and approval of the Community Development Director.

Architecture:

14. Roof-mounted equipment shall not be visible when standing at grade level within 50’ of the building. Should roof-mounted equipment be visible it much be architecturally screened from view per the review and approval of the Community Development Director.

15. The light fixtures on the buildings shall be decorative fixtures in line with the architecture per the review and approval of the Community Development Director.

Landscaping Requirements:

16. A landscaping and irrigation plan for all areas shown on the site plan shall be submitted for review and approval of the Community Development Director prior to the issuance of shell building permits. The landscaping plan shall include the project's frontage and side yards. Landscaping shall conform to the Oakley Water Efficient Landscape Ordinance and the Guidelines for Implementation of the City of Oakley Water Efficient Landscape Ordinance and shall be installed prior to final occupancy. The plan shall be prepared by a licensed landscape architect and shall be certified to be in compliance with the City’s Water Conservation Ordinance.

17. California native drought tolerant plant or shall be used as much as possible. All trees shall be a mix of fifteen-gallon, 24-inch box and 36-inch box, all shrubs shall be a minimum five-gallon size, except as otherwise noted.

18. Parking lot trees, where feasible, shall achieve to provide shading of the parking areas at tree maturity.

19. Prior to occupancy, an on-site inspection shall be made of privately owned lands by a licensed landscape architect to determine compliance with the approved landscape plan. A signed certification of completion shall be submitted to the Community Development Director for review and approval.

20. If occupancy is requested prior to the installation of the landscape and irrigation improvements, then either a performance and payment bond, cash deposit or a letter of credit shall be delivered to the City for 125 percent of the estimated cost of the uncompleted portion of the landscape and irrigation improvements. If compliance is not achieved after six months of occupancy as determined by the Community Development Director, the City shall contract for the completion of the

landscaping and irrigation improvements to be paid for by the held sum. The City shall return the unused portion within one year of receipt or at the completion of all work.

21. Landscaping shall be maintained as shown on the landscape plan in perpetuity.

22. The applicant shall provide mitigation for the removal of any heritage and protected trees per OMC Section 9.1.1112(g)(11)(a).

Walls and Fences:

23. Anti-graffiti techniques shall be used on walls.

24. The applicant shall submit a wall and fence plan with each Building per the final review and approval of the Community Development Director. Walls and fences shall be decorative in nature, with a minimum level of vinyl coated chain link material.

Signage:

25. The proposed signage shall meet the requirements of the City's Zoning Ordinance. All proposed signage shall be reviewed by the Planning and Building Divisions.

26. A Sign Plan shall be provided for the site. Only the following signs shall be allowed, subject to final review and approval by the Community Development Director prior to the issuance of a building permit for signs:

    - To be determined with each Building.

27. The wall signs shall be constructed of individual channel letters.

28. All signs shall be on permanent structure and of design and material to compliment the proposed buildings. No signs on the premises shall be animated, rotating or flashing. No flags, pennants, banners, pinwheels or similar items shall be permitted on the premises, with the exception of a United States flag and California State flag.

29. Temporary signage for such things as special events and grand openings, shall require a Temporary Use Permit per the review and approval of the Community Development Director.

Design Review:

30. All aspects of the architecture and site design for each building within the campus must be consistent with style of architecture submitted with the project. Each building shall be of high quality and have 360 degree design incorporated therein.

The review and approval of each building's design will be handled at the Building Permit submittal per the review and approval of the Community Development Director.

Mitigation Measures

31. All mitigation measures addressed in the Oakley Logistic Center EIR shall be complied with and addressed as outlined in the Mitigation Monitoring and Reporting Plan, per the review and approval of the Community Development Director.

32. All measures contained within the HCP Planning Survey Report dated **September 27, 2019** shall be complied with, per the review and approval of the Community Development Director.

Waste Management Plan:

33. The applicant shall submit a Waste Management Plan that complies with the City of Oakley Construction and Demolition Debris Recycling Ordinance.

BUILDING DIVISION CONDITIONS

34. Plans shall meet the currently adopted Uniform Codes as well as the newest T-24 Energy Requirements per the State of California Energy Commission. To confirm the most recent adopted codes please contact the Building Division at (925) 625 – 7005.

35. An Automatic Life Safety Sprinkler System shall be required in all new construction pursuant to Ordinance 22-06. The Automatic Life Safety Sprinkler Systems in commercial and industrial buildings shall be designed and installed to the standards and requirements found in the most recent version of the NFPA (National Fire Protection Association). Automatic Life Safety Sprinkler Systems in hotels and apartments shall be installed to the stands and requirements found in the most recent version of the NFPA, Standard 13R.

36. Prior to requesting a Certificate of Occupancy from the Building Division all Conditions of Approval required to occupancy must be completed.

PUBLIC WORKS AND ENGINEERING CONDITIONS OF APPROVAL

THE FOLLOWING SHALL BE SATISFIED PRIOR TO THE ISSUANCE OF AN ENCROACHMENT AND/OR GRADING PERMIT:

37. GENERAL. All public improvements shall be made according to the latest adopted City Standard Drawings and Specifications. All work shall conform to the applicable City ordinances. The adjacent public right-of-way shall be kept clear of all job-related dirt and debris at the end of the day. Dirt and debris shall not be

washed into storm drainage facilities. The storing of goods and materials on the sidewalk and/or the street will not be allowed unless a special permit is issued. The developer's representative in charge shall be at the job site during all working hours. Failure to maintain the public right-of-way according to this condition may result in the City performing the required maintenance at the developer's expense.

38. ENCROACHMENT PERMIT. All work in the public right-of-way, including any blockage or partial closure of sidewalks will require an Encroachment Permit. Special provisions such as limitations on works hours, protective enclosures, or other means to facilitate public access in a safe manner may be required.

39. GRADING PERMIT. All earthwork must comply with the City's Grading Ordinance. A Grading Permit must be issued by the public works department prior to site disturbance.

40. PERMIT ISSUANCES. Improvements plans signed approval from Iron House Sewer District and Diablo Water Districted is required prior to City of Oakley release of any construction permit for Grading and Drainage.

41. PUBLIC WORKS INSPECTIONS. The developer or their representative shall notify the Engineering Inspector at least forty-eight (48) hours before starting any work pertaining to on-site drainage facilities, grading or paving, and all improvements in approved plans. Failure to do so will result in rejection of work that was completed without inspection.

42. PRECONSTRUCTION MEETING. Prior to issuance of any permit or the commencement of any site work, the general contractor shall:

    a) Along with the project applicant, attend a pre-construction meeting with the City Engineer to discuss the project conditions of approval, working hours, site maintenance and other construction matters;

    b) Acknowledge in writing that they have read and understand the project conditions of approval and will make certain that all project sub-contractors have read and understand them prior to commencing work and that a copy of the project conditions of approval will be posted on site at all times during construction.

43. CONSTRUCTION STREET PARKING. No vehicle having a manufacturer's rated gross vehicle weight exceeding ten thousand (10,000) pounds shall be allowed to park on the portion of a street which abuts property in a residential zone without prior approval from the City Engineer.

44. EROSION CONTROL. Interim and final erosion control plans shall be prepared and submitted to the Public Works Department. A Notice of Intent (NOI) and Storm Water Pollution Prevention Plan (SWPPP) shall be submitted to the State

SMARTS system for projects disturbing more than one acre and obtain a WDID number. A maximum of two weeks is allowed between clearing of an area and stabilizing/building on an area if grading is allowed during the rainy season. Interim erosion control measures, to be carried out during construction and before installation of the final landscaping shall be included. Interim erosion control method shall include, but are not limited to: silt fences, fiber rolls (with locations and details), erosion control blankets, City standard seeding specification, filter berms, check dams, retention basins, etc. Provide erosion control measures as needed to protect downstream water quality during winter months. The grading, drainage, erosion control plans and SWPPP shall be in compliance with applicable measures contained in the City of Oakley's NPDES Permit.

45. DUST CONTROL. Blowing dust shall be reduced by timing construction activities so that paving and building construction begin as soon as possible after completion of grading, and by landscaping disturbed soils as soon as possible. Further, water trucks shall be present and in use at the construction site. All portions of the site subject to blowing dust shall be watered as often as deemed necessary by the City, or a minimum of three times daily, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas, and staging areas at construction sites in order to insure proper control of blowing dust for the duration of the project. Watering on public streets shall not occur. Streets will be cleaned by street sweepers or by hand as often as deemed necessary by the City Engineer, or at least once a day. Watering associated with on-site construction activity shall take place between the hours of 8 a.m. and 5 p.m. and shall include at least one late-afternoon watering to minimize the effects of blowing dust. All public streets soiled or littered due to this construction activity shall be cleaned and swept daily during the workweek to the satisfaction of the City. Demolition or earthwork activities shall be halted when wind speeds (instantaneous gusts) exceed 25 MPH. All trucks hauling soil, sand, or other loose debris shall be covered.

46. SILT AND MUD IN PUBLIC RIGHT-OF-WAY. It is the responsibility of contractor and homeowner to make sure that all dirt tracked into the public right-of-way is cleaned up daily. Mud, silt, concrete and other construction debris SHALL NOT be washed into the City's storm drains. Construction entrances must be in place per the Erosion Control Plan.

47. TRAFFIC CONTROL PLAN. The project sponsor will be required to work with the Public Works Department to develop a traffic control plan per the current California MUTCD. This plan will include, but not be limited to, the following measures:

    a) Construction activities shall be strategically timed and coordinated to minimize traffic disruption for schools, residents, businesses, and special events. The schools located on the haul route shall be contacted to help with the coordination of the trucking operation to minimize traffic disruption.

b) Flag persons shall be placed at locations necessary to control one-way traffic flow, if required. All flag persons shall have the capability of communicating with each other to coordinate the operation.

c) Prior to construction, advance notification of all affected residents and emergency services shall be made regarding one-way operation, specifying dates and hours of operation and lane closures on main arterial and collector streets and will be permitted only between the hours of 8:30AM to 2:30PM on M, T, TH & F. 8:30AM to 12:00PM on W.

d) The traffic control plan shall be reviewed for compliance to the project's Haul Route, approved by the City of Oakley.

e) A full road closure will require a detour plan and a road closure permit issued by the Public Works Department.

48. CONSTRUCTION MANAGEMENT PLAN. The Applicant shall submit a construction management plan that shall incorporate at a minimum the Earth Movement Plan, Traffic Control Plan, Project Schedule, site security fencing, employee parking, construction staging area, construction trailer, and proposed outhouse locations. The public street shall not be used for any construction related activities, including parking for workers and storage of vehicles.

49. RESTORATION OF PUBLIC IMPROVEMENTS. The developer shall repair or replace all existing improvements not designated for removal that are damaged or removed because of developer's operations. Improvements such as, but not limited to: curbs, gutters, sidewalks, driveways, signs, pavements, raised pavement markers, thermoplastic pavement markings, etc. shall be repaired and replaced to a condition equal to or better than the original condition. Existing improvement to be repaired or replaced shall be at the direction of the Public Works & Engineering Inspector and shall comply with all Title 24 Disabled Access provisions. Developer shall request a walk-through with the Engineering Construction Inspector before the start of construction to verify existing conditions.

50. SIDEWALK REPAIR. The developer shall repair and replace to existing City standards any sidewalk damaged now or during construction of this project. Sidewalk repair shall match existing color, texture and design, and shall be constructed per City Standard Details. The limits of sidewalk repair will be determined by the Public Works Inspector during the construction phase of the project.

51. CURB AND GUTTER. The developer shall repair and replace to existing City standards any curb and gutter damaged now or during construction of this project. New curb and gutter shall be constructed per City Standard Details. The limits of curb and gutter repair will be determined by the Public Works Inspector during the construction phase of the project.

52. CONSTRUCTION NOISE. Between the hours of 7:30 a.m. to 5:30 p.m., weekdays, construction, alteration or repair activities shall be allowed. No individual piece of equipment shall produce a noise level exceeding eighty-five (85) dBA at twenty-five (25) feet. If the device is located within a structure on the property, the measurement shall be made at distances as close to twenty-five (25) feet from the device as possible. The noise level at any point outside of the property plane shall not exceed eighty-five (85) dBA. Pickup and delivery of materials and equipment is restricted to the hours listed above unless prior written approval is obtained by the Public Works Department.

53. GOOD HOUSEKEEPING. Good housekeeping practices shall be observed at all times during the course of construction. Superintendence of construction shall be diligently performed by a person or persons authorized to do so at all times during working hours. The storing of goods and/or materials on the sidewalk and/or the street will not be allowed unless a special permit is issued by the Engineering Division. The adjacent public right-of-way shall be kept clear of all job-related dirt and debris at the end of the day. Dirt and debris shall not be washed into storm drainage facilities. The storing of goods and materials on the sidewalk and/or the street will not be allowed unless a special permit is issued. The developer's representative in charge shall be at the job site during all working hours. Failure to maintain the public right-of-way according to this condition may result in the City performing the required maintenance at the developer's expense.

THE FOLLOWING SHALL BE SATISFIED PRIOR TO THE APPROVAL OF THE GRADING PLAN:

54. ENVIRONMENTAL CLEAN UP. A Land Use Covenant approved by Department of Toxic Substances Control (DTSC) must be provided providing proof that the proposed use complies with land use restrictions placed by DTSC.

55. GEOLOGY AND SOIL MITIGATION MEASURES. A geotechnical investigation shall be conducted for the project to determine the surface and sub-surface conditions at the site and to determine the potential for surface fault rupture on the site. The geotechnical study shall provide recommendations for site grading as well as the design of foundations, retaining walls, concrete slab-on-grade construction, excavation, drainage, on-site utility trenching and pavement sections. The soils report shall include specific criteria and standards governing site grading, drainage, pavement design, retaining wall design, and erosion control. All recommendations of the investigation shall be incorporated into project plans. One copy of the geologic report shall be submitted with the grading permit and public improvement application. Prior to issuance of any permit, the applicant’s soils engineer shall review the final grading and drainage plans to ensure that designs for foundations, retaining walls, site grading, and site drainage are in accordance with their recommendations. The applicant’s soils engineer’s approval shall then be conveyed to the City either by letter or by signing the plans.

56. GRADING.

a) Grade any slopes with a vertical height of four (4) feet or more at a slope of 3H to 1V. Retaining walls that may be installed to reduce the slope must be masonry or concrete block and comply with the City's building code.

b) Retaining wall or other suitable option acceptable by the City Engineer is required where the grade differential between property or adjacent lots are greater than 6". Retaining walls are required to be identified on the grading plans and shall have a note stating a separate building permit is required for retaining wall greater than four (4) feet in height.

c) At least one week prior to commencement of grading, the applicant shall post the site and mail to the owners of property within 300 feet to the exterior boundary of the project site notice that construction work will commence. The notice shall include a list of contact persons with the name, title, phone number and area of responsibility. The person responsible for maintaining the list shall be included. The list shall always be kept current and shall consist of persons with authority to indicate and implement corrective action in their area of responsibility. The names of the individual responsible for noise and litter control shall be expressly identified in the notice. The notice shall be reissued with each phase of major grading activity. A copy of the notice shall be concurrently transmitted to the City Engineer. The notice shall be accompanied by a list of the names and addresses of the property owners noticed, and a map identifying the area noticed.

d) Submit a Haul Route Plan to the City Engineer for review and approval prior to importing or exporting any material from the site. The plan shall include the location of the borrow or fill area, the proposed haul routes, the estimated number and frequency of trips, and the proposed schedule of hauling. Based on this plan, the City Engineering shall determine whether pavement condition surveys must be conducted along the proposed haul routes to determine what impacts the trucking activities may have. The project proponents shall be responsible to repair to their pre-construction condition any roads along the utilized routes.

e) Prior to commencement of any site work that will be result in a land disturbance of one acre or more, the applicant shall provide evidence to the City Engineer that the requirements for obtaining a State General Construction Permit have been met. Such evidence may be a copy of the Notice of Intent Letter sent by the State Water Resources Control Board. The WDID Number shall be shown on the grading plan prior to approval by the City Engineer.

f) The burying of any construction debris is prohibited on construction sites

57. NPDES – NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM. Comply with all rules, regulations and procedures of the NPDES for municipal, construction and industrial activities as promulgated by the California State Water Resources Control Board, the Regional Water Quality Control Board (Central Valley – Region IV), including the Stormwater C.3 requirements as detailed in the Guidebook available at www.cccleanwater.org

Compliance shall include developing long-term best management practices (BMP's) for the reduction or elimination of storm water pollutants. The project design shall incorporate wherever feasible, the following long-term BMP's in accordance with the Contra Costa Clean Water Program for the site's storm water drainage.

- Offer pavers for household driveways and/or walkways as an option to buyers.
- Minimize the amount of directly connected impervious surface area.
- Delineate all storm drains with "No Dumping, Drains to the Delta" permanent metal markers per City Standards.
- Construct concrete driveway weakened plane joints at angles to assist in directing run-off to landscaped/pervious areas prior to entering the street curb and gutter.
- Distribute public information items regarding the Clean Water Program to buyers.
- Other alternatives as approved by the City Engineer.
- Prepare an Operations and Maintenance Manual for the project's storm water control measures.

THE FOLLOWING SHALL BE SATISFIED PRIOR TO THE APPROVAL OF THE IMPROVEMENT PLAN:

58. IMPROVEMENT PLAN APPROVAL. Improvements plans shall be signed approved from Iron House Sewer District and Diablo Water Districted, prior to approval of the City Engineer and release of any construction permit for grading and drainage improvements.

59. PUBLIC IMPROVEMENTS. Project streets within public right of way to must be designed to City public road standards and as shown on the Tentative Map with the following exceptions:

    a. The minimum street grade may be lowered from the standard 1% to 0.75% provided that the project proponent demonstrates that the City's drainage standards can be achieved.

    b. Submit a turning radius exhibit to the City Engineer for review and approval to illustrate that the ninety-degree turns of project streets can accommodate the largest expected vehicle to use the streets without the inclusion of City standard elbows. If the exhibit illustrates that elbows are

necessary to accommodate the expected traffic, then they shall be included in the improvement plans.

60. ROADWAY IMPROVEMENTS. The following improvements shall be installed by the developer as shown on the Tentative Map. Plans for those improvements shall be prepared by a California registered civil engineer, reviewed and approved by the City.

    a. Frontage Improvements. Bridgehead Road shall be constructed with curb, gutter, sidewalk, street lights, pavement widening, signing, striping, and storm drainage as required and shown in the Tentative Map. Frontage improvements shall include a 2 inch grind and overlay for the existing southbound lanes within the project limits.

    b. Onsite Improvements - Wilbur Avenue, A Street, B Street, C Street, and D Street shall be constructed per City Standards for a public road with the modifications shown on the Tentative Map. All other streets shall be installed to private roadway standards to the satisfaction of the City Engineer and East Contra Costa Fire District. Submit a Geotechnical Report that recommends the pavement section necessary to accommodate the truck traffic anticipated for this roadway network.

    c. Offsite Improvements – The following improvements shall be installed consistent with the mitigation measures outlined in the Traffic Impact Report for the project to the satisfaction of the City Engineer:

        i. Wilbur Avenue & Bridgehead Road – Install a four-way traffic signal with crosswalks. Improvements must be constructed and operational prior to the release of the Certificate of Occupancy of the fifth building constructed on site. *(MM 4.4-8a)*

        ii. Main Street at Bridgehead Road/Neroly Road –
        1) Installation of a dual eastbound left turn lane and a dual northbound left turn lane,
        2) Implementation of signal coordination with the adjacent traffic signal at the SR 160 Eastbound Ramps.
        Improvements must be constructed and operational prior to the release of Certificate of Occupancy of the first building constructed on site. *(MM 4.4-7a)*

        iii. Big Break Road at Main Street –
        1) Widening of the southbound Big Break Road approach to the intersection to allow for an additional approach lane,
        2) Construction of a dual left turn lane on the eastbound Main Street approach to the intersection,

3) Widening of the eastbound and westbound Main Street approaches to allow for three through lanes in each direction.
The fair share contribution for these improvements is due two weeks prior to the approval of the Traffic Impact Fee Update or issuance of the building second building permit, whichever comes first. *(MM 4.4-8b)*

iv. Oakley Road at Live Oak Avenue – Widening of the westbound Oakley Road approach to the intersection to allow for a separate right turn lane. The fair share contribution for these improvements is due two weeks prior to the approval of the Traffic Impact Fee Update or issuance of the building second building permit, whichever comes first. *(MM 4.4-2)*

v. Main Street at Empire Avenue– Installation of a dual westbound left turn lane. The fair share contribution for these improvements is due two weeks prior to the approval of the Traffic Impact Fee Update or issuance of the building second building permit, whichever comes first. *(MM 4.4-7b)*

vi. Bridgehead Road between the Planned River Oaks Crossing Entrance and the Main Street and Neroly Road Intersection – Widening of this segment of Bridgehead Road from a two lane to a four lane cross-section. Improvements must be constructed and operational prior to the release of Certificate of Occupancy of the first building constructed on site. *(MM 4.4-9)*

61. DRAINAGE IMPROVEMENTS.

a. Offsite Improvements – Design and construct the proposed Del Antico Basin modification, as described in the Stormwater Control Plan, concurrently with the Phase 1 Backbone Infrastructure. The design and construction is not to exceed a total contribution (construction cost) of two-hundred and fifty thousand dollars ($250,000.00). One acre of the basin bottom shall be excavated and replaced with an 18-inch layer of engineered biosoil over a 12-inch layer of drain rock to the satisfaction of the City Engineer. The basin modification shall be constructed prior to the issuance of certificate of occupancy for any buildings to the satisfaction of the City Engineer.

b. Collect and convey all stormwater entering and /or originating on this property, without diversion and within an adequate storm drainage facility, to an adequate natural watercourse having definable bed and banks, or to an existing adequate public storm drainage facility that conveys the storm waters to an adequate natural watercourse.

c. Submit a final hydrology and hydraulic report including 10-year and 100-year frequency event calculations for the proposed drainage system and stormwater pond to the city Engineer for review and approval. The report shall includes study of the downstream stormdrain facilities to confirm its adequacy and mitigate on-site so that the peak flows of post-project conditions do not exceed the pre-project peak flows.

d. Design and construct all storm drainage facilities in compliance with the Municipal Code and City design standards.

e. Prevent storm drainage from draining across the sidewalk(s) and driveway(s) in a concentrated manner.

f. Dedicate a public drainage easement over the drainage system that conveys storm water run-off from public streets.

g. On-site parking area and driveways shall not surface drain across public sidewalk or driveway aprons.

62. SIGHT DISTANCE EXHIBIT. For the project driveways' ingress and egress, provide an exhibit that will analyze the sight distance required for the appropriate speed limit identified with this project as required by the City Engineer.

63. DESIGN CHANGES. The Applicant's registered Engineer shall notify the City Engineer, in writing, at least 72 hours in advance of all differences between the proposed work and the design indicated on the plans. Any proposed changes shall be subject to the approval of the City before altered work is started. A plan revision must be submitted for approval by the City Engineer.

64. JOINT TRENCH PLANS. The applicant shall submit Joint Trench Composite Plans to the City for review prior to approval of improvement plans or recordation of the final map. The developer shall provide joint trench composite plans for the underground electrical, gas, telephone, cable television and communication conduits and cables including the size, location and details of all trenches, locations of building utility service stubs and meters and placements or arrangements of junction structures as a part of the improvement Plan submittals for the project. The composite drawings and/or utility improvement plans shall be signed by a licensed civil engineer. The joint trench plans shall include street and/or site lighting and associated photometrics. A letter shall be provided by PG&E stating that public streetlight billing will be per Rule LS2A, and that private lights shall be metered with billing to the owner. Pole numbers, assigned by PG&E, shall be clearly delineated on the plans.

65. UTILITIES & UNDERGROUNDING.
    a) Underground all new and existing utility distribution facilities per City of Oakley code section Title 6 Chapter 8 Underground Utility Districts.

b) All utility boxes shall be installed underground, and all wires and cables must be installed in conduits. Compliance with this condition shall be at the discretion of the City Engineer.

c) Above ground utility boxes shall be camouflaged per the review and approval of the City Engineer.

d) A written approval from Diablo Water District and Iron House Sanitary District must be provided that all underground utility improvements have passed all testing requirements prior to commencement of paving a street.

66. STREET LIGHTS. Install streetlights along all public streets as required by the City Engineer. The City Engineer shall determine the final number and location of the lights, and the lights shall be on an LS2-A rate service. Street lights shall be spun aluminum "cobra head" style as required by the City of Oakley Standard Plans.

67. LANDSCAPING IN PUBLIC RIGHT OF WAY.
    a) Install public right-of-way landscaping along the project's frontages as required by the City Engineer and Community Development Director.

    b) Maintain all landscaping within the public right-of-way until such time that the adjacent roadway improvements have been accepted for maintenance. Frontage landscaping shall be maintained by the owner.

    c) Prior to the issuance of certificate of occupancy, an inspection will be performed to verify the health and location of the street trees. Trees in poor health or those without adequate clearance from utilities will require replacement or relocation.

68. FENCING. Any proposed fencing and walls shall be located on private property and maintained by the property owner or owner.

THE FOLLOWING PUBLIC WORKS AND ENGINEERING CONDITIONS OF APPROVAL SHALL BE SATISFIED PRIOR TO THE APPROVAL OF THE FINAL MAP:

69. BONDS. The applicant shall supply suitable securities for all site improvements that are a part of the development in a form acceptable to the City in the amount of 100% (performance), 50% (labor and material) prior to issuance of any permit.

70. FINAL MAP. Submit a Final Map prepared by a Licensed Land Surveyor. The parcel map shall be recorded, and the Subdivision Agreement must be executed before any building permits are issued. Insurance shall be provided per the terms of the Subdivision Agreement. Exception may be granted if the applicant wishes to file for a lot line adjustment prior to the recordation of the Final Map prior to the

release of the building permit or secure a letter from the owner that no lots can be sold until the Final Map is recorded.

71. DEDICATIONS. The following shall be dedicated on the final map. The dedication shall be recorded before any permits are issued.

    a. Dedicate the required right-of-way along the project frontage as shown in the typical sections of the Tentative Map.
    b. Public Utility Easement (PUE): 5' PUE beyond Parcel A, B & C and as required.
    c. Ingress-egress, storm drainage easements, as required.

    Any necessary rights of way, rights of entry, permits and/or easements for the construction of off-site, temporary or permanent, public and private road, utility and drainage improvements shall be furnished to the City. Prior to the issuance of building number 1 the applicant must provide the necessary documentation that all existing easement no longer necessary have been quitclaimed.

72. PRIVATE EASEMENTS. Agreements detailing rights, limitations, and responsibilities of involved parties shall accompany each private easement. The easements and associated agreements shall be recorded simultaneously with the final map.

73. EASEMENTS. All easements no longer in use shall be abandoned/quitclaim. Recorded quitclaim documents or a certificate of compliance letter that all easements are not in conflict, nor restricts the construction of the proposed improvements. Documentation shall be provided to the City prior to release of any building permits.

74. UTILITY SETBACKS. Building foundations shall be set back from utility lines a sufficient distance to allow excavation of the utility without undermining the house foundation. The City Engineer shall determine the appropriate setback based on the depth of the utility, input from the project soils engineer, and the type of foundation.

THE FOLLOWING SHALL BE SATISFIED PRIOR TO THE ISSUANCE OF THE <u>BUILDING PERMIT</u>:

75. PAD CERTIFICATION. A letter from a licensed land surveyor stating that the building pad was constructed in accordance with the approved plans shall be provided prior to the issuance of the building permit.

76. SOILS ENGINEER CONSTRUCTION OBSERVATION. During construction, all excavations and grading shall be inspected by the applicant's soils engineer prior to placement of concrete and/or backfill so they can verify that the actual conditions are as anticipated in the design-level geotechnical report and recommend

appropriate changes in the recommendations contained in the report, if necessary. The results of the construction observation and testing should be documented in an “as-built” letter/report prepared by the applicants’ soils engineer and submitted to the City before any building permit is granted.

77. AGREEMENT FOR STORMWATER BEST MANAGEMENT PRACTICES INSPECTION AND MAINTENANCE OBLIGATIONS. The property owner shall enter into an agreement with the City for maintenance of the stormwater filtration devices required to be installed on this project. The agreement will specify that certain routine maintenance shall be performed by the property owner and will specify device maintenance reporting requirements. The agreement will also specify routine inspection requirements, permits and payment of fees. The agreement shall be recorded prior to release of any occupancy permits.

78. AS-BUILT PLANS. After completion of the construction of all work, the original plans shall have all changes (change orders and field changes) clearly marked. The "as-built" plans shall again be signed and "wet-stamped" by the civil engineer who prepared the plans, attesting to the changes. The original "as-built" plans shall be review and approved the Engineering Inspector. A Mylar and AutoCAD disk of the approved "as-built" plans shall be provided to the City before acceptance of improvements.

79. IMPACT FEES

Comply with the requirements of the development impact fees listed below, in addition to those noticed by the City Council in Resolution 85-00 and 08-03. The applicant shall pay the fees in the amounts specified in Section 8 of the Development Agreement prior to building permit issuance:

A. Pay to the City $3,000,000 (three million dollars) as full satisfaction of its obligation for City traffic impact fees as required by Ordinance No. 14-00, adopted by Resolution 49-03 as amended by 49-17.);

B. Developer shall voluntarily contribute to the City the amount of $850,000 (eight hundred and fifty thousand dollars) for the City, in its sole discretion, to utilize in a manner it believes best to serve and benefit its residents;

C. Regional Transportation Development Impact Mitigation Fee (authorized by Ordinance No. 14-00, adopted by Resolution No. 73-05).

D. Public Facilities Fee (authorized by Ordinance No. 05-00, adopted by Resolution No. 18-03);

E. Fire Facilities Impact Fee (adopted by Resolution No. 09-01);

F. General Plan Fee (adopted by Resolution No. 53-03);

G. East Contra Costa County Habitat Conservation Plan Fee (adopted by Resolution No. 112-07 & 124-07).

The applicant is required to fund the Traffic Impact Fee Update removing the Live Oak Extension and Live Oak Railroad Crossing on the existing project list pending approval of the General Plan Update to remove these projects in our roadway network.

80. ANNEXATIONS

Prior to the issuance of the first occupancy permit, the developer shall establish a funding mechanism to cover the annual financial impact that their project has on police services, maintenance and operation costs associated with regional, community, and neighborhood parks, street landscaping, street lights, stormwater facilities, street sweeping, streets and sidewalk maintenance within the project. Forming a new Community Facilities District (CFD) that includes tax components to address these financial impacts shall satisfy this requirement. All costs associated with meeting this requirement shall be paid for by the developer. Compliance with this requirement shall be to the satisfaction of the Public Works Director.

ADVISORY NOTES

The following Advisory Notes are provided to the applicant as a courtesy but are not a part of the conditions of approval. Advisory Notes are provided for the purpose of informing the applicant of additional ordinance requirements that must be met in order to proceed with development.

A. The applicant/owner should be aware of the expiration dates and renewing requirements prior to requesting building or grading permits.

B. The project will require a grading permit pursuant to the Ordinance Code.

C. Applicant shall comply with the requirements of Iron House Sanitary District.

D. The applicant shall comply with the requirements of the Diablo Water District.

E. Comply with the requirements of the East Contra Costa Fire Protection District.

F. Comply with the requirements of the Building Inspection Division. Building permits are required prior to the construction of most structures.

G. This project may be subject to the requirements of the Department of Fish and Game. It is the applicant's responsibility to notify the Department of Fish and Game, P.O. Box 47, Yountville, California 94599, of any proposed construction within this

development that may affect any fish and wildlife resources, per the Fish and Game Code.

H. The applicant shall be responsible for paying the County Recorder's Fee for the Notice of Determination as well as the State Department of Fish and Game's Filing Fee.

ORDINANCE NO. XX-19

AN ORDINANCE OF THE CITY OF OAKLEY CITY COUNCIL APPROVING THE DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF OAKLEY AND NP OAKLEY, LLC FOR THE OAKLEY LOGISTICS CENTER PROPERTY LOCATED AT 6000 BRIDGEHEAD ROAD (APN'S: 037-020-008, -009, -010, AND -014 THROUGH -022) – OAKLEY LOGISTICS CENTER DEVELOPMENT AGREEMENT (DA 01-18)

RECITALS

WHEREAS, on October 27, 2003 the City Council of the City of Oakley adopted Ordinance Number 12-03, which, enacted a Development Agreement Ordinance, Title 9, Chapter 3 of the Municipal Code establishing the procedures and requirements for the consideration of development agreements pursuant to California Government Code Section 65864 et seq.; and

WHEREAS, on December 17, 2018, NP Oakley, LLC., ("Applicant") submitted an application requesting 1) Certification of the Environmental Impact Report, including adoption of Findings of Fact and a Statement of Overriding Considerations; 2) Adoption of the Mitigation Monitoring and Reporting Program; and approval of 3) a General Plan Amendment (GPA 04-18) to amend the land use designation of the 143.3-acre project site from Light Industrial (LI) /Business Park (BP) /Utility Energy (UE) to Light Industrial (LI)) with the remainder of the subject property being Delta Recreation (DR), and to remove the proposed extension of Live Oak Avenue from Figure 3-1, Circulation Diagram, of the General Plan; 4) a Rezone (RZ 08-18) to amend the zoning designation of the 375.7-acre subject property from Specific Plan (SP-3) to Planned Unit Development (P-1); 5) a Vesting Tentative Map (TM 05-18) to create eight parcels within the 375.7-acre subject property; 6) Design Review (DR 12-18), including the Final Development Plan, for the project's design, including site plans, architectural elevations, conceptual landscape plans, and other physical development; and 7) Development Agreement (DA 01-18) for the proposed development between the City of Oakley and the project applicant. The project site is located at 6000 Bridgehead Road (APN's: 037-020-008, -009, -010, and -014 through -022). ("Project"); and

WHEREAS, the "Project" was analyzed under the Oakley Logistics Center Project EIR (SCH # 2019029113); and

WHEREAS, on December 5, 2019, the Notice of Public Hearing for the Project was duly noticed in the Contra Costa Times, a newspaper of general distribution. On December 5, 2019, the Notice of Public Hearing was posted at Oakley City Hall located at 3231 Main Street, outside the gym at Delta Vista Middle School located at 4901 Frank Hengel Way and outside the library at Freedom High School located at 1050 Neroly Road. The notice was also mailed out to all owners of property within a 500-foot radius of the subject property's boundaries, to parties requesting such notice, and to outside agencies; and

WHEREAS, on December 17, 2019, the City Council certified the Oakley Logistics Center Project EIR (SCH # 2019029113) and adopted a Mitigation Monitoring and Reporting Program for the project; and

WHEREAS, on December 17, 2019, the City Council held a properly noticed public hearing at which it considered the Project's Development Agreement, Staff Report, Oakley 2020 General Plan, the City's Zoning Ordinance, and all comments received in writing and all testimony received at the public hearing (together the "Record"); and

WHEREAS, development of the Project in accordance with the Development Agreement will be consistent with the approved General Plan Amendment, Rezone, Vesting Tentative Map and Design Review for the project and will provide for orderly growth consistent with the goals, policies, and other provisions of the General Plan; and

WHEREAS, in exchange for the foregoing benefits to the City, the Development Agreement vests Developer's right to develop the Project as approved by the City Council, subject to the terms and conditions contained in the Development Agreement and the conditions of approval for the Vesting Tentative Map and Design Review and other discretionary approvals for the Project. The Development Agreement is intended to grant Developer a vested right to develop the project as provided therein, and to provide the City with certain binding assurances with respect to the nature, scope and timing of such development and related public improvements; and

WHEREAS, for those reasons, the City has determined that the project is a development for which the Development Agreement is appropriate in order to achieve the goals and objectives of the City's land use planning policies; and

WHEREAS, on the basis of (a) the foregoing Recitals, (b) the City of Oakley 2020 General Plan, (c) the Oakley Logistics Center Property EIR and (d) the specific conclusions set forth below, as supported by substantial evidence in the Record.

The City Council of the City of Oakley does ordain as follows:

SECTION 1. Findings

Pursuant to Chapter 6.12 of the Oakley Municipal Code, the City Council of the City of Oakley hereby finds and determines as follows:

A. The City has imposed conditions on the project that will protect the property to the urban level of flood protection in urban and urbanizing areas or the national Federal Emergency Management Agency standard of flood protection in urbanized areas; and

B. The property is located in an area of potential flooding of three feet or less from sources other than local drainage (i.e., localized conditions that may occur anywhere in a community, such as localized rainfall, water from stormwater and drainage

problems, and water from temporary water and wastewater distribution system failure) or potential flooding from local drainage that meets the criteria of the national Federal Emergency Management Agency standard of flood protection.

Pursuant to Chapter 9.3 of the Oakley Municipal Code, the City Council of the City of Oakley hereby finds and determines as follows:

A. Regarding the application requesting approval of a Development Agreement by between the City of Oakley and NP Oakley, LLC. for the Oakley Logistics Center Property:

1. The Project is consistent with the objectives, policies, general land uses and programs specified in the Oakley 2020 General Plan. The Project will consist of approximately 2.0 million SF of Class A light industrial, warehousing, distribution, e-commerce fulfillment, and light manufacturing space. The Project is consistent with each of the following General Plan Policies:

- 2.1.1 - Promote a combination of **employment** and residential uses that **provide both jobs** and housing for Oakley's residents.

- 2.1.4 - Promote the placement of the most intensive non-residential development (Commercial, Business Park and Light Industrial) in the Northwest Oakley Planning Area as defined in Figure 2-3.

- 2.1.10 - When considering large scale development projects, the City may, at its discretion, authorize a Specific Plan (SP) or Planned Unit Development (PUD) approach that allows flexibility within a project area. Under this approach, the distribution of land uses may vary from the land uses as designated on the Land Use Diagram. The SP/PUD approach shall not allow either an overall greater development density than allowed under the Land Use Diagram, or a combination of uses that undermines the overall intent of the project area as established under the General Plan policies and Land Use Diagram.

- 2.4.1 - The City of Oakley does not support or accommodate general Heavy Industrial uses. The City does allow and encourage Light Industrial and Utility Energy uses in appropriate locations.

- 2.4.3 - Ensure there is adequate land available to accommodate industrial development.

- 5.1.3 - Actively recruit businesses and industries that are compatible with the General Plan's land use and implementation goals and policies and with the EDP.

2. The Project is compatible with the uses authorized in, and the regulations prescribed for, the land use district in which the real property is located in that the project is designed in compliance with the Oakley 2020 General Plan land uses on the subject property, and has received entitlement's for a General Plan Amendment, Rezone, Vesting Tentative Map and Design Review;

3. The Project is in conformity with public convenience, general welfare and good land use practice. The Oakley Logistic Center Project EIR, identified and provided mitigation measures for significant environmental impacts associated with development of the Oakley Logistics Center project. The Development Agreement authorizes development consistent with the certified EIR and approved entitlements;

4. For the reasons set forth in Finding 3, the Project will not be detrimental to the health, safety and general welfare; and

5. The Project will not adversely affect the orderly development of property. The Project will actually enhance the orderly development of property by assuring that improvements to the property will be consistent with the certified EIR and applicable entitlements approved for the property.

SECTION 2. Approval of the Development Agreement

The City Council hereby approves the Oakley Logistics Center Property Development Agreement (DA 01-18) (Exhibit "A") and authorizes and directs the Mayor to sign it.

SECTION 3. Recordation of Development Agreement

Within ten (10) days after the Mayor executes the Development Agreement, the City Clerk shall submit the Agreement to the County Recorder for recordation.

SECTION 4. Effective Date and Posting

This ordinance shall take effect and be in force thirty (30) days from and after the date of its passage. The City Clerk shall cause the ordinance to be published within fifteen (15) days after its passage in a newspaper of general circulation, or by publishing a summary of the proposed ordinance, posting a certified copy of the proposed ordinance in the City Clerk's Office at least five (5) days prior to the City Council meeting at which the ordinance is to be adopted, and within fifteen (15) days after its adoption, publishing a summary of the ordinance with the names of the Council Members voting for and against the ordinance.

The foregoing ordinance was adopted with the reading waived at a regular meeting of the Oakley City Council on _____, 2019 by the following vote:

THIS DEVELOPMENT AGREEMENT ("**Development Agreement**" or "**Agreement**") is between the CITY OF OAKLEY, a municipal corporation ("**City**"), and NP OAKLEY, LLC, a Missouri limited liability company ("**Developer**") pursuant to the authority of §65864 et seq. of the California Government Code. The City and Developer are sometimes hereafter referred to collectively as the "**Parties**," individually as a "**Party**."

RECITALS

A. California Government Code § 65864 et seq. authorizes the City to enter into an agreement for the development of real property with any person or entity having a legal or equitable interest in such property in order to establish certain development rights in such property.

B. Developer has a legal interest in approximately 375 acres of property located at 6000 Bridgehead Road in Oakley ("**Property**") described in **Exhibit A-1** and depicted in **Exhibit A-2**, attached to this Agreement. Developer intends to develop a logistics center, including industrial and distribution uses, on approximately 150 acres of the Property. The remaining Property is not proposed to be developed ("**Project**").

C. The Property is the site of the former DuPont Chemical Plant that produced chlorofluorocarbons, fuel additive, anti-knock compounds and titanium dioxide. All manufacturing operations ceased in 1999. Over the past many years, the Property has been undergoing extensive clean-up and remediation efforts through the Department of Toxic Substance Control (DTSC). These remediation efforts are expected to be completed by the first quarter of 2020.

D. The General Plan identifies the Property as a major growth area and specifically targets the Property for economic development, with anticipated commercial and light industrial uses.

E. On December 13, 2018, Developer filed development applications with the City to develop the Property with approximately two million square feet of Class A light industrial, warehousing, distribution, e-commerce and light manufacturing space. The Project is expected to provide permanent employment opportunities for more than 2,000 persons.

F. On _____ 2019, the Oakley City Council approved the following actions relating to the development of the Property:

(i) Environmental Impact Report for the Project. Pursuant to the California Environmental Quality Act of 1970, Pub. Res. Code §§ 21000-21178, as amended and the Guidelines for Implementation of the California Environmental Quality Act, Cal. Code Regs. Title 14, §§ 15000-15387 (collectively, "**CEQA**"), the City Council certified a final environmental impact report for the Project (SCH No. 20190029119) pursuant to Resolution No. ____ ("**Project EIR**").

(ii) General Plan Amendment. The City Council, after a duly noticed public hearing and certification of the Project EIR, adopted Resolution No. _____, approving a general plan amendment to 1) change the Business Park and Utility Energy land use designations on the Property to Light Industrial, and 2) remove the proposed extension of Live Oak Avenue through the Project site as shown in Figure 3-1 Circulation Diagram ("**General Plan Amendment**").

(iii) Planned Development (P-1) Zoning. The City Council, after a duly noticed public hearing and certification of the Project EIR, introduced and adopted Ordinance No. ____ rezoning the Property from Specific Plan 3 (SP-3) to Planned Development (P-1) ("**Rezoning**").

(iv) Final Development Plan. The City Council, after a duly noticed public hearing and certification of the Project EIR, introduced and adopted Ordinance No. ____ approving the final development plan ("**Development Plan**").

(v) Vesting Tentative Map. The City Council, after a duly noticed public hearing and certification of the Project EIR, adopted Resolution No. ___, approving a vesting tentative map (TM 05-18) to subdivide approximately 150 acres into eight (8) parcels ("**Vesting Tentative Map**").

G. Consistent with the Vesting Tentative Map, Developer has prepared a Preliminary Phasing Plan to facilitate development as shown in **Exhibit B ("Preliminary Phasing Plan")**. The General Plan Amendment, Rezoning, Development Plan, Vesting Tentative Map, Preliminary Phasing Plan, and this Development Agreement are referred to as "**Project Approvals**."

H. The City Council has found that, among other things, this Development Agreement is consistent with its General Plan, as amended and mentioned in Recital F(ii) above, and has been reviewed and evaluated in accordance with California Government Code §65864 et seq.

I. The City Council has further found that the remediation of the Property has come at great expense and is necessary before redevelopment can occur on the Property. The Council also finds that the redevelopment of the Property with employment generating uses adjacent to a major highway is an essential component of the City's vision for economic development and growth as contemplated in the General Plan. The City further finds that the tax revenue generated from the Project will provide a positive, long-term financial benefit to the City and its residents.

J. This Development Agreement vests Developer with the right to develop the Property consistent with the Project Approvals and any other necessary approvals required by the City that are consistent with and necessary to implement the Project Approvals ("**Subsequent Approvals**").

K. This Development Agreement has been properly reviewed and evaluated by the City in accordance with CEQA. The Project EIR thoroughly analyzed and reviewed all potential significant environmental impacts that could result from approval

and implementation of the Project Approvals. This Development Agreement vests Developer with the right to develop the Property consistent with the Project Approvals.

L. On _____, the City Council waived the first reading, and introduced an ordinance relating to the approval of this Development Agreement. On _____, the City Council waived the second reading and adopted Ordinance No. _____ approving this Development Agreement.

NOW, THEREFORE, with reference to the foregoing recitals and in consideration of the mutual promises, obligations and covenants herein contained, City and Developer agree as follows:

AGREEMENT

Section 1. Description of Property.

The Property which is the subject of this Development Agreement is depicted and described in **Exhibit A-1** and **Exhibit A-2**.

Section 2. Interest of Developer.

The Developer has a legal interest in the Property and desires to develop the Property consistent with the Project Approvals.

Section 3. Relationship of City and Developer.

It is understood that this Development Agreement is a contract that has been negotiated and voluntarily entered into by the City and Developer and that the Developer is not an agent of the City. The City and Developer hereby renounce the existence of any form of joint venture or partnership between them, and agree that nothing contained herein or in any document executed in connection herewith shall be construed as making the City and Developer joint venturers or partners.

Section 4. Effective Date and Term.

Section 4.1 Effective Date.

The effective date of this Development Agreement shall be thirty (30) days after the adoption of Ordinance No. _____approving the Agreement, as set forth in Recital L **("Effective Date**").

Section 4.2 Term.

The term of this Development Agreement ("**Term**") shall commence on the Effective Date and extend to December 31, 2034, unless the Term is otherwise terminated, modified or extended by circumstances set forth in this Agreement. This Development Agreement will automatically terminate if Developer or an affiliate of Developer no longer has an equitable interest or does not acquire a legal interest in the

Property, or portions thereof, and the Development Agreement is not transferred or assigned to another party as set for in Section 17.

Section 4.3 Life of Subdivision Maps, Development Plans and other Approvals.

The term of any time-limited City approval and permit, such as tentative subdivision maps and development plans, if initially shorter than the remaining term of this Development Agreement, shall automatically be extended for the duration of this Agreement (including any extensions). The term of any approval, including the Project Approvals or any Subsequent Approvals, that is longer than the remaining Term of this Agreement shall only be extended as provided by State or City law. The Term of this Agreement and the term of any Project Approvals or Subsequent Approvals shall not include any period of time during which a development moratorium (including, but not limited to, a water or sewer moratorium) or the actions of other public agencies that regulate land use, development or the provision of services to the land, prevents, prohibits or delays the construction of the Project or a lawsuit involving any such development approvals or permits is pending.

Section 5. Use of the Property.

Section 5.1 Right to Develop.

Developer shall have the vested right to develop the Property in accordance with the terms and conditions of the Project Approvals, Subsequent Approvals and this Development Agreement. To the extent the Project Approvals and this Agreement conflict, the terms of this Agreement shall prevail.

Section 5.2 Permitted Uses.

The permitted uses of the Property, the density and intensity of use, the height, bulk and size of proposed buildings, general provisions for reservation or dedication of land for public purposes and general location and maintenance of on-site and off-site improvements, general location of public utilities, and other terms and conditions of development applicable to the Property, shall be those set forth in the Project Approvals, Subsequent Approvals and this Development Agreement.

Section 5.3 Timing of Project Construction, Phasing and Completion.

Developer intends to build the Project in accordance with the Preliminary Phasing Plan as shown in **Exhibit B** attached to this Agreement. Notwithstanding the Preliminary Phasing Plan or any provision of this Development Agreement, City and Developer expressly agree that there is no requirement that Developer initiate or complete development of the Property or any particular phase of the Property within any particular period of time, and City shall not impose such a requirement on any Project Approvals or Subsequent Approvals, except to ensure that necessary infrastructure is completed in an orderly fashion as determined by the City Engineer and agreed to by the Parties. Developer's discretion regarding the timing of construction and completion of the Project shall not affect Developer's obligation to diligently pursue to complete all

phases of the development once initiated. The Parties otherwise acknowledge that Developer cannot at this time predict when or the rate at which or the order in which phases will be developed. Such decisions depend upon numerous factors that are not within the control of Developer, such as market orientation and demand, interest rates, competition and other similar factors. In light of the foregoing, the Parties agree that Developer shall be able to develop in accordance with Developer's own time schedule as such schedule may exist from time to time, and Developer shall determine which part of the Property to develop first, and at Developer's chosen schedule. In particular, and not in limitation of any of the foregoing, since the California Supreme Court held in *Pardee Construction Co. v. City of Camarillo*, 37 Cal.3d 465 (1984), that the failure of the parties therein to consider and expressly provide for the timing of development resulted in a later-adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the Parties' desire to avoid that result by acknowledging that Developer shall have the right to develop the Property in such order and at such rate and at such times as Developer deems appropriate within the exercise of its subjective business judgment. Nothing in this Agreement shall exempt Developer from completing work required by a subdivision improvement agreement or similar agreement in accordance with the terms thereof, nor shall this Section of the Agreement affect the term of this Agreement or any related Project Approvals or Subsequent Approvals.

Section 5.4 Project Changes.

The Parties acknowledge that flexibility may be needed at the time of actual construction of the Project to respond to market demands and conditions. By way of example only, market conditions may dictate that two buildings as shown in the Project Approvals should be incorporated into a one building and/or that the location of internal roadways be changed. These potential changes are referred to as "**Project Changes**." As long as any Project Changes are substantially consistent with the Project Approvals and do not cause any new or increased significant environmental impact, the location of Project Changes shall be approved administratively by the City and shall not require the Project Approvals or this Development Agreement to be amended; such Project Changes shall automatically be incorporated into the Project Approvals and this Development Agreement.

Section 6. Applicable Law, Regulations and Official Policies

Section 6.1 Rules for Permitted Uses.

Unless otherwise expressly provided in this Section 6 of this Development Agreement, for the Term of this Agreement, the City's ordinances, resolutions, rules, regulations and official policies governing the permitted and conditional permitted uses of the Property, governing density and intensity of use of the Property and the maximum height, bulk and size of proposed buildings shall be those in force and effect on the Effective Date of this Agreement ("**Applicable Law**"). Notwithstanding the foregoing, Developer may elect at its sole discretion to comply with or receive the benefits of changes in Applicable Law by providing written notice to City of said election.

Section 6.2 Rules for Design and Construction of Public Improvements.

The ordinances, resolutions, rules, regulations and official policies governing design, improvement and construction standards and specifications applicable to public improvements to be constructed by Developer shall be those in force and effect at the time of the applicable permit approval for the public improvement.

Section 6.3 Uniform Codes Applicable.

Unless expressly provided in this Agreement, development of the Property shall be constructed in accordance with the provisions of the City's adopted Uniform Building, Mechanical, Plumbing, Electrical and Fire Codes and Title 24 of the California Code of Regulations, relating to Building Standards, in effect at the time of approval of the appropriate building, grading, or other construction permits for such development.

Section 6.4 Point of Sale Determination.

The City desires to identify the Project site as the "point of sale" location which refers to the place where a customer executes the payment of goods or services and where sales tax may become payable. The point-of-sale location can only be determined once a user is known to occupy the site. As each user is confirmed to occupy the site, the Parties shall work together to determine if the location of the user can be identified as the point-of-sale location consistent with all applicable local, state and federal laws.

Section 6.5 Formation of Community Services District or other Financing District.

The City or Developer may desire to form a community services district or other type of similar financing district ("**District**") to cover the cost of maintenance of streets, landscaping, lighting and storm drain improvements within the Project. Developer shall not object to the formation of such a District if Developer determines the proposed assessment on the Property adequately reflects the special benefit of maintenance provided by the District. At the sole discretion of Developer, this District may include additional costs to cover operation or maintenance of other Project infrastructure and services.

Section 7. Moratorium Not Applicable.

Notwithstanding anything to the contrary contained herein, in the event an ordinance, resolution or other measure is enacted, whether by action of City, by initiative, referendum, or otherwise, that imposes a building moratorium, a limit on the rate of development, or other requirement which affects Developer's ability to develop all or any part of the Property, City agrees that such ordinance, resolution or other measure shall not apply to the Property, this Development Agreement or Subsequent Approvals unless lawfully imposed by City as part of a validly adopted declaration of a local emergency.

Section 8. Applicable Fees.

Section 8.1 Impact Fees.

The Project shall be subject to only those applicable City development impact fees (and automatic cost adjustments as reflected in the applicable enabling legislation) listed in the attached **Exhibit C** and the traffic impact fee identified in Section 8.2. The amount of the development impact fees in **Exhibit C** shall be that amount in effect on December 17, 2019. City shall not impose any new categories or increases in any impact fees that are not listed on **Exhibit C** or identified in this Section 8 to development of the Property, including Subsequent Approvals, provided the Subsequent Approvals are substantially consistent with the terms of this Agreement.

Section 8.2 Traffic Impact Fee.

At the time of issuance of the first building permit for the Project, Developer shall pay to the City $3,000,000 (three million dollars) as full satisfaction of its obligation for City traffic impact fees as required by Ordinance No. 14-00, adopted by Resolution 49-03 as amended by 49-17. In addition, Developer agrees not to seek credit or reimbursement for traffic improvements it installs as required by mitigation measures in the Project EIR or as a Project condition of approval (which is estimated at $1,600,000) even though some of those improvements are identified in the City's Traffic Impact Fee program and subject to fee credits and reimbursement.

Section 8.3 Community Benefit Contribution

At the time of issuance of the first building permit, Developer shall voluntarily contribute to the City the amount of $850,000 (eight hundred and fifty thousand dollars) for the City, in its sole discretion, to utilize in a manner it believes best to serve and benefit its residents.

Section 8.4 Processing Fees.

The Project shall be subject to the processing fees in the amounts in effect at the time of the applicable application filing, so long as the amounts then in effect are applicable Citywide and to similar applications.

Section 9. Off-site and Oversizing Improvements

Unless otherwise prohibited in Section 8.2 of this Agreement, to the extent Developer is required to construct any off-site or oversizing of improvements that provides a benefit beyond the Property ("**Improvements**"), City shall provide a credit against impact fees to Developer for the costs of constructing such Improvements. The amount of credit shall reflect the amount of benefit that exceeds the benefit provided to the Property for the Improvements. Such "costs" include planning, design, engineering, processing, construction and other similar costs associated with the Improvements. The costs will be calculated by Developer through the use of its engineer and agreed to by the City Manager. If the credit exceeds the amount of the impact fee required to be paid

by Developer, City shall provide the full or remaining credit through another form of reimbursement as agreed to by Developer and such reimbursement must be provided within sixty (60) days of the Improvements being complete.

Section 10. Amendment or Cancellation.

Section 10.1 Modification Because of Conflict with State or Federal Laws.

In the event that state or federal laws or regulations enacted after the Effective Date of this Development Agreement prevent or preclude compliance with one or more provisions of this Agreement or require changes in plans, maps, permits or entitlements approved by the City, the Parties shall meet and confer in good faith in a reasonable attempt to modify this Agreement to comply with such federal or state law or regulation. Any such amendment or suspension of the Agreement shall be approved by the City Council in accordance with California Government Code § 65864 et seq.

Section 10.2 Amendment by Mutual Consent.

This Development Agreement may be amended in writing from time to time by mutual consent of the Parties hereto and in accordance with the procedures of California Government Code § 65864 et seq. and this Agreement.

Section 10.3 Insubstantial Amendments.

Notwithstanding the provisions of Section 10.2 of this Agreement, any amendments to this Development Agreement which do not relate to (a) the Term as provided in Section 4.2; (b) the permitted uses of the Property as provided in Section 5.2; (c) provisions for "significant" reservation or dedication of land; (d) the density or intensity of use of the Property; or (e) the maximum height or size of proposed buildings; may be approved by the City Manager without a public hearing before either the Planning Commission or the City Council, except to the extent otherwise required by law. The City Engineer shall determine whether a reservation or dedication is "significant;" all other determinations shall be made by the City Manager. The Parties acknowledge that changes to the Project Approvals shall not require any amendment to the Development Agreement and shall be automatically included within this Development Agreement.

Section 10.4 Cancellation by Mutual Consent.

Except as otherwise permitted herein, this Agreement may be canceled in whole or in part only by the mutual consent of the Parties or their successors in interest, in accordance with the provisions of California Government Code § 65864 et seq. Any fees paid and/or land dedicated pursuant to this Agreement prior to the date of cancellation shall be retained by City.

Section 11. Annual Review.

Section 11.1 Review Date.

The annual review date for this Development Agreement shall commence one year after the Effective Date and thereafter occur each year on or around that same date. The failure of City to conduct the annual review at the time specified shall not have any negative effect on the validity or enforceability of this Agreement, nor shall the City be precluded from reviewing this Agreement at another time if it has not conducted a review as scheduled.

Section 11.2 Initiation of Review.

The City's Community Development Director shall initiate the annual review by giving to Developer thirty (30) days' written notice that the City intends to undertake such review. Developer shall provide evidence to the Community Development Director prior to the hearing on the annual review, as and when reasonably determined necessary by the Community Development Director, to demonstrate good faith compliance with the provisions of the Development Agreement as provided in Government Code § 65684 et seq.

Section 11.3 Staff Reports.

To the extent practical, City shall deliver a copy of all staff reports and related exhibits concerning contract performance by mail or email, at least five (5) days prior to any annual review.

Section 12. Default.

Section 12.1 Other Remedies Available.

Upon the occurrence of an event of default, the Parties may pursue all other remedies at law or in equity that are not otherwise provided for in this Development Agreement or in City's regulations governing development agreements, expressly including the remedy of specific performance of this Agreement. Notwithstanding the foregoing, Developer shall not be compelled by specific performance to construct all or any part of the Project.

Section 12.2 Notice and Cure.

Upon the occurrence of an event of default by either Party, the nondefaulting Party shall serve written notice of such default upon the defaulting Party. If the default is not cured by the defaulting Party within thirty (30) days after service of such notice of default, the nondefaulting Party may then commence legal or equitable action to enforce its rights under this Agreement; provided, however, that if the default cannot be cured within such thirty (30) day period, the nondefaulting Party shall refrain from any such legal or equitable action so long as the defaulting Party begins to cure such default

within such thirty (30) day period and diligently pursues such cure to completion. Failure to give notice shall not constitute a waiver of any default.

Section 12.3 No Damages against City or Developer.

In no event shall monetary damages be awarded against City or Developer upon an event of default or upon termination of this Agreement.

Section 13. Estoppel Certificate.

Either Party may at any time request written notice from the other Party to certify in writing that, (a) this Agreement is in full force and effect and a binding obligation of the Parties, (b) this Agreement has not been amended or modified either orally or in writing, or if so amended, identifying the amendments, and (c) to the knowledge of the certifying Party the requesting Party is not in default in the performance of its obligations under this Agreement, or if in default, to describe therein the nature and amount of any such default. A Party receiving a request hereunder shall execute and return such certificate within ten (10) days following the receipt thereof, or such longer period as may reasonably be agreed to by the Parties. City Manager of City shall be authorized to execute any certificate requested by Developer. Should the Party receiving the request not execute and return such certificate within the applicable period, this shall not be deemed to be a default.

Section 14. Mortgagee Protection; Certain Rights of Cure.

Section 14.1 Mortgagee Protection.

This Development Agreement shall be superior and senior to any lien placed upon the Property, or any portion thereof after the date of recording this Agreement, including the lien for any deed of trust or mortgage ("**Mortgage**"). Notwithstanding the foregoing, no breach hereof shall defeat, render invalid, diminish or impair the lien of any Mortgage made in good faith and for value, but all the terms and conditions contained in this Agreement shall be binding upon and effective against any person or entity, including without limitation any deed of trust beneficiary or mortgagee ("**Mortgagee**") who acquires title to the Property, or any portion thereof, by foreclosure, trustee's sale, deed in lieu of foreclosure or similar means.

Section 14.2 Mortgagee Not Obligated.

Notwithstanding the provisions of Section 14.1 of this Agreement, unless the Mortgagee assumes the rights, benefits, interests and obligations under this Development Agreement and this assumption is approved by the City Council, no Mortgagee shall have any obligation or duty under this Agreement, before or after foreclosure or a deed in lieu of foreclosure, to construct or complete the construction of improvements, or to guarantee such construction of improvements, or to guarantee such construction or completion, or to pay, perform or provide any fee, dedication, improvements or other exaction or imposition. Any entity issuing security for the faithful performance of a subdivision agreement shall not be considered a Mortgagee for

purposes of this Section. (In other words, sureties issuing performance bonds are obligated to construct the improvements, as compared to true mortgagees.)

Section 14.3 Notice of Default to Mortgagee and Extension of Right to Cure.

If City receives notice from a Mortgagee requesting a copy of any notice of default given Developer hereunder and specifying the address for service thereof, then City shall deliver to such Mortgagee, concurrently with service thereon to Developer, any notice given to Developer with respect to any claim by City that Developer has committed an event of default. Each Mortgagee shall have the right during the same period available to Developer to cure or remedy, or to commence to cure or remedy, the event of default claimed set forth in the City's notice. City, through its City Manager, may extend the thirty-day cure period provided in Section 12.2 of this Agreement for not more than an additional sixty (60) days upon request of Developer or a Mortgagee.

Section 15. Severability.

The unenforceability, invalidity or illegality of any provisions, covenant, condition or term of this Agreement shall not render the other provisions unenforceable, invalid or illegal.

Section 16. Attorneys' Fees and Costs.

If City or Developer initiates any action at law or in equity to enforce or interpret the terms and conditions of this Agreement, the prevailing party shall be entitled to recover reasonable attorneys' fees and costs in addition to any other relief to which it may otherwise be entitled unless otherwise precluded in this Agreement. If any person or entity not a party to this Agreement initiates an action at law or in equity to challenge the validity of any provision of this Agreement, or City's actions pursuant to this Agreement, the Parties shall cooperate in defending such action. Developer shall bear its own costs of defense as a real party in interest in any such action, and shall reimburse City for all reasonable court costs and attorneys' fees expended by City in defense of any such action or other proceeding and for any attorney's fees and costs awarded to a Party to be paid by City.

Section 17. Transfers and Assignments.

Section 17.1 Right to Assign.

Developer has the right to sell or transfer all or a portion of the Property to one or more third parties (each such party is referred to as a "**Transferee**"). In connection with any such sale or transfer to a Transferee, Developer may assign to such Transferee any or all rights, interests and obligations of Developer arising under this Agreement that pertain to the portion of the Property being sold or transferred to such Transferee. No such assignment of Developer's rights, interests and obligations hereunder shall occur without prior written notice to and approval by the City Manager (which shall be for the purpose of assuring City that the proposed Transferee can perform Developer's obligations hereunder), which approval shall not be unreasonably withheld or delayed.

The foregoing notwithstanding, Developer may, without City Manager's approval, but with written notice to the City, in connection with the sale or transfer of all or a portion of the Property to any wholly-owned subsidiary of Developer, assign its interest in this Agreement that pertains to such portion of the Property sold or transferred.

Section 17.2 Approval and Notice of Assignment.

The City Manager shall consider and decide on any assignment of this Agreement within ten (10) business days after Developer's notice, provided all necessary documents, certifications and other information showing the proposed Transferee can perform Developer's obligations are first provided to the City Manager. Notice of any such approved assignment (which includes a description of all rights, interests and obligations that have been transferred and those which have been retained by Developer) shall be recorded in the official records of Contra Costa County, in a form acceptable to the City Manager, concurrently with such assignment.

Section 17.3 Effect of Sale, Transfer or Assignment.

Developer shall be released from any obligations hereunder assigned to a Transferee, provided that: a) such sale, transfer or assignment has been approved by the City Manager (or is otherwise permitted) pursuant to Sections 17.1 and 17.2 of this Agreement; and b) such obligations are expressly assumed by Transferee; and provided further that Transferee shall be subject to all the provisions hereof and shall provide all necessary documents, certifications and other necessary information prior to City Manager approval (unless permitted without the consent of the City Manager pursuant to Section 17.1).

Section 17.4 Termination of Agreement Upon Sale of Individual Parcels to Public.

Notwithstanding any provisions of this Agreement to the contrary, the burdens of this Agreement shall terminate as to any parcels which has been subdivided and individually leased or sold to a person or entity intending to construct a building on such parcel; provided, however, that the benefits of this Agreement shall continue to run as to any such parcel until occupancy of the building to be constructed thereon and Developer's obligations hereunder shall continue until satisfied.

Section 18. Agreement Runs with the Land.

The provisions, rights, terms, covenants, and obligations contained in this Agreement shall be binding upon the Parties and any person or entity to whom this Agreement is assigned to pursuant to Section 17 of this Agreement ("**Benefitting Parties**"). No person or entity may receive or take advantage of the benefits in this Agreement without assuming the appropriate obligations under this Agreement. With respect to Benefitting Parties, the provisions of this Agreement shall be enforceable as equitable servitudes and shall constitute covenants running with the land pursuant to applicable laws, including, but not limited to, Section 1468 of the Civil Code of the State of California. Each covenant to do, or refrain from doing, some act on the Property

hereunder, (a) is for the benefit of such properties and is a burden upon such properties, (b) runs with such properties, and (c) is binding upon Benefitting Parties during its ownership of such properties or any portion thereof.

Section 19. Bankruptcy.

The obligations of this Development Agreement shall not be dischargeable in bankruptcy.

Section 20. Indemnification.

Developer agrees to indemnify, defend and hold harmless City, and its elected and appointed councils, boards, commissions, officers, agents, employees, and representatives from any and all claims, costs (including legal fees and costs) and liability for any personal injury or property damage which may arise directly or indirectly as a result of any actions or inactions by the Developer, or any actions or inactions of Developer's contractors, subcontractors, agents, or employees in connection with the construction, improvement, operation, or maintenance of the development of the Property, provided that Developer shall have no indemnification obligation with respect to negligence or wrongful conduct of City, its contractors, subcontractors, agents or employees or with respect to the maintenance, use or condition of any improvement after the time it has been dedicated to and accepted by the City or another public entity (except as provided in an improvement agreement or maintenance bond).

Section 21. Insurance.

Section 21.1 Public Liability and Property Damage Insurance.

At all times that Developer is constructing any improvements that will become public improvements, Developer shall maintain in effect a policy of comprehensive general liability insurance with a per-occurrence combined single limit of not less than one million dollars ($1,000,000.00) and a deductible of not more than ten thousand dollars ($10,000.00) per claim. The policy so maintained by Developer shall name the City as an additional insured and shall include either a severability of interest clause or cross-liability endorsement.

Section 21.2 Workers Compensation Insurance.

At all times that Developer is constructing any improvements that will become public improvements, Developer shall maintain Workers' Compensation insurance for all persons employed by Developer for work at the site or for work performed pursuant to this Agreement. Developer shall require each contractor and subcontractor similarly to provide Workers' Compensation insurance for its respective employees. Developer agrees to indemnify the City for any damage resulting from Developer's failure to maintain any such insurance.

Section 21.3 Evidence of Insurance.

Prior to commencement of construction of any improvements which will become public improvements, Developer shall furnish City satisfactory evidence of the insurance required in Sections 21.1 and 21.2 of this Agreement and evidence that the carrier is required to give the City at least fifteen days prior written notice of the cancellation or reduction in coverage of a policy. The insurance shall extend to the City, its elective and appointive boards, commissions, officers, agents, employees and representatives and to Developer performing work on the Property and pursuant to this Agreement.

Section 22. Good Faith.

The Parties agree they will cooperate in good faith in implementing this Agreement. Developer may purchase in the future additional properties adjacent to the Property for additional industrial type of development. The Parties acknowledge that these properties would need to be re-designated in the City's General Plan to allow such uses. The Parties agree to work in good faith in processing entitlements for re-designation and eventual development, including but not limited to, an amendment to this Agreement to incorporate those properties or a new development agreement for those properties with the same or similar terms as this Agreement.

Section 23. Excusable Delay; Extension of Time of Performance and Agreement.

In addition to specific provisions of this Agreement, neither Party shall be deemed to be in default where delays in performance or failures to perform are due to, or are a necessary outcome of, war, strikes or other labor disturbances, walk-outs, riots, floods, earthquakes, fires, casualties, acts of God, enactment or imposition against the Project of any moratorium, voter approved initiative or referendum, or any time period for legal challenges pertaining to a moratorium on the Project, or similar basis for excused performance which is not within the reasonable control of the Party to be excused. Litigation challenging the validity of this Agreement or any of the Project Approvals, Subsequent Approvals, or any permit, ordinance, entitlement or other action of a governmental agency, including the City, necessary for the development of the Project, or Developers' inability to obtain materials, power or public facilities (such as water or sewer service) to the Project, shall be deemed to create an excusable delay as to Developer. Upon the request of either Party, an extension of time for the performance of any obligation whose performance has been so prevented or delayed shall be memorialized in writing. The City Manager is authorized on behalf of the City to enter into such an extension. The term of any such extension shall be equal to the period of the excusable delay, or longer, as shall be mutually agreed upon and the term of the extension shall automatically extend the Term of this Agreement.

Section 24. Notices.

All notices required or provided for under this Development Agreement shall be in writing. Notices required to be given to City shall be addressed as follows:

City Manager
City of Oakley
3231 Main Street
Oakley, CA 94561

Notices required to be given to Developer shall be addressed as follows:

NP Oakley, LLC
12977 North Forty Drive, Suite 203
St. Louis, Missouri 63141
Attn: Jed Momot

With a copy to:

NP Oakley, LLC
4825 NW 41st Street, Suite 500
Riverside, Missouri 64150
Attn: Evan Fitts

with copy to:

Wendel Rosen LLP
1111 Broadway, 24th Floor
Oakland, CA 94607
Attn: Patricia E. Curtin

A Party may change its address by giving notice in writing to the other Party and thereafter all notices shall be addressed and transmitted to the new address. Notices shall be deemed given and received upon personal delivery, or if mailed, upon the expiration of 48 hours after being deposited in the United States Mail, Notices may also be given by overnight courier which shall be deemed given the following day or by facsimile transmission which shall be deemed given upon verification of receipt.

Section 25. Agreement is Entire Understanding.

This Development Agreement constitutes the entire understanding and agreement of the Parties.

Section 26. Exhibits.

The following documents are referred to in this Agreement and are attached hereto and incorporated herein as though set forth in full:

Exhibit A-1	Legal Description of Property
Exhibit A-2	Depiction of Property
Exhibit B	Preliminary Phasing Plan
Exhibit C	City of Oakley Impact Fees

Section 27. Counterparts.

This Development Agreement may be executed in duplicate originals, each of which is deemed to be an original.

Section 28. Recordation.

City shall record a copy of this Development Agreement within ten (10) days following execution by all persons below.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed as of the date and year first above written.

BEING PARCEL "A'', AS SET FORTH IN THE DOCUMENT ENTITLED LOT LINE ADJUSTMENT LLA 09-02, RECORDED OCTOBER 5, 2009, INSTRUMENT NO. 2009-234499, OFFICIAL RECORDS.

PARCEL SIX:

A PORTION OF THE NORTHWEST 1/4 OF SECTION 22, TOWNSHIP 2 NORTH, RANGE 2 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 22; THENCE ALONG THE WEST LINE OF SAID SECTION SOUTH 452.40 FEET; THENCE LEAVING SAID SECTION LINE EAST 30 FEET TO A POINT ON THE WESTERLY LINE OF STATE HIGHWAY NO. 24 (60 FEET WIDE) KNOWN AS BRIDGEHEAD ROAD, AS SAID LINE IS ESTABLISHED IN THE DEED FROM JOHN U. DIETHELM ET UX TO THE COUNTY OF CONTRA COSTA, DATED JUNE 13, 1925 AND RECORDED JULY 14, 1925 IN BOOK 3 OF THE OFFICIAL RECORDS OF CONTRA COSTA COUNTY AT PAGE 63, AND THE TRUE POINT OF BEGINNING; THENCE, FROM SAID POINT OF BEGINNING, SOUTH 89°56'02" EAST, 767.91 FEET; THENCE, NORTH 05°0'49" WEST, 465.60 FEET TO THE LINE DIVIDING SECTIONS 15 AND 22; THENCE ALONG SAID SECTION LINE SOUTH 89°06'43" WEST 761.12 FEET TO A POINT ON THE EAST

LINE OF SAID BRIDGEHEAD ROAD; THENCE, ALONG SAID EAST LINE, SOUTH 00°19'03" EAST 0.38 FEET TO AN ANGLE POINT IN SAID LINE; THENCE CONTINUING ALONG SAID RIGHT OF WAY SOUTH 452.49 FEET RETURNING TO THE POINT OF BEGINNING.

BEING PARCEL "B", AS SET FORTH IN THE DOCUMENT ENTITLED LOT LINE ADJUSTMENT LLA 09-02, RECORDED OCTOBER 5, 2009, INSTRUMENT NO. 2009-234499, OFFICIAL RECORDS.

PARCEL SEVEN:

A PORTION OF THE NORTHWEST 1/4 OF SECTION 22, TOWNSHIP 2 NORTH, RANGE 2 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SECTION 22; THENCE, ALONG THE WEST LINE OF SAID SECTION 22, SOUTH 452.40 FEET; THENCE EAST, 30.00 FEET TO A POINT HEREAFTER REFERRED TO AS STATION 'A' ON THE EASTERLY RIGHT OF WAY LINE OF STATE HIGHWAY NO. 24 (60 FEET WIDE) KNOWN AS BRIDGEHEAD ROAD, AS SAID LINE IS ESTABLISHED IN THE DEED FROM JOHN U. DIETHELM ET UX TO THE COUNTY OF CONTRA COSTA, DATED JUNE 13, 1925 AND RECORDED JULY 14, 1925 IN BOOK 3 OF THE OFFICIAL RECORDS OF CONTRA COSTA COUNTY AT PAGE 63; THENCE, SOUTH 8956'02" EAST, 767.91 FEET HEREAFTER REFERRED TO AS STATION 'B' AND THE TRUE POINT OF BEGINNING; THENCE, FROM SAID POINT OF BEGINNING, SOUTH 89°56'02" EAST, 687.03 FEET; THENCE SOUTH 00°00'07" EAST, 924.89 FEET TO THE NORTH LINE OF THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY RIGHT OF WAY AS DESCRIBED IN THE DEED TO THE SAN FRANCISCO AND SAN JOAQUIN VALLEY RAILROAD COMPANY, RECORDED FEBRUARY 11, 1899 IN BOOK 81 OF DEEDS, PAGE 307; THENCE, ALONG SAID NORTH LINE OF SAID RAILROAD, SOUTH 79°44'20" EAST, 277.86 FEET TO THE EAST LINE OF THE PROPERTY DESCRIBED IN THE DEED FROM GEORGE RUCKSTUHL AND ANNA RUCKSTUHL TO DUPONT DATED MARCH 15, 1955 AND RECORDED MARCH 16, 1955 IN BOOK 2496 OF THE OFFICIAL RECORDS OF CONTRA COSTA COUNTY AT PAGE 142; THENCE, ALONG SAID EAST LINE NORTH 00°12'09" WEST, 1455.66 FEET TO THE LINE DIVIDING SECTIONS 15 AND 22; THENCE ALONG SAID SECTION LINE SOUTH 89°06'43" WEST, 962.33 FEET; THENCE, SOUTH 00°50'49" EAST, 465.60 FEET TO THE POINT OF BEGINNING.

BEING PARCEL "C", AS SET FORTH IN THE DOCUMENT ENTITLED LOT LINE ADJUSTMENT LLA 09-02, RECORDED OCTOBER 5, 2009, INSTRUMENT NO. 2009-234499, OFFICIAL RECORDS.

PARCEL EIGHT:

A PORTION OF THE SOUTHWEST 1/4 OF SECTION 15, TOWNSHIP 2 NORTH, RANGE 2 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHWEST CORNER OF SAID SECTION 15; THENCE ALONG THE SOUTH LINE OF SAID SECTION NORTH 89°06'43" EAST (THIS BEARING USED FOR THE PURPOSES OF THIS DESCRIPTION) 30.00 FEET TO A POINT ON THE

EASTERLY RIGHT OF WAY LINE OF STATE HIGHWAY NO. 24 (60 FEET WIDE) KNOWN AS BRIDGEHEAD ROAD, AS SAID LINE IS ESTABLISHED IN THE DEED FROM JOHN U. DIETHELM ET UX TO THE COUNTY OF CONTRA COSTA, DATED JUNE 13, 1925 AND RECORDED JULY 14, 1925 IN BOOK 3 OF THE OFFICIAL RECORDS OF CONTRA COSTA COUNTY AT PAGE 63 AND THE TRUE POINT OF BEGINNING; THENCE ALONG SAID EASTERLY RIGHT OF WAY NORTH 00°19'03" WEST, 1333.98 FEET TO THE NORTHWEST CORNER OF PARCEL ONE, AS DESCRIBED IN THE DEED FROM DIETHELM TO DUPONT, DATED MARCH 15, 1955 AND RECORDED JULY 26, 1955 IN BOOK 2578 OF THE OFFICIAL RECORDS AT PAGE 378, CONTRA COSTA COUNTY RECORDS; THENCE LEAVING SAID EASTERLY LINE OF BRIDGEHEAD ROAD, ALONG THE NORTHERLY LINE OF SAID LANDS OF DUPONT NORTH 89°18'48" EAST, 481.37 FEET; THENCE LEAVING SAID LINE SOUTH 01°00'54" EAST, 1332.23 FEET TO A POINT ON THE LINE DIVIDING SECTIONS 15 AND 22; THENCE ALONG SAID DIVIDING LINE SOUTH 89°06'43" WEST, 497.60 FEET TO THE POINT OF BEGINNING.

BEING PARCEL "A'', AS SET FORTH IN THE DOCUMENT ENTITLED LOT LINE ADJUSTMENT LLA 09-05, RECORDED OCTOBER 5, 2009, INSTRUMENT NO. 2009-234501, OFFICIAL RECORDS.

PARCEL NINE:

A PORTION OF THE SOUTHWEST 1/4 OF SECTION 15, TOWNSHIP 2 NORTH, RANGE 2 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE LINE DIVIDING SECTIONS 15 AND 22, SAID POINT BEING SOUTH 89°06'43" EAST, 527.60 FEET FROM THE SOUTHWEST CORNER OF SAID SECTION 15; THENCE, LEAVING SAID SECTION LINE, NORTH 01°00'54" WEST, 1332.23 FEET TO A POINT ON THE NORTHERLY LINE OF PARCEL ONE, AS DESCRIBED IN THE DEED FROM DIETHELM TO DUPONT DATED MARCH 15, 1955 AND RECORDED JULY 26, 1955 IN BOOK 2578 OF THE OFFICIAL RECORDS AT PAGE 378, CONTRA COSTA COUNTY RECORDS; THENCE, ALONG SAID NORTHERLY LINE OF SAID LANDS OF DUPONT THE FOLLOWING COURSES AND DISTANCES: NORTH 89°18'48" EAST, 142.95 FEET; NORTH 00°22'12" WEST, 174.93 FEET; NORTH 89°45'39" EAST, 501.63 FEET TO A POINT ON THE WESTERLY LINE OF THAT PARCEL OF LAND DESCRIBED IN THE DEED FROM GEORGE RUCKSTUHL AND ANNA RUCKSTUHL TO DUPONT RECORDED MARCH 16, 1955 IN BOOK 2496 OF THE OFFICIAL RECORDS AT PAGE 142, CONTRA COSTA COUNTY RECORDS; THENCE ALONG SAID WESTERLY LINE NORTH 00°01'21" WEST, 1030.16 FEET TO THE NORTHWEST CORNER OF SAID LANDS OF DUPONT; THENCE ALONG THE NORTHERLY LINE OF SAID LANDS, NORTH 87°48'30" EAST, 163.22 FEET; THENCE LEAVING SAID NORTHERLY LINE, SOUTH 00°09'38" EAST, 2534.93 FEET TO THE LINE DIVIDING SECTIONS 15 AND 22; THENCE ALONG SAID SECTION LINE SOUTH 89°06'43" WEST, 789.73 FEET TO THE POINT OF BEGINNING

BEING PARCEL "B'', AS SET FORTH IN THE DOCUMENT ENTITLED LOT LINE ADJUSTMENT LLA 09-05, RECORDED OCTOBER 5, 2009, INSTRUMENT NO. 2009-234501, OFFICIAL RECORDS.

PARCEL TEN:

A PORTION OF THE SOUTHWEST 1/4 OF SECTION 15, TOWNSHIP 2 NORTH, RANGE 2 EAST, MOUNT DIABLO BASE AND MERIDIAN, DESCRIBED AS FOLLOWS:

COMMENCING AT A POINT ON THE LINE DIVIDING SECTIONS 15 AND 22, SAID POINT BEING NORTH 89°06'43" EAST (THIS BEARING USED FOR THE PURPOSES OF THIS DESCRIPTION) 527.60 FEET FROM THE SOUTHWEST CORNER OF SAID SECTION 15; THENCE CONTINUING ALONG SAID SECTION LINE NORTH 89°06'43" EAST 789.73 FEET TO THE POINT OF BEGINNING;

THENCE, LEAVING SAID SECTION LINE, NORTH 00°09'38" WEST, 2534.93 FEET TO A POINT ON THE NORTHERLY LINE OF THAT CERTAIN PARCEL OF LAND DESCRIBED IN THE DEED FROM GEORGE RUCKSTUHL AND ANNA RUCKSTUHL TO DUPONT RECORDED MARCH 16, 1955 IN BOOK 2496 OF THE OFFICIAL RECORDS AT PAGE 142, CONTRA COSTA COUNTY RECORDS, SAID NORTHERLY LINE ALSO BEING THE HIGH WATER LINE OF THE SOUTH BANK OF THE SAN JOAQUIN RIVER; THENCE, ALONG SAID NORTHERLY LINE, NORTH 87°48'30" EAST, 441.57 FEET TO THE NORTHWEST CORNER OF THAT PARCEL OF LAND DESCRIBED IN THE GRANT DEED FROM JOSEPH L. PRELIMINARY PHASING PLAN

EXHIBIT B - PRELIMINARY PHASING PLAN

4787

Phasing Plan Notes

1. Phase 3A, 3B, 3C are interchangeable and could be constructed out of order depending on market and/or tenant demands in size or location within the business park.
2. The phasing diagram is meant to portray building, parking, roadway, and access which will be constructed throughout each phase of the project. In addition to above ground improvements, under ground improvements such as dry utilities (power and gas), water, sewer, stormwater, as well as water detention will also be constructed with each phase.
3. Each phase will include underground improvements necessary to serve the building, parking, and roadway improvements noted within the phase. In many events, underground utilities may be extended outside of a phase in order to service that phase, but will be necessary to comply with code and regulations. Detailed utility phasing and engineering level drawings will be provided at site specific approval.

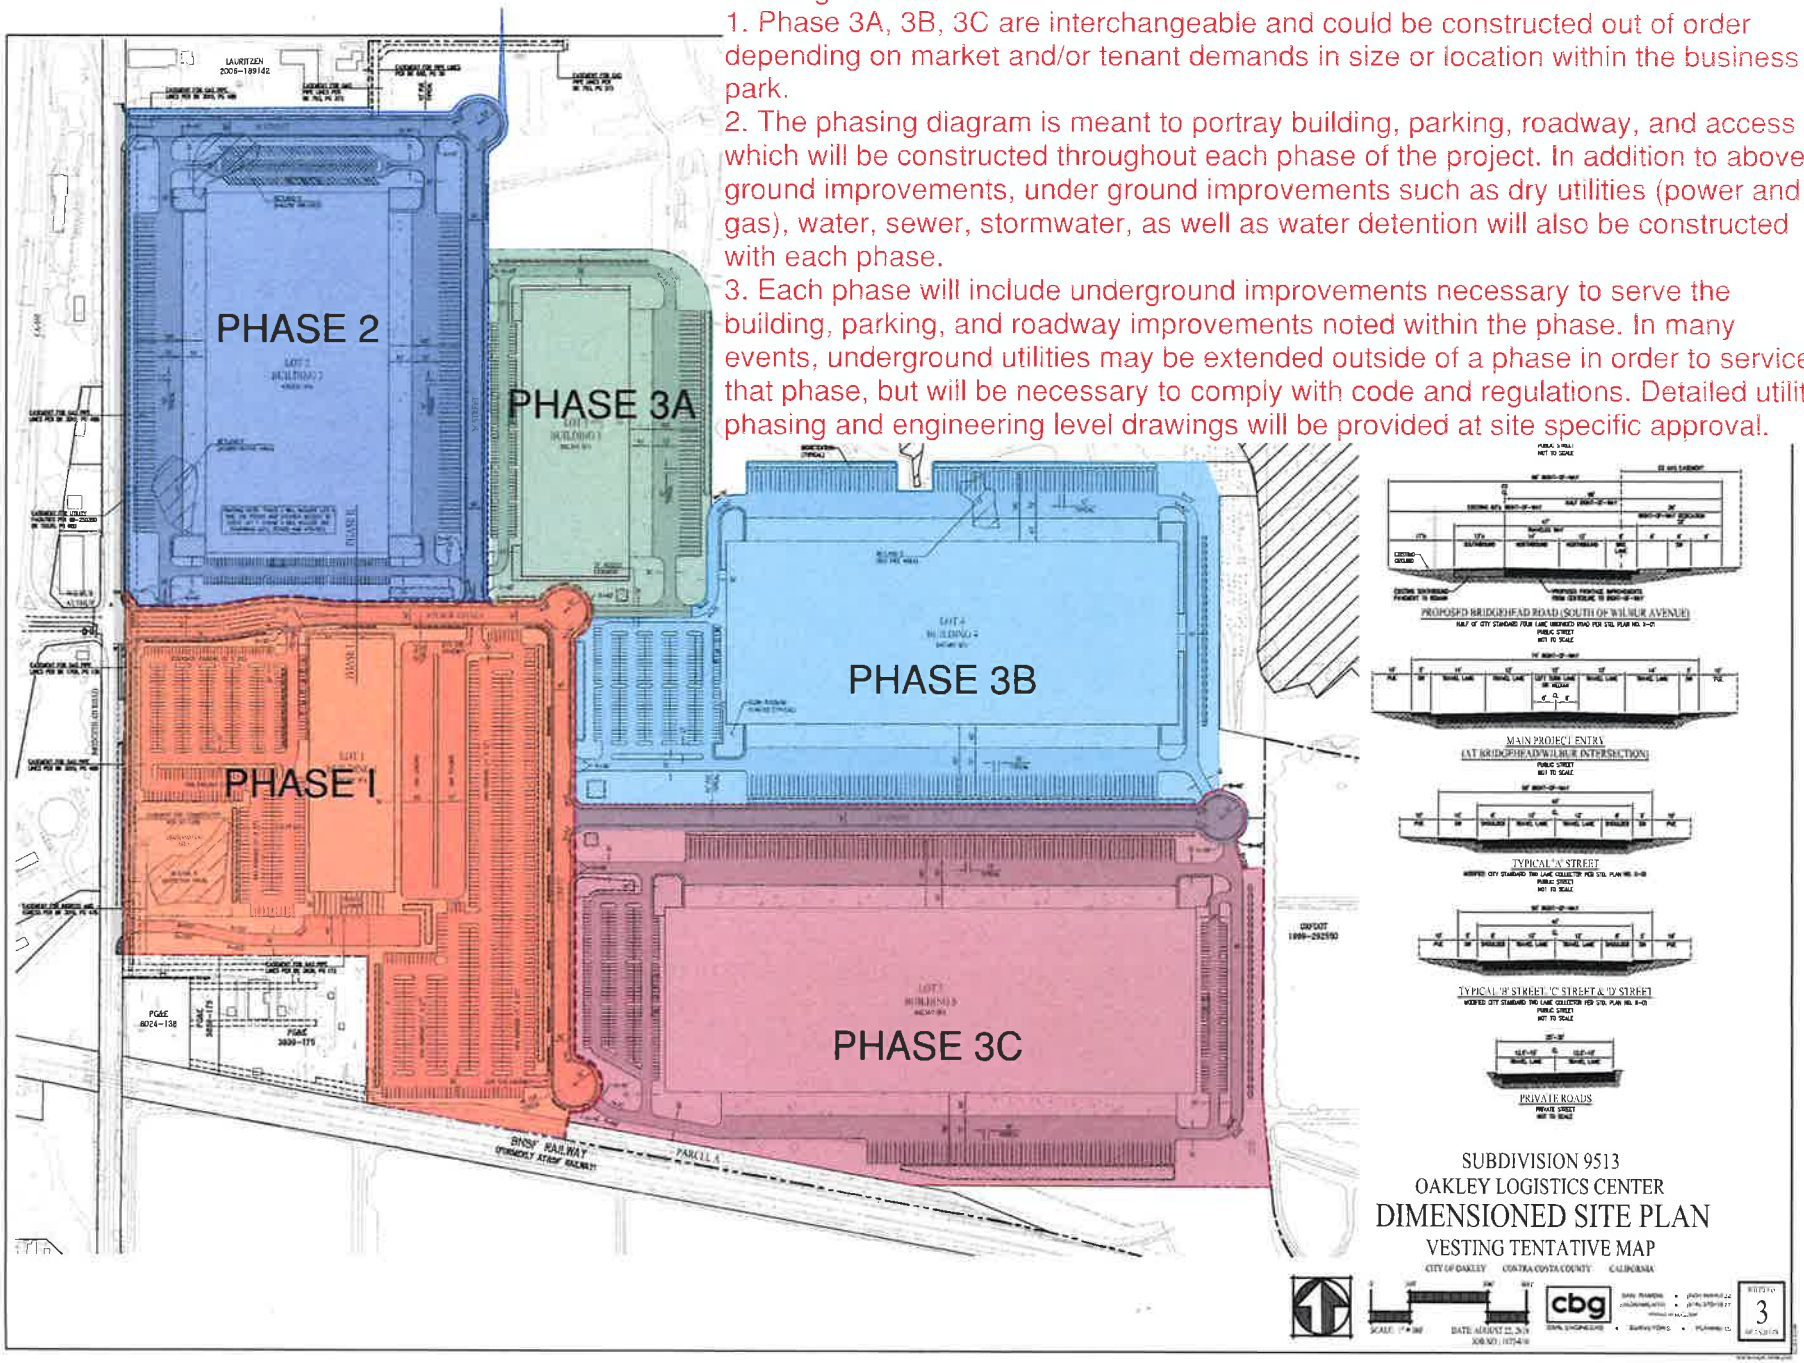

EXHIBIT C

CITY OF OAKLEY IMPACT FEES

- General Plan Fee.
- Regional Transportation Development Impact Mitigation Fee (authorized by Ordinance No. 14-00, adopted by Resolution No. 73-05).
- Public Facilities Fee (authorized by Ordinance No. 05-00, adopted by Resolution No. 18-03).
- Fire Facilities Impact Fee, collected by the City on behalf of the Oakley Fire Protection District.
- East Contra Costa County Habitat Conservation Plan Fee per the East Cypress HCP MOA.

STAFF REPORT

DATE: December 17, 2019

TO: Bryan Montgomery, City Manager *Approved and Forwarded to the City Council*

FROM: Dwayne Dalman, Economic Development Manager

SUBJECT: **Adopt a Resolution authorizing the approval of a Downtown Revitalization Loan Program Loan of $50,000 to Gail & Christian Knight for a new restaurant building to be finished at 3685 Main Street in downtown Oakley**

Background and Analysis

In 2014 the City Council approved funds to be allocated for the Downtown Revitalization Loan Program. The goal of the Loan Program is to leverage public funds and private investment to further enhance the physical appearance and economic vitality of the commercial buildings and businesses in the downtown corridor. The long-term objectives of the program include improving the physical appearance of the buildings and area, encouraging the retention and attraction of businesses to the corridor, increasing property values, increasing tenant stability, increasing pedestrian walkability and creating a stronger "sense of place".

Loan funds under the program can be used in the following ways:

1. Façade Improvements
2. Landscaping and exterior lighting
3. Signage
4. ADA compliance
5. Building infrastructure upgrades needed for new tenant conversion
6. Demolition

Heinrich's Tavern
On May 6, 2019 the City Council approved a $75,000 loan to Mr. Naim Zalmaiyar to assist with the construction of Heinrich's Tavern at 3685 Main Street in downtown Oakley. Mr. Zalmaiyar had restaurant experience relating to the ownership and operation of a Mountain Mikes pizza restaurant and four Subway sandwich restaurants.

Mr. Zalmaiyar purchased the property located on the southwest corner of Main Street and 4th Street in downtown Oakley in July, 2016. The property consisted of a vacant building located on the corner and two homes located to the rear of the property. Though he originally planned to renovate the vacant commercial building, Mr. Zalmaiyar moved forward with demolition of the building and decided to construct a new restaurant.

Mr. Zalmaiyar's intention was to open a full-service restaurant to be known as Heinrich's Tavern. He started construction on the building in April, 2019 and anticipated that the project would be completed in four to five months.

He received a $75,000 Downtown Revitalization loan that was divided into two equal parts loan and grant. The loan funds were used for the following items, under the program guidelines:

- Storefront windows and doors - $32,800
- Brick wainscoting - $10,000
- Exterior lighting - $14,970
- Demolition - $3,500
- Exterior Paint - $8,500
- Stucco - $4,500
- Hardware - $2,500

However, Mr. Zalmaiyar was unable to complete the project and open the restaurant due to higher overall project costs that exceeded his initial estimates by approximately $205,000. These included the following:

- Storm drain & water expenses - $74,000
- Sewer fees - $37,577
- Fire Sprinklers - $27,667
- ADA compliance sidewalk & ramping - $30,162
- ADA restrooms - $2,800

Main Street Tavern

In order to finish the project and open the restaurant, Mr. Zalmaiyar has formed a partnership with Gail & Christopher Knight, called Main Street Tavern LLC. Gail and Christian Knight have 20 years of real estate experience working in the family business of Morning Star Properties in Oakley. Gail works as an Office Manager and Christian works as a Mortgage Advisor.

Under the new partnership, Mr. Zalmaiyar will be primarily responsible for managing the kitchen, restaurant staff, inventory and supplies. Gail Knight will be primarily responsible for marketing, promotion and social media. Christian will be responsible for finances, budgeting, payroll and taxes.

The new partnership has also brought about a change in the proposed business. Instead of Heinrich's Tavern, the business will be known as Main Street Tavern. The menu will feature upscale, pub-style cuisine with fresh, locally-sourced ingredients to support local businesses, farmers and ranchers. It will included an assortment of both lighter and hearty fare, from fresh salads to specialties from the indoor brick oven with pizza, flatbreads, chicken and meatloaf. In addition to the food items, Main Street Tavern will have wine, champagne and a selection of over 10 local beers on tap.

The other change that the partnership would like to implement is to convert the four-stall parking lot to an outdoor dining and entertainment area. Outdoor dining and entertainment is a popular feature that will create an additional draw for Main Street Tavern. The parking lot was already constructed with attractive pavers. In addition, this area would be fenced in and improved with planting and outdoor lighting. The applicants anticipate coming before the Council in January, 2020 for Design Review approval for the outdoor dining area. Loan funds for the outdoor dining area will not be disbursed until the Design Review is approved.

The plan for the business is to grow steadily by increasing the hours of operation. At the start, the tavern will be open from 3pm – 7pm, Thursday, Friday Saturday, Sunday and Monday nights. By springtime, they anticipate expanding the hours and menu to include a weekend brunch. By summer they anticipate expanding the hours again to include lunch service and later in the evening to take advantage of the outdoor dining.

Catalyst Project

When the loan program was first established, a provision was added that allowed the City Council to approve a loan of over $75,000 for a project that exceeded the stated objectives of the program and served as a catalyst for future development. With the first loan of $75,000 and a second loan of $50,000, the combined loans for this project exceed the $75,000 maximum.

However, staff feels that this project could be considered as a catalyst for the downtown. Brewpubs, taprooms and taverns are very popular in the retail landscape and are a desired amenity. There are numerous examples of these type of uses transforming downtowns and other neighborhoods. Cities have actively courted these type of uses and developed financial incentives to bring them to their downtowns. It is anticipated that this use would not only bring more people to the downtown, but also showcase the downtown to other prospective businesses. For these reasons, staff is identifying this project as a catalyst project that is qualified for an increased loan amount.

Loan Parameters

The applicants have requested a loan in the amount of $50,000 under the following loan program parameters:

> **Eligible Applicants** – The owner of the building is in a partnership with the new loan applicants, making the applicants an eligible borrower.

Maximum Loan Amount –The requested loan amount of $50,000 and the previous loan amount of $75,000 are available under the catalyst parameters of the loan program.

Project Equity – The loan program requires the applicant to contribute minimum equity of 10% of the total project costs. The applicant has submitted a cost breakdown with additional project costs of $205,206. The $50,000 loan request represents 24% of the additional project costs, with the new partnership contributing the remaining 76%, which far exceeds the 10% requirements of the program.

Collateral – The new loan will be secured by a Promissory Note and a Personal Guarantee from the applicant.

The loan can be assumed and prepaid with no prepayment penalty, but will become due and payable if the business is sold.

Fiscal Impact

The $50,000 in loan funds would need to be set aside from the City General Fund.

Staff Recommendation

Staff recommends that the Council adopt the resolution approving the Downtown Revitalization Loan Program loan in the amount of $50,000 to Gail & Christian Knight.
