CITY OF ONTARIO

Regular City Council/Housing Authority Meeting
MARCH 18, 2025

City Hall
303 East B Street, Ontario, CA 91764

MAYOR PAUL S. LEON • MAYOR PRO TEM ALAN D. WAPNER
COUNCIL MEMBERS JIM W. BOWMAN, DEBRA PORADA AND DAISY MACIAS

CITY CLERK SHEILA MAUTZ • TREASURER JAMES R. MILHISER
CITY MANAGER SCOTT OCHOA • CITY ATTORNEY RUBEN DURAN

WELCOME TO A MEETING OF THE ONTARIO CITY COUNCIL

All documents for public review are on file with the Records Management/City Clerk's Department located at 303 East B Street, Ontario, CA 91764.

Anyone wishing to speak in person during public comment or on a particular item will be required to fill out a blue slip. Blue slips must be turned in prior to public comment beginning or before an agenda item is taken up. The Clerk will not accept blue slips after that time. To comment by email, submit your comments no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comments to publiccomments@ontarioca.gov. All comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and will be entered into the record.

Speakers will be alerted when they have 1 minute remaining and when their time is up. Speakers are then to return to their seats and no further comments will be permitted.

In accordance with State Law, remarks during public comment are to be limited to subjects within Council's jurisdiction. Remarks on other agenda items will be limited to those items.

Remarks from those seated or standing in the back of the chamber will not permitted. All those wishing to speak including Council and Staff need to be recognized by the Chair before speaking.

ACCOMMODATIONS

If you need special assistance or accommodations to participate in this meeting, please contact the City Clerk's office at 909-395-2009. Notification of 48 hours prior to the meeting will help the City make reasonable arrangements. Equipment for the hearing impaired is available in the Records Management Office.

ORDER OF BUSINESS

The regular City Council and Housing Authority meeting begins with Closed Session and Closed Session Comment at 6:00 p.m., Public Comment at 6:30 p.m. immediately followed by the Regular Meeting and Public Hearings. No agenda item will be introduced for consideration after 10:00 p.m. except by majority vote of the City Council.

CALL TO ORDER *(OPEN SESSION)*

ROLL CALL

Wapner, Bowman, Porada, Macias, Mayor/Chairman Leon

CLOSED SESSION PUBLIC COMMENT

The Closed Session Public Comment portion of the Council/Housing Authority meeting is limited to matters appearing on the Closed Session. Additional opportunities for further Public Comment will be given during and at the end of the meeting.

REPORT ON CLOSED SESSION

City Attorney

PUBLIC COMMENTS 6:30 P.M.

The Public Comment portion of the Council/Housing Authority meeting is limited to 30 minutes. An opportunity for further Public Comment may be given at the end of the meeting. Under provisions of the Brown Act, Council is prohibited from taking action on oral requests.

To comment by email, submit your comments by email no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comment to publiccomments@ontarioca.gov. All Comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and entered into the record. As previously noted -- if you wish to address the Council, fill out one of the blue slips at the rear of the chambers and give it to the City Clerk.

AGENDA REVIEW/ANNOUNCEMENTS

The City Manager will go over all updated materials and correspondence received after the Agenda was distributed to ensure Council Members have received them. He will also make any necessary recommendations regarding Agenda modifications or announcements regarding Agenda items to be considered.

INFORMATION RELATIVE TO POSSIBLE CONFLICT OF INTEREST

Agenda item contractors, subcontractors and agents may require member abstentions due to conflict of interests and financial interests. Council Member abstentions shall be stated under this item for recordation on the appropriate item.

CONSENT CALENDAR

All matters listed under CONSENT CALENDAR will be enacted by one motion in the form listed below – there will be no separate discussion on these items prior to the time Council votes on them, unless a member of the Council requests a specific item be removed from the Consent Calendar for a separate vote.

1. **APPROVAL OF MINUTES**

Minutes for the regular meetings of the City Council and Housing Authority of February 18, 2025, and cancelled special meeting/study session of February 20, 2025, and approving same as on file in the Records Management Department.

ATTACHMENT: 20250218 Meeting Minutes (Not Official Until Approved)
ATTACHMENT: 20250220 C Minutes (Not Official Until Approved).docx

2. **BILLS & PAYROLL**

Bills February 14, 2025 through February 27, 2025, and Payroll January 26, 2025 through February 8, 2025.

3. **A DEVELOPMENT IMPACT FEE CREDIT AGREEMENT (FILE NO. PDIF24-001) BETWEEN THE CITY OF ONTARIO AND AG EHC II (LEN) CA 3, L.P. FOR FACILITY CONSTRUCTION ASSOCIATED WITH TRACT MAP 20536 (FILE NO. PMTT22-021), LOCATED 875 FEET SOUTH OF THE INTERSECTION OF RIVERSIDE DRIVE AND ARCHIBALD AVENUE, WITHIN THE COUNTRYSIDE SPECIFIC PLAN**

That the City Council authorize the City Manager to execute the Development Impact Fee Credit Agreement (File No. PDIF24-001) between the City of Ontario and AG EHC II (LEN) CA 3, L.P., for facility construction associated with Tract Map 20536 (File No. PMTT22-021), located 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within the Countryside Specific Plan, and authorize the City Manager to execute the Agreement.

ATTACHMENT: 20250318 PDIF24-001 AG EHC II (LEN) CA 3, L.P.

4. **FY 2024-25 MID-YEAR BUDGET UPDATE**

That the City Council take the following actions:

A. Approve the budget adjustments and recommendations as presented in the Fiscal Year 2024-25 Mid-Year Budget Update Report (Exhibit A);
B. Consider and adopt a Resolution making a declaration of intent to issue tax-exempt obligations; and
C. Approve the updated Purchasing Policies and Procedures Manual

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, REGARDING ITS INTENTION TO ISSUE TAX-EXEMPT OBLIGATIONS.

PUBLIC HEARINGS

Pursuant to Government Code Section 65009, if you challenge the City's zoning, planning or any other decision in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the City Council at, or prior to the public hearing. Affidavits of posting compliance, for all items below, are on file with the Records Management Department.

---

17. A PUBLIC HEARING TO CONSIDER AN ORDINANCE APPROVING A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-001, TO IMPLEMENT OBJECTIVE DEVELOPMENT AND DESIGN STANDARDS

That the City Council introduce and waive further reading of the Ordinance Approving File No. PDCA24-001, a Development Code Amendment, amending the Reference document section of the City's Development Code, to implement Objective Development and Design Standards for multiple-family and mixed-use residential development.

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO PDCA24-001, A DEVELOPMENT CODE AMENDMENT AMENDING THE REFERENCE DOCUMENT SECTION OF THE CITY'S DEVELOPMENT CODE, TO IMPLEMENT OBJECTIVE DEVELOPMENT AND DESIGN STANDARDS FOR MULTIPLE-FAMILY AND MIXED-USE RESIDENTIAL DEVELOPMENT AND MAKING FINDINGS IN SUPPORT THEREOF.

Assistant City Clerk Isbell announced that there was one written comment:
Brad Neumann, regarding renaming the City of Ontario.

Mayor Leon called upon the first speaker:
Kristina Cotran, announced upcoming events with Toastmasters.
Brad Neumann, spoke on renaming the City of Ontario.

Stephanie, spoke on the use of electric vehicle chargers.
Tommy Mushegain, spoke on the need of universally accessible playgrounds.

AGENDA REVIEW/ANNOUNCEMENTS

City Manager Ochoa announced the need to move public hearing Item No. 13 to the regular meeting of March 4, 2025.

CONSENT CALENDAR

MOTION: Moved by Council Member Porada, seconded by Council Member Macias and carried by a unanimous vote 5-0, to approve the Consent Calendar as presented.

1. APPROVAL OF MINUTES

Minutes for the regular meetings of the City Council and Housing Authority of January 21, 2025, and approving same as on file in the Records Management Department.

2. BILLS & PAYROLL

Approved bills January 17, 2025 through January 30, 2025, in the amount of $40,964,945.93, and Payroll December 29, 2024 through January 11, 2025 in the amount of $5,722,436.49.

3. AN AMENDMENT TO THE MAINTENANCE SERVICES AGREEMENT WITH BRIGHTVIEW LANDSCAPE SERVICES, INC. FOR WEED ABATEMENT

The City Council authorized the City Manager, or his designee, to execute Amendment No. 2 to the Maintenance Services Agreement No. PM 2122-1 with BrightView Landscape Services, Inc., of Upland, California, for Weed Abatement in the amount of $20,496 for a total not-to-exceed contract amount of $321,764.

4. ACCEPT WRITTEN PETITIONS TO CREATE A COMMUNITY FACILITIES DISTRICT; ADOPT A RESOLUTION OF INTENTION TO ESTABLISH CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 73 (WILDFLOWER ACRES) AND TO AUTHORIZE THE LEVY OF SPECIAL TAXES; AND ADOPT A RESOLUTION DECLARING IT NECESSARY TO INCUR BONDED INDEBTEDNESS

The City Council considered and:

A. Accepted written petitions from Pulte Home Company, LLC and AG EHC II (PHM) CA 2, L.P. ("Landowners"), to create a Community Facilities District ("CFD") and to waive certain procedural matters, under the Mello-Roos Community Facilities Act of 1982;

B. Adopted a Resolution of Intention to establish City of Ontario Community Facilities District No. 73 (Wildflower Acres), authorize the associated levy of special taxes therein; and set a public hearing for the formation of the CFD as part of the regularly scheduled City Council meeting on Tuesday, April 1, 2025; and
C. Adopted a Resolution Declaring it Necessary for the City of Ontario Facilities District No. 73 (Wildflower Acres) to Incur Bonded Indebtedness.

RESOLUTION NO. 2025-002 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, OF INTENTION TO ESTABLISH A COMMUNITY FACILITIES DISTRICT PROPOSED TO BE NAMED CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 73 (WILDFLOWER ACRES) AND TO AUTHORIZE THE LEVY OF A SPECIAL TAX THEREIN.

RESOLUTION NO. 2025-003 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DECLARING IT NECESSARY FOR CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 73 (WILDFLOWER ACRES) TO INCUR BONDED INDEBTEDNESS.

5. A CHANGE ORDER TO THE CONSTRUCTION CONTRACT WITH GRBCON, INC. FOR EASEMENT AND STORM DRAIN PIPE REPLACEMENT PROJECT

The City Council authorized the City Manager, or his designee, to approve Change Order No. 3 to the Construction Contract with GRBCON, Inc., of Baldwin Park, California, for the Easement and Storm Drain Pipe Replacement Project in the amount of $163,576 for a total not-to-exceed contract amount of $1,408,677.

6. INCREASE NOT-TO-EXCEED AMOUNT OF CO-OPERATIVE PURCHASES & PRE-AUTHORIZED VENDORS FOR FLEET EQUIPMENT SERVICES AND PARTS

The City Council took the following actions:

A. Authorized the purchasing threshold increase for the co-operative purchase and delivery of fleet parts in the amount of $350,000 for a not-to-exceed amount of $475,000 from Factory Motor Parts, of Pomona, California, consistent with the terms and conditions of the CA-State Contract DGS-7-21-99-41-01, and
B. Authorized the purchasing threshold increase for the co-operative purchase and delivery of fleet parts in the amount of $300,000 for a not-to-exceed amount of $455,000 from Parts Authority, of Rancho Cucamonga, California, consistent with the terms and conditions of the CA-State Contract DGS-7-21-99-41-03; and
C. Authorized the purchasing threshold increase for the pre-authorized purchase and delivery of fleet parts and services in the amount of $450,000 for a not-to-exceed amount of $799,000 from Rush Truck Center, of Fontana, California.

7. ACCEPTANCE OF BROADBAND PROGRAM BENEFICIARIES FROM SOUTHERN CALIFORNIA ASSOCIATION OF GOVERNMENTS (SCAG)

The City Council approved a Memorandum of Understanding with Southern California Association of Governments (SCAG) of Los Angeles, California, for broadband program beneficiaries relating to the Local Agency Technical Assistance Program.

8. PURCHASE ADDITIONAL MICROSOFT 365 SUBSCRIPTIONS WITH SOFTWAREONE INC.

The City Council authorized the City Manager, or his designee, to execute the purchase of additional Microsoft 365 subscriptions with SoftwareONE Inc., of Milwaukee, Wisconsin, for $65,805 plus $100,000 in contingency, revising not-to-exceed amount on the agreement to $1,774,456.

9. AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH CALTEK TECHNOLOGIES, INC., FOR LOW-VOLTAGE CABLING AND EQUIPMENT INSTALLATION

The City Council took the following actions:

A. Authorized the City Manager, or designee, to execute Amendment No. 7 to the Professional Services with Caltek Technologies, Inc., of Ontario, CA, for low-voltage cabling, extending the terms for three years and increase the authorized amount by $300,000 for a total contract not-to-exceed amount of $475,957.
B. Authorized the City Manager, or designee, to execute Amendment No. 7 to the Professional Services with Caltek Technologies, Inc., of Ontario, CA, for low-voltage cabling for the Animal Resource Center of the Inland Empire's (ARC) temporary animal shelter, increasing the authorized amount by $71,276 for a total contract not-to-exceed amount of $547,233.

10. AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH AXON ENTERPRISE, INC. FOR THE ACQUISITION OF POLICE DEPARTMENT FRONTLINE EQUIPMENT

The City Council authorized the City Manager, or his designee, to execute Amendment No. 6 to the Professional Services Agreement with Axon Enterprise, Inc. of Scottsdale, Arizona, for the purchase of twelve (12) Axon Skydio police unmanned aircraft systems (drones) in the amount of $1,812,703 and Axon Standards, an Early Intervention System (EIS), in the amount of $65,000 for a new total not-to-exceed contract amount of $11,658,373.

PUBLIC HEARING

11. A PUBLIC HEARING TO CONSIDER AN URGENCY ORDINANCE APPROVING A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-004, REGARDING ACCESSORY DWELLING UNITS AND JUNIOR ACCESSORY DWELLING UNITS

The City Council considered and waived further reading, and adopted an Urgency Ordinance approving File No. PDCA24-004, to amend Division 5.03 - Supplemental Land Use Regulations, Section 5.03.010 (Accessory Dwelling Units) of the City's Development Code to comply with recent changes to state law that impose new limits on local authority to regulate Accessory Dwelling Units ("ADUs") and Junior Accessory Dwelling Units ("JADUs"), which took e□ect on January 1, 2025.

URGENCY ORDINANCE NO. 3296 AN URGENCY ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-004, AMENDING DIVISION 5.03 & SUPPLEMENTAL LAND USE REGULATIONS, SECTION 5.03.010 OF THE CITY'S DEVELOPMENT CODE RELATING TO ACCESSORY DWELLING UNITS AND JUNIOR ACCESSORY DWELLING UNITS AND FINDING THE ACTION TO BE STATUTORILY EXEMPT FROM CEQA UNDER PUBLIC RESOURCES CODE SECTION 21080.17.

Notice of public hearing was duly given. Affidavits of compliance are on file. There were no written communications.

Mayor Leon opened the public hearing and inquired if anyone was interested in speaking to the item. Hearing no one, Mayor Leon closed the public hearing and opened the item for Council discussion.

MOTION: Moved by Council Member Porada, seconded by Council Member Bowman and carried by a unanimous vote 5-0, to adopt Urgency Ordinance No. 3296.

12. A PUBLIC HEARING TO CONSIDER APPROVAL OF A DISPOSITION AND DEVELOPMENT AGREEMENT BETWEEN THE CITY OF ONTARIO AND ONTARIO RANCH HOTELS, LLC. FOR THE DEVELOPMENT OF A HOTEL FEATURING 227-GUEST ROOMS AT THE SOUTHEAST CORNER OF EAST RIVERSIDE DRIVE AND ONTARIO AVENUE; MAKING CERTAIN CEQA FINDINGS IN CONNECTION THEREWITH

The City Council ("City") considered and:

A. Adopted a Resolution approving pursuant to the Certified Final Environmental Impact Report for the Ontario Regional Sports Complex (SCH No. 2023110328) the Disposition and Development Agreement ("Agreement") between the City of Ontario and Ontario Ranch Hotels, LLC. ("Developer") (on file with the Records Management Department) and approving the acquisition of real property for road improvements needed at the corner of East Riverside Drive and Vineyard Avenue.

B. Authorized the City Manager, or his designee, to sign all documents necessary to implement the Agreement.

RESOLUTION NO. 2025-004 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING, PURSUANT TO THE CERTIFIED FINAL ENVIRONMENTAL IMPACT REPORT FOR THE ONTARIO REGIONAL SPORTS COMPLEX (SCH NO. 2023110328), A DISPOSITION AND DEVELOPMENT AGREEMENT BETWEEN THE CITY AND ONTARIO RANCH HOTELS, LLC FOR THE DEVELOPMENT OF CERTAIN REAL PROPERTY LOCATED ON THE SOUTHEAST CORNER OF EAST RIVERSIDE DRIVE AND ONTARIO AVENUE, ONTARIO, CALIFORNIA (PORTION OF APN 0218-111-12-0000); MAKING CERTAIN CEQA FINDINGS IN CONNECTION THEREWITH.

Notice of public hearing was duly given. Affidavits of compliance are on file. There was one written communication from the Law Office of Jordan R. Sisson in opposition.

Mayor Leon opened the public hearing and called upon the Executive Director of Economic Development to provide background information regarding the item.

Tina Silva, spoke in opposition.
Jorge Zavala, spoke in opposition.
Jordan Sissan, spoke in opposition.
Chris Robles, spoke in opposition.
Karen May, spoke in opposition.
Tommy Mushegain, spoke in opposition.
Robert Ramos, spoke in opposition.

Mayor Leon closed the public hearing and City Council discussed the item before coming to a consensus.

MOTION: Moved by Mayor pro Tem Wapner, seconded by Council Member Porada and carried by a unanimous vote 5-0, to adopt Resolution No. 2025-004.

13. A PUBLIC HEARING TO CONSIDER ADOPTING A RESOLUTION OF NECESSITY FOR THE ACQUISITION BY EMINENT DOMAIN OF A FEE SIMPLE INTEREST IN CERTAIN REAL PROPERTY LOCATED AT 434 NORTH EUCLID AVENUE

The City Council continued this Item to the March 4th meeting.

MOTION: Moved by Mayor Leon, seconded by Council Member Macias and carried by a unanimous vote 5-0, to continue the item to regular meeting on March 4, 2025.

STAFF MATTERS

City Manager Ochoa made no announcements.

COUNCIL MATTERS

Council Member Macias made no comments.

Council Member Bowman welcomed his son back to Ontario.

Mayor pro Tem Wapner made no comments.

Council Member Porada announced the Ontario Heritage Golf Tournament Fundraiser.

Mayor Leon made no comments.

ADJOURNMENT

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Financial Services Prepared By: Jessica Ban Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 3

SUBJECT: **A DEVELOPMENT IMPACT FEE CREDIT AGREEMENT (FILE NO. PDIF24-001) BETWEEN THE CITY OF ONTARIO AND AG EHC II (LEN) CA 3, L.P. FOR FACILITY CONSTRUCTION ASSOCIATED WITH TRACT MAP 20536 (FILE NO. PMTT22-021), LOCATED 875 FEET SOUTH OF THE INTERSECTION OF RIVERSIDE DRIVE AND ARCHIBALD AVENUE, WITHIN THE COUNTRYSIDE SPECIFIC PLAN**

RECOMMENDATION: That the City Council authorize the City Manager to execute the Development Impact Fee Credit Agreement (File No. PDIF24-001) between the City of Ontario and AG EHC II (LEN) CA 3, L.P., for facility construction associated with Tract Map 20536 (File No. PMTT22-021), located 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within the Countryside Specific Plan, and authorize the City Manager to execute the Agreement.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: Approval of the proposed Development Impact Fee (DIF) Credit Agreement (File No. PDIF24-001) will not result in any fiscal impact to the City's General Fund. The project's Development Agreement (File No. PDA22-005) and related conditions require AG EHC II (LEN) CA 3, L.P. (hereinafter referred to as "Developer") to construct DIF program infrastructure with estimated costs of $396,828. The proposed DIF Credit Agreement defines the amount of DIF credit that the Developer may be eligible to receive for construction of the improvements. The DIF credit that the Developer will receive upon completion of the improvements may be exchanged for a refund of the DIF fees paid by the Developer (up to the Developer's maximum DIF obligation) in the respective DIF category.

BACKGROUND & ANALYSIS: On March 7, 2024, the City Council approved the Development Agreement (File No. PDA22-005) between the City of Ontario and AG EHC II (LEN) CA 3, L.P., for Tract Map 20536.

In accordance with the Development Agreement and related conditions, the Developer is required to construct DIF Program infrastructure to serve TM 20536. Improvements include the installation of streets and fiber optics facilities on Archibald Avenue and a quarter-mile signal at Archibald Avenue and Maplewood Privado.

Pursuant to the City's adopted DIF Credit and/or Reimbursement policies, construction of DIF Program facilities requires the Developer and the City to enter into a DIF Credit and/or Reimbursement Agreement, which specifies the infrastructure to be constructed by the Developer and includes an estimate of the maximum DIF credit that may be applied in the applicable Regional/Local DIF categories. These infrastructure improvements are within the Ontario Ranch streets and fiber optics system categories. Since the maximum eligible costs in the Agreement for the required infrastructure exceeds the Developer's DIF obligation, the Developer is eligible to receive DIF Credit under the proposed Agreement.

The proposed Agreement complies with the City's DIF policies and conforms with the approved Development Plan and associated COA. Under the provisions of the City's DIF Program, the City Manager is authorized to execute this Agreement upon approval by the City Council.

DEVELOPMENT IMPACT FEE CREDIT AGREEMENT

FOR FACILITY CONSTRUCTION

By and Between

City of Ontario
a California municipal corporation

and

AG EHC II (LEN) CA 3, L.P.,
A Delaware limited partnership

March 18, 2025

San Bernardino County, California

DEVELOPMENT IMPACT FEE CREDIT AGREEMENT FOR FACILITY CONSTRUCTION BY AND BETWEEN THE CITY OF ONTARIO AND FILE NO. PDIF24-001

This DEVELOPMENT IMPACT FEE CREDIT AGREEMENT ("Agreement"), entered into this _____ day of _____, 2025, between the CITY OF ONTARIO, a California municipal corporation, hereinafter referred to as the "City," and AG EHC II (LEN) CA 3, L.P., a Delaware limited partnership, hereinafter referred to as the "Developer."

RECITALS

A. Developer is the owner and developer of property located within the City, which property has received development approvals from the City, including the Countryside Specific Plan ("Specific Plan") and Tract Map No. 20536 (the "Tract Map"). A legal description of the property is attached hereto as Exhibit 1 and incorporated herein by reference (the "Property"). A map of the Property is attached hereto as Exhibit 2 and incorporated herein by reference.

B. As a condition of the development approvals for the Property, including the Specific Plan and Tract Map approvals, the Developer is required to construct those public improvements identified on Exhibit 3, consisting of certain master planned public infrastructure and improvements, (hereinafter referred to collectively as the "Improvements") The estimated costs for the design and construction of the Improvements are set forth in Exhibit 4. Both Exhibits 3 and 4 are attached hereto and incorporated herein by reference.

C. On July 1, 2003, City Ordinance No. 2779 was adopted establishing certain development impact fees ("DIF Fees") to be paid as a condition to the issuance of certain entitlements within the City. Section 7 of Ordinance 2779 authorizes the City Manager, when he or she determines that the public interest would be served by such an agreement, to execute agreements on behalf of the City with applicants in order to provide a credit to the applicant against certain DIF Fees in exchange for the applicant's construction and dedication of public improvements, upon reasonable terms and conditions as may be determined on a case by case basis and subject to City Council approval.

D. City and the previous owner of the Property have previously entered into a statutory development agreement (File No. PDA22-005), pursuant to Section 65864, et seq., of the Government Code, ("Development Agreement") and such Development Agreement has been assigned to Developer and Developer has assumed all rights, responsibilities and obligations of the Development Agreement, including the design and construction of the Improvements identified in Exhibit 3 and such Improvements are included in the City's Development Impact Fee (DIF) Program as a project, or a portion of a project and eligible for credit against DIF Fees.

E. City and Developer have agreed that the costs to design and construct the Improvements shall be eligible for DIF Credit in accordance with the City's Ontario Ranch DIF Credit policies as contained in the City's DIF Program and Ordinance Nos. 2779 and 2780, and Resolution Nos. 2003-39, 2003-070, 2005-005, 2005-099, 2007-023, 2007-150, 2008-036, 2011-011, 2012-092, 2015-008, 2017-102, 2019-135, and 2022-133.

AGREEMENT

NOW, THEREFORE, for good and valuable consideration, the receipt of which is hereby acknowledged, and the mutual promises contained herein, it is agreed as follows:

1. Definitions. For purposes of this Agreement, the terms below shall be defined as follows:

"Acceptable Title" means title to land or an interest therein required for the operation of an Improvement, in form acceptable to the City Manager, free and clear of all liens, taxes, assessments, leases, easements and encumbrances, whether or not recorded, but subject to any exceptions determined by the City Manager as not materially interfering with the actual or intended use of the land or interest therein required for the operation of an Improvement. Notwithstanding the foregoing, an irrevocable offer of dedication may constitute "Acceptable Title."

"Acceptance Date" means the earlier of (i) the date the City Manager or his or her designee takes final action, in writing, to accept dedication or transfer of an Improvement or (ii) the date determined pursuant to Section 3 below.

"Bid Documents" means all designs, bid documents, construction plans and specifications, system layout drawings and other construction documents and permits relating to an Improvement.

"Certificate of DIF Credit" means a City certificate for the issuance of DIF Credit to Developer in the form attached hereto as Exhibit 5.

"City DIF Program and Policies" means Ordinance Nos. 2779 and 2780 and Resolution Nos. 2003-39, 2003-070, and 2019-135, as may be amended from time to time.

"City Manager" means the City Manager of the City or his or her designee.

"City Engineer" means the City's City Engineer or his or her designee.

"Completed", "Complete" and "Completion" with respect to an Improvement means that such Improvement has been completed in accordance with its Bid Documents, including any final "punch list" items, as approved in writing by the City Engineer, which approval shall not be unreasonably withheld, and that such Improvement is Usable. Notwithstanding the foregoing, if an Improvement which Developer is obligated to construct pursuant to the applicable conditions of approval for a portion of the Property is only a portion of a larger work of improvement, then a determination of "Completed" or

"Completion" with respect to that Improvement shall be made only as to that Improvement and not with respect to the larger work of improvement of which it is a portion.

"Credit Request" means a document, substantially in the form of Exhibit 6, to be used by Developer in requesting DIF Credits with respect to one or more Improvements.

"Days" shall mean business days unless otherwise stated.

"Developer Contract" means a contract between the Developer and a qualified contractor awarded for the construction of the Improvements at the direction of Developer.

"Development Agreement" has the meaning set forth in Recital D above.

"DIF" or "Development Impact Fees" or "DIF Fees" means the development impact fees imposed within the New Model Colony area pursuant to City Ordinance Nos. 2779 and 2780 and City Resolution Nos. 2003-39, 2003-070, 2005-005, 2005-099, 2007-023, 2007-150, 2008-036, 2011-011, 2012-092, 2015-008, 2017-102, 2019-135, and 2022-133, and any subsequent City ordinances and resolutions lawfully adopted by the City Council to update or modify such development impact fees.

"DIF Credit" means credits earned against the payment of DIFs pursuant to this Agreement.

"DIF Obligation" means the amount of Developer's total obligation for Development Impact Fees in either the Regional or Local Adjacent portion of a DIF category for the Property. Developer's DIF Obligation amounts for each DIF Category shall be as provided in Exhibit 4.

"DIF Program" means the Development Impact Fee Program and the capital improvement projects and public infrastructure identified in the Development Impact Fee Program, adopted and amended by the City from time to time.

"Effective Date" means the date set forth in the first paragraph of this Agreement.

"Eligible Cost" means the substantiated cost of an Improvement to be used in calculating DIF Credit amounts, which costs may include: (i) the costs for the construction (including grading) of such Improvement, (ii) costs directly related to the construction and/or acquisition of the Improvement, such as costs of payment, performance and/or maintenance bonds, the professional costs of material testing, and insurance costs (including costs of any title insurance required); (iii) the cost of acquiring any real property or interest therein in order to construct or operate the Improvement, (iv) the fees paid to the City and any other governmental agencies for, and all other costs incurred in connection with, obtaining permits, licenses or other governmental approvals for such Improvement, (v) the costs incurred in preparing Bid Documents and the related costs of geotechnical and environmental evaluations of the Improvement, (vi) costs of

construction and project management, administration and supervision (but only up to five percent (5%) of the costs described in clause (i) above) incurred for the construction of such Improvement, (vii) professional costs associated with such Improvement, such as design, engineering, accounting, inspection, construction staking, and similar professional services including legal services related to the review of construction contracts. The maximum amount of Eligible Costs described in clauses (v) through (vii) shall be limited to a total of fifteen percent (15%) of the costs described in clause (i).

"Improvement" or "Improvements" means the public improvements required to support the development of the Property as described in Exhibit 3 to the extent required by the applicable conditions of approval.

"Program Cost" or "DIF Program Cost" means the estimated cost of an Improvement identified in the "Nexus Study" referenced in City Resolution No. 2003-039 as it may be modified, supplemented or superseded from time to time. The Program Cost to be applied shall be the Program Cost in effect at the time the Improvement is Completed.

"Usable" shall mean that, with respect to any particular Improvement, the Improvement is actually usable for its intended purposes, and includes, for water Improvements connection to the applicable water supply, for sewer Improvements connection to an applicable disposal system, and for recycled water Improvements connection to a treated water supply and distribution system. Notwithstanding the foregoing, if an Improvement which Developer is obligated to construct pursuant to the applicable conditions of approval for a portion of the Property is only a portion of a larger work of improvement, then a determination of whether that Improvement is "Usable" shall be made only with respect to that Improvement and not with respect to the larger work of improvement of which it is a portion.

2. Construction and Funding of Improvements by Developer. Developer shall commence the Improvements in accordance with the terms of the Development Agreement and individual Tract Maps, including any extension thereof. Upon commencement of the Improvement(s), Developer agrees to proceed expeditiously with the construction of the Improvement(s) under the terms herein. For the purposes of this Agreement, commencement of the Improvements shall mean when Developer receives the first permit from City for grading of the Property. If Developer is unable or unwilling to proceed with, and Complete, the construction of the Improvement(s) for any reason, and subject to the provisions in Section 17 below, Developer shall be considered to be in default of this Agreement. City and Developer agree that Developer shall award, or cause to be awarded, all contracts for the construction of the Improvements and that this Agreement as necessary to assure the timely and satisfactory Completion of such Improvements. The Developer shall perform all of its obligations hereunder and shall conduct all operations with respect to the construction of the Improvements in a good, workmanlike and commercially reasonable manner, with the standard of diligence and care normally employed by duly qualified persons utilizing commercially reasonable efforts in the performance of comparable work and in accordance with generally accepted practices appropriate to the activities undertaken. The Developer shall not be relieved of

its obligation to construct the Improvements and cause title to the Improvements to be conveyed to the City even if the DIF Credit Amount is less than the actual cost of the Improvements.

3. Inspection and Acceptance of Completed Improvement by City. City shall make or shall cause to be made periodic site inspections of Developer's construction work. The Acceptance Date for each Improvement constructed by Developer shall occur not later than twenty (20) Days following the last to occur of the following:

(a) the City Engineer's determination that the Improvement is Complete;

(b) the City Manager's determination that Acceptable Title with respect to the Improvement is available for acceptance;

(c) Developer's provision of one (1) set of "as-built" or record drawings or plans for the Improvement, certified and reflecting the condition of the Improvement as constructed; and

(d) Developer's provision of such evidence or proof as the City Manager shall require that all persons, firms and corporations supplying work, labor, materials, supplies and equipment to the construction of the Improvement have been paid and that no claims of liens have been recorded by or on behalf of any such person, firm or corporation. Alternatively, rather than await the expiration of the time for the recording of claims of liens, Developer may elect to provide a title insurance policy or other security acceptable to the City Manager guaranteeing that no such claims of liens will be recorded or become a lien upon any of the real property required for the Improvement.

4. Conveyance of Acceptable Title to City. Acceptable Title to all property on, in or over which, the Improvement will be located, shall, prior to and as a condition precedent to the City's acceptance of any Improvement, be conveyed to City by way of an irrevocable offer of dedication of such property on the Tract Map or by a separate recorded instrument, and such conveyance of interest has been approved by the City as being a sufficient interest therein to permit the City to properly own, operate and maintain such Improvement. Developer agrees to assist the City in obtaining such documents as are required to obtain Acceptable Title. Completion of the transfer of Acceptable Title shall be evidenced by recordation of the acceptance thereof by the City Manager or his designee.

5. Maintenance and Warranties to be provided to City. Developer shall maintain the Improvement in good and safe condition until the Acceptance Date of the Improvement. Prior to the Acceptance Date, Developer shall, at its sole cost and expense, be responsible for performing any required maintenance on the Improvement. On or before the Acceptance Date of the Improvement, Developer shall assign to the City all of Developer's rights in any warranties, guarantees, maintenance obligations or other evidence of contingent obligations of third persons with respect to such Improvement. After the Acceptance Date, City shall be solely responsible for maintenance of the Improvement. With respect to the Improvement, Developer shall warrant that the

Improvement is free from defects in materials and construction defects (and shall correct or cause to be corrected any such defects at Developer's expense) for a period of one year from the Acceptance Date thereof (the "Warranty Period") and Developer shall provide a bond reasonably acceptable in form and substance to the City for such period and such purpose to insure that such defects that appear within said period will be repaired, replaced or corrected by Developer, at its own cost and expense, to the reasonable satisfaction of the City Manager. During the Warranty Period, Developer shall continue to repair, replace or correct any such defects within thirty (30) Days after written notice thereof by the City Manager to Developer, and shall complete such repairs, replacement or correction as soon as practicable. Any warranties, guarantees or other evidences of contingent obligations of third persons with respect to the Improvement shall be delivered to the City Manager, in writing, as part of the transfer of title.

6. Issuance of DIF Credit to Developer. Developer shall receive DIF Credits based upon the verified Eligible Costs of the Improvement (or accepted portion of the Improvement). Issued DIF Credits shall specify the DIF Credit infrastructure category and whether the DIF Credit is for construction of a Regional or Local Adjacent DIF Program Improvement.

7. Limitations on the Issuance of DIF Credit to Developer upon Completion of an Improvement. The amount of DIF Credit to be issued by City shall be limited to the amount of the DIF Program Costs for the Improvement (or accepted portion of the Improvement). The DIF Program Costs identified in the City's DIF Program shall be subject to change, from time to time, as part of the continuing update of the City's DIF Program. The DIF Program Costs for the Improvement (or accepted portion of the Improvement) shall be those in effect at the time the DIF Credit Request is submitted to the City.

(a) To the extent that NMC Builders LLC incurred the costs for the design of the Improvements, Developer agrees that the DIF Credit, up to ten (10%) of the DIF Program Costs, for such design cost portion of the Improvements shall be issued to NMC Builders LLC.

(b) The DIF Credit that the Developer will receive upon Completion of the Improvements may be exchanged for a refund of DIF that was paid by the Developer (up to the Developer's maximum DIF obligation) in the respective DIF category.

8. Issuance of a DIF Credit Certificate. When an Improvement is Complete, Developer shall submit a DIF Credit Request to City with all supporting documentation evidencing the total actual Eligible Costs of the Improvement at the time of submittal. The City Manager or designee shall determine the completeness of the DIF Credit Request and notify Developer of whether the DIF Credit Request is considered complete or if additional information is needed from Developer. Once the DIF Credit Request is considered complete, the City Manager or designee shall use his or her best efforts to determine the total actual Eligible Costs of the Improvements and provide Developer with a Certificate of DIF Credit within twenty (20) Days following receipt of the completed DIF Credit Request.

9. DIF Program Modifications. The estimated cost in the City's DIF Program for DIF Improvements (or defined portions of DIF Improvements) as listed in Exhibit 4 and Developer's total DIF Obligation amount may be modified from time to time based on modifications to the City's DIF Program.

10. Assignment of DIF Credits. Developer shall have the right to transfer or assign DIF Credits provided for herein, to any person, partnership, limited liability company, joint venture, firm or corporation; provided, however, that any such sale, transfer or assignment shall only be made in strict compliance with the following:

(a) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, Developer (i) shall notify the City Manager, in writing, of such sale, transfer or assignment and (ii) shall provide the City with an executed agreement, by purchaser, transferee or assignee that identifies the amount of DIF Credits transferred.

(b) Except for the limited assignment above of DIF Credits, any assignment by Developer of any of the obligations of Developer under this Agreement (a "DIF Improvement Assignment") with regards to the Improvements listed in Exhibit 4, shall identify the Improvements that are the subject of the Assignment Agreement and require the written approval of the City Manager, which approval shall not be unreasonably withheld so long as adequate security as determined by City in its sole discretion, is in place to secure the Completion of the subject Improvements and any DIF Improvement Assignment not made in strict compliance with the foregoing conditions (other than a transfer under Section 23 below) shall, unless such obligations are performed by Developer when required by this Agreement notwithstanding such assignment, constitute a default by Developer and City shall have no further obligations with regard to acceptance of Certificates of DIF Credit issued to Developer, including any DIF Credit assigned or transferred by Developer.

(c) If Developer enters into a DIF Improvement Assignment with a successor in interest with respect to all or a part of the Property (a "Successor Developer") in accordance with Section 10(b) and the Successor Developer obtains DIF Credit pursuant to this Agreement upon its completion of the Improvements identified in the DIF Improvement Assignment, then

(i) such Successor Developer shall have the right to sell, transfer or assign to Developer, and Developer shall have the right to acquire from such Successor Developer, all or a portion of such DIF Credit by complying only with Section 10(b) above, and

(ii) Developer shall have the right to sell, transfer or assign all or a portion of such DIF Credit to other Successor Developers who acquire other portions of the Property by complying only with Section 10(b) above, if the sale, transfer or assignment of such DIF Credit occurs concurrently with the conveyance of another portion of the Property to the other Successor Developer.

11. Additional Documents/Actions. The City Manager is authorized to approve and execute any documents and to take any actions necessary to effectuate the purposes of this Agreement.

12. Integration. This Agreement reflects the complete understanding of the parties with respect to the subject matter hereof. In all other respects, the parties hereto re-affirm and ratify all other provisions of the Development Agreement.

13. Prevailing Wages. Developer is aware of the requirements of California Labor Code Section 1720, et seq. (as amended by Stats 2001 ch. 938 § 2 (S.B. 975)), and 1770, et seq., as well as California Code of Regulations, Title 8, Section 1600, et seq. (collectively, the "Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. The Bid Documents and each Developer's Contract shall require all contractors for the construction of Improvements to pay prevailing wages in accordance with the applicable provisions of the Labor Code. Developer shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the services available to interested parties upon request, and shall post copies at the Developer's principal place of business and at the project site. Developer shall defend, indemnify and hold the City, its officials, officers, employees, agents, contractors and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

14. Default and Force Majeure.

(a) Default. Failure or delay by Developer or City to perform any of its obligations under this Agreement constitutes a default by such party under this Agreement. The party alleged to be in default shall have thirty (30) days after the date of the written notice by the other party to commence to cure such default. The party alleged to be in default shall diligently pursue such cure to completion within thirty (30) days or a reasonable timeframe if such default cannot be reasonably cured within thirty (30) days, as established in the written notice provided by the party asserting the default. If the party alleged to be in default has not cured its default within the cure period set forth therein, the defaulting party shall be deemed in breach. Any failure or delay in giving such notice or in asserting any rights and remedies as to any default shall not constitute a waiver of any default, nor shall it change the time of default, nor shall it deprive the party not in default of its rights to institute and maintain any actions or proceedings which it may deem necessary to protect, assert or enforce any of its rights or remedies. If any default by Developer is not cured within the time period provided by the City, City shall be entitled to terminate this Agreement in its entirety and thereafter, the City shall be under no obligation to perform any of City's obligations hereunder, including, but not limited to, the issuance of DIF Credits that Developer may claim.

(b) Force Majeure. Notwithstanding the provisions contained in the foregoing paragraph, performance by either party hereunder shall not be deemed to be in default where delay or defaults are due to war, insurrection, strikes, lock-outs, riots, floods, earthquakes, fires, casualties, acts of God, epidemics, quarantine restrictions,

freight embargoes, public transportation stoppage, governmental restrictions or priority, litigation brought by a third party, unusually severe weather, reasonably unforeseeable property conditions, acts of the other party, acts or failure to act of the other party or any other public or governmental agency or entity, or any causes beyond the control or without the failure of the party claiming an extension of time to perform (a "Force Majeure Event"). An extension of time for any such cause (an "Excusable Delay") shall be for the time period of the delay and shall commence to run from the time of the commencement of the cause, if notice by the party claiming such extension is sent to the other party within thirty (30) days of knowledge of the commencement of the cause or from the date of the notice if provided after such thirty-day period. Notwithstanding the foregoing, none of the foregoing events shall constitute an Excusable Delay unless and until the party claiming such delay and interference delivers to the other party written notice describing the event, its cause, when and how such party obtained knowledge, the date the event commenced, and the estimated delay resulting therefrom. Any party claiming an Excusable Delay shall make a good faith effort to deliver such written notice within thirty (30) days after it obtains actual knowledge of the event. Times of performance under this Agreement may also be extended in writing by City and Developer. The Parties hereto expressly acknowledge and agree that changes in either general economic conditions or changes in the economic assumptions of any of them (unless such conditions were caused by a Force Majeure Event) that may have provided a basis for entering into this Agreement and that occur at any time after the execution of this Agreement are not Force Majeure Events and do not provide any Party with grounds for asserting the existence of a delay in the performance of any covenant or undertaking that may arise under this Agreement. Each Party expressly assumes the risk that changes in general economic conditions or changes in such economic assumptions relating to the terms and covenants of this Agreement could impose an inconvenience or hardship on the continued performance of such Party under this Agreement, but that such inconvenience or hardship is not a Force Majeure Event and does not excuse the performance by such Party of its obligations under this Agreement. Without limiting the nature of the foregoing, the parties agree that the inability of Developer to obtain a satisfactory commitment from a construction lender for the improvement of the Property or to satisfy any other condition of this Agreement relating to the development of the Property shall not be deemed to be a Force Majeure Event or otherwise provide grounds for the assertion of the existence of a delay under this Section 14.

15. Licenses and Permits. The Developer shall secure (or shall cause to be secured) any and all permits that may be required by the City or any other governmental agency affected by the construction of the Improvements. The Developer shall be responsible for paying all applicable fees and charges to the City to obtain any land use entitlements and permits that are necessary to construct the Improvements.

16. Indemnification. The Developer agrees to protect, indemnify, defend and hold the City, and its respective officers, employees and agents, and each of them, harmless from and against any and all claims, losses, expenses, suits, actions, decrees, judgments, awards, attorney's fees, and court costs (collectively "Damages") that the City, or its respective officers, employees and agents, or any combination thereof, may suffer or that may be sought against or recovered or obtained from the City, or its respective

officers, employees or agents, or any combination thereof, as a result of or by reason of or arising out of or in consequence of (a) the acquisition, construction, or installation of the Improvements; (b) the untruth or inaccuracy of any representation or warranty made by the Developer in this Agreement or in any certifications delivered by the Developer hereunder; or (c) any act or omission of the Developer or any of its subcontractors, or their respective officers, employees or agents, in connection with the Improvements. If the Developer fails to do so, the City shall have the right, but not the obligation, to defend the same and charge all of the direct or incidental costs of such defense, including any reasonable attorneys' fees or court costs, to and recover the same from the Developer. Notwithstanding the foregoing, neither the City nor its respective officers, employees, or agents shall be indemnified, defended or held harmless against such Damages to the extent that such Damages have been caused by their sole active negligence or sole willful misconduct. The parties acknowledge and agree that the Developer shall be released from the indemnity, defense and hold harmless obligations set forth herein upon the acceptance of the Improvements by the City and completion of the Warranty Period for such Improvements.

17. Developer as a Private Developer. In performing under this Agreement, it is mutually understood that the Developer is acting as a private developer, and not as an agent of the City. The City shall have no responsibility for payment to any contractor, subcontractor or supplier of the Developer. Accordingly, this Agreement does not constitute a debt or liability of the City. The City shall not be obligated to advance any of its own funds or any other costs incurred in connection with the Project. No member, official or employee of the City shall be personally liable to the Developer, or any successor in interest, in the event of any default or breach by the City or for any amount that may become due to the Developer or its successors, or on any obligations under the terms of this Agreement.

18. Other Obligations. Nothing contained herein shall be construed as affecting the Developer's respective duty to perform its respective obligations under other agreements, land use regulations or subdivision requirements relating to the development of the Property, which obligations are and shall remain independent of the Developer's rights and obligations, and the City's rights and obligations, under this Agreement; provided, however, that the Developer shall use its reasonable and diligent efforts to perform each and every covenant to be performed by it under any lien or encumbrance, instrument, declaration, covenant, condition, restriction, license, order, or other agreement, the nonperformance of which could reasonably be expected to materially and adversely affect the design, acquisition, construction and installation of the Improvements. This Agreement is not, and shall not be construed as, a statutory development agreement as authorized by Government Code sections 65864 et seq., and this Agreement shall not be interpreted as limiting the authority of the City to adopt and amend regulations concerning permitted uses of property, the density or intensity of use, the maximum height and size of proposed buildings, provisions for the reservation or dedication of land or the payment of impact fees for public purposes.

19. Binding on Successors and Assigns. Except as set forth in Section 10 or Section 23 hereof, neither this Agreement nor the duties and obligations of the Developer

hereunder may be assigned to any person or legal entity other than an affiliate of the Developer without the written consent of the City, which consent shall not be unreasonably withheld or delayed. Neither this Agreement nor the duties and obligations of the City hereunder may be assigned to any person or legal entity, without the written consent of the Developer, which consent shall not be unreasonably withheld or delayed. The agreements and covenants included herein shall be binding on and inure to the benefit of any partners, permitted and accepted assigns, and successors-in-interest of the parties hereto.

20. Amendments. This Agreement can only be amended by an instrument in writing executed and delivered by the City and the Developer.

21. Waivers. No waiver of, or consent with respect to, any provision of this Agreement by a party hereto shall in any event be effective unless the same shall be in writing and signed by such party, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which it was given.

22. No Third Party Beneficiaries. No person or entity, other than the City, shall be deemed to be a third party beneficiary hereof, and nothing in this Agreement (either express or implied) is intended to confer upon any person or entity, other than the City and the Developer (and their respective successors and assigns), any rights, remedies, obligations or liabilities under or by reason of this Agreement.

23. Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit Developer, at Developer's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. Developer shall have the right to encumber and assign its rights and interests hereunder to the lenders providing such financing as security for such financing without the consent of the City and without complying with Section 10 hereof. City acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with Developer and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. City will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. A mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage or deed of trust on the Property made in good faith and for value, unless otherwise required by law.

(b) The mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which mortgagee has submitted a request in writing to the City in the manner specified herein for giving notices, shall be entitled to receive written notification from City of any default by Developer in the performance of Developer's obligations under this Agreement.

(c) If City timely receives a request from a mortgagee requesting a copy of any notice of default given to Developer under the terms of this Agreement, City shall provide a copy of that notice to the mortgagee within ten (10) days following the sending of the notice of default to Developer. The mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no mortgagee shall have an obligation or duty under this Agreement to perform any of Developer's obligations or other affirmative covenants of Developer hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by Developer is a condition precedent to the performance of a covenant by City, the performance thereof shall continue to be a condition precedent to City's performance hereunder, and further provided that any sale, transfer or assignment by any mortgagee in possession shall be subject to the provisions of Section 10 of this Agreement.

24. Notices. Any written notice, statement, demand, consent approval, authorization, offer, designation, request or other communication to be given hereunder shall be given to the party entitled thereto at its address set forth below, or at such other address as such party may provide to the other party in writing from time to time, namely:

If to CITY:
Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

with a copy to:
Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761

If to DEVELOPER:

AG EHC II (LEN) CA 3, L.P.
Steven Benson, Manager
8585 East Hartford Drive, Suite 118
Scottsdale, AZ 85255

With a copy to Builder:

Lennar Homes of California
Geoff Smith, Vice President of Forward Planning
4140 Temescal Canyon Rd., Suite 410
Corona, CA 92883

Each such notice, statement, demand, consent, approval, authorization, offer, designation, request or other communication hereunder shall be deemed delivered to the party to whom it is addressed (a) if personally served or delivered, upon delivery, (b) if given by electronic communication, whether by telex, or telecopy, upon the sender's receipt of an appropriate answerback or other written acknowledgment, (c) if given by registered or certified mail, return receipt requested, deposited with the United States mail postage prepaid, 72 hours after such notice is deposited with the United States mail, (d) if given by overnight courier, with courier charges prepaid, 24 hours after delivery to said

overnight courier, or (e) if given by any other means, upon delivery at the address specified in this Section.

25. Jurisdiction and Venue. City and the Developer (a) agree that any suit action or other legal proceeding arising out of or relating to this Agreement shall be brought in state or local court in the County of San Bernardino or in the Courts of the United States of America in the district in which the City is located, (b) consent to the jurisdiction of each such court in any suit, action or proceeding, and (c) waive any objection that it may have to the laying of venue or any suit, action or proceeding in any of such courts and any claim that any such suit, action or proceeding has been brought in an inconvenient forum. Each of the City and the Developer agrees that a final and non-appealable judgment in any such action or proceeding shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law.

26. Attorneys' Fees. If any action is instituted to interpret or enforce any of the provisions of this Agreement, the prevailing party in such action shall be entitled to recover from the other party thereto reasonable attorney's fees and costs of such suit (including both prejudgment and post judgment fees and costs) as determined by the court as part of the judgment.

27. Governing Law. This Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State of California.

28. Usage of Words. As used herein, the singular of any word includes the plural, and terms in the masculine gender shall include the feminine.

29. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original.

30. Incorporation by Reference. The following Exhibits attached hereto and the Recitals of this Agreement are hereby incorporated by reference as though fully set forth herein:

Exhibit 1 – Legal Description of Property
Exhibit 2 – Map of Property
Exhibit 3 – Description of Improvements
Exhibit 4 – Estimated Costs of Improvements
Exhibit 5 – Certificate of DIF Credit
Exhibit 6 – DIF Credit Request
Exhibit 7 – none referenced

FORM OF DIF CREDIT REQUEST

The undersigned (the "Developer"), hereby requests DIF Credits in the DIF categories and amounts specified in Attachment 1 hereto. In connection with this Credit Request, the undersigned hereby represents and warrants to the City as follows:

1. He (she) is a duly authorized officer or representative of the Developer, qualified to execute this Credit Request on behalf of the Developer and is knowledgeable as to the matters set forth herein.

2. All costs of the Improvements for which credit is requested hereby are Eligible Costs (as defined in the Fee Credit Agreement) and have not been inflated in any respect. The Eligible Costs for which credit is requested have not been the subject of any prior credit request submitted to the City.

3. Supporting documentation (such as the applicable Developer Contract, third party invoices, lien releases and cancelled checks or other evidence of payment) is attached with respect to each cost for which credit is requested.

4. The Improvement for which credit is requested was constructed in accordance with the requirements of the Fee Credit Agreement.

5. Please issue a Certificate of DIF Credit to the Developer in the amount requested.

I declare under penalty of perjury that the above representations and warranties are true and connect.

Email: _____

7. GENERAL PROVISIONS.

Severability. In the event that the application of any of the provisions of this DIF Credit Transfer are held to be unenforceable or invalid, the validity and enforceability of other applications of that provision and of the remaining provisions shall not be affected.

Counterparts. This DIF Credit Transfer may be executed in counterparts.

Entire Agreement. This DIF Credit Transfer contains the entire final understanding of and between the parties and supersedes any prior written or oral agreements between them respecting the subject matter of this DIF Credit Transfer. There are no representations, agreements, arrangements or understandings, oral or written, between the parties that are not fully set forth herein.

Construction. Every covenant, term and provision of this DIF Credit Transfer shall be construed simply according to its fair meaning and not strictly for or against any party.

No Modifications. No supplement, modifications or amendment to this DIF Credit Transfer shall be binding unless executed in writing by both parties.

Further Assurances. The Transferor and Transferee each agree to execute such other documents and perform such other acts as may be necessary or desirable to effectuate this DIF Credit Transfer.

Effect of NMC Agreement and Certificate. This DIF Credit Transfer Agreement is, and shall remain, subject to the terms and conditions of the DIF Credit Certificate and the NMC Agreement, as may be amended by the parties thereto from time to time.

No Third Party Beneficiaries. This DIF Credit Transfer Agreement is made and entered into for the sole protection and benefit of the parties hereto, the City of Ontario,

and their respective successors and assigns. No other person or entity shall have any right of action based upon any provision of this DIF Credit Transfer Agreement.

IN WITNESS WHEREOF, the Transferor and Transferee have duly executed this DIF Credit Transfer as of the date first written above.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Budget Prepared By: Evan Erickson Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 4

SUBJECT: FY 2024-25 MID-YEAR BUDGET UPDATE

RECOMMENDATION: That the City Council take the following actions:

A. Approve the budget adjustments and recommendations as presented in the Fiscal Year 2024-25 Mid-Year Budget Update Report (Exhibit A);
B. Consider and adopt a Resolution making a declaration of intent to issue tax-exempt obligations; and
C. Approve the updated Purchasing Policies and Procedures Manual

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The recommended actions will affect several fund budgets as outlined in the Fiscal Year 2024-25 Mid-Year Budget Update Report.

BACKGROUND & ANALYSIS: The Mid-Year Budget Update Report for Fiscal Year 2024-25 reflects the Financial Services Agency's continued efforts to provide timely, accurate, and understandable financial information to assist the City Council with decision making and achievement of core goals. All Funds have been reviewed in preparing this report. The emphasis of this report is on the General Fund, which funds the majority of government services including public safety, recreation, library, museum, parks, building and planning.

The primary purposes of this report are to:

- Revise the City's budget to reflect the City Council's actions taken since the beginning of the current fiscal year;
- Recommend personnel changes to enhance program operations and efficiencies;
- Recommend budget adjustments that are consistent with City Council goals and objectives; and
- Comment on significant budget and economic trends which may impact fiscal year's budget development.

Fiscal Year 2024-25 Mid-Year Budget Update Recommendations

Fiscal Year 2024-25 Mid-Year Budget Update are routine in nature and comprised predominately by City Council actions taken since the First Quarter Budget Update. Mid-Year Budget Update includes proposed new expenditure budget requests, as well as revised revenue estimates for FY 2024-25. For the General Fund, the net result of these actions will bring the General Fund estimated available and unencumbered ending fund balance to $81.8 million or 21.2% of total appropriations. This amount achieves the goal set by City Council as a reserve for specific and defined emergency events (such as an earthquake or pandemic) and to address immediate needs in resources without impacting City services. This goal was temporarily decreased to 15% during the COVID pandemic but has since been brought back up to the previous set goal of 20%, effective July 1, 2023, with the goal of increasing the reserves up to 25% in future fiscal years.

General Fund Highlights

- $2.8 million increase in Sales Tax revenue
- $450 thousand increase in Parking Tax revenue
- $2.0 million appropriations for the City Share of the Animal Resource Center (ARC) of the Inland Empire Agreement
- $1.6 million appropriations for the roof repair and suite remodel of the Toyota Arena (offset by increase in the City's share of revenues from the arena)

Other Funds (non-General Fund) Highlights

- $9.3 million appropriations for previously approved vehicle purchases both received and anticipated to be received by the end of the fiscal year
- $5.9 million appropriations for the Ontario Sports Empire: debt service related to the property acquisition for Ontario WF Farms (10 acres) and Dairy River (15 acres)
- $5.0 million appropriations for Grove & Holt Intersection widening project
- $3.6 million appropriations and revenues for the United States Environmental Protection Agency (EPA) Solid Waste Infrastructure for Recycling (SWIFR) Grant
- $2.3 million appropriations for additional funding for the Grove and I-10 Interchange Corridor project

Interim budget updates also present recommendations for personnel and organizational changes necessary to enhance program operations and efficiencies. Current recommendations for this Mid-Year report include reclassification changes, adds/deletes, and other modifications to the authorized full-time positions resulting in a zero net increase citywide. More detail is presented in the attached Exhibit A under Recommended Personnel Changes section, pages 10 through 13, of the Fiscal Year 2024-25 Mid-Year Budget Update Report.

Reimbursement Resolution Declaring Intent to Issue Bonds

The City intends to finance the acquisition, construction, and installation of certain public capital improvements with the proceeds of the sale of tax-exempt obligations. Staff recommends approval of a Reimbursement Resolution, which permits the City to reimburse itself for certain costs incurred prior to the issuance of bonds, as allowed under the Internal Revenue Code.

Purchasing Policy Update

As required by Public Contract Code, the City has added additional supplier preferences in our Purchasing Policies and Procedures to allow for fair access to the procurement process and opportunities within the City to include veteran, minority, and women-owned suppliers.

Economic Outlook

The following economic indicators are the most recent measures of economic activity.

Gross Domestic Product (GDP): The broadest measure of economic output, increased at an annual rate of 2.3% in the fourth quarter of 2024, according to the most recent released as a result of increased consumer spending and increased government spending. This was a minor decrease compared to the third quarter of 2024, in which the real GDP increased by 3.1%. The increase in the fourth quarter primarily reflected increases in consumer spending and government spending, with decreases in imports. (Source: Bureau of Economic Analysis)

Unemployment Rate: The national unemployment rate slightly declined to 4.1% in December 2024 compared to the 4.2% reported for November 2024. Comparing the current national rate to the previous year rate of 3.8%, it is an increase of 0.3%. California's unemployment rate remains unchanged in December 2024 with a slight increase compared to the prior year's rate of 5.1%. Locally, the Inland Empire's unemployment rate decreased to 4.9% compared to 5.3% in November 2024. The Inland Empire's labor market has recovered from the COVID-19 pandemic and is still strong. Since April 2020, the region has added over 356,000 jobs, which is more than the 228,700 jobs lost during the national lockdown. (Source: US Bureau of Labor Statistics)

Consumer Price Index (CPI): This rate is utilized to track changes in the prices of goods and services and is a useful tool for tracking inflation or the cost of living. For January 2025, the Riverside-San Bernardino-Ontario metropolitan area's CPI rate increased by 2.9% over the last 12-month period. This small increase in CPI indicates a cooling of the economy due to the various tools the federal government has implemented to hamper the exponential economic growth occurring as a result of the COVID-19 pandemic. (Source: US Bureau of Labor Statistics)

Housing Market: A continued shortage of homes for sale and high costs of borrowing continues to have a negative impact on the housing inventory and demand. With the recent declining of mortgage rates and the expectation that the rates will continue to decrease in 2025, it is anticipated that home sales will bounce back as buyers and sellers return to a more favorable housing market. Statewide sales for existing single-family homes in December 2024 were 19.8% higher than they were for the same time period in the previous year. Overall, home sales in the Inland Empire for

December 2024 increased 10.1% compared to the previous month, and a 7.3% increase compared to the same time period in the previous year. (Source: HdL Coren and Cone)

Conclusion

As the City recovers from the last four years of economic disruption from the COVID pandemic, other challenges still exist with the continued war in Ukraine; rising consumer good prices; continued high interest rates even with recent rate cuts by the Federal Reserve; the possibility of a recession due to accelerated inflation levels not seen since the early 1980's; the unknown fiscal impacts from proposed tariffs by the new federal administration; and the ongoing conflict in the middle east. Even with the anticipated additional resources, the City will need to continue to practice fiscal discipline and establish proactive measures to safely navigate the current and upcoming fiscal challenges, as well as deliver an unparalleled level of service and commitment to our community.

The Adopted Operating Budget for Fiscal Year 2024-25, as modified through this Mid-Year Budget Update, reflects the City Council's continued commitment to support high quality public safety and municipal services, provides for the maintenance and expansion needs of the City's infrastructure and facilities, profiles an aggressive economic development strategy, and assures the investment and reinvestment of City resources into the community - all in the name of affording Ontario residents and businesses an exceptional quality of life. With the City Council's leadership and their prudent fiscal policies, the City's long-term financial health will further solidify its standing as the economic leader in the Inland Empire, and a formidable player in California and the nation.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, REGARDING ITS INTENTION TO ISSUE TAX-EXEMPT OBLIGATIONS.

WHEREAS, the City Council of the City of Ontario (the "Issuer") desires to finance the costs of constructing or acquiring certain public facilities and improvements, as provided in Exhibit A attached hereto and incorporated herein (the "Project");

WHEREAS, the Issuer intends to finance the acquisition of the Project or portions of the Project with the proceeds of the sale of obligations the interest upon which is excluded from gross income for federal income tax purposes (the "Obligations"); and

WHEREAS, prior to the issuance of the Obligations the Issuer desires to incur certain expenditures with respect to the Project from available monies of the Issuer which expenditures are desired to be reimbursed by the Issuer from a portion of the proceeds of the sale of the Obligations;

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF ONTARIO DOES HEREBY RESOLVE, ORDER AND DETERMINE AS FOLLOWS:

SECTION 1. The Issuer hereby states its intention and reasonably expects to reimburse Project costs incurred prior to the issuance of the Obligations with proceeds of the Obligations. Exhibit A describes either the general character, type, purpose, and function of the Project, or the fund or account from which Project costs are to be paid and the general functional purpose of the fund or account.

SECTION 2. The reasonably expected maximum principal amount of the Obligations is $290,000,000 to be issued in one or more series.

SECTION 3. This resolution is being adopted not later than 60 days after the date (the "Expenditures Date or Dates") that the Issuer will expend monies for the portion of the Project costs to be reimbursed from proceeds of the Obligations.

SECTION 4. Except as described below, the expected date of issue of the Obligations will be within eighteen months of the later of the Expenditure Date or Dates and the date the Project is placed in service; provided, the reimbursement may not be made more than three years after the original expenditure is paid. For Obligations subject to the small issuer exception of Section 148(f)(4)(D) of the Internal Revenue Code, the "eighteen-month limit" of the previous sentence is changed to "three years" and the limitation of the previous sentence beginning with "; provided, ..." is not applicable.

SECTION 5. Proceeds of the Obligations to be used to reimburse for Project costs are not expected to be used, within one year of reimbursement, directly or indirectly to pay debt service with respect to any obligation (other than to pay current debt service

coming due within the next succeeding one year period on any tax-exempt obligation of the Issuer (other than the Obligations)) or to be held as a reasonably required reserve or replacement fund with respect to an obligation of the Issuer or any entity related in any manner to the Issuer, or to reimburse any expenditure that was originally paid with the proceeds of any obligation, or to replace funds that are or will be used in such manner.

SECTION 6. This resolution is consistent with the budgetary and financial circumstances of the Issuer, as of the date hereof. No monies from sources other than the Obligation issue are, or are reasonably expected to be reserved, allocated on a long-term basis, or otherwise set aside by the Issuer (or any related party) pursuant to their budget or financial policies with respect to the Project costs. To the best of our knowledge, this City Council is not aware of the previous adoption of official intents by the Issuer that have been made as a matter of course for the purpose of reimbursing expenditures and for which tax-exempt obligations have not been issued.

SECTION 7. The limitations described in Section 3 and Section 4 do not apply to (a) costs of issuance of the Obligations, (b) an amount not in excess of the lesser of $100,000 or five percent (5%) of the proceeds of the Obligations, or (c) any preliminary expenditures, such as architectural, engineering, surveying, soil testing, and similar costs other than land acquisition, site preparation, and similar costs incident to commencement of construction, not in excess of twenty percent (20%) of the aggregate issue price of the Obligations that finances the Project for which the preliminary expenditures were incurred.

SECTION 8. This resolution is adopted as official action of the Issuer in order to comply with Treasury Regulation § 1.150-2 and any other regulations of the Internal Revenue Service relating to the qualification for reimbursement of Issuer expenditures incurred prior to the date of issue of the Obligations, is part of the Issuer's official proceedings, and will be available for inspection by the general public at the main administrative office of the Issuer.

SECTION 9. All the recitals in this Resolution are true and correct and this City Council so finds, determines and represents.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 18th day of March, 2025.

EXHIBIT A

DESCRIPTION OF PROJECT

Projects as part of the Capital Improvement Project (CIP) budget of the City of Ontario for Fiscal Year 2024-2025 through Fiscal Year 2028-2029, including, but not limited to civic center infrastructure, sports complex, street repairs, animal services, theatre, parking, storm drains, park and recreation, museum, roofing, entertainment and downtown revitalization, sidewalks, bollards, information networks, street lights, golf courses, trails, library, lighting, police, public safety, and community center, among other public infrastructure.

CITY OF ONTARIO
ADMINISTRATIVE POLICY

SUBJECT	Number: FSA-002
PURCHASING POLICIES AND PROCEDURES MANUAL	**Effective Date:** March 18, 2025
	Revision Date: March 18, 2025
	Policy Owner(s): Financial Services Agency

PURPOSE

The primary goals and objectives of this Purchasing Policies and Procedures Manual ("Manual") are:

a. To facilitate best-value purchasing transactions.

b. To help employees of the City of Ontario ("City") facilitate the timely procurement of goods and services ("Purchasing System") needed to meet the City's operational needs while adhering to the regulations set forth in the City's Municipal Code (Volume 1, Title 2, Chapter 6), Generally Accepted Accounting Practices ("GAAP"), and all applicable Federal and State of California regulations and requirements.

c. To complement and reinforce fiscal control measures.

d. To communicate Citywide and promote a common understanding of the City's procurement policies and established business practices;

e. To define procurement roles and responsibilities of the Purchasing Division and staff, and serve as a tool for employee training and development.

The policy statements contained in this Manual represent the foundation upon which the City operates in its Purchasing System. This Manual will be revised and supplemented, as required, to meet City requirements.

SCOPE

The Purchasing Division, part of the Financial Services Department, is focused on strengthening the economic well-being and quality of life of the City's community through oversight of the timely procurement of City services and infrastructure. It defines success as providing superior service to all City Departments and thereby to the community, and it strives to maintain:

a. A strong commitment and genuine desire to provide supportive customer service in the spirit of teamwork, to take the extra step to be helpful, and to obtain the best quality of life for our community as the highest priority.

b. An attitude that fosters cooperation, creativity, and innovation in problem-solving while aiming to make the most economically prudent use of the City's limited resources.

c. The highest level of integrity and ethical standards while discharging its duties in accordance with the City's policies and procedures, and all applicable laws and regulations.

DEFINITIONS

a. **Annual Purchase Order:** A purchasing method used to purchase designated goods and/or services on a repetitive basis for the City's Agencies or Departments. Annual Purchase Orders shall be issued to a specific supplier on a per fiscal year basis and shall close at the end of the fiscal year.

b. **Best Value:** A value determined by evaluation of objective criteria that may include, but not be limited to price, features, functions life-cycle costs, technical experience, and past performance. A best value determination may involve the lowest cost proposal meeting the interests of the City and the needs of the project, or a tradeoff between price and other specified factors.

c. **City:** Refers to any entity affiliated with the City, including the Ontario Housing Authority (to the extent such entity adopts a resolution subjecting itself to the Uniform Public Construction Cost Accounting Act, and these purchasing policies and procedures).

d. **Cooperative Purchasing:** A competitive procurement method whereby the procurement requirements of two or more governmental entities are combined to obtain the benefits of volume pricing, reduction in administrative costs, or both.

e. **Emergency:** A sudden unexpected occurrence that poses a clear and imminent danger requiring immediate action to prevent or mitigate the loss or impairment of life, health property, or essential public services.

f. **Formal Bid:** A bid (subject to Section 2-6.07 of the Municipal Code) advertised in a local newspaper; submitted in a sealed envelope and in conformance with a prescribed format; and publicly opened at a specified place, date, and time.

g. **Goods:** Supplies, materials, equipment, and other commodities (other than services and real property) included in California Commercial Code Section 2105.

h. **Non-competitive:** A non-competitive procurement whereby an acceptable justification exists to support goods, services, or public works related purchases provided by a particular supplier without a competitive process.

i. **Prevailing Wage:** California Labor Code Sections 1720 *et seq.* and 1770 *et seq.*, as well as California Code of Regulations Title 8, Section 16000, *et seq*. ("Prevailing Wage Laws) require the payment of prevailing wage rates and the performance of other requirements on certain "public works" and "maintenance" projects. If the work is being performed as part of an applicable "public works" or "maintenance" project as defined by the Prevailing Wage Laws and if the total compensation is $1,000 or more, the City must make suppliers aware of these requirements and suppliers must fully comply with such Prevailing Wage Laws. For more information and threshold levels, visit the Department of Industrial Relations website at dir.ca.gov.

j. **Procurement:** The purchasing, leasing, or otherwise acquiring of any goods, services, or public project construction (including all of the functions that pertain to the acquisition).

k. **Professional Services:** Advisory, consulting, architectural, engineering, computer, legal, financial, telecommunications, financial, surveying or any service which involves the exercise of professional discretion or independent judgment (based on an advanced or specialized knowledge, expertise, or training gained by formal studies or experience).

l. **Purchase Order:** The written document provided to the supplier formalizing the terms and conditions associated with the ordering of the goods, services, or public project required by the City. It is the payment document and also serves as a low value threshold contractual document.

m. **Purchasing Officer:** The position defined by the City's organizational structure that is responsible for overseeing the Purchasing Division. The person occupying such a position may delegate to such other person or entity as he/she deems advisable such duties and responsibilities as have been provided. In the absence of the Purchasing Officer, or designee, the Assistant Finance Director or the Executive Director of Financial Services has the authority to sign purchase orders.

n. **Requisition:** A written request submitted to the Purchasing Division by a City Agency or Department to initiate the procurement process for specified goods, services, or a public project.

o. **Responsive Bid:** A bid which meets all of the specifications set forth in the request for bid proposal.

p. **Responsible Bidder:** A bidder who has demonstrated the attribute of trustworthiness as well as quality, fitness, capacity, and experience to satisfactorily perform the public works contract.

q. **Services:** The furnishing of labor, time, or effort by a contractor or supplier (which may involve to a lesser degree the delivery or supply of products). The term does not include services rendered by City officers and employees, nor private firms offering professional services.

r. **Sole Source:** A non-competitive procurement whereby an acceptable justification exists to support goods, services, or public works related purchases provided by a single source supplier. A sole source is, by definition, only available from one source.

s. **Standardized suppliers:** A non-competitive procurement whereby pre-authorized suppliers, approved by City Council, are selected for procuring products or services determined to be in the City's best interest to buy directly from specified suppliers.

t. **Virgin Materials:** Items that in their raw or unprocessed form tend to use more energy during processing phase. Therefore, recycled materials are preferred.

POLICY

1.0 PROCUREMENT OVERVIEW

1.1 Policy Statement

a. The City's goal for every purchasing transaction is to obtain the best value possible. Best value is determined by evaluating many factors (such as price, delivery capabilities, quality, past performance, training, financial stability, service capabilities, ease of ordering, payment terms, functions, features, life-cycle costs, etc.) and selecting a supplier that offers the best combination of those factors.

1.2 Policy Amplification

a. The Financial Services Department of the Financial Services Agency supports sustaining and promoting a procurement environment to best support the operational needs of the City's Agencies and Departments. These purchasing policies and procedures are meant to foster an environment that puts its City's Agencies and/or Departments in the best possible position to procure the products and services needed in a timely and cost-effective manner to effectively operate (while also making sure appropriate procurement processes are followed).

b. It is the responsibility of all employees involved in the procurement process to exercise due diligence in an effort to mitigate any avoidable risks, obtain maximum value for each dollar expended, and protect the City's rights in carrying out procurement transactions and in administering contracts.

2.0 PROCUREMENT CODE OF ETHICS

2.1 Policy Statement

a. The City desires to maintain a reputation that embodies the very highest standards of ethical conduct, and advocate a code of conduct that prohibits breach of public trust by any attempt to realize personal gain by a public employee through conduct inconsistent with the proper discharge of the employee's duties.

b. Employees are expected to demonstrate loyalty to the City by diligently following lawful instructions, using reasonable care, and using only the authority granted. City employees shall know and obey the letter and spirit of laws governing the purchasing function, and remain alert to the legal ramifications of purchasing decisions.

c. It is the responsibility of all City employees to endeavor to maintain the good name of the City, to develop and maintain good relations between the City and its suppliers, and to keep in mind that personal contacts form much of the basis for public opinion.

City employees must place the interests of the City first in all transactions (and expose questionable practices wherever discovered).

2.2 Supplier Relations

a. Negotiations with suppliers should be based on sound business judgment. The City expects its employees to be fair and neither perform nor accept favors. It is prohibited for City employees to accept personal advantages. Entertainment, gifts, free services, discounts on personal purchases (whether for the City employee or anyone else in his/her family or household) is forbidden. Favors must be declined and gifts must be returned pleasantly, diplomatically, and firmly. Relations with suppliers should be friendly, objective, and strictly for business.

2.3 Conflicts of Interest

a. The City expects its employees will not permit any conflict of interest between their personal affairs and City business. One may not have a financial interest, position, or relationship with any person, firm, or corporation that does business with the City that would influence (or could be regarded as influencing) their actions for the City. Family or relative financial interests can become a conflict for the employee. Any situation which is unclear should be reviewed with management.

2.4 Confidential Information

a. Suppliers may divulge to a City employee or employees confidential or proprietary information. Employees must handle confidential or proprietary information belonging to the City or suppliers with due care and diligence, and with proper consideration of ethical and legal ramifications and governmental regulations. City employees are expected to refer requests from the public for supplier or bidder information to the Records Management Department.

3.0 PROCUREMENT OF GOODS AND SERVICES

3.1 Policy Statement

a. The City strives to make fiscally responsible purchases of goods and services that reduce resource consumption and waste, perform as required, and promote human health and well-being.

3.2 Policy Amplification

a. All procurement of goods and services shall be made in accordance with City Council approved policies and procedures (including without limitation the City's Municipal Code). The City utilizes a combination of formal bids, informal bids, and alternative bid procedures for the procurement of goods, professional services, and public projects

based on need and threshold.

3.3 Formal Bid Procedures

a. Formal bid procedures are used for public projects exceeding two hundred thousand dollars ($200,000) or large dollar value procurements requiring a more formal procurement process. Types of procurement vehicles include:

    i. Notice Inviting Bids
    ii. Request for Qualifications

3.4 Informal Bid Procedures

a. Informal bid procedures are used for small to medium-sized public projects as defined in Municipal Code Section 2-6.13, and procurements for goods, services, and professional services with a defined list of attributes. Types of procurement vehicles include:

    i. Invitation for Bids

3.5 Alternative Bid Procedures

a. Alternative bid procedures are used when formal or informal bidding procedures are not required for goods, services, or professional services due to low dollar value; or when the procurement is for an intended outcome versus a defined list of attributes, etc. Types of procurement vehicles include:

    i. Informal Quotation
    ii. Request for Quote
    iii. Request for Proposal

3.6 Design Build

a. The City may utilize a design-build method of procurement for public projects in accordance with California Public Contracting Code Section 22160 *et seq*.

3.7 Supplier Preference

a. The City has established a local, veteran, minority, and women-owned preference to promote the community's economic health, encourage participation in the procurement process, and receive fair access to contracting and procurement opportunities within our projects.
    i. For the purchase of goods (except for materials for public works projects) the City may grant suppliers located within the City limits a 1¾% advantage in the City's determination of low bid due to the ultimate receipt by the City and

County of a proportionate amount of the sales tax associated with the purchase of the goods solicited.

ii. A supplier whose sales tax is reportable outside of the City (but within the County of San Bernardino) will receive a ¾% advantage in low bid determination. This section shall not apply to procurements subject to Federal funding requirements.

3.8 Standardization

a. Every effort shall be made to standardize commonly used items, vehicles, equipment, and services. Once a standard item has been determined, approval shall be obtained from City Council for repeated purchases expected to exceed $150,000 within a period of up to five (5) years. This will eliminate repetitive approvals by City Council for the same item.

3.9 Cooperative Purchases

a. The City may engage in cooperative purchasing for goods or services as a third-party agency "piggybacking" on another agency's competitively bid agreement so long as the goods or services were procured in accordance with minimum requirements of the Purchasing System. Cooperative purchasing reduces administrative expenses, secures prices, and offers other benefits of a large volume purchase. Caution must be exercised to ensure that the City complies with all applicable Federal, state, and local laws as well as the City's Purchasing System. The Purchasing Division must be consulted prior to any City Agency or Department engaging in cooperative purchasing.

The City's Municipal Code Section 2-6.23 allows for the following exceptions to the procurement methods set forth in the City's Purchasing System:

I. Emergency – When in an emergency as defined in the Purchasing System, provided the procedures set forth in Section 2-6.24 of City's Municipal Code are followed.

II. Sole-Source—When a City Agency or Department determines that the goods, services, or public project can only be obtained from a sole source, the Agency or Department will submit a request for non-competitive procurement to the Purchasing Division. A sole source justification shall be valid for up to one year from the date of approval by the Purchasing Division.

III. Cooperative Purchasing – When the City Council has by resolution transferred the authority to make the purchase of goods to another governmental agency through cooperative purchasing and the agency generally follows the provisions of California Government Code Sections 54201 through 54204.

4.0 PUBLIC PROJECTS

4.1 Policy Statement

a. The City is subject to the California Uniform Public Construction Cost Accounting Act ("Act") in awarding all public projects for construction work.

4.0 Policy Amplification

a. The Act permits the City to:

i. Simplify the bidding process for public projects valued up to $200,000; and
ii. Minimize limits on using City employees for public works.

b. Every five years, the California Uniform Construction Cost Accounting Commission reviews the bid limits for inflation and other factors to determine whether adjustments should be made to the Act. If an adjustment is made to the current thresholds represented in this Manual, the State Controller will notify the affected public agencies. The adjustment may become effective before it appears as a formal change in the Public Contract Code ("PCC").

c. Public projects (as defined by the Act) may be let to contract as set forth in the Purchasing System and PCC sections 22000 through 22045 in accordance with the current dollar limits as follows:

i. Public projects of $60,000 or less may be performed by the employees of the City by force account, negotiated contract, or purchase order;

ii. Public projects of $200,000 or less may be let to contract by informal bid procedures as set forth in the Purchasing System and Act; and

iii. Public projects of more than $200,000 shall, except as otherwise provided in the Act, be let to contract by formal bid procedure as set forth in the Purchasing System.

5.0 FEDERAL FUNDING REQUIREMENTS

5.1 Policy Statement

a. Federal procurement standards are set forth in Title 2 of the Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards ("Uniform Guidance"). The Uniform Guidance requires the City to have and use documented procurement procedures consistent with state, local, and tribal laws; and regulations and the standards of the procurement standards identified in Sections 200.317 through 200.327 of the Uniform Guidance when using certain Federal funds. This includes procurements made (i) in preparation of, during, and after an emergency declared by the President of the United States and that may be subject to Federal funding or reimbursement; and (ii) when using Federal grant funds subject to the Uniform Guidance. When procurement is subject to the Uniform Guidance, the City shall follow its document procurement procedures along with the procurement standards of the Uniform Guidance.

6.0 AGREEMENTS AND/OR CONTRACT STANDARDS

6.0 Policy Statement

a. The City's policy is the City Council has sole authority to approve agreements or contracts exceeding $150,000; and the City Manager or designee signs such contracts on behalf of the City Council, unless otherwise directed by City Council or provided for by law.

b. The Purchasing Officer or his/her authorized representative has sole authority to approve and sign purchase orders on behalf of the City, unless otherwise directed by the City Council or provided for by law.

c. Electronic and/or digital signatures on agreements or contracts are acceptable when in accordance with City policy and Secretary of State (Government Code Section 16.5) procedures established for digital and electronic signatures. The Purchasing Division, Records Management, and the City Attorney reserve the right to require original wet signatures on agreements or contracts when deemed to be in the best interest of the City.

d. It is the policy of the City that it remits payment for supplier invoices via electronic fund transfers through the Automated Clearing House ("ACH") network. All payments related to agreements of $25,000 and over shall be made through electronic ACH transfers.

e. Furthermore, it is the policy of City Council to establish and require the use of contract standards to assure that the interests of the City will be protected in all agreements or contracts.

6.1 Policy Amplification

a. To preclude claims against the City, all employees shall refrain from oral or written commitments that may be construed as binding by the other party.
    i. All employees shall emphasize to the other party that there is no commitment or contract until an agreement or contract is signed by the City Manager or designee.
    ii. Any employee that enters into an agreement or contract without the approval of City Council and/or City Manager as appropriate, or takes actions that are interpreted as commitments by a third party or leads to claims against the City, may be personally liable for any costs associated with the agreement or contract.

b. This policy will be accomplished primarily through the use of standard contracting procedures established and promulgated by the Purchasing Department of the Financial Services Agency.

c. It is the responsibility of each Agency or Department Head to assure that:
   i. Standard contracting procedures are followed in the preparation and processing of all agreements or contracts with the City Agency or Department.
   ii. All applicable standard contract terms and conditions are included in all agreements or contracts.
   iii. All agreements and contracts are reviewed by affected City Agencies or Departments (including the Purchasing Division) before being presented to the Office of the City Manager for approval by the City Manager or placement on the agenda for approval of City Council.
   iv. All revisions and updates to this policy and applicable procedures are promptly disseminated to personnel engaged in contract preparation and administration.

7.0 ANNUAL PURCHASE ORDERS

a. Annual Purchase Orders allow the City to purchase designated goods or services on a repetitive basis for City Agencies or Departments. Annual Purchase Orders shall be issued to a specific supplier on a per fiscal year basis and shall close at the end of the fiscal year. As the cost of the goods, services, and professional services approach the $150,000 threshold, an Agenda Report seeking approval will be submitted by the City Agency or Department to City Council.

b. The Annual Purchase Order system is for goods, services, and professional services that are purchased frequently or in large quantities by the City (provided on an "as-needed" basis). Annual Purchase Orders expedite delivery because separate requisitions are not required for each transaction. In the case of goods and certain services, the supplier agrees to supply the City's requirements at either a fixed price or at a fixed discount from the list market price. The Purchasing Officer will determine the goods, services, and professional services allowed by the Annual Purchase Order system.

c. Purchases by the Annual Purchase Order system include, but are not limited to, any expenditure that is recurring and is a reasonably predictable operating expense.

d. Only those items specified within the Annual Purchase Orders may be ordered using the Annual Purchase Order. Items not allowed under the Annual Purchase Order system shall be ordered in accordance with the City's purchasing policies and procedures:

    i. Using Agency or Department shall contact the supplier for a Quote or estimate, referencing the Annual Purchase Order, to confirm pricing matches negotiated pricing.
    ii. Using Agency or Department must review the quoted price and ensure compliance with the terms of the Annual Purchase Order.
    iii. Using Agency or Department shall ensure it has adequate budget funds for the proposed expenditure.
    iv. Using Agency or Department shall submit a requisition, which includes the quote or estimate, to the Purchasing Division noting the Annual Purchase Order it plans to utilize.
    v. Once the good is received or service accomplished, the invoice from the supplier shall be submitted to the Accounts Payable Division following the normal payment process for invoices.

8.0 RECYCLED PRODUCT PROCUREMENT

8.1 Policy Statement

a. In the procurement of goods for the City, a preference shall be given for the purchase of recycled goods whenever equal in fitness and quality and available at no more than the total cost of non-recycled products in accordance with Sections 2-6.30 and 6-3.701 of the City's Municipal Code.

8.2 Policy Amplification

a. It is the purpose of this policy to encourage purchasing decisions that (1) increase the recycled content of goods purchased and used by the City, (2) reduce waste in the manufacture and use of goods and packaging purchased by the City, (3) and to provide guidance to City staff in evaluating the purchase of goods for City use.

b. The objective is to ensure that no good manufactured with recycled or secondary material is treated differently other than based on function. A secondary objective is to prefer recycled goods over goods made strictly with virgin materials when recycled goods can meet the necessary performance standards.

9.0 SURPLUS PERSONAL PROPERTY

9.1 Policy Statement

a. The City's policy regarding disposition of City-owned surplus personal property is outlined in Section 2-6.31 of the City's Municipal Code. The Purchasing Officer is authorized to dispose of surplus goods which are not used or needed by any Using Agency or which have become unsuitable for City use. The City prohibits employees from acquiring surplus items sold through auction.

9.2 Policy Amplification

a. Timely identification of surplus and obsolete goods is essential to an effective disposition program. Higher maintenance and storage costs and further deterioration of the goods are the result of delayed identification of surplus.

i. Declaration of Surplus Goods. Using Agencies that determine certain goods to be of no use to their Agency must complete a "surplus property transaction request" and forward it to the Purchasing Officer for review and subsequent declaration as being surplus.

ii. Custody of Surplus Goods. Each Using Agency shall retain custody of its surplus goods until their transfer or final disposition has been determined. No Using Agency shall (in any event) permit any surplus goods held by it to be loaned or donated without prior City Council approval, or destroyed or otherwise removed from the City's custody without the prior written approval of the Purchasing Officer.

iii. Transfer. Before disposing of surplus goods, the Using Agency shall canvass all other Using Agencies to determine whether another City Agency can use the surplus goods. If another Agency desires to use the goods, the Purchasing Division shall assist in transferring the goods to that Agency.

iv. Disposition. The Purchasing Officer is hereby authorized to dispose of surplus goods which are not used or needed by any Using Agency or which have become unsuitable for City use. Such goods may be disposed of by any of the following procedures:

- Exchanged or traded in on new goods;
- Sold utilizing competitive procedures similar to those prescribed herein for open market procurement;

- Sold at public auction conducted by a professional auctioneer;
- Sold utilizing a negotiation process when the Purchasing Officer deems that such process is in the best interests of the City;
- Disposed of as scrap material or destroyed if no resale value exists; or
- Donated to a non-profit organization or other public entity following a City Council determination that such donation would serve a public purpose.

v. Once a good has been identified for surplus disposal, the Using Agency submits a request to the Purchasing Officer identifying the disposing procedure with approval from the Head of the Using Agency.

vi. If there is an asset number associated with the surplus goods, the asset number needs to be identified to alert the Accounting Division to have the asset removed from the asset list.

vii. Once all approvals are obtained, a notification of the approved surplus request is routed to the requestor for filing and/or further action.

10.0 PROCEDURES

10.1 PROCUREMENT AND PURCHASING AUTHORITY

10.2 Purchasing Division

a. The Purchasing Division is charged with interpreting and enforcing the City's purchasing policies and procedures. The Purchasing Division is authorized to issue purchase orders, contracts or agreements, and change orders; and is directed to oversee their implementation and its operations in accordance with the rules and regulations prescribed by City Council and the administrative procedures approved by the City Manager.

10.3 City Manager

a. The City Manager is authorized to execute written agreements or contracts (along with amendments or change orders) for all goods, services, professional services, and public projects with a cumulative term of up to five (5) years for which the cumulative value of the agreement or contract (inclusive of all amendments and/or change orders) does not exceed the City Manager's purchasing authority limit as may be established from time to time by resolution or other order of City Council.

b. If an amendment or extension to an agreement results in a financial commitment that exceeds the City Manager's purchasing authority or the five (5) year term limit, City Council authorization is required. The Agenda Report to the City Council shall include an identification of the annual and/or total expected cost and term of the agreement.

c. Amendments or extensions to agreements or contracts that exceed the City Manager's purchasing authority or the maximum term limitation (and City Council authorization is not obtained) require a new procurement process. A non-competitive justification does not preclude City Council authorization requirement.

d. The City Manager is authorized to execute written public project agreements or contracts within his or her purchasing authority limit. Change orders to public project agreements or contracts that exceed 75 percent of the approved contingency shall be signed by the City Manager.

e. The City Manager may delegate authorities granted by the City's Municipal Code Section 2-6.26 to subordinates provided that such delegation be made in writing and signed by the City Manager.

10.4 City Departments

a. Agency Heads and Department Heads, or their designees, consistent with the City's designated purchasing approval limits are authorized to approve and submit all purchase requisitions.

11.0 COMPETITIVE PROCUREMENT

a. Competition in purchasing provides equal opportunity for qualified suppliers to compete for City business and for City personnel to secure the best price, quality, and service. When bids are required, they are to be conducted on an open and competitive basis and without favoritism or bias in order to maximize the best value to the City and the procuring City Agency and/or Department. The bids of interested suppliers shall receive fair and impartial consideration.

b. The rules and regulations established by the City are intended to secure sound value, to guard against favoritism and profiteering at public expense, and to promote the interest of private enterprise and the health of the local economy. To further this objective, the City has elected to utilize an electronic bid management system as provided by Municipal Code Section 2-6.07 to (1) enhance the efficient procurement of goods, services, professional services, maintenance work and public projects, (2) encourage competition for public contracts, and (3) to purchase at the lowest competitive market price without favoritism or prejudice.

c. The estimated cost of each purchase is considered when determining the level of competition necessary. This ensures that the benefit derived from the competitive process justifies the cost of administering the process and that all legal requirements are met. Procurements shall not be split to circumvent dollar limits associated with procurement procedures.

d. Encouraging competition is a means by which the City can mitigate the potential for antitrust activity. A Non-Collusion Declaration is mandated by Public Contract Code Section 7106 and shall be completed in the procurement of all public projects. The Non-Collusion Declaration can be found on the City's Intranet.

12.0 NON-COMPETITIVE PROCUREMENT

a. Full and open competition should be the objective in public procurement; but it is not always possible or practicable. When procuring goods or services, City staff may determine the best value to the City may be achieved by pursuing a non-competitive procurement with a specific supplier due to technological, specialized, or other unique characteristics. Otherwise, as long as there is more than one potential supplier available to satisfy a given need, there exists insufficient justification for a non-competitive procurement.

12.1 Non-Competitive Purchases

a. A non-competitive purchase must be supported by written justification that thoroughly explains the need and reason for the requested course of action. A Non-Competitive Justification Form validates to the Purchasing Division of only one viable supplier for the procurement of the goods and/or services. It must be signed by the Agency or Department Head and submitted with the requisition or agreement or contract packet for the approval of the Purchasing Officer. With its submission of the Non-Competitive Justification form, the Department shall attach a detailed written rationale for the use of only one supplier and not competitively bidding the needed goods or services.

b. The following factors are among those that constitute justification for non-competitive purchases:

    i. The supplier is determined to be the only known source of the goods or services after solicitation of several suppliers, or seeking competitive bids and competition is determined to be inadequate.
    ii. The goods can only be procured directly from the original manufacturer or sole representative of the item in the City's geographical region.
    iii. There is a reasonable basis to conclude the City's minimum needs can only be satisfied by unique goods or services and the supplier demonstrates a unique qualification due to:
        - An innovative concept or a unique capability to provide the particular services proposed;
        - Proven expertise or specialized knowledge in a field of few known experts;
        - Previous experience providing like services to the City resulting in an understanding of City's immediate needs and practices increasing the likelihood of greater efficiency and success;

c. The use of a piece of equipment or commodity would require modifications to existing equipment, necessitate engineering re-design, or require voiding of a warranty.

d. Goods may be deemed available only from the original source in the case of a follow-on contract for the continued development or production of a major system or highly specialized equipment, including major components thereof, when it is likely that award to any other source would result in:

    i. Substantial duplication of cost to the City that is not expected to be recovered through competition.

e. City property is released to a proven supplier who must dismantle equipment in order to assess repair needs and it is not practical or feasible to obtain competitive pricing for repair.

f. The existence of limited rights in data, patent rights, copyrights, or secret processes for the goods.

g. When only specified makes and models of technical equipment and parts will satisfy the City's needs for additional units or replacement items and only one source is available in accordance with the City's standardization program.

h. The item is one with which staff members who will use the item have specialized training and/or expertise and retraining would incur substantial cost in time and/or money.

i. Purchase of property for which it is determined there is no functional equivalent.

j. Existence of an unusual and compelling urgency (emergency purchase) with serious potential repercussions for the City resulting in the impracticality of a competitive purchase.

k. When the City determines (with the advice of legal counsel) that seeking competition would not produce an advantage, competitive bidding requirements may be waived.

12.2 Emergency Purchases

a. Emergency – When in an emergency, as defined in the Purchasing System, provided the procedures set forth in Section 2-6.24 of City's Municipal Code are followed.

Municipal Code Section 2-6.24, Emergency Procurements:

i. In cases of emergency when repair or replacements are necessary, the City Council (pursuant to a four-fifths vote of the City Council) may proceed at once to replace or repair any public facility without adopting plans, specifications, strain sheets, or working details or giving notice for bids to let contracts in accordance with California Public Contract Code Sections 22050 *et seq*. Before the City Council takes any action pursuant to this subdivision (a), it shall make a finding that the emergency will not permit a delay resulting from a competitive solicitation for bids and that the action is

necessary to respond to the emergency based on substantial evidence set forth in the minutes of its meeting.

ii. Pursuant to California Public Contract Code Section 22050, Subdivision (b)(1), the City Council hereby delegates to the City Manager or designee the authority to repair or replace a public facility, take any directly related and immediate action required by that emergency; and procure the necessary equipment, services, and supplies for those purposes without giving notice for bids to let contracts.

iii. If the City Manager or designee orders any action specified in subdivision (a), that person shall report to the City Council (at its next meeting required pursuant to this section) the reasons justifying why the emergency will not permit a delay resulting from a competitive solicitation for bids and why the action is necessary to respond to the emergency.

iv. (1) If the City Council orders any action specified in subdivision (a), the City Council shall review the emergency action at its next regularly scheduled meeting; and, except as specified below, at every regularly scheduled meeting thereafter until the action is terminated to determine (by a four-fifths vote) that there is a need to continue the action

(2) If the City Manager or designee orders any action specified in subdivision (a), the City Council shall initially review the emergency action not later than seven (7) days after the action, or at its next regularly scheduled meeting if that meeting will occur not later than fourteen (14) days after the action; and at least at every regularly scheduled meeting thereafter until the action is terminated to determine (by a four-fifths vote) that there is a need to continue the action (unless the City Manager or designee has terminated that action prior to the City Council reviewing the emergency action and making a determination pursuant to this subdivision).

(3) When the City Council reviews the emergency action pursuant to subdivision (1) or (2), it shall terminate the action at the earliest possible date that conditions warrant so that the remainder of the emergency action may be completed by giving notice for bids to let contracts.

b. Pursuant to Municipal Code Section 4-3.06(a), the Director of Emergency Services is hereby empowered to:

i. Request the City Council to proclaim the existence or threatened existence of a "local emergency" if the City Council is in session, or to issue such proclamation if the City Council is not in session. Whenever a local emergency is proclaimed by the Director of Emergency Services, the City Council shall take action to ratify the proclamation within seven (7) days thereafter or the proclamation shall have no further force or effect; and obtain vital supplies, equipment, and such other properties found lacking and needed for the protection of life and property and to bind the City for the fair value thereof (and, if required immediately, to commandeer the same for public use).

ii. In the absence of the Director of Emergency Services, the Assistant Director of Emergency Services is empowered to take on the powers of the

Director of Emergency Services under Section 4-3.06(a) of the City's Municipal Code. In the absence of both the Director of Emergency Services and the Assistant Director of Emergency Services, the Emergency Manager is empowered to take on the powers of the Director of Emergency Services under Section 4-3.06(a) of the City's Municipal Code. The Director of Emergency Services shall be deemed absent where he or she is unavailable to participate in meetings or otherwise is unable to perform his or her duties during an emergency.

13.0 PROCUREMENT CARDS

13.1 Procurement Card Purchases

a. This policy and procedures document aims to provide clear direction for City departments to request and oversee the use of procurement cards ("Procurement Card") assigned and utilized by authorized City employees. The Procurement Card program has been established to provide a convenient means to make purchases and reduce the costs associated with initiating and paying for those purchases. It will assist in reducing the cost of processing small dollar purchases, expedite delivery of required merchandise, and simplify the payment process. This policy establishes the minimum standards for departments administering the Procurement Card program. Departments may establish additional controls beyond those established by these procedures.

b. The Procurement Card represents the use of public funds; therefore, cardholders must know that their purchases represent the City's interests and reputation for ethical and prudent business dealings.

13.2 Procurement Card Issuance

a. To request a Procurement Card to a City employee, the City Agency or Department Head must complete a Procurement Card Request form and submit the form to the Purchasing Division. The form includes the respective employee's information, the expected types of purchases to be made and the requested card limit. The form is signed by the employee signifying the employee's understanding of the rules governing use of the Procurement Card.

b. Upon receipt of the Procurement Card Request Form, the Purchasing Division will coordinate the issuance of the Procurement Card through the issuing bank, or the bank serving the City as applicable. When the Purchasing Division receives the Procurement Card, the cardholder will be notified to make arrangements to pick up the card and sign that he/she has accepted the Procurement Card.

c. Each Procurement Card holder must activate his/her own Procurement Card. Activation instructions are enclosed with the cardholder's Procurement Card, and activation should be done immediately so the Procurement Card's initial activation instructions do not expire.

d. It is MANDATORY that all Procurement Card holders review the Procurement Card policies and procedures prior to use. Additionally, the Purchasing Division will conduct training for all cardholders. Each cardholder will be required to sign a form that he/she acknowledges these Procurement Card policy and procedures.

e. The Procurement Card is for the exclusive use of the cardholder. The unique Procurement Card that the cardholder receives has both the City and the cardholder's name embossed on the Procurement Card. No member of the cardholder's respective

Department, his/her family, or anyone else may use the Procurement Card. The Procurement Card has been labeled to avoid confusing it with the cardholder's personal credit cards, with the words "Cal-Card" or "State of California" on the top of the card. In all other respects, this is a regular credit card. THE CITY'S PROCUREMENT CARD SHALL NOT BE USED FOR PERSONAL PURCHASES. Although the Procurement Card is issued to a cardholder, it remains City property and may be rescinded at any time.

13.3 Procurement Card Use

a. Use of the Procurement Card requires the cardholder adhere to all City policies and procedures on procurement, including competitive bidding and the benefit of volume discounts or volume arrangements that the City has negotiated with selected suppliers over time.

b. This Manual limits single purchases (inclusive of sales tax and shipping charges) to $5,000, or the amount established by the cardholder's Department for that cardholder.

c. In addition, each Procurement Card has a monthly dollar purchasing limit. Each single purchase may be comprised of multiple items, but the total cannot exceed the single purchase dollar limit on the Procurement Card as established by the cardholder's department. Cardholders shall follow the City's procedures to ensure that sufficient funds are available in the budget line item, prior to making a purchase. Purchases shall not be split to circumvent purchasing regulations.

d. The cardholder may use the Procurement Card at any merchant that accepts VISA Procurement cards. If a supplier does not accept Procurement Cards, the cardholder may contact the Purchasing Division with the supplier's contact information so efforts can be made to set up that supplier for Procurement Card acceptance. Before signing the draft, the cardholder shall verify that the dollar amount is correct, and that sales tax has been included. The cardholder will be provided one copy of the signed sales draft, which he/she shall keep for reconciling the monthly Cardholder Statement of Account.

e. Any changes to the cardholder's information shall be immediately reported to the Purchasing Division. The Purchasing Division will notify the issuing bank of the changes and request a new card. If a replacement card is requested, the Procurement Card cardholder will be notified when the new card is available.

f. Contact the Purchasing Division to request a current Procurement Card be changed or cancelled via email or memorandum. Upon notification to the Purchasing Division, cut the Procurement Card in half or return it to the Purchasing Division in person.

g. Report lost or stolen cards immediately to the Purchasing Division.

13.4 Procurement Card Restrictions

a. The Procurement Card must not be used to purchase the following items:

   i. Alcoholic beverages

   ii. Weapons

   iii. Cash advances through bank tellers or teller machines, or money orders

   iv. Legal fees, court costs, fines, bails, or bonds

   v. Fixed asset purchases (an item or equipment with a cost of $15,000 or more)

   vi. Any personal items and personal services, even if the intent is to repay the City at a later date

   vii. Rental or lease payments

   viii. Purchase of telephone services including pagers and calling cards, except for business telephone calls charged to a hotel/motel room while traveling on City business

   ix. Fees for Upgrades of Air, Hotel (including early check-in), or Auto; unless pre-approved by the City Manager or designee

   x. Using the Procurement Card to circumvent normal purchasing steps in order to buy a product from a relative or close friend

13.5 Unauthorized Use of Procurement Card

a. Unauthorized use of the Procurement Card, including personal use of the Procurement Card or failure to adhere to the Procurement Card Program guidelines, shall result in the cancellation of the cardholder's use of the Procurement Card.

b. Upon an unauthorized use of the Procurement Card, the cardholder and their respective Agency or Department head will have three (3) working days to submit a written justification (email or memorandum) to the Purchasing Officer.

c. If a justification is not received or the offense is deemed a violation, the Procurement Card may be suspended. If a second unauthorized use occurs within a six (6) month period, and a written justification is not received or the use is deemed a violation, the cardholder's use of the Procurement Card system shall be suspended for three (3) months.

d. Repeated or flagrant violation of the authorized use of the Procurement Card by the

cardholder may result in disciplinary action. Fraudulent use of the Procurement Card may be referred to a law enforcement agency.

13.6 Procedures After Purchase

a. All receipts must be turned in monthly with the Procurement Card statement so they can be reconciled. At the close of each billing cycle, the cardholder will receive a Cardholder Statement of Account. The statement itemizes each transaction that was charged to the Procurement Card. Upon receipt of the statement, the cardholder must complete each of the following actions:

   i. Review the statement to verify that the cardholder purchased all items listed, and the amounts charged are correct;

   ii. Indicate the account string to be charged for each transaction;

   iii. Provide a brief description of the item(s) purchased for each transaction. For meals, receipts must itemize the meals ordered and document the meeting type and attendees;

   iv. Attach detailed sales receipts reflecting each item purchased;

   v. If an item purchased is returned, attach the credit voucher to the Statement of Account on which the credit appears;

   vi. If charged for an item incorrectly, try to resolve the problem with the merchant first. Provide a complete explanation of the error and attach it to the Statement of Account; and

   vii. After completing the above, sign and date the Cardholder Statement of Account. Thereafter, route the entire documentation to the respective Department Head for signature approval and then route the packet to the Accounts Payable Division for payment processing.

b. Please note that banks issuing Procurement Cards have operating regulations with specific timeframes established in which reversals of charges may be processed.

c. Upon separation from the City, it is the responsibility of the cardholder to notify the Purchasing Division of the separation and to surrender the Procurement Card to his/her authorizing manager for return to the Purchasing Division. Procurement Cards are to be returned to the Purchasing Division in person.

DO NOT SEND PROCUREMENT CARDS THROUGH THE INTEROFFICE MAIL.

14.0 PROCUREMENT SELECTION METHODS

14.1 Debarment

a. Public Contract Code 6109 prohibits contractors or subcontractors to bid on, be awarded, or perform work on a public works project if they are debarred pursuant to Sections 1771.1 or 1777.7. Before awarding a contract to a contractor, the Department shall check with the California Department of Industrial Relations (dir.ca.gov), the Department of Consumer Affairs Contractors State License Board (cslb.ca.gov), and the System for Award Management (sam.gov) database to ensure the contractor is currently registered with the State of California to perform the work required and is not debarred from participating in solicitations.

14.2 Electronic Bidding

a. The City's electronic bid management system shall be utilized to issue City solicitations, unless allowed by Appendix A or the Purchasing Officer deems the solicitation can be procured differently.

14.3 Solicitation Types

FORMAL BID PROCEDURE: The formal bid procedure shall be for all public projects exceeding two hundred thousand dollars ($200,000), or large dollar value procurements for goods or services. Types of procurement vehicles include:

a. **Notice Inviting Bids ("NIB"):** NIB is a formal procurement process released through the electronic bid management system and award may require a negotiated agreement or contract.
    i. Shall state the time and place for the receiving and opening of sealed bids and distinctly describe the project.
    ii. Shall be published at least fourteen (14) calendar days before the date of opening the bids in a newspaper of general circulation, printed and published in the jurisdiction of the City.
    iii. Shall be sent electronically, if available, by either facsimile or electronic mail and mailed at least fifteen (15) calendar days before the date of opening the bids to all construction trade journals specified in California Public Contract Code Section 22036.
    iv. Shall include a general description of the items to be purchased and shall state where bid forms may be obtained and the date, time, and place of bid opening.
    v. Bidders list shall be made available to all responsible, prospective suppliers known to City staff and others requesting, in writing, to participate in the bid process.

vi. If awarded, the bid will be awarded to the responsible bidder who submits the lowest responsive bid. Unless provided otherwise by law, the City shall have the right to waive any defect or informality in the bidding or in the procedures set forth in this section. Unless provided otherwise by law, no defect of informality shall void any contract entered into.

b. Request for Proposal ("RFP"): RFP may be used for non-public works projects or procurements whenever the City has identified a desired outcome, and the supplier is asked to propose a solution in response to the City's provided statement of work or specifications. The City may ask the suppliers to quote on the original specifications and to indicate how the quotation would be changed if the supplier's suggestion is followed. RFP procurement is released through the electronic bid management system.

i. This solicitation type will include a combination of the following elements:
- Statement of Work or Specifications
- Schedule or Timelines
- Deliverables
- Sample Contract
- Terms and Conditions
- Special Contractual Requirements
- Submittal Instructions
- Evaluation Criteria

ii. RFPs are not typically appropriate for award to the lowest responsible proposer submitting a responsive proposal.

iii. Award of an agreement or contract may be made to the most technically responsible proposer whose proposal provides the highest rated solution to the City based on the proposal and evaluation criteria and will require a negotiated agreement or contract.

c. Request for Qualifications ("RFQ"): City Council Resolution 2003-011 adopted bidder pre-qualification procedures and documents for public projects to streamline the bidding process by focusing staff efforts on the review and evaluation of only those bid responses submitted by pre-qualified bidders. It is highly recommended that this process be used for high dollar public projects.

INFORMAL BID PROCEDURES: Small to medium sized public projects as defined in Municipal Code Section 2-6.13 and procurements for goods, services and professional services with a defined list of attributes. Informal bid processes are released through the electronic bid management system and award may require a negotiated agreement or contract. Types of procurement vehicles include:

a. Invitation for Bid ("IFB"):

i. All procurements for small or medium public projects shall follow the procurement procedures found under Municipal Code Section 2-6-18 Informal Bid Procedure.
ii. All plan holders shall receive an invitation to bid.
iii. Informal bid contracts shall, whenever possible, be based on at least three (3) responsive bids.
iv. Shall be awarded to the lowest responsible bidder, consistent with quality and delivery requirements.
v. The City's standard term for an agreement is three (3) years with two (2) one-year options.

ALTERNATIVE BID PROCEDURES: When formal or informal bidding procedures are not required for goods, services, or professional services due to low dollar value, when the procurement is for an intended outcome versus a defined list of attributes, etc. Types of procurement vehicles include:

a. Informal Quotation ("quote"):

i. The quote procedure may be utilized for the procurement of goods, services, and professional services when the total value (inclusive of all taxes, delivery charges and fees) does not exceed $10,000 (per supplier, project, scope, or type of goods per Agency or Department).
ii. A Purchase Order may be issued for goods and for services with approved documentation.
iii. The City's standard term for an agreement is three (3) years with two (2) one-year options.
iv. Award is based on best value.

b. Request for Quote ("RFQ"):

i. The RFQ procedure may be used for the procurement of goods, services, and professional services when the total value (inclusive of all taxes, delivery charges and fees) does not exceed $25,000 (per supplier, project, scope, or type of goods or services per Agency or Department).
ii. The City's standard term for an agreement is three (3) years with two (2) one-year options.
iii. Award is based on best value.

c. Request for Proposal ("RFP"):

RFP may be used for non-public works projects or procurements whenever the City has identified a desired outcome, and the supplier is asked to propose a solution in response to the City's provided statement of work or specifications. The City may ask the suppliers to quote on the original specifications and to indicate how the quotation would be changed if the supplier's suggestion is followed. RFP procurement is released through the electronic bid management system.

i. This solicitation type will include a combination of the following elements:
   - Statement of Work or Specifications
   - Schedule or Timelines
   - Deliverables
   - Sample Contract
   - Terms and Conditions
   - Special Contractual Requirements
   - Submittal Instructions
   - Evaluation Criteria

ii. RFPs are not typically appropriate for award to the lowest responsible proposer submitting a responsive proposal.

iii. Award of an agreement or contract may be made to the most technically responsible proposer whose proposal provides the highest rated solution to the City based on the proposal and evaluation criteria and will require a negotiated agreement or contract.

DESIGN BUILD

a. The City may utilize a design-build method of procurement for public projects in accordance with California Public Contracting Code Section 22160 *et seq*.

15.0 AGREEMENTS AND/OR CONTRACTS

a. The City utilizes written contracts to document each party's obligation and to minimize the City's risks during the performance of work. The written contract often incorporates much more detail than a purchase order alone can provide, especially related to the operating terms and conditions and the details of the transaction itself. Contracts include standard terms and conditions that serve as the framework and a statement of work that serves as the substance of the contract. During the course of the relationship between the parties, the contract serves as a point of reference which may quickly resolve any misunderstanding.

b. When a Purchase Order and/or agreement or contract reaches or exceeds $150,000, an Agenda Report documenting City Council approval needs to be submitted to Purchasing authorizing the expenditure. If the contract is over multiple years (with set dollar values per year), the original Agenda Report submitted to Purchasing is generally sufficient to cover the period of performance of the Purchase Order and/or agreement or contract (inclusive of optional years) if so stated in the original Agenda Report with delegated signature authority to the City Manager.

c. Generally, the following situations are among those requiring written agreements in addition to a Purchase Order:

   i. Professional and consulting services
   ii. Construction services
   iii. Design services
   iv. Maintenance services
   v. Removal of hazardous materials
   vi. Major software license agreements
   vii. Work that takes longer than one year to complete
   viii. Goods purchased that need to be serviced by the same Supplier

d. The City's contract templates can be found on the City's Intranet. The City Agency and/or Department shall be responsible for ensuring that the most current contract template is used. Purchasing is responsible for updating the contract templates on the City's Intranet.

15.1 Terms

a. The City's standard agreement or contract term for ongoing services is three (3) years with two (2) one-year options, to be exercised at the City's discretion. The City requires all agreements and/or contracts to have defined effective dates. Auto-renewal language is NOT acceptable for agreements or contracts executed by the City.

15.2 Contingency

a. In order to mitigate delays due to unforeseen occurrences and minimize administrative costs associated with completion of procurements, all Departments have authority to exercise a standard contingency of up to 10 percent for any type of service contract or agreement. Exercising a contingency of 10 percent or less will not require City Manager or City Council action; however, any contingency amount in excess of 10 percent will require an amendment or change order with City Manager approval if the dollar commitment is within his signature authorization limit (or Council action if in excess of the City Manager's authority).

b. Construction change orders up to 75 percent of the City Council approved contingency amount may be approved by the Agency Head, contingency in excess of 75 percent City Council approved contingency amount shall require City Manager's signature.

15.3 Department Concurrence

a. **Business License:**

i. City Agencies and/or Departments submitting agreements and/or contracts must confer with the City's Business License Department to determine if a business license is required for the work. If the Business License Department indicates that a business license is not required for the proposed work, then documentation needs to be included in the submission to Purchasing.

ii. "Business" includes any business, commercial enterprise, trade, calling, vocation, profession, occupation, or means of livelihood (whether or not carried on for gain or profit). "Evidence of doing business" shall include but not be limited to a person's use of signs, circulars, cards, telephone books, newspapers, or trade publications to advertise, hold out, or represent that such person is doing business within the City; when any person gives other evidence of transacting and carrying on business within the City; or when such person fails to deny in a sworn statement given to the License Official that such person is not engaged in business within the City after being requested to do so by the License Official. An example of a potential exemption is a nonprofit business exempt from paying Federal income tax by virtue of nonprofit status.

b. **City Attorney:** When negotiations between a City Agency and/or Department and a supplier require changes to a contract template (or the supplier 's contract may be substituted for a City contract), documentation that the City Attorney's Office approved such changes need to be included in the submission to Purchasing.

c. **Communications and Community Relations Department:** Authorization by the Communications and Community Relations Department is required for procurement of all graphic and/or printing services by outside suppliers for:

i. Graphic Design;
ii. Print Services (all outsourced printing); and
iii. Promotional/Advertising Items using the City logo/marketing mark (including promotional items, apparel, etc.).

- The Communications and Community Relations Department will review the request for said services to determine if in-house services can be provided in-lieu of outsourcing or if it is in the best financial and uniformity interest to outsource the work. If the decision is made to outsource the work, the Communications Department will liaison with contracted suppliers. City Agencies and/or Departments must email the following to initiate this request: Communications@ontarioca.gov.

- For all promotional and/or advertising items, requests with mock proofs must be sent to Communications@ontarioca.gov for approval on use of the City logo/marketing mark to ensure uniformity of standards on use are being met prior to the purchase of items.

d. **Human Resources:** Authorization by the Human Resources Department ("HR") is required for procurement of all staffing services by outside suppliers for temporary, part-time, interim, or related personnel services (include documentation in the submission to Purchasing that HR has approved the request).

e. **Information Technology Services:** If the proposed statement of work will impact the City's Information Technology ("IT") hardware or software infrastructure, include documentation in the submission to the Purchasing Division that IT has approved the services.

f. **Risk Management:** Subject to Risk Management Department approval, insurance requirements may be waived in contract when there is low risk to the City. If an insurance provision is waived by the Risk Management Department, include documentation from the Risk Management Department of such waiver.

16.0 PURCHASE ORDER EXCEPTIONS

a. Invoices may not be utilized as backup documentation with a requisition to request generation of a Purchase Order ("PO"). Invoices must be approved utilizing the Accounts Payable approval process and submitted directly to the Accounts Payable Department.
b. Some purchases are not readily adaptable to the PO process. These purchases are usually for items where the competitive process is not applicable. These purchase exceptions are submitted to the Accounts Payable Division for payment processing. The following are allowable exceptions*:
    - Asset seizure payments/evidence reimbursements
    - City, County, State, Federal, or other municipality's services
    - City Procurement Cards
    - Collection services
    - Office and Janitorial supplies approved via Staples, Grainger, Waxie, Amazon
    - Dues, Memberships, and Digital Subscriptions (Ex. Newsletters, Grammarly, Snagit) (Digital Subscriptions Exclude IT Software Renewals and Maintenance Agreements)
    - Escrow fees and closing and rehabilitation loans (wire transfers)
    - Federal Express service & United Parcel Service (Delivery Services)
    - Fiscal agent trustee fee
    - Instructors and sports officials
    - Leases and rentals
    - Legal services
    - Display and recruitment advertising
    - Mail sorting services
    - Payroll deductions
    - Physical exams and medical treatments
    - Post Office fees and permits
    - Property acquisition costs
    - Property profile (lot book reports)
    - Refunds, rebates, and reimbursements (including petty cash)
    - Relocation payments
    - School Tuition
    - Temporary agency employees
    - Travel, conferences, meeting, and training expenses
    - Utility deposits and services

*Purchasing reserves the right to require an agreement and/or Purchase Order be issued for any of the above listed items, if deemed necessary or in the best interests of the City.

REVISIONS

Review Date	Revision
June 30, 2023	
June 30, 2024	
March 18, 2025	

APPENDIX A

PURCHASING THRESHOLDS

All values below include all taxes, fees, and shipping/freight charges.

a. $0 - $25,000 (Goods, Services and Professional Services):
   i. Although the use of the electronic bid management system is not required, the requisition requires the submittal of a minimum of one (1) Quote.
   ii. For services and professional services, including all applicable documents (e.g., a valid Business License, Risk Management approved insurance, etc.).
   iii. The award for goods is based on the lowest responsive and responsible bidder and the best value for professional services.
   iv. A purchase order for goods, services, or professional services may be issued.

b. $25,001 - $60,000 (Goods, Services and Professional Services):
   i. Use of the electronic bid management system is not required.
   ii. Whenever possible, shall be based on three (3) or more responses of an RFQ or an RFP process. To be considered competitive, you should obtain at least two (2) responses and submit them with the requisition.
   iii. The award for goods is based on the lowest responsive and responsible bidder and the best value for professional services.
   iv. For services, a negotiated agreement or contract is required.

c. $60,001 - $150,000 (Goods, Services and Professional Services):
   i. Use of the electronic bid management system to issue a NIB or an RFP.
   ii. Newspaper advertisement is not required.
   iii. Award based on best value, department required to justify selection.
   iv. For services, an agreement or contract is required.

d. $150,001 and above (Goods, Services and Professional Services):
   i. Use of the electronic bid management system to issue NIB or RFP.
   ii. Bid awarded based on best value. Department required to justify selection.
   iii. Professional services solicitation requires procurement by RFP procurement and evaluation based on the professional qualifications necessary for the satisfactory performance of the services needed.
   iv. RFP evaluation factors and their relative importance must be identified in the RFP. The City must have a written method for conducting the evaluation and selection of the supplier.
   v. City Council action is required.

PUBLIC PROJECTS:
With reference to Public Contract Code sections 22030 through 22045: Article 3. Public Projects: Alternative Procedure

a. Up to $60,000 (IFB)
May be performed {1} with City employees, or {2} with a qualified, properly licensed contractor using a negotiated Purchase Order and agreement or contract.

i. If City staff {1} is used, proper codes for Accounting and charging time and material is required.
ii. If a contractor {2} is used and project exceeds $1,000, prevailing wages are required.
iii. Payment bond equal to 100% of the contract required when >$25,000. A performance bond is recommended.
iv. A negotiated contract is required.

b. $60,001 - $200,000 (IFB):

i. Staff must follow the Act and the Informal Bid Procedure (see Purchasing Policies and Procedures and Purchasing System).
ii. Prevailing Wages are required.
iii. Bid bond equal to 10% of the bid price and payment bond equal to the contract price are required. Performance bond is strongly recommended.
iv. A negotiated contract is required.

c. $200,001 and above (NIB):

i. Staff must follow the Act and the Formal Bid Procedure (see Purchasing Policies and Procedures and Purchasing System).
ii. Prevailing Wages are required.
iii. Bid bond equal to 10% of the bid price and payment bond equal to the contract price are required. Performance bond is strongly recommended.
iv. A negotiated contract is required.

d. City Council action required for any procurement exceeding $150,000.

i. Once a Purchase Order and/or agreement or contract exceeds the $150,000, City Council approval is required for each future dollar amendment.
    - This includes each optional year unless the **total dollar value approved** by City Council for authority delegated to City Manager is inclusive of the dollar values of all optional years. Once that dollar value threshold has been exceeded the agreement is required to go back to City Council for approval.
    - The $150,000 threshold is **not limited to a fiscal year and it does not reset to zero** at the beginning of the new fiscal year.

APPENDIX B

AUTHORIZATION RECAP

Dollar Threshold	Purchase Type*	Agreement Type*	Authorization Requirement
$0 - $25,000	Goods, Services and Professional Services	Purchase Order	Agency or Department Head, City Manager or Designee
$25,001 - $60,000	Goods	Purchase Order	Agency or Department Head, City Manager or Designee
	Goods, Services, Public Projects, and Professional Services	Agreement and Purchase Order	City Manager or Designee
$60,001 - $150,000	Goods	Purchase Order	Agency or Department Head, City Manager or Designee
	Goods, Services, Public Projects, and Professional Services	Agreement and Purchase Order	City Manager or Designee
$150,001 +	Goods, Services, Public Projects, and Professional Services	Agreement and Purchase Order	City Council (Approval) City Manager or Designee (Executes Agreement)

For examples and thresholds for Purchasing and Agreement Types, see Appendix A, Purchasing Thresholds

i. Executive Director Community Life & Culture is authorized to execute Entertainment Agreements or Contracts up to $10,000.
ii. Executive Director of Public Works is authorized to execute Public Works Agency operations related purchase agreements and contracts up to $50,000.
iii. Utilities General Manager is authorized to execute Water & Sewer operations related Agreements or Contracts up to $50,000.

APPENDIX C

CITY OF ONTARIO - CONTRACT MATRIX - JULY 2024

TYPE OF CONTRACT	TYPE OF PROJECT	COUNCIL ACTION	CONTRACT VALUE	BIDDING REQUIREMENT	BONDS	ADDITIONAL COMMENTS
Model Construction Contract Documents *Model Document No. 29437851*	"Public project" means any of the following: (1) Construction, reconstruction, erection, alteration, renovation, improvement, demolition, and repair work involving any publicly owned, leased, or operated facility (2) Painting or repainting of any publicly owned, leased, or operated facility (3) In the case of a publicly owned utility system, "public project" shall include only the construction, erection, improvement, or repair of dams, reservoirs, powerplants, and electrical transmission lines of 230,000 volts and higher (Pub. Con. Code § 22000)	Required for contracts more than $150,000 (OMC § 2-6.18(h))	$5,000 and over	Formal bidding over $200,000 (OMC § 2-6.17) Informal bidding $60,000 - $200,000 (OMC § 2-6.18)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• City issues Notice to Proceed to commence contract time • Use on Informal/Formal bid projects
Model Short Form Construction Contract *Model Document No. 33225207*	Intended for low risk public projects or maintenance projects ($200,000 or less) such as: • Maintenance or repair of streets or sewers • Construction, maintenance, or repair of water facilities or water works • All public projects, defined above, which do not require formal bidding ($200,000 or less)	Required for contracts more than $150,000 (OMC § 2-6.18(h))	Up to $200,000	Informal bidding over $200,000 (OMC § 2-6.18) Alternative Bid Procedure for $60,000 or less (OMC § 2-6.19)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• City issues Notice to Proceed to commence contract time • Can be used for "emergency" contracts if project is low cost and straightforward (Pub. Con. Code § 22050)
Model Engineering Department Construction Contract Documents - Caltrans Standard Specification *Model Document No. 29440147*	"Public project" means any of the following: (1) Construction, reconstruction, erection, alteration, renovation, improvement, demolition, and repair work involving any publicly owned, leased, or operated facility (2) Painting or repainting of any publicly owned, leased, or operated facility (3) In the case of a publicly owned utility system, "public project" shall include only the construction, erection, improvement, or repair of dams, reservoirs, powerplants, and electrical transmission lines of 230,000 volts and higher (Pub. Con. Code § 22000) *Specially drafted for projects built pursuant to 2010 Caltrans Standard Specifications*	Required for contracts more than $150,000 (OMC § 2-6.18(h))	$5,000 and over	Formal bidding over $200,000 (OMC § 2-6.17) Informal bidding $60,000 - $200,000 (OMC § 2-6.18)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• City issues Notice to Proceed to commence contract time • Use on Informal/Formal bid projects built pursuant to 2010 Caltrans Standard Specifications
Model Engineering Department Construction Contract Documents - Greenbook *Model Document No. 33484528*	"Public project" means any of the following: (1) Construction, reconstruction, erection, alteration, renovation, improvement, demolition, and repair work involving any publicly owned, leased, or operated facility (2) Painting or repainting of any publicly owned, leased, or operated facility (3) In the case of a publicly owned utility system, "public project" shall include only the construction, erection, improvement, or repair of dams, reservoirs, powerplants, and electrical transmission lines of 230,000 volts and higher (Pub. Con. Code § 22000) *Specially drafted for projects built pursuant to Greenbook*	Required for contracts more than $150,000 (OMC § 2-6.18(h))	$5,000 and over	Formal bidding over $200,000 (OMC § 2-6.17) Informal bidding $60,000 - $200,000 (OMC § 2-6.18)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• City issues Notice to Proceed to commence contract time • Use on Informal/Formal bid projects built pursuant to Greenbook

TYPE OF CONTRACT	TYPE OF PROJECT	COUNCIL ACTION	CONTRACT VALUE	BIDDING REQUIREMENT	BONDS	ADDITIONAL COMMENTS
Model OMUC Construction Contract Documents *Model Document No. 33349674*	"Public project" means any of the following: (1) Construction, reconstruction, erection, alteration, renovation, improvement, demolition, and repair work involving any publicly owned, leased, or operated facility (2) Painting or repainting of any publicly owned, leased, or operated facility (3) In the case of a publicly owned utility system, "public project" shall include only the construction, erection, improvement, or repair of dams, reservoirs, powerplants, and electrical transmission lines of 230,000 volts and higher (Pub. Con. Code § 22000) *Specially drafted for OMUC projects*	Required for contracts more than $150,000 (OMC § 2-6.18(h))	$5,000 and over	Formal bidding over $200,000 (OMC § 2-6.17) Informal bidding $60,000 - $200,000 (OMC § 2-6.18)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• City issues Notice to Proceed to commence contract time • Always use on formally bid projects
Model Design Services Agreement *Model Document No. 33241256*	Engineering or architectural design services for a public facility or structure. Note: Formerly "Model Architect Services Agreement"	Required for all contracts over $150,000	Unlimited	Qualifications-based selection (OMC § 2-6.15)	Not usually required, but can be if the project dictates	• Will usually involve negotiation with architect on terms and scope • Contract awarded based on demonstrated competence and qualifications to satisfactorily perform the work (Gov. Code §§ 4526-4529)
Model Professional Services Agreement *Model Document No. 33225203*	Professional consultant (independent contractor) work, such as: • Financial • Economic • Accounting • Legal • Engineering (non-design) • Administrative	Required for all contracts over $150,000	Unlimited	Formal, informal, or alternative procedure (OMC §§ 2-6.14); Qualifications based selection (OMC § 2-6.15)	Not usually required, but can be if the project dictates	
Model Maintenance Services Agreement *Model Document No. 33225206*	"Maintenance work" includes all of the following: (1) Routine, recurring, and usual work for the preservation or protection of any publicly owned or publicly operated facility for its intended purposes (2) Minor repainting (3) Resurfacing of streets and highways at less than one inch (4) Landscape maintenance, including mowing, watering, trimming, pruning, planting, replacement of plants, and servicing of irrigation and sprinkler systems (5) Work performed to keep, operate, and maintain publicly owned water, power, or waste disposal systems, including, but not limited to, dams, reservoirs, powerplants, and electrical transmission lines of 230,000 volts and higher (Pub. Con. Code § 22000)	Required for contracts more than $150,000	Unlimited	Formal, informal, or alternative procedure (OMC §§ 2-6.14)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• Prevailing wages must be paid on most maintenance projects. Some **exceptions** include: – Janitorial/Custodian services – Security/Watchman services

TYPE OF CONTRACT	TYPE OF PROJECT	COUNCIL ACTION	CONTRACT VALUE	BIDDING REQUIREMENT	BONDS	ADDITIONAL COMMENTS
Model General Services Agreement ***Model Document No. 40935197.1***	"General Services" are those which are not considered Professional Services or Maintenance work. Some examples of situations for which a General Services Agreement would be appropriate are: • Party rentals (i.e., tables and chairs) • Basic computer services (i.e., off the shelf software) Alarm monitoring Services	Required for contracts more than $150,000	Unlimited	Formal, informal, or alternative procedure (OMC §§ 2-6.14)	Not usually required, but can be if the project dictates	• If the services contracted for are not Professional Services or Maintenance Services, then it will most likely fall under a General Services Agreement (if there is any question, consult with the City Attorney's office)
Model IFB Maintenance Services Agreement *Model Document No. 33437079*	"Maintenance work" (as defined by Pub. Con. Code § 22000, above) when informal or formal bidding is desired	Required for contracts more than $150,000	Unlimited	Formal, informal, or alternative procedure (OMC §§ 2-6.14)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• Prevailing wages must be paid on most maintenance projects. Some **exceptions** include: – Janitorial/Custodian services – Security/Watchman services • Use on Informal/Formal bid projects
Model Letter Agreement *Model Document No. 33241407*	For use on small projects (not included in definition of "public project" under Pub. Con. Code § 22000) such as professional and non-professional services involving little money, complexity, and risk to the City.	N/A	For services under $25,000 only	Formal, informal, or alternative procedure (OMC §§ 2-6.14); Qualifications based selection (OMC § 2-6.15)	Not required	Check with Risk Management for insurance/bond requirements
Model Equipment Purchase Agreement *Model Document No. 29443677*	Equipment purchases only	Required for contracts more than $150,000	Unlimited	Any formal, informal, or alternative procedure (OMC §§ 2-6.16)	Not required	Check with Risk Management for insurance/bond requirements
Model Amendment to Non-Construction Agreements *Model Document No. 9423414*	To be used to amend all non-construction agreements	Required when total value of contract or amendment is $150,000 or more	Unlimited	N/A	N/A	Check with Risk Management for insurance/bond requirements that may be triggered by new work added by amendment
Model Goods & Services Agreement *Model Document No. 31872872*	To be used when the City desires vendor to sell the materials and/or equipment to the City, and render services related to those goods	Required for contracts more than $150,000	Unlimited	Any formal, informal, or alternative procedure (OMC §§ 2-6.16)	Not required	Check with Risk Management for insurance/bond requirements
Model Construction Contract Documents w/ CDBG *Model Document No. 31389538*	"Public project" means any of the following: (1) Construction, reconstruction, erection, alteration, renovation, improvement, demolition, and repair work involving any publicly owned, leased, or operated facility (2) Painting or repainting of any publicly owned, leased, or operated facility (3) In the case of a publicly owned utility system, "public project" shall include only the construction, erection, improvement, or repair of dams, reservoirs, powerplants, and electrical transmission lines of 230,000 volts and higher (Pub. Con. Code § 22000) *Specially drafted for projects built pursuant to CDBG Specifications*	Required for contracts more than $150,000 (OMC § 2-6.18(h))	$5,000 and over	Formal bidding over $200,000 (OMC § 2-6.17) Informal bidding $60,000 - $200,000 (OMC § 2-6.18)	Payment Bond required for contracts of $25,000 or more (Civ. Code § 9550) Performance Bond for the full value of the contract is strongly recommended but not required	• City issues Notice to Proceed to commence contract time • Use on Informal/Formal bid projects

NOTES:

1. Prevailing Wages must be paid on any "public works" or "maintenance" contract in excess of $1,000. **Note:** This is a broader definition than "public project" for public bidding purposes (See Labor Code §§ 1720, *et seq*. and 1771; 8 CCR §§ 16000 and 16001(f); and Department of Industrial Relations ("DIR") Precedential Decision List effective January 8, 2001 at www.dir.ca.gov). Please note DIR has set wage rates for some "professional" services performed on public works and maintenance projects.
2. Performance Bonds are generally not required by state law; however, they are strongly recommended to secure performance by the contractor and full and adequate completion of the project.
3. Risk Management **must approve** all insurance/bond waivers.
4. Payment Bonds are required by law for projects involving: (1) construction, alterations, additions, or repairs; (2) seeding, sodding, or planting for landscaping purposes; (3) filling, leveling, or grading work; and (4) demolition or building removal work (See Civil Code Sections 8038 and 9550).

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Adrian Escamilla Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 5

SUBJECT: A CONSTRUCTION CONTRACT WITH C.I. SERVICES, INC. FOR THE ARMSTRONG COMMUNITY CENTER ROOF REPLACEMENT PROJECT

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager, or his designee, to execute Construction Contract No. D&C22-014 with C.I. Services, Inc., of Mission Viejo, California, for the Armstrong Community Center Roof Replacement Project in the amount of $681,200 and authorize a 10% contingency of $68,120 for a total not-to-exceed contract amount of $749,320; and
B. Authorize the City Manager, or his designee, to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The recommended Construction Contract with C.I. Services, Inc. is $681,200 plus a 10% contingency of $68,120 for a total not-to-exceed contract amount of $749,320. The Fiscal Year 2024-25 Adopted Budget includes appropriations in the Capital Projects Fund for the Armstrong Community Center Roof Replacement Project.

BACKGROUND & ANALYSIS: The roof at the Armstrong Community Center has outlived its lifespan and has required increased maintenance over time due to deterioration. Staff recommends re-roofing the Community Center with metal roof panels, which will provide faster evaporation and lower roof-top temperatures to reduce interior building temperatures and increase product life cycle.

On January 16, 2025, six (6) bids were received for Bid No. 1854 D&C22-014 Armstrong Community Center Roof Replacement. The bid results are listed below:

VENDOR	LOCATION	AMOUNT
C.I Services, Inc.	Mission Viejo, CA	$681,200
Southland Roofing, Inc.	Los Angeles, CA	$787,300
AME Builders, Inc.	Upland, CA	$938,300
Danny Letner, Inc.	Orange, CA	$940,604
Rite-Way Roof Corporation	Fontana, CA	$943,995
Best Contracting Services, Inc.	Gardena, CA	$983,035

C.I. Services, Inc., of Mission Viejo, California, was the apparent lowest responsible bidder. On January 17, 2025, the City received a protest letter from AME Builders, Inc. stating that C.I. Services, Inc. submitted a non-responsive bid because they failed to provide a required B License. The City responded to AME Builders, Inc. in a letter dated February 11, 2025, stating that the bid protest is meritless because it is the low bidder's responsibility to provide the required licensing for bidding on public works projects to satisfactorily perform the duties stated in the Construction Contract. City Staff is of the opinion that the low bidder has offered such a showing, and all irregularities are waived.

C.I. Services, Inc., of Mission Viejo, California, was the lowest responsive bidder that met all the required specifications with a cost of $681,200. Based on credentials and pricing, Staff recommends awarding Construction Contract No. D&C22-014 Armstrong Community Center Roof Replacement Project to C.I. Services, Inc. The project is estimated to be completed in June 2025.

SECTION 00500 – CONTRACT FOR CONSTRUCTION

This Contract for Construction ("Contract"), No. D&C22-014 is made and entered as of _____, by and between City of Ontario, with its principal place of business at 303 East "B" Street, Ontario, CA 91764, sometimes hereinafter called the "City" and **C.I. Services, Inc.**, sometimes hereinafter called "Contractor."

WITNESSETH: That the parties hereto have mutually covenanted and agreed, and by these presents do covenant and agree with each other as follows:

ARTICLE 1. SCOPE OF WORK.

The Contractor shall perform all Work within the time stipulated in the Contract, and shall provide all labor, materials, equipment, tools, utility services, and transportation to complete all of the Work required in strict compliance with the Contract Documents as specified in Article 5, below, for the following Project:

Re-roof the Armstrong Community Center. Demo existing asphalt shingle roof and replace with new standing seam metal roof and new TMP membrane over existing flat mechanical areas & exterior roof gutters with new roof drain grates.

Contractor is an independent contractor and not an agent of the City. The Contractor and its surety shall be liable to the City for any damages arising as a result of the Contractor's failure to comply with this obligation.

ARTICLE 2. TIME FOR COMPLETION.

Time is of the essence in the performance of the Work. The Work shall be commenced on the date stated in the City's Notice to Proceed. The Contractor shall complete all Work required by the Contract Documents within **60 calendar days** from the commencement date stated in the Notice to Proceed. By its signature hereunder, Contractor agrees the time for completion set forth above is adequate and reasonable to complete the Work.

ARTICLE 3. CONTRACT PRICE.

The City shall pay to the Contractor as full compensation for the performance of the Contract, subject to any additions or deductions as provided in the Contract Documents, and including all

applicable taxes and costs, the sum of **Six Hundred Eighty-One Thousand Two Hundred Dollars ($681,200)**. Payment shall be made as set forth in the General Conditions. The City will pay to Contractor compensation based upon the prices set forth in the Bid Schedule.

ARTICLE 4. LIQUIDATED DAMAGES.

Contractor acknowledges that the City will sustain actual damages for each and every Day completion of the Project is delayed beyond the Contract Time. Because of the nature of the Project, it would be impracticable or extremely difficult to determine the City's actual damages. Accordingly, in accordance with Government Code section 53069.85, it is agreed that the Contractor will pay the City the sum of $250.00 (Two Hundred Fifty Dollars) for each and every calendar day of delay beyond the time prescribed in the Contract Documents for finishing the Work, as Liquidated Damages and not as a penalty or forfeiture. In the event this is not paid, the Contractor agrees the City may deduct that amount from any money due or that may become due the Contractor under the Contract. This Section does not exclude recovery of other damages specified in the Contract Documents. Liquidated damages may be deducted from progress payments due Contractor, Project retention or may be collected directly from Contractor, or from Contractor's surety. These provisions for liquidated damages shall not prevent the City, in case of Contractor's default, from terminating the Contractor.

Consistent with Public Contract Code Section 7102, Contractor will be compensated for damages incurred due to delays for which the City is responsible. The parties agree that determining Contractor's exact delay damages is and will continue to be impracticable and extremely difficult. As such, for each calendar day in excess of the Contract Time, the City shall pay to the Contractor $250.00 per day as Reverse Liquidated Damages and not as a penalty or forfeiture. Such amount shall constitute the only payment allowed for any City caused delays and shall necessarily include all overhead, all profits, all administrative costs, all bond costs, all labor, materials, equipment and rental costs and any other costs, expenses and fees incurred or sustained as a result of such delays. Notice of requests for delay damages and additional days shall be provided to the City within five (5) Days from the discovery of the circumstances giving rise to any delay or three (3) Days from the discovery of any latent or subsurface conditions giving rise to a delay.

ARTICLE 5. COMPONENT PARTS OF THE CONTRACT.

The "Contract Documents" include the following:

Notice Inviting Bids
Instructions to Bidders
Bid Forms
Bid Acknowledgement
Bid Schedule
Bid Guarantee
Designation of Subcontractors
Information Required of Bidders
Non-Collusion Declaration Form
Iran Contracting Act Certification
Public Works Contractor DIR Registration Certification
Performance Bond
Payment (Labor and Materials) Bond
Contract for Construction

General Conditions
Special Conditions
Specifications
Addenda
Construction Plans and Drawings
Standard Specifications for Public Works Construction “Greenbook”, latest edition, Except Sections 1-9
Applicable Local Agency Standards and Specifications, as last revised
Reference Specifications
Approved and fully executed Change Orders
Permits
Any other documents contained in or incorporated into the Contract

The Contractor shall complete the Work in strict accordance with all of the Contract Documents.

All of the Contract Documents are intended to be complementary. Work required by one of the Contract Documents and not by others shall be done as if required by all. In the event of conflict, the various Contract Documents will be given effect in the order set forth in the General Conditions. This Contract shall supersede any prior agreement of the parties.

ARTICLE 6. PROVISIONS REQUIRED BY LAW AND CONTRACTOR COMPLIANCE.

Each and every provision of law required to be included in these Contract Documents shall be deemed to be included in these Contract Documents. The Contractor shall comply with all requirements of applicable federal, state and local laws, rules and regulations, including, but not limited to, the provisions of the California Labor Code and California Public Contract Code which are applicable to this Work.

ARTICLE 7. INDEMNIFICATION.

Contractor shall provide indemnification and defense as set forth in the General Conditions.

ARTICLE 8. PREVAILING WAGES.

Contractor shall be required to pay the prevailing rate of wages in accordance with the Labor Code which such rates shall be made available at the City’s Office or may be obtained online at http://www.dir.ca.gov and which must be posted at the job site.

ARTICLE 9. FALSE CLAIMS.

Contractor acknowledges that if a false claim is submitted to the City, it may be considered fraud and Contractor may be subject to criminal prosecution. Contractor acknowledges that the False Claims Act, California Government Code sections 12650, et seq., provides for civil penalties where a person knowingly submits a false claim to a public entity. These provisions include within their scope false claims made with deliberate ignorance of the false information or in reckless disregard of the truth or falsity of the information. In the event the City seeks to recover penalties pursuant to the False Claims Act, it is entitled to recover its litigation costs, including attorneys’ fees. Contractor hereby acknowledges that the filing of a false claim may the Contractor to an administrative debarment proceeding wherein Contractor may be prevented from further bidding on public contracts for a period of up to five (5) years.

[REMAINDER OF PAGE LEFT INTENTIONALLY BLANK]

IN WITNESS WHEREOF, this Contract has been duly executed by the above-named parties, on the day and year above written.

KNOW ALL PERSONS BY THESE PRESENTS:

THAT WHEREAS, the City of Ontario, with its principal place of business at 303 East "B" Street, Ontario, CA 91764, (hereinafter referred to as the "City") has awarded to _____, (hereinafter referred to as the "Contractor") an agreement for **Contract No.D&C22-014 Armstrong Community Center Roof replacement**, (hereinafter referred to as the "Project").

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract Documents for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, the Contractor is required by said Contract Documents to perform the terms thereof and to furnish a bond for the faithful performance of said Contract Documents.

NOW, THEREFORE, we, _____, the undersigned Contractor and _____ as Surety, a corporation organized and duly authorized to transact business under the laws of the State of California, are held and firmly bound unto the City in the sum of _____ DOLLARS, ($_____), said sum being not less than one hundred percent (100%) of the total amount of the Contract, for which amount well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that, if the Contractor, his or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and agreements in the Contract Documents and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their intent and meaning; and shall faithfully fulfill all obligations including the one (1) year guarantee of all materials and workmanship; and shall indemnify and save harmless the City, its officials, officers, employees, and authorized volunteers, as stipulated in said Contract Documents, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees including reasonable attorney's fees, incurred by the City in enforcing such obligation.

As a condition precedent to the satisfactory completion of the Contract Documents, unless otherwise provided for in the Contract Documents, the above obligation shall hold good for a period of one (1) year after the acceptance of the work by the City, during which time if Contractor shall fail to make full, complete, and satisfactory repair and replacements and totally protect the City from loss or damage resulting from or caused by defective materials or faulty workmanship. The obligations of Surety hereunder shall continue so long as any obligation of Contractor remains. Nothing herein shall limit the City's rights or the Contractor or Surety's obligations under

the Contract, law or equity, including, but not limited to, California Code of Civil Procedure Section 337.15.

Whenever Contractor shall be, and is declared by the City to be, in default under the Contract Documents, the Surety shall remedy the default pursuant to the Contract Documents, or shall promptly, at the City's option:

i. Take over and complete the Project in accordance with all terms and conditions in the Contract Documents; or

ii. Obtain a bid or bids for completing the Project in accordance with all terms and conditions in the Contract Documents and upon determination by Surety of the lowest responsive and responsible bidder, arrange for a Contract between such bidder, the Surety and the City, and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

iii. Permit the City to complete the Project in any manner consistent with California law and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

Surety expressly agrees that the City may reject any contractor or subcontractor which may be proposed by Surety in fulfillment of its obligations in the event of default by the Contractor.

Surety shall not utilize Contractor in completing the Project nor shall Surety accept a bid from Contractor for completion of the Project if the City, when declaring the Contractor in default, notifies Surety of the City's objection to Contractor's further participation in the completion of the Project.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project to be performed thereunder shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project.

END OF PERFORMANCE BOND

Payment Bond (Labor and Materials).

KNOW ALL MEN BY THESE PRESENTS That

WHEREAS, the City of Ontario , with its principal place of business at 303 East "B" Street, Ontario, CA 91764 (hereinafter designated as the "City"), by action taken or a resolution passed _____ , 20_____, has awarded to _____ hereinafter designated as the "Principal," a contract for the work described as follows: **Contract No. D&C22-014 Armstrong Community Center Roof replacement** (the "Project"); and

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract Documents for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, said Principal is required to furnish a bond in connection with said contract; providing that if said Principal or any of its Subcontractors shall fail to pay for any materials, provisions, provender, equipment, or other supplies used in, upon, for or about the performance of the work contracted to be done, or for any work or labor done thereon of any kind, or for amounts due under the Unemployment Insurance Code or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department from the wages of employees of said Principal and its Subcontractors with respect to such work or labor the Surety on this bond will pay for the same to the extent hereinafter set forth.

NOW THEREFORE, we, the Principal and _____ as Surety, are held and firmly bound unto the City in the penal sum of _____ Dollars ($_____) lawful money of the United States of America, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that if said Principal, his or its subcontractors, heirs, executors, administrators, successors or assigns, shall fail to pay any of the persons named in Civil Code Section 9100, fail to pay for any materials, provisions or other supplies, used in, upon, for or about the performance of the work contracted to be done, or for any work or labor thereon of any kind, or amounts due under the Unemployment Insurance Code with respect to work or labor performed under the contract, or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department or Franchise Tax Board from the wages of employees of the contractor and his subcontractors pursuant to Revenue and Taxation Code Section 18663, with respect to such work and labor the Surety or Sureties will pay for the same, in an amount not exceeding the sum herein above specified, and also, in case suit is brought upon this bond, all litigation expenses incurred by the City in such suit, including reasonable attorneys' fees, court costs, expert witness fees and investigation expenses.

This bond shall inure to the benefit of any of the persons named in Civil Code Section 9100 so as to give a right of action to such persons or their assigns in any suit brought upon this bond.

It is further stipulated and agreed that the Surety on this bond shall not be exonerated or released from the obligation of this bond by any change, extension of time for performance, addition, alteration or modification in, to, or of any contract, plans, specifications, or agreement pertaining or relating to any scheme or work of improvement herein above described, or pertaining or relating

to the furnishing of labor, materials, or equipment therefore, nor by any change or modification of any terms of payment or extension of the time for any payment pertaining or relating to any scheme or work of improvement herein above described, nor by any rescission or attempted rescission or attempted rescission of the contract, agreement or bond, nor by any conditions precedent or subsequent in the bond attempting to limit the right of recovery of claimants otherwise entitled to recover under any such contract or agreement or under the bond, nor by any fraud practiced by any person other than the claimant seeking to recover on the bond and that this bond be construed most strongly against the Surety and in favor of all persons for whose benefit such bond is given, and under no circumstances shall Surety be released from liability to those for whose benefit such bond has been given, by reason of any breach of contract between the owner or the City and original contractor or on the part of any obligee named in such bond, but the sole conditions of recovery shall be that claimant is a person described in Civil Code Section 9100, and has not been paid the full amount of his claim.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract to be performed thereunder, shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of Contract, including but not limited to, the provisions of Sections 2819 and 2845 of the California Civil Code.

END OF PAYMENT BOND

SECTION 00700 – GENERAL CONDITIONS

ARTICLE 1 -TERMS; DEFINITIONS

1.1 Defined Terms

A. Whenever used in the Contract Documents and printed with initial capital letters, the terms listed below will have the meanings indicated which are applicable to both the singular and plural thereof. In addition to terms specifically defined below, terms with initial capital letters in the Contract Documents include references to identified articles and paragraphs, and the titles of other documents or forms.

1. Act of God – An earthquake of magnitude of 3.5 or higher on the Richter scale or a tidal wave.

2. Addenda -- Written or graphic instruments issued prior to the submission of Bids which clarify, correct, or change the Contract Documents.

3. Additional Work -- New or unforeseen work will be classified as "Additional Work" when the Engineer determines that it is not covered by the Contract.

4. Applicable Laws -- The laws, statutes, ordinances, rules, codes, regulations, permits, and licenses of any kind, issued by local, state or federal governmental authorities or private authorities with jurisdiction (including utilities), to the extent they apply to the Work.

5. Bid -- The offer or proposal of a Bidder submitted on the prescribed form setting forth the prices and other terms for the Work to be performed.

6. Bid Guarantee -- The Bid Bond, cashier's check, or certified check to be made by the Bidder, which is to accompany the Bid as a guaranty of good faith to enter into a written contract.

7. Bidder -- The individual or entity who submits a Bid directly to the City.

8. Change Order ("CO") -- A document that authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, issued on or after the Effective Date of the Contract, in accordance with the Contract Documents and in the form contained in the Contract Documents.

9. Change Order Request ("COR") -- A request made by the Contractor for an adjustment in the Contract Price and/or Contract Times as the result of a Contractor-claimed change to the Work.

10. City's Representative – The City of Ontario, and acting through properly authorized agents, such as the Engineer or such other agents acting within the scope of the particular duties entrusted to them. Also sometimes referred to as the "City's Representative" or "Representative" in the Contract Documents. The terms the City and Owner may be used interchangeably

11. Claim -- A demand or assertion by the City or Contractor seeking an adjustment of Contract Price or Contract Times, or both, or other relief with respect to the terms of the Contract. A demand for money or services by a third party is not a Claim.

12. Contract -- The entire integrated written agreement between the City and Contractor concerning the Work. "Contract" may be used interchangeably with "Agreement" in the Contract Documents. The Contract supersedes prior negotiations, representations, or agreements, whether written or oral, and includes all Contract Documents.

13. Contract Documents -- The documents listed in Section 00 52 13, Article 5 of the Contract for Construction. Some documents provided by the City to the Bidders and Contractor, including but not limited to reports and drawings of subsurface and physical conditions are not Contract Documents.

14. Contract Price -- Amount to be paid by the City to the Contractor as full compensation for the performance of the Contract and completion of the Work, subject to any additions or deductions as provided in the Contract Documents, and including all applicable taxes and costs.

15. Contract Time -- The number of days or the dates stated in the Contract Documents to: achieve defined milestones, if any; and to complete the Work so that it is ready for final payment.

16. Contractor -- The individual or entity with which the City has contracted for performance of the Work.

1. Contractor's Designated On-Site Representative -- The Contractor's Designated On-Site Representative will be identified by the Contractor and shall not be changed without prior written consent of the City.

2. Critical Supply Shortage -- An unusual shortage in materials that is (a) supported by documented proof that Contractor made every effort to obtain such materials from all available sources; (b) such shortage is due to the fact that such materials are not physically available from single or multiple sources or could have been obtained only at exorbitant prices entirely inconsistent with current and standard rates taking into account the quantities involved and the usual industry practices in obtaining such quantities; and (c) such shortages and the difficulties in obtaining alternate sources of materials could not have been known or anticipated by Contractor at the time it submitted its bid or entered the Contract. Market fluctuations in prices of materials, whether or not resulting from a Force Majeure Event, does not constitute a Critical Supply Shortage.

3. Day -- A calendar day of 24 hours measured from midnight to the next midnight.

4. Defective Work -- Work that is unsatisfactory, faulty, or deficient; or that does not conform to the Contract Documents; or that does not meet the requirements of any inspection, reference standard, test, or approval referenced in the Contract Documents.

5. Demobilization -- The complete dismantling and removal by the Contractor of all of the Contractor's temporary facilities, equipment, and personnel at the Site.

6. Drawings -- That part of the Contract Documents prepared by of the Engineer of Record which graphically shows the scope, extent, and character of the Work to be performed by Contractor. Shop Drawings and other Contractor Submittals are not Drawings as so defined.

7. Effective Date of the Contract -- The date indicated in the Contract on which it becomes effective, but if no such date is indicated, it means the date on which the Contract is signed and delivered by the last of the two parties to sign and deliver.

8. Engineer -- Whenever not qualified, shall mean the City Engineer or the Engineer authorized to act for and in behalf of the City, acting either directly or through properly authorized agents, such agents acting severally within the scope of the particular duties entrusted to them.

9. Force Majeure Event -- An event that materially affects a party's performance and is one or more of the following: (1) Acts of God or other natural disasters occurring at the Site; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the Work); (4) pandemics, epidemics or quarantine restrictions; (5) strikes and other organized labor action occurring at the Site and the effects thereof on the Work, only to the extent such strikes and other organized labor action are beyond the control of Contractor and its Subcontractors, of every Tier, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (6) a Critical Supply Shortage. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of the City in its capacity as a municipal authority.

10. Hazardous Waste -- The term "Hazardous Waste" shall have the meaning provided in Section 104 of the Solid Waste Disposal Act (42 U.S.C. § 6903) as amended from time to time, or any substance or material identified as hazardous under any state or federal statute governing handling, disposal and/or cleanup of any such substance or material, whichever is more restrictive.

11. Holiday – Holidays occur on:

    New Year's Day - January 1
    President's Day – Third Monday in February
    Memorial Day - Last Monday in May
    Independence Day - July 4
    Labor Day - First Monday in September
    Veteran's Day - November 11
    Thanksgiving Day - Fourth Thursday in November
    Friday after Thanksgiving
    Christmas Eve – December 24
    Christmas Day - December 25

Day After Christmas – December 26
New Year's Eve – December 31

If any Holiday listed above falls on a Saturday, Saturday and the preceding Friday are both Holidays. If the Holiday should fall on a Sunday, Sunday and the following Monday are both Holidays.

12. Notice of Award -- The written notice by the City to the Successful Bidder stating that upon timely compliance by the Successful Bidder with the conditions precedent listed therein, the City will sign and deliver the Contract.

13. Notice of Completion -- The form which may be executed by the City constituting final acceptance of the Project.

14. Notice to Proceed -- A written notice given by the City to Contractor fixing the date on which the Contractor may proceed with the Work and when Contract Times will commence to run.

15. Project -- The total construction of which the Work to be performed under the Contract Documents may be the whole, or a part.

16. Record Drawings – The record set of as-builts prepared by the Contractor during the Work in accordance with the requirements of the General Conditions.

17. Recyclable Waste Materials -- Materials removed from the Site which are required to be diverted to a recycling center rather than an area landfill. Recyclable Waste Materials include, but are not limited to, asphalt, concrete, brick, concrete block, and rock.

18. Sample -- A physical example furnished by the Contractor to illustrate materials, equipment or workmanship; to establish standards by which the Work will be judged.

19. Schedule of Submittals -- A schedule, prepared and maintained by Contractor, of required submittals and the time requirements to facilitate scheduled performance of related construction activities.

20. Shop Drawings -- All drawings, diagrams, illustrations, schedules, and other data or information which are specifically prepared or assembled by or for Contractor and submitted by Contractor to illustrate some portion of the Work.

21. Site -- Lands or areas indicated in the Contract Documents as being furnished by the City upon which the Work is to be performed, including rights-of-way and easements for access thereto, and such other lands furnished by the City which are designated for the use of Contractor.

22. Specifications -- That part of the Contract Documents consisting of written requirements for materials, equipment, systems, standards and workmanship as applied to the Work, and certain administrative requirements and procedural matters applicable thereto.

23. Stop Payment Notice -- A written notice as defined in Civil Code section 8044.

24. Subcontractor -- An individual or entity other than a Contractor having a contract with any other entity than the City for performance of any portion of the Work at the Site.

25. Submittal -- Written and graphic information and physical samples prepared and supplied by the Contractor demonstrating various portions of the Work.

26. Successful Bidder -- The responsible Bidder submitting a responsive Bid to whom the City makes an award.

27. Supplier -- A manufacturer, fabricator, supplier, distributor, material man, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment used in the performance of the Work or to be incorporated in the Work.

28. Underground Facilities -- All underground pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including those that convey electricity, gases, steam, liquid petroleum products, telephone or other communications, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

29. Unit Price Work -- Work to be paid for on the basis of unit prices as provided by the Contractor in its Bid or as adjusted in accordance with the Contract Documents.

30. Warranty -- A guarantee provided to the City by the Contractor that the Work will remain free of defects and suitable for its intended use for the period required by the Contract Documents or the longest period permitted by the law of this state, whichever is longer.

31. Work -- The entire construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction, and furnishing, installing, and incorporating all materials and equipment into such construction, all as required by the Contract Documents.

1.2 Terminology.

A. The words and terms below are not defined but, when used in the Contract Documents, have the indicated meaning.

1. The word “furnish,” when used in connection with services, materials, or equipment, shall mean to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word “install,” when used in connection with services, materials, or equipment, shall mean to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

3. The words “perform” or “provide,” when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use.

4. Regardless of whether “furnish,” “install,” “perform,” or “provide” is used in connection with services, materials, or equipment, an obligation of Contractor is implied.

B. Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2 -PRELIMINARY MATTERS

2.1 Delivery of Contract Documents

A. Within ten (10) Days after receipt of the Notice of Award and before the City will execute the Contract, the Contractor shall furnish and file with the City a signed Contract and the necessary Performance Bond, Payment Bond, and Certificates of Insurance and Endorsements, as well as any other documents specified in the Contract Documents.

2.2 Bonds

A. Contractor shall submit the bonds on the forms provided with the Contract Documents, duly executed by a responsible corporate surety admitted to transact surety business in the State of California, as defined in Code of Civil Procedure section 995.120, and listed in the United States Department of the Treasury circular entitled "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies," authorized to do business in the State of California and acceptable to the City conditioned upon the faithful performance by the Contractor of all requirements of the Contract Documents. Each of the bonds shall be in a sum no less than one hundred percent (100%) of the Contract Price. Bonds shall be delivered to the City within ten (10) Days after receipt of the Notice of Award and before execution of the Contract by the City.

2.3 Evidence of Insurance

A. Prior to commencing any Work but no later than ten (10) Days after receipt of the Notice of Award, the Contractor shall submit or cause to be submitted any and all Certificates of Insurance and Endorsements, showing that the Contractor has the required insurance, to the attention of the City. Such insurance is to be provided at the sole cost and expense of the Contractor. No Work shall be performed until all of the required insurance has been received and approved.

2.4 Execution of the Contract

A. Upon receipt of the required Contract Documents, the City will execute the Contract, establishing the Effective Date of the Contract.

2.5 Contractor's Failure to Perform

A. Should Contractor fail to comply with timelines provided above, the City shall retain the right to enforce and collect on the Contractor's Bid Guarantee, rescind award to the Contractor and award the Contract to the next lowest responsive, responsible bidder as determined by the City. If the City elects to accept bonds and insurance submitted late, the Contract Times will begin to run as of the date stated in the Notice to Proceed. However, the number of days beyond the original ten (10) Days it took to receive the properly executed Contract and related items may be deducted from the Contract Times.

2.6 Commencement of Contract Times; Notice to Proceed

A. The City will not issue a Notice to Proceed until after the Effective Date of the Contract. Work shall commence within ten (10) Days of the date stated in the Notice to Proceed. The Contract Times begin to run on the date specified in the Notice to Proceed. No Work shall be done at the Site prior to the issuance of the Notice to Proceed.

2.7 Copies of Documents

A. Contractor will be furnished, free of charge, five (5) copies of the Contract Documents. Additional copies may be obtained at cost of reproduction. Contractor shall maintain a clean, undamaged set of Contract Documents, including Submittals, at the Project site.

2.8 Substitution Requests, Schedule of Submittals, and Schedule

A. Substitution Requests. Within thirty-five (35) days of Contract award (unless otherwise specified in the Contract Documents), Contractor shall provide all substitution requests as further described in the General Conditions.

B. Schedule of Submittals. Within five (5) Days after the issuance of the Notice of Proceed (unless otherwise specified in the Contract Documents), Contractor shall submit to the City a Schedule of Submittals that conforms with the requirements of Section 00 72 00, Article 5.21.

C. Schedule. Within ten (10) days after the issuance of the Notice of Proceed (unless otherwise specified in the Contract Documents), the Contractor shall submit a construction schedule that conforms with the requirements of Section 00 72 00, Article 8.2.

2.9 Preconstruction Conference; Designation of Authorized Representatives.

A. Before any Work at the Site is started, a conference attended by the City, Contractor, Engineer, and others as appropriate will be held to establish a working understanding among the parties as to the Work and to discuss the schedules

referred to herein, procedures for handling Submittals and Shop Drawings, processing applications for payment, and maintaining required records.

B. At this conference the City and Contractor each shall designate, in writing, a specific individual to act as its authorized representative with respect to the services and responsibilities under the Contract. Such individuals shall have the authority to transmit instructions, receive information, render decisions relative to the Contract, and otherwise act on behalf of each respective party.

2.10 Subcontractor Mobilization Meeting.

A. Prior to the start of each major Subcontractor's Site Work, the Contractor, the involved Subcontractor, and Engineer shall attend a pre-start meeting to discuss the schedule, coordination, procedures, and other administrative issues.

2.11 Authority of Council; Engineer

A. The City Council has the final authority in all matters affecting the Work. Within the scope of the Contract, the Engineer has the authority to enforce compliance with the Contract Documents. The Contractor shall promptly comply with instructions from the Engineer.

B. The decision of the Engineer is final and binding on all questions relating to:

1. quantities;

2. acceptability of material, equipment, or work;

3. execution, progress or sequence of work;

4. interpretation of the Plans, Specifications, or other Contract Documents; and

5. Any other areas specifically identified in the Contract Documents or under the law.

C. Compliance with instructions from the Engineer shall be a condition precedent to any payment under the Contract, unless otherwise ordered by the City Council.

2.12 Mobilization

A. When a Bid item is included in the Bid Schedule for mobilization, the costs of Work in advance of construction operations and not directly attributable to any specific bid item will be included in the progress estimate. When no bid item is provided for mobilization payment for such costs will be deemed to be included in the other items of the Work.

B. Payment for mobilization based on the lump sum provided in the Bid Schedule, shall constitute full compensation for all such Work. No payment for mobilization will be made until all of the listed items have been completed to the satisfaction of the Engineer. The scope of the Work included under mobilization shall include, but shall not be limited to, the following principal items:

1. Obtaining and paying for all bonds, insurance, and permits.

2. Moving on to the Project Site of all Contractor's plant and equipment required for the first month's operations.

3. Installing temporary construction power, wiring, and lighting facilities, as applicable.

4. Establishing fire protection system, as applicable.

5. Developing and installing a construction water supply, as applicable.

6. Providing and maintaining the field office trailers for the Contractor, if necessary, and the Engineer (if specified), complete, with all specified furnishings and utility services.

7. Providing on-site sanitary facilities and potable water facilities as specified per Cal-OSHA and these Contract Documents.

8. Furnishing, installing, and maintaining all storage buildings or sheds required for temporary storage of products, equipment, or materials that have not yet been installed in the Work. All such storage shall meet manufacturer's specified storage requirements, and the specific provisions of the specifications, including temperature and humidity control, if recommended by the manufacturer, and for all security.

9. Arranging for and erection of Contractor's work and storage yard.

10. Posting all OSHA required notices and establishment of safety programs per Cal-OSHA.

11. Full-time presence of Contractor's superintendent at the job Site as required herein.

12. Submittal of construction schedule as required by the Contract Documents.

ARTICLE 3 -CONTRACT DOCUMENTS; INTENT

3.1 Examination of Drawings, Specifications, and Site of Work

A. Examination of Contract Documents; Site. Before commencing any portion of the Work, Contractor shall again carefully examine all applicable Contract Documents, the Project Site, and other information given to Contractor as to materials and methods of construction and other Project requirements. Contractor shall immediately notify the Engineer of any potential error, inconsistency, ambiguity, conflict, or lack of detail or explanation. If Contractor performs, permits, or causes the performance of any Work which is in error, inconsistent or ambiguous, or not sufficiently detailed or explained, Contractor shall bear any and all resulting costs, including, without limitation, the cost of correction. In no case shall the Contractor or any Subcontractor proceed with Work if uncertain as to the applicable requirements.

B. Additional Instructions. After notification of any error, inconsistency, ambiguity, conflict, or lack of detail or explanation, the Engineer will provide any required additional instructions, by means of drawings or other written direction, necessary for proper execution of Work.

C. Quality of Parts, Construction and Finish. All parts of the Work shall be of the best quality of their respective kinds and the Contractor must use all diligence to inform itself fully as to the required construction and finish.

D. Contractor's Variation from Contract Document Requirements. If it is found that the Contractor has varied from the requirements of the Contract Documents including the requirement to comply with all Applicable Laws, the Engineer may at any time, before or after completion of the Work, order the improper Work removed, remade or replaced by the Contractor at the Contractor's expense.

3.2 Intent of Contract Documents

A. The Contract Documents are complementary; what is required by any one will be binding as if required by all. It is the intent of the Contract Documents to describe a functionally complete Project (or part thereof) to be constructed in accordance with the Contract Documents. Any labor, documentation, services, materials, or equipment that reasonably may be inferred from the Contract Documents or from prevailing custom or trade usage as being required to produce the indicated result will be provided whether or not specifically called for, at no additional cost to the City.

B. The Contractor shall furnish, unless otherwise provided in the Contract Documents, all materials, implements, machinery, equipment, tools, supplies and labor necessary to the prosecution and completion of the Project.

C. Clarifications and interpretations of the Contract Documents shall be issued by the Engineer as provided in these General Conditions.

D. If utilities to equipment/fixtures are not shown but are necessary to operate the equipment/fixtures, the utilities service installation is considered to be part of the Work. The implied Work will conform to the appropriate sections of the Contract Documents.

E. Organization of the Contract Documents into divisions, sections, and articles, and arrangement of drawings shall not control the Contractor in dividing Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

3.3 Reference Standards.

A. Standards, Specifications, Codes, Laws, and Regulations.

1. Reference to federal specifications, federal standards, other standards, specifications, manuals, or codes of any technical society, organization, or association, or to Applicable Laws, whether such reference be specific or by implication, shall mean the standard, specification, manual, code, or Applicable Laws in effect at the time of opening of Bids (or on the Effective Date of the

Contract if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard, specification, manual, or code, or any instruction of a Supplier, shall be effective to change the duties or responsibilities of the City, Contractor, or any of their Subcontractors, consultants, agents, or employees, from those set forth in the Contract Documents. No such provision or instruction shall be effective to assign to the City, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility inconsistent with the provisions of the Contract Documents.

3.4 Reporting and Resolving Discrepancies; Order of Precedence.

A. Reporting Discrepancies.

1. The Contract Documents are intended to be fully cooperative and complementary. Before undertaking each part of the Work, Contractor shall carefully study and compare the Contract Documents and check and verify pertinent figures therein and all applicable field measurements. Contractor shall promptly report in writing to the City any conflict, error, ambiguity, or discrepancy which Contractor discovers, should have discovered, or has actual knowledge of, and shall obtain a written interpretation or clarification from the City before proceeding with any Work affected thereby. If, during the performance of the Work, Contractor discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents, or between the Contract Documents and (i) any Applicable Law, (ii) any standard, specification, manual, or code, or (iii) any instruction of any Supplier, then Contractor shall promptly submit a written Request for Information (RFI) to the City. Contractor shall not proceed with the Work affected thereby (except in an emergency) until an amendment or supplement to the Contract Documents has been issued by one of the methods indicated in the Contract Documents, and any Work performed by Contractor before receipt of an amendment or supplement shall be at Contractor's own risk.

B. Order of Precedence.

1. In case of conflicts between the Contract Documents, the order of precedence shall be as follows:

   a. Permits from other agencies as may be required by law

   b. Change Orders, most recent first

   c. Contract

   d. Addenda, most recent first

   e. Special Conditions

   f. Specifications

g. Construction Plans and Drawings(Contract Drawings)

h. General Conditions

i. Instructions to Bidders

j. Notice Inviting Bids

k. Contractor's Bid (Bid Forms)

l. Standard Specifications for Public Works Construction "Greenbook" latest edition (Sections 1-9 Excluded)

m. Applicable Local Agency Standards and Specifications

n. Standard Drawings

o. Reference Documents

2. With reference to the Drawings the order of precedence shall be as follows:

a. Figures govern over scaled dimensions

b. Detail drawings govern over general drawings

c. Addenda/Change Order drawings govern over Drawings

d. Contract Drawings govern over Standard Drawings

e. Contract Drawings govern over Shop Drawings

3. Notwithstanding the orders of precedence established above, in the event of conflicts, the higher standard, higher quality and most expensive shall always apply.

3.5 Amending and Supplementing Contract Documents.

A. The Contract Documents may be amended to provide for additions, deletions, and revisions in the Work or to modify the terms and conditions thereof only by Change Order or written amendment to the Contract duly executed by the parties.

B. The requirements of the Contract Documents may be supplemented, and minor variations and deviations in the Work may be authorized at no cost to the City, by one or more of the following ways:

1. The City's review of a Submittal, Shop Drawing, Sample or substitution request without exception (subject to the provisions of the Contract Documents); or

2. The City's issuance of a response to an RFI.

C. However, no review or RFI response will reduce or modify the Contractor's obligation to fully satisfy and comply with the requirements of the Contract Documents.

3.6 Reuse of Documents.

A. Contractor and any Subcontractor or Supplier shall not:

1. have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Engineer of Record or its consultants, including electronic media editions; or

2. reuse any such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of the City and Engineer of Record and specific written verification or adaptation by Engineer of Record.

B. The prohibitions of this Article will survive final payment, or termination of the Contract. Nothing herein shall preclude Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 4 -INDEMNIFICATION; INSURANCE

4.1 Indemnification

A. To the fullest extent permitted by law, Contractor shall immediately defend (with counsel of the City's choosing), indemnify and hold harmless the City, its officials, officers, agents, employees, and representatives, and each of them from and against:

1. Any and all claims, demands, causes of action, costs, expenses, injuries, losses or liabilities, in law or in equity, of every kind or nature whatsoever, but not limited to, injury to or death, including wrongful death, of any person, and damages to or destruction of property of any person, arising out of, related to, or in any manner directly or indirectly connected with the Work or this Contract, including claims made by subcontractors for nonpayment, including without limitation the payment of all consequential damages and attorney's fees and other related costs and expenses, however caused, regardless of whether the allegations are false, fraudulent, or groundless, and regardless of any negligence of the City or its officers, employees, or authorized volunteers (including passive negligence), except the sole negligence or willful misconduct or active negligence of the City or its officials, officers, employees, or authorized volunteers.

2. Contractor's defense and indemnity obligation herein includes, but is not limited to damages, fines, penalties, attorney's fees and costs arising from claims under the Americans with Disabilities Act (ADA) or other federal or state disability access or discrimination laws arising from Contractor's Work during the course of construction of the improvements or after the Work is complete, as the result of defects or negligence in Contractor's construction of the improvements.

3. Any and all actions, proceedings, damages, costs, expenses, fines, penalties or liabilities, in law or equity, of every kind or nature whatsoever, arising out of, resulting from, or on account of the violation of any governmental law or regulation, compliance with which is the responsibility of Contractor;

4. Any and all losses, expenses, damages (including damages to the Work itself), attorney's fees, and other costs, including all costs of defense which any of them may incur with respect to the failure, neglect, or refusal of Contractor to faithfully perform the Work and all of Contractor's obligations under Contract. Such costs, expenses, and damages shall include all costs, including attorney's fees, incurred by the indemnified parties in any lawsuit to which they are a party.

B. Contractor shall immediately defend, at Contractor's own cost, expense and risk, with the counsel of the City choosing, any and all such aforesaid suits, actions or other legal proceedings of every kind that may be brought or instituted against the City, its officials, officers, agents, employees and representatives. Contractor shall pay and satisfy any judgment, award or decree that may be rendered against the City, its officials, officers, employees, agents, employees and representatives, in any such suit, action or other legal proceeding. Contractor shall reimburse the City, its officials, officers, agents, employees and representatives for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. The only limitations on this provision shall be those imposed by Civil Code section 2782.

C. The provisions of this Article shall survive the termination of this Contract howsoever caused, and no payment, partial payment, or acceptance of occupancy in whole or part of the Work shall waive or release any of the provisions of this Article.

4.2 Insurance

The Contractor shall obtain, and at all times during performance of the Work of Contract, maintain all of the insurance described in this Article. Contractor shall not commence Work under this Contract until it has provided evidence satisfactory to the City that it has secured all insurance required hereunder. Contractor shall not allow any Subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Article. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Contract for cause. Contractor shall furnish the City with original certificates of insurance and endorsements effective coverage required by this Contract on forms satisfactory to the City. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms acceptable to the City. All certificates and endorsements must be received and approved by the City before Work commences.

A. **Additional Insureds; Waiver of Subrogation**. The City, its officials, officers, employees, agents and authorized volunteers shall be named as Additional Insureds on Contractor's All Risk policy and on Contractor's and its subcontractors' policies of Commercial General Liability and Automobile Liability insurance using, for Contractor's policy/ies of Commercial General Liability insurance, ISO CG forms 20 10 and 20 37 (or endorsements providing the exact same coverage, including completed operations), and, for subcontractors' policies of Commercial General Liability insurance, ISO CG form 20 38 (or endorsements providing the exact same coverage). Notwithstanding the minimum limits set forth in this Contract for any type of insurance coverage, all available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as Additional Insureds hereunder. All insurance coverage maintained or procured

pursuant to this Contract shall be endorsed to waive subrogation against the City, its officers, officials**,** agents, employees or volunteers or shall specifically allow Contractor - or others providing insurance evidence in compliance with these specifications - to waive their right of recovery prior to a loss. Contractor hereby waives its own right of recovery against the City, and shall require similar written express waivers and insurance clauses from each of its subcontractors. Copies of these waivers shall be submitted to the City prior to commencement of work.

B. **Workers' Compensation Insurance**. The Contractor shall provide workers' compensation insurance for all of the employees engaged in Work under this Contract, on or at the Site, and, in case of any sublet Work, the Contractor shall require the subcontractor similarly to provide workers' compensation insurance for all the latter's employees as prescribed by State law. Any class of employee or employees not covered by a subcontractor's insurance shall be covered by the Contractor's insurance. In case any class of employees engaged in work under this Contract, on or at the Site, is not protected under the Workers' Compensation Statutes, the Contractor shall provide or shall cause a subcontractor to provide, adequate insurance coverage for the protection of such employees not otherwise protected. The Contractor is required to secure payment of compensation to his employees in accordance with the provisions of section 3700 of the Labor Code. The Contractor shall file with the City certificates of his insurance protecting workers. Company or companies providing insurance coverage shall be acceptable to the City, if in the form and coverage as set forth in the Contract Documents.

C. **Employer's Liability Insurance**. Contractor shall provide Employer's Liability Insurance, including Occupational Disease, in the amount of at least one million dollars ($1,000,000.00) per person per accident. Contractor shall provide the City with a certificate of Employer's Liability Insurance. Such insurance shall comply with the provisions of the Contract Documents. The policy shall be endorsed, if applicable, to provide a Borrowed Servant/Alternate Employer Endorsement and contain a Waiver of Subrogation in favor of the City.

D. **Commercial General Liability Insurance**. Contractor shall provide "occurrence" form Commercial General Liability insurance coverage at least as broad as the most current ISO CGL Form 00 01, including but not limited to, premises liability, contractual liability, products/completed operations, personal and advertising injury which may arise from or out of Contractor's operations, use, and management of the Site, or the performance of its obligations hereunder. The policy shall not contain any exclusion contrary to this Contract including but not limited to endorsements or provisions limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 39); or (2) cross-liability for claims or suits against one insured against another. Policy limits shall not be less than $5,000,000 per occurrence for bodily injury, personal injury and property damage If Commercial General Liability Insurance or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to this project/location or the general aggregate limit shall be twice the required occurrence limit. Defense costs shall be paid in addition to the limits.

1. Such policy shall comply with all the requirements of this Article. The limits set forth herein shall apply separately to each insured against whom claims are made or

suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Contractor from liability in excess of such coverage, nor shall it limit Contractor's indemnification obligations to the City, and shall not preclude the City from taking such other actions available to the City under other provisions of the Contract Documents or law.

2. All general liability policies provided pursuant to the provisions of this Article shall comply with the provisions of the Contract Documents.

3. All general liability policies shall be written to apply to all bodily injury, including death, property damage, personal injury, owned and non-owned equipment, blanket contractual liability, completed operations liability, explosion, collapse, under-ground excavation, removal of lateral support, and other covered loss, however occasioned, occurring during the policy term, and shall specifically insure the performance by Contractor of that part of the indemnification contained in these General Conditions relating to liability for injury to or death of persons and damage to property.

4. If the coverage contains one or more aggregate limits, a minimum of 50% of any such aggregate limit must remain available at all times; if over 50% of any aggregate limit has been paid or reserved, the City may require additional coverage to be purchased by Contractor to restore the required limits. Contractor may combine primary, umbrella, and as broad as possible excess liability coverage to achieve the total limits indicated above. Any umbrella or excess liability policy shall include the additional insured endorsement described in the Contract Documents.

5. All policies of general liability insurance shall permit and Contractor does hereby waive any right of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss.

E. **Automobile Liability Insurance**. Contractor shall provide Automobile Liability Insurance at least as broad as ISO CA 00 01 (Any Auto) in the amount of, at least, two million dollars ($2,000,000) per accident for bodily injury and property damage. Such insurance shall provide coverage with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by Contractor or for which Contractor is responsible, in a form and with insurance companies acceptable to the City. All policies of automobile insurance shall permit and Contractor does hereby waive any right of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss.

F. **Builder's Risk ["All Risk"]**

1. It is the Contractor's responsibility to maintain or cause to be maintained Builder's Risk ["All Risk"] extended coverage insurance on all work, material, equipment, appliances, tools, and structures that are or will become part of the Work and subject to loss or damage by fire, and vandalism and malicious mischief, in an amount to cover 100% of the replacement cost. The City accepts no responsibility for the Work until the Work is formally accepted by the City. The Contractor shall

provide a certificate evidencing this coverage before commencing performance of the Work.

2. The named insureds shall be Contractor, all Subcontractors of any tier (excluding those solely responsible for design work), suppliers, and the City, its elected officials, officers, employees, agents and authorized volunteers, as their interests may appear. Contractor shall not be required to maintain property insurance for any portion of the Work following acceptance by the City.

3. Policy shall be provided for replacement value on an "all risk" basis. There shall be no coinsurance penalty provision in any such policy. Policy must include: (1) coverage for any ensuing loss from faulty workmanship, nonconforming work, omission or deficiency in design or specifications; (2) coverage against machinery accidents and operational testing; (3) coverage for removal of debris, and insuring the buildings, structures, machinery, equipment, materials, facilities, fixtures and all other properties constituting a part of the Project; (4) transit coverage, including ocean marine coverage (unless insured by the supplier), with sub-limits sufficient to insure the full replacement value of any key equipment item; and (5) coverage with sub-limits sufficient to insure the full replacement value of any property or equipment stored either on or off the Site. Such insurance shall be on a form acceptable to the City to ensure adequacy and sublimit.

4. In addition, the policy shall meet the following requirements:

a. Insurance policies shall be so conditioned as to cover the performance of any extra work performed under the Contract.

b. Coverage shall include all materials stored on site and in transit.

c. Coverage shall include Contractor's tools and equipment.

d. Insurance shall include boiler, machinery and material hoist coverage.

G. **Form and Proof of Carriage of Insurance**

1. Any insurance carrier providing insurance coverage required by the Contract Documents shall be admitted to and authorized to do business in the State of California unless waived, in writing, by the City's Risk Manager. Carrier(s) shall have an A.M. Best rating of not less than an A:VII. Insurance deductibles or self-insured retentions must be declared by the Contractor. At the election of the City the Contractor shall either 1) reduce or eliminate such deductibles or self-insured retentions, or 2) procure a bond which guarantees payment of losses and related investigations, claims administration, and defense costs and expenses. If umbrella or excess liability coverage is used to meet any required limit(s) specified herein, the Contractor shall provide a "follow form" endorsement satisfactory to the City indicating that such coverage is subject to the same terms and conditions as the underlying liability policy.

2. Each insurance policy required by this Contract shall be endorsed to state that: (1) coverage shall not be suspended, voided, reduced or cancelled except after thirty (30) days prior written notice by certified mail, return receipt requested, has been given to the City; and (2) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its officials, officers, agents, employees, and volunteers.

3. The Certificates(s) and policies of insurance shall contain or shall be endorsed to contain the covenant of the insurance carrier(s) that it shall provide no less than thirty (30) days written notice be given to the City prior to any material modification or cancellation of such insurance. In the event of a material modification or cancellation of coverage, the City may terminate the Contract or stop the Work in accordance with the Contract Documents, unless the City receives, prior to such effective date, another properly executed original Certificate of Insurance and original copies of endorsements or certified original policies, including all endorsements and attachments thereto evidencing coverage's set forth herein and the insurance required herein is in full force and effect. Contractor shall not take possession, or use the Site, or commence operations under this Contract until the City has been furnished original Certificate(s) of Insurance and certified original copies of endorsements or policies of insurance including all endorsements and any and all other attachments as required in this Article. The original endorsements for each policy and the Certificate of Insurance shall be signed by an individual authorized by the insurance carrier to do so on its behalf.

4. The Certificate(s) of Insurance, policies and endorsements shall so covenant and shall be construed as primary, and the City's insurance and/or deductibles and/or self-insured retentions or self-insured programs shall not be construed as contributory.

5. The City reserves the right to adjust the monetary limits and types of insurance coverages during the term of this Contract including any extension thereof if, in the City's reasonable judgment, the amount or type of insurance carried by the Contractor becomes inadequate.

6. Contractor shall report to the City, in addition to the Contractor's insurer, any and all insurance claims submitted by the Contractor in connection with the Work under this Contract.

7. Products/completed operations coverage shall extend a minimum of three years after the project completion. Coverage shall be included on behalf of the insured for covered claims arising out of the actions of independent contractors. If the insured is using subcontractors, the policy must include work performed "by or on behalf" of the insured. Policy shall contain no language that would invalidate or remove the insurer's duty to defend or indemnify for claims or suits expressly excluded from coverage. Policy shall specifically provide for a duty to defend on the part of the insurer. The City, its officers, officials, agents employees, and volunteers shall be included as insureds under the policy.

ARTICLE 5 -CONTRACTOR RESPONSIBILITIES; REGULATORY REQUIREMENTS

5.1 Applicable Laws

A. Contractor shall give all notices required by and shall comply with all Applicable Laws applicable to the performance of the Work. Except where otherwise expressly required by Applicable Laws, neither the City nor the City's Representative shall be responsible for monitoring Contractor's compliance with any Applicable Laws. If Contractor performs any Work knowing or having reason to know that it is contrary to Applicable Laws, Contractor shall bear all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work.

5.2 Permits and Licenses

A. Permits and licenses necessary for prosecution of the Work shall be secured and paid for by Contractor, including, but not limited to, excavation permit, for plumbing, mechanical and electrical work and for operations in or over public streets or right of way under jurisdiction of public agencies other than the City, unless otherwise specified in the Contract Documents.

B. The Contractor shall arrange and pay for all off-site inspection of the Work related to permits and licenses, including certification, required by the specifications, drawings, or by governing authorities, except for such off-site inspections delineated as the City's responsibility pursuant to the Contract Documents.

C. Before acceptance of the Work, the Contractor shall submit all licenses, permits, certificates of inspection and required approvals to the City.

5.3 Taxes

A. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid in accordance with the Applicable Laws of the place of the Project which are applicable during the performance of the Work. In accordance with Revenue and Taxation Code section 107.6, the Contract Documents may create a possessory interest subject to personal property taxation for which Contractor will be responsible.

5.4 Traffic Control

A. Traffic control plans, if required, shall be prepared at Contractor's expense. Traffic control shall be performed at Contractor's expense in accordance with the requirements of the City and/or the local agency with jurisdiction. Costs for traffic control plans, implementation of traffic control, or traffic signal services required by the City shall be included in the Contractor's Bid.

B. All warning signs and safety devices used by the Contractor to perform the Work shall conform to the requirements contained in the State of California, Department of Transportation's current edition of "Manual of Traffic Controls for Construction and Maintenance Work Zones" or to the requirements of the local agency. The Contractor

shall also be responsible for all traffic control required by the agency having jurisdiction over the Project on the intersecting streets. Contractor must submit a traffic control plan to the agency having jurisdiction over the Project for approval prior to starting Work.

C. The Contractor's representative on the site responsible for traffic control shall produce evidence that he/she has completed training acceptable to the California Department of Transportation for safety through construction zones. All of the streets in which the Work will occur shall remain open to traffic and one lane of traffic maintained at all times unless otherwise directed by the agency of jurisdiction. Businesses and residences adjacent to the Work shall be notified forty-eight (48) hours in advance of closing of driveways. The Contractor shall make every effort to minimize the amount of public parking temporarily eliminated due to construction in areas fronting businesses. No stockpiles of pipe or other material will be allowed in traveled right-of-ways after working hours unless otherwise approved by the Engineer.

5.5 Safety

A. Contractor shall be solely responsible for all safety precautions and programs in connection with the Work. Such responsibility does not relieve Subcontractors of their responsibility for the safety of persons or property in the performance of their work, nor for compliance with applicable safety laws. Contractor shall comply with all Applicable Laws relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection. Contractor shall notify owners of adjacent property and of Underground Facilities and other utility owners when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property.

B. The Contractor shall maintain emergency first aid treatment for his employees which complies with the Federal Occupational Safety and Health Act of 1970 (29 U.S.C. § 651 *et seq*.), and California Code of Regulations, Title 8, Industrial Relations Division 1, Department of Industrial Relations, Chapter 4. The Contractor shall ensure the availability of emergency medical services for its employees in accordance with California Code of Regulations, Title 8, Section 1512. The Contractor shall submit an Illness and Injury Prevention Program and a Project Site specific safety program to the City prior to beginning Work. Contractor shall maintain a confined space program that meets or exceeds the City's standards. Contractor needs to make themselves aware of the City's safety policies and procedures, and shall meet or exceed all City standards in areas where the City must enter to perform inspections.

C. Hazard Communication Programs. Contractor shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available to or exchanged between or among employers at the Site in accordance with Applicable Laws.

5.6 Hazardous Materials

A. The City shall not be responsible for any Hazardous Waste brought to the site by the Contractor. If the Contractor: (i) introduces and/or discharges a Hazardous Waste onto the site in a manner not specified by the Contract Documents; and/or (ii) disturbs a Hazardous Material identified in the Contract Documents, the Contractor shall hire a qualified remediation contractor at Contractor's sole cost to eliminate the condition as soon as possible. Under no circumstance shall the Contractor perform Work for which it is not qualified. The City, in its sole discretion, may require the Contractor to retain at Contractor's cost an independent testing laboratory.

B. If the Contractor encounters a Hazardous Waste which may cause foreseeable injury or damage, Contractor shall immediately: (i) secure or otherwise isolate such condition; (ii) stop all Work in connection with such material or substance (except in an emergency situation); and (iii) notify the City (and promptly thereafter confirm such notice in writing).

C. Subject to Contractor's compliance with this Article 5.6(B), the City shall verify the presence or absence of the Hazardous Waste reported by the Contractor, except as qualified under Article 5.6(A) and Article 5.6(B) in the event such material or substance is found to be present, verify that the levels of the hazardous material are below OSHA Permissible Exposure Levels and below levels which would classify the material as a state of California or federal hazardous waste. When the material falls below such levels, Work in the affected area shall resume upon direction by the City.

D. Contractor shall indemnify and hold harmless the City from and against claims, damages, losses and expenses, arising from a Hazardous Waste on the Project Site, if such Hazardous Waste exceeded OSHA Permissible Exposure Levels or levels which would classify the material as a state of California or federal hazardous waste, and was either i) shown on the Contract Documents or information available to bidders; or (ii) brought to the site by Contractor. Nothing in this paragraph shall obligate the Contractor to indemnify the City in the event of the sole or active negligence or willful misconduct of the City, its officers, agents, or employees.

5.7 Sanitary Facilities.

A. Contractor shall provide sanitary temporary toilet buildings and hand washing facilities for the use of all workers. All toilets and hand washing facilities shall comply with local codes and ordinances. Toilets shall be placed inside sealed secondary containment devices installed on a flat, level surface. Accumulated liquids in the secondary containment devices shall be properly removed and legally disposed without spillage onto the ground. Toilets shall be kept supplied with toilet paper and shall have workable door fasteners. Toilets and hand washing facilities shall be serviced no less than once weekly and shall be present in a quantity of not less than 1 per 20 workers as required by Cal/OSHA regulations. The toilets and hand washing facilities shall be maintained in a sanitary condition at all times. Use of toilet and hand washing facilities in the Work under construction shall not be permitted. Any other sanitary facilities required by Cal/OSHA shall be the responsibility of the Contractor.

5.8 Dust Control

A. Contractor, at its expense, shall maintain all excavations, embankments, haul roads, permanent access roads, plant sites, waste disposal areas, borrow areas, and all other work areas free from dust. Industry accepted methods of dust control suitable for the area involved, such as sprinkling, chemical treatment, light bituminous treatment or similar methods, will be permitted.

5.9 Air Pollution Control

A. Contractor shall comply with all air pollution control rules, regulations, ordinances and statutes. All containers of paint, thinner, curing compound, solvent or liquid asphalt shall be labeled to indicate that the contents fully comply with the applicable material requirements.

B. Without limiting the foregoing, Contractor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the Air Quality Management District with jurisdiction over the Project and/or California Air Resources Board (CARB). Contractor shall specifically be aware of the application of these limits and requirements to "portable equipment", which definition includes any item of equipment with a fuel-powered engine. Contractor shall indemnify the City against any fines or penalties imposed by the air quality management district, CARB, or any other governmental or regulatory agency for its violations of Applicable Laws as well as those of its subcontractors or others for whom Contractor is responsible under its indemnity obligations provided for in the Contract Documents.

5.10 Water Quality Management and Compliance

A. Storm, surface, ground, nuisance, or other waters may be encountered at various times during construction of the Work. The Contractor hereby acknowledges that it has investigated the risk arising from such waters, has prepared its Bid accordingly, and assumes any and all risks and liabilities arising therefrom.

B. Contractor shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Work including, without limitation, all applicable provisions regulating discharges of storm water; the Federal Water Pollution Control Act (33 U.S.C. § 13000 et seq.); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); and any and all regulations, policies, or permits issued pursuant to any such authority. These include, but are not limited to California State Water Resources Control Board Order Number 2009-0009-DWQ (NPDES Permit No. CAS000002), as amended by Order Numbers 2010-0014-DWQ, 2012-0006-DWQ, and any subsequent amendment to or renewal thereof, State Water Resources Control Board Order No. 2013-0001-DWQ (NPDES Order No. CAS000004), Santa Ana Regional Water Quality Control Board No. R8-2010-0036 (NPDES No. CAS618036), and any amendment or renewal thereof.

C. Contractor shall comply with all conditions of the State Water Resources Control Board ("State Water Board") National Pollutant Discharge Elimination System General Permit for Waste Discharge Requirements for Discharges of Storm Water Runoff Associated with Construction Activity ("Construction General Permit") for all construction activity which results in the disturbance of in excess of one acre of total land area or which is part of a larger common area of development or sale. Contractor shall comply with the lawful requirements of the City, and any other applicable municipality, drainage district, or other local agency with jurisdiction over the location where the Work is to be conducted, regarding discharges of storm water to separate storm drain systems or other watercourses under their jurisdiction, including applicable requirements in municipal storm water management programs.

D. Unless otherwise specified in the Special Conditions or other portion of the Contract Documents, the City has not prepared a Storm Water Pollution Prevention Plan ("SWPPP") or other storm water compliance plan for the Project Site. Contractor shall be responsible for filing the Notice of Intent ("NOI") and for obtaining coverage under the Construction General Permit. This includes filing all necessary documentation including the Permit Registration Documents ("PRDs") through the Stormwater Multiple Applications and Report Tracking System ("SMARTS"); preparing and implementing a SWPPP for the Work site; implementing all other provisions, and monitoring and reporting requirements required by the Construction General Permit; and providing a Qualified SWPPP Developer ("QSD") and Qualified SWPPP Practitioner ("QSP"), as necessary for all Work site activities, including but not limited to preparation and submittal of all reports, plans, inspections, and monitoring information in compliance with the Construction General Permit. All submittals shall be coordinated with the City's Legally Responsible Person and Authorized Signatory as those terms are defined in the Construction General Permit. Before any NOI, PRD, SWPPP, or other Construction General Permit-related document may be submitted to the State Water Board or implemented on the Project site, it must first be reviewed and approved by the City and/or City's designee. Contractor shall include all costs of compliance with specified requirements in the Contract Price.

E. The City retains the right to develop its own documentation for the Project site, including but not limited to the SWPPP, and in the alternative may require Contractor to adopt and implement portions of the City developed SWPPP. The City expressly reserves the right to procure coverage under the Construction General Permit for the Work site if Contractor fails to draft satisfactory PRDs or SWPPP or otherwise fails to proceed in a manner that complies with the requirements of the Construction General Permit. The City additionally reserves the right to hire additional contractors to maintain compliance at the Work site. Whether Contractor has adequately maintained compliance with the Construction General Permit shall be the City's sole determination. Any costs incurred by the City in procuring coverage under the Construction General Permit, or drafting and/or implementing a SWPPP for the Work site shall be paid by Contractor.

F. Notwithstanding the above, for those Work sites where construction activity results in the disturbance of less than one acre of total land area and/or do not need coverage under the Construction General Permit, the Contractor shall be responsible for preparing and implementing an Erosion and Sediment Control Plan

in accordance with State Water Resources Control Board Order No. 2013-0001-DWQ (NPDES Order No. CAS000004) and any amendment to or renewal thereof.

G. Failure to comply with the Construction General Permit, laws, regulations, and ordinances listed in this Article is a violation of federal and state law. Notwithstanding any other indemnity contained in these Contract Documents, Contractor agrees to indemnify and hold harmless the City, its officials, officers, agents, employees and authorized volunteers from and against any and all claims, demands, fees, costs, expenses, or losses or liabilities of any kind or nature which the City, its officials, officers, agents, employees and authorized volunteers may sustain or incur for noncompliance with the Permit, laws, regulations, and ordinances listed above, arising out of or in connection with the Work, except for liability resulting from the sole established negligence, willful misconduct or active negligence of the City, its officials, officers, agents, employees or authorized volunteers.

H. The City reserves the right to defend any enforcement action or civil action brought against the City for Contractor's failure to comply with any applicable water quality law, regulation, or policy. Contractor hereby agrees to be bound by, and to reimburse the City for the costs associated with, any settlement reached between the City and any relevant enforcement entity.

5.11 Environmental Quality Protection

A. The Contractor shall comply with all requirements of applicable federal, state, and local environmental rules and regulations. Any infractions of said rules and regulations by the Contractor during the term of the Contract, which result in penalties, will be the responsibility of the Contractor. The City operates under a number of environmental permits issued by various agencies. If due to an action, inaction, or negligence by the Contractor, the City becomes subject to non-compliance penalties, the cost of such penalties shall be borne by the Contractor.

B. The Contractor shall exercise care to preserve the natural landscape and vegetation, and shall conduct operations so as to prevent unnecessary destruction, scarring, or defacing of the natural surroundings in the vicinity of the Work. Movement of crews and equipment within the rights-of-way and over routes provided for access to the Work shall be performed in a manner to prevent damage to property. When no longer required, construction roads shall be restored to original contours. Upon completion of the Work, and following removal of construction facilities and required cleanup, land used for construction purposes and not required for the completed installation shall be scarified and regraded, as required, so that all surfaces are left in a condition that will facilitate natural revegetation, provide for proper drainage, and prevent erosion.

C. If, in the performance of the Work, evidence of the possible occurrence of any Federally listed threatened or endangered plant or animal is discovered, the Contractor shall notify the City Representative immediately, giving the location and nature of the findings. Written confirmation of the evidence, location and nature of the findings shall be forwarded to City within two (2) Days. The Contractor shall immediately cease all construction activities in the immediate area of the discovery to the extent necessary to protect the endangered plant or animal. If directed by the

City Representative, Contractor will refrain from working in the immediate area, suspend the Work in its entirety, or alter its performance to ensure full compliance with all applicable permits, laws and regulations. Any City directed changes to the Work as a result of a siting will be pursuant to the Contract Documents. Any costs or delays incurred by City or the Contractor due to unreasonable or false notification of an endangered plant or animal will be borne by the Contractor.

D. If, in the performance of the Work, Contractor should unearth cultural resources (for example, human remains, animal bones, stone tools, artifacts and/or midden deposits) through excavation, grading, watering or other means, the Contractor shall notify the construction/archeological monitor and/or the City Representative immediately, giving the location and nature of the findings. Written confirmation of the evidence, location and nature of the findings shall be forwarded to the construction/archeological monitor and/or City within two (2) Days. The Contractor shall immediately cease all construction activities in the immediate area of the discovery to the extent necessary to protect the cultural resource. If directed by the City Representative, Contractor will refrain from working in the immediate area, suspend the Work in its entirety, or re-sequence and/or alter its performance to ensure full compliance with all applicable permits, laws and regulations. Should the presence of cultural resources be confirmed, the Contractor will assist the City Representative and the construction/archeological monitor in the preparation and implementation of a data recovery plan. The Contractor shall provide such cooperation and assistance as may be necessary to preserve the cultural resources for removal or other disposition. Any City directed changes to the Work as a result of the cultural resource will be pursuant to the Contract Documents. Should Contractor, without permission, injure, destroy, excavate, appropriate, or remove any cultural resource on or adjacent to the Site, it will be subject to disciplinary action, arrest and penalty under applicable law. The Contractor shall be principally responsible for all costs of mitigation and/or restoration of cultural resources related to the unauthorized actions identified above. Contractor shall be required to pay for unauthorized damage and mitigation costs to cultural resources (historical and archeological resources) as a result of unauthorized activities that damage cultural resources and shall indemnify City pursuant to the Contract Documents.

5.12 Excessive Noise

A. Contractor shall use only such equipment on the Work and in such state of repair so that the emission of sound therefrom is within the noise tolerance level of that equipment as established by Cal/OSHA. Contractor shall comply with the most restrictive of the following: (1) local sound control and noise level rules, regulations and ordinances and (2) the requirements contained in these Contract Documents, including hours of operation requirements.

B. No internal combustion engine shall be operated on the Project without a muffler of the type recommended by the manufacturer. Should any muffler or other control device sustain damage or be determined to be ineffective or defective, the Contractor shall promptly remove the equipment and shall not return said equipment to the job until the device is repaired or replaced. Said noise and vibration level requirements shall apply to all equipment on the job or related to the job, including

but not limited to, trucks, transit mixers or transit equipment that may or may not be owned by the Contractor.

5.13 Diversion of Recyclable Waste Material

A. In compliance with the applicable City's waste reduction and recycling efforts, Contractor shall divert all Recyclable Waste Materials to appropriate recycling centers as required for compliance with the local jurisdiction's waste diversion ordinances. Contractor will be required to submit weight tickets and written proof of diversion with its monthly progress payment requests. Contractor shall complete and execute any certification forms required by the City or other applicable agencies to document Contractor's compliance with these diversion requirements. All costs incurred for these waste diversion efforts shall be the responsibility of the Contractor.

5.14 Inspector's Field Office.

A. If required by the City, the Contractor shall be responsible for providing the inspector's field office. The office shall be a substantial waterproof construction with adequate natural light and ventilation by means of stock design windows. Door shall have a key type lock or padlock clasp. The office shall have heating and air conditioning and shall be equipped with a telephone, a telephone answering machine, an ability to connect to the internet, and a fax machine at Contractor's expense. The field office shall be provided within 20 Days of the Notice to Proceed.

B. A table satisfactory for the study of plans and two chairs shall be provided by Contractor. Contractor shall provide and pay for adequate electric lights, local telephone service, and adequate heat and air conditioning for the field office until authorized removal.

5.15 Contractor's Supervision.

A. Contractor shall continuously keep at the Project site, a competent and experienced full-time Project superintendent acceptable to the City. Superintendent must be able to proficiently speak, read and write in English and shall have the authority to make decisions on behalf of the Contractor. Contractor shall continuously provide efficient supervision of the Project.

5.16 Workers.

A. Contractor shall at all times enforce strict discipline and good order among its employees. Contractor shall not employ on the Project any unfit person or any one not skilled in the Work assigned to him or her.

B. Any person in the employ of the Contractor whom the City may deem incompetent or unfit shall be dismissed from the Work and shall not be employed on this Project.

5.17 Independent Contractors.

A. Contractor shall be an independent contractor for the City and not an employee. Contractor understands and agrees that it and all of its employees shall not be considered officers, employees, or agents of the City and are not entitled to benefits

of any kind normally provided employees of the City, including but not limited to, state unemployment compensation or workers' compensation. Contractor assumes full responsibility for the acts and omissions of its employees or agents related to the Work.

5.18 Verification of Employment Eligibility.

A. By executing the Contract, Contractor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time, and shall require all subcontractors, sub-subcontractors and consultants to comply with the same. Each person executing this Contract on behalf of Contractor verifies that he or she is a duly authorized officer of Contractor and that any of the following shall be grounds for the City to terminate the Contract for cause: (1) failure of the Contractor or its Subcontractors, sub-subcontractors or consultants to meet any of the requirements provided for in this Article; (2) any misrepresentation or material omission concerning compliance with such requirements; or (3) failure to immediately remove from the Work any person found not to be in compliance with such requirements.

5.19 Labor.

A. Hours of Work

1. As provided in Article 3 (commencing at section 1810), Chapter 1, Part 7, Division 2 of the Labor Code, Contractor stipulates that eight (8) hours of labor shall constitute a legal day's work. The time of service of any worker employed at any time by the Contractor or by any subcontractor on any subcontract under this Contract upon the Work or upon any part of the Work contemplated by this Contract is limited and restricted to eight (8) hours during any one calendar day and 40 hours during any one calendar week, except as hereinafter provided. Notwithstanding the provisions herein above set forth, work performed by employees of Contractor in excess of eight (8) hours per day, and 40 hours during any one week, shall be permitted upon this public work upon compensation for all hours worked in excess of eight (8) hours per day at not less than one and one-half times the basic rate of pay.

2. The Contractor and every Subcontractor shall keep an accurate record showing the name of and actual hours worked each calendar day and each calendar week by each worker employed in connection with the Work or any part of the Work contemplated by this Contract. The record shall be kept open at all reasonable hours to the inspection of the City and to the Division of Labor Law Enforcement, Department of Industrial Relations of the State of California.

3. The Contractor shall pay to the City a penalty of twenty-five dollars ($25.00) for each worker employed in the execution of this Contract by the Contractor or by any subcontractor for each calendar day during which such worker is required or permitted to work more than eight (8) hours in any calendar day and 40 hours in any one calendar week in violation of the provisions of Article 3 (commencing at section 1810), Chapter 1, Part 7, Division 2 of the Labor Code.

4. Any work necessary to be performed after regular working hours, or on Saturdays and Sundays or other holidays, shall be performed without additional expense to the City.

5. If Contractor gives notice of an inspection pursuant to the Contract Documents, the City will provide inspection during normal working hours from 7:00 a.m. to 3:30 p.m. Monday through Friday. Requested inspections before or after this time will be charged to the Contractor as reimbursable inspection time. Inspections on weekends requires two (2) Days' notice for review and approval. Upon written request and approval the 8.5 hour working day may be changed to other limits subject to city/county ordinance.

6. It shall be unlawful for any person to operate, permit, use, or cause to operate any of the following at the Project Site, other than between the hours of 7:00 a.m. to 5:00 p.m., Monday through Friday, with no Work allowed on City-observed Holidays, unless otherwise approved by the City:

a. Powered Vehicles

b. Construction Equipment

c. Loading and Unloading Vehicles

d. Domestic Power Tools

B. Payroll Records; Labor Compliance

1. Pursuant to Labor Code section 1776, Contractor and all subcontractors shall maintain weekly certified payroll records, showing the names, addresses, Social Security numbers, work classifications, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by them in connection with the Work under this Contract. Contractor shall certify under penalty of perjury that records maintained and submitted by Contractor are true and accurate. Contractor shall also require Subcontractor(s) to certify weekly payroll records under penalty of perjury.

2. In accordance with Labor Code section 1771.4, the Contractor and each Subcontractor shall furnish the certified payroll records directly to the Department of Industrial Relations ("DIR") on the specified interval and format prescribed by the DIR, which may include electronic submission. Contractor shall comply with all requirements and regulations from the DIR relating to labor compliance monitoring and enforcement. The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4.

3. Any stop orders issued by the DIR against Contractor or any Subcontractor that affect Contractor's performance of Work, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay subject to any applicable liquidated

damages and shall not be compensable by the City. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Contractor or any Subcontractor.

4. The payroll records described herein shall be certified and submitted by the Contractor at a time designated by the City. The Contractor shall also provide the following:

a. A certified copy of the employee's payroll records shall be made available for inspection or furnished to such employee or his or her authorized representative on request.

b. A certified copy of all payroll records described herein shall be made available for inspection or furnished upon request of the DIR.

5. Unless submitted electronically, the certified payroll records shall be on forms provided by the Division of Labor Standards Enforcement ("DLSE") of the DIR or shall contain the same information as the forms provided by the DLSE.

6. Any copy of records made available for inspection as copies and furnished upon request to the public or any public agency, the City, the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement shall be marked or obliterated in such a manner as to prevent disclosure of an individual's name, address and social security number. The name and address of the Contractor awarded the Contract or performing the Contract shall not be marked or obliterated.

7. In the event of noncompliance with the requirements of this Article, the Contractor shall have ten (10) Days in which to comply subsequent to receipt of written notice specifying in what respects the Contractor must comply with this Article. Should noncompliance still be evident after such 10-day period, the Contractor shall pay a penalty of one hundred dollars ($100.00) to the City for each calendar day, or portion thereof, for each worker, until strict compliance is effectuated. Upon the request of the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement, such penalties shall be withheld from progress payment then due.

8. The responsibility for compliance with this Article shall rest upon the Contractor.

C. Prevailing Rates of Wages

1. The Contractor is aware of the requirements of Labor Code sections 1720 *et seq.* and 1770 *et seq.*, as well as California Code of Regulations, Title 8, Section 16000 *et seq.* ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on certain "public works" and "maintenance" projects. Since this Project involves an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and since the total compensation is $1,000 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. The Contractor shall obtain a copy of the prevailing rates of per diem wages at the commencement of this Contract from the website of the

Division of Labor Statistics and Research of the Department of Industrial Relations located at www.dir.ca.gov. In the alternative, the Contractor may view a copy of the prevailing rate of per diem wages which are on file at the City's Administration Office and shall be made available to interested parties upon request. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification, or type of worker needed to perform work on the Project available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the Project site. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and authorized volunteers free and harmless from any claims, liabilities, costs, penalties or interest arising out of any failure or allege failure to comply with the Prevailing Wage Laws.

2. The Contractor shall forfeit as a penalty to the City not more than Two Hundred Dollars ($200.00), pursuant to Labor Code section 1775, for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate as determined by the Director of the DIR for such work or craft in which such worker is employed for any public work done under the Contract by it or by any Subcontractor under it. The difference between such prevailing wage rate and the amount paid to each worker for each calendar day or portion thereof, for which each worker was paid less than the prevailing wage rate, shall be paid to each worker by the Contractor.

3. Contractor shall post, at appropriate conspicuous points on the Project Site, a schedule showing all determined general prevailing wage rates and all authorized deductions, if any, from unpaid wages actually earned.

D. Public Works Contractor Registration

1. Pursuant to Labor Code sections 1725.5 and 1771.1, the Contractor and its Subcontractors must be registered with the DIR prior to the execution of a contract to perform public works. By entering into this Contract, Contractor represents that it is aware of the registration requirement and is currently registered with the DIR. Contractor shall maintain a current registration for the duration of the Project. Contractor shall further include the requirements of Labor Code sections 1725.5 and 1771.1 in any subcontract and ensure that all Subcontractors are registered at the time this Contract is entered into and maintain registration for the duration of the Project. Notwithstanding the foregoing, the contractor registration requirements mandated by Labor Code Sections 1725.5 and 1771.1 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Sections 1725.5 and 1771.1.

E. Employment of Apprentices

1. Contractor and all Subcontractors shall comply with the requirements of Labor Code sections 1777.5 and 1777.6 in the employment of apprentices.

2. Information relative to apprenticeship standards, wage schedules, and other requirements may be obtained from the Director of Industrial Relations, ex officio the Administrator of Apprenticeship, San Francisco, California, or from the Division of Apprenticeship Standards and its branch offices.

3. Knowing violations of Labor Code section 1777.5 will result in forfeiture not to exceed one hundred dollars ($100.00) for each calendar day of non-compliance pursuant to Labor Code section 1777.7.

F. Nondiscrimination/Equal Employment Opportunity

1. Pursuant to Labor Code section 1735 and other applicable provisions of law, the Contractor and its Subcontractors shall not discriminate against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, or any other classifications protected by law on this Project. The Contractor will take affirmative action to insure that employees are treated during employment or training without regard to their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, or any other classifications protected by law.

G. Debarment of Contractors and Subcontractors

1. Contractors or Subcontractors may not perform work on a public works project with a subcontractor who is ineligible to perform work on a public project pursuant to Labor Code section 1777.1 or 1777.7. Any contract on a public works project entered into between a contractor and a debarred subcontractor is void as a matter of law. A debarred subcontractor may not receive any public money for performing work as a subcontractor on a public works contract. Any public money that is paid, or may have been paid to a debarred subcontractor by a contractor on the project shall be returned to the City. The Contractor shall be responsible for the payment of wages to workers of a debarred subcontractor who has been allowed to work on the Project.

5.20 Subcontracts.

A. Contractor agrees to bind every Subcontractor to the terms of the Contract Documents as far as such terms are applicable to Subcontractor's portion of the Work. Contractor shall be as fully responsible to the City for the acts and omissions of its subcontractors and of persons either directly or indirectly employed by its subcontractors, as Contractor is for acts and omissions of persons directly employed by Contractor. Nothing contained in these Contract Documents shall create any contractual relationship between any subcontractor and the City.

B. The City reserves the right to accept all subcontractors. The City's acceptance of any Subcontractor under this Contract shall not in any way relieve Contractor of its obligations in the Contract Documents.

C. Prior to substituting any Subcontractor listed in the Bid Forms, Contractor must comply with the requirements of the Subletting and Subcontracting Fair Practices Act pursuant to California Public Contract Code section 4100 et seq.

5.21 Progress Meetings

A. The Contractor shall schedule and hold regular progress meetings at least weekly and at other times as requested by Engineer or as required by progress of the Work. The Contractor, City, and all Subcontractors active on the Site shall attend each meeting. Contractor may at its discretion request attendance by representatives of its Suppliers, manufacturers, and other Subcontractors. The City will preside at the progress meetings and will arrange for keeping and distributing the minutes. The purpose of the meetings is to review the progress of the Work, maintain coordination of efforts, discuss changes in scheduling, and resolve other problems which may develop. During each meeting, the Contractor shall present any issues which may impact its progress with a view to resolve these issues expeditiously.

5.22 Submittals

A. Schedule of Submittals. Within five (5) Days after the Notice to Proceed (unless otherwise specified in the Contract Documents), Contractor will prepare and deliver a Schedule of Submittals to the City that has been fully integrated with the progress schedule and identifies each Submittal required by the Contract Documents as well as the date on which Contractor will deliver each Submittal to the City. Each Submittal must be delivered to the City at least thirty (30) Days prior to the date the material or equipment is scheduled to be incorporated into the Work. The Contractor is responsible for any schedule delays resulting from the Submittal process.

B. Submittal Procedures.

1. Contractor will follow the following procedures for each Submittal, Shop Drawing and Sample required by the Contract Documents:

   a. Submittals must be transmitted electronically.

   b. Transmittals will be sequentially numbered. Contractor to mark revised Submittals with original number and sequential alphabetic suffix.

   c. Each Submittal will identify the Project, Contractor, Subcontractor and Supplier, pertinent Drawing and detail number, and Specification Section number appropriate to Submittal.

   d. By transmitting a Submittal, Contractor certifies it has reviewed and approved each Submittal, verified products required, field dimensions, adjacent construction Work, and that coordination of information is according to requirements of the Work and Contract Documents.

   e. Identify variations in Contract Documents and product or system limitations that may differ and/or be detrimental to successful performance of completed Work.

   f. When Submittal is revised for resubmission, Contractor shall promptly address the City's comments and resubmit. Contractor shall identify changes made since previous submission.

g. The City's review of Shop Drawings shall not relieve Contractor from responsibility for deviations from the Contract Documents unless Contractor has, in writing, called the City's attention to such deviations at time of submission and the City has taken no exception to the deviation. The City's review of Shop Drawings shall not relieve Contractor from responsibility for errors in Shop Drawings.

h. Submittals not required by the Contract Documents or requested by the City will not be acknowledged or processed.

i. Incomplete Submittals will not be reviewed by the City. Delays resulting from incomplete Submittals are not the responsibility of the City.

j. Contractor shall not be entitled to any extension of the Contract Times as a result of the Submittal process.

k. Contractor shall allow a minimum of 20 working days for review of Submittals unless otherwise specified in the Contract Documents.

2. Where a Submittal, Shop Drawing or Sample is required by the Contract Documents or the Schedule of Submittals, any related Work performed prior to the City review and approval of the pertinent submittal will be performed at the sole risk and expense and responsibility of Contractor.

C. Schedule Milestone for Submittals. Contractor must submit all Submittals required by the Contract Documents in accordance with the Schedule of Submittals. If Contractor fails to submit the Submittals in accordance with the Schedule of Submittals, Contractor will be solely liable for any delays or impacts caused by the delayed Submittal, whether direct or indirect. Contractor will be liable for the time calculated from the date the Submittal is due until the date a compliant Submittal is made. A compliant Submittal will be one that is complete and satisfies the requirements of the Contract Documents.

5.23 Shop Drawings and Sample Submittal Procedures.

A. Before submitting each Shop Drawing or Sample, Contractor shall have:

1. Reviewed and coordinated each Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents;

2. Determined and verified all field measurements, quantities, dimensions, specified performance and design criteria, installation requirements, materials, catalog numbers, and similar information with respect thereto;

3. Determined and verified the suitability of all materials offered with respect to the indicated application, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work; and

4. Determined and verified all information relative to Contractor's responsibilities for means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incident thereto.

B. With each Submittal, Contractor shall give the City specific written notice of any variations that the Shop Drawing or Sample may have from the requirements of the Contract Documents. This notice shall be both a written communication separate from the Shop Drawings or Sample Submittal and, in addition, a specific notation made on each Shop Drawing or Sample submitted to the City for review and approval of each such variation.

C. Shop Drawings.

1. Data shown on the Shop Drawings will be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show the City the services, materials, and equipment Contractor proposes to provide and to enable the City to review the information for assessing conformance with information given and design concept expressed in Contract Documents.

2. When required by individual Specification sections, provide Shop Drawings signed and sealed by a professional engineer responsible for designing components shown on Shop Drawings. Shop Drawings must include signed and sealed calculations to support design in a form suitable for submission to and approval by authorities having jurisdiction.

3. Shop Drawings for steel structures shall consist of shop details, erection and other working Drawings showing details, dimensions, sizes of members and other information necessary for the complete fabrication and erection of the metal work.

4. Shop Drawings of concrete structures shall consist of such detailed drawings as may reasonably be required for the successful prosecution of the Work and which are not included in the Drawings furnished by the Engineer. These may include drawings for false work, bracing, centering and form work, masonry layout diagrams, and diagrams for bent reinforcement.

5. Contractor shall make revisions and provide additional information when required by authorities having jurisdiction.

D. Samples. Clearly identify each Sample as to material, Supplier, pertinent data such as catalog numbers, the use for which intended and other data as required to enable the City to review the submittal for assessing conformance with information given and design concept expressed in Contract Documents. Samples should be of appropriate size and detail to assess functional, aesthetic, color, texture, patterns and finish selection.

E. City's Review.

1. The City will review Shop Drawings and Samples in accordance with the Schedule of Submittals. The City's review and acceptance will be only to determine if the items covered by the Submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and be compatible

with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

2. The City review and approval will not extend to means, methods, techniques, sequences, or procedures of construction (except where a particular means, method, technique, sequence, or procedure of construction is specifically and expressly called for by the Contract Documents) or to safety precautions or programs incident thereto. The review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

3. The City's review and acceptance shall not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless the City has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample.

F. Resubmittal Procedures. Contractor shall make corrections required by the City and shall return corrected Shop Drawings and submit, as required, new Samples for review and approval. Contractor shall direct specific attention in writing to revisions other than the corrections called for by the City on previous Submittals.

5.24 Record ("As-Built") Drawings.

A. The Contractor shall maintain one record set of Contract Documents at the Site or digitally in an acceptable format. On these, it shall mark all Project conditions, locations, configurations, and any other changes or deviations which may vary from the information represented in the original Contract Documents, including buried or concealed construction and utility features which are revealed during the course of construction. Special attention shall be given to recording the horizontal and vertical location of all buried utilities that differ from the locations indicated, or which were not indicated on the Drawings. For all Projects involving the installation of any pipeline, Contractor shall survey and record the top of the pipe at a minimum of every 100 linear feet, and at each bend, recording both the horizontal and vertical locations. Said Drawings shall be supplemented by any detailed sketches as necessary or directed to fully indicate the Work as actually constructed. Any required as-built drawings of civil engineering elements of the Work shall be prepared by a registered civil engineer.

B. These master Record Drawings of the as-built conditions, including all revisions made necessary by Addenda and Change Orders, shall be maintained up-to-date during the progress of the Project. Red ink shall be used for alterations and notes. Notes shall identify relevant Change Orders by number and date. Record Drawings shall be accessible to the Engineer at all times during the construction period. Failure on the Contractor's part to keep Record Drawings current could result in withholding partial payment.

C. Upon completion of the Project and as a condition of final acceptance, the Contractor shall finalize and deliver a complete set of Record Drawings to the Engineers. The information submitted by the Contractor will be assumed to be correct, and the Contractor shall be responsible for, and liable to the City, for the accuracy of such information, and for any errors or omissions which may or may not appear on the Record Drawings.

D. Unless otherwise called for by the Contract Documents, the cost of all material, equipment, and labor required to complete the Record Drawings shall be included in Contractor's bid and distributed in the Bid Schedule. No additional compensation shall be made to the Contractor for this Work.

5.25 Layout and Field Engineering.

A. The Contractor shall utilize a properly licensed surveyor to perform all layout surveys required for the control and completion of the Work, and all necessary surveys to compute quantities of Work performed.

5.26 Separate Contracts and Cooperation.

A. Separate Contracts. The City reserves the right to let other contracts in connection with this Work or on the Project site. Contractor shall permit other contractors reasonable access and storage of their materials and execution of their work and shall properly connect and coordinate its Work with theirs. To ensure proper execution of its subsequent Work, Contractor shall immediately inspect work already in place and shall at once report to the Engineer any problems with the Work in place or discrepancies with the Contract Documents.

B. Cooperation. Contractor shall ascertain to its own satisfaction the scope of the Project and nature of any other contracts that have been or may be awarded by the City in prosecution of the Project to the end that Contractor may perform this Contract in the light of such other contracts, if any. Nothing herein contained shall be interpreted as granting to Contractor exclusive occupancy at site of the Project. Contractor shall not cause any unnecessary hindrance or delay to any other contractor working on the Project. If simultaneous execution of any contract for the Project is likely to cause interference with performance of some other contract or contracts, the Engineer shall decide which Contractor shall cease Work temporarily and which contractor shall continue or whether work can be coordinated so that contractors may proceed simultaneously. The City shall not be responsible for any damages suffered or for extra costs incurred by Contractor resulting directly or indirectly from award, performance, or attempted performance of any other contract or contracts on the Project Site.

5.27 Work Site.

A. Limitation of Use of Site and Other Areas. Rights-of-way, easements, or rights-of-entry for the Work will be provided by the City. Unless otherwise specified in the Special Provisions, the Contractor shall make arrangements, pay for, and assume all responsibility for acquiring, using, and disposing of additional work areas and facilities temporarily required. The Contractor shall indemnify and hold the City harmless from all claims for damages caused by such actions. Contractor shall confine construction equipment, the storage of materials and equipment, and the operations of workers to the Site and other areas permitted by Applicable Laws, and shall not unreasonably encumber the Site and other areas with construction equipment or other materials or equipment. Contractor shall assume full responsibility for any damage to any such land or area, or to City or occupant thereof, or of any adjacent land or areas resulting from the performance of the Work.

B. Site Maintenance. During the progress of the Work, Contractor shall keep the Site and other areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris shall conform to Applicable Laws. The Contractor shall furnish trash bins for all debris from construction. All debris shall be placed in trash bins daily. Forms and false-work that are to be re-used shall be stacked neatly concurrently with their removal. Forms and false-work that are not to be re-used shall be disposed of concurrently with their removal.

C. Cleaning. Prior to Completion of the Work, Contractor shall clean the Site and make it ready for utilization by the City. At the completion of the Work Contractor shall remove from the Site all tools, appliances, construction equipment and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

5.28 Utility Usage.

A. All temporary utilities, including but not limited to electricity, water, gas, and telephone, used on the Work shall be furnished and paid for by Contractor. Contractor shall provide necessary temporary distribution systems, including meters, if necessary, from distribution points to points on the Work where the utility is needed. Upon completion of the Work, Contractor shall remove all temporary distribution systems. Contractor shall provide necessary and adequate utilities and pay all costs for water, electricity, gas, oil, and sewer charges required for completion of the Work, including but not limited to startup and testing required in the Contract Documents. All permanent meters installed shall be listed in the Contractor's name until the Work is accepted. For Work to be performed in existing City facilities, Contractor may use the City's existing utilities, provided such use is reasonable under the circumstances. If Contractor uses the City utilities, it will not need to compensate the City for reasonably consumption of utilities, but Contractor will be responsible for any excessive, unreasonable or wasteful utility usage. Amounts due the City under this section may be deducted from progress payments.

5.29 Protection of Work and Property.

A. The Contractor shall digitally record video and take photographs of the Project site and adjacent improvements in a manner and quality that clearly depicts the existing condition of the Project Site and adjacent improvements immediately prior to the start of Work (minimum 1080p video and 4MP photo). All videos and photographs shall be date and time stamped. The Contractor shall submit the video and photos in digital format on a memory stick before the commencement of Work, along with a map outlining the route and locations of the videos and/or photographs. The Contractor shall be responsible for all damages to persons or property that occur as a result of the Work. Contractor shall be responsible for the proper care and protection of all materials delivered and Work performed until completion and final acceptance by the City. All Work shall be solely at the Contractor's risk.

B. Contractor shall adequately protect adjacent property from settlement or loss of lateral support as necessary. Contractor shall comply with all applicable safety laws and building codes to prevent accidents or injury to persons on, about, or adjacent

to the Project site where Work is being performed. Contractor shall erect and properly maintain at all times, as required by field conditions and progress of work, all necessary safeguards, signs, barriers, lights, and watchmen for protection of workers and the public, and shall post danger signs warning against hazards created in the course of construction.

C. Contractor shall provide such heat, covering, and enclosures as are necessary to protect all Work, materials, equipment, appliances, and tools against damage by weather conditions.

D. Contractor shall take adequate precautions to protect existing sidewalks, curbs, pavements, utilities, and other adjoining property and structures, and to avoid damage thereto, and Contractor shall repair any damage thereto caused by the Work operations. Contractor shall:

1. Enclose the working area with a substantial barricade, and arrange work to cause minimum amount of inconvenience and danger to the public.

2. Provide substantial barricades around any shrubs or trees indicated to be preserved.

3. Deliver materials to the Site over a route designated by the City.

4. Provide any and all dust control required and follow the applicable air quality regulations as appropriate. If the Contractor does not comply immediately with a notice from the City or a public agency responsible for air quality, the City shall have the authority to provide dust control and deduct the cost from payments to the Contractor.

5. Confine Contractor's apparatus, the storage of materials, and the operations of its workers to limits required by law, ordinances, permits, or directions of the City. Contractor shall not unreasonably encumber the Site with its materials.

6. Take care to prevent disturbing or covering any survey markers, monuments, or other devices marking property boundaries or corners. If such markers are disturbed by accident, they shall be replaced by a civil engineer or land surveyor acceptable to the City, at no cost to the City.

7. Ensure that existing facilities, fences and other structures are all adequately protected and that, upon completion of all Work, all facilities that may have been damaged are restored to a condition acceptable to the City.

8. Preserve and protect from injury all buildings, pole lines and all directional, warning and mileage signs that have been placed within the right-of-way.

9. At the completion of work each day, leave the Work and the Site in a clean, safe condition.

10. Comply with any stage construction and/or traffic handling plans. Access to residences and businesses shall be maintained at all times, except with the City's written approval. Any request for approval to reduce or restrict access to

residences and business must be submitted to the City at least seven (7) Days in advance, and the City may issue or withhold approval in its sole discretion.

E. These precautionary measures will apply continuously and not be limited to normal working hours. Full compensation for the work involved in the protection and preservation of life, safety and property as above specified shall be considered as included in the prices paid for the various contract items of Work, and no additional allowance will be made therefor.

F. Should damage to persons or property occur as a result of the Work, Contractor shall promptly notify the City, in writing. Contractor shall be responsible for proper investigation, documentation, including video or photography, to adequately memorialize and make a record of what transpired. The City shall be entitled to inspect and copy any such documentation, video, or photographs.

G. Contractor shall maintain all investigation documentation including video and/or photographs for a minimum of four (4) years following completion of the Project.

5.30 Emergencies.

A. In emergencies affecting the safety or protection of persons or the Work or Property at the Site or adjacent thereto, the Contractor, without special instruction or authorization from the City or the Engineer, is obligated to act to prevent threatened damage, injury or loss. The Contractor shall give the Engineer prompt written notice if the Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby.

ARTICLE 6 -MATERIALS; INSPECTION

6.1 Access to Work.

A. The City, Engineer, their consultants and other representatives and personnel, independent testing laboratories, and governmental agencies with jurisdictional interests will have access to the Site and the Work at reasonable times for their observation, inspection, and testing. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's safety procedures and programs.

6.2 Materials.

A. Except as otherwise specifically stated in the Contract Documents, Contractor shall provide and pay for all materials, labor, tools, equipment, water, lights, power, transportation, superintendence, temporary constructions of every nature, and all other services and facilities whatsoever necessary to execute and complete this Contract within the Contract Time. Unless otherwise specified, all materials, parts, and equipment furnished by the Contractor in the Work shall be new, the best of their respective kinds and grades as noted and/or specified, and workmanship shall be of good quality.

B. No materials, supplies, or equipment for Work under this Contract shall be purchased subject to any chattel mortgage or under a conditional sale or other

agreement by which an interest therein or in any part thereof is retained by the seller or supplier. Contractor warrants good title to all material, supplies, and equipment installed or incorporated in the Work and agrees upon completion of all work to deliver the Project, to the City free from any claims, liens, or charges.

C. Materials shall be furnished in ample quantities and at such times as to ensure uninterrupted progress of the Work and shall be stored properly and protected as required by the Contract Documents. Contractor shall be entirely responsible for damage or loss by weather or other causes to materials or Work. Materials shall be stored on the Project Site in such manner so as not to interfere with any operations of the City or any independent contractor.

D. Contractor shall verify all measurements, dimensions, elevations, and quantities before ordering any materials or performing any Work, and the City shall not be liable for Contractor's failure to so. Except for an adjustment to Unit Price Work for item overruns and underruns in accordance with the Contract Documents, no additional compensation, over and above payment for the actual quantities at the prices set out in the Bid Schedule, will be allowed because of differences between actual measurements, dimension, elevations and quantities and those indicated on the Plans and in the Specifications. Any difference therein shall be submitted to the Engineer for consideration before proceeding with the Work.

6.3 Test and Inspections.

A. Inspection and Testing of Work and Materials

1. If the Contract Documents, the Engineer, or any instructions, laws, ordinances, or public authority requires any part of the Work to be tested or approved, Contractor shall provide the Engineer at least two (2) working days' notice of its readiness for observation or inspection. If inspection is by a public authority other than the City, Contractor shall promptly inform the City of the date fixed for such inspection. Required certificates of inspection (or similar) shall be secured by Contractor. Costs for City testing and inspection shall be paid by the City. Costs of tests for Work found not to be in compliance shall be paid by the Contractor.

2. The Contractor shall pay for the cost of any minimum "show up" costs of a materials testing technician that was called for by the Contractor but ultimately the Contractor work was not ready for the inspection. Any such costs shall be deducted from any amounts due to the Contractor.

3. If any Work is done or covered up without the required testing or approval, the Contractor shall uncover or deconstruct the Work, and the Work shall be redone after completion of the testing at the Contractor's cost in compliance with the Contract Documents.

4. Where inspection and testing are to be conducted by an independent laboratory or agency, materials or samples of materials to be inspected or tested shall be selected by such laboratory or agency, or by the City, and not by Contractor. Unless otherwise stated and as provided by the Contract Documents, the City shall employ and pay for the services of an independent testing laboratory to perform

all inspections, tests, or approvals required by the Contract Documents. All tests or inspections of materials shall be made in accordance with the commonly recognized standards of national organizations.

5. Reexamination of Work may be ordered by the City. If so ordered, Work must be uncovered or deconstructed by Contractor. If Work is found to be in accordance with the Contract Documents, the City shall pay the costs of reexamination and reconstruction. If such work is found not to be in accordance with the Contract Documents, Contractor shall pay all costs.

B. Testing of Materials

1. In advance of manufacture of materials to be supplied by Contractor which must be tested or inspected, Contractor shall notify the City so that the City may arrange for testing at the source of supply. Any materials which have not satisfactorily passed such testing and inspection shall not be incorporated into the Work.

2. If the manufacture of materials to be inspected or tested will occur in a plant or location greater than sixty (60) miles from the City, the Contractor shall pay for any excessive or unusual costs associated with such testing or inspection, including but not limited to excessive travel time, standby time and required lodging.

3. Unless otherwise specified in the Special Provisions, all initial testing and a reasonable amount of retesting will be performed under the direction of the Engineer, and at no expense to the Contractor. The Contractor shall notify the Engineer in writing, at least 15 days in advance, of its intention to use materials for which tests are specified, to allow sufficient time to perform the tests. The notice shall name the proposed supplier and source of material. If the notice of intent to use is sent before the materials are available for testing or inspection, or is sent so far in advance that the materials on hand at the time will not last but will be replaced by a new lot prior to use on the Work, it will be the Contractor's responsibility to re-notify the Engineer when samples which are representative may be obtained.

4. A Certificate of Compliance shall be furnished to the Engineer prior to the use of any material or assembled material for which these Specifications so require or if so required by the Engineer. The Engineer may waive the materials testing requirements and accept a Certificate of Compliance. Material test data may be required by the Engineer to be included with the submittal. Materials used on the basis of a Certificate of Compliance may be sampled and tested at any time. The submission of a Certificate of Compliance shall not relieve the Contractor of responsibility for incorporating material into the Work which conforms to the requirements of the Contract Documents, and any material not conforming to the requirements will be subject to rejection by the Engineer whether in place or not.

5. Copies of mill certificates of composition and quality of all component materials (reinforcing steel, structural steel, lumber, etc.) incorporated in the construction of the Work shall be provided to the City at the time of delivery. City shall retain the right to reject any raw material not provided with a mill certificate at the time of delivery.

6. If, after incorporating such materials into the Work, it is found that sources of supply that have been approved do not furnish a uniform product, or if the product from any source proves unacceptable at any time, the Contractor shall furnish approved material from other approved sources. If any product proves unacceptable after improper storage, handling or for any other reason it shall be rejected, not incorporated into the Work, and shall be removed from the Project Site all at the Contractor's expense.

6.4 Requests for Substitutions.

A. For the purposes of this provision, the term "substitution" shall mean the substitution of any material, method or service substantially equal to or better in every respect to that indicated in the Standard Specifications or otherwise referenced herein.

B. Pursuant to Public Contract Code section 3400(b), the City may make a finding that is described in the Notice Inviting Bids that designates certain products, things, or services by specific brand or trade name.

C. Unless specifically designated in the Special Conditions, whenever any material, process, or article is indicated or specified by grade, patent, or proprietary name or by name of manufacturer, such specifications shall be deemed to be used for the purpose of facilitating the description of the material, process, or article desired and shall be deemed to be followed by the words "or equal." Contractor may, unless otherwise stated, offer for substitution any material, process, or article which may be substantially equal to or better in every respect to that so indicated or specified in the Contract Documents. However, the City has adopted uniform standards for certain materials, processes, and articles.

D. The Contractor shall submit substitution requests, together with substantiating data, for substitution of any "or equal" material, process, or article no later than thirty-five (35) calendar days after award of Contract. Provisions regarding submission of substitution requests shall not in any way authorize an extension of time for the performance of this Contract. If a substitution request is rejected by the City, the Contractor shall provide the material, method or service specified herein. The City shall not be responsible for any costs incurred by the Contractor associated with substitution requests. The burden of proof as to the equality of any material, process, or article shall rest with the Contractor. The Engineer has the complete and sole discretion to determine if a material, process, or article is substantially equal to or better than that specified and to approve or reject all substitution requests.

E. Substantiating data as described above shall include, at a minimum, the following information:

1. A signed affidavit from the Contractor stating that the material, process, or article proposed as a substitution is substantially equal to or better than that specified in every way except as may be listed on the affidavit.

2. Illustrations, specifications, catalog cut sheets, and any other relevant data required to prove that the material, process, or article is substantially equal to or better than that specified.

3. A statement of the cost implications of the substitution being requested, indicating whether and why the proposed substitution will reduce or increase the amount of the contract.

4. Information detailing the durability and lifecycle costs of the proposed substitution.

F. Failure to submit all the required substantiating data detailed above in a timely manner so that the substitution request can be adequately reviewed may result in rejection of the substitution request. The Engineer is not obligated to review multiple submittals related the same substitution request resulting from the Contractor's failure to initially submit a complete package.

G. Time limitations within this Article shall be strictly complied with and in no case will an extension of time for completion of the contract be granted because of Contractor's failure to provide substitution requests at the time and in the manner described herein.

H. The Contractor shall bear the costs of all the City work associated with the review of substitution requests.

I. If substitution requests approved by the Engineer require that Contractor furnish materials, methods or services more expensive than that specified, the increased costs shall be borne by Contractor.

ARTICLE 7 -SUBSURFACE AND PHYSICAL CONDITIONS; UTILITIES

7.1 Soils Investigations.

A. When a soils investigation report for the Site is available, such report is provided for informational purposes only. Any information obtained from such report as to subsurface soil condition, or to elevations of existing grades or elevations of underlying rock, is approximate only and is not guaranteed. Contractor acknowledges that any soils investigation report (including any borings) was prepared for purposes of design only and Contractor is required to examine the Site before submitting its Bid and must make whatever tests it deems appropriate to determine the condition of the so

7.2 Ownership of Site Materials Found.

A. The title to water, soil, rock, gravel, sand, minerals, timber and any other materials developed or obtained in the excavation or other operations of Contractor or any of its Subcontractors in the performance of the Contract, and the right to use said items in carrying out the Contract, or to dispose of same, is hereby expressly reserved by the City. Neither Contractor nor any of its Subcontractors nor any of their representatives or employees shall have any right, title, or interest in said materials, nor shall they assert or make any claim thereto. Contractor will, as determined by the City's Representative, be permitted to use in the Work without charge, any such materials which meet the requirements of the Contract Documents, provided the City shall have the right to use or consume these materials without payment to a third party.

7.3 Existence of Utilities at the Work Site.

A. Existing Utilities

1. The location of known existing utilities and pipelines are shown on the Plans in their approximate locations. However, nothing herein shall be deemed to require the City to indicate the presence of existing service laterals or appurtenances whenever the presence of such utilities on the site of the project can be inferred from the presence of other visible facilities, such as buildings, cleanouts, meter and junction boxes, on or adjacent to the Site of the Project.

2. The City will assume the responsibility for the timely removal, relocation, or protection of existing main or trunk line utility facilities located on the Project site if such utilities are not identified by the City in the Contract Documents or which cannot reasonably be inferred from the presence of other visible facilities.

B. Utility Location

1. It shall be the Contractor's responsibility to determine the exact location and depth of all utilities, including service connections, which have been marked by the respective utility owners and which the Contractor believes may affect or be affected by the Contractor's operations. The Contractor shall not be entitled to additional compensation nor time extensions for work necessary to avoid interferences nor for repair to damaged utilities if the Contractor does not expose all such existing utilities as required by this Article.

2. The locating of utilities shall be in conformance with Government Code Section 4216 et seq. except for the City's utilities located on the City's property and not on public right-of-way.

3. A "High Priority Subsurface Installation" is defined in Government Code Section 4216 (j) as "high-pressure natural gas pipelines with normal operating pressures greater than 415kPA gauge (60psig) or greater than six inches nominal pipe diameter, petroleum pipelines, pressurized sewage pipelines, high-voltage electric supply lines, conductors, or cables that have a potential to ground of greater than or equal to 60kv, or hazardous materials pipelines that are potentially hazardous to workers or the public if damaged."

4. A "Subsurface Installation" is defined in Government Code Section 4216 (s) as "any underground pipeline, conduit, duct, wire, or other structure, except nonpressurized sewer lines, nonpressurized storm drains, or other nonpressurized drain lines."

5. Pursuant to Government Code Section 4216.2 the Contractor shall contact the appropriate regional notification center at least two (2) working days but not more than 14 Days before performing any excavation. The date of the notification shall not count as part of the two-working-day notice. Before notifying the appropriate regional notification center, the Contractor shall delineate the area to be excavated. The Contractor shall request that the utility owners conduct a utility survey and mark or otherwise indicate the location of their service. The Contractor

shall furnish to the Engineer written documentation of its contact(s) with the regional notification center prior to commencing excavation at such locations.

6. After the utility survey is completed, the Contractor shall commence “potholing” or hand digging to determine the actual location of the pipe, duct, or conduit and in accordance with Government Code Section 4216.4 if the excavation within the “tolerance zone” of a subsurface installation. The Engineer shall be given notice prior to commencing potholing operations. The Contractor shall uncover all piping and conduits, to a point one (1) foot below the pipe, where crossings, interferences, or connections are shown on the Drawings, prior to trenching or excavating for any pipe or structures, to determine actual elevations. New pipelines shall be laid to such grade as to clear all existing facilities, which are to remain in service for any period subsequent to the construction of the run of pipe involved.

7. The Contractor's attention is directed to the requirements of Government Code Section 4216.2 (c) which provides: “When the excavation is proposed within 10 feet of a high priority subsurface installation, the operator of the high priority subsurface installation shall notify the excavator of the existence of the high priority subsurface installation to set up an onsite meeting prior to the legal excavation start date and time or at a mutually agreed upon time to determine actions or activities required to verify the location and prevent damage to the high priority subsurface installation. As part of the meeting, the excavator shall discuss with the operator the method and tools that will be used during the excavation and the information the operator will provide to assist in verifying the location of the subsurface installation. The excavator shall not begin excavating until after the completion of the onsite meeting.” The Contractor shall notify the Engineer in advance of this meeting.

C. Utility Relocation and Repair

1. If interferences occur at locations other than those indicated in the Contract Documents with reasonable accuracy, the Contractor shall notify the Engineer in writing. The Engineer will supply a method for correcting said interferences in accordance with the responsibilities of this section and Government Code Section 4215. To the extent any delay is caused thereby, Contractor shall submit a notice of delay within five (5) Days of discovery of the circumstances giving rise to the delay in accordance with Article 9.1 Change Orders and Time Extensions.

2. Care shall be exercised by the Contractor to prevent damage to adjacent existing facilities and public or private works; where equipment will pass over these obstructions, suitable planking shall be placed. If high priority subsurface installations are damaged and the operator cannot be contacted, the Contractor shall call 911 emergency services.

3. The City will compensate the Contractor for the costs of locating and repairing damage not due to the failure of the Contractor to exercise reasonable care, and for removing or relocating such main or trunk line utility facilities not indicated in the Contract Documents with reasonable accuracy, and for the cost of equipment on the Project necessarily idled during such work. The payment for such costs will be made as provided in Article 9.1 Change Orders and Time Extensions. The

Contractor shall not be assessed liquidated damages for delay in completion of the Project, when such delay is caused by the failure of the City or utility company to provide for removal or relocation of such utility facilities. Requests for extensions of time arising out of utility relocation or repair delays shall be filed in accordance with Article 9.1 Change Orders and Time Extensions and Article 9.3 Time for Completion and Liquidated Damages.

4. The public utility, where it is the owner of the affected utility, shall have the sole discretion to perform repairs or relocation work or permit the Contractor to do such repairs or relocation work at a reasonable price. The right is reserved to the City and the owners of utilities or their authorized agents to enter upon the Work area for the purpose of making such changes as are necessary for the rearrangement of their facilities or for making necessary connections or repairs to their properties. The Contractor shall cooperate with forces engaged in such work and shall conduct its operations in such a manner as to avoid any unnecessary delay or hindrance to the work being performed by such forces and shall allow the respective utilities time to relocate their facility.

5. When the Contract Documents indicate that a utility is to be relocated, altered or constructed by others, the City will conduct all negotiations with the utility company and the work will be done at no cost to the Contractor, unless otherwise stipulated in the Contract Documents.

6. Temporary or permanent relocation or alteration of utilities desired by the Contractor for its own convenience shall be the Contractor's responsibility and it shall make arrangements and bear all costs for such work.

D. Construction at Existing Utilities

1. Where the Work to be performed crosses or otherwise interferes with water, sewer, gas, or oil pipelines; buried cable; or other public or private utilities, the Contractor shall perform construction in such a manner so that no damage will result to either public or private utilities. It shall be the responsibility of the Contractor to determine the actual locations of, and make accommodates to maintain, all utilities.

2. Before any utility is taken out of service, permission shall be obtained by the Contractor from the owner. The owner, any impacted resident or business owner and the City Representative will be advised of the nature and duration of the utility outage as well as the Contractor's plan for providing temporary utilities if required by the owner. The Contractor shall be liable for all damage which may result from its failure to maintain utilities during the progress of the Work, and the Contractor shall indemnify City as required by the Contract Documents from all claims arising out of or connected with damage to utilities encountered during construction; damages resulting from disruption of service; and injury to persons or damage to property resulting from the negligent, accidental, or intentional breaching of utilities.

3. Unless otherwise called for by the Contract Documents, the cost of all material, equipment, and labor required to complete this work, shall be included in

Contractor's bid and distributed in the schedule of pay Items. No additional compensation shall be made to the Contractor for this work.

7.4 Trenches

A. Trenches Five Feet or More in Depth.

1. Contractor shall submit to the Engineer at the preconstruction meeting, a detailed plan showing the design of shoring, bracing, sloping or other provisions to be made for worker protection from hazards of caving ground during the excavation of any trench or trenches five feet or more in depth. If such plan varies from shoring system standards established by the Construction Safety Orders of the California Code of Regulations, Department of Industrial Relations, the plan shall be prepared by a California registered civil or structural engineer. The plan shall not be less effective than the shoring, bracing, sloping, or other provisions of the Construction Safety Orders, as defined in the California Code of Regulations. The Contractor shall designate in writing the "competent person" as defined in Title 8, California Code of Regulations, who shall be present at the Work Site each day that trenching/excavation is in progress. The "competent person" shall prepare and provide daily trenching/excavation inspection reports to the Engineer. Contractor shall also submit a copy of its annual California Occupational Safety and Health Administration (Cal/OSHA) trench/excavation permit.

B. Excavations Deeper than Four Feet.

1. If the Work involves excavating trenches or other excavations that extend deeper than four (4) feet below the surface, Contractor shall promptly within three (3) Days, and before the excavation is further disturbed, notify the City in writing of any of the following conditions:

a. Material that the Contractor believes may be material that is hazardous waste, as defined in section 25117 of the Health and Safety Code, that is required to be removed to a Class I, Class II, or Class III disposal site in accordance with provisions of existing law.

b. Subsurface or latent physical conditions at the site differing from those indicated.

c. Unknown physical conditions at the site of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract

2. The City shall promptly investigate the conditions, and if it finds that the conditions do so materially differ, or do involve hazardous waste, and cause a decrease or increase in Contractor's cost of, or the time required for, performance of any part of the Work, shall issue a Change Order under the procedures described in Article 9.1 Change Orders and Time Extensions.

3. In the event that a dispute arises between the City and the Contractor as to whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in the Contractor's cost of, or time required for, performance of any part of the Work, the Contractor shall not be excused from any scheduled completion date provided for by the Contract, but shall proceed with all Work to be

performed under the Contract. Contractor shall retain any and all rights provided either by contract or by law which pertain to the resolution of disputes and protests between the parties.

ARTICLE 8 -PROSECUTION OF THE WORK

8.1 Contractor's Means and Methods.

A. Contractor is solely responsible for the means and methods utilized to perform the Work. In no case shall the Contractor's means and methods deviate from commonly used industry standards.

8.2 Construction Schedule.

A. General Requirements. The schedule shall be prepared in a Critical Path Method ("CPM") format and in an electronic scheduling program acceptable to the City and as specified in the Contract Documents. Contractor shall deliver the schedule and all updates to the City in both paper and electronic form. The electronic versions shall be in the format and include all data used to prepare the schedule. Copies are not acceptable.

B. Schedule. The receipt or approval of any schedules by the City shall not in any way relieve the Contractor of its obligations under the Contract Documents. The Contractor is fully responsible to determine and provide for any and all staffing and resources at levels which allow for good quality and timely completion of the Project. Contractor's failure to incorporate all elements of Work required for the performance of the Contract or any inaccuracy in the schedule shall not excuse the Contractor from performing all Work required for a completed Project within the specified Contract Time. If the required schedule is not received by the time the first payment under the Contract is due, Contractor shall not be paid until the schedule is received, reviewed and accepted by the City.

C. Schedule Contents. The schedule shall allow enough time for inclement weather. The schedule shall indicate the beginning and completion dates of all phases of construction; critical path for all critical, sequential time related activities; and "float time" for all "slack" or "gaps" in the non-critical activities. The schedule shall include appropriate time allowances and constraints for submittals, items of interface with Work performed by others, and specified construction, start-up and performance tests. All float shall be owned by the Project. Schedules indicating early or late completion shall not modify or have any effect on the Contract Time, regardless of whether the schedules are reviewed and/or accepted by the City. For purposes of determining Liquidated Damages, the Contract Time shall control and may only be altered by a duly authorized Change Order.

D. Schedule Updates. Contractor shall continuously update its construction schedule. Contractor shall submit an updated and accurate construction schedule to the City: (1) prior to the start of construction, if there are any changes to the initial schedule; (2) with each progress payment request; and (3) whenever requested to do so by the City. The City may withhold progress payments or other amounts due under the Contract Documents if Contractor fails to submit an updated and accurate

construction schedule. Upon the City's request, Contractor shall submit any schedules or updates to the City in the native electronic format of the software used to create the schedule. Contractor shall also submit schedules showing a two-week detailed look-ahead at weekly meetings conducted with the City. The two-week look-ahead schedule shall clearly identify all staffing and other resources which in the Contractor's judgment are needed to complete the Work within the Contract Time, and it shall clearly state the number of staff to be used on each daily segment of the Work.

E. Acceptance. Acceptance of the schedules by the City will not impose on responsibility for accuracy, for sequencing, scheduling, or progress of the Work, or compliance with the Contract Documents. Acceptance will not interfere with or relieve Contractor from Contractor's full responsibility therefor.

F. Recovery Schedule.

1. Should any of the following conditions exist, City may require Contractor to prepare, at no extra cost to City, a plan of action and a recovery schedule for completing the Work and achieving all contractual milestones within the allotted Contract Time:

a. The Contractor's monthly progress report indicates delays that are, in the opinion of City, of sufficient magnitude that City questions the Contractor's ability to complete the Work;

b. The schedule shows the Contractor to be thirty (30) or more days behind the critical path at any time during construction;

c. The Contractor desires to make changes in the logic or the planned duration of future activities of the schedule which, in the opinion of City, are major in nature.

2. The recovery schedule shall include proposed revisions to the Construction Schedule, demonstrating how Contractor intends to achieve all contractual milestones including Contract completion within the allotted Contract Time. The submittal shall include a narrative describing the actions planned by the Contractor to recover the schedule.

3. Contractor shall submit the Recovery Schedule within seven (7) Days of City's request. If Contractor asserts that City is responsible for the delay, failure to submit the recovery schedule within seven (7) Days of City's request, will be considered a concurrent delay event attributable to Contractor, and Contractor shall only be entitled to non-compensable adjustments to Contract Times. If Contractor is responsible for the delay, this provision will not limit or affect Contractor's liability and failure to submit the recovery schedule with seven (7) Days of City's request may result in City withholding progress payments or other amounts due under the Contract Documents.

4. Contractor is responsible for all costs associated with the preparation and execution of the recovery schedule, including any necessary recovery actions, which may include, but are not limited to, assignment of additional labor, and/or equipment, shift or overtime work, expediting of submittals or deliveries,

overlapping of activities or sequencing changes to increase activity concurrence. Regardless of whether City directs Contractor to prepare a recovery schedule pursuant to this Section, Contractor shall promptly undertake appropriate action at no additional cost to City to recover the schedule whenever the current construction schedule shows that the Contractor will not achieve a milestone and/or complete the Work within the allotted Contract Time.

8.3 Time for Completion and Liquidated Damages

A. Time for Completion. The time for completion set forth in Article 2 of the Contract for Construction shall commence: (1) on the date stated in the Notice to Proceed, or (2) if the Notice to Proceed does not specify a commencement date, then on the date of the Notice to Proceed and shall be completed by Contractor in the time specified in the Contract Documents. The City is under no obligation to consider early completion of the Project; and the Contract completion date shall not be amended by the City's receipt or acceptance of the Contractor's proposed earlier completion date. Any difference in time between the Contractor's early completion and the Contract Time shall be considered a part of the Project float. Contractor shall not be entitled to compensation, and the City will not compensate Contractor, for delays which impact early completion. Contractor shall not, under any circumstances, receive additional compensation from the City (including but not limited to indirect, general, administrative or other forms of overhead costs) for the period between the time of earlier completion proposed by the Contractor and the Contract completion date.

B. Liquidated Damages. If the Work is not completed within the Contract Time(s), it is understood that the City will suffer damage. In accordance with Government Code section 53069.85 and Public Contract Code section 7102, being impractical and infeasible to determine the amount of actual damage, it is agreed that Contractor shall pay to the City as fixed and liquidated damages, and not as a penalty, the sum stipulated in the Contract for each calendar day of delay until the Work is fully completed. Contractor and its surety shall be liable for any liquidated damages. Any money due or to become due the Contractor may be retained to cover liquidated damages.

C. Inclement Weather. Contractor shall abide by the City's determination of what constitutes inclement weather. Time extensions for inclement weather shall only be granted when the Work stopped during inclement weather is on the critical path of the Project schedule. Contractor shall not be entitled to reverse liquidated damages for time extensions resulting from inclement weather.

D. Extension of Time. Contractor's entitlement to an extension of the Contract Time is limited to a City-caused extension of the critical path, reduced by the Contractor's concurrent delays, and established by a proper time impact analysis. Contractor shall not be charged liquidated damages because of any delays in completion of the Work due to unforeseeable causes beyond the control and without the fault or negligence of Contractor (or its Subcontractors or Suppliers). The City shall ascertain the facts and extent of delay and grant extension of time for completing the Work when, in its judgment, the facts justify such an extension. Contractor shall not be entitled to an adjustment in the Contract Times for delays within the control

of Contractor. Delays attributable to and within the control of a Subcontractor or Supplier shall be deemed to be delays within the control of Contractor.

E. Reverse Liquidated Damages. Consistent with Public Contract Code Section 7102, Contractor will be compensated for damages incurred due to unreasonable delays to the critical path for which the City is responsible. The parties agree that determining Contractor's exact delay damages are and will continue to be impracticable and extremely difficult. As such, for each calendar day in excess of the time for completion set forth in Article 2 of the Contract for Construction, the City shall pay to the Contractor the sum stipulated in the Contract per day. Such amount shall constitute the only payment allowed for any City-caused delays and shall necessarily include all overhead, all profits, all administrative costs, all bond costs, all labor, materials, equipment and rental costs and any other costs, expenses and fees incurred or sustained as a result of such delays. Contractor shall not be entitled to reverse liquidated damages for any change in the Work in which Contractor is compensated for overhead and profit through a change in Unit Price Work or a Change Order resulting in a lump sum or allowed mark-up for the additional Work. The amount of reverse liquidated damages shall be reduced by Contractor's concurrent delays.

F. Force Majeure. In accordance with subparagraphs "D" and "E" above, the Contractor shall not be charged liquidated damages, and the City shall not be responsible, for any delays resulting from a Force Majeure Event. If a delay to the critical path results from a Force Majeure Event, the Contractor will be entitled to a time extension but will not receive an adjustment to the Contract Price or any other compensation. Such a non-compensable adjustment shall be Contractor's sole and exclusive remedy for such delays.

G. No Damages for Reasonable Delay. The City's liability to Contractor for delays for which the City is responsible shall be limited to only an extension of time unless such delays were unreasonable under the circumstances. In no case shall the City be liable for any costs which are borne by the Contractor in the regular course of business, including, but not limited to, home office overhead and other ongoing costs. Damages caused by unreasonable City delay shall be based on actual costs only, no proportions or formulas shall be used to calculate any delay damages.

H. Procedure for Time Extensions and Delay Damages. Contractor shall not be entitled to any extension of time or any reverse liquidated damages unless Contractor properly notices the delay and adjustment to compensation and requests a Change Order in accordance with Article 9.1 Change Orders and Time Extensions. Contractor's failure to timely and fully comply with the Change Order procedures in the Contract Documents shall constitute a waiver of Contractor's right to a time extension or reverse liquidated damages.

8.4 Contractor's Responsibility for Work.

A. Until the acceptance of the Work by the Engineer as evidenced in writing, it shall be under the charge and care of the Contractor. The Contractor shall take every necessary precaution against injury or damage to any part thereof by the action of the elements or from any cause whether arising from the execution or non-execution

of the Work. The Contractor shall rebuild, repair, restore and make good at its own expense all injuries or damages to any portion of the Work before its completion and acceptance. In the event of damage proximately caused by an Act of God, as defined by Section 7105 of the Public Contract Code, the City will pay for repair or restoration to damaged Work in excess of 5% of the total Bid.

8.5 Occupancy.

A. The City reserves the right to occupy or utilize any portion of the Work at any time before completion, and such occupancy or use shall not constitute acceptance of any part of Work covered by this Contract. This use shall not relieve the Contractor of its responsibilities under the Contract.

8.6 Securities for Money Withheld

A. Pursuant to section 22300 of the Public Contract Code of the State of California, Contractor may request the City to make retention payments directly to an escrow agent or may substitute securities for any money withheld by the City to ensure performance under the contract. At the request and expense of Contractor, securities equivalent to the amount withheld shall be deposited with the City or with a state or federally chartered bank as the escrow agent who shall return such securities to Contractor upon satisfactory completion of the contract. Deposit of securities with an escrow agent shall be subject to a written agreement substantially in the form provided in section 22300 of the Public Contract Code.

8.7 The City's Right to Suspend/Terminate the Contract

A. Suspension of Work by the City

1. The City may, at its sole option, decide to suspend at any time the performance of all or any portion of the Work by notice in writing to Contractor. Such notice of suspension of Work will designate the amount and type of plant, labor, and equipment to be committed to the Project during the period of suspension. Contractor shall use its best efforts to utilize its plant, labor, and equipment in such a manner as to minimize costs associated with suspension.

2. Upon receipt of any such notice, Contractor shall, unless the notice requires otherwise:

a. Immediately discontinue Work on the date and to the extent specified in the notice;

b. Place no further orders or subcontracts for material, services, or facilities with respect to suspended Work other than to the extent required in the notice;

c. Promptly make every reasonable effort to obtain suspension upon terms satisfactory to the City's Representative of all orders, subcontracts, and rental agreements to the extent they relate to performance of Work suspended; and

d. Continue to protect and maintain the Work including those portions on which Work has been suspended.

3. Except as provided by this Article, as full and complete compensation for such suspension, Contractor shall be granted an adjustment in the Contract Price based on a negotiated daily rate that reflects the Contractor's actual costs associated with the demobilized condition of the Site and an extension of the Contract Times equal to the number of days performance of Work is suspended; provided, however, that no adjustment of Contract Price or extension of Contract Times shall be granted if the suspension results from Contractor's non-compliance with the requirements of the Contract.

B. Termination for Cause by the City:

1. In the sole estimation of the City, if the Contractor refuses or fails to prosecute the Work or any separable part thereof with such diligence as will insure its completion within the time specified by the Contract Documents, or any extension thereof, or fails to complete such Work within such time, or if the Contractor should be adjudged a bankrupt, or if it should make a general assignment for the benefit of its creditors, or if a receiver should be appointed on account of its insolvency, or the Contractor or any of its subcontractors should violate any of the provisions of this Contract, the City may serve written notice upon the Contractor and its surety of the City's intention to terminate this Contract. This notice of intent to terminate shall contain the reasons for such intention to terminate this Contract, and a statement to the effect that the Contractor's right to perform this Contract shall cease and terminate upon the expiration of ten (10) Days unless such violations have ceased and arrangements satisfactory to the City have been made for correction of said violations.

2. After expiration of the ten (10) Day period, the City may terminate the Contract by providing a Notice of Termination to the Contractor. The City may take over and complete the Work by any method it may deem appropriate, including enforcement of the Project performance bond. Contractor and its surety shall be liable to the City for any excess costs or other damages incurred by the City to complete the Work. If the City takes over the Work, the City may, without liability for so doing, take possession of and utilize in completing the Work such materials, appliances, plant, and other property belonging to the Contractor as may be on the Site.

3. Upon termination, Contractor shall not be entitled to receive any further payment from the City, except for Work which was duly performed prior to the effective date of the Notice of Termination. Contractor shall submit an invoice for final payment within thirty (30) Days of the effective date of the Notice of Termination. The City may withhold from final payment up to 150% of any disputed amounts, including any amounts which may be necessary to repair defective Work, complete unfinished Work, or are otherwise occasioned by Contractor's failure to perform its duties under the Contract.

C. Termination for Convenience by the City:

1. The City may terminate performance of the Work called for by the Contract Documents in whole or, from time to time, in part, upon ten (10) Days written notice if the City determines that a termination is in the City's interest.

2. The Contractor shall terminate all or any part of the Work upon delivery to the Contractor of a Notice of Termination specifying that the termination is for the convenience of the City, the extent of termination, and the effective date of such termination.

3. After receipt of Notice of Termination, and except as directed by the City's Representative, the Contractor shall, regardless of any delay in determining or adjusting any amounts due under this termination for convenience clause, immediately proceed with the following obligations:

a. Stop Work as specified in the Notice.

b. Complete any Work specified in the Notice of Termination in a least cost/shortest time manner while still maintaining the quality called for under the Contract Documents.

c. Leave the property upon which the Contractor was working and upon which the facility (or facilities) forming the basis of the Contract Document is situated in a safe and sanitary manner such that it does not pose any threat to the public health or safety.

d. Terminate all subcontracts to the extent that they relate to the portions of the Work terminated.

e. Place no further subcontracts or orders, except as necessary to complete the continued portion of the Contract.

f. Submit to the City's Representative, within ten (10) Days from the effective date of the Notice of Termination, all of the usual documentation called for by the Contract Documents to substantiate all costs incurred by the Contractor for labor, materials and equipment through the effective date of the Notice of Termination. Any documentation substantiating costs incurred by the Contractor solely as a result of the City's exercise of its right to terminate this Contract pursuant to this clause, which costs the contractor is authorized under the Contract documents to incur, shall: (1) be submitted to and received by the Engineer no later than 30 Days after the effective date of the Notice of Termination; (2) describe the costs incurred with particularity; and (3) be conspicuously identified as “Termination Costs occasioned by the City's Termination for Convenience.” If the City rejects any costs, Contractor shall be deemed to waive the rejected costs unless Contractor files a Claim within thirty (30) Days of the rejection pursuant to Article 9.2.

g. Contractor shall be entitled to receive only the amounts payable under this Article, and Contractor specifically waives any claim for any other amounts or damages, including, but not limited to, any claim for consequential damages or lost profits. The provisions in this Article are in addition to and not in limitation of any other rights or remedies available to the City.

4. Termination of the Contract shall not relieve surety of its obligation for any just claims arising out of or relating to the Work performed.

5. Notwithstanding any other provision of this Article, when immediate action is necessary to protect life and safety or to reduce significant exposure or liability, the City may immediately order Contractor to cease Work on the Project until such

safety or liability issues are addressed to the satisfaction of the City or the Contract is terminated.

6. If the City terminates Contractor for cause, and if it is later determined that the termination was wrongful, such default termination shall automatically be converted to and treated as a termination for convenience. In such event, Contractor shall be entitled to receive only the amounts payable under this section, and Contractor specifically waives any claim for any other amounts or damages, including, but not limited to, any claim for consequential damages or lost profits.

8.8 Completion and Acceptance of Work

A. Final Inspection. Upon written notice from Contractor that the entire Work is complete, the Engineer will promptly make a final inspection with the City and Contractor and will notify Contractor in writing of all particulars in which this inspection reveals that the Work is incomplete or defective. Contractor shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

B. Final Acceptance. The acceptance of the Work on behalf of the City will be made by the Engineer. Such acceptance by the City shall not constitute a waiver of defects. After Contractor has, in the opinion of the Engineer, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, bonds, certificates or other evidence of insurance, certificates of inspection, Record Documents, and other documents required by the Contract Documents, the City shall execute a Notice of Completion, constituting final acceptance and completion of the Project, except as may be expressly noted.

8.9 Warranty and Guaranty of Work.

A. Contractor hereby warrants that materials and Work shall be completed in conformance with the Contract Documents and that the materials and Work provided will fulfill the requirements of this Warranty. Contractor hereby agrees to repair or replace, at the discretion of the City, any or all Work that may prove to be defective in its workmanship, materials furnished, methods of installation or fail to conform to the Contract Document requirements together with any other Work which may be damaged or displaced by such defect(s) within a period of one (1) year (or as otherwise indicated in the Contract Documents or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the Work, whichever is later) from the date of the Notice of Completion of the Project without any expense whatever to the City, ordinary wear and tear and unusual abuse and neglect excepted. Contractor shall be required to promptly repair or replace defective equipment or materials, at Contractor's option. All costs associated with such corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor.

B. For any Work so corrected, Contractor's obligation hereunder to correct defective Work shall be reinstated for an additional one (1) year period, commencing with the

date of acceptance of such corrected Work. The reinstatement of the one (1) year warranty shall apply only to that portion of work that was corrected. Contractor shall perform such tests as the City may require to verify that any corrective actions, including, without limitation, redesign, repairs, and replacements comply with the requirements of the Contract. In the event of Contractor's failure to comply with the above-mentioned conditions within ten (10) Days after being notified in writing of required repairs, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming Work and any work damaged by such work or the replacement or correction thereof at Contractor's sole expense. Contractor shall be obligated to fully reimburse the City for any expenses incurred hereunder immediately upon demand.

C. In addition to the warranty set forth in this Article, Contractor shall obtain for the City all warranties that would be given in normal commercial practice and assign to the City any and all manufacturer's or installer's warranties for equipment or materials not manufactured by Contractor and provided as part of the Work, to the extent that such third-party warranties are assignable and extend beyond the warranty period set forth in this Article. Contractor shall furnish the City with all warranty and guarantee documents prior to final acceptance of the Project by the City as required.

D. When specifically indicated in the Contract Documents or when directed by the Engineer, the City may furnish materials or products to the Contractor for installation. In the event any act or failure to act by Contractor shall cause a warranty applicable to any materials or products purchased by the City for installation by the Contractor to be voided or reduced, Contractor shall indemnify the City from and against any cost, expense, or other liability arising therefrom, and shall be responsible to the City for the cost of any repairs, replacement or other costs that would have been covered by the warranty but for such act or failure to act by Contractor.

E. The Contractor shall remedy at its expense any damage to City-owned or controlled real or personal property.

F. The City shall notify the Contractor, in writing, within a reasonable time after the discovery of any failure, defect, or damage. The Contractor shall within ten (10) Days after being notified commence and perform with due diligence all necessary Work. If the Contractor fails to promptly remedy any defect or damage, the City shall have the right to replace, repair or otherwise remedy the defect, or damage at the Contractor's expense.

G. In the event of any emergency constituting an immediate hazard to health, safety, property, or licensees, when caused by Work of the Contractor not in accordance with the Contract requirements, the City may undertake at Contractor's expense, and without prior notice, all Work necessary to correct such condition.

H. Acceptance of Defective Work.

1. If, instead of requiring correction or removal and replacement of defective Work, the City prefers to accept it, the City may do so. Contractor shall pay all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration

or other dispute resolution costs) attributable to the City's evaluation of and determination to accept such defective Work and for the diminished value of the Work. If any acceptance of Defective Work occurs prior to release of the Project retention, a Change Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work, and the City shall be entitled to an appropriate decrease in the Contract Price, reflecting the diminished value of Work and all costs incurred by the City. If the acceptance of defective occurs after release of the Project retention, an appropriate amount will be paid by Contractor to the City.

I. The City May Correct Defective Work

1. If Contractor fails within a reasonable time after written notice from the City to correct Defective Work, or to remove and replace rejected Work as required by the City, or if Contractor fails to perform the Work in accordance with the Contract Documents, or if Contractor fails to comply with any other provision of the Contract Documents, the City may, after seven (7) Days written notice to Contractor, correct, or remedy any such deficiency.

2. In connection with such corrective or remedial action, the City may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, take possession of Contractor's tools, appliances, construction equipment and machinery at the Site, and incorporate in the Work all materials and equipment stored at the Site or for which the City has paid Contractor but which are stored elsewhere. Contractor shall allow the City, and the agents, employees, other contractors, and consultants of each of them, access to the Site to enable the City to exercise the rights and remedies to correct the Defective Work.

3. All claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) incurred or sustained by the City correcting the Defective Work will be charged against Contractor, and a Change Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work; and the City shall be entitled to an appropriate decrease in the Contract Price. Such claims, costs, losses and damages will include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of defective Work.

4. If the Change Order is executed after all payments under the Contract have been paid by the City and the Project Retention is held in an escrow account as permitted by the Contract Documents, Contractor will promptly alert the escrow holder, in writing, of the amount of Retention to be paid to the City. If the Change Order is executed after release of the Project retention, an appropriate amount will be paid by Contractor to the City. Contractor shall not be allowed an extension of the Contract Times because of any delay in the performance of the Work attributable to the City correcting Defective Work.

J. Nothing in the warranty or in the Contract Documents shall be construed to limit the rights and remedies available to the City at law or in equity, including, but not limited to, Code of Civil Procedure section 337.15.

ARTICLE 9 -CHANGE ORDERS; DISPUTE RESOLUTION

9.1 Change Orders and Time Extensions

All changes to the Contract, including compensation increases and time extensions, shall be through a written Change Order in accordance with this Article. The City, without invalidating the Contract, may order changes in the Work consisting of additions, deletions or other revisions, and Contractor's compensation and the time for completion shall be adjusted accordingly. Whenever any change is made as provided for herein, such change shall be considered and treated as though originally included in the Contract, and shall be subject to all terms, conditions, and provisions of the original Contract. Contractor shall not be entitled to claim or bring suit for damages, whether for loss of profits or otherwise, on account of any decrease or omission of any item or portion of Work to be done. No dispute, disagreement, or failure of the parties to reach agreement on the terms of the Change Order shall relieve the Contractor from the obligation to proceed with performance of the Work, including Additional Work, promptly and expeditiously. Any alterations, extensions of time, Additional Work, or any other changes may be made without securing consent of the Contractor's surety or sureties.

A. Change in Contract Procedures

1. City Directive. The City may direct changes in the Work by delivering a written directive. To the extent the work directive results in a change to compensation or time, Contractor must timely request a Change Order and comply with all Change Order procedures in accordance with this Article. Notwithstanding issuance of a work directive, Contractor's failure to timely request a Change Order shall constitute a waiver by Contractor of any adjustment to compensation or time extension for Work performed under the directive. The City shall not be liable to Contractor for Work performed or omitted by Contractor in reliance on verbal orders.

2. Contractor's Notice of Change/Delay. If Contractor intends to initiate a Change Order Request, then Contractor shall provide the City with written notice of the underlying facts and circumstances that gave rise to the proposed change within the following times:

a. If due to unknown subsurface or latent physical conditions, within three (3) Days from the discovery date or prior to the alterations of the conditions, whichever is earlier.

b. If due to a Force Majeure Event, as soon as reasonably practicable under the conditions, which shall be no longer than three (3) Days from the date the Contractor discovers that the Force Majeure Event gives rise to a change, unless that the conditions are such that notice within three (3) Days is not possible or practicable.

c. If due to any other matter that may involve an adjustment to the Contract Time or the Contract Price, within seven (7) days from the discovery date.

To be considered valid and complete, the notice of change/delay shall include a general statement of the circumstances giving rise to the notice of change/delay and a reasonable order of magnitude estimate of the additional costs and/or time. If the circumstances give rise to both a cost adjustment and time extension, Contractor shall submit the notice of change and notice of delay concurrently.

3. Request for Change in Compensation and/or Extension of Time. Contractor shall submit a Change Order Request for any adjustment to Contractor's compensation and/or any extension of time. The Change Order Request shall be made prior to incurring any expense and within fourteen (14) Days from either Contractor's notice of change/delay or the City's directive ordering the change. The Change Order Request shall include all of the following information (unless inapplicable to the change):

a. A detailed description of the circumstances giving rise to the request;

b. A complete itemized cost proposal, including itemized pricing for first tier Subcontractors;

c. Supporting documentation for all costs;

d. A time impact analysis showing the impact of the delay to the critical path to completion;

e. If any added costs or information cannot be determined at the time of the Change Order Request, the reason the costs or information cannot be determined at the time; and

f. Certification to the accuracy of the Change Order Request under penalty of perjury.

The time impact analysis shall be in the critical path method format and shall show the sequencing of all critical and non-critical new activities and/or activity revisions affected by the delay, with logic ties to all affected existing activities noted on the schedule.

The City may demand, and Contractor shall provide, any additional information supporting the Change Order Request, including but not limited to native electronic format version of schedules and time impact analyses. Contractor shall provide the requested additional information within five (5) Days of the request.

For any costs or information that cannot be determined at the time Contractor submits the Change Order Request, Contractor shall submit to the City notice of the costs or information and all supporting documentation within five (5) Days of when the costs or other information become subject to determination.

4. City's Final Decision on Change Order; Ordered Changes. If the City denies the Change Order Request or disagrees with the proposal submitted by Contractor, it will notify the Contractor, and the City will provide its opinion of the appropriate price and/or time extension. If no agreement can be reached, the City shall have the right to order the Work performed on a time and materials basis or to issue a unilateral Change Order setting forth the City's determination of the reasonable additions or savings in costs and time attributable to the extra or deleted work. The City shall also have the right to order changes in the Work to be performed

promptly by the Contractor on a time and materials basis or to issue a unilateral Change Order setting forth the City's determination of the reasonable additions or savings in costs and time attributable to the extra or deleted work. The City's determination shall become final and binding if the Contractor fails to submit a Claim in writing to the City within fourteen (14) Days of the issuance of the unilateral Change Order, disputing the terms of the unilateral Change Order and providing such supporting documentation for its position as the City may reasonably require.

5. Contractor's Waiver of Further Relief. **CONTRACTOR'S FAILURE TO PROVIDE A COMPLETE AND TIMELY NOTICE OF CHANGE/DELAY AND/OR CHANGE ORDER REQUEST, OR TO COMPLY WITH ANY OTHER REQUIREMENT OF THIS ARTICLE, SHALL CONSTITUTE A WAIVER BY CONTRACTOR OF THE RIGHT TO A CONTRACT ADJUSTMENT ON ACCOUNT OF SUCH CIRCUMSTANCES AND A WAIVER OF ANY RIGHT TO FURTHER RECOURSE OR RECOVERY BY REASON OF OR RELATED TO SUCH CHANGE BY MEANS OF THE CLAIMS DISPUTE RESOLUTION PROCESS OR BY ANY OTHER LEGAL PROCESS OTHERWISE PROVIDED FOR UNDER APPLICABLE LAWS.**

   Contractor recognizes and acknowledges that timely submission of a formal written notice of change/delay and Change Order Request, whether or not the circumstances of the change may be known to the City or available to the City through other means, is not a mere formality but is of crucial importance to the ability of the City to promptly identify, prioritize, evaluate and mitigate the potential effects of changes. Any form of informal notice, whether verbal or written (including, without limitation, statements in requests for information, statements in Submittals, statements at any job meeting or entries on monthly reports, daily logs or job meeting minutes), that does not strictly comply with the formal requirements of this Article, shall accordingly be insufficient.

6. Change Order Format

a. A Change Order signed by the Contractor indicates the Contractor's agreement therewith, including any adjustment in compensation or extension of time, and the full and final settlement of all costs (direct, indirect and overhead) related to the Work authorized by the Change Order.

b. The City may designate the forms to be used for notices, requests, and Change Orders. If so designated, Contractor may only use such forms. Contractor shall not reserve a right to assert impact costs, extended job site costs, extended overhead, constructive acceleration and/or actual acceleration beyond what is stated in the Change Order. No Claims shall be allowed for impact, extended overhead costs, constructive acceleration and/or actual acceleration due to a multiplicity of changes and/or clarifications. The Contractor may not change or modify the City's Change Order form in an attempt to reserve additional rights.

B. Determining Adjustments to Compensation.

1. Limitation on Costs. Contractor shall not be entitled to any compensation for Work subject to a Change Order except as expressly set forth in this Article. The mark-up added in instances of Additional Work shall constitute the entire amount of profit, any mark-ups, any field or home office overhead costs, including personnel, equipment or office space, any materials, or any costs of equipment idle time for such Work.

2. Unit Price Change Orders. When the actual quantity of a Unit Price Work item varies from the Bid Schedule, compensation for the change in quantity will be calculated by multiplying the actual quantity by the unit price. This calculation may result in either an additive or deductive Change Order. Bid items included on the Bid Schedule may be deducted from the Work in their entirety without any negotiated extra costs. Because Unit Price Work includes overhead and profit as determined by Contractor at the time of its Bid submission, no mark up or deduction for overhead and profit will be allowed.

3. Lump Sum Change Orders. Whenever possible, any changes affecting compensation shall be in a lump sum mutually agreed by the Contractor and the City.

4. Time and Materials Change Orders. The City may direct the Contractor to proceed with the Additional Work with payment to be made on the basis of actual cost of the labor and materials required to complete the Additional Work. If the Project is federally funded, a time and materials Change Order shall only be issued after a determination that no other Change Order is suitable and the Change Order shall include a ceiling price that the Contractor exceeds at its own risk.

5. Federally Funded Projects. For any change in price to the Contract, general and administrative expenses shall be negotiated and must conform to the cost principles set forth under at 2 C.F.R. Part 200, subpart E, and profit shall be negotiated as a separate element of the cost. To establish a fair and reasonable profit, consideration must be given to the complexity of the Additional Work to be performed, the risk borne by the Contractor, the Contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

6. Allowed Costs. Estimates for lump sum quotations and accounting for time-and-material work shall be limited to direct expenditures necessitated specifically by the change and shall be segregated as follows:

a. Labor. The costs of labor will be the actual cost for wages prevailing locally for each craft or type of worker at the time the Additional Work is done, plus employer payments of payroll taxes and insurance, health and welfare, pension, vacation, apprenticeship funds, and other direct costs resulting from federal, state or local laws, as well as assessment or benefits required by lawful collective bargaining agreements. The use of a labor classification which would increase the Additional Work cost will not be permitted unless the Contractor establishes the necessity for such additional costs. Labor costs for equipment operators and helpers shall be reported only when such costs are not included in the invoice for equipment rental.

b. Materials. The cost of materials reported shall be at the lowest current price at which such materials are locally available in the quantities involved, plus sales tax, freight and delivery. Materials costs shall be based upon supplier or manufacturer's invoice.

c. Tool and Equipment Use. Regardless of ownership, the rates to be used in determining equipment use shall not exceed listed rates prevailing locally at equipment rental agencies, or distributors, at the time the work is performed. The Contractor shall furnish cost data supporting the establishment of the rental rate. The rental rate to be applied for use of each items of equipment shall be the rate resulting in the least total cost to the City for the total period of use. The City shall the make the final determination as to an equitable rental rate for the equipment. No payment will be made for the use of small tools, which have a replacement value of $1,000 or less.

(i) The rental time to be paid for equipment shall be the time the equipment is in productive operation on the Additional Work being performed. Rental time will not be allowed while equipment is inoperative due to breakdowns.

(ii) All equipment shall, in the opinion of the City, be in good working condition and suitable for the purpose for which the equipment is to be used. Equipment with no direct power unit shall be powered by a unit of at least the minimum rating recommended by the manufacturer.

(iii) Before construction equipment is used on any Additional Work, the Contractor shall plainly stencil or stamp an identifying number thereon at a conspicuous location, and shall furnish to the City, in duplicate, a description of the equipment and its identifying number.

(iv) When hourly rates are listed, any part of an hour less than 30 minutes of operation shall be considered to be 1/2-hour of operation, and any part of an hour greater than 30 minutes will be considered one hour of operation. When daily rates are listed, any part of a day less than 4 hours operation shall be considered to be 1/2-day of operation.

d. Allowed Mark-up. The allowed mark-up for any and all overhead (including supervision and home and field office costs) and profit on work added to the Contract shall be determined in accordance with the following provisions:

(i) "Net Cost" is defined as the actual costs of labor, materials and tools and equipment only, excluding overhead and profit. The costs of applicable insurance and bond premium will be reimbursed to the Contractor and Subcontractors at cost only, without mark-up. Contractor shall provide the City with documentation of the costs, including but not limited to payroll records, invoices, and such other information as the City may reasonably request.

(ii) For Work performed by the Contractor's forces the allowed mark-up shall not exceed fifteen (15%) percent of labor costs, ten percent (10%) of material costs, and ten percent (10%) of the cost of tools and equipment use.

(iii) For Work performed by a Subcontractor, the added cost for overhead and profit shall not exceed fifteen percent (15%) of the Subcontractor's Net Cost of the Work

to which the Contractor may add up to five percent (5%) of the Subcontractor's Net Cost.

(iv) For Work performed by a sub-subcontractor, the added cost for overhead and profit shall not exceed fifteen percent (15%) of the sub-subcontractor's Net Cost for Work to which the Subcontractor and Contractor may each add up to an additional five percent (5%) of the Net Cost of the lower tier subcontractor.

(v) No additional mark-up will be allowed for lower tier subcontractors, and in no case shall the added cost for overhead and profit payable by the City exceed twenty-five percent (25%) of the Net Cost as defined herein, of the party that performs the Work.

(vi) Calculation of the mark-up will be subject to the limitations above and to calculation as further detailed in (b)(B)(5) above.

e. Documentation of Time-and-Material Costs.

(i) T&M Daily Sheets. Contractor must submit timesheets, materials invoices, records of equipment hours, and records of rental equipment hours to the City's for an approval signature each day that Work is performed on a time-and-material basis. The Engineer's signature on time sheets only serves as verification that the Work was performed and is not indicative of the City's agreement to Contractor's entitlement to the cost.

(ii) T&M Summary Sheet. Contractor shall submit a T&M Summary Sheet, which shall include total actual costs, within five (5) Days following completion of Additional Work on a time-and-material basis. Contractor's total actual cost shall be presented in a summary table in an electronic spreadsheet file by labor, material, equipment, and any other costs, along with documentation supporting the costs. Contractor's failure to submit the T&M Summary Sheet within five (5) Days of completion of the Additional Work will result in Contractor's waiver for any reimbursement of any costs associated with the Additional Work.

f. Excluded Costs. The following costs or any other home or field office overhead costs, all of which are to be considered administrative costs covered by the Contractor's mark-up, shall not be allowed costs and shall not be included in any lump sum proposals or time-and-materials invoices:

(i) Overhead Cost. Payroll costs and other compensation of Contractor's officers, executives, principals, general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, timekeepers, clerks, and other personnel employed by Contractor whether at the Site or in Contractor's principal office or any branch office, material yard, or shop for general administration of the Work;

(ii) Office Expenses. Expenses of Contractor's principal and branch offices;

(iii) Capital Expenses. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Additional Work and charges against Contractor for delinquent payments;

(iv) Negligence. Costs due to the negligence of Contractor or any Subcontractor or Supplier, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including without limitation the correction of Defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property;

(v) Small Tools. Cost of small tools valued at less than $1,000 and that remain the property of Contractor;

(vi) Administrative Costs. Costs associated with the preparation of Change Orders (whether or not ultimately authorized), cost estimates, or the preparation or filing of Claims;

(vii) Anticipated Lost Profits. Expenses of Contractor associated with anticipated lost profits or lost revenues, lost income or earnings, lost interest on earnings, or unpaid retention;

(viii) Home Office Overhead. Costs derived from the computation of a "home office overhead" rate by application of the *Eichleay, Allegheny*, burden fluctuation, or other similar methods;

(ix) Special Consultants and Attorneys. Costs of special consultants or attorneys, whether or not in the direct employ of Contractor, employed for services specifically related to the resolution of a Claim, dispute, or other matter arising out of or relating to the performance of the Additional Work.

(x) Other. Other overhead or general expense costs of any kind and the cost of any item not specifically and expressly included in the Contract Documents; including but not limited to: submittals, drawings, field drawings, shop drawings, including submissions of drawings; field inspection; general superintendence; computer services; reproduction services; salaries of project engineer, superintendent, timekeeper, storekeeper, and secretaries; janitorial services; small tools, incidentals and consumables; temporary on-site facilities (offices, telephones, high speed internet access, plumbing, electrical power, lighting; platforms, fencing, water); surveying; estimating; protection of work; handling and disposal fees; final cleanup; other incidental work; related warranties; insurance and bond premiums.

(xi) Compliance with Federal Cost Principles. If the Project is federally funded, any costs that are not allowable, reasonable and allocable to the Project, under generally accepted accounting principles and the applicable federal requirements.

9.2 Procedure for Resolving Claims.

Contractor shall timely comply with any and all requirement of the Contract Documents pertaining to notices and requests for changes to the Contract Time or Contract Price, including but not limited to all requirements of Article 9.1, as a prerequisite to filing any claim governed by this Article. The failure to timely submit a notice of delay or notice of change, or to timely request a change to the time for completion or Contractor's compensation, or to timely provide any other notice or request required herein shall constitute a waiver of the right to further pursue the claim under the Contract or at law.

A. Intent. Effective January 1, 1991, Section 20104 et seq., of the California Public Contract Code prescribes a process utilizing informal conferences, non-binding judicial supervised mediation, and judicial arbitration to resolve disputes on construction claims of $375,000 or less. Effective January 1, 2017, Section 9204 of the Public Contract Code prescribes a process for negotiation and mediation to resolve disputes on construction claims. The intent of this Article is to implement Sections 20104 et seq. and Section 9204 of the California Public Contract Code. This Article shall be construed to be consistent with all applicable law, including but not limited to these statutes.

B. Claims. For purposes of this Article, "Claim" means a separate demand by the Contractor for:

1. An adjustment to the time for completion including, without limitation, for relief from damages or penalties for delay assessed by the City;

2. Payment by the City of money or damages arising from Work done by or on behalf of the Contractor pursuant to the Contract, payment for which is not otherwise expressly provided or to which the Contractor is not otherwise entitled; or

3. An amount the payment of which is disputed by the City.

A "Claim" does not include any demand for payment for which the Contractor has failed to provide notice, request a Change Order, or otherwise failed to follow any procedures contained in the Contract Documents.

C. Filing Claims. Claims governed by this Article may not be filed unless and until the Contractor completes any and all requirements of the Contract Documents pertaining to notices and requests for changes to the Contract Time or Contract Price, and Contractor's request for a change has been denied in whole or in part. Claims governed by this Article must be filed no later than thirty (30) Days after a request for change has been denied in whole or in part or after any other event giving rise to the Claim. The Claim shall be submitted in writing to the City and shall include on its first page the following words in 16 point capital font: "THIS IS A CLAIM." The Claim shall include the all information and documents necessary to substantiate the Claim, including but not limited to those identified below. Nothing in this Article is intended to extend the time limit or supersede notice requirements otherwise provided by Contract Documents. Failure to follow such contractual requirements shall bar any Claims or subsequent proceedings for compensation or payment thereon.

D. **Documentation.** The Contractor shall submit all Claims in the following format:

1. Summary description of Claim including basis of entitlement, merit and amount of time or money requested, with specific reference to the Contract Document provisions pursuant to which the Claim is made

2. List of documents relating to Claim:

a. Specifications

b. Drawings

c. Clarifications (Requests for Information)

d. Schedules

e. Other

3. Chronology of events and correspondence

4. Narrative analysis of Claim merit

5. Analysis of Claim cost, including calculations and supporting documents

6. Time impact analysis in the form required by the Contract Documents or, if the Contract Documents do not require a particular format, CPM format, if an adjustment of the Contract Time is requested

E. City's Response. Upon receipt of a Claim pursuant to this Article, the City shall conduct a reasonable review of the Claim and, within a period not to exceed 45 Days, shall provide the Contractor a written statement identifying what portion of the Claim is disputed and what portion is undisputed. Any payment due on an undisputed portion of the Claim will be processed and made within 60 Days after the City issues its written statement.

1. If the City needs approval from its governing body to provide the Contractor a written statement identifying the disputed portion and the undisputed portion of the Claim, and the City's governing body does not meet within the 45 Days or within the mutually agreed to extension of time following receipt of a Claim sent by registered mail or certified mail, return receipt requested, the City shall have up to three (3) Days following the next duly publicly noticed meeting of the City's governing body after the 45-Day period, or extension, expires to provide the Contractor a written statement identifying the disputed portion and the undisputed portion.

2. Within 30 Days of receipt of a Claim, the City may request in writing additional documentation supporting the Claim or relating to defenses or Claims the City may have against the Contractor. If additional information is thereafter required, it shall be requested and provided pursuant to this subdivision, upon mutual agreement of the City and the Contractor. The City's written response to the Claim, as further documented, shall be submitted to the Contractor within 30 Days (if the Claim is less than $50,000, within 15 Days) after receipt of the further documentation, or within a period of time no greater than that taken by the Contractor in producing the additional information or requested documentation, whichever is greater.

F. Meet and Confer. If the Contractor disputes the City's written response, or the City fails to respond within the time prescribed, the Contractor may so notify the City, in writing, either within 15 Days of receipt of the City's response or within 15 Days of the City's failure to respond within the time prescribed, respectively, and demand in writing an informal conference to meet and confer for settlement of the issues in

dispute. Upon receipt of a demand, the City shall schedule a meet and confer conference within 30 Days for settlement of the dispute.

G. Mediation. Within 10 business days following the conclusion of the meet and confer conference, if the Claim or any portion of the Claim remains in dispute, the City shall provide the Contractor a written statement identifying the portion of the Claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the Claim shall be processed and made within 60 Days after the City issues its written statement. Any disputed portion of the Claim, as identified by the Contractor in writing, shall be submitted to nonbinding mediation, with the City and the Contractor sharing the associated costs equally. The public entity and Contractor shall mutually agree to a mediator within 10 business days after the disputed portion of the Claim has been identified in writing, unless the parties agree to select a mediator at a later time.

1. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the Claim. Each party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator.

2. For purposes of this Article, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this Article.

3. Unless otherwise agreed to by the City and the Contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

4. The mediation shall be held no earlier than the date the Contractor completes the Work or the date that the Contractor last performs Work, whichever is earlier. All unresolved Claims shall be considered jointly in a single mediation, unless a new unrelated Claim arises after mediation is completed.

H. Procedures After Mediation. If following the mediation, the Claim or any portion remains in dispute, the Contractor must file a Claim pursuant to Chapter 1 (commencing with Section 900) and Chapter 2 (commencing with Section 910) of Part 3 of Division 3.6 of Title 1 of the Government Code prior to initiating litigation. For purposes of those provisions, the running of the period of time within which a Claim must be filed shall be tolled from the time the Contractor submits his or her written Claim pursuant to subdivision (a) until the time the Claim is denied, including any period of time utilized by the meet and confer conference.

I. Civil Actions. The following procedures are established for all civil actions filed to resolve Claims of $375,000 or less:

1. Within 60 Days, but no earlier than 30 Days, following the filing or responsive pleadings, the court shall submit the matter to non-binding mediation unless

waived by mutual stipulation of both parties or unless mediation was held prior to commencement of the action in accordance with Public Contract Code section 9204 and the terms of this Contract. The mediation process shall provide for the selection within 15 Days by both parties of a disinterested third person as mediator, shall be commenced within 30 Days of the submittal, and shall be concluded within 15 Days from the commencement of the mediation unless a time requirement is extended upon a good cause showing to the court.

2. If the matter remains in dispute, the case shall be submitted to judicial arbitration pursuant to Chapter 2.5 (commencing with Section 1141.10) of Title 3 of Part 3 of the Code of Civil Procedure, notwithstanding Section 1114.11 of that code. The Civil Discovery Act of 1986 (Article 3 (commencing with Section 2016) of Chapter 3 of Title 3 of Part 4 of the Code of Civil Procedure) shall apply to any proceeding brought under this subdivision consistent with the rules pertaining to judicial arbitration. In addition to Chapter 2.5 (commencing with Section 1141.10) of Title 3 of Part 3 of the Code of Civil Procedure, (A) arbitrators shall, when possible, be experienced in construction law, and (B) any party appealing an arbitration award who does not obtain a more favorable judgment shall, in addition to payment of costs and fees under that chapter, also pay the attorney's fees on appeal of the other party.

J. Government Code Claim Procedures.

1. This Article does not apply to tort claims and nothing in this Article is intended nor shall be construed to change the time periods for filing tort claims or actions specified by Chapter 1 (commending with Section 900) and Chapter 2 (commencing with Section 910) of Part 3 of Division 3.5 of Title 1 of the Government Code.

2. In addition to any and all requirements of the Contract Documents pertaining to notices of and requests for adjustment to the Contract Time, Contract Price, or compensation or payment for Additional Work, disputed Work, construction claims and/or changed conditions, the Contractor must comply with the claim procedures set forth in Government Code Section 900, et seq. prior to filing any lawsuit against the City.

3. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to adjustment of the Contract Time or Contract Price for Additional Work, disputed Work, construction claims, and/or changed conditions have been followed by Contractor. If Contractor does not comply with the Government Code claim procedure or the prerequisite contractual requirements, Contractor may not file any action against the City.

4. **A Government Code claim must be filed no earlier than the date the Work is completed or the date the Contractor last performs Work on the Project, whichever occurs first. A Government Code claim shall be inclusive of all unresolved Claims known to Contractor or that should reasonably by known to Contractor excepting only new unrelated Claims that arise after the Government Code claim is submitted.**

K. Non-Waiver. The City's failure to respond to a Claim from the Contractor within the time periods described in this Article or to otherwise meet the time requirements of this Article shall result in the Claim being deemed rejected in its entirety, and shall not constitute a waiver of any rights under this Article.

ARTICLE 10 - MEASUREMENT; PAYMENT

10.1 Cost Breakdown.

A. Lump Sum Work.

1. Contractor shall furnish on forms approved by the City within ten (10) Days of the Notice to Proceed, a schedule of values allocating the entire Contract Price to the various portions of the Work and prepared in such a form and supported by such data to substantiate its accuracy as the Engineer may require. This schedule of values, unless objected to by the Engineer, shall be used as a basis for reviewing the Contractor's applications for payment. Contractor shall submit the schedule of values prior to submitting its first application for payment, and the City will not issue any payment until it receives and approves the schedule of values.

B. Unit Price Work.

1. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work multiplied by the estimated quantity of each item as indicated in the Contract. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Each unit price will be deemed to include an amount considered by Contractor to be adequate to cover Contractor's overhead and or profit for each separately identified item.

2. Unless otherwise specified, payment will be based on the actual quantities of Work as verified and approved by the Engineer, based on the price per unit as set forth in the Bid.

3. The City or Contractor may initiate a Change Order or Change Order Request to adjust the Contract Price in accordance with Contractor Documents based on actual quantities of Unit Price Work. The City or Contractor may make a claim for an adjustment in the Unit Price in accordance with the Contract Documents if:

a. the quantity of any item of Unit Price Work performed by Contractor differs by twenty-five percent (25%) or more from the estimated quantity of such item indicated in the Contract; and

b. there is no corresponding adjustment with respect to any other item of Work; and

c. Contractor believes that Contractor is entitled to an increase in unit price as a result of having incurred additional expense or the City believes that the City is entitled to a decrease in unit price and the parties are unable to agree as to the amount of any such increase or decrease.

10.2 Progress Estimates and Payment.

A. By the tenth (10th) Day of the following calendar month, Contractor shall submit to Engineer a payment request which shall set forth in detail the value of the Work done for the period beginning with the date Work was first commenced and ending on the end of the calendar month for which the payment request is prepared. Contractor shall include an adjusted list of actual quantities, verified by the Engineer, for unit price items listed, if any, in the Bid. Contractor shall include any amount earned for authorized Additional Work. Contractor shall certify under penalty of perjury, that all cost breakdowns and periodic estimates accurately reflect the Work on the Project.

B. From the total thus computed, a deduction shall be made in the amount of five percent (5%) for retention, except where the City has adopted a finding that the Work done under the Contract is substantially complex, and then the amount withheld as retention shall be the percentage specified in the Notice Inviting Bids. From the remainder a further deduction may be made in accordance with Section C below. The amount computed, less the amount withheld for retention and any amounts withheld as set forth below, shall be the amount of the Contractor's payment request.

C. The City may withhold a sufficient amount or amounts of any payment or payments otherwise due to Contractor, as in its judgment may be necessary to cover:

1. Payments which may be past due and payable for just claims against Contractor or any Subcontractors for labor or materials furnished in and about the performance of work on the Project under this Contract.

2. Defective work not remedied.

3. Failure of Contractor to make proper payments to his Subcontractor or for material or labor.

4. Completion of the Contract if there is a reasonable doubt that the Work can be completed for balance then unpaid.

5. Damage to another contractor or a third party.

6. Amounts which may be due the Count for claims against Contractor.

7. Failure of Contractor to keep the Record Drawings up to date.

8. Failure to provide update on construction schedule as required herein.

9. Site cleanup.

10. Failure to comply with Contract Documents.

11. Liquidated damages.

12. Legally permitted penalties.

D. The City may apply such withheld amount or amounts to payment of such claims or obligations at its discretion with the exception of subsections (C)(1), (3), and (5) of this Article, which must be retained or applied in accordance with applicable law. In so doing, the City shall be deemed the agent of Contractor and any payment so made by the City shall be considered as a payment made under contract by the City to Contractor and the City shall not be liable to Contractor for such payments made in good faith. Such payments may be made without prior judicial determination of claim or obligations. The City will render Contractor a proper accounting of such funds disbursed on behalf of Contractor.

E. Upon receipt, the Engineer shall review the payment request to determine whether it is undisputed and suitable for payment. If the payment request is determined to be unsuitable for payment, it shall be returned to Contractor as soon as practicable but not later than seven (7) Days after receipt, accompanied by a document setting forth in writing the reasons why the payment request is not proper. The City shall make the progress payment within 30 Days after the receipt of an undisputed and properly submitted payment request from Contractor, provided that a release of liens and claims has been received from the Contractor pursuant to Civil Code section 8132. The number of days available to the City to make a payment without incurring interest pursuant to this paragraph shall be reduced by the number of Days by which the Engineer exceeds the seven (7) Day requirement.

F. A payment request shall be considered properly executed if funds are available for payment of the payment request and payment is not delayed due to an audit inquiry by the financial officer of the City.

G. The City shall have the right to adjust any estimate of quantity and to subsequently correct any error made in any estimate for payment.

10.3 Final Acceptance and Payment

A. Following the City's acceptance of the Work, the Contractor shall submit to the City a written statement of the final quantities of unit price items for inclusion in the final payment request. The City shall have the right to adjust any estimate of quantity and to correct any error made in any estimate for payment.

B. When the Work has been accepted there shall be paid to Contractor a sum equal to the Contract Price less any amounts previously paid Contractor and less any amounts withheld by the City from Contractor under the terms of the Contract. The final five percent (5%), or the percentage specified in the Notice Inviting Bids where the City has adopted a finding of substantially complete, shall not become due and payable until as required by Public Contract Code section 7107. If the Contractor has placed securities with the City as described herein, the Contractor shall be paid a sum equal to one hundred percent (100%) of the Contract Price less any amounts due the City under the terms of the Contract.

C. Unless Contractor advises the City in writing prior to acceptance of the final five percent (5%) or the percentage specified in the Notice Inviting Bids where the City has adopted a finding of completion, or the return of securities held as described herein, said acceptance shall operate as a release to the City of all claims and all

liability to Contractor for all things done or furnished in connection with this Work and for every act of negligence of the City and for all other claims relating to or arising out of this Work. If Contractor advises the City in writing prior to acceptance of final payment or return of the securities that there is a dispute regarding the amount due the Contractor, the City may pay the undisputed amount contingent upon the Contractor furnishing a release of all undisputed claims against the City with the disputed claims in stated amounts being specifically excluded by Contractor from the operation of the release. No payments, however, final or otherwise, shall operate to release Contractor or its sureties from the Faithful Performance Bond, Labor and Material Payment Bond, or from any other obligation under this Contract.

D. In case of suspension of the Contract any unpaid balance shall be and become the sole and absolute property of the City to the extent necessary to repay the City any excess in the cost of the Work above the Contract Price.

E. Final payment shall be made no later than 60 Days after the date of acceptance of the Work by the City or the date of occupation, beneficial use and enjoyment of the Work by the City including any operation only for testing, start-up or commissioning accompanied by cessation of labor on the Work, provided that a release of liens and claims has been received from the Contractor pursuant to Civil Code section 8136. In the event of a dispute between the City and the Contractor, the City may withhold from the final payment an amount not to exceed 150% of the disputed amount.

F. Within ten (10) Days from the time that all or any portion of the retention proceeds are received by Contractor, Contractor shall pay each of its Subcontractors from whom retention has been withheld each Subcontractor's share of the retention received. However, if a retention payment received by Contractor is specifically designated for a particular Subcontractor, payment of the retention shall be made to the designated Subcontractor if the payment is consistent with the terms of the subcontract.

ARTICLE 11 -MISCELLANEOUS

11.1 Patents.

A. Contractor shall hold and save the City, officials, officers, employees, and authorized volunteers harmless from liability of any nature or kind of claim therefrom including costs and expenses for or on account of any patented or unpatented invention, article or appliance manufactured, furnished or used by Contractor in the performance of this Contract.

11.2 Document Retention & Examination

A. In accordance with Government Code section 8546.7, records of both the City and the Contractor shall be subject to examination and audit by the State Auditor General for a period of three (3) years after final payment.

B. Contractor shall make available to the City any of the Contractor's other documents related to the Project immediately upon request of the City.

C. In addition to the State Auditor rights above, the City shall have the right to examine and audit all books, estimates, records, contracts, documents, bid documents, subcontracts, and other data of the Contractor (including computations and projections) related to negotiating, pricing, or performing the modification in order to evaluate the accuracy and completeness of the cost or pricing data at no additional cost to the City, for a period of four (4) years after final payment.

11.3 Notice.

A. All notices shall be in writing and either served by personal delivery or mailed to the other party. Written notice to the Contractor shall be addressed to Contractor's principal place of business unless Contractor designates another address in writing for service of notice. Notice to the City shall be addressed to the City as designated in the Notice Inviting Bids unless the City designates another address in writing for service of notice. Notice shall be effective upon receipt or five (5) Days after being sent by first class mail, whichever is earlier. Notice given by facsimile shall not be effective unless acknowledged in writing by the receiving party.

11.4 Notice of Third Party Claims

A. Pursuant to Public Contract Code section 9201, the City shall provide the Contractor with timely notification of the receipt of any third-party claims relating to the Contract. The City is entitled to recover reasonable costs incurred in providing such notification.

11.5 State License Board Notice

A. Contractors are required by law to be licensed and regulated by the Contractors' State License Board which has jurisdiction to investigate complaints against contractors if a complaint regarding a patent act or omission is filed within four (4) years of the date of the alleged violation. A complaint regarding a latent act or omission pertaining to structural defects must be filed within ten (10) years of the date of the alleged violation. Any questions concerning a contractor may be referred to the Registrar, Contractors' State License Board, P.O. Box 26000, Sacramento, California 95826.

11.6 Assignment of Contract

A. Contractor shall not assign, transfer, convey, sublet or otherwise dispose of the rights or title of interest of any or all of this contract without the prior written consent of the City. Any assignment or change of Contractor's name of legal entity without the written consent of the City shall be void. Any assignment of money due or to become due under this Contract shall be subject to a prior lien for services rendered or material supplied for performance of Work called for under the Contract Documents in favor of all persons, firms, or corporations rendering such services or supplying such materials to the extent that claims are filed pursuant to the Civil Code, the Code of Civil Procedure or the Government Code.

11.7 Change In Name And Nature Of Contractor's Legal Entity.

A. Should a change be contemplated in the name or nature of the Contractor's legal entity, the Contractor shall first notify the City in order that proper steps may be taken to have the change reflected on the Contract and all related documents. No change of Contractor's name or nature will affect the City's rights under the Contract, including but not limited to the bonds.

11.8 Prohibited Interests

A. No City official or representative who is authorized in such capacity and on behalf of City to negotiate, supervise, make, accept, or approve, or to take part in negotiating, supervising, making, accepting or approving any engineering, inspection, construction or material supply contract or any subcontract in connection with construction of the project, shall be or become directly or indirectly interested financially in the Contract.

11.9 Controlling Law

A. Notwithstanding any subcontract or other contract with any subcontractor, supplier, or other person or organization performing any part of the Work, this Contract shall be governed by the law of the State of California excluding any choice of law provisions.

11.10 Jurisdiction; Venue

A. Contractor and any subcontractor, supplier, or other person or organization performing any part of the Work agrees that any action or suits at law or in equity arising out of or related to the bidding, award, or performance of the Work shall be maintained in the Superior Court of San Bernardino County, California, and expressly consent to the jurisdiction of said court, regardless of residence or domicile, and agree that said court shall be a proper venue for any such action.

11.11 Cumulative Remedies.

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Applicable Laws, by special warranty or guarantee, or by other provisions of the Contract Documents. The provisions of this Article will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

11.12 Survival of Obligations.

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract Documents, as well as all continuing obligations indicated in the Contract Documents, will survive final payment, completion, and acceptance of the Work or termination or completion of the Contract or termination of the services of Contractor.

11.13 Headings.

A. Article and paragraph headings are inserted for convenience only and do not constitute parts of these General Conditions.

11.14 Assignment of Antitrust Actions

A. In accordance with §7103.5(b) of the California Public Contract Code, Contractor and Subcontractors must conform to the following requirements:

1. In entering into a public works contract or a subcontract to supply goods, services, or materials pursuant to a public works contract, Contractor or Subcontractor offer and agree to assign to the awarding body all rights, title, and interest in and to all causes of action it may have under §4 of the Clayton Act (15 U.S.C. Sec. 15) or under the Cartwright Act (Chapter 2 (commencing with §16700) of Part 2 of Division 7 of the Business and Professions Code) arising from purchases of goods, services, or materials pursuant to the public works contract or the subcontract.

2. This assignment must be made and become effective at the time the awarding body tenders to Contractor, without further acknowledgment by the parties.

11.15 All Legal Provisions Included

A. Contractor shall give all notices and comply with all federal, state and local laws, ordinances, rules and regulations bearing on conduct of work as indicated and specified by their terms. References to specific laws, rules or regulations in this Contract are for reference purposes only, and shall not limit or affect the applicability of provisions not specifically mentioned. If Contractor observes that drawings and specifications are at variance therewith, he shall promptly notify City in writing and any necessary changes shall be adjusted as provided for in this Contract for changes in Work. If Contractor performs any Work knowing it to be contrary to such laws, ordinances, rules and regulations, and without such notice to City, he shall bear all costs arising therefrom.

B. Contractor shall be responsible for familiarity with the Americans with Disabilities Act (“ADA”) (42 U.S.C. § 12101 et seq.). The Work will be performed in compliance with ADA laws, rules and regulations. Contractor shall comply with the Historic Building Code, including, but not limited to, as it relates to the ADA, whenever applicable.

C. Contractor acknowledges and understands that, pursuant to Public Contract Code section 20676, sellers of "mined material" must be on an approved list of sellers published pursuant to Public Resources Code section 2717(b) in order to supply mined material for this Contract.

D. No City official or representative who is authorized in such capacity and on behalf of City to negotiate, supervise, make, accept, or approve, or to take part in negotiating, supervising, making, accepting or approving any engineering, inspection, construction or material supply contract or any subcontract in connection with construction of the Work, shall be or become directly or indirectly interested financially in the Contract.

E. All provisions of law required to be inserted in the Contract or Contract Documents pursuant to any Applicable Laws shall be and are inserted herein. If through mistake, neglect, oversight, or otherwise, any such provision is not herein inserted or inserted in improper form, upon the application of either party, the Contract or Contract Documents shall be changed by City, at no increase in Contract Price or extension in Contract Times, so as to strictly comply with the Applicable Laws and without prejudice to the rights of either party hereunder.

SECTION 00750 – SPECIAL CONDITIONS

ARTICLE 1 -SCOPE OF WORK

1.1 Location of the Project.

A. Armstrong Community Center 1265 S Palmetto Avenue Ontario Ca 91762

1.2 Scope of Work.

Re-roof the Armstrong Community Center. Demo existing asphalt shingle roof and replace with new standing seam metal roof and new TMP membrane over existing flat mechanical areas & exterior roof gutters with new roof drain grates.

1.3 Approved set of plans (Permit # B20240378) uploaded on Planetbids

END OF SPECIAL CONDITIONS

TECHNICAL SPECIFICATIONS

"THE FOLLOWING SPECIFICATIONS ARE INCORPORATED HEREIN BY REFERENCE AS IF SET FORTH IN THEIR ENTIRETY:

DIVISION 07 - THERMAL AND MOISTURE PROTECTION

074113.04 Metal Roof Panels, Standing Seam (T-238)

SECTION 074113.04 - METAL ROOF PANELS, STANDING SEAM

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Architectural Standing-seam metal roof panels.

2. Metal roof accessories.

3. Substrate boards.

4. Underlayments.

1.2 DEFINITIONS

A. Roofing Terminology: Refer to ASTM D1079 "Standard Terminology Relating to Roofing and Waterproofing" and glossary in applicable edition of NRCA's "The NRCA Roofing Manual: Metal Panel and SPF Roof Systems" for definition of terms related to roofing work in this Section.

B. Metal Roof Panel Assembly: Metal roof panels, attachment system components, miscellaneous metal framing, thermal insulation, and accessories necessary for a complete weathertight roofing system.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Meet with Owner, Architect, Owner's insurer if applicable, testing and inspecting agency representative, metal roof panel Installer, metal roof panel manufacturer's representative, substrate Installer, and installers whose work interfaces with or affects metal roof panels including installers of roof accessories and roof-mounted equipment.

2. Review and finalize construction schedule and verify availability of materials, Installer's personnel, equipment, and facilities needed to make progress and avoid delays.

3. Review methods and procedures related to metal roof panel installation, including manufacturer's written instructions.

4. Examine substrate conditions for compliance with requirements, including flatness and attachment to structural members.

5. Review structural loading limitations of deck during and after roofing.

6. Review flashings, special roof details, roof drainage, roof penetrations, equipment curbs, and condition of other construction that will affect metal roof panels.

7. Review governing regulations and requirements for insurance, certificates, and testing and inspecting if applicable.

8. Review temporary protection requirements for metal roof panel assembly during and after installation.

9. Review roof observation and repair procedures after metal roof panel installation.

10. Document proceedings, including corrective measures and actions required, and furnish copy of record to each participant.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product indicated.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for each type of panel and accessory.

B. Shop Drawings: Show fabrication and installation layouts of metal roof panels; details of edge conditions, side-seam and endlap joints, panel profiles, corners, anchorages, trim, flashings, closures, and accessories; and special details. Indicate point of fixity of metal panels. Distinguish between factory- and field-assembled work.

1. Accessories: Include details of the flashing, trim, and anchorage systems, at a scale of not less than 1-1/2 inches per 12 inches (1:10); Include details of the following items:

a. Flashing and trim.

b. Pipe penetration flashings.

c. Roof curbs.

d. Gutters.

e. Downspouts.

2. Shop Drawings for Snow Guards: By snow guard manufacturer. Show fabrication and installation layouts and attachment to other construction.

C. Delegated-Design Submittal: For metal roof panel assembly indicated to comply with performance requirements and design criteria, including analysis data signed and sealed by a qualified professional engineer responsible for their preparation. Include the following:

1. Structural analysis data indicating compliance with Performance Requirements Article.

2. Include miscellaneous metal framing components, layout, and fastening.

D. Samples for Initial Selection: For each type of metal roof panel indicated with factory-applied color finishes.

1. Include similar Samples of trim and accessories involving color selection.

E. Samples for Verification: For each type of exposed finish required, prepared on Samples of size indicated below:

1. Metal Roof Panels: 12 inches (300 mm) long by actual panel width. Include fasteners, clips, trim, closures, and other metal roof panel accessories.

1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

1. Submit Installer qualifications in the form of an original letter on manufacturer's letterhead signed by authorized manufacturer representative.

B. Material Certificates: For thermal insulation, from manufacturer.

C. Compliance Certificate: For State of Florida product approval.

D. Notice of Acceptance: For Miami Dade County product approval.

E. Field Quality Control Reports.

1.6 CLOSEOUT SUBMITTALS

A. Maintenance Data: For metal roof panels to include in maintenance manuals.

B. Warranties: Executed copies of warranties.

1.7 QUALITY ASSURANCE

A. Manufacturer Qualifications: A manufacturer of plant-fabricated metal roof panel systems listed in this Section and meeting performance requirements, with a minimum of five years' experience providing metal roof panel systems for projects of similar type and scope, offering warranty, technical inspection, and maintenance inspection services specified.

B. Installer Qualifications: An employer of workers trained and certified by manufacturer, including a full-time on-site supervisor with a minimum of five years' experience installing similar work, able to communicate verbally with Contractor, Architect, and employees, and qualified by the manufacturer to furnish warranty of type specified.

C. UL-Certified, Portable Roll-Forming Equipment: UL-certified, portable roll-forming equipment capable of producing metal panels warranted by manufacturer to be the same as factory-formed products. Maintain UL certification of portable roll-forming equipment for duration of work.

1. Manufacturer's On-Site Roll Former Operators: Experienced full-time employees of metal roof panel manufacturer.

D. Manufacturer's Technical Representative Qualifications: An authorized full-time employee representative of manufacturer, certified as a Registered Roof Observer (RRO) by the International Institute of Building Envelope Consultants (IIBEC) formerly the Roof Consultants Institute (RCI), and experienced in the installation and maintenance of the specified roof panel system and qualified to determine Installer's compliance with the requirements of this Project.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Deliver components, sheets, metal roof panels, and other manufactured items so as not to be damaged or deformed. Package metal roof panels for protection during transportation and handling.

B. Unload, store, and erect metal roof panels in a manner to prevent bending, warping, twisting, and surface damage.

C. Stack metal roof panels on platforms or pallets, covered with suitable weathertight and ventilated covering. Store metal roof panels to ensure dryness. Do not store metal roof panels in contact with other materials that might cause staining, denting, or other surface damage.

D. Protect strippable protective covering on metal roof panels from exposure to sunlight and high humidity, except to extent necessary for period of metal roof panel installation.

1.9 PROJECT / FIELD CONDITIONS

A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit metal roof panel work to be performed according to manufacturer's written instructions and warranty requirements.

B. Field Measurements: Verify actual dimensions of construction contiguous with metal roof panels by field measurements before fabrication.

1.10 COORDINATION

A. Coordinate sizes and locations of roof curbs, equipment supports, and roof penetrations with actual equipment provided.

B. Coordinate metal roof panels with rain drainage work, flashing, trim, and construction of substrate, parapets, walls, and other adjoining work to provide a leakproof, secure, and noncorrosive installation.

1.11 WARRANTY

A. Manufacturer's Warranty: Roof System Manufacturer's standard form in which Manufacturer agrees to repair or replace components of roofing system that fail in materials or workmanship within warranty period, as follows.

1. Form of Warranty: Manufacturer's standard warranty form.

2. Scope of Warranty: Work of this Section and including sheet metal details and termination details installed by the roof system Installer and approved by the Roof System Manufacturer.

3. Warranty Period: 20 years from date of completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Basis of Design: The roof system specified in this Section is based upon products of Tremco CPG Inc, Beachwood, OH, (800) 562-2728, www.tremcoroofing.com that are named in other Part 2 articles. Provide specified products.

B. Source Limitations: Obtain components for roofing system from same manufacturer as membrane roofing or manufacturer approved by membrane roofing manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. General Performance: Metal roof panels shall comply with performance requirements without failure due to defective manufacture, fabrication, installation, or other defects in construction.

B. Roofing System Design: Provide metal roof panel assembly that is identical to systems that have been successfully tested by a qualified testing and inspecting agency in accordance with ANSI/FM 4471, UL 580, or UL 1897, and to resist uplift pressures calculated in accordance with ASCE-7 and applicable code.

C. Hail Resistance: Provide metal roof panel assemblies listed with UL as Class 4 hail resistant panels.

D. Hydrostatic-Head Resistance: No water penetration when tested according to ASTM E2140.

1. Test-Pressure Difference: 12.00 lbf/sq. ft. (575 Pa).

E. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes by preventing buckling, opening of joints, overstressing of components, failure of joint sealants, failure of connections, and other detrimental effects. Base calculations on surface temperatures of materials due to both solar heat gain and nighttime-sky heat loss.

1. Temperature Change (Range): 120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces.

F. Exterior Fire-Test Exposure: UL 790/ASTM E108, Class A; for application and roof slopes indicated, as determined by testing identical membrane roofing materials by a qualified testing agency. Materials shall be identified with appropriate markings of applicable testing agency.

2.3 STANDING-SEAM METAL ROOF PANELS

A. Provide factory-formed metal roof panels designed to be installed by lapping and interconnecting raised side edges of adjacent panels with joint type indicated and mechanically attaching panels to supports using concealed clips in side laps. Include clips, cleats, pressure plates, and accessories required for weathertight installation.

1. Steel Panel Systems: Unless more stringent requirements are indicated, comply with ASTM E1514.

B. Vertical-Rib, Seamed-Joint, Standing-Seam Metal Roof Panels: Factory-formed symmetrical panels with vertical ribs at panel edges and flat pan between ribs; designed for sequential

installation in either direction by mechanically attaching panels to supports using concealed clips located under one side of panels and engaging opposite edge of adjacent panels, and mechanically seaming panels together utilizing a seam cap, and configured to enable future replacement of individual panels without disturbing adjacent panels.

1. Basis-of-Design Product: Tremco, TremLock T-238.

2. Aluminum-Zinc Alloy-Coated Steel Sheet: ASTM A792/A792M, Class AZ50 coating designation, Grade 50 (Class AZM150 coating designation, Grade 340), prepainted by the coil-coating process to comply with ASTM A755/A755M; structural quality.

    a. Thickness: 0.0236-inch/24 ga. (0.71-mm) minimum thickness.

    b. Surface: Smooth, flat finish.

    c. Exposed Coil-Coated Finish: High-performance organic coating.

        1) Color: As selected from manufacturer's full range.

    d. Exposed Finish: Exposed metallic coating.

3. Joint Type: Field mechanically seamed, with continuous factory-applied sealant.

4. Seam Cap: Match panel material and finish; provide with two rows of integral factory hot-applied sealant.

5. Panel Shape: Flat.

6. Panel Pan Configuration: Plank and Pencil Ribbed.

7. Panel Seam Height: Not less than 2-3/8 inch (60.3 mm).

8. Panel Coverage: 16 inches (406 mm).

9. Eave Notch: Factory-formed.

10. Clips: Fixed Clips that accommodate thermal movement. Continuous clips where required to meet performance requirements. Bearing plates where required.

    a. Material: zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet. 0.064-inch/16 ga. (1.63-mm) nominal thickness for individual clips, or 0.0236-inch/24 ga. (0.71-mm) nominal thickness for continuous clips.

2.4 METAL ROOF ACCESSORIES

A. Metal Roof Accessories, General: Provide components approved by roof panel manufacturer and as required for a complete metal roof panel assembly including trim, copings, fasciae, corner units, ridge closures, clips, flashings, sealants, gaskets, fillers, closure strips, and similar items. Match material and finish of metal roof panels unless otherwise indicated.

    1. Closures: Provide closures at eaves and ridges, fabricated of same metal as metal roof panels.

2. Closure Strips: Closed-cell, expanded, cellular, rubber or crosslinked, polyolefin-foam or closed-cell laminated polyethylene; minimum 1-inch- (25-mm-) thick, flexible closure strips; cut or premolded to match metal panel profile. Provide closure strips where indicated or necessary to ensure weathertight construction.

B. Panel Sealants: Provide one of the following identical to that used in test panels meeting performance requirements:

1. Sealant Tape: Pressure-sensitive, 99 percent solids, gray polyisobutylene or butyl rubber compound sealant tape with release-paper backing. Provide permanently elastic, nonsag, nontoxic, nonstaining tape 1 inch (25 mm) wide and 1/8 inch (3 mm) thick, with nylon spacer beads to prevent overcompression of the sealant tape.

2. Butyl-Rubber-Based, Solvent-Release Sealant: ASTM C1311, with nylon spacer beads to prevent overcompression of the sealant tape.

C. Flashing and Trim: Provide flashing and trim formed from same material as metal panels, and as required to seal against weather and to provide finished appearance. Locations include, but are not limited to, eaves, rakes, corners, bases, framed openings, ridges, fasciae, and fillers. Finish flashing and trim with same finish system as adjacent metal panels.

1. Basis of Design Product: Tremco, TremLock Sheet.

D. Gutters: Formed from same material roof panels. Match profile of gable trim, complete with end pieces, outlet tubes, and other special pieces as required. Fabricate in minimum 96-inch- (2400-mm-) long sections, of size and metal thickness according to SMACNA's "Architectural Sheet Metal Manual." Furnish gutter supports spaced a maximum of 36 inches (900 mm) o.c., fabricated from same metal as gutters. Provide wire ball strainers of compatible metal at outlets. Finish gutters to match metal roof panels.

E. Downspouts: Formed from same material as roof panels. Fabricate in 10-foot- (3-m-) long sections, complete with formed elbows and offsets, of size and metal thickness according to SMACNA's "Architectural Sheet Metal Manual." Finish downspouts to match gutters.

F. Pipe Penetration Flashings: Flexible boot type, with stainless-steel compression ring, and stainless-steel pipe strap. Use silicone-type boot at hot pipes.

G. Roof Curbs: Fabricated from aluminum sheet, minimum 0.080-inch- (1.2-mm-) thick; with bottom of skirt profiled to match roof panel profiles, and welded top box, integral internal fastener flange, and water diverter. Fabricate curb subframing of minimum 0.0598-inch- (1.5-mm-) thick, angle-, C-, or Z-shaped galvanized steel sheet. Fabricate curb and subframing to withstand indicated loads, of size and height indicated. Finish roof curbs to match metal roof panels.

1. Insulate roof curb with 1-inch- (25-mm-) thick, rigid insulation.

2.5 SUBSTRATE BOARDS

A. Gypsum panel, glass-mat-faced, primed, ASTM C1177/C1177M.

1. Basis of design product: Tremco/GP Gypsum DensDeck Prime.

2. Thickness: 1/2 inch (12 mm).

B. Substrate-Board Fasteners: Factory-coated steel fasteners and metal or plastic plates complying with corrosion-resistance provisions in FMG 4470, designed for fastening substrate board to substrate.

2.6 UNDERLAYMENT MATERIALS

A. Self-Adhering, High-Temperature Underlayment: Self-adhering, cold-applied, sheet underlayment, consisting of slip-resistant, woven polymer surface laminated to a modified bitumen adhesive compound, with silicon coated split-release film backing. Provide primer when recommended by underlayment manufacturer.

1. Basis of design product: Self-Adhering High-Temperature Underlayment (Tremco SA).

2. Basis of Design Product: Tremco, SA.

3. Nominal Thickness: 40 mils (1.0 mm).

4. Tensile Strength, ASTM D1970: MD- 80 lbs/in. (14 kN/m); XMD - 30 lbs/in. (10.5 kN/m).

5. Tear Resistance, ASTM D1970: MD - 60 lbf (267 kN/m); XMD - 40 lbf (178 kN/m).

6. Elongation, ASTM D1970: MD - 70 percent; XMD 60 percent.

7. Nail Sealability, ASTM D1970: Pass.

8. Thermal Stability, ASTM D1970: Pass; Stable after testing at 225 deg F (107 deg C).

9. Low Temperature Flexibility, ICC AC 48: Pass.

10. Permeance, maximum, ASTM E96: 0.03 perms; (1.72 ng/Pa x s x sq m).

11. Adhesion to Plywood, ASTM D903: 5 lbf at 40 deg F (0.04 kN/m at 4.4 deg C) , 12 lbf at 75 deg F (0.08 kN/m at 23.9 deg C).

2.7 MISCELLANEOUS MATERIALS

A. Panel Fasteners: Self-tapping screws, bolts, nuts, self-locking rivets and bolts, end-welded studs, and other suitable fasteners designed to withstand design loads. Provide exposed fasteners with heads matching color of metal roof panels by means of plastic caps or factory-applied coating. Provide EPDM, PVC, or neoprene sealing washers.

2.8 FABRICATION

A. Fabricate and finish metal roof panels and accessories at the factory to greatest extent possible, by manufacturer's standard procedures and processes and as necessary to fulfill indicated performance requirements. Comply with indicated profiles and with dimensional and structural requirements.

1. Site-rolled fabrication of panels or shop-rolling of panels using fixed equipment designed for site-rolling applications does not meet the requirements of this Section.

B. Fabricate metal panels with joints between panels designed to form weathertight seals.

C. Provide panel profile, including major ribs and intermediate stiffening ribs, if any, for full length of panel.

D. Sheet Metal Flashing and Trim: Fabricate flashing and trim to comply with manufacturer's recommendations and recommendations in SMACNA's "Architectural Sheet Metal Manual" that apply to design, dimensions, metal, and other characteristics of item indicated.

1. Form exposed sheet metal accessories that are without excessive oil canning, buckling, and tool marks and that are true to line and levels indicated, with exposed edges folded back to form hems.

2. Seams and Sealed Joints for Sheet Metal Accessories:

a. Seams for Steel: Fabricate nonmoving seams in accessories with flat-lock seams. Tin edges to be seamed, form seams, and solder.

b. Sealed Joints: Form nonexpansion, but movable, joints in metal to accommodate sealant and to comply with SMACNA standards.

3. Conceal fasteners and expansion provisions where possible. Exposed fasteners are not allowed on faces of accessories exposed to view.

4. Fabricate cleats and attachment devices from same material as accessory being anchored or from compatible, noncorrosive metal recommended in writing by metal panel manufacturer.

a. Size: As recommended by SMACNA's "Architectural Sheet Metal Manual" or metal panel manufacturer for application, but not less than thickness of metal being secured.

2.9 FINISHES

A. Comply with NAAMM's "Metal Finishes Manual for Architectural and Metal Products" for recommendations for applying and designating finishes.

B. Protect mechanical and painted finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

C. Appearance of Finished Work: Noticeable variations in same piece are not acceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

D. High-Performance Organic Coating for Steel Panels and Accessories:

1. Two-Coat Fluoropolymer: AAMA 621 (steel) / AAMA 2605 (aluminum). Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances, metal roof panel supports, and other conditions affecting performance of the Work.

1. Examine solid roof substrate to verify that substrate joints are supported by framing or blocking and that installation is within flatness tolerances required by metal roof panel manufacturer.

a. Verify that air- or water-resistive barriers have been installed over sheathing or backing substrate to prevent air infiltration or water penetration.

2. Examine roughing-in for components and systems penetrating metal roof panels to verify actual locations of penetrations relative to seam locations of metal roof panels before metal roof panel installation.

3. For the record, prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.

4. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Clean substrates of substances harmful to insulation, including removing projections capable of interfering with insulation attachment.

3.3 SUBSTRATE BOARD INSTALLATION

A. Substrate Board: Install substrate boards over roof substrate on entire roof surface. Attach with substrate-board fasteners.

1. Install substrate board with long joints in continuous straight lines, perpendicular to roof slopes with end joints staggered between rows. Tightly butt substrate boards together.

2. Comply with requirements for fire-rated construction.

3.4 UNDERLAYMENT INSTALLATION

A. Self-Adhering Sheet Underlayment: Apply primer if required by manufacturer. Comply with temperature restrictions of underlayment manufacturer for installation. Apply at locations indicated below, wrinkle free, in shingle fashion to shed water, and with end laps of not less than 6 inches (150 mm), staggered 24 inches (600 mm) between courses. Overlap side edges not less than 3-1/2 inches (90 mm). Extend underlayment into built-in gutter trough. Roll laps with roller. Cover underlayment within 14 days.

1. Apply over entire roof surface.

B. Install flashings to cover underlayment.

3.5 METAL ROOF PANEL INSTALLATION, GENERAL

A. Install metal roof panels according to manufacturer's written instructions in orientation, sizes, and locations indicated on Drawings.

B. Provide metal roof panels of full length from eave to ridge.

C. Thermal Movement. Rigidly fasten metal roof panels to structure at one and only one location for each panel. Allow remainder of panel to move freely for thermal expansion and contraction. Predrill panels for fasteners.

1. Point of Fixity: Fasten each panel along a single line of fixing located at eave.

2. Avoid attaching accessories through roof panels in a manner that will inhibit thermal movement.

D. Install metal roof panels as follows:

1. Commence metal roof panel installation in presence of factory-authorized representative.

2. Field cutting of metal panels by torch or abrasive saw is not permitted.

3. Install panels perpendicular to supporting purlins.

4. Locate and space fastenings in uniform vertical and horizontal alignment.

5. Provide metal closures at rake edges, rake walls, and each side of ridge and hip caps.

6. Flash and seal metal roof panels with weather closures at eaves, rakes, and perimeter of all openings.

7. Install ridge and hip caps as metal roof panel work proceeds.

8. Install metal flashing to allow moisture to run over and off metal roof panels.

E. Fasteners: Use long-life fasteners, as recommend by panel manufacturer, for surfaces exposed to the exterior and galvanized steel fasteners for surfaces exposed to the interior.

F. Anchor Clips: Anchor metal roof panels and other components of the Work securely in place, using manufacturer's approved fasteners according to manufacturers' written instructions.

G. Metal Protection: Where dissimilar metals will contact each other or corrosive substrates, protect against galvanic action by painting contact surfaces with bituminous coating, by applying rubberized-asphalt underlayment to each contact surface, or by other permanent separation as recommended by metal roof panel manufacturer.

1. Use underlayment where roof panels will contact wood, ferrous metal, or cementitious construction.

H. Joint Sealers: Install gaskets, joint fillers, and sealants where indicated and where required for weatherproof performance of metal roof panel assemblies. Provide types of gaskets, fillers, and sealants indicated or, if not indicated, types recommended by metal roof panel manufacturer.

1. Prepare joints and apply sealants to comply with ASTM C1193.

3.6 METAL ROOF PANEL INSTALLATION

A. Standing-Seam Metal Roof Panels: Fasten metal roof panels to substrate with concealed clips at each standing-seam joint at location, spacing, and with fasteners recommended by manufacturer.

1. Install clips to supports with self-tapping fasteners.

2. Install pressure plates at locations indicated in manufacturer's written installation instructions.

3. Seamed Joint: Crimp standing seams with manufacturer-approved, motorized seamer tool so clip, metal roof panel, and factory-applied sealant are completely engaged.

4. Watertight Installation:

a. Apply a continuous ribbon of sealant or tape to seal joints of metal panels, using sealant or tape as recommend in writing by manufacturer as needed to make panels watertight.

b. Provide sealant or tape between panels and protruding equipment, vents, and accessories.

3.7 ACCESSORY INSTALLATION

A. General: Install accessories with positive anchorage to building and weathertight mounting and provide for thermal expansion. Coordinate installation with flashings and other components.

1. Install components required for a complete metal roof panel assembly including trim, copings, ridge closures, seam covers, flashings, sealants, gaskets, fillers, closure strips, and similar items.

B. Flashing and Trim: Comply with performance requirements and manufacturer's written installation instructions. Provide concealed fasteners where possible, and set units true to line and level as indicated. Install work with laps, joints, and seams that will be permanently watertight and weather resistant.

1. Form trim and transition joints using compressed joints with captive butyl sealant capable of resisting static water pressure. Cleated joints and exposed joint sealants do not meet this requirement.

2. Install exposed flashing and trim that is without excessive oil canning, buckling, and tool marks and that is true to line and levels indicated, with exposed edges folded back to form hems. Install sheet metal flashing and trim to fit substrates and to result in waterproof and weather-resistant performance.

3. Expansion Provisions: Provide for thermal expansion of exposed flashing and trim. Space movement joints at a maximum of 10 feet (3 m) with no joints allowed within 24 inches (600 mm) of corner or intersection. Where lapped expansion provisions cannot be used or would not be sufficiently weather resistant and waterproof, form expansion joints of

intermeshing hooked flanges, not less than 1 inch (25 mm) deep, filled with mastic sealant (concealed within joints).

C. Gutters: Join sections with riveted and soldered or lapped, riveted, and sealed joints. Attach gutters to eave with gutter hangers spaced not more than 36 inches (914 mm) o.c. using manufacturer's standard fasteners. Provide end closures and seal watertight with sealant. Provide for thermal expansion.

D. Downspouts: Join sections with telescoping joints. Provide fasteners designed to hold downspouts securely 1 inch (25 mm) away from walls; locate fasteners at top and bottom and at approximately 60 inches (1500 mm) o.c. in between.

1. Provide elbows at base of downspouts to direct water away from building.

2. Connect downspouts to underground drainage system indicated.

E. Roof Curbs: Install curbs at locations indicated on Drawings. Install flashing around bases where they meet metal roof panels.

F. Pipe Flashing: Form flashing around pipe penetration and metal roof panels. Fasten and seal to metal roof panels as recommended by manufacturer.

3.8 FIELD QUALITY CONTROL

A. Manufacturer’s Technical Representative: Engage a qualified manufacturer’s technical representative acceptable to Owner for a minimum of 15 full-time days on site to perform substrate examination, interim observations, and final roof inspections, and to prepare reports.

B. Remove and replace applications of metal roof panels where inspections indicate that they do not comply with specified requirements.

C. Additional inspections, at Contractor's expense, will be performed to determine compliance of replaced or additional work with specified requirements.

3.9 CLEANING

A. Remove temporary protective coverings and strippable films, if any, as metal roof panels are installed unless otherwise indicated in manufacturer's written installation instructions. On completion of metal roof panel installation, clean finished surfaces as recommended by metal roof panel manufacturer. Maintain in a clean condition during construction.

B. After metal roof panel installation, clear drainage channels of obstructions, dirt, and sealant.

C. Replace metal roof panels that have been damaged or have deteriorated beyond successful repair by finish touchup or similar minor repair procedures.

END OF SECTION 074113.04

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Community Life and Culture Prepared By: Danielle Guevara Department: Prepared By: Danielle Guevara Staff Member Presenting: Helen McAlary, Executive Director Community Life and Culture Reviewed By: Lacey A Rightmer Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 6

SUBJECT: AN AMENDMENT TO A MAINTENANCE SERVICES AGREEMENT WITH BAY ALARM COMPANY FOR BURGLARY ALARM SERVICES

RECOMMENDATION: That the City Council approve and authorize the City Manager, or his designee, to execute Amendment No. 11 to the Maintenance Services Agreement with Bay Alarm Company, of Concord, California, for a total not-to-exceed amount of $1,530,547, for the alarm system upgrade, and a term to June 30, 2025.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Maintain the Current High Level of Public Safety

FISCAL IMPACT: The proposed Amendment No. 11 to Bay Alarm Company increases the existing agreement by $17,000 for a revised total Agreement amount of $1,530,547. The Fiscal Year 2024-25 Adopted Budget includes appropriations from the General Fund to cover the cost of these services.

BACKGROUND & ANALYSIS: The City awarded Mijac Alarm, which later changed its name to Bay Alarm, a five-year contract for Security and Fire Alarm Monitoring Services in July 2020. A number of amendments have followed to address the needs at citywide facilities.

To enhance safety measures for the public and employees, Staff recommend the installation of panic buttons at Dorothy A. Quesada pool, Westwind Community Center pool, and Ovitt Family Community Library. These strategically placed devices will provide immediate access to emergency assistance ensuring a quick response during an emergency. Bay Alarm will install panic buttons and provide ongoing alarm services at these added locations to ensure the safety of the buildings, City staff, and the general public.

Staff recommends approving Amendment No. 11 to the Maintenance Services Agreement with Bay Alarm Company in the amount of $17,000 for a new total not-to-exceed contract amount of $1,530,547.

AMENDMENT NO. 11 TO THE MAINTENANCE SERVICE AGREEMENT BETWEEN THE CITY OF ONTARIO AND BAY ALARM COMPANY

1. Parties and Date.

This Amendment No. 11 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Bay Alarm Company, a Corporation "Contractor". City and Contractor are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Contractor have entered into an agreement entitled "Maintenance Service Agreement" dated July 1, 2020 ("Agreement").

2.2 Amendment Purpose. The City and Contractor desire to amend the Agreement to include the following work in the locations listed on Attachment "A". The scope of work will supply and install panic alarms as well as provide ongoing monthly monitoring services at these locations. The City and Contractor agree to increase the Agreement's compensation by Seventeen Thousand dollars ($17,000) for a total revised not-to-exceed amount of One Million Five Hundred Thirty Thousand Five Hundred Forty-Seven ($1,530,547). The Parties have heretofore entered into the Amendment No. 1 dated April 6, 2021, Amendment No. 2 dated November 15, 2021, Amendment No. 3 dated June 20, 2022, Amendment No. 4 dated November 15, 2022, Amendment No. 5 dated February 21, 2023, and Consent to Assignment Agreement dated June 20, 2022, Amendment No. 6 dated July 1, 2023, Amendment No. 7 dated October 17, 2023, Amendment No. 8 dated July 26, 2024, Amendment No. 9 dated August 20, 2024, and Amendment No. 10 dated October 1, 2024.

2.3 Amendment Authority. This Amendment No.11 is authorized pursuant to Section 3 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.1 of the Agreement is hereby amended in its entirety to read

3.1 Amendment. Section 3.1.1 of the Agreement is hereby amended in its entirety to read as follows:

> 3.1.1 General Scope of Service. Contractor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional Security and Fire Alarm Monitoring services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and Incorporated herein by reference. All Services shall be subject to and performed in accordance with this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state, and federal laws, rules, and regulations.

Exhibit "A" is hereby revised adding Attachment A and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 11, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 11. From and after the date of this Amendment No. 11, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 11.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 11.

3.4 Severability. If any portion of this Amendment No. 11 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Cynthia Heredia-Torres Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 7

SUBJECT: **AMENDMENTS TO THE DESIGN SERVICES AGREEMENT WITH HMC ARCHITECTS FOR THE ONTARIO WELLNESS CAMPUS PROJECT AND THE ONTARIO ARENA PLAZA PROJECT**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager, or his designee, to execute Amendment No. 1 to the Design Services Agreement with HMC Architects, of Ontario, California, to provide On-Call Architectural, Space Planning, and Engineering Design Services for the D&C24-017 Ontario Wellness Campus Project in the amount of $5,377,587 for a total not-to-exceed contract amount of $5,577,587, and
B. Authorize the City Manager, or his designee, to execute Amendment No. 2 to the Design Services Agreement with HMC Architects, of Ontario, California, to provide On-Call Architectural, Space Planning, and Engineering Design Services for the Ontario Arena Plaza Project in the amount of $1,098,740 for a total not-to-exceed contract amount of $6,676,327; and
C. Authorize the City Manager or his designee, to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The proposed Amendment No. 1 to the Design Services Agreement with HMC Architects is in the amount of $5,377,587 for a total not-to-exceed contract amount of $5,577,587. The Fiscal Year 2024-25 Adopted Budget includes appropriations in the Capital Projects - Measure Q Fund for the Ontario Wellness Center Project.

The proposed Amendment No. 2 to the Design Services Agreement with HMC Architects is in the

amount of $1,098,740 for a total not-to-exceed contract amount of $6,676,327. The Fiscal Year 2024-25 Adopted Budget includes partial appropriations in the Capital Projects Fund for the Ontario Arena Plaza project. If approved, appropriations in the Capital Projects Fund will be included in future quarterly budget updates to the City Council for approval as needed.

BACKGROUND & ANALYSIS: On November 19, 2024, the City Council approved Design Services Agreements to five (5) firms, including HMC Architects, for Invitation No. 1832 On-Call Architectural, Space Planning, and Engineering Design Services.

Ontario Wellness Campus Project

The Wellness Campus will serve as the access point to vital services, resources, shelter, and emergency needs in the City. With the intention of expanding the services the Wellness Campus provides, the City is in the process of acquiring two (2) additional motels on either side of the existing 12,250 square foot Access Center. Acquiring these motels will require demolition, renovation, modernization, and new construction to accommodate offices, and emergency and temporary housing units. On October 15, 2024, the City Council approved an amendment to the previous Design Services Agreement with HMC Architects for Design Development Services including conceptual design development and preparation of plans and specifications for the Ontario Wellness Campus Project.

Staff is recommending executing Amendment No. 1 to the Design Services Agreement with HMC to begin design work on the conceptual plans they had previously developed for the Ontario Wellness Campus Project.

Ontario Arena Plaza Project

On June 20, 2022, the Development Advisory Board approved a Development Plan to construct four mixed-use buildings totaling 63,655 commercial square feet and 694 dwelling units on 13.3 acres of land located at 4000 East Ontario Center Parkway within the mixed-use land use district of Piemonte Overlay of the Ontario Center Specific Plan. The overall concept for the approved project is to construct a mixed-use development that encourages entertainment, dining and pedestrian activities by creating spaces for a variety of uses in proximity to each other. The focal feature of this mixed-use development is a 2-acre public Ontario Arena Plaza between the Toyota Arena on the west and the 5-story mixed-use buildings to the east and southeast.

The vision for the Ontario Arena Plaza is to create an engaging space for activities and leisure. The Ontario Arena Plaza should serve as the epicenter for the entertainment district, where people can gather for special events, entertainment and social interaction. If approved, HMC Architects will prepare construction documents for the two wine bars to be constructed within the Ontario Arena Plaza in collaboration with ASM Global (Toyota Arena), Adept (the developer for the mixed-use development), and SWA Group (the designer for the Ontario Arena Plaza conceptual design).

AMENDMENT NO. 1 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND HMC GROUP DBA HMC ARCHITECTS

1. Parties and Date.

This Amendment No. 1 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and **HMC Group dba HMC Architects**, a CORPORATION, "Consultant". City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "**D&C 24-012 On-Call Architectural, Space Planning And Engineering Design Services Agreement"** dated 01/28/25 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to revise the scope of services for D&C24-017 Wellness Campus Site and the not-to-exceed compensation amount by Five Million Three Hundred Seventy-Seven Thousand Five Hundred Eighty-Seven Dollars ($5,377,587) for a total not-to-exceed agreement amount of Five Million Five Hundred Seventy-Seven Thousand Five Hundred Eighty-Seven Dollars ($5,577,587).

2.3 Amendment Authority. This Amendment No. 1 is authorized pursuant to Section 3.37 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.1 and 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

> "3.1.1 Scope of Services. Consultant promises and agrees to furnish to City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional architectural and related services necessary for the full and adequate completion of the Project consistent with the provisions of this Agreement (hereinafter referred to as "Services"). The Services are more particularly described throughout this

Agreement, including Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, any exhibits attached hereto and incorporated herein by reference, and all applicable local, state, and federal laws, rules and regulations. All Services performed by Consultant shall be subject to the sole and discretionary approval of the City, which approval shall not be unreasonably withheld. Additionally, Consultant shall comply with all Federal requirements applicable to the Services as set forth in Exhibit A."

3.10.1 Consultant's Compensation for Basic Services. City shall pay to Consultant, for the performance of all Services rendered under this Agreement, the total not to exceed amount of **Five Million Five Hundred Seventy-Seven Thousand Five Hundred Eighty-Seven Dollars ($5,577,587)** ("Total Compensation"). This Total Compensation amount shall be based upon, and may be adjusted according to, the fee schedule and related terms and conditions attached hereto as Exhibit "B" and incorporated herein by reference. The Total Compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement.

Exhibit A and B is hereby revised in its entirety and added Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 1, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 1. From and after the date of this Amendment No. 1, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 1.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 1.

3.4 Severability. If any portion of this Amendment No. 1 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

HMC DESIGN FOR GOOD Architects

Amendment No. 1

Date: November 21, 2024

Project Name: Ontario Access Center (CO AC)
HMC #2518004-300

AMENDMENT NO. 1 TO OWNER/ARCHITECT AGREEMENT

That certain Owner/Architect Agreement (Agreement) dated July 24, 2024, by and between City of Ontario (Owner) and HMC Group (Architect), with respect to providing Architectural & Engineering Services is hereby amended, modified, and revised as follows:

Per the Agreement dated July 24, 2024, the Scope of Services will be divided into Tasks:

- Task 1 shall be Programming and Conceptual Design of Holt Site Campus
- Task 2 shall be Existing Building Modernization of Motor Inn
- Task 3 shall be New Buildings and Site (Schematic Design through Construction)

F. Compensation

HMC will provide the services outlined in the Scope of Work for Task 3 per the Agreement dated July 24, 2024, for a fixed fee of **Five Million, Three Hundred Seventy-Seven Thousand, Five Hundred Eighty-Seven Dollars ($5,377,587)**.

The fixed fee shall be 11.7% of the estimated construction cost, based on the current budget of approximately Forty-Six Million Dollars ($46,000,000).

Phase	Fee %		Fee
Schematic Design (SD)	15%	$	806,638
Design Development (DD)	25%	$	1,344,397
Construction Documents (CD)	35%	$	1,882,155
Agency Review & Approval (AG)	3%	$	161,328

AMENDMENT NO. 2 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND HMC GROUP DBA HMC ARCHITECTS

1. Parties and Date.

This Amendment No. 2 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and **HMC Group dba HMC Architects**, a Corporation "Consultant". City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled **"D&C 24-012 On-Call Architectural, Space Planning and Engineering Design Services Agreement"** dated January 28, 2025 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement and add the design scope for D&C24-009 Ontario Arena Plaza and increase the not to exceed amount by One Million Ninety-Eight Thousand Seven Hundred Forty Dollars ($1,098,740) for a new total contract amount not-to-exceed Six Million Six Hundred Seventy-Six Thousand Three Hundred Twenty-Seven Dollars ($6,676,327). The parties have heretofore entered into Amendment No. 1 dated March 18, 2025.

2.3 Amendment Authority. This Amendment No. 2 is authorized pursuant to Section 3.37 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.1, and 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

> 3.1.1 Scope of Services. Consultant promises and agrees to furnish to City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional architectural and related services necessary for the full and adequate completion of the Project consistent with the provisions of this Agreement (hereinafter referred to as "Services"). The Services

are more particularly described throughout this Agreement, including Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, any exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations. All Services performed by Consultant shall be subject to the sole and discretionary approval of the City, which approval shall not be unreasonably withheld. Additionally, Consultant shall comply with all Federal requirements applicable to the Services as set forth in Exhibit "A-I."

"3.10.1 Consultant's Compensation for Basic Services. City shall pay to consultant, for the performance of all Services rendered under this Agreement, with the total not to exceed amount of **Six Million Six Hundred Seventy-Six Thousand Three Hundred Twenty-Seven Dollars ($6,676,327)** ("Total Compensation"). This Total Compensation amount shall be based upon proposals and incorporated herein by reference. The total compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement."

Exhibit A is hereby amendment with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 2, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 2. From and after the date of this Amendment No. 2, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 2.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 2.

3.4 Severability. If any portion of this Amendment No. 2 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

[SIGNATURES ON FOLLOWING PAGE]

SIGNATURE PAGE FOR AMENDMENT NO. 2 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND HMC GROUP DBA HMC ARCHITECTS

IN WITNESS WHEREOF, the Parties have entered into this Amendment No. 2 as of the day and year first above written.

Regarding: Proposal for Architectural & Engineering Services
City of Ontario
Arena Restaurant and Bar (ARB)
HMC #2518010-000

Dear Mr. Haes:

HMC Group (HMC) is pleased to submit the following Proposal to provide Architectural, Engineering, and Specialty Consultant Services for the above-mentioned Projects.

A. Proposed Project:

A new two-story Round Bar/Kitchen, approximately 3,200 sq ft across the upper and lower levels. This includes food storage, preparation space, a commercial bar, and utility/support spaces.
A new one-story Wine Bar/Kitchen, approximately 2,800 sq ft. This includes food storage, preparation space, a commercial bar, and utility/support spaces.

B. Site Description:

The new Round Bar and Wine Bar is to be located at East side of Arena, 4000 Ontario Center, Ontario, CA 91764, approximately 40’ away from the Arena Building.

C. Scope of Services:

1. At each phase of design, HMC shall facilitate all-day Milestone Page Turn meeting with the Owner to review milestone deliverables and gather feedback. At the conclusion of each meeting, Owner to provide Notice to Proceed into next phase, which represents an understanding and approval of Scope and Schedule as indicated in the Submittal.
   a. HMC to provide 100% Schematic Design Submittal, which includes design drawings and Architecture/Engineering (A/E) basis of design narratives. Refer to Attachment “D” HMC Production Document Deliverables for additional information.
   b. HMC to provide 100% Design Development Submittal, which includes design development drawings. Refer to Attachment “D” HMC Production Document Deliverables for additional information.
   c. HMC to provide 100% Construction Document Submittal, which includes design construction drawings and specifications. Refer to Attachment “D” HMC Production Document Deliverables for additional information.
2. Obtain City of Ontario Planning, Building Department approval and San Bernadino County Environmental Health Department approval for the Project.

3. Assist with Bidding, which include answering pre-bid RFIs, providing addenda as required, and evaluation of contractor bids.
4. Provide Contract Administration services, HMC anticipates the following:
   a. Attending one (1) preconstruction meeting with City & General Contractor.
   b. Attending approximately twenty (20) weekly Owner, Architect, Contractor (OAC) meetings.
   c. Attending approximately eight (8) Construction Observation visits from the A/E team (if attending OACs in-person, construction observation visits will coincide with OACs).
   d. Responding to approximately one hundred twenty (120) Submittals (shop drawings, product data, etc.).
   e. Responding to approximately sixty (60) Requests for Information (RFI).
   f. Reviewing and approving monthly contractor Pay Applications.
   g. Preparing one (1) A/E Punch List of the construction prior to Owner occupancy.
   h. Reviewing contractor-prepared Closeout Documents (subcontractor and material provider warranties, operations & maintenance manuals, contractor's as-built drawings).

D. Preliminary Schedule:

Refer to Attachment "E" for the Preliminary Project Schedule. This is intended to provide a rough timeline of the project based on known information at this time but is subject to change as additional information is discovered as the project moves forward through the subsequent phases.

Note: The Owner and Architect agree and acknowledge that the performance of the Architect's services may depend upon other parties and circumstances which the Architect cannot control. The schedule and fee, therefore, may be extended by agreement between the Owner and Architect, except where the Architect is solely responsible for Project delays.

E. Assumptions / Exclusions:

a. Services
   a. Basic Services include:
      - Architectural
      - Structural Engineering
      - Mechanical, Plumbing, and Electrical Engineering
   b. Supplemental Services include:
      - Fire Sprinkler and Alarm Engineering
      - Data/Telecom/Low Voltage Engineering
      - Security (Intrusion/CCTV) Engineering
      - Audio-Visual
      - Lighting Design
      - Foodservice Design
      - Water Features/Fountains
      - Commissioning
   c. Specialty consultants other than those listed in this Proposal are excluded.

b. Energy and Sustainability
    a. LEED, WELL, Zero Energy Building, or other sustainable certification(s) of any type related to this Project are excluded.
    b. Detailed on-site renewable energy and/or IAQ management plans are excluded.
    c. QSP monitoring services; horizontal control plans; Standard Urban Stormwater Mitigation Plan (SUSMP), and off-site work is excluded.
    d. QSD services for development of Storm Water Pollution Prevention Plan (SWPPP) is excluded. Fees for submission of SWPPP shall be paid for by Owner.
c. Construction
    a. It is assumed that project delivery method is Design-Bid-Build (DBB).
    b. Construction duration is preliminarily estimated at a maximum of ten (10) calendar months. Should the construction schedule be extended through no fault of the architect, additional services for extended Contract Administration services shall apply.
    c. Construction staking during construction is excluded and shall be provided by General Contractor.
d. Fees
    a. Agency and permit fees are excluded.
    b. Testing and inspection fees are excluded.
e. Deliverables
    a. Development of Record Drawings from Contractor's As-Builts is excluded.
    b. Hard copy prints of Construction Documents and Specifications are excluded.

F. Compensation:

HMC will provide the services listed in the Scope of Services above for a fixed fee of **One Million, Eighty-Eight Thousand, Seven Hundred Forty Dollars ($1,088,740),** based on an estimated construction cost of $7,200,000 consists of Round Bar/Kitchen: $4,800,000 and Wine Bar/Kitchen: $2,400,000.

Architectural and Engineering Fee Structure

Architectural	$557,595
Structural	$48,300
Mechanical / T24 Energy Modeling	$70,380
Plumbing	$74,175
Electrical	$75,900
Total Basic Services	**$826,350**
Fire Sprinkler and Alarm Engineering	$14,835
Data/Telecom/Low Voltage/Security Engineering/ AV	$69,805
Lighting Design	$27,600
Foodservice Design	$74,750
Water Features/Fountains	$42,400
Commissioning	$33,000
Total Supplemental Services	**$262,390**
Total Fee	**$1,088,740**

Compensation Phase Breakdown

Phase	Fee %	Fee
Schematic Design	15%	$163,311
Design Development	20%	$217,748
Construction Documents	35%	$381,059
Agency Review & Approval	5%	$54,437
Bidding & Negotiations	5%	$54,437
Contract Administration	20%	$217,748
Total	**100%**	**$1,088,740**

G. Additional Services:

If Additional Services are required beyond the original Scope of Services, such services described in Attachment "B", HMC will bill on an hourly basis per Attachment "A", HMC Standard Hourly Rate Schedule.

H. Reimbursable Expenses:

Reimbursable expenses are preliminarily estimated not to exceed **Ten Thousand Dollars ($10,000)**. Reimbursable expenses are in addition to compensation for Consulting Services, including printing, plotting, delivery, and other expenses related to Agency review, Bidding, Construction or other Owner requested costs. Expense of fees paid for securing approval of authorities having jurisdiction over the Project. The Architect's compensation shall be computed based on one and one fifteenth (1.15) times the amounts invoiced to the Architect.

Please review this Proposal and if it meets with your approval, please send HMC your Standard Form of Agreement for signature.

If you have any questions or need additional information, please contact me at (626) 826-9108.

Sincerely,

Brandon Gullotti AIA, NCARB
Principal In Charge
HMC Architects

Attachment "B"

ADDITIONAL SERVICES

The Additional Services described in this Attachment are not included in Basic Services and they shall be paid for by the Owner as provided in this Agreement, in addition to the compensation for Basic Services. Additional Services may only be provided if authorized or confirmed in writing by the Owner and Architect.

Project Representation Beyond Basic Services:

1. ***Revisions:*** Making revisions in Drawings, Specifications, Project Manual or other documents when such revisions are:

   a. Inconsistent with approvals or instructions previously given by the Owner;

   b. Required by the enactment, revised interpretation, jurisdictional differences in interpretation, or revision of codes, laws or regulations subsequent to the preparation of such documents, or additional costs caused by delays resulting from such.

2. ***Project Changes:*** Providing services required because of changes in the Project including, but not limited to, size, quality, scope, complexity, the Owner's schedule, or the method of bidding or negotiating and contracting for construction including project phasing or bid packages.

3. ***Change Orders:*** Preparing Drawings, Specifications and other documentation, analysis and supporting data, evaluating Contractor's proposals, and providing other services in connection with Change Orders and directives.

4. ***Default:*** Providing services made necessary by the default or termination of the Contractor, by defects or deficiencies in the Work of the Contractor, or by failure of performance of either the Owner, Contractor or others performing services or providing work on the Project.

5. ***Contractor's Submittals:*** Reviewing a Contractor's submittal out of sequence from the submittal schedule agreed to by the Architect, or multiple reviews of submittals beyond the number of reviews included as Basic Services.

6. ***Contractor's RFI:*** Responding to the Contractor's requests for information where such information is available to the Contractor from a careful study and comparison of the Contract Documents, field conditions, Contractor-prepared coordination drawings, or prior Project correspondence or documentation.

7. ***Claims:*** Providing services in connection with claims submitted by Contractor or others.

8. ***Hearings, Proceedings:*** Providing services in connection with the preparation for, or attendance at, public hearings or other meetings, or legal proceedings, except where the Architect is a party thereto.

Contingent Additional Services

1. ***Existing or Other Facilities:*** Providing services to investigate facilities or existing conditions or to make measured drawings thereof.

2. ***Detailed Estimates:*** Providing detailed estimates of Construction Cost.

3. ***Providing Other Consultants:*** Providing services of consultants, if any, other than those specified as Basic Services under this Agreement.

4. ***Client-Provided Front-End Specifications:*** Providing services made necessary due to process or scope changes resulting from the inclusion of Client-provided front end specifications section.

5. ***Post Completion/Extended Construction:*** Providing services after the original completion date not due to the fault of the Architect or after issuance to the Owner of the final Certificate for Payment, or thirty (30) days after the date of Substantial Completion of the Work, whichever is earlier.

6. ***Project Hold/Resumption:*** If the Project is placed on hold by the Owner for more than 90 days due to circumstances beyond the direct control of the Architect, the schedule shall be adjusted and the Architect's compensation shall be equitably adjusted to provide for expenses incurred in the interruption and resumption of the Architect's services.

7. ***Other Additional Services:*** Providing any other services not otherwise included in this Agreement.

ATTACHMENT "D"

HMC PRODUCTION DELIVERABLES

100% Schematic Design Submittal

- **Project Schedule**
- **Design, Energy Conservation, Code Analysis**
- **Architectural Requirements**

  Floor Plans

  - Room names with cross reference to sizes required by project program.
  - Overall dimensions, grid, partition, and column layouts with door & window openings.
  - Demolition plan if required by the project.

  Elevations and Sections

  - Exterior elevations depicting height and relationship to natural and graded ground contours.
  - Sections as needed to explain the structure or its design features.

  Code Analysis

  - Allowable building area calculations in accordance with construction type, side yards, setbacks, fire sprinkler increases, zoning code floor area ratios if applicable and building height compliance.
  - Floor plans depicting exit system, occupancy and area separations.
  - Mixed occupancy ratios if applicable.
  - Calculated plumbing fixture counts.

  Architectural Narrative

  - General description of architectural materials and building systems

- **Structural Requirements**
  - Written description of the recommended structural system and the basis of recommendation over other approaches.
  - Conceptual foundation and framing plans.

- **Plumbing Requirements**
  - Written analysis of the calculated load demands and capacity of existing systems and available utility services – including fire service, sanitary systems, natural gas, domestic water, storm retention and release.
  - Plumbing plans with diagrammatic water service, storage, roof drainage, fire risers if applicable and invert elevations at points of connection with site utilities.

- **HVAC Requirements**
  - Written analysis of the calculated loads of systems. Description of recommended system and the basis of recommendation over other approaches.
  - Conceptual single-line mechanical diagram showing major ducts and equipment. Identification and sizes of primary service ducts, locations and weights of major equipment items including cooling towers, chillers, pumps, fans, air-handling units, compressors and related items.
  - Capacity of existing systems if applicable based on record drawings, field inspections and/or test reports.
  - Description of hoods and ducting with relationship between exhaust and fresh air supply.

- **Electrical & Telecommunications Requirements**
  - Site electrical plan, indicating method of service for electrical power, telecommunications, and fire alarm systems.
  - Single line diagram showing:
    1. Method of service.
    2. Major transformers and transformer substations.
    3. Major switchboards, motor control centers, panels and distribution boards.
    4. Major components of emergency power.

5. Major components of telecommunications systems – BDF, IDF, point of connection to existing backbone if applicable.
- Basis of design narrative report for lighting approach and other applicable systems such as public address, fire alarm, security, call systems and pneumatic tube.

100% Design Development Submittal

- **Updated Project Schedule**
- **Updated Design, Energy Conservation, Code Analysis**
- **Expanded Architectural Requirements**

Floor Plans

- Room names with cross reference to sizes required by project program with defined corridors, lobbies, stairs, elevators, toilet rooms, janitors' closets, and mechanical/electrical equipment rooms.
- Overall dimensions, grid, partition, and column layouts with door & window openings with provisions for making facilities accessible to and usable by the disabled.
- Location of plumbing fixtures such as floor drains, drinking fountains, showers, fire-hose cabinets, fire extinguisher cabinets, fume & exhaust hoods.
- Major built-in features such as fixed seating, food service equipment, display cases, counters, shelves, lockers, laboratory workspaces, and casework.
- Contract or movable furniture systems layouts indicating differences between fixed and movable furniture systems and equipment.
- Floor and wall finish patterns and accents.
- Demolition plan if required by the project.

Reflected Ceiling Plans

- Lighting layouts, ceiling systems and design elements such soffits, troughs, vaults, and coffers.

Roof Plans

- Indicating roof mounted equipment, slopes, ridges, drains, roof screens, parapet heights, roofing material, roof hatches and other associated equipment.

Elevations and Sections

- Exterior elevations depicting height and relationship to natural and graded ground contours.
- Depict all building elements including penthouses, entrances, canopies, windows, doors, stairs, platforms, louvers, stacks, and similar items with indicated finish of materials.
- Sections as needed to explain the structure or its design features. Including longitudinal and traverse sections for each major area, indicating floor elevations, ceiling heights, tunnels and unexcavated areas, basements, rooflines, and parapets, passages between buildings if applicable – sections cross referenced to floor plans.
- Coordinate and indicate HVAC distribution and hood venting.

Interior Elevations

- Elevations of all major rooms and design features with details to explain concept and design.

Schedules

- Door Schedule denoting size, type, frame, rating assembly, material and special comments.
- Window Schedule denoting size, type, frame, glazing, window covering if applicable and special comments.
- Finish Schedule denoting material finish of floor, floor base, wall & ceiling.

Updated Code Analysis

- Allowable building area calculations in accordance with construction type, side yards, setbacks, fire sprinkler increases, zoning code floor area ratios if applicable and building height compliance.
- Floor plans depicting exit system, occupancy and area separations.
- Mixed occupancy ratios if applicable.
- Calculated plumbing fixture counts.
- Illustrate code implications from preliminary review and interpretations of agencies.

Enlarged Room Plans

- Equipment rooms indicating layout of equipment to ensure sufficient space has been allocated.
- Toilet Rooms and support services rooms.
- Special design feature rooms.

Outline Specifications

- Updated and more detailed description for all finishes and materials, building components and systems as compared with the schematic design documents submittal - including specifications for structural, mechanical, plumbing, electrical/telecommunications and building support systems.
- Division 01- General Requirements.

- **Structural Requirements**
  - Updated written description of the recommended structural system and the basis of recommendation over other approaches.
  - Foundation and framing plans based on load calculations and seismic analysis.

- **Plumbing Requirements**
  - Updated written analysis of the calculated load demands and capacity of existing systems and available utility services – including fire service, sanitary systems, natural gas, domestic water, storm retention and release.
  - Plumbing plans with diagrammatic water service, storage, roof drainage, fire risers if applicable and invert elevations at points of connection with site utilities, including sizes based on calculations.
  - Riser diagrams if applicable.

- **HVAC Requirements**
  - Updated written analysis of the calculated loads of systems. Description of recommended system and the basis of recommendation over other approaches.
  - Double line mechanical plan showing primary duct layout and single line secondary supply and return distribution. Identification of sizes and bottom of duct elevations of primary service ducts, locations and weights of major equipment items including cooling towers, chillers, pumps, fans, air-handling units, compressors and related items.
  - Supply and return zones for each occupancy.
  - Capacity of existing systems if applicable based on record drawings, field inspections and/or test reports.
  - Hoods, exhaust fans and ducting with destination points of exhaust.
  - Equipment schedules.
  - Mechanical rooms depicting equipment demonstrating that sufficient space has been allocated.

- **Electrical & Telecommunications Requirements**
  - Site electrical plan, indicating method of service for electrical power, telecommunications, and fire alarm systems.
  - Updated Single line diagram showing:
    1. Method of service.
    2. Major transformers and transformer substations.
    3. Major switchboards, motor control centers, panels and distribution boards.
    4. Major components of emergency power.
    5. Major components of telecommunications systems – BDF, IDF, point of connection to existing backbone if applicable.
  - Electrical floor plan indicating distribution layout of electrical power, signal and telecommunications.
  - Lighting plan and fixture schedule.
  - Updated basis of design narrative report for lighting approach and other applicable systems such as public address, fire alarm, security, call systems and pneumatic tube.

100% Construction Documents Submittal

Production

The following outline of documents represent the minimum construction document phase submittals which shall include working drawings and specifications from all disciplines.

Architectural Drawings

- Title Sheet
- Site & building demolition plan where project applicable
- Site Plan
- Phasing site and floor plans where project applicable
- Life/Safety plans including applicable code analysis and tabulations
- Key, reference and enlarged floor plans
- Reflected ceiling plans

- Roof Plans
- Exterior elevations and building sections
- Furniture and equipment plans where project applicable
- Wayfinding, signage plans where project applicable
- Interior and casework elevations
- Partition, ceiling, and design feature details
- Door, window and interior finish schedules
- Enlarged wall sections
- Stair and elevator plans, sections and details where project applicable
- Materials board – updated from design development phase.
- Finish and Furniture Sample Binders
- Detail of anchorage for all fixed equipment in accordance with building code requirements.
- Stamp all drawings and specifications as required by law by architect of record.

Structural Drawings

- Foundation plans.
- Framing plans.
- Building sections.
- Framing and column schedules.
- Details of connections, special assemblies and expansion, drift and seismic joints.
- Details of structural framing systems for support of nonstructural components and equipment.
- Structural drawings accompanied with computations, stress diagrams, and other pertinent data.

Plumbing Drawings

- Site utility sewer lines sized with invert elevations at points of connection.
- Building waste line layouts, sized with vent stacks and connections to drains, fixtures and equipment.
- Building hot & cold water supply layouts, sized with circulation mains, tanks, branches, risers and connections to fixtures and equipment.
- Riser diagrams for supply and waste systems.
- Fire extinguishing equipment, risers and standpipes where project applicable.
- Plumbing fixtures, tanks, and pumps with drainage and supply connections.
- Layout and size of natural gas, vacuums and medical gas systems where project applicable.
- Detail sections demonstrating coordination of structural, HVAC and piping systems.
- Plumbing drawings indicating complete plumbing system in detail and shall include methods for fastening equipment to the structure to resist seismic forces.

HVAC Drawings

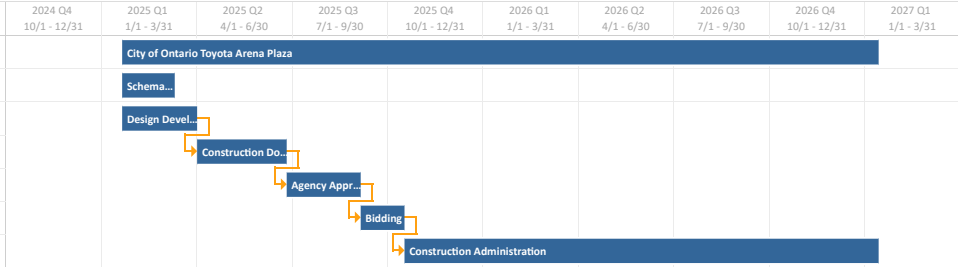
- Schedules and legends
- Floor plans, sections indicating air and piping systems including all branch distribution.
- Sections, details and enlarged floor plans depicting layouts of mechanical equipment rooms.
- Air balance schedule for outside, supply, return, and exhaust air and sections demonstrating sufficient clearances and volumes for air flows and access of equipment where project applicable.
- Flow diagrams for chilled water, condenser water, and boilers where project applicable.
- Air riser diagrams where project applicable.
- Plans and detail sections depicting HVAC systems and branches with duct and pipe sizes for heating, steam, refrigeration, exhaust and ventilation where project applicable.
- Auxiliary HVAC required for 24/7 operating equipment service systems where project applicable.
- Energy calculations.
- HVAC drawings shall indicate the complete heating, ventilating, and air-conditioning systems in detail and shall include methods for fastening equipment to the structure to resist seismic forces.

Electrical and Telecommunication Drawings

- Electrical service to building from public utility, with size of feeders
- Site and building transformers locations
- Main switchboard power panels, light panels and associated equipment.
- Feeder and conduit sizes.
- Site and building light fixtures, receptacles, switches and power outlets.
- Telecommunication system, routing, distribution, terminal cabinets, backboards and coordinated mechanical requirements.
- Fire alarm system and connection to existing system where project applicable.
- Emergency power, generator, transfer switches, fuel tanks and auxiliary service where project applicable.
- Electrical drawings shall indicate sufficient level of detail to illustrate connections, routings, and other items in complex areas. All wiring shall be final sized. Detailed methods for fastening

equipment to the structure to resist seismic forces shall be indicated – drawings shall indicate feeder and conduit sizes, schedule of feeder breakers or switches, light fixtures, receptacles, switches, and power outlets, BDF & IDF terminal racks/cabinets and/or backboards, cabling/wiring risers and routing.

Specifications



- CSI format specifications from each respective discipline including Division- 01, General Conditions and Supplementary Conditions. Specifications shall demonstrate adherence with client's standards and contracted vendors and suppliers where project applicable.
- Bidding Requirements, Notice to Bidders and Bid Forms.

RECOMMENDATION: That the City Council take the following actions:

A. Authorize a cooperative purchase agreement for D&C23-011 Professional Baseball Stadium with BodEV, Inc., of La Habra, California, for the purchase and installation of ChargePoint electric vehicle (EV) chargers for the Professional Baseball Stadium, Professional Stadium Parking Structure, and the Ontario Sports Empire in the amount of $1,189,758 plus a contingency amount of $119,000 for a total contract amount not-to-exceed $1,308,758 consistent with the terms and conditions of the Sourcewell Contract Number 042221-CPI; and
B. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to agreements, assessments, easements, reduction of retention accounts, contracts amendments within the authorization limits, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The proposed contract with BodEV, Inc. is in the amount of $1,189,758 plus a contingency amount of $119,000 for a total not-to-exceed contract amount of $1,308,758. The Fiscal Year 2024-25 Adopted Budget includes appropriations in the Capital Projects-Measure Q Fund for the purchase and installation of ChargePoint EV chargers for the Regional Sports Complex-Professional Baseball Stadium project.

BACKGROUND & ANALYSIS: On August 6, 2024, the City Council approved the Environmental Impact Report for the Ontario Sports Empire. The Ontario Sports Empire includes a new Professional Baseball Stadium located at the Northwest corner of Riverside Drive and Hellman

Avenue. On October 15, 2024, the City Council awarded 24 Construction Contracts for the Professional Baseball Stadium, including a Construction Contract for Bid No. 1829 Professional Baseball Stadium Parking Structure. The construction of the Professional Baseball Stadium, Professional Stadium Parking Structure, and the Ontario Sports Empire is underway with the Professional Baseball Stadium opening in March 2026.

Per the California Green Building Code, new non-residential facilities with over 201 parking spaces must make 20% of the total number of parking spaces EV capable and 25% of those parking spaces ready for use on day one. If approved, BodEV, Inc. will supply 81 EV chargers that will be ready and operable for use as of day one for the Ontario Sports Empire

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

Sourcewell

Solicitation Number: RFP #042221

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and ChargePoint, Inc., 254 E. Hacienda Ave., Campbell, CA 95008-6617 (Vendor).

Sourcewell is a State of Minnesota local government agency and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada. Sourcewell issued a public solicitation for Electric Vehicle Supply Equipment and Related Services from which Vendor was awarded a contract.

Vendor desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires July 20, 2025, unless it is cancelled sooner pursuant to Article 22. This Contract may be extended up to one additional one-year period upon request of Sourcewell and with written agreement by Vendor.

C. SURVIVAL OF TERMS. Articles 11 through 14 survive the expiration or cancellation of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Vendor will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above. Vendor's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

All Equipment and Products provided under this Contract must be new/current model. Vendor may offer close-out or refurbished Equipment or Products if they are clearly indicated in Vendor's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Vendor warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Vendor warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Vendor's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that is effective past the expiration of the Vendor's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution, Vendor will make available to Sourcewell a means to validate or authenticate Vendor's authorized dealers, distributors, and/or resellers relative to the Equipment, Products, and Services related to this Contract. This list may be updated from time-to-time and is incorporated into this Contract by reference. It is the Vendor's responsibility to ensure Sourcewell receives the most current version of this list.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced as stated in Vendor's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Vendor must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery.

Vendor must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Vendor in breach of this Contract if the Vendor intentionally delivers substandard or inferior Equipment or Products. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Vendor as soon as possible and the Vendor will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

B. SALES TAX. Each Participating Entity is responsible for supplying the Vendor with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Vendor may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Vendor determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Vendor may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Contract Administrator. This form is available from the assigned Sourcewell Contract Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

A fully executed Sourcewell Price and Product Request Form will become an amendment to this Contract and be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Vendor understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Vendor is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Vendor's employees may be required to perform work at government-owned facilities, including schools. Vendor's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Vendor that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Vendor. Typically, a Participating Entity will issue an order directly to Vendor. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration of this Contract; however, Vendor performance, Participating Entity payment, and any applicable warranty periods or other Vendor or Participating Entity obligations may extend beyond the term of this Contract.

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

Vendor's acceptable forms of payment are included in Attachment A. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Vendor, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entitles may require the use of a Participating Addendum; the terms of which will be worked out directly between the Participating Entity and the Vendor. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements) not addressed in this Contract, the Participating Entity and the Vendor may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

D. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Vendor in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the goods to be purchased;
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements; or
3. Vendor commits any material breach of this Contract or the additional terms agreed to between the Vendor and a Participating Entity.

E. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Vendor will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

B. BUSINESS REVIEWS. Vendor must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Vendor must provide a contract sales activity report (Report) to the Sourcewell Contract Administrator assigned to this Contract. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Vendor must submit a report indicating no sales were made).

The Report must contain the following fields:

- Customer Name (e.g., City of Staples Highway Department);
- Customer Physical Street Address;
- Customer City;
- Customer State/Province;
- Customer Zip Code;
- Customer Contact Name;
- Customer Contact Email Address;
- Customer Contact Telephone Number;
- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Vendor.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Vendor will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Vendor may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Vendor will submit payment to Sourcewell for two percent (2%) multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Vendor's name and Sourcewell-assigned contract number in the memo; and must be mailed to the address above "Attn: Accounts Receivable" or remitted electronically to Sourcewell's banking institution per Sourcewell's Finance department instructions. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

Vendor agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Vendor is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Vendor in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Vendor's Authorized Representative is the person named in the Vendor's Proposal. If Vendor's Authorized Representative changes at any time during this Contract, Vendor must promptly notify Sourcewell in writing.

10. AUDIT, ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. AUDIT. Pursuant to Minnesota Statutes Section 16C.05, subdivision 5, the books, records, documents, and accounting procedures and practices relevant this Agreement are subject to examination by Sourcewell or the Minnesota State Auditor for a minimum of six years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

B. ASSIGNMENT. Neither the Vendor nor Sourcewell may assign or transfer any rights or obligations under this Contract without the prior consent of the parties and a fully executed assignment agreement. Such consent will not be unreasonably withheld.

C. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been fully executed by the parties.

D. WAIVER. If either party fails to enforce any provision of this Contract, that failure does not waive the provision or the right to enforce it.

E. CONTRACT COMPLETE. This Contract contains all negotiations and agreements between Sourcewell and Vendor. No other understanding regarding this Contract, whether written or oral, may be used to bind either party. For any conflict between the attached Proposal and the terms set out in Articles 1-22, the terms of Articles 1-22 will govern.

F. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. LIABILITY

Vendor must indemnify, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees, arising out of the performance of this Contract by the Vendor or its agents or employees; this indemnification includes injury or death to person(s) or property alleged to have been caused by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications.

12. GOVERNMENT DATA PRACTICES

Vendor and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell under this Contract and as it applies to all data created, collected, received, stored, used, maintained, or disseminated by the Vendor under this Contract.

If the Vendor receives a request to release the data referred to in this article, the Vendor must immediately notify Sourcewell and Sourcewell will assist with how the Vendor should respond to the request.

13. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:
   a. Sourcewell grants to Vendor a royalty-free, worldwide, non-exclusive right and license to use theTrademark(s) provided to Vendor by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Vendor.
   b. Vendor grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Vendor's Trademarks in advertising and promotional materials for the purpose of marketing Vendor's relationship with Sourcewell.
2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to its and their respective distributors, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and promotional materials for the purpose of marketing the Parties' relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.
3. *Use; Quality Control.*

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

a. Sourcewell must not alter Vendor's Trademarks from the form provided by Vendor and must comply with Vendor's removal requests as to specific uses of its trademarks or logos.

b. Vendor must not alter Sourcewell's Trademarks from the form provided by Sourcewell and must comply with Sourcewell's removal requests as to specific uses of its trademarks or logos.

c. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's Trademarks only in good faith and in a dignified manner consistent with such party's use of the Trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

4. As applicable, Vendor agrees to indemnify and hold harmless Sourcewell and its Participating Entities against any and all suits, claims, judgments, and costs instituted or recovered against Sourcewell or Participating Entities by any person on account of the use of any Equipment or Products by Sourcewell or its Participating Entities supplied by Vendor in violation of applicable patent or copyright laws.

5. Termination. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of vendors which may be used until the next printing). Vendor must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Vendor individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Materials should be sent to the Sourcewell Contract Administrator assigned to this Contract.

D. ENDORSEMENT. The Vendor must not claim that Sourcewell endorses its Equipment, Products, or Services.

14. GOVERNING LAW, JURISDICTION, AND VENUE

Minnesota law governs this Contract. Venue for all legal proceedings out of this Contract, or its breach, must be in the appropriate state court in Todd County or federal court in Fergus Falls, Minnesota.

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

15. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

16. SEVERABILITY

If any provision of this Contract is found to be illegal, unenforceable, or void then both Sourcewell and Vendor will be relieved of all obligations arising under such provisions. If the remainder of this Contract is capable of performance, it will not be affected by such declaration or finding and must be fully performed.

17. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Vendor will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Vendor may escalate the resolution of the issue to a higher level of management. The Vendor will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Vendor must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Vendor fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed will be borne by the Vendor.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

Written notice of default and a reasonable opportunity to cure must be issued by the party claiming default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

18. INSURANCE

A. REQUIREMENTS. At its own expense, Vendor must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*
Workers' Compensation: As required by any applicable law or regulation.
Employer's Liability Insurance: must be provided in amounts not less than listed below:
Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Vendor will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.
Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for Products-Completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Vendor will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.
Minimum Limits:
$1,000,000 each accident, combined single limit

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

4. *Umbrella Insurance*. During the term of this Contract, Vendor will maintain umbrella coverage over Workers' Compensation, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

5. *Network Security and Privacy Liability Insurance*. During the term of this Contract, Vendor will maintain coverage for network security and privacy liability. The coverage may be endorsed on another form of liability coverage or written on a standalone policy. The insurance must cover claims which may arise from failure of Vendor's security resulting in, but not limited to, computer attacks, unauthorized access, disclosure of not public data – including but not limited to, confidential or private information, transmission of a computer virus, or denial of service.

Minimum limits:
$2,000,000 per occurrence
$2,000,000 annual aggregate

Failure of Vendor to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Vendor must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Contract Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf.

Failure to request certificates of insurance by Sourcewell, or failure of Vendor to provide certificates of insurance, in no way limits or relieves Vendor of its duties and responsibilities in this Contract.

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Vendor agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Vendor's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Vendor, and products and completed operations of Vendor. The policy provision(s) or endorsement(s) must further provide that coverage is primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds.

D. WAIVER OF SUBROGATION. Vendor waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

insurance applicable to the Vendor or its subcontractors. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Vendor or its subcontractors. Where permitted by law, Vendor must require similar written express waivers of subrogation and insurance clauses from each of its subcontractors.

E. UMBRELLA/EXCESS LIABILITY/SELF-INSURED RETENTION. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies), or self-insured retention.

19. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Vendor must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Vendor conducts with Sourcewell and Participating Entities.

20. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Vendor certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Vendor declares bankruptcy, Vendor must immediately notify Sourcewell in writing.

Vendor certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Vendor further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

21. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Participating Entities that use United States federal grant or FEMA funds to purchase goods or services from this Contract may be subject to additional requirements including the procurement standards of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 C.F.R. § 200. Participating Entities may also require additional requirements based on specific funding specifications. Within this Article, all

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

references to “federal” should be interpreted to mean the United States federal government. The following list only applies when a Participating Entity accesses Vendor’s Equipment, Products, or Services with United States federal funds.

A. EQUAL EMPLOYMENT OPPORTUNITY. Except as otherwise provided under 41 C.F.R. § 60, all contracts that meet the definition of “federally assisted construction contract” in 41 C.F.R. § 60-1.3 must include the equal opportunity clause provided under 41 C.F.R. §60-1.4(b), in accordance with Executive Order 11246, “Equal Employment Opportunity” (30 FR 12319, 12935, 3 C.F.R. §, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, “Amending Executive Order 11246 Relating to Equal Employment Opportunity,” and implementing regulations at 41 C.F.R. § 60, “Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor.” The equal opportunity clause is incorporated herein by reference.

B. DAVIS-BACON ACT, AS AMENDED (40 U.S.C. § 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. § 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 C.F.R. § 5, “Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction”). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland “Anti-Kickback” Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 C.F.R. § 3, “Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States”). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency. Vendor must be in compliance with all applicable Davis-Bacon Act provisions.

C. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. § 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations (29 C.F.R. § 5). Under 40 U.S.C. § 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence. This provision is hereby incorporated by reference into this Contract. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

D. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT. If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 C.F.R. § 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency. Vendor certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Vendor must comply with applicable requirements as referenced above.

E. CLEAN AIR ACT (42 U.S.C. § 7401-7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. § 1251-1387). Contracts and subgrants of amounts in excess of $150,000 require the non-federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. § 7401- 7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. § 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Vendor certifies that during the term of this Contract will comply with applicable requirements as referenced above.

F. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689). A contract award (see 2 C.F.R. § 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 C.F.R. §180 that implement Executive Orders 12549 (3 C.F.R. § 1986 Comp., p. 189) and 12689 (3 C.F.R. § 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. Vendor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency.

G. BYRD ANTI-LOBBYING AMENDMENT, AS AMENDED (31 U.S.C. § 1352). Vendors must file any required certifications. Vendors must not have used federal appropriated funds to pay any

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Vendors must disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the non-federal award. Vendors must file all certifications and disclosures required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352).

H. RECORD RETENTION REQUIREMENTS. To the extent applicable, Vendor must comply with the record retention requirements detailed in 2 C.F.R. § 200.333. The Vendor further certifies that it will retain all records as required by 2 C.F.R. § 200.333 for a period of 3 years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

I. ENERGY POLICY AND CONSERVATION ACT COMPLIANCE. To the extent applicable, Vendor must comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

J. BUY AMERICAN PROVISIONS COMPLIANCE. To the extent applicable, Vendor must comply with all applicable provisions of the Buy American Act. Purchases made in accordance with the Buy American Act must follow the applicable procurement rules calling for free and open competition.

K. ACCESS TO RECORDS (2 C.F.R. § 200.336). Vendor agrees that duly authorized representatives of a federal agency must have access to any books, documents, papers and records of Vendor that are directly pertinent to Vendor's discharge of its obligations under this Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right also includes timely and reasonable access to Vendor's personnel for the purpose of interview and discussion relating to such documents.

L. PROCUREMENT OF RECOVERED MATERIALS (2 C.F.R. § 200.322). A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. § 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

DocuSign Envelope ID: 70B60DB7-D64E-41C6-9705-04DD85F6669A

22. CANCELLATION

Sourcewell or Vendor may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Vendor's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	

7	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	ChargePoint was founded in 2007 with a single mission in mind – to make EV charging easy and convenient so that everyone feels confident in making the transition to electric transportation. We are one of the only EV charging technology companies that designs, manufacturers, and sells the entire ecosystem of EV charging needs – hardware, software, and services – in one seamless solution. This integrated approach allows ChargePoint to offer an unsurpassed EV driver experience while ensuring that station owners have all the tools and features necessary to keep their stations up and running while aligned with their particular use case. ChargePoint operates across a broad range of end customers and charging use cases including individual homeowners, commercial workplaces, fleets, municipalities, retail, auto OEMs, and more. Our station management software and energy management solutions help people and businesses shift away from fossil fuels and manage growing demand for EV charging. The ChargePoint mobile app, the highest rated app in its segment, allows EV drivers to easily find charging stations, review prices and availability, authenticate, and pay for charging sessions on our network wherever their journey takes them. ChargePoint advocacy and partnership with a variety of EV stakeholders and policy groups throughout the US helps pave the way for widespread EV adoption. ChargePoint has built its solution upon four core principles in support of making the charging experience easy, flexible, and efficient: 1. Scale: Ability to scale from small scale pilots to large scale adoption across multiple sites. 2. Experience: Over a decade of experience in building an effortless charging experience for all. 3. Quality: Reliable and safe charging solutions utilizing industry standards and evaluated using ChargePoint's own Advanced Testing Facility. 4. Service: Best in class services for every mission, including remote monitoring and equipment uptime guarantees. Electric mobility is the smart choice and ChargePoint is excited about our role in helping to build the new fueling network. ChargePoint has more than 110,000 activated places to charge on its network, with access to an additional 160,000 public places to charge through roaming integrations with other major networks. Below are just a few of the exciting milestones achieved as we build out the new fueling network: + More than 88,815,316 charges delivered + Drivers plug into a ChargePoint® network approximately every 2.0 seconds + Drivers have avoided more than 400 liters of gasoline, 283,855,743 kgs of CO2 emissions and 298,795,235 kgs of GHG emissions + More than 4,386,000,000 electric kilometers driven on the ChargePoint Network + ChargePoint stations have dispensed more than 711,469 Megawatt hours (MWh) of electric fuel ChargePoint employs a field, inside and channel sales team that collectively oversee all new and existing customer sales opportunities (ChargePoint employees).
8	What are your company's expectations in the event of an award?	ChargePoint is currently a qualified Sourcewell vendor of EV charging solutions and we would expect similar activities if granted a continuation of that status. As Sourcewell members inquire about purchasing EVSE and related services provided under this contract, we anticipate that Sourcewell would direct those members to ChargePoint where we can assist the member in identifying the best solution, and the best buying and installation path to fit their needs. ChargePoint and/or our channel partners would be able to deliver all of the charging station needs and software solutions described herein. ChargePoint will also proactively promote the contract. As the industry leader, ChargePoint has experience deploying large scale programs across North America and has the resources necessary to quickly train staff and partners on such initiatives. ChargePoint will continue to support listing of the opportunity on its popular EV charger incentives website, conduct marketing campaigns to raise awareness of the opportunity, and support awareness training of our various channel partners and electrical contractors to broaden the number of entities helping to conduct outreach and support Sourcewell members.

9	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	ChargePoint has developed thousands of established commercial customers and have shipped more than 100,000 charging ports, providing a solid revenue pipeline and financial standing. ChargePoint has raised over $550 million in investment funding prior to becoming a public company from some of the largest and best-known companies including: American Electric Power, Quantum Energy Partners, Linse Capital, Daimler AG, Rho Capital, Braemar Energy Ventures, Canada Pension Plan (CCPIB), Siemens, Constellation Technology Ventures, Chevron Technology Ventures, and BMW. In February of 2021, ChargePoint became the world's first publicly traded global EV charging network when we were listed on the New York Stock Exchange (NYSE) under the stock symbol CHPT. At the close of the transaction to become a publicly traded company, ChargePoint had approximately $615 million in cash (prior to payment of its outstanding term loan), which it anticipates will fund ongoing operations and to support the expansion of the Company's commercial, fleet and residential businesses in North America and Europe. Please refer to the following link for additional information and financials associated with investor relations: https://investors.chargepoint.com/overview/default.aspx	*
10	What is your US market share for the solutions that you are proposing?	ChargePoint has an estimated ~70% market share of networked public L2 chargers within North America.	*
11	What is your Canadian market share for the solutions that you are proposing?	ChargePoint has an estimated ~70% market share of networked public L2 chargers within North America.	*
12	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	ChargePoint has not petitioned for bankruptcy protection.	*
13	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	ChargePoint is best described as a manufacturer and service provider. ChargePoint designs and develops a turnkey EVSE solution: we design and manufacturer our own networked charging stations, develop cloud-based network management software, provide driver app and web portal analytics, and maintain dedicated driver and station owner support teams. ChargePoint has a national direct sales force including regionally based teams and corporate inside sales department. Support activities are out of our Arizona facility. All direct Sales and Support are employees of ChargePoint. In addition, ChargePoint also has a full, local and national, network of partners across the US that we engage for sales, installation, and maintenance depending on their discipline. Our partners are not employees of ChargePoint. ChargePoint intends to be a single vendor contact for Sourcewell members from project planning to sales, installation, and station support. If members require turnkey equipment sales and installation services, ChargePoint would likely work together with an appropriate channel partner to provide the desired proposal structure.	*
14	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	ChargePoint's local and national network of partners across the US and Canada are trained and certified on the installation of our products through our Training and Certification program. All of our partners have licensed electricians on-staff or maintain partnerships with such electricians. Sourcewell members have the option of using their own licensed electrician for installation of ChargePoint stations. ChargePoint has installation manuals and videos available to help facilitate a successful install. In this case, ChargePoint would need to validate the installation prior to activating an Assure warranty for equipment maintenance and support; this is a simple review and approval of the work performed.	*
15	Provide all "Suspension or Debarment" information that has applied to your organization during the past ten years.	ChargePoint has never been suspended or disbarred.	*

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *	
16	Describe any relevant industry awards or recognition that your company has received in the past five years	ChargePoint Awards + 2019 London Business Awards: Social Impact International Company • Acterra Award: Environmental Innovation 2018 Global Cleantech Hall of Fame + 2017 East Bay Clean Cities, Clean Air Champion Award Architizer A+ Award Popular Choice Winner: Smart Home Category • Electrek Best of CES 2017: Best EV Accessory + 2016 Edison Awards: Silver in the Electric Energy & Propulsion Systems category Climate Change Business Journal: Business Model Innovation for Energy and Carbon Management + 2015 United Nations: Momentum for Change Goldman Sachs: 100 Most Intriguing Entrepreneurs Verizon: Supplier Award for Environmental Excellence Smart Grid Today: 2015 Smart Grid Pioneer Global Cleantech 100 winner for 6 years running + 2014 CNBC: Disruptor 50: The End of the Gas Station? 17	What percentage of your sales are to the governmental sector in the past three years	In the past three years is approximately 20% of our sales are in the government sector.	*
18	What percentage of your sales are to the education sector in the past three years	In the past three years is also approximately 10% of our sales are from the education sector.	*
19	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	ChargePoint is listed on numerous states, provincial and cooperative purchasing contracts, either directly or indirectly via channel partners. It is likely that every state or province where an EVSE contract or authorized vendor list exists, ChargePoint's products are available either directly or through authorized channel partners. As a privately held company, ChargePoint does not release financial detail related to customer transactions.	*
20	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	+ ChargePoint holds a Kinetic GPO contract ($0) + ChargePoint holds an Equalis Group/Sourcing Alliance contract ($0)	*

Table 4: References/Testimonials

Long Beach Community College	Education	California - CA	Mix of CT4000	Various, up to $430k	$500k	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	
23	Sales force.	ChargePoint has over 50 employees in sales. ChargePoint has its own regionally based outside sales teams covering every state within the US and all of the provinces in Canada. We also have dedicated sales teams for federal, fleet and public sectors. Our outside sales team is empowered to travel safely anywhere within their territory to meet with Sourcewell member onsite. They are also capable of hosting online webinars and training sessions when needed. In addition to our outside sales team, we also have corporate based inside sales teams. Through our marketing efforts, existing client base, and market reputation, we receive a significant number of inbound inquiries. To streamline this process for customers, we have a designated inside sales team devoted to all inbound calls and inquiries from existing and prospective clients. Having a designated team handling these inbound phone calls ensures inquiries are handled quickly and efficiently. Once a call is answered and qualified, the inside salesperson connects the customer with the local regional sales representative. The regional sales representative will work with the customer from this point. We also have an inside sales team dedicated to outbound calls. This team could be focused on proactive outreach to Sourcewell members and will also be following up on leads that are generated through various marketing initiatives. ChargePoint also has a team of Solutions Engineers and complex project support resources that can assist in any presale technical education required to get help Sourcewell members understand their EV charging options and ultimately develop an optimized deployment. After deployment, ChargePoint also has a team of Customer Success Managers (CSMs) who look after all existing customers and would make sure Sourcewell members are getting the most out of their ChargePoint solutions. As you know, ChargePoint has held an active Sourcewell award since 2018 and has always been eager to partner with Sourcewell to perform joint marketing or any other contract development activity believed to drive additional success in all forms. Upon securing a new contract, ChargePoint would be pleased to work with Sourcewell to perform a "relaunch" with the intent of building new momentum around the refreshed award. As an example, ChargePoint could leverage our marketing team to run campaigns to generate interest and promote Sourcewell. This has been a productive approach for other initiatives, such as grants that we have been awarded. Our go-to-market approach is quick and seamless which creates a simple process for clients and partners.	*

24	Dealer network or other distribution methods.	ChargePoint has a network of over 65 Value Added Resellers located throughout the US and Canada. These resellers are capable of on-site evaluation, installation, installation quotation, and EV stations sales. A subset of these partner are also Operations and Maintenance (O&M) partners as described below. ChargePoint has a network of over 2,000 certified installers and 13 O&M (Operations & Maintenance) partners located through the United States and Canada who are qualified to perform engineering, permitting, and construction services for any type of EVSE. ChargePoint works closely with our customers and partners to ensure site design, charging station layout, and driver experience is the best in the industry. We have 6 national distribution partners covering us in every state. These partners total nearly 4,000 locations combined and give us the reach to over 70,000 electrical contractors as well as access to local and state gov't agencies across the country. ChargePoint's network of distribution partners have their own sales and marketing teams that they will use to promote the contract to existing and prospective clients. As stated above, ChargePoint will train all distribution partners and installers on the Sourcewell contract details so they can effectively inform customers and generate opportunities. Regardless the sales channel, ChargePoint works closely with our customers and partners to ensure site design, charging station layout, and driver experience is the best in the industry.	*
25	Service force.	ChargePoint's charging solutions come complete with 24/7 driver support, extended hours station owner technical support and maintenance if desired. ChargePoint Support is the largest and most experienced customer service force in the EV charging industry. The ChargePoint support team is based in Scottsdale, AZ with over 50 trained employees and is understood to be the largest in-house EV charging support team in the industry. These numbers do not include our 13 O&M partners that also offer support services and are located throughout the United States and Canada. The support organization is divided into driver, station owner, and activations support teams, with representatives sharing duties and knowledge. In addition, we have plans to add additional headcount by nearly a dozen more by year end. ChargePoint Support works remotely via the ChargePoint Network to assist drivers and diagnose station issues. Once issues are determined, Support works with our network of local O&M partners to perform any require site visits including repairs. Beyond standard technical support, ChargePoint offers ChargePoint Assure, a comprehensive maintenance and management program that is outlined in greater detail in section 9A.	*

26	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	ChargePoint operates an in-house Customer Call Center primally based at our Scottsdale, AZ office. Our Customer Call Center supports both EV drivers as well as our station owners and installation partners. Our 40+ Driver Support agents provide 24/7/365 coverage for EV drivers in English, Spanish, and French via a toll-free telephone number clearly posted on the charging equipment. Live representatives will answer the phone quickly and customers will not be routed through a confusing calling tree. The customer service representatives will provide a variety of services to address customer concerns at the charging station. If t possible the Agent will resolve the issue remotely, whether station or driver related. If unable to resolve, the issue will be escalated to Station Support and the driver provided the address of a nearby station if one is not available on site. Driver Support agents handle over 230,000 calls annually with an average speed of answer of 30 seconds or less. Our Customer Support Center also includes Technical Support for station owners and installation partners. This toll-free line is available Monday through Saturday from 5 AM PT to 6 PM PT. Representative help resolve issues from symptom identification, diagnosis, parts logistics, labor logistics, and resolution validation. Our 38 support agents resolve over 100,000 cases annually with an estimated average speed of answer of 30 seconds. All ChargePoint charging equipment include remote diagnostics and “remote start” capabilities. When customer service receives notice that minor operational maintenance is needed, the representative will remotely diagnose the EVSE to verify the extent of the service need. If issues cannot be remotely addressed, ChargePoint will dispatch service personnel to the site for repairs for which parts costs will be covered for items covered by an active warranty. Customer utilizing our Assure offering can rest easy knowing that ChargePoint will proactively monitor the station for any issues. If an issue is detected, ChargePoint will acknowledge the issue within one business day and, if an onsite visit is required, will dispatch labor to the site within one business day of receipt of parts onsite. Our clients also get 98% annual station uptime guarantee with a non-performance penalty for outages caused by station hardware or software failures. Repairs in the field our handled by ChargePoint’s national operations and maintenance (O&M) partners that have all committed to audit requirements and penalties against service level, liability indemnification, customer warranty, pricing accuracy under fixed unit pricing terms, and maintenance of required credentials to perform the work contracted.	*
27	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	ChargePoint is already a qualified EV charging vendor with Sourcewell and your members within the United States and we look forward to continuing to support your members moving forward. ChargePoint has an established install base, dedicated sales force, partners, and provide all listed charging hardware, software, and services throughout the United Sates.	*
28	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	ChargePoint is already a qualified EV charging vendor with Sourcewell and your members within Canada and we look forward to continuing to support your members moving forward. ChargePoint has an established install base, dedicated sales force, partners, and provide all listed charging hardware, software, and services throughout Canada.	*
29	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	ChargePoint, either directly or by leveraging our extensive list of partners, has the ability to fully service all geographic areas of the US and Canada.	*
30	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	None.	*
31	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	We do not have any contract issues related to Hawaii and Alaska. We have a large number of stations in operation in Hawaii.	*

Table 7: Marketing Plan

Line Item	Question	Response *	

32	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	ChargePoint will use the following strategy to promote this contract: + Outside Sales: Our sales team and account executives will proactively reach out to all Sourcewell members within their assigned territories to promote the contract. We are currently speaking to many of them already and will ensure they are aware of the contract and the value it will bring them. + Inside Sales: Our inbound team will be able to promote the contract to all inbound inquiries that come in. As mentioned in Question 18, we receive a significant number of inbound leads from potential/existing Sourcewell members, and our inbound team will promote this contract to everyone and educate them on the details of how they can take advantage of it. Our outbound team will focus on proactive outreach to Sourcewell members and all government agencies. They will also call on leads that get generated through our marketing efforts. We have the tools necessary to track leads through campaigns and call on lead lists. + Marketing: Upon award we would do a formal announcement across various channels to get the word out. We will perform regular marketing campaigns to educate the market on this contract. In addition to any help Sourcewell can provide with contact information, we have the tools necessary to quickly pull customer contact information for email campaigns. + Webinars: ChargePoint will offer to create webinars that highlight the benefits of the Sourcewell contract with real life testimonials. These webinars can be vendor neutral and positioned as an educational presentation. + Trade shows: ChargePoint participates in various tradeshows/events around the country and will have marketing material available highlighting our partnership with Sourcewell and details of the contract. + Incentives: We will match all state, local and utility incentives to Sourcewell members and proactively educate prospects about the value of both the incentive program and the Sourcewell partnership. + Distribution Network: Our large distribution/partner network also have sales and marketing teams primarily supporting electrical contractors. Contractors are often a first touch point for customer exploring a charging solution. ChargePoint will work closely with its partners to help them develop effective marketing strategies. We will also train their sales team to effectively leverage this contract. We will have regular follow up calls and trainings to make sure this contract stays top of mind. Examples of our outreach: 1. ChargePoint at the ACT Expo: North America's largest clean fleet show; 2. Incentive Announcement for $25k EVSE incentive in San Francisco and; 3. $3 million in funding available for municipalities in New York.	*
33	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	Our marketing approach leverages technology to quickly pull contact information from prospective customers and generate marketing campaigns. ChargePoint is often involved in new programs, contract, grant etc. and can get messaging out to market extremely quickly. We use various marketing tools for generating leads and managing them through the sales funnel. + Organic social posts (Facebook, LinkedIn, Twitter, Instagram) + Digital advertising (banner ads, social ads, paid search, retargeting) + Premium content (gated on chargepoint.com) + Syndicated content + Organic search + Charging Forward blog + Chargepoint.com business, vertical and roles pages + Credits and Incentives web page with link to lead form on chargepoint.com + Forms (content downloads) + Request a station (CP.com) + Events (webinars, industry events, partner events) + Email campaigns (purchased lists, contacts from inbounds) + Marketing automation + Downloads of content/other assets + Inbound calls + Sales Development Reps (SDR) outbound calls + Customer referrals + Driver referrals	*

34	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	ChargePoint has a collaborative and effective partnership in place with Sourcewell with its current contract. ChargePoint would view Sourcewell as a marketing partner to help promote this contract. We would look for support on an initial announcement to current members notifying them of this renewed opportunity. We have methods of gathering contact information, however, hope that you will be able to share membership contact information for ongoing outreach and marketing campaigns. The value of providing us with this information will allow us to move quicker and more efficiently. We would also look for opportunities to collaborate on co-branded marketing initiatives that adhere to ChargePoint's brand guidelines. With Sourcewell's well established relationship with its members and ChargePoint expertise in EV charging, working closely together on marketing initiatives will ensure members feel they are in good hands with their EV charging needs. The Sourcewell contract will be part of every discussion we have with existing and potential Sourcewell members. We are speaking with government agencies every day and leveraging this contract will benefit all stakeholders (Sourcewell, Sourcewell members and ChargePoint).	*
35	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	Similar to other types of customers, for most Sourcewell members, choosing and implementing a successful charging solution is an unfamiliar experience. This is why ChargePoint has developed the most extensive, expert sales team in the industry and make these resources available to customers exploring our space. With our help, we're confident customers will be put in a position to implement successful projects. Primarily for this reason, ChargePoint does not have its own e-procurement system, our GSA Schedules are online via www.gsaadvantage.gov.	*

Table 8: Value-Added Attributes

Line Item	Question	Response *	
36	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	As standard practice, for free, Sourcewell members have access to: + ChargePoint will provide operational training on the station at start-up. + ChargePoint is also available for Cloud Portal/Network Training after install and station activation. + Training videos and detailed manuals are available also. + On an on-going basis the ChargePoint team is available via email or phone to answer questions or provide additional training. + If required and depending on scope of project, Sourcewell members or their contractors have access to the ChargePoint University portal which is a detailed training and testing that is designed for reseller partner and installer certification.	*
37	Describe any technological advances that your proposed products or services offer.	Since ChargePoint's inception in 2007 in Silicon Valley California, we have led the way forward with technological innovations to help make it easy for drivers to go electric and station owners to offer EV charging. Today ChargePoint uses all of the latest advances: Cloud based Network, M2M IoT Cellular station connectivity, Secure (PCI compliant) Payment processing, Power Management for installation and energy savings, Next-Generation Modular DC Fast Charging, and the largest dedicated engineering team in the industry. Below are just a sample of the latest technological innovations: Professional Services Sometimes it's not just as easy to sell a charging station. Station owners, especially for more complex deployment such as fleet charging, often need additional support to evaluate, design, install, and be trained on the stations. ChargePoint offers a complete array of professional services to support these needs including site modeling, preliminary site design and engineering, site acquisition, project management, station installation and commissioning, as well as training for operators such as at fleet depots. Charge Management Software Smart EV charging is critical to provide value to drivers and site hosts. ChargePoint offers all elements of the charging ecosystem but considers itself a "network first" company in that the software is the most important element of any solution. The associated software provides the tools and interfaces for drivers to find and use stations, and for station operators to efficiently optimize the business of EV charging. Listed below are just a few of the advanced features on the ChargePoint Network software: + Station Locations & Availability: complete visibility of stations and their availability make it easy for drivers to find a compatible charger. + Access Control: Manage and control access to charging stations based on well-defined policies. Enhance the value for the station owner with the right level of control. + Flexible Pricing: Provide the station owner with pricing controls that are in line with station usage. Provide flexibility to update pricing as usage changes. + Authorization, Authentication & Accounting: Ensure safe and secure payment for charging. Security measures include the pseudonymization and encryption of personal data and other capable security measures that ensure the ongoing confidentiality, integrity,	

		availability, and resilience of the network. + Power Management: Ensure that charging stations never draw more power than the site can provide. + Driver Notifications: Notify EV drivers about station availability, state of charge and other key messages to enhance your relationship with drivers. + Queueing (Waitlist): Increase utilization of stations and charge more vehicles by enabling drivers to get in a virtual queue for stations. Power Management For operating costs, software can allow station operators to target “off-peak” periods of lower energy costs or avoid triggering a high demand charge. In addition, use of these features can maximize the number of charging ports within a given site while still keeping overall power requirement at the site meter below a determined level. This helps reduce the necessary electrical infrastructure and utility service required to support a given site and thus save capital expenditures. Below is a summary of the available load management tools available within ChargePoint charge management software: + Power Share: Intelligently share available power across multiple stations by setting a “not to exceed” limit, which may vary by time of day and day of week. Power may be allocated based on a configurable policy using equal share or priority-based first come first served. This approach allows for NEC compliant oversubscription of available electrical service, mitigation of expensive demand charges, and the option to defer utility upgrades which can be costly and delay projects. + Load Shift: Use energy when it is cheapest, usually at night when Time of Use (ToU) charges are lower. In environments where the vehicles have sufficient dwell time during off-peak times, shifting load to the least expensive time of day can provide significant savings. Operators simply plug the vehicles in as normal when they return to the depot, and ChargePoint will automatically start charging the vehicles to align with the lowest cost of electricity, no operator intervention required. + Power Limit: Manage load via building/energy management systems, either through integration via API or installation of a ChargePoint smart meter upstream of the charging stations. This approach optimizes power use by dynamically adjusting power to the charging stations based on real-time monitoring of facility loads. + Demand Response: ChargePoint can facilitate participating in utility driven demand response programs through use of a standards based OpenADR interface or API, allowing the utility to control charging station load during peak events where supply may not meet demand. Fleet Charging Solutions Fleet vehicle can require a range of special charging considerations including optimization of depot charging, access to charging while on-route, and home charging for take-home fleets. ChargePoint provides for all of these charging needs through specialized fleet charging solutions. ChargePoint Fleet Depot software integrate with other fleet back-office systems and enables optimized charging of larger fleets while ensuring that fleet vehicles are charged and ready to meet business and operational objectives at the least possible energy cost and within electrical capacity constraints. ChargePoint also offers our Fleet Mobility plan to support charging of vehicle at publicly available charging stations while on-route and integrated with existing fleet fuel card systems. ChargePoint has partnered with US Bank (Voyager Fleet Card) and WEX to offer customers the convenience of paying for and tracking electric fuel with their existing fleet cards and is continually assessing additional integrations. Finally, ChargePoint offers our Take Home Fleet solution which integrates with our Home Flex charging station and allows fleet managers to access charging data from company vehicle charging at employee's homes to support reimbursement, as necessary. Fleet System Interfaces Fleet System Interface: To ensure a seamless integration with fleet systems relied upon by fleet operators today, ChargePoint has completed or initiated integration discussions with the most common platform including: Geotab, Viriciti, Clever Devices, AssetWorks, Trapeze, Voyager, Wright Express (WEX), and more. A full set of soap/xml-based application programming interfaces (APIs) are available to integrate into a variety of back-office systems and ChargePoint will continue to grow the partnerships with fleet solution providers to best serve fleet operators.	*
38	Describe any “green” initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	ChargePoint has a dedicated team of people that works with numerous organizations, including state and federal government, to formulate policies to promote EV adoption and evolution of the grid and other infrastructure that will be necessary to realize widespread electrified transportation. ChargePoint is a member or plays an active role in the following organizations: CALSTART CALSTART is a member-supported organization of more than 140 firms, fleets and agencies worldwide dedicated to supporting a growing high-tech, clean transportation industry that cleans the air, creates jobs, cuts imported oil and reduces global warming emissions. CALSTART provides services and consulting to spur advanced transportation technologies, fuels, systems and the companies that make them. Use the staff directory to find the expert you need.	

CLEANTECH GROUP
The mission of Cleantech Group (CTG) is to accelerate sustainable innovation. Our subscriptions, events and programs are all designed to help corporates, investors, and all players in the innovation ecosystem discover and connect with the key companies, trends, and people in the market. Our coverage is global, spans the entire clean technology theme and is relevant to the future of all industries. The company is headquartered in San Francisco, with a growing international presence in London.

EDTA
The Electric Drive Transportation Association (EDTA) is the trade association promoting battery, hybrid, plug-in hybrid and fuel cell electric drive technologies and infrastructure. EDTA conducts public policy advocacy, provides education and awareness, and enables industry networking and collaboration. EDTA's membership includes vehicle and equipment manufacturers, energy companies, technology developers, component suppliers, government agencies and others.

eMI³
Under the umbrella of ERTICO – ITS Europe, the eMobility ICT Interoperability Innovation, eMI³, is an open group of significant actors from the global Electric Vehicles market who joined forces to harmonize the ICT data definitions, formats, interfaces, and exchange mechanisms in order to enable a common language among all ICT platforms for Electric Vehicles. eMI³ core objectives lie in the development, publication, sharing and promotion of ICT standards. Since 1st December 2015, eMI³ is an ERTICO Innovation Platform established as a Non-Profit International Association under Belgium law.

Parksmart
Parksmart defines and recognizes sustainable practices in parking structure management, programming, design and technology. Industry-driven and field tested, Parksmart distinguishes the forward-thinking parking facilities shaping tomorrow's sustainable mobility network. *

Plug-In Electric Vehicle Collaborative
The California Plug-In Electric Vehicle Collaborative is a public/private organization comprised of 47 members that include key PEV stakeholders all working together to move the PEV market forwards in California.

Silicon Valley Leadership Group
The Silicon Valley Leadership Group is a public policy business trade organization. The Leadership Group was founded in 1978 by David Packard of Hewlett-Packard and represents more than 400 of Silicon Valley's most respected employers on issues, programs and campaigns that affect the economic health and quality of life in Silicon Valley, including energy, transportation, education, housing, health care, tax policies, economic vitality and the environment.

Green Sports Alliance
Leveraging the cultural & market influence of sports to promote healthy, sustainable communities where we live & play. Members collectively provide nearly one of every three private sector jobs in Silicon Valley and contribute more than $3 trillion to the worldwide economy.

California Energy Commission
As the state's primary energy policy and planning agency, the California Energy Commission is committed to reducing energy costs and environmental impacts of energy use - such as greenhouse gas emissions - while ensuring a safe, resilient, and reliable supply of energy.

Los Angeles Business Commission
Uniting the power of business with the power of government for education and advocacy to promote environmental and economic sustainability.

Cleantech San Diego
Cleantech San Diego is a nonprofit member organization that positions the greater San Diego region, including Imperial County, as a global leader in the cleantech economy. We foster collaborations across the private-public-academic landscape, lead advocacy efforts to promote cleantech priorities, and encourage investment in the San Diego region.
Our members include more than 100 local businesses, universities, governments, and nonprofits committed to advancing sustainable solutions for the benefit of the economy and the environment.

39	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	ChargePoint AC L2 stations are Energy Star certified. ChargePoint DC products are intended to be Energy Star certified when the program is fully defined and available for certification. ChargePoint owns an Advanced Test Center that exposes all of our products to extreme environmental accelerated life cycle testing. Tests include solar loading, extreme heat, extreme cold, humidity, seismic, focused pressurized water, impact, and dozens of other tests designed to improve product reliability and longevity. Higher reliability, less on-site visits, fewer replacement parts, and longer life span all contribute to lessening environmental impact.	*
40	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	ChargePoint has several authorized resellers with various Women or Minority Business Entity (WMBE) or Small Business Entity (SBE), and Service-Disabled Veteran owned accreditations. ChargePoint will provide a detailed list upon request.	*

41	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	ChargePoint is a complete systems provider, offering the highest level of integration of hardware, software, and services, and delivering the best value in the industry. Our charging stations, mobile applications, and network management platform are designed to work seamlessly together to provide the best station owner and driver experiences in the market. ChargePoint's extensive technical expertise and fully integrated portfolio also allows ChargePoint to work rapidly with key partners to develop new, innovative solutions in support of a rapidly evolving market. Simply put, ChargePoint is unlike any other charging solution provider in that it provides the scale, experience, service, and quality necessary to make any EV charging initiative a success. Experience An integrated experience provides an effortless charging experience for station owners and drivers. It ensures consistent performance, efficiency, and reliability at every touchpoint whether one is using a mobile app, plugging into a charging station, managing the station or analyzing charging data. ChargePoint has more than 110,000 activated places to charge on its network, with access to an additional 160,000 public places to charge through roaming integrations with other major networks. ChargePoint is the only company that delivers solutions that provide an integrated EV charging experience for businesses and drivers across every touch point and for every use case. We design, develop, and manufacture complete, integrated hardware and software solutions for every charging scenario: from home and multifamily to workplace and fleet. From a top-rated mobile app and award-winning services and support to the most reliable network and stations, ChargePoint has you covered. Scale As EV adoption grows and charging becomes a necessity for your business, you want to rest assured that the charging solution you invest in today will set you up for success in the future by enabling you to support more drivers, add the latest software features and expand your EV fleet with minimal disruption to your business. The EV charging solution you invest in today must set you up for success tomorrow. ChargePoint offers seamless scalable solutions that grow with your business. We will help you get started easily, up to speed quickly and, when the time comes, ramp up effortlessly—all with minimal disruption to your business. Our extensive expertise with incentives, rebates and grants will even save you money every step of the way. No wonder 60% of Fortune 50 companies are ChargePoint customers. Quality You need an EV charging solution that just works no matter how it is used, where it is used or when it is used. A solution that is so reliable that you can just set it and forget it. Your EV charging solution has to work, every time. That is why ChargePoint is the only company that has made a major investment in quality testing on all our stations and software. ChargePoint is the only EV charging solutions company with an advanced in-house testing lab. We rigorously test all our stations and software to ensure your investment can stand up to any element, scenario, or mishap. All our products are UL-listed, ENERGY STAR® and CE (EU) certified, and our modular design minimizes downtime. With so much riding on the New Fueling Network, your EV charging solution just has to work, every time. With ChargePoint, it will. Service Best-in-class support is essential for providing a high caliber experience for all participants in the fueling network, whether one is driving a personal vehicle, delivering goods, driving work vehicles, or riding shared transport. ChargePoint knows comprehensive services are critical for an exceptional EV charging experience. ChargePoint has been in the business of electric fueling longer than anyone else. Since 2007, we have been working with our customers to design comprehensive services built around their needs. Today, from sophisticated networked solutions to top-rated service products, we have the resources to provide our own 24/7 support in multiple languages and the infrastructure to support drivers no matter where they charge on our network. Station operators do not have to take waste previous time to figure out whether the hardware or software vendor is responsible for an issue – just call ChargePoint and we will handle the rest.	*

Table 9A: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
42	Do your warranties cover all products, parts, and labor?	ChargePoint provides a standard one-year warranty for all commercial level 2 charging stations and a three-year warranty for our residential charging station. Standard warranty covers parts only. Beyond standard technical support, ChargePoint offers ChargePoint Assure, a comprehensive maintenance and management program that includes dispatched labor at committed service levels to perform on site repairs, proactive dispatch, monthly reports, 24x7 station health monitoring, and a long list of additional features described in more detail below. Assure is available from one to five-year term increments. + Unlimited software configuration changes + 98% annual uptime guarantee with non-performance penalty + Standard one (1) business day response time to station failures or one (1) business day from Parts arrival when required + Automated monthly summary reports and detailed quarterly reports of your station's performance metrics. We send the reports automatically, so you don't have to generate them. + Proactive station monitoring and dispatch + Labor coverage for station equipment issues typically not covered by warranty such as vandalism, abuse and accidents caused by reckless drivers or snowplows. + Additional options are available upon request, such as strategic spares, consigned inventory, and customer training for on- site repairs and maintenance.	*
43	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	Yes. Please see ChargePoint F_Assure Terms of Service.	*
44	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	Yes, for Assure.	*
45	Are there any geographic regions of the United States or Canada (as applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	No. ChargePoint Assure is available throughout the US and Canada.	*
46	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	For this proposal, ChargePoint is the original equipment manufacturer of the charging equipment, so all warranty service is covered by ChargePoint.	*
47	What are your proposed exchange and return programs and policies?	ChargePoint and its channel partners strive to avoid any situation where improper products are purchased and returns, or exchanges are requested. On a case-by-case basis ChargePoint may allow returns or exchanges with payment of a 20% restocking fee and payment of any required freight charges to correct the problem. ChargePoint channel partners may also offer returns and exchanges at their discretion. Please refer to ChargePoint Attachment G_Parts Exchange Warranty for details.	*
48	Describe any service contract options for the items included in your proposal.	ChargePoint Assure, as outlined in the response to item 42, is the primary service offering we are including in our proposal. ChargePoint is also developing an enhanced Assure offering called Assure Pro, in concert with our Managed Spares Service, to provide faster repair times.	*

Table 9B: Performance Standards or Guarantees

Describe in detail your performance standards or guarantees, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your performance materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
49	Describe any performance standards or guarantees that apply to your services (network uptime, power management, charging capabilities, etc.)	ChargePoint Assure, as outlined in section 9A in this proposal, is an optional extended and enhanced warranty offer that provides for proactive monitoring, coordinated repairs, and full parts and labor costs coverage. The SLA associated with Assure provides for a 98% or better uptime guarantee with financial penalties for non-performance. Please see the attachments titled Assure Data Sheet and Assure Terms of Service for additional detail.	*
50	Describe any service standards or guarantees that apply to your services (policies, metrics, KPIs, etc.)	Please refer to Line Item 49.	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
51	What are your payment terms (e.g., net 10, net 30)?	Net 30. ChargePoint channel partners may offer varying payment terms at their discretion.	*
52	Describe any leasing or financing options available for use by educational or governmental entities.	ChargePoint supports the following options for procurement of charging stations and associated services. In addition to the options available below, ChargePoint's channel partners may also offer additional financing and leasing plans. Outright Purchase Upfront payment of all goods and services. ChargePoint and associated partners then fulfill installation works, network services and ongoing support in accordance with contractual agreements. ChargePoint as a Service (CPaaS) In this unique offer ChargePoint remains the owner of the stations. The customer simply pays a fixed monthly fee for ability to use the stations. ChargePoint maintains the stations with an uptime guarantee. At the end of the term the station can be replaced with the latest version or we will take them back if the Customer chooses to purchase a different solution. Hence, this resolves the problem obsolete hardware that needs to be removed or integrated and fits very nicely with the leasing business. Financing Options ChargePoint partners with major financial providers to offer a full finance offer for all ChargePoint services as well as site 'make-ready'. A simple monthly payment covers all bundled costs over the course of the agreed term with a final payment option for ownership of stations to transfer to Sourcewell and its members.	*
53	Briefly describe your proposed order process. Include enough detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template. For example, indicate whether your dealer network is included in your response and whether each dealer (or some other entity) will process the Sourcewell participating entities' purchase orders.	Depending on Sourcewell member needs, ChargePoint would either process orders directly with the Sourcewell member or through a local channel partner. The channel partner would process an order with the Sourcewell member and an upstream order with ChargePoint for the associated products and services. In either case the Sourcewell member would pay at or below the contract price and ChargePoint would track order details for quarterly payment of the administration fee on any products purchased from ChargePoint.	*
54	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	Yes. ChargePoint and various channel partners can accept credit cards for payment.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as desribed in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	
55	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	ChargePoint has provided a detailed line-item price book showing list price and proposed contract price. Freights costs are most cost effectively determined at the time of purchase, based on quantity, mode, distribution point and shipping destination so they have not been provided on a line-item basis. This book is broken into distinct product categories to simplify review. Those categories are Charging Stations, Network Services, Assure Maintenance Plans, and Accessories. Notes are also provided to guide reviewers to creating estimated project pricing.	*
56	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Discounts range from 0-20% off MSRP.	*
57	Describe any quantity or volume discounts or rebate programs that you offer.	The pricing provided takes into account an assumption of volume created by purchasing across the Sourcewell membership. However, on a case-by-case basis ChargePoint may consider providing improved pricing to individual members who intend to purchase large volumes in single orders.	*
58	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	ChargePoint would consider any installation services including materials and labor beyond the scope of our Install- Valid service listed in our pricing proposal to be “Open Market” options. In many cases government entities prefer to use previously contracted vendors or employed tradespeople to perform the site preparation for charging station installation. Install-Valid service then allows these entities to purchase just the somewhat specialized charging station assembly, mounting and testing directly from ChargePoint. However, in instances where an Sourcewell member would prefer to procure complete installation services from one vendor ChargePoint would coordinate scoping by an appropriate channel or O&M partner who would then provide a quote for these services to the Sourcewell member. ChargePoint would facilitate this sourcing but would not be directly involved with any financial transactions between the member and ChargePoint partner for those services. Furthermore, ChargePoint would not intend to track quarterly or pay Administrative fee on these services.	*
59	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	As described in question 58 above, ANY installation services including materials and labor beyond the scope of our Install-Valid service is not included in our pricing proposal. In many cases government entities prefer to use previously contracted vendors or employed tradespeople to perform the site preparation for charging station installation. Install-Valid service then allows these entities to purchase just the somewhat specialized charging station assembly, mounting and testing directly from ChargePoint. However, in instances where an Sourcewell member would prefer to procure complete installation services from one vendor ChargePoint would coordinate scoping by an appropriate channel or O&M partner who would then provide a quote for these services to the Sourcewell member. ChargePoint would facilitate this sourcing but would not be directly involved with any financial transactions between the Sourcewell member and ChargePoint partner for those services.	*
60	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Freight costs are most cost effectively determined at the time of purchase, based on quantity, mode, distribution point and shipping destination so they have not been provided on a line-item basis. ChargePoint will provide pricing upon request. In addition, if Sourcewell members are able to require their own shipping carrier upon purchase.	*
61	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	Freight terms for Alaska, Hawaii and Canada are treated no different the contiguous united states. As described above freights costs are most cost effectively determined at the time of purchase, based on quantity, mode, distribution point and shipping destination so they have not been provided on a line-item basis.	*

62	Describe any unique distribution and/or delivery methods or options offered in your proposal.	No unique distribution and/or delivery methods or options offered in your proposal.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments
63	c. better than the Proposer typically offers to GPOs, cooperative procurement organizations, or state purchasing departments.	

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
64	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell.	ChargePoint is well experienced with offering contracted pricing to various public and private entities across the globe. In addition, we operate our business on a world class CRM platform with the ability to easily meet these needs. Upon award, we will leverage our CRM tools to tag any Sourcewell opportunities appropriately, so they receive the contract pricing and terms. In the event these leads require a pass-through channel or O&M partner, we will ensure the partner is conforming to any contract requirements as well. As sales are made and shipments are processed all Sourcewell tagged orders will be archived in our CRM system which can easily be queried quarterly for itemized reporting of products and revenue. From this report the Sourcewell administrative fee can be easily calculated and paid.	*
65	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Upon award, ChargePoint will proactively promote the contract. As the industry leader, ChargePoint has experience deploying large scale programs across North America and have the resources necessary to quickly train staff and partners on new initiatives. Here is an outline of our training approach: + Contract Launch: Appropriate stakeholders from ChargePoint will attend this meeting to learn more about best practices and successful deployments. + ChargePoint Project Team Planning: After the contract launch our ChargePoint project team will immediately develop a training presentation and material for sales management, direct sales team, our marketing team, and our partner network. We will seek Sourcewell's input on our planned presentation prior to performing any training sessions. + Training deployment: We will coordinate training sessions for sales management, direct sales teams, our marketing team, and our partner network. We do these trainings often and typically via webinar. The partner training will be separate from our internal trainings. + Training follow up: o ChargePoint employees: After the initial training we will have follow up webinars with direct sales to make sure this is top of mind. We will share success stories with the team to keep "buzz" going. o Partner: After initial training, we will have follow-up webinars and email campaigns sent to all partners promoting the contract. We will continue to train them on how to leverage this contract within the markets they cover. We currently host several partner trainings throughout the year and will make sure this is a topic. + Website: We will have a link on the "Current Incentives" page on our website to guide Sourcewell members, ChargePoint employees, and partners to learn more about the award.	*

66	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	ChargePoint is well experienced with offering contracted pricing to various public and private entities across the globe. In addition, we operate our business on a world class CRM platform with the ability to easily meet these needs. Upon award, we will leverage our CRM tools to tag any Sourcewell opportunities appropriately, so they receive the contract pricing and terms. If these leads are required to pass through a channel or O&M partner, we will ensure the partner is conforming to any contract requirements as well. As sales are made and shipments are processed all Sourcewell tagged orders will be archived in our CRM system which can easily be queried quarterly for itemized reporting of products and revenue. From this report the Sourcewell administrative fee can be easily calculated and paid.	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *	
67	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	ChargePoint is the only global charging solution provider that offers a complete range of AC and DC charging solutions for all vehicle types and charging use cases. Charging Equipment Charging stations must be safe, reliable, easy to use and capable of measuring detailed energy usage and enabling managed charging. In support of this RFP, we propose the following EVSEs designed, engineered, and manufactured by ChargePoint to work seamlessly with our software and service portfolio: 1. ChargePoint CPH50: The Home Flex (CPH50) is a residential charging station to support the single-family home market. It provides up charging up to 12kW all linked with a powerful mobile app. 2. ChargePoint CPF50: The preferred AC Level 2 charging station for most fleet applications that are located at a depot/behind the fence. 3. ChargePoint CT4000: A commercial AC Level 2 charging station with additional features ideal for mixed-use applications including fleets, employee workplace, and public access charging. 4. ChargePoint Express CPE250: DC Fast Charging up to 62.5kw (single) or 125kW (paired). Designed with high availability, serviceability, and universal compatibility in mind. 5. ChargePoint Express Plus: Distributed DC Fast Charging from 200 to 350kW across up to 8 charging dispensers. Designed on a modular basis to scale with vehicles and power needs. Please refer to the attached data sheets for additional information on the proposed charging stations. Charging Software ChargePoint's EV charge management software is designed to provide operational visibility and management of the complete charging ecosystem and to enable fleet operators to reduce operating costs, increase operational efficiency, and deliver on their mission critical needs. ChargePoint's cloud-based software includes a full suite of features to manage stations including a dashboard, manage access control, set pricing, collected driver fees, view real-time vehicle charging status and remote diagnostics, and track and analysis all charging sessions at the site. Software plans are available in 1-to-5-year terms and are tailored to the specific station and use case. Services ChargePoint offers a range of services to support our proposed EV charging solutions. This includes: + Assure/Assure Pro: Optional extended and enhanced warranty providing proactive monitoring, coordinated repairs, full coverage of parts and labor, and an uptime guarantee of 98%. + Professional Services: These ala carte services are available depending on the specifics of a given site deployment and the needs of the customer. Services include modeling, preliminary site design and engineering, project management, installation and commissioning, and training. Prices are available on a per project basis based on the scope of work.	*
68	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	ChargePoint is proposing to continue to sell charging hardware, software, and services including maintenance and service for all types of charging use cases.	*

Table 14B: Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed types or classes of equipment, products, and services are offered within your proposal. Provide additional comments in the text box provided, as necessary.

Line Item	Category or Type	Offered *	Description / Comments *	
69	Non-network electric vehicle charging hardware	○ Yes ◉ No	ChargePoint does not offer non-networked charging solutions given the importance of a network to enable a more positive driver experience and to enable station owners the ability to remotely monitor and adjust operating parameters to optimize the charging experience.	*
70	Network electric vehicle charging hardware	◉ Yes ○ No	ChargePoint offers the CPF50 and CT4000 level 2 stations for private and mixed-use charging respectively, the CPE250 and Express Plus platform for DC fast charging, and the CPH50 Home Flex for residential level 2 charging.	*
71	Services related to electric vehicle charging hardware (refer to RFP Section II. B. 1. b.)	◉ Yes ○ No	ChargePoint offers final installation, commissioning, and ongoing maintenance services for all proposed charging hardware.	*
72	Site assessment, site preparation and materials, and installation services related to electric vehicle charging hardware	◉ Yes ○ No	ChargePoint offers preliminary site design and engineering and final installation services. Additional site construction may also be provided by various ChargePoint channel partners and installation partners.	*
73	Network service provider or operator	◉ Yes ○ No	Via the ChargePoint Network	*
74	Charge monitoring, reporting, or billing services	◉ Yes ○ No	Via the ChargePoint Network	*
75	Grid or power management solutions	◉ Yes ○ No	Via the ChargePoint Network	*

Table 15: Industry Specific Questions

Line Item	Question	Response *
76	Describe the process for installation of your products or services and explain the method of quotation, as applicable.	ChargePoint offers final installation and wiring of all ChargePoint charging stations. Our local and national network of partners across the U.S. and Canada are trained and certified on the installation of our products through our Training and Certification Program. All of our partners have access to licensed electricians which can also provide additional electrical infrastructure construction as necessary to support station installation. Sourcewell members have the option of using their own licensed electrician for installation of ChargePoint stations. ChargePoint has installation manuals and videos available to help facilitate a successful install. In this case, ChargePoint would need to validate the installation prior to activating an Assure warranty for equipment maintenance and support; this is a simple review and approval of the work performed.
77	If your proposal includes delivery of services by prequalified contractors, describe your method of prequalification. State how prequalified contractors will be identified or selected by Sourcewell Participating Entities in the event of contract award.	ChargePoint uses sub-contractors to provide service, support, installation and validation of charging equipment. ChargePoint has a network of over 40 O&M (operations and maintenance) partners and 2,000 certified installers supporting North America. Our local and national network of partners across the US and Canada are trained and certified on the installation of our products through our Training and Certification Program. To ensure project success, we can work with Sourcewell members and our O&M partner to perform engineering, permitting, and construction services for any type of EVSE. ChargePoint is committed to closely with members to ensure site design, charging station layout, and driver experience meets their desires and expectations.
78	Identify the data collected during the initial installation of your equipment, products, or services. Identify the data collected when your equipment, products, and services are accessed by an end-user.	ChargePoint may use the information we collect from or about you for the following business or commercial purposes, such as uses to: + Process your application to create an account with ChargePoint; + Provide our Service to you, including information, products, and services you request from us that enable you to access our charging stations network; + Process billing functions, including payment of fees; + Notify you of changes to our Website or Service; + Manage and administer your account, including to distinguish between multiple vehicles or users under a single account, and for information regarding charging sessions (e.g., duration, energy consumption, station owner and station data); + Manage and respond to any inquiries, correspondence, concerns or complaints you have sent to us; + Communicate with you regarding the Service; + Enable you to communicate with other users; + Promote and market ChargePoint products and services; + Analyze use of the Service; + Improve any services we provide, and research or develop other products or services; + Keep our Service secure and operational; + Provide value added service, promotions, and pricing; + Fulfill the purposes for which you provided it (such as to help you find a ChargePoint station); + Maintain internal records; + Create or maintain aggregated, anonymized, or de-identified information, which we may use and disclose without restriction; + Investigate, prevent, or take action regarding unlawful or harmful activities, including potential threats to physical safety, potential fraud, and violations of our Terms and Conditions; and/or + Safeguard our and others' rights or property. We may combine any of the information that we collect from you with other information, including information that we obtain from third parties, or with information derived from any other products or services we provide. For example, we may combine personal information you provide us, such as an email address, with information automatically collected about your device.
79	Identify the storage location for all data collected in the use of your equipment, products, or services. Describe applicable data security measures and identify any services performed outside the US or Canada, as applicable.	ChargePoint leverages Amazon AWS as our hosting provider, with instances located in the United States, Canada, EU (Germany), and Australia. All data generated through the use of charging stations is stored within the appropriate region. ChargePoint is PCI certified by a 3rd party auditor and has SOC2 Type II certification. We are also in the final stages of completing our ISO 27001 certification, which is expected to be completed by end of May 2021. ChargePoint's primary driver support call center is located in Scottsdale AZ. To provide 24/7 driver support, some driver support calls may be routed to our Amsterdam NL support center.

Table 16: Exceptions to Terms, Conditions, or Specifications Form

Line Item 80. NOTICE: To identify any exception, or to request any modification, to the Sourcewell template Contract terms, conditions, or specifications, a Proposer must submit the exception or requested modification on the **Exceptions to Terms, Conditions, or Specifications Form** immediately below. The contract section, the specific text addressed by the exception or requested modification, and the proposed modification must be identified in detail. Proposer's exceptions and proposed modifications are subject to review and approval of Sourcewell and will not automatically be included in the contract.

Contract Section	Term, Condition, or Specification	Exception or Proposed Modification

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as “Marketing Plan.”

Proposer's Affidavit

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor’s objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:

    1. Included on the “Specially Designated Nationals and Blocked Persons” list maintained by the Office of Foreign Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

    2. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://sam.gov/SAM/; or

3. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Sam Ta, Sr. RFP Manager, ChargePoint Holdings, Inc.

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

AMENDMENT #1
TO
CONTRACT # 042221-CPI

THIS AMENDMENT is by and between **Sourcewell** and **ChargePoint, Inc.** (Vendor).

Sourcewell awarded a contract to Vendor to provide Electric Vehicle Supply Equipment and Related Services to Sourcewell and its Participating Entities, effective July 15, 2021, through July 20, 2025 (Contract).

The parties wish to amend the following terms within the Contract.

1. This Amendment is effective upon the date of the last signature below.

2. Article 2. Equipment, Products, or Services Section, B. Warranty is deleted in its entirety and replaced with the following:

   Vendor warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and for a period of one year and consistent with Vendor's Parts Only Warranty (the "Warranty") are free from defects in design, materials, and workmanship. In addition, Vendor warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Vendor's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that is effective past the expiration of the Vendor's warranty will be passed on to the Participating Entity.

3. Article 6 Participating Entity Use and Purchasing, A. Orders and Payment is deleted in its entirety and replaced with the following:

   To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Vendor that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Vendor. Typically, a Participating Entity will issue an order directly to Vendor. If a Participating Entity issues a purchase order, it may use its own forms as agreed between the Participating Party and Vendor, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration of this Contract; however, Vendor performance, Participating Entity payment, and any applicable warranty periods or other Vendor or Participating Entity obligations may extend beyond the term of this Contract.

4. Article 8 Report on Contract Sales Activity and Administrative Fee Payment, B. Administrative Fee is deleted in its entirety and replaced with the following:

   In consideration for the support and services provided by Sourcewell, the Vendor will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing.

DocuSign Envelope ID: 5C2172A7-7B37-4D4B-8BA9-62D84E9C7937

Vendor may not charge Participating Entities more than the contracted price to offset the Administrative Fee. The Vendor will submit payment to Sourcewell of 2% multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter.

Payments should note the Vendor's name and Sourcewell-assigned contract number in the memo; and must be mailed to the address above "Attn: Accounts Receivable" or remitted electronically to Sourcewell's banking institution per Sourcewell's Finance department instructions. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

5. Article 11 Liability is deleted in its entirety and replaced with the following:

   Vendor must indemnify, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any third party claims or causes of action, including reasonable attorneys' fees, to the extent arising out of the negligent performance of this Contract by the Vendor or its agents or employees or Vendor's willful misconduct; this indemnification includes injury or death to person(s) or property alleged to have been caused by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications

6. Article 21. Provisions for Non-United States Federal Entity Procurements Under United States Federal Awards or Other Awards, Section D. Rights to Inventions Made Under a Contract or Agreement is deleted in its entirety.

Except as amended by this Amendment, the Contract remains in full force and effect.

CITY OF ONTARIO
GOODS & SERVICES AGREEMENT

This Agreement is made and entered into as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **BodEV, Inc.**, a **Corporation** with its principal place of business at **2581 Union Ave, La Habra, CA 90631** ("Vendor"). City and Vendor are sometimes individually referred to as "Party" and collectively as "Parties" in this Agreement.

RECITALS

A. Vendor desires to perform and assume responsibility for the provision of certain services and goods required by the City on the terms and conditions set forth in this Agreement. Vendor represents that it is experienced in providing similar services and goods to public clients, that it and its employees or subcontractors have all necessary licenses and permits to perform the services in the State of California and that is familiar with and understands the needs of City.

B. City desires to engage Vendor to sell to City the materials and/or equipment and/or render such services as more particularly described in this Agreement.

TERMS

1. SCOPE OF SERVICES.

1.1 General Scope of Services. Vendor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the **EV Chargers for the Ontario Sports Empire Complex** ("Services") which are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

1.2 Goods. Vendor agrees to sell to City and City agrees to purchase the materials and/or equipment ("Goods") as specified and per the specifications attached hereto and incorporated herein as Exhibit "A." Unless specifically stated otherwise, the Goods shall be new and unused and of the current production year.

2. TERM.

2.1 The term of this Agreement shall be from **March 18, 2025,** to **July 20, 2025**, unless earlier terminated as provided herein. Vendor shall provide all Goods and complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the work.

3. FEES AND PAYMENTS.

3.1 Compensation. Vendor shall receive compensation, including authorized reimbursements, for all Goods provided and Services rendered under this Agreement at the rates set forth in Exhibit "A" attached hereto and incorporated herein by reference. The total compensation shall not exceed **One Million One Hundred Eighty-Nine Thousand Seven Hundred Fifty-Eight Dollars ($1,189,758**) without written approval of City's Manager. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2 Payment of Compensation. Vendor shall submit to City a monthly itemized statement which indicates work completed and hours of Services rendered by Vendor and Goods provided. The statement shall describe the amount of Services and Goods provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within 45 days of receiving such statement, review the statement and pay all non-disputed and approved charges thereon.

3.3 Reimbursement for Expenses. Vendor shall not be reimbursed for any expenses unless authorized in writing by City.

3.4 Extra Work. At any time during the term of this Agreement, City may request that Vendor perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Goods and Services, but which the parties did not reasonably anticipate would be necessary at the execution of this Agreement. Vendor shall not perform, nor be compensated for, Extra Work without written authorization from City's Representative.

3.5 Automated Clearing House ("ACH") payments. It is the City's policy to pay its consultant invoices via electronic fund transfers through the ACH network. All payments due and owing pursuant to a properly issued and correct invoice or under this Agreement shall be made through electronic ACH transfers, unless otherwise agreed upon by both Parties in writing. Vendor shall provide the City with ACH payment details whereby the City shall initiate the ACH transfers to Vendor in the amount required pursuant to a properly issued and correct invoice or under this Agreement. Each Party shall undertake any and all required actions and execute any required documents, instruments, or agreements required to effectuate the requirements of this Section. In the event the City erroneously deposits funds into an account, or otherwise deposits funds to which Vendor is not entitled: (1) Vendor shall immediately notify the City and the financial institution; (2) Vendor shall not withdraw any of the funds which were erroneously deposited or to which Vendor is not entitled; and (3) Vendor authorizes both the City and financial institution to take all actions necessary to correct the error and return to the City all funds erroneously deposited or to which Vendor is not entitled.

4. RESPONSIBILITIES OF VENDOR.

4.1 Control and Payment of Subordinates; Independent Contractor. The Services shall be performed by Vendor or under its supervision. Vendor will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Vendor on an independent contractor basis and not as an employee. Vendor retains the right to perform similar or different services for others during the term of this Agreement. Any additional personnel performing the Services under this Agreement on behalf of Vendor shall also not be employees of City and shall at all times be under Vendor's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Vendor or any of Vendor's officers, employees or agents, except as set forth in this Agreement. Vendor shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of providing Goods and Services under this Agreement and as required by law. Vendor shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

4.2 Schedule of Services.

4.2.1 Vendor shall perform the Services and provide Goods expeditiously, within the term of this Agreement, and in accordance with the Schedule of Goods and Services set forth in Exhibit "B" attached hereto and incorporated herein by reference ("Performance time"). Upon request of City, Vendor shall provide a more detailed schedule of anticipated performance to meet the Schedule of Goods and Services. Vendor agrees that if the Goods are not provided and/or the Services are not completed within the Performance Time, it is understood, acknowledged and agreed that the City will suffer damage.

4.2.2 Neither City nor Vendor shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Vendor and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this Section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Agreement.

4.2.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Vendor to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

4.3 Conformance to Applicable Requirements. All work prepared by Vendor shall be subject to the approval of City.

4.4 Acceptance. The Goods shall be received subject to City's inspection and right of rejection. The Goods shall not be considered accepted until inspection, testing and/or use of the Goods is found to be in accordance with the City's specifications. Final inspection of the Goods shall be at the location specified herein, unless otherwise agreed in writing. If the Goods are found at any time to be defective in material or workmanship, or otherwise not in conformance with specifications, City shall have the right, in addition to any other rights which it may have under warranties or otherwise, to reject such Goods in whole or in part. Rejected Goods shall be held at Vendor's risk for a reasonable time thereafter and shall be returned or disposed of at Vendor's expense. No rejected Goods shall be replaced by Vendor without written instruction or authorization from City.

4.5 Coordination of Services. Vendor agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

4.6 Standard of Care; Performance of Employees. Vendor shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Vendor represents and maintains that it is skilled in the professional calling necessary to perform the Services. Vendor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them. Vendor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, including a City business license, and that such licenses and approvals shall be maintained throughout the term of this Agreement. As provided for in the indemnification provisions of this Agreement, Vendor shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Vendor's failure to comply with the standard of care provided for herein. Any employee of the Vendor or its sub-Vendors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Services, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed by the Vendor and shall not be re-employed to perform any of the Services provided under this Agreement.

4.7 Warranty. In addition to all warranties which may be provided by law, Vendor warrants that the Goods delivered hereunder shall, (a) be free from defect of material or workmanship and conform strictly to the specifications, drawings, or sample specified or furnished; (b) conform to drawings, plans, specifications, samples or other descriptions furnished, specified, accepted or approved by City; and (c) be merchantable and fit for the purposes intended. The warranty shall be for a period of one (1) year, or such longer period as provided by a manufacturer's warranty or as agreed to by Vendor and City, from the date of final written acceptance of the Goods by City. This warranty shall survive any inspection, delivery, acceptance, or payment by City of the Goods. Vendor, at its own expense, shall repair or replace, at the option of City, any defective Goods within two (2) business days after receipt of notice from City or within four (4) hours in case of emergency, as determined by City. Vendor also warrants that the Goods are free and clear of all liens and encumbrances whatsoever, that Vendor is conveying good and marketable title to same, and that Vendor owns or has a valid license for all of the proprietary technology and intellectual property incorporated within the Goods. Vendor

agrees to indemnify, defend and hold City harmless against any and all third party claims resulting from the breach or inaccuracy of any of the foregoing warranties.

4.8 Reserved.

4.9 Disputes. Should any dispute arise respecting the true value of any work done, of any work omitted, or of any extra work which Vendor may be required to do, or respecting the size of any payment to Vendor during the performance of this Contract, Vendor shall continue to perform the Work while said dispute is decided by the City. If Vendor disputes the City's decision, Vendor shall have such remedies as may be provided by law.

4.10 Laws and Regulations; Employee/Labor Certifications. Vendor shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting its performance under this Agreement, including all Cal/OSHA requirements, and shall give all notices required by law. Vendor shall be liable for all violations of such laws and regulations in connection with this Agreement. If the Vendor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Vendor shall be solely responsible for all costs arising therefrom. City is a public entity of the State of California subject to certain provisions of the Health & Safety Code, Government Code, Public Contract Code, and Labor Code of the State. It is stipulated and agreed that all provisions of the law applicable to the public contracts of a municipality are a part of this Agreement to the same extent as though set forth herein and will be complied with. These include but are not limited to the payment of prevailing wages, the stipulation that eight (8) hours' labor shall constitute a legal day's work and that no worker shall be permitted to work in excess of eight (8) hours during any one calendar day except as permitted by law. Vendor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

4.10.1 Employment Eligibility; Vendor. By executing this Agreement, Vendor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time. Such requirements and restrictions include, but are not limited to, examination and retention of documentation confirming the identity and immigration status of each employee of the Vendor. Vendor also verifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement. Vendor shall avoid any violation of any such law during the term of this Agreement by participating in an electronic verification of work authorization program operated by the United States Department of Homeland Security, by participating in an equivalent federal work authorization program operated by the United States Department of Homeland Security to verify information of newly hired employees, or by some other legally acceptable method. Vendor shall maintain records of each such verification, and shall make them available to the City or its representatives for inspection and copy at any time during normal business hours. The City shall not be responsible for any costs or expenses related to Vendor's compliance with the requirements provided for in Section 4.10 or any of its sub-sections.

4.10.2 Employment Eligibility; Subcontractors, and Consultants. To the same extent and under the same conditions as Vendor, Vendor shall require all of its subcontractors, and consultants performing any work relating to this Agreement to make the same verifications and comply with all requirements and restrictions provided for herein.

4.10.3 Employment Eligibility; Failure to Comply. Each person executing this Agreement on behalf of Vendor verifies that they are a duly authorized officer of Vendor, and understands that any of the following shall be grounds for the City to terminate the Agreement for cause: (1) failure of Vendor or its subcontractors, or consultants to meet any of the requirements provided for in Sections 4.10.1 or 4.10.2; (2) any misrepresentation or material omission concerning compliance with such requirements (including in those verifications provided to the Vendor under Section 4.10.2); or (3) failure to immediately remove from this contract any person found not to be in compliance with such requirements.

4.10.4 Labor Certification. By its signature hereunder, Vendor certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

4.10.5 Equal Opportunity Employment. Vendor represents that it is an equal opportunity employer and it shall not discriminate against any subcontractor, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Vendor shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

4.10.6 Air Quality. Vendor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the California Air Resources Board (CARB). Vendor shall specifically be aware of the CARB limits and requirements' application to "portable equipment", which definition is considered by CARB to include any item of equipment with a fuel-powered engine. Vendor shall indemnify City against any fines or penalties imposed by CARB or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Vendor, its subcontractors, or others for whom Vendor is responsible under its indemnity obligations provided for in this Agreement.

4.10.7 Water Quality.

4.10.7.1 Management and Compliance. To the extent applicable, Vendor's Services must account for, and fully comply with, all local, state and federal laws, rules and regulations that may impact water quality compliance, including, without limitation, all applicable provisions of the Federal Water Pollution Control Act (33 U.S.C. §§ 1300); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); laws, rules and regulations of the Environmental Protection Agency, the State Water Resources Control Board and the Santa Ana Regional Water Quality Control Board; the City's ordinances regulating discharges of storm water; and any and all regulations, policies, or permits issued pursuant to any such authority regulating the discharge of pollutants, as that term is used in the Porter-Cologne Water Quality Control Act, to any ground or surface water in the State.

4.10.7.2 Liability for Non-Compliance. Failure to comply with the laws, regulations and policies described in this Section is a violation of law that may subject Vendor or City to penalties, fines, or additional regulatory requirements. Vendor shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless,

pursuant to the indemnification provisions of this Agreement, from and against any and all fines, penalties, claims or other regulatory requirements imposed as a result of Vendor's non-compliance with the laws, regulations and policies described in this Section, unless such non-compliance is the result of the sole negligence or willful misconduct of the City, its officials, officers, agents, employees or authorized volunteers.

4.10.7.3 Training. In addition to any other standard of care requirements set forth in this Agreement, Vendor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them without impacting water quality in violation of the laws, regulations and policies described in this Section. Vendor further warrants that it, its employees and subcontractors will receive adequate training, as determined by City, regarding the requirements of the laws, regulations and policies described in this Section as they may relate to the Services provided under this Agreement. Upon request, City will provide Vendor with a list of training programs that meet the requirements of this paragraph.

5. PROJECT MANAGEMENT

5.1 City's Representative. The City hereby designates Daniel Beers, Principal Project Manager, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Agreement. Vendor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

5.2 Vendor's Representative. Vendor hereby designates Brendan O'Donnell, Project Manager or his or her designee, to act as its representative for the performance of this Agreement ("Vendor's Representative"). Vendor's Representative shall have full authority to represent and act on behalf of the Vendor for all purposes under this Agreement. The Vendor's Representative shall supervise and direct the Services, using his best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all work required under this Agreement.

6. INSURANCE.

6.1 Time for Compliance. Vendor shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Vendor shall not allow any subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Section.

6.2 Minimum Requirements. Vendor shall, at its expense, procure and maintain for the duration of the Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Agreement by the Vendor, its agents, representatives, employees or subcontractors. Vendor shall also require all of its subcontractors to procure and maintain the same insurance for the duration of the Agreement. Such insurance shall meet at least the following minimum levels of coverage:

6.2.1 Minimum Scope of Insurance. Coverage shall be at least as broad as the latest version of the following: (1) *General Liability*: Insurance Services Office Commercial General Liability coverage (occurrence form CG 0001); (2) *Automobile Liability*: Insurance Services Office Business Auto Coverage form number CA 0001, code 1 (any auto); and (3) *Workers' Compensation and Employer's Liability*: Workers' Compensation insurance as required

by the State of California and Employer's Liability Insurance. The policy shall not contain any exclusion contrary to the Agreement, including but not limited to endorsements or provisions limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 29); or (2) cross liability for claims or suits by one insured against another.

6.2.2 Minimum Limits of Insurance. Vendor shall maintain limits no less than: (1) *General Liability:* $2,000,000 MINIMUM per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with general aggregate limit is used including, but not limited to, form CG 2503, either the general aggregate limit shall apply separately to this Agreement/location or the general aggregate limit shall be twice the required occurrence limit; (2) *Automobile Liability:* $2,000,000 MINIMUM per accident for bodily injury and property damage; and (3) *Workers' Compensation and Employer's Liability:* Workers' Compensation limits as required by the Labor Code of the State of California. Employer's Liability limits of $1,000,000 MINIMUM per accident for bodily injury or disease. Defense costs shall be paid in addition to the limits.

6.2.3 Notices; Cancellation or Reduction of Coverage. At least fifteen (15) days prior to the expiration of any such policy, evidence showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or materially reduced, Vendor shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies. In the event any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, the City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by the City will be promptly reimbursed by Vendor or the City may withhold amounts sufficient to pay premium from Vendor payments. In the alternative, the City may suspend or terminate this Agreement.

6.2.4 Additional Insured. The City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be named as additional insureds on Vendor's and its subcontractors' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

6.3 Insurance Endorsements. The insurance policies shall contain the following provisions, or Vendor shall provide endorsements on forms supplied or approved by the City to add the following provisions to the insurance policies:

6.3.1 General Liability. The general liability policy shall include or be endorsed (amended) to state that: (1) using ISO CG forms 20 10 and 20 37, or endorsements providing the exact same coverage, the City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insured with respect to the Services or ongoing and complete operations performed by or on behalf of the Vendor, including materials, parts or equipment furnished in connection with such work; and (2) using ISO form 20 01, or endorsements providing the exact same coverage, the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Vendor's scheduled underlying coverage. Any excess insurance shall contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City, before the City's own primary insurance, deductible, or self-insurance shall be called upon to protect it as a named insured. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Vendor's insurance and shall not be

called upon to contribute with it in any way. Notwithstanding the minimum limits set forth in Section 6.2.2, any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 6.3.1.

6.3.2 Automobile Liability. The automobile liability policy shall include or be endorsed (amended) to state that: (1) the City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible; and (2) the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Vendor's scheduled underlying coverage. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Vendor's insurance and shall not be called upon to contribute with it in any way. Policy shall contain or be endorsed to contain such provisions. Notwithstanding the minimum limits set forth in Section 6.2.2, any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 6.3.2.

6.3.3 Workers' Compensation and Employer's Liability Coverage. The insurer shall agree to waive all rights of subrogation against the City, its directors, officials, officers, employees, agents, and volunteers for losses paid under the terms of the insurance policy which arise from work performed by the Vendor.

6.3.4 All Coverages. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds.

6.4 Separation of Insureds; No Special Limitations; Waiver of Subrogation. All insurance required by this Section shall contain standard separation of insureds provisions. In addition, such insurance shall not contain any special limitations on the scope of protection afforded to the City, its directors, officials, officers, employees, agents, and volunteers. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. All policies shall waive any right of subrogation of the insurer against the City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, or shall specifically allow Vendor or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Vendor hereby waives its own right of recovery against City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, and shall require similar written express waivers and insurance clauses from each of its subcontractors.

6.5 Deductibles and Self-Insurance Retentions. Any deductibles or self-insured retentions must be declared to and approved by the City. Vendor shall guarantee that, at the

option of the City, either: (1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the City, its directors, officials, officers, employees, agents, and volunteers; or (2) the Vendor shall procure a bond guaranteeing payment of losses and related investigation costs, claims and administrative and defense expenses.

6.6 Subcontractor Insurance Requirements. Vendor shall not allow any subcontractors to commence work on any subcontract relating to the work under the Agreement until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. If requested by Vendor, the City may approve different scopes or minimum limits of insurance for particular subcontractors. The Vendor and the City shall be named as additional insureds on all subcontractors' policies of Commercial General Liability using ISO form 20 38, or coverage at least as broad.

6.7 Acceptability of Insurers. Insurance is to be placed with insurers with a current A.M. Best's rating no less than A:VIII, licensed to do business in California, and satisfactory to the City.

6.8 Verification of Coverage. Vendor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Agreement on forms satisfactory to the City. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms provided by the City if requested. All certificates and endorsements must be received and approved by the City before work commences. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

6.9 Reporting of Claims. Vendor shall report to the City, in addition to Vendor's insurer, any and all insurance claims submitted by Vendor in connection with the Services under this Agreement.

7. INDEMNIFICATION.

7.1 Scope of Indemnity. To the fullest extent permitted by law, Vendor shall defend, indemnify and hold the City, its officials, employees, agents and volunteers free and harmless from any and all claims, demands, causes of action, suits, actions, proceedings, costs, expenses, liability, judgments, awards, decrees, settlements, loss, damage or injury of any kind, in law or equity, regardless of whether the allegations are false, fraudulent, or groundless, to property or persons, including wrongful death, (collectively, "Claims") in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Vendor, its officials, officers, employees, subcontractors, consultants or agents arising out of or in connection with the Services, the Goods or this Agreement, including without limitation the payment of all expert witness fees, attorneys' fees and other related costs and expenses. Notwithstanding the foregoing, to the extent required by Civil Code section 2782, Vendor's indemnity obligation shall not apply to such loss or damage which is caused by the sole negligence or willful misconduct of the City.

7.2 Additional Indemnity Obligations. Vendor shall defend, with counsel of City's choosing and at Vendor's own cost, expense and risk, any and all Claims covered by this section that may be brought or instituted against City or its officials, employees, agents and volunteers. In addition, Vendor shall pay and satisfy any judgment, award or decree that may be rendered against City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Vendor shall also reimburse City for the cost of any settlement paid

by City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Vendor shall reimburse City and its officials, employees, agents and volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. Vendor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, its officials, employees, agents and volunteers.

8. CALIFORNIA LABOR CODE

8.1 Prevailing Wages. Vendor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, If the total compensation is $1,000 or more, Vendor agrees to fully comply with such Prevailing Wage Laws. City shall provide Vendor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Vendor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Vendor's principal place of business and at the project site. Vendor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Vendor shall therefore comply with such Labor Code sections to the fullest extent required by law.

8.2 Registration. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Vendor and all subcontractors must be registered with the Department of Industrial Relations. Vendor shall maintain registration for the duration of this Agreement and require the same of any subcontractor. Notwithstanding the foregoing, the contractor registration requirements mandated by Labor Code Sections 1725.5 and 1771.1 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Sections 1725.5 and 1771.1.

8.3 Compliance Monitoring. This Agreement may also be subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Vendor's sole responsibility to comply with all applicable registration and labor compliance requirements. Any stop orders issued by the Department of Industrial Relations against Vendor or any subcontractor that affect Vendor's performance of Services, including any delay, shall be Vendor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Vendor caused delay and shall not be compensable by the City. Vendor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Vendor or any subcontractor.

9. SAFETY.

Vendor shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its services, the Vendor shall at all times be in compliance with all

applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed. Safety precautions as applicable shall include, but shall not be limited to: (A) adequate life protection and life saving equipment and procedures; (B) instructions in accident prevention for all employees and subcontractors, such as safe walkways, scaffolds, fall protection ladders, bridges, gang planks, confined space procedures, trenching and shoring, equipment and other safety devices, equipment and wearing apparel as are necessary or lawfully required to prevent accidents or injuries; and (C) adequate facilities for the proper inspection and maintenance of all safety measures.

10. ACCOUNTING RECORDS.

Vendor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Vendor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Vendor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

11. TERMINATION OF AGREEMENT.

11.1 Grounds for Termination. City may, by written notice to Vendor, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Vendor of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Vendor shall be compensated only for those Services and Goods which have been adequately rendered to City, and Vendor shall be entitled to no further compensation. If terminated for cause because the Vendor refused or failed to deliver the Goods, the City may obtain Goods by whatever method it may deem expedient. If City's cost of obtaining the Goods, including compensation for additional managerial and administrative services, will exceed the unpaid balance of the Goods, Vendor will be liable for and will pay the difference to City. Vendor may not terminate this Agreement except for cause. The rights and remedies of the City provided in this Section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

11.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Vendor to provide all finished or unfinished documents and data and other information of any kind prepared by Vendor in connection with the performance of the Services under this Agreement. Vendor shall be required to provide such document and other information within fifteen (15) days of the request.

11.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, goods and services similar to those terminated.

12. GENERAL PROVISIONS.

12.1 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Vendor:

BodEV, Inc.
2581 Union Ave
La Habra, CA 90631
Attn: Brendan O'Donnell

City:

City of Ontario
303 East "B" Street
Ontario, CA 91764-4196
Attn: Dan Beers, Principal Construction Project Manager

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

12.2 Subcontracting. Vendor shall not subcontract any portion of the work required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

12.3 Governing Law; Government Code Claim Compliance. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Vendor must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Vendor. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Vendor shall be barred from bringing and maintaining a valid lawsuit against the City.

12.4 Time of Essence. Time is of the essence for each and every provision of this Agreement.

12.5 City's Right to Employ Other Vendors. City reserves right to employ other Vendors in connection with the Goods and Services provided under this Agreement.

12.6 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

12.7 Assignment or Transfer. Vendor shall not assign, hypothecate or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.

12.8 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term

referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Vendor include all personnel, employees, agents, and subcontractors of Vendor, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content or intent of this Agreement.

12.9 Amendment; Modification. No supplement, modification or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

12.10 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

12.11 No Third Party Beneficiaries. Except to the extent expressly provided for in Section 12.7, there are no intended third party beneficiaries of any right or obligation assumed by the Parties.

12.12 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

12.13 Prohibited Interests. Vendor maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Vendor, to solicit or secure this Agreement. Further, Vendor warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Vendor, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Vendor further agrees to file, or shall cause its employees or subcontractors to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

12.14 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

12.15 Authority to Enter Agreement. Vendor has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

12.16 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

12.17 Entire Agreement. This Agreement contains the entire Agreement of the parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified by a writing signed by both parties.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Daniel P Beers Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 9

SUBJECT: A CONSTRUCTION CONTRACT WITH TFN ARCHITECTURAL SIGNAGE, INC. FOR SIGNAGE AT THE ONTARIO PROFESSIONAL BASEBALL STADIUM

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager, or his designee, to execute a Construction Contract with TFN Architectural Signage, Inc., of Placentia, California, to provide signage for Bid No. 1878 - D&C23-011 – Professional Baseball Stadium (Rebid of BC20) in the amount of $1,816,695 and authorize a contingency of $363,339 for a total not-to-exceed contract amount of $2,180,034; and
B. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The proposed Construction Contract with TFN Architectural Signage, Inc. is in the amount of $1,816,695 plus a contingency of $363,339 for a total not-to-exceed contract amount of $2,180,034. The Fiscal Year 2024-25 Adopted Budget includes appropriations in the Capital Projects -Measure Q Fund for the Signage at the Ontario Professional Baseball Stadium.

BACKGROUND & ANALYSIS: On August 6, 2024, the City Council approved the Environmental Impact Report for the Ontario Sports Empire. The Ontario Sports Empire includes a new Professional Baseball Stadium located at the Northwest corner of Riverside Drive and Hellman Avenue. On September 17, 2024, the City Council awarded Construction Contracts for the Structural Steel and Grading for the Professional Baseball Stadium at the Ontario Sports Empire.

On October 15, 2024, the City Council awarded 24 Construction Contracts for various construction

trades for the Professional Baseball Stadium. At the same meeting, the City Council rejected all bids for three (3) of the construction trades. Bid packages 02-Site Concrete, 06-Finish Carpentry, and 20-Signage had inconsistent bids, and several bidders were deemed non-responsive. To get a competitive and fair cost, Staff recommended rejecting all bids for these categories and rebid. On December 17, 2024, the City Council awarded Construction Contracts for the rebid of bid packages 02-Site Concrete and 06-Finish Carpentry.

On February 6, 2025, five (5) bids were received for Bid No. 1878 - D&C23-011 – Professional Baseball Stadium (Rebid of BC20). Below is a list of the responsible/responsive bids received:

VENDOR	LOCATION	AMOUNT
TFN Architectural Signage, Inc.	Placentia, CA	$1,816,695
Fusion Sign and Design	Riverside, CA	$1,920,213
Drive21, Inc.	New York, CA	$2,094,335
Architectural Design & Signs, Inc.	Corona, CA	$2,261,430
CREO Industrial Arts	Woodinville, WA	$2,351,248

Tilden-Coil Constructors, Inc., the City's Construction Management Company for the Sport Complex Project, and City Staff reviewed each bid and each company's qualifications and responsiveness to the bid requirements. Based on the credentials, pricing, and reference checks, Staff recommends awarding Construction Contract D&C23-011 Professional Baseball Stadium (Rebid of BC20) to TFN Architectural Signage, Inc.

SECTION 00500 – CONTRACT FOR CONSTRUCTION

This Contract for Construction ("Contract"), No. D&C23-011 is made and entered as of _____, by and between City of Ontario, with its principal place of business at 303 East "B" Street, Ontario, CA 91764, sometimes hereinafter called the "City" and **TFN Architectural Signage, Inc. dba Third Floor North**, sometimes hereinafter called "Contractor."

WITNESSETH: That the parties hereto have mutually covenanted and agreed, and by these presents do covenant and agree with each other as follows:

ARTICLE 1. SCOPE OF WORK.

The Contractor shall perform all Work within the time stipulated in the Contract, and shall provide all labor, materials, equipment, tools, utility services, and transportation to complete all of the Work required in strict compliance with the Contract Documents as specified in Article 5, below, for the following Project:

Ontario Ballpark – Signage

Contractor is an independent contractor and not an agent of the City. The Contractor and its surety shall be liable to the City for any damages arising as a result of the Contractor's failure to comply with this obligation.

ARTICLE 2. TIME FOR COMPLETION.

Time is of the essence in the performance of the Work. The Work shall be commenced on the date stated in the City's Notice to Proceed. The Contractor shall complete all Work required by the Contract Documents **per the contract schedule and within 391 calendar days** from the commencement date stated in the Notice to Proceed. By its signature hereunder, Contractor agrees the time for completion set forth above is adequate and reasonable to complete the Work.

ARTICLE 3. CONTRACT PRICE.

The City shall pay to the Contractor as full compensation for the performance of the Contract, subject to any additions or deductions as provided in the Contract Documents, and including all

applicable taxes and costs, the sum of **One Million Eight Hundred Sixteen Thousand Six Hundred Ninety-Five Dollars ($1,816,695)**. Payment shall be made as set forth in the General Conditions. The City will pay to Contractor compensation based upon the prices set forth in the Bid Schedule.

ARTICLE 4. LIQUIDATED DAMAGES.

Contractor acknowledges that the City will sustain actual damages for each and every Day completion of the Project is delayed beyond the Contract Time. Because of the nature of the Project, it would be impracticable or extremely difficult to determine the City's actual damages. Accordingly, in accordance with Government Code section 53069.85, it is agreed that the Contractor will pay the City the sum of $10,000 for each and every calendar day of delay beyond the time prescribed in the Contract Documents for finishing the Work, as Liquidated Damages and not as a penalty or forfeiture. In the event this is not paid, the Contractor agrees the City may deduct that amount from any money due or that may become due the Contractor under the Contract. This Section does not exclude recovery of other damages specified in the Contract Documents. Liquidated damages may be deducted from progress payments due Contractor, Project retention or may be collected directly from Contractor, or from Contractor's surety. These provisions for liquidated damages shall not prevent the City, in case of Contractor's default, from terminating the Contractor.

ARTICLE 5. COMPONENT PARTS OF THE CONTRACT.

The "Contract Documents" include the following:

Notice Inviting Bids
Instructions to Bidders
Bid Forms
Bid Acknowledgement
Bid Schedule
Bid Guarantee
Designation of Subcontractors
Non-Collusion Declaration Form
Iran Contracting Act Certification
Public Works Contractor DIR Registration Certification
Performance Bond
Payment (Labor and Materials) Bond
Contract for Construction
General Conditions
Special Conditions
Specifications
Addenda
Construction Plans and Drawings
Standard Specifications for Public Works Construction "Greenbook", latest edition, Except Sections 1-9
Applicable Local Agency Standards and Specifications, as last revised
Reference Specifications
Approved and fully executed Change Orders
Permits
Scope of Work Summary
Any other documents contained in or incorporated into the Contract

The Contractor shall complete the Work in strict accordance with all of the Contract Documents.

All of the Contract Documents are intended to be complementary. Work required by one of the Contract Documents and not by others shall be done as if required by all. In the event of conflict, the various Contract Documents will be given effect in the order set forth in the General Conditions. This Contract shall supersede any prior agreement of the parties.

ARTICLE 6. PROVISIONS REQUIRED BY LAW AND CONTRACTOR COMPLIANCE.

Each and every provision of law required to be included in these Contract Documents shall be deemed to be included in these Contract Documents. The Contractor shall comply with all requirements of applicable federal, state and local laws, rules and regulations, including, but not limited to, the provisions of the California Labor Code and California Public Contract Code which are applicable to this Work.

ARTICLE 7. INDEMNIFICATION.

Contractor shall provide indemnification and defense as set forth in the General Conditions.

ARTICLE 8. PREVAILING WAGES.

Contractor shall be required to pay the prevailing rate of wages in accordance with the Labor Code which such rates shall be made available at the City's Office or may be obtained online at http://www.dir.ca.gov and which must be posted at the job site.

ARTICLE 9. FALSE CLAIMS.

Contractor acknowledges that if a false claim is submitted to the City, it may be considered fraud and Contractor may be subject to criminal prosecution. Contractor acknowledges that the False Claims Act, California Government Code sections 12650, et seq., provides for civil penalties where a person knowingly submits a false claim to a public entity. These provisions include within their scope false claims made with deliberate ignorance of the false information or in reckless disregard of the truth or falsity of the information. In the event the City seeks to recover penalties pursuant to the False Claims Act, it is entitled to recover its litigation costs, including attorneys' fees. Contractor hereby acknowledges that the filing of a false claim may the Contractor to an administrative debarment proceeding wherein Contractor may be prevented from further bidding on public contracts for a period of up to five (5) years.

[REMAINDER OF PAGE LEFT INTENTIONALLY BLANK]

IN WITNESS WHEREOF, this Contract has been duly executed by the above-named parties, on the day and year above written.

Department: Public Works Prepared By: Adrian Escamilla Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 10

SUBJECT: **AWARD A CONSTRUCTION CONTRACT TO MCCARTHY BUILDING COMPANIES, INC. FOR DESIGN-BUILD CONSTRUCTION SERVICES FOR THE VINEYARD PARKING STRUCTURE PROJECT**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager, or his designee, to execute a Construction Contract with McCarthy Building Companies, Inc., of Newport Beach, California, to provide design-build construction services for the Vineyard Parking Structure in the amount of $24,990,042 and authorize a contingency of $3,748,506 for a total not-to-exceed contract amount of $28,738,548;
B. Authorize the City Manager, or his designee, to execute all documents required for the completion of the project including, but not limited to agreements, assessments, easements, lot line adjustments, reduction of retention accounts, contracts and contract amendments within the authorization limits, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The proposed Construction Contract with McCarthy Building Companies, Inc. is $24,990,042 plus a contingency of $3,748,506 for a total not-to-exceed contract amount of $28,738,548. If approved, additional appropriations in the Capital Projects - Measure Q Fund will be requested at a future quarterly budget update as needed.

BACKGROUND & ANALYSIS: The proposed Vineyard Parking Structure will be a multi-story parking structure with approximately 650 parking spaces located on Vineyard Avenue and Riverside Drive. The structure will provide the necessary public parking for the Ontario Sports Empire located in the Ontario Ranch Community. The Ontario Sports Empire consists of sports fields, including approximately 13 multi-use fields, eight multi-use baseball/softball fields and open space.

In December 2025, the City solicited pre-qualification proposals for Invitation No. 1844 D&C24-008 Vineyard Parking Structure from Design-Build entities interested in qualifying to build the Vineyard Parking Structure. Six (6) submittals were deemed responsive. Those six (6) Design-Build entities were asked to submit proposals to design and construct the Vineyard Parking Structure. A selection team of City Staff and Transtech, Inc., the Construction Management Company of the Vineyard Parking Structure Project, reviewed and scored the four (4) submittals listed below based on appearance and adherence to the bid documents.

CONTRACTOR NAME	AVERAGE SCORE
McCarthy Building Companies, Inc.	90
Swinerton Builders	75
Bomel Construction	74
Hensel Phelps	55

Based on the scores, McCarthy Building Companies, Inc.'s proposal was deemed most responsive with an overall average rating of 90. Their proposal was the best blend of exterior appeal, favorable project timeline, number of parking spaces, and project cost. McCarthy Building Companies, Inc. has extensive design-build experience. Their recent projects include the C-Block Parking Structure, City Hall Parking Structure, and various external parking structure projects. Staff recommends approval of a Construction Contract with McCarthy Building Companies, Inc. for the Vineyard Parking Structure Project.

The Vineyard Parking Structure is scheduled to become operational by Fall 2026.

ARTICLE 6. PROVISIONS REQUIRED BY LAW AND CONTRACTOR COMPLIANCE.

Each and every provision of law required to be included in these Contract Documents shall be deemed to be included in these Contract Documents. The Contractor shall comply with all requirements of applicable federal, state and local laws, rules and regulations, including, but not limited to, the provisions of the California Labor Code and California Public Contract Code which are applicable to this Work.

ARTICLE 7. INDEMNIFICATION.

Contractor shall provide indemnification and defense as set forth in the General Conditions.

ARTICLE 8. PREVAILING WAGES.

Contractor shall be required to pay the prevailing rate of wages in accordance with the Labor Code which such rates shall be made available at the City's Office or may be obtained online at http://www.dir.ca.gov and which must be posted at the job site.

ARTICLE 9. FALSE CLAIMS.

Contractor acknowledges that if a false claim is submitted to the City, it may be considered fraud and Contractor may be subject to criminal prosecution. Contractor acknowledges that the False Claims Act, California Government Code sections 12650, et seq., provides for civil penalties where a person knowingly submits a false claim to a public entity. These provisions include within their scope false claims made with deliberate ignorance of the false information or in reckless disregard of the truth or falsity of the information. In the event the City seeks to recover penalties pursuant to the False Claims Act, it is entitled to recover its litigation costs, including attorneys' fees. Contractor hereby acknowledges that the filing of a false claim may the Contractor to an administrative debarment proceeding wherein Contractor may be prevented from further bidding on public contracts for a period of up to five (5) years.

[REMAINDER OF PAGE LEFT INTENTIONALLY BLANK]

IN WITNESS WHEREOF, this Contract has been duly executed by the above-named parties, on the day and year above written.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Manuel Rebolledo Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Jacqueline Leon, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 11

SUBJECT: AUTHORIZE A SOLE SOURCE PURCHASE WITH FIRE APPARATUS SOLUTIONS FOR TWO (2) NEW KME FIRE PUMPERS

RECOMMENDATION: That the City Council authorize the sole source purchase and delivery of two (2) new KME K180 Fire Pumpers from Fire Apparatus Solutions of Rialto, California, in the amount of $1,996,979 plus a 5% contingency in the amount of $99,849 for a total not-to-exceed amount of $2,096,828.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety

FISCAL IMPACT: The recommendation for the purchase of two (2) new fire apparatus is in the amount of $2,096,828. If approved, additional appropriations in the Equipment Services Fund will be requested at a future quarterly budget update as needed.

BACKGROUND & ANALYSIS: On September 19, 2023, the City Council approved Fire Apparatus Solutions (FAS), of Rialto, California, as a sole source vendor for fire apparatus. On April 2, 2023, FAS became the only authorized KME Dealership in the State of California.

The addition of two new fire pumpers is essential to address the growing needs of our fire department and reserve fleet. Currently, our reserve fleet consists of four units, and one, Unit 006, was placed into service in 1999, far exceeding the recommended service life. The National Fire Protection Agency (NFPA) advises removing fire apparatus from emergency service after 25 years, making Unit 006 no longer viable. The addition of Stations 9 and 11 only accounted for frontline apparatus, not the reserve needs. With operational readiness and mutual aid requests becoming difficult, the reserve fleet's availability has dropped to 0-1 units, straining training and maintenance.

Fleet Services and Fire Department City staff recommend a sole-source purchase through a goods and equipment agreement with FAS, considering service center location, warranty, reliability, and training needs, along with FAS's additional services like annual pump testing, aerial certifications, and routine maintenance. Adding two new reserve engines will increase our reserve fleet to five,

improving operational flexibility, training, and emergency response, ensuring we meet the City and departments growing demands.

CITY OF ONTARIO
GOODS AND EQUIPMENT PURCHASE AGREEMENT

This Goods and Equipment Purchase Agreement ("Agreement") is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City"), **and Fire Apparatus Solutions**, a **S-CORPORATION** with its principal place of business at **1762 S. Sycamore Ave, Rialto, CA 92376** ("Supplier"). City and Supplier are sometimes individually referred to as "Party" and collectively as "Parties" in this Agreement.

Section 1. DEFINITIONS.

A. "Goods" means all machinery, equipment, supplies, items, parts, materials, labor or other services, including design, engineering and installation services, provided by Supplier as specified in Exhibit "A," attached hereto and incorporated herein by reference.

B. "Delivery Date(s)" means that date or dates upon which the Goods is to be delivered to City, ready for approval, testing and/or use as specified in Exhibit "B."

Section 2. MATERIALS AND WORKMANSHIP.

When Exhibit "A" specifies machinery, equipment or material by manufacturer, model or trade name, no substitution will be made without City's written approval. Machinery, equipment or material installed in the Goods without the approval required by this Section 2 will be deemed to be defective material for purposes of Section 4. Where machinery, equipment or materials are referred to in Exhibit "A" as equal to any particular standard, City will decide the question of equality. When requested by City, Supplier will furnish City with the name of the manufacturer, the performance capabilities and other pertinent information necessary to properly determine the quality and suitability of any machines, equipment and material to be incorporated in the Goods. Material samples will be submitted at City's request.

Section 3. INSPECTIONS AND TESTS.

City shall have the right to inspect and/or test the Goods prior to acceptance. If upon inspection or testing the Goods or any portion thereof are found to be nonconforming, unsatisfactory, defective, of inferior quality or workmanship, or fail to meet any requirements or specifications contained in Exhibit "A," then without prejudice to any other rights or remedies, City

may reject the Goods or exercise any of its rights under Section 4.C. The inspection, failure to make inspection, acceptance of goods, or payment for goods shall not impair City's right to reject nonconforming goods, irrespective of City's failure to notify Supplier of a rejection of nonconforming goods or revocation of acceptance thereof or to specify with particularity any defect in nonconforming goods after rejection or acceptance thereof.

Section 4. WARRANTY.

A. Supplier warrants that the Goods will be of merchantable quality and free from defects in design, engineering, material, and workmanship for a period of two (2) years, or such longer period as provided by a manufacturer's warranty or as agreed to by Supplier and City, from the date of final written acceptance of the Goods by City as required for final payment under Section 7. Supplier further warrants that any services provided in connection with the Goods will be performed in a professional and workmanlike manner and in accordance with the highest industry standards.

B. Supplier further warrants that all machinery, equipment, or process included in the Goods will meet the performance requirements and specifications specified in Exhibit "A" and shall be fit for the purpose intended. City's inspection, testing, approval, or acceptance of any such machinery, equipment, or process will not relieve Supplier of its obligations under this Section 4.B.

C. For any breach of the warranties contained in Section 4.A and Section 4.B, Supplier will, immediately after receiving notice from City, at the option of City, and at Supplier's own expense and without cost to City:

1. Repair the defective Goods;

2. Replace the defective Goods with conforming Goods, F.O.B. City's plant, office or other location of City where the Goods was originally performed or delivered; or

3. Repay to City the purchase price of the defective Goods.

If City selects repair or replacement, any defects will be remedied without cost to City, including but not limited to, the costs of removal, repair, and replacement of the defective Goods, and reinstallation of new Goods. All such defective Goods that is so remedied will be similarly warranted as stated above. In addition, Supplier will repair or replace other items of the Goods which may have been damaged by such defects or the repairing of the same, all at its own expense and without cost to City.

D. Supplier also warrants that the Goods is free and clear of all liens and encumbrances whatsoever, that Supplier has a good and marketable title to same, and that Supplier owns or has a valid license for all of the proprietary technology and intellectual property incorporated within the Goods. Supplier agrees to indemnify, defend, and hold City harmless against any and all third party claims resulting from the breach or inaccuracy of any of the foregoing warranties.

E. In the event of a breach by Supplier of its obligations under this Section 4, City will not be limited to the remedies set forth in this Section 4, but will have all the rights and remedies permitted by applicable law, including without limitation, all of the rights and remedies afforded to City under the California Commercial Code.

Section 5. PRICES.

Unless expressly provided otherwise, all prices and fees specified in Exhibit "C," attached hereto and incorporated herein by reference, are firm and shall not be subject to change without the written approval of City. No extra charges of any kind will be allowed unless specifically agreed to in writing by City's authorized representative. The total price shall include (i) all federal, state and local sales, use, excise, privilege, payroll, occupational and other taxes applicable to the Goods furnished to City hereunder; and (ii) all charges for packing, freight and transportation to destination.

Section 6. CHANGES.

City, at any time, by a written order, and without notice to any surety, may make changes in the Goods, including but not limited to, City's requirements and specifications. If such changes affect the cost of the Goods or time required for its performance, an equitable adjustment will be made in the price or time for performance or both. Any change in the price necessitated by such change will be agreed upon between City and Supplier and such change will be authorized by a change order document signed by City and accepted by Supplier.

Section 7. PAYMENTS.

A. Terms of payment, are net thirty (30) days, less any applicable retention, after receipt of invoice, or completion of applicable Progress Milestones. Final payment shall be made by City after Supplier has satisfied all contractual requirements. Payment of invoices shall not constitute acceptance of Goods.

B. If Progress Milestones have been specified in Exhibit "B," then payments for the Goods will be made as the requirements of such Progress Milestones are met. Progress payments for the Goods will be made by City upon proper application by Supplier during the progress of the Goods and according to the terms of payment as specified in Exhibit "B." Supplier's progress billing invoice will include progress payments due for the original scope of work and changes. Each "Item for Payment" shown in Exhibit "B" and each change order will be itemized on the invoice. Invoices for cost plus work, whether part of Exhibit "B" or a change order, must have subcontractor and/or supplier invoices attached to Supplier's invoice. Other format and support documents for invoices will be determined by City in advance of the first invoice cycle.

C. Payments otherwise due may be withheld by City on account of defective Goods not remedied, liens or other claims filed, reasonable evidence indicating probable filing of liens or other claims, failure of Supplier to make payments properly to its subcontractors or for material or labor, the failure of Supplier to perform any of its other obligations under the Agreement, or to protect City against any liability arising out of Supplier's failure to pay or discharge taxes or other obligations. If the causes for which payment is withheld are removed, the withheld payments will

be made promptly. If the said causes are not removed within a reasonable period after written notice, City may remove them at Supplier's expense.

D. Payment of the final Progress Milestone payment or any retention will be made by City upon:

1. Submission of an invoice for satisfactory completion of the requirements of a Progress Milestone as defined in Exhibit "B" and in the amount associated with the Progress Milestone;

2. Written acceptance of the Goods by City;

3. Delivery of all drawings and specifications, if required by City;

4. Delivery of executed full releases of any and all liens arising out of this Agreement; and

5. Delivery of an affidavit listing all persons who might otherwise be entitled to file, claim, or maintain a lien of any kind or character, and containing an averment that all of the said persons have been paid in full.

If any person refuses to furnish an actual release or receipt in full, Supplier may furnish a bond satisfactory to City to indemnify City against any claim or lien at no cost to City.

E. Acceptance by Supplier of payment of the final Progress Milestone payment pursuant to Section 7.D will constitute a waiver, release and discharge of any and all claims and demands of any kind or character which Supplier then has, or can subsequently acquire against City, its successors and assigns, for or on account of any matter or thing arising out of, or in any manner connected with, the performance of this Agreement. However, payment for the final Progress Milestone by City will not constitute a waiver, release or discharge of any claims or demands which City then has, or can subsequently acquire, against Supplier, its successors and assigns, for or on account of any matter or thing arising out of, or in any manner connected with, the performance of this Agreement.

F. Automated Clearing House ("ACH") payments. It is the City's policy to pay its consultant invoices via electronic fund transfers through the ACH network. All payments due and owing pursuant to a properly issued and correct invoice or under this Agreement shall be made through electronic ACH transfers, unless otherwise agreed upon by both Parties in writing. Supplier shall provide the City with ACH payment details whereby the City shall initiate the ACH transfers to Supplier in the amount required pursuant to a properly issued and correct invoice or under this Agreement. Each Party shall undertake any and all required actions and execute any required documents, instruments, or agreements required to effectuate the requirements of this Section. In the event the City erroneously deposits funds into an account, or otherwise deposits funds to which Supplier is not entitled: (1) Supplier shall immediately notify the City and the financial institution; (2) Supplier shall not withdraw any of the funds which were erroneously deposited or to which Supplier is not entitled; and (3) Supplier authorizes both the City and

financial institution to take all actions necessary to correct the error and return to the City all funds erroneously deposited or to which Supplier is not entitled.

Section 8. SCHEDULE FOR DELIVERY.

A. The time of Supplier's performance is of the essence for this Agreement. The Goods will be delivered in accordance with the schedule set forth in Exhibit "B." Supplier must immediately notify City in writing any time delivery is behind schedule or may not be completed on schedule. In addition to any other rights City may have under this Agreement or at law, Supplier shall pay City the sum of **$1,996,979** per item of Goods for each calendar day for which the item of Goods is unavailable beyond the scheduled delivery date(s) specified in Exhibit "B."

B. In the event that the Goods is part of a larger project or projects that require the coordination of multiple contractors or suppliers, then Supplier will fully cooperate in scheduling the delivery so that City can maximize the efficient completion of such project(s).

Section 9. TAXES.

A. Supplier agrees to timely pay all sales and use tax (including any value added or gross receipts tax imposed similar to a sales and use tax) imposed by any federal, state or local taxing authority on the ultimate purchase price of the Goods provided under this Agreement.

B. Supplier will withhold, and require its subcontractors, where applicable, to withhold all required taxes and contributions of any federal, state or local taxing authority which is measured by wages, salaries or other remuneration of its employees or the employees of its subcontractors. Supplier will deposit, or cause to be deposited, in a timely manner with the appropriate taxing authorities all amounts required to be withheld.

C. All other taxes, however denominated or measured, imposed upon the price of the Goods provided hereunder, will be the responsibility of Supplier. In addition, all taxes assessed by any taxing jurisdiction based on Supplier property used or consumed in the provision of the Goods such as and including ad valorem, use, personal property and inventory taxes will be the responsibility of Supplier.

D. Supplier will, upon written request, submit to City written evidence of any filings or payments of all taxes required to be paid by Supplier hereunder.

Section 10. INDEPENDENT CONTRACTOR.

Supplier enters into this Agreement as an independent contractor and not as an employee of City. Supplier shall have no power or authority by this Agreement to bind City in any respect. Nothing in this Agreement shall be construed to be inconsistent with this relationship or status. All employees, agents, contractors or subcontractors hired or retained by the Supplier are employees, agents, contractors or subcontractors of the Supplier and not of City. City shall not be obligated in any way to pay any wage claims or other claims made against Supplier by any such employees, agents, contractors or subcontractors or any other person resulting from performance of this Agreement.

Section 11. SUBCONTRACTS.

Unless otherwise specified, Supplier must obtain City's written permission before subcontracting any portion of the Goods. Except for the insurance requirements in Section 13.A, all subcontracts and orders for the purchase or rental of supplies, materials or equipment, or any other part of the Goods, will require that the subcontractor be bound by and subject to all of the terms and conditions of the Agreement. No subcontract or order will relieve Supplier from its obligations to City, including, but not limited to Supplier's insurance and indemnification obligations. No subcontract or order will bind City.

Section 12. TITLE AND RISK OF LOSS.

Unless otherwise agreed, City will have title to, and risk of loss of, all completed and partially completed portions of the Goods upon delivery, as well as materials delivered to and stored on City property which are intended to become a part of the Goods. However, Supplier will be liable for any loss or damage to the Goods and/or the materials caused by Supplier or its subcontractors, their agents or employees, and Supplier will replace or repair said Goods or materials at its own cost to the complete satisfaction of City. Notwithstanding the foregoing, in the event that the City has paid Supplier for all or a portion of the Goods which remains in the possession of Supplier, then City shall have title to, and the right to take possession of, such Goods at any time following payment therefor. Risk of loss for any Goods which remains in the possession of Supplier shall remain with Supplier until such Goods has been delivered or City has taken possession thereof. Supplier will have risk of loss or damage to Supplier's property used in the construction of the Goods but which does not become a part of the Goods.

Section 13. INDEMNIFICATION.

A. Supplier shall defend, indemnify and hold the City, its officials, officers, employees, volunteers and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury, in law or equity, to property or persons, including wrongful death, in any manner arising out of or incident to any alleged acts, omissions, negligence or willful misconduct of Supplier, its officials, officers, employees, agents, subcontractors and subconsultants arising out of or in connection with the Goods or the performance of this Agreement, including without limitation the payment of all consequential damages and attorneys' fees and other related costs and expenses except such loss or damage which was caused by the sole negligence or willful misconduct of the City.

B. Supplier's defense obligation for any and all such aforesaid suits, actions or other legal proceedings of every kind that may be brought or instituted against the City, its officials, officers, employees, agents, or volunteers shall be at Supplier's own cost, expense, and risk. Supplier shall pay and satisfy any judgment, award, or decree that may be rendered against City or its officials, officers, employees, agents, or volunteers, in any such suit, action, or other legal proceeding. Supplier shall reimburse City and its officials, officers, employees, agents, and/or volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.

C. Supplier's obligation to indemnify shall not be restricted to insurance proceeds, if any, received by the City, its officials, officers, employees, agents or volunteers.

Section 14. INSURANCE.

A. General. Supplier shall take out and maintain:

1. Commercial General Liability Insurance, of at least $2,000,000 per occurrence/ $4,000,000 aggregate for bodily injury, personal injury and property damage, at least as broad as Insurance Services Office Commercial General Liability most recent Occurrence Form CG 00 01;

2. Automobile Liability Insurance for bodily injury and property damage including coverage for owned, non-owned and hired vehicles, of at least $2,000,000 per accident for bodily injury and property damage, at least as broad as most recent Insurance Services Office Form Number CA 00 01 covering automobile liability, Code 1 (any auto);

3. Workers' Compensation in compliance with applicable statutory requirements and Employer's Liability Coverage of at least $1,000,000 per occurrence; and

4. Pollution Liability Insurance of at least $2,000,000 per occurrence shall be provided by the Supplier if transporting hazardous materials.

5. If Supplier is also the manufacturer of any equipment included in the Goods, Supplier shall carry Product Liability and/or Errors and Omissions Insurance which covers said equipment with limits of not less than $1,000,000.

B. Additional Insured; Primary; Waiver of Subrogation; No Limitation on Coverage. The policies required under this Section shall give City, its officials, officers, employees, agents or volunteers additional insured status on commercial general liability and automobile liability insurance with the endorsements. Such policies shall contain a provision stating that Supplier's policy is primary insurance and that any insurance, deductible, or self-insurance maintained by the City or any additional insureds shall not be called upon to contribute to any loss, and shall contain or be endorsed with a waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers. The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Requirements of specific coverage or limits contained in this section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. Any available coverage shall be provided to the parties required to be named as additional insured pursuant to this Agreement.

C. Cancellation. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply

with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds

D. Insurance Carrier. All insurance required under this Section is to be placed with insurers with a current A.M. Best's rating no less than A-:VII, licensed to do business in California, and satisfactory to the City.

E. Evidence of Insurance. Supplier shall furnish City with original certificates of insurance and endorsements effecting coverage required by the Agreement. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms supplied or approved by the City. All certificates and endorsements must be received and approved by the City before delivery commences. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

F. Subcontractors. All subcontractors shall meet the requirements of this Section before commencing work. In addition, Supplier shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

G. Freight. Supplier shall ensure that third party shippers contracted by Supplier have adequate insurance coverage for the shipped Goods.

Section 15. LIENS.

A. Supplier, subcontractors and suppliers will not make, file or maintain a mechanic's or other lien or claim of any kind or character against the Goods, for or on account of any labor, materials, fixtures, tools, machinery, equipment, or any other things furnished, or any other work done or performance given under, arising out of, or in any manner connected with the Agreement (such liens or claims referred to as "Claims"); and Supplier, subcontractor and suppliers expressly waive and relinquish any and all rights which they now have, or may subsequently acquire, to file or maintain any Claim and Supplier, subcontractor and suppliers agree that this provision waiving the right of Claims will be an independent covenant.

B. Supplier will save and hold City harmless from and against any and all Claims that may be filed by a subcontractor, supplier or any other person or entity and Supplier will, at its own expense, defend any and all actions based upon such Claims and will pay all charges of attorneys and all costs and other expenses arising from such Claims.

Section 16. TERMINATION OF AGREEMENT BY CITY.

A. Should Supplier at any time refuse or fail to deliver the Goods with promptness and diligence, or to perform any of its other obligations under the Agreement, City may terminate Supplier's right to proceed with the delivery of the Goods by written notice to Supplier. In such event City may obtain the Goods by whatever method it may deem expedient, including the hiring of another contractor or other contractors and, for that purpose, may take possession of all

materials, machinery, equipment, tools and appliances and exercise all rights, options and privileges of Supplier. In such case Supplier will not be entitled to receive any further payments until the Goods is delivered. If City's cost of obtaining the Goods, including compensation for additional managerial and administrative services, will exceed the unpaid balance of the Agreement, Supplier will be liable for and will pay the difference to City.

B. City may, for its own convenience, terminate Supplier's right to proceed with the delivery of any portion or all of the Goods by written notice to Supplier. Such termination will be effective in the manner specified in such notice, will be without prejudice to any claims which City may have against Supplier, and will not affect the obligations and duties of Supplier under the Agreement with respect to portions of the Goods not terminated.

C. On receipt of notice under Section 16.B, Supplier will, with respect to the portion of the Goods terminated, unless the notice states otherwise,

1. Immediately discontinue such portion of the Goods and the placing of orders for materials, facilities, and supplies in connection with the Goods,

2. Unless otherwise directed by City, make every reasonable effort to procure cancellation of all existing orders or contracts upon terms satisfactory to City; and

3. Deliver only such portions of the Goods which City deems necessary to preserve and protect those portions of the Goods already in progress and to protect material, plant and equipment at the Goods site or in transit to the Goods site.

D. Upon termination pursuant to Section 16.B, Supplier will be paid a pro rata portion of the compensation in the Agreement for any portion of the terminated Goods already delivered, including material and services for which it has made firm contracts which are not canceled, it being understood that City will be entitled to such material and services. Upon determination of the amount of said pro rata compensation, City will promptly pay such amount to Supplier upon delivery by Supplier of the releases of liens and affidavit, pursuant to Section 7.C.

Section 17. FORCE MAJEURE

A. Supplier shall not be held responsible for failure or delay in shipping nor City for failure or delay in accepting goods described herein if such failure or delay is due to a Force Majeure Event.

B. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters occurring at the project site; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the work); (4) pandemics, epidemics or quarantine restrictions; and (5) strikes and other organized labor action occurring at the project site and the effects thereof on the work, only to the extent such strikes and other organized labor action are beyond the control of Supplier and its subcontractors, of every tier, and to the extent the effects thereof cannot be avoided by use of replacement

workers. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of the City in its capacity as a municipal authority.

C. In the event of any such excused interference with shipments, City shall have the option either to reduce the quantity provided for in the order accordingly or to exercise its right of cancellation as set forth in this Agreement.

Section 18. MISCELLANEOUS PROVISIONS.

A. Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address or at such other address as the respective parties may provide in writing for this purpose:

CITY:	SUPPLIER:
City of Ontario 303 East "B" Street Ontario, CA 91764 Attn: [Manuel Rebolledo, Superintendent	Fire Apparatus Solutions 1762 S. Sycamore Ave Rialto, CA 92375 Attn: William Kalmikov

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

B. Assignment or Transfer. Supplier shall not assign or transfer any interest in this Agreement whether by assignment or novation, without the prior written consent of the City, which will not be unreasonably withheld. Provided, however, that claims for money due or to become due Supplier from the City under this Agreement may be assigned to a financial institution or to a trustee in bankruptcy, without such approval. Notice of any assignment or transfer, whether voluntary or involuntary, shall be furnished promptly to the City.

C. Successors and Assigns. This Agreement shall be binding on the successors and assigns of the Parties.

D. Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

E. Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

F. Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County.

G. Attorneys' Fees and Costs. If any action in law or equity, including an action for declaratory relief, is brought to enforce or interpret the provisions of this Agreement, each Party shall pay its own attorneys' fees.

H. Interpretation. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party.

I. No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

J. Authority to Enter Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right and authority to make this Agreement and bind each respective Party.

K. Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

L. Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

M. City's Right to Employ Other Suppliers. City reserves its right to employ other contractors in connection with the Goods.

N. Entire Agreement. This Agreement constitutes the entire agreement between the Parties relative to the Goods specified herein. There are no understandings, agreements, conditions, representations, warranties or promises with respect to this Agreement, except those contained in or referred to in the writing.

City of Ontario Fire Department
425 East B Street
Ontario, CA 91764

Division Chief Scott Brown:

KME Fire Apparatus is pleased to provide you with this proposal for two (2) KME K180 Model 4119 Type 1 Pumper Apparatus. The price, terms and conditions for the proposed apparatus are as follows:

Option 1: 1 Unit:		Option 2: 2 Units
KME Custom Type 1 Pumper:	$886,751.00	$1,773.502.00
Shelving per specs below	$21,300.00	$42,600.00
Opticom	$4,000.00	$8,000.00
Hale Foam Refill System	$6,100.00	$12,200.00
Subtotal	$918,151.00	$1,836,302.00
California Sales Tax @ 8.75%:	$80,338.21	$160,676.43
Total Price for Single unit:	**$998,4898.21**	**$1,996,978.43**

This price is valid until close of business February 28, 2025
Terms: Net 30 days
Delivery: 300-330 days from ORDER
Liquidated Damages: Due to the supply chain disruptions, KME is not able to honor a penalty clause.

If you have any questions pertaining to this proposal, please contact me at 909-917-4339 or brandonfasfire@gmail.com.

We appreciate the opportunity to offer this proposal to the City of Ontario Fire Department.

Respectfully,
Brandon Gomez
Brandon Gomez

The Following items will be provided once delivered to FAS:

L-1: 3 full depth adjustable pull out shelves, 2 half depth adjustable shelves

L-2: 1 fixed vertical divider, 2 half depth adjustable shelves forward of the vertical divider

L-3: 1 full depth adjustable shelf, 1 half depth adjustable shelf

Rear: 1 full depth floor mounted pull out shelf, 1 full depth adjustable pull out shelf

R-1: 1 full depth adjustable shelf, 3 half depth adjustable shelves

R-2: 2 half depth adjustable shelves

R-3: 1 full depth floor mounted pull out shelf, 1 full depth adjustable pull out shelf, 2 half depth adjustable shelves

Both L-3 and R-3 will require partitions to keep it separated from the rear compartment as well.

½" Sign Gold stripe on cab paint break.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Utilities Prepared By: Joline Neal Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 12

SUBJECT: A MAINTENANCE SERVICES AGREEMENT WITH HYDROLOGICS, INC. FOR ON-CALL ZERO DISCHARGE FLUSHING SERVICES

RECOMMENDATION: That the City Council approve and authorize the City Manager, or designee, to execute a one-year Maintenance Services Agreement with Hydrologics, Inc., of Bosque Farms, New Mexico, for On-Call Zero Discharge Flushing Services in the amount of $600,000 from March 18, 2025 to March 17, 2026, with the option to extend the Agreement for up to four successive one-year periods for a total not-to-exceed amount of $3,000,000.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2024-2025 Adopted Budget includes appropriations from the Water Capital Fund for these services. The recommended Agreement is for $600,000 for the initial term. At the City's discretion, up to four additional one-year extensions may be executed. Should the City exercise all four successive one-year extensions, the projected amount for the five years (March 18, 2025 to March 17, 2030) would be a total not-to-exceed of $3,000,000.

The City and Contractor have agreed to fixed billing rates and the contractor will be compensated for on-call, as needed services at the billing rates set forth in the proposed Agreement. Prices for the first year are fixed, and after the first year, any proposed increases in fees will be negotiated annually and will not exceed 5% per year. The total compensation paid under the proposed Agreement will be commensurate with the City Council approved plans and budgets. There is no impact to the General Fund.

BACKGROUND & ANALYSIS: The City owns and operates a potable water distribution system with over 700 miles of pipeline, which is continually expanding with the development of the Ontario Ranch. The system is primarily maintained by City Staff. The proposed Agreement will assist Staff in

performing flushing maintenance on an as-needed basis, using a specialized approach. This additional resource will enable the City to perform state-required system flushing and maintain high-quality drinking water while conserving water resources.

Hydrologics, Inc.'s patented Zero Discharge Flushing (ZDF) is a proprietary technology used to flush pipelines in water distribution systems without the water waste typical of traditional flushing and maintenance methods. The ZDF technology is the only approved zero discharge technology by the State Water Board's Division of Drinking Water for best management practices in maintaining water quality. Hydrologics, Inc.'s ZDF technology has been utilized in the water industry for over 12 years by various water agencies.

Staff recommends Hydrologics, Inc.'s ZDF technology because it minimizes customer impacts, conserves drinking water supplies, reduces water pipe replacement costs, and supports the City's water line maintenance and water conservation goals.

CITY MANAGER

CITY OF ONTARIO
MAINTENANCE SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and Hydrologics, Inc., a Corporation (Massachusetts), with its principal place of business at 1860 Bosque Farms Blvd, Bosque Farms, New Mexico 87068. City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Contractor.

Contractor desires to perform and assume responsibility for the provision of certain maintenance services required by the City on the terms and conditions set forth in this Agreement. Contractor represents that it is experienced in providing zero discharge flushing services to public clients, that it and its employees or subcontractors have all necessary licenses and permits to perform the Services in the State of California, and that is familiar with the plans of City.

2.2 Project.

City desires to engage Contractor to render such services for the On-Call Zero Discharge Flushing Services ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Contractor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the maintenance services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from March 18, 2025 to March 17, 2026, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than four additional one-year terms. Contractor shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Contractor shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Six hundred thousand dollars ($600,000.00**) without written approval of the City Manager. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Contractor shall submit to City a monthly itemized statement which indicates work completed and hours of Services rendered by Contractor. The statement shall describe the amount of Services and supplies provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within 45 days of receiving such statement, review the statement and pay all approved charges thereon.

3.2.3 Deductions. City may deduct or withhold, as applicable, from each progress payment an amount necessary to protect City from loss because of: (1) stop payment notices as allowed by state law; (2) unsatisfactory prosecution of the Services by Contractor; (3) sums representing expenses, losses, or damages as determined by the City, incurred by the City for which Contractor is liable under the Agreement; and (4) any other sums which the City is entitled to recover from Contractor under the terms of the Agreement or pursuant to state law, including Section 1727 of the California Labor Code. The failure by the City to deduct any of these sums from a progress payment shall not constitute a waiver of the City's right to such sums.

3.2.4 Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.

3.2.5 Extra Work. At any time during the term of this Agreement, City may request that Contractor perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the parties did not reasonably anticipate would be necessary at the execution of this Agreement.

Contractor shall not perform, nor be compensated for, Extra Work without written authorization from City's Representative.

3.2.6 Automated Clearing House ("ACH") payments. It is the City's policy to pay its consultant invoices via electronic fund transfers through the ACH network. All payments due and owing pursuant to a properly issued and correct invoice or under this Agreement shall be made through electronic ACH transfers, unless otherwise agreed upon by both Parties in writing. Contractor shall provide the City with ACH payment details whereby the City shall initiate the ACH transfers to Contractor in the amount required pursuant to a properly issued and correct invoice or under this Agreement. Each Party shall undertake any and all required actions and execute any required documents, instruments, or agreements required to effectuate the requirements of this Section. In the event the City erroneously deposits funds into an account, or otherwise deposits funds to which Contractor is not entitled: (1) Contractor shall immediately notify the City and the financial institution; (2) Contractor shall not withdraw any of the funds which were erroneously deposited or to which Contractor is not entitled; and (3) Contractor authorizes both the City and financial institution to take all actions necessary to correct the error and return to the City all funds erroneously deposited or to which Contractor is not entitled.

3.3 Responsibilities of Contractor.

3.3.1 Control and Payment of Subordinates; Independent Contractor. The Services shall be performed by Contractor or under its supervision. Contractor will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Contractor on an independent contractor basis and not as an employee. Contractor retains the right to perform similar or different services for others during the term of this Agreement. Any additional personnel performing the Services under this Agreement on behalf of Contractor shall also not be employees of City and shall at all times be under Contractor's exclusive direction and control. Contractor shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Contractor shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Contractor shall perform the Services expeditiously, within the term of this Agreement, and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Contractor represents that it has the professional and technical personnel required to perform the Services in conformance with such conditions. In order to facilitate Contractor's conformance with the Schedule, City shall respond to Contractor's submittals in a timely manner. Upon request of City, Contractor shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Contractor shall be subject to the approval of City.

3.3.4 City's Representative. The City hereby designates Joline Neal, Water Quality Programs Manager, or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Agreement except for increasing compensation. Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

3.3.5 Contractor's Representative. Contractor hereby designates Matthew Powers, Director of Operations, or his or her designee, to act as its representative for the performance of this Agreement ("Contractor's Representative"). Contractor's Representative shall have full authority to represent and act on behalf of the Contractor for all purposes under this Agreement. The Contractor's Representative shall supervise and direct the Services, using his best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.6 Coordination of Services. Contractor agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.7 Standard of Care; Performance of Employees. Contractor shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Contractor represents and maintains that it is skilled in the professional calling necessary to perform the Services. Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them. Finally, Contractor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, including a City Business License, and that such licenses and approvals shall be maintained throughout the term of this Agreement. As provided for in the indemnification provisions of this Agreement, Contractor shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Contractor's failure to comply with the standard of care provided for herein. Any employee of the Contractor or its sub-contractors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Contractor and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.8 Period of Performance.

3.3.8.1 Contractor shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Contractor shall perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be provided separately in writing to the Contractor. Contractor agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such completion schedule or Project milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.8.2 Neither City nor Contractor shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the Services); (4) strikes and other organized labor

action occurring at the site and the effects thereof on the Services, only to the extent such strikes and other organized labor action are beyond the control of Contractor and its subconsultants, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Services and Agreement.

3.3.8.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Contractor to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.9 Disputes. Should any dispute arise respecting the true value of any work done, of any work omitted, or of any extra work which Contractor may be required to do, or respecting the size of any payment to Contractor during the performance of this Contract, Contractor shall continue to perform the Work while said dispute is decided by the City. If Contractor disputes the City's decision, Contractor shall have such remedies as may be provided by law.

3.3.10 Laws and Regulations; Employee/Labor Certifications.

3.3.10.1 Compliance with Laws. Contractor shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Contractor shall be liable for all violations of such laws and regulations in connection with Services. If the Contractor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Contractor shall be solely responsible for all costs arising therefrom. City is a public entity of the State of California subject to certain provisions of the Health & Safety Code, Government Code, Public Contract Code, and Labor Code of the State. It is stipulated and agreed that all provisions of the law applicable to the public contracts of a municipality are a part of this Agreement to the same extent as though set forth herein and will be complied with. These include but are not limited to the payment of prevailing wages, the stipulation that eight (8) hours' labor shall constitute a legal day's work and that no worker shall be permitted to work in excess of eight (8) hours during any one calendar day except as permitted by law. Contractor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

3.3.10.2 Employment Eligibility; Contractor. By executing this Agreement, Contractor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time. Such requirements and restrictions include, but are not limited to, examination and retention of documentation confirming the identity and immigration status of each employee of the Contractor. Contractor also verifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any

such law at any time during the term of the Agreement. Contractor shall avoid any violation of any such law during the term of this Agreement by participating in an electronic verification of work authorization program operated by the United States Department of Homeland Security, by participating in an equivalent federal work authorization program operated by the United States Department of Homeland Security to verify information of newly hired employees, or by some other legally acceptable method. Contractor shall maintain records of each such verification, and shall make them available to the City or its representatives for inspection and copy at any time during normal business hours. The City shall not be responsible for any costs or expenses related to Contractor's compliance with the requirements provided for in Section 3.3.10 or any of its sub-sections.

3.3.10.3 Employment Eligibility; Subcontractors, Sub-subcontractors and Consultants. To the same extent and under the same conditions as Contractor, Contractor shall require all of its subcontractors, sub-subcontractors and consultants performing any work relating to the Project or this Agreement to make the same verifications and comply with all requirements and restrictions provided for in Section 3.3.10.1.

3.3.10.4 Employment Eligibility; Failure to Comply. Each person executing this Agreement on behalf of Contractor verifies that they are a duly authorized officer of Contractor, and understands that any of the following shall be grounds for the City to terminate the Agreement for cause: (1) failure of Contractor or its subcontractors, sub-subcontractors or consultants to meet any of the requirements provided for in Sections 3.3.10.1 or 3.3.10.2; (2) any misrepresentation or material omission concerning compliance with such requirements (including in those verifications provided to the Contractor under Section 3.3.10.2); or (3) failure to immediately remove from the Project any person found not to be in compliance with such requirements.

3.3.10.5 Equal Opportunity Employment. Contractor represents that it is an equal opportunity employer and it shall not discriminate against any subcontractor, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Contractor shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.6 Air Quality. Contractor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the California Air Resources Board (CARB). Contractor shall specifically be aware of the CARB limits and requirements' application to "portable equipment", which definition is considered by CARB to include any item of equipment with a fuel-powered engine. Contractor shall indemnify City against any fines or penalties imposed by CARB or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Contractor, its subcontractors, or others for whom Contractor is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.7 Water Quality.

(A) To the extent applicable, Contractor's Services must account for, and fully comply with, all local, state and federal laws, rules and regulations that may impact water quality compliance, including, without limitation, all applicable provisions of the

Federal Water Pollution Control Act (33 U.S.C. §§ 1300); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); laws, rules and regulations of the Environmental Protection Agency, the State Water Resources Control Board and the Colorado River Regional Water Quality Control Board; the City's ordinances regulating discharges of storm water; and any and all regulations, policies, or permits issued pursuant to any such authority regulating the discharge of pollutants, as that term is used in the Porter-Cologne Water Quality Control Act, to any ground or surface water in the State.

(B) Liability for Non-Compliance. Failure to comply with the laws, regulations and policies described in this Section is a violation of law that may subject Contractor or City to penalties, fines, or additional regulatory requirements. Contractor shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from and against any and all fines, penalties, claims or other regulatory requirements imposed as a result of Contractor's non-compliance with the laws, regulations and policies described in this Section, unless such non-compliance is the result of the sole established negligence, willful misconduct or active negligence of the City, its officials, officers, agents, employees or authorized volunteers.

(C) Training. In addition to any other standard of care requirements set forth in this Agreement, Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them without impacting water quality in violation of the laws, regulations and policies described in this Section. Contractor further warrants that it, its employees and subcontractors will receive adequate training, as determined by City, regarding the requirements of the laws, regulations and policies described in this Section as they may relate to the Services provided under this Agreement. Upon request, City will provide Contractor with a list of training programs that meet the requirements of this paragraph.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Contractor shall not commence Services under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Contractor shall not allow any subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Section.

3.3.11.2 Minimum Requirements. Contractor shall, at its expense, procure and maintain for the duration of the Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Agreement by the Contractor, its agents, representatives, employees or subcontractors. Contractor shall also require all of its subcontractors to procure and maintain the same insurance for the duration of the Agreement. Such insurance shall meet at least the following minimum levels of coverage:

(A) Minimum Scope of Insurance. Coverage shall be at least as broad as the latest version of the following: (1) *General Liability*: Insurance Services Office Commercial General Liability coverage (occurrence form CG 0001); (2) *Automobile Liability*: Insurance Services Office Business Auto Coverage form number CA 0001, code 1 (any auto); and (3) *Workers' Compensation and Employer's Liability*: Workers' Compensation insurance as required by the State of California and Employer's Liability Insurance. The policy shall not contain any exclusion contrary to the Agreement, including but not limited to endorsements or provisions

limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 29); or (2) cross liability for claims or suits by one insured against another.

(B) Minimum Limits of Insurance. Contractor shall maintain limits no less than: (1) *General Liability:* $2,000,000 per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with general aggregate limit is used including, but not limited to, form CG 2503, either the general aggregate limit shall apply separately to this Agreement/location or the general aggregate limit shall be twice the required occurrence limit; (2) *Automobile Liability:* $2,000,000 per accident for bodily injury and property damage; and (3) *Workers' Compensation and Employer's Liability:* Workers' Compensation limits as required by the Labor Code of the State of California. Employer's Liability limits of $1,000,000 per accident for bodily injury or disease. Defense costs shall be paid in addition to the limits.

(C) Notices; Cancellation or Reduction of Coverage. At least fifteen (15) days prior to the expiration of any such policy, evidence showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or materially reduced, Contractor shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies. In the event any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, the City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by the City will be promptly reimbursed by Contractor or the City may withhold amounts sufficient to pay premium from Contractor payments. In the alternative, the City may suspend or terminate this Agreement.

(D) Additional Insured. The City, its directors, officials, officers, employees, agents, and volunteers shall be named as additional insureds on Contractor's and its subcontractors' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

3.3.11.3 Insurance Endorsements. The insurance policies shall contain the following provisions, or Contractor shall provide endorsements on forms supplied or approved by the City to add the following provisions to the insurance policies:

(A) General Liability. The general liability policy shall include or be endorsed (amended) to state that: (1) using ISO CG forms 20 10 and 20 37, or endorsements providing the exact same coverage, the City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insured with respect to the Services or ongoing and complete operations performed by or on behalf of the Contractor, including materials, parts or equipment furnished in connection with such work; and (2) using ISO form 20 01, or endorsements providing the exact same coverage, the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Contractor's scheduled underlying coverage. Any excess insurance shall contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City, before the City's own primary insurance, deductible, or self-insurance shall be called upon to protect it as a named insured. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Contractor's insurance and shall not be called upon to contribute with it in any way. Notwithstanding the minimum limits set forth in Section 3.3.11.2(B), any available insurance proceeds in excess of the specified

minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 3.3.11.3(A).

(B) Automobile Liability. The automobile liability policy shall include or be endorsed (amended) to state that: (1) the City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Contractor or for which the Contractor is responsible; and (2) the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Contractor's scheduled underlying coverage. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Contractor's insurance and shall not be called upon to contribute with it in any way. Policy shall contain or be endorsed to contain such provisions. Notwithstanding the minimum limits set forth in Section 3.3.11.2(B), any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 3.3.11.3(B).

(C) Workers' Compensation and Employer's Liability Coverage. The insurer shall agree to waive all rights of subrogation against the City, its directors, officials, officers, employees, agents, and volunteers for losses paid under the terms of the insurance policy which arise from work performed by the Contractor.

(D) All Coverages. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds.

3.3.11.4 Separation of Insureds; No Special Limitations; Waiver of Subrogation. All insurance required by this Section shall contain standard separation of insureds provisions. In addition, such insurance shall not contain any special limitations on the scope of protection afforded to the City, its directors, officials, officers, employees, agents, and volunteers. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. All policies shall waive any right of subrogation of the insurer against the City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, or shall specifically allow Contractor or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Contractor hereby waives its own right of recovery against City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, and shall require similar written express waivers and insurance clauses from each of its subcontractors.

3.3.11.5 Deductibles and Self-Insurance Retentions. Any deductibles or self-insured retentions must be declared to and approved by the City. Contractor shall guarantee that, at the option of the City, either: (1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the City, its directors, officials, officers, employees, agents,

and volunteers; or (2) the Contractor shall procure a bond guaranteeing payment of losses and related investigation costs, claims and administrative and defense expenses.

3.3.11.6 Subcontractor Insurance Requirements. Contractor shall not allow any subcontractors to commence work on any subcontract relating to the work under the Agreement until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. If requested by Contractor, the City may approve different scopes or minimum limits of insurance for particular subcontractors. The Contractor and the City shall be named as additional insureds on all subcontractors' policies of Commercial General Liability using ISO form 20 38, or coverage at least as broad.

3.3.11.7 Acceptability of Insurers. Insurance is to be placed with insurers with a current A.M. Best's rating no less than A:VIII, licensed to do business in California, and satisfactory to the City.

3.3.11.8 Verification of Coverage. Contractor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Agreement on forms satisfactory to the City. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms provided by the City if requested. All certificates and endorsements must be received and approved by the City before work commences. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

3.3.11.9 Reporting of Claims. Contractor shall report to the City, in addition to Contractor's insurer, any and all insurance claims submitted by Contractor in connection with the Services under this Agreement.

3.3.12 Safety. Contractor shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Contractor shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed. Safety precautions as applicable shall include, but shall not be limited to: (A) adequate life protection and lifesaving equipment and procedures; (B) instructions in accident prevention for all employees and subcontractors, such as safe walkways, scaffolds, fall protection ladders, bridges, gang planks, confined space procedures, trenching and shoring, equipment and other safety devices, equipment and wearing apparel as are necessary or lawfully required to prevent accidents or injuries; and (C) adequate facilities for the proper inspection and maintenance of all safety measures.

3.3.13 Bonds.

3.3.13.1 Performance Bond. If required by law or otherwise specifically requested by City in Exhibit "C" attached hereto and incorporated herein by reference, Contractor shall execute and provide to City concurrently with this Agreement a Performance Bond in the amount of the total, not-to-exceed compensation indicated in this Agreement, and in a form provided or approved by the City. If such bond is required, no payment will be made to Contractor until it has been received and approved by the City.

3.3.13.2 Payment Bond. If required by law or otherwise specifically requested by City in Exhibit "C" attached hereto and incorporated herein by reference, Contractor

shall execute and provide to City concurrently with this Agreement a Payment Bond in the amount of the total, not-to-exceed compensation indicated in this Agreement, and in a form provided or approved by the City. If such bond is required, no payment will be made to Contractor until it has been received and approved by the City.

3.3.13.3 Bond Provisions. Should, in City's sole opinion, any bond become insufficient or any surety be found to be unsatisfactory, Contractor shall renew or replace the affected bond within 10 days of receiving notice from City. In the event the surety or Contractor intends to reduce or cancel any required bond, at least thirty (30) days prior written notice shall be given to the City, and Contractor shall post acceptable replacement bonds at least ten (10) days prior to expiration of the original bonds. No further payments shall be deemed due or will be made under this Agreement until any replacement bonds required by this Section are accepted by the City. To the extent, if any, that the total compensation is increased in accordance with the Agreement, the Contractor shall, upon request of the City, cause the amount of the bonds to be increased accordingly and shall promptly deliver satisfactory evidence of such increase to the City. To the extent available, the bonds shall further provide that no change or alteration of the Agreement (including, without limitation, an increase in the total compensation, as referred to above), extensions of time, or modifications of the time, terms, or conditions of payment to the Contractor, will release the surety. If the Contractor fails to furnish any required bond, the City may terminate this Agreement for cause.

3.3.13.4 Surety Qualifications. Only bonds executed by an admitted surety insurer, as defined in Code of Civil Procedure Section 995.120, shall be accepted. The surety must be a California-admitted surety with a current A.M. Best's rating no less than A:VIII and satisfactory to the City. If a California-admitted surety insurer issuing bonds does not meet these requirements, the insurer will be considered qualified if it is in conformance with Section 995.660 of the California Code of Civil Procedure, and proof of such is provided to the City.

3.3.14 Work Site.

3.3.14.1 Inspection Of Site. Contractor shall visit sites where Services are to be performed and shall become acquainted with all conditions affecting the Services prior to commencing the Services. Contractor shall make such examinations as it deems necessary to determine the condition of the work sites, its accessibility to materials, workmen and equipment, and to determine Contractor's ability to protect existing surface and subsurface improvements. No claim for allowances–time or money–will be allowed as to such matters after commencement of the Services.

3.3.14.2 Field Measurements. Contractor shall make field measurements, verify field conditions and shall carefully compare such field measurements and conditions and other information known to Contractor with the Contract Documents, including any plans, specifications, or scope of work before commencing Services. Errors, inconsistencies or omissions discovered shall be reported to the City immediately and prior to performing any Services or altering the condition.

3.3.15 Loss and Damage. Contractor shall be responsible for all loss and damage which may arise out of the nature of the Services agreed to herein, or from the action of the elements, or from any unforeseen difficulties which may arise or be encountered in the prosecution of the Services until the same is fully completed and accepted by City.

3.3.16 Warranty. Contractor warrants all Services under the Contract (which for purposes of this Section shall be deemed to include unauthorized work which has not been removed and any non-conforming materials incorporated into the work) to be of good quality and free from any defective or faulty material and workmanship. Contractor agrees that for a period of one year (or the period of time specified elsewhere in the Contract or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the work, whichever is later) after the date of final acceptance, Contractor shall within ten (10) days after being notified in writing by the City of any defect in the Services or non-conformance of the Services to the Contract, commence and prosecute with due diligence all Services necessary to fulfill the terms of the warranty at its sole cost and expense. Contractor shall act sooner as requested by the City in response to an emergency. In addition, Contractor shall, at its sole cost and expense, repair and replace any portions of the work (or work of other contractors) damaged by its defective Services or which becomes damaged in the course of repairing or replacing defective work. For any work so corrected, Contractor's obligation hereunder to correct defective work shall be reinstated for an additional one year period, commencing with the date of acceptance of such corrected work. Contractor shall perform such tests as the City may require to verify that any corrective actions, including, without limitation, redesign, repairs, and replacements comply with the requirements of the Contract. All costs associated with such corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor. All warranties and guarantees of subcontractors, suppliers and manufacturers with respect to any portion of the work, whether express or implied, are deemed to be obtained by Contractor for the benefit of the City, regardless of whether or not such warranties and guarantees have been transferred or assigned to the City by separate agreement and Contractor agrees to enforce such warranties and guarantees, if necessary, on behalf of the City. In the event that Contractor fails to perform its obligations under this Section, or under any other warranty or guaranty under this Contract, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming work and any work damaged by such work or the replacement or correction thereof at Contractor's sole expense. Contractor shall be obligated to fully reimburse the City for any expenses incurred hereunder upon demand.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Contractor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and since the total compensation is $1,000 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. City shall provide Contractor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the project site. Contractor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. It shall be mandatory upon the Contractor and all subcontractors to comply with all California Labor Code provisions, which include but are not limited to prevailing wages (Labor Code Sections 1771, 1774 and 1775), employment of apprentices (Labor Code Section 1777.5), certified payroll records (Labor Code Sections 1771.4 and 1776), hours of labor (Labor Code Sections 1813 and 1815)

and debarment of contractors and subcontractors (Labor Code Section 1777.1). The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4.

3.4.2 Registration/DIR Compliance. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, and if the total compensation is $15,000 or more, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Contractor and all subcontractors performing such Services must be registered with the Department of Industrial Relations. Contractor shall maintain registration for the duration of the Project and require the same of any subcontractors, as applicable.

3.4.3 Registration/DIR Compliance. This Project is subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Contractor's sole responsibility to comply with all applicable registration and labor compliance requirements. Any stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor that affect Contractor's performance of Services, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay and shall not be compensable by the City. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1 Grounds for Termination. City may, by written notice to Contractor, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Contractor of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Contractor shall be compensated only for those services which have been adequately rendered to City, and Contractor shall be entitled to no further compensation. Contractor may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished Documents and Data and other information of any kind prepared by Contractor in connection with the performance of Services under this Agreement. Contractor shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 Scope of Indemnity. To the fullest extent permitted by law, Contractor shall defend, indemnify and hold the City, its officials, employees, agents and volunteers free and harmless from any and all claims, demands, causes of action, suits, actions, proceedings, costs, expenses, liability, judgments, awards, decrees, settlements, loss, damage or injury of any kind, in law or equity, regardless of whether the allegations are false, fraudulent, or groundless, to property or persons, including wrongful death, (collectively, "Claims") in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Contractor, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Contractor's Services, the Project or this Agreement, including without limitation the payment of all expert witness fees, attorneys' fees and other related costs and expenses. Notwithstanding the foregoing, to the extent required by Civil Code section 2782, Contractor's indemnity obligation shall not apply to such loss or damage which is caused by the sole or active negligence or willful misconduct of the City.

3.6.2 Additional Indemnity Obligations. Contractor shall defend, with counsel of City's choosing and at Contractor's own cost, expense and risk, any and all Claims covered by this section that may be brought or instituted against City or its officials, employees, agents and volunteers. In addition, Contractor shall pay and satisfy any judgment, award or decree that may be rendered against City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Contractor shall also reimburse City for the cost of any settlement paid by City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Contractor shall reimburse City and its officials, employees, agents and volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. Contractor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, its officials, employees, agents and volunteers.

3.7 General Provisions.

3.7.1 Accounting Records. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Contractors. Contractor is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Contractor is in compliance with the California Labor Code, Contractor shall only utilize its employees to provide the Services. Contractor may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Contractor represents and warrants that all personnel who perform the Services on Contractor's behalf are Contractor's employees,

and that Contractor complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Contractor shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Contractor to use a Subcontractor, Contractor shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Contractor:

Hydrologics, Inc.
1860 Bosque Farms Blvd
Bosque Farms, NM 87068
Attn: Matthew Powers, Director of Operations

City:

City of Ontario
303 East "B" Street
Ontario, CA 91764
Attn: Joline Neal, Water Quality Programs Manager

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Governing Law; Government Code Claim Compliance. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Contractor must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Contractor. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Contractor shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.5 Attorneys' Fees. If either Party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all other costs of such action.

3.7.6 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.7 City's Right to Employ Other Contractors. City reserves right to employ other contractors in connection with this Project.

3.7.8 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.9 Assignment or Transfer. Contractor shall not assign, hypothecate or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.

3.7.10 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Contractor include all personnel, employees, agents, and subcontractors of Contractor, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content or intent of this Agreement.

3.7.11 Amendment; Modification. No supplement, modification or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.12 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

3.7.13 No Third Party Beneficiaries. Except to the extent expressly provided for in Section 3.5.7, there are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.14 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.15 Prohibited Interests. Contractor maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Contractor, to solicit or secure this Agreement. Further, Contractor warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Contractor, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Contractor further agrees to file, or shall cause its employees or subcontractors to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this

Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.16 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.17 Authority to Enter Agreement. Contractor has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.18 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.19 Entire Agreement. This Agreement contains the entire Agreement of the parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified by a writing signed by both parties.

EXHIBIT "A"

SCOPE OF SERVICES

Hydrologics, Inc. shall provide labor, materials, tools, equipment, vehicles, and transportation necessary to complete the On-call Zero Discharge Flushing (ZDF) Services ("Services").

The Scope of Work includes the provision of flushing services on an "as needed and when requested" basis, including both scheduled and emergency response work performed at the sole discretion of the Ontario Municipal Utilities Company ("OMUC").

The Services shall include, but are not limited to:

- Perform pre-cleaning/flushing and disinfection of ZDF vehicles, equipment, and water pipelines.
- Install new filter bags/cartridges on the vehicle unit.
- Perform water quality monitoring and measurements.
- Complete and submit a "Daily Flushing Report" to OMUC for each day of pipeline cleaned.

Roles and Responsibilities

Hydrologics, Inc.

- Provide ZDF unit, equipment, and operators.
- The ZDF scouring system's components shall be National Science Foundation (NSF) 61 compliant. This includes, but is not limited to stainless steel filter vessels, hoses, pumps, chlorine, and piping material.
- Perform chlorination by ANSI/AWWA C653-03 on flushing vehicles and equipment used for water pipeline flushing prior to the start of each service request.
- Collect and measure water quality samples on the ZDF unit before, during, and after flushing services.
- Perform water quality measurements before the start of and during flushing services. Water quality measurements shall be of turbidity and chlorine using real-time inline analyzers.
- Adhere to ANSI/AWWA Standard C651-14 when disinfecting distribution water mains.

- Complete and submit a *Weekly Flushing Report* that contains a weekly summary and a day-by-day detail to OMUC Water Quality Programs at the end of each week services are performed.

Ontario Municipal Utilities Company (OMUC)

- Provide system information before the start of requested services.
- OMUC staff shall turn city-owned valves within the potable water distribution system for Hydrologics, Inc. to complete flushing services.
- Collect and measure water quality samples in the potable water distribution system before the start of requested services.
- Perform water quality sample collection and measurements in the distribution system during and after flushing services.
- Notify the Division of Drinking Water (DDW) when services are expected to begin.
- Perform progress reports to DDW for each flushing activity.
- Hydrologics, Inc. shall work under the direction of OMUC staff before and during the flushing services.
- OMUC shall schedule in advance with Hydrologics, Inc.'s availability to request services.
- OMUC shall make payment to invoices with Net 30-day terms.

SUBJECT: A DESIGN SERVICES AGREEMENT WITH TRIAD CONSULTING AND SYSTEM DESIGN GROUP LLC FOR SITE SECURITY IMPROVEMENTS

RECOMMENDATION: That the City Council approve and authorize the City Manager, or designee, to execute a Design Services Agreement with Triad Consulting & Systems Design Group LLC, of Corona, California for design and bid support services for Site Security Improvements for a total amount of $935,904, plus a 15% contingency of $140,386, for a total not-to-exceed amount of $1,076,290, and a term from March 18, 2025 to September 18, 2028.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the Growth and Evolution of the City's Economy
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2024-25 Adopted Budget includes appropriations from the Water Capital Fund for this project. This project is one of several projects identified in the recent Water Revenue Bond issuance approved by the City Council on July 16, 2024. Expenditures will be based on a negotiated billing rate sheet, and proposals will be requested per specific tasks between Triad Consulting & Systems Design Group LLC and the City. There is no impact to the General Fund.

BACKGROUND & ANALYSIS: The City's water distribution system includes over 50 facilities, including reservoirs, wells, pump stations, and pressure reducing stations that provide and distribute the City's potable water supply. In May 2020, a Risk & Resilience Assessment Report (RRA) was completed to develop a complete characterization of system assets, threats and risks. The RRA process resulted in various recommendations to improve resilience and safety to the City's water infrastructure. The top threats to the City's drinking water identified in the RRA included security vulnerabilities at local wells, imported water sources, fire hydrants, and water distribution facility sites.

Staff worked closely with the City's partnering agencies, including the Ontario Police Department

and Information Technology, to gather input and recommendations for security upgrades to infrastructure and sites. As a result, Staff developed a Preliminary Site Security comprehensive scope of work for solicitation of Site Security Improvements design.

The Preliminary Site Security Assessment (Assessment) was completed in September 2022, for 32 existing City water facilities. The intent of the assessment was to determine the necessary upgrades required at each facility to prevent and decrease vagrancy, theft, and property damage. Based on the results, it was recommended that 24 out of the 32 locations undergo security improvements. The improvements include installation of wrought iron fencing, electric sliding gates, fiber optic communication conduit for future integration with the City's Real Time Information Center (RTIC), perimeter and site lighting, intrusion alarms, and security cameras and monitoring equipment.

On September 5, 2024, Staff solicited a Request for Proposals (RFP) on PlanetBids for engineering design services based on the Assessment. In response, on October 9, 2024, the City received several proposals. Staff is recommending award and approval of the Design Services Agreement to Triad Consulting & System Design Group LLC, based upon their experience, qualifications, familiarity with similar type projects, and performance in site security assessments.

CITY OF ONTARIO
DESIGN SERVICES AGREEMENT

11. PARTIES AND DATE.

This Agreement is made and entered into as of _____, by and between the City of Ontario, a municipal corporation organized and operating under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City"), and **Triad Consulting & System Design Group**, a **Limited Liability Company** with its principal place of business at **2925 Mira Vita Way, Corona, CA 92881** (hereinafter referred to as "Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

12. RECITALS.

12.1 City. City is a municipal corporation organized under the laws of the State of California, with power to contract for services necessary to achieve its purpose.

12.2 Consultant**.** Consultant desires to perform and assume responsibility for the provision of certain professional **engineering** design services required by the City on the terms and conditions set forth in this Agreement. Consultant warrants that it is fully licensed, qualified, and willing to perform the services required by this Agreement; provided, however, that if Consultant is a corporation or other organization, the Project Consultant designated pursuant to

Section 3.2, and not the Consultant itself, shall be fully licensed to practice as an **engineer** in the State of California.

12.3 Project**.** City desires to engage Consultant to render such services for the **UT 1073 Site Security Improvements** ("Project") as set forth in this Agreement.

13. TERMS

13.1 Employment of Consultant.

13.1.1 Scope of Services. Consultant promises and agrees to furnish to City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional **engineering** and related services necessary for the full and adequate completion of the Project consistent with the provisions of this Agreement (hereinafter referred to as "Services"). The Services are more particularly described throughout this Agreement, including Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, any exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations. All Services performed by Consultant shall be subject to the sole and discretionary approval of the City, which approval shall not be unreasonably withheld.

13.1.2 Term. The term of this Agreement shall be from **March 18, 2025** to **September 18, 2028**, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines.

13.2 Project Consultant; Key Personnel.

13.2.1 **Engineer of Record**. Consultant shall name a specific individual to act as Project Consultant, subject to the approval of City. Consultant hereby designates **Joe Rogowicz** (License No. **E11795**) to act as the **Engineer of Record** for the Project. The **Engineer of Record** shall: (1) maintain oversight of the Services; (2) have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement; (3) supervise and direct the Services using his or her best skill and attention; (4) be responsible for the means, methods, techniques, sequences and procedures used for the Services; (5) adequately coordinate all portions of the Services; and (6) act as principal contact with City and all contractors, consultants, engineers and inspectors on the Project. Any change in the **Engineer of Record** shall be subject to the City's prior written approval, which approval shall not be unreasonably withheld. The new **Engineer of Record** shall be of at least equal competence as the prior **Engineer of Record**. In the event that City and Consultant cannot agree as to the substitution of a new **Engineer of Record**, City shall be entitled to terminate this Agreement for cause.

13.2.2 Key Personnel. In addition to the **Engineer of Record**, Consultant has represented to the City that certain additional key personnel, engineers and consultants will perform the Services under this Agreement. Should one or more of such personnel, engineers or consultants become unavailable, Consultant may substitute others of at least equal competence upon written approval of the City. In the event that City and Consultant cannot agree as to the substitution of key personnel, engineers or consultants, City shall be entitled to terminate this Agreement for cause.

13.3 Hiring of Consultants and Personnel.

13.3.1 Right to Hire or Employ. Consultant shall have the option, unless City objects in writing after notice, to employ at its expense architects, engineers, experts or other consultants qualified and licensed to render services in connection with the planning and/or administration of the Project, and to delegate to them such duties as Consultant may delegate without relieving Consultant from administrative or other responsibility under this Agreement. Consultant shall be responsible for the coordination and cooperation of Consultant's architects, engineers, experts or other consultants. All consultants, including changes in consultants, shall be subject to approval by City in its sole and reasonable discretion. Consultant shall notify City of the identity of all consultants at least fourteen (14) days prior to their commencement of work to allow City to review their qualifications and approve to their participation on the Project in its sole and reasonable discretion.

13.3.2 Qualification and License. All architects, engineers, experts and other consultants retained by Consultant in performance of this Agreement shall be qualified to perform the Services assigned to them, and shall be licensed to practice in their respective professions, where required by law.

13.3.3 Standards and Insurance. All architects, engineers, experts and other consultants hired by Consultant shall be required to meet all of the same standards and insurance requirements set forth in this Agreement, unless other standards or requirements are approved by the City in writing. Unless changes are approved in writing by the City, Consultant's agreements with its consultants shall contain a provision making them subject to all provisions stipulated in this Agreement.

13.3.4 Assignments or Staff Changes. Consultant shall promptly obtain written City approval of any assignment, reassignment or replacement of such architects, engineers, experts and consultants, or of other staff changes of key personnel working on the Project. As provided in the Agreement, any changes in Consultant's consultants and key personnel shall be subject to approval by City.

13.3.5 Draftsman and Clerical Support. Draftsmen and clerical personnel shall be retained by Consultant at Consultant's sole expense.

13.4 Standard of Care.

13.4.1 Standard of Care. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals qualified to perform the Services in the same discipline in the State of California, and shall be responsible to City for damages sustained by the City and delays to the Project as specified in the indemnification provision of this Agreement. Without limiting the foregoing, Consultant shall be fully responsible to the City for any increased costs incurred by the City as a result of any such delays in the design or construction of the Project. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants and represents that all of its employees, architects, engineers, experts and other consultants shall have sufficient skill and experience to perform the Services assigned to them. Finally, Consultant represents that it, its employees, architects, engineers, experts and other consultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services assigned to or rendered by them and that such licenses and approvals shall be maintained throughout the term of this Agreement. As

provided for in the indemnification provisions of this Agreement, Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein.

13.4.2 Performance of Employees. Any employee or consultant who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee or consultant who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

13.5 Laws and Regulations.

13.5.1 Knowledge and Compliance. Consultant shall keep itself fully informed of and in compliance with all applicable local, state and federal laws, rules and regulations in any manner affecting the performance of the Services or the Project, and shall give all notices required of the Consultant by law. Consultant shall be liable, pursuant to the standard of care and indemnification provisions of this Agreement, for all violations of such laws and regulations in connection with its Services. Consultant shall defend, indemnify and hold City, its officials, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

13.5.2 Drawings and Specifications. Consultant shall cause all drawings and specifications to conform to any applicable requirements of federal, state and local laws, rules and regulations, including the Uniform Building Code, in effect as of the time the drawings and specifications are prepared or revised during the latest phase of the Services described in Exhibit "A" attached hereto. Any significant revisions made necessary by changes in such laws, rules and regulations after this time may be compensated as Additional Services which were not known or reasonably should not have been known by Consultant. Consultant shall cause the necessary copies of such drawings and specifications to be filed with any governmental bodies with approval jurisdiction over the Project, in accordance with the Services described in Exhibit "A" attached hereto. For the preparation of all such drawings and specifications, the Consultant shall use Computer Aided Design Drafting ("CADD") (e.g., AutoCAD) or other technology acceptable to the Consultant and City.

13.5.3 Americans with Disabilities Act. Consultant will use its best professional efforts to interpret all applicable federal, state and local laws, rules and regulations with respect to access, including those of the Americans with Disabilities Act ("ADA"). Consultant shall inform City of the existence of inconsistencies of which it is aware or reasonably should be aware between federal and state accessibility laws, rules and regulations, as well as any other issues which are subject to conflicting interpretations of the law, and shall provide the City with its interpretation of such inconsistencies and conflicting interpretations. Unless Consultant brings such inconsistencies and conflicting interpretations to the attention of the City and requests City's direction on how to proceed, the Consultant's interpretation of such inconsistencies and conflicting interpretations shall be the sole responsibility and liability of Consultant, and the Consultant shall correct all plans, specifications and other documents prepared for the Project at no additional cost if its interpretations are shown to be incorrect. In the event that the Consultant request's City's direction on how to proceed with respect to any inconsistent and/or conflicting interpretation, the

Consultant shall be responsible to the City only pursuant to the indemnification provisions of this Agreement.

13.5.4 Permits, Approvals and Authorizations. Consultant shall provide City with a list of all permits, approvals or other authorizations required for the Project from all federal, state or local governmental bodies with approval jurisdiction over the Project. Consultant shall then assist the City in obtaining all such permits, approvals and other authorizations. The costs of such permits, approvals and other authorizations shall be paid by the City.

13.5.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251 *et seq*.); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant shall additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. Failure to comply with laws, regulations, and ordinances listed in this Section is a violation of federal and state law.

13.6 Independent Contractor.

13.6.1 Control and Payment of Subordinates. City retains Consultant on an independent contractor basis and Consultant is not an employee of City. Consultant is not an employee for state tax, federal tax or any other purpose, and is not entitled to the rights or benefits afforded to City's employees. Any additional personnel performing the Services under this Agreement on behalf of Consultant shall also not be employees of City, and shall at all times be under Consultant's exclusive direction and control. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

13.7 Schedule of Services.

13.7.1 Consultant Services. Consultant shall fully and adequately complete the Services described in this Agreement and in Exhibit "A" attached hereto and incorporated herein by reference.

13.7.2 Timely Performance Standard. Consultant shall perform all Services hereunder as expeditiously as is consistent with professional skill and care, as well as the orderly progress of the Project work so as not to be the cause, in whole or in part, of delays in the completion of the Project or in the achievement of any Project milestones, as provided herein. Specifically, Consultant shall perform its Services so as to allow for the full and adequate completion of the Project within the time required by the City and within any completion schedules adopted for the Project. Consultant agrees to coordinate with City's staff, contractors and consultants in the performance of the Services, and shall be available to City's staff, contractors and consultants at all reasonable times.

13.7.3 Performance Schedule. Consultant shall prepare an estimated time schedule for the performance of Consultant's Services, to be adjusted as the Project proceeds. Such schedule shall be subject to the City's review and approval, which approval shall not be unreasonably withheld, and shall include allowances for periods of time required for City's review and approval of submissions, and for approvals of authorities having jurisdiction over Project approval and funding. If City and Consultant cannot mutually agree on a performance schedule, City shall have the authority to immediately terminate this Agreement. The schedule shall not be exceeded by Consultant without the prior written approval of City. If the Consultant's Services are not completed within the time provided by the agreed upon performance schedule, or any milestones established therein, it is understood, acknowledged and agreed that the City will suffer damage for which the Consultant will be responsible.

13.7.4 Excusable Delays. Any delays in Consultant's work caused by the following may be added to the time for completion of any obligations of Consultant: (1) the actions of City or its employees; (2) the actions of those in direct contractual relationship with City; (3) the actions of any governmental agency having jurisdiction over the Project; (4) the actions of any parties not within the reasonable control of the Consultant; and (5) any Force Majeure Event (as defined herein) or other unforeseen occurrence not due to any fault or negligence on the part of Consultant. Neither the City nor the Consultant shall be liable for damages, liquidated or otherwise, to the other on account of such delays.

13.7.5 Force Majeure Events. Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Services and Agreement. Should a Force Majeure Event occur, the non-performing Party shall, within fifteen (15) calendar days of the beginning of an Force Majeure Event, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

13.7.6 Request for Excusable Delay Credit. The Consultant shall, within fifteen (15) calendar days of the beginning of any excusable delay, notify the City in writing of the causes of delay (unless City grants in writing a further period of time to file such notice prior to the date of final payment under the Agreement). City will then ascertain the facts and the extent of the delay, and grant an extension of time for completing the Services when, in its sole judgment, the findings of fact justify such an extension. The City's findings of fact thereon shall be final and conclusive on the Parties. Extensions of time shall apply only to that portion of the Services affected by the delay and shall not apply to other portions of the Services not so affected. The

sole remedy of Consultant for extensions of time shall be an extension of the performance time at no cost to the City. If Additional Services are required as a result of an excusable delay, the Parties shall mutually agree thereto pursuant to the Additional Services provision of this Agreement. Should Consultant make an application for an extension of time, Consultant shall submit evidence that the insurance policies required by this Agreement remain in effect during the requested additional period of time.

13.8 Additional Services.

13.8.1 Request for Services. At City's request, Consultant may be asked to perform services not otherwise included in this Agreement, not included within the basic services listed in Exhibit "A" attached hereto, and/or not customarily furnished in accordance with generally accepted architectural practice.

13.8.2 Definition. As used herein, "Additional Services" mean: (1) any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary for the Consultant to perform at the execution of this Agreement; or (2) any work listed as Additional Services in Exhibit "A" attached hereto. Consultant shall not perform, nor be compensated for, Additional Services without prior written authorization from City and without an agreement between the City and Consultant as to the compensation to be paid for such services. City shall pay Consultant for any approved Additional Services, pursuant to the compensation provisions herein, so long as such services are not made necessary through the fault of Consultant pursuant to the indemnification provision of this Agreement.

13.8.3 Examples of Additional Services. Such Additional Services shall not include any redesign or revisions to drawings, specifications or other documents when such revisions are necessary in order to bring such documents into compliance with applicable laws, rules, regulations or codes of which Consultant was aware or should have been aware pursuant to the laws and regulations provision of this Agreement above. Such Additional Services may include, but shall not be limited to:

(a) Separately Bid Portions of Project. Plan preparation and/or administration of work on portions of the Project separately bid.

(b) Furniture and Interior Design. Assistance to City, if requested, for the selection of moveable furniture, equipment or articles which are not included in the Construction Documents.

(c) Fault of Contractor. Services caused by delinquency, default or insolvency of contractor, or by major defects in the work of the contractor, provided that any such services made necessary by the failure of Consultant to detect and report such matters when it reasonably should have done so shall not be compensated.

(d) Inconsistent Approvals or Instructions. Revisions in drawings, specifications or other documents when such revisions are inconsistent with written approvals or instructions previously given and are due to causes beyond the control of Consultant.

(e) Legal Proceedings. Serving as an expert witness on City's behalf or attending legal proceedings to which the Consultant is not a party.

(f) Damage Repair. Supervision of repair of damages to any structure.

(g) Extra Environmental Services. Additional work required for environmental conditions (e.g. asbestos or site conditions) not already contemplated within the Consultant's services for the Project.

13.9 City Responsibilities. City's responsibilities shall include the following:

13.9.1 Data and Information. City shall make available to Consultant all necessary data and information concerning the purpose and requirements of the Project, including scheduling and budget limitations, objectives, constraints and criteria. As part of the budget limitation information, the City shall provide the Consultant with a preliminary construction budget ("City's Preliminary Construction Budget").

13.9.2 Project Survey. If required pursuant to the scope of the Project and if requested by Consultant, City shall furnish Consultant with, or direct Consultant to procure at City's expense, a survey of the Project site prepared by a registered surveyor or civil engineer, any other record documents which shall indicate existing structures, land features, improvements, sewer, water, gas, electrical and utility lines, topographical information and boundary dimensions of the site, and any other such pertinent information.

13.9.3 Bid Phase. Distribute Construction Documents to bidders and conduct the opening and review of bids for the Project.

13.9.4 Testing. Retain consultant(s) to conduct chemical, mechanical, soils, geological or other tests required for proper design of the Project, and furnish such surveys, borings, test pits, and other tests as may be necessary to reveal conditions of the site which must be known to determine soil condition or to ensure the proper development of the required drawings and specifications.

13.9.5 Required Inspections and Tests. Retain consultant(s) to conduct materials testing and inspection or environmental/hazardous materials testing and inspection pursuant to any applicable laws, rules or regulations.

13.9.6 Fees of Reviewing or Licensing Agencies. Directly pay or reimburse the payment of all fees required by any reviewing or licensing agency, or other agency having approval jurisdiction over the Project.

13.9.7 City's Representative. The City hereby designates the City Manager, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Contract. The City Manager hereby designates **Dennis Mejia, PE, Utilities Engineering Division Manager**, or his or her designee, as the City's contact for the implementation of the Services hereunder. Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

13.9.8 Review and Approved Documents. Review all documents submitted by Consultant, including change orders and other matters requiring approval by the City Council or other officials. City shall advise Consultant of decisions pertaining to such documents within a reasonable time after submission, so as not to cause unreasonable delay as provided in the excusable delay provisions of this Agreement above.

13.10 Compensation.

13.10.1 Consultant's Compensation for Basic Services. City shall pay to Consultant, for the performance of all Services rendered under this Agreement, the total not to exceed amount of **Nine Hundred Thirty-Five Thousand Nine Hundred Four** Dollars **($935,904**) ("Total Compensation"). This Total Compensation amount shall be based upon, and may be adjusted according to, the fee schedule and related terms and conditions attached hereto as Exhibit "B" and incorporated herein by reference. The Total Compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement.

13.10.2 Payment for Additional Services. At any time during the term of this Agreement, City may request that Consultant perform Additional Services. As used herein, Additional Services means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Any additional work in excess of this amount must be approved by the City. If authorized, such Additional Services will be compensated at the rates and in the manner set forth in Exhibit "C" attached hereto and incorporated herein by reference, unless a flat rate or some other form of compensation is mutually agreed upon by the Parties. If City requires Consultant to hire consultants to perform any Additional Services, Consultant shall be compensated therefore at the rates and in the manner set forth in Exhibit "C" attached hereto and incorporated herein by reference, unless a flat rate or some other form of compensation is mutually agreed upon by the Parties. City shall have the authority to review and approve the rates of any such consultants. In addition, Consultant shall be reimbursed for any expenses incurred by such consultants pursuant to the terms and conditions of Section 3.10.3.

13.10.3 Reimbursable Expenses. Reimbursable expenses are in addition to compensation for the Services and Additional Services. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, which approval may be evidenced by inclusion in Exhibit "C" attached hereto. Such reimbursable expenses shall include only those expenses which are reasonably and necessarily incurred by Consultant in the interest of the Project. Consultant shall be required to acquire prior written consent in order to obtain reimbursement for the following: (1) extraordinary transportation expenses incurred in connection with the Project; (2) out-of-town travel expenses incurred in connection with the Project; (3) fees paid for securing approval of authorities having jurisdiction over the Project; (4) bid document duplication costs in excess of $1,000; and (5) other costs, fees and expenses in excess of $1,000.

13.10.4 Payment to Consultant. Consultant's compensation and reimbursable expenses shall be paid by City to Consultant no more often than monthly. Such periodic payments shall be made based upon the percentage of work completed, and in accordance with the phasing and funding schedule provided in Exhibit "B" and the compensation rates indicated in Exhibit "C" attached hereto and incorporated herein by reference. In order to receive payment, Consultant shall present to City an itemized statement which indicates Services performed, percentage of Services completed, method for computing the amount payable, and the amount to be paid. The statement shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement, as well as those expenses for which reimbursement is requested for that statement period. The amount paid to Consultant shall never exceed the percentage amounts authorized by the phasing and funding schedule located in Exhibit "B" attached hereto. City shall, within thirty (30) days of receiving such statement, review the

statement and pay all approved charges thereon pursuant to the provisions of Civil Code Section 3320. Disputed amounts shall be resolved by the Parties in a mutually agreeable manner.

Payments made for Additional Services shall be made in installments, not more often than monthly, proportionate to the degree of completion of such services or in such other manner as the Parties shall specify when such services are agreed upon, and in accordance with any authorized fee or rate schedule. In order to receive payment, Consultant shall present to City an itemized statement which indicates the Additional Services performed, percentage of Additional Services completed, method for computing the amount payable, and the amount to be paid. The statement shall describe the amount of Additional Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within thirty (30) days of receiving such statement, review the statement and pay all approved charges thereon pursuant to the provisions of Civil Code Section 3320. Disputed amounts shall be resolved by the Parties in a mutually agreeable manner.

Upon cancellation or termination of this Agreement, Consultant shall be compensated as set forth in the termination provision herein.

13.10.5 Withholding Payment to Consultant. The City may withhold payment, in whole or in part, to the extent reasonably necessary to protect the City from claims, demands, causes of action, costs, expenses, liabilities, losses, damages, or injuries of any kind to the extent arising out of or caused by the negligence, recklessness, or willful misconduct protected under the indemnification provisions of this Agreement. Failure by City to deduct any sums from a progress payment shall not constitute a waiver of the City's right to such sums. The City may keep any moneys which would otherwise be payable at any time hereunder and apply the same, or so much as may be necessary therefor, to the payment of any expenses, losses, or damages as determined by the City, incurred by the City for which Consultant is liable under the Agreement or state law. Payments to the Consultant for compensation and reimbursable expenses due shall not be contingent on the construction, completion or ultimate success of the Project. Payment to the Consultant shall not be withheld, postponed, or made contingent upon receipt by the City of offsetting reimbursement or credit from Parties not within the Consultant's reasonable control.

13.10.6 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Sections 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on certain "public works" and "maintenance" projects. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and Since the total compensation is $1,000 or more, Consultant agrees to fully comply with and to require its consultants to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the Project site. It shall be mandatory upon the Consultant and all subconsultants to comply with all California Labor Code provisions, which include but are not limited to prevailing wages (Labor Code Sections 1771, 1774 and 1775), employment of apprentices (Labor Code Section 1777.5), certified payroll records (Labor Code Sections 1771.4 and 1776), hours of labor (Labor Code Sections 1813 and 1815) and debarment of contractors and subcontractors (Labor Code Section 1777.1). The requirement to submit certified payroll records directly to the Labor Commissioner

under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4. Consultant shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claims, liabilities, costs, penalties or interest arising out of any failure or alleged failure of the Consultant or its consultants to comply with the Prevailing Wage Laws.

(a) Registration/DIR Compliance. If the Services are being performed as part of an applicable "public works project" of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants performing such Services must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants. This project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the Department of Industrial Relations against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Consultant or any subconsultant.

3.10.7 Automated Clearing House ("ACH") payments. It is the City's policy to pay its consultant invoices via electronic fund transfers through the ACH network. All payments due and owing pursuant to a properly issued and correct invoice or under this Agreement shall be made through electronic ACH transfers, unless otherwise agreed upon by both Parties in writing. Consultant shall provide the City with ACH payment details whereby the City shall initiate the ACH transfers to Consultant in the amount required pursuant to a properly issued and correct invoice or under this Agreement. Each Party shall undertake any and all required actions and execute any required documents, instruments, or agreements required to effectuate the requirements of this Section. In the event the City erroneously deposits funds into an account, or otherwise deposits funds to which Consultant is not entitled: (1) Consultant shall immediately notify the City and the financial institution; (2) Consultant shall not withdraw any of the funds which were erroneously deposited or to which Consultant is not entitled; and (3) Consultant authorizes both the City and financial institution to take all actions necessary to correct the error and return to the City all funds erroneously deposited or to which Consultant is not entitled.

13.11 Notice to Proceed.

Consultant shall not proceed with performance of any Services under this Agreement unless and until the City provides a written notice to proceed.

13.12 Termination, Suspension and Abandonment.

13.12.1 Grounds for Termination; Consultant's Termination for Cause. City hereby reserves the right to suspend or abandon, at any time and for any reason, all or any portion of the Project and the construction work thereon, or to terminate this Agreement at any time with or without cause. Consultant shall be provided with at least seven (7) days advanced written

notice of such suspension, abandonment or termination. In the event of such suspension, abandonment or termination, Consultant shall be paid for Services and reimbursable expenses rendered up to the date of such suspension, abandonment or termination, pursuant to the schedule of payments provided for in this Agreement, less any claims against or damages suffered by City as a result of the default, if any, by Consultant. Consultant hereby expressly waives any and all claims for damages or compensation arising under this Agreement, except as set forth herein, in the event of such suspension, abandonment or termination. Consultant may terminate this Agreement for substantial breach of performance by the City such as failure to make payment to Consultant as provided in this Agreement.

13.12.2 City's Suspension of Work. If Consultant's Services are suspended by City, City may require Consultant to resume such Services within ninety (90) days after written notice from City. When the Project is resumed, the Total Compensation and schedule of Services shall be equitably adjusted upon mutual agreement of the City and Consultant.

13.12.3 Documents and Other Data. Upon suspension, abandonment or termination, Consultant shall provide to City all preliminary studies, sketches, working drawings, specifications, computations, and all other Project Documents, as defined below, to which City would have been entitled at the completion of Consultant's Services under this Agreement. Upon payment of the amount required to be paid to Consultant pursuant to the termination provisions of this Agreement, City shall have the rights, as provided in this Agreement hereinafter, to use such Project Documents prepared by or on behalf of Consultant under this Agreement. Consultant shall make such documents available to City upon request and without additional compensation other than as may be approved as a reimbursable expense.

13.12.4 Employment of other Consultants. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

13.13 Ownership and Use of Documents; Confidentiality.

13.13.1 Ownership. All plans, specifications, original or reproducible transparencies of working drawings and master plans, preliminary sketches, architectural presentation drawings, structural computations, estimates and any other documents prepared pursuant to this Agreement, including, but not limited to, any other works of authorship fixed in any tangible medium of expression such as writings, physical drawings and data magnetically or otherwise recorded on computer diskettes (hereinafter referred to as the "Project Documents") shall be and remain the property of City. Although the official copyright in all Project Documents shall remain with the Consultant or other applicable subcontractors or consultants, the Project Documents shall be the property of City whether or not the work for which they were made is executed or completed. Within thirty (30) calendar days following completion of the Project, Consultant shall provide to City copies of all Project Documents required by City. In addition, Consultant shall retain copies of all Project Documents on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of reasonable duplication costs. Before destroying the Project Documents following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

13.13.2 Right to Use. Consultant grants to City the right to use and reuse all or part of the Project Documents, at City's sole discretion and with no additional compensation to Consultant, for the following purposes:

(a) The construction of all or part of this Project.

(b) The repair, renovation, modernization, replacement, reconstruction or expansion of this Project at any time;

(c) The construction of another project by or on behalf of the City for its ownership and use;

City is not bound by this Agreement to employ the services of Consultant in the event such documents are used or reused for these purposes. City shall be able to use or reuse the Project Documents for these purposes without risk of liability to the Consultant or third parties with respect to the condition of the Project Documents, and the use or reuse of the Project Documents for these purposes shall not be construed or interpreted to waive or limit City's right to recover for latent defects or for errors or omissions of the Consultant.

Any use or reuse by City of the Project Documents on any project other than this Project without employing the services of Consultant shall be at City's own risk with respect to third parties. If City uses or reuses the Project Documents on any project other than this Project, it shall remove the Consultant's seal from the Project Documents and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Project Documents on such other project.

13.13.3 License. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify or reuse any and all Project Documents and any intellectual property rights therein. Consultant shall require any and all subcontractors and consultants to agree in writing that City is granted a non-exclusive and perpetual license for the work of such subcontractors or consultants performed pursuant to this Agreement.

13.13.4 Right to License. Consultant represents and warrants that Consultant has the legal right to license any and all copyrights, designs and other intellectual property embodied in the Project Documents that Consultant prepares or causes to be prepared pursuant to this Agreement. Consultant shall indemnify and hold City harmless pursuant to the indemnification provisions of this Agreement for any breach of this Section. Consultant makes no such representation and warranty in regard to previously prepared designs, plans, specifications, studies, drawings, estimates or other documents that were prepared by design professionals other than Consultant and provided to Consultant by City.

13.13.5 Confidentiality. All Project Documents, either created by or provided to Consultant in connection with the performance of this Agreement, shall be held confidential by Consultant to the extent they are not subject to disclosure pursuant to the Public Records Act. All Project Documents shall not, without the written consent of City, be used or reproduced by Consultant for any purposes other than the performance of the Services. Consultant shall not disclose, cause or facilitate the disclosure of the Project Documents to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the written consent of City.

13.14 Indemnification.

13.14.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

13.14.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

13.15 Insurance.

Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section.

13.15.1 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, Consultant shall, at its expense, procure and maintain in full force and effect for the duration of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

13.15.2 Additional Insured. The City of Ontario, its officials, officers, employees, agents, and volunteers shall be named as additional insureds on Consultant's and its subconsultants' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

13.15.3 Commercial General Liability

(a) The Consultant shall take out and maintain, during the performance of all work under this Agreement, in amounts not less than specified herein, Commercial General Liability Insurance, in a form and with insurance companies acceptable to the City.

(b) Coverage for Commercial General Liability insurance shall be at least as broad as the following: Insurance Services Office Commercial General Liability coverage (Occurrence Form CG 00 01) or exact equivalent. Commercial General Liability Insurance must include coverage for the following:

(i) Bodily Injury and Property Damage

(ii) Personal Injury/Advertising Injury

(iii) Premises/Operations Liability

(iv) Products/Completed Operations Liability

(v) Aggregate Limits that Apply per Project

(vi) Explosion, Collapse and Underground (UCX) exclusion deleted

(vii) Contractual Liability with respect to this Contract

(viii) Broad Form Property Damage

(ix) Independent Consultants Coverage

(c) The policy shall contain no endorsements or provisions limiting coverage for (1) contractual liability; (2) cross liability exclusion for claims or suits by one insured against another; (3) products/completed operations liability; or (4) contain any other exclusion contrary to the Agreement.

(d) The policy shall give City, the City Council and each member of the City Council, its officers, employees, agents and City designated volunteers additional insured status using ISO endorsement forms CG 20 10 10 01 and 20 37 10 01, or endorsements providing the exact same coverage.

(e) The general liability program may utilize either deductibles or provide coverage excess of a self-insured retention, subject to written approval by the City, and provided that such deductibles shall not apply to the City as an additional insured.

13.15.4 Automobile Liability

(a) At all times during the performance of the work under this Agreement, the Consultant shall maintain Automobile Liability Insurance for bodily injury and property damage including coverage for owned, non-owned and hired vehicles, in a form and with insurance companies acceptable to the City.

(b) Coverage for automobile liability insurance shall be at least as broad as Insurance Services Office Form Number CA 00 01 covering automobile liability (Coverage Symbol 1, any auto).

(c) The policy shall give City, the City Council and each member of the City Council, its officers, employees, agents and City designated volunteers additional insured status.

(d) Subject to written approval by the City, the automobile liability program may utilize deductibles, provided that such deductibles shall not apply to the City as an additional insured, but not a self-insured retention.

13.15.5 Workers' Compensation/Employer's Liability

(a) Consultant certifies that he/she is aware of the provisions of Section 3700 of the California Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and he/she will comply with such provisions before commencing work under this Agreement.

(b) To the extent Consultant has employees at any time during the term of this Agreement, at all times during the performance of the work under this Agreement, the Consultant shall maintain full compensation insurance for all persons employed directly by him/her to carry out the work contemplated under this Agreement, all in accordance with the "Workers' Compensation and Insurance Act," Division IV of the Labor Code of the State of California and any acts amendatory thereof, and Employer's Liability Coverage in amounts indicated herein. Consultant shall require all subconsultants to obtain and maintain, for the period required by this Agreement, workers' compensation coverage of the same type and limits as specified in this Section.

13.15.6 Professional Liability (Errors and Omissions)

(a) At all times during the performance of the work under this Agreement the Consultant shall maintain professional liability or Errors and Omissions insurance appropriate to its profession, in a form and with insurance companies acceptable to the City and in an amount indicated herein. This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. "Covered Professional Services" as designated in the policy must specifically include work performed under this Agreement. The policy must "pay on behalf of" the insured and must include a provision establishing the insurer's duty to defend.

13.15.7 Minimum Policy Limits Required

(a) The following insurance limits are required for the Agreement:

Coverage	Combined Single Limit
Commercial General Liability	$2,000,000 per occurrence/ $4,000,000 aggregate for bodily injury, personal injury, and property damage
Automobile Liability	$2,000,000 per occurrence for bodily injury and property damage
Employer's Liability	$1,000,000 per occurrence

Professional Liability	$2,000,000 per claim and aggregate (errors and omissions)

(b) Defense costs shall be payable in addition to the limits.

(c) Requirements of specific coverage or limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. Any available coverage shall be provided to the parties required to be named as Additional Insured pursuant to this Agreement.

13.15.8 Evidence Required

(a) Prior to execution of the Agreement, the Consultant shall file with the City evidence of insurance from an insurer or insurers certifying to the coverage of all insurance required herein. Such evidence shall include original copies of the ISO CG 00 01 (or insurer's equivalent) signed by the insurer's representative and Certificate of Insurance (Acord Form 25-S or equivalent), together with required endorsements. All evidence of insurance shall be signed by a properly authorized officer, agent, or qualified representative of the insurer and shall certify the names of the insured, any additional insureds, where appropriate, the type and amount of the insurance, the location and operations to which the insurance applies, and the expiration date of such insurance.

13.15.9 Policy Provisions Required

(a) Consultant shall provide the City at least thirty (30) days prior written notice of cancellation of any policy required by this Agreement, except that the Consultant shall provide at least ten (10) days prior written notice of cancellation of any such policy due to non-payment of premium. If any of the required coverage is cancelled or expires during the term of this Agreement, the Consultant shall deliver renewal certificate(s) including the General Liability Additional Insured Endorsement to the City at least ten (10) days prior to the effective date of cancellation or expiration.

(b) The Commercial General Liability Policy and Automobile Policy shall each contain a provision stating that Consultant's policy is primary insurance and that any insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

(c) The retroactive date (if any) of each policy is to be no later than the effective date of this Agreement. Consultant shall maintain such coverage continuously for a period of at least three years after the completion of the work under this Agreement. Consultant shall purchase a one (1) year extended reporting period A) if the retroactive date is advanced past the effective date of this Agreement; B) if the policy is cancelled or not renewed; or C) if the policy is replaced by another claims-made policy with a retroactive date subsequent to the effective date of this Agreement.

(d) All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right

of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

(e) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

13.15.10 Qualifying Insurers

(a) All policies required shall be issued by acceptable insurance companies, as determined by the City, which satisfy the following minimum requirements: Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and admitted to transact in the business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

13.15.11 Additional Insurance Provisions

(a) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(b) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(c) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(d) Neither the City nor the City Council, nor any member of the City Council, nor any of the officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

13.15.12 Subconsultant Insurance Requirements

(a) Consultant shall not allow any subcontractors or subconsultants to commence work on any subcontract until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. Policies of commercial general liability insurance provided by such subcontractors or subconsultants shall be endorsed to name the City as an additional insured using ISO form CG 20 38 04 13 or an endorsement providing the exact same coverage. If requested by Consultant, City may approve different scopes or minimum limits of insurance for particular subcontractors or subconsultants.

13.16 Records.

Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of five (5) years from the date of final payment under this Agreement.

13.17 Standardized Manufactured Items.

Consultant shall cooperate and consult with City in the use and selection of manufactured items on the Project, including but not limited to, paint, hardware, plumbing, mechanical and electrical equipment, fixtures, roofing materials and floor coverings. All such manufactured items shall be standardized to City's criteria to the extent such criteria do not interfere with building design.

13.18 Limitation of Agreement.

This Agreement is limited to and includes only the work included in the Project described herein. Any additional or subsequent construction at the site of the Project, or at any other City site, will be covered by, and be the subject of, a separate Agreement for engineering services between City and the Consultant chosen therefor by City.

13.19 Mediation.

Disputes arising from this Agreement may be submitted to mediation if mutually agreeable to the Parties hereto. The type and process of mediation to be utilized shall be subject to the mutual agreement of the Parties.

13.20 Successors and Assigns.

This Agreement shall be binding upon and shall inure to the benefit of the successors in interest, executors, administrators and assigns of each Party to this Agreement. However, Consultant shall not assign or transfer by operation of law or otherwise any or all of its rights, burdens, duties or obligations without the prior written consent of City. Any attempted assignment without such consent shall be invalid and void.

13.21 Asbestos Certification.

Consultant shall certify to City, in writing and under penalty of perjury, that to the best of its knowledge, information and belief no asbestos-containing material or other material deemed to be hazardous by the state or federal government was specified as a building material in any construction document that the Consultant prepares for the Project. Consultant shall require all consultants who prepare any other documents for the Project to submit the same written certification. Consultant shall also assist the City in ensuring that contractors provide City with certification, in writing and under penalty of perjury, that to the best of their knowledge, information and belief no material furnished, installed or incorporated into the Project contains asbestos or any other material deemed to be hazardous by the state or federal government. These certifications shall be part of the final Project submittal. Consultant shall include statements in its

specifications that materials containing asbestos or any other material deemed to be hazardous by the state or federal government are not to be included.

13.22 No Third Party Rights.

This Agreement shall not create any rights in, or inure to the benefits of, any third party except as expressly provided herein.

13.23 Governing Law.

This Agreement shall be construed in accordance with, and governed by, the laws of the State of California. Venue shall be in San Bernardino County.

13.24 Exhibits and Recitals.

All exhibits and recitals contained herein and attached hereto are material parts of this Agreement and are incorporated as if fully set forth.

13.25 Severability.

Should any provision in the Agreement be held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remaining provisions shall continue in full force and effect.

13.26 Non-Waiver.

None of the provisions of this Agreement shall be considered waived by either Party, unless such waiver is specifically specified in writing.

13.27 Safety.

Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of its employees, consultant and subcontractors appropriate to the nature of the work and the conditions under which the work is to be performed.

13.28 Harassment Policy.

Consultant shall provide a copy of the City's Harassment Policy to each of its employees assigned to perform the tasks under this Agreement. Consultant shall submit to the City's Personnel Manager a statement signed by each of its employees who are assigned to perform the Services under this Agreement certifying receipt of City's Harassment Policy and certifying that they have read the Harassment Policy. A finding by the City that any of Consultant's employees has harassed a City employee shall be grounds for appropriate discipline, up to and including such employee's removal from performance of this Agreement at City's request.

13.29 Delivery of Notices.

All notices permitted or required under this Agreement shall be given to the respective Parties at the following address, or at such other address as the respective Parties may provide in writing for this purpose:

CITY:	CONSULTANT:
City of Ontario	Triad Consulting & System Design Group, LLC
303 East “B” Street	2925 Mira Vista Way,
Ontario, CA 91764	Corona, CA 92881
Attn: Dennis Mejia, P.E., Utilities Engineering Division Manager, OMUC	

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the Party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

13.30 Time of Essence.

Time is of the essence for each and every provision of this Agreement.

13.31 City’s Right to Employ Other Consultants.

City reserves right to employ other consultants, including designers, in connection with this Project or other projects.

13.32 Prohibited Interests.

13.32.1 Solicitation. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Further, Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability.

13.32.2 Conflict of Interest. For the term of this Agreement, no director, official, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

13.33 Equal Opportunity Employment.

Consultant represents that it is an equal opportunity employer and that it shall not discriminate against any employee or applicant for employment because of race, religion, color, national origin, ancestry, sex, age or any other classification protected by federal or state law. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City’s minority business enterprise program, affirmative action plan or other related programs or guidelines currently in effect or hereinafter enacted.

13.34 Labor Certification.

By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

13.35 Subcontracting.

As specified in this Agreement, Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to each and every provision of this Agreement.

13.36 Supplemental Conditions.

Any supplemental conditions shall be attached as an exhibit to this Agreement, and that exhibit shall be incorporated herein by reference.

13.37 Entire Agreement.

This Agreement, with its exhibits, contains the entire agreement of the Parties hereto, and supersedes any and all other prior or contemporaneous negotiations, understandings and oral or written agreements between the Parties hereto. Each Party acknowledges that no representations, inducements, promises or agreements have been made by any person which are not incorporated herein, and that any other agreements shall be void. Furthermore, any modification of this Agreement shall only be effective if in writing signed by all Parties hereto.

PROPOSED SCOPE OF SERVICES

EXHIBIT "A"

SCOPE OF SERVICES

PROJECT DESCRIPTION

Ontario Municipal Utilities Company (OMUC) Staff has recorded an increase of vagrancy, theft, and property damage at multiple well sites and treatment sites throughout the City.

OMUC is requesting a fee proposal from Consultants to provide professional design services for assessment of site security and design to improve safety and security at twenty-six City facilities.

The primary Scope of Work will consist of a site security assessment and design of, but not limited to, installing new wrought iron fences, electric sliding gates with remote control, communication conduit for future fiber optic network, site lighting, perimeter lighting, alarms, security cameras and monitoring equipment, coordination with Southern California Edison (SCE), and constructing of masonry reinforced block walls.

For the purpose of this RFP, the Consultant shall assume that the project will be designed in three construction package/phases, which may include 1. site access and hardening, 2. fixture upgrades and electrical upgrades, and 3. security camera and monitoring equipment upgrades. Final Phasing will be determined during the Preliminary Engineering and Design Phase.

Project locations may be found in **Attachment "1"**. An Initial Assessment Report describing the existing conditions of each City facility and proposed improvements may be found in **Attachment "2"**.

In addition to the Specific Scope of Services from the Consultant's Proposal incorporated as part of the task the Consultant is also responsible for the following General Scope of Services:

1. GENERAL REQUIREMENTS

1.1 Basic Services: Consultant agrees to perform all the necessary professional, engineering (e.g., mechanical, electrical, plumbing, structural, civil, site engineering), and any other necessary engineering services mutually agreeable to the parties for the Project in a timely and professional manner, consistent with the standards of the profession, including those provided for herein.

1.2 Exclusions from Basic Services: The following services shall be excluded from the basic services listed above: "N/A", NOT APPLICABLE.

1.3 Additional Services: Consultant shall perform the following Additional Services for the Project: "N/A", NOT APPLICABLE**.**

1.4 Communication with City: Consultant shall participate in consultations and conferences with authorized representatives of City and/or other local, regional, or state agencies concerned with the Project, which may be necessary for the completion of the Project or the development of documents in accordance with the applicable standards and requirements of law and the City. Such consultations and conferences shall continue throughout the planning and development of the Project. Consultant shall take direction only from the City's Representative, or any other representative specifically designated by the City for this Project.

1.4.1 Weekly Project Check-Ins: Consultant shall provide a minimum of one brief weekly project update via telephone call to the City's Project Manager and follow-up the telephone call with a brief email. The Weekly Check-in shall include current project status; tasks or items completed since last project update; tasks and items expected to be completed in the coming week; any issues that may affect project status; and any action items for the Consultant and City.

1.4.2 Meeting Agendas and Minutes with Action Items: Agendas with attachments shall be sent at least one business day prior to the date of the meeting. Meeting Minutes (draft and final) with Action Items shall be sent within three business days after: all meetings regarding the Project, including meetings with the City or any other parties; and after all Project communications regarding change in project status.

1.4.3 Monthly Billings: Monthly Billings shall be submitted in the City's standard invoicing format. Invoices shall include, at a minimum, number of hours budgeted for each task or sub-task, number of hours spent during the month and cumulative for the project. In addition, the monthly invoices shall identify labor, indirect and other project related costs incurred during the month and brief description of the activities. Consultant shall provide two (2) hard copies and one (1) electronic copy (smart pdf).

1.4.4 Monthly Billing Status Reports: A Monthly Billing Status Report shall be submitted with the Monthly Billing Invoice, which includes summary of work completed and review of work status relative to budget and schedule. Any divergences between work completed and budget expended, and schedule needs to be specifically explained and addressed to avoid future budget short-comings and delays in schedule.

1.4.5 Updated Project Schedule: The Project Schedule shall be updated monthly, or whenever there is an expected change to the deliverables schedules and shall address any deviation from the schedule, if any. Updated project schedules shall be sent with the appropriate weekly check-in.

1.4.6 Updated Project Budget: The Project Budget (including an itemized Costs Estimate) shall be updated whenever there are changes that are expected to significantly impact estimated Project Budget, and at a minimum, with the completion of each task.

1.4.7 Kickoff Meeting: Consultant shall organize, prepare, and attend the Project Kickoff Meeting. The kickoff meeting shall include an agenda and a review of

project scope, schedule, establish project communication procedures, define project deliverables, and meeting schedule.

1.4.8 Decision Log: Consultant shall maintain a decision log in order to record the decisions made by the project team. The decision log shall contain all decisions, including those made during the technical workshops, project meetings, telephone conversations and emails. Decision Log at the minimum shall include the following heading: item number, date, item action description, decision made, action taken, notes.

1.4.9 Format of Deliverables: Consultant shall submit all original documents in one or more of the followings formats as directed to by the City: MS Word, MS Excel, MS Project, MS Power Point, PDF, AutoCAD, ArcGIS.

1.4.10 Coordination with the City of Upland, the City of Rancho Cucamonga, and California Department of Transportation (Caltrans): Reservoir 1212-1A, 1B, WFA 1 (ID-23), 1212-3A (ID-22), 1348-1A, 1B, 1C (ID-24), Booster 1348-3 & 4 (ID-22) are located within the City of Upland. Well 20 (ID-2) is located within the City of Rancho Cucamonga. Well 9, Booster 1348-1, Booster 1348-2 (ID-1) and Well 37,39, 37-IX, 39-IX, Reservoir 1010-2A,2B, CDA Milliken Booster (ID-11) will require coordination with Caltrans. As such, Consultant will establish a point of contact with the agency that will be able to provide any technical input and submit all necessary plans, and specifications to secure all approvals and permits that will be necessary in the project. Consultant, on the City's behalf, shall procure all permits, licenses, and other authorizations necessary to accomplish work. The costs of such permits, approvals and other authorizations shall be paid by the City.

1.4.11 Quality Assurance/ Quality Control (QA/QC): Submittals for the Preliminary Design Report, 60%, 90% and Final Design will be reviewed by Consultant's senior manager knowledgeable in similar projects and not directly involved with the day-to-day project activities prior to delivery. The Senior Manager, as part of their review, will review all elements of the proposed site security improvements, engineering calculations (e.g., geotechnical, structural, and physical loads/stresses), appropriateness and availability of selected materials, adherence to applicable industry and regulatory standards/codes, cost estimate, and schedule.

1.4.12 Project Management: This task addresses the management responsibilities associated with proper scheduling, budget control, invoice preparation, and coordination with the City's Consultant's project team. The City will be advised on the schedule impact of project technical decisions and the project design schedule will be consistently updated (on at least a monthly basis) to reflect current project status.

The following meetings will be held at the City's office in Ontario with the appropriate members of the Consultant's project team:

- Project Kick-off meeting
- Design review workshop, Preliminary Design Report
- Design review meeting (60% Design)

- Design review meeting (90% Design)
- Design review meeting (Final Design)
- Additional meetings (1)

2. PHASE 1 – PROJECT KICKOFF, SITE SECURITY ASSESSMENT, AND PRELIMINARY DESIGN REPORT

Task 1.1 - Project Kick-off

- Consultant will begin this project with a kick-off meeting with City staff. This meeting is a key opportunity for City representatives and the consultant team to steer and further clarify critical elements of the project. The meeting agenda will focus on the project understanding, team member involvement, project constraints, project progress, and anticipated design development impediments. This meeting will also include a review of background information and project scope as well as an overview of the project schedule, objectives, milestones, and details.
- Consultant will interview key personnel of the Engineering and Operations staff to incorporate design preferences and fully understand the issues influencing the project.
- Consultant will establish a single point of contact and commit that person for the duration of the Project to provide timely information relative to the Project issues.
- Consultant will prepare project weekly status reports, meeting minutes and recognize critical issues early on to discuss and resolve them with City staff.
- The project requires project management which includes project setup, scheduling, controlling, and correspondence. Correspondence includes telephone conversations, emails, project status reports, monthly status reports, project memorandums when necessary and detailed monthly invoices.

Task 1.2 – Site Reconnaissance and Detailed Utility Verification

Consultant shall research obtain the City's and other Utility Companies' records for location of existing and future utilities which may conflict with each site's development. These records should include but are not limited to the following:

- Prepare and submit utility information requests to utility owners with facilities in the project vicinity. Consultant shall provide copies of requests sent to all affected parties.
- Prepare and submit utility verification requests to utility owners with facilities in the project vicinity. Consultant shall provide copies of requests sent to all affected parties.
- Prepare and submit utility conflict notices to utility owners with facilities impacted by the proposed project.
- Prepare and submit utility relocation notices to utility owners, as required.
- Obtain utility permits and clearances as required to construct the project.
- Conduct utility coordination meetings, as required.
- Collected as-built information will be compiled, reviewed, and included into the topographic survey base map.
- Record drawings of existing and future facilities that may conflict with the proposed improvements.

- Before the topographic survey of the project is started, Consultant will contact USA and request that utilities be marked for each project site in order that the marking can be surveyed and placed into the base drawing.
- Legal description of surrounding properties.
- Proximity to a source of power.

The data collected by the consultant will be incorporated into the AutoCAD base drawing. Upon completion of compiling the topographic survey and utility agency-provided drawings, project areas will be visited where utility as-built drawing information is insufficient.

Task 1.3 – Topographic Survey

In Consultant's effort to provide an accurate and detailed design, Consultant will provide a topographic survey of each project location. The goal will be to have Underground Service Alert mark the utilities prior to the topographic survey, allowing for this data to be collected. The topographic survey will serve as the project base drawing. City provided Atlas Maps and record drawings will be used to supplement the base drawing. Upon completion of the base drawing the map will be field verified (refer to Task 1.2). The topographic survey will include the following information:

- Horizontal Control based on NAD 83.
- Vertical Control based on NAVD 88.
- Elevations will be based on City or County benchmark elevations.
- Consultant shall provide an aerial survey correlated with the State Plane Coordinate System to obtain a one-foot contour interval topographic and orthographic images at least 100 feet beyond the Project limits including horizontal and vertical control and benchmark delineation consistent with established control and existing City facilities.
- Existing roadway features between the right-of-way, including street addresses for parcels on both sides of the streets, curb and gutter, edges of pavement, sidewalks/parkways, curb returns, curb ramps, driveways; alley intersections, bus pads, bike lanes, street striping, traffic loops.
- Below and above-ground structures including but not limited to poles, existing vaults, and boxes.
- Existing signs; power poles, guy wires.
- Existing surface improvements including fire hydrants located within or adjacent to the right-of-way; water system appurtenances; (water meters with size, water service lines), sanitary sewers and storm drain manholes with surface and invert elevation, clean outs, monitoring wells, catch basins and inlets, gas meters, electric meters, vaults.
- Locations of trees that are four inches in diameter or greater, within or adjacent to the street right-of-way.
- Locations of USA utility markings within the project limits.

Task 1.4: Geotechnical Investigation

The Consultant shall perform a detailed geotechnical investigation and prepare a report for sites requiring new segment walls. The report shall include but is not limited to: borings to determine subsurface conditions and site geology, soil bearing capacity, presence of rock and rock removal capability factors/analysis, anticipated excavation characteristics of materials along the alignment or at the proposed sites, groundwater conditions and dewatering, R-values, moisture content, density, gradation, consolidation, expansion, soil contamination issues, laboratory test results (max density, sieve analysis, Atterberg limit), soil corrosivity, soil chemistry test results (pH, resistivity, sulfate content), corrosion protection and control, pipeline bedding requirements, suitability of native material for backfill, and shoring recommendations. For the purpose of this RFP, the investigation shall assume 25 borings. Additional borings, if necessary and agreed to by the City Project Manager shall be completed after a written contract change order is approved. Boreholes in paved roadways shall be repaired with permanent hot mix patch repair in accordance with **Attachment "3"**. Consultant shall incorporate any and all geotechnical requirements into the planning and design phases of the Project in conformance with the industry standard of care.

Consultant shall summarize all findings, results, and recommendations into a draft geotechnical investigation report. Three (3) copies and one (1) electronic copy of the draft geotechnical report shall be submitted for review. OMUC comments shall be incorporated and three (3) copies and one (1) electronic copy of the final geotechnical report shall be submitted.

Task 1.5 – Site Security Assessment and Preliminary Design Report (30%)

- Consultant shall furnish all labor, materials, equipment, insurance, training and certifications to complete the site security assessment.
- Consultant shall review attached Initial Assessment Report.
- Consultant shall perform all required safety and security assessments of, but not limited to, intrusion to property after hours, doors, locks, keys, fencing, gates, lighting, alarms, communication systems, and security cameras.
- Consultant shall summarize the findings and provide a safety and security assessment report within the preliminary design report.
- Consultant shall Identify the needed improvements, corrective issues, and provide recommendations.
- Consultant shall verify electrical capacity and needs at each site and coordinate with Southern California Edison (SCE) as needed.
- Operations shall be performed while in service without causing disruption to the treatment or distribution system.
- Findings are to be graded in accordance with applicable standards, latest editions, from the following agencies:
    - Guidelines for Physical Security of Water Utilities – ANSI/ASCE/EWRI 56-10
- Identify required permits and clearances needed to construct the project.
- Consultant shall prepare a preliminary plan and design report that summarizes the consultant's evaluation of the project constraints, which include the following:

- Proposed site security improvements.
- Work plan that identifies and discusses the various project constraints and scope items that must be addressed and recommend a plan of action(s) that should be followed to deliver the project.
- Opinion of probable costs.
- Provide phasing recommendations based on input received from City Staff, which may include 1. site access and hardening, 2. fixture upgrades and electrical upgrades, and 3. security camera and monitoring equipment upgrades. Suggested additional recommendations include Critical site improvement priority list, project budget, etc.

- The Design Report will also memorialize the specified materials proposed for the project. A summary of the city-approved variances and deviations from standard plans will be included in the Design Report

Task 1.6 – Coordination with City of Ontario IT Department, City of Ontario Broadband Department, Bay Alarm Company

Consultant shall coordinate between each agency during the design of the security camera and monitoring equipment upgrades. Successful implementation of the project will be contingent on City of Ontario IT Department, City of Ontario Broadband Department, and Bay Alarm Company approval of design. As such, Consultant will establish a point of contact at each agency that will be able to provide any technical input and submit all necessary plans, and specifications to secure all approvals and permits that will be necessary. The proposed design shall be compatible and integrable with the existing security camera and monitoring equipment recommended by coordinated agencies. Consultant, on the City's behalf, shall procure all permits, licenses, and other authorizations necessary to accomplish the work.

Task 1.7 – Project Workshop

Conduct preliminary design workshop including a detailed presentation of OMUC personnel at completion of draft preliminary design report to discuss the project, schedule, cost, constraints, and transition plan to final design.

Consultant shall summarize all findings, results, conclusion, and recommendations into a draft PDR. The Consultant shall submit five (5) copies of each Draft PDR including one (1) electronic copy (smart pdf) and original files for OMUC review. OMUC comments on the Draft PDR shall be incorporated into a Final PDR. The Consultant shall submit to the OMUC eight (8) copies each of the final PDR including an electronic copy (smart pdf) and original files.

<u>Tasks identified in Phase 2 and 3 shall apply to up to three (3) construction phases approved per Task 1.5</u>

3. PHASE 2 – ENGINEERING DESIGN SERVICES AND PROJECT MANAGEMENT

Task 2.1 – Preliminary Design (60%) Submittal

Upon completing record document research and field data collection the Consultant shall compile all gathered information and prepare preliminary design plans. Preliminary design shall include recommended site security improvements required. After the Preliminary Design is approved by the City, the Consultant shall proceed with the detailed design.

The design will include the necessary security and safety improvements. Task 2.1 will include additional data collection as necessary.

The plans will illustrate and specify all necessary information for the Contractor to bid and complete the work.

Along with the 60% construction plan submittal, the technical specifications will be submitted, including the City's front-end contract documents which will be tailored for the project. The City will provide the front-end document boiler plate.

Consultant will provide the plans sheets at 1" = 40' for horizontal and 1" = 4' for vertical scale. The plan set will include title sheet, notes, and standard details.

Consultant will attend a meeting with City staff to review and discuss the 60% plan-check comments and other City staff feedback. Consultant shall maintain a log of 60% plan review comments and responses.

Task 2.2 – Detailed Design (90%) Submittal

With preliminary design (60%) review comments from the City and other entities, Consultant shall prepare detailed design PS & E for the proposed improvements. Plans shall be prepared using computer aided design software (AutoCAD) and shall be printed on size 24x36 paper. The 90% plan submittal shall be stamped and signed by a California Registered Professional Engineer. The 90% special provisions and technical specifications (PS & E) shall be prepared and submitted. The City will review the submitted PS & E, provide comments, and request revisions until it is in compliance with City standards and policies.

The 90% design submittal will include all necessary information for the Contractor to bid and complete the work.

The plans will illustrate and specify the dimensions, type of material, sizes, construction sequencing, and the quality required for the project.

Along with the 90% construction plan submittal, the technical specifications will be submitted, including the City's front-end contract documents which will be tailored for the project.

Consultant will provide the plans sheets at 1" = 40' for horizontal and 1" = 4' for vertical scale. The plan set will include title sheet, notes, and standard details.

Consultant will attend a meeting with City staff to review and discuss the 90% plan-check comments and other City staff feedback. Consultant shall maintain a log of 90%

plan review comments and responses. If warranted by the plan check comments, Consultant shall submit one more iteration of the 90% plans and specifications for review and approval.

Task 2.3 – Final Design Revisions

Consultant shall make all City-requested changes, additions, deletions, and corrections in the Final Design and Specifications at no additional cost, so long as they are not in conflict with the requirements of public agencies having jurisdiction or prior approval, or inconsistent with earlier City direction or Consultant's professional judgment. Consultant shall bring any such conflicts and/or inconsistencies to the attention of City. The parties agree that Consultant, and not the City, possesses the requisite expertise to determine the constructability of the Final Working Drawings and Specifications. However, the City reserves the right to conduct one or more constructability review processes with the Final Working Drawings and Specifications, and to hire an independent Consultant or other consultant to perform such reviews. Any such independent constructability review shall be at City's expense. Consultant shall make all City-requested changes, additions, deletions, and corrections in the Final Working Drawings and Specifications which may result from any constructability review, at no additional cost to the City, so long as they are not in conflict with the requirements of public agencies having jurisdiction or prior approval, or inconsistent with earlier City direction or Consultant's professional judgment. If such changes, additions, deletions, or corrections are inconsistent with prior City direction, Consultant shall make such alterations and be compensated therefore pursuant to the Additional Services provision of this Agreement.

Task 2.4 – Final Working Drawings and Specifications (100% Submittal)

Upon approval of the 90% design PS & E by the City, the Consultant shall prepare the final working documents for bid. A complete set of 100% stamped and signed plans and specifications shall be submitted to the City. Such Final Working Drawings and Specifications shall be developed from the Preliminary Design Phase and Design Development Documents approved by City. The Final Working Drawings and Specifications shall set forth in detail all of the following: (1) the Project construction work to be done; (2) the materials, workmanship, finishes, and equipment required for the architectural, structural, mechanical, and electrical systems; As indicated in (Section 3.9.2 of the Agreement), City may be requested to supply Consultant with the necessary information to determine the proper location of all improvements on and off site, including record drawings ("as-built drawings") in City's possession. Consultant will make a good-faith effort to verify the accuracy of such information by means of a thorough interior and exterior visual survey of site conditions. City shall also make a good-faith effort to verify the accuracy of the as-built drawings and provide any supplemental information to Consultant which may not be shown on the as-built drawings.

Task 2.5 – Permits

Consultant shall identify all required permits and provide a list of permitting agencies, contacts, and requirements needed to obtain such permits. Consultant should identify

the timelines associated with the permit review and approval and potential impacts on project schedule. Consultant shall incorporate comments from the Agencies, if required with the approval from the City, Consultant shall revise the Scope of Work as necessary. Consultant will be responsible in securing easements, construction easements, encroachment permits, rights of way, dedications, infrastructures, road improvements, as well coordinating with utilities and adjacent property owners. The costs of such permits, approvals and other authorizations shall be paid by the City.

Task 2.6 Southern California Edison (SCE) Coordination and Approval

Southern California Edison (SCE) is the electrical utility provider to the city of Ontario. Consultant will coordinate with SCE for providing electrical service or additional capacity needs as required at each site. Consultant shall obtain approved SCE construction plans, which will be included as supplemental information to the contract documents. The City will pay all associated SCE fees.

Task 2.7 – Opinion of Probable Construction Cost (30%, 60%, 90% and 100% Submittal)

During the preparation of the 30%, 60%, 90% and 100% submittal packages, Consultant will prepare an Opinion of Probable Construction Cost (OPCC) for each portion of the project. The OPCC will be tabularized in the same format as the construction document bid sheet.

4. PHASE 3 - BIDDING SUPPORT SERVICES

Task 3.1 – Contract Document Interpretation and Bidding Assistance

During bidding, Consultant will provide interpretation and consultation regarding questions and/or requests for clarification to the plans and specifications. Consultant will assist and support the City taking the lead in preparing bid addenda as required to provide clarification to contract documents and responses to Requests for Information (RFI) and Requests for Clarifications (RFC). Consultant will help City staff with technical details required for the staff report to the City Council.

Task 3.2 – Submittal Review

Each submittal received from the Contractor will be reviewed for its completeness and conformance to the project specifications and City standards by the Consultant. The submittals will be distributed to the City for review and final comments before being returned to the Contractor for action.

Task 3.3 – Pre-Bid Meeting

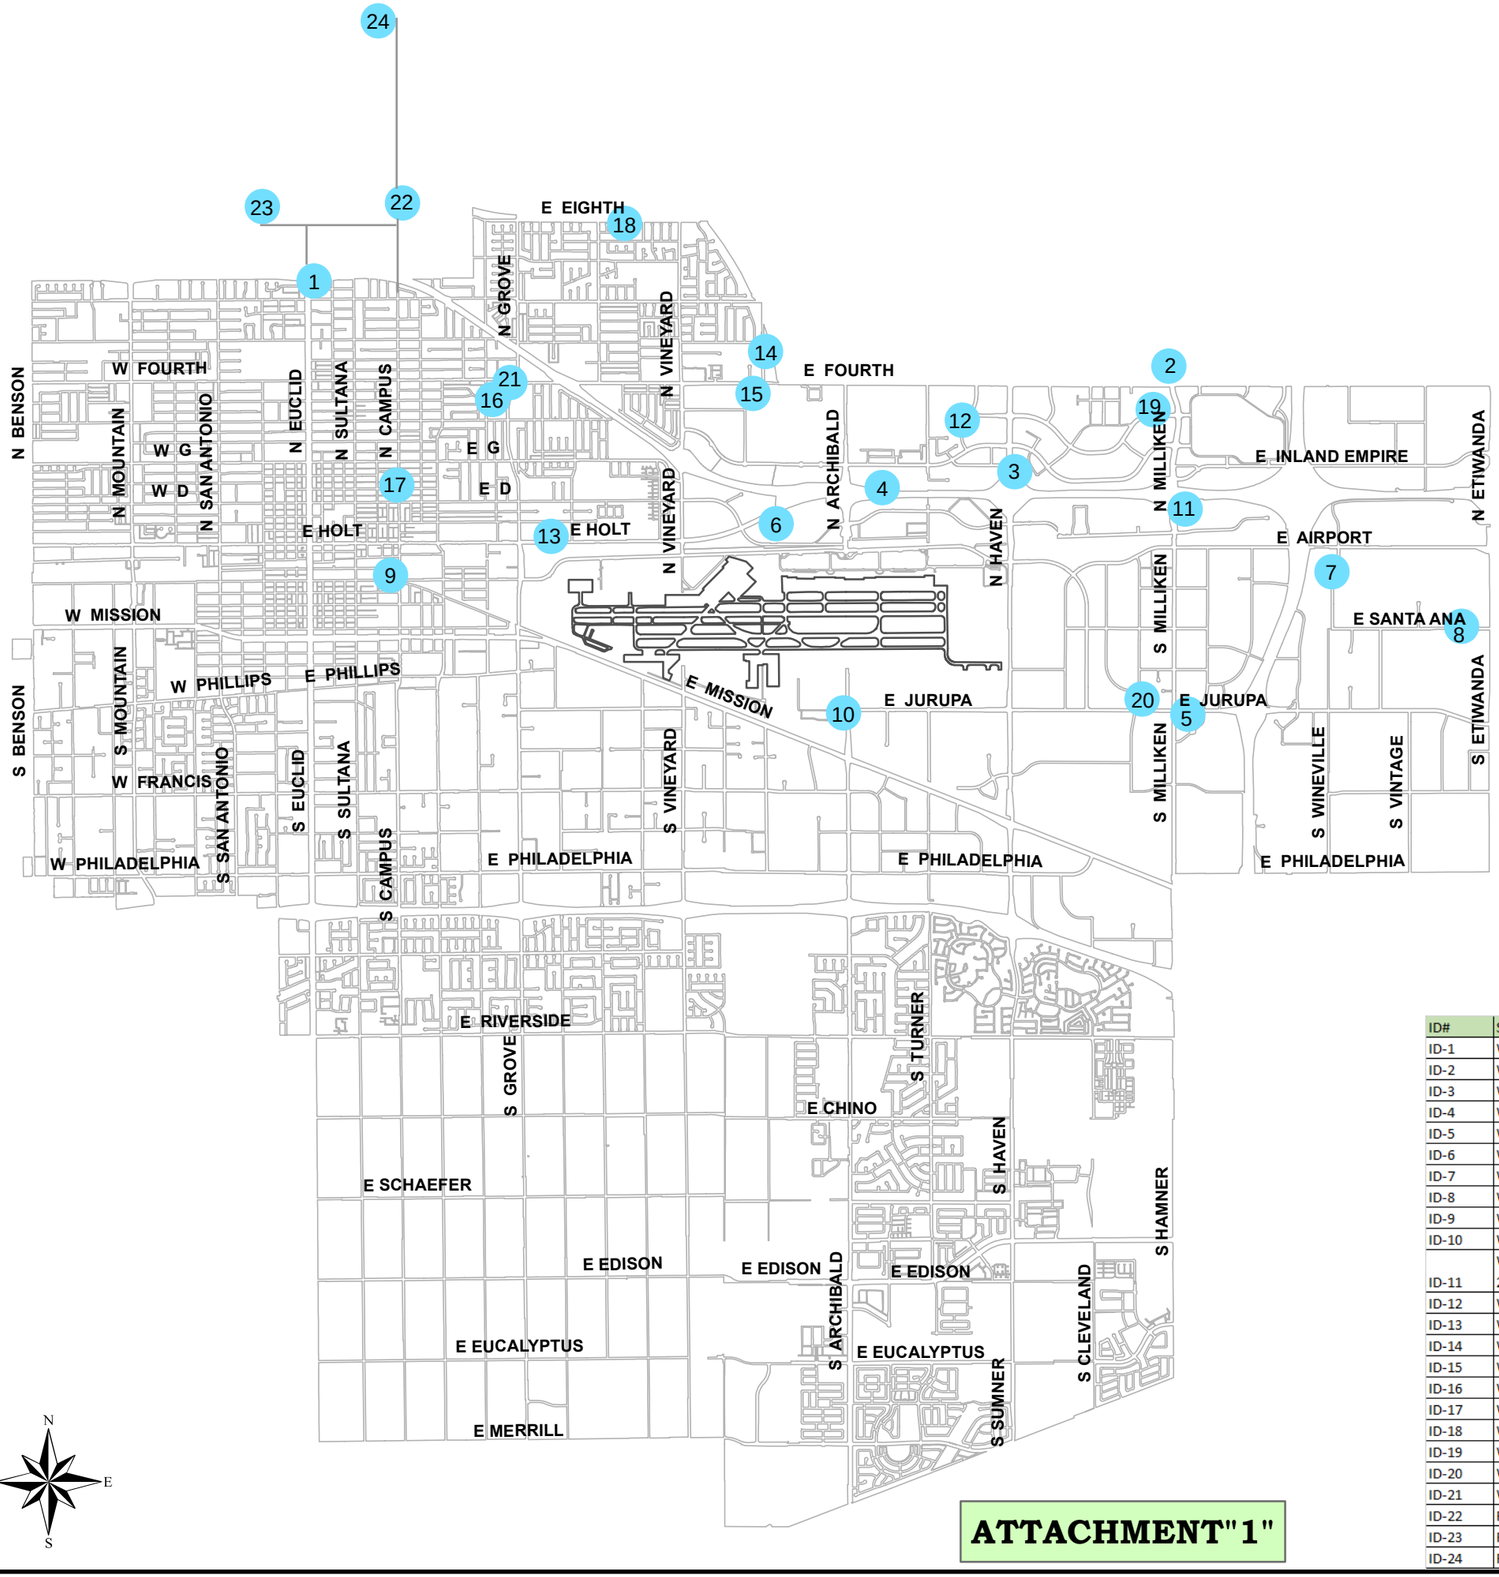
Once City schedules the Pre-Bid Meeting, the Consultant shall attend the meeting, prepare meeting agenda, facilitate meeting, formally respond to all Requests for Information, and prepare meetings minutes.

Task 3.4 – Analyze Bids

After Project bid openings, Consultant shall assist City Staff in analyzing bids, verifying contractor's license, conduct background check of the lowest, responsive bidder, and make a recommendation for award of the construction contract.

Task 3.5 – Conformed Plans and Specifications

The Consultant shall prepare conformed plans and specifications for use in constructing the project. Conformed plans and specifications shall reflect changes made during bidding and will be noted as a revision to final design plans.



Task 3.6 - Additional Services

Consultant is encouraged in its proposals to identify any additional work that is not specified in this Scope of Work that would be, in its opinion, necessary to complete the project as defined herein. Consultant may propose additional services that in its opinion will improve the efficiency and quality of the project. If identified, the additional work or services must be included in the proposal but separated out in the Consultant's Fee Schedule as Optional Tasks. The City will have final discretion on acceptance and approval of these Optional Tasks.

Well 9, Booster 1348-1, Booster 1348-2 (ID-1)

Address: 300 E Alvarado St, Ontario, CA 91764

Recommended Improvements:

1. Construction of 8 feet wrought iron fence, 8 feet masonry block wall, or improve the height of the wall around the facility. Improvement to the wall height could be done by constructing an overhanging wrought iron fence on top of the wall to a height of 8 feet.
    a. Construction of 8 feet masonry block wall along Figure 2 and 5 to block loud noises from the freeway. Future coordination with Caltrans will be required.
2. The entrance gate in figure 4 should be replaced with a taller rolling gate.
3. Improvements to the lighting and addition of security cameras to the facility with consciousness that there is a residential community south of the site.

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Well 20 (ID-2)

Address: 9600 Milliken Avenue, Rancho Cucamonga, CA 91730

Recommended Improvements:

1. Improve the height of the wall around the facility. Improvement to the wall height could be done by constructing an overhanging wrought iron fence on top of the wall to a height of 8 feet.
2. Improvements to the lighting and the addition of security cameras to the facility.
3. Install a 30' tower to communicate with the city's existing SCADA.

Well 24 (ID-3)

Address: 700 N Haven Avenue, Ontario, CA 91764 (34.069379, -117.575077)

Well 24 is located behind Ontario Airport Hotel. The existing CL2 room is planned to be demolished and rebuilt.

Recommended Improvements:

1. Improvements to the lighting and the addition of security cameras to the facility.
    a. The city will be installing an AMI at this location.
2. Improvements to the entrance gate shall include an automated iron rolling gate.
3. Construction of 8 feet wrought iron fence, 8 feet masonry block wall, or improve the height of the wall around the facility. Improvement to the wall height could be done by constructing an overhanging wrought iron fence on top of the wall to a height of 8 feet. A portion of the wall on the northwest corner will be removed and replaced when the new Chlorine room is constructed.

Fig. 1

Fig. 2

Fig. 3

Well 25 (ID-4)

Address: 2982 Inland Empire Blvd, Ontario, CA 91764

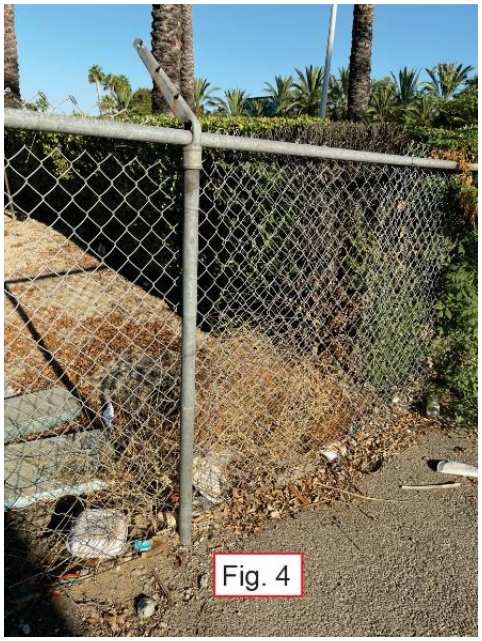
Well 25 is currently deactivated. The city leases part of the location to cell companies and has cell towers within the property grounds.

Recommended Improvements:

1. Construction of 8 feet wrought iron fence or 8 feet masonry block wall.
2. Improvements to the lighting and the addition of security cameras to the facility.
3. Improvements to the entrance gate shall include an automated iron rolling gate with keypads inside and outside of the facility.

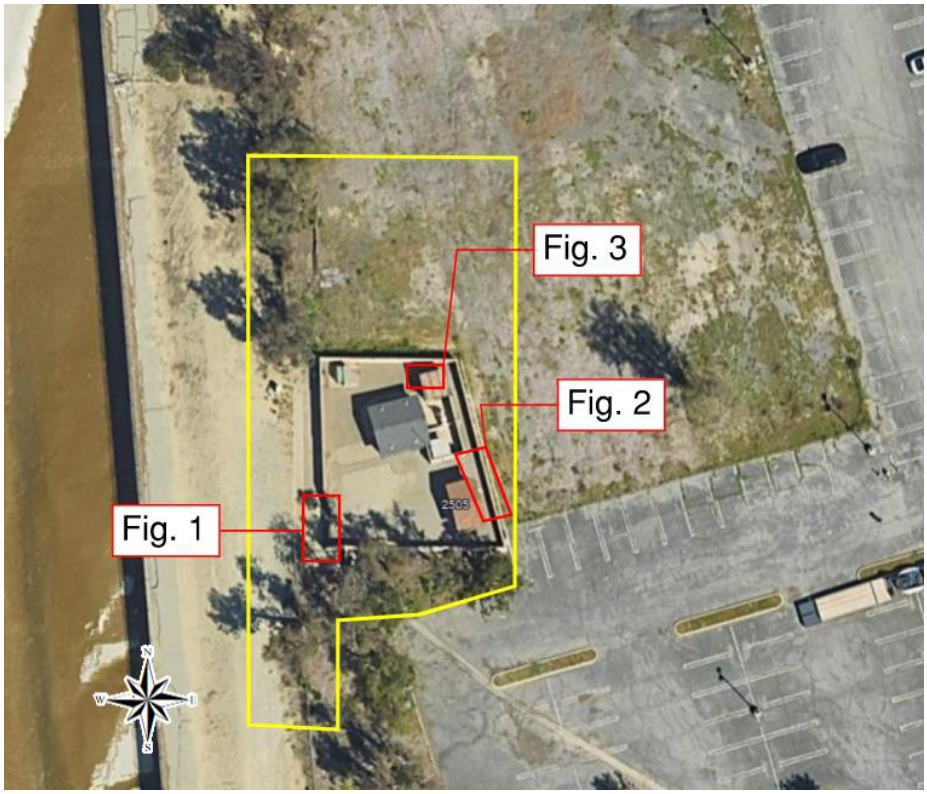
Well 27 (ID-5)

Address: 4300 E Jurupa St, Ontario, CA 91761 (34.047955, -117.556795)



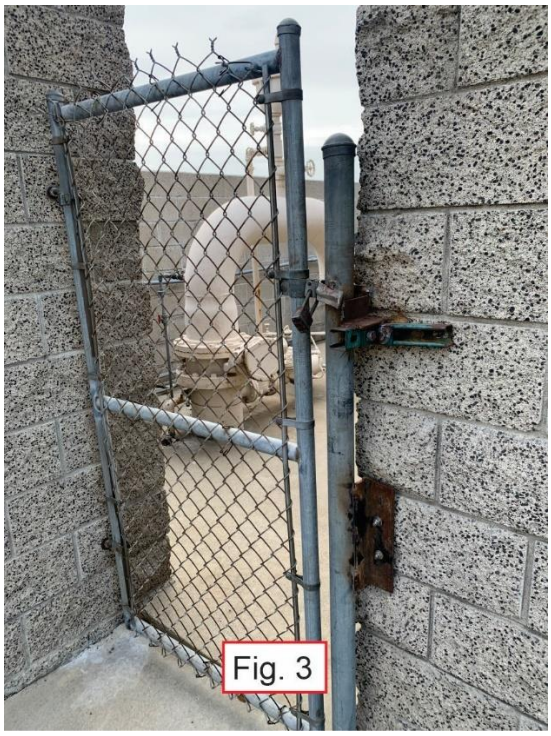
Recommended Improvements:

1. Construct 8 feet wrought iron fence, 8 feet masonry block wall, or improve the height of the wall around the facility. Improvement to the wall height could be done by constructing an overhanging wrought iron fence on top of the wall to a height of 8 feet.



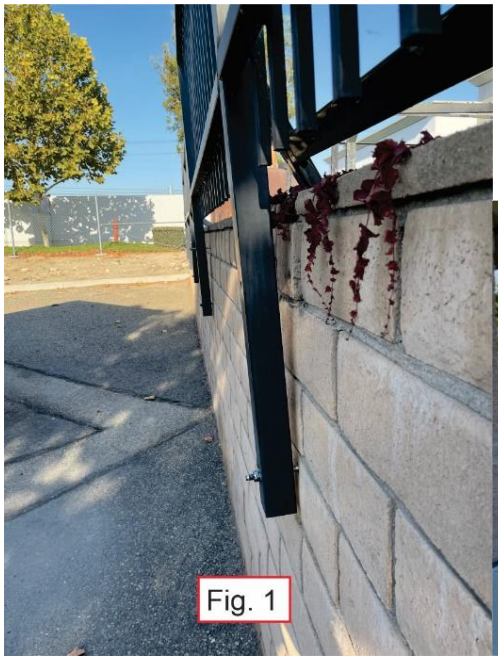
Well 29 (ID-6)

Address: 2505 E Guasti Rd, Ontario, CA 91761 (34.064988, -117.600892)

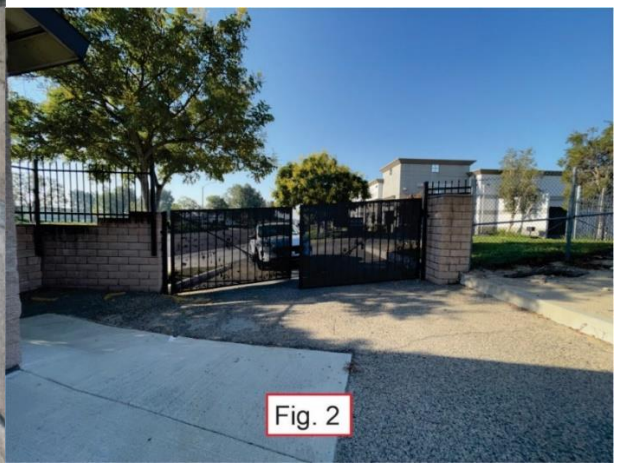


Recommended Improvements:

1. Construct 8 feet wrought iron fence, 8 feet masonry block wall, or improve the height of the wall around the facility. Improvement to the wall height could be done by constructing an overhanging wrought iron fence on top of the wall to a height of 8 feet.
2. Improvements to the entrance gate shall include an automated iron rolling gate.
    a. Figure 1 displays the damaged front gate that will need to be replaced.
3. Improvements to the lighting and the addition of security cameras to the facility.



Well 30 (ID-7)



Address: 220 S Wineville Ave, Ontario, CA 91761 (34.060490, -117.541260)

Recommended Improvements:

1. Core drill and post cement the existing falling wrought iron fence into the wall.
2. Construct 8 feet wrought iron fence, 8 feet masonry block wall, or improve the height of the wall around the facility. Improvement to the wall height could be done by constructing an overhanging wrought iron fence on top of the wall to a height of 8 feet.
    a. Figures 3 and 4 are potential areas to remove and replace the existing fencing with a more secure wall. Improvements to the walls should make it conscious that there is a high-pressure gas line in the back half of the site.
3. Improvements to the lighting and the addition of security cameras to the facility.
4. Improvement to the existing entrance gate in Figure 2 by extending the gate farther out towards the property line and installing an electric gate opener.

Well 37, 39, 37-IX,39-IX, Reservoir 1010-2A, 2B, CDA Milliken Booster (ID-11)

Address: 4327 E Guasti Rd, Ontario, CA 91761 (34.065831, -117.557447)

Recommended Improvements:

1. Construct 8 feet wrought iron fence, 8 feet masonry block wall, or improve the height of the wall around the facility.
    a. Caltrans coordination will be required to approve the walls along the north side of the facility next to the 10 freeway and west side along Milliken Avenue.
    b. Install k-rails on the west side of the facility along Milliken Avenue.
    c. Improvements to the lighting and the addition of security cameras to the facility.
        i. It is recommended that the site have perimeter lighting and security cameras to be added in key areas of the site.

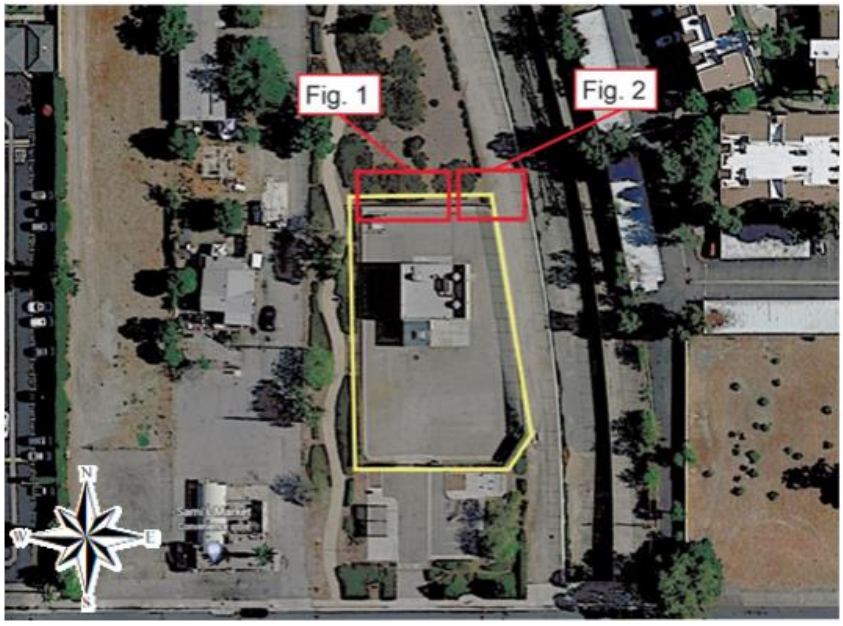
Fig. 1

Fig. 2

Fig. 3

Well 38 (ID-12)

Address: 915 N Center Ave, Ontario, CA 91764



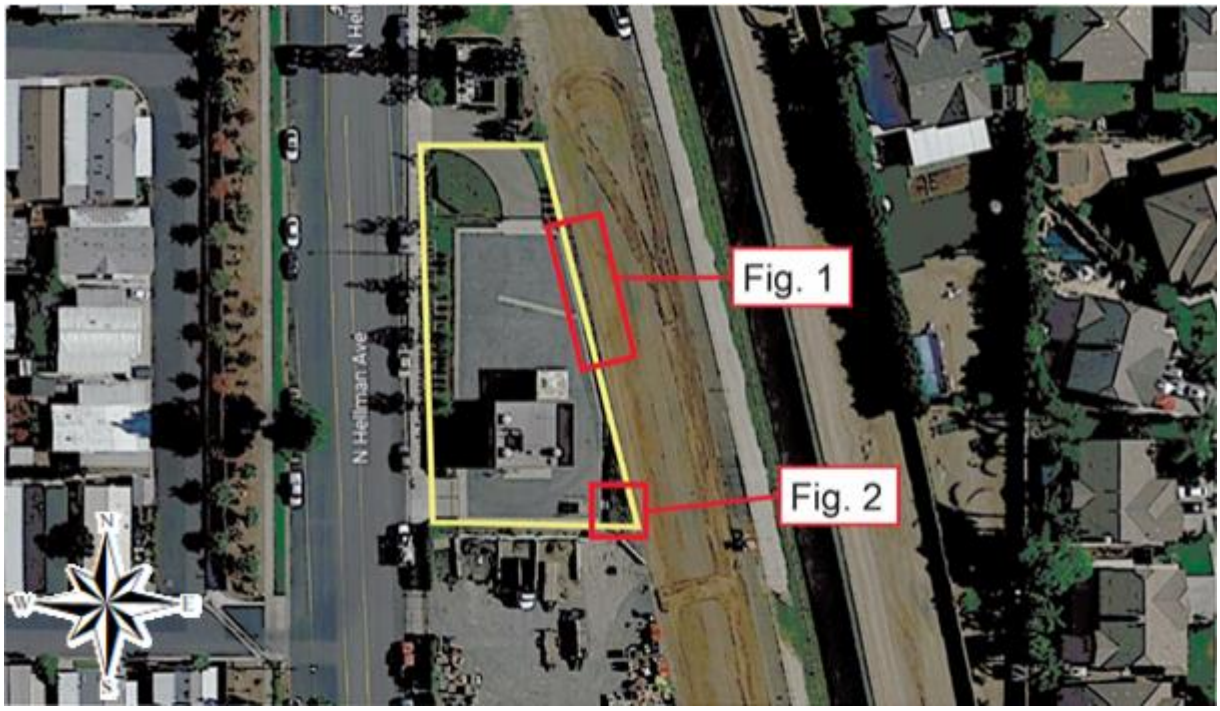
Recommended Improvements:

1. Improvements to the lighting of the facility and the addition of security cameras inside the building.

Well 40 (ID-13)

Address: 1335 E Holt Blvd, Ontario, CA 91761

Recommended Improvements:



1. Construction of 8 feet wrought iron fence.
    a. Figures 1 and 2 display areas where the chain linked fence has been damaged.
2. Improvements to the lighting and the addition of security cameras to the facility.

Well 41 (ID-14)

Address: 1278 N Hellman Ave, Ontario, CA 91764

Recommended Improvements:

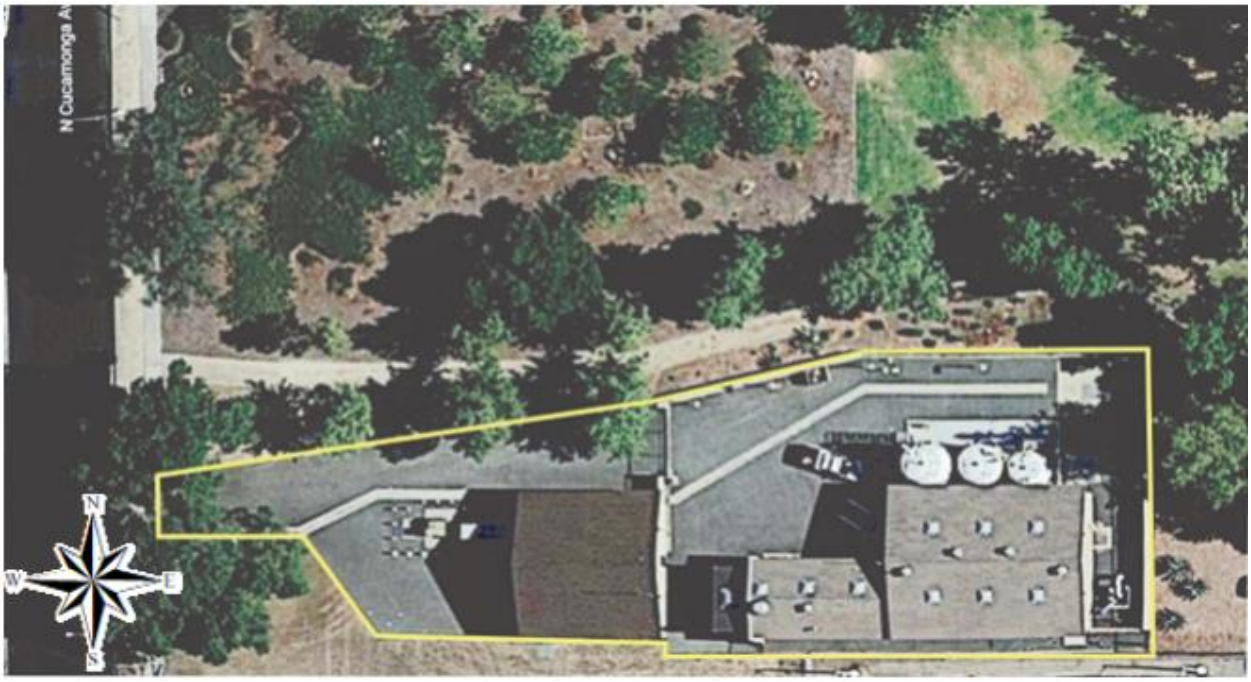
1. Construct 8 feet wrought iron fence around the facility.
2. Improvements to the lighting and the addition of security cameras to the facility.

Fig. 1

Fig. 2

Well 41-IX (ID-15)

Address: 2252 E 4th St, Ontario, CA 91764

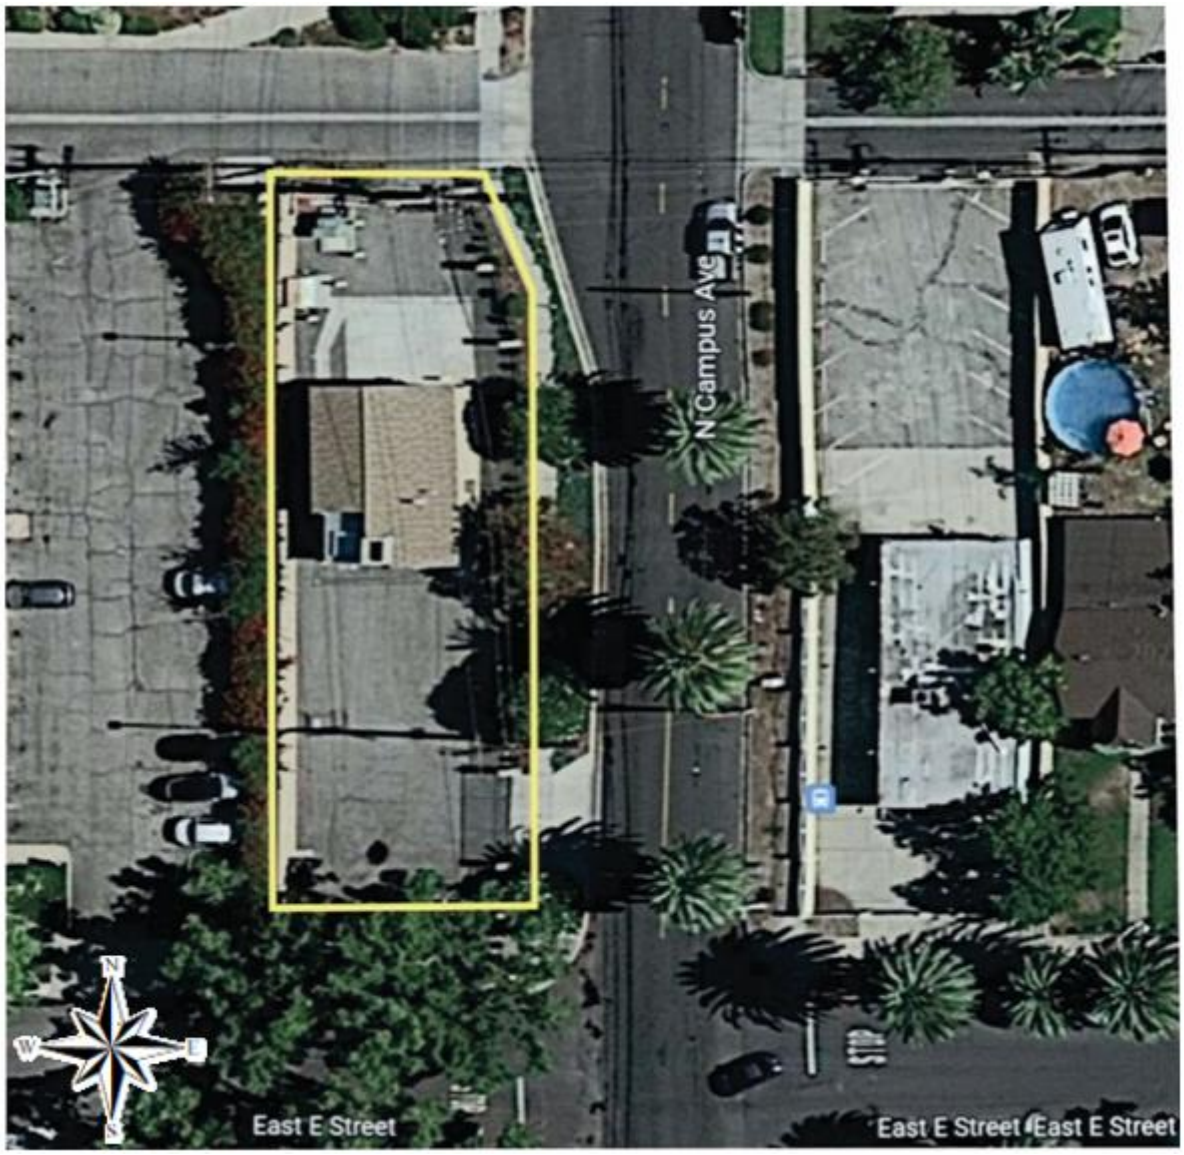


Recommended Improvements:

1. Improvements to the lighting and the addition of security cameras to the facility.

Well 44, Well 44-IX, Galvin Booster 1,2,3,4 (ID-16)

Address: 994 N Cucamonga Ave, Ontario, CA 91764



Recommended Improvements:

1. Extend the block wall towards the street and relocate the automatic gate towards the extended wall.

Well 45 (ID-17)

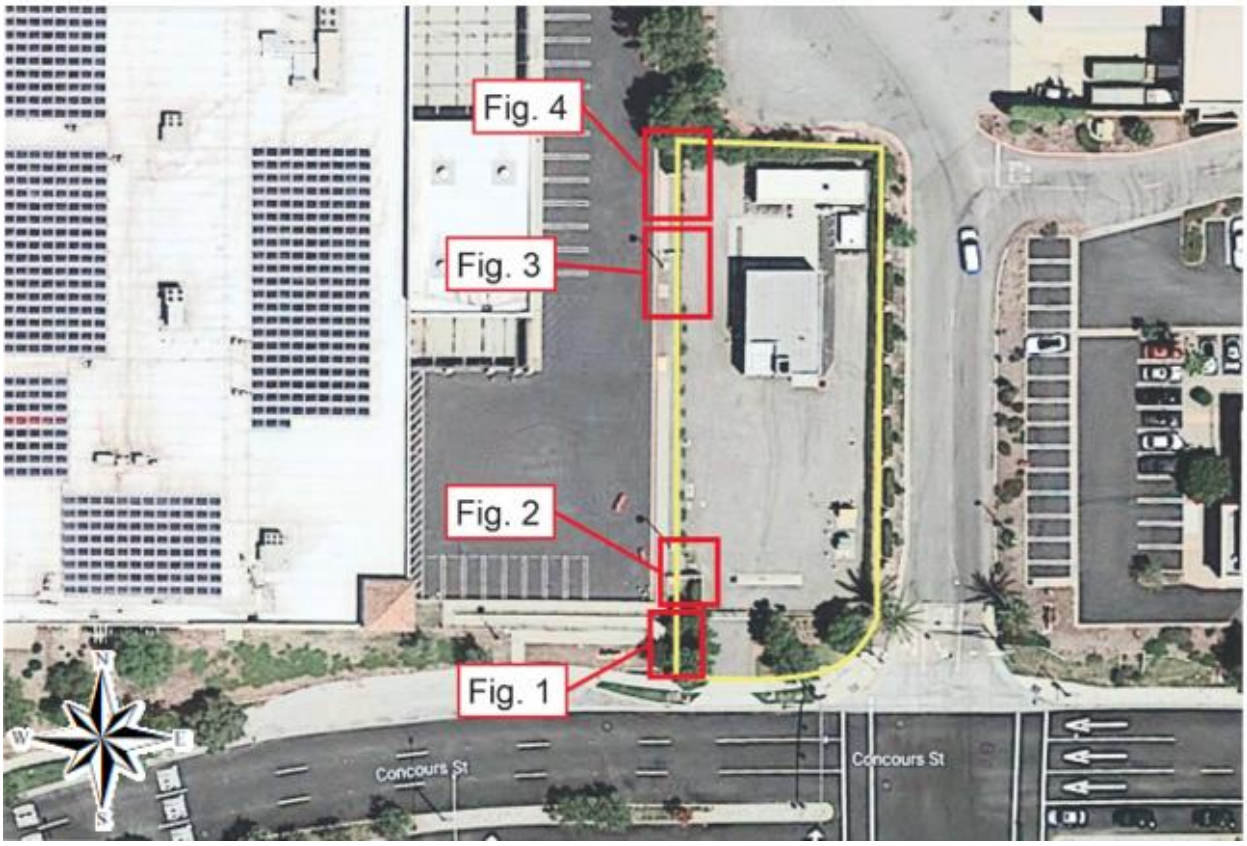
Address: 665 East E Street, Ontario, CA 91764

Recommended Improvements:

1. Improvements to the lighting and the addition of security cameras to the facility will help reduce potential intrusions.

Well 46 (ID-18)

Address: 1670 E 8th St, Ontario, CA 91764



Recommended Improvements:

1. Improvements to the lighting and the addition of security cameras to the facility will help reduce potential intrusions.
    a. Additional security cameras should be monitoring the diesel fuel tank at the facility.

Well 47 (ID-19)

Address: 4255 Concours St, Ontario, CA 91764 (34.074938, -117.560358)

Recommended Improvements:

1. Improvements to the wall height to 8 feet surrounding the facility would help prevent intrusions into the facility.
2. Improvements to the lighting and the addition of security cameras to the facility will help reduce potential intrusions.

Fig. 1

Fig. 2

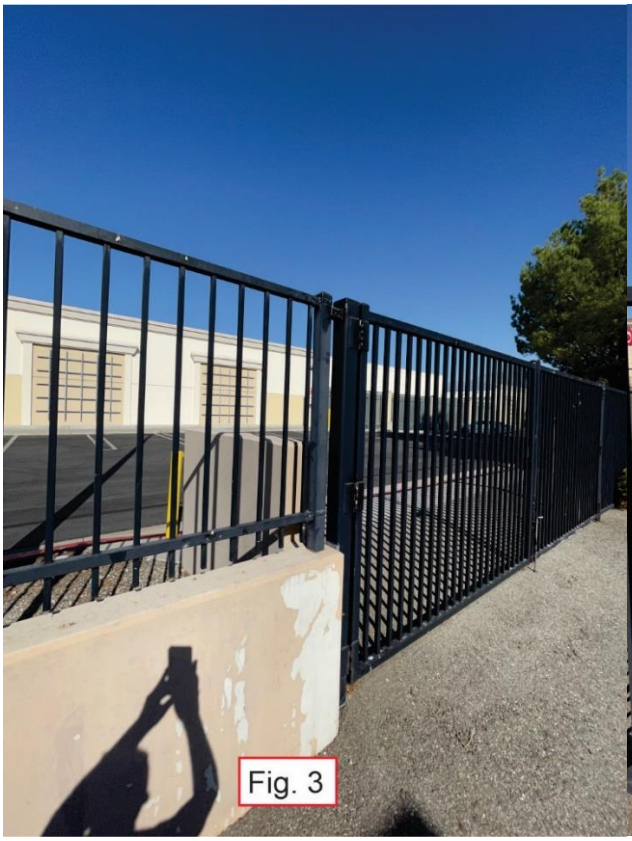


Fig. 3

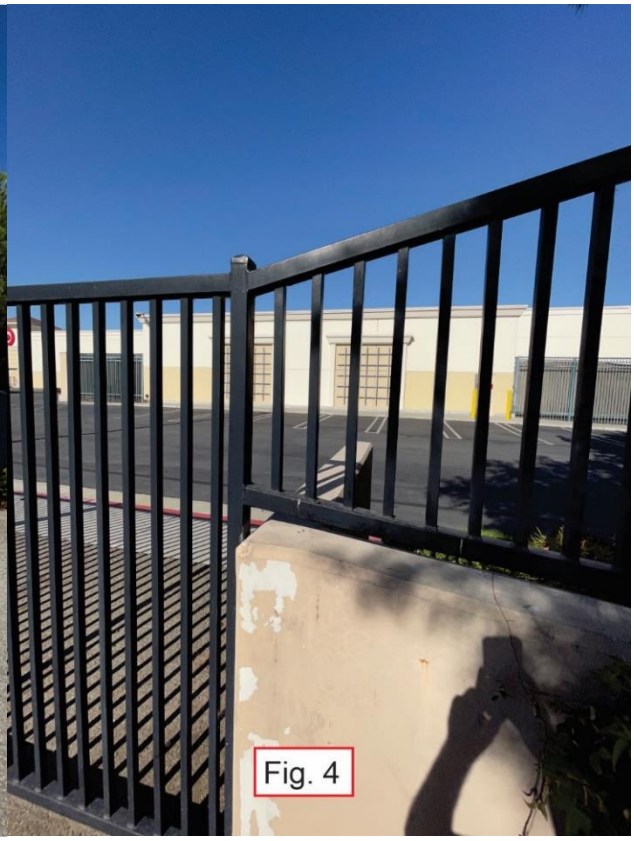

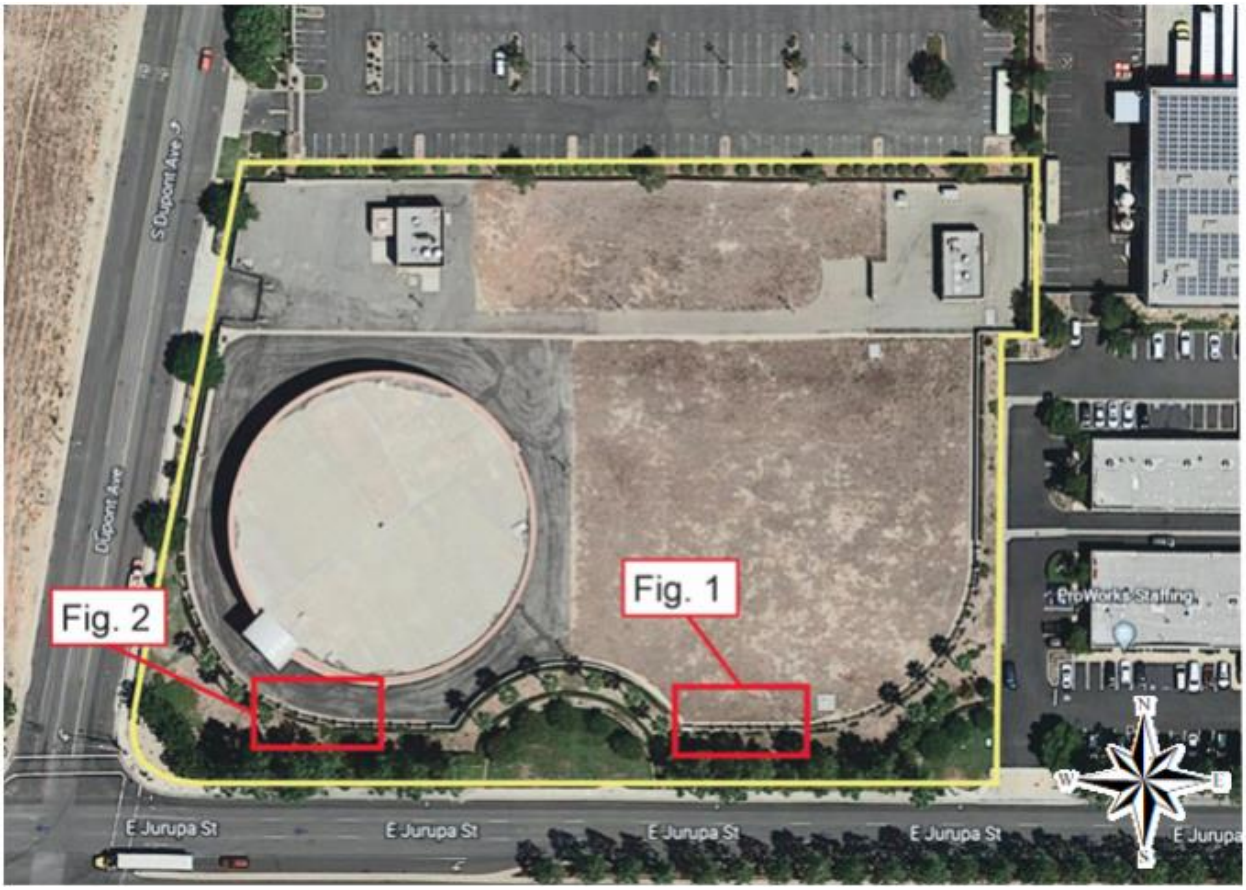

Fig. 4

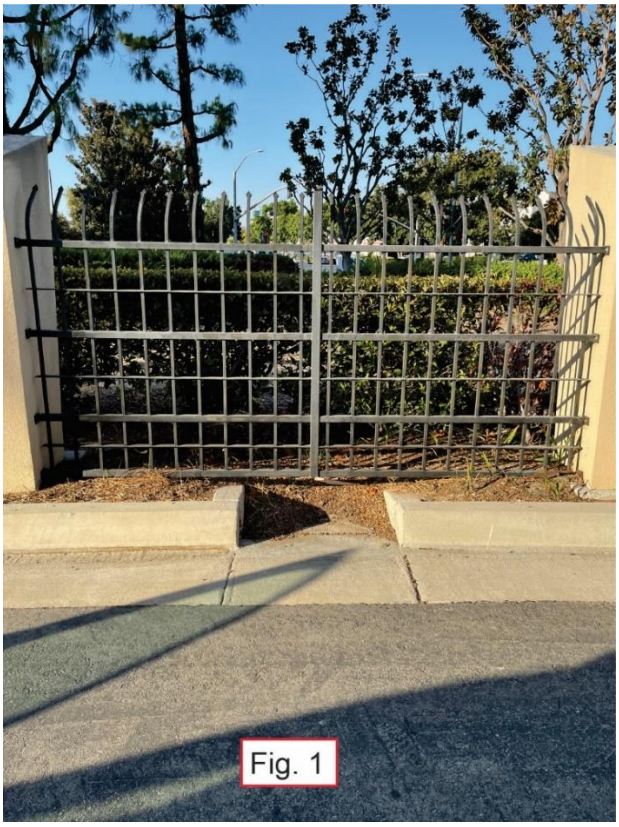
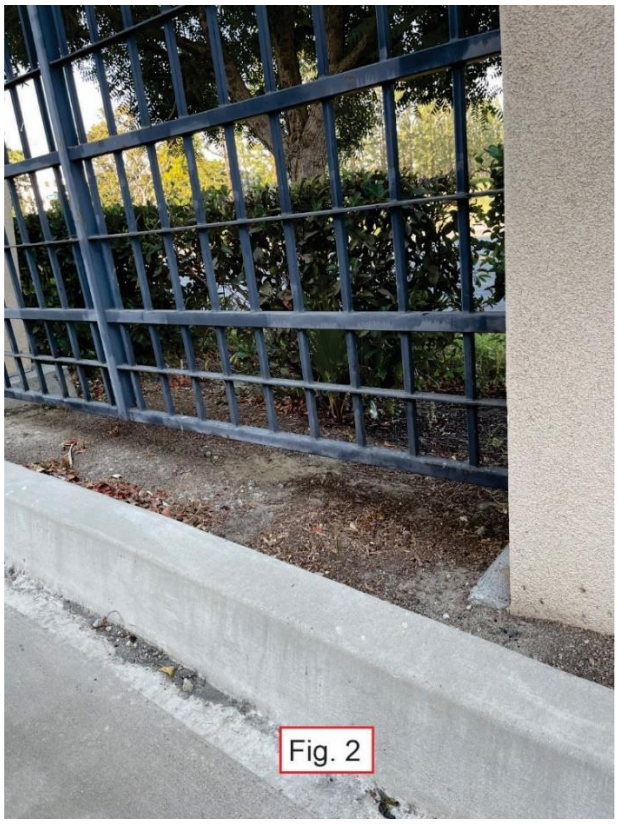


Well 49, Reservoir 925-1A, CDA Booster 1, 2, 3 (ID-20)



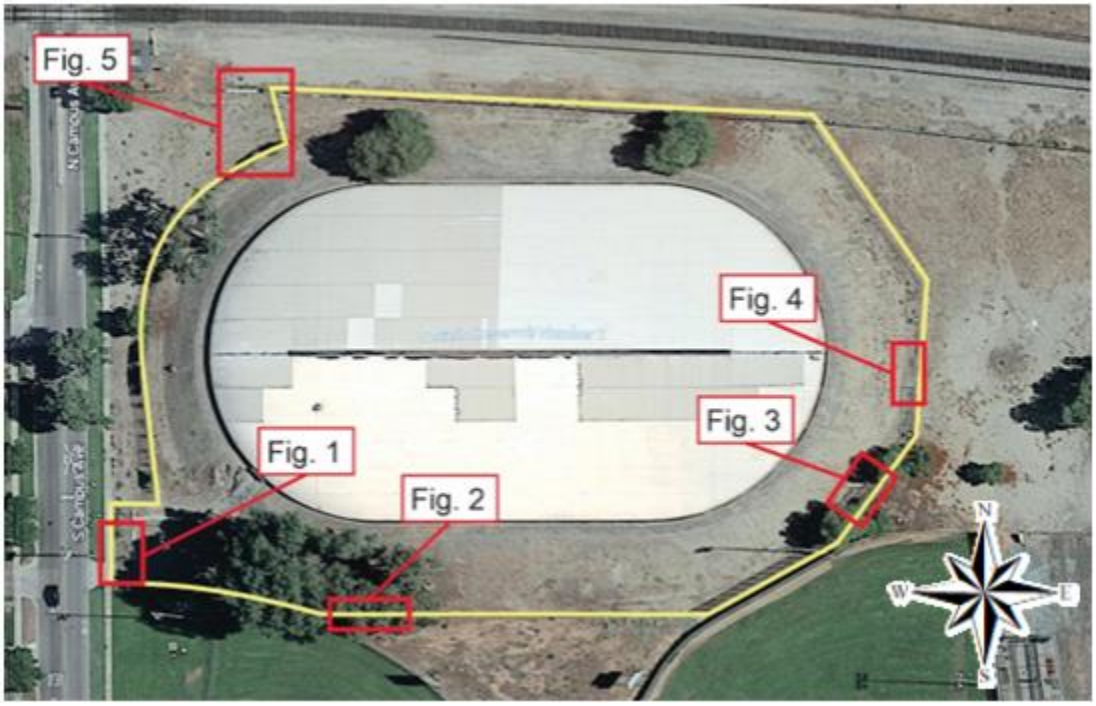
Address: 1340 S Dupont Ave, Ontario, CA 91761

Recommended Improvements:

1. Construct 8 feet wrought iron fence or 8 feet masonry block wall. This will replace the chain link fence and ineffective fence design.
2. Improvements to the lighting and the addition of security cameras to the facility will help reduce potential intrusions.

Well 52 (ID-21)

Address: 1270 E 4th St, Ontario, CA 91764

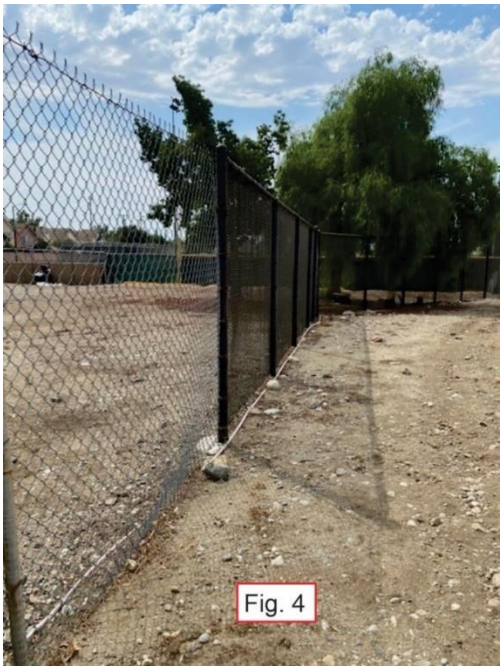


Recommended Improvements:

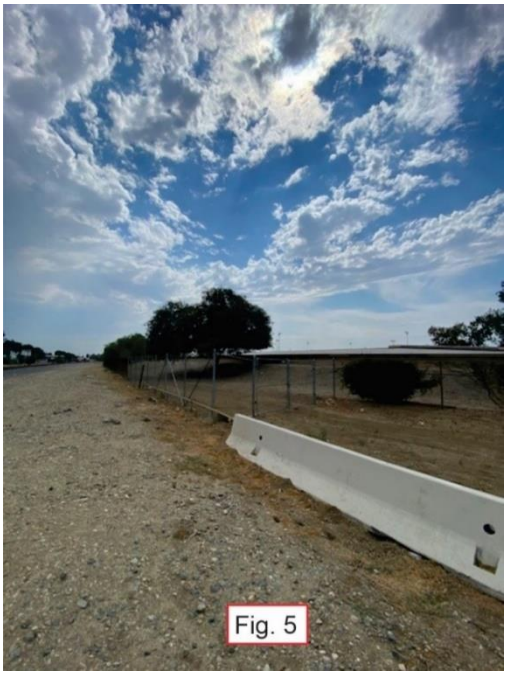
1. Currently Well 52 does not have any fenced structure around the facility. Construction of 8 feet wrought iron fence would limit the exposure of the facility to intrusions.
2. Improvements by the addition of security cameras inside the facility will help increase security provisions.

Reservoir 1212-3A, Booster 1348-3, 4 (ID-22)

Address: 50 N Campus Ave, Upland, CA 91786



Recommended Improvements:



1. Construction of 8 feet wrought iron fence and entrance gate to replace the existing damaged chain linked fence and aged entrance gate. The improved fencing will prevent intrusions.
2. Improvements by addition of perimeter lighting and security cameras to the facility will help reduce potential intrusions.

Fig. 1

Fig. 2

Fig. 3

Reservoir 1212-1A, 1212-1B, WFA 1 (ID-23)

Address: 100 S Fern Ave, Upland, CA 91786

Recommended Improvements:

1. Construction of 8 feet wrought iron fence or an 8 feet masonry block wall will help prevent intruders from trespassing.

2. Improvements to the lighting and the addition of security cameras to the facility will help reduce potential intrusions.

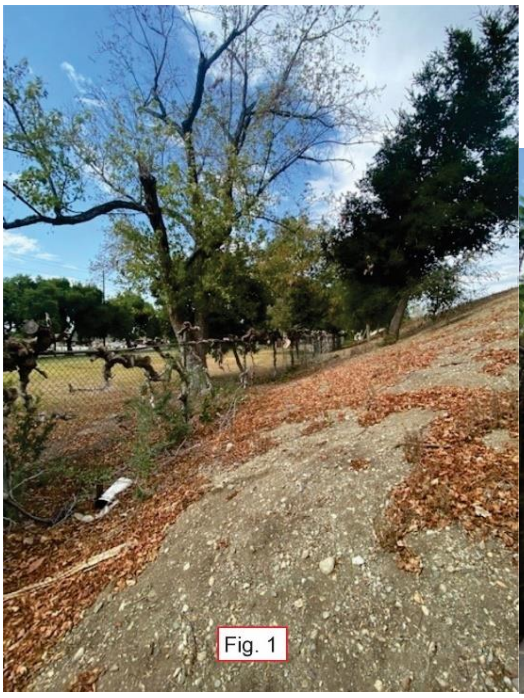


Fig. 1

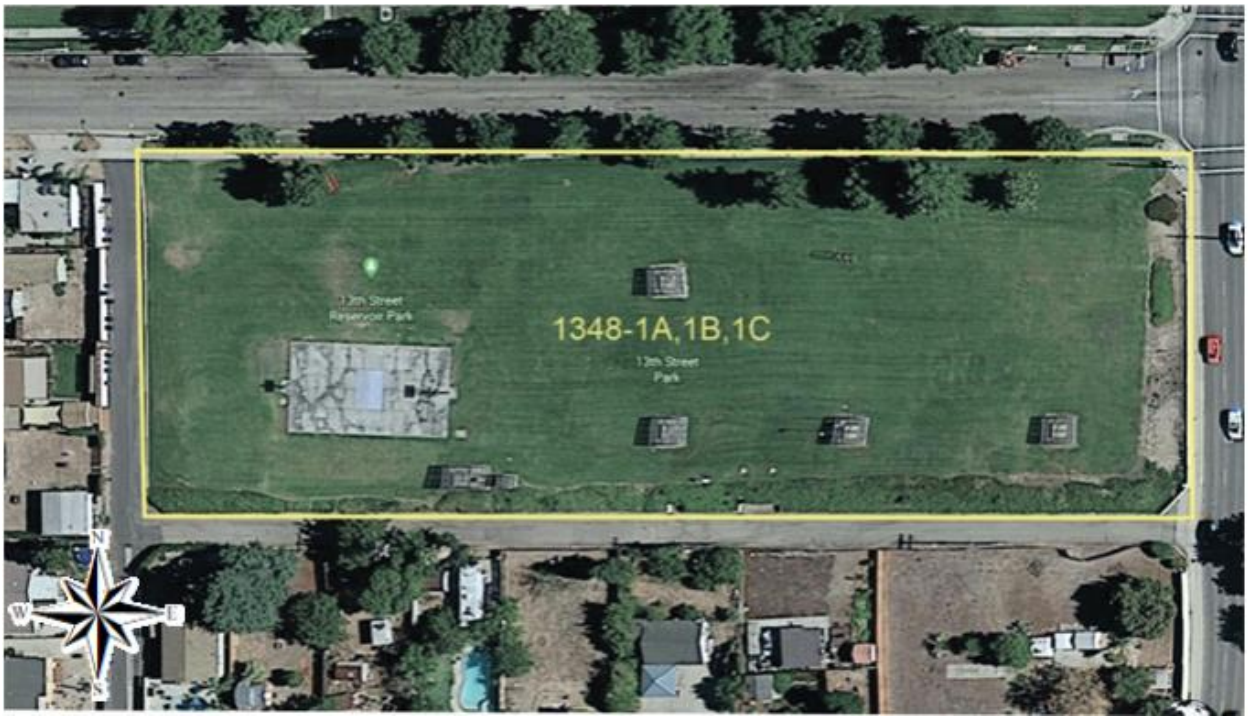

Fig. 2

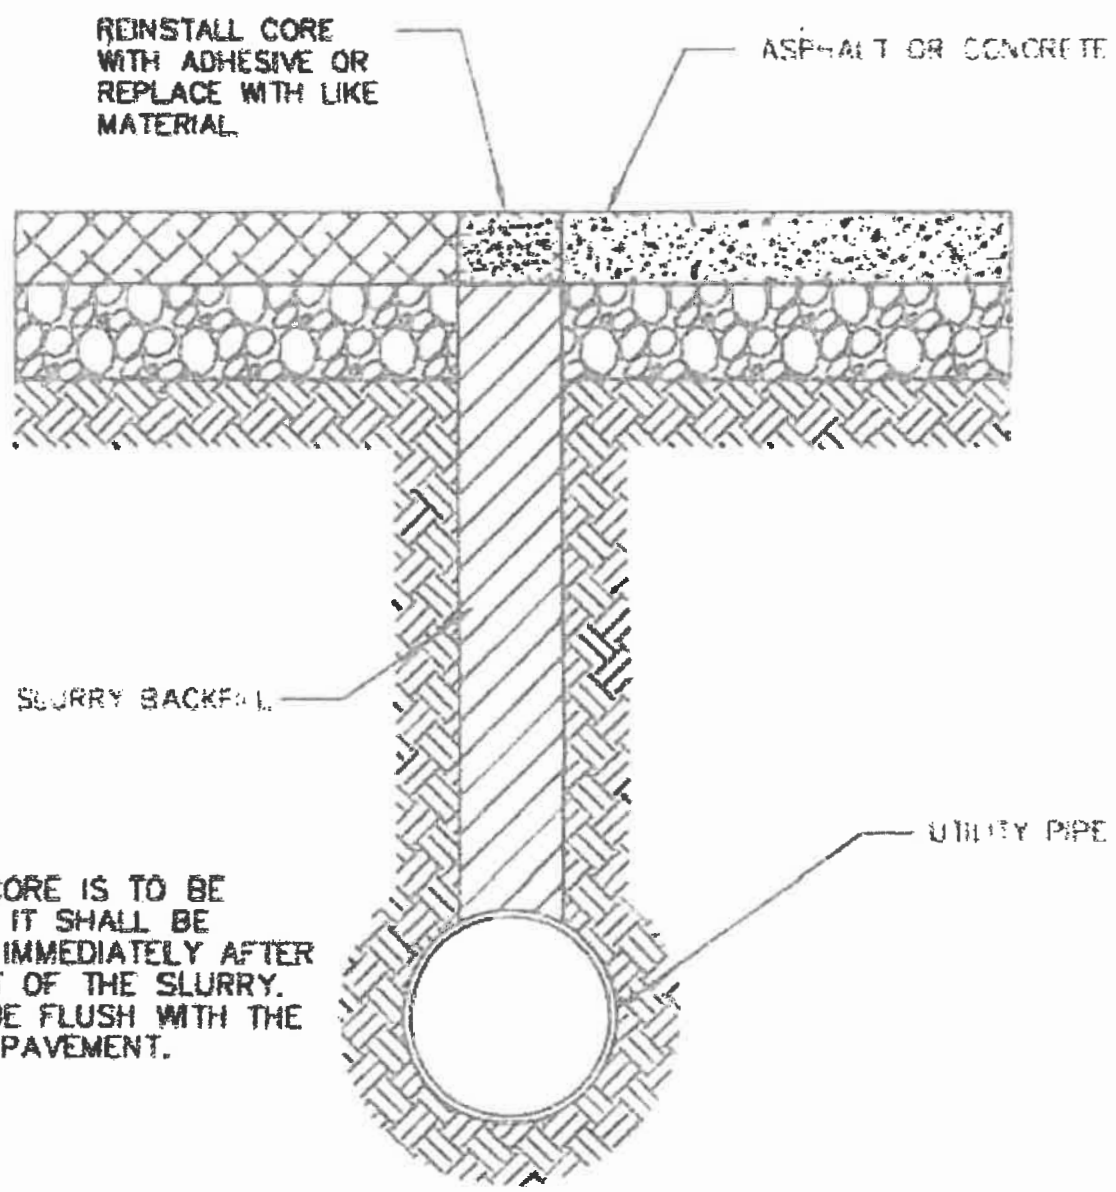
Fig. 3

Fig. 4

Reservoir 1348-1A, 1B, 1C (ID-24)

Address: 596 E 13th St, Upland, CA 91786



Recommended Improvements:

1. Intrusion switches on the reservoir cages would help provide notifications to vandalism of city property.
2. Installation of a tower or pole to connect with the city's SCADA system would help notify the city of vandalism to city property.

8. FEE PROPOSAL

Fee Proposal Narrative: Triad Consulting is pleased to submit the following Fee Proposal to the City of Ontario for *RFP – UT 1073 Site Security Improvements*.

Anticipated Effort: Triad Consulting estimates this project to require approximately 4,800 hours of professional and consultative service. We welcome the opportunity to engage in detailed discussions in regard to the scope of work and anticipated tasks to provide the City with the exact services to meet the project requirements in the most cost-beneficial manner.

Fee: Based on the overall project requirements described in *Exhibit "A" Scope of Services* and in *Section 7. Proposed Methods to Accomplish Work* of this proposal, **Triad Consulting proposes a time & material, not-to-exceed (T&MNTE) of $935,904.00 that includes estimated reimbursable expenses and $83,850.00 additional services, as needed, authorized by the City**.

A Fee Sheet listing costs by phase and labor category is included on the following page of this proposal. Note on the Fee Sheet subcontractor fees totaled $271,480.00. They are $148,080.00 for Topographic Surveys by CAL VADA Surveying, Inc. and $123,400.00 for Geotech Investigations by NOVA Services, Inc.

Estimated Reimbursable Expenses: Triad Consulting will invoice for approved reimbursable expenses at cost. Foreseeable reimbursable expenses for this project include; local mileage (current GSA rates) and deliverable reproduction costs. Actual reimbursable expenses may be lower or higher than estimated.

Progress Invoices and Additional Services (Time and Material): Triad Consulting will bill progress monthly for basic and approved additional services according to the following hourly rates.

PROFESSIONAL FEES	PER HOUR
Principal/Project Manager	$225
Senior Security Consultant	$195
Electrical Engineer	$180
Senior System Engineer	$180
System Technologist	$150
System Designer	$140
Project Coordinator	$125

Triad Consulting does not bill for miscellaneous project administration. Triad Consulting's payment terms at Net 30 days.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Utilities Prepared By: Joline Neal Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 14

SUBJECT: **AN ORDINANCE AMENDING CHAPTERS 8B AND 8C OF TITLE 6 OF THE ONTARIO MUNICIPAL CODE RELATED TO WATER SERVICES AND RECYCLED WATER, AND ESTABLISHING CHAPTERS 8D AND 8E TO TITLE 6 OF THE ONTARIO MUNICIPAL CODE RELATED TO POTABLE WATER FACILITIES AND CROSS-CONNECTION CONTROL**

RECOMMENDATION: That the City Council adopt an Ordinance amending Chapters 8B and 8C of Title 6 of the Ontario Municipal Code related to water services and recycled water, and establishing Chapters 8D and 8E to Title 6 of the Ontario Municipal Code related to potable water facilities and cross-connection control.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: There is not a direct fiscal impact associated with the adoption of this Ordinance. No changes to the schedule of fees and charges are being recommended.

BACKGROUND & ANALYSIS: On March 4, 2025, the City Council introduced and waived further reading of an Ordinance approving Municipal Code amendments to Chapters 8B and 8C of Title 6 of the Ontario Municipal Code related to water services and recycled water, and establishing Chapters 8D and 8E to Title 6 of the Ontario Municipal Code related to potable water facilities and cross-connection control.

On December 19, 2023, the State Water Resources Control Board adopted its Cross-Connection Control Policy Handbook ("CCCPH"), required by Assembly Bills 1671 and 1180. This new regulation repeals previous Title 17 regulations on cross-connection control and backflow prevention. The CCCPH requires drinking water systems to review their cross-connection control programs and implement an enforceable plan to protect drinking water from contaminants or pollutants from related water user activities. Water systems must submit a Cross-Connection Control Plan to the Division of Drinking Water by July 1, 2025, detailing control measures the water system will use to

protect drinking water.

For clarity and transparency, a general reorganization and separation of salient existing and new items is proposed for approval. Chapter 8B of the Municipal Code generally includes account services, criteria for water service design, construction, operations, and management of potable water facilities. Chapter 8C establishes procedures, specifications, and limitations for expansion and continued development, operation of recycled water facilities and systems, and rules and regulations controlling the use of recycled water. The City owns and operates a potable water distribution system with over 40,000 service connections and responsibly delivers high-quality drinking water to over 185,000 Ontario residents. In tandem, the City owns and operates a recycled water distribution system containing over 50 miles of pipelines with over 550 service connections, which supports the City's water conservation efforts by offsetting potable water use. Recycled water is not approved for drinking water consumption and is primarily used for agricultural purposes, landscape irrigation, and commercial and industrial activities.

Staff and Legal reviewed Chapter 8B & 8C to determine if the current language meets the new state requirements and further reviewed language related to the design and construction of potable water facilities.

Staff and Legal have identified the following deficiencies in Chapter 8B & 8C in complying with the new State requirements:

- The current language does not fully align with the new CCCPH requirements.
- Additional enforceable control measures are needed to protect the City's drinking water system from potential cross-contamination, supported by administrative remedies.
- Roles, responsibilities, and control measures for engineering design, construction, inspection, monitoring, operation, and maintenance need to be more clearly defined.
- There is outdated terminology and City processes related to new service connections and the design and construction of potable water facilities.

To align with new requirements, Staff and Legal are proposing the addition of two new chapters to Title 6 of the Municipal Code:

- Chapter 8D: Potable Water Facilities, defines the roles and responsibilities of applicants, developers, contractors, the City, and customers and provides standards and procedures for the design, construction, monitoring, inspection, and management of potable water facilities.
- Chapter 8E: Cross-Connection Control, provides greater protection of the City's drinking water system from contamination by water users. When recycled water systems are present alongside drinking water systems, the City must implement safeguards to prevent cross-contamination.

The changes will enhance legal compliance, incorporate new standards, and ensure uniform application across the City, while improving transparency and accessibility within the Municipal Code.

Proposed changes to Chapters 8B and 8C include:

- Revision for clarification, consistency, and content organization purposes.
- Definition of the customer responsibility for water use and determination of service charges.
- Removal of language related to engineering design, construction, operations, and management of water service facilities to incorporate into the new Chapter 8D.
- Removal of language related to water quality control and incorporate it into the new Chapter 8E.
- Removal of Title 17 (repealed State regulations) language and incorporating new references to Chapter 8E and new State regulations (CCCPH).

Proposed enactment of Chapters 8D and 8E includes:

- Chapter 8D: Potable Water Facilities:
    - Incorporation and update of language from Chapter 8B on the City's current design and construction specifications and standards for potable water facilities to protect water quality.
    - Defining current City processes, roles, and responsibilities for the City, applicant, developer, contractor, and customer.
- Chapter 8E: Cross-Connection Control:
    - Establishes a Cross-Connection Control Program, the need for the designation of a coordinator, and the City's requirement to safeguard drinking water supplies from contaminants or pollutants from related water user activities.
    - Defines protection types, locations, and control measures for safeguarding drinking water.
    - Establishes the City's right to inspect water user premises, evaluate hazards and contaminants used onsite, and require customers to correct deficiencies with protection needed to prevent contamination.
    - Establishes notification and reporting procedures to test and install devices that protect the City's drinking water system.
    - Establishes enforceable remedies for water users that violate the CCCPH and contaminate the City's drinking water system.

Staff recommends adoption of the proposed changes to Chapters 8B and 8C and enactment of Chapters 8D and 8E to the City's Municipal Code.

ENVIRONMENTAL REVIEW: The Ordinance is exempt from the California Environmental Quality Act ("CEQA") pursuant to Section 15358 (the activity will not result in a direct or reasonably foreseeable indirect physical change in the environment) of the CEQA Guidelines, California Code of Regulations, Title 14, Chapter 3, because it has no potential for resulting in physical change to the environment, directly or indirectly. Moreover, the City Council finds that this Ordinance is also exempt under CEQA pursuant to Guidelines Section 15061(b)(3) (there exists no possibility that the activity will have a significant adverse effect on the environment).

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, AMENDING, REORGANIZING, AND RECODIFYING CHAPTER 8B OF TITLE 6 OF THE ONTARIO MUNICIPAL CODE PERTAINING TO WATER SERVICES, AMENDING AND RECODIFYING CHAPTER 8C OF TITLE 6 OF THE ONTARIO MUNICIPAL CODE PERTAINING TO RECYCLED WATER USE, ENACTING CHAPTER 8D OF TITLE 6 OF THE ONTARIO MUNICIPAL CODE PERTAINING TO POTABLE WATER FACILITIES, AND ENACTING CHAPTER 8E OF TITLE 6 OF THE ONTARIO MUNICIPAL CODE PERTAINING TO CROSS-CONNECTION CONTROL AND FINDING THE ACTION EXEMPT FROM CEQA.

WHEREAS, the City Council finds and declares safe and reliable drinking water is necessary for the City of Ontario's ("City") public health, fire protection, economic development, and the overall quality of life; and

WHEREAS, cross-connections and backflow between non-potable water and/or other liquids, gases, or other substances and the City's potable water supply pose a threat to safety and reliability of its public water system; and

WHEREAS, the State Water Resources Control Board ("State Water Board") adopted its Cross-Connection Control Policy Handbook ("CCCPH") pursuant to Assembly Bill 1671 and Assembly Bill 1180; and

WHEREAS, the CCCPH rendered previous backflow protection and cross-connection control standards inoperative and established new, enforceable standards applicable to the City's public water system; and

WHEREAS, the CCCPH requires the City updates its cross-connection control program and develop a Cross-Connection Control Plan to ensure the protection of the City's potable water supply against actual or potential cross-connections and backflow events; and

WHEREAS, this Ordinance is one legal authority that enables the City to meet CCCPH standards and implement its Cross-Connection Plan; and

WHEREAS, the City hereby determines it necessary to enact its cross-connection control program, as set forth in Chapter 8E of Title 6 of the Municipal Code; and

WHEREAS, City hereby determines it necessary to amend and recodify the rules and regulations for its recycled water service, as set forth in Chapter 8C of Title 6 of the Municipal Code, in order to amend cross-connection provisions to be consistent with the CCCPH and the City's cross-connection program; and

WHEREAS, the City has determined that its existing water ordinance, as set forth in Chapter 8B of Title 6 of the Municipal Code, requires amendment, reorganization, and recodification to consolidate and clarify the rights and responsibilities of the City, applicants, contractors, customers, developers, and property owners concerning water services and potable water facilities.

NOW THEREFORE, THE CITY COUNCIL OF THE CITY OF ONTARIO DOES ORDAIN AS FOLLOWS:

SECTION 1. The recitals above are true and correct and are hereby incorporated herein by this reference.

SECTION 2. Chapter 8B, of Title 6 of the Municipal Code is hereby amended, reorganized, and recodified to read as set forth in Exhibit A attached hereto (new language in underline and deleted language in strikethrough) and by this reference made an operative part of this Ordinance.

SECTION 3. Chapter 8C, of Title 6 of the Municipal Code is hereby amended, reorganized, and recodified to read as set forth in Exhibit B attached hereto (new language in underline and deleted language in strikethrough) and by this reference made an operative part of this Ordinance.

SECTION 4. Chapter 8D, of Title 6 of the Municipal Code is hereby enacted to read as set forth in Exhibit C attached hereto and by this reference made an operative part of this Ordinance.

SECTION 5. Chapter 8E, of Title 6 of the Municipal Code is hereby enacted to read as set forth in Exhibit D attached hereto and by this reference made an operative part of this Ordinance.

SECTION 6. If any section, subsection, subdivision, sentence, clause, or phrase in this Ordinance or any part thereof is for any reason held to be unconstitutional, invalid or ineffective by any court of competent jurisdiction, such decision shall not affect the validity or effectiveness of the remaining portions of this ordinance or any part thereof. The City Council hereby declares that it would have adopted each section irrespective of the fact that any one or more subsections, subdivisions, sentences, clauses, or phrases be declared unconstitutional, invalid or ineffective.

SECTION 7. This Ordinance shall become effective immediately after its adoption by the City Council.

SECTION 8. The City Council finds that adoption of this Ordinance is exempt from the California Environmental Quality Act ("CEQA") pursuant to Section 15358 (the activity will not result in a direct or reasonably foreseeable indirect physical change in the environment) of the CEQA Guidelines, California Code of Regulations, Title 14, Chapter 3, because it has no potential for resulting in physical change to the environment, directly or indirectly. Moreover, the City Council finds that this Ordinance is also exempt under

CEQA pursuant to Guidelines Section 15061(b)(3) (there exists no possibility that the activity will have a significant adverse effect on the environment).

SECTION 9. The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within fifteen (15) days of the adoption. The City Clerk shall post a certified copy of this Ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this 18th day of March 2025.

Sec. 6-8.45. Definitions.

For the purposes of this chapter, unless otherwise apparent from context, certain words and phrases used in this chapter shall have the meanings hereinafter designated. The definitions in this chapter are included for reference purposes only and are not intended to narrow the scope of definitions set forth in federal or state laws or regulations. Words used in this chapter in the singular may include the plural and the plural may include the singular. Use of the masculine shall also mean feminine and neuter.

(a) “City” means the City of Ontario, California.

(b) “City Council” means the City Council of the City of Ontario, California.

(c) “City Manager” means the City Manager of the City of Ontario, or his or her authorized representative.

(d) “Construction water” means the water, potable or recycled, used in conjunction with the building of a structure from conception to transfer of ownership, excluding landscape irrigation, or the water used for soil consolidation, dust control, and the like, during grading operations.

(e) “Cost” means the monetary value of labor, material, material transportation, supervision, engineering, administration, and other necessary overhead expenses.

(f) “Customer” means a person, firm, or corporation who is the recipient of water service from the City.

(g) “Developer” means a person, firm, corporation, partnership, or association who desires water service which requires the installation of new, improved or expanded water service facilities for him or herself or for others, except that employees and consultants of such persons or entities, acting in such capacity, are not developers.

(h) “Municipal Utilities Company” means the Municipal Utilities Company of the City of Ontario.

(i) "Service" or "water service" means the furnishing of water to a customer.

(j) “Service connection” shall mean the water pipe, or pipes, and appurtenances installed by a developer to transport potable water from adjoining City facilities located within a public right-of-way or public utility easement to the developer’s parcel of land. Said service connections shall terminate at the customer side of the meter and meter box located at a specified place approved by the City.

(k) “Utilities Customer Services Department” means the Utilities Customer Services Department of the Municipal Utilities Company.

(l) “Utilities Customer Services Director” means the Director of the Utilities Customer Services Department of the Municipal Utilities Company, or his or her authorized representative.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 2, Ord. 2914, eff. January 1, 2010, and § 2, Ord. 2946, eff. January 6, 2012, § 3, Ord. 3251, eff. July 20, 2023, § 2 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.46. Rules and regulations.

Rules and regulations explaining the procedures and methods of the Municipal Utilities Company in carrying out the provisions of this chapter shall be set forth and may be amended in the manner described in § 1-1.09 of this Code.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 3, Ord. 2946, eff. January 6, 2012, § 1, Ord. 3153, eff. January 21, 2020)

Sec. 6-8.47. Tampering.

No person except an employee or representative of the City shall at any time and in any manner operate the curb stops or valves or the main gates or valves of the City's water system, or interfere with meters or their connections, street mains, or other parts or facilities of the water system.

(§ 6, Ord. 2785, eff. November 16, 2003)

Sec. 6-8.48. Service connections outside city.

No additional customers outside the City shall be served or connected to the water system of the City, and no additional dwellings or customers shall be connected to existing service connections outside the City; provided, however, the City Council may

by motion approve water service outside the City where the owners of land have signed a covenant running with the land that the land shall be annexed whenever possible, and the City Council finds that such annexation would be in the public interest, and the annexation might reasonably be completed within the foreseeable future. The City Council may, however, provide otherwise by written agreement with any city, county, or other governmental agency.

(§ 6, Ord. 2785, eff. November 16, 2003)

Sec. 6-8.49. Collection and payment.

(a) Unified billing system. The City may use a unified billing system for City-furnished services. The charges for water, refuse, storm water abatement, and wastewater services may be billed on the water bill and collected as one (1) item. Failure to pay the amount due in full for any of the services may result in the discontinuation of water services as provided below.

(b) Utility bill payment. Utility bills shall be due and payable to the Utilities Customer Services Department on the bill date to the customer of record. Any utility bill remaining unpaid eighteen (18) business days after such bill date shall be deemed past due and a late charge and penalties will be applied as set forth in §§ 1-2.06 and 1-2.07 of the Ontario Municipal Code. Should a residential account remain unpaid for a period of sixty (60) calendar days from the past due date, water service to the property may be disconnected for nonpayment after the City provides notice pursuant to the City's administrative policy on discontinuation of residential water service, described in paragraph (c) below. Should a non-residential account remain unpaid from thirty (30) calendar days from the past due date, water service to the property may be disconnected for non-payment after mailed notice to the customer of record at least ten (10) calendar days prior to termination.

Residential water customers may contest or appeal a bill in the manner described in the City's adopted policy for discontinuation of residential water service. Non-residential customers may contest or appeal a bill using the same dispute and appeal procedures described in the policy for discontinuation of residential water service.

(c) Disconnection of Residential Water Service. The City Manager may adopt and amend a written administrative policy on discontinuation of residential water service for nonpayment pursuant to Section 6-8.46, and such policy shall be available on the City's website. Such policy may include, but may not be limited to, supplementary provisions concerning billing procedures, discontinuation of service, notification procedures, restoration of service, procedures to contest or appeal a bill, extensions or other alternative payment arrangements, protections available to qualified low-income customers, procedures for becoming a customer of the City under specified circumstances, and related matters. To the extent a policy adopted pursuant to this section conflicts with any provisions of this chapter, this chapter shall control. Except as expressly provided in this section or the policy, the policy shall not apply to non-residential customers.

(d) Water turn on/off. Once terminated, service shall not be turned on again except upon payment of all amounts due on the utility account, including all late charges and penalties, and the cost of making a service call to turn the water off and/or on. The fee to cover the cost of making a service call to turn the water off and/or on shall be set forth in an ordinance adopted by the City Council. Residential customers who demonstrate a household income below 200 percent of the federal poverty line may be eligible for reduced turn-on fees pursuant to applicable law and as further described in the City's policy on discontinuation of residential water service.

(e) Customer liability. Failure to receive a bill shall not relieve the customer of liability. Any amount due shall be deemed a debt to the City, and is subject to the provisions set forth in §§ 1-2.06 and 1-2.07 of the Municipal Code.

(f) Special bill rate. Special bills, split bills, any other irregular bills, or bills covering irregular billing periods, shall be calculated by the Municipal Utilities Company; provided, however, the adjusted rate so made shall be reasonable in accordance with the rate schedule set forth in this section.

(g) Determination of minimum charges. For the purpose of determining minimum charges as set forth in this section, each separate meter connected to the water system shall be charged on individual readiness-to-serve meter fee and commodity charge.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 4, Ord. 2946, eff. January 6, 2012; § 3, Ord. 3251, eff. July 20, 2023)

Sec. 6-8.50. Disabled person's and Senior Citizen's discount.

(a) Disabled person defined. A “disabled person” for the purposes of this section is an adult who has a mental or physical disability that, in the opinion of a licensed physician, renders him or her incapable of being gainfully employed.

(b) Eligible household. An eligible household for the purpose of this section is a separately billed dwelling unit, which is (1) occupied by a person age sixty-five (65) or older, or by a disabled person, and (2) has annual gross household income at or below 200% of federal poverty level. The City may establish detailed qualifications and requirements for demonstrating annual gross household income in a written administrative policy adopted pursuant to Section 6-8.46.

(c) Applications. Applications for an eligible household discount shall be submitted in writing to the Utilities Customer Services Director. The application shall be on a form provided by the Utilities Customer Services Director, shall be completed to show the information elicited by the form and shall be signed under penalty of perjury by the applicant. When the discount is sought based upon a disabled person, the application shall be accompanied by a physicians certificate stating that the person is a disabled person within the meaning of subsection (a) of this section. The Utilities Customer Services Director shall determine whether a household is an eligible household for the purpose of this section and his or her determination shall be final.

(d) Discount. The charges for water, refuse and wastewater service provided to an eligible household, shall be discounted by an amount approved by the City Council pursuant to an ordinance or resolution. The discount shall be available only to customers with individually metered residential water service. The discount shall be in effect for a one (1) year period, which shall begin as determined by the City Council (e.g. upon approval of an individual application, upon the start of the following fiscal year, etc.). To renew the discount for an additional year, the customer must complete and return a renewal application to the City's Utilities Customer Services Department. A renewal notice shall be mailed to the Customer with the utilities bill at or before the end of each year of eligibility. The discount offered under this subsection is subject to City Council approval through the annual budget process and the availability of funds allocated to fund the discount.

(e) Termination of eligibility. A household shall no longer be an eligible household if the Utilities Customer Services Department does not receive a renewal application, if any of the eligibility criteria set forth in subsection (b) above cease to exist, or if funds to provide the discount are unavailable pursuant to subsection (d).

(§ 6, Ord. 2785, eff. November 16, 2003; § 5, Ord. 3251, eff. July 20, 2023)

Sec. 6-8.51. Service fees and charges.

(a) Residential, non-residential, and private fire service water fees and charges. In addition to other fees, assessments, or charges provided by the Municipal Code or adopted by the City Council, the owner or occupant of any parcel of property for which no other water service fee or charge is provided, and which parcel of property is connected to the water system of the City, shall pay monthly water service fees and charges as established from time to time by resolution of the City Council.

(b) Turning water supply on and off. No charge shall be made for shutting off and turning on water supply when requested by the customer for the closing of an old account or the beginning of a new one. When service has been discontinued due to non-payment of utility bills or for any infraction of the rules, the charges to restore water service shall be as listed above. The customer shall pay these charges, plus the amount of any outstanding bills, before service can be restored.

(c) Construction water. All construction water shall be metered and charged.

(d) Temporary service connection. Temporary service connections shall be subject to the fees and deposits as established from time to time by resolution of the City Council. All water delivered through a temporary service connection shall be metered and charged.

(e) Water meter testing fee. Water meter testing fee shall be based on the actual costs of removal, testing and reinstallation of the meter.

(f) Reserved.

(g) Other water service work. This charge is based on actual time, travel and material cost based on the City's burden of labor and overhead rates in effect at the time service is provided.

(h) Outside City services. For water furnished to any customer outside the City limits, the rates shall be double the rates charged inside the City. The City Council may, however, provide otherwise by written agreement with any city, county, or other governmental agency.

(i) Charges for agricultural use. Charges for usage of recycled water for agricultural service, where the agricultural use provides assignment of water production rights to the City, shall be determined by the Utilities General Manager; provided, however, such charges will be consistent with the most recent rate study and current rates charged by the Chino Basin Watermaster for replenishment assessments.

(j) Charges for unmetered service. Unmetered usage of water and charges for unmetered usage of water shall be authorized by the Utilities General Manager prior to such usage; provided, however, such charges shall be reasonably in accordance with the charges established by resolution adopted by the City Council.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 5, Ord. 2806, eff. January 21, 2005, §§ 4, 5, 6 and 7, Ord. 2816, eff. December 1, 2005, § 2, Ord. 2880, eff. February 4, 2008, § 3, Ord. 2914, eff. January 1, 2010, § 2, Ord. 2974, eff. December 19, 2013, § 5, Ord. 3133, eff. July 5, 2019, § 2 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.52. Water service .

(a) Application for water service. Before water is turned on by the City for any purpose, the customer shall apply for new service, at least one (1) business day before desired date of service, in which he or she guarantees payment of future utility bills for the service requested. The customer applying for service shall be held responsible for said utility bills until the service is discontinued on the next business day after the City is notified to discontinue service. When such notice is not received by the City, the customer shall be required to pay for service until one (1) business day after the City has knowledge that the customer has vacated the premises or otherwise discontinued service. No tenant applying for residential utility services shall be required to pay any charges or penalties on account of non-payment of charges by a previous tenant. The City may require that tenants seeking to establish service provide a written lease or rental agreement along with signed authorization from the landlord or property owner to ensure that the tenant is authorized to occupy the property and initiate utility services; provided, however, that the City will not require that service to tenants be furnished on the account of the landlord or property owner unless the property owner voluntarily agrees to that requirement in writing by completing a consent form provided by the City. The City shall require an applicant for utility services or restoration of services after turn-off for a delinquent bill to make an advance payment equal to twice the estimated monthly bill for water, refuse and wastewater services, provided that no such advance payment shall be less than eighty dollars ($80.00).

(b) Water used without application. A customer taking possession of premises and using water from an active service connection without having applied for utility

services shall be held liable for the water delivered from the date of the last recorded meter reading. If the meter is found inoperative, then the quantity consumed shall be estimated. If proper application for utility services is not made upon notification to do so by the City, and if accumulated bills for services are not paid immediately, the services may be discontinued without further notice.

(c) New service connection. For new, improved or expanded service connection, the customer shall submit an application in accordance with section 6-8.809 and 6-8.810 of Chapter 8D of Title 6 of the Ontario Municipal Code.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by §§ 8 and 9, Ord. 2816, eff. December 1, 2005, § 5, Ord. 2946, eff. January 6, 2012, § 3, Ord. 2974, eff. December 19, 2013, § 2, Ord. 3039, eff. April 3, 2016; § 6, Ord. 3251, eff. July 20, 2023, § 2 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.53 Reserved.

Sec. 6-8.54 Reserved.

Sec. 6-8.55. Water meters.

(a) Accuracy of meter questioned by consumer. When the consumer questions the accuracy of the water meter, the City Manager shall, upon request and payment of the water meter testing fee, cause an official test to be made. Meters are tested by certified testers contracted by the City. The meter shall be tested on variable rates of delivery and, if the average registration is more than three percent (3%) in excess of the actual quantity of water passing through the meter, another meter shall be substituted therefor. The City Manager shall refund to the consumer, in addition to the meter testing fee charged at the rate shown in § 6-8.51(d)(6), the overcharge based upon the reading and billing for the current period preceding the test, unless it can be shown that the error was due to some cause for which the date can be fixed. In the latter case, the overcharge shall be computed back to and not beyond such time.

(b) Non-registering meters. The City may bill the customer for water consumed while the meter was non-registering, but not to exceed a period of two (2) months, at the minimum monthly meter rate, or upon an estimate of the consumption based upon the customer's prior use during the same season of the year, if conditions were similar, or upon an estimate based upon reasonable comparison with the use of other customers during the same period receiving the same class of service under similar circumstances and conditions.

(c) Meter errors. When it is found that error in a meter is due to some cause, the date of which can be fixed, the overcharge or the undercharge shall be computed back to but not beyond such date, not to exceed the current statute of limitations law.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 7, Ord. 2946, eff. January 6, 2012)

Sec. 6-8.56. Fire hydrants.

(a) Purpose of fire hydrants. Fire hydrants are provided for the sole purpose of extinguishing fires, and are to be opened and used only by the Fire Department and Municipal Utilities Company, or such other persons as are specifically authorized by the Municipal Utilities Company. To insure safety of fire hydrants for fire protection, any person or persons authorized by the Municipal Utilities Company to open fire hydrants shall be required to use only an approved spanner wrench, and to replace the caps on outlets when the same are not in use. Failure to meet this requirement shall be sufficient cause to prohibit further use of the hydrants, and the refusal of subsequent authorization for use of the fire hydrants. Damage caused by the failure to comply with the above shall be repaired at the expense of the person(s) authorized.

(b) Unlawful to take water without permit. It is unlawful for any person to take any water from any fire hydrant without a written permit, furnished upon application to the Municipal Utilities Company. Said application shall include a monthly permit fee and deposit equal to the replacement value of meter and backflow valve. Any person taking water from a hydrant without a permit shall be assumed to have taken water in the value of at least One Thousand Dollars ($1,000.00) and shall be charged for said amount.

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 8, Ord. 2946, eff. January 6, 2012)

Sec. 6-8.57 Reserved.

Sec. 6-8.58 Reserved.

Sec. 6-8.59 Reserved.

Sec. 6-8.60. Emergency water regulations.

(a) Unplanned interruption of water supply. In the event of an unplanned interruption of water supply causing a water shortage, the City Manager or his or her designee is authorized to restrict water use and apportion the available supply of water among its customers in the most equitable manner possible to continue service fairly and without discrimination, except that preference shall be given to such service as is essential to the public interest and to the preservation of life and health pursuant to § 6-8.22(b).

(b) Notice of water shortage. A notice of a water shortage shall be published in a daily newspaper of general circulation within the City. Any restrictions on the use of water shall become effective immediately upon such publication pursuant to § 6-8.22(c).

(§ 6, Ord. 2785, eff. November 16, 2003, as amended by § 10, Ord. 2946, eff. January 6, 2012)

Sec. 6-8.61. Violations.

It shall be unlawful for any person to violate any provisions of this chapter, and persons violating said provisions shall be subject to Chapter 2 of Title 1 of the Municipal Code.

(§ 6, Ord. 2785, eff. November 16, 2003)

EXHIBIT B

CHAPTER 8C: RECYCLED WATER USE

Article 1: General Provisions
6-8.701 Authority
6-8.702 Purpose
6-8.703 Goals
6-8.704 Policy
6-8.705 Priority
6-8.706 Administrator
6-8.707 Other applicable rules and codes
6-8.708 Severability

Article 2: Definitions
6-8.709 Definitions

Article 3: Area Served
6-8.710 Service area

Article 4: General Requirements
6-8.711 Determination of recycled water use area
6-8.712 Authorized uses
6-8.713 Conditions of service
6-8.714 Recycled water service application
6-8.715 Recycled water use agreement
6-8.716 Rates, fees, charges and deposits
6-8.717 Construction water service
6-8.718 Size, location and installation of service line
6-8.719 Service connection limitations
6-8.720 Service pressure
6-8.721 Relocation of recycled water service lines

Article 5: Protective Measures
6-8.722 Cross-connections
6-8.723 Other measures
6-8.724 Emergency connection to the recycled water system to the potable water system

Article 6: Facilities Design and Construction
6-8.725 Facilities design
6-8.726 Offsite recycled water facilities
6-8.727 Onsite recycled water facilities
6-8.728 Construction

Article 7: Facilities Operation
6-8.729 Offsite facilities
6-8.730 Onsite facilities
6-8.731 Monitoring and inspection
6-8.732 Maintenance responsibility

6-8.733 Meter testing

Article 8: Enforcement
6-8.734 Illegal connections, diversions, or tampering
6-8.735 Violations and enforcement

Article 1: General Provisions

Sec. 6-8.701. Authority.

Recycled water use is regulated by the California State Water Resources Control Board (State Board) and the Regional Water Quality Control Board, Santa Ana Region (RWQCB). In accordance with waste discharge requirements for water reclamation projects, the RWQCB requires control mechanisms to regulate facilities distributing recycled water. The California Legislature has established a state policy encouraging the use of recycled water (California Water Code, Section 13510). Permission to use recycled water is based on Inland Empire Utilities Agency's ability to treat domestic wastewater in accordance with the Uniform Statewide Recycling Criteria under Title 22, Division 4, Chapter 3 of the California Code of Regulations. These regulations were adopted to ensure proper health protection and specify the treatment degree to meet the needs of the intended applications.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.702. Purpose.

The purpose of this chapter is to establish procedures, specifications, and limitations for the safe use and operation of recycled water facilities and systems within the City's service area, and adopt rules and regulations controlling such use and operation.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.703. Goals.

The goals of this chapter are as follows:

(a) Achieve conservation of potable water supplies by using recycled water for current and future demands. Recycled water uses may include:

(1) Agricultural irrigation.

(2) Commercial uses (including flushing toilets and urinals).

(3) Construction use.

(4) Industrial processes.

(5) Landscape irrigation.

(6) Landscape and/or recreational impoundments.

(7) Wildlife habitat.

(8) Groundwater recharge, as approved by the State Board and RWQCB.

(b) Maintain recycled water quality through a stringent pretreatment program for industrial wastewater.

(c) Prevent direct human consumption of recycled water through:

(1) Adherence to all applicable rules and regulations.

(2) Posting of warning signs by the user.

(3) Cross-connection/backflow prevention program.

(d) Control runoff of recycled water through monitoring of the installation and operation of all recycled water facilities and use areas.

(e) Monitor recycled water quality.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.704. Policy.

(a) It is the policy of the City that recycled water be used for any and all purposes approved by state regulations for recycled water use. Recycled water shall be the primary source of supply for commercial and industrial uses, whenever available and/or feasible. Use of potable water for commercial and industrial uses shall be contrary to City policy, shall not be considered the most beneficial use of a natural resource, and shall be avoided to the maximum extent feasible. If the City determines that recycled water service is feasible under §§ 6-8.710 and 6-8.711, the applicant, owner, or user will be required to use recycled water service.

(1) The people of the State of California have a primary interest in the development of facilities to recycle water containing waste to supplement existing surface and underground water supplies and to assist in meeting the future water requirements of the state (California Water Code, Section 13510). Conservation of all available water resources requires the maximum reuse of recycled water for beneficial uses of water (California Water Code, Section 461). The State of California has declared that use of potable water for non-potable uses may be a waste or an unreasonable use where recycled water is available (California Government Code, Section 65602(e); California Water Code, Section 13550).

(2) It is the policy of the City that recycled water shall be used within the jurisdiction of the City whenever and wherever: 1) there is not an alternative higher or better use for the recycled water; and 2) such use is consistent with legal requirements, preservation of public health, safety and welfare of the public, and protection of the environment.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.705. Priority.

Connection to the City's recycled water system shall be provided on a first-come, first-served basis, as long as infrastructure and recycled water are available.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.706. Administrator.

Except as otherwise provided herein, the City Manager shall administer, implement, and enforce the provisions of this chapter. The City Manager may, at his or her discretion, delegate any or all of these powers and duties.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.707. Other applicable rules and codes.

Other guidelines, rules and regulations, ordinances, and specifications that may be applied by the Administrator to govern the use of recycled water within the City include:

(a) Rules and regulations that deal with backflow prevention, billing, deposits, penalties, delinquencies, and metering for potable water as established in Chapters 8A, 8C, 8D, 8E of Title 6 of the Ontario Municipal Code.

(b) Regional Recycled Water Distribution System Ordinance (Ordinance No. 69, Inland Empire Utilities Agency.)

(c) Water Reclamation (Title 22, Division 4 of the California Code of Regulations.)

(d) State Water Board's Cross-Connection Control Policy Handbook (adopted December 19, 2023.)

(e) Guidelines for Distribution of Non-potable Water (California-Nevada Section AWWA.)

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.708. Severability.

If any section, subsection, sentence, clause or phrase of this chapter establishing rules and regulations for the use of recycled water is for any reason found to be invalid or unconstitutional, such decision shall not affect the remaining portions of this chapter.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Article 2: Definitions

Sec. 6-8.709. Definitions.

The terms used in this chapter shall have the following meanings:

(a) "Agricultural use" shall mean water used for the production of crops and/or livestock. Agricultural uses include, but are not limited to, the growing of field and nursery crops, row crops, trees and vines, and the feeding of fowl and livestock.

(b) "Air gap separation" or "AG" shall mean a physical vertical separation of at least two (2) times the effective pipe diameter between the free-flowing discharge end of

a potable water supply pipeline and the flood level of an open or non-pressurized receiving vessel, and in no case less than one (1) inch.

(c) "Applicant" shall mean any person, group, firm, partnership, corporation, association, or agency that applies for recycled water service.

(d) "Approved use" shall mean an application of recycled water in a manner, and for a purpose, designated in a recycled water use agreement, and in compliance with applicable state and local rules and regulations.

(e) "Approved use area" shall mean a site with well-defined boundaries designated in a recycled water use agreement in compliance with applicable state and local rules and regulations.

(f) "As-built drawings" shall mean the record drawings that show the completed facilities as constructed or modified.

(g) "Auxiliary water supply" shall mean a source of water, other than an approved water supply, that is either used or equipped, or can be equipped, to be used as a water supply and is located on the premises of, or available to, a customer.

(h) "AWWA" shall mean the American Water Works Association.

(i) "City Council" shall mean the City Council of the City of Ontario.

(j) "City Manager" shall mean the chief administrative officer of the City of Ontario or his or her authorized designee.

(k) "Commercial use" shall mean the water used for non-body contact such as toilets, urinals, decorative fountains, decorative indoor and outdoor landscape, and other uses approved by the City.

(l) "Construction water service" shall mean temporary recycled water service obtained from the City for construction purposes on any new facilities or structures.

(m) "Cross-connection" shall mean any actual or potential connection or structural arrangement between a public water system, including a piping system connection to the City’s distribution system and located on the premises of a customer or available to the customer, and any source or distribution system containing liquid, gas, or other substances not from an approved water supply.

(n) "Cross-Connection Control Policy Handbook” or “CCCPH” shall mean the State Water Board’s Cross-Connection Control Policy Handbook, which are standards and principles for California’s Public Water Systems.

(o) "Direct beneficial use" shall mean the use of recycled water, which has been transported from the point of production to the point of use, without an intervening discharge to waters of the state.

(p) "Discharge" shall mean any release or distribution of recycled water to a use area or disposal site/mechanism. Such discharges are subject to approval by the City.

(q) "Divert" shall mean to change the intended course or path of recycled water into or out of the City's recycled water system without the authorization or consent of the

City. Any unpermitted withdrawal of recycled water from the City's facilities is a "diversion".

(r) "IEUA" shall mean the Inland Empire Utilities Agency.

(s) "Industrial use" shall mean the water used for industrial process such as rinsing, washing, cooling, flushing, circulation, or construction; and other uses approved by the City.

(t) "Infiltration rate" shall mean the rate at which water penetrates the soil surface and enters the soil profile.

(u) "Landscape irrigation" shall mean recycled water used for the propagation and maintenance of trees, shrubs, ground cover and turf used for erosion control and aesthetic value, not for resale or profit purposes.

(v) "Letter of approval" shall mean a written formal letter issued by the State Board approving the use of recycled water at a premise.

(w) "Non-potable water" shall mean water that has not been treated for, or is not acceptable for human consumption, in conformance with federal, state and local water standards. Non-potable water includes recycled water.

(x) "Offsite facilities" shall mean all existing or proposed facilities under the control of the IEUA or the City, from the source of supply to the point of connection with the customer's onsite facilities, up to and including the City's recycled water meter and meter box. Such facilities shall include, without limitation, recycled water transmission mains, recycled water pipes and reservoirs, pumping stations, treatment plants and other appurtenances and property.

(y) "Onsite facilities" shall mean all existing or proposed facilities within property under the control of the customer, normally downstream of the City's recycled water meter and meter box.

(z) "Onsite Recycled Water Supervisor" shall mean a qualified person designated by a recycled water user and approved by the City to be responsible for the safe and efficient operation of the user's recycled water system. This person shall be knowledgeable in the operation of the recycled water system and in the application of federal, state and local guidelines, criteria, standards, and rules and regulations governing the use of recycled water.

(aa) "POC" shall mean the point of connection at the recycled water service meter.

(bb) "Ponding" shall mean the retention of recycled water on the ground surface or human-made surface for a period of time following the cessation of an approved recycled water use activity, such that potential hazard to the public health may result, as determined by regulatory agencies.

(cc) "Potable water" shall mean water furnished to the customer which meets applicable local, state and federal drinking water standards.

(dd) "Recycled water" shall mean water, which as a result of treatment of wastewater, is suitable for direct beneficial use or a controlled use that otherwise would not occur. The treatment of wastewater is accomplished in accordance with the Uniform

Statewide Recycling Criteria set forth in Title 22, Division 4 of the California Code of Regulations.

(ee) "Recycled water system" means the publicly owned property involved in the distribution of recycled water within the City and any privately owned onsite facilities, including piping, pumps, reservoir, land, supply lines (main lines), fittings, and equipment related to such elements.

(ff) "Recycled water facilities" shall mean the systems and structures used in the treatment, storage, pumping, transmission and distribution of recycled water.

(gg) "Recycled water use agreement" shall mean an agreement between the user and the City to use recycled water in compliance with all applicable rules and regulations.

(hh) "Regulatory agency" shall mean any public entity legally constituted by federal, state and local statutes to protect health and water quality.

(ii) "Runoff' shall mean the flow of water along natural or human-made surfaces away from the designated use area.

(jj) "RWQCB" shall mean the California Regional Water Quality Control Board, Santa Ana Region.

(kk) "Service" shall mean the delivery of recycled water to a user.

(ll) "Service connection" shall mean City facilities between the City recycled water distribution system and the customer's meter, including, but not limited to, the meter, meter box, valves, and piping equipment.

(mm) "Standard specifications" shall mean the specifications approved by the City for construction of recycled water facilities.

(nn) "State Board" shall mean the California State Water Resources Control Board.

(oo) "Tampering" shall mean the unauthorized entering, breaking, damaging, destroying, uncovering, defacing, rearranging, injuring, altering, or interference with any temporary or permanent structure (including any pipeline), equipment (including any pumps or backflow devices), or appurtenance owned by the City or that is part of the City's recycled water. Any unpermitted connection the City's facilities is "tampering".

(pp) "Unauthorized discharge" shall mean any release of recycled water that violates any applicable federal, state, or local statutes, regulations, chapters, contracts, or other requirements.

(qq) "Uniform Statewide Recycling Criteria" shall mean the criteria for treatment of recycled water established for the protection of public health and codified under Title 22, Division 4, Chapter 3 of the California Code of Regulations.

(rr) "Use area" shall mean the specific area designated to be served with recycled water through onsite recycled water facilities.

(ss) "User" shall mean any person, group, firm, partnership, corporation, association or agency accepting recycled water from the City's recycled water facilities

for use in accordance with this chapter. "Applicant," "owner," or "customer" are terms that are to be considered as users.

(tt) "Windblown spray" shall mean any dispersed, airborne particles of recycled water capable of being transmitted through the air to a location other than that for which the direct application of recycled water is approved.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Article 3: Area Served

Sec. 6-8.710. Service area.

The rules and regulations contained in this chapter apply to recycled water service to lands and/or improvements lying within the legal boundaries of the City, and to properties contiguous to the City under the same ownership as abutting lands within the City or its designated service boundary. Recycled water service shall be provided to a specific service area when related distribution facilities are completed, and service becomes available.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Article 4: General Requirements

Sec. 6-8.711. Determination of recycled water use area.

(a) General.

(1) The City Council may adopt and periodically review the City's Recycled Water Master Plan and recommend where water service should be made with recycled water in place of potable water. The Master Plan shall be in accordance with all of the requirements of the State Board and the RWQCB, and shall encourage recycled water use.

(2) If the City determines recycled water is available, or will be available within five (5) years, the City may request modifications to existing onsite water facilities and require construction of recycled water systems in new developments.

(3) The City Council may enter into agreements with other municipalities and public entities to identify recycled water use service areas within the City and the jurisdiction of each entity.

(4) The City may identify customers who are located within the City's service area, and within an area identified in the City's Recycled Water Master Plan as an area capable of receiving service from the City's recycled water system, and may determine the feasibility of providing recycled water service to identified users.

(5) If the City determines recycled water service is feasible, applicants for new recycled water service must install onsite facilities to accommodate both potable water and recycled water in accordance with this chapter.

(b) Existing potable water service.

(1) The City may make determinations of areas where existing potable water use should be replaced with recycled water use.

(2) The City shall provide notice of the determination to use recycled water to the current customer, explaining the reasons for recycled water use, procedures to facilitate recycled water use, and proposed conditions and schedule for the conversion. Partial or full conversion of existing customers to recycled water use may be mandated to the extent allowed or required by law.

(3) A customer seeking to convert to recycled water service must submit an application for a letter of approval to the City for review, along with any required application fee. The City shall review the application for completeness and contact the customer regarding the potential provision of recycled water service and the City's recycled water use agreement. If the customer does not agree to the terms of the recycled water use agreement, or if the City determines that recycled water is not available for the proposed use, the City may, in its sole and absolute discretion, refuse to provide such service.

(c) New recycled water service.

(1) Upon submittal by applicant of a tentative map, land use permit, other proposed land development/land use, or request for recycled water service, the Administrator shall make preliminary determinations if recycled water service can be provided to the area in question. Based upon such determinations, use of recycled water and construction of recycled water distribution systems or other facilities, and the application for recycled water service, may be required as conditions of approval for any development application, in addition to any other conditions of the new industrial, commercial or residential development.

(2) Upon submittal by applicant of a proposed alteration or remodeling of multifamily, commercial, or industrial structures which substantially increase a facility's area, volume or size, or upon request for recycled water service, the Administrator shall make preliminary determinations if recycled water service can be provided to the area in question. Based upon such determinations, use of recycled water and construction of recycled water distribution systems or other facilities, and the application for such use, may be required as conditions of approval for any application, in addition to other conditions of approval for the alteration or remodel.

(3) The Administrator may require the use of recycled water for approved uses and refuse or otherwise restrict potable water service when recycled water is available and approved for use.

(4) Any recycled water supply assessments or verifications prepared by the City will not entitle the applicant's project to recycled water service, or to any right, priority, or allocation in any supply, capacity, or facility, or affect the City's obligation to provide service to its users or potential future users. In order to receive service, the applicant, owner, or user must meet all of the applicable requirements of this chapter.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 28, Ord. 2816, eff. December 1, 2005 and § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.712. Authorized uses.

(a) Uses of recycled water include only those uses approved by the State Board and consistent with the Uniform Statewide Recycling Criteria under Title 22 of the California Code of Regulations. Each proposed use will be considered for approval by the City on a case-by-case basis, and the City may determine in its discretion whether it is feasible to furnish recycled water for the proposed use. The City's determination of feasibility will be based on the following factors:

(1) Whether recycled water may be furnished for the intended use at a reasonable cost to the user and the City.

(2) Whether recycled water use is in accordance with the standards of treatment and water quality requirements set forth in Title 22, Division 4, Chapter 3, of the California Code of Regulations and all other applicable federal, state, and local laws and regulations.

(3) Whether the use of recycled water can be made in a manner not detrimental to public health.

(b) Prior to approving such uses, the City may, in its discretion, set forth specific requirements as conditions to providing such services and/or require specific approval from the appropriate regulatory agencies. Prior to approval, the user must comply with the requirements established by this chapter and any other requirements imposed by the Inland Empire Utilities Agency, State Board, or any other regulatory agencies that have jurisdiction over such uses.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.713. Conditions of service.

(a) Prior to obtaining recycled water service, the user must enter into a recycled water use agreement with the City. Recycled water use shall be subject to terms and conditions established in the agreement, and in accordance with this chapter and other applicable codes, rules, and regulations. If any of the conditions of service are not satisfied at all times, the recycled water use agreement may be revoked by the Administrator, after which all recycled water service shall cease:

(b) The City shall not be liable for any damage by recycled water or resulting from:

(1) Defective plumbing.

(2) Broken or faulty services or recycled water mains.

(3) Onsite facilities failures.

(4) High or low pressure conditions.

(5) Interruptions of service.

(6) Any inappropriate or illegal use or management practices.

(c) All recycled water will be provided to the user in the conditions and quantity specified in the recycled water use agreement.

(d) Recycled water use will not be subject to the same restrictions as potable water during drought conditions and will be supplied as available.

(e) Recycled water service may be terminated whenever the quality of the recycled water does not comply with the requirements of the regulatory agencies, or at any time the provisions of this chapter, or the conditions specified in the recycled water use agreement, are violated.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.714. Recycled water service application.

(a) An application for a service connection must be made on a form furnished by the City. The applicant shall provide the City with the anticipated recycled water demand (maximum gallons per minute) and shall specify the size of the water meter that is desired; however, the City reserves the right to determine the ultimate size of the service connection and meter. The applicant shall also specify the property to be served. The information supplied by the applicant shall be considered as authoritative and final. If any error in such application shall cause installation of a service connection that is improper, either in size or location, the cost of all changes required shall be borne by the applicant. The steps for obtaining recycled water service are as follows:

(1) The applicant completes and submits a recycled water service application, including existing facility "as-built" drawings or proposed facility plans as appropriate, description of where and how recycled water use is proposed, and any other information pertinent to the use of recycled water as requested by the Administrator.

(2) An engineering report shall be prepared by a qualified engineer registered in California and experienced in the field of wastewater treatment, and submitted to the State Board for approval. The City or Inland Empire Utilities Agency may prepare the report on behalf of the user, provided that the user pays all costs associated with the preparation of the report. The engineering report shall be consistent with State Board guidelines. Pursuant to the Uniform Statewide Recycling Criteria under Title 22 of the California Code of Regulations, the engineering report shall include:

(i) A description of the design of the proposed reclamation system.

(ii) A means for compliance with Title 22 regulations and any other features specified by the State Board.

(iii) A contingency plan which will assure that no untreated or inadequately treated wastewater will be delivered to the use area.

(3) The City shall forward the completed engineering report to the State Board for review and approval.

(4) The user and the City will address any concerns that the State Board may have regarding the engineering report and revise the report accordingly.

(5) Upon the State Board's approval of the engineering report, the user may enter into a recycled water use agreement with the City. The user must enter into the agreement to begin recycled water service and pay any applicable fees.

(6) The Administrator will schedule a start-up test of the onsite recycled water system to ensure that cross-connections do not exist.

(7) Upon the successful completion of the test, the Administrator may authorize recycled water service to begin.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.715. Recycled water use agreement.

Every applicant agreeing to receive recycled water shall sign a recycled water use agreement (to be furnished by the City) and shall be subject to the following conditions:

(a) The applicant shall pay any specified connection fees, service line charges and other charges, and adhere to the requirements prescribed by this chapter and any additional requirements required by other agencies governing recycled water use.

(b) In order to maintain acceptable operating conditions throughout the recycled water system, the Administrator may schedule recycled water use for specific applications. Such scheduling may involve programming deliveries to different users and/or to various portions of a single user's onsite system. Any scheduling shall consider the operating constraints of the affected users.

(c) The Administrator may temporarily terminate recycled water service at any time recycled water produced by the Inland Empire Utilities Agency does not meet the requirements of the regulatory agencies. Recycled water service would, in such case, be restored when the recycled water meets the governing requirements.

(d) At a minimum, the recycled water use agreement shall include the following:

(1) Names and addresses of the owner of the property and user(s) of the recycled water.

(2) A statement that no changes in the proposed system will be undertaken without amending the agreement.

(3) A statement that the applicant recognizes potential penalties for violation of this chapter and any regulatory agencies.

(4) A copy of the State Board approved engineering report.

(5) Specific quantity of recycled water to be used, including estimated average annual use in acre-feet, and the maximum gallons per minutes (GPM) needed at the point of connection (POC) as shown on the plans.

(6) Approved uses.

(7) A statement that the agreement shall be canceled or amended if:

(i) A change of recycled water use occurs.

(ii) A change in the piping system has been implemented without prior approval.

(iii) A violation of these rules and regulations occurs and results in a system turn-off.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.716. Rates, fees, charges and deposits.

(a) All rates and fees regarding recycled water service and their administrative costs shall be established by the City Council and incorporated into Ontario Municipal Code Title 6, Chapter 8B. Any changes in fee and rate schedules shall be automatically adopted into this chapter.

(b) Applicants for recycled water service shall pay their fair share for the construction of facilities needed to deliver recycled water to the applicant's property. All fees and estimated construction costs shall be paid prior to construction; however, the City may reimburse the applicant for a portion of the cost of such facilities as described in subsection (c) of this section.

(c) Under certain circumstances, the City may contribute to the cost of designing and/or constructing the facilities needed to deliver recycled water to an applicant's property. Subject to the availability of funds, the City may:

(1) Reimburse an applicant for costs incurred to install oversized facilities in the public right-of-way.

(2) Elect to participate in or construct pipelines, reservoirs, pumping stations or other facilities, as the City determines necessary, and/or as funds are available.

(3) Elect to fund or construct recycled water facilities, necessary for converting existing customers from potable to recycled water, with customer reimbursement to the City in the form of an increased recycled water rate, not to exceed the potable rate, until such time as reimbursement is complete under the terms of the recycled water use agreement.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 29, Ord. 2816, eff. December 1, 2005, and §

Sec. 6-8.717. Construction water service.

Persons desiring recycled water for construction purposes shall request a temporary water meter for connection to a City recycled water fire hydrant, and shall be subject to the fees and deposits as set forth in this chapter. It shall be the responsibility of the customer to identify the approximate location of the recycled water fire hydrant. The customer shall be responsible for any damage and repair to the meter while in the customer's possession. In the event that a meter is stolen, it will be at the City's sole discretion whether the deposit shall be forfeited. If a replacement meter is requested, a new deposit and application may be required for the replacement meter. All temporary water meters shall be installed by City staff and secured to the desired recycled water fire hydrant with a City-provided locking device. The meter shall remain at the City

approved and designated location until such time as the customer requests it to be moved. The customer can request the meter to be relocated at a maximum number of four (4) times per billing period. Requests for removal or relocation will be accomplished the same working day, provided the request is made to the City prior to 1:00 p.m. of the day of the request. Any request made after 1:00 p.m. may be completed the following business day.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.718. Size, location, and installation of service line.

Recycled water service lines shall be extended by the property owner/developer to a curb line or property line of the customer's property, abutting on a public street, highway, road or City easement in which recycled water mains are installed. The size and location and/or type of recycled water service lines, service connections, meters, backflow protection devices, and any/all other appurtenances are subject to review and approval by the City.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.719. Service connection limitations.

Recycled water service shall be subject to the following conditions:

(a) The City reserves the right to limit the area of land under one (1) ownership to be supplied by one (1) recycled water service connection and recycled water meter.

(b) A recycled water service connection and its corresponding meter shall not be used to supply adjoining property of a different owner, or to supply property of the same owner across a road, street or other public right-of-way.

(c) When a property provided with a recycled water connection and corresponding recycled water meter is subdivided, such connection and meter shall be considered as serving the lot or parcel of land it directly or first enters. Additional recycled water mains and/or recycled water service lines will be required for all subdivided areas in accordance with this chapter.

(d) Private irrigation systems for homeowner's associations and other developments where landscaping around homes and in common areas are served with one (1) recycled water meter, shall not be allowed to cross public roads, easements, or other public rights-of-way without City approval.

(e) All recycled water used on any property where a meter is installed must pass through the meter. Customers shall be held responsible and charged for all recycled water passing through their meters.

(f) Every recycled water service line shall be equipped with an angle curb stop on the inlet side of the meter; such angle curb stop being intended exclusively for the use of the City in controlling the recycled water supply through the recycled water service line. If the curb stop is damaged by the user's use to an extent requiring replacement, such replacement shall be at the user's expense.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.720. Service pressure.

Whenever possible, the recycled water system will operate at a slightly lower pressure than the potable water system. This will cause potable water to flow in the recycled water system in the event of a cross-connection.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 30, Ord. 2816, eff. December 1, 2005, and § 2, Ord. 3197, eff. January 7, 2022)

Sec. 6-8.721. Relocation of recycled water service lines.

Should a recycled water service line installed pursuant to the request of the applicant, owner, or user be of the wrong size, or installed at a wrong location or depth, then the cost of all changes required shall be paid for by the applicant, owner, or user. All recycled water services provided prior to final street improvements will be considered temporary and the costs for all repairs or changes required to be performed by the City must be paid by the applicant, owner, or user.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022)

Article 5: Protective Measures

Sec. 6-8.722. Cross-connections.

Chapter 8E of Title 6 of the Ontario Municipal Code establishes the rules and regulations for the City's active Cross-Connection Control Program ("Program"). Service is conditioned on the users adherence to the Program. The City has designated a Cross-Connection Control Coordinator ("Coordinator") for the Program. When a request for recycled water service is initiated, the applicant must provide sufficient information, including plumbing and building plans, to enable the Administrator, Coordinator, and other regulatory agencies to determine the level of backflow protection required. The proper backflow protection, as determined by the Administrator, Coordinator, and other regulatory agencies, shall then be installed and tested according to Chapter 8E before recycled water service is provided. Users must make their premises open for inspection at all reasonable times in accordance with section 6-8.908 of Chapter 8E.

Any questions or notifications regarding these provisions or the program should be directed to the Coordinator or the Administrator, or his/her designee.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.723. Other measures.

(a) Water meters used for recycled water service shall be tagged or color-coded purple, color Pantone 512 or 522, or otherwise distinguished as such per AWWA standards. These meters shall not be interchanged or used for potable water service after repairs and/or meter testing have been performed.

(b) Where premises contain dual or multiple water systems and piping, the exposed portions of pipelines shall be painted, banded, or marked pursuant to § 6-8.726 at sufficient intervals to distinguish clearly water is safe for drinking purposes and water that is not safe. All outlets intended for drinking purposes shall be plainly marked to indicate that fact.

(c) For residences providing recycled water services, water outlets that serve non-potable water shall be marked with the words "Recycled Water - Do Not Drink".

(d) Periodic inspection by the City of the recycled water facilities will determine if all identifying items are clearly discernable. If not, they shall be immediately replaced, repaired or refurbished as needed, by the user. These items include:

(1) Warning tags.

(2) Painted surfaces.

(3) Warning tape.

(4) Identification tape.

(5) Covers, caps, signs.

(6) Other items that indicate recycled water is being used.

(e) To determine the existence of any cross-connections or backflow conditions into the potable water system, periodic testing by State Board approved methods will be performed by the Administrator and/or other regulatory agencies.

(f) The State and County Health Departments, the Administrator, and the IEUA shall be kept informed by written document of the identity of the person responsible for the user's recycled water system on all premises concerned with these rules and regulations. At each authorized use area, an 'Onsite' Recycled Water Supervisor shall be designated. This supervisor shall be responsible for:

(1) The installation and use of all components of the onsite recycled water system(s).

(2) Prevention of cross-connections.

(3) Change in use of recycled water.

(g) When the recycled water uses or conditions, as determined by the Administrator, Coordinator or other regulatory agencies, represent a clear and immediate hazard to the City's potable and/or recycled water supply that cannot be immediately removed or corrected, the Administrator shall terminate recycled water use. Section 6-8.920 of Chapter 8E establishes the conditions or uses that create a basis for termination.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 31, Ord. 2816, eff. December 1, 2005 and § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.724. Emergency connection to the recycled water system to the potable water system.

If the Administrator determines an emergency exists where all or parts of the recycled water system are unable to provide recycled water, the Administrator may approve an emergency temporary connection to the potable water system. Before such emergency temporary connection is made, the portion without recycled water shall be isolated by an air gap separation from the remainder of the recycled water system. This isolation shall occur at either individual services or on the offsite system, as determined by the Administrator. An approved backflow prevention device shall be installed on the potable

water lines in accordance with this chapter and any and all applicable rules and regulations of the state and local health departments. The recycled water system shall be disinfected in accordance with Title 22 California Code of Regulations and AWWA C651 Standard prior to any use of potable water through the system. Before the emergency temporary connection or connections shall be removed, whether onsite or offsite, the user shall notify the City's Municipal Utilities' Water Quality Programs Division. The emergency temporary connection shall be removed before connection to the recycled water system is re-established. Re-establishment of recycled water service must be inspected and approved by the Administrator prior to resuming delivery of recycled water.

Article 6: Facilities Design and Construction

Sec. 6-8.725. Facilities design.

(a) The design of offsite and onsite recycled water facilities, including the preparation of plans and construction specifications, shall be under the responsibility of an engineer registered in the State of California. The design of customer (onsite) facilities that will use recycled water, and preparations of plans and construction specifications, shall be stamped and signed by a State of California registered landscape architect or civil engineer, unless otherwise approved by the Administrator.

(b) Before the Administrator grants final acceptance of any system using recycled water, as-built drawings of the system shall be provided. The installed system shall be tested in accordance with the City Standard Specifications to ensure that the system is in full compliance with applicable rules and regulations.

(c) All offsite and onsite recycled water facilities shall be designed and constructed according to the requirements, conditions, and standards as adopted in the City Standard Specifications to ensure that the system is in full compliance with this chapter. Recycled water systems, both onsite and offsite, shall be separate and independent of any potable water systems.

(d) Where the premises contain dual or multiple water systems, the exposed portions of pipelines shall be identified at sufficient intervals.

(e) Areas irrigated with recycled water must be kept completely separated from domestic water wells and reservoirs. Recycled water shall not be applied or allowed to migrate to within fifty (50) feet of any well used for domestic supply. No impoundment of recycled water shall be located within one hundred (100) feet of any domestic water well, unless it can be demonstrated that special circumstances justify lesser distances to be acceptable.

(f) Adequate means of notification shall be provided to inform the public, employees and others that recycled water is being used. Conspicuous signs with appropriate wording that can be clearly read should be placed at adequate intervals around the authorized use area.

(1) Golf courses should print messages on score cards in a different color indicating recycled water is being used. Water hazards containing recycled water should be posted with appropriate signs.

(2) Languages in addition to English should be used on signs where appropriate.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.726. Offsite recycled water facilities.

(a) Any offsite recycled water distribution facilities required to serve existing or new developments of the property within the City, as determined by the Administrator, shall be provided by the applicant, owner, or customer at their expense, unless the Administrator determines it is a City benefit to construct these capital facilities.

(b) Plans and specifications for all recycled water distribution facilities shall be submitted to and approved by the Administrator, and other regulatory agencies, in advance of construction.

(c) The City will assume responsibility for providing recycled water service to the point of connection of such development on transfer, to the City, of the title to all offsite recycled water systems and any necessary easements. All easements shall be in a form acceptable to the Administrator, and not subject to outstanding obligations to relocate such facilities or any deeds of trust, except in instances where such is determined by the Administrator to be in the best interest of the City.

(d) The City and the property owner or developer may enter into a reimbursement agreement for the portions of a recycled water system that are required to be oversized with capacity to supply more recycled water than the property owner or developer requires. The determination to enter into a reimbursement agreement, and the specific items that are the subject of reimbursement, will be made by the City.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.7273. Onsite recycled water facilities.

(a) The user or the owner of the property shall be responsible for all costs associated with onsite recycled water facilities.

(b) When City standards and specifications require a higher quality material, equipment, design or construction method than that required by other governing codes, rules and regulations, the City standards and specifications shall take precedence.

(1) In areas where recycled water is not immediately available when the use area is ready for construction, and if the City has determined that recycled water will be supplied in the future, onsite facilities shall be designed to use recycled water. Provisions shall be made to allow for connection to the City's offsite recycled water facilities, when available. In the interim, potable or other suitable water may be supplied to the onsite facilities through an "interim service connection."

(2) Conditions of interim service are:

(i) The City anticipates recycled water will be available to the site within five (5) years of the time interim service is initiated.

(ii) The user or the owner of the property must sign a recycled water use agreement.

(iii) The user or the owner of the property must agree to perform or pay for all work necessary to remove the interim connection and make connections to

the permanent recycled water system at the time the recycled water system is installed.

(iv) An approved backflow prevention device is required on the interim service. The backflow prevention device shall be downstream of the meter and shall be a part of the onsite recycled water facilities.

(v) Future recycled water users will pay for the following:

(A) Cost of constructing and abandoning the interim service and cost of constructing the recycled water service.

(B) Applicable recycled water fees at the time service becomes available.

(C) Applicable interim water rates for the type of water delivered through the interim service.

(vi) When recycled water is available to the site, an inspection of the onsite facilities will be conducted by the Administrator to verify that the facilities are still in compliance with the recycled water use agreement. Recycled water service shall be provided on verification of compliance. If the facilities are not in compliance, the Administrator shall notify the user to make any necessary corrections.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 32, Ord. 2816, eff. December 1, 2005 and § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.728. Construction.

(a) Construction of all new recycled water facilities will follow City standards and specifications and the American Water Works Association Construction Guidelines for Recycled Water Facilities.

(b) Where it is planned that an existing non-recycled water system shall be converted to a recycled water facility, the facilities to be converted to recycled water shall be investigated in detail at the user's expense, to determine the measures required to bring the system into full compliance with this chapter. No existing potable water facilities shall be connected to or incorporated into the recycled water system without City and State Board approvals.

(c) If, due to onsite failure of the recycled water system, the Administrator determines that it is necessary to convert onsite facilities from a recycled water supply to a potable water supply, a comprehensive investigation shall be performed by or for the City.

(1) The facilities to be converted to recycled water use shall be investigated in detail, including review of any record drawings, preparation of required reports, and determinations by the City of measures necessary to bring the system into full compliance with this chapter for recycled water service.

(2) No potable water facilities shall be connected to or incorporated in the recycled water system that have not been approved for recycled water service by the City.

(d) It shall be the responsibility of the user to pay all costs for such conversion. Conversion costs may include, but not be limited to, the following:

(1) Isolation of the recycled water supply. Service shall be removed and plugged at the City main or abandoned in a manner approved by the Administrator.

(2) Installation of approved backflow prevention devices, as determined by the Administrator, on all potable and/or other water meter connections.

(3) Removal of any/all special recycled water quick couplers. The user shall be responsible for replacement with quick couplers approved for potable water systems.

(4) Notification to all onsite personnel involved.

(5) Removal of all warning labels/signs.

(6) Installation of any/all potable water facilities and payment of any associated capacity fees, as established in Title 6, Chapter 8B, of the Ontario Municipal Code.

(7) System flushing, disinfecting, decontamination, and water quality analyses, as required by the City and/or other regulatory agencies.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Article 7: Facilities Operation

Sec. 6-8.729. Offsite facilities.

The City and/or the Inland Empire Utilities Agency shall be responsible for the operation, maintenance and surveillance of all offsite recycled water systems. This includes but is not limited to recycled water pipelines, valves, connections, storage facilities, and other related equipment and property up to and including the meter. Only the City and/or the Inland Empire Utilities Agency personnel and their representatives shall operate, adjust, change, alter, move or relocate any portion of their respective offsite recycled water facilities.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.730. Onsite facilities.

(a) General.

(1) The operation, surveillance, repair, and maintenance of all customer recycled water facilities are the responsibility of the user and his or her designated Onsite Recycled Water Supervisor.

(i) The Onsite Recycled Water Supervisor shall be responsible for the installation, operation, and maintenance of the onsite recycled water system, enforcing applicable requirements of the City's recycled water use agreement, preventing potential hazards related to such system, maintenance of the system

plans in "as-built" form, and distribution of recycled water in accordance with applicable laws and permits held by the City.

(2) The Administrator shall have the right to enter the user's premises to monitor and inspect all onsite recycled water facilities. Where necessary, keys and/or lock combinations shall be issued to the Administrator to provide such access during hours of recycled water system operation.

(b) The Onsite Recycled Water Supervisor shall have the following responsibilities pertaining to operation of onsite facilities:

(1) Ensure that all operations personnel are trained and familiarized with the use of recycled water.

(2) Furnish all operations personnel with maintenance instructions, irrigation schedules, controller charts, and as-built drawings to ensure proper operation in accordance with the onsite facilities design and applicable rules and regulations.

(3) Prepare and submit to the Administrator one (1) reproducible set of as-built drawings.

(4) Notify the Administrator of all updates or proposed changes, modifications, or additions to the onsite facilities and operations for review and approval prior to construction or implementation. All updates and proposed changes shall comply with this chapter, the recycled water use agreement and any other applicable rules and regulations.

(5) Ensure that the operation and maintenance of all recycled water facilities remain in accordance with this chapter, the recycled water use agreement and any other applicable rules and regulations.

(6) Operate and control the system in order to prevent direct human consumption of recycled water and to control and limit runoff. The user or the owner of the property shall be responsible for any and all subsequent uses of the recycled water. Operation and control measures to be utilized in this regard shall include where appropriate, but not limited to:

(i) Minimizing discharge onto areas not under control of the user so as to minimize public contact. Full circle sprinklers shall not be used adjacent to sidewalks, roadways, and property lines in order to confine the discharge to the use area.

(ii) Operating the onsite recycled water facilities during periods of minimal human use of the service area, and allowing a maximum dry-out time before the irrigated area will be used by the public.

(iii) Providing adequate first aid kits on the premises, and promptly treating all cuts and abrasions to prevent infection. If infection is likely, a physician should be consulted.

(iv) Taking any other precautionary measures to minimize direct contact with recycled water. User's employees, residents, and the public should not be subjected to recycled water sprays.

(v) Applying recycled water at a rate that does not exceed the infiltration rate of the soil. Where varying soil types are present, the design and operation of the recycled water facilities shall be compatible with the lowest infiltration rate of the soils present.

(vi) Reporting to the Administrator any/all failures in the recycled water system that cause an unauthorized discharge of recycled water.

(vii) Protecting all drinking fountains located within the approved use area, by location and/or a structure from contact with recycled water to the maximum extent possible. Windblown spray, direct application through irrigation or other approved uses are considered sources of recycled water. Protection shall be by design, construction practice, or system operation.

(viii) Protecting facilities that may be used by the public, including but not limited to, eating surfaces and playground equipment located within the approved use areas, by locating seating and/or structures from contact with recycled water to the maximum extent possible. Windblown spray, direct contact by irrigation application, or other approved uses are considered sources of recycled water. Protection shall be by design, construction practice, or system operation.

(c) The user shall enforce the following prohibitions:

(1) Cross-connections, as defined by the Cross-Connection Control Policy Handbook , resulting from the use of recycled water or from the physical presence of a recycled water service, whether by design, construction practice, or system operation, are prohibited.

(2) Discharge of recycled water for any purposes, in areas other than those specifically approved in the recycled water use agreement, and without the prior approval of the Administrator, is prohibited.

(3) Use or installation of permanent hose bibs on any customer water system that presently operates or is designed to operate with recycled water is prohibited.

(4) Conditions that directly or indirectly cause recycled water to pond either within or outside of the approved use area, whether by design, construction practice, or system operation are prohibited, unless designed specifically for ponding and approved by Administrator.

(5) Conditions that directly or indirectly cause runoff of recycled water onto areas outside of approved use areas, whether by design, construction practice, or system operation, are prohibited.

(6) Use of recycled water for any purposes other than those specifically approved in the recycled water use agreement, and without the prior approval of the Administrator, is prohibited.

(7) Conditions that directly or indirectly permit windblown spray to pass outside of the approved use area, whether by design, construction practice, or system operation, are prohibited.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.731. Monitoring and inspection.

(a) The Administrator will periodically monitor and inspect the entire recycled distribution facility, including both offsite and onsite facilities. The Administrator will conduct monitoring programs, maintain records as deemed necessary, inspect onsite facilities for compliance with applicable rules and regulations, and provide reports as requested by the State Board. For these purposes, the Administrator will have the right to enter the user's premises during hours of recycled water system operation to inspect onsite recycled water facilities and approved areas of recycled water use, to ensure compliance with this chapter and Chapter 8E, including the requirement that runoff be controlled and limited (§ 6-8.733(b)(6)) and the prohibition of cross-connections between potable water facilities and recycled water facilities (Chapter 8E).

(b) The approved user shall be responsible for providing access to and cooperation with the City's Cross-Connection Control Specialist or designee so that the City's Cross-Connection Control Specialist or designee can perform periodic cross-connection tests, site inspections and backflow prevention device tests. Site inspections shall include pressure testing of the system(s) as well as a visual check of the entire system to verify that no cross-connections or unapproved connections exist. The approved user shall be responsible for correcting any work which violates the City's regulations, at the user's sole expense, including any costs associated with repair and re-testing the backflow prevention device should the backflow prevention device fails to pass the required test.

(c) If the user or owner changes, the City's Cross-Connection Control Coordinator or designee will perform an inspection and test to verify compliance with this chapter and Chapter 8E.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.732. Maintenance responsibility.

(a) The user or owner is responsible for maintaining all onsite facilities that are under the ownership of parties other than the City.

(b) No person shall place, dispose, deposit or permit the placement, disposal, or deposit of oil, toxic, hazardous or contaminated liquid or waste, trash, soil, building materials, or any other substances, objects, or obstructions in, on, or around meter boxes or other City facilities. No person shall allow or permit meter boxes or other City facilities from becoming obstructed or obscured by trees, shrubs, plants or in any other manner so as to impede their use or access or make their location difficult to determine.

(c) If such substances, objects, or obstructions are not cleaned and removed, or are permitted to obscure or impede use or access to such facilities, the City may accomplish the cleaning and removal at the user's expense. The Administrator will provide reasonable notice to the user before assessing the charge.

(§ 1, Ord. 2689, eff. June 17, 1999, as amended by § 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.733. Meter testing.

If a recycled water meter fails to register during any period or is known to register inaccurately, the owner or user shall be charged using a reasonable average daily consumption based on prior consumption or based on other reasonable calculations in the absence of historical consumption data. The City will examine and test the meter through which recycled water is being furnished or determine whether it is correctly registering the amount of recycled water being delivered.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Article 8: Enforcement

Sec. 6-8.734. Illegal connections, diversions, or tampering.

(a) Diversion and tampering are prohibited.

(b) Diversion and tampering are crimes under the California Penal Code and are violations of the Water Code and the Civil Code. Diversion and tampering may be subject to charges and penalties, as well as referral to the District Attorney for criminal prosecution. All charges and penalties shall be applicable and collected in accordance with applicable laws and regulations.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

Sec. 6-8.735. Violations and enforcement.

Nothing in this chapter limits or restricts the City's general authority to enforce noncompliance of applicable rules and regulations. The City retains the right to enforce violations of this chapter in accordance with Chapter 1-5 or in accordance with any other legally authorized process, including but not limited to discontinuing service to any customer that commits a violation, infraction, or otherwise fails to comply with the municipal code, any amendments or additions thereto, and any adopted rules or regulations. Prior to the service disconnection, the City shall provide notice to the customer where a violation, infraction, or otherwise noncompliance results, or is likely to result, in a dangerous or unsanitary condition on the customer's premises, or within the City's water system, and where disconnection of service is necessary to protect the City from fraud, imposition, loss or abuse.

(§ 2, Ord. 3197, eff. January 7, 2022, § 3 Ord. XXX, eff. April XX, 2025)

EXHIBIT C

CHAPTER 8D: POTABLE WATER FACILITIES

Article 1: General Provisions
6-8.800 Purpose and policy
6-8.801 Objectives
6-8.802 Severability

Article 2: Definitions
6-8.803 Definitions

Article 3: General Responsibilities
6-8.804 Applicant and developer responsibilities
6-8.805 Contractor responsibilities
6-8.806 City rights and responsibilities
6-8.807 Customer responsibilities

Article 4: New Service Connection Requirements
6-8.808 Connection fees
6-8.809 New service connection
6-8.810 Application for new service connection
6-8.811 Conditions of service
6-8.812 No entitlement to service

Article 5: Design and Construction
6-8.813 Water system design specifications and guidelines
6-8.814 Street sub-grade
6-8.815 Right-of-way and easements
6-8.816 Potable pipeline location
6-8.817 Fire hydrants
6-8.818 Water service lines
6-8.819 Service connections
6-8.820 Fire service connection
6-8.821 Automated meter reading devices
6-8.822 Backflow prevention assemblies
6-8.823 Service relocation
6-8.824 Temporary service connection

Article 6: Monitoring and Inspection
6-8.825 Inspection
6-8.826 Pressure and leakage testing
6-8.827 Bacteriological sampling and testing
6-8.828 Shutdowns
6-8.829 Title of water facilities

Article 7: Operation and Maintenance
6-8.830 Service connection maintained by Municipal Utilities Company
6-8.831 City right of ingress to and egress from customer’s property

6-8.832 City access
6-8.833 Obstruction of or deposit of material in meter boxes or hydrants
6-8.834 Quick-closing valves(or other devices)
6-8.835 Change in size of connection or meter
6-8.836 Emergency repairs

Article 8: Violations
6-8.837 Violations

Article 1: General Provisions

Sec. 6-8.800. Purpose and policy.

The purpose of this chapter is to set forth requirements and procedures for the design, construction, monitoring, inspection, and maintenance of potable water facilities, and enable the City to comply with all applicable State and Federal laws and regulations.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.801. Objectives.

The objectives of this chapter are:

(a) To establish the City's rights and responsibilities regarding design, construction, inspection, operation, and maintenance of potable water facilities.

(b) To establish roles and responsibilities of applicant, developer, contractor, and customer regarding design, construction, monitoring, inspection, and maintenance of potable water facilities.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.802. Severability.

If any section, subsection, sentence, clause or phrase of this chapter establishing rules and regulations for the use of potable water is for any reason found to be invalid or unconstitutional, such decision shall not affect the remaining portions of this Chapter.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 2: Definitions

Sec. 6-8.803. Definitions.

(a) "Applicant" shall mean any person, firm, corporation, association, or agency who desires to obtain water services from the City.

(b) "Automated meter reading device" shall mean a specified device installed with metered services with new development and replacement meters that transmits meter read information electronically to a remote receiving device.

(c) “Bacteriological test” shall mean a microbiological examination of water samples routinely taken on the public water system and on all newly constructed water facilities prior to City acceptance, to determine if the water from said potable water facilities meets sanitary quality standards for public consumption set by the California State Water Resources Control Board.

(d) “CADD” shall mean Computer Aided Design and Drafting.

(e) “City” shall mean the City of Ontario, California.

(f) “City Council” shall mean the City Council of the City of Ontario, California.

(g) “City Manager” shall mean the City Manager of the City of Ontario, or his or her authorized representative.

(h) “Contractor” shall mean any person who for himself or herself, in conjunction with, or by or through other, agrees to perform and does perform a construction contract and shall include:

(1) Any person required to be licensed under the California Contractors’ State License Law, and any person contracting with the United States to perform a construction contract, whether such persons are formed or organized under the laws of this state, or another state or country; and

(2) Subcontractors and specialty contractors and those engaged in such building trades as defined in the California Code of Regulations, Title 18, Section 1521.

(i) “Customer” shall mean a person, firm, or corporation who is the recipient of water service from the City.

(j) “DDW” shall mean California State Water Resources Control Board’s Division of Drinking Water.

(k) “Design Development Guidelines and Specifications" shall mean the City’s most current published version for potable water system design and criteria.

(l) “Developer” shall mean a person, firm, corporation, partnership, or association who desires water service which requires the installation of new, improved or expanded water service facilities for him or herself or for others, except that employees and consultants of such persons or entities, acting in such capacity, are not developers.

(m) "Domestic service” shall mean the delivery of potable water through an authorized service connection designated primarily for potable and sanitation uses, and other associated uses.

(n) “ELAP” shall mean the California Environmental Laboratory Accreditation Program.

(o) “Engineer” shall mean the City Engineer of the City of Ontario, or his or her authorized representative.

(p) “Fecal coliform” shall mean a subgroup of total coliforms and are associated with human and animal wastes. Escherichia coli is a fecal coliform species.

(q) "Fire service” shall mean the standby and delivery of water through an authorized service connection designated exclusively for fire protection including automatic sprinklers and fire hydrants.

(r) "Greenbook” shall mean the most current published edition of “Greenbook” Standard Specifications for Public Works Construction.

(s) "Heterotrophic plate count” shall mean a procedure for estimating the number of culturable heterotrophic bacteria in water.

(t) "IEUA” shall mean the Inland Empire Utilities Agency.

(u) “Inspector” shall mean the City of Ontario’s Engineering Department’s Public Works Inspector.

(v) “Municipal Utilities Company” shall mean the Municipal Utilities Company of the City of Ontario.

(w) "NPDES” shall mean National Pollutant Discharge Elimination System.

(x) “Operation and maintenance” shall mean the functions required to ensure continuous operations and viability of the City’s infrastructure.

(y) “Service connection” shall mean the water pipe, or pipes, and appurtenances installed by the developer to transport potable water from adjoining City facilities located within a public right-of-way or public utility easement to the developer’s parcel of land. Said service connections shall terminate at the customer side of the meter and meter box located at a specified place approved by the City.

(z) “Standard Drawings” shall mean the City’s Standard Drawings.

(aa) "Subdivision” shall mean the division, by a developer, of any part of portion of a parcel of land, within the service area of the City, into two or more separate parcels or units for sale or lease for residential, commercial, or industrial purposes.

(bb) “Total coliform” shall mean a coliform group consisting of several genera of bacteria that belong to the family Enterobacteriaceae that live in the intestines of warm-blooded animals, such as humans and animals.

(cc) "Transmission facilities” shall mean any designated City facilities, and appurtenances, considered to be the backbone infrastructure that transports large quantities of water within the City to and from the storage facilities and the City treatment/processing plants. Such facilities shall not be used as, nor be deemed to be,

part of the on-site water facilities which are required for the connection and delivery of water service to a customer or developer.

(dd) "Water facilities" shall mean any water mains, service connections, water service lines, meters, and appurtenances used for providing potable water service to any parcels of land or subdivision of said parcels of land, excluding designated transmission facilities.

(ee) "Water Pipeline Construction Specifications" shall mean the City's most current published version for constructing potable water facilities.

(ff) "Water Pipeline Material Specification and Approved List" shall mean the City's most current published version for materials used to construct potable water facilities.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 3: General Responsibilities

Sec. 6-8.804. Applicant and developer responsibilities.

(a) The applicant or developer shall be required to pay all applicable fees based on current rates approved by City Council.

(b) The applicant or developer's responsibilities shall generally include engineering, construction, sanitizing, and testing of water facilities in accordance with this chapter and subject to the Engineer and Inspector's approval. Complete engineering shall be by a registered civil engineer and shall include submission of a full set of detailed improvement plans in electronic form of a scale acceptable to the Engineer, along with appropriate plan check and inspection fees. After all changes, modifications, and additions requested by the Engineer have been made on the improvement plans and have been approved, the applicant or developer shall furnish the Engineer a complete set of electronic improvement plans, which shall become the property of the City. In addition to furnishing the Engineer with a complete set of electronic improvement plans, the applicant or developer shall furnish an electronic file containing necessary data for producing CADD drawings in a format approved by the Engineer.

(c) Any changes in installation from the improvement plans submitted pursuant to subsection (b) shall have prior written approval of the Engineer, and the applicant or developer shall furnish the Engineer a complete set of as-built plans before water service is established and provided. An electronic CADD file shall also be furnished for the as-built plans.

(d) The applicant or developer shall have the required installation, chlorination, and sanitization of newly installed water facilities performed by a contractor that meets the licensing requirements in subsection (a) and (b) of section 6-8.805.

(e) The applicant or developer shall ensure that the contractor installs water facilities in accordance with the City's Design Development Guidelines and

Specifications and Standard Drawings unless otherwise granted in writing by the Engineer.

(f) The applicant or developer shall be responsible for relocating or reinstalling any existing water facilities installed in conflict with plans submitted pursuant to subsection (b) or (c). Relocation of water facilities shall be contingent upon the City approval of the plans, which are to be submitted by applicant or developer in a format as required by the Engineer. Under no circumstances may water facilities be relocated unless authorized by the Engineer in writing.

(g) The applicant or developer is responsible for the abandonment of any existing facilities that, through the plan checking process, are deemed unnecessary or inadequate for usage by the new construction. Any abandonment will be done in accordance with the approved plans in conjunction with the construction of the new facilities or in a manner as directed by the Engineer.

(h) The applicant or developer shall comply with any other requirement set forth in this Chapter.

Sec. 6-8.805. Contractor responsibilities.

(a) The contractor shall possess a State of California Class “A” license issued by the Department of Motor Vehicles and a Class “C-34” or Class “C-12” license issued by the Contractors State License Board for the installation of newly installed systems.

(b) The contractor shall possess a State of California Class “C-36” license issued by the Contractors State License Board for the chlorination and sanitization of newly installed systems.

(c) The contractor shall at all times maintain and insure the integrity of newly constructed facilities, including but not limited to pipeline, appurtenance, and devices, during storage, transportation, and installation. Pipe shall be delivered and stored with factory provided end caps. Failure to maintain the integrity of newly constructed facilities through the demonstration of inspection and testing shall allow the City, at its sole discretion, to have the contractor remove, replace, retest, or reinspect at the contractor’s sole expense.

(d) The contractor shall provide and maintain at all times during construction, ample means and devices with which to promptly remove and dispose of all water entering the excavations or other parts of the work. Ground or sub surface water shall not be allowed to rise around pipe installations until joining compound in the joints has set. The contractor shall dispose of the water and any other materials generated from the work site in a suitable manner without damage to adjacent property. No water shall be drained into work built or under construction. Water and any other materials generated from the work site shall be disposed of in such a manner that conforms to state and federal waste disposal laws.

(e) At all times the contractor will coordinate all work with the City to minimize waterline shutdowns made pursuant to section 6-8.828.

(f) The contractor shall have monitoring performed, in connection with chlorination and sanitization the of newly installed systems, by a current certified California Water Distribution Operator and demonstrate formal training by a certified ELAP laboratory. All charges shall be borne by contractor.

(g) The contractor shall disinfect pipelines, valves, hydrants, service laterals, fittings, tanks, and other surfaces exposed to water in accordance with AWWA C651. Sampling locations shall be in accordance with AWWA C651 and the DDW regulations.

(h) The contractor shall dechlorinate and remove pollutants from water flushed from water mains in accordance with AWWA C655 and discharge requirements specified in the City's Specifications and NPDES permits.

(i) Prior to water service being established, the contractor shall complete and pass the hydrostatic pressure, leakage, and disinfection tests prior to connecting any new line to the existing pipe and mains. All tests shall be completed in the presence of the Inspector for recording.

(j) The contractor shall comply with any other requirement set forth in this chapter.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.806. City rights and responsibilities.

(a) The City is responsible for inspections made pursuant to Article 6 of this chapter.

(b) The City reserves the right to install any water facility which will become the property of the City for maintenance and operation.

(c) The City shall be responsible for the operation and surveillance of all of the City's water facilities, including, but not limited to pipelines, treatment facilities, and appurtenances and property up to and including the City's meter, shall be under the management and control of the City.

(d) No other persons except authorized City employees shall have any right to enter upon, inspect, operate, adjust, change, alter, move, or relocate any portion of the foregoing or any of the City's property. In the event that such should occur, all charges and penalties shall be applicable and collected. Such action shall also be in violation of any and all applicable federal, state, and local statutes, ordinances, regulation, and other requirements.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.807. Customer responsibilities.

(a) Provision of water service includes a right-of-way on the customer's property for the City to gain unobstructed access to the City's water facilities (e.g., water meter box, fire hydrants, air release valves, etc.) at all times.

(b) The customer is obligated to maintain unrestricted and visible access to the customer's property for the safety of City personnel and to protect the City's water facilities.

(c) The customer shall comply with any other requirement set forth in this chapter.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 4: New Service Connection Requirements

Sec. 6-8.808. Connection fees.

Connection fees applicable to all new, improved or expanded service connections will be established from time to time by the City and shall include any fees and/or rates established by IEUA through ordinance.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.809. New service connection.

An applicant shall submit an application for every new, improved or expanded service connection to the Engineering Department. The application shall be accompanied by payment of all appropriate fees. The fee for providing the meter shall include perpetual maintenance.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8. 810. Application for new service connection.

An applicant requesting service connection(s) for a subdivision, commercial, or industrial development shall submit an application to the Engineering Department. The application shall include, but not limited to, the following information:

(a) Name and address of applicant;

(b) Legal description, location of service connection along the frontage of the property to be served;

(c) Two (2) copies of tentative tract map, plot plan, or parcel map;

(d) Meter size of service connection;

(e) Fire flow requirements per Fire Department;

(f) All other required City documents, such as business license;

(g) Purpose for which service shall be used; and

(h) Other information which City may reasonably require.

The information supplied by the applicant the application shall be considered authoritative and final. If any error in such application shall cause installation of a service connection that is improper, either in size or location, the cost of all changes required shall be borne solely by the applicant. Once the application for water service is completed and signed, all appropriate fees and charges are paid, a service connection is installed, a meter is set , and the water is turned on, the charge for water service shall begin. If water service is not required when the service connection is installed, the water meter shall not be installed and the angle curb stop or valve governing the supply will be left shut off and locked. When service is required, the applicant shall contact the City for water service.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8. 811. Conditions of service.

Applicants shall be required to accept and consent to such conditions of pressure and service as are provided by the distribution system at the location of the proposed service connection, and to hold the City harmless for any damages arising out of low pressure, high pressure, fluctuations in pressure, or interruption of service.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.812. No entitlement to service.

Any water supply assessment or verifications prepared by the City will not entitle the applicant's project to water service or to any right, priority, or allocation in any supply, capacity, or facility, or affect the City's obligation to provide service to its customers or potential future customers. In order to receive service, the applicant must meet all of the applicable requirements of this chapter.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 5: Design and Construction

Sec. 6-8.813. Water system design specifications and guidelines.

(a) The water system shall be designed and constructed in accordance with criteria described in the most current City of Ontario "Water Master Plan" and other City published design guidelines, specifications, and standards including but not limited to:

(1) Cross-Connection Control Program, Chapter 8E of Title 6 of the Ontario Municipal Code
(2) Design Development Guidelines and Specifications;
(3) Standard Drawings;
(4) Water Master Plan;
(5) Water Pipeline Construction Specifications; and
(6) Water Pipeline Material Specification and Approved List.

Design elements include but are not limited to system layout and pipeline locations, demand and usage, pipe sizing, valving, pressure regulating facilities, air/vacuum release valves, fire hydrants, blow-off appurtenances, service laterals, corrosivity, and tracer wires.

(b) In addition to subsection (a) and (b), design and construction of the water system shall meet the applicable requirements and specifications described in following documents:

(1) This Chapter;
(2) DDW Waterworks Standards Main Separation, California Code of Regulations Title 22, section 64572;
(3) California Fire Code, as it exists or may be amended, for the purposes of fire hydrant location and frequency;
(4) Greenbook; and
(5) Any other requirement or specification the Engineer deems reasonably necessary to ensure compliance with state and federal laws and the reliability and safety of the City's water system.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.814. Street sub-grade.

If recently installed mains and services are required to be removed, relocated or adjusted to grade as a result of changes requested by the developer or, because of incorrect survey information as to the grade of curbs and street, location of property lines or other utilities, etc., all expenses incurred by making said changes shall be borne solely by the developer. For newly surfaced streets, all trench restoration and resurfacing charges shall be paid by the developer and subject to City street moratorium requirements.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.815. Right-of-way and easements.

Unless otherwise granted in writing by the Engineer:

(a) No public utilities shall be installed in any street or other location not formally dedicated for such use, except by consent of the property owner and the City. Such consent shall be prepared by the developer, reviewed and approved by the Engineer, in an approved easement deed format provided by the City, and recorded in favor of the City.

(b) Within a utility easement, water main separations shall adhere to the California Code of Regulations Section 64572. Additional minimum separations shall be met for each utility and adhere to this chapter.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.816. Potable pipeline location.

Crossing of non-potable lines shall adhere to DDW Waterworks Standards Main Separation requirements as contained in California Code of Regulations Title 22, section 64572. If minimum clearance cannot be achieved, a separation waiver request shall be completed and submitted to the Municipal Utilities Company. The Municipal Utilities Company shall review and if in concurrence, submit the request to DDW for state review and approval pursuant to California Code of Regulations Title 22, section 64511.100.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.817. Fire hydrants.

All fire hydrants shall be installed at a frequency and distance that is consistent with Appendix C and CC of California Fire Code. Fire hydrants shall be installed with a minimum separation of 5-feet from any driveway, street light, power pole, sign, fence, wall, or other development that may obstruct access.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.818. Water service lines.

(a) Service connections shall be installed to the curb or street right-of-way line as determined by the Engineer. The property to be served shall front on or be adjacent to a dedicated public right-of-way wherein the City maintains or can install a standard potable water main.

(b) The developer or applicant shall determine the size of service connections and meters and their location with respect to the boundaries of the premises to be served prior to issuance of building or plumbing permits by the City.

(c) Notwithstanding subsection (b), the City may determine the size of the water service lines, the service connections, and the meters.

(d) The City shall determine type and size of backflow protection devices for potable water service, in accordance with Chapter 8E of Title 6 of the Ontario Municipal Code, and any and all other appurtenances to the service.

(e) The water service line(s) shall be installed to a curb line of the customer's property, or if no curb, to the customer's property line, abutting upon a public street, highway, alley, easement, lane, or road (other than a freeway) in which are installed water mains of the City. Water service line(s) should not be done until the exact location of the service connection has been approved by the Engineer.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.819. Service connections.

Unless otherwise granted in writing by the Engineer:

(a) Each residence and/ building, excepting condominium and townhouse projects under separate ownership shall must be provided with a single and separate service connection and water meter except under special conditions as determined by the City.

(b) Two (2) or more dwellings or buildings under one (1) ownership and on the same lot or parcel of land shall have separate service connections for each dwelling or building. A separate landscape irrigation meter is required for a property under the conditions described in Chapter 7, Chapter 8A, or Chapter 8C of Title 6 of the Ontario Municipal Code.

(c) The customer's pipe which connects to the outlet side of the meter shall not be installed until the service connection is completed. If the applicant or developer's pipe is installed to the outlet side of the meter before the service connection is installed and its location does not correspond with the service connection specified on the application form and improvement plans, then the applicant or developer shall pay the additional cost for completing the service connection from the water main to the outlet side of the meter. The service connection and all equipment appurtenant thereto, including the meter and meter box, shall be the sole property of the City, and no part of the cost thereof shall be refunded to the applicant or developer.

(d) The Engineer reserves the right to limit the number of houses or buildings, such as apartments, or the area of land under one ownership to be supplied by one service connection and water meter.

(e) The Engineer may limit the number of service connections to any residential or other project whether under separate or multiple ownership.

(f) A service connection and water meter must not be used to supply adjoining property of a different owner, or to supply property of the same owner across a street, or alley.

(g) No service connection shall be installed on the public or private side of any service lateral that is intended to service joint or adjacent parcels of land.

(h) When property provided with a service connection and water meter is subdivided, that connection and meter will be considered as serving the lot or parcel of land that it directly or first enters. Additional water mains and/or service lines will be required for all subdivided areas in accordance with this chapter.

(i) Every service connection will be equipped with an angle curb stop, or valve, on the inlet side of the meter; that angle curb stop, or valve, is intended exclusively for the use of the City in controlling the water supply through the water service line. If the angle curb stop, or valve, is for any reason damaged by the customer's use to an extent requiring replacement, the City shall have the right to charge the customer for the cost to replace or repair such angle curb stop, or valve.

(j) The City, at its option, may allow connection to the City's water system by persons outside the City limits. Said connection is at the discretion of the City and may be disconnected upon thirty (30) days' notice.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.820. Fire service connection.

(a) The valve controlling water flow to the service connection shall be closed when a fire service connection is installed and remain so until a written order is received from the owner or lessee of the premises to have the water turned on. After the water is turned on, the City shall not be held liable for damages of any kind whatsoever that may occur on or to the premises serviced as a result of the installation, maintenance, or use of such service connection, or because of fluctuation of pressure, or interruption of supply.

(b) If water is used through a fire service connection for any other purpose than extinguishing of fires or conducting annual testing of the fire system, the City Manager shall have the right to require a meter on the fire service connection at the owner's expense or shut off the entire water supply for such premises. Upon the installation of such a meter, the established water rates then in effect for water services shall apply and be imposed for any water service provided to the property.

(c) The City shall have the right to take a domestic, commercial, or industrial service connection from the fire service connection at the curb to supply the same premises as that to which the fire service connection belongs. The Engineer shall have the right to determine the proportion of the installation costs properly chargeable to each service connection if such segregation of costs becomes necessary. .The established water rates then in effect for water services shall apply and be imposed for any water service provided to the property.

(d) The Engineer shall require the installation on all fire service connections, a backflow prevention assembly device as determined in Chapter 8E of Title 6 of the Ontario Municipal Code.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.821. Automated meter reading devices.

(a) All new developments shall utilize automated meter reading devices as the standard meter for all new metered services. The cost of the installation for these devices shall be paid and borne solely by the applicant or developer at a cost established from time to time by the City. The City reserves the right to make an installation on the basis of actual cost.

(b) The City shall test each meter prior to installation.

(c) The Municipal Utilities Company shall set all meters after acceptance of the installation by the Engineer, and application for service in accordance with Chapter 8B of Title 6 of the Ontario Municipal Code.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.822. Backflow prevention assemblies.

(a) An applicant must provide sufficient information, including plumbing and building plans, to enable the City to determine the level of backflow prevention required. The proper backflow protection, as determined by the City, shall be installed, and inspected before water service is provided.

(b) Backflow protection assemblies shall be installed in accordance with the City's standard drawings and Chapter 8E of Title 6 of the Ontario Municipal Code.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.823. Service relocation.

(a) The City reserves the right to relocate or modify the existing service connection, at any time, upon notification to the consumer.

(b) Whenever service connections, meters, fire hydrants, or other appurtenances are requested to be moved by a customer, the charges for such service relocation shall be borne and solely paid by the customer at the actual cost.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.824. Temporary service connection.

(a) An applicant shall submit an application for temporary service to a property to the Engineer for his or her review and recommendation. Before any temporary service shall be installed, the applicant shall agree to the following:

(1) Pay the cost of the temporary service connection, appropriate deposit, and the cost of all water delivered to the property;

(2) Not to provide water for or to any other property;

(3) Pay appropriate charges for a permanent service connection for the property when a water main is available and the cost, if any, for removal of the temporary service connection; and

(4) All temporary service connections shall be limited to six (6) months unless an extension is granted by the City Manager.

(5) The applicant or contractor shall be held responsible for loss or damage to the meter from the time it is installed until it is removed, or until 48 hours after notice in writing has been given to the City that the contractor or other person is finished using the meter. In the event that a meter is stolen, it will be at the City's sole discretion whether the deposit shall be forfeited. If a replacement meter is requested, a new deposit and application may be required for the replacement meter.

(6) Flows through a 3-inch or larger temporary service fire hydrant meter shall be limited to a maximum of 330 gallons per minute, unless otherwise authorized in writing at the time of application. Any deliberate attempt on the part of the applicant or user to increase the flow is just cause for the City to discontinue service.

(7) The City reserves the right to interrupt service without notice if such usage is causing pressure in the system to drop below an acceptable range.

(8) Each temporary service customer shall make every attempt to maintain a constant flow through the meter. To achieve this requirement, the customer may be required to provide and install a storage facility (construction tank, small interim reservoir, etc.) at the sole expense of the customer, approved by the City, in conjunction with the meter.

(9) When using fire hydrants for temporary service connections, no more than one outlet per hydrant shall be used for this purpose and shall be accompanied by a tested and properly functioning backflow prevention assembly in accordance with Chapter 8E of Title 6 of the Ontario Municipal Code.

(b) Temporary service connections are primarily installed for the convenience and use of Contractors during construction work.

(c) All meters for temporary service connections shall be installed by the City and secured to the desired fire hydrant with a City locking device and lock. These meters shall remain at this location until such time the responsible person requests it to be moved or removed pursuant to section 6-8.223.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 6: Monitoring and Inspection

Sec. 6-8. 825. Inspection.

(a) The City Inspector shall inspect all facilities installed by the contractor to insure compliance with the improvement plans, design specifications and requirements as described in section 6-8.813.

(b) Upon completion of the installation and backfill of newly installed systems, and prior to filling the pipeline with water for the pressure test, the contractor shall notify the City that the pipeline system is ready for video inspection. Said notification shall be made at least three working days in advance of the actual video inspection date. The video inspection will be made by a video inspection company approved by the City shall be made in the presence of the City's Inspector.

(1) The video inspection company shall provide the City with the color DVD or electronic video file and a written report detailing the condition of the interior of the mainline and joints. Subsequent to review of the video file and report by the City, the City will notify the contractor within 3 business days that they may then proceed with the filling, testing, and disinfection of the pipeline; or the City will provide a list of corrective measures that must occur prior to acceptance.

(2) Should remedial activities be necessary, the reconstruction methodology shall be approved by the City prior to commencement of the work. Upon completion of the remedial construction, the contractor shall once again notify the City that the newly installed systems are ready for a video inspection. The City reserves the right to re-video any portions of the water system they determine may have been affected by the reconstruction work activities.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.826. Pressure and leakage testing.

(a) A minimum 4-hour hydrostatic pressure test shall be performed and successfully completed in accordance with AWWA C600 or C605.

(b) The contractor shall apply test pressures at an approved outlet or fitting located within 5 feet vertically of the lowest point of each pipe section to be tested and securely plug such fittings. Where air valves or other suitable outlets are unavailable, the contractor shall provide approved taps and fittings for air release, and securely plug these.

(c) Flushing of mains with water at a velocity of at least 2.5 feet per second over its entire length shall be performed using an eccentric reducer. Velocity through outlets and fittings shall not exceed 25 feet per second during flushing.

(d) Leakage shall be computed as the total quantity of water pumped into the pipeline during the test period, including water added to reach the specified test pressure for the final time. Leakage shall not exceed the rate specified for the type of pipe tested. The contractor shall repeat the testing until the leakage does not exceed the specified leakage rate. The contractor shall repair all visible leaks regardless of the amount of leakage at their sole expense. All tests shall be completed in the presence of the City Inspector who shall record the results.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.827. Bacteriological sampling and testing.

(a) Prior to bacteriological tests, an application for shutdown must be submitted pursuant to section 6-8.828.

(b) Bacteriological tests shall be analyzed by a certified ELAP laboratory with approved fields of testing for said matrix.

(c) Passing bacteriological tests on two (2) consecutive days shall be achieved prior to connecting the pipeline to the existing water system or placing the pipeline into service. Satisfactory bacteriological results shall conform to the following:

(1) No total or fecal coliform.
(2) A heterotrophic plate count less than 200 colony-forming units (CFU) per milliliter (mL).
(3) Presence of chlorine residual at or below a concentration that does not interfere with the bacteriological testing and compromise the results.

(d) If the initial chlorination fails to produce two (2) consecutive days of passing bacteriological tests, chlorination shall be repeated until two (2) consecutive days of passing bacteriological tests are achieved.

(1) If the third attempt fails to obtain two (2) consecutive days of passing bacteriological test, then the City reserves the right, and at the sole expense of the contractor, to have the contractor clean the newly installed pipeline using a high-velocity flow that produces a neutral output discharge or other technology that removes excessive dirt or debris that has entered in the new installation that conforms to water conversation and NPDES requirements.

(e) Laboratory reports shall be furnished upon issuance to the City and shall include, but not be limited to chain of custody, lab work sheet or summary letter imprinted with the laboratory's name, address, and phone number. The report shall specify the field tests, laboratory analysis and results, and shall be signed by the laboratory director. The Engineer may require that laboratory reports be accompanied with any other form or document to ensure compliance with this section.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.828. Shutdowns.

(a) Shutdown of the City's in service potable lines shall be requested through an application. Said application shall be submitted to the City ten (10) working days before the first bacteriological test begins.

(b) Shutdowns are generally performed during Monday through Thursday between 9:00 AM and 4:00 PM, unless granted in writing by the Engineer.

(c) The Inspector shall sign off the application when all bacteriological testing has passed, and results are accepted by the City.

(d) After all bacteriological tests have passed, the contractor or developer shall have ten working days to perform the shutdown. If there is failure to perform the shutdown within the ten working day window, bacteriological testing shall be performed once to insure pipeline sterility has been maintained.

(e) Water will be turned on when pipeline has passed all bacteriological testing. There are no exceptions.

(f) For non-steel pipelines, 16-inches or less, the maximum time allowed is six(6) hours unless granted in writing by the Engineer.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.829. Title of water facilities.

Title to all water facilities, whether installed by the City or a developer, shall be vested in the City upon completion of all work, testing, chlorination, inspection and acceptance for use.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 7: Operation and Maintenance

Sec. 6-8. 830. Service connection maintained by Municipal Utilities Company.

(a) The Municipal Utilities Company shall maintain the service connection extending from the water main to the meter. The applicant shall install and maintain all pipes and fixtures extending or lying on the outlet side of the meter, excluding a City provided shutoff valve, 12-inch brass nipple and coupling. The Municipal Utilities Company shall set and maintain a meter on each service connection and the customer or owner shall be held liable for any damage to the meter due to his or her negligence. Every service connection shall be equipped with an angle curb stop, or valve, on the inlet side of the meter. Such valve or angle curb stop is intended for the exclusive use of the Municipal Utilities Company to control the water supply through a service connection. If the angle curb stop, or valve, is damaged due to the customer or owners use or negligence, the customer or owner shall be liable for replacement costs.

(b) The City assumes no responsibility for the maintenance and operation of a customer's water system beyond the service connection and point of ownership by the City. All plumbing, water piping, fixtures, connections, devices and related appurtenances beyond the service connection, and beyond the City's point of ownership, shall be maintained by the customer in "good standing condition".

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8. 831. City right of ingress to and egress from customer's property.

The City shall have the right of ingress to and egress from the customer's property during reasonable hours for any purpose reasonably related to the furnishing of water services and the exercise of any and all rights secured to it by law or these rules, including inspection of the consumer's customer's piping and equipment for compliance with the Municipal Code and these rules.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8. 832. City access.

A customer shall provide and maintain reasonable access for City representatives to all service connections, meters, back-flow prevention devices, or other facilities pertinent to water service installed on his or her premises.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.833. Obstruction of or deposit of material in meter boxes or hydrants.

(a) No person shall place, dispose, or deposit or permit the placement, disposal or deposit of oil, toxic, hazardous or contaminated liquid or waste, trash, dirt, building materials or other substances, objects or obstructions in, on or around meter boxes, and it shall be the responsibility of each applicant, owner, or customer to prevent meter boxes, City hydrants or other City facilities from becoming obstructed or obscured by such applicant, owner, or customer's trees, shrubs, plants or in any other manner so as to impede their use or access to them or make their location difficult to determine.

(b) The City shall not be held responsible nor liable for any damage or cost for the replacement or repair of any ground cover and/or plants, shrubs, or other obstructions, which may be removed or damaged while City personnel are using the right-of-way or easements.

(c) If such substances, objects or obstructions are not cleaned and removed or are permitted to obscure or impede such facilities, the City may, after providing reasonable notice to the applicant, developer, customer, or owner accomplish the cleaning and removal and charge the applicant, developer, customer, or owner for the cost of doing so.

(d) The applicant, developer, customer, or owner's failure to comply with the clearance and right-of-way obligations set forth in this chapter shall be deemed a violation of the chapter and termination of service.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8. 834. Quick-closing valves(or other devices).

No person shall not install any quick-closing valves or other equipment or device which shall cause excessive pressure surges in the City water system without prior written approval by the Engineer.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.835. Change in size of connection or meter.

Where a change or size increase of an existing service connection or meter is requested by a customer, the charges shall be the same as for a new service and any fees not previously paid shall be required.

(§ 4, Ord. XXX, eff. April XX, 2025)

Sec. 6-8. 836. Emergency repairs.

The City shall not accept any responsibility for the maintenance of pressure and reserves the right to discontinue service while making emergency repairs, and the like. Customers depending upon a continuous supply should provide emergency storage.

(§ 4, Ord. XXX, eff. April XX, 2025)

Article 8: Violations

Sec. 6-8.837. Violations.

It shall be unlawful for any person to violate any provisions of this chapter, and persons violating said provisions shall be subject to any of the following acts:

(a) Denial of an application;

(b) Termination of service; and

(c) Penalties pursuant to Chapter 2 of Title 1 of the Municipal Code.

(§ 4, Ord. XXX, eff. April XX, 2025)

EXHIBIT D

CHAPTER 8E: CROSS-CONNECTION CONTROL

Article 1: General Provisions
6-8.900 Purpose
6-8.901 Applicability
6-8.902 Cross-Connection Control Coordinator
6-8.903 Other applicable rules and regulations
6-8.904 Severability

Article 2: Definitions
6-8.905 Definitions

Article 3: Protection Requirements
6-8.906 Backflow and unauthorized connections prohibited
6-8.907 Backflow installation
6-8.908 Entry and inspection
6-8.909 Backflow prevention assembly type
6-8.910 Where protection is required
6-8.911 Type of protection required

Article 4: Inspection, Testing, Maintenance Requirements
6-8.912 Inspection and testing of protective assemblies
6-8.913 Maintenance of backflow prevention assemblies
6-8.914 Replacement of protective assemblies

Article 5: Notifications
6-8.915 Annual backflow testing notifications
6-8.916 Notice to install
6-8.917 Notice of violation

Article 6: Reporting Requirements
6-8.918 Reporting backflow test results
6-8.919 Reporting of pollution or contamination

Article 7: Administrative Remedies
6-8.920 Water service termination

Article 1: General Provisions

Sec. 6-8.900 Purpose.

(a) The purpose of this chapter is to protect the City's potable water supply against actual or potential cross-connections from private on-site systems by isolating on-premises contamination or pollution that may occur due to undiscovered or unauthorized on-site cross-connections. This chapter is intended to protect the City's distribution system through premises containment and is not intended to provide regulatory measures for protecting users from the hazards of cross-connections within

their own premises. Notwithstanding the provisions in this chapter, the City accepts no responsibility for cross-connections or resulting hazards or contamination.

(b) This chapter is intended to comply with the State Water Board's Cross-Connection Control Policy Handbook and shall be in addition to, and not in lieu of, the controls and requirements of other regulatory agencies, such as local government agencies and local and State Health Departments. To the extent anything in the provisions within this chapter conflict with applicable laws or regulations, as may be amended from time to time, the provisions of such laws or regulations, including the Cross-Connection Control Policy Handbook, shall control.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.901 Applicability.

The requirements imposed by this chapter shall apply to all potable water, irrigation, and fire service connections from the City.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.902 Cross-Connection Control Coordinator.

The City has developed an active Cross-Connection Control Program ("Program") and designated a Cross-Connection Control Coordinator ("Coordinator") for the Program. The Coordinator shall maintain status as a cross-connection control specialist and be responsible for the development of, and the reporting, tracking, and other administrative duties of the Program. The Coordinator, or his/her designee, and the City Manager, or his/her designee, are authorized to administer and enforce this chapter and the Program.

Any questions or notifications regarding these provisions or the program should be directed to the Coordinator or the City Manager, or his/her designee.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.903. Other applicable rules and regulations.

Other guidelines, rules and regulations, ordinances, and specifications that may be applied by the Coordinator and/or the City Manager when administering and enforcing the Program include but are not limited to:

(a) Water Programs (Title 40, Chapter 1, Subchapter D of the Code of Federal Regulations.)

(b) Drinking Water (Division 104, Part 12 of the California Health and Safety Code.)

(c) Environmental Health (Title 22, Division 4 of the California Code of Regulations.)

(d) State Water Board's Cross-Connection Control Policy Handbook (adopted December 19, 2023.)

(e) Manual of Cross-Connection Control, published by the Foundation for Cross-Connection Control and Hydraulic Research, University of Southern California, University Park, Los Angeles, CA. Current Edition.

(f) EPA-570/9-89-007 Cross-Connection Control Manual, prepared by the U.S. Environmental Protection Agency.

(g) Uniform Plumbing Code, published by IAPMO, Current Edition.

(h) Manual M-14, published by AWWA, Current Edition.

(i) Water conservation provisions as established in the Chapter 8A of Title 6 of the Ontario Municipal Code

(j) Water services and fees provisions as established in the Chapter 8B of Title 6 of the Ontario Municipal Code

(k) Recycled water use provisions as established in the Chapter 8C of Title 6 of the Ontario Municipal Code

(l) Design and construction of water facilities provisions as established in Chapter 8D of Title 6 of the Ontario Municipal Code

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.904 Severability.

If any section, subsection, sentence, clause or phrase of this chapter establishing rules and regulations for the use of potable water is for any reason found to be invalid or unconstitutional, such decision shall not affect the remaining portions of this chapter.

(§ 5, Ord. XXX, eff. April XX, 2025)

Article 2: Definitions

Sec. 6-8.905. Definitions.

(a) "Air-gap separation" or "AG" shall mean a physical vertical separation of at least two (2) times the effective pipe diameter between the free-flowing discharge end of a potable water supply pipeline and the flood level of an open or non-pressurized receiving vessel, and in no case less than one (1) inch.

(b) "ANSI" shall mean the American National Standards Institute.

(c) "ANSI ISO 17024 accredited certifying organization" shall mean a State Water Board-recognized organization certifying backflow prevention assembly testers and meets CCCPH testing and performance standards.

(d) “Applicant” shall mean any person, firm, corporation, association, or agency who desires to obtain water, sewer, and/or recycled water service from the City.

(e) "Approved water supply” shall mean a water source that has been approved by the State Water Board for domestic use in a public water system and designated as such in a domestic water supply permit issued pursuant to section 116525 of the California Health and Safety Code.

(f) "Auxiliary water supply” shall mean a source of water, other than an approved water supply, that is either used or equipped, or can be equipped, to be used as a water supply and is located on the premises of, or available to, a customer.

(g) "Backflow” shall mean an undesired or unintended reversal of flow of water and/or other liquids, gases, or other substances into the City’s water potable system.

(h) “Backflow prevention assembly” or “BPA” shall mean a mechanical assembly designed and constructed to prevent backflow, such that while in-line it can be maintained and its ability to prevent backflow, as designed, can be field tested, inspected and evaluated.

(i) “Backflow prevention assembly tester” shall mean a person who is certified by an American National Standards Institute ANSI ISO 17024 accredited certifying organization and holds a valid certification.

(j) “Backsiphonage” shall mean a form of backflow due to a reduction in system pressure, which causes a sub-atmospheric pressure to exist in the water system.

(k) “City” shall mean the City of Ontario, California.

(l) “City Council” shall mean the City Council of the City of Ontario, California.

(m) “City Manager” shall mean the City Manager of the City of Ontario, or his or her authorized representative.

(n) "Contaminants” shall mean any substance that shall impair the quality of water, in such a way as to create an actual hazard to the public health through poisoning, the spread of disease, etc.

(o) "Cross-connection” shall mean any actual or potential connection or structural arrangement between a public water system, including a piping system connection to the City’s distribution system and located on the premises of a customer or available to the customer, and any source or distribution system containing liquid, gas, or other substances not from an approved water supply.

(p) "Cross-Connection Control Policy Handbook” or “CCCPH” shall mean the State Water Board’s Cross-Connection Control Policy Handbook, which are standards and principles for California’s Public Water Systems.

(q) “Customer” shall mean a person, firm, or corporation who is the recipient of water service from the City.

(r) "Degree of Hazard” shall mean either a pollutant (non-health hazard) or contaminant (health hazard); derived from the assessment of the materials, which may come in contact with the City’s distribution system through a cross-connection.

(s) "Distribution system” has the same meaning as defined in section 63750.50 of the California Code of Regulations, Title 22, Division 4, Chapter 2.

(t) "Double check detector backflow prevention assembly” or “DCDA” shall mean a double check valve backflow prevention assembly that includes a bypass with a water meter and double check backflow prevention assembly, with the bypass’s water meter accurately registering flow rates up to two gallons per minute and visually showing a registration for all rates of flow. This type of assembly may only be used to isolate low hazard cross-connections.

(u) “Double check detector backflow prevention assembly – type II” or “DCDA-II” shall mean a double check valve backflow prevention assembly that includes a bypass around the second check, with the bypass having a single check valve and a water meter accurately registering flow rates up to two gallons per minute and visually showing a registration for all rates of flow. This type of assembly may only be used to isolate low hazard cross-connections.

(v) “Double check valve backflow prevention assembly” or “DC” shall mean an assembly consisting of two independently acting internally loaded check valves, with tightly closing shut-off valves located at each end of the assembly (upstream and downstream of the two check valves) and fitted with test cocks that enable accurate field testing of the assembly. This type of assembly may only be used to isolate low hazard cross-connections.

(w) "Fire protection system” shall mean automatic fire sprinkler installations and/or private onsite fire hydrants served with potable water through a separate service connection.

(x) "Hazard Assessment” shall mean an evaluation of an applicant, owner, or customer’s premises designed to evaluate the types and degrees of hazard at a user’s premises.

(y) "High hazard cross-connection” shall mean a cross-connection that poses a threat to the potability or safety of the City’s water supply. Materials entering the City’s water supply through a high hazard cross-connection are contaminants or health hazards.

(z) “Low hazard cross-connection” shall mean a cross-connection that has been found to not pose a threat to the potability or safety of the public water supply but may adversely affect the aesthetic quality of the potable water supply. Materials entering the public water supply through a low hazard cross-connection are pollutants or non-health hazards.

(aa) "ISO" shall mean the International Organization for Standardization.

(bb) "Premises" shall mean the lot, parcel, or property to which potable water is being supplied by the City or for which potable water service has been requested.

(cc) "Premises containment" shall mean protection of the City's distribution system from backflow from a customer's premises through the installation of one or more air-gaps or BPAs, installed as close as practical to the user's service connection, in a manner that isolates the customer's water supply from the City's distribution system.

(dd) "Potable water" shall mean water furnished to the customer which meets applicable local, state and federal drinking water standards.

(ee) "Pollutants" shall mean any substance that impairs the quality of the water to a degree, which does not create a hazard to the public health but which does adversely and unreasonably affect the aesthetic qualities of such waters for domestic use.

(ff) "Readily accessible" shall mean capable of being reached for testing and/or maintenance, without the need of removing any access panel, door, or similar obstruction.

(gg) "Reduced pressure principle backflow prevention assembly" or "RP" shall mean an assembly with two independently acting internally loaded check valves, with a hydraulically operating mechanically independent differential-pressure relief valve located between the check valves and below the upstream check valve. The assembly shall have shut-off valves located upstream and downstream of the two check valves, and test cocks to enable accurate field testing of the assembly.

(hh) "Reduced pressure principle detector backflow prevention assembly" or "RPDA" shall mean a reduced pressure principle backflow prevention assembly that includes a bypass with a water meter and reduced pressure principle backflow prevention assembly, with the bypass' water meter accurately registering flow rates up to two gallons per minute and visually showing a registration for all rates of flow.

(ii) "Reduced pressure principle detector backflow prevention assembly – type II" or "RPDA-II" shall mean a reduced pressure principle backflow prevention assembly that includes a bypass around the second check, with the bypass having a single check valve and a water meter accurately registering flow rates up to two gallons per minute and visually showing a registration for all rates of flow.

(jj) "Service connection" shall mean the terminal end of a service connection from the City's distribution system (i.e., where the City may lose jurisdiction and sanitary control of the water at its point of delivery to the consumer's water system) and the point in a water system where the City's water supply can be protected from backflow using an air-gap or backflow prevention assembly. If a water meter is installed at the end of the service connection, then the service connection shall mean the downstream end of the water meter.

(kk) "State Water Board" shall mean the California State Water Resources Control Board.

(§ 5, Ord. XXX, eff. April XX, 2025)

Article 3: Protection Requirements

Sec. 6-8.906. Backflow and unauthorized connections prohibited.

(a) No person is permitted to cause, permit, facilitate or maintain an actual or potential cross-connection or any type of connection that permits an actual or potential backflow of water to the City's distribution system.

(b) No physical connection shall hereafter exist, or be installed, located, maintained or operated, between the City's distribution system (including its appurtenant mains, pipes, fixtures, equipment or appliances) and any other water supply system or any sewer or drainage system, or any steam, gas or chemical line, pipe or conduit, or any device, boiler tank or container whereby a contamination or pollution or any dangerous, impure, unsanitary or nonpotable substance (solid, liquid, or gaseous or any combination thereof) may now, or hereafter be introduced into any portion of City's distribution system by backflow, backsiphonage, or any other method, manner, means, or cause whatsoever.

(c) It is unlawful for any person to make a permanent or temporary connection onto a backflow prevention assembly for the purpose of bypassing the backflow prevention assembly.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.907. Backflow installation.

(a) No person is permitted to install, maintain, or allow a metered water service connection to any premises served by the City unless the City's distribution system is protected in conformance with applicable State law or regulation (including the Cross-Connection Control Policy Handbook) and this chapter. Any person who is required to install an approved backflow prevention assembly must install, maintain, inspect and test such assembly in accordance with applicable State law or regulation (including the Cross-Connection Control Policy Handbook) and this chapter at the applicant, owner, or customer's own expense and within the time specified for installation. Every backflow prevention assembly required by law, regulation, or this chapter must be of model and size approved by the City. Failure, refusal or inability on the part of the applicant, owner, or customer to install said assembly or assemblies constitutes grounds for discontinuing water service to such metered or non-metered water service connections until such assembly or assemblies have been properly installed.

(b) Backflow prevention assemblies shall be installed on the premises, in accordance with the City's standards, before the first branch line leading off the service and not on the City's portion of the system. Backflow prevention assemblies shall be located as close as practical to the applicant, owner, or customer's service connection,

or at a location approved by the City. Backflow prevention assemblies shall be readily accessible for testing and maintenance and no device shall be submerged at any time.

(c) All backflow prevention assemblies required by this chapter shall be installed in accordance with any and all criteria set forth in Cross-Connection Control Policy Handbook section 3.3.2.

(d) Notwithstanding subsection (a), the City maintains the right to install, test, and maintain a backflow prevention assembly on premises where water service is provided. The cost thereof shall be borne by the applicant, owner, or customer.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.908. Entry and inspection.

All applicant, owner, or customer systems and premises shall be open for inspection at all reasonable times to authorized representatives of the City to enable the City to ascertain the existence of cross-connections or other structural or sanitary hazards, including violations of the cross-connection rules and regulations in this chapter. When such a condition becomes known, the City shall deny or discontinue service to the premises, in accordance with this chapter. Water service will be discontinued until the applicant, owner, or customer has corrected the condition(s) in conformance with State laws and City requirements relating to plumbing and water supplies, and with regulations adopted pursuant thereto.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.909. Backflow prevention assembly type.

Newly installed and replaced backflow prevention assemblies required in this chapter shall be of models approved by the City. Approved backflow prevention assemblies meet one of the following requirements:

(a) Air-gaps (“AG”) shall meet the requirements in Table 1, Minimum Air Gaps for Generally used Plumbing Fixtures, page 4 of the American Society of Mechanical Engineers (ASME) A112.1.2- 2012 (R2017);

(b) Double check valve backflow prevention assemblies (“DC”) and reduced pressure principle backflow prevention assemblies (“RP”) shall be inspected, tested, and approved under the standards established in the Manual of Cross-Connection Control, published by the Foundation for Cross-Connection Control and Hydraulic Research, University of Southern California, University Park, Los Angeles, CA. Current Edition.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.910. Where protection is required.

Backflow protection for the City’s potable water supply shall be provided on each water service connection downstream of the water meter but before the structural dwelling to:

(a) Premises having an auxiliary water supply such as recycled or non-potable water systems;

(b) Premises on which any substance is handled in such fashion that could permit entry into the water system. This shall include the handling of process waters and waters originating from the City's distribution system that have been subject to deterioration in sanitary quality;

(c) Premises where there is any material dangerous to health which is handled in such a fashion as to create an actual or potential hazard. Examples of premises where actual, or potential, health hazards, or conditions will exist include, but are not limited to, the following: sewage treatment plants, sewage pumping stations, chemical manufacturing plants, hospitals, mortuaries, plating works, etc;

(d) Premises that have pressurized equipment installed;

(e) Premises that have landscape where potable water is used to irrigate;

(f) Premises that have fire protection systems installed;

(g) Premises that have internal cross-connections, unless such cross-connections are abated to the satisfaction of the City and approved by the state or local health agency;

(h) Premises having intricate plumbing and piping arrangements or where not all portions of the premises are readily accessible for inspection purposes;

(i) Premises having a repeated history of cross-connections being established or re-established;

(j) Premises being served water through a temporary above ground water service connection;

(k) Premises having a change in customer (either owner or tenant) on any commercial or industrial premise(s) where a backflow prevention assembly is not installed, the new or previous owner or customer shall notify the City immediately. The City will then reassess the level of protection required. Also, any alterations or improvements to existing onsite facilities that may affect the level of protection required must be reported immediately to the City to be evaluated; and,

(l) Premises that meet the definition of high-hazard cross-connection control premise under Appendix D of the Cross-Connection Control Policy Handbook.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.911. Type of protection required.

(a) The type of protection required on potable water services is related to the degree of hazard that exists on the premises as specified in this chapter and Appendix D of the Cross-Connection Control Policy Handbook.

(b) The type of protective device authorized for potable water services is a reduced pressure principle backflow prevention assembly (“RP”). This includes premises that utilize a single potable water service to a dwelling and irrigating landscape.

(c) Premises identified as a high hazard cross-connection control premise shall install a reduced pressure principle backflow prevention assembly (“RP”) or air-gap separation (“AG”), or both. Customers shall comply with any additional requirements or degrees of protection for particular high hazard cross-connections set forth in Appendix D of the Cross-Connection Control Policy Handbook.

(d) Except for low hazard fire protection systems that meet the criteria forth in Cross-Connection Control Policy Handbook section 3.3.2.(e)(3), fire protection systems shall be protected with either double check detector backflow prevention assembly (“DCDA” or “DCDA-type II”) or reduced pressure principle detector backflow prevention assembly (“RPDA” or “RPDA-type II”).

(e) Dedicated service for the sole purpose of irrigating landscape with potable water shall be protected with a reduced pressure principle backflow prevention assembly (“RP”). Pressure vacuum breakers are not allowed to be installed on dedicated irrigation lines.

(§ 5, Ord. XXX, eff. April XX, 2025)

Article 4: Inspection, Testing, and Maintenance Requirements

Sec. 6-8.912. Inspection and testing of protective assemblies.

(a) It shall be the duty and the sole responsibility of the applicant, owner, or customer of any premises on which backflow prevention assemblies are installed to have inspections and testing made at least once a calendar year, or more often in those instances where successive inspections indicate repeated failure. All inspections and testing shall be performed by a certified backflow prevention assembly tester that meets all requirements set forth in the State Water Board’s Cross-Connection Control Policy Handbook.

(b) Backflow prevention assemblies shall also be tested immediately after they are installed, relocated or repaired and shall not be placed in service unless they are functioning as designed.

(c) Whenever a backflow prevention assembly tester observes a backflow incident or an unprotected cross-connection at a backflow prevention assembly or prior to the applicant, owner, or customer’s premises, the backflow prevention assembly tester shall notify the City within twenty-four (24) hours. The City shall immediately discontinue water service to the premises and conduct an investigation. Water service shall not be restored until the City receives confirmation of a passing test.

(d) Premises with air-gap separations shall be visually inspected at least annually to determine compliance with this chapter by a person certified as backflow prevention assembly tester or certified cross-connection control specialist pursuant to the State Water Board's Cross-Connection Control Policy Handbook.

(e) From time to time, representatives of any health agency having jurisdiction and/or the City may conduct evaluations of any premises where water service is provided by the City. The purpose of such evaluations is to determine if any actual or potential cross-connections exist, if there are any unapproved uses, and to assess compliance with applicable laws and regulations. applicant, owner, or customer shall provide reasonable cooperation in facilitating such evaluations.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.913. Maintenance of backflow prevention assemblies

(a) The applicant, owner, or customer shall notify the City any time a backflow prevention assembly is repaired, replaced, or relocated.

(b) A backflow prevention assembly shall be repaired or replaced by, and at the sole expense of the applicant, owner, or customer whenever it is found to not function properly as designed. A backflow prevention assembly that fails a test or inspection pursuant to section 6-8.912 must be repaired or replaced within thirty (30) days of notification of the failure.

(c) Records of all tests and repairs shall be maintained by the applicant, owner, or customer and submitted to the City in accordance with section 6-8.918. The City may request records regarding any backflow prevention assemblies on the premises.

(d) A backflow prevention assembly may be removed for repair or replacement, provided that water service is discontinued until repair or replacement is completed and the assembly is returned to service, or the service connection is equipped with other backflow protection approved by the City. A retest shall be performed immediately following the repair or replacement of the assembly.

(e) A backflow prevention assembly may be relocated following confirmation by the City that the relocation will continue to provide the required protection and satisfy installation requirements. A retest shall be performed immediately following the relocation of the assembly before water service is restored.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.914. Replacement of protective assemblies.

Whenever an existing backflow prevention assembly is to be moved from its present location, or when it requires more than minimum maintenance, or when the City finds that the improper maintenance of the assembly constitutes a hazard to health, the

assembly shall be replaced by the owner with a backflow prevention assembly meeting the requirements of this chapter.

(§ 5, Ord. XXX, eff. April XX, 2025)

Article 5: Notifications

Sec. 6-8.915. Annual backflow testing notifications.

The City will provide annual testing notifications to an owner or customer's premise as follows:

(a) First Notice. The City will notify the owner or customers when routine backflow prevention assembly testing is needed. The notice will include the date when the test shall be completed by forty-five (45) days after the date of the notice.

(b) Second Notice. A second notice shall be sent to each owner or customer that does not have the backflow prevention assembly tested as prescribed in the first notice within the time allowed. The second notice will give the owner or customer a twenty-one (21) day period to have the backflow prevention assembly tested or take other corrective action.

(c) Notice of Non-compliance. If no action is taken within the 21-day period, then a Notice of Non-compliance will be sent to the owner or customer giving the owner or customer a final ten (10) day period to have the assembly tested or take other corrective action.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.916. Notice to install.

The City shall survey its service area and conduct a hazard assessment as required by Chapter 3, Article 2 of the Cross-Connection Control Policy Handbook. The City shall issue a Notice to Install for all premises assessed and determined to require approved backflow prevention assembly. A backflow prevention assembly shall be installed in accordance with this chapter within ninety (90) days from the date of the Notice to Install.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.917. Notice of violation.

It shall be the applicant, owner, or customer's responsibility to ensure backflow prevention assemblies are installed appropriately and demonstrate the assembly is functioning adequately as designed. Failure to install or demonstrate the proper functioning of backflow prevention assemblies by the due date prescribed in section 6-8.915 or 6-8.916, or re-test based on criteria described in section 6-8.913, shall be considered non-compliant with this chapter. A Notice of Violation shall be issued stating the cause of non-compliance with this chapter, when water services will be discontinued, corrective actions the owner or customer shall take to correct the

deficiency or violation, and administrative fees to restore water service as prescribed in Chapter 8B of Title 6 of the Ontario Municipal Code.

(§ 5, Ord. XXX, eff. April XX, 2025)

Article 6: Reporting Requirements

Sec. 6-8.918. Reporting backflow test results.

The City uses a unified cross-connection software system for the management and reporting of backflow prevention assemblies. Test results shall be electronically submitted to the City through an electronic portal by the due date prescribed in Section 6-8.916 or 6-8.917 or when a device has been subjected to the criteria described in Section 6-8.914. Copies of the completed forms shall also be sent to the local health department. The City will maintain records in accordance with Cross-Connection Control Policy Handbook section 3.5.1.

(§ 5, Ord. XXX, eff. April XX, 2025)

Sec. 6-8.919. Reporting of pollution or contamination.

In the event of contamination or pollution of the City's distribution system due to a cross-connection on the premises, the local health officer and City shall be promptly advised by the person responsible for the premise so that appropriate measures may be taken to mitigate the contamination or pollution.

(§ 5, Ord. XXX, eff. April XX, 2025)

Article 7: Administrative Remedies

Sec. 6-8.920. Water service termination.

(a) If the City determines that water uses or conditions encountered represent a clear and immediate hazard to the City's potable water supply that cannot be immediately abated, the City shall institute the procedure for discontinuing water service. Conditions or water uses that create a basis for water service termination shall include, but are not limited to, the following:

(1) Refusal to install a required backflow prevention assembly.
(2) Refusal to test a backflow prevention assembly.
(3) Refusal to repair a faulty backflow prevention assembly.
(4) Refusal to replace a faulty backflow prevention assembly.
(5) Direct or indirect connection between the City's distribution system and a sewer system.
(6) Unprotected direct or indirect connection between the City's distribution system and a system or equipment containing contaminants.
(7) Unprotected direct or indirect connection between the City's distribution system and an auxiliary water system.

(8) A situation which presents an immediate health hazard to the City's distribution system, as determined by the State Water Board, health agency or the City.

(b) For conditions described in §§ 6-8.921(a)(1)-(4), the City will terminate service to an applicant, owner, or customer's premise(s) if no action is taken within the due date provided in the Notice of Non-Compliance as described in §§ 6-8.915(c). A final Notice of Violation shall be provided to the applicant, owner, or customer, prescribing the necessary actions to comply with this chapter, state, and federal regulatory requirements, and administrative penalties to restore water service. (b)Water service will be terminated and remain turned off until the assembly is tested and passes the test or other corrective action is taken and approved by the City in accordance with this chapter. Administrative fees to restore water service shall be paid in advance of the water being turned on.

(c) For conditions described in §§ 6-8.921(a)(5)-(8), the City will make reasonable effort to advise the applicant, owner, or customer of intent to terminate water service. Then, the City will terminate the water service and lock the service valve in the closed position. Water service will not be reinstated until correction of all violations has been approved by the City. Failure to correct the violations may result in permanent termination of water service in accordance with this chapter.

Item No: 15

SUBJECT: AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH WINDSONG PRODUCTIONS, LLC. FOR VIDEO PRODUCTION SERVICES

RECOMMENDATION: That the City Council authorize the City Manager, or his designee, to execute Amendment No. 4 to the Professional Services Agreement with Windsong Productions, LLC., of Fresno, California, for video production services in the amount of $619,544 for a total not-to-exceed amount of $1,727,380 and to extend the term of the agreement to June 30, 2026.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the Growth and Evolution of the City's Economy

FISCAL IMPACT: The Fiscal Year 2024-25 Adopted Budget includes appropriations of $209,896 in Economic Development and $32,945 in the Management Services for video production services from Windsong Productions, LLC. (Windsong). If approved, appropriations will be included in future Annual Budgets to City Council for approval as needed. The recommended Amendment No. 4 increases the total authorized contract amount by $619,544 with a new not-to-exceed total of $1,727,380.

BACKGROUND & ANALYSIS: On November 2, 2021, the City executed a Professional Services Agreement with Windsong for video production services following a competitive Request for Proposals process for a not-to-exceed amount of $235,000. Since then, it was clarified that the $235,000 amount only covered the cost of services for the initial year of the Agreement term (Fiscal Year 2021-22). The vendor was asked to provide cost projections through the end of the Agreement term (Fiscal Year 2023-24). On October 18, 2022, the City Council approved Amendment No. 1 to add the total cost of services for the entire agreement term, bringing the new not-to-exceed amount to $753,312. The City Council approved Amendment No. 2 on February 6, 2024, to expand the scope of services and increase the not-to-exceed amount to $815,047.

Pursuant to the original Agreement, the City has the sole discretion to renew for two additional one-year terms. Amendment No. 3 was approved by the City Council on July 2, 2024, to extend the term for the first additional one-year term and increase the agreement amount by $292,789 to cover the services during Fiscal Year 2024-25, bringing the new not-to-exceed amount to $1,107,836.

Video production services are a critical component of the City's marketing and advertising efforts, allowing the City to create engaging visual content that showcases businesses, projects, and various City initiatives to the public. Windsong's services are utilized for the Made in Ontario series, the annual State of the City video, and other promotional videos highlighting City-hosted events.

To ensure the continuation of these essential services, Amendment No. 4 proposes extending the Agreement for the second additional one-year term through Fiscal Year 2025-26. This amendment includes an increase of $619,544 to cover the additional costs associated with the 2025 State of the City event and ongoing video production services, bringing the new total contract amount to $1,727,380.

This extension will allow the City to maintain high-quality video content that supports its communication and outreach objectives. The continued partnership with Windsong will ensure consistency in production quality and messaging across City platforms. Approval of Amendment No. 4 is recommended to uphold the City's commitment to effective public engagement through professional video production services.

Re: Notice to Extend Agreement with Windsong Productions, LLC., Amendment No. 4

Dear Joann Mercado Hicks,

As you know, the City of Ontario ("City") and Windsong Productions, LLC. ("Consultant") entered into a Professional Services Agreement dated August 18, 2021, Amendment No. 1 dated September 7, 2022, Amendment No. 2 dated February 6, 2024, and Amendment No. 3 dated July 2, 2024 (the "Agreement"). The term of the Agreement is set to expire on August 18, 2025.

Pursuant to the Agreement, the City has the sole discretion to renew the Agreement for two additional one-year terms. Through this letter, the City hereby extends the term of the Agreement the second additional year and increases the dollar value by six hundred nineteen thousand five hundred forty-four dollars ($619,544) for a new total not to exceed the amount of **one million seven hundred twenty-seven thousand three-hundred eighty dollars ($1,727,380**).

The terms and conditions of the Agreement shall remain the same.

If you have any questions, please don't hesitate to contact Karla Tavera at the City.

Sincerely,

Scott Ochoa
City Manager

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Karla Tavera Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 16

SUBJECT: A RESOLUTION OF INTENTION TO RENEW THE GREATER ONTARIO TOURISM MARKETING DISTRICT

RECOMMENDATION: That the City Council adopt a Resolution of Intention to renew the existing Greater Ontario Tourism Marketing Plan.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: There is not a direct fiscal impact associated with this action. Because the Greater Ontario Tourism Marketing District (GOTMD) programs are intended to increase tourism in Ontario, there may be an increase in transient occupancy tax and sales tax collections in the future.

BACKGROUND & ANALYSIS: Greater Ontario Tourism Marketing District (GOTMD) is a benefit assessment district that relies on assessments from lodging establishments in Ontario and Rancho Cucamonga. The dollars generated fund the following activities: Sales & Marketing, Tourism Development & Enhancement, Administration & Advocacy, and Contingency/Renewal efforts for Greater Ontario lodging businesses. GOTMD has been in existence since 2013 for an initial five (5) year term, and was subsequently renewed in 2018 for a ten (10) year term. Lodging businesses now wish to renew the GOTMD for an additional ten (10) year term. The action being presented would extend the life of the GOTMD for another ten years.

The renewed GOTMD includes all lodging businesses, including short-term rentals, existing and in the future, available for public occupancy within the boundaries of the cities of Ontario and Rancho Cucamonga. Lodging business owners decided to pursue renewal of the GOTMD in order to continue to build upon its success, and to ensure a revenue source devoted to marketing Greater Ontario as a tourist, meeting and event destination. This is especially critical at this time given global events set to occur in Southern California, such as the Olympics, as well as Ontario's continued investment in establishing itself as a tourism hub, with assets such as the Ontario International Airport, the Ontario Convention Center, the Toyota Arena, and soon the Ontario Sports Empire.

If renewed, the GOTMD would generate approximately $6,000,000 on an annual basis for promotion of travel and tourism specific to Greater Ontario.

Tourism Marketing Districts

Tourism Marketing Districts (TMDs) utilize the efficiencies of private sector operation in the market-based promotion of tourism. These special assessment districts allow assessed business owners to organize their efforts to increase tourism. Hotel owners within the TMD fund the TMD, and those funds are used to provide services that are desired by and benefit the assessed businesses within the TMD.

TMD benefits:

- Funds cannot be diverted for other government programs;
- They are customized to fit the needs of each destination;
- They allow for a wide range of services; including: destination marketing, tourism promotion, and sales lead generation;
- They are designed, created and governed by those who will pay the assessment; and,
- They provide a stable funding source for tourism promotion.

In California, TMDs are primarily formed pursuant to the Property and Business Improvement District Law of 1994 (94 Law). This law allows for the creation of special benefit assessment districts to raise funds within a specific geographic area. The key difference between TMDs and other special benefit assessment districts is that funds raised are returned to the private non-profit corporation governing the TMD.

MANAGEMENT DISTRICT PLAN

The Management District Plan (Attachment 1) includes the proposed boundary of the GOTMD, a service plan and budget and a proposed means of governance. The GOTMD will include all lodging businesses, including short-term rentals, existing and in the future, available for public occupancy within the boundaries of the cities of Ontario and Rancho Cucamonga.

The annual assessment rate is three percent (3%) of gross short-term sleeping room rental revenue. Because the marketing programs will not promote or seek certain stays, assessments will not be collected on revenue resulting from: stays of more than thirty (30) consecutive days; stays by any Federal officer or employee when on official Federal government business; nor on stays by any officer or employee of a foreign government who is exempt by express provision of Federal law or international treaty.

The renewed GOTMD will have a ten (10) year term, beginning July 1, 2028, or as soon as possible thereafter, and ending ten (10) year from its start date. The assessment will be implemented beginning July 1, 2028 or as soon as possible thereafter. Once per year beginning on the anniversary of GOTMD renewal there is a thirty (30) day period in which business owners paying fifty percent (50%) or more of the assessment may protest and begin proceedings to terminate the GOTMD.

The Greater Ontario Convention and Visitors Bureau dba GOCAL (GOCAL) will be responsible for collecting the assessments on a monthly basis from each assessed business. The cities of Ontario and Rancho Cucamonga shall forward the assessments to GOCAL, which will have the responsibility of managing GOTMD programs as provided in the Management District Plan.

GOTMD RENEWAL PROCESS

March 18, 2025 - RESOLUTION OF INTENTION HEARING
Upon the submission of a written petition, signed by the business owners in the renewed district who will pay more than fifty percent (50%) of the assessments proposed to be levied, the Council may initiate proceedings to renew the GOTMD by the adoption of a resolution expressing its intention to renew the GOTMD.

Petition Status: Petitions in favor of GOTMD renewal were submitted by assessed businesses which represent over 50% of the total GOTMD assessment. This majority petition allows the Council to initiate proceedings for GOTMD renewal at the March 18, 2025 meeting.

No later than:

April 4, 2025 - NOTICE
The 94 Law requires the City of Ontario (City) to mail written notice to the owners of all businesses proposed to be assessed within the GOTMD. Mailing the notice begins a mandatory forty-five (45) day period in which assessed business owners may protest GOTMD renewal.

April 15, 2025 - PUBLIC MEETING
Allow public testimony on the renewal of the GOTMD and levy of assessments. No Council action required.

May 20, 2025 - FINAL PUBLIC HEARING
If written protests are received from the owners of businesses in the renewed GOTMD which will pay fifty percent (50%) or more of the assessments proposed to be levied, and protests are not withdrawn so as to reduce the protests to less than fifty percent (50%), no further proceedings to levy the proposed assessment against such businesses shall be taken for a period of one (1) year from the date of the finding of a majority protest by the Council.

If the Council, following the public hearing, decides to establish the renewed GOTMD, the Council shall adopt a resolution of formation.

Staff recommends the adoption of the Resolution of Intention to renew the existing Greater Ontario Tourism Marketing Plan.

GOCAL
GREATER ONTARIO CALIFORNIA

I. OVERVIEW

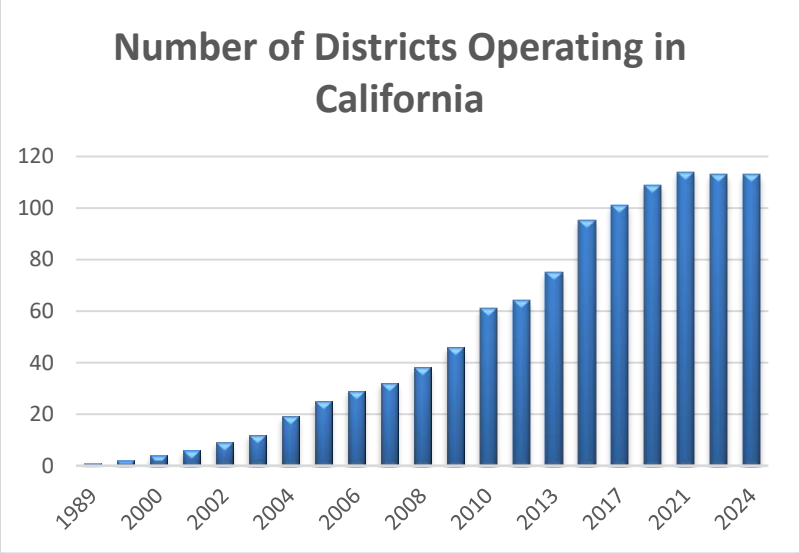
Developed by Greater Ontario area lodging businesses and the Greater Ontario Convention and Visitors Bureau dba GOCAL, the Greater Ontario Tourism Marketing District (GOTMD) is an assessment district proposed to continue to provide specific benefits to payors, by funding marketing and sales promotion efforts for assessed businesses. This approach has been used successfully in other destination areas throughout the country to provide the benefit of additional room night sales directly to payors. The GOTMD was formed in 2013 for an initial five (5) year term and was subsequently renewed in 2018 for a ten (10) year term. Lodging businesses now wish to renew the GOTMD for an additional ten (10) year term.

Location: The renewed GOTMD includes all lodging businesses, including short-term rentals, existing and in the future, available for public occupancy within the boundaries of the cities of Ontario and Rancho Cucamonga (Cities), as shown on the map in Section IV.

Services: The GOTMD is designed to provide specific benefits directly to payors by increasing awareness and demand for room night sales. Sales & Marketing and Tourism Development & Enhancement programs will increase demand for overnight tourism and market payors as tourist, meeting and event destinations, thereby increasing demand for room night sales.

Budget: The total GOTMD annual assessment budget for the initial year of its ten (10) year operation is anticipated to be approximately $6,000,000. A similar assessment budget is expected to apply to subsequent years, but this assessment budget is expected to fluctuate as room sales do, and as businesses open and close.

Cost: The annual assessment rate is three percent (3%) of gross short-term sleeping room rental revenue. Because the marketing programs will not promote or seek certain stays, assessments will not be collected on revenue resulting from: stays of more than thirty (30) consecutive days; stays by any Federal officer or employee when on official Federal government business; nor on stays by any officer or employee of a foreign government who is exempt by express provision of Federal law or international treaty.



Collection: GOCAL or Cities will be responsible for collecting the assessment on a monthly basis (including any delinquencies, interest, and overdue charges) from each lodging business located in each respective jurisdiction. GOCAL and Cities shall take all reasonable efforts to collect the assessments from each lodging business.

Duration: The renewed GOTMD will have a ten (10) year life, beginning July 1, 2028, or as soon as possible thereafter, and ending ten (10) years from its start date. After ten (10) years, the GOTMD may be renewed pursuant to the Property and Business Improvement District Law of 1994, Streets and Highways Code section 36600 et seq. (94 Law) if lodging business owners support continuing the GOTMD programs.

Management: GOCAL shall continue to serve as the GOTMD's Owners' Association. The Owners' Association is charged with managing funds and implementing programs in accordance with this Plan and must provide annual reports to the City Council.

II. BACKGROUND

Tourism Marketing Districts (TMDs) are an evolution of the traditional Business Improvement District. The first TMD was formed in West Hollywood, California in 1989. Since then, over 100 California destinations have followed suit. In recent years, other states have begun adopting the California model – Illinois, Minnesota, Massachusetts, Montana, South Dakota, Washington, Colorado, Texas and Louisiana have adopted TMD laws. Several other states are in the process of adopting their own legislation. The cities of Wichita, Kansas and Newark, New Jersey used an existing business improvement district law to form a TMD. Additionally, some cities, like Portland, Oregon and Memphis, Tennessee have utilized their home rule powers to create TMDs without a state law.

California's TMDs collectively raise over $300 million annually for local destination marketing. With competitors raising their budgets, and increasing rivalry for visitor dollars, it is important that the Greater Ontario area lodging businesses continue to invest in stable, commerce-specific marketing programs.

TMDs utilize the efficiencies of private sector operation in the market-based promotion of tourism districts. TMDs allow tourism business owners to organize their efforts to increase commerce. Lodging business owners within the TMD pay an assessment and those funds are used to provide services that increase commerce.

In California, most TMDs are formed pursuant to the Property and Business Improvement District Law of 1994. This law allows for the creation of a benefit assessment district to raise funds within a specific geographic area. *The key difference between TMDs and other benefit assessment districts is that funds raised are returned to the private non-profit corporation governing the district.*

There are many benefits to TMDs:

- Funds must be spent on services and improvements that provide a specific benefit only to those who pay;
- Funds cannot be diverted to general government programs;
- They are customized to fit the needs of payors in each destination;
- They allow for a wide range of services;
- They are ***designed, created and governed by those who will pay*** the assessment; and
- They provide a stable, long-term funding source for tourism promotion.

III. ACCOMPLISHMENTS & FUTURE OUTLOOK

Since its formation, the GOTMD has played a pivotal role in strengthening and enhancing the local tourism economy to drive overnight visitation to assessed businesses. As the GOTMD looks ahead to its next chapter, this section highlights key accomplishments from the most recent term, and looks to the future for the renewed GOTMD.

The following charts illustrate the economic impact and tourism activity generated by the GOTMD over the past decade. The first chart demonstrates the total economic impact by fiscal year, while the second chart provides data on sales leads and room nights generated, showing the number of leads pursued and hotel room nights booked as a result of GOTMD efforts.

Fiscal Year	Economic Impact
2013-2014	$52M
2014-2015	$69M
2015- 2016	$97M
2016-2017	$94M
2017-2018	$95M
2018-2019	$92M
2019-2020	--------
2020-2021	$76.5M LOSS
2021-2022	$77.7M
2022-2023	$96.5M
2023-2024	$110M
	TOTAL $792.2M

Fiscal Year	Sales Leads	Room Nights Generated
2013-2014	325	58,584
2014-2015	316	49,417
2015-2016	290	54,540
2016-2017	389	65,937
2017-2018	383	65,937
2018-2019	295	39,456
2019-2020	--------	---------
2020-2021	58 DOWN 75%	No data due to COVID
2021-2022	350	60,009
2022-2023	425	59,000
2023-2024	320	87147

GOCAL is attracting new hotel development and increasing its hotel supply, with 5 new hotels in the works with the Ontario Planning Department. In addition, GOCAL will be experiencing anticipated growth in its tourism and convention assets to expand GOCAL's desirability as a tourism and convention destination. Hotels in development are:

- Hyatt House/Hyatt Place – 256 Rooms (anticipated opening in March/April 2026)
- Residence Inn A-Loft – 225 Rooms (anticipated opening in October 2026)
- Ontario Hotel – 650 Rooms (anticipated opening in Fall 2027)
- Hilton Hampton Inn – 124 (anticipated opening in Spring 2026)
- Everhome Suites – 113 Rooms (anticipated opening in Winter 2025)

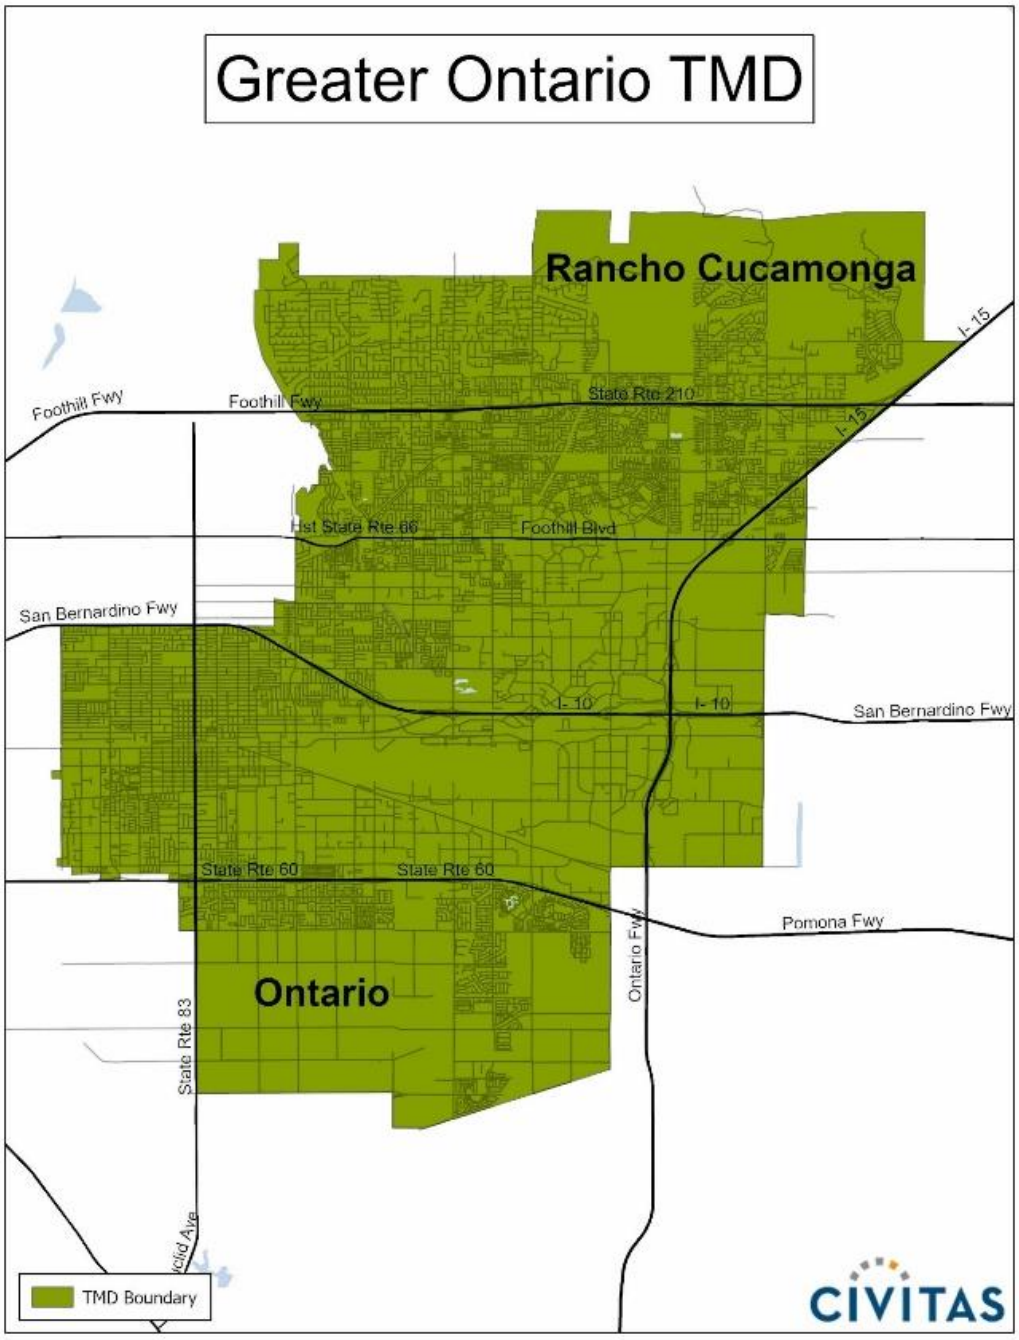
Upon completion of the properties above, hotel rooms for the Greater Ontario area will increase by another 1,369 hotel inventory to a total of over 8,000 rooms.

In addition to the anticipated add of more hotels:

- Michael Krouse, President & CEO of GOCAL, led the CalTravel Association's Convention Centers Coalition for the reopening of convention center to begin hosting meetings and conventions and recovery for the industry. GOCAL received a grant for $974,768 combined from the US Department of Commerce Economic Development Administration to assist in those efforts of restoring the meetings and conventions.
- Plans are in the works to expand the Ontario Convention Center to include a 650-room headquarter hotel onsite and a newly constructed parking structure. Construction to begin in 2026.

- Ontario Convention Center has 300 active days per year and has attracted larger conventions for multiple years. This expansion to double the size of the center will allow us to secure meetings and conventions in a next higher tier in size. Coupled with new hotel products, this also supports our ability to grow in the meetings and convention sector.
- Route 66 Cruisin' Reunion, established in 2013, is a two-day classic car show that attracts enthusiasts from all over the country. Each year, we see an increase in classic car participants, and in 2024, an all-time record of over 1,300 cars were on display. This event attracts over 100,000 attendees from several states nationwide over the two days.
- The development of the 200-acre Ontario Sports Empire, a new minor league baseball stadium in South Ontario and future home of a minor league team and LA Dodger affiliate, will increase demand for overnight stays for the projected 1.4 million new visitors.
- The Adept project surrounding the Toyota Arena will be a world-class entertainment district with plans for a Performing Arts Center, open spaces and an outdoor concert venue, restaurants, dining, and a new hotel.
- Ontario International Airport continues to add domestic flights to destinations such as El Paso, Nashville, Washington DC, and Hawaii. The airport is working on future plans for expansion and development of a dedicated state-of-the-art international Terminal 3. Our convention center is located within one mile of the Ontario International Airport.
- Brightline West will provide high-speed rail service to and from Cucamonga Station in Rancho Cucamonga and Las Vegas in 2028, with connectivity to all of Southern California via Metrolink and Amtrak.
- Having established the Greater Ontario Sports and Entertainment Authority, we have dedicated sales and marketing staff booking and marketing to this specific growing industry for professional and youth sports of all kinds.
- Since 2013, we have produced over $1B in economic impact to our region.
- The State of the Region Event hosted annually at the Ontario Convention Center is a premier event for the region to discuss current statistics, provide an economic forecast for the coming year

learn about the dynamic strength of our economy, how to adapt to changing conditions, and build a network of forward-thinking professionals as we plan for the future.



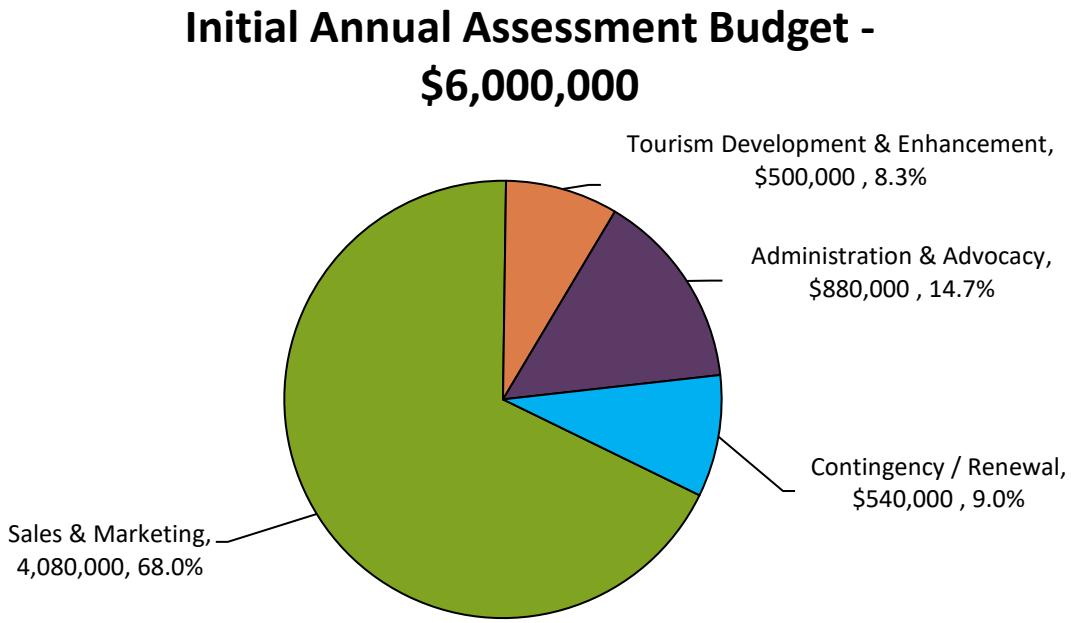
IV. BOUNDARY

The GOTMD will include all lodging businesses, including short-term rentals, existing and in the future, available for public occupancy within the boundaries of the Cities of Ontario and Rancho Cucamonga, as shown in the map below.

Lodging business definition: any structure, or any portion of any structure, which is occupied, or intended or designed for occupancy, by transients for dwelling, lodging, or sleeping purposes and shall include any hotel, inn, tourist home, motel, studio hotel, bachelor hotel, lodging house, rooming house, apartment house, dormitory, public or private club, mobile home or house trailer at a fixed location, or other similar structure, or portion thereof.

Short-term rental definition: a dwelling unit, or any portion thereof, that is rented by the host to another party for a period of not more than 30 consecutive days in exchange for any form of monetary or non-monetary compensation or consideration. "Short-term rental" shall include rental activity in which the host remains on the site of his or her primary residence throughout the duration of the guest's stay, rental activity in which the host remains off the site of his or her primary residence-site for some or all of the duration of the guest's stay, and rental activity that is not a primary residence, and which is available for temporary lodging, for compensation or any form of consideration. "Short-term rental" shall not include: single-room occupancy buildings and a dwelling unit for which a tenant has a month-to-month rental agreement and the rental payments are made on a monthly basis, or corporate housing.

A complete listing of assessed lodging businesses within the renewed GOTMD can be found in Appendix 2.



Total Square Miles: 90.21
Distance to Los Angeles: 37 Miles
Distance to Palm Springs: 72 Miles
Distance to San Diego: 113 Miles

V. ASSESSMENT BUDGET AND SERVICES

A. Annual Service Plan

Assessment funds will be spent to provide specific benefits conferred or privileges granted directly to the payors that are not provided to those not charged, and which do not exceed the reasonable cost to the City of Ontario (City) of conferring the benefits or granting the privileges. The privileges and services provided with the GOTMD funds are Sales & Marketing and Tourism Development & Enhancement programs available only to assessed businesses.

A service plan assessment budget has been developed to deliver services that benefit the assessed businesses. A detailed annual assessment budget will be developed and approved by GOCAL. The chart below illustrates the initial annual assessment budget allocations. These activities and allocations will also apply in subsequent years. The total initial assessment budget is estimated to be $6,000,000.

Although actual revenues will fluctuate due to market conditions, the proportional allocations of the budget shall remain the same. However, the City and the GOCAL board shall have the authority to adjust budget allocations between the categories by no more than fifteen percent (15%) of the total budget per year. A description of the proposed improvements and activities for the initial year of operation is below. The same activities are proposed for subsequent years. In the event of a legal challenge against the GOTMD, any and all assessment funds may be used for the costs of defending the GOTMD.

Each budget category includes all costs related to providing that service. For example, the Sales & Marketing budget includes the cost of staff time dedicated to overseeing and implementing the sales and marketing program. Staff time dedicated purely to administrative tasks is allocated to the Administration & Advocacy portion of the budget. The costs of an individual staff member may be allocated to multiple budget categories. The staffing levels necessary to provide the services below will be determined by GOCAL on an as-needed basis.

Sales & Marketing

A Sales & Marketing program will promote assessed businesses as tourist, meeting, and event destinations. The Sales & Marketing program will have a central theme of promoting Ontario and Rancho Cucamonga as desirable places for overnight visits to leisure travelers and meeting planners. The program will have the goal of increasing overnight visitation and room night sales at assessed businesses, and may include the following activities:

- Internet marketing efforts to increase awareness and optimize internet presence to drive overnight visitation and room sales to assessed businesses;
- Print ads in magazines and newspapers targeted at potential visitors to drive overnight visitation and room sales to assessed businesses;
- Television ads targeted at potential visitors to drive overnight visitation and room sales to assessed businesses;
- Promotion and production of special events that draw overnight visitors to assessed businesses;
- Radio ads targeted at potential visitors to drive overnight visitation and room sales to assessed businesses;
- Attendance of trade shows to promote assessed businesses;
- Sales blitzes for assessed businesses;
- Familiarization tours of assessed businesses;
- Preparation and production of collateral promotional materials such as brochures, flyers and maps featuring assessed businesses;
- Attendance of professional industry conferences and affiliation events to promote assessed businesses;
- Market research to identify targets and opportunities to attract overnight visitors to assessed businesses;
- Incentivizing conferences and meetings to book at the destination to increase overnight visitation at assessed businesses.
- Partnership with both local, state and national tourism organizations to target key domestic and international markets to increase overnight visitation at assessed businesses;
- Development and implementation of a public relations and communications strategy, inclusive of social media outlets and press release distribution designed to drive overnight visitation at assessed businesses;
- Lead generation activities designed to attract tourists and group events to assessed businesses; and
- Director of Sales and General Manager meetings to plan and coordinate tourism promotion efforts for assessed businesses

Tourism Development & Enhancement

A Tourism Development & Enhancement program will be designed to improve the visitor experience in an effort to increase overnight visitation at assessed lodging businesses and short-term rentals. It will provide potential funding for programs and initiatives based on criteria to be developed. The focus of the program will be on the entire destination brand footprint to ensure a consistent brand experience. The program may include the following activities, but is not limited to:

- A transportation program connecting hotels with points of interest, the airport and tourism assets, to increase room night sales and enhance the visitor experience;
- An ambassador program with stakeholders to improve the overall destination experience and encourage overnight visitation; and

- Operation of a California Welcome Center (WC) to provide visitor resources and ensure a consistent brand experience throughout the destination.

Administration & Advocacy
The Administration & Advocacy portion of the budget will be utilized to provide the activities and improvements for the GOTMD. These costs may include rent, telephone charges, legal fees, accounting fees, postage, administrative staff, insurance, and other general office expenses. A small portion of the budget may be utilized towards dedicated staff time to provide unified attention, communication and responsiveness throughout the GOTMD and provide a unified voice to represent the GOTMD's best interests.

Contingency / Renewal
A prudent portion of the budget will be allocated to a contingency fund, to account for lower than anticipated collections. If there are contingency funds collected and near the expiration of the GOTMD there are contingency funds remaining, and businesses wish to renew the GOTMD, the contingency funds may be used for renewal costs.

B. Annual Budget

The total ten (10) year assessment budget is projected at approximately $6,000,000 annually, or $60,000,000 through June 2038. A similar budget is expected to apply to subsequent years, but this budget is expected to fluctuate as room sales do and as businesses open and close.

C. California Constitutional Compliance

The GOTMD assessment is not a property-based assessment subject to the requirements of Proposition 218. Courts have found Proposition 218 limited the term 'assessments' to levies on real property.[1] Rather, the GOTMD assessment is a business-based assessment, and is subject to Proposition 26. Pursuant to Proposition 26 all levies are a tax unless they fit one of seven exceptions. Two of these exceptions apply to the GOTMD, a "specific benefit" and a "specific government service." Both require that the costs of benefits or services do not exceed the reasonable costs to the City of conferring the benefits or providing the services.

1. Specific Benefit

Proposition 26 requires that assessment funds be expended on, "a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of conferring the benefit or granting the privilege."[2] The services in this Plan are designed to provide targeted specific benefits directly to assessed businesses, and are intended only to provide specific benefits and services directly to those businesses paying the assessment. These services are tailored not to serve the general public, businesses in general, or parcels of land, but rather to serve the specific businesses within the GOTMD. The activities described in this Plan are specifically targeted to increase demand for room night sales for assessed lodging businesses within the boundaries of the GOTMD and are narrowly tailored. GOTMD funds will be used exclusively to provide the specific benefit of increased demand for room night sales directly to the assessees. Assessment funds shall not be used to feature non-assessed lodging businesses in GOTMD programs, or to directly generate sales for non-assessed businesses. The activities paid for from assessment revenues are business services constituting and providing specific benefits to the assessed businesses. Nothing in this Plan limits the ability of the

[1] *Jarvis v. the City of San Diego* 72 Cal App. 4th 230
[2] Cal. Const. art XIII C § 1(e)(1)

Owners' Association to enter into private contracts with non-assessed lodging businesses for the provision of services to those businesses.

The assessment imposed by this GOTMD is for a specific benefit conferred directly to the payors that are not provided to those not charged. The specific benefit conferred directly to the payors is an increase in demand for room night sales. The specific benefit of an increase in demand for room night sales for assessed lodging businesses will be provided only to lodging businesses paying the district assessment, with Sales & Marketing programs promoting lodging businesses paying the GOTMD assessment. The Sales & Marketing programs will be designed to increase room night sales at each assessed lodging businesses. Because they are necessary to provide the Sales & Marketing programs that specifically benefit the assessed lodging businesses, the Administration & Advocacy and Contingency/Renewal services also provide the specific benefit of increased demand for room night sales to the assessed lodging businesses.

Although the GOTMD, in providing specific benefits to payors, may produce incidental benefits to non-paying businesses, the incidental benefit does not preclude the services from being considered a specific benefit. The legislature has found that, "A specific benefit is not excluded from classification as a 'specific benefit' merely because an indirect benefit to a nonpayor occurs incidentally and without cost to the payor as a consequence of providing the specific benefit to the payor."[3]

2. Specific Government Service

The assessment may also be utilized to provide, "a specific government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of providing the service or product."[4] The legislature has recognized that marketing and promotions services like those to be provided by the GOTMD are government services within the meaning of Proposition 26[5]. Further, the legislature has determined that "a specific government service is not excluded from classification as a 'specific government service' merely because an indirect benefit to a nonpayor occurs incidentally and without cost to the payor as a consequence of providing the specific government service to the payor."[6]

3. Reasonable Cost

GOTMD services will be implemented carefully to ensure they do not exceed the reasonable cost of such services. The full amount assessed will be used to provide the services described herein. Funds will be managed by GOCAL, and reports submitted on an annual basis to the City. Only assessed lodging businesses will be featured in marketing materials, receive sales leads generated from GOTMD-funded activities, be featured in advertising campaigns, and benefit from other GOTMD-funded services. Non-assessed lodging businesses will not receive these, nor any other, GOTMD-funded services and benefits. The assessed lodging business list was compiled from records provided by each jurisdiction and complies with the requirements of the 94 Law. Pursuant to Streets and Highways Code Section 36615, the City Council's determination of ownership is final and conclusive, with no obligation to obtain other information.

The GOTMD-funded programs are targeted directly to benefit assessed businesses. It is, however, possible that there will be a spillover benefit to non-assessed businesses. If non-assessed lodging businesses receive incremental room nights, that portion of the promotion or program generating

[3] Government Code § 53758(a)
[4] Cal. Const. art XIII C § 1(e)(2)
[5] Government Code § 53758(b)
[6] Government Code § 53758(b)

those room nights shall be paid with non-GOTMD funds. GOTMD funds shall only be spent to benefit the assessed businesses and shall not be spent on that portion of any program which directly generates incidental room nights for non-assessed businesses.

D. Assessment

The annual assessment rate is three percent (3%) of gross short-term sleeping room rental revenue. Because the marketing programs will not promote or seek certain stays, assessments will not be collected on: stays of more than thirty (30) consecutive days; stays by any Federal officer or employee when on official Federal government business; nor on stays by any officer or employee of a foreign government who is exempt by express provision of Federal law or international treaty.

The assessment was calculated based on the total cost of the activities to be provided for the benefit of the businesses within the GOTMD, with costs allocated based on the proportional benefit conferred to each assessed business. Activities funded by the GOTMD, are specifically targeted to increase room nights at assessed businesses. All room night sales do not represent the same benefit to the payors. For example, a higher priced room night is of greater benefit than a lower priced room night because the assesses derive greater revenue. To account for this benefit differential and to make sure the benefits are proportional, an assessment formula based on a percentage of revenue has been selected. The proposed formula accurately reflects greater benefit to assessed businesses with higher priced room nights.

The term "gross sleeping room rental revenue" as used herein means: the consideration charged for the occupancy of space in a lodging business valued in money. Gross sleeping room rental revenue shall not include any federal, state or local taxes collected, including but not limited to transient occupancy taxes.

The assessment is levied upon and a direct obligation of the assessed lodging business. However, the assessed lodging business may, at its discretion, pass the assessment on to transients. The amount of assessment, if passed on to each transient, shall be disclosed in advance and separately stated from the amount of rent charged and any other applicable taxes, and each transient shall receive a receipt for payment from the business. If the GOTMD assessment is identified separately it shall be disclosed as the "GOTMD Assessment." As an alternative, the disclosure may include the amount of the GOTMD assessment and the amount of the assessment imposed pursuant to the California Tourism Marketing Act, Government Code §13995 et seq. and shall be disclosed as the "Tourism Assessment." The assessment is imposed solely upon and is the sole obligation of the assessed lodging business even if it is passed on to transients. The assessment shall not be considered revenue for calculation of transient occupancy taxes.

Bonds shall not be issued.

E. Interest and Overdue Charges

The GOTMD shall reimburse the Cities of Ontario and Rancho Cucamonga for any costs associated with collecting unpaid assessments. If sums in excess of the delinquent GOTMD assessment are sought to be recovered in the same collection action by the Cities, the GOTMD shall bear its pro rata share of such collection costs.

1. Any business which fails to remit any assessment within thirty (30) days shall pay an overdue charge in the amount of one-half of one percent (0.5%) per day of the assessment due and owning in addition to the amount of the assessment.

2. Any business which fails to remit any delinquent assessment on or before a period of thirty (30) days following the date on which the assessment first became delinquent (or sixty [60] days after the initial due date) shall pay a second delinquency overdue charge in the amount of ten percent (10%) of the assessment due and owing in addition to the amount of the assessment and the one-half of one percent (0.5%) overdue charge first imposed pursuant to section 1 above.
3. If the collecting City determines that the non-payment of any assessment is due to fraud, an overdue charge in the amount of twenty-five (25%) of the amount of assessment due and owning shall be added thereto in addition to the overdue charges set forth in section 1 and 2 above.
4. In addition to the overdue charges imposed, any business which fails to remit any assessment shall pay interest at the rate of one-half of one percent (0.5%) per month, or fraction thereof, on the amount of the assessment due and owing, exclusive of overdue charges, from the date on which the assessment first became delinquent until paid.

F. Time and Manner for Collecting Assessments

The GOTMD assessment will be implemented beginning July 1, 2028 or as soon as possible thereafter, and end ten (10) years from its start date. The Cities or GOCAL will be responsible for collecting the assessment on a monthly basis (including any delinquencies, overdue charges and interest) from each assessed lodging business located in their respective jurisdictions. GOCAL and Cities shall take all reasonable efforts to collect the assessments from each lodging business within the GOTMD.

1. GOCAL and/or Cities shall make all reasonable efforts to enter into an agreement with all Hosting Platforms to collect and remit the GOTMD assessment on behalf of assessed businesses using the hosting platform.

2. An assessed business, using a Hosting Platform, reserves the right to have the Hosting Platform collect the assessment based on information supplied by the assessed business, and remit such assessment to the assessed business for ultimate reporting and remittance by the assessed business to GOCAL and/or Cities. In such case, the Hosting Platform, upon request from GOCAL and/or Cities, and not more than once per consecutive twelve-month period, shall provide GOCAL and/or Cities with copies of documentation related to assessed business which have provided acknowledgement of its obligation to collect all assessments owed on a gross short-term room rental revenue and to remit and report any assessments collected directly to GOCAL and/or Cities.

VI. GOVERNANCE

A. Owners' Association

The Ontario City Council, through adoption of this Plan, has the right, pursuant to Streets and Highways Code §36651, to identify the body that shall implement the proposed program, which shall be the Owners' Association of the GOTMD as defined in Streets and Highways Code §36612. The Ontario City Council has determined that GOCAL will continue to serve as the Owners' Association for the GOTMD.

B. Brown Act and California Public Records Act Compliance

An Owners' Association is a private entity and may not be considered a public entity for any purpose, nor may its board members or staff be considered to be public officials for any purpose. The Owners' Association is, however, subject to government regulations relating to transparency, namely the Ralph M. Brown Act and the California Public Records Act. These regulations are designed to promote public accountability. The Owners' Association acts as a legislative body under the Ralph M. Brown Act (Government Code §54950 et seq.). Thus, meetings of the Board and certain committees must be held in compliance with the public notice and other requirements of the Brown Act. Accordingly, the Owners' Association shall publicly report any action taken and the vote or abstention on that action of each member present for the action. The Owners' Association is also subject to the record keeping and disclosure requirements of the California Public Records Act.

C. Annual Report

GOCAL shall present an annual report at the end of each year of operation to the City Council pursuant to Streets and Highways Code §36650 (see Appendix 1). The annual report shall include:

- Any proposed changes in the boundaries of the improvement district or in any benefit zones or classification of businesses within the district.
- The improvements and activities to be provided for that fiscal year.
- An estimate of the cost of providing the improvements and the activities for that fiscal year.
- The method and basis of levying the assessment in sufficient detail to allow each business owner to estimate the amount of the assessment to be levied against his or her business for that fiscal year.
- The estimated amount of any surplus or deficit revenues to be carried over from a previous fiscal year.
- The estimated amount of any contributions to be made from sources other than assessments levied pursuant to this part.

APPENDIX 1 – LAW

*** THIS DOCUMENT IS CURRENT THROUGH THE 2023 EXTRA SESSION CH 1, 2023 REGULAR SESSION CH. 890***
(ALL 2023 LEGISLATION)

STREETS AND HIGHWAYS CODE
DIVISION 18. PARKING
PART 7. PROPERTY AND BUSINESS IMPROVEMENT DISTRICT LAW OF 1994

CHAPTER 1. General Provisions

ARTICLE 1. Declarations

36600. Citation of part

This part shall be known and may be cited as the "Property and Business Improvement District Law of 1994."

36601. Legislative findings and declarations; Legislative guidance

The Legislature finds and declares all of the following:

(a) Businesses located and operating within business districts in some of this state's communities are economically disadvantaged, are underutilized, and are unable to attract customers due to inadequate facilities, services, and activities in the business districts.

(b) It is in the public interest to promote the economic revitalization and physical maintenance of business districts in order to create jobs, attract new businesses, and prevent the erosion of the business districts.

(c) It is of particular local benefit to allow business districts to fund business related improvements, maintenance, and activities through the levy of assessments upon the businesses or real property that receive benefits from those improvements.

(d) Assessments levied for the purpose of conferring special benefit upon the real property or a specific benefit upon the businesses in a business district are not taxes for the general benefit of a city, even if property, businesses, or persons not assessed receive incidental or collateral effects that benefit them.

(e) Property and business improvement districts formed throughout this state have conferred special benefits upon properties and businesses within their districts and have made those properties and businesses more useful by providing the following benefits:

(1) Crime reduction. A study by the Rand Corporation has confirmed a 12-percent reduction in the incidence of robbery and an 8-percent reduction in the total incidence of violent crimes within the 30 districts studied.

(2) Job creation.

(3) Business attraction.

(4) Business retention.

(5) Economic growth.

(6) New investments.

(f) With the dissolution of redevelopment agencies throughout the state, property and business improvement districts have become even more important tools with which communities can combat blight, promote economic opportunities, and create a clean and safe environment.

(g) Since the enactment of this act, the people of California have adopted Proposition 218, which added Article XIII D to the Constitution in order to place certain requirements and restrictions on the formation of, and activities, expenditures, and assessments by property-based districts. Article XIII D of the Constitution provides that property-based districts may only levy assessments for special benefits.

(h) The act amending this section is intended to provide the Legislature's guidance with regard to this act, its interaction with the provisions of Article XIII D of the Constitution, and the determination of special benefits in property-based districts.

(1) The lack of legislative guidance has resulted in uncertainty and inconsistent application of this act, which discourages the use of assessments to fund needed improvements, maintenance, and activities in property-based districts, contributing to blight and other underutilization of property.

(2) Activities undertaken for the purpose of conferring special benefits upon property to be assessed inherently produce incidental or collateral effects that benefit property or persons not assessed. Therefore, for special benefits to exist as a separate and distinct category from general benefits, the incidental or collateral effects of those special benefits are inherently part of those special benefits. The mere fact that special benefits produce incidental or collateral effects that benefit property or persons not assessed does not convert any portion of those special benefits or their incidental or collateral effects into general benefits.
(3) It is of the utmost importance that property-based districts created under this act have clarity regarding restrictions on assessments they may levy and the proper determination of special benefits. Legislative clarity with regard to this act will provide districts with clear instructions and courts with legislative intent regarding restrictions on property-based assessments, and the manner in which special benefits should be determined.

36602. Purpose of part

The purpose of this part is to supplement previously enacted provisions of law that authorize cities to levy assessments within property and business improvement districts, to ensure that those assessments conform to all constitutional requirements and are determined and assessed in accordance with the guidance set forth in this act. This part does not affect or limit any other provisions of law authorizing or providing for the furnishing of improvements or activities or the raising of revenue for these purposes.

36603. Preemption of authority or charter city to adopt ordinances levying assessments

Nothing in this part is intended to preempt the authority of a charter city to adopt ordinances providing for a different method of levying assessments for similar or additional purposes from those set forth in this part. A property and business improvement district created pursuant to this part is expressly exempt from the provisions of the Special Assessment Investigation, Limitation and Majority Protest Act of 1931 (Division 4 (commencing with Section 2800)).

36603.5 Part prevails over conflicting provisions

Any provision of this part that conflicts with any other provision of law shall prevail over the other provision of law, as to districts created under this part.

36604. Severability

This part is intended to be construed liberally and, if any provision is held invalid, the remaining provisions shall remain in full force and effect. Assessments levied under this part are not special taxes.

ARTICLE 2. Definitions

36606. "Activities"

"Activities" means, but is not limited to, all of the following that benefit businesses or real property in the district:
(a) Promotion of public events.
(b) Furnishing of music in any public place.
(c) Promotion of tourism within the district.
(d) Marketing and economic development, including retail retention and recruitment.
(e) Providing security, sanitation, graffiti removal, street and sidewalk cleaning, and other municipal services supplemental to those normally provided by the municipality.
(f) Other services provided for the purpose of conferring special benefit upon assessed real property or specific benefits upon assessed businesses located in the district.

36606.5. "Assessment"

"Assessment" means a levy for the purpose of acquiring, constructing, installing, or maintaining improvements and providing activities that will provide certain benefits to properties or businesses located within a property and business improvement district.

36607. "Business"

"Business" means all types of businesses and includes financial institutions and professions.

36608. "City"

"City" means a city, county, city and county, or an agency or entity created pursuant to Article 1 (commencing with Section 6500) of Chapter 5 of Division 7 of Title 1 of the Government Code, the public member agencies of which includes only cities, counties, or a city and county, or the State of California.

36609. "City council"

"City council" means the city council of a city or the board of supervisors of a county, or the agency, commission, or board created pursuant to a joint powers agreement and which is a city within the meaning of this part.

36609.4. "Clerk"

"Clerk" means the clerk of the legislative body.

36609.5. "General benefit"

"General benefit" means, for purposes of a property-based district, any benefit that is not a "special benefit" as defined in Section 36615.5.

36610. "Improvement"

"Improvement" means the acquisition, construction, installation, or maintenance of any tangible property with an estimated useful life of five years or more including, but not limited to, the following:

(a) Parking facilities.
(b) Benches, booths, kiosks, display cases, pedestrian shelters and signs.
(c) Trash receptacles and public restrooms.
(d) Lighting and heating facilities.
(e) Decorations.
(f) Parks.
(g) Fountains.
(h) Planting areas.
(i) Closing, opening, widening, or narrowing of existing streets.
(j) Facilities or equipment, or both, to enhance security of persons and property within the district.
(k) Ramps, sidewalks, plazas, and pedestrian malls.
(l) Rehabilitation or removal of existing structures.

36611. "Management district plan"; "Plan"

"Management district plan" or "plan" means a proposal as defined in Section 36622.

36612. "Owners' association"

"Owners' association" means a private nonprofit entity that is under contract with a city to administer or implement improvements, maintenance, and activities specified in the management district plan. An owners' association may be an existing nonprofit entity or a newly formed nonprofit entity. An owners' association is a private entity and may not be considered a public entity for any purpose, nor may its board members or staff be considered to be public officials for any purpose. Notwithstanding this section, an owners' association shall comply with the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5 of the Government Code), at all times when matters within the subject matter of the district are heard, discussed, or deliberated, and with the California Public Records Act (Division 10 (commencing with Section 7920.000) of Title 1 of the Government Code), for all records relating to activities of the district.

36614. "Property"

"Property" means real property situated within a district.

36614.5. "Property and business improvement district"; "District"

"Property and business improvement district," or "district," means a property and business improvement district established pursuant to this part.

36614.6. "Property-based assessment"

"Property-based assessment" means any assessment made pursuant to this part upon real property.

36614.7. "Property-based district"

"Property-based district" means any district in which a city levies a property-based assessment.

36615. "Property owner"; "Business owner"; "Owner"

"Property owner" means any person shown as the owner of land on the last equalized assessment roll or otherwise known to be the owner of land by the city council. "Business owner" means any person recognized by the city as the owner of the business. "Owner" means either a business owner or a property owner. The city council has no obligation to obtain other information as to the ownership of land or businesses, and its determination of ownership shall be final and conclusive for the purposes of this part. Wherever this part requires the signature of the property owner, the signature of the authorized agent of the property owner shall be sufficient. Wherever this part requires the signature of the business owner, the signature of the authorized agent of the business owner shall be sufficient.

36615.5. "Special benefit" [Effective January 1, 2023]

(a) "Special benefit" means, for purposes of a property-based district, a particular and distinct benefit over and above general benefits conferred on real property located in a district or to the public at large. Special benefit includes incidental or collateral effects that arise from the improvements, maintenance, or activities of property-based districts even if those incidental or collateral effects benefit property or persons not assessed. Special benefit excludes general enhancement of property value.

(b) "Special benefit" also includes, for purposes of a property-based district, a particular and distinct benefit provided directly to each assessed parcel within the district. Merely because parcels throughout an assessment district share the same special benefits does not make the benefits general.

36616. "Tenant"

"Tenant" means an occupant pursuant to a lease of commercial space or a dwelling unit, other than an owner.

ARTICLE 3 Prior Law

36617. Alternate method of financing certain improvements and activities; Effect on other provisions

This part provides an alternative method of financing certain improvements and activities. The provisions of this part shall not affect or limit any other provisions of law authorizing or providing for the furnishing of improvements or activities or the raising of revenue for these purposes. Every improvement area established pursuant to the Parking and Business Improvement Area Law of 1989 (Part 6 (commencing with Section 36500) of this division) is valid and effective and is unaffected by this part.

CHAPTER 2. Establishment

36620. Establishment of property and business improvement district

A property and business improvement district may be established as provided in this chapter.

36620.5. Requirement of consent of city council

A county may not form a district within the territorial jurisdiction of a city without the consent of the city council of that city. A city may not form a district within the unincorporated territory of a county without the consent of the board of supervisors of that county. A city may not form a district within the territorial jurisdiction of another city without the consent of the city council of the other city.

36621. Initiation of proceedings; Petition of property or business owners in proposed district

(a) Upon the submission of a written petition, signed by the property or business owners in the proposed district who will pay more than 50 percent of the assessments proposed to be levied, the city council may initiate proceedings to form a district by the adoption of a resolution expressing its intention to form a district. The amount of assessment attributable to property or a business owned by the same property or business owner that is in excess of 40 percent of the amount of all assessments proposed to be levied, shall not be included in determining whether the petition is signed by property or business owners who will pay more than 50 percent of the total amount of assessments proposed to be levied.

(b) The petition of property or business owners required under subdivision (a) shall include a summary of the management district plan. That summary shall include all of the following:

(1) A map showing the boundaries of the district.

(2) Information specifying where the complete management district plan can be obtained.

(3) Information specifying that the complete management district plan shall be furnished upon request.

(c) The resolution of intention described in subdivision (a) shall contain all of the following:

(1) A brief description of the proposed improvements, maintenance, and activities, the amount of the proposed assessment, a statement as to whether the assessment will be levied on property or businesses within the district, a statement as to whether bonds will be issued, and a description of the exterior boundaries of the proposed district, which may be made by reference to any plan or map that is on file with the clerk. The descriptions and statements do not need to be detailed and shall be sufficient if they enable an owner to generally identify the nature and extent of the improvements, maintenance, and activities, and the location and extent of the proposed district.

(2) A time and place for a public hearing on the establishment of the property and business improvement district and the levy of assessments, which shall be consistent with the requirements of Section 36623.

36622. Contents of management district plan

The management district plan shall include, but is not limited to, all of the following:

(a) If the assessment will be levied on property, a map of the district in sufficient detail to locate each parcel of property and, if businesses are to be assessed, each business within the district. If the assessment will be levied on businesses, a map that identifies the district boundaries in sufficient detail to allow a business owner to reasonably determine whether a business is located within the district boundaries. If the assessment will be levied on property and businesses, a map of the district in sufficient detail to locate each parcel of property and to allow a business owner to reasonably determine whether a business is located within the district boundaries.

(b) The name of the proposed district.

(c) A description of the boundaries of the district, including the boundaries of benefit zones, proposed for establishment or extension in a manner sufficient to identify the affected property and businesses included, which may be made by reference to any plan or map that is on file with the clerk. The boundaries of a proposed property assessment district shall not overlap with the boundaries of another existing property assessment district created pursuant to this part. This part does not prohibit the boundaries of a district created pursuant to this part to overlap with other assessment districts established pursuant to other provisions of law, including, but not limited to, the Parking and Business Improvement Area Law of 1989 (Part 6 (commencing with Section 36500)). This part does not prohibit the boundaries of a business assessment district created pursuant to this part to overlap with another business assessment district created pursuant to this part. This part does not prohibit the boundaries of a business assessment district created pursuant to this part to overlap with a property assessment district created pursuant to this part.

(d) The improvements, maintenance, and activities proposed for each year of operation of the district and the estimated cost thereof. If the improvements, maintenance, and activities proposed for each year of operation are the same, a description of the first year's proposed improvements, maintenance, and activities

and a statement that the same improvements, maintenance, and activities are proposed for subsequent years shall satisfy the requirements of this subdivision.
(e) The total annual amount proposed to be expended for improvements, maintenance, or activities, and debt service in each year of operation of the district. If the assessment is levied on businesses, this amount may be estimated based upon the assessment rate. If the total annual amount proposed to be expended in each year of operation of the district is not significantly different, the amount proposed to be expended in the initial year and a statement that a similar amount applies to subsequent years shall satisfy the requirements of this subdivision.
(f) The proposed source or sources of financing, including the proposed method and basis of levying the assessment in sufficient detail to allow each property or business owner to calculate the amount of the assessment to be levied against their property or business. The plan also shall state whether bonds will be issued to finance improvements.
(g) The time and manner of collecting the assessments.
(h) The specific number of years in which assessments will be levied. In a new district, the maximum number of years shall be five. Upon renewal, a district shall have a term not to exceed 10 years. Notwithstanding these limitations, a district created pursuant to this part to finance capital improvements with bonds may levy assessments until the maximum maturity of the bonds. The management district plan may set forth specific increases in assessments for each year of operation of the district.
(i) The proposed time for implementation and completion of the management district plan.
(j) Any proposed rules and regulations to be applicable to the district.
(k)

(1) A list of the properties or businesses to be assessed, including the assessor's parcel numbers for properties to be assessed, and a statement of the method or methods by which the expenses of a district will be imposed upon benefited real property or businesses, in proportion to the benefit received by the property or business, to defray the cost thereof.
(2) In a property-based district, the proportionate special benefit derived by each identified parcel shall be determined exclusively in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the activities. An assessment shall not be imposed on any parcel that exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and a property-based district shall separate the general benefits, if any, from the special benefits conferred on a parcel. Parcels within a property-based district that are owned or used by any city, public agency, the State of California, or the United States shall not be exempt from assessment unless the governmental entity can demonstrate by clear and convincing evidence that those publicly owned parcels in fact receive no special benefit. The value of any incidental, secondary, or collateral effects that arise from the improvements, maintenance, or activities of a property-based district and that benefit property or persons not assessed shall not be deducted from the entirety of the cost of any special benefit or affect the proportionate special benefit derived by each identified parcel.
(3) In a property-based district, properties throughout the district may share the same special benefits. In a district with boundaries that define which parcels are to receive improvements, maintenance, or activities over and above those services provided by the city, the improvements, maintenance, or activities themselves may constitute a special benefit. The city may impose assessments that are less than the proportional special benefit conferred, but shall not impose assessments that exceed the reasonable costs of the proportional special benefit conferred. Because one or more parcels pay less than the special benefit conferred does not necessarily mean that other parcels are assessed more than the reasonable cost of their special benefit.

(l) In a property-based district, a detailed engineer's report prepared by a registered professional engineer certified by the State of California supporting all assessments contemplated by the management district plan.
(m) Any other item or matter required to be incorporated therein by the city council.

<u>36623.</u> Procedure to levy assessment

(a) If a city council proposes to levy a new or increased property assessment, the notice and protest and hearing procedure shall comply with Section 53753 of the Government Code.
(b) If a city council proposes to levy a new or increased business assessment, the notice and protest and hearing procedure shall comply with Section 54954.6 of the Government Code, except that notice shall be

mailed to the owners of the businesses proposed to be assessed. A protest may be made orally or in writing by any interested person. Every written protest shall be filed with the clerk at or before the time fixed for the public hearing. The city council may waive any irregularity in the form or content of any written protest. A written protest may be withdrawn in writing at any time before the conclusion of the public hearing. Each written protest shall contain a description of the business in which the person subscribing the protest is interested sufficient to identify the business and, if a person subscribing is not shown on the official records of the city as the owner of the business, the protest shall contain or be accompanied by written evidence that the person subscribing is the owner of the business or the authorized representative. A written protest that does not comply with this section shall not be counted in determining a majority protest. If written protests are received from the owners or authorized representatives of businesses in the proposed district that will pay 50 percent or more of the assessments proposed to be levied and protests are not withdrawn so as to reduce the protests to less than 50 percent, no further proceedings to levy the proposed assessment against such businesses, as contained in the resolution of intention, shall be taken for a period of one year from the date of the finding of a majority protest by the city council.

(c) If a city council proposes to conduct a single proceeding to levy both a new or increased property assessment and a new or increased business assessment, the notice and protest and hearing procedure for the property assessment shall comply with subdivision (a), and the notice and protest and hearing procedure for the business assessment shall comply with subdivision (b). If a majority protest is received from either the property or business owners, that respective portion of the assessment shall not be levied. The remaining portion of the assessment may be levied unless the improvement or other special benefit was proposed to be funded by assessing both property and business owners.

36624. Changes to proposed assessments

At the conclusion of the public hearing to establish the district, the city council may adopt, revise, change, reduce, or modify the proposed assessment or the type or types of improvements, maintenance, and activities to be funded with the revenues from the assessments. Proposed assessments may only be revised by reducing any or all of them. At the public hearing, the city council may only make changes in, to, or from the boundaries of the proposed property and business improvement district that will exclude territory that will not benefit from the proposed improvements, maintenance, and activities. Any modifications, revisions, reductions, or changes to the proposed assessment district shall be reflected in the notice and map recorded pursuant to Section 36627.

36625. Resolution of formation

(a) If the city council, following the public hearing, decides to establish a proposed property and business improvement district, the city council shall adopt a resolution of formation that shall include, but is not limited to, all of the following:

(1) A brief description of the proposed improvements, maintenance, and activities, the amount of the proposed assessment, a statement as to whether the assessment will be levied on property, businesses, or both within the district, a statement on whether bonds will be issued, and a description of the exterior boundaries of the proposed district, which may be made by reference to any plan or map that is on file with the clerk. The descriptions and statements need not be detailed and shall be sufficient if they enable an owner to generally identify the nature and extent of the improvements, maintenance, and activities and the location and extent of the proposed district.

(2) The number, date of adoption, and title of the resolution of intention.

(3) The time and place where the public hearing was held concerning the establishment of the district.

(4) A determination regarding any protests received. The city shall not establish the district or levy assessments if a majority protest was received.

(5) A statement that the properties, businesses, or properties and businesses in the district established by the resolution shall be subject to any amendments to this part.

(6) A statement that the improvements, maintenance, and activities to be conferred on businesses and properties in the district will be funded by the levy of the assessments. The revenue from the levy of assessments within a district shall not be used to provide improvements, maintenance, or activities outside the district or for any purpose other than the purposes specified in the resolution of intention, as modified by the city council at the hearing concerning establishment of the district. Notwithstanding the foregoing, improvements and activities that must be provided outside the

district boundaries to create a special or specific benefit to the assessed parcels or businesses may be provided, but shall be limited to marketing or signage pointing to the district.

(7) A finding that the property or businesses within the area of the property and business improvement district will be benefited by the improvements, maintenance, and activities funded by the proposed assessments, and, for a property-based district, that property within the district will receive a special benefit.

(8) In a property-based district, the total amount of all special benefits to be conferred on the properties within the property-based district.

(b) The adoption of the resolution of formation and, if required, recordation of the notice and map pursuant to Section 36627 shall constitute the levy of an assessment in each of the fiscal years referred to in the management district plan.

36627. Notice and assessment diagram

Following adoption of the resolution establishing district assessments on properties pursuant to Section 36625, the clerk shall record a notice and an assessment diagram pursuant to Section 3114. No other provision of Division 4.5 (commencing with Section 3100) applies to an assessment district created pursuant to this part.

36628. Establishment of separate benefit zones within district; Categories of businesses

The city council may establish one or more separate benefit zones within the district based upon the degree of benefit derived from the improvements or activities to be provided within the benefit zone and may impose a different assessment within each benefit zone. If the assessment is to be levied on businesses, the city council may also define categories of businesses based upon the degree of benefit that each will derive from the improvements or activities to be provided within the district and may impose a different assessment or rate of assessment on each category of business, or on each category of business within each zone.

36628.5. Assessments on businesses or property owners

The city council may levy assessments on businesses or on property owners, or a combination of the two, pursuant to this part. The city council shall structure the assessments in whatever manner it determines corresponds with the distribution of benefits from the proposed improvements, maintenance, and activities, provided that any property-based assessment conforms with the requirements set forth in paragraph (2) of subdivision (k) of Section 36622.

36629. Provisions and procedures applicable to benefit zones and business categories

All provisions of this part applicable to the establishment, modification, or disestablishment of a property and business improvement district apply to the establishment, modification, or disestablishment of benefit zones or categories of business. The city council shall, to establish, modify, or disestablish a benefit zone or category of business, follow the procedure to establish, modify, or disestablish a property and business improvement district.

36630. Expiration of district; Creation of new district

If a property and business improvement district expires due to the time limit set pursuant to subdivision (h) of Section 36622, a new management district plan may be created and the district may be renewed pursuant to this part.

CHAPTER 3: Assessments

36631. Time and manner of collection of assessments; Delinquent payments

The collection of the assessments levied pursuant to this part shall be made at the time and in the manner set forth by the city council in the resolution levying the assessment. Assessments levied on real property may be collected at the same time and in the same manner as for the ad valorem property tax, and may provide for the same lien priority and penalties for delinquent payment. All delinquent payments for assessments levied pursuant to this part may be charged interest and penalties.

36632. Assessments to be based on estimated benefit; Classification of real property and businesses; Exclusion of residential and agricultural property

(a) The assessments levied on real property pursuant to this part shall be levied on the basis of the estimated benefit to the real property within the property and business improvement district. The city council may classify properties for purposes of determining the benefit to property of the improvements and activities provided pursuant to this part.
(b) Assessments levied on businesses pursuant to this part shall be levied on the basis of the estimated benefit to the businesses within the property and business improvement district. The city council may classify businesses for purposes of determining the benefit to the businesses of the improvements and activities provided pursuant to this part.
(c) Properties zoned solely for residential use, or that are zoned for agricultural use, are conclusively presumed not to benefit from the improvements and service funded through these assessments, and shall not be subject to any assessment pursuant to this part.

36633. Time for contesting validity of assessment

The validity of an assessment levied under this part shall not be contested in an action or proceeding unless the action or proceeding is commenced within 30 days after the resolution levying the assessment is adopted pursuant to Section 36625. An appeal from a final judgment in an action or proceeding shall be perfected within 30 days after the entry of judgment.

36634. Service contracts authorized to establish levels of city services

The city council may execute baseline service contracts that would establish levels of city services that would continue after a property and business improvement district has been formed.

36635. Request to modify management district plan

The owners' association may, at any time, request that the city council modify the management district plan. Any modification of the management district plan shall be made pursuant to this chapter.

36636. Modification of plan by resolution after public hearing; Adoption of the resolution of intention

(a) Upon the written request of the owners' association, the city council may modify the management district plan after conducting one public hearing on the proposed modifications. The city council may modify the improvements and activities to be funded with the revenue derived from the levy of the assessments by adopting a resolution determining to make the modifications after holding a public hearing on the proposed modifications. If the modification includes the levy of a new or increased assessment, the city council shall comply with Section 36623. Notice of all other public hearings pursuant to this section shall comply with both of the following:
(1) The resolution of intention shall be published in a newspaper of general circulation in the city once at least seven days before the public hearing.
(2) A complete copy of the resolution of intention shall be mailed by first class mail, at least 10 days before the public hearing, to each business owner or property owner affected by the proposed modification.
(b) The city council shall adopt a resolution of intention which states the proposed modification prior to the public hearing required by this section. The public hearing shall be held not more than 90 days after the adoption of the resolution of intention.

36637. Reflection of modification in notices recorded and maps

Any subsequent modification of the resolution shall be reflected in subsequent notices and maps recorded pursuant to Division 4.5 (commencing with Section 3100), in a manner consistent with the provisions of Section 36627.

36638. Assessment as government improvised fee on Civ C § 1770 transaction [Operative July 1, 2024]

(a) A business assessment pursuant to this part is a fee imposed by a government on the transaction for purposes of paragraph (29) of subdivision (a) of Section 1770 of the Civil Code.
(b) This section shall become operative on July 1, 2024.

CHAPTER 3.5 Financing

36640. Bonds authorized; Procedure; Restriction on reduction or termination of assessments

(a) The city council may, by resolution, determine and declare that bonds shall be issued to finance the estimated cost of some or all of the proposed improvements described in the resolution of formation adopted pursuant to Section 36625, if the resolution of formation adopted pursuant to that section provides for the issuance of bonds, under the Improvement Bond Act of 1915 (Division 10 (commencing with Section 8500)) or in conjunction with Marks–Roos Local Bond Pooling Act of 1985 (Article 4 (commencing with Section 6584) of Chapter 5 of Division 7 of Title 1 of the Government Code). Either act, as the case may be, shall govern the proceedings relating to the issuance of bonds, although proceedings under the Bond Act of 1915 may be modified by the city council as necessary to accommodate assessments levied upon business pursuant to this part.

(b) The resolution adopted pursuant to subdivision (a) shall generally describe the proposed improvements specified in the resolution of formation adopted pursuant to Section 36625, set forth the estimated cost of those improvements, specify the number of annual installments and the fiscal years during which they are to be collected. The amount of debt service to retire the bonds shall not exceed the amount of revenue estimated to be raised from assessments over 30 years.

(c) Notwithstanding any other provision of this part, assessments levied to pay the principal and interest on any bond issued pursuant to this section shall not be reduced or terminated if doing so would interfere with the timely retirement of the debt.

CHAPTER 4. Governance

36650. Report by owners' association; Approval or modification by city council

(a) The owners' association shall cause to be prepared a report for each fiscal year, except the first year, for which assessments are to be levied and collected to pay the costs of the improvements, maintenance, and activities described in the report. The owners' association's first report shall be due after the first year of operation of the district. The report may propose changes, including, but not limited to, the boundaries of the property and business improvement district or any benefit zones within the district, the basis and method of levying the assessments, and any changes in the classification of property, including any categories of business, if a classification is used.

(b) The report shall be filed with the clerk and shall refer to the property and business improvement district by name, specify the fiscal year to which the report applies, and, with respect to that fiscal year, shall contain all of the following information:

(1) Any proposed changes in the boundaries of the property and business improvement district or in any benefit zones or classification of property or businesses within the district.

(2) The improvements, maintenance, and activities to be provided for that fiscal year.

(3) An estimate of the cost of providing the improvements, maintenance, and activities for that fiscal year.

(4) The method and basis of levying the assessment in sufficient detail to allow each real property or business owner, as appropriate, to estimate the amount of the assessment to be levied against his or her property or business for that fiscal year.

(5) The estimated amount of any surplus or deficit revenues to be carried over from a previous fiscal year.

(6) The estimated amount of any contributions to be made from sources other than assessments levied pursuant to this part.

(c) The city council may approve the report as filed by the owners' association or may modify any particular contained in the report and approve it as modified. Any modification shall be made pursuant to Sections 36635 and 36636.

The city council shall not approve a change in the basis and method of levying assessments that would impair an authorized or executed contract to be paid from the revenues derived from the levy of assessments, including any commitment to pay principal and interest on any bonds issued on behalf of the district.

36651. Designation of owners' association to provide improvements, maintenance, and activities

The management district plan may, but is not required to, state that an owners' association will provide the improvements, maintenance, and activities described in the management district plan. If the management district plan designates an owners' association, the city shall contract with the designated nonprofit corporation to provide services.

CHAPTER 5. Renewal

36660. Renewal of district; Transfer or refund of remaining revenues; District term limit

(a) Any district previously established whose term has expired, or will expire, may be renewed by following the procedures for establishment as provided in this chapter.
(b) Upon renewal, any remaining revenues derived from the levy of assessments, or any revenues derived from the sale of assets acquired with the revenues, shall be transferred to the renewed district. If the renewed district includes additional parcels or businesses not included in the prior district, the remaining revenues shall be spent to benefit only the parcels or businesses in the prior district. If the renewed district does not include parcels or businesses included in the prior district, the remaining revenues attributable to these parcels shall be refunded to the owners of these parcels or businesses.
(c) Upon renewal, a district shall have a term not to exceed 10 years, or, if the district is authorized to issue bonds, until the maximum maturity of those bonds. There is no requirement that the boundaries, assessments, improvements, or activities of a renewed district be the same as the original or prior district.

CHAPTER 6. Disestablishment

36670. Circumstances permitting disestablishment of district; Procedure

(a) Any district established or extended pursuant to the provisions of this part, where there is no indebtedness, outstanding and unpaid, incurred to accomplish any of the purposes of the district, may be disestablished by resolution by the city council in either of the following circumstances:
(1) If the city council finds there has been misappropriation of funds, malfeasance, or a violation of law in connection with the management of the district, it shall notice a hearing on disestablishment.
(2) During the operation of the district, there shall be a 30-day period each year in which assessees may request disestablishment of the district. The first such period shall begin one year after the date of establishment of the district and shall continue for 30 days. The next such 30-day period shall begin two years after the date of the establishment of the district. Each successive year of operation of the district shall have such a 30-day period. Upon the written petition of the owners or authorized representatives of real property or the owners or authorized representatives of businesses in the district who pay 50 percent or more of the assessments levied, the city council shall pass a resolution of intention to disestablish the district. The city council shall notice a hearing on disestablishment.
(b) The city council shall adopt a resolution of intention to disestablish the district prior to the public hearing required by this section. The resolution shall state the reason for the disestablishment, shall state the time and place of the public hearing, and shall contain a proposal to dispose of any assets acquired with the revenues of the assessments levied within the property and business improvement district. The notice of the hearing on disestablishment required by this section shall be given by mail to the property owner of each parcel or to the owner of each business subject to assessment in the district, as appropriate. The city shall conduct the public hearing not less than 30 days after mailing the notice to the property or business owners. The public hearing shall be held not more than 60 days after the adoption of the resolution of intention.

36671. Refund of remaining revenues upon disestablishment or expiration without renewal of district; Calculation of refund; Use of outstanding revenue collected after disestablishment of district

(a) Upon the disestablishment or expiration without renewal of a district, any remaining revenues, after all outstanding debts are paid, derived from the levy of assessments, or derived from the sale of assets acquired with the revenues, or from bond reserve or construction funds, shall be refunded to the owners of the property or businesses then located and operating within the district in which assessments were levied by

applying the same method and basis that was used to calculate the assessments levied in the fiscal year in which the district is disestablished or expires. All outstanding assessment revenue collected after disestablishment shall be spent on improvements and activities specified in the management district plan.
(b) If the disestablishment occurs before an assessment is levied for the fiscal year, the method and basis that was used to calculate the assessments levied in the immediate prior fiscal year shall be used to calculate the amount of any refund.

APPENDIX 2 – ASSESSED BUSINESSES

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO , CALIFORNIA, DECLARING ITS INTENTION TO RENEW THE GREATER ONTARIO TOURISM MARKETING DISTRICT (GOTMD) AND FIXING THE TIME AND PLACE OF A PUBLIC MEETING AND A PUBLIC HEARING THEREON AND GIVING NOTICE THEREOF.

WHEREAS, the City of Ontario (City) created the GOTMD on June 4, 2013 by Resolution No. 2013-041 for a five (5) year term; and

WHEREAS, the GOTMD was subsequently renewed on March 15, 2016 for a ten (10) year term, which ends on June 30, 2028; and

WHEREAS, the Property and Business Improvement Law of 1994, Streets and Highways Code § 36600 et seq., authorizes the City to renew business improvement districts for the purposes of promoting tourism; and

WHEREAS, Greater Ontario Convention and Vicitors Bureau dba GOCAL (GOCAL), lodging business owners, and City representatives have met to consider the renewal of the GOTMD; and

WHEREAS, GOCAL has drafted a Management District Plan (Plan) which sets forth the proposed boundary of the GOTMD, a service plan and budget, and a proposed means of governance; and

WHEREAS, the renewed GOTMD includes lodging businesses, including short-term rentals, in the cities of Ontario and Rancho Cucamonga; and

WHEREAS, consent to include lodging businesses in their respective jurisdictions has been granted from the City of Rancho Cucamonga; and

WHEREAS, lodging businesses who will pay more than fifty percent (50%) of the assessment under the GOTMD have petitioned the City Council of the City (Council) to renew the GOTMD.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL THAT:

1. The recitals set forth herein are true and correct.

2. The Council finds that assessed businesses that will pay more than fifty percent (50%) of the assessment proposed in the Plan have signed and submitted petitions in support of the renewal of the GOTMD. The Council accepts the petitions and adopts this Resolution of Intention to renew the GOTMD and to levy an assessment on all lodging businesses within the GOTMD boundaries in accordance with the Property and Business Improvement District Law of 1994.

3. The Council finds that the Plan satisfies all requirements of Streets and Highways Code §36622.

4. The Council declares its intention to renew the GOTMD and to levy and collect assessments on lodging businesses within the GOTMD boundaries pursuant to the Property and Business Improvement District Law of 1994.

5. The GOTMD shall include all lodging businesses, including short-term rentals, existing and in the future, available for public occupancy within the boundaries of the cities of Ontario and Rancho Cucamonga, as shown in the map attached as Exhibit A.

6. The name of the district shall be the Greater Ontario Tourism Marketing District.

7. The annual assessment rate is three percent (3%) of gross short-term sleeping room rental revenue. Because the marketing programs will not promote or seek certain stays, assessments will not be collected on revenue resulting from: stays of more than thirty (30) consecutive days; stays by any Federal officer or employee when on official Federal government business; nor on stays by any officer or employee of a foreign government who is exempt by express provision of Federal law or international treaty.

8. The assessments levied for the GOTMD shall be applied toward Sales & Marketing, Tourism Development & Enhancement, Administration & Advoacy, and Contingency/Renewal programs to market assessed lodging businesses in the GOTMD as tourist, meeting, and event destinations, as described in the Plan. Funds remaining at the end of any year may be used in subsequent years in which GOTMD assessments are levied as long as they are used consistent with the requirements of this resolution and the Plan.

9. The renewed GOTMD will have a ten (10) year term, beginning July 1, 2028, or as soon as possible thereafter, and ending ten (10) years from its start date, unless renewed pursuant to Streets and Highways Code § 36660.

10. Bonds shall not be issued.

11. The time and place for the public meeting to hear testimony on establishing the GOTMD and levying assessments are set for April 15, 2025, at 6:30 PM, or as soon thereafter as the matter may be heard, in the Council Chambers at the City Hall located at 303 East B Street, Ontario, CA 91764.

12. The time and place for the public hearing to establish the GOTMD and the levy of assessments are set for May 20, 2025, at 6:30 PM, or as soon thereafter as the matter may be heard, in the Council Chambers at the City Hall located at 303 East B Street Ontario, CA 91764. The City Clerk is

directed to provide written notice to the assessed businesses subject to assessment of the date and time of the meeting and hearing, and to provide that notice as required by Streets and Highways Code § 36623, no later than April 4, 2025.

13. At the public meeting and hearing the testimony of all interested persons for or against the renewal of the GOTMD may be received. If at the conclusion of the public hearing, there are of record written protests by the owners of the assessed businesses within the renewed GOTMD that will pay fifty percent (50%) or more of the estimated total assessment of the entire GOTMD, no further proceedings to renew the GOTMD shall occur for a period of one (1) year.

14. The complete Plan is on file with the City Clerk and may be reviewed upon request.

15. This resolution shall take effect immediately upon its adoption by the City Council.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 18th day of March, 2025.

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **PUBLIC HEARINGS**
Department: Planning Prepared By: Robert Morales Department: Prepared By: Robert Morales Staff Member Presenting: Rudy Zeledon, Executive Director Community Development Reviewed By: Kimberly Ruddins, Henry Noh Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 17

SUBJECT: **A PUBLIC HEARING TO CONSIDER AN ORDINANCE APPROVING A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-001, TO IMPLEMENT OBJECTIVE DEVELOPMENT AND DESIGN STANDARDS**

RECOMMENDATION: That the City Council introduce and waive further reading of the Ordinance Approving File No. PDCA24-001, a Development Code Amendment, amending the Reference document section of the City's Development Code, to implement Objective Development and Design Standards for multiple-family and mixed-use residential development.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Pursue City's Goals and Objectives by Working with Other Governmental Agencies
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: There is not a direct fiscal impact associated with this action.

BACKGROUND & ANALYSIS: On June 4, 2024, the City Council approved Ordinance No. 3275, an interim Urgency Ordinance that amended the Development Code to establish Objective Development and Design Standards. This action was taken to align with Housing Element Programs 9.19 and 9.21, as well as Government Code Section 65589.5, which mandates local governments to implement objective standards for streamlining housing project approvals while ensuring transparency and consistency. On August 20, 2024, the City Council approved Ordinance No. 3285, which extended Ordinance No. 3275. This extension provided staff with the necessary time to analyze and develop a permanent Ordinance.

The proposed Development Code Amendment is comprised of certain clarifications and revisions to the City of Ontario Development Code, generally described as follows:

- Amending the Reference document section of the City's Development Code, to implement

Objective Development and Design Standards for multiple-family and mixed-use residential development.

The Objective standards refer to clear, measurable criteria such as building height limits, setbacks, and materials, which do not require subjective judgment. In response to these evolving State requirements, the City established more robust Objective Development and Design Standards (ODDS) to streamline housing development approvals and ensure a clear, consistent review process. These standards must be applied to applicable projects in accordance with state laws, including the State Density Bonus Law, Housing Accountability Act, Senate Bill 423 (previously Senate Bill 35), and Senate Bill 330, to promote transparency and facilitate efficient approvals.

The ODDS establishes standards for streamlined ministerial residential projects. All applicable projects under ODDS must adhere to architectural styles outlined in the standards to create unbiased criteria for efficient residential development approvals. ODDS encompass various residential types and establish development and design standards for multi-family and mixed-use areas that currently lack specific standards.

The Ordinance integrates ODDS for multi-family and mixed-use development types, including a compliance checklist and style sheet for various architectural styles. The checklist specifies minimum design requirements, while the style sheets depict both traditional and modern interpretations. Comprehensive numerical standards for setbacks, building heights, and additional criteria are defined for mixed-use and detached multi-family areas, in line with Housing Element Programs 9.19 and 9.21.

On February 25, 2025, the Planning Commission conducted a public hearing to consider the proposed Development Code Amendment. Upon the conclusion of the public hearing, the Planning Commission voted (4-0) to approve Resolution No. PC25-014, recommending that the City Council approve the proposed Development Code Amendment

COMPLIANCE WITH THE ONTARIO PLAN (TOP): The proposed project is consistent with the principles, goals, and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council priorities components of TOP. Goals and policies of TOP that are furthered by the proposed Development Code Amendment are addressed in the attached Planning Commission backup material.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (general plan) component of TOP, as the project furthers the purposes, principles, goals, and policies of the Housing Element.

ENVIRONMENTAL REVIEW: The proposed Development Code Amendment is exempt from the requirements of the California Environmental Quality Act (CEQA) and the guidelines promulgated thereunder, pursuant to Section 15061(b)(3) of the CEQA Guidelines, in that the activity is covered by the commonsense exemption (general rule) that CEQA applies only to projects that have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

CITY OF ONTARIO PLANNING DEPARTMENT

PLANNING COMMISSION AGENDA REPORT

February 25, 2025

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Email: PlanningDirector@OntarioCA.gov

FILE NO.: PDCA24-001

SUBJECT: A public hearing to consider a Development Code Amendment amending the Reference document section of the City's Development Code, to implement Objective Development and Design Standards for multiple-family and mixed-use residential development. **City Initiated. City Council action is required.**

RECOMMENDED ACTION: That the Planning Commission consider and adopt a Resolution recommending the City Council approve the Development Code Amendment (File No. PDCA24-001), pursuant to the facts and reasons contained in the staff report and Resolution.

PROJECT SETTING: The proposed Development Code Amendment is of citywide impact, affecting approximately 50 square miles (31,789 acres) of land, which is bordered by Benson Avenue and Euclid Avenue on the west; Interstate 10 Freeway, Eighth Street, and Fourth Street on the north; Etiwanda Avenue and Hamner Avenue on the east; and Merrill Avenue and the San Bernardino County/Riverside County boundary on the south. The City of Ontario is substantially built-out with a mix of residential, commercial, industrial, agricultural, airport, recreational, and institutional/public land uses. According to the latest US Census forecast, the City of Ontario's 2022 estimated population is 179,516 persons and in terms of population, is ranked the 26th largest city in the State and the 146th largest in the nation. Ontario's population has increased by 3.46 percent since the most recent census, which recorded a population of 175,265 in 2020.

BACKGROUND: In recent years, state housing-related statutes have increasingly limited or prohibited the use of local subjective standards for new development. While the City has traditionally relied on a mix of subjective and objective standards to ensure that development projects align with surrounding uses and City goals, the current objective standards alone are not sufficient to ensure compatibility. As state laws continue to limit the use of subjective standards, the need for more thoughtful and comprehensive objective standards has become increasingly urgent.

Objective standards refer to clear, measurable criteria such as building height limits, setbacks, and materials, which do not require subjective judgment. In response to these evolving requirements, the City established more robust Objective Development and Design Standards (ODDS) to streamline housing development approvals and ensure a clear, consistent review process. These standards must be applied to applicable projects

CC 2nd reading	4/1/25		Final Action

in accordance with state laws, including the State Density Bonus Law, Housing Accountability Act, Senate Bill 423 (previously Senate Bill 35), and Senate Bill 330, to promote transparency and facilitate efficient approvals.

The ODDS establish standards for streamlined ministerial residential projects. All applicable projects under ODDS must adhere to architectural styles outlined in the standards to create unbiased criteria for efficient residential development approvals. ODDS encompass various residential types and establish development and design standards for multi-family and mixed-use areas that currently lack specific standards.

The Ordinance integrates ODDS for multi-family and mixed-use development types, including a compliance checklist and style sheet for various architectural styles. The checklist specifies minimum design requirements, while the style sheets depict both traditional and modern interpretations. Comprehensive numerical standards for setbacks, building heights, and additional criteria are defined for mixed-use and detached multi-family areas, in line with Housing Element Programs 9.19 and 9.21.

On June 4, 2024, the City Council adopted Ordinance No. 3275, an interim Urgency Ordinance implementing a Development Code Amendment to establish Objective Development and Design Standards in compliance with Housing Element Programs 9.19 and 9.21 and Government Code Section 65589.5. This section requires local governments to apply objective standards in their regulatory schema to streamline housing project approvals while ensuring transparency and consistency.

On August 20, 2024, the City Council adopted Ordinance No. 3285, extending Ordinance No. 3275, thereby extending the Urgency Ordinance to allow staff sufficient time to analyze and develop a permanent Ordinance.

PROJECT ANALYSIS:

The proposed Development Code Amendment is comprised of certain clarifications and revisions to the City of Ontario Development Code, generally described as follows:

(1) Amending the Reference document section of the City's Development Code, to implement Objective Development and Design Standards for multiple-family and mixed-use residential development.

PUBLIC NOTIFICATION: The number of owners to whom a public hearing notice would be mailed or delivered is greater than 1,000; therefore, pursuant to Development Code Section 2.03.010.C.2 and Government Code Section 65091(a)(4), in lieu of mailed or delivered notice, a display advertisement of at least 1/8 page was placed in a newspaper of general circulation in the City of Ontario (Inland Valley Daily Bulletin). Public hearing notification was published a minimum of 10 days in advance of the public hearing.

CORRESPONDENCE: As of the preparation of the Resolutions, Planning Department staff has not received any written or verbal communications from the owners or occupants of properties surrounding the Project site or from the public in general, regarding the subject application.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) Ontario International Airport Land Use Compatibility Plan ("ONT ALUCP") — On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the projects, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, Planning Commission has concluded that the proposed Development Code Amendment are consistent with the policies and criteria set forth within the ONT ALUCP.

(2) Chino Airport Land Use Compatibility Plan ("CNO ALUCP") — On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan. The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Development Code Amendment may affect certain land development criteria on certain properties located within the Airport Influence Area of Chino Airport, which have been evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As a result, the Planning Commission has concluded that the proposed Development Code Amendment are consistent with the policies and criteria set forth within the CNO ALUCP.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan

(general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Policy Plan (General Plan)

Land Use Element:

- Goal LU-1 Balance. A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➢ LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.

Housing Element:

- Goal H-2 Housing Supply & Diversity. Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

➢ H-2.5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

➢ H-2.6 Infill Development. We support the revitalization of neighborhoods through the construction of higher-density residential developments on underutilized residential and commercial sites.

Community Economics Element:

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.

  - CE-1.6 Diversity of Housing. We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses.

- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors, and centers where people choose to be.

  - CE-2.1 *Development Projects*. We require new development and redevelopment to create unique, high-quality places that add value to the community.

  - CE-2.4 *Protection of Investment*. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

Community Design Element:

- Goal CD-1 Image & Identity: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.

  - CD-1.1 *City Identity*. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods.

  - CD-1.2 Place Types. We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.

- Goal CD-2 Design Quality. A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

  - CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

    - Building volume, massing, and height to provide context-appropriate scale and proportion;

- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

➢ CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

➢ CD-2.9 *Landscape Design*. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➢ CD-2.10 *Parking Areas.* We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

- Structured parking: facade articulation, screening, appropriate lighting, and landscaping; and
- Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.

▪ Goal CD-3 Urban, Mixed Use, and Transit-Oriented Place Types: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

➢ CD-3.4 Context-Aware and Appropriate Design. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts.

➢ CD-3.5 Active Frontages. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (general plan) component of The Ontario Plan, as the project furthers the purposes, principals, goals, and policies of the Housing Element.

ENVIRONMENTAL REVIEW: The proposed Development Code Amendment is exempt from the requirements of the California Environmental Quality Act (CEQA) and the guidelines promulgated thereunder, pursuant to Section 15061(b)(3) of the CEQA Guidelines, in that the activity is covered by the commonsense exemption (general rule) that CEQA applies only to projects that have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

Attachment A:
Resolution for File No. PDCA24-001

(Document to follow this page)

RESOLUTION NO. PC25-014

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL APPROVE FILE NO. PDCA24-001 AMENDING THE REFERENCE DOCUMENT SECTION OF THE ONTARIO DEVELOPMENT CODE, TO AUTHORIZE OBJECTIVE DEVELOPMENT AND DESIGN STANDARDS FOR MULTIPLE-FAMILY AND MIXED-USE DEVELOPMENT, AND FINDING THE ACTION TO BE EXEMPT FROM CEQA.

WHEREAS, for the last several years, the State has enacted housing-related statutes that either limit or prohibit the use of local subjective standards for new development; and

WHEREAS, the City has historically regulated new housing development through a mix of subjective and objective standards to ensure that each project is reasonable and compatible with surrounding uses and City goals and objectives; and

WHEREAS, the City's current objective standards on their own are not sufficient to ensure that new housing development is reasonable or compatible; and

WHEREAS, as state law has evolved to increasingly limit the City's use of subjective standards, the need for more and more thoughtful objective standards has become urgent; and

WHEREAS, specifically the approval of multiple-family residential and mixed-use residential development projects in various zoning districts based solely on the default standards currently in the City's Development Code, without additional appropriate objective regulations governing project design, site planning, building massing, height, setback, landscape, building type, architectural review, and similar criteria, threatens to adversely impact the character of existing neighborhoods and to negatively impact property values, personal privacy, and fire safety; and

WHEREAS, the City desires now to amend its local regulatory scheme to provide reasonable and appropriate objective standards, in compliance with state law and the City's own adopted housing element; and

WHEREAS, as part of the implementation of the City's Housing Element Update the City prepared this Development Code Amendment to implement multiple-family residential and mixed-use residential objective development and design standards consistent with the policy program for these standards; and

WHEREAS, the City is adopting an official Ordinance that will allow the City to respond and impose consistent development standards to address the anticipated increase in housing development project applications; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act, commencing with Public Resources Code Section 21000 (hereinafter referred to as "CEQA"); and

WHEREAS, the Project is exempt from CEQA pursuant to a categorical exemption (listed in CEQA Guidelines Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendations to the City Council, on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan 2050, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, the proposed Project is located within the Airport Influence Area of Chino Airport, within the City of Ontario boundary, and is subject to, and must be consistent with, the policies criteria set forth in Reference I, Chino Airport Land Use Compatibility Plan (CNO ALUCP), which applies only to jurisdictions within City of Ontario, and addresses the safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on June 4, 2024, the City Council of the City of Ontario adopted Ordinance No. 3275, an interim Urgency Ordinance with a 90-day duration to establish Objective Development and Design Standards in compliance with Housing Element Programs 9.19 and 9.21 and Government Code Section 65589.5; and

WHEREAS, on August 20, 2024, the City Council of the City of Ontario adopted Ordinance No. 3285, extending Ordinance No. 3275 providing a nine-month extension of the Urgency Ordinance to allow staff sufficient time to analyze and develop a permanent Ordinance; and

WHEREAS, on February 25, 2025, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The administrative record has been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(2) The Project has been assessed under CEQA and is deemed exempt based on CEQA Guidelines Section 15183, as it involves the adoption and implementation of Design Standards. This falls under the exemption for Projects Consistent with a Community Plan, General Plan, or Zoning, as it directs staff to adopt standards aligned with the General Plan Housing Element policy for multiple-family residential development. The determination relies on Section 15004, providing guidance on the timing of environmental review. While projects using the Design Standards may need environmental documents, the adoption of Objective Development and Design Standards is exempt from CEQA as it won't significantly impact the environment. Staff recommends City Council acknowledge the exemption, accept the NOE, and instruct staff to file the document under CEQA and the CEQA Guidelines (14 CCR Section 1500, et seq.); and

(3) The application of the categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

(4) The determination of CEQA exemption reflects the independent judgment of the Planning Commission.

SECTION 2: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan 2050, as the Project site is not one of the properties in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report.

SECTION 3: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission therefore finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP; and

(2) On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport

Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection, Overflight. As a result, the Planning Commission therefore finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the Chino ALUCP.

SECTION 4: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in the Sections 1 through 3 above, the Planning Commission hereby concludes as follows:

(1) The proposed Development Code Amendment is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Goals components of The Ontario Plan ("TOP"). The Development Code Amendment will: (a) serve to promote a community that is consistently seeking—and thoughtfully applying—new ways of doing things better, as encouraged by TOP's Vision; (b) provides for a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, have a wide spectrum of choices of where they can live and recreate, as promoted by Land Use Element Policy LU-1.6, Complete Community; and (c) promotes the City Council Goals through the establishment of Development Code provisions that encourages investment in the growth and evolution of the City's economy and focuses City resources in commercial and residential neighborhoods; and

(2) The proposed Development Code Amendment would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City. The Development Code Amendment incorporates safeguards intended to ensure that the purposes of the Development Code are preserved; the project will not be contrary to or damage the public health, safety, convenience, or general welfare; the project will not result in any significant environmental impacts; and the project will be in full conformity with the Vision, City Council Priorities, and Policy Plan components of The Ontario Plan.

SECTION 5: ***Code Amendment.*** The REFERENCE section of the Ontario Development Code is hereby amended to read in its entirety as follows:

Reference J – Objective Development & Design Standards.

This section incorporates by reference the Objective Development and Design Standards, or "ODDS," that are adopted and amended by the City Council by resolution. The ODDS are binding requirements and standards.

SECTION 6: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 7: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 8: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 25th day of February 25, 2025, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Nicola Ricci
Planning Commission Chairman

ATTEST:

Henry K. Noh
Planning Director and
Secretary to the Planning Commission

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO)
CITY OF ONTARIO)

I, Gwen Berendsen, Secretary Pro Tempore of the Planning Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC25-014, was duly passed and adopted by the Planning Commission of the City of Ontario at their regular meeting held on February 25, 2025, by the following roll call vote, to wit:

AYES: DeDiemar, Gage, Lampkin, Ricci

5.3 CHECKLIST 80

Chapter 1: Introduction

Development and design standards regulate the intensity, style, size, and orientation of development. Objective design standards are quantifiable, verifiable, and measurable, offering a predictable and fair process for housing approvals. This document aims to streamline and endorse housing design that aligns with community consistency.

1.1 Purpose

The Objective Development and Design Standards (ODDS) introduced in this document align with The Ontario Plan (TOP) Policy Plan (general plan) and the Ontario Development Code to provide objective standards for streamlined ministerial approval of residential multiple-family and mixed- use development projects consistent with state law and implementation of TOP goals and policies.

The purpose of the Residential ODDS meets 2 primary objectives to:

1. **Comply with state law.** The ODDS provide standards for design, construction, review, and approval of multiple-family residential and mixed-use development, consistent with state law.

2. **Implement TOP's Policy Plan.** The ODDS implement the multiple-family residential and mixed-use land use designations in the Land Use Element and the policies in the Community Design Element, including the vision and intended outcomes of Place Types identified in Figures CD-01 through CD-07.

1.2 Who is this document for?

This document is intended for developers and property owners in the development of real property in the City of Ontario. It serves as a guide for clear communication between property owners, designers, developers, and City staff outlining the key elements of quality design. For property owners, it offers a concise understanding of design elements that are consistent with the Policy Plan and required by the Development Code.

1.3 Applicability

In addition to any objective standards imposed through the underlying base zone, the ODDS document provides standards for housing developments limited to the following areas (refer to the Policy Plan Land Use Plan Exhibits LU-01, LU-04, and CD-01 and the official Zoning Map):

- **Multiple-Family Development.** Applies to all multiple-family residential categories as shown on Policy Plan Land Use Plan Exhibit LU-01 (LMDR, MDR, and HDR, and Mixed-Use land use designations).

- **Mixed-Use Development.** Applies to mixed-use categories as shown on Policy Plan Land Use Plan Exhibit LU-01and associated Place Types as shown on Exhibit CD-01.

1.4 User guide

1. **Identify TOP Policy Plan land use designation and zoning district.**

   a. Refer to Exhibit LU-01 Land Use Plan and identify land use designation.

   b. Refer to the Official Zoning Map to verify zoning and whether the project falls within the Specific Plan or Planned Unit Development (PUD) and adhere to the standards outlined in each document.

   c. Development applications shall utilize ODDS wherever PUD or Specific Plan standards are silent.

2. **Apply multiple-family (Chapter 2) or mixed-use (Chapter 3) development standards.**

3. **Select architecture (Chapter 4).**

   For each project type select 1 of the following 6 styles: Mission-Spanish Colonial Revival, Craftsman, American Mercantile, Tuscan, Modern, or Farmhouse.

4. **ODDS checklist.**

   Fill out the ODDS checklist.

Chapter 2: Multiple Family Standards

2.1 Site Design Standards

2.1.1 Site design

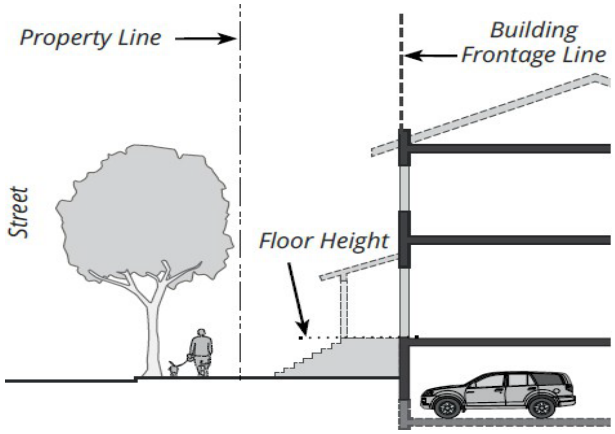
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows:

    a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way.
    b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way.
    c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.
    d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way.

2.1.2 Site access

1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley.
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway.

2.1.3 Parking



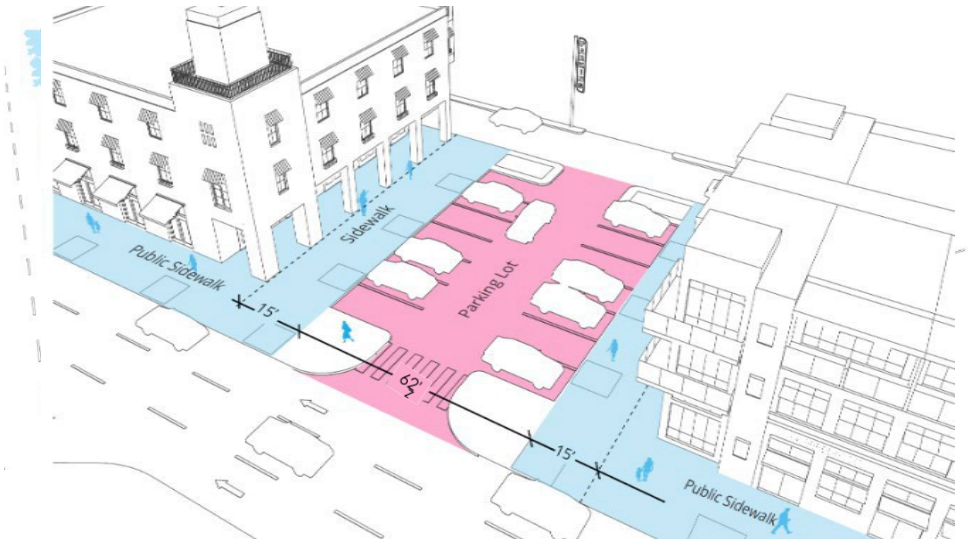
A. Placement on site

Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:

1. **Surface parking.**

    a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property line, or aligned with the building façade, whichever is greater.
    b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces.
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade.
4. **Subterranean parking** A subterranean parking structure may extend to all property lines.
5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court (see Figure 2.1-1).

Figure 2.1-1 Semi-subterranean parking



B. Surface parking lot design

Surface parking lots shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:

1. **Screening**
    a. **Street-adjacent parking lots**
        i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet in height.
        ii. Walls and hedges must be a minimum 18 inches from the back of the sidewalk.
        iii. Landscaped berms are prohibited.
    b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs.
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings.

C. Parking court design

Figure 2.1-2 Parking Court

1. **Design standards.**
    a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet (see Figure 2.1-2).
    b. The parking court shall consist of only 1 parking bay, and this bay shall not exceed a maximum width of 62 feet.

c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.

D. Parking structure design

1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum 2 design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in *Section 2.2.2 Building Types* (see Figure 2.1-3).
2. **Parking structure standards**
   a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet.
   b. Single access lane driveways into the structure shall not exceed 14 feet in width.
   c. Parked vehicles shall be screened from view from adjoining streets.
   d. Signs as shall be consistent with Division 8: Sign Regulations of Ontario Development Code.

Figure 2.1-3 Parking structure and façade design

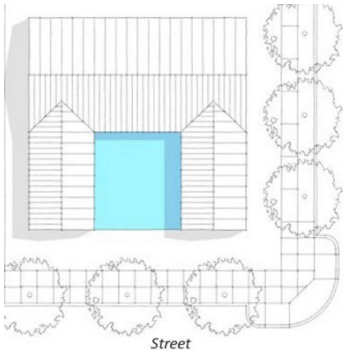
2.1.4 Open space standards

A. Common open space and public frontage

1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:
   a. **Close to parks.** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size.
   b. **Common open space types.** 1 or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.
2. **Access and visibility.** At-grade open space shall be accessible and visible from the adjacent ground floor.

B. Common open space types

Forecourt



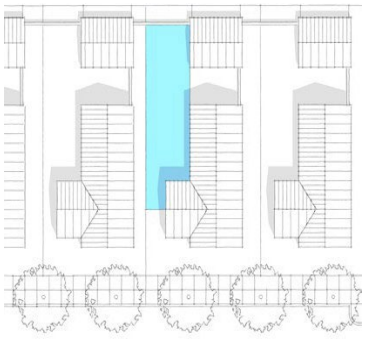


Figure 2.1-4 Forecourt

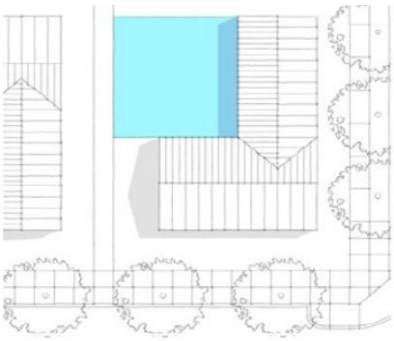
1. Design standards

a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.
b. **Minimum dimensions** Forecourts shall be a minimum of 15 feet by 15 feet.



Side garden

Figure 2.1-5 Side Garden

1. Design standards

a. **Minimum side garden dimensions**: 15 feet by 15 feet.
b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:
   i. Up to a total of 30 percent of the side garden's width or length.
   ii. A ground-floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden.

Court

Figure 2.1-6 Court Configuration

1. Design standards

a. **Minimum dimensions**: All courts shall be a minimum of 20 feet by 30 feet.
b. **Enclosure**
   i. A court shall have building walls on a minimum 2 sides, while the third and fourth side can be defined by architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).
   ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).
c. **Access**
   i. Courts shall be accessed from the street or walkway.
   ii. Units shall be allowed to take direct access through a court.
d. **Encroachments**
   i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard.

ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court.

e. **Common area** A court shall serve as communal spaces and pedestrian access.

f. **Amenities** A court shall include a minimum 1 of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.

Passage

1. **Design standards**

a. Location. Passages shall be provided between buildings or side gardens.

b. Size. Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side.

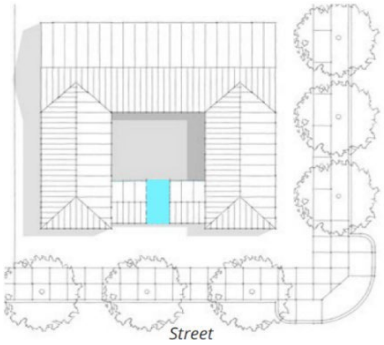


Figure 2.1-7 Passage configuration

C. Private open space

1. **General standards**

a. A minimum of 60 square feet of private open space shall be provided for each residential unit and a minimum 1 of the private on-site open space types shall be provided.

b. **Exception**: Private on-site open space shall not be required for a project site that is located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.

D. Private open space types

Private roof deck

1. **Description** A private open space located on the roof of a building dedicated to a single unit.
2. **Design standards** Minimum dimensions of 7 feet by 7 feet.

Backyard

1. **Description**. A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.
2. **Design standards.**
   a. **Size**. Minimum dimensions of 20 feet by 15 feet.
   b. **Encroachments**. Encroachment into the backyard is allowed up to 30% of the rear yard area.

Architectural façade elements as private open space

1. **Description** The following elements defined in *Section 2.3 Architectural Façade Elements* may be used to meet on-site private open space requirements.
   a. Balcony
   b. Terrace Balcony

Entry elements as private open space

1. **Description** The following elements defined in Section 2.4 Entry Elements may be used to meet on-site private open space requirements.
    a. Dooryard
    b. Porch

2.1.5 Landscaping

1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).

2.1.6 Fences and walls

1. **Fence and wall heights** Walls and fences shall be designed in compliance with the applicable standards contained in Division 6.02 (Walls, Fences, and Obstructions) of the Ontario Development Code.

2.2 Multiple-Family development standards

The following tables and associated standards for multiple-family development standards covering new residential construction, additions, remodels, or repurposed uses that necessitate an entitlement or building permit from the city. all standards listed under table 2.01 Multiple-Family Development Standards are applicable to all multiple-family projects including projects within mixed-use zones.

Table 2.01: Multiple-Family Development Standards

Requirements	Development Type			Additional Regulations
	Multiple-Family Residential			
	Mixed-Use Building Type			
A. BUILDING DEVELOPMENT STANDARDS				
1. Minimum Setback from Public Street Property Lines	**Urban (25 du/ ac or greater)**	**Neighborhood (Less than 25 du/ac)**	**Housing (Less than 25 du/ac and 5 units or less)**	Note 9
a. Arterial	0 feet	10 feet	14 feet	
b. Collector	5 feet	10 feet	14 feet	
c. Local	5 feet	15 feet	20 feet	
2. Minimum Setback from Interior Project Boundary Property Lines	5 feet			
3. Minimum Setback from Public Alley Property Lines	5 feet			
4. Minimum Setback from Private Drives/Alleyways (from edge of drive aisle)				
a. Living Area	10 feet			
b. Garages and Other Nonhabitable Structures	10 feet			
5. Minimum Setback from Dwellings to Parking Spaces				

Requirements	Development Type	Additional Regulations
	Multiple-Family Residential	
	Mixed-Use Building Type	
a. Living Area	10 feet	
b. Garages and Other Nonhabitable Structures	5 feet	
6. Minimum Setback from Parking Space or Drive Aisle to Wall or Fence	5 feet	
7. Minimum Separation Between Detached Buildings		
a. Dwelling Front to Front	< 2-Stories: 25 FT; ≥ 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
b. Dwelling Front to Rear	< 2-Stories: 25 FT; ≥ 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
c. Dwelling Front to Side	< 2-Stories: 25 FT; ≥ 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
d. Dwelling Side to Side	< 2-Stories: 10 FT; ≥ 3 Stories: 15 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
e. Dwelling Side to Rear	15 FT; unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Massing and Façade Design	Note 5
f. Dwelling Rear to Rear	20 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
8. Garage to Garage (or other nonhabitable structures)	30 FT – Entry to Entry 30 FT – Entry to Side 10 FT – Side to Side 10 FT – Side to Rear	Note 5
9. Minimum Storage Space	240 CF	Note 4
10. Maximum Street Façade Height		
a. Downtown District	45 feet	Note 8
b. Other Districts & Corridors:	n/a	
c. Neighborhood Centers:	35 feet	
11. Maximum Building Height		
a. Downtown District	n/a	Note 8
b. Other Districts & Corridors:	n/a	Note 5
c. Neighborhood Centers:	60 FT	Note 5
12. Minimum Setback from Major Pipelines	50 FT (to habitable structures)	Note 7

Notes:

1. *An existing lot of record that is substandard as to minimum "project" area and/or dimension(s), shall be permitted all the development rights of the zone in which it is located.*
2. *The density range shall be consistent with the underlying Mix-Used Category identified in Figure LU-04, Mixed Use Areas and defined in Table LU-02, Land Use Designations Summary Table, of the Policy Plan (General Plan). A density bonus and other incentives pursuant to GC Sections 65915 through 65918, may be granted by the Approving Authority. Refer to Development Code Subsection 6.01.010.H (Density Bonus and Other Incentives).*

3. *A health risk assessment shall be required for multiple-family development projects located within 1,000 feet of a freeway, as determined by the Zoning Administrator.*
4. *Lockable private storage space for each residential unit shall be provided within a garage or storage building, or a space directly accessible from the dwelling. Exterior closets accessed from patios or balconies may be used if screened from public view.*
5. *Required building separation, and allowable heights may be differ based on massing type and adjacent uses. See Section 2.2.2 Building Types for additional information regarding building separation. See section 2.2.1 for standards adjusting allowable height. The following items are exceptions to height standards identified in this table and those noted in section 2.2.1:*
   a. *Equipment. Chimneys, elevators, stairs, mechanical houses, screened vents, HVAC equipment, and solar panels may exceed California Building Code height limits.*
   b. *Architectural Elements. Architectural elements such as spires, steeples, or roof lanterns may exceed height limits if consistent with the architectural style outlined in Chapter 4 of the ODDS.*
6. *A lot designated as Mixed-Use (MU) in the Policy Plan (General Plan) shall be developed at no less than the minimum number of dwelling units allowed within the specified density range for the applicable Mixed-Use Category, except that If, because of the configuration/design of a lot, the minimum residential density cannot be achieved, the lot may be developed with non-residential uses.*
7. *Includes major high-pressure pipelines for fuel oil, gasoline, and diesel and aviation fuels within the City. Existing pipelines include:*
   a. *Two parallel pipelines (a 16-inch and a 20-inch) that enter the City at Benson Avenue, traveling parallel to the northerly side of the Southern Pacific right-of-way to Ontario International Airport, then parallel to the southerly side of the Southern Pacific right-of-way, then parallel to the northerly side of the right-of-way beyond Ontario International Airport, then exiting the City at Etiwanda Avenue; and*
   b. *Two parallel pipelines that traverse the easterly portion of the City, entering the City at the southerly portion of Milliken Avenue, then traveling north under Milliken Avenue to Inland Empire Boulevard, then east to Rochester Avenue, then north to the City Limits.*
8. *In the Downtown District, the maximum 45-foot façade height shall extend no more than 70 percent of the frontage. The remaining 30 percent of the frontage shall include an upper-level setback of at least 12 feet, starting at the third story. Usable outdoor spaces, such as roof decks or terraces, may occupy the roof area of the upper-level setback. See Urban Form standards under Section 2.2.2A Urban Building Type.*
9. *Projects less than 1 acre in size but exceeding 25 du/ac can use Neighborhood or Housing Form in lieu of the Urban massing form.*

2.2.1 Height Standards

1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility.
2. **Multiple family development types** The following height limits shall apply to all proposed multiple family development types.
   a. Buildings within 100 feet of single-family residential dwellings must not exceed 35 feet or the height of adjacent residential buildings, whichever is greater.
   b. Buildings within 100 feet of undeveloped single-family zone parcels shall not exceed 35 feet in height.

2.2.2 Building Types

1. Identify the suitable building type for the project based on its density, including**:**

a. "**Urban**" (applies to multiple-family development projects with 25 dwelling units per acre or more*). Projects less than 1 acre in size but exceeding 25 du/ac can use neighborhood or housing Form in lieu of the urban massing form.*

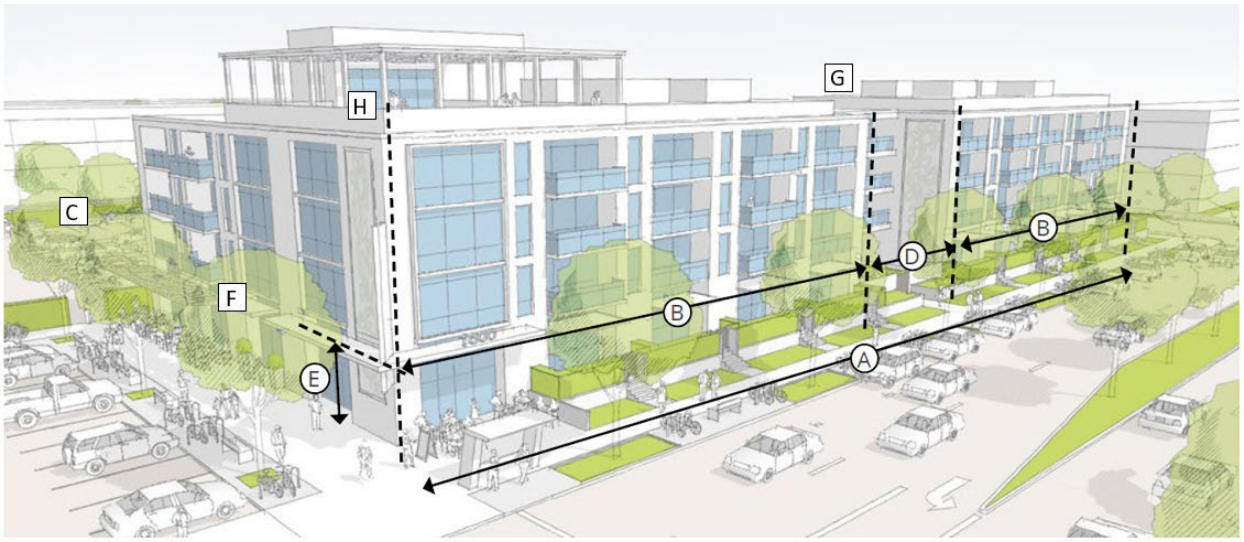
b. "**Neighborhood**" (applies to multiple-family development projects with fewer than 25 dwelling units per acre that include buildings with more than 5 units).

c. "**Housing**" (applies to multiple-family development projects with fewer than 25 dwelling units per acre that *include buildings with 5 or fewer units)*.

Table 2.2-1 Building Types

Land Use Density	Building Types
Greater than 25 du/ac	Urban
Less than 25 du/ac and greater than 5 units	Neighborhood
Less than 25 du/ac and 5 units or less	Housing form

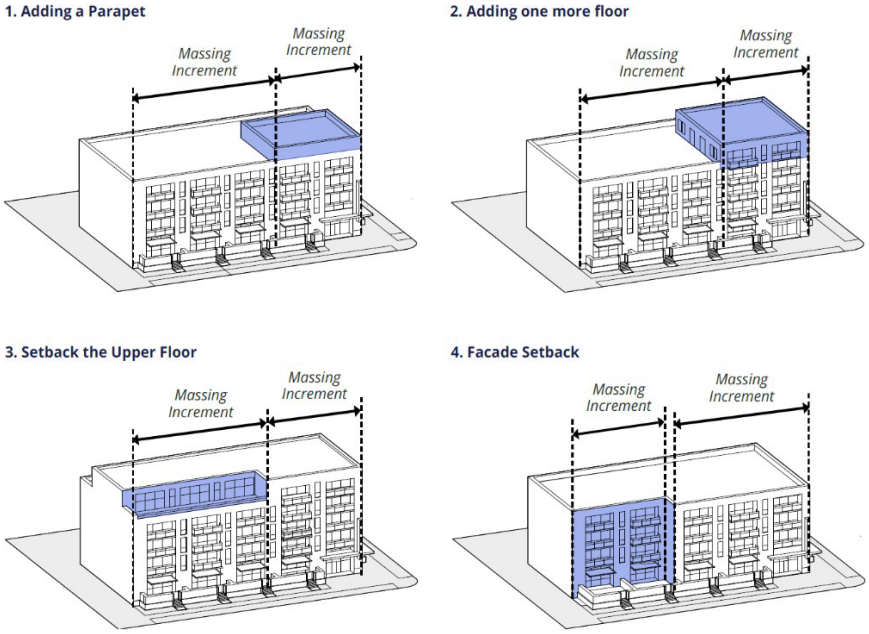
A. Urban massing and façade design



Urban massing and façade design standards are required for all multiple-family developments projects with 25 du/ac or more (see Figures 2.2-1 and 2.2-2).

Massing increments

Massing increments are visually discrete design compositions that are distinguishable from each other and have a coherent look and character from the ground to the top of the facade. Massing increments appear as either distinct buildings or distinct parts of a single building.



1. **Massing standards**
   a. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows:
      i. The maximum length of a single massing increment shall not exceed 150 feet.
      ii. A minimum 2 distinct massing increments shall be provided.
   b. **Articulation of massing increments** Individual massing increments shall be differentiated from 1 another using a minimum 1 of the following massing strategies:
      i. Vary parapet height by a minimum of 3 feet
      ii. Increase number of stories
      iii. Set back upper floor. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade.
      iv. Set the entire facade back a minimum of 10 feet for 20 feet
      v. Incorporate tower element
   c. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.
   d. **Repeating massing increment design** A massing increment design may be repeated on the same project elevation. Repeated massing increments shall be separated by a distinct massing increment.

Figure 2.2-1 Urban: Massing Diagram

2. Element standards	Standards
a. Building façade along font lot line	400 feet max.
b. Massing increment	150 feet max.
c. Space between buildings	0 feet min.
d. Façade setback (if elected)	10 feet x 10 feet min.
e. Building base height	15 feet min.
f. Building façade alongside lot line	200 feet max.
g. Height difference between massing increments	3 feet min.
h. Upper-level setback from facade	15 feet min.

Figure 2.2-2 Urban: Massing strategies

Façade Composition

1. **Façade composition standards**

Multi-story building façades The building facade shall be divided into a base and body as follows:

a. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies:
   i. Provide a string course at the top of the first story
   ii. Specify base materials different from rest of façade
   iii. Specify base colors different from rest of façade
   iv. Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements.

b. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:
   i. Windows shall be organized in bays, bands, curtain wall, and grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.
   ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.

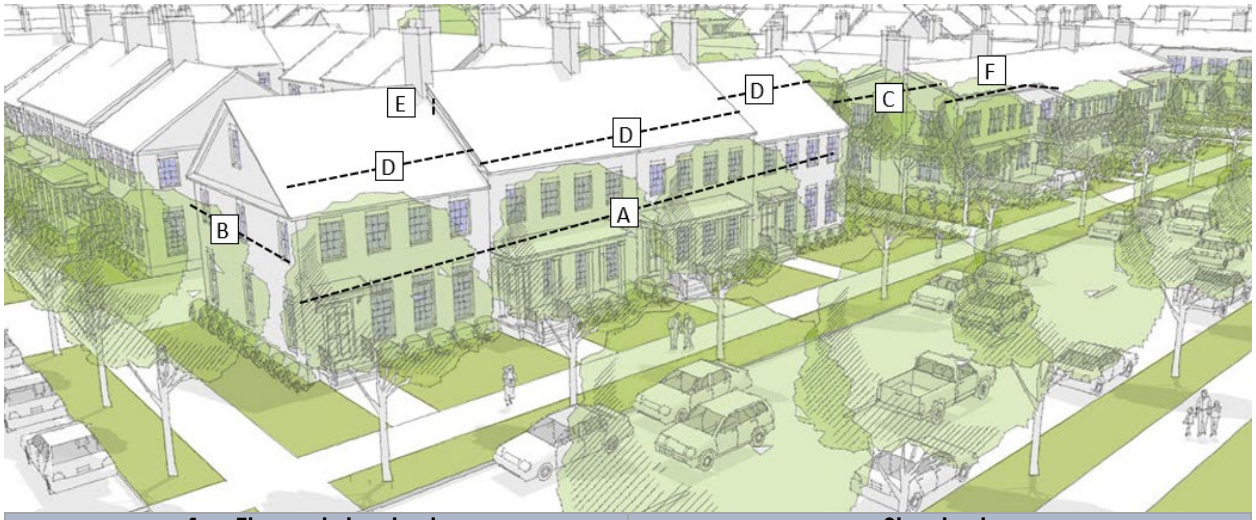
Fenestration design

Fenestration design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.

1. **Façade fenestration standards**
   a. **Minimum fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the façade (see Figure 2.2-3).

      i. **Ground floor**
         a. Front lot line: 70% minimum
         b. All other frontages: 50% minimum
         c. Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade
         d. Ground floor bathroom windows are prohibited on facades that face front lot line
      ii. **Upper floors** 15% minimum

Figure 2.2-3 Urban: Fenestration Diagram



B. Neighborhood massing and façade design

Neighborhood massing and façade design standards are required for all multiple-family development types applicable to multiple-family development projects with fewer than twenty-five (25) du/ac that include buildings with more than 5 units (see Figure 2.2-4).

Massing increments

Figure 2.2-4 Neighborhood: Massing Diagram

1. Element standards	Standards
A. Building façade along front lot line	135 feet max.
B. Building façade length alongside interior lot line	135 feet max.
C. Space between buildings	15 feet min.
D. Massing increment	75 feet max.
E. Height difference between massing increments	2 feet min.
F. Façade setback (if elected)	10 feet x 20 feet

1. **Massing standards.**

   a. **Size of massing increments.** Building facades along front and side lot lines that face public streets and are longer than 135 feet shall be divided into massing increments as follows:

      i. The maximum length of a single massing increment shall not exceed 75 feet.
      ii. A minimum of 2 distinct massing/architectural increments shall be provided using 1 strategy from the massing strategies list and 1 strategy from architectural strategy list (see Figure 2.2-5).

   b. **Massing strategy list**

      i. Vary height by a minimum of 3 feet.
      ii. Increase number of stories.
      iii. Set back upper floors by a minimum 15 feet.
      iv. Set the entire facade back a minimum of 10 feet for twenty feet.
      v. Increase story height.
      vi. Incorporate tower element.

Figure 2.2-5 Neighborhood: Examples of Massing Strategies Diagram

c. **Architectural strategy list**

i. Use different facade materials and/or colors.
ii. Window treatment and design. Use different window types, configurations, and/or frame colors.
iii. Diversify facade elements (balconies, trellises, chimneys, awnings) as per Section 2.3 Architectural Façade Elements.
iv. Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in Section 2.4 Entry Elements.
v. Massing increments that have distinct facades, shall appear as distinct buildings.
vi. A massing increment design can be repeated twice on the same project elevation, with a distinct separation between repeated increments.

Façade composition

1. **Façade composition standards**

a. **Multi-story building façades** The building facade shall be divided into a base and body as follows.

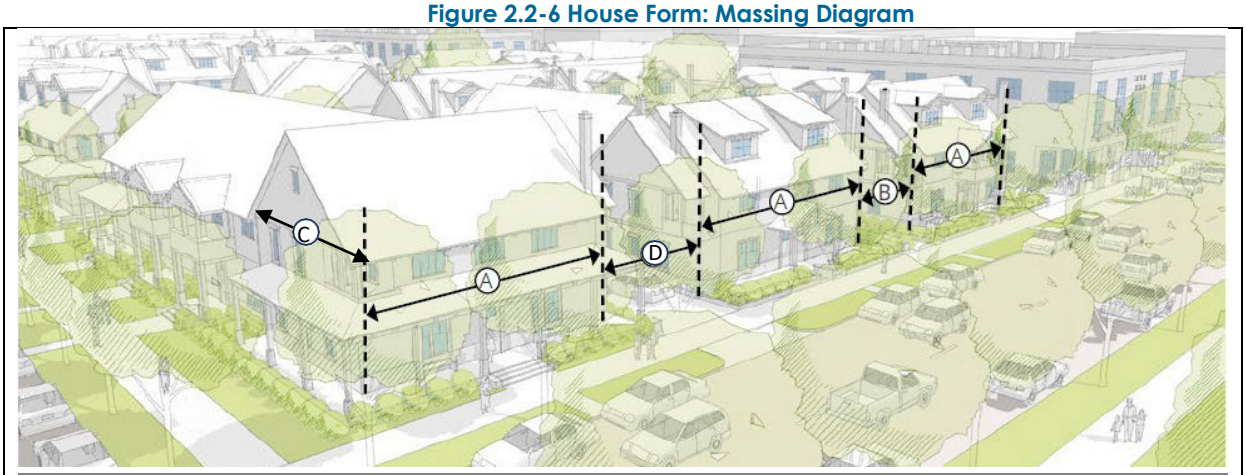
i. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum 2 of the following strategies.

(a) Provide a string course at the top of the first story.
(b) Specify base materials different from rest of façade.
(c) Specify base colors different from rest of façade.
(d) Provide a ground floor Arcade or Gallery per *Section 2.3 Architectural Façade Elements*.

ii. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:

(a) Windows shall be organized in bays, bands, curtain wall, and/or grid of windows consistent with the Facade Fenestration Standards for the Neighborhood massing type.
(b) Each massing increment's entire facade composition must be contained within its boundaries, with no overlap of facade elements, like window openings and balconies, across the division between increments.

Fenestration Design



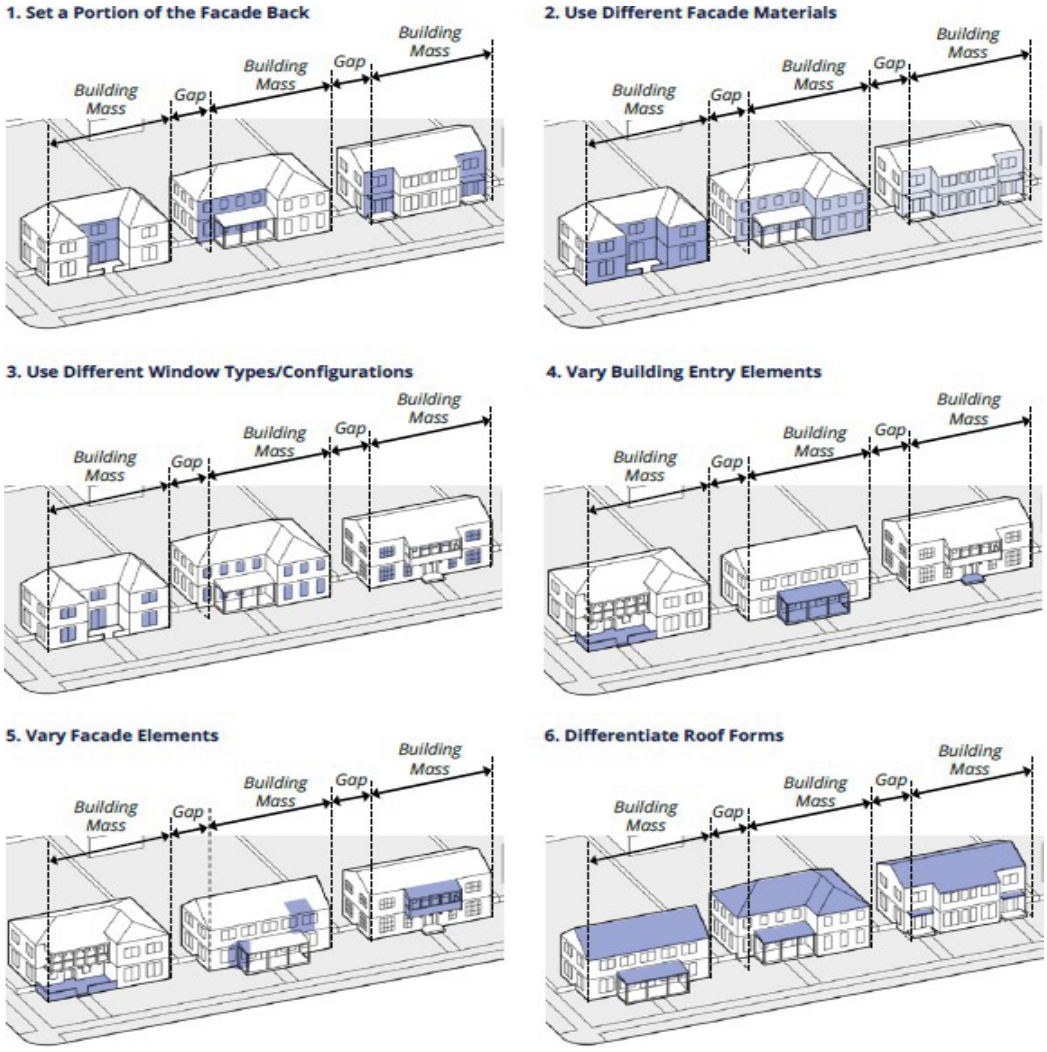
1. **Façade fenestration standards**

a. **Minimum Fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:
   i. **Ground Floor**: 30% minimum.
      (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.
      (b) Ground floor bathroom windows are prohibited on facades that face the front lot line.
   ii. **Upper floors**: 15% minimum.

C. House-form massing and façade design

House-form massing and façade Design standards for projects with densities below 25 du/ac that include buildings with 5 or fewer units (see Figure 2.2-6).

Figure 2.2-6 House Form: Massing Diagram



1. Element standards	Standards
A. Building Façade length along font lot line	60 feet max.
B. Massing Increment	60 feet max.
C. Building Façade length alongside lot line	60 feet max.
D. Space between buildings	15 Feet

2. **Massing and façade composition standards**

a. **Massing increments** A massing increment shall include the whole length of a single building façade, up to 60 feet in length. Only 1 massing increment per building façade shall be included (see Figure 2.2-7).
b. **Length of buildings** Buildings along front and side lot lines that face public streets shall be no longer than 60 feet.
c. **Space between buildings** Buildings along front and side lot lines shall be separated by a minimum15 feet.
d. **Articulation of building façade** Frontages along front and side lot lines must differ from neighboring buildings on-site using a minimum of 2 of the specified massing and architectural strategies:

i. **Façade setback** Setting a portion of the facade back a minimum of 2 feet for a length of 20 feet.
ii. **Material or color** Use different facade materials and/or colors consistent with the architectural style.
iii. **Window treatment and design** Use different window types, configurations, and/or frame colors.
iv. **Architectural façade elements** Vary façade elements (balconies, trellises, chimneys, awnings) according to *Section 2.3 Architectural Façade Elements*.
v. **Entry elements** Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in *Section 2.4 Entry Elements*.
vi. **Vary roof form** Vary the roof form of different increments such as gabled, hipped, and others consistent with the architectural style of the building (selected from Chapter 4).

Figure 2.2-7 House Form Massing Strategies

Fenestration Design

1. **Façade fenestration standards**

Minimum fenestration Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:

i. **Ground floor**: 30% minimum.
   (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.
   (b) **Exception**: Windows on garage panel door.
   (c) Ground floor bathroom windows are prohibited on facades that face front lot line.
ii. **Upper floors**: 15% minimum.
iii. The horizontal distance between wall openings shall not exceed 15 feet within a facade or massing increment.

2.2.3 Materials and Detailing

Building Materials

1. **Prohibited materials**

a. Fiberglass or plastic (false) architectural or facade elements or ornamentations are prohibited.
b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street.
c. Reflective materials, such as mirrored glass, shiny metal, and chrome.

2. **Combining materials** When combining 2 or more wall materials on 1 facade:
   a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco above masonry).
   b. Vertical joints between different materials shall only occur at inside corners.

Windows and Doors

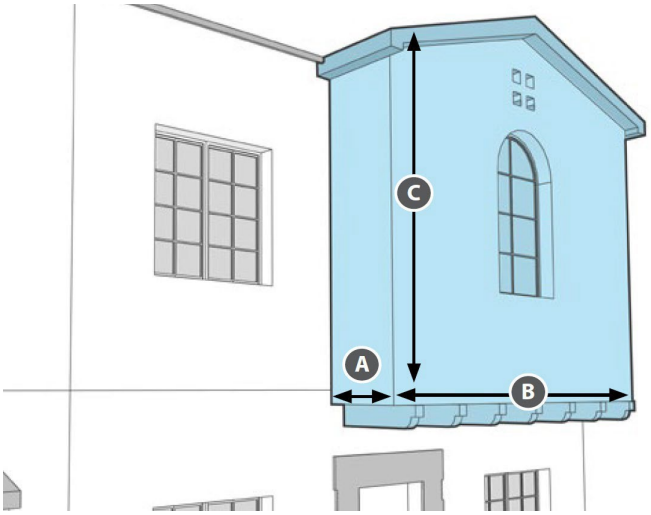
1. **Materials and types**

a. **Window recess** Windows shall be recessed specific to each building's architectural style listed in Chapter 4: Architectural styles but shall be no less than 2 inches for any style.
b. **Window Material**
   i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing and profile thickness and employ muted patterns and colors consistent with the building's architectural style.
c. **Trim**
   i. **Window and door trim materials** Wood or cement fiber board is permitted.
   ii. **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber, reinforced concrete, and cement fiber board.

2.3 Architectural façade elements

2.3.1 Awning

Figure 2.3-1 Awning Diagram



1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Clearance above ground	8 feet	Not Applicable
C. Length	See Below	

2. Design standards

a. **Encroachment** Residential Awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.
b. **Material** Residential Awnings shall be of a simple shed form and made of code-compliant fire-resistant material.
c. **Upper floors** Each individual awning shall cover no more than 1 window opening.

2.3.2 Projecting room

Figure 2.3-2 Projecting Room Diagram

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	2 feet
B. Width	Not Applicable	20 feet
C. Height	Not Applicable	2-story building: 1 story max. 3-story building: 1 story max. 4-story+ building: 2 stories maximum.

2. Design standards

a. **Encroachment** Projecting rooms may encroach into the setback or public right-of-way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.

b. **Support**
   i. Building projecting rooms shall have visible supports (I.e., beams, braces, or brackets).
   ii. Building projecting rooms shall be setback 10 feet from an adjacent property line

c. **Space between projecting rooms** Space between Projecting Rooms shall be 20 feet within the same building plane.

2.3.3 Bay Window

Figure 2.3-3 Bay Window Diagram

1. Element standards	Minimum	Maximum
A. Height	Not Applicable	10 feet
B. Width	Not Applicable	10 feet

2. Design standards.

a. **Encroachment** Bay windows may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.
b. **Dimensions** Bay windows shall be a maximum of 10 feet wide and shall have a height that is equal to or greater than their width.
c. **Depth:** The depth of Bay Windows shall be a minimum of 3 feet.
d. **Façade placement** Bay windows shall be placed a minimum of 2 feet from any building corner and a minimum of 3 from any other bay window.
e. **Fenestration** Bay windows shall consist of a minimum 75% transparent fenestration.

2.3.4 Balcony

Figure 2.3-4 Balcony Diagram

1. Element standards	Minimum	Maximum
A. Height	Not Applicable	Refer to Design Standards
B. Width		
C. Depth		

2. Design standards

a. **Encroachment** Balconies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.
b. **Façade projection or recession** Balconies may project from the facade, be recessed into the facade, or a combination of the two.
c. **Required private open space** Balconies meeting private open space standards shall have a minimum dimension of 7 feet by 7 feet.

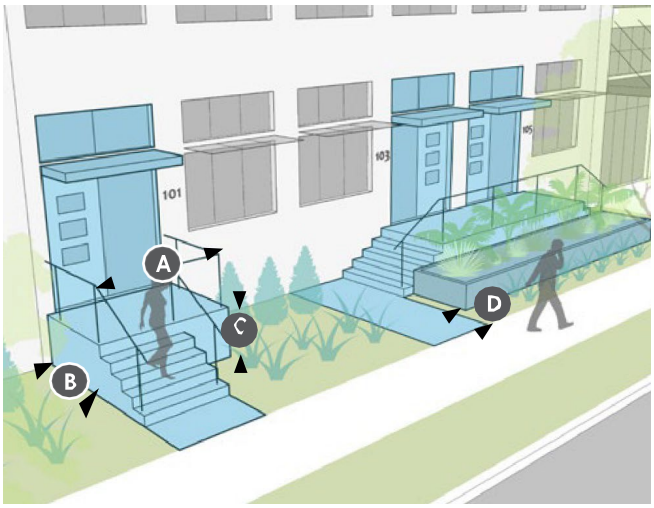
2.3.5 Terrace balcony

Figure 2.3-5 Terrace Balcony Diagram

1. Element standards	Minimum	Maximum
A. Height	Not Applicable	Refer to Design Standards
B. Width		
C. Depth		

2. Design standards

a. **Encroachment** Terrace balconies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.



b. **Support**
   i. Terrace balconies shall be supported by continuous walls that extend all the way to the ground.
   ii. Terrace balconies shall not be designed as posts, columns, or pillars.

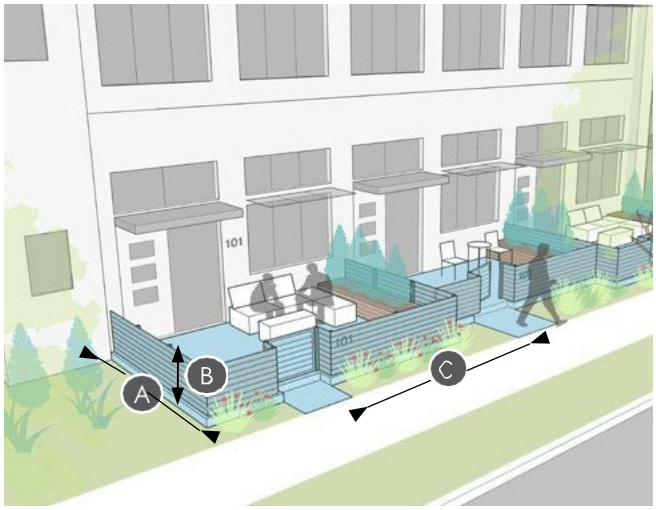
c. **Required private open space** Terrace balconies meeting private open space requirement shall meet or exceed the 7 feet by 7 feet standards specified in 2.1.5 Open Space Standards.

2.4 Entry elements

2.4.1 Stoop

Figure 2.4-1 Stoop Diagram

1. Element standards	Minimum	Maximum
A. Stoop Width	4 feet	8 feet
B. Stoop Depth (not including stairs)	4 feet	8 feet
C. Stoop Floor Depth	1.5 feet	3 feet
D. Planter/ Fence Height	Not Applicable	3 feet



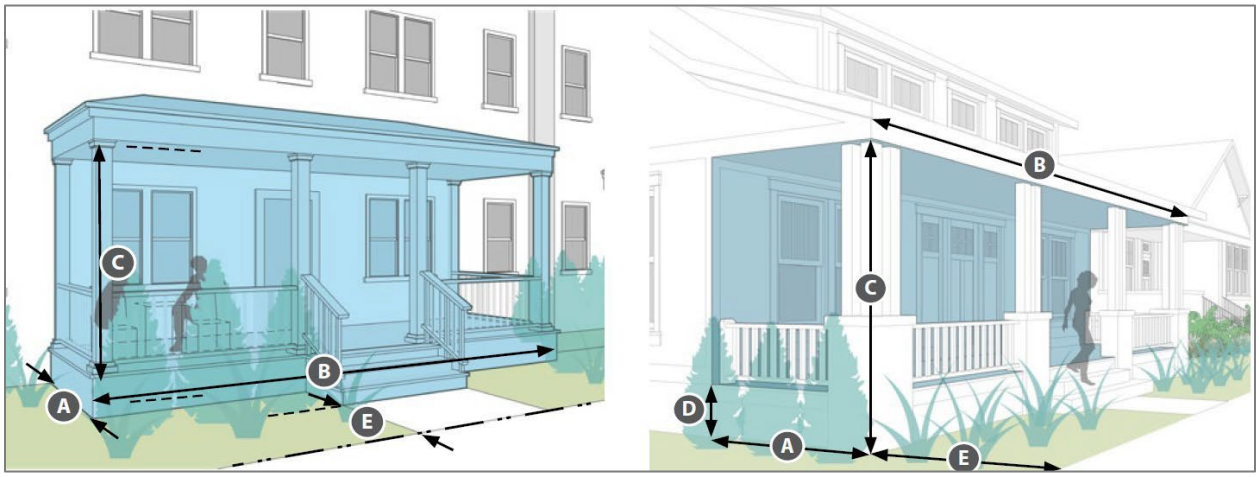
2. Design standards

a. **Relationship to entry** Stoops must align directly with the unit entry(s) they serve.
b. **Number of units served** Stoops shall provide access to a maximum of 2-unit entries.
c. **Lobby entries** Stoops may provide access to a lobby entry.
d. **Stoop stairway orientation** The exterior stoop stairway may be oriented perpendicular or parallel to the adjacent sidewalk.

3. Landscaping Landscaping shall be planted on the sides of the stoop, either at grade or in raised planters. Raised planters shall have a minimum depth of 12 inches.

2.4.2 Dooryard

Figure 2.4-2 Dooryard Diagram



1. Element standards	Minimum	Maximum
A. Depth, Clear	8 feet	Not Applicable
B. Finish level above sidewalk	Not Applicable	3 feet
1. Length of Terrace	Not Applicable	150 feet
C. Distance between stairways	Not Applicable	50 feet

2. Design standards

a. **Relationship to Entry** Dooryards shall align directly with the unit entry(ies) they serve.
b. **Number of Units Served** Dooryards shall provide access to a maximum of 2-unit entries.
c. **Enclosure** Dooryards shall be enclosed by a maximum 3-foot high, decorative walls, fences, or low hedges.
d. **Architectural Style** Walls and/or fences shall match the building's architectural style.
e. **Doorway Stairway Orientation** If the doorway is raised above grade, the exterior stairway for raised Dooryards shall be oriented perpendicular or parallel to the adjacent sidewalk.

2.4.3 Porch

Figure 2.4-3 Porch Diagram

1. Element standards	Minimum	Maximum
A. Porch depth (excluding stairs)	8 feet	Not Applicable
B. Porch width	8 feet	Not Applicable
C. Porch height	8 feet	12 feet
D. Floor height	1.5 feet	3 feet
E. Between porch and front Property Line	5 feet	Not Applicable

2. Design standards

a. **Number of units served** Porches shall provide access to multiple ground-floor unit doors.
b. **Wrap-around porches** Porches shall wrap around building corners.

Chapter 3: Mixed Use Design Standards

3.1 Site Design Standards

General Design and Development Standards that meet or exceed all standards are applicable to all Projects.

3.1.1 Site Design

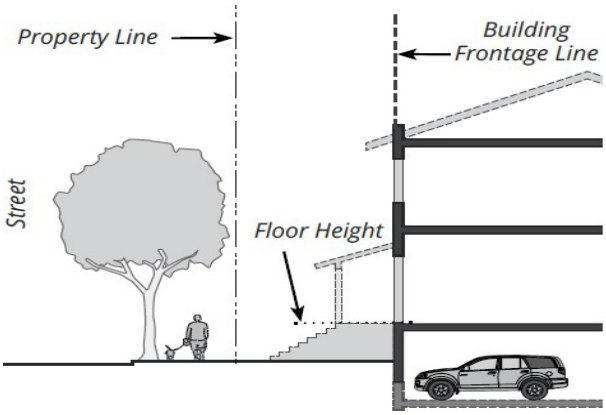
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows**:**
    a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way.
    b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way.
    c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.
    d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way.

3.1.2 Site Access

1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley.
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway.

3.1.3 Parking

Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:



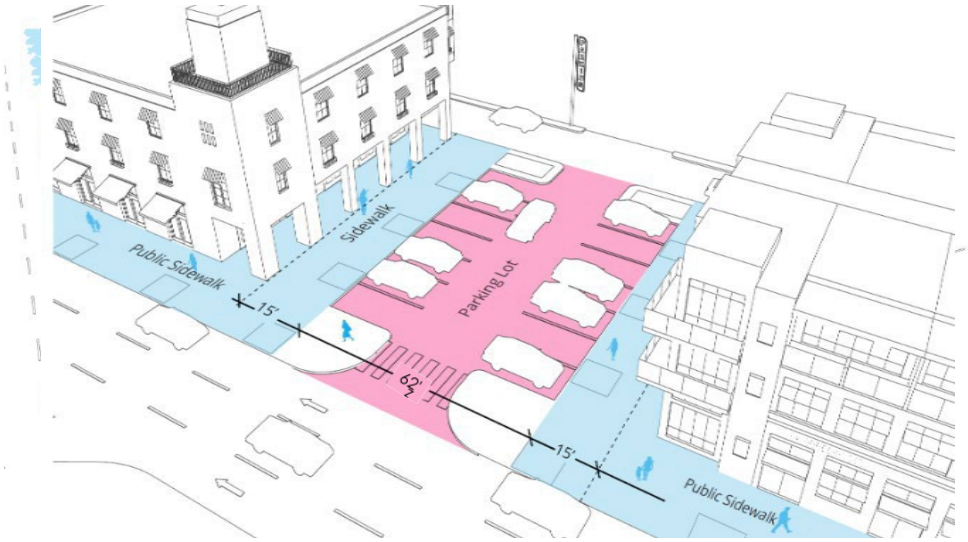
A. Placement on site

Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:

1. **Surface parking**
    a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property line, or aligned with the building façade, whichever is greater.
    b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces.
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade.
4. **Subterranean parking** A subterranean parking structure may extend to all property lines (see Figure 3.1-1).

5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court.

Figure 3.1-1 Semi-subterranean parking



B. Surface parking lot design

1. **Screening**
    a. **Street-adjacent parking lots**
        i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet in height.
        ii. Walls and hedges must be a minimum 18 inches from the back of the sidewalk.
        iii. Landscaped berms are prohibited.
    b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs.
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings.

C. Parking court design

Figure 3.1-2 Parking Court

1. **Design standards**
    a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet (see Figure 3.1-2).
    b. The parking court shall consist of only1parking bay, and this bay shall not exceed a maximum width of 62 feet.
    c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.

D. Parking structure design

1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum 2 design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in *Section 3.2.3 Building Types* (see Figure 3.1-3).
2. **Parking structure standards**
    a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet. Single openings shall be no wider than 14 feet.
    b. Parked vehicles shall be shielded from view from adjoining streets.
    c. The exterior elevations of parking structures facing a public street shall incorporate architectural elements from the project building.
    d. Vehicular entries shall be located a minimum 50 feet from the corner of a block.
    e. Signs shall be consistent with Division 8: Sign Regulations of Ontario Development Code.

Figure 3.1-3 Example of parking structure and Façade Design

3.1.4 Open Space Standards

This Section provides standards that direct the design of common and private on-site open spaces.

A. Common open space and public frontage

1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:
    a. **Close to parks** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size.
    b. **Common open space types** 1 or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.
2. **Access and visibility** At-grade open space shall be accessible and visible from the adjacent ground floor.

B. Common Open Space Types

Forecourt

1. **Design standards**
    a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.
    b. Minimum dimensions. Forecourts shall be a minimum of 15 feet by 15 feet.

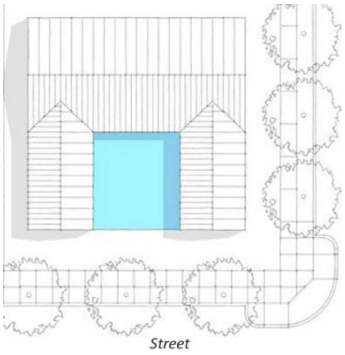


Figure 3.1-4 Forecourt

Side Garden

1. **Design standards**
    a. Minimum side garden dimensions: 15 feet by 15 feet.
    b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:
        i. Up to a total of 30 percent of the side garden's width and/or length.
        ii. A ground floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden.

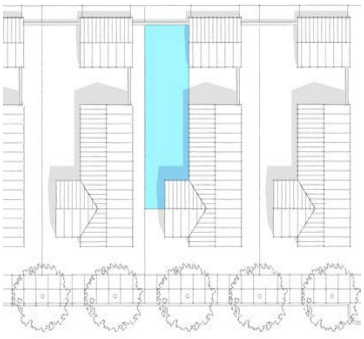

Figure 3.1-5 Side Garden

Court

1. **Design standard**

    a. **Minimum dimensions**: All courts shall be a minimum of 20 feet by 30 feet.
    b. **Enclosure**
        i. A court shall have building walls on at minimum 2 sides, while the third and fourth side can be defined by architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).
        ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).
    c. **Access**
        i. Courts shall be accessed from the street or walkway.
        ii. Units shall be allowed to take direct access through a court.

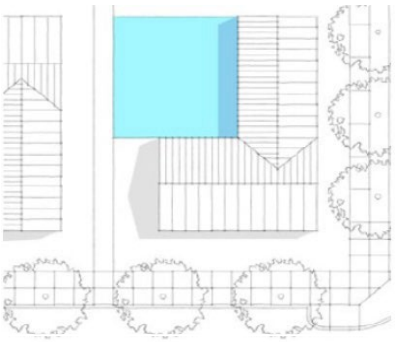

Figure 3.1-6 Court Configuration

d. **Encroachments**
   i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard.
   ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court.

e. **Common area** A court shall serve as communal spaces and pedestrian access.
f. **Amenities** A court shall include at minimum 1 of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.

Passage

1. **Design standards**
   a. **Location** Passages shall be provided between buildings or side gardens.
   b. **Size** Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side.

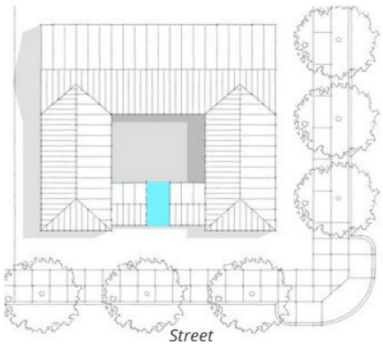

Figure 3.1-7 Passage Configuration

C. Private Open Space

1. General standards
   a. of 60 square feet of private open space shall be provided for each residential unit and a minimum of **1** or more of the private on-site open space types shall be provided, with the following.
   b. **Exception**: Private on-site open space shall not be required for a project site located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.

D. Private Open Space Types

Private Roof Deck

1. **Description** A private open space located on the roof of a building dedicated to a single unit.
2. **Design standards**
   a. Minimum dimensions of 7 feet by 7 feet.
   b. Materials, finishes, fixtures, and colors visible from the street shall be designed consistent with the architectural style of the building.

Backyard

1. **Description** A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.
2. **Design standards**
   a. Backyards are located behind the unit.
   b. Minimum dimensions of 20 feet by 15 feet.
   c. Encroachment into the backyard is allowed up to 30% of the space's width and/or length.
   d. Maximum projection for any ground floor element is 8 feet, with a 10-foot upper floor setback from property line if there's usable space above the first floor.

Architectural façade elements as private open space

1. **Description** The following elements defined in *Section 2.3 Architectural Façade Elements* may be used to meet on-site private open space requirements.
    a. Balcony
    b. Terrace Balcony

Entry elements as private open space

1. **Description** The following elements defined in *Section 2.4 Entry Elements* may be used to meet on-site private open space requirements.
    a. Dooryard
    b. Porch

3.1.5 Landscaping

This section provides standards for landscaping, materials, and Irrigation.

1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).

2. **Paths** Where front yards are landscaped, individual paths to the sidewalk shall be provided for each entrance
3. **Materials** Decorative accents. Paving materials shall incorporate decorative elements consistent with the architectural style of the building.

3.1.6 Fences and Walls

1. **Fence and wall heights** Walls and Fences shall be designed in compliance with the applicable standards contained in Division 6.02 (Walls, Fences, and Obstructions) of the Ontario Development Code.

3.2 Mixed Use Development Standards

The following tables and associated standards for Mixed-Use standards covering new residential construction, additions, remodels, or repurposed uses that necessitate an entitlement or building permit from the City. All standards listed under Table 3.01 Mixed-Use Development are applicable to all mixed-use projects.

Table 3.01 Mixed Use Development Standards per Building Type

Requirements	Mixed-Use Development Standards		Additional Regulations
	Mixed-Use Building Type		
A. BUILDING DEVELOPMENT STANDARDS			
Massing and Façade Design	***Main Street***	***Urban***	
1. Minimum Setback from Public Street Property Lines			Notes 2 & 8
a. **Arterial**	0 feet	0 feet	
b. **Collector**	0 Feet	5 feet	
c. **Local**	5 feet	5 feet	
2. Maximum Setback from Public Street Property Lines			
a. **Arterial**	5 feet	5 feet	
b. **Collector**	10 feet	10 feet	

Requirements	Mixed-Use Development Standards		Additional Regulations
	Mixed-Use Building Type		
c. **Local**	10 feet	10 feet	
3. Minimum Setback from Interior Project Boundary Property Lines	0 feet (attached to adjacent property) 10 feet (freestanding)		
4. Minimum Setback from Public Alley Property Lines	5 Feet		
5. Minimum Setback from Private Drives/Alleyways (from edge of drive aisle)			
a. **Living Area**	10 feet		
b. **Garages and Other Nonhabitable Structures**	5 feet		
6. Minimum Setback from Dwellings to Parking Spaces			
a. **Living Area**	10 feet		
b. **Garages and Other Nonhabitable Structures**	5 feet		
7. Minimum Setback from Parking Space or Drive Aisle to Wall or Fence	5 feet		
8. Minimum Separation Between Detached Buildings			
a. **Dwelling Front to Front**	< 2-Stories: 25 feet; > 3 Stories: 30 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
b. **Dwelling Front to Rear**	< 2-Stories: 25 feet; > 3 Stories: 30 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
c. **Dwelling Front to Side**	< 2-Stories: 25 feet; > 3 Stories: 30 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
d. **Dwelling Side to Side**	< 2-Stories: 5 feet; > 3 Stories: 5 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
e. **Dwelling Side to Rear**	15 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
f. **Dwelling Rear to Rear**	20 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
	30 feet – Entry to Entry		
	30 feet – Entry to Side		
g. **Garage to Garage (or other nonhabitable**	10 feet – Side to Side		
structures)	10 feet – Side to Rear		
9. Minimum Storage Space	240 CF		Note 4
10. Maximum Street Façade Height			
a. Arterial	45 feet	N/a	Note 8
b. Collector	N/a	N/a	
c. **Local**	N/a	N/a	
11. Maximum Building Height (from grade to top of plate)			
a. Arterial	Table 3.2-2 Mixed-Use Building Types		Note 8
b. Collector			
c. Local			
12. Minimum Floor-to- Floor Height			
a. Ground Floor (Non-residential /Residential)	15 feet / 10 feet		
b. Upper and Sub Levels	9 feet		
13. Minimum Setback from Major Pipelines	50 feet (to habitable structures)		Note 6

Notes:

1. *An existing lot of record that is substandard as to minimum "project" area and/or dimension(s), shall be permitted all the development rights of the zone in which it is located. New lots designated as Mixed-Use (MU) in the Policy Plan (General Plan) shall comply with the identified minimum.*
2. *The density range shall be consistent with the underlying Mixed-Used Category identified in Figure LU-04, Mixed Use Areas and defined in Table LU-02, Land Use Designations Summary Table, of the Policy Plan (General Plan). A density bonus and other incentives pursuant to GC Sections 65915 through 65918, may be granted by the Approving Authority. Refer to Development Code Subsection 6.01.010.H (Density Bonus and Other Incentives).*
3. *Measurement of the continuous frontage may include existing frontages, provided there is no more than 10 feet between the frontage of active ground floor uses in the existing building and those of the proposed development project.*
4. *Adequate lockable private storage space for each residential unit shall be provided within a garage or storage building, or a space directly accessible from the dwelling. Exterior closets accessed from patios or balconies may be used if screened from public view.*
5. *A lot designated as Mixed-Use (MU) in the Policy Plan (General Plan) shall be developed at no less than the minimum number of dwelling units allowed within the specified density range for the applicable Mixed-Use Category, except that If, because of the configuration/design of a lot, the minimum residential density cannot be achieved, the lot may be developed with non-residential uses.*
6. *Includes major high-pressure pipelines for fuel oil, gasoline, and diesel and aviation fuels within the City. Existing pipelines include:*
   a. *Two parallel pipelines (a 16-inch and a 20-inch) that enter the City at Benson Avenue, traveling parallel to the northerly side of the Southern Pacific right-of-way to Ontario International Airport, then parallel to the southerly side of the Southern Pacific right-of-way, then parallel to the northerly side of the right-of-way beyond Ontario International Airport, then exiting the City at Etiwanda Avenue; and*
   b. *Two parallel pipelines that traverse the easterly portion of the City, entering the City at the southerly portion of Milliken Avenue, then traveling north under Milliken Avenue to Inland Empire Boulevard, then east to Rochester Avenue, then north to the City Limits.*
7. *The minimum setback from private streets shall be measured from a line running parallel to the street, which is located 12 feet behind face-of-curb (a.k.a., "parkway").*
8. *In the Downtown District, the maximum 45-foot façade height shall extend no more than 70 percent of the frontage. The remaining 30 percent of the frontage shall include an upper-level setback of at least 12 feet, starting at the third story. Usable outdoor spaces, such as roof decks or terraces, may occupy the roof area of the upper-level setback. See Urban Form standards under Section 2.2.2A Urban Building Type.*

3.2.1 Height Standards

1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility:
2. **Vertical mixed use development types** The following height limits shall apply to all proposed vertical mixed use development types.
    a. Buildings within 100 feet of single-family dwellings shall not exceed 35 feet or the height of adjacent residential buildings.
    b. Buildings within 100 feet of undeveloped parcels with planned less intense uses shall not exceed 35 feet.

3.2.2 Ground Floor Building Frontage

1. **Mixed-Use development types** The ground floor frontage for vertical mixed-use developments must be designed to accommodate commercial uses.

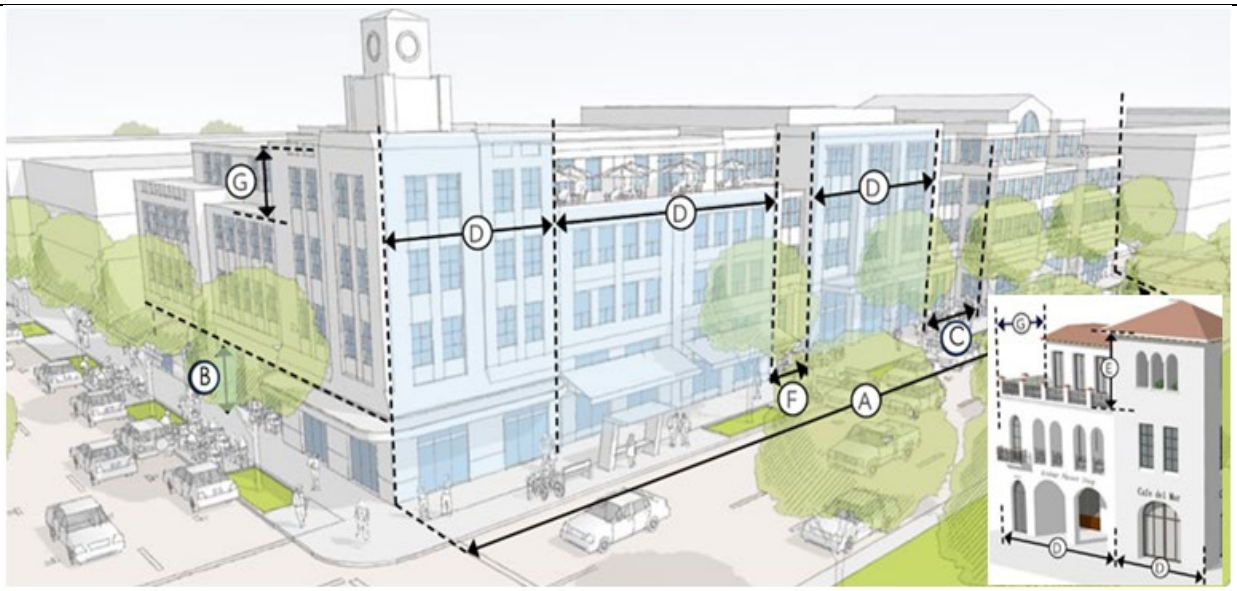
3.2.3 Building Types

Identify the suitable building type based on the location including (see Table 3.2-1):

1. **"Main Street"** (applicable to mixed-use areas within the District Place type as shown on Policy Plan Exhibits LU-04 and CD-01)
2. "**Urban"** (applicable to mixed-use areas outside the District Place type)

Table 3.2-1 Mixed- Use Building Types

TOP Land Use Place type	Max Permitted Height	Building Types
Downtown	45 feet	Main Street
Airport Metro/Entertainment	120 feet	Main Street
Guasti	70 feet	Main Street
South Euclid	70 feet	Main Street
South Employment	70 feet	Main Street
East Holt Blvd	70 feet	Urban
Inland Empire Blvd	70 feet	Urban
Infill	50 feet	Urban
South of Riverside Drive	50 feet	Urban



A. Main Street Massing and Façade Design

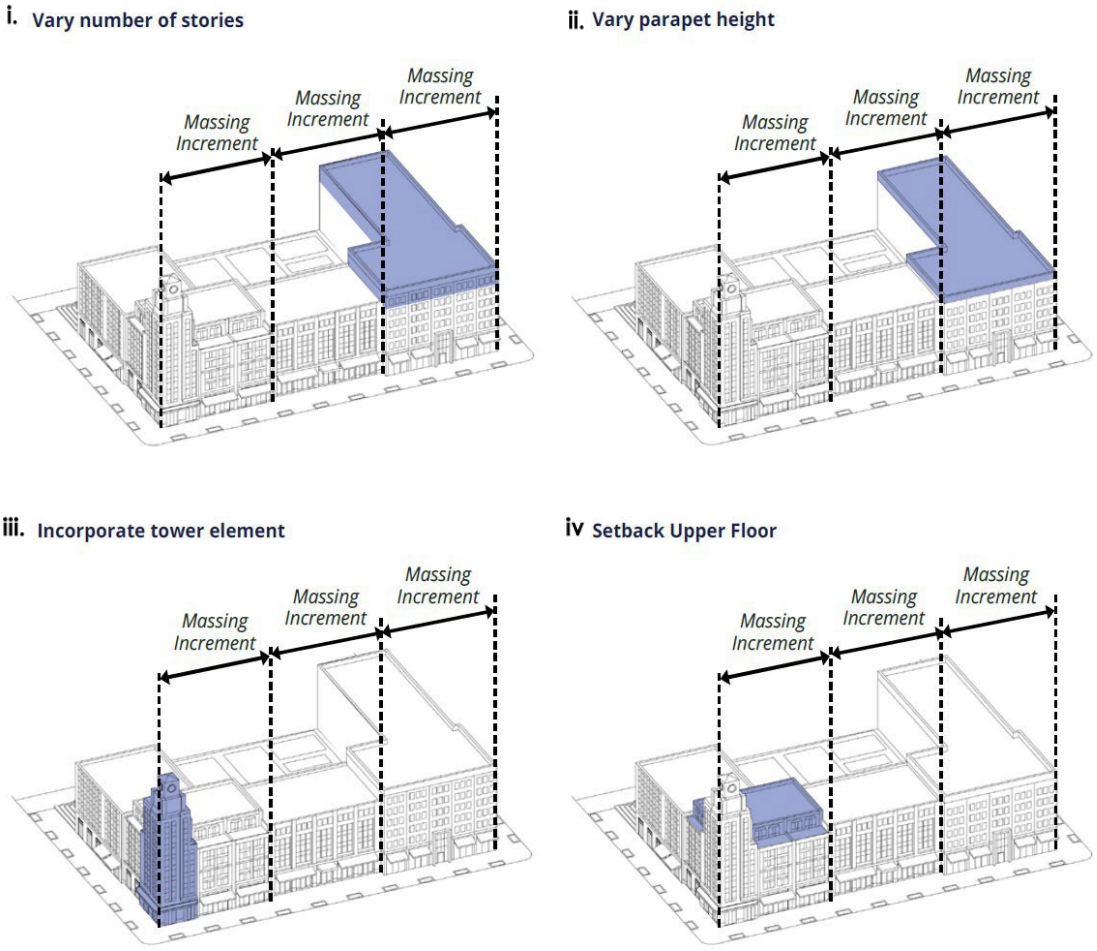
Main Street Massing and Façade design standards are required in all mixed-use areas within the District Place type, as shown in the City's Policy Plan (Exhibits LU-04 and LU-05).

Massing increment
Massing Increments shall appear as either distinct buildings or distinct parts of a single building.

1. Massing standards

Figure 3.2-1 Main Street: Massing Diagram

1. Element Standards
A. Building Façade along font lot line (300 feet max).
B. Building Façade alongside lot line (150 feet max).
C. Space between buildings (0 feet min).
D. Massing Increment (75 feet max).
E. Height Difference between Massing Increments (3 feet min).
F. Façade Break (10 feet x 10 feet min).
G. Upper-Level Setback (15 feet min).



2. Massing standards

a. **Size of massing increments.** Building facades that face public streets and are longer than 75 feet in length shall be divided into massing increments as follows (see Figure 3.2-1):
   i. The maximum length of a single massing increment shall not exceed 75 feet.
   ii. Single building projects less than 150 linear feet of street frontage shall have no massing increments applied.
   iii. Single building projects between 150 and 250 linear feet of street frontage shall have at minimum 2 massing increments separated by a façade break.
   iv. Single project buildings that have more than 250 linear feet of street frontage shall have 3 massing increments each separated by a façade break.

b. **Required difference in facade height**. Adjacent massing increments must vary in façade height measured from the sidewalk to the eave, cornice, or parapet, using a minimum 1 massing strategy (see Figure 3.2-1 and Figure 3.2.2):

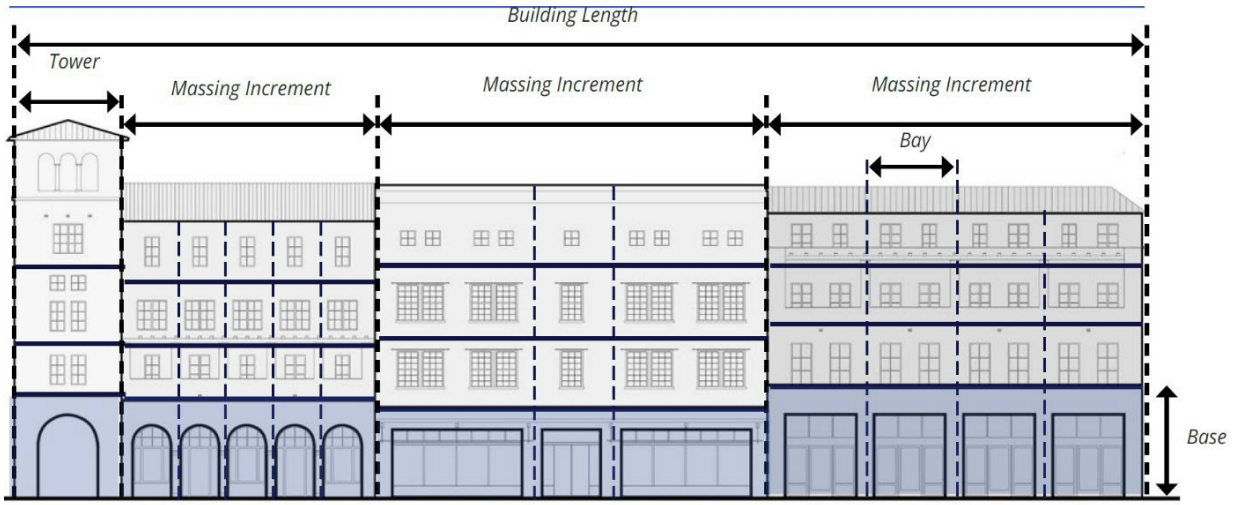
i. Vary number of stories.
ii. Vary the parapet height by a minimum of 3 feet.
iii. Incorporate tower element.
iv. Set back upper floor(s) a minimum 15 feet.

Figure 3.2-2 Main Street: Examples of Massing Strategies Diagram

c. **Articulation of massing increments.** Individual massing increments shall be differentiated from one another using 3 of the following architectural strategies (see Figure 3.2-2):
   i. **Set façade increment back.** Set the entire facade increment back a minimum of 3 feet.
   ii. **Base height.** Vary the height of the building base of adjacent increments.
   iii. **Façade colors.** Use different facade materials and/or colors.
   iv. **Window type/configuration.** Use different window types, configurations, and/or frame colors.
   v. **Presence/arrangement of façade elements.** Vary the presence or arrangement of façade elements such as projecting balconies, recessed balconies, trellises, chimneys, and awnings.

d. **Self-contained massing increments.** Facade elements, such as window openings and balconies, shall not overlap the division between massing increments.
e. **Repeating massing increment design.** A massing increment design may be repeated a maximum of 3 times on the same project elevation. Repeated massing increments may not be located immediately adjacent to each other.

Façade Composition

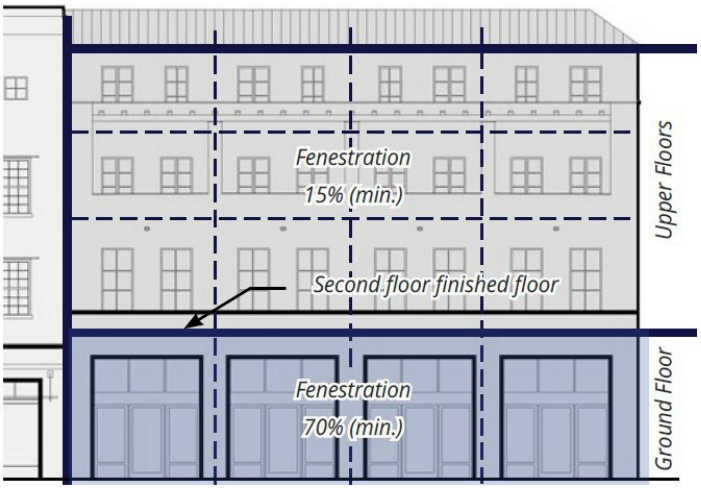


1. **Facade composition standards**
   a. **Facade Grid.** The window, door, and/or shopfront openings of each individual facade shall be organized into a grid as follows:
      i. **Horizontal alignment of elements.** Rooflines, openings, and materials within each facade shall be aligned horizontally.
      ii. **Vertical Bays.** The entirety of a building's façade shall be clearly divided into vertical bays.

   b. **Multi-story building façades.** Multi-story building facades shall be designed to include a base, middle, and top.
      i. **Base.** Building base of entire ground floor for buildings less than 5 stories or 25 feet for buildings 5 stories or more, shall use a minimum of 2 of the following strategies:
         (a) Provide a string course at the top of the first story;
         (b) Specify base materials different from rest of facade;
         (c) Specify base colors different from rest of facade;
         (d) Provide a ground floor Arcade or Gallery per (*Section 3.2 Architectural Façade Elements*).

      ii. **Middle**. The middle of the building—the facade of all floors located above the base—shall be designed as follows:
         (a) Window and door openings shall be organized in bays per the façade fenestration standards of this section.
         (b) If provided, attached façade elements such as balconies, bay windows, and projecting rooms, shall be designed per the façade fenestration standards of this section.
      iii. **Top.** The façade elements that define the upper limits of the building—shall be designed as follows:
         (a) The top of the building facade shall incorporate capping elements, such as a cornice, enhanced ornamentation, or a decorative parapet (see Figure 3.2-3).

Figure 3.2-3 Main Street: Façade Composition



Facades organized according to massing increments that may consist of an individual building or one building that is divided into individual massing increments. Each increment is designed according to a grid of floor levels and bays.

Fenestration Design

Fenestration Design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.

1. **Façade fenestration standards.**
    a. **Minimum fenestration.** Facade designs shall include a minimum percentage of fenestration calculated as the total percentage of window and door area divided by the total area of that portion of the façade (see Figure 3.2-4):
        i. **Ground floor**: 70% minimum.
        ii. **Upper floors**: 15% minimum.

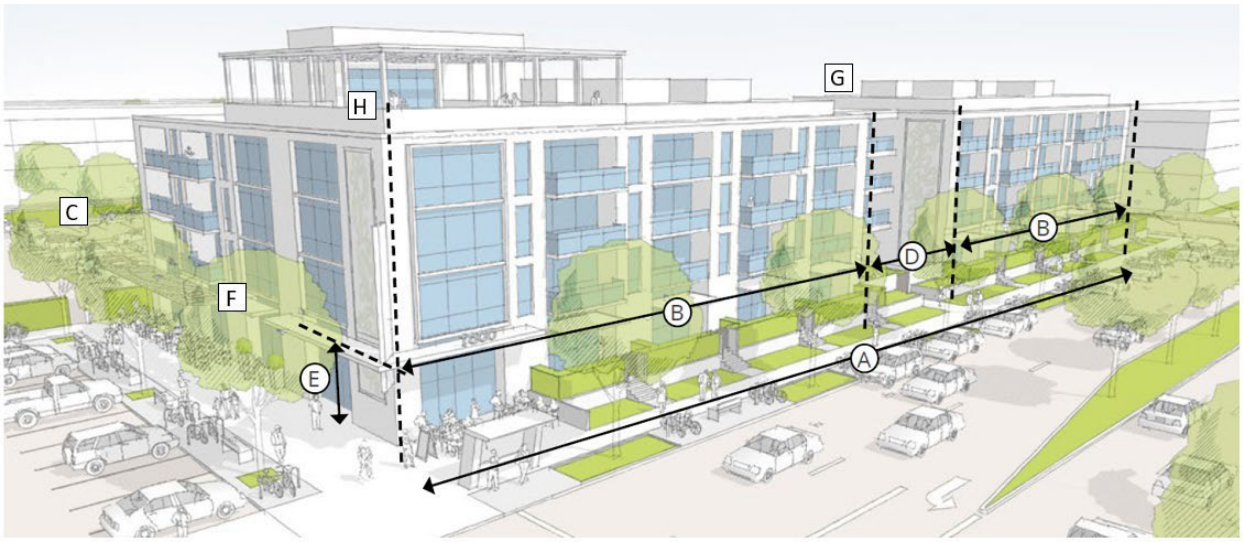
Figure 3.2-4 Main Street: Fenestration

2. **General to all floors.** All window jambs/frames shall be set back a minimum of 2 inches back from the facade plane.

3. **Specific to ground floors.** Structural elements shall be visible on the exterior of ground floor facades to visually convey that the upper floors are supported.

    a. **Ground floor windowsills** on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.
    b. **Ground floor bathroom windows** prohibited on facades that face front streets.

B. Urban massing and façade design



Urban massing and façade design_ Standards are required for all multiple-family developments projects with 25 du/ac or more.

Massing Increments

Massing increments are visually discrete design compositions that are distinguishable from each other and have a coherent look and character from the ground to the top of the facade. Massing Increments appear as either distinct buildings or distinct parts of a single building (see Figure 3.2-5).

1. **Massing standards**

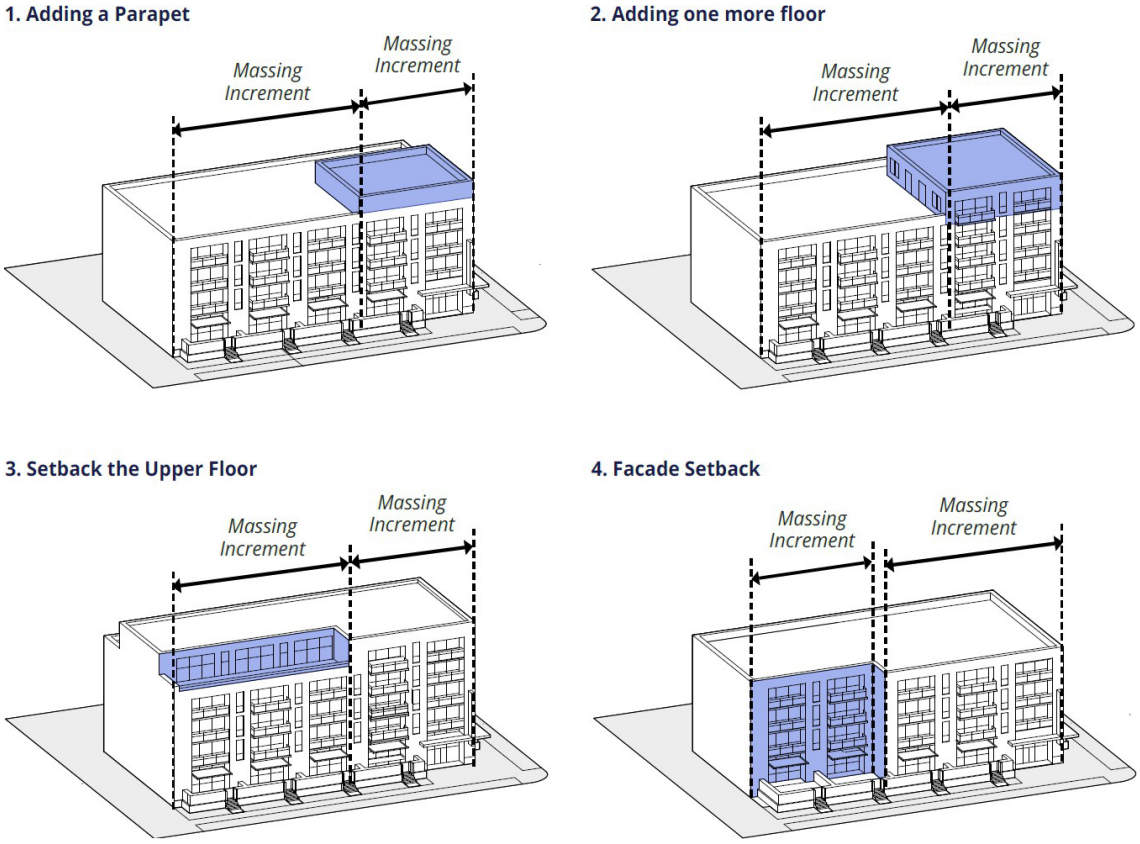


Figure 3.2-5 Urban Massing

Element Standards	Standards
a. Building façade along font lot line	400 feet max
b. Massing increment	150 feet max
c. Space between buildings	0 feet minimum
d. Façade setback (if elected)	10 feet x 10 feet minimum
e. Building base height	15 feet minimum
f. Building façade alongside lot line	200 feet max
g. Height difference between massing increments	3 feet minimum
h. Upper-level setback from facade	15 feet minimum

2. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows:
    a. The maximum length of a single massing increment shall not exceed 150 feet (see Figure 3.2-6).
    b. A minimum of **2** distinct massing increments shall be provided.
3. **Articulation of massing increments** Individual massing increments shall be differentiated from one another using at minimum 1 of the following massing strategies:
    a. Vary parapet height by a minimum of 3 feet.
    b. Increase number of stories.
    c. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade.
    d. Set the entire facade back a minimum of 10 feet for 20 feet.
    e. Incorporate tower element.

Figure 3.2-6 Urban: Examples of Massing Strategies Diagram

1. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.

    a. **Repeating massing increment design** A massing increment design may be repeated on the same project elevation. Repeated massing increments shall be separated by a distinct massing increment

Façade Composition

Façade composition standards address the design and arrangement of various building elevation elements that are applied to each massing increment, including window and door openings, attached and recessed façade elements such as bay windows, balconies, and arcades, and wall materials and colors.

1. **Façade composition standards**

2. **Multi-story building façades** The building facade shall be divided into a base and body as follows.

    b. **Base** Separate the building base (entire ground floor facade or first 2 floors of buildings 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies.

        i. Provide a string course at the top of the first story.
        ii. Specify base materials different from rest of façade.
        iii. Specify base colors different from rest of façade.
        iv. Provide a ground floor Arcade or Gallery per Section 3.3 Architectural Façade Elements.

    c. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:

        i. Windows shall be organized in bays, bands, curtain wall, and/or grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.
        ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.

    d. **Strategies** The listed strategies show acceptable ways to differentiate massing increments:

        i. Vary the height of the building body.
        ii. Use different facade materials and/or colors.
        iii. Use different window types/configurations.
        iv. Diversify facade elements, including projecting balconies, recessed balconies, canopies, and awnings.

Fenestration Design

Fenestration Design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.

1. **Façade fenestration standards.**

    a. **Minimum fenestration.** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total

area of that part of the facade.

i. **Ground floor**
   (a) Front lot line: 70% minimum
   (b) All other frontages: 50% minimum
   (c) Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade.
   (d) Ground floor bathroom windows are prohibited on facades that face front lot line.

ii. **Upper floors** 15% minimum

Figure 3.2-7 Urban: Fenestration Diagram

3.2.4 Materials and Detailing

A. Building Materials

1. **Prohibited materials**
   a. Fiberglass or plastic (false) architectural or facade elements or ornamentations are prohibited.
   b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street.
   c. Reflective materials, such as mirrored glass, shiny metal, and chrome, are allowed with the following exception:
      i. Application to small areas (up to 50 sq ft or 2% of façade area, whichever is less) for signage highlighting, ensuring no glare nuisance to traffic, pedestrians, or neighboring buildings.
2. **Combining materials.** When combining 2 or more wall materials on 1 facade:
   a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco above masonry).
   b. Vertical joints between different materials shall only occur at inside corners.

B. Windows and Doors

1. **Material and types**
    a. **Window recess** Windows shall be recessed in a manner that is specific to each building's architectural style but shall be no less than 2 inches for any style.
    b. **Architectural style of detailing** Windows, doors, frames, colors, and styles shall be appropriate to the building's architectural style in terms of window type, proportion, and color.
    c. **Materials** Windows and doors shall be made of wood, fiberglass, fiberglass-clad wood, aluminum clad wood, or metal.
    d. **Glazing** Glazing shall be clear glass with no more than ten percent daylight reduction (tinting). Reflective (mirrored) glazing is prohibited.
    e. **Residential buildings** The following are applicable to multiple-family development types.
        i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing and profile thickness and employ muted patterns and colors consistent with the building's architectural style.
        ii. Nail-on windows that are deeply set within their frame are permitted.
        iii. Muntins shall be of a substantial dimension (e.g., not flat) and shall be placed on the exterior of windows.
        iv. Trim:
            a) **Window and door trim materials** Wood or cement fiber board. Foam trim around windows is allowed. Foam trim around doors is prohibited.
            b) **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber reinforced concrete, and cement fiber board.

3.3 Architectural Façade Elements

The following architectural façade elements shall be incorporated into a development project to fulfill the requirements for façade articulation and/or articulation of massing increment defined in 3.2.3. Massing and Façade Design.

3.3.1 Arcade

Figure 3.3-1 Arcade

1. Element Standards	Minimum	Maximum
A. Depth	12 feet	16 feet
B. Distance from Property Line	0 feet	
C. Opening height, clear	See Below	
D. Overall height	See Below	

2. Design standards

a. **Projection depth** The arcade projection depth from the ground floor facade shall be no greater than the height of the arcade opening (see Figure 3.3-1).

b. **Sidewalk depth beneath arcade** The covered sidewalk under the arcade shall be a minimum of 10 feet wide from the inside of the vertical support to the ground floor building face.

c. **Entry element requirement** Arcades shall be combined with Shopfronts (defined in *Section 3.4 Entry Elements*).

d. **Minimum openings and massing increments** Arcades shall be a minimum of 3 openings wide. The location where an arcade stops or changes in design or dimensions shall correspond to a change in massing increment (*Section 3.2.3.*

Massing and Façade Design) for massing increment requirements).

e. **Vertical supports** Vertical supports may be piers, columns, or arches. The width of a vertical support shall not exceed 3 feet.
f. **Width of openings** The openings between vertical supports, as seen from the street, shall be taller than they are wide.
g. **Shape and cadence of openings** Openings, whether rectangular or arched, must align with facade bays if present (vertical bays are mandatory for Main Street standards and optional for other massing types in *Section 3.2.3. Massing and Façade Design*).
h. **Vertical clearance** The minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets, spandrels, and/or lower portions of arches.
i. **Arcade height relative to interior building floor height** The height of the soffit inside the arcade shall be no less than the height of the ceiling of the floor to which it corresponds.
j. **Architectural style** Arcade detailing, including lighting, shall utilize the architectural style of the building.

3.3.2 Gallery

Figure 3.3-2 Gallery

1. Element standards	Minimum	Maximum
A. Depth, clear	10 feet	16 feet
B. Distance to property line, clear	0 feet	5 feet
C. Opening height, clear	12 feet	2 floors
D. Overall height	See Below	

2. Design standards

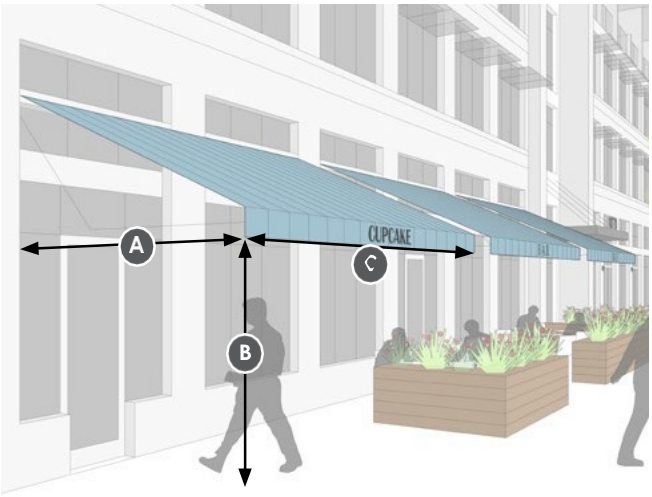
a. **Projection depth** Gallery projection depth from the ground floor facade shall be no greater than the height of the gallery opening (see Figure 3.2-2 "A").

b. **Sidewalk depth beneath gallery** Covered sidewalk width under the gallery must be a minimum of 10 feet from the inside of the vertical support to the ground floor building face (see Figure 3.2-2 "A").

c. **Minimum openings and massing increments** Galleries shall be a minimum of 3 openings wide. The location where a gallery stops or changes in design or dimensions shall correspond to a change in massing increment (*see Section 3.2.3. Massing and Façade Design*).

d. **Vertical supports** Vertical supports may be piers or columns. The width of a vertical support shall not exceed 1 foot.

e. **Width of openings** Openings between vertical supports, as seen from the street, shall be taller than they are wide.



f. **Shape and cadence of openings** Openings may be rectangular but shall not be arched.

g. **Vertical clearance** Minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets and spandrels.

h. **Gallery height relative to interior building floor height.** Height of the soffit inside the gallery shall be no less than the height of the ceiling of the floor to which it corresponds.
i. **Vertical alignment** Galleries may be single or double-story and shall correlate with building floors (see "D" in above figure).
j. **Architectural style** Gallery detailing, including lighting shall utilize the architectural style of the building.

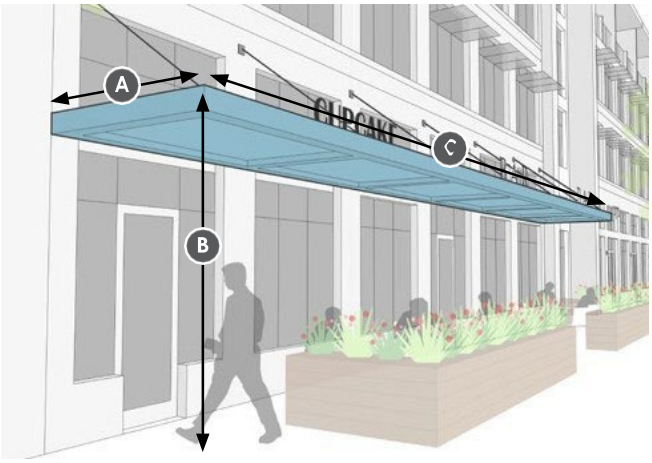
3.3.3 Commercial Awning

Figure 3.3-3 Commercial Awning Diagram

1. Element standards	Minimum	Maximum
A. Depth	4 feet	Not Applicable
B. Clearance above sidewalk	8 feet	Not Applicable
C. Length	See Below	

2. Design standards

a. **Encroachment** Commercial awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code (see Figure 3.3-3).



b. **Material** Commercial awnings shall be of a simple shed form, made of code-compliant fire-resistant canvas.

c. **Width.** Awning widths shall equal in size to shopfront opening widths.

d. **Prohibited lighting** Internally illuminated and back-lit awnings and any associated light diffusers are prohibited.

3.3.4 Commercial canopy

Figure 3.3-4 Commercial Canopy

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Minimum clearance above ground	Not Applicable	12 feet
C. Length of terrace	Not Applicable	150 feet

2. Design standards

a. **Encroachment** Commercial canopies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code (see Figure 3.3-4).

b. **Form and material** Canopies shall be of a simple form, made of metal and/or glass.

c. **Support** Canopies shall be supported either from below by metal brackets, or from above by rods and wires that affix to the wall.

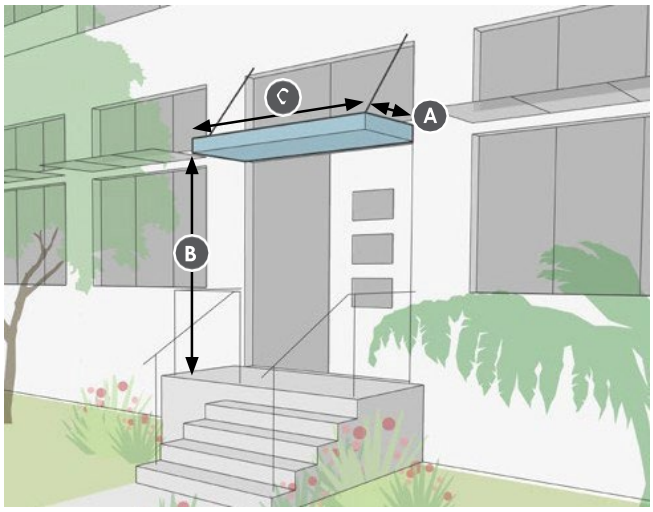
d. **Width** Canopies may extend across multiple storefronts.

3.3.5 Awning

Figure 3.3-5 Awning

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Clearance above ground	8 feet	Not Applicable
C. Length	See Below	

2. Design Standards



a. **Encroachment** Residential awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code (see Figure 3.3-5).

b. **Material** Residential awnings shall be of simple shed form, made of code-compliant fire-resistant.

c. **Upper floors** Each individual awning shall cover no more than 1 window opening.

3.3.6 Canopy

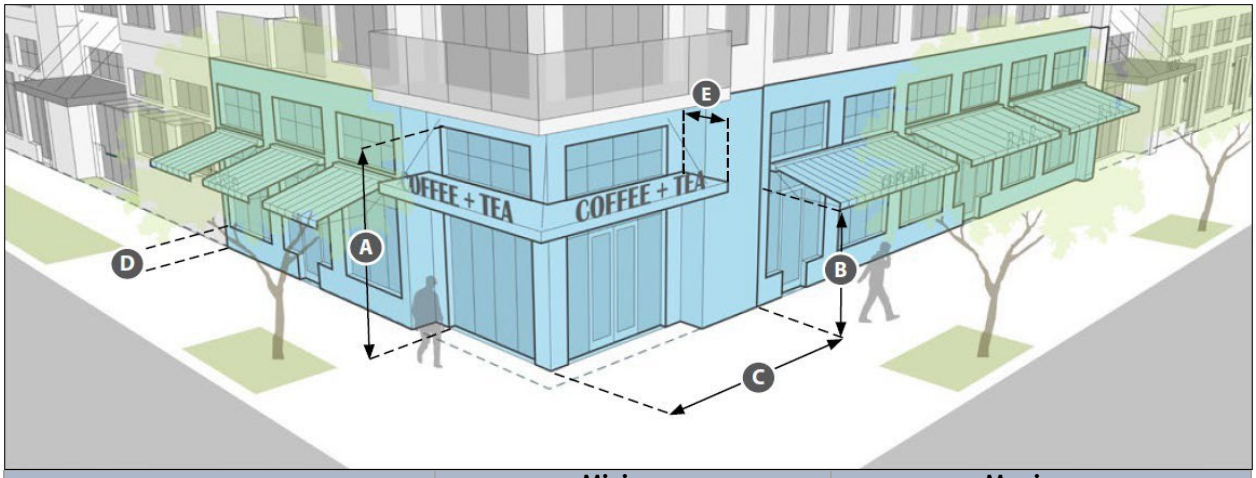
Figure 3.3-6 Canopy

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Minimum clearance from landing	7 feet	8 feet
C. Length of terrace	Not Applicable	8 feet

2. Design standards

a. **Material** Canopies shall be of a simple form, made of metal and/or glass.

b. **Support** Canopies shall be supported either from below by metal brackets, or from above by rods or wires that affix to the wall (see Figure 3.3-6).



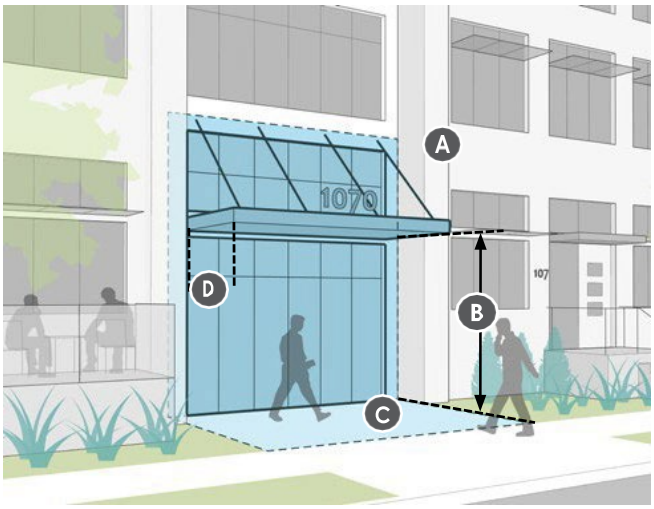
c. **Upper floors** Each individual canopy shall cover no more than 1 window opening.

3.4 Entry Elements

This section regulates the design of Building entry elements such as porches, dooryards, stoops, shopfronts, and lobby entries to the fulfill façade articulation requirements identified in *Section 3.1.3. Massing and Façade Design*.

3.4.1 Shopfront

Figure 3.4-1 Shopfront



1. Element standards	Minimum	Maximum
A. Height to top of transom	12 feet	16 feet
B. Height to bottom of canopy/awning	8 feet	10 feet
C. Width of each shopfront bay	10 feet	25 feet
D. Height of shopfront base	1 foot	3 feet
E. Awning/Canopy Depth	4 feet	Not Applicable

2. **Design standards**
   a. **Vertical bays** Shopfront openings must align into bays, following the vertical bay specifications in *Section 3.2.3. Massing and Façade Design* of main street standards (see Figure 3.4-1).
   b. **Architectural façade elements**
      i. Shopfronts in vertical mixed-use buildings may integrate with Galleries or Arcades.
      ii. **Visibility** Windowsills in non-entry bays shall not exceed 2 feet above grade.
   c. **Setback use and design** Recessed shopfronts without dooryard, terrace, or porch designs shall extend to the property line.

3.4.2 Lobby Entry

Figure 3.4-2 Lobby Entry

1. Element standards	Minimum	Maximum
A. Height to top of transom	10 feet	20 feet
B. Height to bottom of canopy/awning	8 feet	Not Applicable
C. Distance to property line	Not Applicable	20 feet
D. Awning/Canopy Depth	4 feet	Not Applicable

2. Design standards.

a. **Lobby entries** shall be visible and distinguishable from adjacent ground floor units and include a minimum of 1 of the following design strategies (see Figure 3.4-2):
   i. Center placement for symmetry.
   ii. Prominent corner location.
   iii. Incorporate 2 architectural elements (columns, overhanging roofs, canopies, awnings, or ornamental light fixtures).
   iv. Recessed entry.
   v. Entry framing.

b. **Main Street massing types**
   i. Lobby entries shall not exceed 20% of the frontage length.
   ii. Allocate the remaining length to shopfronts.

c. **Visibility** Lobbies entries shall be visible from the public right of way as follows:
   i. Windowsills shall be no higher than 2 feet above adjacent grade.
   ii. Internal shade devices such as blinds, shades, or curtains are prohibited.

d. A forecourt may be introduced to provide a transition between the entry and sidewalk (forecourt standards are discussed in *Section 3.1.5 Open Space Standards*)

Chapter 4. Architectural styles

Below is a list of Architectural styles which shall be applied. A maximum of 1 architectural style shall be applied to each project.

4.1 Mission-Spanish Colonial Revival
4.2 Craftsman
4.3 American Mercantile
4.4 Tuscan
4.5 Modern
4.6 Farmhouse

4.1 Mission - Spanish Colonial Revival

Influenced by Spanish/Mediterranean and early Californian styles in the late 19th and early 20th centuries, the Spanish Colonial Revival style is asymmetrically arranged and includes low-pitched roofs covered with S-type clay red roofing tiles, wooden frames with stucco siding, and arches above doors, porch entries, and main windows (see Figure 4.1-1).

Figure 4.1-1 Mission - Spanish Colonial Revival

4.1.1 Form and Massing

1. **Façade design (Apply all)**

   a. Asymmetrical façade/elevations
   b. Three or more roof planes
   c. A minimum of 50 percent of the units shall have balconies or window treatments (such as shutters or awnings)
   d. Entrances are recessed a minimum 12 inches
   e. Additional details for projects over 4 stories, vertical mixed use, or with more than 15 buildings (requires 2 details):

i. Include **2** add-on projections such as verandas, arcades, balconies, and exterior stairs
ii. The ends of building massing's shall be stepped down
iii. One focal point, such as courtyard, tower, or fountain
iv. Apply wingwalls or columns on the ground level

4.1.2 Roof

1. **Roof design (Apply all)**
   a. Low-pitched (4:12 maximum) cross- or side-gabled roofs. The pitch shall remain constant except for a veranda or arcade.
   b. Red, fired, clay tile roofs. Tile types include both Spanish (S-shaped) and Mission (half-cylinder)
   c. Hipped roofs shall only be used in combination with gables or on a tower element.
   d. Shed roofs are only used in conjunction with verandas
   e. When a flat roof is used, it shall be screened by a parapet that is an extension of the wall plane or by a modified Mansard roof.

4.1.3 Materials and Colors

1. **Materials and colors (Apply all)**
   a. Roof tiles shall use terracotta, brown earth tones, or rustic red color palettes.
   b. White, cream, or tan stucco wall with smooth (20/30) textured finish (i.e., hand troweled)
   c. Wood shall be used as secondary wall material for the following and similar elements:

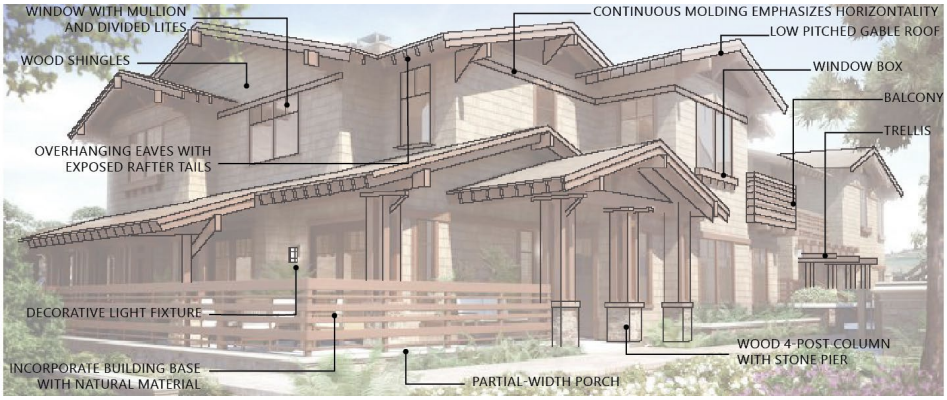
      i. Posts and exposed beams
      ii. Railing, spindles, and grille work
      iii. Shutters, window frames, and doors

   d. If windows have shutters, the shutters' color shall match the accent color that is used for doors or decorative trim.
   e. A minimum of 1 wrought-iron element (such as railings, hardware, and gates) shall be used.

4.1.4 Doors and Windows

1. **Door and windows (Apply all)**
   a. Accent windows shall be a minimum of 20 percent of the total windows
   b. The primary facade shall include a minimum of 1 arched element
   c. A minimum of 50 percent of the windows shall be casement windows
   d. All entrance-door surrounds shall be banded with ceramic tile, molded plaster, or painted accents.
   e. All casement windows and double-hung windows shall have wood frames
   f. Eighty percent of the windows shall have window muntins

4.1.5 Decorative Details



1. **Decorative details**
   a. All residential projects shall provide **a minimum of 4** of the following; and
   b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

      i. Entry/front porch or patio
      ii. Decorative tiles
      iii. Clay tile vents
      iv. Wrought-iron balcony railings or support brackets
      v. Dark-metal light fixture and hardwires
      vi. Paired wood (or wood simulated) garage doors with iron hardware
      vii. Verandas, pergolas, or arcades
      viii. Exterior stairs
      ix. Awnings with metal spear supports

4.2 Craftsman

The Craftsman or California Bungalow style, originating from the early 20th-century Arts and Crafts movement. Notable features include the artful use of wood and natural materials, low-pitched roofs, horizontal orientation, earth-toned colors, exposed rafters, decorative brackets, porches, and columns (see Figure 4.2-1).

Figure 4.2-1 Craftsman

4.2.1 Form and Massing

1. **Façade design (Apply all)**
    a. Asymmetrical facades/elevations
    b. Three or more roof planes on the primary facade
    c. Front-facing gable roofs
    d. Street-facing units shall have balconies or porches
    e. The front lot line façade shall have 2 to 3 materials/colors

4.2.2 Roof

1. **Roof design (Apply all)**
    a. Low- to moderate-pitched gable or hipped roofs from 6:12 to 8:12
    b. Overhanging eaves (minimum 24 inches along primary elevation) with exposed rafter tails or beams.
    c. Brackets or knee braces at gabled ends
    d. Use of imitation wood or asphalt shingles

4.2.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Brick or stone shall be used in the base
    b. Primary wall materials shall include dark-color wood shingles, clapboard siding, or fiber cement siding and natural materials such as stone or brick.
    c. Use of earth-toned color palette, such as browns and greens

d. The front lot line façade shall have a **minimum of 3** paint colors: 1 for the cladding, 1 for trim, and 1 for accents such as windows and decorative details.

4.2.4 Doors and Windows

1. **Door and windows (Apply all)**
   a. A minimum of 50 percent of the windows shall be casement windows.
   b. A minimum of 80 percent of the primary windows shall be multi-paned.
   c. A minimum of 2 types/shapes of windows shall be used
   d. Utilize flat wood trims (typically 4½ inches or 5½ inches wide) around the primary windows and entry doors.
   e. Window and door trim color shall be different with the color of the walls.
   f. Entry doors and garage doors shall have 1 row of vertical or horizontal glass panels.

4.2.5 Decorative Details

1. **Decorative details**
   a. All residential projects shall provide **a minimum of 4** of the following; and
   b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

      i. Stone pier and battered wood support
      ii. Exposed rafter tails and knee-brace brackets
      iii. Dormers on the front façade
      iv. Second-story balcony
      v. Decorative attic/gable vent
      vi. Light fixtures shall be box-shaped, with metal frame and geometric pattern
      vii. Chimneys are visible at the exterior and arranged on a side elevation
      viii. Stained-glass or transom windows
      ix. Covered front porches shall tapered pillars
      x. Ground-level windows shall have muntins

4.3 American mercantile

This building type began in the late 19th century when, in the process of identifying towns and cities, housing and offices were built over retail stores. This mixed-use strategy is still relevant today as the reurbanization of existing city centers becomes an established pattern (see Figure 4.3-1).

Figure 4.3-1 American Mercantile

4.3.1 Form and Massing

1. **Façade design (Apply all)**
    a. Asymmetrical facades/elevations
    b. Simple, rectangular form
    c. Symmetrical placement of piers, columns, ground-floor storefronts, and openings on upper levels.
    d. Transparent windows and doorways shall be no less than 80 percent of the street frontage at the ground level.
    e. Multistory facades are divided into base, body, and top, with the ground floor taller than the upper floors.
    f. Columns or lintels over openings
    g. Bases are articulated by changes in material or changes in wall plane
    h. Minimal projections or recessions on wall plane

4.3.2 Roof

1. **Roof design (Apply all)**
    a. Flat roof.
    b. A projecting cornice or a receding, stepped parapet
    c. Cornice and details mimic and reference historical detailing
    d. Street-facing gable roof with roof pitches at minimum 5:12 unless concealed behind a parapet.

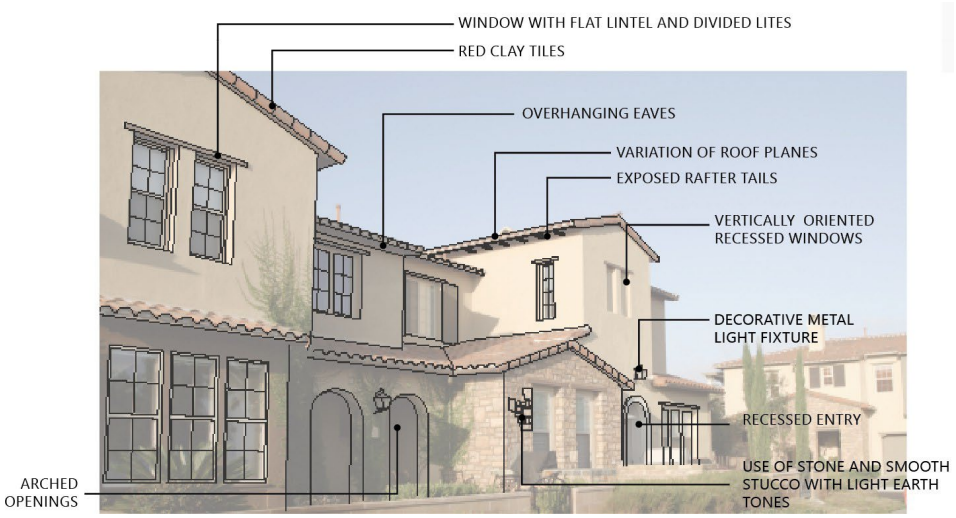
4.3.2 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Walls shall be composed of brick
    b. Decorative moldings, cornices, or an applied ornament of stone or cast concrete shall be used.
    c. No more than 3 colors shall be used on any given facade
    d. Stucco and clapboard is prohibited

4.3.4 Doors and Windows

1. **Door and windows (Apply all)**
    a. Ground-floor windows and doors shall be large and expansive with a transom.
    b. Upper-floor windows shall be double-hung vertically and grouped with a rhythm consistent with the major storefront openings below.
    c. Entrance shall have higher bays, recessed entries by a minimum of 3 feet, or different color/materials.
    d. Upper-floor windows shall have window lintel and sill
    e. Transom windows above the doors and windows on the ground level
    f. Fifty percent of windows shall have muntins
    g. Upper floor windows shall have a minimum 2-inch recess

4.3.5 Decorative Details



1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Awnings, canopies, and second-floor balconies
        ii. Pedimented windows
        iii. Wide window trim with a keystone
        iv. Double-bracketed cornice
        v. Gable roof
        vi. Roof finial
        vii. Transom above door and windows on the ground level
        viii. Metal balcony railing
        ix. Canopy or awning
        x. Recessed entries
        xi. Cast-iron columns
        xii. Shopfront millwork

4.4 Tuscan

A blend of Spanish Revival and rural Italian elements, this interpretation of traditional Mediterranean architecture features stone and stucco, light earth tones, and red-tiled roofs. Classical elements like columns, arches, and decorative ironwork enhance visual complexity. Italianate references are evident in squared towers and projections. Features include porches, porticoes, and vertically oriented, recessed windows (see Figure 4.4-1).

Figure 4.4-1 Tuscan

4.4.1 Form and Massing

1. **Façade design (Apply all)**
    a. Asymmetrical arrangement of windows and design elements along front lot line.
    b. Porches, porticoes and/or Juliet balconies
    c. Recessed entries (a minimum of 3 feet)

4.4.2 Roof

1. **Roof design (Apply all)**
    a. Flat or low-pitched hip or gable roof (maximum 6:12 slope)
    b. Red-toned clay tiles
    c. Multiple roof levels (at minimum 3)
    d. Large overhanging eaves (minimum 12 inches) along primary elevation

4.4.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Incorporate rough-hewn stone as accent feature
    b. Flat stucco walls in light earth tones
    c. Use of earth-toned color palette
    d. Brown or beige window frames

4.4.4 Doors and windows

1. **Doors and windows (Apply all)**
    a. Single- or double-hung windows shall be more horizontal in proportion, with six-over-six muntin patterns and 5½-inch-wide trim.
    b. Casement windows shall be paired with four-pane patterns for smaller windows and eight-pane patterns for larger windows.
    c. Vertically oriented rectangular or arched windows arranged in asymmetrical patterns.
    d. Casement or double-hung sash with flat or arched lintels
    e. Windows shall be recessed 3 to 12 inches

4.4.5 Decorative details

1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Juliet balconies
        ii. Rafter extensions and brackets
        iii. Stone or stucco window/door trim
        iv. Rectangular or arched wooden door
        v. Arcade or porch at entry
        vi. Decorative ironwork (window grilles, railings, light fixtures, decorative planters)
        vii. Arched windows
        viii. Paired decorative wood shutters. Shutters shall be equal to half the width of the window. Shutter styles shall be paneled or louvered.
        ix. Use of brick, stone, or wood columns
        x. Stucco or stone chimneys
        xi. Different-color wood trellis
        xii. Arched openings and doorways at the ground level

4.5 Modern

Modern architecture prioritizes clean lines, geometric shapes, and the use of unconventional or industrial materials such as glass, metal, concrete, steel, and reclaimed materials characterized by extensive large windows, contemporary buildings maximize natural light, and passive solar heating (see Figure 4.5-1).

Figure 4.5-1 Modern

4.5.1 Form and Massing

1. **Façade design (Apply all)**
    a. An irregular, asymmetrical façade
    b. Rectangular structure
    c. Horizontal massing
    d. Straight and continuous lines
    e. Repeating lines and elements

4.5.2 Roof

1. **Roof design.** Flat or low-pitched roofs (4:12 slope max)

4.5.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Use of raw and natural materials including wood, concrete, metal, and glass.
    b. Traditional materials (such as smooth stucco (20/30), wood, brick, and stone) shall be used as an accent material.
    c. Minimum 2 materials on the building facade.
    d. Use of color blocking for geometric forms and break up massing elements.
    e. Building facade shall incorporate **a minimum of 2** of the following as an accent:

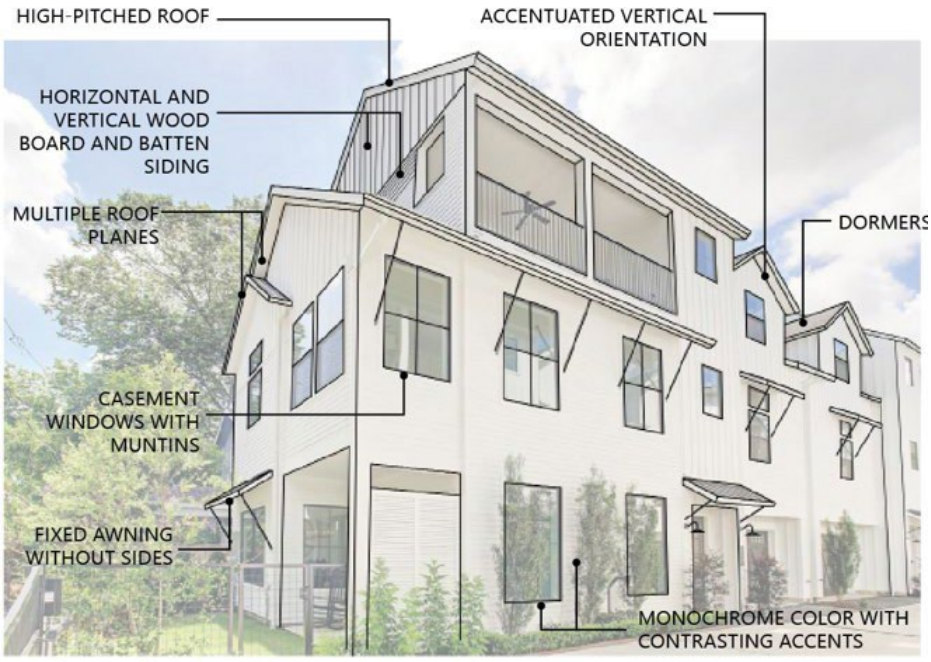
        i. Awnings

ii. Popouts, trellis
iii. Arbor structures
iv. Balconies

4.5.4 Doors and Windows

1. **Door and windows (Apply all)**
   a. Large glass doors and/or window openings
   b. Window wrapping around a corner of the building
   c. Narrow aluminum window frames

4.5.5 Decorative Details



1. **Decorative details (Apply all)**
   a. All residential projects shall provide **a minimum of 4** of the following; and
   b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

      i. Metal balcony railings
      ii. Clerestory windows
      iii. Floor-to-ceiling glass door
      iv. Floor-to-ceiling glass windows on the ground level
      v. Roof decks
      vi. Trellis shade structures
      vii. Metal awning
      viii. Roof overhang with exposed wood or steel frame

4.6 Farmhouse

Farmhouse style utilizes vertical or horizontal wood siding, monochrome colors with contrasting accents, minimal ornamentation, and medium to high-pitched roofs. Minimal detailing includes awnings, porches, and wall-mounted gooseneck lights (see Figure 4.6-1).

Figure 4.6-1 Farmhouse

4.6.1 Form and Massing

1. **Façade design (Apply all)**
    a. Straight exterior lines, geometric form
    b. Asymmetrical massing with a gable at the front of the house
    c. Repeating shapes and lines
    d. Gable roof creating a triangular wall on the ends.
    e. Incorporate farm and ranch forms (i.e. barns, silos, sheds, tank houses, and granary towers)
    f. Multiple gable and shed roof planes
    g. Geometric forms, industrial materials, and repetition
    h. Covered porches and awnings to break up volumes between lower and upper floors.
    i. Variation in projecting wall planes with a minimum 12-inch depth

4.6.2 Roof

1. **Roof design (Apply all)**
    a. High-pitched gabled roof or shed roof (minimum 6:12 slope)
    b. Intersecting gable roofs
    c. Dark asphalt shingle, metal roofs, or synthetic slate shingles
    d. Triangular rooflines
    e. Large overhangs (minimum 2 feet in length) above the patio and garage

4.6.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Use metal, wood, or masonry
    b. Utilize board-and-batten siding, corrugated panels
    c. Monochrome accents of doors, windows, or architectural features
    d. Stucco is permitted as an accent material

4.6.4 Doors and Windows

1. **Doors and windows (Apply all)**
    a. Windows shall be double-hung with a proportion of 2 or 2½ times taller than wide
    b. Groupings of 2 or 3 double-hung window units
    c. Multi-paned windows
    d. Accent trim around window and door openings
    e. Double-hung or casement windows

4.6.5 Decorative Details

1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Wide front porch with simple columns
        ii. Covered patio
        iii. Shed or gabled dormers
        iv. Carriage-style garage doors
        v. Dark shutters and window sashes
        vi. Gable brackets, vents, and trim
        vii. Iron-inspired barn-style lighting
        viii. Metal awnings without sides
        ix. Gooseneck light fixtures at the entrance
        x. Large doors and windows to maximize natural light
        xi. Multi-paned windows on the ground-level windows and doors

Chapter 5. Administration

5.1 Administration of Standards

This chapter provides methodology for the implementation of the Objective Design Standards, including administration, project approval, and appeals. The responsibilities of the City of Ontario Planning Staff shall include administering, interpreting, and enforcing all requirements and standards of this document.

Any terms not defined herein and any issues affecting the design and development of the subject project area not specifically addressed in the ODDS shall be governed by the provisions of the Ontario Development Code.

5.1.1 Interpretation and Severability

Unless otherwise provided herein, any ambiguity concerning the content or application of the Objective Design Standards shall be resolved by the City of Ontario Executive Director Community Development (Director) or his / her designee in a manner consistent with the goals, policies, purpose, and intent established in this document. If any portion of these standards is declared to be invalid or ineffective in whole or in part, such decision shall not affect the validity of the remaining parts of the remaining portions thereof.

5.1.2 Reference Documents

- **The Ontario Plan**
- **City of Ontario Development Code**

5.2 Glossary of terms

Alley. A narrow, low-capacity thoroughfare with 1 shared lane and no parking lanes which provides secondary access to all Lots within a Block. Driveways, Parking Aisles, and Fire Lanes are not Alleys.

Arbor (entrance arbor). A wooden structure that is intended to define an entrance into an on-site outdoor space, such as a front yard or parking lot.

Arcade. A facade with a ground floor colonnade supporting the upper stories of the building, intended to provide shade, glare control, and weather protection.

Bay. A facade division comprised of groupings of vertically aligned facade elements, such as shopfronts, windows, awnings, and wall materials that are stacked 1 above the other. Bays can be differentiated from 1 another by changes in material, color, and/or use of architectural elements such as pilasters.

Bay Window. A window or series of windows projecting from the exterior wall of a building and forming an extension, or bay, of the room. Subject to the requirements of the regulating zone, bay windows may encroach into the setback or public right-of-way.

Block. An aggregation of Lots, Passages, Carless Streets, and driveways which are bound on all sides by Streets. Block dimensions are measured along private Street Rights-of-way.

Building Base. The lowermost portion of a building facade that is distinctly differentiated from upper floors or upper wall surfaces. The base of mixed-use buildings consists of the ground floor or, for taller buildings, an ensemble of the first 2 floors. The base of multi-family or office buildings can consist of the entire ground floor, or a low band (three to 4 feet high) comprised of different materials or colors than upper wall surfaces.

Building Length. The length of the building as measured parallel to the front property line

Court. A semi-public, shared open space within a lot, for use by more than 1 resident or commercial tenant. Courts generally provide visitor access from the street to dwellings, retail, or office spaces, and/or buildings within the lot that lack direct access from the street. The degree of enclosure or openness of the court may vary, as per the requirements of each zone and the design intent of the project designer.

Director. The Director of Community Development, or designee.

Drive Aisle. A vehicular lane within a parking lot that provides access to the individual parking spaces.

Driveway. A vehicular lane within a lot that leads to onsite parking.

Encroachment: Structure extending into a required setback area.

Facade: Exterior wall of a building adjacent to a street or public open space.

Facade Increment: Visually distinguished complete facade composition.

Fenestration: Transparent glass openings in a building face.

Fire Lane: On-site right of way for emergency vehicle access.

Forecourt: Open space extension into a lot, defined by building faces.

Frontage, Private: Building facade and area between it and property line along a street.

Frontage, Public: Area between street-adjacent property line and the first travel lane.

Gallery: Ground-floor colonnade providing shade, glare control, and weather protection.

Green: Publicly accessible open space at the intersection of streets, landscaped for recreation.

Ground Floor: Building floor nearest to the existing grade around the building.

Height, Building: Height measured from finished grade at any property line along the street.

Loggia: Colonnaded or arcaded space within a building, open to the air on 1 side.

Lot: Portion of land for allowed development, synonymous with "property" or "design site."

Lot Line: Front, side, or rear boundary of a lot, synonymous with property line.

Massing (or Facade) Increment: Segment of a building facade divided into visually discrete compositions.

Passage: A pathway designed for pedestrians on a property, like a Paseo, but may not extend through an entire block.

Parking Court: A public space between buildings designed for surface parking.

Pergola: A wooden structure intended to provide shade or define an entrance into an on-site outdoor space.

Pier, Shopfront: The vertical elements on either side of a shopfront bay.

Place Types: A classification of urban environments based on streetscape and building character, including attributes such as building placement, height, frontage, land use, density, and streetscape design.

Plaza: An open space at the intersection of important streets for civic and commercial activities. Sizes range from one-half (1/2) acre to 2 acres, defined by surrounding buildings and typically paved with arranged shade trees. Amenities may include fountains and food kiosks.

Primary Access: The principal means of approaching and entering a building or property.

Primary entrances: Typically referring to front doors, including direct access into a ground floor residential unit, nonresidential space, common lobby, or zaguan leading to a court.

Privacy Windows: Windows that are either opaque and unopenable or start at minimum 6 feet from the floor.

Public Open Space: Off-street outdoor space owned by the city for public use or on a private parcel adjacent to a right of way, functioning as a public space.

Publicly Accessible: Open spaces or streets open/available to the public, whether publicly or privately owned.

Shopfront: A ground-floor frontage assembly with large transparent windows, a conspicuous entrance leading directly into the unit, spatially defined by vertical elements called piers.

Side, Lot Line: Any property line shared with a neighboring property when there is no public open space between them.

Side yard: The portion of a parcel extending from the front property line to the rear property line and between the side property line and the closest side of the principal building. It may also be designed as open space.

Story height: The vertical distance from floor to ceiling, measured from the top of the floor finish to the bottom of the ceiling joists for the topmost story.

Street: A right of way defined as a street, excluding paseos, driveways, parking aisles, fire lanes, and alleys.

Street, Front: The side of the lot adjacent to a street, a property may have multiple fronts.

Street, Side: (Applicable only to corner lots) The side of the lot adjacent to a street or public open space that is not considered the front.

Trellis: A wood or metal frame supporting thin overhead wooden or metal strips or latticework, providing shade and supporting climbing plants. It may be freestanding.

5.3 Checklist

See Attachment A

ATTACHMENT A

March 18, 2025

Objective Development & Design Standards Checklist

The Objective Development & Design Standards (ODDS) Checklist is applicable to both Multiple Family Development and Mixed-Use Development. Refer to the ODDS Chapter's 1 through 4 for specific additional information.

In addition to any objective standards imposed through the underlying base zone, the ODDS document provides standards for housing developments limited to the following areas (refer to the Policy Plan Land Use Plan Exhibits LU-01, LU-04, and CD-01 and the official Zoning Map):

- **Multiple-Family Development.** Applies to all multiple-family residential categories as shown on Policy Plan Land Use Plan Exhibit LU-01 (LMDR, MDR, and HDR, and Mixed-Use land use designations).
- **Mixed-Use Development.** Applies to mixed-use categories as shown on Policy Plan Land Use Plan Exhibit LU-01and associated Place Types as shown on Exhibit CD-01.

The Applicant is required to provide a completed Checklist upon application submittal.

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
2.1 Site Design Standards				
2.1.1 Site Design				
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows:				
a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way				
b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way				
c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.				
d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way				
2.1.2 Site Access				
1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley				
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway				
2.1.3 Parking				
A. Placement on site Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Surface parking**				
a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property.				
b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.				
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces.				
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade.				
4. **Subterranean parking** A subterranean parking structure may extend to all property lines.				
5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court.				
B. Surface parking lot design. Surface parking lots shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Screening**				
a. **Street-adjacent parking lots**				
i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
in height.				
ii. Walls and hedges must be a minimum 18 inches from the back of sidewalk				
iii. Landscaped berms are prohibited				
b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs				
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas)				
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings				
C. Parking court design				
1. **Design standards**				
a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet				
b. The parking court shall consist of only 1 parking bay, and this bay shall not exceed a maximum width of 62 feet				
c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.				
D. Parking structure design				
1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum 2 design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in Section 2.2.2 Building Types.				
2. **Parking structure standards**				
a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet				
b. Single access lane driveways into the structure shall not exceed 14 feet in width				
c. Parked vehicles shall be screened from view from adjoining streets				
d. Signs as shall be consistent with Division 8: Sign Regulations of Ontario Development Code				
2.1.4 Open Space Standards				
A. Common open space and public frontage				
1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:				
a. **Close to park** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
b. **Common open space types** 1 or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.				
2. **Access and visibility** At-grade open space shall be accessible and visible from the adjacent ground floor				
B. Common open space types				
Forecourt				
1. **Design standards**				
a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.				
b. **Minimum dimensions** Forecourts shall be a minimum of 15 feet by 15 feet				
Side garden				
1. **Design standards**				
a. **Minimum side garden dimensions**: 15 feet by 15 feet				
b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:				
i. Up to a total of 30 percent of the side garden's width or length				
ii. A ground-floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden				
Court				
1. **Design standards.**				
a. **Minimum dimensions:** All courts shall be a minimum of 20 feet by 30 feet				
b. **Enclosure**				
i. A court shall have building walls on a minimum 2 sides, while the third and fourth side can be defined by architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).				
ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).				
c. **Access**				
i. Courts shall be accessed from the street or walkway				
ii. Units shall be allowed to take direct access through a court				
d. **Encroachments**				
i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard				
ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court				
e. **Common Area** A court shall serve as communal spaces and pedestrian access				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
f. **Amenities** A court shall include a minimum 1 of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
Passage				
1. **Design standards**				
a. **Location** Passages shall be provided between buildings or side gardens				
b. **Size** Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side				
C. Private Open Space				
1. **General standards**				
a. A minimum of 60 square feet of private open space shall be provided for each residential unit and a minimum 1 of the private on-site open space types shall be provided.				
b. **Exception:** Private on-site open space shall not be required for a project site that is located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.				
D. Private Open Space Types				
Private roof deck				
1. **Description** A private open space located on the roof of a building dedicated to a single unit				
2. **Design standards** Minimum dimensions of 7 feet by 7 feet				
Backyard				
1. **Description** A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.				
2. **Design standards**				
a. **Size** Minimum dimensions of 20 feet by 15 feet				
b. **Encroachments** Encroachment into the backyard is allowed up to 30% of the rear yard area				
Architectural façade elements as private open space				
1. **Description** The following elements defined in Section 2.3 Architectural Façade Elements may be used to meet on-site private open space requirements.				
a. Balcony				
b. Terrace Balcony				
Entry elements as private open space				
1. **Description** The following elements defined in Section 2.4 Entry Elements may be used to meet on-site private open space requirements.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
a. Dooryard				
b. Porch				
2.1.5 Landscaping				
1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).				
2.1.6 Fences and Walls				
1. **Fence and wall heights** Walls and fences shall be designed in compliance with the applicable standards contained in Division 6.02 (Walls, Fences, and Obstructions) of the Ontario Development Code.				
2.2 Multiple-Family development standards				
Table 2.01 Multiple-Family Development Standards per Development Type *(Refer Section 2.2.2 Building Types)*				
A. Building Development Standards				
1. **Minimum Setback from Public Street Property Lines:** *(refer to Note 9 – Table 2.01).*				
a. **Arterial** **Urban** (25 du/ ac or greater) - 0 feet **Neighborhood** (Less than 25 du/ac) – 10 feet **Housing** (Less than 25 du/ac and 5 units or less – 14 feet				
b. **Collector** **Urban** (25 du/ ac or greater) - 5 feet **Neighborhood** (Less than 25 du/ac) – 10 feet **Housing** (Less than 25 du/ac and 5 units or less – 14 feet				
c. **Local** **Urban** (25 du/ ac or greater) – 5 feet **Neighborhood** (Less than 25 du/ac) – 15 feet **Housing** (Less than 25 du/ac and 5 units or less – 20 feet				
2. **Minimum Setback from Interior Project Boundary Property Lines –** 5 feet				
3. **Minimum Setback from Public Alley Property Lines –** 5 feet				
4. **Minimum Setback from Private Drives/Alleyways (from edge of drive aisle)**				
a. Living Area – 10 feet				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
b. Garages and other nonhabitable Structures – 10 feet				
5. **Minimum Setback from Dwellings to Parking Spaces**				
a. Living Area – 10 feet				
b. Garages and other non-habitable structures – 5 feet				
6. **Minimum Setback from Parking Space or Drive Aisle to Wall or Fence –** 5 feet				
7. **Minimum Separation Between Detached Buildings:**				
a. Dwelling Front to Front- < 2-Stories: 25 FT; > 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
b. Dwelling Front to Rear- < 2-Stories: 25 FT; > 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
c. Dwelling Front to Side - < 2-Stories: 25 FT; > 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
d. Dwelling Side to Side - < 2-Stories: 10 FT; > 3 Stories: 15 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
e. Dwelling Side to Rear - 15 FT; unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
f. Dwelling Rear to Rear- 20 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
8. **Garage to Garage (or other nonhabitable structures)** a. 30 FT – Entry to Entry b. 30 FT – Entry to Side c. 10 FT – Side to Side d. 10 FT – Side to Rear				
9. **Minimum Storage Space –** 240 CF *(refer to Note 4 – Table 2.01)*				
10. **Maximum Street Façade Height** a. Downtown District – 45 Feet *(refer to Note 8 – Table 2.01)* b. Other Districts & Corridors – n/a c. Neighborhood Centers - 35 Feet				
11. **Maximum Building Height**				

ODDS – Chapter 2				
2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
a. Downtown District – n/a *(refer to Note 8 – Table 2.01)* b. Other Districts & Corridors – n/a *(refer to Note 5 – Table 2.01)* c. Neighborhood Centers -60 FT *(refer to Note 5 – Table 2.01)*				
12. **Minimum Setback from Major Pipelines -** 50 FT (to habitable structures) *(refer to Note 7 – Table 2.01)*				
2.2.1 Height Standards				
1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility.				
2. **Multiple family development types** The following height limits shall apply to all proposed multiple family development types.				
a. Buildings within 100 feet of single-family residential dwellings must not exceed 35 feet or the height of adjacent residential buildings, whichever is greater				
b. Buildings within 100 feet of undeveloped single-family zone parcels shall not exceed 35 feet in height				
2.2.2 Building Types				
1. **Identify** the suitable building type for the project based on its density, including:				
a. **"Urban"** (applies to multiple-family development projects with 25 dwelling units per acre or more). Projects less than 1 acre in size but exceeding 25 du/ac can use neighborhood or housing Form in lieu of the urban massing form.				
b. **"Housing"** (applies to multiple-family development projects with fewer than 25 dwelling units per acre that include buildings with 5 or fewer units).				
c. **"Neighborhood"** (applies to multiple-family development projects with fewer than 25 dwelling units per acre that include buildings with more than 5 units)				
A. Urban massing and façade design				
Urban massing and façade design standards are required for all multiple-family developments projects with 25 du/ac or more				
Massing increments				
1. **Massing standards**				
a. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows: i. The maximum length of a single massing increment shall not exceed 150 feet ii. A minimum 2 distinct massing increments shall be provided				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
b. **Articulation of massing increments** Individual massing increments shall be differentiated from one another using a minimum 1 of the following massing strategies:				
i. Vary parapet height by a minimum of 3 feet				
ii. Increase number of stories				
iii. Set back upper floor. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade				
iv. Set the entire facade back a minimum of 10 feet for 20 feet				
v. Incorporate tower element				
c. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.				
d. **Repeating massing increment design** A massing increment design may be repeated on the same project elevation. Repeated massing increments shall be separated by a distinct massing increment.				
2. **Element standards**				
a. Building façade along font lot line - 400 feet max				
b. Massing increment - 150 feet max				
c. Space between buildings - 0 feet min				
d. Façade setback (if elected) - 10 feet x 10 feet min				
e. Building base height - 15 feet min				
f. Building façade alongside lot line - 200 feet max.				
g. Height difference between massing increments - 3 feet min				
h. Upper-level setback from façade - 15 feet min				
Façade Composition				
1. **Façade composition standards**. The building facade shall be divided into a base and body as follows:				
a. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies:				
i. Provide a string course at the top of the first story				
ii. Specify base materials different from rest of façade				
iii. Specify base colors different from rest of façade				
iv. Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
b. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:				
i. Windows shall be organized in bays, bands, curtain wall, and grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.				
ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.				
Fenestration design				
1. **Façade fenestration standards**				
a. **Minimum fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the façade.				
i. **Ground floor** (a) Front lot line: 70% minimum (b) All other frontages: 50% minimum (c) Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade (d) Ground floor bathroom windows are prohibited on facades that face front lot line				
ii. **Upper floors** 15% minimum.				
B. Neighborhood massing and façade design				
Neighborhood massing and façade Design standards are required for all multiple-family development types applicable to multiple-family development projects with fewer than twenty- five (25) du/ac that include buildings with more than 5 units.				
Massing increments				
1. **Element standards**				
a. Building façade along front lot line – 135 feet max				
b. Building façade length alongside interior lot line – 135 feet max				
c. Space between buildings – 15 feet min				
d. Massing increment – 75 feet max				
e. Height difference between massing increments – 2 feet min				
f. Façade setback (if elected) – 10 feet x 20 feet				
2. **Massing standards** a. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
135 feet shall be divided into massing increments as follows:				
i. The maximum length of a single massing increment shall not exceed 75 feet				
ii. A minimum of 2 distinct massing/architectural increments shall be provided using 1 strategy from the massing strategies list and 1 strategy from architectural strategy list.				
b. **Massing strategy list**				
i. Vary height by a minimum of 3 feet				
ii. Increase number of stories				
iii. Set back upper floors by a minimum 15 feet				
iv. Set the entire facade back a minimum of 10 feet for twenty feet				
v. Increase story height				
vi. Incorporate tower element				
c. **Architectural strategy list**				
i. Use different facade materials and/or colors				
ii. Window treatment and design. Use different window types, configurations, and/or frame colors				
iii. Diversify facade elements (balconies, trellises, chimneys, awnings) as per Section 2.3 Architectural Façade Elements.				
iv. Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in Section 2.4 Entry Elements.				
v. Massing increments that have distinct facades, shall appear as distinct buildings				
vi. A massing increment design can be repeated twice on the same project elevation, with a distinct separation between repeated increments.				
Façade composition				
1. **Façade composition standards**				
a. **Multi-story building façades** The building facade shall be divided into a base and body as follows:				
i. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum 2 of the following strategies.				
(a) Provide a string course at the top of the first story				
(b) Specify base materials different from rest of façade				
(c) Specify base colors different from rest of façade				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
(d) Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements				
ii. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:				
(a) Windows shall be organized in bays, bands, curtain wall, and/or grid of windows consistent with the Facade Fenestration Standards for the Neighborhood massing type.				
(b) Each massing increment's entire facade composition must be contained within its boundaries, with no overlap of facade elements, like window openings and balconies, across the division between increments.				
Fenestration Design				
1. **Façade fenestration standards**				
a. **Minimum Fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:				
i. **Ground Floor:** 30% minimum (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.				
(b) Ground floor bathroom windows are prohibited on facades that face the front lot line				
ii. **Upper floors:** 15% minimum				
C. House-form massing and façade design				
House-form massing and façade Design standards for projects with densities below 25 du/ac that include buildings with 5 or fewer units.				
1. **Element standards**				
a. Building Façade length along font lot line – 60 feet max.				
b. Massing Increment - 60 feet max.				
c. Building Façade length alongside lot line - 60 feet max.				
d. Space between buildings – 15 feet max.				
2. **Massing and façade composition standards**				
a. **Massing increments** A massing increment shall include the whole length of a single building façade, up to 60 feet in length. Only **1** massing increment per building façade shall be included.				
b. **Length of buildings** Buildings along front and side lot lines that face public streets shall be no longer than 60 feet.				
c. **Space between buildings** Buildings along front and side lot lines shall be separated by a minimum 15 feet.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
d. **Articulation of building façade**. Frontages along front and side lot lines must differ from neighboring buildings on-site using a minimum of **2** of the specified massing and architectural strategies:				
i. **Façade setback** Setting a portion of the facade back a minimum of 2 feet for a length of 20 feet				
ii. **Material or color** Use different facade materials and/or colors consistent with the architectural style				
iii. **Window treatment and design** Use different window types, configurations, and/or frame colors				
iv. **Architectural façade elements** Vary façade elements (balconies, trellises, chimneys, awnings) according to Section 2.3 Architectural Façade Elements.				
v. **Entry elements** Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in Section 2.4 Entry Elements.				
vi. **Vary roof form** Vary the roof form of different increments such as gabled, hipped, and others consistent with the architectural style of the building (selected from Chapter 4).				
Fenestration Design				
1. **Façade fenestration standards**				
a. **Minimum fenestration.** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:				
i. **Ground floor:** 30% minimum (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade. (b) **Exception:** Windows on garage panel door (c) Ground floor bathroom windows are prohibited on facades that face front lot line				
ii. **Upper floors:** 15% minimum				
iii. The horizontal distance between wall openings shall not exceed 15 feet within a facade or massing increment.				
2.2.3 Material and Detailing				
Building Materials				
1. **Prohibited materials**				
a. Fiberglass or plastic (false) architectural or facade elements or ornamentations are prohibited				
b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street				
c. Reflective materials, such as mirrored glass, shiny metal, and chrome				
2. **Combining materials** When combining **2** or more wall materials on **1** facade:				
a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco				

ODDS – Chapter 2				
2.0 MULTIPLE FAMILY STANDARDS	**Applicant**		**City**	
	Done	N/A	Done	N/A
above masonry).				
b. Vertical joints between different materials shall only occur at inside corners.				
Windows and Doors				
1. **Materials and types**				
a. **Window recess** Windows shall be recessed specific to each building's architectural style listed in Chapter 4: Architectural styles but shall be no less than 2 inches for any style.				
b. **Window Material**				
i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing and profile thickness and employ muted patterns and colors consistent with the building's architectural style.				
c. **Trim**				
i. **Window and door trim materials** Wood or cement fiber board is permitted				
ii. **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber, reinforced concrete, and cement fiber board.

2.3. Architectural façade elements				
2.3.1 Awning				
1. **Element standards**				
a. **Depth**				
Minimum - Not applicable				
Maximum - 3 feet				
b. **Clearance above ground**				
Minimum - 8 feet				
Maximum - Not applicable				
c. **Length** Refer to Design Standards				
2. **Design standards**				
a. **Encroachment** Residential Awnings may encroach into the setback or public right- of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Material** Residential Awnings shall be of a simple shed form and made of code- compliant fire-resistant material.				
c. **Upper floors** Each individual awning shall cover no more than **1** window opening.				
2.3.2 Projecting Room				
1. **Element standards**				
a. **Depth**				
Minimum - Not applicable				
Maximum - 2 feet				
b. **Width**				
Minimum - Not applicable				
Maximum - 20 feet				
c. **Height**				
i. 2-story building: 1 story max				
ii. 3 story building: 1 story max				
iii. 4 story+ building: 2 stories max

2. **Design standards**				
a. **Encroachment** Projecting rooms may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Support**				
i. Building projecting rooms shall have visible supports (e.g., beams, braces, or brackets)				
ii. Building projecting rooms shall be set back 10 feet from an adjacent property line				
c. **Space between projecting rooms.** Space between Projecting Rooms shall be 20 feet within the same building plane.				
2.3.3 Bay Window				
1. **Element standards**				
a. **Height**				
Minimum - Not applicable				
Maximum - 10 feet				
b. **Width**				
Minimum - Not applicable				
Maximum - 10 feet				
2. **Design standards**				
a. **Encroachment** Bay windows may encroach into the setback or public right- of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Dimensions** Bay windows shall be a maximum of 10 feet wide and shall have a height that is equal to or greater than their width.				
c. **Depth** The depth of Bay Windows shall be a minimum of 3 feet				
d. **Façade placement** Bay windows shall be placed a minimum of 2 feet from any building corner and a minimum of 3 from any other bay window.				
e. **Fenestration** Bay windows shall consist of a minimum 75% transparent fenestration				
2.3.4 Balcony				
1. **Element standards**				
a. **Height**				
Minimum – Not applicable.

2.4. Entry elements				
2.4.1 Stoop				
1. **Element standards**				
a. **Stoop Width**				
Minimum - 4 feet				
Maximum - 8 feet				
b. **Stoop Depth (not including stairs)**				
Minimum - 4 feet				
Maximum - 8 feet				
c. **Stoop Floor Depth**				
Minimum - 1.5 feet				
Maximum - 3 feet				
d. **Planter/ Fence Height**				
Minimum - Not applicable				
Maximum - 3 feet				
2. **Design standards**				
a. **Relationship to entry** Stoops must align directly with the unit entry(s) they serve.				
b. **Number of units served** Stoops shall provide access to a maximum of 2-unit entries.				
c. **Lobby entries** Stoops may provide access to a lobby entry.				
d. **Stoop stairway orientation** The exterior stoop stairway may be oriented perpendicular or parallel to the adjacent sidewalk.				
3. **Landscaping** Landscaping shall be planted on the sides of the stoop, either at grade or in raised planters. Raised planters shall have a minimum depth of 12 inches.				
2.4.2 Dooryard				
1. **Element standards**				
a. **Depth, Clear**				
Minimum - 8 feet				
Maximum - Not applicable				

ODDS – Chapter 2

b. **Finish level above sidewalk**				
Minimum - Not applicable				
Maximum - 3 feet				
c. **Length of Terrace**				
Minimum - Not applicable				
Maximum - 150 feet				
d. **Distance between stairways**				
Minimum - Not applicable				
Maximum - 50 feet				
2. **Design standards**				
a. **Relationship to Entry** Dooryards shall align directly with the unit entry(ies) they serve.				
b. **Number of units served** Stoops shall provide access to a maximum of 2-unit entries.				
c. **Enclosure** Dooryards shall be enclosed by a maximum 3-foot high, decorative walls, fences, or low hedges.				
d. **Architectural Style** Walls and/or fences shall match the building's architectural style.				
e. **Doorway Stairway Orientation** If the doorway is raised above grade, the exterior stairway for raised Dooryards shall be oriented perpendicular or parallel to the adjacent sidewalk.				
2.4.3 Porch				
1. **Element standards**				
a. **Porch Depth**				
Minimum - 8 feet				
Maximum - Not applicable				
b. **Porch width**				
Minimum - 8 feet				
Maximum - Not applicable				
c. **Porch height.**				
Minimum - 8 feet				
Maximum - 12 feet				
d. **Floor height.**

Maximum - Not applicable				
2. **Design standards**				
a. **Number of units served** Porches shall provide access to multiple ground-floor unit doors.				
b. **Wrap-around porches** Porches shall wrap around building corners.				

ODDS – Chapter 3

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
3.1 Site Design Standards				
3.1.1 Site Design				
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows:				
a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way.				
b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way.				
c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.				
d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way				
3.1.2 Site Access				
1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley				
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway.				
3.1.3 Parking				
A. Placement on site Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Surface Parking**				
a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property line, or aligned with the building façade, whichever is greater.				
b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.				
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces				
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade				
4. **Subterranean parking** A subterranean parking structure may extend to all property lines.				
5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
B. Surface parking lot design: Surface parking lots shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Screening**				
a. **Street-adjacent parking lots**				
i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet in height. Walls and hedges must be a minimum 18 inches from the back of the sidewalk.				
ii. Walls and hedges must be a minimum 18 inches from the back of the sidewalk				
iii. Landscaped berms are prohibited				
b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs.				
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).				
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings				
C. Parking court design				
1. **Design standards**				
a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet				
b. The parking court shall consist of only **1** parking bay, and this bay shall not exceed a maximum width of 62 feet.				
c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.				
D. Parking structure design				
1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum **2** design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in 3 Building Types.				
2. **Parking structure standards**				
a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet. Single openings shall be no wider than 14 feet.				
b. Parked vehicles shall be shielded from view from adjoining streets				
c. The exterior elevations of parking structures facing a public street shall incorporate architectural elements from the project building.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
d. Vehicular entries shall be located a minimum 50 feet from the corner of a block				
e. Signs as shall be consistent with Division 8: Sign Regulations of Ontario Development Code.				
3.1.4 Open Space Standards				
A. Common open space and public frontage				
1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:				
a. **Close to parks** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size.				
b. **Common open space types** At least **1** or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.				
2. **Access and visibility** At-grade open space shall be accessible and visible from the adjacent ground floor				
B. Common open space and public frontage				
Forecourt				
1. **Design standards**				
a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.				
b. Minimum dimensions. Forecourts shall be a minimum of 15 feet by 15 feet				
Side garden				
1. **Design standards**				
a. Minimum side garden dimensions: 15 feet by 15 feet				
b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:				
i. Up to a total of 30 percent of the side garden's width or length				
ii. A ground-floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden.				
Court				
1. **Design standards**				
a. **Minimum dimensions:** All courts shall be a minimum of 20 feet by 30 feet				
b. **Enclosure**				
i. A court shall have building walls on a minimum 2 sides, while the third and fourth side can be defined by				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).				
ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).				
c. **Access**				
i. Courts shall be accessed from the street or walkway				
ii. Units shall be allowed to take direct access through a court				
d. **Encroachments**				
i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard.				
ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court.				
e. **Common area** A court shall serve as communal spaces and pedestrian access				
f. **Amenities** A court shall include a minimum **1** of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.				
Passage				
1. **Design standards.**				
a. **Location** Passages shall be provided between buildings or side gardens.				
b. **Size** Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side.				
C. Private Open Space				
1. **General standards**				
a. A minimum 60 square feet of private open space shall be provided for each residential unit and a minimum **1** of the private on-site open space types shall be provided.				
b. **Exception:** Private on-site open space shall not be required for a project site that is located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.				
D. Private Open Space Types				
Private roof deck				
1. **Description** A private open space located on the roof of a building dedicated to a single unit.				
2. **Design standards**				
a. Minimum dimensions of 7 feet by 7 feet				
b. Materials, finishes, fixtures, and colors visible from the street shall be designed consistent with the architectural style of the building.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
Backyard				
1. **Description** A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.				
2. **Design standards**				
a. Backyards are located behind the unit				
b. Size. Minimum dimensions of 20 feet by 15 feet				
c. Encroachments. Encroachment into the backyard is allowed up to 30% of the space's width and/or length.				
d. Maximum projection for any ground floor element is 8 feet, with a 10-foot upper floor setback from property line if there's usable space above the first floor.				
Architectural façade elements as private open space				
1. **Description** The following elements defined in Section 2.3 Architectural Façade Elements may be used to meet on-site private open space requirements.				
a. Balcony				
b. Terrace Balcony				
Entry elements as private open space				
1. **Description** The following elements defined in Section 2.4 Entry Elements may be used to meet on-site private open space requirements.				
a. Dooryard				
b. Porch				
3.1.5 Landscaping				
1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).				
2. **Paths** Where front yards are landscaped, individual paths to sidewalk shall be provided for each entrance.				
3. **Materials** Decorative accents. Paving materials shall incorporate decorative elements consistent with the architectural style of the building.				
3.1.6 Fences and Walls				
1. **Fence and wall heights** Walls and fences shall be designed in compliance with the applicable standards contained in				

ODDS – Chapter 3

a. **Ground Floor** **Non-residential** – 15 feet **Residential** – 10 feet				
b. **Upper and Sub Levels –** 9 feet				
13. **Minimum Setback from Major Pipelines –** 50 feet (to habitable structures) *(refer to Note 6 – Table 3.01)*				
3.2.1 Height Standards				
1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility.				
2. **Vertical mixed use development types** The following height limits shall apply to all proposed multiple family development types.				
a. Buildings within 100 feet of single-family residential dwellings must not exceed 35 feet or the height of adjacent residential buildings.				
b. Buildings within 100 feet of undeveloped single-family zone parcels shall not exceed 35 feet in height.				
3.2.2 Ground Floor Building Frontage				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
1. **Mixed-Use development types.** The ground floor frontage for vertical mixed-use developments must be designed to accommodate commercial uses.				
3.2.3 Building Types				
Identify the suitable building type based on location, including:				
1. **"Main Street"** (applicable to mixed-use areas within the District Place type as shown on Policy Plan Exhibits LU-04 and CD-01).				
2. **"Urban"** (applicable to mixed-use areas outside the District Place type).				

(Table 3.2-2 Mixed-Use Building Types)

TOP Land Use Place type	Max Permitted Height	Building Types
Downtown	45 feet	Main Street
Airport Metro/Entertainment	120 feet	Main Street
Guasti	70 feet	Main Street
South Euclid	70 feet	Main Street
South Employment	70 feet	Main Street
East Holt Blvd	70 feet	Urban
Inland Empire Blvd	70 feet	Urban
Infill	50 feet	Urban
South of Riverside Drive	50 feet	Urban

A. Main Street Massing and Façade Design				
Massing increments				
1. **Element standards**				
a. Building Façade along font lot line (300 feet max)				
b. Building Façade alongside lot line (150 feet max)				
c. Space between buildings (0 feet min)				
d. Massing Increment (75 feet max)				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
e. Height Difference between Massing Increments (3 feet min)				
f. Façade Break (10 feet x 10 feet min)				
g. Upper-Level Setback (15 feet min)				
2. **Massing standards**				
a. **Size of massing increments** Building facades that face public streets and are longer than 75 feet in length shall be divided into massing increments as follows:				
i. The maximum length of a single massing increment shall not exceed 75 feet.				
ii. Single building projects less than 150 linear feet of street frontage shall have no massing increments applied.				
iii. Single building projects between 150 and 250 linear feet of street frontage shall have at minimum 2 massing increments separated by a façade break.				
iv. Single project buildings that have more than 250 linear feet of street frontage shall have 3 massing increments each separated by a façade break.				
b. **Required difference in facade height.** Adjacent massing increments must vary in façade height measured from the sidewalk to the eave, cornice, or parapet, using a minimum **1** massing strategy:				
i. Vary number of stories				
ii. Vary the parapet height by a minimum of 3 feet				
iii. Incorporate tower element				
iv. Set back upper floor(s) a minimum 15 feet				
c. **Articulation of massing increments.** Individual massing increments shall be differentiated from one another using **3** of the following architectural strategies:				
i. **Set façade increment back** Set the entire facade increment back a minimum of 3 feet.				
ii. **Base height** Vary the height of the building base of adjacent increments.				
iii. **Façade colors** Use different facade materials and/or colors.				
iv. Window type/configuration. Use different window types, configurations, and/or frame colors.				
v. **Presence/arrangement of façade elements** Vary the presence or arrangement of façade elements such as projecting balconies, recessed balconies, trellises, chimneys, and awnings.				
d. **Self-contained massing increments** Facade elements, such as window openings and balconies, shall not overlap the division between massing increments.				
e. **Repeating massing increment design** A massing increment design may be repeated a maximum of 3 times on				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
the same project elevation. Repeated massing increments may not be located immediately adjacent to each other.				
Façade Composition				
1. **Facade composition standards**				
a. **Facade Grid** The window, door, and/or shopfront openings of each individual facade shall be organized into a grid as follows:				
i. **Horizontal alignment of elements** Rooflines, openings, and materials within each facade shall be aligned horizontally.				
ii. **Vertical Bays** The entirety of a building's façade shall be clearly divided into vertical bays.				
b. **Multi-story building façades** Multi-story building facades shall be designed to include a base, middle, and top.				
i. **Base** Building base of entire ground floor for buildings less than 5 stories or 25 feet for buildings 5 stories or more, shall use a minimum of 2 of the following strategies:				
(a) Provide a string course at the top of the first story;				
(b) Specify base materials different from rest of facade;				
(c) Specify base colors different from rest of facade;				
(d) Provide a ground floor Arcade or Gallery per (Section 3.2 Architectural Façade Elements).				
ii. **Middle** The middle of the building—the facade of all floors located above the base—shall be designed as follows:				
(a) Window and door openings shall be organized in bays per the façade fenestration standards of this section.				
(b) If provided, attached façade elements such as balconies, bay windows, and projecting rooms, shall be designed per the façade fenestration standards of this section.				
iii. **Top** The façade elements that define the upper limits of the building—shall be designed as follows:				
(a) The top of the building facade shall incorporate capping elements, such as a cornice, enhanced ornamentation, or a decorative parapet.				
Fenestration Design				
1. **Façade fenestration standards**				
a. **Minimum Fenestration.** Facade designs shall include a minimum percentage of fenestration calculated as the total percentage of window and door area divided by the total area of that portion of the façade:				
i. **Ground Floor:** 70% minimum				

ODDS – Chapter 3

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
ii. **Upper Floors:** 15% minimum				
2. **General to all floors.** All window jambs/frames shall be set back a minimum of 2 inches back from the facade plane.				
3. **Specific to ground floors** Structural elements shall be visible on the exterior of ground floor facades to visually convey that the upper floors are supported.				
a. **Ground floor windowsills** Facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.				
b. **Ground floor bathroom windows** Prohibited on facades that face front streets.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
B. Urban massing and façade design				
1. **Urban massing and façade design** standards are required for all multiple-family developments projects with 25 du/ac or more.				
Massing increments				
1. **Massing Standards**				
a. Building Façade along font lot line (400 feet max)				
b. Massing Increment (150 feet max)				
c. Space between buildings (0 feet min)				
d. Façade Setback (if elected) (10 feet x 10 feet minimum)				
e. Building base height (15 feet min)				
f. Building façade alongside lot line (200 feet max).				
g. Height difference between massing Increments (3 feet min)				
h. Upper-level setback from façade (15 feet min)				
2. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows:				
a. The maximum length of a single massing increment shall not exceed 150 feet				
b. A minimum of **2** distinct massing increments shall be provided				
3. **Articulation of massing increments** Individual massing increments shall be differentiated from one another using a minimum **1** of the following massing strategies:				
a. Vary parapet height by a minimum of 3 feet				
b. Increase number of stories				
c. Set back upper floor. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade				
d. Set the entire facade back a minimum of 10 feet for 20 feet				
e. Incorporate tower element				
4. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.				
a. **Repeating massing increment design** A massing increment design may be repeated on the same project				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
elevation. Repeated massing increments shall be separated by a distinct massing increment.				
Façade Composition				
1. **Façade Composition Standards.**				
2. **Multi-story building façades. The building facade shall be divided into a base and body as follows:**				
a. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies:				
i. Provide a string course at the top of the first story.				
ii. Specify base materials different from rest of façade.				
iii. Specify base colors different from rest of façade.				
iv. Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements.				
b. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:				
i. Windows shall be organized in bays, bands, curtain wall, and grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.				
ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.				
c. **Strategies** The listed strategies show acceptable ways to differentiate massing increments:				
i. Vary the height of the building body.				
ii. Use different facade materials and/or colors.				
iii. Use different window types/configurations.				
iv. Diversify facade elements, including projecting balconies, recessed balconies, canopies, and awnings.				
Fenestration design Fenestration design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.				
1. **Façade fenestration standards**				
a. **Minimum fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the façade.				
i. **Ground floor**				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
(a) Front lot line: 70% minimum.				
(b) All other frontages: 50% minimum.				
(c) Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade.				
(d) Ground floor bathroom windows are prohibited on facades that face front lot line.				
ii. **Upper floors.** 15% minimum.				
3.2.4 Material and Detailing				
A. Building Materials				
1. **Prohibited materials**				
a. Fiberglass or plastic (false) architectural or facade elements or ornamentations.				
b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street.				
c. Reflective materials, such as mirrored glass, shiny metal, and chrome are allowed with the following **exception**:				
i. Application to small areas (up to 50 sq ft or 2% of façade area, whichever is less) for signage highlighting, ensuring no glare nuisance to traffic, pedestrians, or neighboring buildings.				
2. **Combining materials** When combining **2** or more wall materials on **1** facade:				
a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco above masonry).				
b. Vertical joints between different materials shall only occur at inside corners.				
B. Windows and Doors				
1. **Material and types**				
a. **Window recess** Windows shall be recessed in a manner that is specific to each building's architectural style but shall be no less than 2 inches for any style.				
b. **Architectural style of detailing** Windows, doors, frames, colors, and styles shall be appropriate to the building's architectural style in terms of window type, proportion, and color.				
c. **Materials** Windows and doors shall be made of wood, fiberglass, fiberglass-clad wood, aluminum clad wood, or metal.				
d. **Glazing** Glazing shall be clear glass with no more than ten percent daylight reduction (tinting). Reflective (mirrored) glazing is prohibited.				
e. **Residential buildings** The following are applicable to multiple-family development types.				
i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
and profile thickness and employ muted patterns and colors consistent with the building's architectural style.				
ii. Nail-on windows that are deeply set within their frame are permitted.				
iii. Muntins shall be of a substantial dimension (e.g., not flat) and shall be placed on the exterior of windows.				
i. Trim:				
(a) **Window and door trim materials** Wood or cement fiber board. Foam trim around windows is allowed. Foam trim around doors is prohibited.				
(b) **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber reinforced concrete, and cement fiber board.				
3.3. Architectural Façade Elements				
3.3.1 Arcade				
1. **Element standards**				
a. **Depth**				
Minimum - 12 Feet				
Maximum - 16 Feet				
b. **Distance from property line** - 0 Feet				
c. **Open height, clear** – refer to Design standards below				
d. **Overall height** - refer to Design standards below				
2. **Design standards**				
a. **Projection depth** The arcade projection depth from the ground floor facade shall be no greater than the height of the arcade opening.				
b. **Sidewalk depth beneath arcade** The covered sidewalk under the arcade shall be a minimum of 10 feet wide from the inside of the vertical support to the ground floor building face.				
c. **Entry element requirement** Arcades shall be combined with Shopfronts (defined in *Section 3.4 Entry Elements*).				
d. **Minimum openings and massing increments** Arcades shall be a minimum of 3 openings wide. The location where an arcade stops or changes in design or dimensions shall correspond to a change in massing increment (*Section 3.2.3. Massing and Façade Design*) for massing increment requirements.				
e. **Vertical supports** Vertical supports may be piers, columns, or arches. The width of a vertical support shall not exceed 3 feet.				
f. **Width of openings** The openings between vertical supports, as seen from the street, shall be taller than they are wide.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
g. **Shape and cadence of openings** Openings, whether rectangular or arched, must align with facade bays if present (vertical bays are mandatory for Main Street standards and optional for other massing types in *Section 3.2.3. Massing and Façade Design*).				
h. **Vertical clearance** The minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets, spandrels, and/or lower portions of arches.				
i. **Arcade height relative to interior building floor height** The height of the soffit inside the arcade shall be no less than the height of the ceiling of the floor to which it corresponds.				
j. **Architectural style** Arcade detailing, including lighting, shall utilize the architectural style of the building.				
3.3.2 Gallery				
1. **Element standards**				
a. **Depth**, clear				
Minimum - 10 Feet				
Maximum - 16 Feet				
b. **Distance from property line**, clear				
Minimum - 0 Feet				
Maximum - 5 Feet				
c. **Overall Height,** clear				
Minimum - 12 Feet				
Maximum - 2 Floors				
d. **Overall height** - refer to Design standards below				
2. **Design standards**				
a. **Projection depth** Gallery projection depth from the ground floor facade shall be no greater than the height of the gallery opening.				
b. **Sidewalk depth beneath gallery** Covered sidewalk width under the gallery must be a minimum of 10 feet from the inside of the vertical support to the ground floor building face.				
c. **Minimum openings and massing increments** Galleries shall be a minimum of 3 openings wide. The location where a gallery stops or changes in design or dimensions shall correspond to a change in massing increment (see Section 3.2.3. Massing and Façade Design).				
d. **Vertical supports** Vertical supports may be piers or columns. The width of a vertical support shall not exceed 1				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
foot.				
e. **Width of openings** Openings between vertical supports, as seen from the street, shall be taller than they are wide.				
f. **Shape and cadence of openings** Openings may be rectangular but shall not be arched.				
g. **Vertical clearance** Minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets and spandrels.				
h. **Gallery height relative to interior building floor height** Height of the soffit inside the gallery shall be no less than the height of the ceiling of the floor to which it corresponds.				
i. **Vertical alignment** Galleries may be single or double-story and shall correlate with building floors .				
j. **Architectural style** Gallery detailing, including lighting shall utilize the architectural style of the building.				
3.3.3 Commercial Awning				
1. **Element standards**				
a. **Depth**				
Minimum – 4 Feet				
Maximum - Not applicable				
b. **Clearance above sidewalk**				
Minimum – 8 Feet				
Maximum – Not applicable				
c. **Length**				
Minimum - refer to Design standards below				
Maximum - refer to Design standards below				
2. **Design standards**				
a. **Encroachment** Commercial awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Material** Commercial awnings shall be of a simple shed form, made of code- compliant fire-resistant canvas.				
c. **Width** Awning widths shall equal in size to shopfront opening widths.				
d. **Prohibited lighting** Internally illuminated and back-lit awnings and any associated light diffusers are prohibited.				
3.3.4 Commercial canopy				
1. **Element standards**				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
a. **Depth**				
Minimum – Not applicable				
Maximum - 3 Feet				
b. **Minimum clearance above ground**				
Minimum – Not applicable				
Maximum – 12 Feet				
c. **Length of terrace**				
Minimum - Not applicable				
Maximum – 150 Feet				
2. **Design standards**				
a. **Encroachment** Commercial canopies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Form and material** Canopies shall be of a simple form, made of metal and/or glass.				
c. **Support.** Canopies shall be supported either from below by metal brackets, or from above by rods and wires that affix to the wall.				
d. **Width** Canopies may extend across multiple storefronts.				
3.3.5 Awning				
1. **Element standards**				
a. **Depth**				
Minimum – Not Applicable				
Maximum - 3 Feet				
b. **Clearance above ground**				
Minimum – 8 Feet				
Maximum – Not Applicable				
c. **Length**				
Minimum - refer to Design standards below				
Maximum - refer to Design standards below				
2. **Design standards**

a. **Encroachment** Residential awnings may encroach into the setback or public right- of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Material** Residential awnings shall be of a simple shed form, made of code- compliant fire-resistant.				
c. **Upper floors** Each individual awning shall cover no more than 1 window opening.				
3.3.6 Canopy				
1. **Element standards**				
a. **Depth**				
Minimum – Not Applicable				
Maximum - 3 Feet				
b. **Minimum clearance from landing**				
Minimum – 7 Feet				
Maximum – 8 Feet				
c. **Length of terrace**				
Minimum - Not Applicable				
Maximum - 8 Feet				
2. **Design standards**				
a. **Material** Canopies shall be of a simple form, made of metal and/or glass.				
b. **Support** Canopies shall be supported either from below by metal brackets, or from above by rods or wires that affix to the wall.				
c. **Upper floors** Each individual canopy shall cover no more than 1 window opening.				
3.4. Entry Elements				
3.4.1 Shopfront				
1. **Element standards**				
a. **Height to top of transom**				
Minimum – 12 Feet				
Maximum - 16 Feet				
b. **Height to bottom of canopy/awning**				
Minimum – 8 Feet				

3.0 Mixed Use Design Standards

	Done	N/A	Done	N/A
Maximum – 10 Feet				
c. **Width of each shopfront bay**				
Minimum - 10 Feet				
Maximum - 25 Feet				
d. **Height of shopfront base**				
Minimum - 1 Foot				
Maximum - 3 Feet				
e. **Awning/Canopy Depth**				
Minimum - 4 Feet				
Maximum - Not Applicable				
2. **Design standards**				
a. **Vertical bays** Shopfront openings must align into bays, following the vertical bay specifications in *Section 3.2.3. Massing and Façade Design* of main street standards.				
b. **Architectural façade elements**				
i. Shopfronts in vertical mixed-use buildings may integrate with Galleries or Arcades.				
ii. **Visibility** Windowsills in non-entry bays shall not exceed 2 feet above grade.				
c. **Setback use and design** Recessed shopfronts without dooryard, terrace, or porch designs shall extend to the property line.				
3.4.2 Lobby Entry				
1. **Element standards**				
a. **Height to top of transom**				
Minimum – 10 Feet				
Maximum - 20 Feet				
b. **Height to bottom of canopy/awning**				
Minimum – 8 Feet				
Maximum – Not Applicable				
c. **Distance to property line**				
Minimum - Not Applicable				
Maximum - 20 Feet				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
d. **Awning/Canopy Depth**				
Minimum - 4 Feet				
Maximum - Not Applicable				
2. **Design standards**				
a. **Lobby entries** shall be visible and distinguishable from adjacent ground floor units and include a minimum of **1** of the following design strategies:				
i. Center placement for symmetry				
ii. Prominent corner location				
iii. Incorporate 2 architectural elements (columns, overhanging roofs, canopies, awnings, or ornamental light fixtures)				
iv. Recessed entry				
v. Entry framing				
b. **Main Street massing types**				
i. Lobby entries shall not exceed 20% of the frontage length				
ii. Allocate the remaining length to shopfronts				
c. **Visibility** Lobbies entries shall be visible from the public right of way as follows:				
i. Windowsills shall be no higher than 2 feet above adjacent grade				
ii. Internal shade devices such as blinds, shades, or curtains are prohibited				
d. **Forecourt** may be introduced to provide a transition between the entry and sidewalk (forecourt standards are discussed in Section 3.1.5 Open Space Standards).				

ODDS – Chapter 4

4.0 Architectural Styles

	Applicant		City	
	Done	N/A	Done	N/A
4.1 Mission – Spanish Colonial Revival				
4.1.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Asymmetrical façade/elevations				
b. Three or more roof planes.				
c. A minimum of 50 percent of the units shall have balconies or window treatments (such as shutters or awnings)				
d. Entrances are recessed a minimum 12 inches				
e. Additional details for projects over 4 stories, vertical mixed use, or with more than 15 buildings (requires 2 details):				
i. Include 2 add-on projections such as verandas, arcades, balconies, and exterior stairs				
ii. The ends of building massing's shall be stepped down				
iii. One focal point, such as courtyard, tower, or fountain				
iv. Apply wingwalls or columns on the ground level				
4.1.2 Roof				
1. **Roof design (Apply all)**				
a. Low-pitched (4:12 maximum) cross- or side-gabled roofs. The pitch shall remain constant except for a veranda or arcade.				
b. Red, fired, clay tile roofs. Tile types include both Spanish (S-shaped) and Mission (half-cylinder)				
c. Hipped roofs shall only be used in combination with gables or on a tower element				
d. Shed roofs are only used in conjunction with verandas				
e. When a flat roof is used, it shall be screened by a parapet that is an extension of the wall plane or by a modified Mansard roof				
4.1.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Roof tiles shall use terracotta, brown earth tones, or rustic red color palettes.				
b. White, cream, or tan stucco wall with smooth (20/30) textured finish (i.e., hand troweled)				
c. Wood shall be used as secondary wall material for the following and similar elements:				
i. Posts and exposed beams				
ii. Railing, spindles, and grille work				

ODDS – Chapter 4

4.0 Architectural Styles	Applicant		City	
	Done	N/A	Done	N/A
4.1 Mission – Spanish Colonial Revival				
iii. Shutters, window frames, and doors				
d. If windows have shutters, the shutters' color shall match the accent color that is used for doors or decorative trim				
e. A minimum of 1 wrought-iron element (such as railings, hardware, and gates) shall be used				
4.1.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Accent windows shall be a minimum of 20 percent of the total windows				
b. The primary facade shall include a minimum of 1 arched element				
c. A minimum of 50 percent of the windows shall be casement windows				
d. All entrance-door surrounds shall be banded with ceramic tile, molded plaster, or painted accents				
e. All casement windows and double-hung windows shall have wood frames				
f. Eighty percent of the windows shall have window muntins				
4.1.5 Decorative Details				
1. **Decorative details**				
a. All residential projects shall provide **a minimum of 4** of the following, and				
b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following				
i. Entry/front porch or patio				
ii. Decorative tiles				
iii. Clay tile vents				
iv. Wrought-iron balcony railings or support brackets				
v. Dark-metal light fixture and hardwires				
vi. Paired wood (or wood simulated) garage doors with iron hardware				
vii. Verandas, pergolas, or arcades				
viii. Exterior stairs				
ix. Awnings with metal spear supports				

ODDS – Chapter 4

Architectural Styles

4.2 Craftsman				
4.2.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Asymmetrical facades/elevations				
b. Three or more roof planes on the primary facade				
c. Front-facing gable roofs				
d. Street-facing units shall have balconies or porches				
e. The front lot line façade shall have 2 to 3 materials/colors				
4.2.2 Roof				
1. **Roof design (Apply all)**				
a. Low- to moderate-pitched gable or hipped roofs from 6:12 to 8:12				
b. Overhanging eaves (minimum 24 inches along primary elevation) with exposed rafter tails or beams				
c. Brackets or knee braces at gabled ends				
d. Use of imitation wood or asphalt shingles				
4.2.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Brick or stone shall be used in the base				
b. Primary wall materials shall include dark-color wood shingles, clapboard siding, or fiber cement siding and natural materials such as stone or brick				
c. Use of earth-toned color palette, such as browns and greens				
d. The front lot line façade shall have a minimum 3 paint colors: 1 for the cladding ,1 for trim, and 1 for accents such as windows and decorative details.				
4.2.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. A minimum of 50 percent of the windows shall be casement windows				
b. A minimum of 80 percent of the primary windows shall be multi-paned				
c. A minimum of 2 types/shapes of windows shall be used				
d. Utilize flat wood trims (typically 4½ inches or 5½ inches wide) around the primary windows and entry doors				

ODDS – Chapter 4

4.3 American mercantile				
4.3.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Asymmetrical facades/elevations				
b. Simple, rectangular form				
c. Symmetrical placement of piers, columns, ground-floor storefronts, and openings on upper levels				
d. Transparent windows and doorways shall be no less than 80 percent of the street frontage at the ground level				
e. Multistory facades are divided into base, body, and top, with the ground floor taller than the upper floors				
f. Columns or lintels over openings				
g. Bases are articulated by changes in material or changes in wall plane				
h. Minimal projections or recessions on wall plane				
4.3.2 Roof				
1. **Roof design (Apply all)**				
a. Flat roof				
b. A projecting cornice or a receding, stepped parapet				
c. Cornice and details mimic and reference historical detailing				
d. Street-facing gable roof with roof pitches at minimum 5:12 unless concealed behind a parapet				
4.3.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Walls shall be composed of brick.				
b. Decorative moldings, cornices, or an applied ornament of stone or cast concrete shall be used.				
c. No more than 3 colors shall be used on any given facade.				
d. Stucco and clapboard is prohibited.				
4.3.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Ground-floor windows and doors shall be large and expansive with a transom.				
b. Upper-floor windows shall be double-hung vertically and grouped with a rhythm consistent with the major storefront openings below.				

ODDS – Chapter 4

c. Entrance shall have higher bays, recessed entries by a minimum of 3 feet, or different color/materials				
d. Upper-floor windows shall have window lintel and sill				
e. Transom windows above the doors and windows on the ground level				
f. Fifty percent of windows shall have muntins				
g. Upper floor windows shall have a minimum 2-inch recess				
4.3.5 Decorative Details				
1. **Decorative details**				
a. All residential projects shall provide **a minimum of 4** of the following, and				
b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:				
i. Awnings, canopies, and second-floor balconies				
ii. Pedimented windows				
iii. Wide window trim with a keystone				
iv. Double-bracketed cornice				
v. Gable roof				
vi. Roof finial				
vii. Transom above door and windows on the ground level				
viii. Metal balcony railing				
ix. Canopy or awning				
x. Recessed entries				
xi. Cast-iron columns				
xii. Shopfront millwork

4.4 Tuscan				
4.4.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Asymmetrical arrangement of windows and design elements along front lot line				
b. Porches, porticoes and/or Juliet balconies				
c. Recessed entries (a minimum of 3 feet)				
4.4.2 Roof				
1. **Roof design (Apply all)**				
a. Flat or low-pitched hip or gable roof (maximum 6:12 slope)				
b. Red-toned clay tiles				
c. Multiple roof levels (at minimum 3)				
d. Large overhanging eaves (minimum 12 inches) along primary elevation				
4.4.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Incorporate rough-hewn stone as accent feature				
b. Flat stucco walls in light earth tones				
c. Use of earth-toned color palette				
d. Brown or beige window frames				
4.4.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Single- or double-hung windows shall be more horizontal in proportion, with six-over- six muntin patterns and 5½-inch-wide trim				
b. Casement windows shall be paired with four-pane patterns for smaller windows and eight-pane patterns for larger windows				
c. Vertically oriented rectangular or arched windows arranged in asymmetrical patterns				
d. Casement or double-hung sash with flat or arched lintels				
e. Windows shall be recessed 3 to 12 inches

4.5.1 Form and Massing				
1. **Façade design (Apply all)**				
a. An irregular, asymmetrical façade				
b. Rectangular structure				
c. Horizontal massing				
d. Straight and continuous lines				
e. Repeating lines and elements				
4.5.2 Roof				
1. **Roof design (Apply all)**				
a. Flat or low-pitched roofs (4:12 slope max)				
4.5.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Use of raw and natural materials including wood, concrete, metal, and glass				
b. Traditional materials (such as smooth stucco (20/30), wood, brick, and stone) shall be used as an accent material				
c. Minimum **2** materials on the building facade				
d. Use of color blocking for geometric forms and break up massing elements				
e. Building facade shall incorporate **a minimum of 2** of the following as an accent:				
i. Awnings				
ii. Popouts, trellis				
iii. Arbor structures				
iv. Balconies				
4.5.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Large glass doors and/or window openings				
b. Window wrapping around a corner of the building				
c. Narrow aluminum window frames

4.6 Farmhouse				
4.6.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Straight exterior lines, geometric form				
b. Asymmetrical massing with a gable at the front of the house				
c. Repeating shapes and lines				
d. Gable roof creating a triangular wall on the ends				
e. Incorporate farm and ranch forms (i.e. barns, silos, sheds, tank houses, and granary towers)				
f. Multiple gable and shed roof planes				
g. Geometric forms, industrial materials, and repetition				
h. Covered porches and awnings to break up volumes between lower and upper floors				
i. Variation in projecting wall planes with a minimum 12-inch depth				
4.6.2 Roof				
1. **Roof design (Apply all)**				
a. High-pitched gabled roof or shed roof (minimum 6:12 slope)				
b. Intersecting gable roofs				
c. Dark asphalt shingle, metal roofs, or synthetic slate shingles				
d. Triangular rooflines				
e. Large overhangs (minimum 2 feet in length) above the patio and garage				
4.6.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Use metal, wood, or masonry				
b. Utilize board-and-batten siding, corrugated panels				
c. Monochrome accents of doors, windows, or architectural features				
d. Stucco is permitted as an accent material

4.6.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Windows shall be double-hung with a proportion of 2 or 2½ times taller than wide				
b. Groupings of 2 or 3 double-hung window units				
c. Multi-paned windows				
d. Accent trim around window and door openings				
e. Double-hung or casement windows				
4.6.5 Decorative Details				
1. **Decorative details**				
a. All residential projects shall provide **a minimum of 4** of the following, and				
b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:				
i. Wide front porch with simple columns				
ii. Covered patio				
iii. Shed or gabled dormers				
iv. Carriage-style garage doors				
v. Dark shutters and window sashe				
vi. Gable brackets, vents, and trim				
vii. Iron-inspired barn-style lighting				
viii. Metal awnings without sides				
ix. Gooseneck light fixtures at the entrance				
x. Large doors and windows to maximize natural light				
xi. Multi-paned windows on the ground-level windows and doors				

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO PDCA24-001, A DEVELOPMENT CODE AMENDMENT AMENDING THE REFERENCE DOCUMENT SECTION OF THE CITY'S DEVELOPMENT CODE, TO IMPLEMENT OBJECTIVE DEVELOPMENT AND DESIGN STANDARDS FOR MULTIPLE-FAMILY AND MIXED-USE RESIDENTIAL DEVELOPMENT AND MAKING FINDINGS IN SUPPORT THEREOF.

WHEREAS, for the last several years, the State has enacted housing-related statutes that either limit or prohibit the use of local subjective standards for new development; and

WHEREAS, the City has historically regulated new housing development through a mix of subjective and objective standards to ensure that each project is reasonable and compatible with surrounding uses and City goals and objectives; and

WHEREAS, the City's current objective standards on their own are not sufficient to ensure that new housing development is reasonable or compatible; and

WHEREAS, as state law has evolved to increasingly limit the City's use of subjective standards, the need for more and more-thoughtful objective standards has become urgent; and

WHEREAS, specifically the approval of multiple-family residential and mixed-use residential development projects in various zoning districts based solely on the default standards currently in the City's Development Code, without additional appropriate objective regulations governing project design, site planning, building massing, height, setback, landscape, building type, architectural review, and similar criteria, threatens to adversely impact the character of existing neighborhoods and to negatively impact property values, personal privacy, and fire safety; and

WHEREAS, the City desires now to amend its local regulatory scheme to provide reasonable and appropriate objective standards, in compliance with state law and the City's own adopted housing element; and

WHEREAS, as part of the implementation of the City's Housing Element Update the City prepared this Development Code Amendment to implement multiple-family residential and mixed-use residential objective development and design standards consistent with the policy program for these standards; and

WHEREAS, on June 4, 2024, the City Council of the City of Ontario held a public hearing to consider the Project and subsequently adopted an Urgency Ordinance with a 90-day duration; and

WHEREAS, on August 20, 2024, the City Council of the City of Ontario conducted a public hearing and approved a nine-month extension of the Urgency Ordinance; and

WHEREAS, the City is adopting an official Ordinance that will allow the City to respond and impose consistent development standards to address the anticipated increase in housing development project applications; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on February 25, 2025, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and recommended that the City Council adopt the Ordinance; and

WHEREAS, on March 18, 2025, the City Council of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Ordinance have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1: ***Incorporation of Recitals.*** The recitals above are each incorporated by reference and adopted as findings by the City Council.

SECTION 2: ***Environmental Determination and Findings.*** Adoption of this Ordinance has been assessed under CEQA and is deemed exempt based on CEQA Guidelines Section 15183, as it involves the adoption and implementation of Design Standards. This falls under the exemption for Projects Consistent with a Community Plan, General Plan, or Zoning, as it directs staff to adopt standards aligned with the General Plan Housing Element policy for multiple-family residential development. The determination relies on Section 15004, providing guidance on the timing of environmental review. While projects using the Design Standards may need environmental documents, the adoption of Objective Development and Design Standards is exempt from CEQA as it won't significantly impact the environment. Staff recommends City Council acknowledge the exemption, accept the NOE, and instruct staff to file the document under CEQA and the CEQA Guidelines (14 CCR Section 1500 et seq.).

SECTION 3: ***General Plan Consistency.*** This Ordinance is, as a matter of law, consistent with the City's General Plan under the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

  - Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Policy Plan (General Plan)

Land Use Element:

- Goal LU-1 Balance. A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

  - LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.

Housing Element:

- Goal H-2 Housing Supply & Diversity. Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

  - H-2.5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

  - H-2.6 Infill Development. We support the revitalization of neighborhoods through the construction of higher-density residential developments on underutilized residential and commercial sites.

Community Economics Element:

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.

- CE-1.6 Diversity of Housing. We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses.

- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors, and centers where people choose to be.

  - CE-2.1 *Development Projects.* We require new development and redevelopment to create unique, high-quality places that add value to the community.

  - CE-2.4 *Protection of Investment.* We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

Community Design Element:

- Goal CD-1 Image & Identity: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.

  - CD-1.1 *City Identity.* We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods.

  - CD-1.2 Place Types. We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.

- Goal CD-2 Design Quality. A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

  - CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

    - Building volume, massing, and height to provide context-appropriate scale and proportion;
    - A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
    - Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

- CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

- CD-2.9 *Landscape Design.* We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

- CD-2.10 *Parking Areas.* We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

    - Structured parking: facade articulation, screening, appropriate lighting, and landscaping; and
    - Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.

- Goal CD-3 Urban, Mixed Use, and Transit-Oriented Place Types: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

    - CD-3.4 Context-Aware and Appropriate Design. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts.

    - CD-3.5 Active Frontages. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).

SECTION 4: ***Code Amendment.*** The REFERENCE Section of the Ontario Development Code is hereby amended to read in its entirety as follows:

Reference J – Objective Development & Design Standards.
This section incorporates by reference the Objective Development and Design Standards, or "ODDS," that are adopted and amended by the City Council by resolution. The ODDS are binding requirements and standards.

SECTION 5: ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 4, above, the City Council hereby APPROVES the herein described changes that comprise the Development Code Amendment, and which are attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 6: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 7: ***Severability.*** If any provision of this ordinance or its application to any person or circumstance is held to be invalid, such invalidity has no effect on the other provisions or applications of the ordinance that can be given effect without the invalid provision or application, and to this extent, the provisions of this ordinance are severable. The City Council declares that it would have adopted this ordinance irrespective of the invalidity of any portion thereof.

SECTION 8: ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 9: ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this _____ day of _____ 2024.

5.3 CHECKLIST 80

Chapter 1: Introduction

Development and design standards regulate the intensity, style, size, and orientation of development. Objective design standards are quantifiable, verifiable, and measurable, offering a predictable and fair process for housing approvals. This document aims to streamline and endorse housing design that aligns with community consistency.

1.1 Purpose

The Objective Development and Design Standards (ODDS) introduced in this document align with The Ontario Plan (TOP) Policy Plan (general plan) and the Ontario Development Code to provide objective standards for streamlined ministerial approval of residential multiple-family and mixed- use development projects consistent with state law and implementation of TOP goals and policies.

The purpose of the Residential ODDS meets 2 primary objectives to:

1. **Comply with state law.** The ODDS provide standards for design, construction, review, and approval of multiple-family residential and mixed-use development, consistent with state law.

2. **Implement TOP's Policy Plan.** The ODDS implement the multiple-family residential and mixed-use land use designations in the Land Use Element and the policies in the Community Design Element, including the vision and intended outcomes of Place Types identified in Figures CD-01 through CD-07.

1.2 Who is this document for?

This document is intended for developers and property owners in the development of real property in the City of Ontario. It serves as a guide for clear communication between property owners, designers, developers, and City staff outlining the key elements of quality design. For property owners, it offers a concise understanding of design elements that are consistent with the Policy Plan and required by the Development Code.

1.3 Applicability

In addition to any objective standards imposed through the underlying base zone, the ODDS document provides standards for housing developments limited to the following areas (refer to the Policy Plan Land Use Plan Exhibits LU-01, LU-04, and CD-01 and the official Zoning Map):

- **Multiple-Family Development.** Applies to all multiple-family residential categories as shown on Policy Plan Land Use Plan Exhibit LU-01 (LMDR, MDR, and HDR, and Mixed-Use land use designations).

- **Mixed-Use Development.** Applies to mixed-use categories as shown on Policy Plan Land Use Plan Exhibit LU-01and associated Place Types as shown on Exhibit CD-01.

1.4 User guide

1. **Identify TOP Policy Plan land use designation and zoning district.**

   a. Refer to Exhibit LU-01 Land Use Plan and identify land use designation.

   b. Refer to the Official Zoning Map to verify zoning and whether the project falls within the Specific Plan or Planned Unit Development (PUD) and adhere to the standards outlined in each document.

   c. Development applications shall utilize ODDS wherever PUD or Specific Plan standards are silent.

2. **Apply multiple-family (Chapter 2) or mixed-use (Chapter 3) development standards.**

3. **Select architecture (Chapter 4).**

   For each project type select 1 of the following 6 styles: Mission-Spanish Colonial Revival, Craftsman, American Mercantile, Tuscan, Modern, or Farmhouse.

4. **ODDS checklist.**

   Fill out the ODDS checklist.

Chapter 2: Multiple Family Standards

2.1 Site Design Standards

2.1.1 Site design

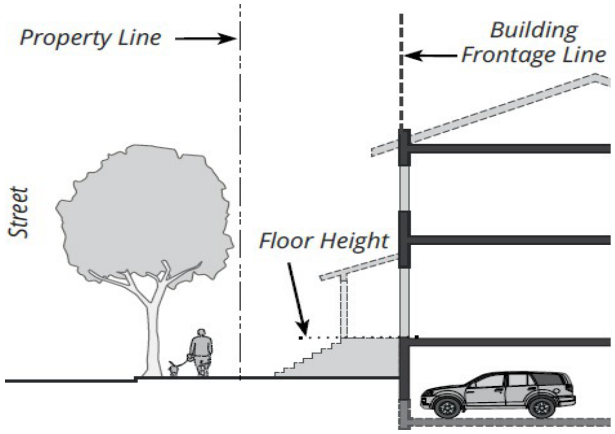
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows:

    a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way.
    b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way.
    c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.
    d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way.

2.1.2 Site access

1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley.
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway.

2.1.3 Parking



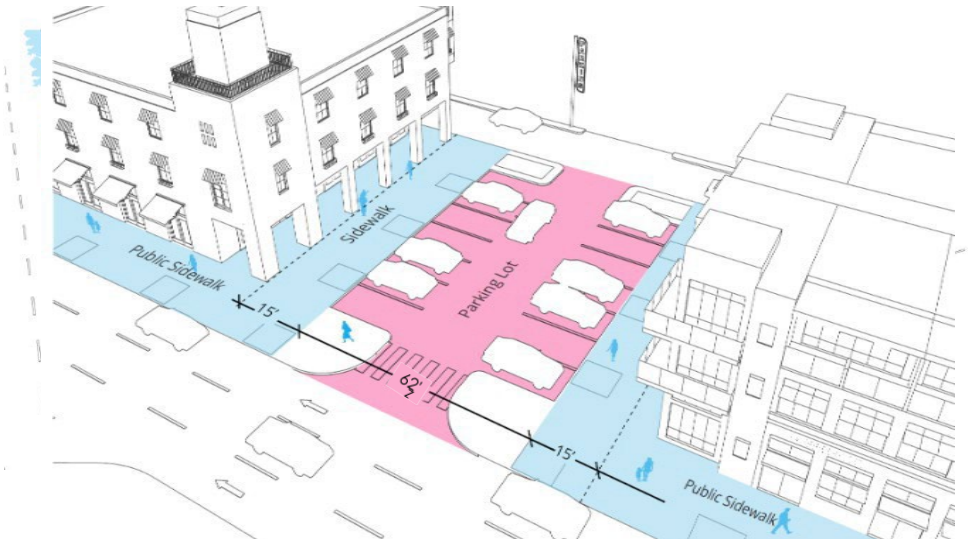
A. Placement on site

Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:

1. **Surface parking.**

    a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property line, or aligned with the building façade, whichever is greater.
    b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces.
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade.
4. **Subterranean parking** A subterranean parking structure may extend to all property lines.
5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court (see Figure 2.1-1).

Figure 2.1-1 Semi-subterranean parking



B. Surface parking lot design

Surface parking lots shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:

1. **Screening**
    a. **Street-adjacent parking lots**
        i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet in height.
        ii. Walls and hedges must be a minimum 18 inches from the back of the sidewalk.
        iii. Landscaped berms are prohibited.
    b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs.
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings.

C. Parking court design

Figure 2.1-2 Parking Court

1. **Design standards.**
    a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet (see Figure 2.1-2).
    b. The parking court shall consist of only 1 parking bay, and this bay shall not exceed a maximum width of 62 feet.

c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.

D. Parking structure design

1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum 2 design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in *Section 2.2.2 Building Types* (see Figure 2.1-3).
2. **Parking structure standards**
   a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet.
   b. Single access lane driveways into the structure shall not exceed 14 feet in width.
   c. Parked vehicles shall be screened from view from adjoining streets.
   d. Signs as shall be consistent with Division 8: Sign Regulations of Ontario Development Code.

Figure 2.1-3 Parking structure and façade design

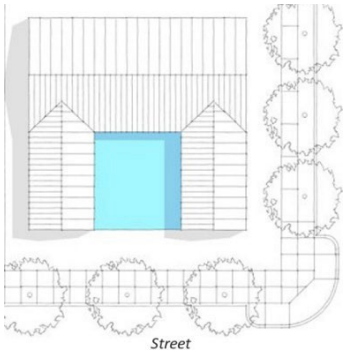
2.1.4 Open space standards

A. Common open space and public frontage

1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:
   a. **Close to parks.** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size.
   b. **Common open space types.** 1 or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.
2. **Access and visibility.** At-grade open space shall be accessible and visible from the adjacent ground floor.

B. Common open space types

Forecourt



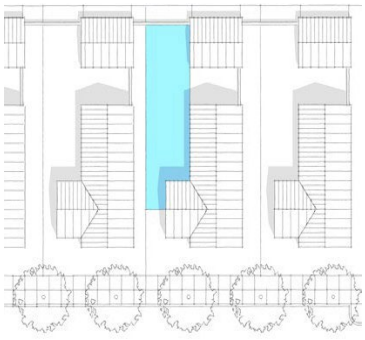


Figure 2.1-4 Forecourt

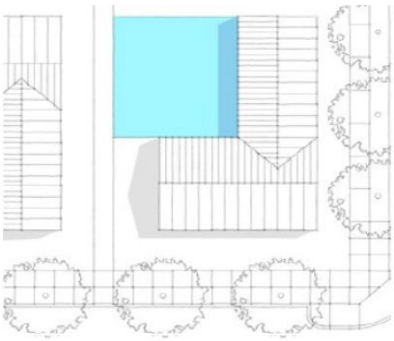
1. Design standards

a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.
b. **Minimum dimensions** Forecourts shall be a minimum of 15 feet by 15 feet.



Side garden

Figure 2.1-5 Side Garden

1. Design standards

a. **Minimum side garden dimensions**: 15 feet by 15 feet.
b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:
   i. Up to a total of 30 percent of the side garden's width or length.
   ii. A ground-floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden.

Court

Figure 2.1-6 Court Configuration

1. Design standards

a. **Minimum dimensions**: All courts shall be a minimum of 20 feet by 30 feet.
b. **Enclosure**
   i. A court shall have building walls on a minimum 2 sides, while the third and fourth side can be defined by architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).
   ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).
c. **Access**
   i. Courts shall be accessed from the street or walkway.
   ii. Units shall be allowed to take direct access through a court.
d. **Encroachments**
   i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard.

ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court.

e. **Common area** A court shall serve as communal spaces and pedestrian access.

f. **Amenities** A court shall include a minimum 1 of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.

Passage

1. **Design standards**

a. Location. Passages shall be provided between buildings or side gardens.

b. Size. Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side.

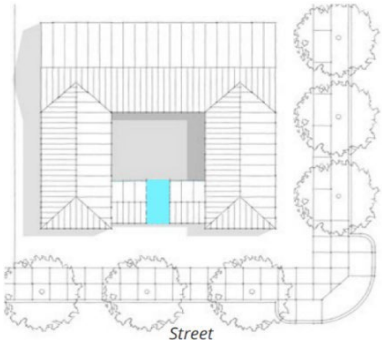


Figure 2.1-7 Passage configuration

C. Private open space

1. **General standards**

a. A minimum of 60 square feet of private open space shall be provided for each residential unit and a minimum 1 of the private on-site open space types shall be provided.

b. **Exception**: Private on-site open space shall not be required for a project site that is located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.

D. Private open space types

Private roof deck

1. **Description** A private open space located on the roof of a building dedicated to a single unit.
2. **Design standards** Minimum dimensions of 7 feet by 7 feet.

Backyard

1. **Description**. A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.
2. **Design standards.**
   a. **Size**. Minimum dimensions of 20 feet by 15 feet.
   b. **Encroachments**. Encroachment into the backyard is allowed up to 30% of the rear yard area.

Architectural façade elements as private open space

1. **Description** The following elements defined in *Section 2.3 Architectural Façade Elements* may be used to meet on-site private open space requirements.
   a. Balcony
   b. Terrace Balcony

Entry elements as private open space

1. **Description** The following elements defined in Section 2.4 Entry Elements may be used to meet on-site private open space requirements.
    a. Dooryard
    b. Porch

2.1.5 Landscaping

1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).

2.1.6 Fences and walls

1. **Fence and wall heights** Walls and fences shall be designed in compliance with the applicable standards contained in Division 6.02 (Walls, Fences, and Obstructions) of the Ontario Development Code.

2.2 Multiple-Family development standards

The following tables and associated standards for multiple-family development standards covering new residential construction, additions, remodels, or repurposed uses that necessitate an entitlement or building permit from the city. all standards listed under table 2.01 Multiple-Family Development Standards are applicable to all multiple-family projects including projects within mixed-use zones.

Table 2.01: Multiple-Family Development Standards

Requirements	Development Type			Additional Regulations
	Multiple-Family Residential			
	Mixed-Use Building Type			
A. BUILDING DEVELOPMENT STANDARDS				
1. Minimum Setback from Public Street Property Lines	**Urban (25 du/ ac or greater)**	**Neighborhood (Less than 25 du/ac)**	**Housing (Less than 25 du/ac and 5 units or less)**	Note 9
a. Arterial	0 feet	10 feet	14 feet	
b. Collector	5 feet	10 feet	14 feet	
c. Local	5 feet	15 feet	20 feet	
2. Minimum Setback from Interior Project Boundary Property Lines	5 feet			
3. Minimum Setback from Public Alley Property Lines	5 feet			
4. Minimum Setback from Private Drives/Alleyways (from edge of drive aisle)				
a. Living Area	10 feet			
b. Garages and Other Nonhabitable Structures	10 feet			
5. Minimum Setback from Dwellings to Parking Spaces				

Requirements	Development Type	Additional Regulations
	Multiple-Family Residential	
	Mixed-Use Building Type	
a. Living Area	10 feet	
b. Garages and Other Nonhabitable Structures	5 feet	
6. Minimum Setback from Parking Space or Drive Aisle to Wall or Fence	5 feet	
7. Minimum Separation Between Detached Buildings		
a. Dwelling Front to Front	< 2-Stories: 25 FT; ≥ 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
b. Dwelling Front to Rear	< 2-Stories: 25 FT; ≥ 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
c. Dwelling Front to Side	< 2-Stories: 25 FT; ≥ 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
d. Dwelling Side to Side	< 2-Stories: 10 FT; ≥ 3 Stories: 15 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
e. Dwelling Side to Rear	15 FT; unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Massing and Façade Design	Note 5
f. Dwelling Rear to Rear	20 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types.	Note 5
8. Garage to Garage (or other nonhabitable structures)	30 FT – Entry to Entry 30 FT – Entry to Side 10 FT – Side to Side 10 FT – Side to Rear	Note 5
9. Minimum Storage Space	240 CF	Note 4
10. Maximum Street Façade Height		
a. Downtown District	45 feet	Note 8
b. Other Districts & Corridors:	n/a	
c. Neighborhood Centers:	35 feet	
11. Maximum Building Height		
a. Downtown District	n/a	Note 8
b. Other Districts & Corridors:	n/a	Note 5
c. Neighborhood Centers:	60 FT	Note 5
12. Minimum Setback from Major Pipelines	50 FT (to habitable structures)	Note 7

Notes:

1. *An existing lot of record that is substandard as to minimum "project" area and/or dimension(s), shall be permitted all the development rights of the zone in which it is located.*
2. *The density range shall be consistent with the underlying Mix-Used Category identified in Figure LU-04, Mixed Use Areas and defined in Table LU-02, Land Use Designations Summary Table, of the Policy Plan (General Plan). A density bonus and other incentives pursuant to GC Sections 65915 through 65918, may be granted by the Approving Authority. Refer to Development Code Subsection 6.01.010.H (Density Bonus and Other Incentives).*

3. *A health risk assessment shall be required for multiple-family development projects located within 1,000 feet of a freeway, as determined by the Zoning Administrator.*
4. *Lockable private storage space for each residential unit shall be provided within a garage or storage building, or a space directly accessible from the dwelling. Exterior closets accessed from patios or balconies may be used if screened from public view.*
5. *Required building separation, and allowable heights may be differ based on massing type and adjacent uses. See Section 2.2.2 Building Types for additional information regarding building separation. See section 2.2.1 for standards adjusting allowable height. The following items are exceptions to height standards identified in this table and those noted in section 2.2.1:*
   a. *Equipment. Chimneys, elevators, stairs, mechanical houses, screened vents, HVAC equipment, and solar panels may exceed California Building Code height limits.*
   b. *Architectural Elements. Architectural elements such as spires, steeples, or roof lanterns may exceed height limits if consistent with the architectural style outlined in Chapter 4 of the ODDS.*
6. *A lot designated as Mixed-Use (MU) in the Policy Plan (General Plan) shall be developed at no less than the minimum number of dwelling units allowed within the specified density range for the applicable Mixed-Use Category, except that If, because of the configuration/design of a lot, the minimum residential density cannot be achieved, the lot may be developed with non-residential uses.*
7. *Includes major high-pressure pipelines for fuel oil, gasoline, and diesel and aviation fuels within the City. Existing pipelines include:*
   a. *Two parallel pipelines (a 16-inch and a 20-inch) that enter the City at Benson Avenue, traveling parallel to the northerly side of the Southern Pacific right-of-way to Ontario International Airport, then parallel to the southerly side of the Southern Pacific right-of-way, then parallel to the northerly side of the right-of-way beyond Ontario International Airport, then exiting the City at Etiwanda Avenue; and*
   b. *Two parallel pipelines that traverse the easterly portion of the City, entering the City at the southerly portion of Milliken Avenue, then traveling north under Milliken Avenue to Inland Empire Boulevard, then east to Rochester Avenue, then north to the City Limits.*
8. *In the Downtown District, the maximum 45-foot façade height shall extend no more than 70 percent of the frontage. The remaining 30 percent of the frontage shall include an upper-level setback of at least 12 feet, starting at the third story. Usable outdoor spaces, such as roof decks or terraces, may occupy the roof area of the upper-level setback. See Urban Form standards under Section 2.2.2A Urban Building Type.*
9. *Projects less than 1 acre in size but exceeding 25 du/ac can use Neighborhood or Housing Form in lieu of the Urban massing form.*

2.2.1 Height Standards

1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility.
2. **Multiple family development types** The following height limits shall apply to all proposed multiple family development types.
   a. Buildings within 100 feet of single-family residential dwellings must not exceed 35 feet or the height of adjacent residential buildings, whichever is greater.
   b. Buildings within 100 feet of undeveloped single-family zone parcels shall not exceed 35 feet in height.

2.2.2 Building Types

1. Identify the suitable building type for the project based on its density, including**:**

a. "**Urban**" (applies to multiple-family development projects with 25 dwelling units per acre or more*). Projects less than 1 acre in size but exceeding 25 du/ac can use neighborhood or housing Form in lieu of the urban massing form.*

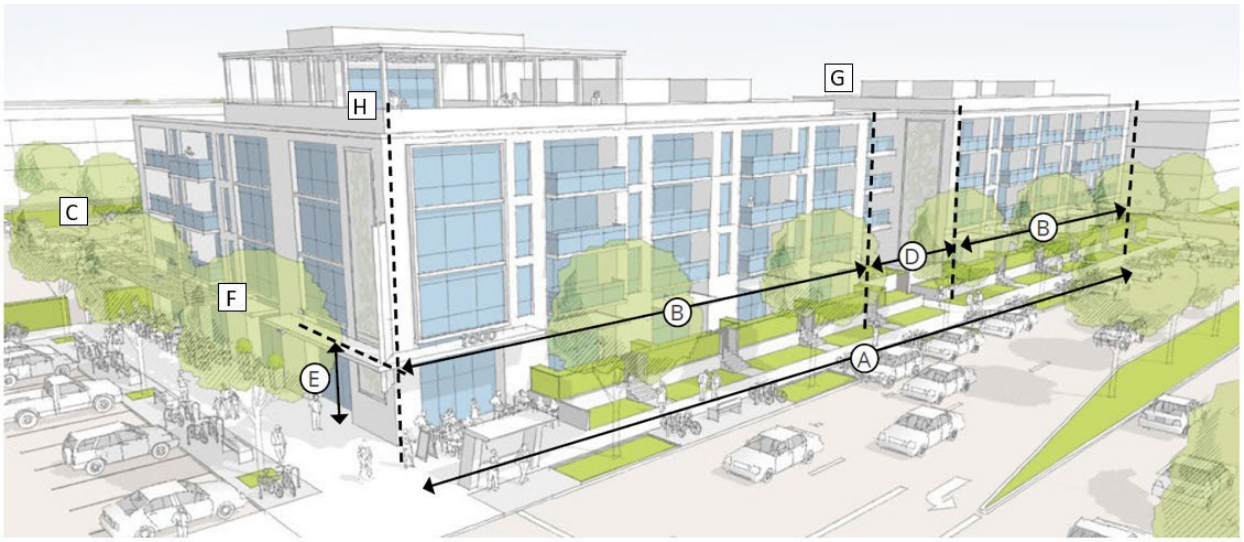
b. "**Neighborhood**" (applies to multiple-family development projects with fewer than 25 dwelling units per acre that include buildings with more than 5 units).

c. "**Housing**" (applies to multiple-family development projects with fewer than 25 dwelling units per acre that *include buildings with 5 or fewer units)*.

Table 2.2-1 Building Types

Land Use Density	Building Types
Greater than 25 du/ac	Urban
Less than 25 du/ac and greater than 5 units	Neighborhood
Less than 25 du/ac and 5 units or less	Housing form

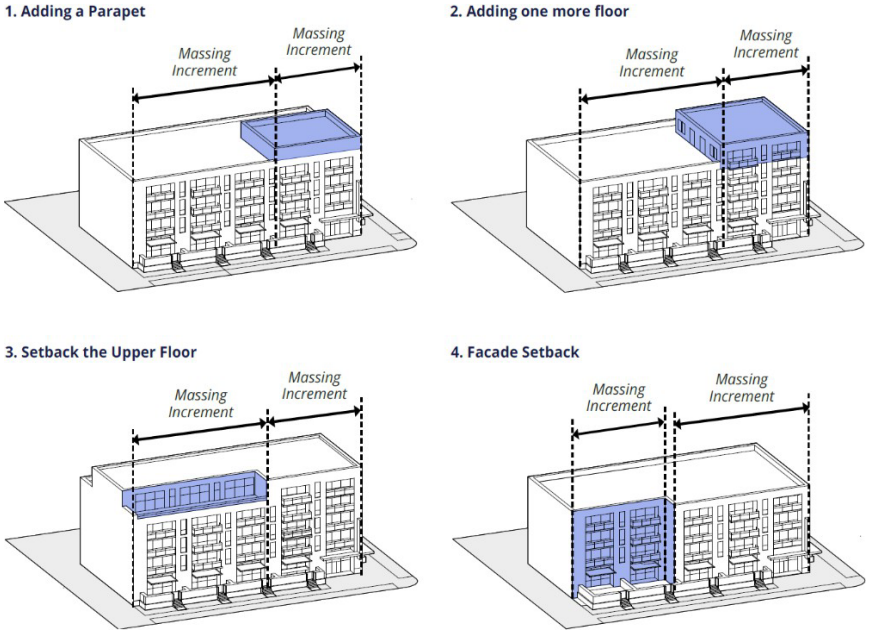
A. Urban massing and façade design



Urban massing and façade design standards are required for all multiple-family developments projects with 25 du/ac or more (see Figures 2.2-1 and 2.2-2).

Massing increments

Massing increments are visually discrete design compositions that are distinguishable from each other and have a coherent look and character from the ground to the top of the facade. Massing increments appear as either distinct buildings or distinct parts of a single building.



1. **Massing standards**
   a. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows:
      i. The maximum length of a single massing increment shall not exceed 150 feet.
      ii. A minimum 2 distinct massing increments shall be provided.
   b. **Articulation of massing increments** Individual massing increments shall be differentiated from 1 another using a minimum 1 of the following massing strategies:
      i. Vary parapet height by a minimum of 3 feet
      ii. Increase number of stories
      iii. Set back upper floor. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade.
      iv. Set the entire facade back a minimum of 10 feet for 20 feet
      v. Incorporate tower element
   c. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.
   d. **Repeating massing increment design** A massing increment design may be repeated on the same project elevation. Repeated massing increments shall be separated by a distinct massing increment.

Figure 2.2-1 Urban: Massing Diagram

2. Element standards	Standards
a. Building façade along font lot line	400 feet max.
b. Massing increment	150 feet max.
c. Space between buildings	0 feet min.
d. Façade setback (if elected)	10 feet x 10 feet min.
e. Building base height	15 feet min.
f. Building façade alongside lot line	200 feet max.
g. Height difference between massing increments	3 feet min.
h. Upper-level setback from facade	15 feet min.

Figure 2.2-2 Urban: Massing strategies

Façade Composition

1. **Façade composition standards**

Multi-story building façades The building facade shall be divided into a base and body as follows:

a. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies:
   i. Provide a string course at the top of the first story
   ii. Specify base materials different from rest of façade
   iii. Specify base colors different from rest of façade
   iv. Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements.

b. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:
   i. Windows shall be organized in bays, bands, curtain wall, and grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.
   ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.

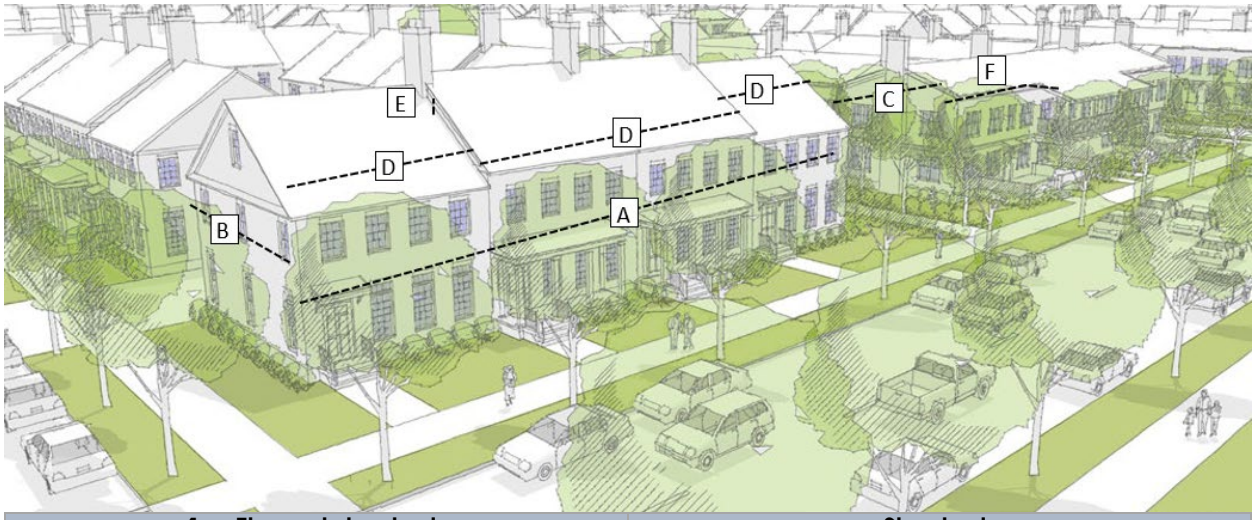
Fenestration design

Fenestration design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.

1. **Façade fenestration standards**
   a. **Minimum fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the façade (see Figure 2.2-3).

      i. **Ground floor**
         a. Front lot line: 70% minimum
         b. All other frontages: 50% minimum
         c. Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade
         d. Ground floor bathroom windows are prohibited on facades that face front lot line
      ii. **Upper floors** 15% minimum

Figure 2.2-3 Urban: Fenestration Diagram



B. Neighborhood massing and façade design

Neighborhood massing and façade design standards are required for all multiple-family development types applicable to multiple-family development projects with fewer than twenty-five (25) du/ac that include buildings with more than 5 units (see Figure 2.2-4).

Massing increments

Figure 2.2-4 Neighborhood: Massing Diagram

1. Element standards	Standards
A. Building façade along front lot line	135 feet max.
B. Building façade length alongside interior lot line	135 feet max.
C. Space between buildings	15 feet min.
D. Massing increment	75 feet max.
E. Height difference between massing increments	2 feet min.
F. Façade setback (if elected)	10 feet x 20 feet

1. **Massing standards.**

   a. **Size of massing increments.** Building facades along front and side lot lines that face public streets and are longer than 135 feet shall be divided into massing increments as follows:

      i. The maximum length of a single massing increment shall not exceed 75 feet.
      ii. A minimum of 2 distinct massing/architectural increments shall be provided using 1 strategy from the massing strategies list and 1 strategy from architectural strategy list (see Figure 2.2-5).

   b. **Massing strategy list**

      i. Vary height by a minimum of 3 feet.
      ii. Increase number of stories.
      iii. Set back upper floors by a minimum 15 feet.
      iv. Set the entire facade back a minimum of 10 feet for twenty feet.
      v. Increase story height.
      vi. Incorporate tower element.

Figure 2.2-5 Neighborhood: Examples of Massing Strategies Diagram

c. **Architectural strategy list**

i. Use different facade materials and/or colors.
ii. Window treatment and design. Use different window types, configurations, and/or frame colors.
iii. Diversify facade elements (balconies, trellises, chimneys, awnings) as per Section 2.3 Architectural Façade Elements.
iv. Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in Section 2.4 Entry Elements.
v. Massing increments that have distinct facades, shall appear as distinct buildings.
vi. A massing increment design can be repeated twice on the same project elevation, with a distinct separation between repeated increments.

Façade composition

1. **Façade composition standards**

a. **Multi-story building façades** The building facade shall be divided into a base and body as follows.

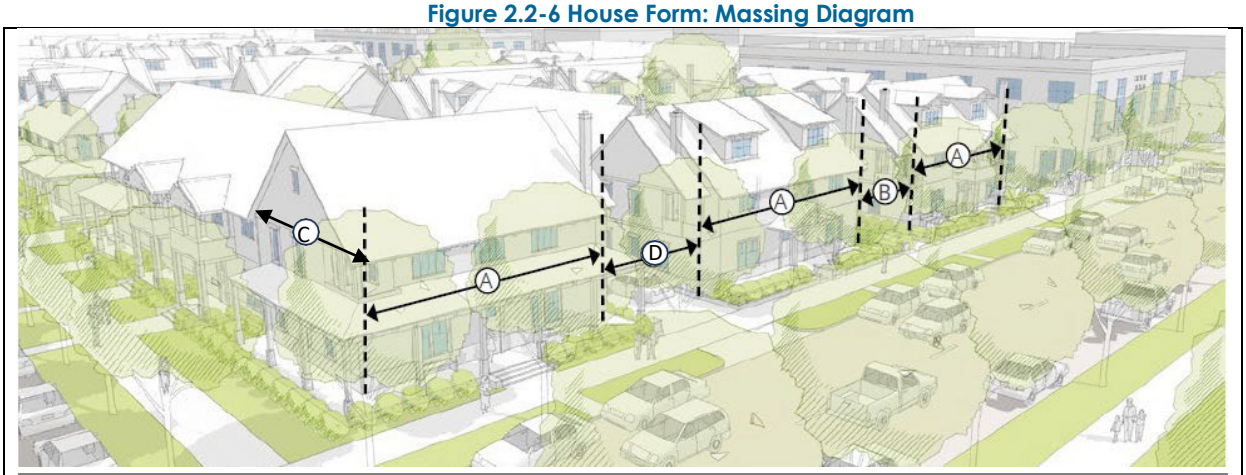
i. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum 2 of the following strategies.

(a) Provide a string course at the top of the first story.
(b) Specify base materials different from rest of façade.
(c) Specify base colors different from rest of façade.
(d) Provide a ground floor Arcade or Gallery per *Section 2.3 Architectural Façade Elements*.

ii. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:

(a) Windows shall be organized in bays, bands, curtain wall, and/or grid of windows consistent with the Facade Fenestration Standards for the Neighborhood massing type.
(b) Each massing increment's entire facade composition must be contained within its boundaries, with no overlap of facade elements, like window openings and balconies, across the division between increments.

Fenestration Design



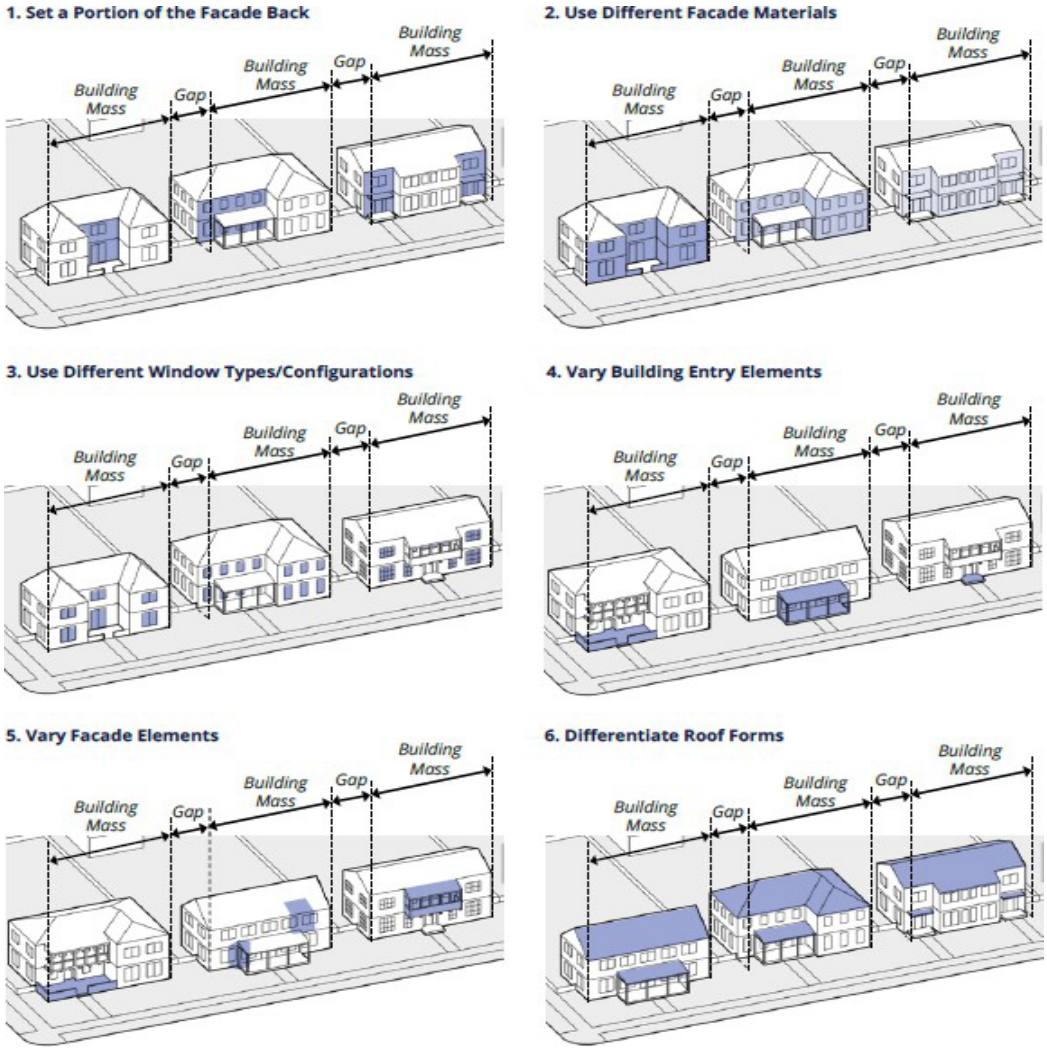
1. **Façade fenestration standards**

   a. **Minimum Fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:
      i. **Ground Floor**: 30% minimum.
         (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.
         (b) Ground floor bathroom windows are prohibited on facades that face the front lot line.
      ii. **Upper floors**: 15% minimum.

C. House-form massing and façade design

House-form massing and façade Design standards for projects with densities below 25 du/ac that include buildings with 5 or fewer units (see Figure 2.2-6).

Figure 2.2-6 House Form: Massing Diagram



1. Element standards	Standards
A. Building Façade length along font lot line	60 feet max.
B. Massing Increment	60 feet max.
C. Building Façade length alongside lot line	60 feet max.
D. Space between buildings	15 Feet

2. **Massing and façade composition standards**

   a. **Massing increments** A massing increment shall include the whole length of a single building façade, up to 60 feet in length. Only 1 massing increment per building façade shall be included (see Figure 2.2-7).
   b. **Length of buildings** Buildings along front and side lot lines that face public streets shall be no longer than 60 feet.
   c. **Space between buildings** Buildings along front and side lot lines shall be separated by a minimum15 feet.
   d. **Articulation of building façade** Frontages along front and side lot lines must differ from neighboring buildings on-site using a minimum of 2 of the specified massing and architectural strategies:

i. **Façade setback** Setting a portion of the facade back a minimum of 2 feet for a length of 20 feet.
ii. **Material or color** Use different facade materials and/or colors consistent with the architectural style.
iii. **Window treatment and design** Use different window types, configurations, and/or frame colors.
iv. **Architectural façade elements** Vary façade elements (balconies, trellises, chimneys, awnings) according to *Section 2.3 Architectural Façade Elements*.
v. **Entry elements** Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in *Section 2.4 Entry Elements*.
vi. **Vary roof form** Vary the roof form of different increments such as gabled, hipped, and others consistent with the architectural style of the building (selected from Chapter 4).

Figure 2.2-7 House Form Massing Strategies

Fenestration Design

1. **Façade fenestration standards**

Minimum fenestration Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:

i. **Ground floor**: 30% minimum.
   (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.
   (b) **Exception**: Windows on garage panel door.
   (c) Ground floor bathroom windows are prohibited on facades that face front lot line.
ii. **Upper floors**: 15% minimum.
iii. The horizontal distance between wall openings shall not exceed 15 feet within a facade or massing increment.

2.2.3 Materials and Detailing

Building Materials

1. **Prohibited materials**

   a. Fiberglass or plastic (false) architectural or facade elements or ornamentations are prohibited.
   b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street.
   c. Reflective materials, such as mirrored glass, shiny metal, and chrome.
2. **Combining materials** When combining 2 or more wall materials on 1 facade:
   a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco above masonry).
   b. Vertical joints between different materials shall only occur at inside corners.

Windows and Doors

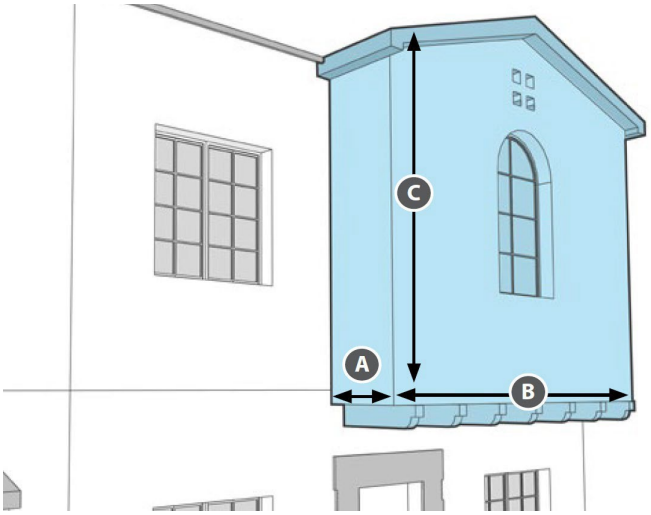
1. **Materials and types**

   a. **Window recess** Windows shall be recessed specific to each building's architectural style listed in Chapter 4: Architectural styles but shall be no less than 2 inches for any style.
   b. **Window Material**
      i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing and profile thickness and employ muted patterns and colors consistent with the building's architectural style.
   c. **Trim**
      i. **Window and door trim materials** Wood or cement fiber board is permitted.
      ii. **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber, reinforced concrete, and cement fiber board.

2.3 Architectural façade elements

2.3.1 Awning

Figure 2.3-1 Awning Diagram



1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Clearance above ground	8 feet	Not Applicable
C. Length	See Below	

2. Design standards

a. **Encroachment** Residential Awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.
b. **Material** Residential Awnings shall be of a simple shed form and made of code-compliant fire-resistant material.
c. **Upper floors** Each individual awning shall cover no more than 1 window opening.

2.3.2 Projecting room

Figure 2.3-2 Projecting Room Diagram

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	2 feet
B. Width	Not Applicable	20 feet
C. Height	Not Applicable	2-story building: 1 story max. 3-story building: 1 story max. 4-story+ building: 2 stories maximum.

2. Design standards

a. **Encroachment** Projecting rooms may encroach into the setback or public right-of-way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.

b. **Support**
   i. Building projecting rooms shall have visible supports (I.e., beams, braces, or brackets).
   ii. Building projecting rooms shall be setback 10 feet from an adjacent property line

c. **Space between projecting rooms** Space between Projecting Rooms shall be 20 feet within the same building plane.

2.3.3 Bay Window

Figure 2.3-3 Bay Window Diagram

1. Element standards	Minimum	Maximum
A. Height	Not Applicable	10 feet
B. Width	Not Applicable	10 feet

2. Design standards.

a. **Encroachment** Bay windows may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.
b. **Dimensions** Bay windows shall be a maximum of 10 feet wide and shall have a height that is equal to or greater than their width.
c. **Depth:** The depth of Bay Windows shall be a minimum of 3 feet.
d. **Façade placement** Bay windows shall be placed a minimum of 2 feet from any building corner and a minimum of 3 from any other bay window.
e. **Fenestration** Bay windows shall consist of a minimum 75% transparent fenestration.

2.3.4 Balcony

Figure 2.3-4 Balcony Diagram

1. Element standards	Minimum	Maximum
A. Height	Not Applicable	Refer to Design Standards
B. Width		
C. Depth		

2. Design standards

a. **Encroachment** Balconies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.
b. **Façade projection or recession** Balconies may project from the facade, be recessed into the facade, or a combination of the two.
c. **Required private open space** Balconies meeting private open space standards shall have a minimum dimension of 7 feet by 7 feet.

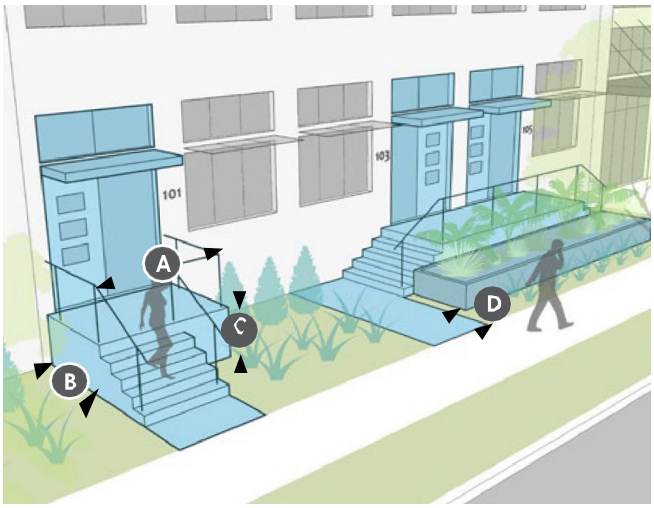
2.3.5 Terrace balcony

Figure 2.3-5 Terrace Balcony Diagram

1. Element standards	Minimum	Maximum
A. Height	Not Applicable	Refer to Design Standards
B. Width		
C. Depth		

2. Design standards

a. **Encroachment** Terrace balconies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.



b. **Support**
   i. Terrace balconies shall be supported by continuous walls that extend all the way to the ground.
   ii. Terrace balconies shall not be designed as posts, columns, or pillars.

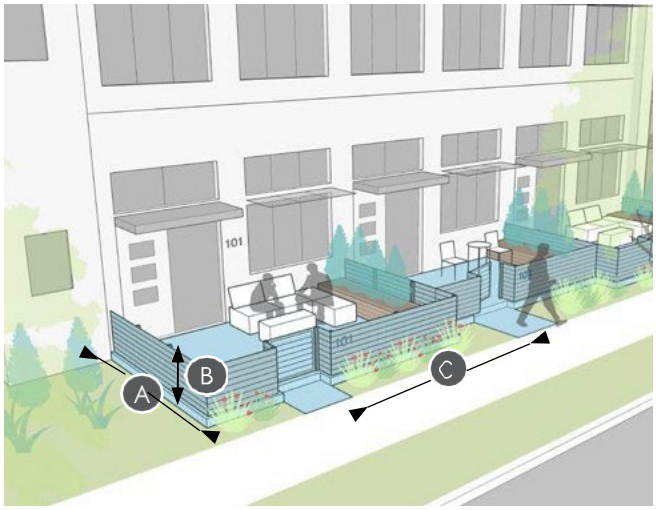
c. **Required private open space** Terrace balconies meeting private open space requirement shall meet or exceed the 7 feet by 7 feet standards specified in 2.1.5 Open Space Standards.

2.4 Entry elements

2.4.1 Stoop

Figure 2.4-1 Stoop Diagram

1. Element standards	Minimum	Maximum
A. Stoop Width	4 feet	8 feet
B. Stoop Depth (not including stairs)	4 feet	8 feet
C. Stoop Floor Depth	1.5 feet	3 feet
D. Planter/ Fence Height	Not Applicable	3 feet



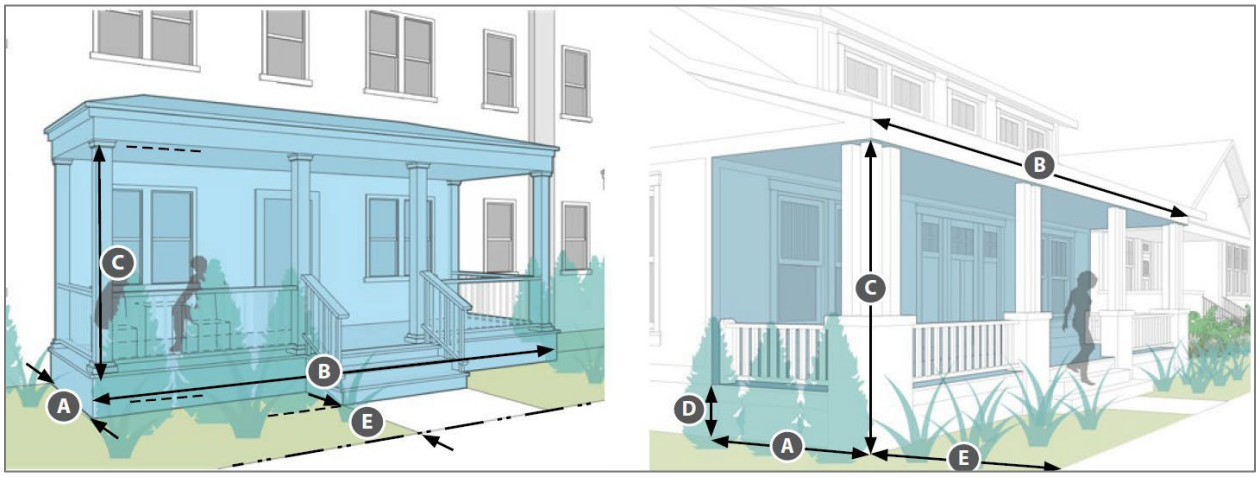
2. Design standards

a. **Relationship to entry** Stoops must align directly with the unit entry(s) they serve.
b. **Number of units served** Stoops shall provide access to a maximum of 2-unit entries.
c. **Lobby entries** Stoops may provide access to a lobby entry.
d. **Stoop stairway orientation** The exterior stoop stairway may be oriented perpendicular or parallel to the adjacent sidewalk.

3. Landscaping Landscaping shall be planted on the sides of the stoop, either at grade or in raised planters. Raised planters shall have a minimum depth of 12 inches.

2.4.2 Dooryard

Figure 2.4-2 Dooryard Diagram



1. Element standards	Minimum	Maximum
A. Depth, Clear	8 feet	Not Applicable
B. Finish level above sidewalk	Not Applicable	3 feet
1. Length of Terrace	Not Applicable	150 feet
C. Distance between stairways	Not Applicable	50 feet

2. Design standards

a. **Relationship to Entry** Dooryards shall align directly with the unit entry(ies) they serve.
b. **Number of Units Served** Dooryards shall provide access to a maximum of 2-unit entries.
c. **Enclosure** Dooryards shall be enclosed by a maximum 3-foot high, decorative walls, fences, or low hedges.
d. **Architectural Style** Walls and/or fences shall match the building's architectural style.
e. **Doorway Stairway Orientation** If the doorway is raised above grade, the exterior stairway for raised Dooryards shall be oriented perpendicular or parallel to the adjacent sidewalk.

2.4.3 Porch

Figure 2.4-3 Porch Diagram

1. Element standards	Minimum	Maximum
A. Porch depth (excluding stairs)	8 feet	Not Applicable
B. Porch width	8 feet	Not Applicable
C. Porch height	8 feet	12 feet
D. Floor height	1.5 feet	3 feet
E. Between porch and front Property Line	5 feet	Not Applicable

2. Design standards

a. **Number of units served** Porches shall provide access to multiple ground-floor unit doors.
b. **Wrap-around porches** Porches shall wrap around building corners.

Chapter 3: Mixed Use Design Standards

3.1 Site Design Standards

General Design and Development Standards that meet or exceed all standards are applicable to all Projects.

3.1.1 Site Design

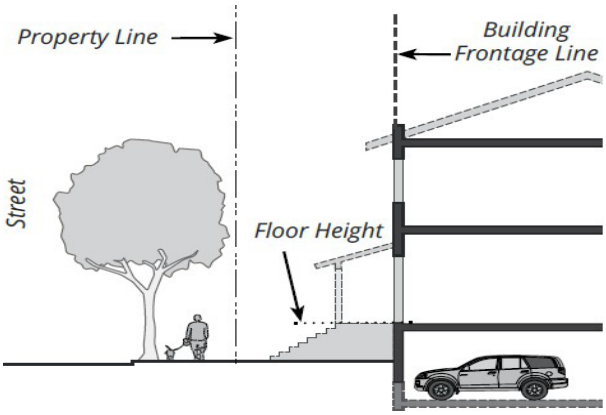
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows**:**
    a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way.
    b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way.
    c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.
    d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way.

3.1.2 Site Access

1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley.
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway.

3.1.3 Parking

Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:



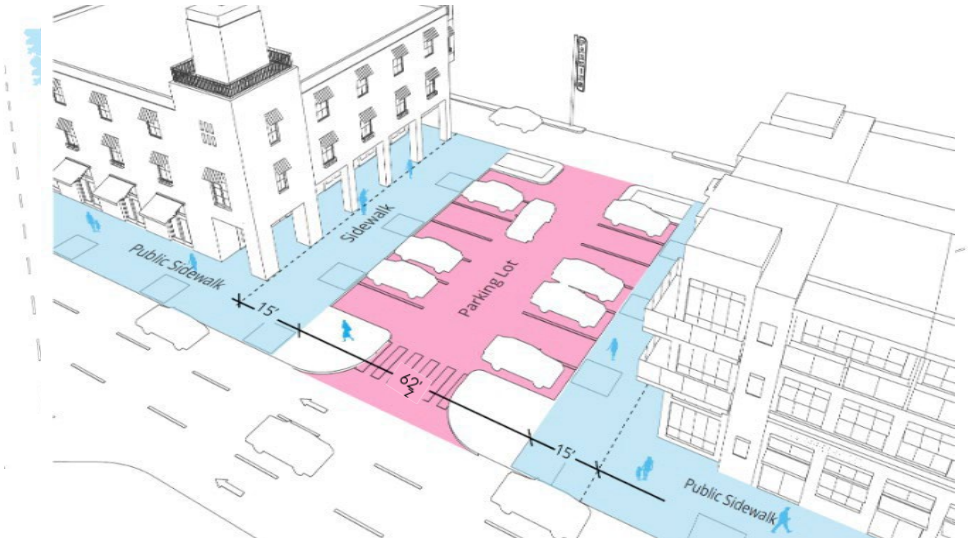
A. Placement on site

Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:

1. **Surface parking**
    a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property line, or aligned with the building façade, whichever is greater.
    b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces.
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade.
4. **Subterranean parking** A subterranean parking structure may extend to all property lines (see Figure 3.1-1).

5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court.

Figure 3.1-1 Semi-subterranean parking



B. Surface parking lot design

1. **Screening**
    a. **Street-adjacent parking lots**
        i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet in height.
        ii. Walls and hedges must be a minimum 18 inches from the back of the sidewalk.
        iii. Landscaped berms are prohibited.
    b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs.
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings.

C. Parking court design

Figure 3.1-2 Parking Court

1. **Design standards**
    a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet (see Figure 3.1-2).
    b. The parking court shall consist of only1parking bay, and this bay shall not exceed a maximum width of 62 feet.
    c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.

D. Parking structure design

1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum 2 design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in *Section 3.2.3 Building Types* (see Figure 3.1-3).
2. **Parking structure standards**
    a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet. Single openings shall be no wider than 14 feet.
    b. Parked vehicles shall be shielded from view from adjoining streets.
    c. The exterior elevations of parking structures facing a public street shall incorporate architectural elements from the project building.
    d. Vehicular entries shall be located a minimum 50 feet from the corner of a block.
    e. Signs shall be consistent with Division 8: Sign Regulations of Ontario Development Code.

Figure 3.1-3 Example of parking structure and Façade Design

3.1.4 Open Space Standards

This Section provides standards that direct the design of common and private on-site open spaces.

A. Common open space and public frontage

1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:
    a. **Close to parks** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size.
    b. **Common open space types** 1 or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.
2. **Access and visibility** At-grade open space shall be accessible and visible from the adjacent ground floor.

B. Common Open Space Types

Forecourt

1. **Design standards**
    a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.
    b. Minimum dimensions. Forecourts shall be a minimum of 15 feet by 15 feet.

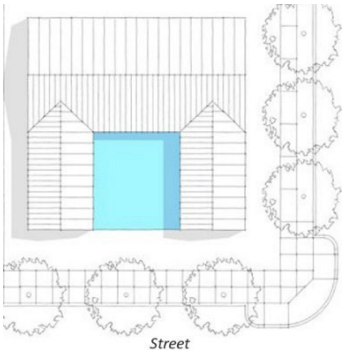


Figure 3.1-4 Forecourt

Side Garden

1. **Design standards**
    a. Minimum side garden dimensions: 15 feet by 15 feet.
    b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:
        i. Up to a total of 30 percent of the side garden's width and/or length.
        ii. A ground floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden.

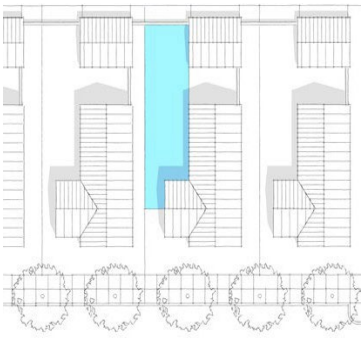

Figure 3.1-5 Side Garden

Court

1. **Design standard**

    a. **Minimum dimensions**: All courts shall be a minimum of 20 feet by 30 feet.
    b. **Enclosure**
        i. A court shall have building walls on at minimum 2 sides, while the third and fourth side can be defined by architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).
        ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).
    c. **Access**
        i. Courts shall be accessed from the street or walkway.
        ii. Units shall be allowed to take direct access through a court.

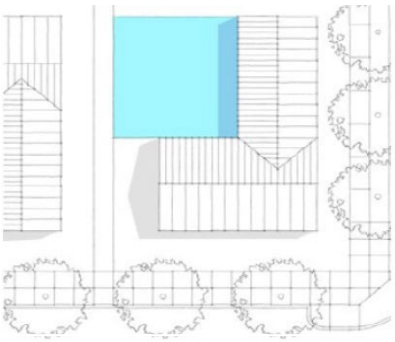

Figure 3.1-6 Court Configuration

d. **Encroachments**
   i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard.
   ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court.

e. **Common area** A court shall serve as communal spaces and pedestrian access.
f. **Amenities** A court shall include at minimum 1 of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.

Passage

1. **Design standards**
   a. **Location** Passages shall be provided between buildings or side gardens.
   b. **Size** Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side.

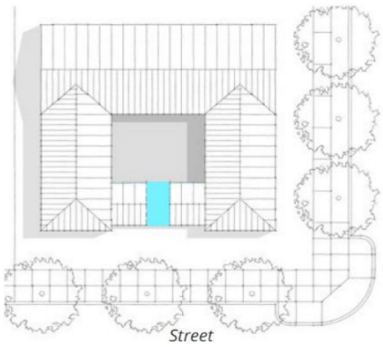

Figure 3.1-7 Passage Configuration

C. Private Open Space

1. General standards
   a. of 60 square feet of private open space shall be provided for each residential unit and a minimum of **1** or more of the private on-site open space types shall be provided, with the following.
   b. **Exception**: Private on-site open space shall not be required for a project site located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.

D. Private Open Space Types

Private Roof Deck

1. **Description** A private open space located on the roof of a building dedicated to a single unit.
2. **Design standards**
   a. Minimum dimensions of 7 feet by 7 feet.
   b. Materials, finishes, fixtures, and colors visible from the street shall be designed consistent with the architectural style of the building.

Backyard

1. **Description** A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.
2. **Design standards**
   a. Backyards are located behind the unit.
   b. Minimum dimensions of 20 feet by 15 feet.
   c. Encroachment into the backyard is allowed up to 30% of the space's width and/or length.
   d. Maximum projection for any ground floor element is 8 feet, with a 10-foot upper floor setback from property line if there's usable space above the first floor.

Architectural façade elements as private open space

1. **Description** The following elements defined in *Section 2.3 Architectural Façade Elements* may be used to meet on-site private open space requirements.
    a. Balcony
    b. Terrace Balcony

Entry elements as private open space

1. **Description** The following elements defined in *Section 2.4 Entry Elements* may be used to meet on-site private open space requirements.
    a. Dooryard
    b. Porch

3.1.5 Landscaping

This section provides standards for landscaping, materials, and Irrigation.

1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).

2. **Paths** Where front yards are landscaped, individual paths to the sidewalk shall be provided for each entrance
3. **Materials** Decorative accents. Paving materials shall incorporate decorative elements consistent with the architectural style of the building.

3.1.6 Fences and Walls

1. **Fence and wall heights** Walls and Fences shall be designed in compliance with the applicable standards contained in Division 6.02 (Walls, Fences, and Obstructions) of the Ontario Development Code.

3.2 Mixed Use Development Standards

The following tables and associated standards for Mixed-Use standards covering new residential construction, additions, remodels, or repurposed uses that necessitate an entitlement or building permit from the City. All standards listed under Table 3.01 Mixed-Use Development are applicable to all mixed-use projects.

Table 3.01 Mixed Use Development Standards per Building Type

Requirements	Mixed-Use Development Standards		Additional Regulations
	Mixed-Use Building Type		
A. BUILDING DEVELOPMENT STANDARDS			
Massing and Façade Design	***Main Street***	***Urban***	
1. Minimum Setback from Public Street Property Lines			Notes 2 & 8
a. **Arterial**	0 feet	0 feet	
b. **Collector**	0 Feet	5 feet	
c. **Local**	5 feet	5 feet	
2. Maximum Setback from Public Street Property Lines			
a. **Arterial**	5 feet	5 feet	
b. **Collector**	10 feet	10 feet	

Requirements	Mixed-Use Development Standards		Additional Regulations
	Mixed-Use Building Type		
c. **Local**	10 feet	10 feet	
3. Minimum Setback from Interior Project Boundary Property Lines	0 feet (attached to adjacent property) 10 feet (freestanding)		
4. Minimum Setback from Public Alley Property Lines	5 Feet		
5. Minimum Setback from Private Drives/Alleyways (from edge of drive aisle)			
a. **Living Area**	10 feet		
b. **Garages and Other Nonhabitable Structures**	5 feet		
6. Minimum Setback from Dwellings to Parking Spaces			
a. **Living Area**	10 feet		
b. **Garages and Other Nonhabitable Structures**	5 feet		
7. Minimum Setback from Parking Space or Drive Aisle to Wall or Fence	5 feet		
8. Minimum Separation Between Detached Buildings			
a. **Dwelling Front to Front**	< 2-Stories: 25 feet; > 3 Stories: 30 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
b. **Dwelling Front to Rear**	< 2-Stories: 25 feet; > 3 Stories: 30 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
c. **Dwelling Front to Side**	< 2-Stories: 25 feet; > 3 Stories: 30 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
d. **Dwelling Side to Side**	< 2-Stories: 5 feet; > 3 Stories: 5 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
e. **Dwelling Side to Rear**	15 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
f. **Dwelling Rear to Rear**	20 feet unless otherwise specified by massing requirements ("Space between buildings") in Section 3.2.3 Building Types.		
g. **Garage to Garage (or other nonhabitable structures)**	30 feet – Entry to Entry 30 feet – Entry to Side 10 feet – Side to Side 10 feet – Side to Rear		
9. Minimum Storage Space	240 CF		Note 4
10. Maximum Street Façade Height			
a. Arterial	45 feet	N/a	Note 8
b. Collector	N/a	N/a	
c. **Local**	N/a	N/a	
11. Maximum Building Height (from grade to top of plate)			
a. Arterial **b. Collector** **c. Local**	Table 3.2-2 Mixed-Use Building Types		Note 8
12. Minimum Floor-to- Floor Height			
a. Ground Floor (Non-residential /Residential)	15 feet / 10 feet		
b. Upper and Sub Levels	9 feet		
13. Minimum Setback from Major Pipelines	50 feet (to habitable structures)		Note 6

Notes:

1. *An existing lot of record that is substandard as to minimum "project" area and/or dimension(s), shall be permitted all the development rights of the zone in which it is located. New lots designated as Mixed-Use (MU) in the Policy Plan (General Plan) shall comply with the identified minimum.*
2. *The density range shall be consistent with the underlying Mixed-Used Category identified in Figure LU-04, Mixed Use Areas and defined in Table LU-02, Land Use Designations Summary Table, of the Policy Plan (General Plan). A density bonus and other incentives pursuant to GC Sections 65915 through 65918, may be granted by the Approving Authority. Refer to Development Code Subsection 6.01.010.H (Density Bonus and Other Incentives).*
3. *Measurement of the continuous frontage may include existing frontages, provided there is no more than 10 feet between the frontage of active ground floor uses in the existing building and those of the proposed development project.*
4. *Adequate lockable private storage space for each residential unit shall be provided within a garage or storage building, or a space directly accessible from the dwelling. Exterior closets accessed from patios or balconies may be used if screened from public view.*
5. *A lot designated as Mixed-Use (MU) in the Policy Plan (General Plan) shall be developed at no less than the minimum number of dwelling units allowed within the specified density range for the applicable Mixed-Use Category, except that If, because of the configuration/design of a lot, the minimum residential density cannot be achieved, the lot may be developed with non-residential uses.*
6. *Includes major high-pressure pipelines for fuel oil, gasoline, and diesel and aviation fuels within the City. Existing pipelines include:*
   a. *Two parallel pipelines (a 16-inch and a 20-inch) that enter the City at Benson Avenue, traveling parallel to the northerly side of the Southern Pacific right-of-way to Ontario International Airport, then parallel to the southerly side of the Southern Pacific right-of-way, then parallel to the northerly side of the right-of-way beyond Ontario International Airport, then exiting the City at Etiwanda Avenue; and*
   b. *Two parallel pipelines that traverse the easterly portion of the City, entering the City at the southerly portion of Milliken Avenue, then traveling north under Milliken Avenue to Inland Empire Boulevard, then east to Rochester Avenue, then north to the City Limits.*
7. *The minimum setback from private streets shall be measured from a line running parallel to the street, which is located 12 feet behind face-of-curb (a.k.a., "parkway").*
8. *In the Downtown District, the maximum 45-foot façade height shall extend no more than 70 percent of the frontage. The remaining 30 percent of the frontage shall include an upper-level setback of at least 12 feet, starting at the third story. Usable outdoor spaces, such as roof decks or terraces, may occupy the roof area of the upper-level setback. See Urban Form standards under Section 2.2.2A Urban Building Type.*

3.2.1 Height Standards

1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility:
2. **Vertical mixed use development types** The following height limits shall apply to all proposed vertical mixed use development types.
    a. Buildings within 100 feet of single-family dwellings shall not exceed 35 feet or the height of adjacent residential buildings.
    b. Buildings within 100 feet of undeveloped parcels with planned less intense uses shall not exceed 35 feet.

3.2.2 Ground Floor Building Frontage

1. **Mixed-Use development types** The ground floor frontage for vertical mixed-use developments must be designed to accommodate commercial uses.

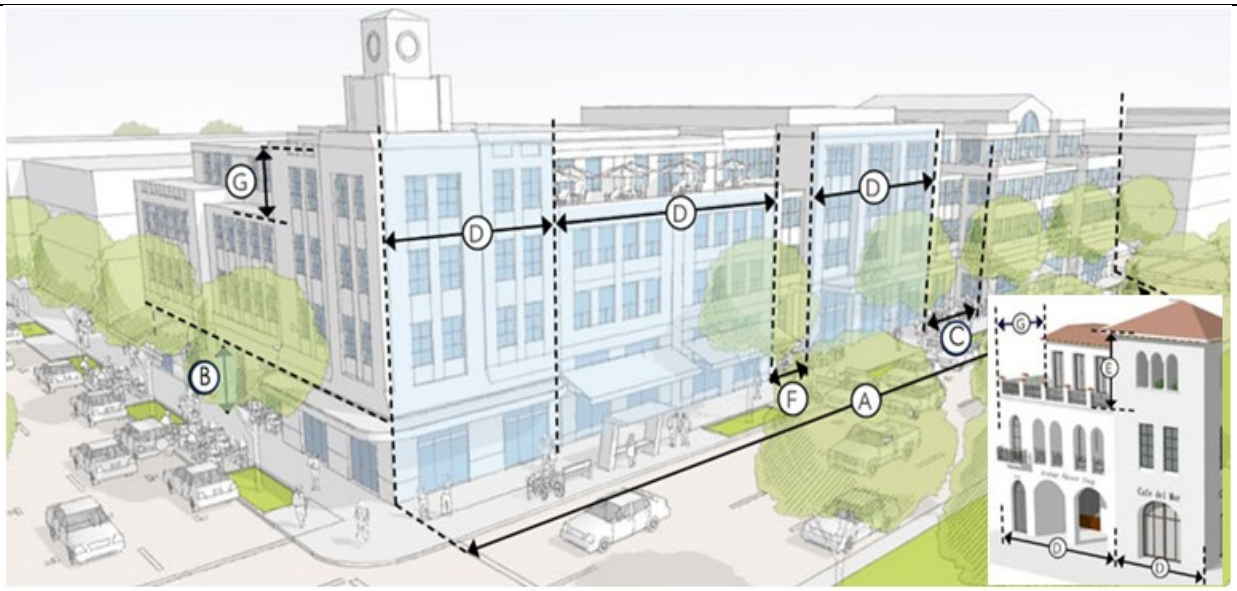
3.2.3 Building Types

Identify the suitable building type based on the location including (see Table 3.2-1):

1. **"Main Street"** (applicable to mixed-use areas within the District Place type as shown on Policy Plan Exhibits LU-04 and CD-01)
2. "**Urban"** (applicable to mixed-use areas outside the District Place type)

Table 3.2-1 Mixed- Use Building Types

TOP Land Use Place type	Max Permitted Height	Building Types
Downtown	45 feet	Main Street
Airport Metro/Entertainment	120 feet	Main Street
Guasti	70 feet	Main Street
South Euclid	70 feet	Main Street
South Employment	70 feet	Main Street
East Holt Blvd	70 feet	Urban
Inland Empire Blvd	70 feet	Urban
Infill	50 feet	Urban
South of Riverside Drive	50 feet	Urban



A. Main Street Massing and Façade Design

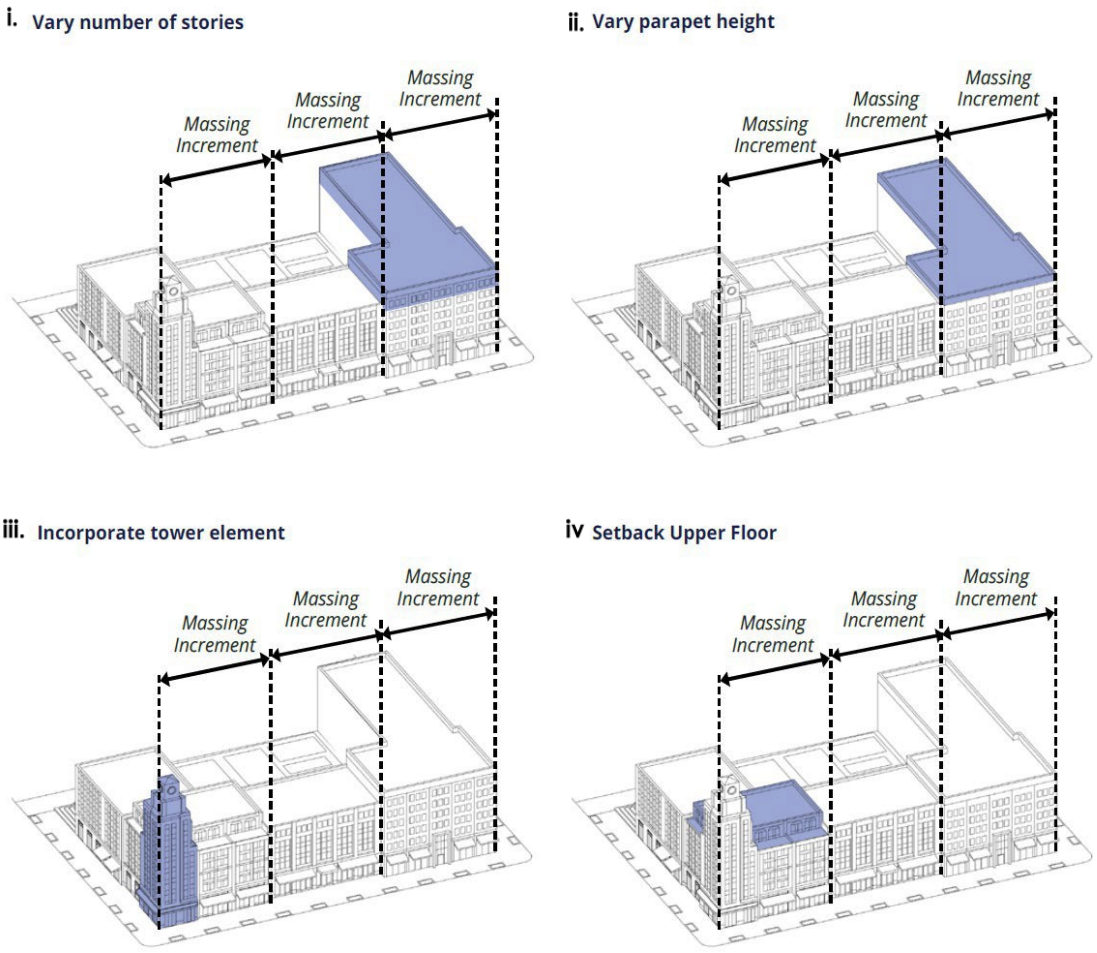
Main Street Massing and Façade design standards are required in all mixed-use areas within the District Place type, as shown in the City's Policy Plan (Exhibits LU-04 and LU-05).

Massing increment
Massing Increments shall appear as either distinct buildings or distinct parts of a single building.

1. Massing standards

Figure 3.2-1 Main Street: Massing Diagram

1. Element Standards
A. Building Façade along font lot line (300 feet max).
B. Building Façade alongside lot line (150 feet max).
C. Space between buildings (0 feet min).
D. Massing Increment (75 feet max).
E. Height Difference between Massing Increments (3 feet min).
F. Façade Break (10 feet x 10 feet min).
G. Upper-Level Setback (15 feet min).



2. Massing standards

a. **Size of massing increments.** Building facades that face public streets and are longer than 75 feet in length shall be divided into massing increments as follows (see Figure 3.2-1):
   i. The maximum length of a single massing increment shall not exceed 75 feet.
   ii. Single building projects less than 150 linear feet of street frontage shall have no massing increments applied.
   iii. Single building projects between 150 and 250 linear feet of street frontage shall have at minimum 2 massing increments separated by a façade break.
   iv. Single project buildings that have more than 250 linear feet of street frontage shall have 3 massing increments each separated by a façade break.

b. **Required difference in facade height**. Adjacent massing increments must vary in façade height measured from the sidewalk to the eave, cornice, or parapet, using a minimum 1 massing strategy (see Figure 3.2-1 and Figure 3.2.2):

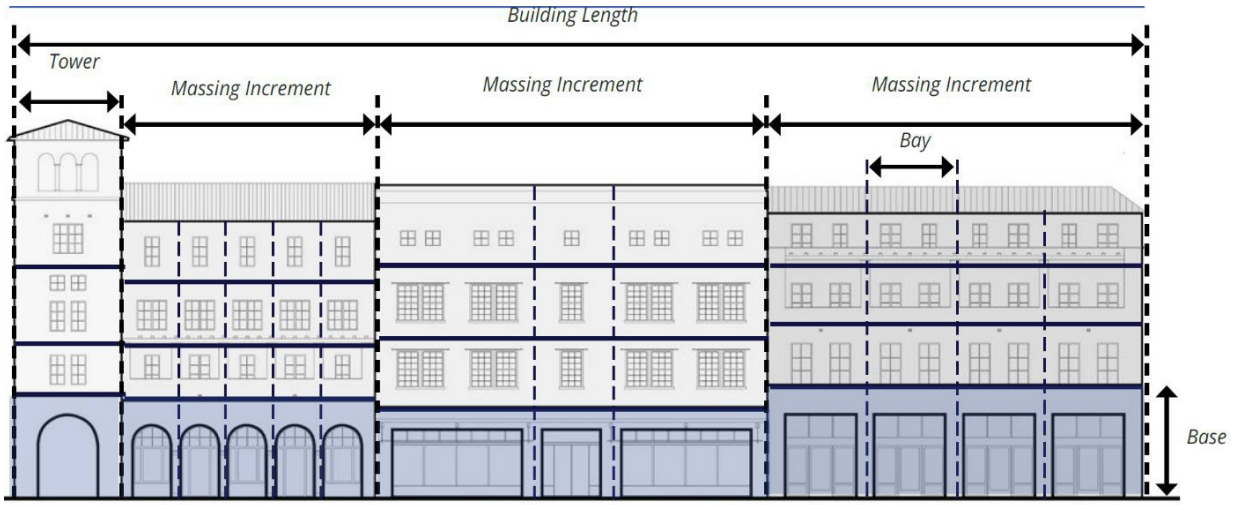
i. Vary number of stories.
ii. Vary the parapet height by a minimum of 3 feet.
iii. Incorporate tower element.
iv. Set back upper floor(s) a minimum 15 feet.

Figure 3.2-2 Main Street: Examples of Massing Strategies Diagram

c. **Articulation of massing increments.** Individual massing increments shall be differentiated from one another using 3 of the following architectural strategies (see Figure 3.2-2):
   i. **Set façade increment back.** Set the entire facade increment back a minimum of 3 feet.
   ii. **Base height.** Vary the height of the building base of adjacent increments.
   iii. **Façade colors.** Use different facade materials and/or colors.
   iv. **Window type/configuration.** Use different window types, configurations, and/or frame colors.
   v. **Presence/arrangement of façade elements.** Vary the presence or arrangement of façade elements such as projecting balconies, recessed balconies, trellises, chimneys, and awnings.

d. **Self-contained massing increments.** Facade elements, such as window openings and balconies, shall not overlap the division between massing increments.
e. **Repeating massing increment design.** A massing increment design may be repeated a maximum of 3 times on the same project elevation. Repeated massing increments may not be located immediately adjacent to each other.

Façade Composition

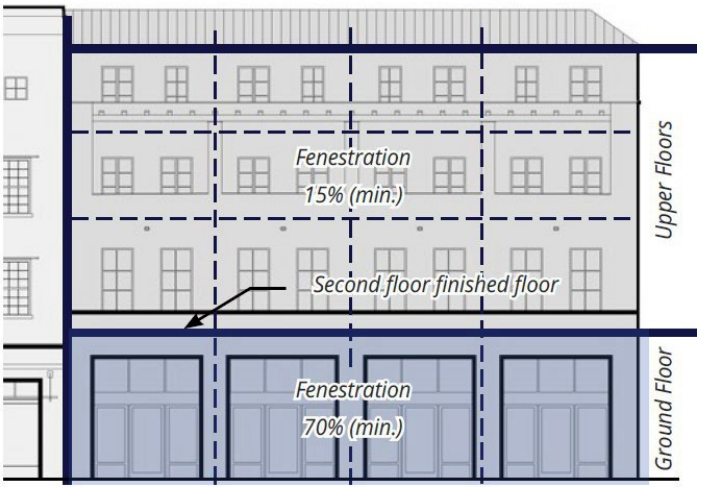


1. **Facade composition standards**
   a. **Facade Grid.** The window, door, and/or shopfront openings of each individual facade shall be organized into a grid as follows:
      i. **Horizontal alignment of elements.** Rooflines, openings, and materials within each facade shall be aligned horizontally.
      ii. **Vertical Bays.** The entirety of a building's façade shall be clearly divided into vertical bays.

   b. **Multi-story building façades.** Multi-story building facades shall be designed to include a base, middle, and top.
      i. **Base.** Building base of entire ground floor for buildings less than 5 stories or 25 feet for buildings 5 stories or more, shall use a minimum of 2 of the following strategies:
         (a) Provide a string course at the top of the first story;
         (b) Specify base materials different from rest of facade;
         (c) Specify base colors different from rest of facade;
         (d) Provide a ground floor Arcade or Gallery per (*Section 3.2 Architectural Façade Elements*).

      ii. **Middle**. The middle of the building—the facade of all floors located above the base—shall be designed as follows:
         (a) Window and door openings shall be organized in bays per the façade fenestration standards of this section.
         (b) If provided, attached façade elements such as balconies, bay windows, and projecting rooms, shall be designed per the façade fenestration standards of this section.
      iii. **Top.** The façade elements that define the upper limits of the building—shall be designed as follows:
         (a) The top of the building facade shall incorporate capping elements, such as a cornice, enhanced ornamentation, or a decorative parapet (see Figure 3.2-3).

Figure 3.2-3 Main Street: Façade Composition



Facades organized according to massing increments that may consist of an individual building or one building that is divided into individual massing increments. Each increment is designed according to a grid of floor levels and bays.

Fenestration Design

Fenestration Design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.

1. **Façade fenestration standards.**
    a. **Minimum fenestration.** Facade designs shall include a minimum percentage of fenestration calculated as the total percentage of window and door area divided by the total area of that portion of the façade (see Figure 3.2-4):
        i. **Ground floor**: 70% minimum.
        ii. **Upper floors**: 15% minimum.

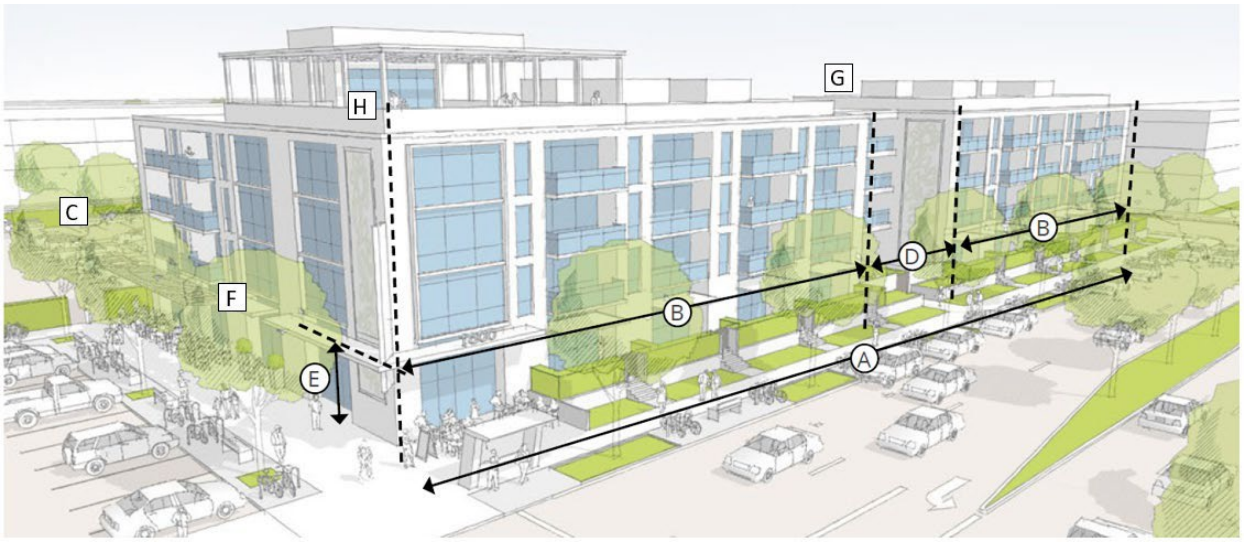
Figure 3.2-4 Main Street: Fenestration

2. **General to all floors.** All window jambs/frames shall be set back a minimum of 2 inches back from the facade plane.

3. **Specific to ground floors.** Structural elements shall be visible on the exterior of ground floor facades to visually convey that the upper floors are supported.

    a. **Ground floor windowsills** on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.
    b. **Ground floor bathroom windows** prohibited on facades that face front streets.

B. Urban massing and façade design



Urban massing and façade design_ Standards are required for all multiple-family developments projects with 25 du/ac or more.

Massing Increments

Massing increments are visually discrete design compositions that are distinguishable from each other and have a coherent look and character from the ground to the top of the facade. Massing Increments appear as either distinct buildings or distinct parts of a single building (see Figure 3.2-5).

1. **Massing standards**

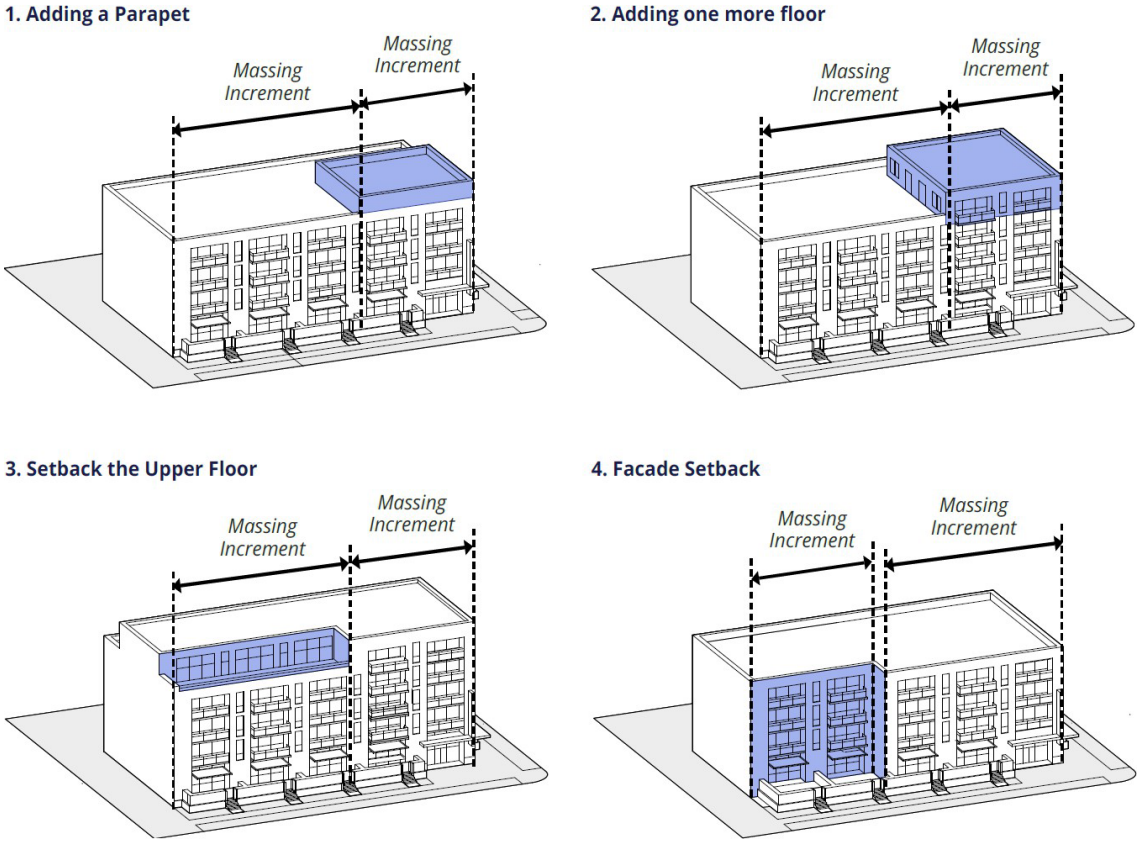


Figure 3.2-5 Urban Massing

Element Standards	Standards
a. Building façade along font lot line	400 feet max
b. Massing increment	150 feet max
c. Space between buildings	0 feet minimum
d. Façade setback (if elected)	10 feet x 10 feet minimum
e. Building base height	15 feet minimum
f. Building façade alongside lot line	200 feet max
g. Height difference between massing increments	3 feet minimum
h. Upper-level setback from facade	15 feet minimum

2. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows:
    a. The maximum length of a single massing increment shall not exceed 150 feet (see Figure 3.2-6).
    b. A minimum of **2** distinct massing increments shall be provided.
3. **Articulation of massing increments** Individual massing increments shall be differentiated from one another using at minimum 1 of the following massing strategies:
    a. Vary parapet height by a minimum of 3 feet.
    b. Increase number of stories.
    c. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade.
    d. Set the entire facade back a minimum of 10 feet for 20 feet.
    e. Incorporate tower element.

Figure 3.2-6 Urban: Examples of Massing Strategies Diagram

1. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.

    a. **Repeating massing increment design** A massing increment design may be repeated on the same project elevation. Repeated massing increments shall be separated by a distinct massing increment

Façade Composition

Façade composition standards address the design and arrangement of various building elevation elements that are applied to each massing increment, including window and door openings, attached and recessed façade elements such as bay windows, balconies, and arcades, and wall materials and colors.

1. **Façade composition standards**

2. **Multi-story building façades** The building facade shall be divided into a base and body as follows.

    b. **Base** Separate the building base (entire ground floor facade or first 2 floors of buildings 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies.

        i. Provide a string course at the top of the first story.
        ii. Specify base materials different from rest of façade.
        iii. Specify base colors different from rest of façade.
        iv. Provide a ground floor Arcade or Gallery per Section 3.3 Architectural Façade Elements.

    c. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:

        i. Windows shall be organized in bays, bands, curtain wall, and/or grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.
        ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.

    d. **Strategies** The listed strategies show acceptable ways to differentiate massing increments:

        i. Vary the height of the building body.
        ii. Use different facade materials and/or colors.
        iii. Use different window types/configurations.
        iv. Diversify facade elements, including projecting balconies, recessed balconies, canopies, and awnings.

Fenestration Design

Fenestration Design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.

1. **Façade fenestration standards.**

    a. **Minimum fenestration.** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total

area of that part of the facade.

i. **Ground floor**
   (a) Front lot line: 70% minimum
   (b) All other frontages: 50% minimum
   (c) Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade.
   (d) Ground floor bathroom windows are prohibited on facades that face front lot line.

ii. **Upper floors** 15% minimum

Figure 3.2-7 Urban: Fenestration Diagram

3.2.4 Materials and Detailing

A. Building Materials

1. **Prohibited materials**
   a. Fiberglass or plastic (false) architectural or facade elements or ornamentations are prohibited.
   b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street.
   c. Reflective materials, such as mirrored glass, shiny metal, and chrome, are allowed with the following exception:
      i. Application to small areas (up to 50 sq ft or 2% of façade area, whichever is less) for signage highlighting, ensuring no glare nuisance to traffic, pedestrians, or neighboring buildings.
2. **Combining materials.** When combining 2 or more wall materials on 1 facade:
   a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco above masonry).
   b. Vertical joints between different materials shall only occur at inside corners.

B. Windows and Doors

1. **Material and types**
    a. **Window recess** Windows shall be recessed in a manner that is specific to each building's architectural style but shall be no less than 2 inches for any style.
    b. **Architectural style of detailing** Windows, doors, frames, colors, and styles shall be appropriate to the building's architectural style in terms of window type, proportion, and color.
    c. **Materials** Windows and doors shall be made of wood, fiberglass, fiberglass-clad wood, aluminum clad wood, or metal.
    d. **Glazing** Glazing shall be clear glass with no more than ten percent daylight reduction (tinting). Reflective (mirrored) glazing is prohibited.
    e. **Residential buildings** The following are applicable to multiple-family development types.
        i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing and profile thickness and employ muted patterns and colors consistent with the building's architectural style.
        ii. Nail-on windows that are deeply set within their frame are permitted.
        iii. Muntins shall be of a substantial dimension (e.g., not flat) and shall be placed on the exterior of windows.
        iv. Trim:
            a) **Window and door trim materials** Wood or cement fiber board. Foam trim around windows is allowed. Foam trim around doors is prohibited.
            b) **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber reinforced concrete, and cement fiber board.

3.3 Architectural Façade Elements

The following architectural façade elements shall be incorporated into a development project to fulfill the requirements for façade articulation and/or articulation of massing increment defined in 3.2.3. Massing and Façade Design.

3.3.1 Arcade

Figure 3.3-1 Arcade

1. Element Standards	Minimum	Maximum
A. Depth	12 feet	16 feet
B. Distance from Property Line	0 feet	
C. Opening height, clear	See Below	
D. Overall height	See Below	

2. Design standards

a. **Projection depth** The arcade projection depth from the ground floor facade shall be no greater than the height of the arcade opening (see Figure 3.3-1).

b. **Sidewalk depth beneath arcade** The covered sidewalk under the arcade shall be a minimum of 10 feet wide from the inside of the vertical support to the ground floor building face.

c. **Entry element requirement** Arcades shall be combined with Shopfronts (defined in *Section 3.4 Entry Elements*).

d. **Minimum openings and massing increments** Arcades shall be a minimum of 3 openings wide. The location where an arcade stops or changes in design or dimensions shall correspond to a change in massing increment (*Section 3.2.3.*

Massing and Façade Design) for massing increment requirements).

e. **Vertical supports** Vertical supports may be piers, columns, or arches. The width of a vertical support shall not exceed 3 feet.
f. **Width of openings** The openings between vertical supports, as seen from the street, shall be taller than they are wide.
g. **Shape and cadence of openings** Openings, whether rectangular or arched, must align with facade bays if present (vertical bays are mandatory for Main Street standards and optional for other massing types in *Section 3.2.3. Massing and Façade Design*).
h. **Vertical clearance** The minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets, spandrels, and/or lower portions of arches.
i. **Arcade height relative to interior building floor height** The height of the soffit inside the arcade shall be no less than the height of the ceiling of the floor to which it corresponds.
j. **Architectural style** Arcade detailing, including lighting, shall utilize the architectural style of the building.

3.3.2 Gallery

Figure 3.3-2 Gallery

1. Element standards	Minimum	Maximum
A. Depth, clear	10 feet	16 feet
B. Distance to property line, clear	0 feet	5 feet
C. Opening height, clear	12 feet	2 floors
D. Overall height	See Below	

2. Design standards

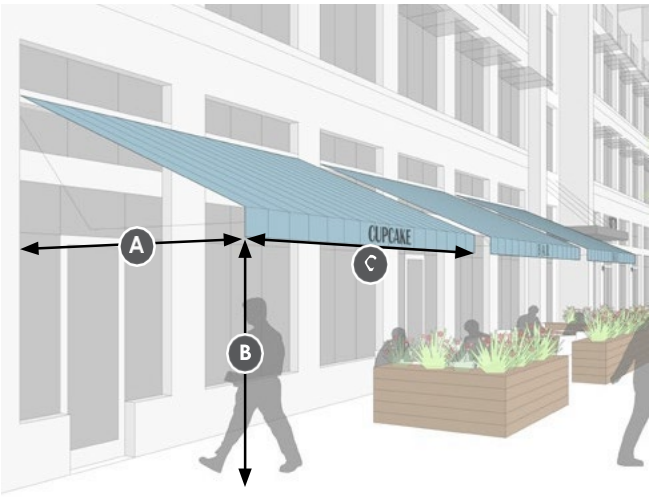
a. **Projection depth** Gallery projection depth from the ground floor facade shall be no greater than the height of the gallery opening (see Figure 3.2-2 "A").

b. **Sidewalk depth beneath gallery** Covered sidewalk width under the gallery must be a minimum of 10 feet from the inside of the vertical support to the ground floor building face (see Figure 3.2-2 "A").

c. **Minimum openings and massing increments** Galleries shall be a minimum of 3 openings wide. The location where a gallery stops or changes in design or dimensions shall correspond to a change in massing increment (*see Section 3.2.3. Massing and Façade Design*).

d. **Vertical supports** Vertical supports may be piers or columns. The width of a vertical support shall not exceed 1 foot.

e. **Width of openings** Openings between vertical supports, as seen from the street, shall be taller than they are wide.



f. **Shape and cadence of openings** Openings may be rectangular but shall not be arched.

g. **Vertical clearance** Minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets and spandrels.

h. **Gallery height relative to interior building floor height.** Height of the soffit inside the gallery shall be no less than the height of the ceiling of the floor to which it corresponds.
i. **Vertical alignment** Galleries may be single or double-story and shall correlate with building floors (see "D" in above figure).
j. **Architectural style** Gallery detailing, including lighting shall utilize the architectural style of the building.

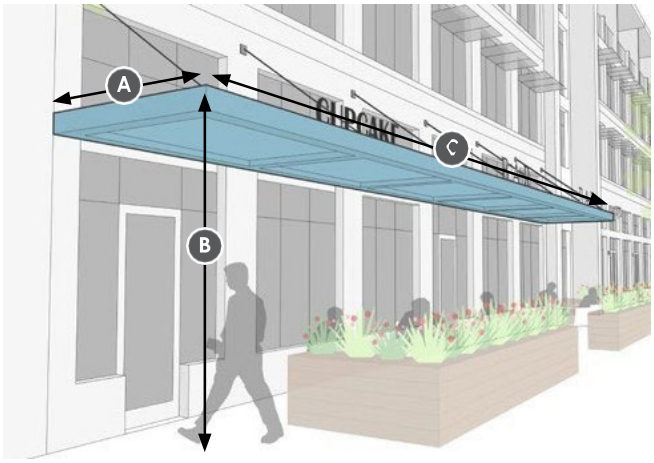
3.3.3 Commercial Awning

Figure 3.3-3 Commercial Awning Diagram

1. Element standards	Minimum	Maximum
A. Depth	4 feet	Not Applicable
B. Clearance above sidewalk	8 feet	Not Applicable
C. Length	See Below	

2. Design standards

a. **Encroachment** Commercial awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code (see Figure 3.3-3).



b. **Material** Commercial awnings shall be of a simple shed form, made of code-compliant fire-resistant canvas.

c. **Width.** Awning widths shall equal in size to shopfront opening widths.

d. **Prohibited lighting** Internally illuminated and back-lit awnings and any associated light diffusers are prohibited.

3.3.4 Commercial canopy

Figure 3.3-4 Commercial Canopy

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Minimum clearance above ground	Not Applicable	12 feet
C. Length of terrace	Not Applicable	150 feet

2. Design standards

a. **Encroachment** Commercial canopies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code (see Figure 3.3-4).

b. **Form and material** Canopies shall be of a simple form, made of metal and/or glass.

c. **Support** Canopies shall be supported either from below by metal brackets, or from above by rods and wires that affix to the wall.

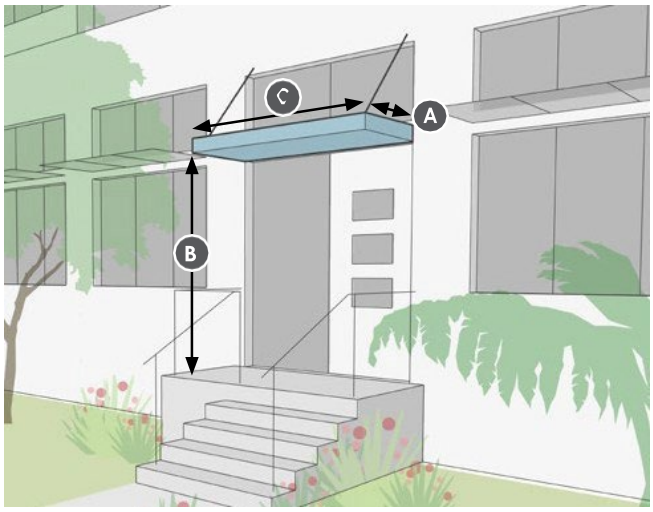
d. **Width** Canopies may extend across multiple storefronts.

3.3.5 Awning

Figure 3.3-5 Awning

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Clearance above ground	8 feet	Not Applicable
C. Length	See Below	

2. Design Standards



a. **Encroachment** Residential awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code (see Figure 3.3-5).

b. **Material** Residential awnings shall be of simple shed form, made of code-compliant fire-resistant.

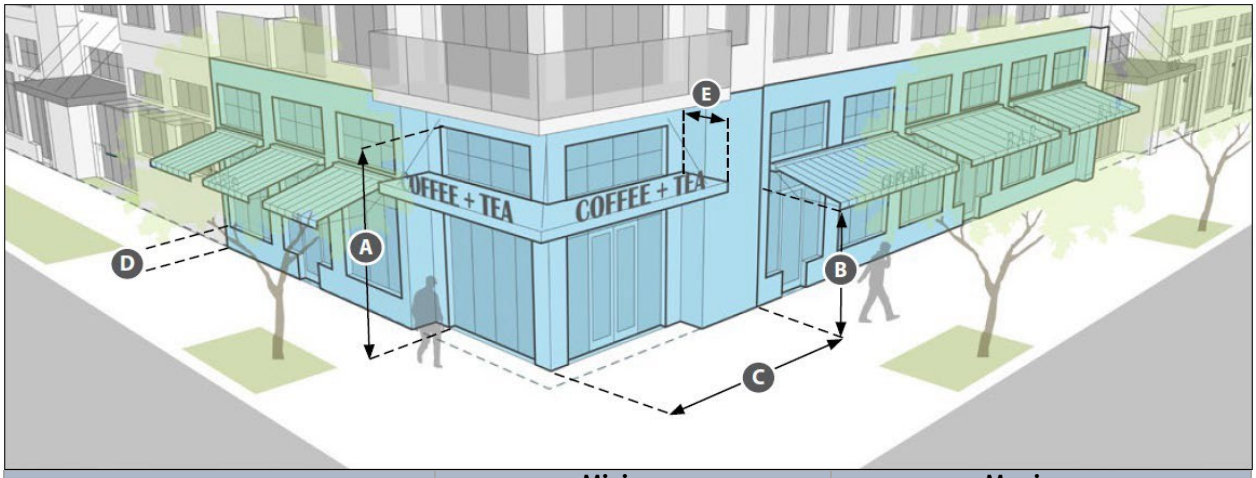
c. **Upper floors** Each individual awning shall cover no more than 1 window opening.

3.3.6 Canopy

Figure 3.3-6 Canopy

1. Element standards	Minimum	Maximum
A. Depth	Not Applicable	3 feet
B. Minimum clearance from landing	7 feet	8 feet
C. Length of terrace	Not Applicable	8 feet

2. Design standards



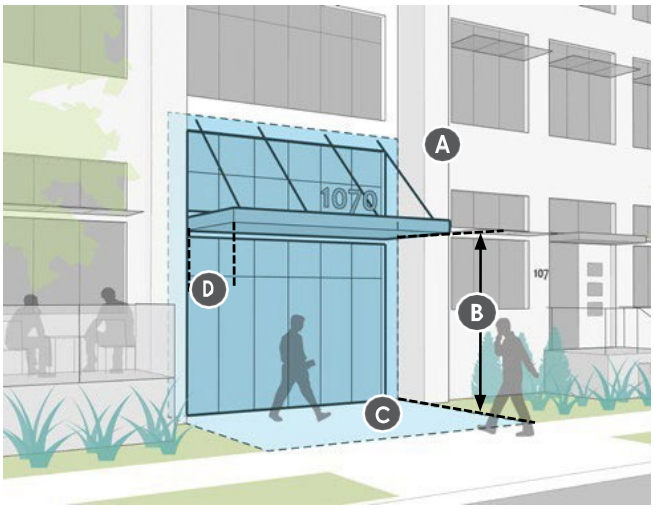
a. **Material** Canopies shall be of a simple form, made of metal and/or glass.
b. **Support** Canopies shall be supported either from below by metal brackets, or from above by rods or wires that affix to the wall (see Figure 3.3-6).
c. **Upper floors** Each individual canopy shall cover no more than 1 window opening.

3.4 Entry Elements

This section regulates the design of Building entry elements such as porches, dooryards, stoops, shopfronts, and lobby entries to the fulfill façade articulation requirements identified in *Section 3.1.3. Massing and Façade Design*.

3.4.1 Shopfront

Figure 3.4-1 Shopfront



1. Element standards	Minimum	Maximum
A. Height to top of transom	12 feet	16 feet
B. Height to bottom of canopy/awning	8 feet	10 feet
C. Width of each shopfront bay	10 feet	25 feet
D. Height of shopfront base	1 foot	3 feet
E. Awning/Canopy Depth	4 feet	Not Applicable

2. **Design standards**
   a. **Vertical bays** Shopfront openings must align into bays, following the vertical bay specifications in *Section 3.2.3. Massing and Façade Design* of main street standards (see Figure 3.4-1).
   b. **Architectural façade elements**
      i. Shopfronts in vertical mixed-use buildings may integrate with Galleries or Arcades.
      ii. **Visibility** Windowsills in non-entry bays shall not exceed 2 feet above grade.
   c. **Setback use and design** Recessed shopfronts without dooryard, terrace, or porch designs shall extend to the property line.

3.4.2 Lobby Entry

Figure 3.4-2 Lobby Entry

1. Element standards	Minimum	Maximum
A. Height to top of transom	10 feet	20 feet
B. Height to bottom of canopy/awning	8 feet	Not Applicable
C. Distance to property line	Not Applicable	20 feet
D. Awning/Canopy Depth	4 feet	Not Applicable

2. Design standards.

a. **Lobby entries** shall be visible and distinguishable from adjacent ground floor units and include a minimum of 1 of the following design strategies (see Figure 3.4-2):
   i. Center placement for symmetry.
   ii. Prominent corner location.
   iii. Incorporate 2 architectural elements (columns, overhanging roofs, canopies, awnings, or ornamental light fixtures).
   iv. Recessed entry.
   v. Entry framing.

b. **Main Street massing types**
   i. Lobby entries shall not exceed 20% of the frontage length.
   ii. Allocate the remaining length to shopfronts.

c. **Visibility** Lobbies entries shall be visible from the public right of way as follows:
   i. Windowsills shall be no higher than 2 feet above adjacent grade.
   ii. Internal shade devices such as blinds, shades, or curtains are prohibited.

d. A forecourt may be introduced to provide a transition between the entry and sidewalk (forecourt standards are discussed in *Section 3.1.5 Open Space Standards*)

Chapter 4. Architectural styles

Below is a list of Architectural styles which shall be applied. A maximum of 1 architectural style shall be applied to each project.

4.1 Mission-Spanish Colonial Revival
4.2 Craftsman
4.3 American Mercantile
4.4 Tuscan
4.5 Modern
4.6 Farmhouse

4.1 Mission - Spanish Colonial Revival

Influenced by Spanish/Mediterranean and early Californian styles in the late 19th and early 20th centuries, the Spanish Colonial Revival style is asymmetrically arranged and includes low-pitched roofs covered with S-type clay red roofing tiles, wooden frames with stucco siding, and arches above doors, porch entries, and main windows (see Figure 4.1-1).

Figure 4.1-1 Mission - Spanish Colonial Revival

4.1.1 Form and Massing

1. **Façade design (Apply all)**

    a. Asymmetrical façade/elevations
    b. Three or more roof planes
    c. A minimum of 50 percent of the units shall have balconies or window treatments (such as shutters or awnings)
    d. Entrances are recessed a minimum 12 inches
    e. Additional details for projects over 4 stories, vertical mixed use, or with more than 15 buildings (requires 2 details):

i. Include **2** add-on projections such as verandas, arcades, balconies, and exterior stairs
ii. The ends of building massing's shall be stepped down
iii. One focal point, such as courtyard, tower, or fountain
iv. Apply wingwalls or columns on the ground level

4.1.2 Roof

1. **Roof design (Apply all)**
   a. Low-pitched (4:12 maximum) cross- or side-gabled roofs. The pitch shall remain constant except for a veranda or arcade.
   b. Red, fired, clay tile roofs. Tile types include both Spanish (S-shaped) and Mission (half-cylinder)
   c. Hipped roofs shall only be used in combination with gables or on a tower element.
   d. Shed roofs are only used in conjunction with verandas
   e. When a flat roof is used, it shall be screened by a parapet that is an extension of the wall plane or by a modified Mansard roof.

4.1.3 Materials and Colors

1. **Materials and colors (Apply all)**
   a. Roof tiles shall use terracotta, brown earth tones, or rustic red color palettes.
   b. White, cream, or tan stucco wall with smooth (20/30) textured finish (i.e., hand troweled)
   c. Wood shall be used as secondary wall material for the following and similar elements:

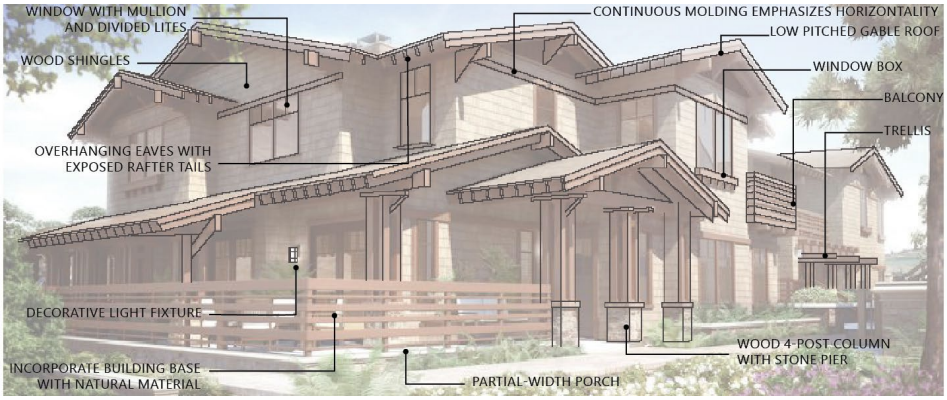
      i. Posts and exposed beams
      ii. Railing, spindles, and grille work
      iii. Shutters, window frames, and doors

   d. If windows have shutters, the shutters' color shall match the accent color that is used for doors or decorative trim.
   e. A minimum of 1 wrought-iron element (such as railings, hardware, and gates) shall be used.

4.1.4 Doors and Windows

1. **Door and windows (Apply all)**
   a. Accent windows shall be a minimum of 20 percent of the total windows
   b. The primary facade shall include a minimum of 1 arched element
   c. A minimum of 50 percent of the windows shall be casement windows
   d. All entrance-door surrounds shall be banded with ceramic tile, molded plaster, or painted accents.
   e. All casement windows and double-hung windows shall have wood frames
   f. Eighty percent of the windows shall have window muntins

4.1.5 Decorative Details



1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Entry/front porch or patio
        ii. Decorative tiles
        iii. Clay tile vents
        iv. Wrought-iron balcony railings or support brackets
        v. Dark-metal light fixture and hardwires
        vi. Paired wood (or wood simulated) garage doors with iron hardware
        vii. Verandas, pergolas, or arcades
        viii. Exterior stairs
        ix. Awnings with metal spear supports

4.2 Craftsman

The Craftsman or California Bungalow style, originating from the early 20th-century Arts and Crafts movement. Notable features include the artful use of wood and natural materials, low-pitched roofs, horizontal orientation, earth-toned colors, exposed rafters, decorative brackets, porches, and columns (see Figure 4.2-1).

Figure 4.2-1 Craftsman

4.2.1 Form and Massing

1. **Façade design (Apply all)**
    a. Asymmetrical facades/elevations
    b. Three or more roof planes on the primary facade
    c. Front-facing gable roofs
    d. Street-facing units shall have balconies or porches
    e. The front lot line façade shall have 2 to 3 materials/colors

4.2.2 Roof

1. **Roof design (Apply all)**
    a. Low- to moderate-pitched gable or hipped roofs from 6:12 to 8:12
    b. Overhanging eaves (minimum 24 inches along primary elevation) with exposed rafter tails or beams.
    c. Brackets or knee braces at gabled ends
    d. Use of imitation wood or asphalt shingles

4.2.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Brick or stone shall be used in the base
    b. Primary wall materials shall include dark-color wood shingles, clapboard siding, or fiber cement siding and natural materials such as stone or brick.
    c. Use of earth-toned color palette, such as browns and greens

d. The front lot line façade shall have a **minimum of 3** paint colors: 1 for the cladding, 1 for trim, and 1 for accents such as windows and decorative details.

4.2.4 Doors and Windows

1. **Door and windows (Apply all)**
   a. A minimum of 50 percent of the windows shall be casement windows.
   b. A minimum of 80 percent of the primary windows shall be multi-paned.
   c. A minimum of 2 types/shapes of windows shall be used
   d. Utilize flat wood trims (typically 4½ inches or 5½ inches wide) around the primary windows and entry doors.
   e. Window and door trim color shall be different with the color of the walls.
   f. Entry doors and garage doors shall have 1 row of vertical or horizontal glass panels.

4.2.5 Decorative Details

1. **Decorative details**
   a. All residential projects shall provide **a minimum of 4** of the following; and
   b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

      i. Stone pier and battered wood support
      ii. Exposed rafter tails and knee-brace brackets
      iii. Dormers on the front façade
      iv. Second-story balcony
      v. Decorative attic/gable vent
      vi. Light fixtures shall be box-shaped, with metal frame and geometric pattern
      vii. Chimneys are visible at the exterior and arranged on a side elevation
      viii. Stained-glass or transom windows
      ix. Covered front porches shall tapered pillars
      x. Ground-level windows shall have muntins

4.3 American mercantile

This building type began in the late 19th century when, in the process of identifying towns and cities, housing and offices were built over retail stores. This mixed-use strategy is still relevant today as the reurbanization of existing city centers becomes an established pattern (see Figure 4.3-1).

Figure 4.3-1 American Mercantile

4.3.1 Form and Massing

1. **Façade design (Apply all)**
    a. Asymmetrical facades/elevations
    b. Simple, rectangular form
    c. Symmetrical placement of piers, columns, ground-floor storefronts, and openings on upper levels.
    d. Transparent windows and doorways shall be no less than 80 percent of the street frontage at the ground level.
    e. Multistory facades are divided into base, body, and top, with the ground floor taller than the upper floors.
    f. Columns or lintels over openings
    g. Bases are articulated by changes in material or changes in wall plane
    h. Minimal projections or recessions on wall plane

4.3.2 Roof

1. **Roof design (Apply all)**
    a. Flat roof.
    b. A projecting cornice or a receding, stepped parapet
    c. Cornice and details mimic and reference historical detailing
    d. Street-facing gable roof with roof pitches at minimum 5:12 unless concealed behind a parapet.

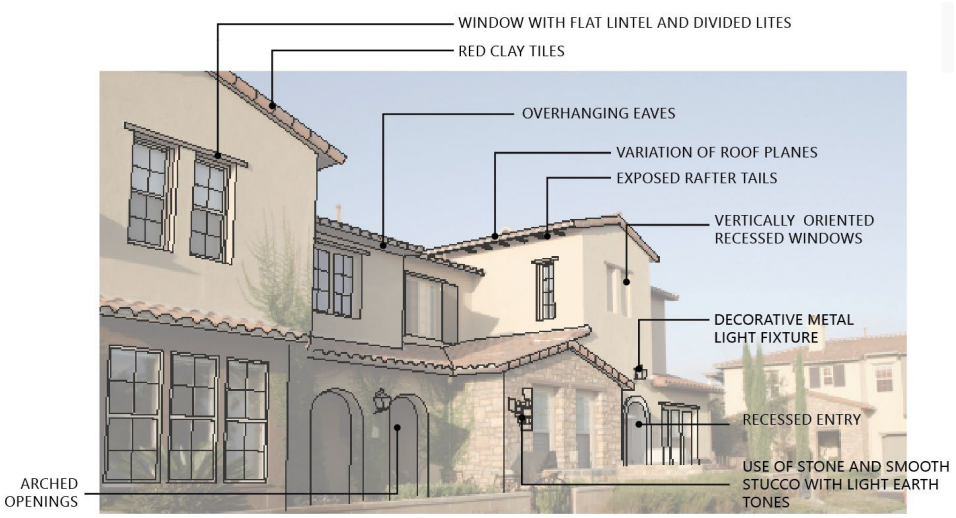
4.3.2 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Walls shall be composed of brick
    b. Decorative moldings, cornices, or an applied ornament of stone or cast concrete shall be used.
    c. No more than 3 colors shall be used on any given facade
    d. Stucco and clapboard is prohibited

4.3.4 Doors and Windows

1. **Door and windows (Apply all)**
    a. Ground-floor windows and doors shall be large and expansive with a transom.
    b. Upper-floor windows shall be double-hung vertically and grouped with a rhythm consistent with the major storefront openings below.
    c. Entrance shall have higher bays, recessed entries by a minimum of 3 feet, or different color/materials.
    d. Upper-floor windows shall have window lintel and sill
    e. Transom windows above the doors and windows on the ground level
    f. Fifty percent of windows shall have muntins
    g. Upper floor windows shall have a minimum 2-inch recess

4.3.5 Decorative Details



1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Awnings, canopies, and second-floor balconies
        ii. Pedimented windows
        iii. Wide window trim with a keystone
        iv. Double-bracketed cornice
        v. Gable roof
        vi. Roof finial
        vii. Transom above door and windows on the ground level
        viii. Metal balcony railing
        ix. Canopy or awning
        x. Recessed entries
        xi. Cast-iron columns
        xii. Shopfront millwork

4.4 Tuscan

A blend of Spanish Revival and rural Italian elements, this interpretation of traditional Mediterranean architecture features stone and stucco, light earth tones, and red-tiled roofs. Classical elements like columns, arches, and decorative ironwork enhance visual complexity. Italianate references are evident in squared towers and projections. Features include porches, porticoes, and vertically oriented, recessed windows (see Figure 4.4-1).

Figure 4.4-1 Tuscan

4.4.1 Form and Massing

1. **Façade design (Apply all)**
    a. Asymmetrical arrangement of windows and design elements along front lot line.
    b. Porches, porticoes and/or Juliet balconies
    c. Recessed entries (a minimum of 3 feet)

4.4.2 Roof

1. **Roof design (Apply all)**
    a. Flat or low-pitched hip or gable roof (maximum 6:12 slope)
    b. Red-toned clay tiles
    c. Multiple roof levels (at minimum 3)
    d. Large overhanging eaves (minimum 12 inches) along primary elevation

4.4.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Incorporate rough-hewn stone as accent feature
    b. Flat stucco walls in light earth tones
    c. Use of earth-toned color palette
    d. Brown or beige window frames

4.4.4 Doors and windows

1. **Doors and windows (Apply all)**
    a. Single- or double-hung windows shall be more horizontal in proportion, with six-over-six muntin patterns and 5½-inch-wide trim.
    b. Casement windows shall be paired with four-pane patterns for smaller windows and eight-pane patterns for larger windows.
    c. Vertically oriented rectangular or arched windows arranged in asymmetrical patterns.
    d. Casement or double-hung sash with flat or arched lintels
    e. Windows shall be recessed 3 to 12 inches

4.4.5 Decorative details

1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Juliet balconies
        ii. Rafter extensions and brackets
        iii. Stone or stucco window/door trim
        iv. Rectangular or arched wooden door
        v. Arcade or porch at entry
        vi. Decorative ironwork (window grilles, railings, light fixtures, decorative planters)
        vii. Arched windows
        viii. Paired decorative wood shutters. Shutters shall be equal to half the width of the window. Shutter styles shall be paneled or louvered.
        ix. Use of brick, stone, or wood columns
        x. Stucco or stone chimneys
        xi. Different-color wood trellis
        xii. Arched openings and doorways at the ground level

4.5 Modern

Modern architecture prioritizes clean lines, geometric shapes, and the use of unconventional or industrial materials such as glass, metal, concrete, steel, and reclaimed materials characterized by extensive large windows, contemporary buildings maximize natural light, and passive solar heating (see Figure 4.5-1).

Figure 4.5-1 Modern

4.5.1 Form and Massing

1. **Façade design (Apply all)**
    a. An irregular, asymmetrical façade
    b. Rectangular structure
    c. Horizontal massing
    d. Straight and continuous lines
    e. Repeating lines and elements

4.5.2 Roof

1. **Roof design.** Flat or low-pitched roofs (4:12 slope max)

4.5.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Use of raw and natural materials including wood, concrete, metal, and glass.
    b. Traditional materials (such as smooth stucco (20/30), wood, brick, and stone) shall be used as an accent material.
    c. Minimum 2 materials on the building facade.
    d. Use of color blocking for geometric forms and break up massing elements.
    e. Building facade shall incorporate **a minimum of 2** of the following as an accent:

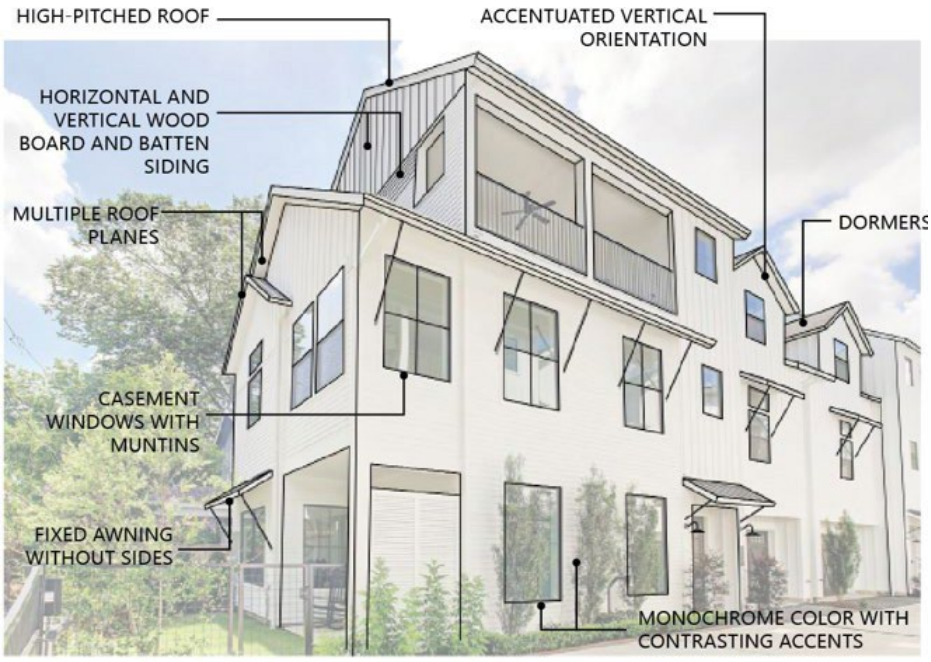
        i. Awnings

ii. Popouts, trellis
iii. Arbor structures
iv. Balconies

4.5.4 Doors and Windows

1. **Door and windows (Apply all)**
    a. Large glass doors and/or window openings
    b. Window wrapping around a corner of the building
    c. Narrow aluminum window frames

4.5.5 Decorative Details



1. **Decorative details (Apply all)**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Metal balcony railings
        ii. Clerestory windows
        iii. Floor-to-ceiling glass door
        iv. Floor-to-ceiling glass windows on the ground level
        v. Roof decks
        vi. Trellis shade structures
        vii. Metal awning
        viii. Roof overhang with exposed wood or steel frame

4.6 Farmhouse

Farmhouse style utilizes vertical or horizontal wood siding, monochrome colors with contrasting accents, minimal ornamentation, and medium to high-pitched roofs. Minimal detailing includes awnings, porches, and wall-mounted gooseneck lights (see Figure 4.6-1).

Figure 4.6-1 Farmhouse

4.6.1 Form and Massing

1. **Façade design (Apply all)**
    a. Straight exterior lines, geometric form
    b. Asymmetrical massing with a gable at the front of the house
    c. Repeating shapes and lines
    d. Gable roof creating a triangular wall on the ends.
    e. Incorporate farm and ranch forms (i.e. barns, silos, sheds, tank houses, and granary towers)
    f. Multiple gable and shed roof planes
    g. Geometric forms, industrial materials, and repetition
    h. Covered porches and awnings to break up volumes between lower and upper floors.
    i. Variation in projecting wall planes with a minimum 12-inch depth

4.6.2 Roof

1. **Roof design (Apply all)**
    a. High-pitched gabled roof or shed roof (minimum 6:12 slope)
    b. Intersecting gable roofs
    c. Dark asphalt shingle, metal roofs, or synthetic slate shingles
    d. Triangular rooflines
    e. Large overhangs (minimum 2 feet in length) above the patio and garage

4.6.3 Materials and Colors

1. **Materials and colors (Apply all)**
    a. Use metal, wood, or masonry
    b. Utilize board-and-batten siding, corrugated panels
    c. Monochrome accents of doors, windows, or architectural features
    d. Stucco is permitted as an accent material

4.6.4 Doors and Windows

1. **Doors and windows (Apply all)**
    a. Windows shall be double-hung with a proportion of 2 or 2½ times taller than wide
    b. Groupings of 2 or 3 double-hung window units
    c. Multi-paned windows
    d. Accent trim around window and door openings
    e. Double-hung or casement windows

4.6.5 Decorative Details

1. **Decorative details**
    a. All residential projects shall provide **a minimum of 4** of the following; and
    b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:

        i. Wide front porch with simple columns
        ii. Covered patio
        iii. Shed or gabled dormers
        iv. Carriage-style garage doors
        v. Dark shutters and window sashes
        vi. Gable brackets, vents, and trim
        vii. Iron-inspired barn-style lighting
        viii. Metal awnings without sides
        ix. Gooseneck light fixtures at the entrance
        x. Large doors and windows to maximize natural light
        xi. Multi-paned windows on the ground-level windows and doors

Chapter 5. Administration

5.1 Administration of Standards

This chapter provides methodology for the implementation of the Objective Design Standards, including administration, project approval, and appeals. The responsibilities of the City of Ontario Planning Staff shall include administering, interpreting, and enforcing all requirements and standards of this document.

Any terms not defined herein and any issues affecting the design and development of the subject project area not specifically addressed in the ODDS shall be governed by the provisions of the Ontario Development Code.

5.1.1 Interpretation and Severability

Unless otherwise provided herein, any ambiguity concerning the content or application of the Objective Design Standards shall be resolved by the City of Ontario Executive Director Community Development (Director) or his / her designee in a manner consistent with the goals, policies, purpose, and intent established in this document. If any portion of these standards is declared to be invalid or ineffective in whole or in part, such decision shall not affect the validity of the remaining parts of the remaining portions thereof.

5.1.2 Reference Documents

- **The Ontario Plan**
- **City of Ontario Development Code**

5.2 Glossary of terms

Alley. A narrow, low-capacity thoroughfare with 1 shared lane and no parking lanes which provides secondary access to all Lots within a Block. Driveways, Parking Aisles, and Fire Lanes are not Alleys.

Arbor (entrance arbor). A wooden structure that is intended to define an entrance into an on-site outdoor space, such as a front yard or parking lot.

Arcade. A facade with a ground floor colonnade supporting the upper stories of the building, intended to provide shade, glare control, and weather protection.

Bay. A facade division comprised of groupings of vertically aligned facade elements, such as shopfronts, windows, awnings, and wall materials that are stacked 1 above the other. Bays can be differentiated from 1 another by changes in material, color, and/or use of architectural elements such as pilasters.

Bay Window. A window or series of windows projecting from the exterior wall of a building and forming an extension, or bay, of the room. Subject to the requirements of the regulating zone, bay windows may encroach into the setback or public right-of-way.

Block. An aggregation of Lots, Passages, Carless Streets, and driveways which are bound on all sides by Streets. Block dimensions are measured along private Street Rights-of-way.

Building Base. The lowermost portion of a building facade that is distinctly differentiated from upper floors or upper wall surfaces. The base of mixed-use buildings consists of the ground floor or, for taller buildings, an ensemble of the first 2 floors. The base of multi-family or office buildings can consist of the entire ground floor, or a low band (three to 4 feet high) comprised of different materials or colors than upper wall surfaces.

Building Length. The length of the building as measured parallel to the front property line

Court. A semi-public, shared open space within a lot, for use by more than 1 resident or commercial tenant. Courts generally provide visitor access from the street to dwellings, retail, or office spaces, and/or buildings within the lot that lack direct access from the street. The degree of enclosure or openness of the court may vary, as per the requirements of each zone and the design intent of the project designer.

Director. The Director of Community Development, or designee.

Drive Aisle. A vehicular lane within a parking lot that provides access to the individual parking spaces.

Driveway. A vehicular lane within a lot that leads to onsite parking.

Encroachment: Structure extending into a required setback area.

Facade: Exterior wall of a building adjacent to a street or public open space.

Facade Increment: Visually distinguished complete facade composition.

Fenestration: Transparent glass openings in a building face.

Fire Lane: On-site right of way for emergency vehicle access.

Forecourt: Open space extension into a lot, defined by building faces.

Frontage, Private: Building facade and area between it and property line along a street.

Frontage, Public: Area between street-adjacent property line and the first travel lane.

Gallery: Ground-floor colonnade providing shade, glare control, and weather protection.

Green: Publicly accessible open space at the intersection of streets, landscaped for recreation.

Ground Floor: Building floor nearest to the existing grade around the building.

Height, Building: Height measured from finished grade at any property line along the street.

Loggia: Colonnaded or arcaded space within a building, open to the air on 1 side.

Lot: Portion of land for allowed development, synonymous with "property" or "design site."

Lot Line: Front, side, or rear boundary of a lot, synonymous with property line.

Massing (or Facade) Increment: Segment of a building facade divided into visually discrete compositions.

Passage: A pathway designed for pedestrians on a property, like a Paseo, but may not extend through an entire block.

Parking Court: A public space between buildings designed for surface parking.

Pergola: A wooden structure intended to provide shade or define an entrance into an on-site outdoor space.

Pier, Shopfront: The vertical elements on either side of a shopfront bay.

Place Types: A classification of urban environments based on streetscape and building character, including attributes such as building placement, height, frontage, land use, density, and streetscape design.

Plaza: An open space at the intersection of important streets for civic and commercial activities. Sizes range from one-half (1/2) acre to 2 acres, defined by surrounding buildings and typically paved with arranged shade trees. Amenities may include fountains and food kiosks.

Primary Access: The principal means of approaching and entering a building or property.

Primary entrances: Typically referring to front doors, including direct access into a ground floor residential unit, nonresidential space, common lobby, or zaguan leading to a court.

Privacy Windows: Windows that are either opaque and unopenable or start at minimum 6 feet from the floor.

Public Open Space: Off-street outdoor space owned by the city for public use or on a private parcel adjacent to a right of way, functioning as a public space.

Publicly Accessible: Open spaces or streets open/available to the public, whether publicly or privately owned.

Shopfront: A ground-floor frontage assembly with large transparent windows, a conspicuous entrance leading directly into the unit, spatially defined by vertical elements called piers.

Side, Lot Line: Any property line shared with a neighboring property when there is no public open space between them.

Side yard: The portion of a parcel extending from the front property line to the rear property line and between the side property line and the closest side of the principal building. It may also be designed as open space.

Story height: The vertical distance from floor to ceiling, measured from the top of the floor finish to the bottom of the ceiling joists for the topmost story.

Street: A right of way defined as a street, excluding paseos, driveways, parking aisles, fire lanes, and alleys.

Street, Front: The side of the lot adjacent to a street, a property may have multiple fronts.

Street, Side: (Applicable only to corner lots) The side of the lot adjacent to a street or public open space that is not considered the front.

Trellis: A wood or metal frame supporting thin overhead wooden or metal strips or latticework, providing shade and supporting climbing plants. It may be freestanding.

5.3 Checklist

See Attachment A

ATTACHMENT A

March 18, 2025

Objective Development & Design Standards Checklist

The Objective Development & Design Standards (ODDS) Checklist is applicable to both Multiple Family Development and Mixed-Use Development. Refer to the ODDS Chapter's 1 through 4 for specific additional information.

In addition to any objective standards imposed through the underlying base zone, the ODDS document provides standards for housing developments limited to the following areas (refer to the Policy Plan Land Use Plan Exhibits LU-01, LU-04, and CD-01 and the official Zoning Map):

- **Multiple-Family Development.** Applies to all multiple-family residential categories as shown on Policy Plan Land Use Plan Exhibit LU-01 (LMDR, MDR, and HDR, and Mixed-Use land use designations).
- **Mixed-Use Development.** Applies to mixed-use categories as shown on Policy Plan Land Use Plan Exhibit LU-01and associated Place Types as shown on Exhibit CD-01.

The Applicant is required to provide a completed Checklist upon application submittal.

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
2.1 Site Design Standards				
2.1.1 Site Design				
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows:				
a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way				
b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way				
c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.				
d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way				
2.1.2 Site Access				
1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley				
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway				
2.1.3 Parking				
A. Placement on site Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Surface parking**				
a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property.				
b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.				
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces.				
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade.				
4. **Subterranean parking** A subterranean parking structure may extend to all property lines.				
5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court.				
B. Surface parking lot design. Surface parking lots shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Screening**				
a. **Street-adjacent parking lots**				
i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
in height.				
ii. Walls and hedges must be a minimum 18 inches from the back of sidewalk				
iii. Landscaped berms are prohibited				
b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs				
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas)				
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings				
C. Parking court design				
1. **Design standards**				
a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet				
b. The parking court shall consist of only 1 parking bay, and this bay shall not exceed a maximum width of 62 feet				
c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.				
D. Parking structure design				
1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum 2 design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in Section 2.2.2 Building Types.				
2. **Parking structure standards**				
a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet				
b. Single access lane driveways into the structure shall not exceed 14 feet in width				
c. Parked vehicles shall be screened from view from adjoining streets				
d. Signs as shall be consistent with Division 8: Sign Regulations of Ontario Development Code				
2.1.4 Open Space Standards				
A. Common open space and public frontage				
1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:				
a. **Close to park** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
b. **Common open space types** 1 or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.				
2. **Access and visibility** At-grade open space shall be accessible and visible from the adjacent ground floor				
B. Common open space types				
Forecourt				
1. **Design standards**				
a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.				
b. **Minimum dimensions** Forecourts shall be a minimum of 15 feet by 15 feet				
Side garden				
1. **Design standards**				
a. **Minimum side garden dimensions**: 15 feet by 15 feet				
b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:				
i. Up to a total of 30 percent of the side garden's width or length				
ii. A ground-floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden				
Court				
1. **Design standards.**				
a. **Minimum dimensions:** All courts shall be a minimum of 20 feet by 30 feet				
b. **Enclosure**				
i. A court shall have building walls on a minimum 2 sides, while the third and fourth side can be defined by architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).				
ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).				
c. **Access**				
i. Courts shall be accessed from the street or walkway				
ii. Units shall be allowed to take direct access through a court				
d. **Encroachments**				
i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard				
ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court				
e. **Common Area** A court shall serve as communal spaces and pedestrian access				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
f. **Amenities** A court shall include a minimum 1 of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
Passage				
1. **Design standards**				
a. **Location** Passages shall be provided between buildings or side gardens				
b. **Size** Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side				
C. Private Open Space				
1. **General standards**				
a. A minimum of 60 square feet of private open space shall be provided for each residential unit and a minimum 1 of the private on-site open space types shall be provided.				
b. **Exception:** Private on-site open space shall not be required for a project site that is located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.				
D. Private Open Space Types				
Private roof deck				
1. **Description** A private open space located on the roof of a building dedicated to a single unit				
2. **Design standards** Minimum dimensions of 7 feet by 7 feet				
Backyard				
1. **Description** A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.				
2. **Design standards**				
a. **Size** Minimum dimensions of 20 feet by 15 feet				
b. **Encroachments** Encroachment into the backyard is allowed up to 30% of the rear yard area				
Architectural façade elements as private open space				
1. **Description** The following elements defined in Section 2.3 Architectural Façade Elements may be used to meet on-site private open space requirements.				
a. Balcony				
b. Terrace Balcony				
Entry elements as private open space				
1. **Description** The following elements defined in Section 2.4 Entry Elements may be used to meet on-site private open space requirements.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
a. Dooryard				
b. Porch				
2.1.5 Landscaping				
1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).				
2.1.6 Fences and Walls				
1. **Fence and wall heights** Walls and fences shall be designed in compliance with the applicable standards contained in Division 6.02 (Walls, Fences, and Obstructions) of the Ontario Development Code.				
2.2 Multiple-Family development standards				
Table 2.01 Multiple-Family Development Standards per Development Type *(Refer Section 2.2.2 Building Types)*				
A. Building Development Standards				
1. **Minimum Setback from Public Street Property Lines:** *(refer to Note 9 – Table 2.01).*				
a. **Arterial** **Urban** (25 du/ ac or greater) - 0 feet **Neighborhood** (Less than 25 du/ac) – 10 feet **Housing** (Less than 25 du/ac and 5 units or less – 14 feet				
b. **Collector** **Urban** (25 du/ ac or greater) - 5 feet **Neighborhood** (Less than 25 du/ac) – 10 feet **Housing** (Less than 25 du/ac and 5 units or less – 14 feet				
c. **Local** **Urban** (25 du/ ac or greater) – 5 feet **Neighborhood** (Less than 25 du/ac) – 15 feet **Housing** (Less than 25 du/ac and 5 units or less – 20 feet				
2. **Minimum Setback from Interior Project Boundary Property Lines –** 5 feet				
3. **Minimum Setback from Public Alley Property Lines –** 5 feet				
4. **Minimum Setback from Private Drives/Alleyways (from edge of drive aisle)**				
a. Living Area – 10 feet				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
b. Garages and other nonhabitable Structures – 10 feet				
5. **Minimum Setback from Dwellings to Parking Spaces**				
a. Living Area – 10 feet				
b. Garages and other non-habitable structures – 5 feet				
6. **Minimum Setback from Parking Space or Drive Aisle to Wall or Fence –** 5 feet				
7. **Minimum Separation Between Detached Buildings:**				
a. Dwelling Front to Front- < 2-Stories: 25 FT; > 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
b. Dwelling Front to Rear- < 2-Stories: 25 FT; > 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
c. Dwelling Front to Side - < 2-Stories: 25 FT; > 3 Stories: 30 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
d. Dwelling Side to Side - < 2-Stories: 10 FT; > 3 Stories: 15 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
e. Dwelling Side to Rear - 15 FT; unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
f. Dwelling Rear to Rear- 20 FT unless otherwise specified by massing requirements ("Space between buildings") in Section 2.2.2 Building Types. *(refer to Note 5 – Table 2.01)*.				
8. **Garage to Garage (or other nonhabitable structures)** a. 30 FT – Entry to Entry b. 30 FT – Entry to Side c. 10 FT – Side to Side d. 10 FT – Side to Rear				
9. **Minimum Storage Space –** 240 CF *(refer to Note 4 – Table 2.01)*				
10. **Maximum Street Façade Height** a. Downtown District – 45 Feet *(refer to Note 8 – Table 2.01)* b. Other Districts & Corridors – n/a c. Neighborhood Centers - 35 Feet				
11. **Maximum Building Height**				

ODDS – Chapter 2				
2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
a. Downtown District – n/a *(refer to Note 8 – Table 2.01)* b. Other Districts & Corridors – n/a *(refer to Note 5 – Table 2.01)* c. Neighborhood Centers -60 FT *(refer to Note 5 – Table 2.01)*				
12. **Minimum Setback from Major Pipelines -** 50 FT (to habitable structures) *(refer to Note 7 – Table 2.01)*				
2.2.1 Height Standards				
1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility.				
2. **Multiple family development types** The following height limits shall apply to all proposed multiple family development types.				
a. Buildings within 100 feet of single-family residential dwellings must not exceed 35 feet or the height of adjacent residential buildings, whichever is greater				
b. Buildings within 100 feet of undeveloped single-family zone parcels shall not exceed 35 feet in height				
2.2.2 Building Types				
1. **Identify** the suitable building type for the project based on its density, including:				
a. **"Urban"** (applies to multiple-family development projects with 25 dwelling units per acre or more). Projects less than 1 acre in size but exceeding 25 du/ac can use neighborhood or housing Form in lieu of the urban massing form.				
b. **"Housing"** (applies to multiple-family development projects with fewer than 25 dwelling units per acre that include buildings with 5 or fewer units).				
c. **"Neighborhood"** (applies to multiple-family development projects with fewer than 25 dwelling units per acre that include buildings with more than 5 units)				
A. Urban massing and façade design				
Urban massing and façade design standards are required for all multiple-family developments projects with 25 du/ac or more				
Massing increments				
1. **Massing standards**				
a. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows: i. The maximum length of a single massing increment shall not exceed 150 feet ii. A minimum 2 distinct massing increments shall be provided				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
b. **Articulation of massing increments** Individual massing increments shall be differentiated from one another using a minimum 1 of the following massing strategies:				
i. Vary parapet height by a minimum of 3 feet				
ii. Increase number of stories				
iii. Set back upper floor. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade				
iv. Set the entire facade back a minimum of 10 feet for 20 feet				
v. Incorporate tower element				
c. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.				
d. **Repeating massing increment design** A massing increment design may be repeated on the same project elevation. Repeated massing increments shall be separated by a distinct massing increment.				
2. **Element standards**				
a. Building façade along font lot line - 400 feet max				
b. Massing increment - 150 feet max				
c. Space between buildings - 0 feet min				
d. Façade setback (if elected) - 10 feet x 10 feet min				
e. Building base height - 15 feet min				
f. Building façade alongside lot line - 200 feet max.				
g. Height difference between massing increments - 3 feet min				
h. Upper-level setback from façade - 15 feet min				
Façade Composition				
1. **Façade composition standards**. The building facade shall be divided into a base and body as follows:				
a. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies:				
i. Provide a string course at the top of the first story				
ii. Specify base materials different from rest of façade				
iii. Specify base colors different from rest of façade				
iv. Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
b. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:				
i. Windows shall be organized in bays, bands, curtain wall, and grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.				
ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.				
Fenestration design				
1. **Façade fenestration standards**				
a. **Minimum fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the façade.				
i. **Ground floor** (a) Front lot line: 70% minimum (b) All other frontages: 50% minimum (c) Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade (d) Ground floor bathroom windows are prohibited on facades that face front lot line				
ii. **Upper floors** 15% minimum.				
B. Neighborhood massing and façade design				
Neighborhood massing and façade Design standards are required for all multiple-family development types applicable to multiple-family development projects with fewer than twenty- five (25) du/ac that include buildings with more than 5 units.				
Massing increments				
1. **Element standards**				
a. Building façade along front lot line – 135 feet max				
b. Building façade length alongside interior lot line – 135 feet max				
c. Space between buildings – 15 feet min				
d. Massing increment – 75 feet max				
e. Height difference between massing increments – 2 feet min				
f. Façade setback (if elected) – 10 feet x 20 feet				
2. **Massing standards** a. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
135 feet shall be divided into massing increments as follows:				
i. The maximum length of a single massing increment shall not exceed 75 feet				
ii. A minimum of 2 distinct massing/architectural increments shall be provided using 1 strategy from the massing strategies list and 1 strategy from architectural strategy list.				
b. **Massing strategy list**				
i. Vary height by a minimum of 3 feet				
ii. Increase number of stories				
iii. Set back upper floors by a minimum 15 feet				
iv. Set the entire facade back a minimum of 10 feet for twenty feet				
v. Increase story height				
vi. Incorporate tower element				
c. **Architectural strategy list**				
i. Use different facade materials and/or colors				
ii. Window treatment and design. Use different window types, configurations, and/or frame colors				
iii. Diversify facade elements (balconies, trellises, chimneys, awnings) as per Section 2.3 Architectural Façade Elements.				
iv. Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in Section 2.4 Entry Elements.				
v. Massing increments that have distinct facades, shall appear as distinct buildings				
vi. A massing increment design can be repeated twice on the same project elevation, with a distinct separation between repeated increments.				
Façade composition				
1. **Façade composition standards**				
a. **Multi-story building façades** The building facade shall be divided into a base and body as follows:				
i. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum 2 of the following strategies.				
(a) Provide a string course at the top of the first story				
(b) Specify base materials different from rest of façade				
(c) Specify base colors different from rest of façade				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS

	Applicant		City	
	Done	N/A	Done	N/A
(d) Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements				
ii. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:				
(a) Windows shall be organized in bays, bands, curtain wall, and/or grid of windows consistent with the Facade Fenestration Standards for the Neighborhood massing type.				
(b) Each massing increment's entire facade composition must be contained within its boundaries, with no overlap of facade elements, like window openings and balconies, across the division between increments.				
Fenestration Design				
1. **Façade fenestration standards**				
a. **Minimum Fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:				
i. **Ground Floor:** 30% minimum (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.				
(b) Ground floor bathroom windows are prohibited on facades that face the front lot line				
ii. **Upper floors:** 15% minimum				
C. House-form massing and façade design				
House-form massing and façade Design standards for projects with densities below 25 du/ac that include buildings with 5 or fewer units.				
1. **Element standards**				
a. Building Façade length along font lot line – 60 feet max.				
b. Massing Increment - 60 feet max.				
c. Building Façade length alongside lot line - 60 feet max.				
d. Space between buildings – 15 feet max.				
2. **Massing and façade composition standards**				
a. **Massing increments** A massing increment shall include the whole length of a single building façade, up to 60 feet in length. Only **1** massing increment per building façade shall be included.				
b. **Length of buildings** Buildings along front and side lot lines that face public streets shall be no longer than 60 feet.				
c. **Space between buildings** Buildings along front and side lot lines shall be separated by a minimum 15 feet.				

ODDS – Chapter 2

2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
d. **Articulation of building façade**. Frontages along front and side lot lines must differ from neighboring buildings on-site using a minimum of **2** of the specified massing and architectural strategies:				
i. **Façade setback** Setting a portion of the facade back a minimum of 2 feet for a length of 20 feet				
ii. **Material or color** Use different facade materials and/or colors consistent with the architectural style				
iii. **Window treatment and design** Use different window types, configurations, and/or frame colors				
iv. **Architectural façade elements** Vary façade elements (balconies, trellises, chimneys, awnings) according to Section 2.3 Architectural Façade Elements.				
v. **Entry elements** Vary the building entry element type or design of stoops, porches, dooryards, and other elements identified in Section 2.4 Entry Elements.				
vi. **Vary roof form** Vary the roof form of different increments such as gabled, hipped, and others consistent with the architectural style of the building (selected from Chapter 4).				
Fenestration Design				
1. **Façade fenestration standards**				
a. **Minimum fenestration.** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the facade:				
i. **Ground floor:** 30% minimum (a) Ground floor windowsills on facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade. (b) **Exception:** Windows on garage panel door (c) Ground floor bathroom windows are prohibited on facades that face front lot line				
ii. **Upper floors:** 15% minimum				
iii. The horizontal distance between wall openings shall not exceed 15 feet within a facade or massing increment.				
2.2.3 Material and Detailing				
Building Materials				
1. **Prohibited materials**				
a. Fiberglass or plastic (false) architectural or facade elements or ornamentations are prohibited				
b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street				
c. Reflective materials, such as mirrored glass, shiny metal, and chrome				
2. **Combining materials** When combining **2** or more wall materials on **1** facade:				
a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco				

ODDS – Chapter 2				
2.0 MULTIPLE FAMILY STANDARDS	Applicant		City	
	Done	N/A	Done	N/A
above masonry).				
b. Vertical joints between different materials shall only occur at inside corners.				
Windows and Doors				
1. **Materials and types**				
a. **Window recess** Windows shall be recessed specific to each building's architectural style listed in Chapter 4: Architectural styles but shall be no less than 2 inches for any style.				
b. **Window Material**				
i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing and profile thickness and employ muted patterns and colors consistent with the building's architectural style.				
c. **Trim**				
i. **Window and door trim materials** Wood or cement fiber board is permitted				
ii. **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber, reinforced concrete, and cement fiber board.

2.3. Architectural façade elements				
2.3.1 Awning				
1. **Element standards**				
a. **Depth**				
Minimum - Not applicable				
Maximum - 3 feet				
b. **Clearance above ground**				
Minimum - 8 feet				
Maximum - Not applicable				
c. **Length** Refer to Design Standards				
2. **Design standards**				
a. **Encroachment** Residential Awnings may encroach into the setback or public right- of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Material** Residential Awnings shall be of a simple shed form and made of code- compliant fire-resistant material.				
c. **Upper floors** Each individual awning shall cover no more than **1** window opening.				
2.3.2 Projecting Room				
1. **Element standards**				
a. **Depth**				
Minimum - Not applicable				
Maximum - 2 feet				
b. **Width**				
Minimum - Not applicable				
Maximum - 20 feet				
c. **Height**				
i. 2-story building: 1 story max				
ii. 3 story building: 1 story max				
iii. 4 story+ building: 2 stories max

2. **Design standards**				
a. **Encroachment** Projecting rooms may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Support**				
i. Building projecting rooms shall have visible supports (e.g., beams, braces, or brackets)				
ii. Building projecting rooms shall be set back 10 feet from an adjacent property line				
c. **Space between projecting rooms.** Space between Projecting Rooms shall be 20 feet within the same building plane.				
2.3.3 Bay Window				
1. **Element standards**				
a. **Height**				
Minimum - Not applicable				
Maximum - 10 feet				
b. **Width**				
Minimum - Not applicable				
Maximum - 10 feet				
2. **Design standards**				
a. **Encroachment** Bay windows may encroach into the setback or public right- of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Dimensions** Bay windows shall be a maximum of 10 feet wide and shall have a height that is equal to or greater than their width.				
c. **Depth** The depth of Bay Windows shall be a minimum of 3 feet				
d. **Façade placement** Bay windows shall be placed a minimum of 2 feet from any building corner and a minimum of 3 from any other bay window.				
e. **Fenestration** Bay windows shall consist of a minimum 75% transparent fenestration				
2.3.4 Balcony				
1. **Element standards**				
a. **Height**				
Minimum – Not applicable.

2.4. Entry elements				
2.4.1 Stoop				
1. **Element standards**				
a. **Stoop Width**				
Minimum - 4 feet				
Maximum - 8 feet				
b. **Stoop Depth (not including stairs)**				
Minimum - 4 feet				
Maximum - 8 feet				
c. **Stoop Floor Depth**				
Minimum - 1.5 feet				
Maximum - 3 feet				
d. **Planter/ Fence Height**				
Minimum - Not applicable				
Maximum - 3 feet				
2. **Design standards**				
a. **Relationship to entry** Stoops must align directly with the unit entry(s) they serve.				
b. **Number of units served** Stoops shall provide access to a maximum of 2-unit entries.				
c. **Lobby entries** Stoops may provide access to a lobby entry.				
d. **Stoop stairway orientation** The exterior stoop stairway may be oriented perpendicular or parallel to the adjacent sidewalk.				
3. **Landscaping** Landscaping shall be planted on the sides of the stoop, either at grade or in raised planters. Raised planters shall have a minimum depth of 12 inches.				
2.4.2 Dooryard				
1. **Element standards**				
a. **Depth, Clear**				
Minimum - 8 feet				
Maximum - Not applicable

b. **Finish level above sidewalk**				
Minimum - Not applicable				
Maximum - 3 feet				
c. **Length of Terrace**				
Minimum - Not applicable				
Maximum - 150 feet				
d. **Distance between stairways**				
Minimum - Not applicable				
Maximum - 50 feet				
2. **Design standards**				
a. **Relationship to Entry** Dooryards shall align directly with the unit entry(ies) they serve.				
b. **Number of units served** Stoops shall provide access to a maximum of 2-unit entries.				
c. **Enclosure** Dooryards shall be enclosed by a maximum 3-foot high, decorative walls, fences, or low hedges.				
d. **Architectural Style** Walls and/or fences shall match the building's architectural style.				
e. **Doorway Stairway Orientation** If the doorway is raised above grade, the exterior stairway for raised Dooryards shall be oriented perpendicular or parallel to the adjacent sidewalk.				
2.4.3 Porch				
1. **Element standards**				
a. **Porch Depth**				
Minimum - 8 feet				
Maximum - Not applicable				
b. **Porch width**				
Minimum - 8 feet				
Maximum - Not applicable				
c. **Porch height.**				
Minimum - 8 feet				
Maximum - 12 feet				
d. **Floor height.**

Minimum - 1.5 feet				
Maximum - 3 feet				
e. **Space between porch and front property line**				
Minimum - 5 feet				
Maximum - Not applicable				
2. **Design standards**				
a. **Number of units served** Porches shall provide access to multiple ground-floor unit doors.				
b. **Wrap-around porches** Porches shall wrap around building corners.				

ODDS – Chapter 3

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
3.1 Site Design Standards				
3.1.1 Site Design				
1. **Lot lines** The lines bounding a lot. The classifications of "Lot Line" are as follows:				
a. **Front** This line separates the narrowest street frontage of a lot from a public or private street right-of-way.				
b. **Interior "side"** Any lot line that is not a front or rear lot line and does not border a public or private street right-of-way.				
c. **Rear** The lot line opposite and farthest from the front lot line. In the case of an irregularly shaped lot, a straight line shall be drawn to determine the rear lot line.				
d. **Street side** Any lot line that is not a front or rear lot line, and which abuts a public or private street right-of-way				
3.1.2 Site Access				
1. **Alleys** Vehicular access to the on-site parking areas shall be from the alley				
2. **Roadway inclusion** Pedestrian access from the public right-of-way must include sidewalk on both sides of the driveway.				
3.1.3 Parking				
A. Placement on site Parking shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Surface Parking**				
a. **Setbacks** Surface parking lots adjacent to public or private streets shall include a landscaped and irrigated setback a minimum of 5 feet in width measured from property line, or aligned with the building façade, whichever is greater.				
b. **Orientation** Surface parking lots shall be located at the rear, side, or internal lot lines and away from the front lot line.				
2. **Above-ground parking structures** Ground-floor parking shall be sited behind residential, office, or commercial spaces				
3. **Semi-subterranean parking** A semi-subterranean garage shall not extend beyond the building frontage line and shall not extend higher than 4 feet above sidewalk grade				
4. **Subterranean parking** A subterranean parking structure may extend to all property lines.				
5. **Private residential garages** Each private garage must have vehicular access from an alley, side street, or motor court.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
B. Surface parking lot design: Surface parking lots shall be designed in compliance with the applicable standards contained in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code, except as modified by the following:				
1. **Screening**				
a. **Street-adjacent parking lots**				
i. A street-adjacent surface parking lot shall be screened from view by a low wall or hedge no higher than 3 feet in height. Walls and hedges must be a minimum 18 inches from the back of the sidewalk.				
ii. Walls and hedges must be a minimum 18 inches from the back of the sidewalk				
iii. Landscaped berms are prohibited				
b. **Neighboring parcels** Views from neighboring properties shall be screened with trees and shrubs.				
2. **Landscape** Landscaping materials shall be applied in compliance with the applicable objective parking lot landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).				
3. **Shade structures** Shade structures, if used, shall match the architectural style of the project buildings				
C. Parking court design				
1. **Design standards**				
a. The width of the parking court, when measured from 1 building face to the other, shall not exceed 100 feet				
b. The parking court shall consist of only **1** parking bay, and this bay shall not exceed a maximum width of 62 feet.				
c. On both sides of the parking court, sidewalks must be established, each with a minimum width of 15 feet. These sidewalks must connect with the adjacent public sidewalk network.				
D. Parking structure design				
1. **Context-sensitive façade design** Parking structure façades shall incorporate a minimum **2** design elements using the architectural styles identified in Chapter 4: Architectural styles and adhere to Main Street or Urban and facade design standards applied in 3 Building Types.				
2. **Parking structure standards**				
a. Any driveway providing access to a parking structure shall have a minimum width of 28 feet. Single openings shall be no wider than 14 feet.				
b. Parked vehicles shall be shielded from view from adjoining streets				
c. The exterior elevations of parking structures facing a public street shall incorporate architectural elements from the project building.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
d. Vehicular entries shall be located a minimum 50 feet from the corner of a block				
e. Signs as shall be consistent with Division 8: Sign Regulations of Ontario Development Code.				
3.1.4 Open Space Standards				
A. Common open space and public frontage				
1. **Common open space type requirements** Common open space shall cover a minimum of 15 percent of the total lot area with the following **exceptions**:				
a. **Close to parks** Common on-site open space shall not be required for lots within a 1/4-mile of an existing park or plaza a minimum 0.25 acres in size.				
b. **Common open space types** At least **1** or more of the common on-site open space types listed under "Common Open Space Types" shall be provided on each lot that has a residential use.				
2. **Access and visibility** At-grade open space shall be accessible and visible from the adjacent ground floor				
B. Common open space and public frontage				
Forecourt				
1. **Design standards**				
a. A forecourt may occur on any floor and may be used as an allowed method of creating façade massing increments.				
b. Minimum dimensions. Forecourts shall be a minimum of 15 feet by 15 feet				
Side garden				
1. **Design standards**				
a. Minimum side garden dimensions: 15 feet by 15 feet				
b. Dooryards, porches, stoops, and architectural elements may encroach into the side garden as follows:				
i. Up to a total of 30 percent of the side garden's width or length				
ii. A ground-floor encroaching element shall be allowed to project a maximum of 8 feet into the side garden.				
Court				
1. **Design standards**				
a. **Minimum dimensions:** All courts shall be a minimum of 20 feet by 30 feet				
b. **Enclosure**				
i. A court shall have building walls on a minimum 2 sides, while the third and fourth side can be defined by				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
architectural or landscape elements (i.e., low walls, trellises, hedges, or rows of trees).				
ii. A driveway located adjacent to a court shall be screened by architectural elements (e.g., low walls or trellises, hedges, or rows of trees).				
c. **Access**				
i. Courts shall be accessed from the street or walkway				
ii. Units shall be allowed to take direct access through a court				
d. **Encroachments**				
i. Dooryards, porches, stoops, and architectural elements may encroach into the Side Yard.				
ii. A ground floor encroaching element shall not encroach beyond 8 feet of the building's façade into the court.				
e. **Common area** A court shall serve as communal spaces and pedestrian access				
f. **Amenities** A court shall include a minimum **1** of the following amenities: a seating area, a fountain, a BBQ island, or an outdoor fireplace.				
Passage				
1. **Design standards.**				
a. **Location** Passages shall be provided between buildings or side gardens.				
b. **Size** Passages shall be a minimum width of 8 feet with minimum of 2 feet of landscape strip on each side.				
C. Private Open Space				
1. **General standards**				
a. A minimum 60 square feet of private open space shall be provided for each residential unit and a minimum **1** of the private on-site open space types shall be provided.				
b. **Exception:** Private on-site open space shall not be required for a project site that is located within 1/4-mile distance of an existing park or plaza that is a minimum 0.25 acres in size.				
D. Private Open Space Types				
Private roof deck				
1. **Description** A private open space located on the roof of a building dedicated to a single unit.				
2. **Design standards**				
a. Minimum dimensions of 7 feet by 7 feet				
b. Materials, finishes, fixtures, and colors visible from the street shall be designed consistent with the architectural style of the building.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
Backyard				
1. **Description** A private, landscaped open space located behind each individual unit that is intended to provide passive or active outdoor space for the users of the unit.				
2. **Design standards**				
a. Backyards are located behind the unit				
b. Size. Minimum dimensions of 20 feet by 15 feet				
c. Encroachments. Encroachment into the backyard is allowed up to 30% of the space's width and/or length.				
d. Maximum projection for any ground floor element is 8 feet, with a 10-foot upper floor setback from property line if there's usable space above the first floor.				
Architectural façade elements as private open space				
1. **Description** The following elements defined in Section 2.3 Architectural Façade Elements may be used to meet on-site private open space requirements.				
a. Balcony				
b. Terrace Balcony				
Entry elements as private open space				
1. **Description** The following elements defined in Section 2.4 Entry Elements may be used to meet on-site private open space requirements.				
a. Dooryard				
b. Porch				
3.1.5 Landscaping				
1. **General to all** Landscaping materials shall be applied in compliance with the applicable landscape standards contained in Ontario Development Code Section 6.05.030 (Required Landscape Areas).				
2. **Paths** Where front yards are landscaped, individual paths to sidewalk shall be provided for each entrance.				
3. **Materials** Decorative accents. Paving materials shall incorporate decorative elements consistent with the architectural style of the building.				
3.1.6 Fences and Walls				
1. **Fence and wall heights** Walls and fences shall be designed in compliance with the applicable standards contained in

a. **Ground Floor** **Non-residential** – 15 feet **Residential** – 10 feet				
b. **Upper and Sub Levels –** 9 feet				
13. **Minimum Setback from Major Pipelines –** 50 feet (to habitable structures) *(refer to Note 6 – Table 3.01)*				
3.2.1 Height Standards				
1. **Height transition zones** Requires all new buildings within 100 feet of less intense development patterns (existing or planned) to reduce heights to ensure neighborhood compatibility.				
2. **Vertical mixed use development types** The following height limits shall apply to all proposed multiple family development types.				
a. Buildings within 100 feet of single-family residential dwellings must not exceed 35 feet or the height of adjacent residential buildings.				
b. Buildings within 100 feet of undeveloped single-family zone parcels shall not exceed 35 feet in height.				
3.2.2 Ground Floor Building Frontage				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
1. **Mixed-Use development types.** The ground floor frontage for vertical mixed-use developments must be designed to accommodate commercial uses.				
3.2.3 Building Types				
Identify the suitable building type based on location, including:				
1. **"Main Street"** (applicable to mixed-use areas within the District Place type as shown on Policy Plan Exhibits LU-04 and CD-01).				
2. **"Urban"** (applicable to mixed-use areas outside the District Place type).				

(Table 3.2-2 Mixed-Use Building Types)

TOP Land Use Place type	Max Permitted Height	Building Types
Downtown	45 feet	Main Street
Airport Metro/Entertainment	120 feet	Main Street
Guasti	70 feet	Main Street
South Euclid	70 feet	Main Street
South Employment	70 feet	Main Street
East Holt Blvd	70 feet	Urban
Inland Empire Blvd	70 feet	Urban
Infill	50 feet	Urban
South of Riverside Drive	50 feet	Urban

A. Main Street Massing and Façade Design				
Massing increments				
1. **Element standards**				
a. Building Façade along font lot line (300 feet max)				
b. Building Façade alongside lot line (150 feet max)				
c. Space between buildings (0 feet min)				
d. Massing Increment (75 feet max)				

ODDS – Chapter 3

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
e. Height Difference between Massing Increments (3 feet min)				
f. Façade Break (10 feet x 10 feet min)				
g. Upper-Level Setback (15 feet min)				
2. **Massing standards**				
a. **Size of massing increments** Building facades that face public streets and are longer than 75 feet in length shall be divided into massing increments as follows:				
i. The maximum length of a single massing increment shall not exceed 75 feet.				
ii. Single building projects less than 150 linear feet of street frontage shall have no massing increments applied.				
iii. Single building projects between 150 and 250 linear feet of street frontage shall have at minimum 2 massing increments separated by a façade break.				
iv. Single project buildings that have more than 250 linear feet of street frontage shall have 3 massing increments each separated by a façade break.				
b. **Required difference in facade height.** Adjacent massing increments must vary in façade height measured from the sidewalk to the eave, cornice, or parapet, using a minimum **1** massing strategy:				
i. Vary number of stories				
ii. Vary the parapet height by a minimum of 3 feet				
iii. Incorporate tower element				
iv. Set back upper floor(s) a minimum 15 feet				
c. **Articulation of massing increments.** Individual massing increments shall be differentiated from one another using **3** of the following architectural strategies:				
i. **Set façade increment back** Set the entire facade increment back a minimum of 3 feet.				
ii. **Base height** Vary the height of the building base of adjacent increments.				
iii. **Façade colors** Use different facade materials and/or colors.				
iv. Window type/configuration. Use different window types, configurations, and/or frame colors.				
v. **Presence/arrangement of façade elements** Vary the presence or arrangement of façade elements such as projecting balconies, recessed balconies, trellises, chimneys, and awnings.				
d. **Self-contained massing increments** Facade elements, such as window openings and balconies, shall not overlap the division between massing increments.				
e. **Repeating massing increment design** A massing increment design may be repeated a maximum of 3 times on				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
the same project elevation. Repeated massing increments may not be located immediately adjacent to each other.				
Façade Composition				
1. **Facade composition standards**				
a. **Facade Grid** The window, door, and/or shopfront openings of each individual facade shall be organized into a grid as follows:				
i. **Horizontal alignment of elements** Rooflines, openings, and materials within each facade shall be aligned horizontally.				
ii. **Vertical Bays** The entirety of a building's façade shall be clearly divided into vertical bays.				
b. **Multi-story building façades** Multi-story building facades shall be designed to include a base, middle, and top.				
i. **Base** Building base of entire ground floor for buildings less than 5 stories or 25 feet for buildings 5 stories or more, shall use a minimum of 2 of the following strategies:				
(a) Provide a string course at the top of the first story;				
(b) Specify base materials different from rest of facade;				
(c) Specify base colors different from rest of facade;				
(d) Provide a ground floor Arcade or Gallery per (Section 3.2 Architectural Façade Elements).				
ii. **Middle** The middle of the building—the facade of all floors located above the base—shall be designed as follows:				
(a) Window and door openings shall be organized in bays per the façade fenestration standards of this section.				
(b) If provided, attached façade elements such as balconies, bay windows, and projecting rooms, shall be designed per the façade fenestration standards of this section.				
iii. **Top** The façade elements that define the upper limits of the building—shall be designed as follows:				
(a) The top of the building facade shall incorporate capping elements, such as a cornice, enhanced ornamentation, or a decorative parapet.				
Fenestration Design				
1. **Façade fenestration standards**				
a. **Minimum Fenestration.** Facade designs shall include a minimum percentage of fenestration calculated as the total percentage of window and door area divided by the total area of that portion of the façade:				
i. **Ground Floor:** 70% minimum				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
ii. **Upper Floors:** 15% minimum				
2. **General to all floors.** All window jambs/frames shall be set back a minimum of 2 inches back from the facade plane.				
3. **Specific to ground floors** Structural elements shall be visible on the exterior of ground floor facades to visually convey that the upper floors are supported.				
a. **Ground floor windowsills** Facades along the front lot line that face public streets shall be no higher than 3 feet above the adjacent grade.				
b. **Ground floor bathroom windows** Prohibited on facades that face front streets.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
B. Urban massing and façade design				
1. **Urban massing and façade design** standards are required for all multiple-family developments projects with 25 du/ac or more.				
Massing increments				
1. **Massing Standards**				
a. Building Façade along font lot line (400 feet max)				
b. Massing Increment (150 feet max)				
c. Space between buildings (0 feet min)				
d. Façade Setback (if elected) (10 feet x 10 feet minimum)				
e. Building base height (15 feet min)				
f. Building façade alongside lot line (200 feet max).				
g. Height difference between massing Increments (3 feet min)				
h. Upper-level setback from façade (15 feet min)				
2. **Size of massing increments** Building facades along front and side lot lines that face public streets and are longer than 100 feet shall be divided into massing increments as follows:				
a. The maximum length of a single massing increment shall not exceed 150 feet				
b. A minimum of **2** distinct massing increments shall be provided				
3. **Articulation of massing increments** Individual massing increments shall be differentiated from one another using a minimum **1** of the following massing strategies:				
a. Vary parapet height by a minimum of 3 feet				
b. Increase number of stories				
c. Set back upper floor. Set the upper floor or multiple upper floors back a minimum of 15 feet from the facade				
d. Set the entire facade back a minimum of 10 feet for 20 feet				
e. Incorporate tower element				
4. **Massing increments with distinct facades** Massing increments that have distinct facades and shall appear as distinct buildings.				
a. **Repeating massing increment design** A massing increment design may be repeated on the same project				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
elevation. Repeated massing increments shall be separated by a distinct massing increment.				
Façade Composition				
1. **Façade Composition Standards.**				
2. **Multi-story building façades. The building facade shall be divided into a base and body as follows:**				
a. **Base** Separate the building base (entire ground floor facade or first 2 floors of building's 5 stories or taller) from the rest of the facade for a minimum of 15 feet (fewer than 5 stories) or 25 feet (5 stories or more) from grade, using a minimum **2** of the following strategies:				
i. Provide a string course at the top of the first story.				
ii. Specify base materials different from rest of façade.				
iii. Specify base colors different from rest of façade.				
iv. Provide a ground floor Arcade or Gallery per Section 2.3 Architectural Façade Elements.				
b. **Body** The body of the building consists of the facade of all floors located above the base and shall be designed as follows:				
i. Windows shall be organized in bays, bands, curtain wall, and grid of windows consistent with the Facade Fenestration Standards for the Urban massing type.				
ii. Each massing increment must contain its entire facade composition without elements overlapping the division between increments.				
c. **Strategies** The listed strategies show acceptable ways to differentiate massing increments:				
i. Vary the height of the building body.				
ii. Use different facade materials and/or colors.				
iii. Use different window types/configurations.				
iv. Diversify facade elements, including projecting balconies, recessed balconies, canopies, and awnings.				
Fenestration design Fenestration design addresses the percentage of window and door openings for ground floors and upper floors and glazing transparency.				
1. **Façade fenestration standards**				
a. **Minimum fenestration** Facade designs must meet a minimum fenestration percentage, calculated as the total window and door area divided by the total area of that part of the façade.				
i. **Ground floor**				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
(a) Front lot line: 70% minimum.				
(b) All other frontages: 50% minimum.				
(c) Ground floor windowsills on facades along the front lot line shall be no higher than 3 feet above the adjacent grade.				
(d) Ground floor bathroom windows are prohibited on facades that face front lot line.				
ii. **Upper floors.** 15% minimum.				
3.2.4 Material and Detailing				
A. Building Materials				
1. **Prohibited materials**				
a. Fiberglass or plastic (false) architectural or facade elements or ornamentations.				
b. Rough-cast and sand-finishes are prohibited on all building surfaces that are visible from a street.				
c. Reflective materials, such as mirrored glass, shiny metal, and chrome are allowed with the following **exception**:				
i. Application to small areas (up to 50 sq ft or 2% of façade area, whichever is less) for signage highlighting, ensuring no glare nuisance to traffic, pedestrians, or neighboring buildings.				
2. **Combining materials** When combining **2** or more wall materials on **1** facade:				
a. Place lighter weight materials above more substantial ones (e.g., glass above wood, wood above stucco, stucco above masonry).				
b. Vertical joints between different materials shall only occur at inside corners.				
B. Windows and Doors				
1. **Material and types**				
a. **Window recess** Windows shall be recessed in a manner that is specific to each building's architectural style but shall be no less than 2 inches for any style.				
b. **Architectural style of detailing** Windows, doors, frames, colors, and styles shall be appropriate to the building's architectural style in terms of window type, proportion, and color.				
c. **Materials** Windows and doors shall be made of wood, fiberglass, fiberglass-clad wood, aluminum clad wood, or metal.				
d. **Glazing** Glazing shall be clear glass with no more than ten percent daylight reduction (tinting). Reflective (mirrored) glazing is prohibited.				
e. **Residential buildings** The following are applicable to multiple-family development types.				
i. Vinyl or vinyl clad windows shall resemble wood windows (i.e., faux wood or engineered wood) in detailing				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
and profile thickness and employ muted patterns and colors consistent with the building's architectural style.				
ii. Nail-on windows that are deeply set within their frame are permitted.				
iii. Muntins shall be of a substantial dimension (e.g., not flat) and shall be placed on the exterior of windows.				
i. Trim:				
(a) **Window and door trim materials** Wood or cement fiber board. Foam trim around windows is allowed. Foam trim around doors is prohibited.				
(b) **Building trim materials** Wood, stone, cast stone, pre-cast concrete, glass fiber reinforced concrete, and cement fiber board.				
3.3. Architectural Façade Elements				
3.3.1 Arcade				
1. **Element standards**				
a. **Depth**				
Minimum - 12 Feet				
Maximum - 16 Feet				
b. **Distance from property line** - 0 Feet				
c. **Open height, clear** – refer to Design standards below				
d. **Overall height** - refer to Design standards below				
2. **Design standards**				
a. **Projection depth** The arcade projection depth from the ground floor facade shall be no greater than the height of the arcade opening.				
b. **Sidewalk depth beneath arcade** The covered sidewalk under the arcade shall be a minimum of 10 feet wide from the inside of the vertical support to the ground floor building face.				
c. **Entry element requirement** Arcades shall be combined with Shopfronts (defined in *Section 3.4 Entry Elements*).				
d. **Minimum openings and massing increments** Arcades shall be a minimum of 3 openings wide. The location where an arcade stops or changes in design or dimensions shall correspond to a change in massing increment (*Section 3.2.3. Massing and Façade Design*) for massing increment requirements.				
e. **Vertical supports** Vertical supports may be piers, columns, or arches. The width of a vertical support shall not exceed 3 feet.				
f. **Width of openings** The openings between vertical supports, as seen from the street, shall be taller than they are wide.				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
g. **Shape and cadence of openings** Openings, whether rectangular or arched, must align with facade bays if present (vertical bays are mandatory for Main Street standards and optional for other massing types in *Section 3.2.3. Massing and Façade Design*).				
h. **Vertical clearance** The minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets, spandrels, and/or lower portions of arches.				
i. **Arcade height relative to interior building floor height** The height of the soffit inside the arcade shall be no less than the height of the ceiling of the floor to which it corresponds.				
j. **Architectural style** Arcade detailing, including lighting, shall utilize the architectural style of the building.				
3.3.2 Gallery				
1. **Element standards**				
a. **Depth**, clear				
Minimum - 10 Feet				
Maximum - 16 Feet				
b. **Distance from property line**, clear				
Minimum - 0 Feet				
Maximum - 5 Feet				
c. **Overall Height,** clear				
Minimum - 12 Feet				
Maximum - 2 Floors				
d. **Overall height** - refer to Design standards below				
2. **Design standards**				
a. **Projection depth** Gallery projection depth from the ground floor facade shall be no greater than the height of the gallery opening.				
b. **Sidewalk depth beneath gallery** Covered sidewalk width under the gallery must be a minimum of 10 feet from the inside of the vertical support to the ground floor building face.				
c. **Minimum openings and massing increments** Galleries shall be a minimum of 3 openings wide. The location where a gallery stops or changes in design or dimensions shall correspond to a change in massing increment (see Section 3.2.3. Massing and Façade Design).				
d. **Vertical supports** Vertical supports may be piers or columns. The width of a vertical support shall not exceed 1				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
foot.				
e. **Width of openings** Openings between vertical supports, as seen from the street, shall be taller than they are wide.				
f. **Shape and cadence of openings** Openings may be rectangular but shall not be arched.				
g. **Vertical clearance** Minimum vertical clearance at each opening shall be a minimum of 12 feet, excluding decorative brackets and spandrels.				
h. **Gallery height relative to interior building floor height** Height of the soffit inside the gallery shall be no less than the height of the ceiling of the floor to which it corresponds.				
i. **Vertical alignment** Galleries may be single or double-story and shall correlate with building floors .				
j. **Architectural style** Gallery detailing, including lighting shall utilize the architectural style of the building.				
3.3.3 Commercial Awning				
1. **Element standards**				
a. **Depth**				
Minimum – 4 Feet				
Maximum - Not applicable				
b. **Clearance above sidewalk**				
Minimum – 8 Feet				
Maximum – Not applicable				
c. **Length**				
Minimum - refer to Design standards below				
Maximum - refer to Design standards below				
2. **Design standards**				
a. **Encroachment** Commercial awnings may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Material** Commercial awnings shall be of a simple shed form, made of code- compliant fire-resistant canvas.				
c. **Width** Awning widths shall equal in size to shopfront opening widths.				
d. **Prohibited lighting** Internally illuminated and back-lit awnings and any associated light diffusers are prohibited.				
3.3.4 Commercial canopy				
1. **Element standards**				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
a. **Depth**				
Minimum – Not applicable				
Maximum - 3 Feet				
b. **Minimum clearance above ground**				
Minimum – Not applicable				
Maximum – 12 Feet				
c. **Length of terrace**				
Minimum - Not applicable				
Maximum – 150 Feet				
2. **Design standards**				
a. **Encroachment** Commercial canopies may encroach into the setback or public right-of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Form and material** Canopies shall be of a simple form, made of metal and/or glass.				
c. **Support.** Canopies shall be supported either from below by metal brackets, or from above by rods and wires that affix to the wall.				
d. **Width** Canopies may extend across multiple storefronts.				
3.3.5 Awning				
1. **Element standards**				
a. **Depth**				
Minimum – Not Applicable				
Maximum - 3 Feet				
b. **Clearance above ground**				
Minimum – 8 Feet				
Maximum – Not Applicable				
c. **Length**				
Minimum - refer to Design standards below				
Maximum - refer to Design standards below				
2. **Design standards**				

3.0 Mixed Use Design Standards

	Applicant		City

a. **Encroachment** Residential awnings may encroach into the setback or public right- of- way as defined in Division 6.01.010(D)(2): Encroachments into Required Setback Areas of the Ontario Development Code.				
b. **Material** Residential awnings shall be of a simple shed form, made of code- compliant fire-resistant.				
c. **Upper floors** Each individual awning shall cover no more than 1 window opening.				
3.3.6 Canopy				
1. **Element standards**				
a. **Depth**				
Minimum – Not Applicable				
Maximum - 3 Feet				
b. **Minimum clearance from landing**				
Minimum – 7 Feet				
Maximum – 8 Feet				
c. **Length of terrace**				
Minimum - Not Applicable				
Maximum - 8 Feet				
2. **Design standards**				
a. **Material** Canopies shall be of a simple form, made of metal and/or glass.				
b. **Support** Canopies shall be supported either from below by metal brackets, or from above by rods or wires that affix to the wall.				
c. **Upper floors** Each individual canopy shall cover no more than 1 window opening.				
3.4. Entry Elements				
3.4.1 Shopfront				
1. **Element standards**				
a. **Height to top of transom**				
Minimum – 12 Feet				
Maximum - 16 Feet				
b. **Height to bottom of canopy/awning**				
Minimum – 8 Feet				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
Maximum – 10 Feet				
c. **Width of each shopfront bay**				
Minimum - 10 Feet				
Maximum - 25 Feet				
d. **Height of shopfront base**				
Minimum - 1 Foot				
Maximum - 3 Feet				
e. **Awning/Canopy Depth**				
Minimum - 4 Feet				
Maximum - Not Applicable				
2. **Design standards**				
a. **Vertical bays** Shopfront openings must align into bays, following the vertical bay specifications in *Section 3.2.3. Massing and Façade Design* of main street standards.				
b. **Architectural façade elements**				
i. Shopfronts in vertical mixed-use buildings may integrate with Galleries or Arcades.				
ii. **Visibility** Windowsills in non-entry bays shall not exceed 2 feet above grade.				
c. **Setback use and design** Recessed shopfronts without dooryard, terrace, or porch designs shall extend to the property line.				
3.4.2 Lobby Entry				
1. **Element standards**				
a. **Height to top of transom**				
Minimum – 10 Feet				
Maximum - 20 Feet				
b. **Height to bottom of canopy/awning**				
Minimum – 8 Feet				
Maximum – Not Applicable				
c. **Distance to property line**				
Minimum - Not Applicable				
Maximum - 20 Feet				

3.0 Mixed Use Design Standards

	Applicant		City	
	Done	N/A	Done	N/A
d. **Awning/Canopy Depth**				
Minimum - 4 Feet				
Maximum - Not Applicable				
2. **Design standards**				
a. **Lobby entries** shall be visible and distinguishable from adjacent ground floor units and include a minimum of **1** of the following design strategies:				
i. Center placement for symmetry				
ii. Prominent corner location				
iii. Incorporate 2 architectural elements (columns, overhanging roofs, canopies, awnings, or ornamental light fixtures)				
iv. Recessed entry				
v. Entry framing				
b. **Main Street massing types**				
i. Lobby entries shall not exceed 20% of the frontage length				
ii. Allocate the remaining length to shopfronts				
c. **Visibility** Lobbies entries shall be visible from the public right of way as follows:				
i. Windowsills shall be no higher than 2 feet above adjacent grade				
ii. Internal shade devices such as blinds, shades, or curtains are prohibited				
d. **Forecourt** may be introduced to provide a transition between the entry and sidewalk (forecourt standards are discussed in Section 3.1.5 Open Space Standards).

4.1 Mission – Spanish Colonial Revival				
4.1.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Asymmetrical façade/elevations				
b. Three or more roof planes.				
c. A minimum of 50 percent of the units shall have balconies or window treatments (such as shutters or awnings)				
d. Entrances are recessed a minimum 12 inches				
e. Additional details for projects over 4 stories, vertical mixed use, or with more than 15 buildings (requires 2 details):				
i. Include 2 add-on projections such as verandas, arcades, balconies, and exterior stairs				
ii. The ends of building massing's shall be stepped down				
iii. One focal point, such as courtyard, tower, or fountain				
iv. Apply wingwalls or columns on the ground level				
4.1.2 Roof				
1. **Roof design (Apply all)**				
a. Low-pitched (4:12 maximum) cross- or side-gabled roofs. The pitch shall remain constant except for a veranda or arcade.				
b. Red, fired, clay tile roofs. Tile types include both Spanish (S-shaped) and Mission (half-cylinder)				
c. Hipped roofs shall only be used in combination with gables or on a tower element				
d. Shed roofs are only used in conjunction with verandas				
e. When a flat roof is used, it shall be screened by a parapet that is an extension of the wall plane or by a modified Mansard roof				
4.1.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Roof tiles shall use terracotta, brown earth tones, or rustic red color palettes.				
b. White, cream, or tan stucco wall with smooth (20/30) textured finish (i.e., hand troweled)				
c. Wood shall be used as secondary wall material for the following and similar elements:				
i. Posts and exposed beams				
ii. Railing, spindles, and grille work				

ODDS – Chapter 4

4.1 Mission – Spanish Colonial Revival				
iii. Shutters, window frames, and doors				
d. If windows have shutters, the shutters' color shall match the accent color that is used for doors or decorative trim				
e. A minimum of 1 wrought-iron element (such as railings, hardware, and gates) shall be used				
4.1.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Accent windows shall be a minimum of 20 percent of the total windows				
b. The primary facade shall include a minimum of 1 arched element				
c. A minimum of 50 percent of the windows shall be casement windows				
d. All entrance-door surrounds shall be banded with ceramic tile, molded plaster, or painted accents				
e. All casement windows and double-hung windows shall have wood frames				
f. Eighty percent of the windows shall have window muntins				
4.1.5 Decorative Details				
1. **Decorative details**				
a. All residential projects shall provide **a minimum of 4** of the following, and				
b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following				
i. Entry/front porch or patio				
ii. Decorative tiles				
iii. Clay tile vents				
iv. Wrought-iron balcony railings or support brackets				
v. Dark-metal light fixture and hardwires				
vi. Paired wood (or wood simulated) garage doors with iron hardware				
vii. Verandas, pergolas, or arcades				
viii. Exterior stairs				
ix. Awnings with metal spear supports

1. **Façade design (Apply all)**				
a. Asymmetrical facades/elevations				
b. Simple, rectangular form				
c. Symmetrical placement of piers, columns, ground-floor storefronts, and openings on upper levels				
d. Transparent windows and doorways shall be no less than 80 percent of the street frontage at the ground level				
e. Multistory facades are divided into base, body, and top, with the ground floor taller than the upper floors				
f. Columns or lintels over openings				
g. Bases are articulated by changes in material or changes in wall plane				
h. Minimal projections or recessions on wall plane				
4.3.2 Roof				
1. **Roof design (Apply all)**				
a. Flat roof				
b. A projecting cornice or a receding, stepped parapet				
c. Cornice and details mimic and reference historical detailing				
d. Street-facing gable roof with roof pitches at minimum 5:12 unless concealed behind a parapet				
4.3.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Walls shall be composed of brick.				
b. Decorative moldings, cornices, or an applied ornament of stone or cast concrete shall be used.				
c. No more than 3 colors shall be used on any given facade.				
d. Stucco and clapboard is prohibited.				
4.3.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Ground-floor windows and doors shall be large and expansive with a transom.				
b. Upper-floor windows shall be double-hung vertically and grouped with a rhythm consistent with the major storefront openings below.				

ODDS – Chapter 4

Architectural Styles	Applicant		City	
	Done	N/A	Done	N/A
c. Entrance shall have higher bays, recessed entries by a minimum of 3 feet, or different color/materials				
d. Upper-floor windows shall have window lintel and sill				
e. Transom windows above the doors and windows on the ground level				
f. Fifty percent of windows shall have muntins				
g. Upper floor windows shall have a minimum 2-inch recess				
4.3.5 Decorative Details				
1. **Decorative details**				
a. All residential projects shall provide **a minimum of 4** of the following, and				
b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:				
i. Awnings, canopies, and second-floor balconies				
ii. Pedimented windows				
iii. Wide window trim with a keystone				
iv. Double-bracketed cornice				
v. Gable roof				
vi. Roof finial				
vii. Transom above door and windows on the ground level				
viii. Metal balcony railing				
ix. Canopy or awning				
x. Recessed entries				
xi. Cast-iron columns				
xii. Shopfront millwork

4.4 Tuscan				
4.4.1 Form and Massing				
1. **Façade design (Apply all)**				
a. Asymmetrical arrangement of windows and design elements along front lot line				
b. Porches, porticoes and/or Juliet balconies				
c. Recessed entries (a minimum of 3 feet)				
4.4.2 Roof				
1. **Roof design (Apply all)**				
a. Flat or low-pitched hip or gable roof (maximum 6:12 slope)				
b. Red-toned clay tiles				
c. Multiple roof levels (at minimum 3)				
d. Large overhanging eaves (minimum 12 inches) along primary elevation				
4.4.3 Materials and Color				
1. **Materials and colors (Apply all)**				
a. Incorporate rough-hewn stone as accent feature				
b. Flat stucco walls in light earth tones				
c. Use of earth-toned color palette				
d. Brown or beige window frames				
4.4.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Single- or double-hung windows shall be more horizontal in proportion, with six-over- six muntin patterns and 5½-inch-wide trim				
b. Casement windows shall be paired with four-pane patterns for smaller windows and eight-pane patterns for larger windows				
c. Vertically oriented rectangular or arched windows arranged in asymmetrical patterns				
d. Casement or double-hung sash with flat or arched lintels				
e. Windows shall be recessed 3 to 12 inches

4.6.4 Doors and Windows				
1. **Door and windows (Apply all)**				
a. Windows shall be double-hung with a proportion of 2 or 2½ times taller than wide				
b. Groupings of 2 or 3 double-hung window units				
c. Multi-paned windows				
d. Accent trim around window and door openings				
e. Double-hung or casement windows				
4.6.5 Decorative Details				
1. **Decorative details**				
a. All residential projects shall provide **a minimum of 4** of the following, and				
b. Residential projects 4 stories and taller, mixed-use projects, or projects with more than 15 buildings shall provide **a minimum of 6** of the following:				
i. Wide front porch with simple columns				
ii. Covered patio				
iii. Shed or gabled dormers				
iv. Carriage-style garage doors				
v. Dark shutters and window sashe				
vi. Gable brackets, vents, and trim				
vii. Iron-inspired barn-style lighting				
viii. Metal awnings without sides				
ix. Gooseneck light fixtures at the entrance				
x. Large doors and windows to maximize natural light				
xi. Multi-paned windows on the ground-level windows and doors				

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **PUBLIC HEARINGS**
Department: Planning Prepared By: Thomas Grahn Department: Prepared By: Thomas Grahn Staff Member Presenting: Rudy Zeledon, Executive Director Community Development Reviewed By: Kimberly Ruddins, Henry Noh, Rudy Zeledon Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 18

SUBJECT: **A PUBLIC HEARING TO CONSIDER AN ORDINANCE APPROVING A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-004, REGARDING ACCESSORY DWELLING UNITS AND JUNIOR ACCESSORY DWELLING UNITS**

RECOMMENDATION:

That the City Council open the public hearing, receive public testimony, close the public hearing, and by motion:

A. Find that the adoption of the proposed Ordinance is statutorily exempt from review under the California Environmental Quality Act ("CEQA") under Public Resources Code section 21080.17; and
B. Consider and adopt an Ordinance upholding the recommendation of the Planning Commission approving the Development Code Amendment (File No. PDCA24-004), pursuant to the facts and reasons contained in the staff report and Ordinance.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner

FISCAL IMPACT: There is not a direct fiscal impact associated with this action.

BACKGROUND & ANALYSIS: On February 18, 2025, the City Council adopted an Urgency Ordinance revising and clarifying certain provisions of Chapter 5.0 (Zoning and Land Use) of the Development Code regarding Accessory Dwelling Units (ADU) and Junior Accessory Dwelling Units (JADU) to comply with recent changes in State Law imposed by Assembly Bill 2533 (AB 2533) and Senate Bill 1211 (SB 1211). On February 25, 2025, the Planning Commission adopted a Resolution recommending the City Council adopt an Ordinance revising and clarifying those same provisions of Chapter 5.0 (Zoning and Land Use) of the Development Code regarding ADUs and JADUs to

comply with recent changes in State Law imposed by AB 2533 and SB 1211. The proposed Ordinance will amend Division 5.03 - Supplemental Land Use Regulations, Section 5.03.010 (Accessory Dwelling Units) of the City's Development Code to comply with recent changes to state law that impose new limits on local authority to regulate Accessory Dwelling Units ("ADUs") and Junior Accessory Dwelling Units ("JADUs"). Both AB 2533 and SB 1211 took effect January 1, 2025. To remain valid, the City's ADU Ordinance must comply with requirements imposed by AB 2533 and SB 1211. Adopting the proposed Ordinance ensures that the City's ADU Ordinance will be valid under AB 2533 and SB 1211.

PROJECT ANALYSIS: In recent years, the California Legislature has approved, and the Governor has signed into law, a number of bills that, among other things, amended various sections of the Government Code to impose new limits on local authority to regulate ADUs and JADUs. In 2024, the California Legislature approved, and the Governor signed into law, two new bills — AB 2533 and SB 1211 — that further amend state ADU law as summarized below.

AB 2533 – Unpermitted ADUs and JADUs

Subject to limited exceptions, existing state law prohibits a city from denying a permit to legalize an unpermitted ADU that was constructed before January 1, 2018, if the denial is based on the ADU not complying with applicable building, state, or local ADU standards. One exception allows a city to deny a permit to legalize if the city makes a written finding that correcting the violation is necessary to protect the health and safety of the public or the occupants of the structure.

AB 2533 changes this by: (1) expanding the above prohibition to also include JADUs; (2) moving the construction-cutoff date from January 1, 2018, to January 1, 2020; and (3) replacing the above exception with a requirement that local agencies find that correcting the violation is necessary to comply with the standards specified in Health and Safety Code section 17920.3 (Substandard Buildings). (See amended Gov. Code, § 66332(a)–(f)).

SB 1211 – Replacement Parking Requirements; Multifamily ADUs

Replacement Parking

Existing state law prohibits the City from requiring off-street parking spaces to be replaced when a garage, carport, or covered parking structure is demolished in conjunction with the construction of, or conversion to, an ADU.

SB 1211 amends this prohibition to now also prohibit a city from requiring replacement parking when an uncovered parking space is demolished for or replaced with an ADU. (See amended Gov. Code, § 66314(d)(11).)

Multifamily ADUs

SB 1211 further defines *livable space* in connection with converted ADUs inside a multifamily dwelling structure. Existing state law requires the City to ministerially approve qualifying building-permit applications for ADUs within "portions of existing multifamily dwelling structures that are not used as livable space, including, but not limited to, storage rooms, boiler rooms, passageways, attics, basements, or garages ...." The term "livable space" is not defined by existing state ADU law.

SB 1211 changes this by adding a new definition: "'Livable space' means a space in a dwelling intended for human habitation, including living, sleeping, eating, cooking, or sanitation." (See amended Gov. Code, § 66313(e)).

SB 1211 also increases the number of detached ADUs that lots with an existing multifamily dwelling can have. Existing state law allows a lot with an existing or proposed multifamily dwelling to have up to two detached ADUs.

Under SB 1211, a lot with an *existing* multifamily dwelling can have up to eight detached ADUs, or as many detached ADUs as there are primary dwelling units on the lot, whichever is less. (See amended Gov. Code, § 66323(a)(4)(A)(ii).) SB 1211 does not alter the number of ADUs that a lot with a *proposed* multifamily dwelling can have — the limit remains at two. (See amended Gov. Code, § 66323(a)(4)).

ENVIRONMENTAL REVIEW: Under California Public Resources Code section 21080.17, CEQA does not apply to the adoption of an Ordinance by a city or county implementing the provisions of Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code, which is California's ADU law and which also regulates JADUs, as defined by section 66313. Therefore, the adoption of the proposed Ordinance is statutorily exempt from CEQA in that it implements state ADU law.

CITY OF ONTARIO PLANNING DEPARTMENT

PLANNING COMMISSION AGENDA REPORT

February 25, 2025

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Email: PlanningDirector@OntarioCA.gov

FILE NO.: PDCA24-004

SUBJECT: A public hearing to consider Development Code Amendment revising and clarifying certain provisions of Chapter 5.0 (Zoning and Land Use) of the Development Code regarding Accessory Dwelling Units and Junior Accessory Dwelling Units to comply with recent changes in State Law; and Finding the Action to be Statutorily Exempt from CEQA under Section 21080.17 of the Public Resources Code. **City Initiated. City Council action is required.**

RECOMMENDED ACTION: That the Planning Commission open the public hearing, receive public testimony, close the public hearing, and by motion:

(1) Find that the adoption of the proposed ordinance is statutorily exempt from review under the California Environmental Quality Act ("CEQA") under Public Resources Code section 21080.17; and

(2) Consider and adopt a Resolution recommending the City Council approve the Development Code Amendment (File No. PDCA24-004), pursuant to the facts and reasons contained in the staff report and Resolution.

PROJECT SETTING: The proposed Development Code Amendment is of citywide impact, affecting approximately 50 square miles (31,789 acres) of land, which is generally bordered by Benson Avenue and Euclid Avenue on the west; Interstate 10 Freeway, Eighth Street, and Fourth Street on the north; Etiwanda Avenue and Hamner Avenue on the east; and Merrill Avenue and the San Bernardino County/Riverside County boundary on the south. The City of Ontario is substantially built-out with a mix of residential, commercial, industrial, agricultural, airport, recreational, and institutional/public land uses. According to the latest US Census forecast, the City of Ontario's 2022 estimated population is 179,516 persons and in terms of population, is ranked the 26th largest city in the State and the 146th largest in the nation. Ontario's population has increased by 3.46 percent since the most recent census, which recorded a population of 175,265 in 2020.

BACKGROUND: On February 18, 2025, the City Council adopted an Urgency Ordinance revising and clarifying certain provisions of Chapter 5.0 (Zoning and Land Use) of the Development Code regarding Accessory Dwelling Units (ADU) and Junior Accessory Dwelling Units (JADU) to comply with recent changes in State Law imposed by Assembly Bill 2533 (AB 2533) and Senate Bill 1211 (SB 1211). Both AB 2533 and SB 1211 took effect

Case Planner:	Tom Grahn, Senior Planner
Planning Director Approval:

Hearing Body	*Date*	*Decision*	*Action*
PC	2/25/2025		Recommends
CC 1st reading	3/18/2025		Introduction
CC 2nd reading	4/1/2025		Final Action

January 1, 2025. To remain valid, the City's ADU Ordinance must comply with requirements imposed by AB 2533 and SB 1211. Adopting the proposed Resolution ensures that the City's ADU Ordinance will be valid under AB 2533 and SB 1211.

PROJECT ANALYSIS:

In recent years, the California Legislature has approved, and the Governor has signed into law, a number of bills that, among other things, amended various sections of the Government Code to impose new limits on local authority to regulate ADUs and JADUs. In 2024, the California Legislature approved, and the Governor signed into law, two new bills — AB 2533 and SB 1211 — that further amend state ADU law as summarized below.

AB 2533 – Unpermitted ADUs and JADUs

Subject to limited exceptions, existing state law prohibits a city from denying a permit to legalize an unpermitted ADU that was constructed before January 1, 2018, if the denial is based on the ADU not complying with applicable building, state, or local ADU standards. One exception allows a city to deny a permit to legalize if the city makes a written finding that correcting the violation is necessary to protect the health and safety of the public or the occupants of the structure.

AB 2533 changes this by: (1) expanding the above prohibition to also include JADUs; (2) moving the construction-cutoff date from January 1, 2018, to January 1, 2020; and (3) replacing the above exception with a requirement that local agencies find that correcting the violation is necessary to comply with the standards specified in Health and Safety Code section 17920.3 (Substandard Buildings). (See amended Gov. Code, § 66332(a)–(f).)

SB 1211 – Replacement Parking Requirements; Multifamily ADUs

Replacement Parking
Existing state law prohibits the City from requiring off-street parking spaces to be replaced when a garage, carport, or covered parking structure is demolished in conjunction with the construction of, or conversion to, an ADU.

SB 1211 amends this prohibition to now also prohibit a city from requiring replacement parking when an uncovered parking space is demolished for or replaced with an ADU. (See amended Gov. Code, § 66314(d)(11).)

Multifamily ADUs
SB 1211 further defines *livable space* in connection with converted ADUs inside a multifamily dwelling structure. Existing state law requires the City to ministerially approve qualifying building-permit applications for ADUs within "portions of existing multifamily dwelling structures that are not used as livable space, including, but not limited to,

storage rooms, boiler rooms, passageways, attics, basements, or garages ...." The term "livable space" is not defined by existing state ADU law.

SB 1211 changes this by adding a new definition: "'Livable space' means a space in a dwelling intended for human habitation, including living, sleeping, eating, cooking, or sanitation." (See amended Gov. Code, § 66313(e).)

SB 1211 also increases the number of detached ADUs that lots with an existing multifamily dwelling can have. Existing state law allows a lot with an existing or proposed multifamily dwelling to have up to two detached ADUs.

Under SB 1211, a lot with an *existing* multifamily dwelling can have up to eight detached ADUs, or as many detached ADUs as there are primary dwelling units on the lot, whichever is less. (See amended Gov. Code, § 66323(a)(4)(A)(ii).) SB 1211 does not alter the number of ADUs that a lot with a *proposed* multifamily dwelling can have — the limit remains at two. (See amended Gov. Code, § 66323(a)(4).)

PUBLIC NOTIFICATION: The number of owners to whom a public hearing notice would be mailed or delivered is greater than 1,000; therefore, pursuant to Development Code Section 2.03.010.C.2 and Government Code Section 65091(a)(4), in lieu of mailed or delivered notice, a display advertisement of at least 1/8 page was placed in a newspaper of general circulation in the City of Ontario (Inland Valley Daily Bulletin). Public hearing notification was published a minimum of 10 days in advance of the public hearing.

CORRESPONDENCE: As of the preparation of the Resolution, Planning Department staff has not received any written or verbal communications from the owners or occupants of properties surrounding the Project site or from the public in general, regarding the subject application.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670, et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) Ontario International Airport Land Use Compatibility Plan ("ONT ALUCP") — On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the projects, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including

[1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, Planning Commission has concluded that the proposed Development Code Amendment and Zone Change are consistent with the policies and criteria set forth within the ONT ALUCP.

(2) Chino Airport Land Use Compatibility Plan ("CNO ALUCP") — On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan. The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Development Code Amendment may affect certain land development criteria on certain properties located within the Airport Influence Area of Chino Airport, which have been evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As a result, the Planning Commission has concluded that the proposed Development Code Amendment and Zone Change are consistent with the policies and criteria set forth within the CNO ALUCP.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

  - G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan).

Land Use Element:

- Goal LU-1 Balance: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

  - LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.

Housing Element:

- Goal H-2 Housing Supply & Diversity: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

  - H-2.5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

- Goal H-5 Special Needs: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age, or other status.

  - H-5.2 Family Housing. We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation, and other amenities.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (general plan) component of The Ontario Plan, as the project furthers the purposes, principals, goals, and policies of the Housing Element.

ENVIRONMENTAL REVIEW: Under California Public Resources Code section 21080.17, CEQA does not apply to the adoption of an Ordinance by a city or county implementing

the provisions of Article 2 of Chapter 13 of Division 1 of Title 7 of the Government Code, which is California's ADU law and which also regulates JADUs, as defined by section 66313. Therefore, the adoption of the proposed Ordinance is statutorily exempt from CEQA in that it implements state ADU law.

RESOLUTION NO. PC25-015

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THAT THE CITY COUNCIL APPROVE A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-004, AMENDING DIVISION 5.03 & SUPPLEMENTAL LAND USE REGULATIONS, SECTION 5.03.010 OF THE CITY'S DEVELOPMENT CODE RELATING TO ACCESSORY DWELLING UNITS AND JUNIOR ACCESSORY DWELLING UNITS IN THE CITY, AND FINDING THE ACTION TO BE STATUTORILY EXEMPT FROM CEQA UNDER PUBLIC RESOURCES CODE § 21080.17, AND MAKING FINDINGS IN SUPPORT THEREOF.

WHEREAS, THE CITY OF ONTARIO ("Applicant") has initiated an Application for the approval of a Development Code Amendment, File No. PDCA24-004, as described title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the City of Ontario Development Code (Ontario Municipal Code Title 9) provides the legislative framework for the implementation of The Ontario Plan, which establishes long term principals, goals, and policies for guiding the growth and development of the City in a manner that achieves Ontario's vision, and promotes and protects the public health, safety, comfort, convenience, prosperity, and welfare of its citizens; and

WHEREAS, the Development Code Amendment is of citywide impact, affecting approximately 50 square miles (31,789 acres) of land, which is generally bordered by Benson Avenue and Euclid Avenue on the west; Interstate 10 Freeway, Eighth Street, and Fourth Street on the north; Etiwanda Avenue and Hamner Avenue on the east; and Merrill Avenue and the San Bernardino County/Riverside County boundary on the south; and

WHEREAS, the Planning and Zoning Law authorizes cities to act by Ordinance to provide for the creation and regulation of accessory dwelling units ("ADUs") and junior accessory dwelling units ("JADUs"); and

WHEREAS, in recent years, the California Legislature has approved, and the Governor has signed into law, a number of bills that, among other things, amend various sections of the Government Code to impose new limits on local authority to regulate ADUs and JADUs; and

WHEREAS, in 2024, the California Legislature approved, and the Governor signed into law, Assembly Bill 2533 ("AB 2533") and Senate Bill 1211 ("SB 1211"), which further amend state ADU law; and

WHEREAS, AB 2533 and SB 1211 took effect on January 1, 2025, and for the City's ADU ordinance to remain valid, it must be amended to reflect the requirements of AB 2533 and SB 1211; and

WHEREAS, the City desires to amend its local regulatory scheme for the construction of ADUs and JADUs to reflect AB 2533's and SB 1211's changes to state law; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendation to the City Council on the subject Application; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on February 25, 2025, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Incorporation***. The recitals above are true and correct and are each incorporated by reference and adopted as findings by the Planning Commission.

SECTION 2: ***Environmental Determination and Findings.*** The Planning Commission recommends that the City Council find that, under California Public Resources Code section 21080.17, the California Environmental Quality Act ("CEQA") does not apply to the adoption of an Ordinance by a city or county implementing the provisions of Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code, which is California's ADU law and which also regulates JADUs, as defined by section 66313. Therefore, adoption of the proposed Ordinance is statutorily exempt from CEQA in that it implements state ADU law.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan.

SECTION 4: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670, et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission, therefore, finds and determines that the Project is consistent with the policies and criteria set forth within the ONT ALUCP; and

(2) On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection, Overflight. As a result, the Planning Commission, therefore, finds and determines that the Project is consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the CNO ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing,

and upon the specific findings set forth in Sections 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) The proposed Development Code Amendment is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Goals components of The Ontario Plan ("TOP"). The Development Code Amendment will: (a) serve to promote a community that is consistently seeking—and thoughtfully applying—new ways of doing things better, as encouraged by TOP's Vision; (b) provides for a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, have a wide spectrum of choices of where they can live and recreate, as promoted by Land Use Element Policy LU-1.6, Complete Community; and (c) promotes the City Council Goals through the establishment of Development Code provisions that encourages investment in the growth and evolution of the City's economy and focuses City resources in commercial and residential neighborhoods; and

(2) The proposed Development Code Amendment would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City. The Development Code Amendment incorporates safeguards intended to ensure that the purposes of the Development Code are preserved; the project will not be contrary to or damage the public health, safety, convenience, or general welfare; the project will not result in any significant environmental impacts; and the project will be in full conformity with the Vision, City Council Priorities, and Policy Plan components of The Ontario Plan.

SECTION 6: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVES the herein described changes that comprise the Development Code Amendment, and which are attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East B Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 8: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 25th day of February 2025, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Nicola Ricci
Planning Commission Chairperson

ATTEST:

Henry Noh
Planning Director and
Secretary of the Planning Commission

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO)
CITY OF ONTARIO)

I, Gwen Berendsen, Secretary Pro Tempore of the Planning Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC25-015, was duly passed and adopted by the Planning Commission of the City of Ontario at their regular meeting held on February 25, 2025, by the following roll call vote, to wit:

AYES: DeDiemar, Gage, Lampkin, Ricci

NOES: None

ABSENT: Anderson

ABSTAIN: None

Gwen Berendsen
Secretary Pro Tempore

2025 Development Code Amendment
For ADUs and JADUs

(Document to follow this page)

City of Ontario Development Code
Division 5.03 – Supplemental Land Use Regulations
5.03.010: Accessory Dwelling Units

A. **Purpose.** The purpose of this Section is to allow and regulate accessory dwelling units (ADUs) and junior accessory dwelling units (JADUs) in compliance with Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code.

B. **Effect of Conforming.** An ADU or JADU that conforms to the standards in this Section will not be:

1. Deemed to be inconsistent with the City's general plan and zoning designation for the lot on which the ADU or JADU is located.

2. Deemed to exceed the allowable density for the lot on which the ADU or JADU is located.

3. Considered in the application of any local ordinance, policy, or program to limit residential growth.

4. Required to correct a nonconforming zoning condition, as defined in Subsection C.7, below. This does not prevent the City from enforcing compliance with applicable building standards in accordance with Health and Safety Code Section 17980.12.

C. **Definitions.** As used in this Section, the words or phrases listed below shall have the meanings thereafter specified:

1. Accessory Dwelling Unit (ADU). An attached or a detached residential dwelling unit that provides complete independent living facilities for one or more persons and is located on a lot with a proposed or existing primary residence. An accessory dwelling unit also includes the following:

a. An efficiency unit, as defined by HSC Section 17958.1; and

b. A manufactured home, as defined by HSC Section 18007.

2. Accessory Structure. A structure that is accessory and incidental to a dwelling located on the same lot.

3. Complete Independent Living Facilities. Permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family or multiple-family dwelling is or will be situated.

4. Efficiency Kitchen. A kitchen that includes each of the following:

a. A cooking facility with appliances.

b. A food preparation counter and storage cabinets that are of a reasonable size in relation to the JADU.

5. Junior Accessory Dwelling Unit (JADU). A residential unit that:

a. Is no more than 500 SF in size;

b. Is contained entirely within an existing or proposed single-family structure. An enclosed use within the residence, such as an attached garage, is considered to be a part of and contained within the single-family structure;

c. Includes its own separate sanitation facilities or shares sanitation facilities with the existing or proposed single-family structure;

d. If the unit does not include its own separate bathroom, then it contains an interior entrance to the main living area of the existing or proposed single-family structure in addition to an exterior entrance that is separate from the main entrance to the primary dwelling; and

e. It includes an efficiency kitchen, as defined in Subsection C.4, above.

6. Livable Space. A space in a dwelling intended for human habitation, including living, sleeping, eating, cooking, or sanitation.

7. Living Area. The interior habitable area of a dwelling unit, including basements and attics, but does not include a garage or any accessory structure.

8. Nonconforming Zoning Condition. A physical improvement on a property that does not conform with current zoning standards.

9. Passageway. A pathway that is unobstructed clear to the sky and extends from a street to one entrance of the ADU or JADU.

10. Proposed Dwelling. A dwelling that is the subject of a permit application and that meets the requirements for permitting.

11. Public Transit. A location, including but not limited to a bus stop or train station, where the public may access buses, trains, subways, and other forms of transportation that charge set fares, run on fixed routes, and are available to the public.

12. Tandem Parking. Two or more automobiles parked on a driveway or on any other location on a lot, lined up one behind the other.

D. **Approvals.** The following approvals apply to ADUs and JADUs under this Section:

1. Building Permit Only. If an ADU or JADU complies with each of the general requirements in subsection E below, it is allowed with only a building permit in the following scenarios:

a. *Converted on Single-Family Lot.* One ADU as described in this Subsection D.1.a and one JADU on a lot with a proposed or existing single-family dwelling on it, where the ADU or JADU:

(1) Is either: within the space of a proposed single-family dwelling; within the existing space of an existing single-family dwelling; or (in the case of and ADU only) within the existing space of an accessory structure, plus up to 150 additional SF if the expansion is limited to accommodating ingress and egress; and

(2) Has exterior access that is independent of that for the single-family dwelling; and

(3) Has side and rear setbacks sufficient for fire and safety, as dictated by applicable building and fire codes; and

(4) The JADU complies with the requirements of Government Code Sections 66333 through 66339.

b. *Limited Detached on Single-Family Lot.* One detached, new-construction ADU on a lot with a proposed or existing single-family dwelling (in addition to any JADU that might otherwise be established on the lot under Subsection D.1.a, above), if the detached ADU satisfies each of the following limitations:

(1) The side- and rear-yard setbacks are at least 4 FT; and

(2) The total floor area is 800 SF or smaller; and

(3) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

c. *Converted on Multiple-Family Lot.* One or more ADUs within portions of existing multiple-family dwelling structures that are not used as livable space, including but not limited to storage rooms, boiler rooms, passageways, attics, basements, or garages, if each converted ADU complies with state building standards for dwellings. Under this Subsection D.1.c, at least one converted ADU is allowed within an existing multiple-family dwelling, up to a quantity equal to 25 percent of the existing multiple-family dwelling units.

d. *Limited Detached on Multiple-Family Lot.* No more than two detached ADUs on a lot that has an existing or proposed multiple-family dwelling, or up to 8 detached ADUs on a lot with and existing multiple-family dwelling, if each detached ADU satisfies all of the following:

(1) The side- and rear-yard setbacks are at least 4 FT. If the existing multiple-family dwelling has a rear or side yard setback of less than 4 FT, the City shall not require any modification to the multiple-family dwelling as a condition of approving the ADU; and

(2) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

(3) If the lot has an existing multiple-family dwelling, the quantity of detached ADUs does not exceed the number of primary dwelling units on the lot.

2. Process and Timing.

a. An ADU permit is considered and approved ministerially, without discretionary review or a hearing.

b. The City must approve or deny an application to create an ADU or JADU within 60 days from the date that the City receives a completed application. If the City has not

approved or denied the completed application within 60 days, the application is deemed approved unless either:

(1) The applicant requests a delay, in which case the 60-day time period is tolled for the period of the requested delay, or

(2) When an application to create an ADU or JADU is submitted with a permit application to create a new single-family or multiple-family dwelling on the lot, the City may delay acting on the permit application for the ADU or JADU until the City acts on the permit application to create the new single-family or multiple-family dwelling, but the application to create the ADU or JADU will still be considered ministerially, without discretionary review or a hearing.

c. If the City denies application to create an ADU or JADU, the City must provide the applicant with comments that include, among other things, a list of all the defective or deficient items and a description of how the application may be remedied by the applicant. Notice of the denial and corresponding comments must be provided to the applicant within the 60-day time period established by Subsection D.3.b, above.

d. A demolition permit for a detached garage that is to be replaced with an ADU is reviewed with the application for the ADU and issued at the same time.

E. **General ADU and JADU Requirements.** The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above:

1. Zoning.

a. An ADU subject only to a building permit under Subsection D.1, above, may be created on a lot in a residential or mixed-use zoning district.

b. An ADU subject to an ADU permit under Subsection D.2, above, may be created on a lot that is zoned to allow single-family dwelling residential use or multiple-family dwelling residential use.

c. In accordance with Government Code section 66333(a), a JADU may only be created on a lot zoned for single-family residences.

2. Height.

a. Except as otherwise provided by Subsections E.2.b and E.2.c, below, a detached ADU created on a lot with an existing or proposed single-family or multiple-family dwelling unit may not exceed 16 FT in height.

b. A detached ADU may be up to 18 FT in height if it is created on a lot with an existing or proposed single-family or multiple-family dwelling unit that is located within one-half mile walking distance of a major transit stop or a high quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, and the ADU may be up to two additional feet in height (for a maximum of 20 FT) if necessary to accommodate a roof pitch on the ADU that is aligned with the roof pitch of the primary dwelling unit.

c. A detached ADU created on a lot with an existing or proposed multiple-family dwelling that has more than one story may not exceed 18 FT in height.

d. An ADU that is attached to the primary dwelling may not exceed 25 FT in height or the height limitation imposed by the underlying zone that applies to the primary dwelling, whichever is lower. Notwithstanding the foregoing, ADUs subject to this Subsection E.2.d may not exceed two stories.

e. For purposes of this Subsection E.2, height is measured from existing legal grade or the level of the lowest floor, whichever is lower, to the peak of the structure.

3. Fire Sprinklers.

a. Fire sprinklers are required in an ADU if sprinklers are required in the primary residence.

b. The construction of an ADU does not trigger a requirement for fire sprinklers to be installed in the existing primary dwelling.

4. Rental Term. No ADU or JADU may be rented for a term that is shorter than 30 days. This prohibition applies regardless of when the ADU or JADU was created.

5. No Separate Sale or Conveyance. An ADU or JADU may be rented, but, except as provided in Government Code section 66341, no ADU or JADU may be sold or otherwise conveyed separately from the lot and the primary dwelling (in the case of a single-family lot) or from the lot and all of the dwellings (in the case of a multiple-family lot).

6. Septic System. If the ADU or JADU will connect to an onsite wastewater-treatment system, the owner must include with the application a percolation test completed within the last 5 years or, if the percolation test has been recertified, within the last 10 years.

7. Owner Occupancy.

a. An ADU created under this section on or after January 1, 2020 are not subject to an owner-occupancy requirement.

b. As required by state law, all JADUs are subject to an owner-occupancy requirement. A natural person with legal or equitable title to the property must reside on the property, in either the primary dwelling or JADU, as the person's legal domicile and permanent residence. However, the owner-occupancy requirement in this Subsection E.7.b does not apply if the property is entirely owned by another governmental agency, land trust, or housing organization.

8. "Rent Reporting. In order to facilitate the City's obligation to identify adequate sites for housing in accordance with Government Code Sections 65583.1 and 66330, the following requirements must be satisfied:

a. With the building-permit application, the applicant must provide the City with an estimate of the projected annualized rent that will be charged for the ADU or JADU.

b. Within 90 days after each January 1 following issuance of the building permit, the owner must report the actual rent charged for the ADU or JADU during the prior year. If the City does not receive the report within the 90-day period, the owner is in violation of this Code, and the City may send the owner a notice of violation and allow the owner another 30

days to submit the report. If the owner fails to submit the report within the 30-day period, the City may enforce this provision in accordance with applicable law.

9. Building and Safety.

a. *Must Comply with Building Code*. Subject to Subsection E.10.b, below, all ADUs and JADUs must comply with all local building code requirements.

b. *No Change of Occupancy*. Construction of an ADU does not constitute a Group R occupancy change under the local building code, as described in Section 310 of the California Building Code, unless the building official or Community Improvement Division officer makes a written finding based on substantial evidence in the record that the construction of the ADU could have a specific, adverse impact on public health and safety. Nothing in this Subsection E.10.b prevents the City from changing the occupancy code of a space that was uninhabitable space or that was only permitted for nonresidential use and was subsequently converted for residential use in accordance with this Section.

F. **Specific ADU Requirements.** The following requirements apply only to ADUs that require an ADU permit under Subsection D.2, above.

1. Maximum Size.

a. The maximum size of a detached or attached ADU subject to this Subsection F is 850 SF for a studio or one-bedroom unit and 1,000 SF for a unit with two or more bedrooms.

b. An attached ADU that is created on a lot with an existing primary dwelling is further limited to 50 percent of the floor area of the existing primary dwelling.

c. Application of other development standards in this Subsection F, such as lot coverage, might further limit the size of the ADU, but no application of the percent-based size limit in Subsection F.1.b, above, or front setback, lot coverage limit, or open-space requirement may require the ADU to be less than 800 SF.

2. Building Setbacks.

a. Subject to Subsection F.1.c, above, an ADU that is subject to this Subsection F shall maintain a minimum front yard setback of 30 FT from arterial street rights-of-way and 20 FT from all collector and local street rights-of-way.

b. An ADU that is subject to this Subsection F must conform to 4-FT side yard and rear yard setbacks.

c. No setback is required for an ADU that is subject to this Subsection F if the ADU is constructed in the same location and to the same dimensions as an existing structure.

3. Lot Coverage. No ADU subject to this Subsection F may cause the total lot coverage of the lot to exceed the maximum lot coverages shown in the Tables below, subject to Subsection F.1.c, above.

Traditional Single-Family Residential Development Standards

Requirements	***Residential Zoning Districts***				
	AR-2	***RE-2***	***RE-4***	***LDR-5***	***MDR-11, MDR-18, MDR-25 & HDR-45***
Maximum Lot Coverage	30%	40%		50%	60%

Small Lot Traditional and Alley-Loaded Single-Family Residential Development Standards

Requirements	***Residential Zoning Districts***		
	LDR-5	***MDR-11***	***MDR-18, MDR-25 & HDR-45***
Maximum Lot Coverage	55%	60%	70%

Multiple-Family Residential Development Standards

Requirements	***Residential Zoning Districts***			
	MDR-11	***MDR-18***	***MDR-25***	***HDR- 45***
Maximum Project Coverage	60%			100%

4. Minimum Open Space. No ADU subject to this Subsection F may cause the total percentage of open space of the lot to fall below the minimum requirements specified below, subject to Subsection F.1.c, above.

a. *Small Lot Traditional and Alley-Loaded Development Projects, and Cluster Single-Family Development Projects.* Small lot traditional, small lot alley-loaded, and cluster single-family development projects that consist of more than 3 dwellings, shall devote a minimum of 20 percent of the project site to open space.

b. *Multiple-Family and Mixed-Use Development Projects.* Multiple-family development projects and the multiple-family residential portion of mixed-use development projects that consist of more than 3 dwellings, shall provide open space as follows:

Minimum Open Space Requirements for Multiple-Family and Mixed-Use Development Projects

Open Space Type	***Zoning Districts***		
	MDR-11 & MDR-18	***MDR-25***	***HDR-45***
Private Open Space	200 SF (40%)	150 SF (37.5%)	60 SF (20%)
Common Open Space	300 SF (60%)	250 SF (62.5%)	250 SF (80%)
Total Open Space	500 SF (100%)	400 SF (100%)	310 SF (100%)

5. Passageway. No passageway, as defined by Subsection C.9, above, is required for an ADU.

6. Off-Street Parking.

a. *Generally.* One off-street parking space is required for each ADU. The parking space may be provided in setback areas or as tandem parking, as defined by Subsection C.12, above.

b. *Exceptions.* No parking under Subsection F.7.a, above, is required in the following situations:

(1) The ADU is located within one-half mile walking distance of public transit, as defined in Subsection C.11, above.

(2) The ADU is located within an architecturally and historically significant historic district.

(3) The ADU is part of the proposed or existing primary residence, or an accessory structure under Subsection D.1.a, above.

(4) When on-street parking permits are required but not offered to the occupant of the ADU.

(5) When there is an established car share vehicle stop located within one block of the ADU.

(6) When the permit application to create an ADU is submitted with an application to create a new single-family or multiple-family dwelling on the same lot, provided that the ADU or the lot satisfies any other criteria listed in Subsections F.6.b(1) through F.6.b(5), above.

c. *No Replacement.* When a garage, carport, covered parking structure, or uncovered parking space is demolished in conjunction with the construction of an ADU or converted to an ADU, those off-street parking spaces are not required to be replaced.

7. Architectural Requirements.

a. The materials and colors of the exterior walls, roof, and windows and doors must match the appearance and architectural design of those of the primary dwelling.

b. The roof slope must match that of the dominant roof slope of the primary dwelling. The dominant roof slope is the slope shared by the largest portion of the roof.

c. The exterior lighting must be limited to down-lights or as otherwise required by the City's Building or Fire Code.

d. The ADU must have an independent exterior entrance, apart from that of the primary dwelling.

e. The interior horizontal dimensions of an ADU must be at least 10 FT wide in every direction, with a minimum interior wall height of 7 FT.

f. Windows and doors of the ADU may not have a direct line of sight to an adjoining residential property. Fencing, landscaping, or privacy glass may be used to provide screening and prevent a direct line-of-sight.

g. All windows and doors in an ADU are less than 30 FT from a property line that is not a public right-of-way line must either be (for windows) clerestory with the bottom of the glass at least 6 FT above the finished floor, or (for windows and for doors) utilize frosted or obscure glass.

8. Landscape Requirements. A Landscape Plan shall be submitted to the City, which provides for evergreen landscape screening, to include trees, shrubs, and groundcovers that shall be planted, permanently irrigated, and fully maintained, and which is located between an ADU and adjacent parcels, and where an ADU impacts a front yard and/or is subject to public views from a public or private street. Evergreen landscape screening shall be provided as follows:

a. Minimum 15-gallon size screening shrubs shall be installed at every 5 linear feet of exterior building wall. Alternatively, a 6-FT high decorative masonry block wall may be constructed.

b. ADUs created by garage conversion, which results in the removal of the garage door, shall provide a minimum 3-FT wide foundation landscape planter for the full length of the wall wherein the garage door was removed, which shall be fully landscaped and irrigated, and permanently maintained.

c. All landscaping must be drought tolerant and California friendly.

d. Landscape and irrigation plans shall be prepared and submitted to the City for review and approval.

9. Historical Protections. An ADU that is on or within 600 feet of real property that is listed in the California Register of Historic Resources must be located so as to not be visible from any public right-of-way.

G. **Fees.** The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above.

1. Impact Fees.

a. No impact fee is required for an ADU that is less than 750 SF in size. For the purposes of this Subsection G.1, the term "impact fee" means a "fee" under the Mitigation Fee Act (Government Code Section 66000(b)) and a fee under the Quimby Act (Government Code Section 66477). "Impact fee" as used in this Section, does not include any connection fee or capacity charge for water or sewer service.

b. Any impact fee that is required for an ADU that is 750 SF or larger in size must be charged proportionately in relation to the square footage of the primary dwelling unit (e.g., the floor area of the ADU, divided by the floor area of the primary dwelling, times the typical fee amount charged for a new dwelling.)

2. Utility Fees.

a. If an ADU is constructed with a new single-family home, a separate utility connection directly between the ADU and the utility and payment of the normal connection fee and capacity charge for a new dwelling are required.

b. Except as described in Subsection G.2.a, converted ADUs on a single-family lot that are created under Subsection D.1.a above are not required to have a new or separate utility connection directly between the ADU and the utility. Nor is a connection fee or capacity charge required.

c. Except as described in Subsection G.2.a, all ADUs that are not covered by Subsection G.2.b require a new, separate utility connection directly between the ADU and the utility for any utility that is provided by the city. All utilities that are not provided by the city are subject to the connection and fee requirements of the utility provider.

(1) The connection is subject to a connection fee or capacity charge that is proportionate to the burden created by the ADU based on either the floor area or the number of drainage-fixture units (DFU) values, as defined by the Uniform Plumbing Code, upon the water or sewer system.

(2) The portion of the fee or charge that is charged by the city may not exceed the reasonable cost of providing this service.

H. **Nonconforming Zoning Code Conditions, Building Code Violations, and Unpermitted Structures.**

1. Generally. The City will not deny an ADU or JADU application due to a nonconforming zoning condition, building code violation, or unpermitted structure on the lot that does not present a threat to the public health and safety and that is not affected by the construction of the ADU or JADU.

2. Unpermitted ADUs constructed before 2020.

a. *Permit to Legalize.* As required by state law, the City may not deny a permit to legalize an existing, but unpermitted ADU or JADU that was constructed before January 1, 2020, if denial is based on either of the following grounds:

(1) The ADU or JADU violates applicable building standards; or

(2) The ADU or JADU does not comply with state ADU or JADU law or this ADU ordinance (Section 5.03.010).

b. *Exceptions.*

(1) Notwithstanding Subsection H.2.a, above the City may deny a permit to legalize an existing but unpermitted ADU or JADU that was constructed before January 1, 2020, if the City makes a finding that correcting a violation is necessary to comply with the standards specified in California Health and Safety Code section 17920.3.

(2) Subsection H.2.a, above does not apply to a building that is deemed to be substandard in accordance with California Health and Safety Code Section 17920.3.

I. **Nonconforming ADUs and Discretionary Approval.** Any proposed ADU or JADU that would otherwise be allowed under this section but that does not conform to the objective design or development standards set forth in Subsections A through H of this Section may be allowed by the City, subject to a Conditional Use Permit issued in accordance with the other provisions of this Development Code.

5.03.000: Purpose

The purpose of this Division is to provide operating, site planning and/or development standards for certain land uses allowed by Division 5.02 (Land Use) of this Development Code, and for activities and facilities that require special standards to mitigate their potential adverse impacts, thereby assuring a land use, activity, and/or facility of stable and desirable character, which is compatible with existing and future development and land uses in the vicinity, and protects the use and enjoyment of neighboring properties consistent with goals and policies of The Ontario Plan.

5.03.005: Applicability

A. The land uses, activities and facilities addressed by this Division shall be located in compliance with Division 5.02 (Land Use) of this Development Code.

B. The standards for specific uses, activities and facilities established by this Division shall supplement, and are required in addition to, the applicable development and subdivision regulations contained in Chapter 6.0 (Development and Subdivision Regulations) of this Development Code.

C. Each and every physical improvement required to be installed or constructed in conjunction with the establishment of a land use, activity or facility addressed by this Division, shall be completed prior to the commencement of the land use.

5.03.010: Accessory Dwelling Units

A. **Purpose.** The purpose of this Section is to allow and regulate accessory dwelling units (ADUs) and junior accessory dwelling units (JADUs) in compliance with Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code ~~Sections 65852.2 and 65852.22~~.

B. **Effect of Conforming.** An ADU or JADU that conforms to the standards in this Section will not be:

1. Deemed to be inconsistent with the City's general plan and zoning designation for the lot on which the ADU or JADU is located.

2. Deemed to exceed the allowable density for the lot on which the ADU or JADU is located.

3. Considered in the application of any local ordinance, policy, or program to limit residential growth.

4. Required to correct a nonconforming zoning condition, as defined in Subsection C.7, below. This does not prevent the City from enforcing compliance with applicable building standards in accordance with Health and Safety Code Section 17980.12.

C. **Definitions.** As used in this Section, the words or phrases listed below shall have the meanings thereafter specified:

1. Accessory Dwelling Unit (ADU). An attached or a detached residential dwelling unit that provides complete independent living facilities for one or more persons and is located on a lot with a proposed or existing primary residence. An accessory dwelling unit also includes the following:

a. An efficiency unit, as defined by HSC Section 17958.1; and

b. A manufactured home, as defined by HSC Section 18007.

2. Accessory Structure. A structure that is accessory and incidental to a dwelling located on the same lot.

3. Complete Independent Living Facilities. Permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family or multiple-family dwelling is or will be situated.

4. Efficiency Kitchen. A kitchen that includes each of the following:

a. A cooking facility with appliances.

b. A food preparation counter and storage cabinets that are of a reasonable size in relation to the JADU.

5. Junior Accessory Dwelling Unit (JADU). A residential unit that:

a. Is no more than 500 SF in size;

b. Is contained entirely within an existing or proposed single-family structure. An enclosed use within the residence, such as an attached garage, is considered to be a part of and contained within the single-family structure;

c. Includes its own separate sanitation facilities or shares sanitation facilities with the existing or proposed single-family structure;

d. If the unit does not include its own separate bathroom, then it contains an interior entrance to the main living area of the existing or proposed single-family structure in addition to an exterior entrance that is separate from the main entrance to the primary dwelling; and

e. It includes an efficiency kitchen, as defined in Subsection C.4, above.

6. Livable Space. A space in a dwelling intended for human habitation, including living, sleeping, eating, cooking, or sanitation.

~~6.~~7. Living Area. The interior habitable area of a dwelling unit, including basements and attics, but does not include a garage or any accessory structure.

~~7.~~8. Nonconforming Zoning Condition. A physical improvement on a property that does not conform with current zoning standards.

~~8.~~9. Passageway. A pathway that is unobstructed clear to the sky and extends from a street to one entrance of the ADU or JADU.

~~9.~~10. Proposed Dwelling. A dwelling that is the subject of a permit application and that meets the requirements for permitting.

~~10.~~11. Public Transit. A location, including but not limited to a bus stop or train station, where the public may access buses, trains, subways, and other forms of transportation that charge set fares, run on fixed routes, and are available to the public.

~~11.~~12. Tandem Parking. Two or more automobiles parked on a driveway or on any other location on a lot, lined up one behind the other.

D. Approvals. The following approvals apply to ADUs and JADUs under this Section:

1. Building Permit Only. If an ADU or JADU complies with each of the general requirements in subsection E below, it is allowed with only a building permit in the following scenarios:

a. *Converted on Single-Family Lot.* One ADU as described in this Subsection D.1.a and one JADU on a lot with a proposed or existing single-family dwelling on it, where the ADU or JADU:

(1) Is either: within the space of a proposed single-family dwelling; within the existing space of an existing single-family dwelling;~~,~~ or (in the case of and ADU only) within the existing space of an accessory structure, plus up to 150 additional SF if the expansion is limited to accommodating ingress and egress; and

(2) Has exterior access that is independent of that for the single-family dwelling; and

(3) Has side and rear setbacks sufficient for fire and safety, as dictated by applicable building and fire codes; and

(4) The JADU complies with the requirements of Government Code Sections ~~65852.22~~66333 through 66339.

b. *Limited Detached on Single-Family Lot.* One detached, new-construction ADU on a lot with a proposed or existing single-family dwelling (in addition to any JADU that might otherwise be established on the lot under Subsection D.1.a, above), if the detached ADU satisfies each of the following limitations:

(1) The side- and rear-yard setbacks are at least 4 FT; and

(2) The total floor area is 800 SF or smaller; and

(3) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

c. *Converted on Multiple-Family Lot.* One or more ADUs within portions of existing multiple-family dwelling structures that are not used as livable space, including but not limited to storage rooms, boiler rooms, passageways, attics, basements, or garages, if each converted ADU complies with state building standards for dwellings. Under this Subsection D.1.c,

at least one converted ADU is allowed within an existing multiple-family dwelling, up to a quantity equal to 25 percent of the existing multiple-family dwelling units.

d. *Limited Detached on Multiple-Family Lot.* No more than two detached ADUs on a lot ~~that has an existing or~~with a proposed multiple-family dwelling, or up to 8 detached ADUs on a lot with and existing multiple-family dwelling, if each detached ADU satisfies ~~both~~all of the following ~~limitations~~:

(1) The side- and rear-yard setbacks are at least 4 FT. If the existing multiple-family dwelling has a rear or side yard setback of less than 4 FT, the City shall not require any modification to the multiple-family dwelling as a condition of approving the ADU; and

(2) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

~~(2)~~**(3)** If the lot has an existing multiple-family dwelling, the quantity of detached ADUs does not exceed the number of primary dwelling units on the lot.

2. Process and Timing.

a. The City must approve or deny an application to create an ADU or JADU within 60 days from the date that the City receives a completed application. If the City has not approved or denied the completed application within 60 days, the application is deemed approved unless either:

(1) The applicant requests a delay, in which case the 60-day time period is tolled for the period of the requested delay, or

(2) When an application to create an ADU or JADU is submitted with a permit application to create a new single-family or multiple-family dwelling on the lot, the City may delay acting on the permit application for the ADU or JADU until the City acts on the permit application to create the new single-family or multiple-family dwelling, but the application to create the ADU or JADU will still be considered ministerially, without discretionary review or a hearing.

b. If the City denies application to create an ADU or JADU, the City must provide the applicant with comments that include, among other things, a list of all the defective or deficient items and a description of how the application may be remedied by the applicant. Notice of the denial and corresponding comments must be provided to the applicant within the 60-day time period established by Subsection D.3.b, above.

c. A demolition permit for a detached garage that is to be replaced with an ADU is reviewed with the application for the ADU and issued at the same time.

E. General ADU and JADU Requirements. The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above:

1. Zoning.

a. An ADU ~~or JADU~~ subject only to a building permit under Subsection D.1, above, may be created on a lot in a residential or mixed-use zoning district.

b. An ADU ~~or JADU~~ subject to ~~an ADU permit under~~ Subsection D.2, above, may be created on a lot that is zoned to allow single-family dwelling residential use or multiple-family dwelling residential use.

~~b.~~**c.** In accordance with Government Code section 66333(a), a JADU may only be created on a lot zoned for single-family residences.

2. Height.

a. Except as otherwise provided by Subsections E.2.b and E.2.c, below, a detached ADU created on a lot with an existing or proposed single-family or multiple-family dwelling unit may not exceed 16 FT in height.

b. A detached ADU may be up to 18 FT in height if it is created on a lot with an existing or proposed single-family or multiple-family dwelling unit that is located within one-half mile walking distance of a major transit stop or a high quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, and the ADU may be up to two additional feet in height (for a maximum of 20 FT) if necessary to accommodate a roof pitch on the ADU that is aligned with the roof pitch of the primary dwelling unit.

c. A detached ADU created on a lot with an existing or proposed multiple-family dwelling that has more than one story may not exceed 18 FT in height.

d. An ADU that is attached to the primary dwelling may not exceed 25 FT in height or the height limitation imposed by the underlying zone that applies to the primary dwelling, whichever is lower. Notwithstanding the foregoing, ADUs subject to this Subsection E.2.d may not exceed two stories.

e. For purposes of this Ssubsection E.2, height is measured from existing legal grade or the level of the lowest floor, whichever is lower, to the peak of the structure.

3. Fire Sprinklers.

a. Fire sprinklers are required in an ADU if sprinklers are required in the primary residence.

b. The construction of an ADU does not trigger a requirement for fire sprinklers to be installed in the existing primary dwelling.

4. Rental Term. No ADU or JADU may be rented for a term that is shorter than 30 days. This prohibition applies regardless of when the ADU or JADU was created.

5. No Separate Sale or Conveyance. An ADU or JADU may be rented~~; however~~ but, except as provided in Government Code section 66341, no ADU or JADU may be sold or otherwise conveyed separately from the lot and the primary dwelling (in the case of a single-family lot) or from the lot and all of the dwellings (in the case of a multiple-family lot)~~, except as otherwise provided in Government Code Section 65852.26~~.

6. Septic System. If the ADU or JADU will connect to an onsite wastewater-treatment system, the owner must include with the application a percolation test completed within the last 5 years or, if the percolation test has been recertified, within the last 10 years.

7. Owner Occupancy.

a. An ADU created under this section on orpermitted after January 1, 2020~~, but before January 1, 2025, is~~ are not subject to an~~the~~ owner-occupancy requirement ~~that was in place when the ADU was created~~.

~~**b.** Unless applicable law requires otherwise, all ADUs that are permitted on or after January 1, 2025 are subject to an owner-occupancy requirement. A natural person with legal or equitable title to the property must reside on the property as the person's legal domicile and permanent residence.~~

~~c.~~b. As required by state law, all JADUs are subject to an owner-occupancy requirement. A natural person with legal or equitable title to the property must reside on the property, in either the primary dwelling or JADU, as the person's legal domicile and permanent residence. However, the owner-occupancy requirement in this Subsection E.7.b~~c~~ does not apply if the property is entirely owned by another governmental agency, land trust, or housing organization.

8. "RentIncome Reporting. In order to facilitate the City's obligation to identify adequate sites for housing in accordance with Government Code Sections 65583.1 and 6633065852.2, the following requirements must be satisfied:

a. With the building-permit application, the applicant must provide the City with an estimate of the projected annualized rent that will be charged for the ADU or JADU.

b. Within 90 days after each January 1 ~~yearly anniversary of the~~following issuance of the building permit, the owner must report the actual rent charged for the ADU or JADU during the prior year. If the City does not receive the report within the 90-day period, the owner is in violation of this Code, and the City may send the owner a notice of violation and allow the owner another 30 days to submit the report. If the owner fails to submit the report within the 30-day period, the City may enforce this provision in accordance with applicable law.

9. Building and Safety.

a. *Must Comply with Building Code.* Subject to Subsection E.10.b, below, all ADUs and JADUs must comply with all local building code requirements.

b. *No Change of Occupancy.* Construction of an ADU does not constitute a Group R occupancy change under the local building code, as described in Section 310 of the California Building Code, unless the building official or Community Improvement~~Code Enforcement~~ Division officer makes a written finding based on substantial evidence in the record that the construction of the ADU could have a specific, adverse impact on public health and safety. Nothing in this Subsection E.10.b prevents the City from changing the occupancy code of a space that was uninhabitable space or that was only permitted for nonresidential use and was subsequently converted for residential use in accordance with this Section.

F. Specific ADU Requirements. The following requirements apply only to ADUs that require an ADU permit under Subsection D.2, above.

1. Maximum Size.

a. The maximum size of a detached or attached ADU subject to this Subsection F is 850 SF for a studio or one-bedroom unit and 1,000 SF for a unit with two or more bedrooms.

b. An attached ADU that is created on a lot with an existing primary dwelling is further limited to 50 percent of the floor area of the existing primary dwelling.

c. Application of other development standards in this Subsection F, such as lot coverage, might further limit the size of the ADU, but~~; nevertheless,~~ no application of the percent-based size limit in Subsection F.1.b, above, or front setback, lot coverage limit, or open-space requirement may require the ADU to be less than 800 SF.

2. Building Setbacks.

a. Subject to Subsection F.1.c, above, an ADU that is subject to this Subsection F shall maintain a minimum front yard setback of 30 FT from arterial street rights-of-way and 20 FT from all collector and local street rights-of-way.

b. An ADU that is subject to this Subsection F must conform to 4-FT side yard and rear yard setbacks.

c. No setback is required for an ADU that is subject to this Subsection F if the ADU is constructed in the same location and to the same dimensions as an existing structure.

3. Lot Coverage. No ADU subject to this Subsection F may cause the total lot coverage of the lot to exceed the maximum lot coverages shown in the Tables below, subject to Subsection F.1.c, above.

Traditional Single-Family Residential Development Standards

Requirements	*Residential Zoning Districts*				
	AR-2	*RE-2*	*RE-4*	*LDR-5*	*MDR-11, MDR-18, MDR-25 & HDR-45*
Maximum Lot Coverage	30%	40%		50%	60%

Small Lot Traditional and Alley-Loaded Single-Family Residential Development Standards

Requirements	*Residential Zoning Districts*		
	LDR-5	*MDR-11*	*MDR-18, MDR-25 & HDR-45*
Maximum Lot Coverage	55%	60%	70%

Multiple-Family Residential Development Standards

Requirements	*Residential Zoning Districts*			
	MDR-11	*MDR-18*	*MDR-25*	*HDR- 45*
Maximum Project Coverage	60%			100%

4. Minimum Open Space. No ADU subject to this Subsection F may cause the total percentage of open space of the lot to fall below the minimum requirements specified below, subject to Subsection F.1.c, above.

a. *Small Lot Traditional and Alley-Loaded Development Projects, and Cluster Single-Family Development Projects.* Small lot traditional, small lot alley-loaded, and cluster single-family development projects that consist of more than 3 dwellings, shall devote a minimum of 20 percent of the project site to open space.

b. *Multiple-Family and Mixed-Use Development Projects.* Multiple-family development projects and the multiple-family residential portion of mixed-use development projects that consist of more than 3 dwellings, shall provide open space as follows:

Minimum Open Space Requirements for Multiple-Family and Mixed-Use Development Projects

Open Space Type	Zoning Districts		
	MDR-11 & MDR-18	MDR-25	HDR-45
Private Open Space	200 SF (40%)	150 SF (37.5%)	60 SF (20%)
Common Open Space	300 SF (60%)	250 SF (62.5%)	250 SF (80%)
Total Open Space	500 SF (100%)	400 SF (100%)	310 SF (100%)

5. Passageway. No passageway, as defined by Subsection C.~~8~~9, above, is required for an ADU.

6. Off-Street Parking.

a. *Generally.* One off-street parking space is required for each ADU. The parking space may be provided in setback areas or as tandem parking, as defined by Subsection C.~~11~~12, above.

b. *Exceptions.* No parking under Subsection F.7.a, above, is required in the following situations:

(1) The ADU is located within one-half mile walking distance of public transit, as defined in Subsection C.~~10~~11, above.

(2) The ADU is located within an architecturally and historically significant historic district.

(3) The ADU is part of the proposed or existing primary residence, or an accessory structure under Subsection D.1.a, above.

(4) When on-street parking permits are required but not offered to the occupant of the ADU.

(5) When there is an established car share vehicle stop located within one block of the ADU.

(6) When the permit application to create an ADU is submitted with an application to create a new single-family or multiple-family dwelling on the same lot, provided that the ADU or the lot satisfies any other criteria listed in Subsections F.6.b(1) through F.6.b(5), above.

c. *No Replacement.* When a garage, carport, ~~or~~ covered parking structure, or uncovered parking space is demolished in conjunction with the construction of an ADU or converted to an ADU, those off-street parking spaces are not required to be replaced.

7. Architectural Requirements.

a. The materials and colors of the exterior walls, roof, and windows and doors must match the appearance and architectural design of those of the primary dwelling.

b. The roof slope must match that of the dominant roof slope of the primary dwelling. The dominant roof slope is the slope shared by the largest portion of the roof.

c. The exterior lighting must be limited to down-lights or as otherwise required by the City's Building or Fire Code.

d. The ADU must have an independent exterior entrance, apart from that of the primary dwelling.

e. The interior horizontal dimensions of an ADU must be at least 10 FT wide in every direction, with a minimum interior wall height of 7 FT.

f. Windows and doors of the ADU may not have a direct line of sight to an adjoining residential property. Fencing, landscaping, or privacy glass may be used to provide screening and prevent a direct line-of-sight.

g. All windows and doors in an ADU are less than 30 FT from a property line that is not a public right-of-way line must either be (for windows) clerestory with the bottom of the glass at least 6 FT above the finished floor, or (for windows and for doors) utilize frosted or obscure glass.

8. Landscape Requirements. A Landscape Plan shall be submitted to the City, which provides for evergreen landscape screening, to include trees, shrubs, and groundcovers that shall be planted, permanently irrigated, and fully maintained, and which is located between an ADU and adjacent parcels, and where an ADU impacts a front yard and/or is subject to public views from a public or private street. Evergreen landscape screening shall be provided as follows:

a. Minimum 15-gallon size screening shrubs shall be installed at every 5 linear feet of exterior building wall. Alternatively, a 6-FT high decorative masonry block wall may be constructed.

b. ADUs created by garage conversion, which results in the removal of the garage door, shall provide a minimum 3-FT wide foundation landscape planter for the full length of the wall wherein the garage door was removed, which shall be fully landscaped and irrigated, and permanently maintained.

c. All landscaping must be drought tolerant and California friendly.

d. Landscape and irrigation plans shall be prepared and submitted to the City for review and approval.

9. Historical Protections. An ADU that is on or within 600 feet of real property that is listed in the California Register of Historic Resources must be located so as to not be visible from any public right-of-way.

G. Fees. The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above.

1. Impact Fees.

a. No impact fee is required for an ADU that is less than 750 SF in size. For the purposes of this Subsection G.1, the term "impact fee" means a "fee" under the Mitigation Fee Act (Government Code Section 66000(b)) and a fee under the Quimby Act (Government Code Section 66477). "Impact fee" as used in this Section, does not include any connection fee or capacity charge for water or sewer service.

b. Any impact fee that is required for an ADU that is 750 SF or larger in size must be charged proportionately in relation to the square footage of the primary dwelling unit (e.g., the floor area of the ADU, divided by the floor area of the primary dwelling, times the typical fee amount charged for a new dwelling.)

2. Utility Fees.

a. If an ADU is constructed with a new single-family home, a separate utility connection directly between the ADU and the utility and payment of the normal connection fee and capacity charge for a new dwelling are required~~ADUs and JADUs shall not be required to have a new or separate utility connection directly between the ADU or JADU and the utility, nor shall a connection fee or capacity charge be required~~.

b. Except as described in Subsection G.2.a, converted ADUs on a single-family lot that are created under Subsection D.1.a above are not required to have a new or separate utility connection directly between the ADU and the utility. Nor is a connection fee or capacity charge required.

c. Except as described in Subsection G.2.a, all ADUs that are not covered by Subsection G.2.b require a new, separate utility connection directly between the ADU and the utility for any utility that is provided by the city. All utilities that are not provided by the city are subject to the connection and fee requirements of the utility provider.

(1) The connection is subject to a connection fee or capacity charge that is proportionate to the burden created by the ADU based on either the floor area or the number of drainage-fixture units (DFU) values, as defined by the Uniform Plumbing Code, upon the water or sewer system.

~~(1)~~**(2)** The portion of the fee or charge that is charged by the city may not exceed the reasonable cost of providing this service.

H. Nonconforming Zoning Code Conditions, Building Code Violations, and Unpermitted Structures.

1. Generally. The City will not deny an ADU or JADU application due to a nonconforming zoning condition, building code violation, or unpermitted structure on the lot that

does not present a threat to the public health and safety and that is not affected by the construction of the ADU or JADU.

2. Unpermitted ADUs constructed before 20202018.

a. *Permit to Legalize.* As required by state law, the City may not deny a permit to legalize an existing, but unpermitted ADU or JADU that was constructed before January 1, 20202018, if denial is based on either of the following grounds:

(1) The ADU or JADU violates applicable building standards; or

(2) The ADU or JADU does not comply with state ADU or JADU law ~~(Government Code Section 65852.2)~~ or this ADU ordinance (Section 5.03.010).

b. *Exceptions.*

(1) Notwithstanding Subsection H.2.a, above the City may deny a permit to legalize an existing but unpermitted ADU or JADU that was constructed before January -1, 20202018, if the City makes a finding that correcting a violation is necessary to ~~protect the health and safety of the public or of occupants of the structure~~comply with the standards specified in California Health and Safety Code section 17920.3.

(2) Subsection H.2.a, above does not apply to a building that is deemed to be substandard in accordance with California Health and Safety Code Section 17920.3.

I. Nonconforming ADUs and Discretionary Approval. Any proposed ADU or JADU that would otherwise be allowed under this section but that does not conform to the objective design or development standards set forth in Subsections A through H of this Section may be allowed by the City, subject to a Conditional Use Permit issued in accordance with the other provisions of this Development Code.

5.03.011: Accessory Residential Structures

A. Purpose. The purpose of this Section is to establish standards for the construction and use of Accessory Residential Structures (other than Accessory Dwelling Units allowed pursuant to Section 5.03.010 of this Development Code) in conjunction with existing single-family dwellings located within single-family or multiple-family zoning districts. (Note: The construction and use of Accessory Residential Structures in conjunction with existing multiple-family dwellings shall be subject to the development standards applicable to the primary multiple-family dwellings.)

B. Applicability. For purposes of this Section, the herein established development standards shall apply to Accessory Residential Structures such as garages, carports, guesthouses, storage sheds, pool houses, recreation rooms, etc., which are incidental or subordinate to the primary dwelling.

C. Definitions. As used in this Section, the words or phrases listed below shall have the meanings thereafter specified:

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING A DEVELOPMENT CODE AMENDMENT, FILE NO. PDCA24-004, AMENDING DIVISION 5.03 & SUPPLEMENTAL LAND USE REGULATIONS, SECTION 5.03.010 OF THE CITY'S DEVELOPMENT CODE RELATING TO ACCESSORY DWELLING UNITS AND JUNIOR ACCESSORY DWELLING UNITS IN THE CITY, AND FINDING THE ACTION TO BE STATUTORILY EXEMPT FROM CEQA UNDER PUBLIC RESOURCES CODE § 21080.17, AND MAKING FINDINGS IN SUPPORT THEREOF.

WHEREAS, THE CITY OF ONTARIO ("Applicant") has initiated an Application for the approval of a Development Code Amendment, File No. PDCA24-004, as described title of this Ordinance (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the City of Ontario Development Code (Ontario Municipal Code Title 9) provides the legislative framework for the implementation of The Ontario Plan, which establishes long term principals, goals, and policies for guiding the growth and development of the City in a manner that achieves Ontario's vision, and promotes and protects the public health, safety, comfort, convenience, prosperity, and welfare of its citizens; and

WHEREAS, the Development Code Amendment is of citywide impact, affecting approximately 50 square miles (31,789 acres) of land, which is generally bordered by Benson Avenue and Euclid Avenue on the west; Interstate 10 Freeway, Eighth Street, and Fourth Street on the north; Etiwanda Avenue and Hamner Avenue on the east; and Merrill Avenue and the San Bernardino County/Riverside County boundary on the south; and

WHEREAS, the Planning and Zoning Law authorizes cities to act by Ordinance to provide for the creation and regulation of accessory dwelling units ("ADUs") and junior accessory dwelling units ("JADUs"); and

WHEREAS, in recent years, the California Legislature has approved, and the Governor has signed into law, a number of bills that, among other things, amend various sections of the Government Code to impose new limits on local authority to regulate ADUs and JADUs; and

WHEREAS, in 2024, the California Legislature approved, and the Governor signed into law, Assembly Bill 2533 ("AB 2533") and Senate Bill 1211 ("SB 1211"), which further amend state ADU law; and

WHEREAS, AB 2533 and SB 1211 took effect on January 1, 2025, and for the City's ADU ordinance to remain valid, it must be amended to reflect the requirements of AB 2533 and SB 1211; and

WHEREAS, the City desires to amend its local regulatory scheme for the construction of ADUs and JADUs to reflect AB 2533's and SB 1211's changes to state law; and

WHEREAS, pursuant to the provisions of Government Code Title 1, Division 1, Chapter 3 (commencing with Government Code Section 65100) Ontario Development Code Table 2.02-1 (Review Matrix) assigns the City Council the responsibility and authority to review act on the Development Code Amendment following review and recommendation on the matter by the Planning Commission; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on February 25, 2025, the Planning Commission of the City of Ontario conducted a hearing to consider the Development Code Amendment and concluded said hearing on that date, voting to issue Resolution No. PC25-015, recommending the City Council approve the Development Code Amendment; and

WHEREAS, on March 18, 2025, the City Council of the City of Ontario conducted a public hearing on the Development Code Amendment and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Ordinance have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario, as follows:

SECTION 1: ***Incorporation***. The recitals above are true and correct and are each incorporated by reference and adopted as findings by the City Council.

SECTION 2: ***Environmental Determination and Findings.*** The City Council finds that, under California Public Resources Code section 21080.17, the California Environmental Quality Act ("CEQA") does not apply to the adoption of an Ordinance by a city or county implementing the provisions of Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code, which is California's ADU law and which also regulates JADUs, as defined by section 66313. Therefore, adoption of the proposed Ordinance is statutorily exempt from CEQA in that it implements state ADU law.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as

the decision-making body for the Project, the City Council finds that based on the facts and information contained in the Application and supporting documentation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan.

SECTION 4: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670, et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project is consistent with the policies and criteria set forth within the ONT ALUCP; and

(2) On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including

Safety, Airspace Protection, Overflight. As a result, the City Council, therefore, finds and determines that the Project is consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the CNO ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Sections 1 through 4, above, the City Council hereby concludes as follows:

(1) The proposed Development Code Amendment is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Goals components of The Ontario Plan ("TOP"). The Development Code Amendment will: (a) serve to promote a community that is consistently seeking—and thoughtfully applying—new ways of doing things better, as encouraged by TOP's Vision; (b) provides for a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, have a wide spectrum of choices of where they can live and recreate, as promoted by Land Use Element Policy LU-1.6, Complete Community; and (c) promotes the City Council Goals through the establishment of Development Code provisions that encourages investment in the growth and evolution of the City's economy and focuses City resources in commercial and residential neighborhoods; and

(2) The proposed Development Code Amendment would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City. The Development Code Amendment incorporates safeguards intended to ensure that the purposes of the Development Code are preserved; the project will not be contrary to or damage the public health, safety, convenience, or general welfare; the project will not result in any significant environmental impacts; and the project will be in full conformity with the Vision, City Council Priorities, and Policy Plan components of The Ontario Plan.

SECTION 6: ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the City Council hereby APPROVES the herein described changes that comprise the Development Code Amendment, and which are attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 8. ***Severability.*** If any section, sentence, clause or phrase of this Ordinance or the application thereof to any entity, person or circumstance is held for any reason to be invalid or unconstitutional, such invalidity or unconstitutionality shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause, or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses, or phrases be declared invalid or unconstitutional.

SECTION 9. ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 10. ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following adoption. The City Clerk shall post a certified copy of this Ordinance, including the vote for and against the same, in the Office of the City Clerk in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this _____ day of _____ 2025.

File No. PDCA24-004
2025 Development Code Amendment
For ADUs and JADUs

(Document to follow this page)

A. Purpose. The purpose of this Section is to allow and regulate accessory dwelling units (ADUs) and junior accessory dwelling units (JADUs) in compliance with Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code.

B. Effect of Conforming. An ADU or JADU that conforms to the standards in this Section will not be:

1. Deemed to be inconsistent with the City's general plan and zoning designation for the lot on which the ADU or JADU is located.

2. Deemed to exceed the allowable density for the lot on which the ADU or JADU is located.

3. Considered in the application of any local ordinance, policy, or program to limit residential growth.

4. Required to correct a nonconforming zoning condition, as defined in Subsection C.7, below. This does not prevent the City from enforcing compliance with applicable building standards in accordance with Health and Safety Code Section 17980.12.

C. Definitions. As used in this Section, the words or phrases listed below shall have the meanings thereafter specified:

1. Accessory Dwelling Unit (ADU). An attached or a detached residential dwelling unit that provides complete independent living facilities for one or more persons and is located on a lot with a proposed or existing primary residence. An accessory dwelling unit also includes the following:

a. An efficiency unit, as defined by HSC Section 17958.1; and

b. A manufactured home, as defined by HSC Section 18007.

2. Accessory Structure. A structure that is accessory and incidental to a dwelling located on the same lot.

3. Complete Independent Living Facilities. Permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family or multiple-family dwelling is or will be situated.

4. Efficiency Kitchen. A kitchen that includes each of the following:

a. A cooking facility with appliances.

b. A food preparation counter and storage cabinets that are of a reasonable size in relation to the JADU.

5. Junior Accessory Dwelling Unit (JADU). A residential unit that:

a. Is no more than 500 SF in size;

b. Is contained entirely within an existing or proposed single-family structure. An enclosed use within the residence, such as an attached garage, is considered to be a part of and contained within the single-family structure;

c. Includes its own separate sanitation facilities or shares sanitation facilities with the existing or proposed single-family structure;

d. If the unit does not include its own separate bathroom, then it contains an interior entrance to the main living area of the existing or proposed single-family structure in addition to an exterior entrance that is separate from the main entrance to the primary dwelling; and

e. It includes an efficiency kitchen, as defined in Subsection C.4, above.

6. Livable Space. A space in a dwelling intended for human habitation, including living, sleeping, eating, cooking, or sanitation.

7. Living Area. The interior habitable area of a dwelling unit, including basements and attics, but does not include a garage or any accessory structure.

8. Nonconforming Zoning Condition. A physical improvement on a property that does not conform with current zoning standards.

9. Passageway. A pathway that is unobstructed clear to the sky and extends from a street to one entrance of the ADU or JADU.

10. Proposed Dwelling. A dwelling that is the subject of a permit application and that meets the requirements for permitting.

11. Public Transit. A location, including but not limited to a bus stop or train station, where the public may access buses, trains, subways, and other forms of transportation that charge set fares, run on fixed routes, and are available to the public.

12. Tandem Parking. Two or more automobiles parked on a driveway or on any other location on a lot, lined up one behind the other.

D. Approvals. The following approvals apply to ADUs and JADUs under this Section:

1. Building Permit Only. If an ADU or JADU complies with each of the general requirements in subsection E below, it is allowed with only a building permit in the following scenarios:

a. *Converted on Single-Family Lot.* One ADU as described in this Subsection D.1.a and one JADU on a lot with a proposed or existing single-family dwelling on it, where the ADU or JADU:

(1) Is either: within the space of a proposed single-family dwelling; within the existing space of an existing single-family dwelling; or (in the case of and ADU only) within the existing space of an accessory structure, plus up to 150 additional SF if the expansion is limited to accommodating ingress and egress; and

(2) Has exterior access that is independent of that for the single-family dwelling; and

(3) Has side and rear setbacks sufficient for fire and safety, as dictated by applicable building and fire codes; and

(4) The JADU complies with the requirements of Government Code Sections 66333 through 66339.

b. *Limited Detached on Single-Family Lot.* One detached, new-construction ADU on a lot with a proposed or existing single-family dwelling (in addition to any JADU that might otherwise be established on the lot under Subsection D.1.a, above), if the detached ADU satisfies each of the following limitations:

(1) The side- and rear-yard setbacks are at least 4 FT; and

(2) The total floor area is 800 SF or smaller; and

(3) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

c. *Converted on Multiple-Family Lot.* One or more ADUs within portions of existing multiple-family dwelling structures that are not used as livable space, including but not limited to storage rooms, boiler rooms, passageways, attics, basements, or garages, if each converted ADU complies with state building standards for dwellings. Under this Subsection D.1.c, at least one converted ADU is allowed within an existing multiple-family dwelling, up to a quantity equal to 25 percent of the existing multiple-family dwelling units.

d. *Limited Detached on Multiple-Family Lot.* No more than two detached ADUs on a lot that has an existing or proposed multiple-family dwelling, or up to 8 detached ADUs on a lot with and existing multiple-family dwelling, if each detached ADU satisfies all of the following:

(1) The side- and rear-yard setbacks are at least 4 FT. If the existing multiple-family dwelling has a rear or side yard setback of less than 4 FT, the City shall not require any modification to the multiple-family dwelling as a condition of approving the ADU; and

(2) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

(3) If the lot has an existing multiple-family dwelling, the quantity of detached ADUs does not exceed the number of primary dwelling units on the lot.

2. Process and Timing.

a. An ADU permit is considered and approved ministerially, without discretionary review or a hearing.

b. The City must approve or deny an application to create an ADU or JADU within 60 days from the date that the City receives a completed application. If the City has not

approved or denied the completed application within 60 days, the application is deemed approved unless either:

(1) The applicant requests a delay, in which case the 60-day time period is tolled for the period of the requested delay, or

(2) When an application to create an ADU or JADU is submitted with a permit application to create a new single-family or multiple-family dwelling on the lot, the City may delay acting on the permit application for the ADU or JADU until the City acts on the permit application to create the new single-family or multiple-family dwelling, but the application to create the ADU or JADU will still be considered ministerially, without discretionary review or a hearing.

c. If the City denies application to create an ADU or JADU, the City must provide the applicant with comments that include, among other things, a list of all the defective or deficient items and a description of how the application may be remedied by the applicant. Notice of the denial and corresponding comments must be provided to the applicant within the 60-day time period established by Subsection D.3.b, above.

d. A demolition permit for a detached garage that is to be replaced with an ADU is reviewed with the application for the ADU and issued at the same time.

E. General ADU and JADU Requirements. The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above:

1. Zoning.

a. An ADU subject only to a building permit under Subsection D.1, above, may be created on a lot in a residential or mixed-use zoning district.

b. An ADU subject to an ADU permit under Subsection D.2, above, may be created on a lot that is zoned to allow single-family dwelling residential use or multiple-family dwelling residential use.

c. In accordance with Government Code section 66333(a), a JADU may only be created on a lot zoned for single-family residences.

2. Height.

a. Except as otherwise provided by Subsections E.2.b and E.2.c, below, a detached ADU created on a lot with an existing or proposed single-family or multiple-family dwelling unit may not exceed 16 FT in height.

b. A detached ADU may be up to 18 FT in height if it is created on a lot with an existing or proposed single-family or multiple-family dwelling unit that is located within one-half mile walking distance of a major transit stop or a high quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, and the ADU may be up to two additional feet in height (for a maximum of 20 FT) if necessary to accommodate a roof pitch on the ADU that is aligned with the roof pitch of the primary dwelling unit.

c. A detached ADU created on a lot with an existing or proposed multiple-family dwelling that has more than one story may not exceed 18 FT in height.

d. An ADU that is attached to the primary dwelling may not exceed 25 FT in height or the height limitation imposed by the underlying zone that applies to the primary dwelling, whichever is lower. Notwithstanding the foregoing, ADUs subject to this Subsection E.2.d may not exceed two stories.

e. For purposes of this Subsection E.2, height is measured from existing legal grade or the level of the lowest floor, whichever is lower, to the peak of the structure.

3. Fire Sprinklers.

a. Fire sprinklers are required in an ADU if sprinklers are required in the primary residence.

b. The construction of an ADU does not trigger a requirement for fire sprinklers to be installed in the existing primary dwelling.

4. Rental Term. No ADU or JADU may be rented for a term that is shorter than 30 days. This prohibition applies regardless of when the ADU or JADU was created.

5. No Separate Sale or Conveyance. An ADU or JADU may be rented, but, except as provided in Government Code section 66341, no ADU or JADU may be sold or otherwise conveyed separately from the lot and the primary dwelling (in the case of a single-family lot) or from the lot and all of the dwellings (in the case of a multiple-family lot).

6. Septic System. If the ADU or JADU will connect to an onsite wastewater-treatment system, the owner must include with the application a percolation test completed within the last 5 years or, if the percolation test has been recertified, within the last 10 years.

7. Owner Occupancy.

a. An ADU created under this section on or after January 1, 2020 are not subject to an owner-occupancy requirement.

b. As required by state law, all JADUs are subject to an owner-occupancy requirement. A natural person with legal or equitable title to the property must reside on the property, in either the primary dwelling or JADU, as the person's legal domicile and permanent residence. However, the owner-occupancy requirement in this Subsection E.7.b does not apply if the property is entirely owned by another governmental agency, land trust, or housing organization.

8. "Rent Reporting. In order to facilitate the City's obligation to identify adequate sites for housing in accordance with Government Code Sections 65583.1 and 66330, the following requirements must be satisfied:

a. With the building-permit application, the applicant must provide the City with an estimate of the projected annualized rent that will be charged for the ADU or JADU.

b. Within 90 days after each January 1 following issuance of the building permit, the owner must report the actual rent charged for the ADU or JADU during the prior year. If the City does not receive the report within the 90-day period, the owner is in violation of this Code, and the City may send the owner a notice of violation and allow the owner another 30

days to submit the report. If the owner fails to submit the report within the 30-day period, the City may enforce this provision in accordance with applicable law.

9. Building and Safety.

a. *Must Comply with Building Code.* Subject to Subsection E.10.b, below, all ADUs and JADUs must comply with all local building code requirements.

b. *No Change of Occupancy.* Construction of an ADU does not constitute a Group R occupancy change under the local building code, as described in Section 310 of the California Building Code, unless the building official or Community Improvement Division officer makes a written finding based on substantial evidence in the record that the construction of the ADU could have a specific, adverse impact on public health and safety. Nothing in this Subsection E.10.b prevents the City from changing the occupancy code of a space that was uninhabitable space or that was only permitted for nonresidential use and was subsequently converted for residential use in accordance with this Section.

F. Specific ADU Requirements. The following requirements apply only to ADUs that require an ADU permit under Subsection D.2, above.

1. Maximum Size.

a. The maximum size of a detached or attached ADU subject to this Subsection F is 850 SF for a studio or one-bedroom unit and 1,000 SF for a unit with two or more bedrooms.

b. An attached ADU that is created on a lot with an existing primary dwelling is further limited to 50 percent of the floor area of the existing primary dwelling.

c. Application of other development standards in this Subsection F, such as lot coverage, might further limit the size of the ADU, but no application of the percent-based size limit in Subsection F.1.b, above, or front setback, lot coverage limit, or open-space requirement may require the ADU to be less than 800 SF.

2. Building Setbacks.

a. Subject to Subsection F.1.c, above, an ADU that is subject to this Subsection F shall maintain a minimum front yard setback of 30 FT from arterial street rights-of-way and 20 FT from all collector and local street rights-of-way.

b. An ADU that is subject to this Subsection F must conform to 4-FT side yard and rear yard setbacks.

c. No setback is required for an ADU that is subject to this Subsection F if the ADU is constructed in the same location and to the same dimensions as an existing structure.

3. Lot Coverage. No ADU subject to this Subsection F may cause the total lot coverage of the lot to exceed the maximum lot coverages shown in the Tables below, subject to Subsection F.1.c, above.

Traditional Single-Family Residential Development Standards

Requirements	*Residential Zoning Districts*				
	AR-2	*RE-2*	*RE-4*	*LDR-5*	*MDR-11, MDR-18, MDR-25 & HDR-45*
Maximum Lot Coverage	30%	40%		50%	60%

Small Lot Traditional and Alley-Loaded Single-Family Residential Development Standards

Requirements	*Residential Zoning Districts*		
	LDR-5	*MDR-11*	*MDR-18, MDR-25 & HDR-45*
Maximum Lot Coverage	55%	60%	70%

Multiple-Family Residential Development Standards

Requirements	*Residential Zoning Districts*			
	MDR-11	*MDR-18*	*MDR-25*	*HDR- 45*
Maximum Project Coverage	60%			100%

4. Minimum Open Space. No ADU subject to this Subsection F may cause the total percentage of open space of the lot to fall below the minimum requirements specified below, subject to Subsection F.1.c, above.

a. *Small Lot Traditional and Alley-Loaded Development Projects, and Cluster Single-Family Development Projects.* Small lot traditional, small lot alley-loaded, and cluster single-family development projects that consist of more than 3 dwellings, shall devote a minimum of 20 percent of the project site to open space.

b. *Multiple-Family and Mixed-Use Development Projects.* Multiple-family development projects and the multiple-family residential portion of mixed-use development projects that consist of more than 3 dwellings, shall provide open space as follows:

Minimum Open Space Requirements for Multiple-Family and Mixed-Use Development Projects

Open Space Type	*Zoning Districts*		
	MDR-11 & MDR-18	*MDR-25*	*HDR-45*
Private Open Space	200 SF (40%)	150 SF (37.5%)	60 SF (20%)
Common Open Space	300 SF (60%)	250 SF (62.5%)	250 SF (80%)
Total Open Space	500 SF (100%)	400 SF (100%)	310 SF (100%)

5. Passageway. No passageway, as defined by Subsection C.9, above, is required for an ADU.

6. Off-Street Parking.

a. *Generally.* One off-street parking space is required for each ADU. The parking space may be provided in setback areas or as tandem parking, as defined by Subsection C.12, above.

b. *Exceptions.* No parking under Subsection F.7.a, above, is required in the following situations:

(1) The ADU is located within one-half mile walking distance of public transit, as defined in Subsection C.11, above.

(2) The ADU is located within an architecturally and historically significant historic district.

(3) The ADU is part of the proposed or existing primary residence, or an accessory structure under Subsection D.1.a, above.

(4) When on-street parking permits are required but not offered to the occupant of the ADU.

(5) When there is an established car share vehicle stop located within one block of the ADU.

(6) When the permit application to create an ADU is submitted with an application to create a new single-family or multiple-family dwelling on the same lot, provided that the ADU or the lot satisfies any other criteria listed in Subsections F.6.b(1) through F.6.b(5), above.

c. *No Replacement.* When a garage, carport, covered parking structure, or uncovered parking space is demolished in conjunction with the construction of an ADU or converted to an ADU, those off-street parking spaces are not required to be replaced.

7. Architectural Requirements.

a. The materials and colors of the exterior walls, roof, and windows and doors must match the appearance and architectural design of those of the primary dwelling.

b. The roof slope must match that of the dominant roof slope of the primary dwelling. The dominant roof slope is the slope shared by the largest portion of the roof.

c. The exterior lighting must be limited to down-lights or as otherwise required by the City's Building or Fire Code.

d. The ADU must have an independent exterior entrance, apart from that of the primary dwelling.

e. The interior horizontal dimensions of an ADU must be at least 10 FT wide in every direction, with a minimum interior wall height of 7 FT.

f. Windows and doors of the ADU may not have a direct line of sight to an adjoining residential property. Fencing, landscaping, or privacy glass may be used to provide screening and prevent a direct line-of-sight.

g. All windows and doors in an ADU are less than 30 FT from a property line that is not a public right-of-way line must either be (for windows) clerestory with the bottom of the glass at least 6 FT above the finished floor, or (for windows and for doors) utilize frosted or obscure glass.

8. Landscape Requirements. A Landscape Plan shall be submitted to the City, which provides for evergreen landscape screening, to include trees, shrubs, and groundcovers that shall be planted, permanently irrigated, and fully maintained, and which is located between an ADU and adjacent parcels, and where an ADU impacts a front yard and/or is subject to public views from a public or private street. Evergreen landscape screening shall be provided as follows:

a. Minimum 15-gallon size screening shrubs shall be installed at every 5 linear feet of exterior building wall. Alternatively, a 6-FT high decorative masonry block wall may be constructed.

b. ADUs created by garage conversion, which results in the removal of the garage door, shall provide a minimum 3-FT wide foundation landscape planter for the full length of the wall wherein the garage door was removed, which shall be fully landscaped and irrigated, and permanently maintained.

c. All landscaping must be drought tolerant and California friendly.

d. Landscape and irrigation plans shall be prepared and submitted to the City for review and approval.

9. Historical Protections. An ADU that is on or within 600 feet of real property that is listed in the California Register of Historic Resources must be located so as to not be visible from any public right-of-way.

G. Fees. The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above.

1. Impact Fees.

a. No impact fee is required for an ADU that is less than 750 SF in size. For the purposes of this Subsection G.1, the term "impact fee" means a "fee" under the Mitigation Fee Act (Government Code Section 66000(b)) and a fee under the Quimby Act (Government Code Section 66477). "Impact fee" as used in this Section, does not include any connection fee or capacity charge for water or sewer service.

b. Any impact fee that is required for an ADU that is 750 SF or larger in size must be charged proportionately in relation to the square footage of the primary dwelling unit (e.g., the floor area of the ADU, divided by the floor area of the primary dwelling, times the typical fee amount charged for a new dwelling.)

2. Utility Fees.

a. If an ADU is constructed with a new single-family home, a separate utility connection directly between the ADU and the utility and payment of the normal connection fee and capacity charge for a new dwelling are required.

b. Except as described in Subsection G.2.a, converted ADUs on a single-family lot that are created under Subsection D.1.a above are not required to have a new or separate utility connection directly between the ADU and the utility. Nor is a connection fee or capacity charge required.

c. Except as described in Subsection G.2.a, all ADUs that are not covered by Subsection G.2.b require a new, separate utility connection directly between the ADU and the utility for any utility that is provided by the city. All utilities that are not provided by the city are subject to the connection and fee requirements of the utility provider.

(1) The connection is subject to a connection fee or capacity charge that is proportionate to the burden created by the ADU based on either the floor area or the number of drainage-fixture units (DFU) values, as defined by the Uniform Plumbing Code, upon the water or sewer system.

(2) The portion of the fee or charge that is charged by the city may not exceed the reasonable cost of providing this service.

H. Nonconforming Zoning Code Conditions, Building Code Violations, and Unpermitted Structures.

1. Generally. The City will not deny an ADU or JADU application due to a nonconforming zoning condition, building code violation, or unpermitted structure on the lot that does not present a threat to the public health and safety and that is not affected by the construction of the ADU or JADU.

2. Unpermitted ADUs constructed before 2020.

a. *Permit to Legalize.* As required by state law, the City may not deny a permit to legalize an existing, but unpermitted ADU or JADU that was constructed before January 1, 2020, if denial is based on either of the following grounds:

(1) The ADU or JADU violates applicable building standards; or

(2) The ADU or JADU does not comply with state ADU or JADU law or this ADU ordinance (Section 5.03.010).

b. *Exceptions.*

(1) Notwithstanding Subsection H.2.a, above the City may deny a permit to legalize an existing but unpermitted ADU or JADU that was constructed before January 1, 2020, if the City makes a finding that correcting a violation is necessary to comply with the standards specified in California Health and Safety Code section 17920.3.

(2) Subsection H.2.a, above does not apply to a building that is deemed to be substandard in accordance with California Health and Safety Code Section 17920.3.

I. Nonconforming ADUs and Discretionary Approval. Any proposed ADU or JADU that would otherwise be allowed under this section but that does not conform to the objective design or development standards set forth in Subsections A through H of this Section may be allowed by the City, subject to a Conditional Use Permit issued in accordance with the other provisions of this Development Code.

5.03.000: Purpose

The purpose of this Division is to provide operating, site planning and/or development standards for certain land uses allowed by Division 5.02 (Land Use) of this Development Code, and for activities and facilities that require special standards to mitigate their potential adverse impacts, thereby assuring a land use, activity, and/or facility of stable and desirable character, which is compatible with existing and future development and land uses in the vicinity, and protects the use and enjoyment of neighboring properties consistent with goals and policies of The Ontario Plan.

5.03.005: Applicability

A. The land uses, activities and facilities addressed by this Division shall be located in compliance with Division 5.02 (Land Use) of this Development Code.

B. The standards for specific uses, activities and facilities established by this Division shall supplement, and are required in addition to, the applicable development and subdivision regulations contained in Chapter 6.0 (Development and Subdivision Regulations) of this Development Code.

C. Each and every physical improvement required to be installed or constructed in conjunction with the establishment of a land use, activity or facility addressed by this Division, shall be completed prior to the commencement of the land use.

5.03.010: Accessory Dwelling Units

A. **Purpose.** The purpose of this Section is to allow and regulate accessory dwelling units (ADUs) and junior accessory dwelling units (JADUs) in compliance with Article 2 of Chapter 13 of Division 1 of Title 7 of the California Government Code ~~Sections 65852.2 and 65852.22~~.

B. **Effect of Conforming.** An ADU or JADU that conforms to the standards in this Section will not be:

1. Deemed to be inconsistent with the City's general plan and zoning designation for the lot on which the ADU or JADU is located.

2. Deemed to exceed the allowable density for the lot on which the ADU or JADU is located.

3. Considered in the application of any local ordinance, policy, or program to limit residential growth.

4. Required to correct a nonconforming zoning condition, as defined in Subsection C.7, below. This does not prevent the City from enforcing compliance with applicable building standards in accordance with Health and Safety Code Section 17980.12.

C. **Definitions.** As used in this Section, the words or phrases listed below shall have the meanings thereafter specified:

1. Accessory Dwelling Unit (ADU). An attached or a detached residential dwelling unit that provides complete independent living facilities for one or more persons and is located on a lot with a proposed or existing primary residence. An accessory dwelling unit also includes the following:

a. An efficiency unit, as defined by HSC Section 17958.1; and

b. A manufactured home, as defined by HSC Section 18007.

2. Accessory Structure. A structure that is accessory and incidental to a dwelling located on the same lot.

3. Complete Independent Living Facilities. Permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the single-family or multiple-family dwelling is or will be situated.

4. Efficiency Kitchen. A kitchen that includes each of the following:

a. A cooking facility with appliances.

b. A food preparation counter and storage cabinets that are of a reasonable size in relation to the JADU.

5. Junior Accessory Dwelling Unit (JADU). A residential unit that:

a. Is no more than 500 SF in size;

b. Is contained entirely within an existing or proposed single-family structure. An enclosed use within the residence, such as an attached garage, is considered to be a part of and contained within the single-family structure;

c. Includes its own separate sanitation facilities or shares sanitation facilities with the existing or proposed single-family structure;

d. If the unit does not include its own separate bathroom, then it contains an interior entrance to the main living area of the existing or proposed single-family structure in addition to an exterior entrance that is separate from the main entrance to the primary dwelling; and

e. It includes an efficiency kitchen, as defined in Subsection C.4, above.

6. Livable Space. A space in a dwelling intended for human habitation, including living, sleeping, eating, cooking, or sanitation.

~~6.~~7. Living Area. The interior habitable area of a dwelling unit, including basements and attics, but does not include a garage or any accessory structure.

~~7.~~8. Nonconforming Zoning Condition. A physical improvement on a property that does not conform with current zoning standards.

~~8.~~9. Passageway. A pathway that is unobstructed clear to the sky and extends from a street to one entrance of the ADU or JADU.

~~9.~~10. Proposed Dwelling. A dwelling that is the subject of a permit application and that meets the requirements for permitting.

~~10.~~11. Public Transit. A location, including but not limited to a bus stop or train station, where the public may access buses, trains, subways, and other forms of transportation that charge set fares, run on fixed routes, and are available to the public.

~~11.~~12. Tandem Parking. Two or more automobiles parked on a driveway or on any other location on a lot, lined up one behind the other.

D. Approvals. The following approvals apply to ADUs and JADUs under this Section:

1. Building Permit Only. If an ADU or JADU complies with each of the general requirements in subsection E below, it is allowed with only a building permit in the following scenarios:

a. *Converted on Single-Family Lot.* One ADU as described in this Subsection D.1.a and one JADU on a lot with a proposed or existing single-family dwelling on it, where the ADU or JADU:

(1) Is either: within the space of a proposed single-family dwelling; within the existing space of an existing single-family dwelling;~~,~~ or (in the case of and ADU only) within the existing space of an accessory structure, plus up to 150 additional SF if the expansion is limited to accommodating ingress and egress; and

(2) Has exterior access that is independent of that for the single-family dwelling; and

(3) Has side and rear setbacks sufficient for fire and safety, as dictated by applicable building and fire codes; and

(4) The JADU complies with the requirements of Government Code Sections ~~65852.22~~66333 through 66339.

b. *Limited Detached on Single-Family Lot.* One detached, new-construction ADU on a lot with a proposed or existing single-family dwelling (in addition to any JADU that might otherwise be established on the lot under Subsection D.1.a, above), if the detached ADU satisfies each of the following limitations:

(1) The side- and rear-yard setbacks are at least 4 FT; and

(2) The total floor area is 800 SF or smaller; and

(3) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

c. *Converted on Multiple-Family Lot.* One or more ADUs within portions of existing multiple-family dwelling structures that are not used as livable space, including but not limited to storage rooms, boiler rooms, passageways, attics, basements, or garages, if each converted ADU complies with state building standards for dwellings. Under this Subsection D.1.c,

at least one converted ADU is allowed within an existing multiple-family dwelling, up to a quantity equal to 25 percent of the existing multiple-family dwelling units.

d. *Limited Detached on Multiple-Family Lot.* No more than two detached ADUs on a lot ~~that has an existing or~~with a proposed multiple-family dwelling, or up to 8 detached ADUs on a lot with and existing multiple-family dwelling, if each detached ADU satisfies ~~both~~all of the following ~~limitations~~:

(1) The side- and rear-yard setbacks are at least 4 FT. If the existing multiple-family dwelling has a rear or side yard setback of less than 4 FT, the City shall not require any modification to the multiple-family dwelling as a condition of approving the ADU; and

(2) The peak height above grade does not exceed the applicable height limit provided in Subsection E.2, below.

~~(2)~~**(3)** If the lot has an existing multiple-family dwelling, the quantity of detached ADUs does not exceed the number of primary dwelling units on the lot.

2. Process and Timing.

a. The City must approve or deny an application to create an ADU or JADU within 60 days from the date that the City receives a completed application. If the City has not approved or denied the completed application within 60 days, the application is deemed approved unless either:

(1) The applicant requests a delay, in which case the 60-day time period is tolled for the period of the requested delay, or

(2) When an application to create an ADU or JADU is submitted with a permit application to create a new single-family or multiple-family dwelling on the lot, the City may delay acting on the permit application for the ADU or JADU until the City acts on the permit application to create the new single-family or multiple-family dwelling, but the application to create the ADU or JADU will still be considered ministerially, without discretionary review or a hearing.

b. If the City denies application to create an ADU or JADU, the City must provide the applicant with comments that include, among other things, a list of all the defective or deficient items and a description of how the application may be remedied by the applicant. Notice of the denial and corresponding comments must be provided to the applicant within the 60-day time period established by Subsection D.3.b, above.

c. A demolition permit for a detached garage that is to be replaced with an ADU is reviewed with the application for the ADU and issued at the same time.

E. General ADU and JADU Requirements. The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above:

1. Zoning.

a. An ADU ~~or JADU~~ subject only to a building permit under Subsection D.1, above, may be created on a lot in a residential or mixed-use zoning district.

b. An ADU ~~or JADU~~ subject to ~~an ADU permit under~~ Subsection D.2, above, may be created on a lot that is zoned to allow single-family dwelling residential use or multiple-family dwelling residential use.

~~b.~~**c.** In accordance with Government Code section 66333(a), a JADU may only be created on a lot zoned for single-family residences.

2. Height.

a. Except as otherwise provided by Subsections E.2.b and E.2.c, below, a detached ADU created on a lot with an existing or proposed single-family or multiple-family dwelling unit may not exceed 16 FT in height.

b. A detached ADU may be up to 18 FT in height if it is created on a lot with an existing or proposed single-family or multiple-family dwelling unit that is located within one-half mile walking distance of a major transit stop or a high quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, and the ADU may be up to two additional feet in height (for a maximum of 20 FT) if necessary to accommodate a roof pitch on the ADU that is aligned with the roof pitch of the primary dwelling unit.

c. A detached ADU created on a lot with an existing or proposed multiple-family dwelling that has more than one story may not exceed 18 FT in height.

d. An ADU that is attached to the primary dwelling may not exceed 25 FT in height or the height limitation imposed by the underlying zone that applies to the primary dwelling, whichever is lower. Notwithstanding the foregoing, ADUs subject to this Subsection E.2.d may not exceed two stories.

e. For purposes of this Ssubsection E.2, height is measured from existing legal grade or the level of the lowest floor, whichever is lower, to the peak of the structure.

3. Fire Sprinklers.

a. Fire sprinklers are required in an ADU if sprinklers are required in the primary residence.

b. The construction of an ADU does not trigger a requirement for fire sprinklers to be installed in the existing primary dwelling.

4. Rental Term. No ADU or JADU may be rented for a term that is shorter than 30 days. This prohibition applies regardless of when the ADU or JADU was created.

5. No Separate Sale or Conveyance. An ADU or JADU may be rented, ~~; however~~ but, except as provided in Government Code section 66341, no ADU or JADU may be sold or otherwise conveyed separately from the lot and the primary dwelling (in the case of a single-family lot) or from the lot and all of the dwellings (in the case of a multiple-family lot) ~~, except as otherwise provided in Government Code Section 65852.26~~.

6. Septic System. If the ADU or JADU will connect to an onsite wastewater-treatment system, the owner must include with the application a percolation test completed within the last 5 years or, if the percolation test has been recertified, within the last 10 years.

7. Owner Occupancy.

a. An ADU created under this section on orpermitted after January 1, 2020~~, but before January 1, 2025, is~~ are not subject to an~~the~~ owner-occupancy requirement ~~that was in place when the ADU was created~~.

~~**b.** Unless applicable law requires otherwise, all ADUs that are permitted on or after January 1, 2025 are subject to an owner-occupancy requirement. A natural person with legal or equitable title to the property must reside on the property as the person's legal domicile and permanent residence.~~

~~c.~~b. As required by state law, all JADUs are subject to an owner-occupancy requirement. A natural person with legal or equitable title to the property must reside on the property, in either the primary dwelling or JADU, as the person's legal domicile and permanent residence. However, the owner-occupancy requirement in this Subsection E.7.b~~c~~ does not apply if the property is entirely owned by another governmental agency, land trust, or housing organization.

8. "RentIncome Reporting. In order to facilitate the City's obligation to identify adequate sites for housing in accordance with Government Code Sections 65583.1 and 6633065852.2, the following requirements must be satisfied:

a. With the building-permit application, the applicant must provide the City with an estimate of the projected annualized rent that will be charged for the ADU or JADU.

b. Within 90 days after each January 1 ~~yearly anniversary of the~~following issuance of the building permit, the owner must report the actual rent charged for the ADU or JADU during the prior year. If the City does not receive the report within the 90-day period, the owner is in violation of this Code, and the City may send the owner a notice of violation and allow the owner another 30 days to submit the report. If the owner fails to submit the report within the 30-day period, the City may enforce this provision in accordance with applicable law.

9. Building and Safety.

a. *Must Comply with Building Code.* Subject to Subsection E.10.b, below, all ADUs and JADUs must comply with all local building code requirements.

b. *No Change of Occupancy.* Construction of an ADU does not constitute a Group R occupancy change under the local building code, as described in Section 310 of the California Building Code, unless the building official or Community Improvement~~Code Enforcement~~ Division officer makes a written finding based on substantial evidence in the record that the construction of the ADU could have a specific, adverse impact on public health and safety. Nothing in this Subsection E.10.b prevents the City from changing the occupancy code of a space that was uninhabitable space or that was only permitted for nonresidential use and was subsequently converted for residential use in accordance with this Section.

F. Specific ADU Requirements. The following requirements apply only to ADUs that require an ADU permit under Subsection D.2, above.

1. Maximum Size.

a. The maximum size of a detached or attached ADU subject to this Subsection F is 850 SF for a studio or one-bedroom unit and 1,000 SF for a unit with two or more bedrooms.

b. An attached ADU that is created on a lot with an existing primary dwelling is further limited to 50 percent of the floor area of the existing primary dwelling.

c. Application of other development standards in this Subsection F, such as lot coverage, might further limit the size of the ADU, but~~; nevertheless,~~ no application of the percent-based size limit in Subsection F.1.b, above, or front setback, lot coverage limit, or open-space requirement may require the ADU to be less than 800 SF.

2. Building Setbacks.

a. Subject to Subsection F.1.c, above, an ADU that is subject to this Subsection F shall maintain a minimum front yard setback of 30 FT from arterial street rights-of-way and 20 FT from all collector and local street rights-of-way.

b. An ADU that is subject to this Subsection F must conform to 4-FT side yard and rear yard setbacks.

c. No setback is required for an ADU that is subject to this Subsection F if the ADU is constructed in the same location and to the same dimensions as an existing structure.

3. Lot Coverage. No ADU subject to this Subsection F may cause the total lot coverage of the lot to exceed the maximum lot coverages shown in the Tables below, subject to Subsection F.1.c, above.

Traditional Single-Family Residential Development Standards

Requirements	*Residential Zoning Districts*				
	AR-2	*RE-2*	*RE-4*	*LDR-5*	*MDR-11, MDR-18, MDR-25 & HDR-45*
Maximum Lot Coverage	30%	40%		50%	60%

Small Lot Traditional and Alley-Loaded Single-Family Residential Development Standards

Requirements	*Residential Zoning Districts*		
	LDR-5	*MDR-11*	*MDR-18, MDR-25 & HDR-45*
Maximum Lot Coverage	55%	60%	70%

Multiple-Family Residential Development Standards

Requirements	*Residential Zoning Districts*			
	MDR-11	*MDR-18*	*MDR-25*	*HDR- 45*
Maximum Project Coverage	60%			100%

4. Minimum Open Space. No ADU subject to this Subsection F may cause the total percentage of open space of the lot to fall below the minimum requirements specified below, subject to Subsection F.1.c, above.

a. *Small Lot Traditional and Alley-Loaded Development Projects, and Cluster Single-Family Development Projects.* Small lot traditional, small lot alley-loaded, and cluster single-family development projects that consist of more than 3 dwellings, shall devote a minimum of 20 percent of the project site to open space.

b. *Multiple-Family and Mixed-Use Development Projects.* Multiple-family development projects and the multiple-family residential portion of mixed-use development projects that consist of more than 3 dwellings, shall provide open space as follows:

Minimum Open Space Requirements for Multiple-Family and Mixed-Use Development Projects

Open Space Type	Zoning Districts		
	MDR-11 & MDR-18	MDR-25	HDR-45
Private Open Space	200 SF (40%)	150 SF (37.5%)	60 SF (20%)
Common Open Space	300 SF (60%)	250 SF (62.5%)	250 SF (80%)
Total Open Space	500 SF (100%)	400 SF (100%)	310 SF (100%)

5. Passageway. No passageway, as defined by Subsection C.~~8~~9, above, is required for an ADU.

6. Off-Street Parking.

a. *Generally.* One off-street parking space is required for each ADU. The parking space may be provided in setback areas or as tandem parking, as defined by Subsection C.~~11~~12, above.

b. *Exceptions.* No parking under Subsection F.7.a, above, is required in the following situations:

(1) The ADU is located within one-half mile walking distance of public transit, as defined in Subsection C.~~10~~11, above.

(2) The ADU is located within an architecturally and historically significant historic district.

(3) The ADU is part of the proposed or existing primary residence, or an accessory structure under Subsection D.1.a, above.

(4) When on-street parking permits are required but not offered to the occupant of the ADU.

(5) When there is an established car share vehicle stop located within one block of the ADU.

(6) When the permit application to create an ADU is submitted with an application to create a new single-family or multiple-family dwelling on the same lot, provided that the ADU or the lot satisfies any other criteria listed in Subsections F.6.b(1) through F.6.b(5), above.

c. *No Replacement.* When a garage, carport, ~~or~~ covered parking structure, or uncovered parking space is demolished in conjunction with the construction of an ADU or converted to an ADU, those off-street parking spaces are not required to be replaced.

7. Architectural Requirements.

a. The materials and colors of the exterior walls, roof, and windows and doors must match the appearance and architectural design of those of the primary dwelling.

b. The roof slope must match that of the dominant roof slope of the primary dwelling. The dominant roof slope is the slope shared by the largest portion of the roof.

c. The exterior lighting must be limited to down-lights or as otherwise required by the City's Building or Fire Code.

d. The ADU must have an independent exterior entrance, apart from that of the primary dwelling.

e. The interior horizontal dimensions of an ADU must be at least 10 FT wide in every direction, with a minimum interior wall height of 7 FT.

f. Windows and doors of the ADU may not have a direct line of sight to an adjoining residential property. Fencing, landscaping, or privacy glass may be used to provide screening and prevent a direct line-of-sight.

g. All windows and doors in an ADU are less than 30 FT from a property line that is not a public right-of-way line must either be (for windows) clerestory with the bottom of the glass at least 6 FT above the finished floor, or (for windows and for doors) utilize frosted or obscure glass.

8. Landscape Requirements. A Landscape Plan shall be submitted to the City, which provides for evergreen landscape screening, to include trees, shrubs, and groundcovers that shall be planted, permanently irrigated, and fully maintained, and which is located between an ADU and adjacent parcels, and where an ADU impacts a front yard and/or is subject to public views from a public or private street. Evergreen landscape screening shall be provided as follows:

a. Minimum 15-gallon size screening shrubs shall be installed at every 5 linear feet of exterior building wall. Alternatively, a 6-FT high decorative masonry block wall may be constructed.

b. ADUs created by garage conversion, which results in the removal of the garage door, shall provide a minimum 3-FT wide foundation landscape planter for the full length of the wall wherein the garage door was removed, which shall be fully landscaped and irrigated, and permanently maintained.

c. All landscaping must be drought tolerant and California friendly.

d. Landscape and irrigation plans shall be prepared and submitted to the City for review and approval.

9. Historical Protections. An ADU that is on or within 600 feet of real property that is listed in the California Register of Historic Resources must be located so as to not be visible from any public right-of-way.

G. Fees. The following requirements apply to all ADUs and JADUs that are approved under Subsections D.1 or D.2, above.

1. Impact Fees.

a. No impact fee is required for an ADU that is less than 750 SF in size. For the purposes of this Subsection G.1, the term "impact fee" means a "fee" under the Mitigation Fee Act (Government Code Section 66000(b)) and a fee under the Quimby Act (Government Code Section 66477). "Impact fee" as used in this Section, does not include any connection fee or capacity charge for water or sewer service.

b. Any impact fee that is required for an ADU that is 750 SF or larger in size must be charged proportionately in relation to the square footage of the primary dwelling unit (e.g., the floor area of the ADU, divided by the floor area of the primary dwelling, times the typical fee amount charged for a new dwelling.)

2. Utility Fees.

a. If an ADU is constructed with a new single-family home, a separate utility connection directly between the ADU and the utility and payment of the normal connection fee and capacity charge for a new dwelling are required~~ADUs and JADUs shall not be required to have a new or separate utility connection directly between the ADU or JADU and the utility, nor shall a connection fee or capacity charge be required~~.

b. Except as described in Subsection G.2.a, converted ADUs on a single-family lot that are created under Subsection D.1.a above are not required to have a new or separate utility connection directly between the ADU and the utility. Nor is a connection fee or capacity charge required.

c. Except as described in Subsection G.2.a, all ADUs that are not covered by Subsection G.2.b require a new, separate utility connection directly between the ADU and the utility for any utility that is provided by the city. All utilities that are not provided by the city are subject to the connection and fee requirements of the utility provider.

(1) The connection is subject to a connection fee or capacity charge that is proportionate to the burden created by the ADU based on either the floor area or the number of drainage-fixture units (DFU) values, as defined by the Uniform Plumbing Code, upon the water or sewer system.

~~(1)~~**(2)** The portion of the fee or charge that is charged by the city may not exceed the reasonable cost of providing this service.

H. Nonconforming Zoning Code Conditions, Building Code Violations, and Unpermitted Structures.

1. Generally. The City will not deny an ADU or JADU application due to a nonconforming zoning condition, building code violation, or unpermitted structure on the lot that

does not present a threat to the public health and safety and that is not affected by the construction of the ADU or JADU.

2. Unpermitted ADUs constructed before 20202018.

a. *Permit to Legalize.* As required by state law, the City may not deny a permit to legalize an existing, but unpermitted ADU or JADU that was constructed before January 1, 20202018, if denial is based on either of the following grounds:

(1) The ADU or JADU violates applicable building standards; or

(2) The ADU or JADU does not comply with state ADU or JADU law ~~(Government Code Section 65852.2)~~ or this ADU ordinance (Section 5.03.010).

b. *Exceptions.*

(1) Notwithstanding Subsection H.2.a, above the City may deny a permit to legalize an existing but unpermitted ADU or JADU that was constructed before January -1, 20202018, if the City makes a finding that correcting a violation is necessary to ~~protect the health and safety of the public or of occupants of the structure~~comply with the standards specified in California Health and Safety Code section 17920.3.

(2) Subsection H.2.a, above does not apply to a building that is deemed to be substandard in accordance with California Health and Safety Code Section 17920.3.

I. Nonconforming ADUs and Discretionary Approval. Any proposed ADU or JADU that would otherwise be allowed under this section but that does not conform to the objective design or development standards set forth in Subsections A through H of this Section may be allowed by the City, subject to a Conditional Use Permit issued in accordance with the other provisions of this Development Code.

5.03.011: Accessory Residential Structures

A. Purpose. The purpose of this Section is to establish standards for the construction and use of Accessory Residential Structures (other than Accessory Dwelling Units allowed pursuant to Section 5.03.010 of this Development Code) in conjunction with existing single-family dwellings located within single-family or multiple-family zoning districts. (Note: The construction and use of Accessory Residential Structures in conjunction with existing multiple-family dwellings shall be subject to the development standards applicable to the primary multiple-family dwellings.)

B. Applicability. For purposes of this Section, the herein established development standards shall apply to Accessory Residential Structures such as garages, carports, guesthouses, storage sheds, pool houses, recreation rooms, etc., which are incidental or subordinate to the primary dwelling.

C. Definitions. As used in this Section, the words or phrases listed below shall have the meanings thereafter specified:

CITY OF ONTARIO *Agenda Report* **March 18, 2025**	**SECTION:** **PUBLIC HEARINGS**
Department: Development Administration Prepared By: Pablo De Lara Staff Member Presenting: Rudy Zeledon, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 19

SUBJECT: **A PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE APPROVING A DEVELOPMENT AGREEMENT (FILE NO. PDA22-004) BETWEEN THE CITY OF ONTARIO AND ROSEVILLE INVESTMENTS, LLC AND AMERICAN SUPERIOR LAND, LLC.**

RECOMMENDATION: That the City Council introduce and waive further reading of an Ordinance Approving a Development Agreement (File No. PDA22-004) between the City of Ontario and Roseville Investments, LLC and American Superior Land, LLC.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: There is not a direct fiscal impact associated with this action. The Development Agreement will provide funding from the formation of a Community Facilities District (CFD) for City services and facilities required to support the Rich-Haven Specific Plan (Specific Plan) development, thereby mitigating the increased costs associated with such services. In addition, the City will receive development impact, compliance processing, licensing, and permitting fees. No General Fund revenue will be used to support the Ontario Ranch development.

BACKGROUND & ANALYSIS: The Ontario Ranch Financial commitments required for construction of properties within a specific plan are substantial. Therefore, to adequately forecast these costs and gain assurance that the Project may proceed under the existing policies, rules, and regulations, Richland Developers Inc., Roseville Investments, LLC and American Superior Land, LLC (collectively the "Applicant" or "Owner"), has requested that the City enter into negotiations to create a Development Agreement (Agreement).

The Agreement proposes to include 106.1 gross acres of land within Planning Areas 1A, 1B, and 1C land use districts of the Rich-Haven Specific Plan, as shown on the attached Exhibit A. The Agreement grants the Applicant a vested right to develop Tentative Tract Map 20526 (the Map), provided that the Owner complies with the terms and conditions of the Specific Plan and related EIR.

The Map (see attached Exhibit B) is located at the southwest corner of Haven Avenue and Riverside Drive. It proposes to subdivide 106.1 gross acres of land into 12 numbered lots and 10 lettered lots for residential uses, a public school, private drives, landscape edges, and common open space purposes.
